(17 CFR 240.13e-4(c))

---

**Item 8.01. Other Events**

OGE Energy Corp. (the Company) is the parent company of Oklahoma Gas and Electric Company (OG&E), a regulated electric utility with approximately 759,000 customers in Oklahoma and western Arkansas, and Enogex Inc. and its subsidiaries (Enogex), a natural gas pipeline business with principal operations in Oklahoma and Texas.

On October 11, 2007, OG&E announced that each of the parties in the proposed construction of the 950 megawatt Red Rock generating unit has agreed to terminate agreements to build and operate the plant. This announcement followed the Oklahoma Corporation Commission's (OCC) issuance of an order on October 11, 2007 verifying the OCC's verbal decision in September to deny pre-approval for construction of the Red Rock facility. In the order, the OCC indicated that both Public Service Company of Oklahoma and OG&E will need more electric generating capacity in the next few years, but also asserted that not enough consideration was given to solutions other than Red Rock. The related press release is furnished as Exhibit 99.01 and incorporated herein by reference.

## **OG&E, PSO and OMPA terminate Red Rock plant agreements**

OKLAHOMA CITY — OG&E Electric Services, Public Service Company of Oklahoma and the Oklahoma Municipal Power Authority announced today that each of the parties in the proposed construction of the 950-megawatt Red Rock generating unit has agreed to terminate agreements to build and operate the plant.

The announcement followed the Oklahoma Corporation Commission's issuance earlier in the day of an Order verifying the Commission's verbal decision in September to deny pre-approval for construction of the Red Rock facility. In today's Order the Commission indicated that both PSO and OG&E will need more electric generating capacity in the next few years, but also asserted that not enough consideration was given to solutions other than Red Rock.

We continue to believe that a jointly-owned Red Rock plant represented a unique opportunity for three Oklahoma utilities to maintain a balanced generation portfolio and hold down future energy costs, said Pete Delaney, OGE Energy Corp. chairman, president and CEO. Unfortunately, as we said consistently throughout this process, it is not feasible to construct a plant of this size without the Commission's blessing. We will now turn our attention to developing alternative, albeit less attractive, baseload generation options.

OG&E estimates its share of costs in the planning phase of the Red Rock project to be between \$18 million and \$20 million. The company intends to seek regulatory recovery of those costs.

OG&E, serving more than 758,000 customers in Oklahoma and western Arkansas, is a subsidiary of Oklahoma City-based OGE Energy Corp. (NYSE: OGE). OGE Energy also is the parent company of Enogex Inc., a natural gas pipeline business with principal operations in Oklahoma.
