Results of Operations

Three and Nine Months Ended March 31, 2005 versus Three and Nine Months Ended March 31, 2004

We incurred a net loss of \$632,259 for the three months ended March 31, 2005, as compared to a net loss of \$1,508,212 for the three months ended March 31, 2004 due to the following:

For the three months ended March 31, 2005, the Company incurred total research and development costs of \$124,784 compared to \$244,856 for the three months ended March 31, 2004. Research and development expenses have been reduced during the three months ended March 31, 2005 as a result of a decrease in the number of employees and consultants that were employed or that performed services during the quarter. Research and development expenses consist of engineering and project management salaries; consulting expenses, prototype equipment costs and travel related expenses. All expenses incurred during the research and development stage are expensed as incurred.

General and administrative decreased approximately 32 percent, from \$403,983 for the three months ended March 31, 2004, to \$275,540 for the three months ended March 31, 2005. General and administrative costs incurred in the Sarasota, Florida and Seattle, Washington operations consist mainly of salaries, travel and professional fees related to the development of our new business opportunities.

Stock based compensation for the three months ended March 31, 2005 decreased from \$945,963 for the three months ended March 31, 2004 to \$225,718 for the three months ended March 31, 2005. The reduction is a result of not entering into agreements to compensate financial consultants in the three months ended March 31, 2005.

For the three months ended March 31, 2005, our Costa Rican operations generated revenues of \$13,519 and operating expenses of \$16,330, resulting in an operating loss of \$2,811. As discussed in note 6 to the financial statements, the Costa Rican operations were sold effective April 21, 2005.

The net loss of \$1,808,924 for the nine months ended March 31, 2005 is comparable to the net loss of \$2,660,657 for the nine months ended March 31, 2004. Overall general and administrative expenses increased while stock based consulting fees decreased approximately \$1,125,000.

For the nine months ended March 31, 2005, the Company incurred total research and development costs of \$543,776 compared to \$566,326 for the nine months ended March 31, 2004. Research and development expenses consist of engineering and project management salaries; consulting expenses, prototype equipment costs and travel related expenses. All expenses incurred during the research and development stage are expensed as incurred.

General and administrative increased approximately 10.7 percent, from \$837,089 for the nine months ended March 31, 2004, to \$ 926,257 for the nine months ended March 31, 2005. General and administrative costs incurred in the Sarasota, Florida and Seattle, Washington operations consist mainly of salaries, travel and professional fees related to the development of our new business opportunities.

Stock based compensation, consulting for the nine months ended March 31, 2005 decreased 82.4 percent from \$1,177,463 for the nine months ended March 31, 2004 to \$ 207,218 for the nine months ended March 31, 2005.

For the nine months ended March 31 2005, our Costa Rican operations generated revenues of \$31,145 and operating expenses of \$44,456, resulting in an operating loss of \$13,311.

Liquidity and Capital Resources

We have current assets of \$125,705 (including \$78,733 in cash) compared with current liabilities of \$1,855,957, resulting in a working capital deficit of \$1,730,252 as of March 31, 2005. Our auditors have questioned our ability to continue as a going concern in our June 30, 2004 annual audited financial statements due to our significant operating losses incurred since inception and our working capital deficit. We rely on loans and private sales of equity to maintain liquidity. Our capital resources include private stock sales and cash advances from principal shareholders.

Our cash balance increased \$56,021 from \$22,712 at June 30, 2004 to \$78,733 as of March 31, 2005. The increase was the result of a combination of cash proceeds from note payable, joint venture partner and common stock sales totaling \$682,965, offset by cash used for the purchase of equipment of \$28,434 and negative cash flows from operations of \$598,510. Negative cash flows from operations consisted primarily of our \$1,808,924 net loss, offset by stock-based compensation of \$442,618, and an increase in accounts payable and accruals of \$ 316,580.

Until we establish profitable operations, our sources of liquidity will continue to be shareholder loans and common stock sales. Our internet service provider operations incurred a net loss of approximately \$6500 during the nine months ended March 31, 2005 and are not expected to provide operating cash in the foreseeable future.

The Company's future success will be dependent upon its ability to create and provide effective and competitive automatic vehicle location services and the Company's ability to develop and provide new services that meet customers changing requirements; including the effective use of leading technologies to continue to enhance its current services and to influence and respond to emerging industry standards and other technological changes on a timely and cost-effective basis. There can be no assurance that we will achieve these goals.

On October 15, 2004, the Board of Directors approved the issuance of convertible debentures to an officer, three directors and the company's outside counsel to convert amounts owed to them into common stock at the market price of \$0.10 and \$0.08 when the debenture was approved. The debentures are convertible at the option of the officer, director or outside counsel. The total debt that may be converted is \$709,798. If all the debt is converted, an additional 8,066,582 shares would be issued.
