This Prospectus Supplement filed pursuant to Rule 424(b)(3)

Registration No. 333-107977

PROSPECTUS SUPPLEMENT

This is a Supplement, dated March 12, 2004 to the Prospectus (the "Prospectus") which forms a part of the Post-Effective Amendment No. 1 to the Form S-3 Registration Statement (No. 333-107977) filed on November 14, 2003 on behalf of Celgene Corporation (the "Company").

The Company originally issued the notes to which this Prospectus Supplement relates in a private placement in June 2003. The notes were sold by the initial purchaser of the notes in a transaction exempt from the registration requirements of the Securities Act to persons reasonably believed by the initial purchaser to be qualified institutional buyers as defined by Rule 144A under the Securities Act.

The following table sets forth information with respect to the selling securityholders and the principal amount of notes beneficially owned by each selling securityholder that may be offered pursuant to the Prospectus. The information is based on information provided by or on behalf of the selling securityholders. The selling securityholders may offer all, some or none of the notes or the common stock into which the notes are convertible. Because the selling securityholders may offer all or some portion of the notes or the common stock, the Company cannot estimate the amount of the notes or the common stock that will be held by the selling securityholders upon termination of any of these sales. In addition, the selling securityholders identified below may have sold, transferred or otherwise disposed of all or a portion of their notes since the date on which they provided the information regarding their notes in transactions exempt from the registration requirements of the Securities Act, therefore, the information provided herein for any particular securityholder may overstate such securityholder's current ownership. The percentage of notes outstanding beneficially owned by each selling securityholder is based on \$400,000,000 aggregate principal amount of notes outstanding.

The number of shares of common stock issuable upon conversion of the notes shown in the table below assumes conversion of the full amount of notes held by each selling securityholder at an initial conversion rate of 20.6398 shares per \$1,000 principal amount of notes and a cash payment in lieu of any fractional shares. No selling securityholder named in the table below beneficially owns one percent or more of our common stock, based on 81,237,008 shares of common stock outstanding on February 27, 2004.
