#### Explanatory Note

-----

This Quarterly Report on Form 10QSB is related to our operations during the three and six month periods ended June 30, 2004 and the related financial statements for that period, and is being filed on a delinquent basis. The financial statements that follow and the information contained below is not

## Edgar Filing: AMERICAN STELLAR ENERGY INC. - Form 10QSB

indicative of our current business operations as we have redirected our business from oil and gas to mining, which included both the acquisition and disposal of our oil operations during 2004 and 2005, and the acquisition of interest in various gold mining properties in Chihuahua, Mexico during 2005.

### PART I: FINANCIAL INFORMATION

#### ITEM 1. FINANCIAL STATEMENTS

The financial information set forth below with respect to our Statements of Operations for the three and six months ended June 30, 2004 are unaudited. This financial information, in the opinion of management, includes all adjustments consisting of normal recurring entries necessary for the fair presentation of such data. The results of operations for the three and six months ended June 30, 2004 are not indicative of results of subsequent periods.

AMERICAN STELLAR ENERGY, INC.  
(Formerly Merchantpark Communications, Inc.)  
(A Development Stage Company)  
(Unaudited)

Notes to the Consolidated Financial Statements  
June 30, 2004

NOTE 1 - BASIS OF PRESENTATION

The accompanying financial statements are consolidated with the Company's wholly owned subsidiary and have been prepared by the Company without audit. In the opinion of management, all adjustments (which include only normal recurring adjustments) necessary to present fairly the financial position, results of operations and cash flows for the six months ended June 30, 2004 and for all periods presented have been made.

## Edgar Filing: AMERICAN STELLAR ENERGY INC. - Form 10QSB

Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted. It is suggested that these condensed financial statements be read in conjunction with the financial statements and notes thereto included in the Company's December 31, 2003 audited financial statements. The results of operations for the six months ended June 30, 2004 are not necessarily indicative of the operating results for the full year.

### NOTE 2 - (a) NATURE OF OPERATION

During 2003, the Company began seeking business opportunities in the energy sector and changed its name to American Stellar Energy Inc. In early 2004, management identified a suitable oil prospect, the Corsicana prospect, acquired working interest in that prospect, and began operating in the oil and gas industry. Subsequent to June 30, 2004, it acquired additional oil and gas properties, commenced operations on those properties and began receiving revenues. During 2005, the Company disposed of the oil and gas properties in favor of the acquisition and development of mining properties.

### NOTE 2 - (b) GOING CONCERN

The Company's consolidated financial statements are prepared using generally accepted accounting principles applicable to a going concern which contemplates the realization of assets and liquidation of liabilities in the normal course of business. The Company has incurred losses of \$244,219 for the 6 month period ended June 30, 2004 that have resulted in an accumulated deficit of approximately \$1,504,127 at June 30, 2004, which raises substantial doubt about the Company's ability to continue as a going concern. The accompanying consolidated financial statements do not include any adjustments relating to the recoverability and classification of liabilities that might result from the outcome of this uncertainty. It is management's intent to seek additional financing through new stock issuances and lines of credit. The Company sold all of its oil interests by November 2005. The Company plans to focus on the mining of gold and other precious metals and hopes to generate revenues through sales of these metals.

### NOTE 3 - CORSICANA FIELD PROJECT

Through an operating agreement on January 20, 2004 with Armen Energy LLC and an initial \$25,000 deposit on execution, the Company obtained an undivided 45% working interest, by way of a "Farm Out Agreement", on acreage that will be held-by-production. The property is located in Corsicana, Texas and consists of a 1,000 acre tract of land on which oil fields have been developed since the 1960's, with varying degrees of success. Mr. Francis R. Biscan Jr., President, holds a minority interest in Armen Energy LLC and has also negotiated a "Right of First Refusal" on subsequent properties identified by Armen Energy as having

## Edgar Filing: AMERICAN STELLAR ENERGY INC. - Form 10QSB

### Notes to the Consolidated Financial Statements June 30, 2004

#### NOTE 3 - CORSICANA FIELD PROJECT DEPOSIT (Continued)

development potential. The remaining 45% working interest in the property was taken by KOKO Petroleum Inc., an unrelated public company which is responsible for funding 50% of the development costs of the project.

The Company will earn an interest in the held-by-production leases (the "farmout leases") in the following manner:

- i) It will pay to the operator funds for land and geological/geophysical expenses, as follows:
  - a. \$25,000 upon execution of the agreement (paid), and
  - b. \$25,000 before participating in any well beyond the initial test well
- ii) When 100% of the participating interest in the drilling of the initial test well is placed, the operator shall invoice the Company for 50% of the \$150,000 estimated total cost to drill and complete the initial test well on the Farmout. Failure to remit such payment within 30 days from receipt of the invoice will result in the forfeiture of all of the Company's right under this agreement and the forfeiture of the \$25,000 previously paid for land and geological/geophysical expenses.
- iii) Upon the operator's receipt of the assignment of the oil and gas lease to be earned as provided for in the Farmout, the operator shall assign to the Company an undivided 45% working interest in and to said leases, delivering a 37% net revenue interest in each lease.
- iv) The Company agrees to pay an additional 5% of the total cost to drill and complete in the next consecutive nineteen wells after the initial test well on the farmout. The Company agrees to tender such payment within 30 days from receipt of the invoice.
- v) The Company shall own an undivided 45% interest in each well drilled until payout. Payout is defined as that point in time when the value of the oil, gas and other hydrocarbons produced, saved and marketed or taken from each well, equals the total cost of:
  - a. drilling, testing, completing and equipping the well into the tanks or gas gathering lines;
  - b. the cost of operating the well up to the date of payout;
  - c. severance, production and/or mineral ad valorem taxes measured by production and assessed on production from the well;
  - d. royalty to the lessors in the well; and
  - e. the overriding royalty reserved to the operator and all other overriding royalty or other burdens created by the operator or its predecessors in title.

Value shall be determined by the net proceeds realized from the sale of such production, or the fair market value thereof at the wellhead if not sold but taken for use in field operation. At payout of each well, the operator shall back-in for and own a 10% working interest in such paid-out well, proportionately reduced to the Company's initial interest in such well. At each well payout, the Company shall execute and deliver assignments to the operator sufficient to vest the operator with its back-in working interest.

Notes to the Consolidated Financial Statements  
June 30, 2004

## NOTE 3 - CORSICANA FIELD PROJECT DEPOSIT (Continued)

- vi) Prior to initial drilling operations on the first well on the farmout, the Company and the operator shall enter into a mutually acceptable operating agreement.
- vii) Should the operator propose the drilling of a well on the farmout lands and the Company elects to not drill the well, then upon spudding of the well, the Company shall assign to the operator all of the Company's interest in the lease covering and affecting 80 acres around the proposed well location. At such time when the well achieves 400% payout, the Company shall back-in for a 40.5% working interest in the wellbore. Such back-in at 400% payout shall apply to any and all wells drilled within 80 acres.

The Company has no other oil and gas activity outside this block.

Total deposit as of June 30, 2004 was \$57,039.

Capitalized costs relating to oil and gas producing assets at June 30, 2004 consisted of the following:

Proved oil and gas properties	\$47,961
-------------------------------	----------

## NOTE 4 - RELATED PARTY TRANSACTIONS

During the 6 months ended June 30, 2004, the Chief Executive Officer of the Company loaned \$8,591 to the Company for working capital. The loan is unsecured, non-interest bearing, and payable on demand.

The Chief Executive Officer provided consulting services to the Company which resulted in \$48,000 of consulting expense for the six months ended June 30, 2004 (June 30, 2003 \$30,000).

The Company's Chief Executive Officer holds a minority interest in Armen Energy LLC, the operator of its natural gas and oil properties, and has also negotiated a "Right of First Refusal" for the Company on subsequent properties identified by the operator as having development potential.

The Company issued 550,000 shares of common stock valued at \$27,500 to a related party for consulting services performed in the prior year.

The Company's Chief Executive Officer and Chief Financial Officer purchased 650,000 shares and 200,000 shares, respectively, of the common stock of the Company at \$0.06 per share.

A stock certificate of 1,200,000 shares was issued to a former director for

## Edgar Filing: AMERICAN STELLAR ENERGY INC. - Form 10QSB

services. Subsequent to being issued, the number of shares was renegotiated downward and this certificate was cancelled.

(Unaudited)

Notes to the Consolidated Financial Statements  
June 30, 2004

### NOTE 5 - SUBSEQUENT EVENTS

#### (a) Mexican Subsidiary

Amermin S.A. de C.V.

In May 2005, the Company invested in one or more mining projects in Mexico and become a full vested 49% partnership with Amermin S.A. de C.V (Amermin), a mining company incorporated in Chihuahua, Mexico. By making initial cash deposits towards the purchase of La Currita mining concessions and one other mining project, the Company exercised an option to acquire a further 48% interest in Amermin.

#### (b) Oil and Gas Properties

Hill Lease

In January 2005, the Company acquired a 45% working interest and a 33.75% net revenue interest in 15.5 acres with one existing oil well in Navarro County, Texas, known as the "Hill Lease", for \$11,700. The Company sold this interest to Future Quest Nevada, Inc. for \$37,000 in November 2005.

Interest in Corsicana Field Project

In August 2005, the Company sold its 45% working interest in its Corsicana 1,000 acre farmout in Navarro County, Texas. The sale price was \$165,000, and the proceeds were received in 2005.

#### (c) Mining Properties

La Currita mining concessions

In May 2005, the Company entered an agreement to purchase 100% of the assets and concession rights in Chihuahua, Mexico, known as "La Currita", through its newly acquired 97% owned Mexican subsidiary, Amermin. La Currita is a set of 3 mineral concessions, including 4 mines and a 150 ton per day floatation mill for processing ore. The terms of the purchase agreement call for a total purchase price of \$1,200,000. Terms of payment are \$225,000, with 19 monthly installments of \$50,000, which is payable until March, 2007. Should the Company fail to make 2 successive payments, the Company may lose this property and forfeit all previous payments. The mill is currently in start up mode, processing 80 tons of gold and silver ore per day with varying consistency.

San Miguel mining concessions

In May 2005, the Company paid \$10,000 to enter an option agreement to purchase 100% of the rights to 12 undeveloped concessions, known as "San Miguel",

## Edgar Filing: AMERICAN STELLAR ENERGY INC. - Form 10QSB

located in Chihuahua, Mexico, through its newly acquired 97% owned Mexican subsidiary, Amermin. The total purchase price is \$700,000.

### La Millionaire mining concessions

In June 2005, the Company paid \$100,000 for an option agreement in a set of 4 mineral concessions on approximately 2,162 acres in Chihuahua, Mexico, known as "La Millionaire", through its newly acquired 97% owned Mexican subsidiary, Amermin. The option agreement allows the Company to enter a joint venture agreement to earn 60% interest in La Millionaire when the Company spends an additional \$350,000 within 7 years to put the property into production. Once La Millionaire is in production, the Company receives 100% of the profits until its original \$450,000 investment has been repaid. Thereafter the Company participates at a 60% rate. If the Company fails to make the required investment, the Company may lose its interest in La Millionaire and forfeit all previous payments.

AMERICAN STELLAR ENERGY, INC.  
(Formerly Merchantpark Communications, Inc.)  
(A Development Stage Company)  
(Unaudited)

Notes to the Consolidated Financial Statements  
June 30, 2004

### NOTE 5 - SUBSEQUENT EVENTS (Continued)

#### Paramount joint venture

In August 2005, the Company entered an option agreement through its newly acquired 97% owned Mexican subsidiary, Amermin, with Paramount Gold Mining Corp. "Paramount" for the sale of the San Miguel mining concessions. Paramount made an initial payment of \$50,000.00 for the option to acquire a 35% interest in San Miguel mining concessions. Pending the affirming results of a title search, Paramount will make a payment of \$250,000 to purchase 25% interest in the San Miguel mining concessions. A further payment of \$100,000 will increase the purchase to 35% interest in the San Miguel mining concessions. In order to maintain its interest, Paramount will make an additional payment of \$50,000 or an equivalent value of its shares on every anniversary date of this agreement.

Paramount may increase its interest in the San Miguel mining concessions to 55%, after the following conditions have been met:

- a) Paramount spends an additional \$1,000,000 on exploration and development within 18 months of the date this agreement is signed.
- b) Paramount issues to the Company an additional 700,000 restricted common shares.

Furthermore, Paramount has an option to increase its interest in the San Miguel mining concessions to 70%, on the following conditions:

- a) Paramount spends an additional \$1,500,000 over and above the \$1,000,000 expenditure spent on exploration and development within 30 months of the date this agreement is signed.
- b) Paramount issues to the Company 200,000 restricted common shares

## Edgar Filing: AMERICAN STELLAR ENERGY INC. - Form 10QSB

The option to finalize the agreement was subsequently extended to November 30, 2005, and Paramount has exercised the option subsequent to the year end.

### La Blanca properties

In December 2005, the Company entered into a joint purchase agreement with Paramount to acquire certain assets and rights obtained by Drilling Consultants, Inc. (DCI) to 4 mining claims located in Guazapares, Chihuahua, Mexico. These four concessions are known as the La Blanca property and total 140 hectares. They are located adjacent to our San Miguel properties. The total purchase price of the claims is \$4,300,000 which will be paid in accordance with a specific purchase price schedule agreed upon by Paramount and DCI. Under the Company's agreement with Paramount, the Company has the right to earn a 10% interest and up to a 30% interest in the La Blanca property under certain conditions: (1) after Paramount has made property payments for one year (totaling \$1,010,000), the Company will pay 20% of all additional payments (totaling \$3,290,000) due under a specific schedule to earn a 20% interest in the assets and rights in the four mining concessions; (2) the Company's payments will begin on January 30, 2007 and will continue through January 10, 2010 at which time the Company will have paid \$658,000 for its interest; (3) if at any time the Company fail to make its 20% share of any payment on the payment schedule, the Company's percentage interest will reduce proportionately; and (4) once payment has been made in full under the schedule, the Company will have earned its 20% interest (or proportionately reduced interest) and the Company will also shall have earned an additional 10% regardless of what was paid by the Company through the payment period.

### NOTE 5 - SUBSEQUENT EVENTS (Continued)

#### Shares Issuance

Subsequent to June 30, 2004, the Company issued 1,400,000 shares of common stock for \$70,000 to investor relations consultants for services performed for the 6 months ended June 30, 2004. Accordingly, the amounts were disclosed as share subscriptions received at June 30, 2004.

Subsequent to June 30, 2004, the Company issued 100,000 shares to the Company's Chief Financial Officer for signing the employment agreement on November 2004.

### ITEM 2. MANAGERMENTS DISCUSSION AND ANALYSIS OR PLAN OF OPERATION

In this report, references to "American Stellar," "Merchant Park," "we," "us," and "our" refer to American Stellar Energy Inc. (formerly Merchant Park Communications, Inc.).

#### Safe Harbor for Forward-Looking Statements

-----

When used in this report, the words "may," "will," "expect," "anticipate," "continue," "estimate," "project," "intend," and similar expressions are intended to identify forward-looking statements within the meaning of Section 27a of the Securities Act of 1933 and Section 21e of the Securities Exchange Act of 1934 regarding events, conditions, and financial trends that may affect the Company's future plans of operations, business strategy, operating results, and financial position. Persons reviewing this report are cautioned that any forward-looking statements are not guarantees of future performance and are subject to risks and uncertainties and that actual results may differ materially from those included within the forward-looking statements as a result of various factors. Such factors are discussed under this "Item 2. Management's Discussion and Analysis or Plan of Operation," and also include general economic factors and conditions that may directly or indirectly impact the our financial condition or results of operations.

#### General

-----

We were incorporated October 14, 1999 in Nevada as Westnet Communications Group, Inc. ("Westnet"), for the purpose of developing a special interest worldwide web site. On April 1, 2001 we acquired Merchantpark Communications, Inc., a Nevada corporation ("Merchantpark") and its software development operations in a stock for stock transaction and changed our name to Merchantpark Communications, Inc. In March 2002 we discontinued our software development operations due to lack of operating capital which included the disposal of our software related assets and liabilities, entering into debt settlement agreements with creditors, and disposing of our inactive subsidiary entities. During 2003, we began seeking business opportunities in the energy sector and changed our name to American Stellar Energy Inc to better reflect our proposed business. In early 2004, management identified a suitable oil prospect, the Corsicana prospect, acquired working interest in that prospect, and began operating in the oil and gas industry. We initiated our first well on the Corsicana Prospect in the second quarter of 2004. Subsequent to June 30, 2004, we commenced operations on our properties and began receiving revenues in the fourth quarter of 2004. During 2005, we acquired additional oil properties but disposed of all of our oil and gas interest in 2005 in favor of the acquisition and development of mining properties.

American Stellar is considered a development stage company and as such our statements of operations, stockholders' equity and cash flows disclose activity since inception. This discussion relates to our operations during our three and six month period ended June 30, 2004 and should be read in conjunction with the financial statements and notes which precede under "ITEM 2. FINANCIAL STATEMENTS."

-----  
REVENUES

During our second quarter of 2004, we had not yet started receiving revenues from our oil operations. We acquired our 45% working interest in the Corsicana property in Texas through an initial \$25,000 payment in our first quarter and the execution of an agreement with Armen Energy LC. During our second quarter our deposit increased by \$32,039. The agreement with Armen Energy is discussed in greater detail below. We did not begin realizing revenues from oil production until our fourth quarter of 2004. During 2003 we were seeking business opportunities and had no revenues from operations in either the first or second quarter. Therefore, we had no revenues in the three or six months ended June 30, 2004 or 2003 from any source.

EXPENSES

Our consulting expenses almost tripled between our 2004 second quarter and our 2003 second quarter, from \$22,500 in 2003 to \$61,909 in 2004. Our general administrative expenses also increased from \$283 in the three months ended June 30, 2003 to \$10,431 in three months ended June 30, 2004. When comparing the six month periods ended June 30, 2004 and 2003, there is an increase of approximately 384% between the periods in consulting expenses which rose from \$44,955 in the first six months of 2003 to \$217,682 in the first six months of 2004. General and Administrative expenses also increased from \$4,044 to \$26,537 between the two years first six months. These increases reflect the shift from minimal operations in 2003 to the startup of our oil and gas operations in 2004 and includes \$48,000 in compensation paid to our CEO under an employment agreement in effect for 2004 and also includes the payment in stock of 550,000 of our common shares for \$27,500 in services performed by another officer/director during the prior year. The higher increase in consulting expenses incurred during the first three month period were a result of 2003 compensation due various individuals which were not expensed until our first quarter of 2004.

Our loss before other expenses was \$244,219 in the six months ended June 30, 2004 with \$72,340 of that amount occurring in the second quarter. Our net loss before other expenses was \$48,999 during the six months ended June 30, 2003 with \$22,783 of that loss attributed to the second quarter. Our total net loss during the six months ended June 30, 2003 increased to \$78,099 as a result of a \$30,000 loss on extinguishment of debt which took place in the second quarter of 2003 increasing the net loss for the three month period to \$52,783. We had no comparative loss in other expenses in the six month period of 2004 although we incurred a foreign currency translation loss in of \$364 in the first six months of 2004, with \$208 occurring during the second quarter bring our net loss for the six months ended June 30, 2004 to \$244,583 and for the three months ended June 30, 2004 to \$72,548.

Liquidity and Capital Resources  
-----

The following discussion is based on our financial condition as of June 30, 2004 and our liquidity and capital resources at that time as it related to our then existing operations in the oil industry.

-21-

Our monthly cash outflows are primarily related to consulting services costs,

## Edgar Filing: AMERICAN STELLAR ENERGY INC. - Form 10QSB

and the expenses of day to day operations as we attempt to develop our oil business and include our working interest responsibilities on the Corsicana properties. These cash outflows exceed monthly cash inflows based on lack of revenues from oil production or any other source. We had \$17,620 in cash as of June 30, 2004 to fund operations.

We had a cash flow deficiency related to operating activities of \$196,608 in the six month period ended June 30, 2004 compared to \$35,273 in the six months ended June 30, 2003. Part of our non-cash activities in the first half of 2004 reflects \$115,150 of services rendered for which common stock was issued during the first six months of 2004 and includes stock issued to officers for \$63,000 in accrued services under existing employment agreements during that period. Investing activities consisted of a \$47,961 investment in proved oil and gas properties and equipment during our second quarter. The cash flow financing was provided by sale of common stock for \$164,020, and subscriptions received for \$70,000 for shares of stock in lieu of compensation. These financing activities occurred mostly in the first quarter of 2004 and resulted in cash on hand as at June 30, 2004 of \$17,620 to fund ongoing company operating expenses as well as working interest expenses on the well with the majority of the funding expended during the first two quarters.

We had total assets as of June 30, 2004 of \$122,620. This includes the \$17,620 in cash and a \$57,039 deposit on our Corsicana project. It also includes \$47,961 in capitalized costs related to proved oil and gas properties.

Our liabilities consist of a loan from a related party/shareholder in the amount of \$8,591 which is non interest bearing and has no fixed terms of repayment; we also had accounts payable of \$2,149.

### Farm Out Agreement with Armen Energy LLC

-----

On January 20, 2004, we executed an agreement with Armen Enrgy LLC ("Armen") which initiated our new plan of operation in the oil and gas industry. Through the "farmout" agreement with Armen, we obtained an undivided 45% working interest on acreage that is held-by-production. Armen had previously obtained from Spartan General Partners ("Spartan") a farmout of 1,000 acres of held-by-production leases with the right to drill and earn an undivided 90% interest in the farmout lands. Armen agreed to carry Spartan for a 10% interest in each well up to 20 wells. It granted American Stellar an undivided working interest by way of a Participation Agreement in January of 2004; the remaining 45% undivided working interest was granted to Koko Petroleum, Inc., an unrelated party.

Upon the purchase of our interest which required a deposit of \$25,000, paid at execution by us, and an additional \$25,000 required to be paid before participating in any well beyond the initial test well, we became responsible for 50% of the estimated costs for drilling and completion of the initial well at which point we were assigned our 45% working interest which equaled a 37% net revenue interest. Net revenues means the percentage of oil and gas left to the working interest participants after reserving for Armen an overriding royalty interest in each lease equal to the difference between current lease burdens and 74%.

-22-

Under the agreement the parties agreed that Armen, or a mutually acceptably designee, would become the operator of the wells. We entered into an agreement

## Edgar Filing: AMERICAN STELLAR ENERGY INC. - Form 10QSB

with Texas MOR, Inc. dba Rife Oil Properties, to be our operator (the "Operator").

Our Chief Executive Officer, Mr. Francis R. Biscan Jr., holds a minority interest in Armen and has also negotiated a "Right of First Refusal" for American Stellar on subsequent properties identified by Armen as having development potential.

### Plan of Operation for the 12 months Following our Second Quarter of 2004

-----

During the 12 months following the period of this report we planned to continue to develop our Corsicana property and put it into production as well as seek other oil and gas properties to invest in. Our cash requirements over the 12 months following June 30, 2004, included: compensation due under employment agreements with officers and directors aggregating \$126,000 annually; additional consulting expenses related to investor relations and acquisition opportunities; expenses related to well drilling and operation based on our 45% working interest in the Corsicana properties, general and administrative expenses related to day to operations, and legal and accounting expenses related to reporting obligations both past and current.

### Financing

-----

We operate in a very competitive industry in which large amounts of capital are required in order to continually acquire, explore and develop properties. Most of our competitors have significantly greater capital resources than we have. In order to achieve cash flows from operations we must receive revenues from oil production which will require spudding new wells on our Corsicana properties or the acquisition of additional properties. We do not have cash flows from our current operations and our existing cash on hand will not be sufficient to provide for our day to day administrative costs or any expansion into additional properties, or the drilling of additional wells, or the costs associated with our working interest.

In the past we have relied on loans from related parties and sales of our stock to fund operations, including the issuance of stock as payment for services. If we rely on equity offerings for funding, then we will likely use private placements of our common stock pursuant to exemptions from the registration requirements provided by federal and state securities laws. The purchasers and manner of issuance will be determined according to our financial needs and the available exemptions. We also note that if we issue more shares of our common stock our stockholders may experience dilution in the value per share of their common stock.

### Trends, Uncertainties and Risks

-----

The following risks, trends and uncertainties relate to our business operations as of June 30, 2004. Our oil operations were disposed of in their entirety by November 2005.

- . There is no guarantee we will be successful in achieving revenues from oil production.

-23-

- . If we succeed in achieving revenues from production, such revenues will

## Edgar Filing: AMERICAN STELLAR ENERGY INC. - Form 10QSB

be highly dependent on the price of crude oil which is unpredictable.

- . We are highly dependent on the Operator of our wells and must rely on their expertise for both the operation of the wells and sale of crude oil to distributors when and if we achieve production.
- . We have no diversification with only one business, that of oil and gas exploration and development, and only one property in that business.
- . The oil and gas industry is subject to substantial regulation with respect to discharge of materials into the environment or otherwise relating to the protection of the environment. Exploration, development and production of oil and gas are regulated by various government agencies with respect to storage and transportation of hydrocarbons and clean-up of sites of wells. Many of these activities require government approval before underwriting the costs associated with compliance with applicable laws and regulations which have increased the costs associated with planning, designing, drilling, installing, operating, and plugging and abandoning a well. To the extent that we own an interest in a well, we may be responsible for costs of environmental regulation compliance even well after the plugging and abandoning of that well.
- . Operation of an oil and gas well is subject to risks such as blowouts, cratering, pollution, and fires, any one of which could result in damage or destruction of the well or production faults.
- . We will compete with many other oil and gas companies which are better capitalized and have more experience in the industry than we do. Our lack of experience could adversely affect our chances to compete in an industry dominated by larger more experienced firms.
- . We have a limited operating history in this field and have recognized no revenues from operations in this field. Accordingly, there can be no assurance that we can operate at a profitable level.
- . Our officers and directors have no experience in the oil and gas industry and this lack of experience could adversely affect our chances of success.
- . We have incurred losses for our second quarter ended June 30, 2004 resulting in an accumulated deficit as of that date of \$1,504,127 which raises substantial doubt as to our ability to continue as a going concern.

### Off-balance Sheet Arrangements

-----

None

### Subsequent Events Related to Oil Producing Activities

-----

The following is a brief synopsis of our oil activities subsequent to the June 30, 2004:

-24-

- . The first well on the Corsicana property which was initiated in June 2004

## Edgar Filing: AMERICAN STELLAR ENERGY INC. - Form 10QSB

tested 3 exploratory zones: the "Woodbine," the Wolfe City," and one development zone, the "Pecan Gap". This first well named "1B McKinney" initially produced at the rate of 21.3 barrels of fluids per day. Of this, 10.65 barrels of oil were recovered and 10.65 barrels of "work-over" water. It was initially thought that this water would be worked off and result in 90% or better, of all fluids produced, being oil, but the integrity of the formation was severely compromised and production declined to just 2 barrels of oil per day. In October, 2004, wells number 2 and 3 were drilled successfully, logged, and completed with Initial Production Rates of 25 and 36 barrels per day.

- . In January 2005, we acquired a 45% Working Interest in a new property called the "Hill Lease" located on 15.5 acres in Navarro, Texas, which had a well that had been drilled and cased in the Pecan Gap zone, but missed most of the zone with the previous completion. We paid \$11,700 for the working interest in the Hill Lease.
- . By the fall of 2005, our initial production from our three producing wells on the Corsicana property had declined to approximately 5 barrels per day each.
- . In September, 2005 the "Hill" well was recompleted and resulted in an initial production rate of approximately 6 barrels per day, which declined quickly to about 3 barrels per day.
- . Although the Corsicana wells were operating economically and generating revenue of approximately \$3,000 to \$4,000 per month, it was determined by management that they were not providing the return on investment necessary to achieve a satisfactory growth rate. In August, of 2005, the Corsicana lease was sold for a contract price of \$175,000 which was reduced for early payment to \$165,000 which has been paid in full by the purchasers. The Hill lease, after determining production rates was also deemed to be of limited long term value, was subsequently sold for \$37,000 in early November, 2005.

### Subsequent Events Related to Mining Activities

-----

The following activities have occurred subsequent to June 30, 2004 which are not related to the ongoing oil operations in 2004 but reflect our diversification into the mining industry:

- . Acquisition of Amermin S.A. de C.V. subsidiary: In May of 2005 we exercised an option to acquire a 97% working interest in Amermin S.A. de C.V. ("Armermin"), a mining company in Chihuahua, Mexico by making initial cash payments towards the purchase of La Currrita mining concessions and one other mining project.
- . La Currrita Mining Concessions: Also in May of 2005 we entered into an agreement to purchase 100% of the assets and concession rights in property in Chihuahua, Mexico known as "La Currrita". The agreement was entered into through our 97% owned Mexican subsidiary, Amermin. La Currrita is a set of 3 mineral concessions including 4 mines and a 150 ton a day flotation mill for processing ore. The total purchase price is \$1.2 million of which we have paid \$225,000 with 19 monthly installments

## Edgar Filing: AMERICAN STELLAR ENERGY INC. - Form 10QSB

due of \$50,000. We will lose our rights to this property should we fail to make two consecutive payments and forfeit all previous payments. The mill currently processes 80 tons of gold/silver per day with varying consistency.

- . San Miguel Mining Concessions: On May 16 of 2005, through Amermin, we entered into option agreement with Compania Minera Navojoa S.A. de C.V. to purchase 100% of the rights to 12 mineral concessions located in Chihuahua, Mexico known as "San Miguel". We paid \$10,000 to enter into this option. Development of this concession is contingent on the results of a title search. Under the agreement we agreed to pay \$700,000 for the 12 mineral concessions: \$300,000 at execution of a formal purchase agreement, and \$100,000 at 6 month intervals until paid in full. The title search was completed and we have paid \$150,000 of the first \$300,000 with the balance of \$150,000 due upon the completion and execution of the formal purchase agreement. Our first \$100,000 payment will be due 6 months from the execution of the formal purchase agreement. The San Miguel concessions are the subject of an agreement with Paramount Gold Mining Corp as discussed below.
- . La Millionaire Mining Concessions: In June 2005, through our subsidiary Amermin, we paid \$100,000 to enter into an option on "La Millionaire", a set of four mineral concessions on 2,162 acres in Chihuahua, Mexico. The option agreement allows us to enter a joint venture to earn a 60% interest in La Millionaire once we spend an additional \$350,000 within 7 years over the initial \$100,000 to put the property into production. Once La Millionaire is in production, we will receive 100% of the profits until our original \$450,000 investment has been repaid. After that, we participate at a rate of 60%. If we fail to make the required investment we may lose our interest in La Millionaire and forfeit all payments.
- . On August 3, 2005, Amermin entered into an option agreement with Paramount Gold Mining Corp. ("Paramount") for the sale of up to a 70% interest in the San Miguel mining concessions. Paramount made an initial payment to us of \$50,000 for the option to acquire a 35% interest in the San Miguel concessions. Pending results of a title search, Paramount agreed to pay \$250,000 to purchase a 25% interest in the concessions; a further payment of \$100,000 will increase Paramount's interest to the 35%. To maintain its interest, Paramount is required to make a yearly payment of \$50,000 or an equivalent value of its shares, on the anniversary date of the agreement. Paramount may increase its interest in San Miguel to 55% once certain conditions are met: it spends \$1,000,000 on exploration and development, and issues us 700,000 of its restricted shares. Paramount has the further option to increase its interest to 70% by spending an additional \$1.5 Million over and above the \$1,000,000 spent on exploration and development within 30 months and through the issuance of an additional 200,000 shares. The option to finalize this agreement was extended to November 30, 2005 and Paramount has exercised the option and paid us \$250,000 on December 1, 2005. Under the agreement, Paramount has the right to process ore at our La Currita Mill at a minimum rate of 75 tons per day and pay a processing fee to us equal to actual milling costs per ton plus 10% of the net smelter proceeds. Any revenues, net of operating costs, derived from mining ore at San Miguel groupings, will be divided between us and

## Edgar Filing: AMERICAN STELLAR ENERGY INC. - Form 10QSB

Paramount based on each partner's proportionate interest at the time. So long as Paramount pursues exploration of the property it will be deemed to be the operator; if it does not pursue exploration, it will no longer be the operator but will retain its interest.

- . On December 12, 2005, we entered into a Joint Purchase Agreement with Paramount to acquire certain assets and rights obtained by Drilling Consultants, Inc. ("DCI") to 4 mining claims located in Guazapares, Chihuahua, Mexico. These four concessions are known as the La Blanca property and total 140 hectares. They are located adjacent to our San Miguel properties. The total purchase price of the claims is \$4,300,000 which will be paid in accordance with a specific purchase price schedule agreed upon by Paramount and DCI. Under our agreement with Paramount, American Stellar has the right to earn a 10% interest and up to a 30% interest in the La Blanca property under certain conditions: (1) after Paramount has made property payments for one year (totaling \$1,010,000), we will pay 20% of all additional payments (totaling \$3,290,000) due under a specific schedule to earn a 20% interest in the assets and rights in the four mining concessions; (2) our payments will begin on January 30, 2007 and will continue through January 10, 2010 at which time we will have paid \$658,000 for our interest; (3) if at any time we fail to make our 20% share of any payment on the payment schedule, our percentage will reduce proportionately; and (4) once payment has been made in full under the schedule, we will have earned our 20% interest (or proportionately reduced interest) and we will also shall have earned an additional 10% regardless of what was paid by us through the payment period.

### ITEM 3. CONTROLS AND PROCEDURES

Our Chief Executive Officer and our Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures as of the end of the period covered by this report. Based on that evaluation, they concluded that our disclosure controls and procedures were effective.

Also, our Chief Executive and Financial Officers determined that there were no changes made in our internal controls over financial reporting during the first quarter of 2004 that have materially affected, or are reasonably likely to materially affect our internal control over financial reporting.

## PART II OTHER INFORMATION

### ITEM 1. LEGAL PROCEEDINGS

None.

### ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The following discussion describes all securities sold by American Stellar Energy Corporation during the three month period ended June 30, 2004. Note: these transactions were disclosed in our Annual Report on 10KSB for the year ended December 31, 2004 which was filed prior to this report.

## Edgar Filing: AMERICAN STELLAR ENERGY INC. - Form 10QSB

- . On April 27, 2004, we issued an aggregate of 2,807,000 of our unregistered common shares to nine individuals who purchased shares at various prices from \$.05 - \$.10 per share for a total of \$164,020 in cash received between February 20, 2004 and March 15, 2004. One of those individuals was an affiliate at the time of the transaction, Mr. Francis Biscan Jr., our CEO, who purchased 650,000 shares at \$0.06 per share. We relied on an exemption from registration for a private transaction not involving a public distribution provided by Section 4(2) of the Securities Act.
- . On June 25, 2004, we issued 1,620,000 to three individuals: Clayton Smith, Francis Biscan Jr. and Alexander Anderson, for \$66,600 worth of services. Mr. Biscan, our CEO, received his 1,200,000 shares in lieu of payment under an employment compensation plan for services valued at \$48,000; Mr Anderson, an officer and director at the time of the transaction, received 375,000 shares for services valued at \$15,000; Clayton Smith, received 45,000 shares as payment for services rendered valued at \$3,600 or \$.14 per share. We relied on an exemption from registration for a private transaction not involving a public distribution provided by Section 4(2) of the Securities Act.

In connection with each of these isolated issuances of our securities, we believe that each purchaser:

- . was aware that the securities had not been registered under federal securities laws;
- . acquired the securities for his/hers/its own account for investment purposes and not with a view to or for resale in connection with any distribution for purposes of the federal securities laws;
- . understood that the securities would need to be held indefinitely unless registered or an exemption from registration applied to a proposed disposition; and
- . was aware that the certificate representing the securities would bear a legend restricting their transfer.

### ITEM 3. DEFAULTS UPON SENIOR SECURITIES

Not Applicable.

### ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

None

### ITEM 5. OTHER INFORMATION

All information required to be disclosed on a Form 8K related to the period covered by this report has been previously reported in a prior filing(s).
