UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

(Mark One)

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
 FOR THE FISCAL YEAR ENDED DECEMBER 31, 2018

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Commission file number: 001-16577

(Exact name of registrant as specified in its charter)

Michigan

38-3150651

(State or other jurisdiction of incorporation or organization) (I.R.S. Employer Identification No.)

5151 Corporate Drive, Troy, Michigan

48098-2639

(Address of principal executive offices)

(Zip Code)

Registrant's telephone number, including area code: (248) 312-2000

Securities registered pursuant to Section 12(b) of the Act:

Title of each class

Name of each exchange on which registered

Common Stock, par value \$0.01 per share New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§ 229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large Accelerated Filer Accelerated Filer Smaller Reporting Company

Non-Accelerated Filer Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The estimated aggregate market value of the voting common stock held by non-affiliates of the registrant, computed by reference to the closing sale price (\$34.26 per share) as reported on the New York Stock Exchange on June 30,

2018, was approximately \$1 billion. The registrant does not have any non-voting common equity shares. As of February 26, 2019, 56,442,315 shares of the registrant's common stock, \$0.01 par value, were issued and outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's Proxy Statement relating to the 2019 Annual Meeting of Stockholders are incorporated by reference into Part III of this Report on Form 10-K.

FORWARD-LOOKING STATEMENTS

Certain statements in this Form 10-K, including but not limited to statements included within the Management's Discussion and Analysis of Financial Condition and Results of Operations, are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995, as amended. In addition, we may make forward-looking statements in our other documents filed with or furnished to the Security and Exchange Commission (SEC), and our management may make forward-looking statements orally to analysts, investors, representatives of the media, and others.

Generally, forward-looking statements are not based on historical facts but instead represent management's current beliefs and expectations regarding future events and are subject to significant risks and uncertainties. Such statements may be identified by words such as believe, expect, anticipate, intend, plan, estimate, may increase, may fluctuate, and similar expressions or future or conditional verbs such as will, should, would, and could. Our actual results and capital and other financial conditions may differ materially from those described in the forward-looking statements depending upon a variety of factors, including without limitation the precautionary statements included within each individual business' discussion and analysis of our results of operations and the risk factors listed and described in Item 1A. to Part I, Risk Factors.

Other than as required under United States securities laws, we do not undertake to update the forward-looking statements to reflect the impact of circumstances or events that may arise after the date of the forward-looking statements.

PART I

ITEM 1. BUSINESS

Where we say "we," "us," "our," the "Company," "Bancorp" or "Flagstar," we usually mean Flagstar Bancorp, Inc. However, in some cases, a reference will include our wholly-owned subsidiary Flagstar Bank, FSB (the "Bank"). See the Glossary of Abbreviations and Acronyms on page 3 for definitions used throughout this Form 10-K.

Introduction

We are a savings and loan holding company founded in 1993. Our business is primarily conducted through our principal subsidiary, the Bank, a federally chartered savings bank founded in 1987. We provide commercial and consumer banking services and we are the 5th largest bank mortgage originator in the nation and the 6th largest sub-servicer of mortgage loans nationwide. At December 31, 2018, we had 3,938 full-time equivalent employees. Our common stock is listed on the NYSE under the symbol "FBC."

Our relationship-based business model leverages our full-service bank's capabilities and our national mortgage platform to create and build financial solutions for our customers. At December 31, 2018, we operated 160 full service banking branches that offer a full set of banking products to consumer, commercial, and government customers. Our banking footprint spans throughout Michigan, Indiana, California, Wisconsin, Ohio and contiguous states.

We originate mortgages through a wholesale network of brokers and correspondents in all 50 states, and our own loan officers from 75 retail locations in 24 states and two call centers, which include our direct-to-consumer lending team. Flagstar is also a leading national servicer of mortgage loans and provides complementary ancillary offerings including MSR lending, servicing advance lending and recapture services.

Recent Acquisitions

In the first quarter of 2018, we closed on the purchase of the mortgage loan warehouse business from Santander Bank, which added \$499 million in outstanding warehouse loans, and we completed the acquisition of eight Desert Community Bank branches in San Bernardino County, California, with \$614 million in deposits and \$59 million in loans.

In the fourth quarter of 2018, we closed on the purchase of 52 branches in Indiana, Michigan, Wisconsin and Ohio, from Wells Fargo, with \$1.8 billion in deposits and \$107 million in loans. For further information, see Note 2 - Acquisitions.

Operating Segments

Our operations are conducted through our three operating segments: Community Banking, Mortgage Originations and Mortgage Servicing. For further information, see MD&A - Operating Segments and Note 23 - Segment Information.

Competition

We face substantial competition in attracting deposits and generating loans. Our most direct competition for deposits has historically come from other savings banks, commercial banks and credit unions in our banking footprint. Money market funds, full-service securities brokerage firms, and financial technology companies also compete with us for these funds. We compete for deposits by offering a broad range of high quality customized banking services at competitive rates. From a lending perspective, there are many institutions including commercial banks, national

mortgage lenders, local savings banks, credit unions, and commercial lenders offering consumer and commercial loans. We compete by offering competitive interest rates, fees, and other loan terms through efficient and customized service.

Subsidiaries

We conduct business primarily through our wholly-owned bank subsidiary. In addition, the Bank has wholly-owned subsidiaries through which we conduct non-bank business or which are inactive. The Bank and its wholly owned subsidiaries comprised 99.7 percent of our total assets at December 31, 2018. For further information, see Note 1 - Description of Business, Basis of Presentation, and Summary of Significant Accounting Standards, Note 8 - Variable Interest Entities and Note 24 - Holding Company Only Financial Statements.

Regulation and Supervision

The Bank is a federally chartered savings bank, subject to federal regulation and oversight by the OCC. We are also subject to regulation and examination by the FDIC, which insures the deposits of the Bank to the extent permitted by law and the requirements established by the Federal Reserve. The Bank is also subject to the supervision of the CFPB which regulates the offering and provision of consumer financial products or services under the federal consumer financial laws. The OCC, FDIC and the CFPB may take regulatory enforcement actions if we do not operate in accordance with applicable regulations, policies and directives. Proceedings may be instituted against us, or any "institution-affiliated party," such as a director, officer, employee, agent or controlling person, who engages in unsafe and unsound practices, including violations of applicable laws and regulations. The FDIC has additional authority to terminate insurance of accounts, if after notice and hearing, we are found to have engaged in unsafe and unsound practices, including violations of applicable laws and regulations. The federal system of regulation and supervision establishes a comprehensive framework of activities in which to operate and is intended primarily for the protection of depositors and the FDIC's Deposit Insurance Fund rather than our shareholders.

As a savings and loan holding company, we are required to comply with the rules and regulations of the Federal Reserve. We are required to file certain reports and we are subject to examination by the enforcement authority of the Federal Reserve. Under the federal securities laws, we are also subject to the rules and regulations of the Securities and Exchange Commission.

Any change to laws and regulations, whether by the FDIC, OCC, CFPB, SEC, the Federal Reserve, or Congress, could have a material adverse impact on our operations.

Holding Company Regulation

Acquisition, Activities and Change in Control. Flagstar Bancorp, Inc. is a unitary savings and loan holding company. We may only conduct, or acquire control of companies engaged in, activities permissible for a unitary savings and loan holding company pursuant to the relevant provisions of the Home Owners' Loan Act and relevant regulations. Further, we generally are required to obtain Federal Reserve approval before acquiring directly or indirectly, ownership or control of any voting shares of another bank or bank holding company (or savings associations or savings and loan holding company) if, after such acquisition, we would own or control more than 5 percent of the outstanding shares of any class of voting securities of the bank or bank holding company (or savings association or savings and loan holding company). Additionally, we are prohibited from acquiring control of a depository institution that is not federally insured or retaining control of a savings association subsidiary for more than one year after the date that such subsidiary becomes uninsured.

We may not be acquired by a company, unless the Federal Reserve approves such transaction. In addition, the GLBA generally restricts a company from acquiring us if that company is engaged directly or indirectly in activities that are not permissible for a savings and loan holding company or financial holding company.

Volcker Rule. Section 619 of the Dodd-Frank Act required the federal financial regulatory agencies to adopt rules that prohibit banking entities, including federal savings associations and their and affiliates, from engaging in proprietary trading and investing in and/or sponsoring certain "covered funds." In 2013, the agencies adopted rules to implement section 619. These rules, collectively with section 619, are commonly referred to as the "Volcker Rule." Compliance with the Volcker Rule generally has been required since July 21, 2015. Pursuant to the requirements of the Volcker Rule, we have established a standard compliance program based on the size and complexity of our operations.

Capital Requirements. The Bank and Flagstar are currently subject to the regulatory capital framework and guidelines reached by Basel III as adopted by the OCC and Federal Reserve. The OCC and Federal Reserve have risk-based capital adequacy guidelines intended to measure capital adequacy with regard to a banking organization's balance sheet, including off-balance sheet exposures such as unused portions of loan commitments, letters of credit, and recourse arrangements.

The Bank and Flagstar have been subject to the capital requirements of the Basel III rules since January 1, 2015. On October 27, 2017, the agencies published a proposed rule which would simplify certain aspects of the capital rules, including the capital treatment for items covered by the rule. The agencies expect that the capital treatment and transition provisions for items covered by Basel III rules will change once the proposal is finalized and effective. On November 21, 2017, in preparation for forthcoming rules that would simplify regulatory capital requirements to reduce regulatory burden, federal banking regulators approved the extension of the existing transitional capital treatment for certain regulatory capital deductions and risk weights. For additional information, see Note 20 - Regulatory Capital.

Source of Strength. The Dodd-Frank Act codified the Federal Reserve's "source of strength" doctrine and extended it to savings and loan holding companies. Under the Dodd-Frank Act, the prudential regulatory agencies are required to promulgate joint rules requiring savings and loan holding companies, such as us, to serve as a source of financial strength for any depository institution subsidiary by maintaining the ability to provide financial assistance to such insured depository institution in the event that it suffers financial distress.

Collins Amendment. The Collins Amendment to the Dodd Frank Act established minimum Tier 1 leverage and risk-based capital requirements for insured depository institutions, depository institution holding companies, and non-bank financial companies that are supervised by the Federal Reserve. The minimum Tier 1 leverage and risk-based capital requirements are determined by the minimum ratios established by the federal banking agencies that apply to insured depository institutions under the prompt corrective action regulations. The amendment states that certain hybrid securities, such as trust preferred securities, may be included in Tier 1 capital for bank holding companies that had total assets below \$15 billion as of December 31, 2009. As we were below \$15 billion in assets as of December 31, 2009, the trust preferred securities classified as long term debt on our balance sheet are included as Tier 1 capital while they are outstanding, unless we complete an acquisition of a depository institution holding company and we report total assets greater than \$15 billion at the end of the quarter in which the acquisition occurs. At our present size, with total assets of \$18.5 billion at December 31, 2018, an acquisition of a depository holding company would likely cause our trust preferred securities totaling \$247 million at December 31, 2018 to no longer be included in Tier 1 capital and would therefore be included in Tier 2 capital.

Banking Regulation

We must comply with a wide variety of banking, consumer protection and securities laws, regulations and supervisory expectations and are regulated by multiple regulators, including the Federal Reserve, the Office of the Comptroller of the Currency of the U.S. Department of the Treasury, the Consumer Financial Protection Bureau, and the Federal Deposit Insurance Corporation.

FDIC Insurance and Assessment. The FDIC insures the deposits of the Bank and such insurance is backed by the full faith and credit of the U.S. government through the DIF. The FDIC maintains the DIF by assessing each financial institution an insurance premium. The FDIC defined deposit insurance assessment base for an insured depository institution is equal to the average consolidated total assets during the assessment period, minus average tangible equity.

All FDIC-insured financial institutions must pay an annual assessment based on asset size to provide funds for the payment of interest on bonds issued by the Financing Corporation ("FICO bonds"), a federal corporation chartered under the authority of the Federal Housing Finance Board. The last of the remaining FICO bonds will mature in September 2019. The Federal Housing Finance Agency (FHFA) projects that the last FICO assessment will be collected in the first half of 2019.

In 2016, the FDIC adopted a rule in accordance with the provisions of Dodd-Frank that requires large institutions to bear the burden, through an imposed surcharge, of raising the DIF reserve ratio. As of September 30, 2018, the DIF has exceeded the required ratio and therefore the surcharge imposed on large banks ended as of that date. We expect the elimination of the surcharge to decrease FDIC insurance premiums approximately \$3 million for the full year 2019.

Affiliate Transaction Restrictions. The Bank is subject to the affiliate and insider transaction rules applicable to member banks of the Federal Reserve as well as additional limitations imposed by the OCC. These provisions prohibit or limit the Bank from extending credit to, or entering into certain transactions with principal stockholders, directors and executive officers of the banking institution and certain of its affiliates. The Dodd-Frank Act imposed further

restrictions on transactions with certain affiliates and extension of credit to executive officers, directors and principal stockholders.

Limitation on Capital Distributions. The OCC and FRB regulate all capital distributions made by the Bank, directly or indirectly, to the holding company, including dividend payments. The Bank must receive approval from the OCC and FRB to pay dividends to the Bancorp if, after paying those dividends, the Bank would fail to meet the required minimum levels under risk-based capital guidelines and the minimum leverage and tangible capital ratio requirements. Payment of dividends by the Bank also may be restricted at any time at the discretion of the OCC if it deems the payment to constitute an unsafe and unsound banking practice.

Loans to One Borrower. Under the Home Owners Loan Act (HOLA), loans to one borrower may not be in excess of 15 percent of Tier 1 and Tier 2 capital plus any portion of the allowance for loan losses not included in Tier 2 capital. This limit was \$256 million as of December 31, 2018. For further information, see MD&A - Risk Management.

Bank Secrecy Act and Anti-Money Laundering. The Bank is subject to the BSA and other anti-money laundering laws and regulations, including the USA PATRIOT Act. The BSA requires all financial institutions to, among other things, establish a risk-based system of internal controls reasonably designed to prevent money laundering and the financing of terrorism. The BSA includes various record keeping and reporting requirements such as cash transaction and suspicious activity reporting as well as due diligence requirements. The Bank is also required to comply with U.S. Treasury's Office of Foreign Assets Control imposed economic sanctions that affect transactions with designated foreign countries, nationals, individuals, entities and others.

The Economic Growth, Regulatory Relief and Consumer Protection Act of 2018

On May 24, 2018, the Economic Growth, Regulatory Relief, and Consumer Protection Act ("Economic Growth Act") was enacted, which repealed or modified several provisions of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 ("Dodd-Frank Act"). Certain key aspects of the Economic Growth Act that have the potential to affect the Company's business and results of operations include:

- Raising the total asset threshold from \$10 billion to \$250 billion at which bank holding companies are required to conduct annual company-run stress tests mandated by the Dodd-Frank Act.
- Revising the definition of high volatility commercial real estate loans to ease the regulatory burden associated with the identification of loans that meet qualifying criteria.
- Providing that certain reciprocal deposits shall not be considered brokered deposits, subject to certain limitations. Entitling federal savings associations, such as the Bank, with less than \$20 billion in total assets as of December 31, 2017, an option to elect to operate as covered savings associations (similar to a national bank) without changing their charter.

Consumer Protection Laws and Regulations

The Bank is subject to a number of federal consumer protection laws and regulations. These include, among others, the Truth in Lending Act, the Truth in Savings Act, the Equal Credit Opportunity Act, the Fair Housing Act, the Fair Credit Reporting Act, the Servicemembers Civil Relief Act, the Expedited Funds Availability Act, the Community Reinvestment Act, the Real Estate Settlement Procedures Act, electronic funds transfer laws, redlining laws, predatory lending laws, laws prohibiting unfair, deceptive or abusive acts or practices in connection with the offer, or sale of consumer financial products or services, and the GLBA regarding customer privacy and data security.

The Bank is subject to supervision by the CFPB, which has responsibility for enforcing federal consumer financial laws. The CFPB has broad rulemaking authority to administer and carry out the provisions of the Dodd-Frank Act with respect to financial institutions that offer covered financial products and services to consumers, including prohibitions against unfair, deceptive abusive acts or practices in connection with any transaction with a consumer for a consumer financial product or service, or the offering of a consumer financial product or service including regulations related to the origination and servicing of residential mortgages. The Bank is subject to the CFPB's supervisory, examination and enforcement authority with respect to consumer protection laws and regulations. As a result, we could incur increased costs, potential litigation or be materially limited or restricted in our business, product offerings or services in the future.

Due to regulatory focus on compliance with consumer protection laws and regulations, portions of our lending operations which most directly deal with consumers, including mortgage and consumer lending, may pose particular challenges. Further, the CFPB continues to propose new rules and to amend existing rules. While we are not aware of any material compliance issues related to our mortgage and consumer lending practices, the focus of regulators and the changes to regulations may increase our compliance risks. Despite the supervision and oversight we exercise in these areas, failure to comply with these regulations could result in the Bank being liable for damages to individual

borrowers or other imposed penalties.

Additionally, the Equal Credit Opportunity Act and the Fair Housing Act prohibit financial institutions from engaging in discriminatory lending practices. The Department of Justice, CFPB, and other agencies are responsible for enforcing these laws and regulations. Private parties may also have the ability to challenge an institution's performance under fair lending laws in class action litigation. A successful challenge to the Bank's performance under the fair lending laws and regulations could adversely impact the Bank's rating under the Community Reinvestment Act and result in a wide variety of sanctions or penalties or limit certain revenue channels.

Regulatory Matters

Supervisory Agreement. The Supervisory Agreement originally dated January 27, 2010, was lifted by the Federal Reserve on August 14, 2018. For further information and a complete description of all of the terms of the Supervisory Agreement, please refer to the copy of the Supervisory Agreement filed with the SEC as an exhibit to our 2016 Form 10-K for the year ended December 31, 2016.

Consent Order with CFPB. On September 29, 2014, the Bank entered into a Consent Order with the CFPB. The Consent Order relates to alleged violations of federal consumer financial laws arising from the Bank's residential first mortgage loan loss mitigation practices and default servicing operations dating back to 2011. Under the terms of the Consent Order, the Bank paid \$28 million for borrower remediation and \$10 million in civil money penalties. The settlement did not include an admission of wrongdoing on the part of the Bank or its employees, directors, officers, or agents. For further information and a complete description of all of the terms of the Consent Order, please refer to the copy of the Consent Order filed with the SEC as an exhibit to our Current Report on Form 8-K filed on September 29, 2014.

Incentive Compensation

The U.S. bank regulatory agencies issued comprehensive guidance on incentive compensation policies intended to ensure that the incentive compensation policies of U.S. banks do not undermine safety and soundness by encouraging excessive risk-taking. The U.S. bank regulatory agencies review, as part of the regular, risk-focused examination process, the incentive compensation arrangements of U.S. banks that are not "large, complex banking organizations." These reviews are tailored to each bank based on the scope and complexity of the bank's activities and the prevalence of incentive compensation arrangements.

Additional Information

Our executive offices are located at 5151 Corporate Drive, Troy, Michigan 48098, and our telephone number is (248) 312-2000. Our stock is traded on the NYSE under the symbol "FBC."

We make our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act available free of charge on our website at www.flagstar.com, under "Investor Relations," as soon as reasonably practicable after we electronically file such material with the SEC. These reports are also available without charge on the SEC website at www.sec.gov.

ITEM 1A. RISK FACTORS

Our financial condition and results of operations may be adversely affected by various factors, many of which are beyond our control. In addition to the factors identified elsewhere in this Report, we believe the most significant risk factors affecting our business are set forth below.

Market, Interest Rate, Credit and Liquidity Risk

Economic and general conditions in the markets in which we operate may adversely affect our business.

Our business and results of operations are affected by economic and market conditions, political uncertainty and social conditions, factors impacting the level and volatility of short-term and long-term interest rates, inflation, home prices, unemployment and under-employment levels, bankruptcies, household income, consumer spending, fluctuations in

both debt and equity capital markets and currencies, liquidity of the financial markets, the availability and cost of capital and credit, investor sentiment and confidence in the financial markets, and the sustainability of economic growth. Deterioration of any of these conditions could adversely affect our business segments, the level of credit risk we have assumed, our capital levels, liquidity, and our results of operations.

Domestic and international fiscal and monetary policies also affect our business. Central bank actions, particularly those of the Federal Reserve, can affect the value of financial instruments and other assets, such as investment securities and MSRs, and their policies can affect our borrowers, potentially increasing the risk that they may fail to repay their loans. Changes in fiscal and monetary policies are beyond our control and difficult to predict but could have an adverse impact on our capital requirements and the cost of running our business.

Changes in interest rates could adversely affect our financial condition and results of operations including our net interest margin, mortgage related assets, and our investment portfolio.

Our results of operations and financial condition could be significantly affected by changes in interest rates. Our financial results depend substantially on net interest income, which is the difference between the interest income that we earn on interest-earning assets and the interest expense we pay on interest-bearing liabilities. Net interest income represented 53 percent of our total revenue for the full year ended December 31, 2018.

Changes in interest rates may affect the expected average life of our mortgage LHFI and mortgage backed securities and, to a lesser extent, our commercial loans. Decreases in interest rates can trigger an increase in unscheduled prepayments of our loans and mortgage backed securities as borrowers refinance to reduce their own borrowing costs. Conversely, increases in interest rates may decrease loan refinance activity.

The fair value of our fixed-rate financial instruments, including certain LHFI, LHFS, and investment securities is affected by changes in interest rates. If interest rates increase, the fair value of our fixed-rate financial instruments will generally decline and, therefore, have a negative effect on our financial results. We use derivatives to provide a level of protection against interest rate risks, but no hedging strategy will offset this risk completely.

Additionally, the fair value of our MSRs is highly sensitive to changes in interest rates and changes in market implied interest rate volatility. Decreases in interest rates can trigger an increase in actual repayments and market expectation for higher levels of repayments in the future which have a negative impact on MSR fair value. Conversely, higher rates typically drive lower repayments which result in an increase in the MSR fair value. We utilize derivatives to manage the impact of changes in the fair value of the MSRs. Our risk management strategies, which rely on assumptions or projections, may not adequately mitigate the impact of changes in interest rates, interest rate volatility, credit spreads or prepayment speeds, and as a result, the change in the fair value of MSRs may negatively impact earnings.

Changes in the method of determining the London Inter-Bank Offered Rate (LIBOR), or the replacement of LIBOR with an alternative reference rate, may adversely affect interest income or expense.

On July 27, 2017, the United Kingdom Financial Conduct Authority, which oversees LIBOR, formally announced that it could not assure the continued existence of LIBOR in its current form beyond the end of 2021, and that an orderly transition process to one or more alternative benchmarks should begin. In June 2017, the Alternative Reference Rates Committee, a steering committee comprised of large U.S. financial institutions organized by the Federal Reserve, announced that it had selected a modified version of the unpublished Broad Treasuries Financing Rate as the preferred alternative reference rate for U.S. dollar obligations. This rate, now referred to as the Secured Overnight Financing Rate (SOFR), is based on actual transactions in certain portions of overnight repurchase agreement markets for certain U.S. Treasury obligations, and was first published during the first half of 2018.

It is unclear whether, or in what form, LIBOR will continue to exist after 2021. If LIBOR ceases to exist or if the methods of calculating LIBOR change from current methods for any reason, interest rates on our floating rate loans, deposits, obligations, derivatives, and other financial instruments tied to LIBOR rates, as well as the revenue and expenses associated with those financial instruments, may be adversely affected. Additionally, whether or not SOFR attains market traction as a replacement to LIBOR remains in question and it remains uncertain at this time what the impact of a possible transition to SOFR may have on our business, financial result and operations.

Rising interest rates and adverse changes in mortgage market conditions could reduce mortgage revenue.

In 2018, approximately 47 percent of our revenue was derived from our Mortgage Origination segment which includes activities related to the origination and sales of residential mortgages. The residential real estate mortgage lending business is sensitive to changes in interest rates. Declining interest rates generally increase the volume of mortgage originations while higher interest rates generally cause that volume to decrease. Historically, mortgage origination volume and sales for the Bank and for other financial institutions have risen and fallen in response to these and other factors. An increase in interest rates and/or a decrease in our mortgage production volume could have a material adverse effect on our operating results. During 2018, average 10 year U.S. Treasury rates, on which we base our pricing of our 30 year mortgages, was 2.91 percent, 58 basis points higher than average rates experienced during 2017. The sustained higher rates experienced throughout 2018 negatively impacted the mortgage market including loan origination volume and refinancing activity.

In addition to being affected by interest rates, the secondary mortgage markets are also subject to investor demand for residential mortgage loans and investor yield requirements for these loans. These conditions may fluctuate or worsen in the future. Adverse market conditions, including increased volatility and reduced market demand, could result in greater risk in retaining mortgage loans pending their sale to investors. A prolonged period of secondary market illiquidity may result in a reduction of our loan mortgage production volume and could have a material adverse effect on our financial condition and results of operations.

Our mortgage origination business is also subject to the cyclical and seasonal trends of the real estate market. Cyclicity in our industry could lead to periods of strong growth in the mortgage and real estate markets followed by periods of sharp declines and losses in such markets. Seasonal trends have historically reflected the general patterns of residential and commercial real estate sales, which typically peak in the spring and summer seasons. One of the primary influences on our mortgage business is the aggregate demand for mortgage loans, which is affected by prevailing interest rates, housing supply and demand, residential construction trends, and overall economic conditions. If we are unable to respond to the cyclicity of our industry by appropriately adjusting our operations or relying on the strength of our other product offerings during cyclical downturns, our business, financial condition and results of operations could be adversely affected.

To effectively manage our MSR concentration risk we may have to sell our MSRs when market conditions are not optimal or hold MSRs at a level which is punitive to our Common Equity Tier 1 capital (CET1) under Basel III.

We are subject to capital standards requirements, including requirements of the Dodd-Frank Act and those developed by the Bank's regulators based on the Basel Committee on Banking Supervision, commonly referred to as Basel III. Basel III established a qualifying criteria for regulatory capital, including limitations on the amount of DTAs and MSRs that may be held without triggering higher capital requirements. Basel III currently limits the amount of MSRs and DTAs each to 10 percent of CET1, individually, and 15 percent of CET1, in the aggregate.

As of December 31, 2018, we had \$290 million in MSRs and a MSR to Common Equity Tier 1 Capital ratio of 23.0 percent. We produced, on average, approximately \$89 million of new MSRs per quarter in 2018 and we expect to continue to generate MSRs going forward. Considering the volume of MSRs that we generate, we must continually sell MSRs to manage the concentration of this asset. In 2018, we sold \$371 million in MSRs and as of December 31, 2018, we had pending MSR sales with a fair value of \$44 million which closed during the first quarter of 2019. While our established plan to manage our MSR concentration incorporates our production volumes and required sales, no assurance can be given that we will be able to do so. Additionally, to manage our MSR concentration, we may have to sell our MSRs at a price less than their fair value due to market constraints present at the time of sale which could have an adverse effect on our financial condition and results of operations.

On October 27, 2017, the agencies issued a notice of proposed rulemaking (NPR) which would simplify certain aspects of the Basel III capital rules. The agencies expect that the capital treatment and transition provisions for items covered by this final rule will change once the simplification proposal is finalized and effective. Specifically, the proposal would increase the limit on MSRs to 25 percent of CET1 and eliminate the aggregate 15 percent CET1 deduction threshold for MSRs and temporary difference DTAs. The increase in the limit on MSRs would allow us to hold up to \$347 million in MSRs without being punitive to our capital ratios. The regulators have not yet issued their final rule.

In preparation for the NPR, the Basel III implementation phase-in has been halted for the treatment of MSRs and certain DTAs. The agencies issued a final rule that will maintain the capital rules' 2017 transition provisions for several regulatory capital deductions and certain other requirements that are subject to multi-year phase-in schedules in the regulatory capital rules. Specifically, the final rule will maintain the capital rules' 2017 transition provisions at 80 percent for the regulatory capital treatment of the following items: (i) MSRs, (ii) DTAs arising from temporary

differences that could not be realized through net operating loss carrybacks, (iii) investments in the capital of unconsolidated financial institutions, and (iv) minority interests. As of December 31, 2018, we had \$290 million on MSRs, \$48 million in DTAs arising from temporary differences and no material investments in unconsolidated financial institutions or minority interest. This final rule will maintain the 2017 transition provisions for certain items for non-advanced approach banks, such as the Bank.

Our ALLL could be too low to sufficiently cover future credit losses. As of December 31, 2018, our ALLL was \$128 million, covering 1.4 percent of total loans held-for-investment. Our estimate of the inherent losses is imperfect and based on management judgment.

Our ALLL, which reflects our estimate of such losses inherent in the loan portfolio at December 31, 2018, may not be adequate to cover actual credit losses. If this allowance is insufficient, future provisions for credit losses could adversely affect

our financial condition and results of operations. We attempt to limit the risk that borrowers will fail to repay loans by carefully underwriting our loans, but losses nevertheless occur in the ordinary course of business. Our ALLL is based on historical experience as well as our evaluation of the risks inherent in the loan portfolio at December 31, 2018. The determination of an appropriate level of loan loss allowance is a subjective process that requires significant management judgment, including estimates of loss and the loss emergence period, estimates and judgments about the collectability of our loan portfolio including but not limited to the creditworthiness of our borrowers and the value of real estate or other collateral backing the repayment of loans. New information regarding existing loans, identification of additional problem loans, failure of borrowers and guarantors to perform in accordance with the terms of their loans, and other factors, both within and outside of our control, may require an increase in the ALLL. Moreover, our regulators, as part of their supervisory function, periodically review our ALLL and may recommend or require us to increase the amount of our ALLL, based on their judgment, which may be different from that of our management. Any increase in our loan losses would have an adverse effect on our earnings and financial condition.

Concentration of loans held-for-investment in certain geographic locations and markets may increase the magnitude of potential losses should defaults occur.

Our residential mortgage loan portfolio is geographically concentrated in certain states, including California and Michigan, which comprise approximately 52 percent of the portfolio. In addition, our commercial loan portfolio has a concentration of Michigan lending relationships. Approximately 44 percent of our CRE loans are collateralized by properties in Michigan and 29 percent of our C&I borrowers are located in Michigan. These concentrations have made, and will continue to make, our loan portfolio particularly susceptible to downturns in the local economies and the real estate and mortgage markets in these areas. Adverse conditions that are beyond our control may affect these areas, including unemployment, inflation, recession, natural disasters, declining property values, municipal bankruptcies and other factors which could increase both the probability and severity of defaults in our loan portfolio, reduce our ability to generate new loans and negatively affect our financial results.

In 2018, we continued to grow our commercial portfolio to \$5.0 billion at December 31, 2018. As a part of that, CRE and C&I loans grew to \$3.6 billion and comprised 39 percent of our total LHFI portfolio. Additionally, our home builder finance program reached \$718 million in outstanding loans at December 31, 2018. The home builder lending portfolio contains secured and unsecured loans and our lending platform originates loans throughout the U.S. with regional offices in Houston and Denver. The growth of our home builder lending business may be impacted by overall economic conditions in the areas builders operate as well as new home construction rates and trends.

Commercial loans, excluding our warehouse loans, generally expose us to a greater risk of nonpayment and loss than residential real estate loans due to the more complex nature of underwriting. Such loans typically involve larger loan balances to single borrowers or groups of related borrowers compared to residential real estate loans. At December 31, 2018, our largest CRE and C&I borrowers had loans of \$71 million and \$70 million, respectively. Further, we have commitments up to \$100 million in our CRE and C&I portfolios. As such, a default by one of our larger borrowers could result in a significant loss relative to our ALLL. Additionally, secured loans, including residential and commercial real estate, may experience changes in the underlying collateral value due to adverse market conditions which could result in increased charge-offs in the event of a loan default.

At December 31, 2018, our adjustable-rate warehouse lines of credit granted to other mortgage lenders was \$3.8 billion, of which \$1.5 billion was outstanding. There may be risks associated with the mortgage lenders that borrow from the Bank, including credit risk, inadequate underwriting, and potential external fraud. At December 31, 2018, our largest borrower had an outstanding advance of \$80 million. A default by one of our larger warehouse borrowers could result in a large loss. Additionally, adverse changes to industry competition, mortgage demand and the interest rate environment may have a negative impact on warehouse lending.

Liquidity risk may affect our ability to meet obligations and impact our ability to grow our business.

We require substantial liquidity to repay our customers' deposits, fulfill loan demand, meet borrowing obligations as they come due, and fund our operations under both normal operating environments and unforeseen circumstances causing liquidity stress. Our liquidity could be impaired by our inability to access the capital markets or unforeseen outflows of deposits. Our access to liquidity, including deposits, as well as the cost of that liquidity, is dependent on various factors, a number of which could make funding more difficult, more expensive or unavailable on any terms. These factors include: losses or declining financial results, material changes to operating margins, financial leverage on an absolute basis or relative to peers, changes within the organization, specific events that impact our financial condition or reputation, disruptions in the capital

markets, specific events that adversely impact the financial services industry, counterparty availability, the corporate and regulatory structure, balance sheet and capital structure, geographic and business diversification, interest rate fluctuations, market share and competitive position, general economic conditions and the legal, regulatory, accounting and tax environments governing funding transactions. Many of these factors are beyond our control. A material deterioration in any one or a combination of these factors could result in a downgrade of our credit or servicer standing with counterparties or a decline in our reputation within the marketplace, and could result in higher cash outflows requiring additional access to liquidity, having a limited ability to borrow funds, maintain or increase deposits (including custodial deposits from our agency servicing portfolio) or to raise capital on commercially reasonable terms or at all. If we are unable to maintain and grow certain of these financing arrangements, are restricted from accessing certain funding sources by our regulators, are unable to arrange for new financing on acceptable terms, or if we default on any of the covenants imposed upon us by our borrowing facilities, then we may have to limit our growth, reduce the number of loans we are able to originate or take actions that could have other negative effects on our operations.

We are a holding company and are, therefore, dependent on the Bank for funding of obligations.

As a holding company with no significant assets other than the capital stock of the Bank and cash on hand, our ability to service our debt, including interest payments on our senior notes and trust preferred securities, pay dividends, repurchase shares of our common stock, pay for certain services we purchase from the Bank and cover operating expenses, depend upon available cash on hand and the receipt of dividends from the Bank. The holding company had cash and cash equivalents of \$201 million at December 31, 2018, or approximately 3.2 years of future cash outflows, dividend payments, share repurchases and debt service coverage when excluding the redemption of \$250 million of senior notes which mature on July 15, 2021. On January 29, 2019, our Board of Directors approved an accelerated share repurchase ("ASR") agreement with Wells Fargo, N.A. to repurchase up to \$50 million of the Company's common stock. Operating expenses, which include costs paid to the Bank, totaled \$34 million for the year ended December 31, 2018. The declaration and payment of dividends by the Bank on all classes of its capital stock is subject to the discretion of the Bank's Board of Directors and to applicable regulatory and legal limitations. If the Bank, does not, or cannot, make sufficient dividend payments to us, we may not be able to service our debt, which could have a material adverse effect on our financial condition and results of operations or could cause us to take other actions which could be materially detrimental.

Regulatory Risk

We are highly dependent on the Agencies to buy mortgage loans that we originate. Changes in these entities or their current roles could adversely affect our business, financial condition and results of operations.

We generate mortgage revenues primarily from gains on the sale of single-family residential loans pursuant to programs currently offered by Fannie Mae, Freddie Mac, Ginnie Mae and other investors. These entities account for a substantial portion of the secondary market in residential mortgage loans. During the year ended December 31, 2018, we sold approximately 50 percent of our mortgage loans to Fannie Mae and Freddie Mac. Any future changes in these programs, our eligibility to participate in such programs, the criteria for loans to be accepted or laws that significantly affect the activity of such entities could, in turn, result in a lower volume of corresponding loan originations or other administrative costs which may materially adversely affect our results of operations or could cause us to take other actions that would be materially detrimental.

Fannie Mae and Freddie Mac remain in conservatorship and a path forward for them to emerge from conservatorship is unclear. Their roles could be reduced, modified or eliminated as a result of regulatory actions and the nature of their guarantees could be limited or eliminated relative to historical measurements. The elimination or modification of the traditional roles of Fannie Mae or Freddie Mac could create additional competition in the market and significantly and

adversely affect our business, financial condition and results of operations.

Changes in the servicing, origination, or underwriting guidelines or criteria required by the Agencies could adversely affect our business, financial condition and results of operations.

We are required to follow specific guidelines or criteria that impact the way that we originate, underwrite, or service. Agency loans, including guidelines with respect to credit standards for mortgage loans, our staffing levels and other servicing practices, the servicing and ancillary fees that we may charge, our modification standards and procedures and the amount of non-reimbursable advances.

We cannot negotiate these terms with the Agencies and they are subject to change at any time. A significant change in these guidelines which decreases the fees we charge or requires us to expend additional resources in providing mortgage

services could decrease our revenues or increase our costs, which would adversely affect our business, financial condition and results of operations.

In addition, changes in the nature or extent of the guarantees provided by Fannie Mae and Freddie Mac or the insurance provided by the FHA could also have broad adverse market implications. The fees that we are required to pay to the Agencies for these guarantees have changed significantly over time and any future increases in these fees would adversely affect our business, financial condition and results of operations.

We depend upon having FDIC insurance to raise deposit funding at reasonable rates. Future changes in deposit insurance premiums and special FDIC assessments could adversely affect our earnings.

The Dodd-Frank Act required the FDIC to substantially revise its regulations for determining the amount of an institution's deposit insurance premiums. Consequently, the FDIC has defined the deposit insurance assessment base for an insured depository institution as average consolidated total assets during the assessment period, minus average Tier 1 Capital. Our assessment rate is determined by use of a scorecard that combines our CAMELS ratings with certain other financial information. Changes in the level and mix of these financial components in the scorecard may result in a higher assessment rate. The FDIC may determine that we present a higher risk to the DIF than other banks due to various factors. These factors include significant risks relating to interest rates, loan portfolio and geographic concentration, concentration of high credit risk loans, increased loan losses, regulatory compliance, existing and future litigation and other factors. As a result, we could be subject to higher deposit insurance premiums and special assessments in the future that could adversely affect our earnings. The Bank's deposit insurance premiums and special assessments in the future also may be higher than competing banks may be required to pay. For the years ended December 31, 2018, 2017 and 2016, our FDIC insurance expense premiums totaled \$22 million, \$16 million and \$11 million, respectively.

Operational Risk

Our recent acquisition of bank branches from Wells Fargo involves integration and other risks.

Bank branch acquisitions involve a number of challenges including, the ability to integrate new business into operations, internal controls and regulatory functions. There is no assurance we will be able to limit the outflow of deposits held by our new customers in the acquired branches or attract new deposits and generate new interest-earning assets in geographic areas we did not previously serve. There is no guarantee that the acquired branches will achieve results in the future similar to those achieved by our existing banking business; that we will compete effectively in the market areas served by acquired branches; or that we will manage any growth resulting from the transaction effectively. We face the additional risk that the anticipated benefits of the acquisition may not be realized fully or at all, or within the time period expected.

A failure of our information technology systems, or those of any of our key third party vendors or service providers, could cause operational losses and damage our reputation.

Our businesses are increasingly dependent on our ability to process, record and monitor a large number of complex transactions and data. If our internal information technology systems fail, we may be unable to conduct business for a period of time, which may impact our financial results if that interruption is sustained. In addition, our reputation with our customers or business partners may suffer, which could have a further, long-term impact on our financial results.

Because we conduct part of our business over the Internet and outsource a significant number of our critical functions to third parties, our operations depend on our third-party service providers to maintain and operate their own technology systems. To the extent these third parties' systems fail, despite our monitoring and contingency plans, we

may be unable to conduct business or provide certain services, and we may face financial and reputational losses as a result.

We face operational risks due to the high volume and the high dollar value of transactions we process.

We rely on the ability of our employees and systems to process a wide variety of transactions. Many of the transactions we process may be of high dollar value, such as those related to mortgage lending and warehouse advances. In 2018, we originated a total of \$32.5 billion in residential mortgage loans and processed \$33.9 billion of warehouse lending advances. We face operational risk from, but not limited to, the risk of fraud by employees or persons outside our company, the execution of unauthorized transactions, errors relating to transaction processing and technology, breaches of our internal control systems or failures of those of our suppliers or counterparties, compliance failures, cyber-attacks, technology failures, or unforeseen problems related to system implementations or upgrades, business continuation and disaster recovery issues, and other external

events. This risk of loss also includes the potential legal actions that could arise as a result of an operational deficiency or as a result of noncompliance with applicable regulatory standards, adverse business decisions or their implementation, and customer attrition due to potential negative publicity. The occurrence of any of these events could result in a financial loss, regulatory action or damage to our reputation.

We may lose market share to our competitors if we are not able to respond to technological change and introduce new products and services.

Financial products and services have become increasingly technologically driven. We may not be able to respond to technological innovations as quickly as our competitors do. Certain of our competitors are making significantly greater investments and allocating significantly more in financial resources toward technological innovations than we historically have. Our ability to meet the needs of our customers and introduce competitive products in a cost-efficient manner depends on our responsiveness to technological advances, investment in new technology as it becomes available, and obtaining and maintaining related essential personnel. Furthermore, the introduction of new technologies and products by financial technology companies and platforms may adversely affect our ability to maintain our customer base, obtain new customers or successfully grow our business. The failure to respond to the product demands of our customers, due to cost, proficiency or otherwise, could have a material adverse impact on our business and therefore on our financial condition and results of operations.

We collect, store and transfer our customers' personally identifiable information. Any cybersecurity attack or other compromise to the security of that information could adversely impact our business and financial condition.

Cybersecurity related attacks are attempted on an ongoing basis which pose a risk of data breaches relative to the processing of consumer transactions that contain customers' personally identifiable information. As a part of conducting business, we receive, transmit and store a large volume of personally identifiable information and other user data either on our network or in the cloud.

Cybersecurity risks for banking institutions have increased significantly in recent years due to new technologies, the reliance on technology to conduct financial transactions and the increased sophistication of organized crime and hackers. A cybersecurity attack or information security breach could adversely impact our ability to conduct business due to the potential costs for remediation, protection and litigation and reputational damage with customers, business partners and investors.

There are myriad federal, state, local and international laws regarding privacy and the storing, sharing, use, disclosure and protection of personally identifiable information and user data. We have policies and processes in place that are intended to meet the requirements of those laws, including security systems to prevent unauthorized access to that information. Nevertheless, those processes and systems may be inadequate. Also, to the extent we rely upon third parties to handle personally identifiable data on our behalf, we may be responsible if such data is compromised or subject to a cybersecurity attack while in the custody and control of those third parties.

Privacy laws are continually evolving and many state and local jurisdictions have laws that differ from federal law or privacy policies, further some of those policies or laws may conflict. If we fail to comply with applicable privacy policies or federal, state, local or international laws and regulations or experience any compromise of security that results in the unauthorized release of personally identifiable information or other user data, those events could damage the reputation of our business, and discourage potential users from utilizing our products and services. In addition, we may have to bear the cost of mitigating identity theft concerns, and may be subject to fines or legal proceedings by governmental agencies or consumers. Any of these events could adversely affect our business and financial condition.

We may be terminated as a servicer or subservicer or incur costs, liabilities, fines and other sanctions if we fail to satisfy our servicing obligations, including our obligations with respect to mortgage loan foreclosure actions.

Servicing revenue makes up approximately 11 percent of our total revenue and contributed approximately \$1.8 billion in average custodial deposits during 2018. At December 31, 2018, we had relationships with 7 owners of MSRs, excluding ourselves, in which we act as servicer or subservicer for the mortgage loans they own. Due to the limited number of relationships, discontinuation of existing agreements with any of those third parties or adverse changes in contractual terms could have a significant negative impact to our mortgage servicing revenue. The terms and conditions in which a master servicer may terminate subservicing contracts are broad and, in some instances, could be exercised at the discretion of the master servicer without requiring cause. Additionally, the master servicer directs the oversight of custodial deposits associated with serviced loans and, to the extent allowable, could choose to transfer the oversight of the Bank's custodial deposits to another depository institution. Further, as servicer or subservicer of loans, we have certain contractual obligations, including foreclosing on defaulted mortgage loans or, to the extent applicable, considering alternatives to foreclosure. If we commit a

material breach of our obligations as servicer, we may be subject to termination if the breach is not cured within a specified period of time following notice, causing us to lose servicing income.

We may be required to repurchase mortgage loans, pay fees or indemnify buyers against losses.

When mortgage loans are sold by us, we make customary representations and warranties to purchasers, guarantors and insurers, including the Agencies, about the mortgage loans, and the manner in which they were originated. Whole loan sale agreements require us to repurchase or substitute mortgage loans, or indemnify buyers against losses, in the event we breach these representations or warranties. In addition, we may be required to repurchase mortgage loans as a result of early payment default of the borrower or we may be required to pay fees. We also are subject to litigation relating to these representations and warranties which may result in significant costs. With respect to loans that are originated through our broker or correspondent channels, the remedies we have available against the originating broker or correspondent, if any, may not be as broad as the remedies available to purchasers, guarantors and insurers of mortgage loans against us. We also face further risk that the originating broker or correspondent, if any, may not have the financial capacity to perform remedies that otherwise may be available. Therefore, if a purchaser, guarantor or insurer enforces its remedies against us, we may not be able to recover losses from the originating broker or correspondent. If repurchase and indemnity demands increase and such demands are valid claims, our liquidity, results of operations and financial condition may also be adversely affected.

For certain investors and/or certain transactions, we may be contractually obligated to repurchase a mortgage loan or reimburse the investor for credit or other losses incurred on the loan as a remedy for servicing errors with respect to the loan. If we have increased repurchase obligations because of claims for which we did not satisfy our obligations, or increased loss severity on such repurchases, we may have a significant reduction to noninterest income or an increase to noninterest expense. We may incur significant costs if we are required to, or if we elect to, re-execute or re-file documents or take other action in our capacity as a servicer in connection with pending or completed foreclosures. We may incur litigation costs if the validity of a foreclosure action is challenged by a borrower. Any of these actions may harm our reputation or negatively affect our servicing business and, as a result, our profitability.

Our representation and warranty reserve, which is based on an estimate of probable future losses, was \$7 million at December 31, 2018. This may not be adequate to cover losses for loans that we have sold or securitized for which we may be subsequently required to repurchase, pay fines or fees, or indemnify purchasers and insurers because of violations of customary representations and warranties. Our regulators, as part of their supervisory function, periodically review our representation and warranty reserve for losses. Our regulators may recommend or require us to increase our reserve, based on their judgment, which may differ from that of our management. The repurchase demand pipeline was \$9 million UPB at December 31, 2018.

We utilize third party mortgage originators which subjects us to strategic, reputation, compliance and operational risk.

In 2018, approximately 86 percent of our residential first mortgage volume depended upon the use of third party mortgage originators, i.e. mortgage brokers and correspondent lenders, who are not our employees. These third parties originate mortgages and provide services to many different banks and other entities. Accordingly, they may have relationships with or loyalties to such banks and other parties that are different from those they have with or to us. Failure to maintain good relations with such third party mortgage originators could have a negative impact on our market share which would negatively impact our results of operations.

We rely on third party mortgage originators to originate and document the mortgage loans we purchase or originate. While we perform due diligence on the mortgage companies with whom we do business and review the loan files and loan documents we purchase to attempt to detect any irregularities or legal noncompliance, we have less control over these originators than employees of the Bank.

Due to regulatory scrutiny, our third party mortgage originators could choose or be required to either reduce the scope of their business or exit the mortgage origination business altogether. The TILA-RESPA Integrated Disclosure Rule issued by the CFPB establishes comprehensive mortgage disclosure requirements for lenders and settlement agents in connection with most closed-end consumer credit transactions secured by real property. The rule requires certain disclosures to be provided to consumers in connection with applying for and closing on a mortgage loan. The rule also mandates the use of specific disclosure forms, timing of communicating information to borrowers and certain record keeping requirements. The ongoing administrative burden and the system requirements associated with complying with these rules or potential changes to these rules could impact our mortgage volume and increase costs. In addition, these arrangements with third party mortgage originators and the fees payable by us to such third parties could be subject to regulatory scrutiny and restrictions in the future.

The Equal Credit Opportunity Act and the Fair Housing Act, prohibit discriminatory lending practices by lenders, including financial institutions. Mortgage and consumer lending practices raise compliance risks resulting from the detailed and complex nature of mortgage and consumer lending laws regulations imposed by federal regulatory agencies, and the relatively independent and diverse operating channels in which loans are originated. As we originate loans through various channels, we, and our third party mortgage originators, are especially impacted by these laws and regulations and are required to implement appropriate policies and procedures to help ensure compliance with fair lending laws and regulations and to avoid lending practices that result in the disparate treatment of or disparate impact to borrowers across our various locations under multiple channels. Failure to comply with these laws and regulations, by us or our third party mortgage originators, could result in the Bank being liable for damages to individual borrowers or other imposed penalties.

General Risk Factors

MP Thrift, an entity managed and controlled by MatlinPatterson, owns 47.8 percent of our common stock. Future issuance of Flagstar's common stock in the public market, or as a result of actions taken by MP Thrift, could adversely affect the trading price of Flagstar's common stock.

As of December 31, 2018, MP Thrift owned 47.8 percent of the Company's common stock. Sales of a substantial number of shares of Flagstar's common stock in the public market, or the perception that these sales might occur, may cause the market price of Flagstar's common stock to decline. Further, a large quantity of our shares introduced into the market, either at once or over time, could increase the supply of Flagstar common stock, thereby putting pressure on our stock price. Pricing pressure could further be exacerbated by low trading volumes and market conditions, both of which may impact the extent of time it may take for pricing to rationalize.

We are subject to various legal or regulatory investigations and proceedings.

At any given time, we are involved with a number of legal and regulatory examinations as a part of the routine reviews conducted by regulators and other parties which may involve consumer protection, employment, tort, and numerous other laws and regulations. Proceedings or actions brought against us may result in judgments, settlements, fines, injunctions, business improvement orders, consent orders, supervisory agreements, restrictions on our business activities, or other results adverse to us, which could materially and negatively affect our business. If such claims and other matters are not resolved in a manner favorable to us, they may result in significant financial liability and/or adversely affect the market perception of us and our products and services, as well as impact customer demand for those products and services. Some of the laws and regulations to which we are subject may provide a private right of action that a consumer or class of consumers may pursue to enforce these laws and regulations. We have been, and may be in the future, subject to stockholder derivative actions, which could seek significant damages or other relief. Any financial liability or reputational damage could have a material adverse effect on our business, which, in turn, could have a material adverse effect on our financial condition and results of operations. Claims asserted against us can be highly complicated and slow to develop, making the outcome of such proceedings difficult to predict or estimate early in the process. As a participant in the financial services industry, it is likely that we will be exposed to a high level of litigation and regulatory scrutiny relating to our business and operations.

In 2018, the Ninth Circuit Federal Court of Appeals held that California state law requiring mortgage servicers to pay interest on certain mortgage escrow accounts was not, as a matter of law, preempted by the National Bank Act (*Lusnak v. Bank of America*). This ruling goes against the position that regulators, national banks and other federally-chartered financial institutions have taken regarding the preemption of state-law mortgage escrow interest requirements. The opinion issued by the Ninth Circuit Federal Court of Appeals is legal precedent only in certain parts of the western United States. If the Ninth's Circuit's holding is more broadly adopted by other Federal Circuits, including those covering states that currently have or in the future may enact statutes requiring the payment of interest

on escrow balances or if we would be required to retroactively apply interest on escrows, the Company's earnings could be adversely affected.

Although we establish accruals for legal proceedings when information related to the loss contingencies represented by those matters indicates both that a loss is probable and that the amount of loss can be reasonably estimated, we do not have accruals for all legal proceedings where we face a risk of loss. Due to the inherent subjectivity of the assessments and unpredictability of the outcome of legal and regulatory proceedings, amounts accrued may not represent the ultimate loss to us from the legal and regulatory proceedings in question. As a result, our ultimate losses may be significantly higher than the amounts accrued for legal loss contingencies. For further information, see Note 21 - Legal Proceedings, Contingencies and Commitments.

Loss of certain personnel, including key members of the Corporation's management team, could adversely affect the Corporation.

We are and will continue to be dependent upon our management team and other key personnel. Losing the services of one or more key members of our management team or other key personnel could adversely affect our operations.

In addition, we are subject to regulations that allow us to make severance payments only in limited circumstances. Our named executive officers may be entitled to certain severance and change in control benefits. Although we follow certain leading practices with respect to executive compensation including the elimination of supplemental executive retirement plans (SERPs) or other nonqualified plans for executives and avoiding severance payments for "cause" terminations or voluntary resignations, we may be subject to certain legal or regulatory risks associated with previous employment agreements or retirement plans which could impact our liabilities and results of operations related to these matters.

Other Risk Factors

The above description of risk factors is not exhaustive. Other risk factors are described elsewhere herein as well as in other reports and documents that we file with or furnish to the SEC. Other factors that could also cause results to differ from our expectations may not be described herein or in any such report or document.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Flagstar's headquarters is located in Troy, Michigan at 5151 Corporate Drive and we operate a regional office in Jackson, Michigan. We own both the headquarters and regional office buildings.

At December 31, 2018, we operated 160 bank branches in the following states:

	Owned	Leased	Total	Free-Standing Office Building	In-Store Banking Center	Buildings with Other Tenants	Total
Michigan	87	27	114	90	2	22	114
Indiana	27	6	33	31	—	2	33
California	8	—	8	8	—	—	8
Wisconsin	3	1	4	3	—	1	4
Ohio	1	—	1	1	—	—	1
Total	126	34	160	133	2	25	160

We also have 75 retail mortgage locations, 4 wholesale lending offices, and 9 commercial lending offices. These locations are primarily leased and located in 25 states.

ITEM 3. LEGAL PROCEEDINGS

From time to time, the Company is party to legal proceedings incident to its business. For further information, see Note 21 - Legal Proceedings, Contingencies and Commitments.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

18

PART II

ITEM 5. MARKET FOR THE REGISTRANT'S COMMON EQUITY AND RELATED STOCKHOLDER MATTERS

Our common stock trades on the NYSE under the trading symbol FBC. At December 31, 2018, there were 57,749,464 shares of our common stock outstanding held by 11,746 stockholders of record.

Dividends

We had not paid dividends on our common stock since the fourth quarter 2007. On January 29, 2019, our Board of Directors declared a quarterly cash dividend which will commence in the first quarter of 2019. The declaration and payment of future dividends, if any, will be considered by our Board of Directors in its discretion and will depend on a number of factors, including our financial condition, liquidity, earnings and prospective earnings.

Sale of Unregistered Securities

We made no unregistered sales of our equity securities during the fiscal year ended December 31, 2018.

Issuer Purchases of Equity Securities

Period	Total Number of Shares Purchased	Average Price per Share	Total Number of Shares Purchased as Part of Publicly Announced Plan	Maximum Number of Shares that May Yet Be Purchased Under the Plan
October 1, 2018 to October 31, 2018	—	—	—	—
November 1, 2018 to November 30, 2018	—	—	—	—
December 1, 2018 to December 31, 2018	4,709	\$ 31.51	4,709	28,919

On October 16, 2018, the Board approved the offer to repurchase common stock from beneficial owners of 99 or fewer shares of common stock, commonly referred as an odd-lot buyback. This repurchase offer is complete and expired on January 11, 2019. All repurchased shares are authorized and will be accounted for as treasury stock in the Consolidated Statements of Financial Condition.

On January 31, 2019, our Board of Directors announced an accelerated share repurchase ("ASR") agreement with Wells Fargo, N.A. to repurchase up to \$50 million of the Company's common stock. The ASR program commenced on February 1, 2019. Under the terms of the ASR, the Company received an initial delivery of approximately 1.3 million shares which represents 82 percent of the total number of shares expected to be repurchased pursuant to the ASR program, based on the closing price of \$30.85 on January 31, 2019. The total number of shares to be repurchased will be based on the average of the Company's daily volume-weighted average stock price, less a discount, during the term of the ASR program, which is expected to be completed by the end of the second quarter of 2019.

Equity Compensation Plan Information

For information with respect to securities to be issued under our equity compensation plans, see Part III, Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters, which information is hereby incorporated by reference.

<u>Capital</u>	<u>57</u>
<u>Use of Non-GAAP Financial Measures</u>	<u>60</u>
<u>Critical Accounting Estimates</u>	<u>61</u>

The following is an analysis of our financial condition and results of operations. This should be read in conjunction with our Consolidated Financial Statements and related notes filed with this report in Part II, Item 8. Financial Statements and Supplementary Data.

Overview

We are a savings and loan holding company founded in 1993. Our business is primarily conducted through our principal subsidiary, the Bank, a federally chartered savings bank founded in 1987. We provide a range of commercial, small business, and consumer banking services and we are the 5th largest bank mortgage originator in the nation. We distinguish ourselves by crafting specialized solutions for our customers, local delivery, high quality customer service and competitive product pricing. For additional details and information on each of our lines of business, see MD&A - Operating Segments and Note 23 - Segment Information.

The year ended December 31, 2018 resulted in net income of \$187 million, or \$3.21 per diluted share, and adjusted net income of \$176 million, or \$3.02 per diluted share, when excluding Wells Fargo branch acquisition expenses of \$13 million, and related hedging gains of \$24 million, both net of taxes. When comparing full year 2018 to full year 2017, net income increased \$124 million, or \$1.57 per diluted share. Excluding the Wells Fargo branch acquisition expenses and related hedging gains from 2018, and an \$80 million charge to the provision for income taxes in 2017 resulting from tax reform, adjusted net income increased \$33 million, or \$0.55 per diluted share. During 2018, we continued to grow the community bank, strengthened our balance sheet with high quality interest earning assets and stable liquidity, and continued to diversify our earnings.

Three strategic banking acquisitions in 2018 further strengthened the community bank. In the first quarter we acquired eight branches of Desert Community Bank and the mortgage loan warehouse business from Santander Bank, followed by the acquisition of 52 branches from Wells Fargo in the fourth quarter. These acquisitions expanded our banking footprint and added \$2.2 billion of deposits and \$760 million of loans to our balance sheet as of December 31, 2018.

As a result of our acquisitions and continued organic growth, average interest-earning assets increased \$2.0 billion, with broad based growth in both our commercial and consumer loan portfolios, which increased \$1.2 billion and \$704 million, respectively. The acquired low-cost deposits were the primary driver of the \$2.5 billion increase in retail and government deposits in 2018, which provides ample liquidity to fund future balance sheet growth. The increase in earning-assets, along with consistent expansion of our net interest margin reflecting higher yielding loans and low-cost deposits, drove up adjusted net interest income less the hedging gains, \$78 million, or 20 percent. Net interest income accounted for 52 percent of total revenues in 2018, compared to 45 percent in 2017.

Our mortgage servicing business continued to gain scale and we ended the year servicing nearly 827,000 accounts, representing an 87 percent increase from the prior year. During 2018, we had \$29 billion in MSR sales with subservicing retained on 100 percent of these sales, strengthening our national position as the 6th largest servicer. This business continues to provide both stable deposits and a reliable, predictable source of fee income.

The mortgage market continued to be challenging throughout 2018 as the national mortgage origination market experienced an 8 percent decline in volume from the prior year. As a result, our mortgage origination volume declined 6 percent to \$32 billion, contributing to a \$68 million decrease in net gain on loan sales. This loss was partially offset by stronger valuations and lower prepayments on our mortgage servicing assets, which improved \$14 million.

Earnings Performance Highlights

	For the Years Ended December 31,				
	2018	2017	2016	Change	Change
				2018 vs. 2017	2017 vs. 2016
	(Dollars in millions)				
Net interest income	\$497	\$390	\$323	\$ 107	\$ 67
Provision (benefit) for loan losses	(8)	6	(8)	(14)	14
Total noninterest income	439	470	487	(31)	(17)
Total noninterest expense	712	643	560	69	83
Provision for income taxes	45	148	87	(103)	61
Net income	\$187	\$63	\$171	\$ 124	\$(108)
Adjusted net income (1)	\$176	\$143	\$155	\$ 33	\$(12)
Income per share:					
Basic	\$3.26	\$1.11	\$2.71	\$ 2.15	\$(1.60)
Diluted	\$3.21	\$1.09	\$2.66	\$ 2.12	\$(1.57)
Adjusted diluted (1)	\$3.02	\$2.47	\$2.38	\$ 0.55	\$ 0.09

(1) For further information, see MD&A - Use of Non-GAAP Financial Measures.

2018 Compared to 2017

Net income increased \$124 million, or \$2.12 per diluted share, to \$187 million, or \$3.21 per diluted share.

Adjusted net income increased \$33 million, or \$0.55 per diluted share, to \$176 million, or \$3.02 per diluted share, when excluding an \$80 million charge due to tax reform in 2017 and Wells Fargo branch acquisition expenses of \$13 million, net of tax, and related hedging gains of \$24 million, net of tax, in 2018.

Net interest income increased \$107 million, or \$78 million, when excluding hedging gains of \$29 million which were reclassified from AOCI. The increase in net interest income was primarily driven by 14 percent higher average interest-earning assets, led by commercial loan growth, and net interest margin expansion of 14 basis points.

The provision for loan losses decreased \$14 million, primarily driven by minimal net charge-offs and low levels of delinquencies.

Noninterest income decreased \$31 million, primarily due to a \$68 million decrease in net gain on loan sales, partially offset by a \$14 million increase in net return on MSRs.

Noninterest expense increased \$69 million, primarily resulting from organic growth and acquisitions which drove higher compensation and benefits, along with an increase in occupancy and equipment expenses.

Provision for income taxes decreased \$103 million, primarily resulting from the revaluation of our DTAs as a result of the new tax legislation in the fourth quarter of 2017 and a lower corporate tax rate throughout 2018.

2017 Compared to 2016

Net income decreased \$108 million, or \$1.57 per diluted share, to \$63 million, or \$1.09 per diluted share.

Adjusted net income decreased \$12 million, or \$0.09 per diluted share, to \$143 million, or \$2.47 per diluted share, when excluding a \$16 million, net of tax, decrease in the fair value of the DOJ settlement in 2016 and an \$80 million charge due to tax reform in 2017.

Net interest income increased \$67 million, due to interest earning asset growth of \$2.0 billion led by higher average LHS resulting from extending turn times and accumulation of loans in support of residential mortgage backed securitization and commercial lending growth.

The provision for loan losses increased \$14 million, primarily due to 2016 sales of consumer loans which resulted in a gain and increases in the provision in 2017 driven by loan growth.

- Noninterest income decreased \$17 million, primarily due to a \$48 million decrease in net gain on loan sales and a \$24 million decrease in the fair value of the DOJ liability settlement in 2016, partially offset by a \$48 million increase in the net return on MSRs.

Noninterest expense increased \$83 million, primarily driven by growth initiatives, including our 2017 acquisitions, as well as higher mortgage volume related expenses.

Net Interest Income

The following table presents on a consolidated basis interest income from average assets and liabilities, expressed in dollars and yields:

	For the Years Ended December 31,

(1) Includes nonaccrual loans, for further information relating to nonaccrual loans, see Note 1 - Description of Business, Basis of Presentation, and Summary of Significant Accounting Policies.

(2) Includes noninterest-bearing custodial deposits that arise due to the servicing of loans for others.

(3) Interest rate spread is the difference between rates of interest earned on interest earning assets and rates of interest paid on interest-bearing liabilities.

(4) Net interest margin is net interest income divided by average interest earning assets.

(5) The year ended December 31, 2018, excludes \$29 million of hedging gains reclassified from AOCI in conjunction with the payment of long-term FHLB advances. See Non-GAAP Financial Measures for further information.

Rate/Volume Analysis

The following tables present the dollar amount of changes in interest income and interest expense for the components of interest-earning assets and interest-bearing liabilities. The table distinguishes between the changes related to average outstanding balances (changes in volume while holding the initial rate constant) and the changes related to average interest rates (changes in average rates while holding the initial balance constant). The rate/volume variances are allocated to rate.

2018 Compared to 2017

For the year ended December 31, 2018, net interest income increased \$107 million, or \$78 million when excluding a \$29 million hedging gain, compared to the same period in 2017. The increase was primarily driven by growth in average interest earning assets, led by increases in our higher yielding commercial loan portfolio, and a 14 basis point increase in net interest margin.

Our net interest margin for the year ended December 31, 2018 was 2.89 percent, compared to 2.75 percent for the year ended December 31, 2017. The increase in net interest margin was primarily due to growth in our commercial loan portfolio, partially offset by higher average rates on deposits. Loans-held-for-investment saw a 56 basis point increase

in average yield, primarily due to higher yields on our commercial loans, driven by increases in LIBOR rates during 2018. In comparison, our interest bearing deposit costs increased 41 basis points, representing a deposit beta of 41 percent, which is the change in the annualized rate of our deposits divided by the change in the Federal Reserve discount rate. The average yield on our LHF portfolio, influenced by our variable rate commercial loan portfolio, was more responsive to changes in market rates than our deposit costs. Deposit costs increased due to higher rates and an increase in use of wholesale deposits. Wholesale deposits,

27

which experienced a rate increase of 61 basis points, were primarily utilized as an additional funding source prior to the acquisition of the deposits from Wells Fargo.

Average interest-earnings assets increased \$2.0 billion for the year ended December 31, 2018, compared to the same period in 2017, primarily due to growth in the LHFI portfolio. Average commercial loans increased \$1.2 billion with broad based growth across CRE, C&I, and the warehouse loan portfolios. We continued to grow CRE and C&I loans, and the acquisition of the Santander warehouse lending business in the first quarter of 2018 increased average warehouse loans \$493 million during the year. The consumer loan portfolio increased \$704 million, primarily due to the addition of residential first mortgages and HELOCs to the LHFI portfolio.

Average interest-bearing liabilities increased \$1.3 billion for the year ended December 31, 2018, compared to the full year in 2017, primarily due to a \$1.2 billion increase in interest bearing deposits. The increase in average deposits is primarily attributable to the acquisition of deposits from DCB, which impacted the full year average by \$478 million, and one month of Wells Fargo deposits, which impacted the full year average by \$147 million. Average wholesale deposits increased \$378 million, primarily to provide additional funding prior to the acquisition of the Wells Fargo deposits.

2017 Compared to 2016

Net interest income increased \$67 million for the year ended December 31, 2017, compared to the same period in 2016. The increase was primarily driven by growth in average interest-earning assets of 16 percent, led by higher average LHFS balances and growth of our higher yielding commercial LHFI portfolios.

Our net interest margin for the year ended December 31, 2017 was 2.75 percent, as compared to 2.64 percent for the year ended December 31, 2016. The increase in net interest margin was driven by a higher average yield on interest earning assets due to the growth in our commercial loan portfolio. This was partially offset by an increase in interest expense resulting from a full year of interest on our long-term senior debt which was issued in July 2016.

Average interest-earnings assets increased \$2.0 billion for the year ended December 31, 2017, compared to the same period in 2016. The increase was due to a \$1.0 billion increase in LHFS due to extending turn times and accumulation of loans in support of residential mortgage backed securitization. The CRE and C&I portfolios increased \$925 million, or 57 percent, as we continued to focus our efforts on building a broad-based, higher yielding commercial loan portfolio.

Average interest-bearing liabilities increased \$2.1 billion for the year ended December 31, 2017, compared to the full year in 2016, primarily due to an increase in FHLB advances used to fund balance sheet growth in excess of deposit growth. Average interest-bearing deposits increased \$205 million, or 3 percent, for the year ended December 31, 2017, compared to the same period in 2016, driven by higher average retail deposits, partially offset by lower average government deposits. Our costs remained well managed in a rising interest rate environment, despite a slight extension of duration due to a higher percentage of certificates of deposit.

Provision (Benefit) for Loan Losses

2018 Compared to 2017

The provision for loan losses was a benefit of \$8 million for the year ended December 31, 2018, compared to a provision of \$6 million for the year ended December 31, 2017. The improvement in the provision reflects our continued strong credit quality with consistently low levels of charge-offs, low delinquencies, and growth of the portfolio in areas we believe to pose lower levels of credit risk.

2017 Compared to 2016

The provision for loan losses increased \$14 million to \$6 million for the year ended December 31, 2017, compared to a benefit of \$8 million for the year ended December 31, 2016. The increase was primarily due to loan growth of \$1.6 billion in our commercial and consumer portfolios. The benefit in 2016 resulted from the sale of consumer loans with a UPB of \$1.3 billion, of which \$110 million were nonperforming.

For further information, see MD&A - Credit Risk.

Noninterest Income

The following tables provide information on our noninterest income along with other mortgage metrics:

	For the Years Ended December 31, 2018 2017 2016		
	(Dollars in millions)		
Net gain on loan sales	\$200	\$268	\$316
Loan fees and charges	87	82	76
Net return (loss) on mortgage servicing rights	36	22	(26)
Loan administration income	23	21	18
Deposit fees and charges	21	18	22
Other noninterest income	72	59	81
Total noninterest income	\$439	\$470	\$487

	For the Years Ended December 31,					
	2018	2017	2016			
	(Dollars in millions)					
Mortgage rate lock commitments (fallout-adjusted) (1)	\$30,308	\$32,527	\$29,372			
Net margin on mortgage rate lock commitments (fallout-adjusted) (1) (2)	0.65	% 0.82	% 1.02	%		
Net margin on loans sold and securitized	0.62	% 0.82	% 0.94	%		

(1) Fallout adjusted refers to mortgage rate lock commitments which are adjusted by a percentage of mortgage loans in the pipeline that are not expected to close based on previous historical experience and the level of interest rates.

Gain on sale margin is based on net gain on loan sales (excludes net gain on loan sales of \$2 million, \$1 million, (2) and \$15 million from loans transferred from HFI for the years ended December 31, 2018, December 31, 2017 and December 31, 2016, respectively) to fallout-adjusted mortgage rate lock commitments.

2018 Compared to 2017

Total noninterest income decreased \$31 million during the year ended December 31, 2018 from the year ended December 31, 2017, primarily due to the following:

Net gain on loan sales decreased \$68 million. Lower mortgage origination volume and pricing competition experienced in the mortgage market throughout 2018 impacted both net gain on loan sale margin, which decreased 17 basis points, and fall-out adjusted lock volume which decreased \$2.2 billion. The lower margin was primarily driven by secondary margin compression and a shift in channel mix toward the lower margin, but lower cost delegated correspondent channel, partially offset by an improvement in securitization performance. The full year 2018 saw the benefit of our 2017 delegated correspondent lending and retail lending related acquisitions, which provided a boost to fall-out adjusted lock volume in those channels. Our total fall-out adjusted lock volume decreased 6.8 percent, despite the 8.3 percent decline in the overall mortgage origination market experienced during 2018.

Net return on MSRs, including the impact of hedges, increased \$14 million, primarily due to higher net return from the MSR asset resulting from lower prepayments and stronger valuations, along with a higher average MSR balance. Other noninterest income increased \$13 million, primarily due to higher FHLB stock dividend income attributable to an increase in FHLB stock holdings and a supplemental dividend from the FHLB received in the first quarter of 2018, higher rental income within the equipment finance operating lease portfolio, an increase in investment and insurance income and a gain from the sale of our wealth management business.

2017 Compared to 2016

Total noninterest income decreased \$17 million during the year ended December 31, 2017 from the year ended December 31, 2016, primarily due to the following:

Net gain on loan sales decreased \$48 million. Market conditions impacted the net gain on loan sales margin which decreased 12 basis points with fallout adjusted lock yields decreasing 20 basis points to 0.82 percent. As a result of our 2017 mortgage acquisitions, the decrease in margin was partially offset by a 10.7 percent increase in fallout adjusted mortgage rate lock volume. Despite the 14 percent decline in the overall mortgage origination market experienced in 2017, we maintained our market share. In addition, the decrease in net gain on loan sales was partially attributable to

extending turn times on sales of certain LHFS, which shifts earnings from net gain on loan sales to net interest income as well as the sale of nonperforming LHFI that occurred in 2016 which resulted in a \$14 million gain.

Net return on MSRs, including the impact of hedges, increased \$48 million primarily driven by a more stable prepayment environment as a result of higher market interest rates, partially offset by a decrease in servicing fee income resulting from a lower MSR balance and higher transaction costs due to MSR sales that occurred in 2017. Other noninterest income decreased \$22 million primarily due to a \$24 million reduction in the DOJ settlement liability that occurred in the third quarter of 2016 and a \$6 million decrease in the representation and warranty benefit driven by lower recoveries. These decreases were partially offset by increased rental income attributable to growth in operating leases, and higher investment and insurance revenues.

Noninterest Expense

The following table sets forth the components of our noninterest expense:

	For the Years Ended December 31,					
	2018	Wells Fargo Branch Acquisition		Adjusted 2018 (1)	2017	2016
	Expenses					
	(Dollars in millions)					
Compensation and benefits	\$318	\$ 3		\$ 315	\$299	\$269
Occupancy and equipment	127	3		124	103	85
Commissions	80	—		80	72	55
Loan processing expense	59	—		59	57	55
Legal and professional expense	28	3		25	30	29
Federal insurance premiums	22	—		22	16	11
Intangible asset amortization	5	—		5	—	—
Other noninterest expense	73	6		67	66	56
Total noninterest expense (1)	\$712	\$ 15		\$ 697	\$643	\$560

(1) See Non-GAAP Financial Measures for further information.

	For the Years Ended		
	December 31,		
	2018	2017	2016
Efficiency ratio	76.0 %	74.8 %	69.2 %
Average number FTE	3,655	3,303	2,850

2018 Compared to 2017

Total noninterest expense increased \$69 million during the year ended December 31, 2018, compared to the year ended December 31, 2017. Expenses related to the 2018 Wells Fargo branch acquisition totaled \$15 million and primarily included costs related to integration, marketing, legal and consulting. Excluding these expenses, adjusted noninterest expense increased \$54 million during the year ended December 31, 2018, compared to the year ended December 31, 2017, primarily due to the following:

Compensation and benefits expense increased \$16 million, primarily due to a higher headcount resulting from acquisitions and growth in our community bank, partially offset by cost management and lower incentive compensation.

Occupancy and equipment increased \$21 million, primarily due to a higher average depreciable asset base resulting from technology upgrades and software, along with increases in vendor services to support business growth.

Commission expense increased \$8 million, primarily due to an increase in originations in the higher commission earning retail channel, driven from the acquisition of Opes in 2017.

Legal and professional expense decreased \$5 million, primarily due to fewer significant legal matters in 2018 and higher acquisition related expenses in 2017.

FDIC insurance premiums increased \$6 million, primarily driven by growth in our total assets.

Intangible asset amortization increased to \$5 million, primarily due to the amortization of the intangible assets associated with our 2018 banking acquisitions.

Other noninterest expense increased \$1 million, primarily due to increases in advertising expense to raise brand awareness and charitable contributions, primarily offset by a reduction in the value of a contingent consideration liability.

2017 Compared to 2016

Total noninterest expense increased \$83 million during the year ended December 31, 2017 from the year ended December 31, 2016, primarily due to the following:

Compensation and benefits expense increased \$30 million, primarily due to higher headcount resulting from acquisitions and additions to the Community Banking segment to support growth in both our C&I and CRE portfolios. Our average full-time equivalent employees increased overall by 16 percent from December 31, 2016 to a total average of 3,303 full-time equivalent employees at December 31, 2017, of which 444 were Opes average full-time equivalent employees.

Occupancy and equipment increased \$18 million, primarily due to a higher average depreciable asset base and increased utilization of vendor services to support the needs of our growing business.

Commission expense increased \$17 million, primarily due to higher loan originations and a shift in channel mix to delegated retail channels with higher commission rates resulting from our mortgage acquisitions.

FDIC insurance premiums increased \$5 million, primarily driven by growth in our commercial portfolios.

Other noninterest expense increased \$10 million, primarily due to an increase in advertising expenses due to direct mail and brand awareness campaigns that were launched to drive deposit growth. The remaining increase is attributable to higher business development costs related to acquisitions and an increase in charitable activities.

Provision for Income Taxes

The H.R.1, originally known as the Tax Cuts and Jobs Act, which was signed in December 2017, included various changes to the U.S. tax code that had an impact on us, including, but not limited to, the following:

Reduction in the statutory corporation tax rate from a maximum rate of 35 percent to a flat rate of 21 percent effective January 1, 2018

Repeal of the corporate alternative minimum tax (“AMT”)

Immediate expensing of capital investments

Modifications to the provisions of future generated net operating losses

Additional limitations on the deductibility of performance-based compensation for named executive officers.

2018 Compared to 2017

Our provision for income taxes for the year ended December 31, 2018 was \$45 million, compared to a provision of \$148 million for the year ended December 31, 2017. The decrease in the provision for income taxes was primarily due to the change related to the revaluation of deferred tax assets during the fourth quarter of 2017, resulting from the passage of the new tax legislation. The Company's effective tax rate for the year ended December 31, 2018 was 19.4 percent. Our effective tax rate differs from the combined federal and state statutory rate primarily due to a change in our valuation allowance for net deferred tax assets at the state level, higher tax exempt earnings, and stock based compensation.

2017 Compared to 2016

Our provision for income taxes for the year ended December 31, 2017 was \$148 million, compared to a provision of \$87 million for the year ended December 31, 2016. The increase in the provision for income taxes was primarily due

to the charge to the provision for income taxes of approximately \$80 million from the revaluation of our DTAs as a result of the new tax legislation. Excluding this charge, the Company's adjusted effective tax rate was 32.1 percent. This adjusted effective tax rate differs from the combined federal and state statutory rate primarily due to benefits from tax-exempt earnings and stock-based compensation.

For further information, see Note 19 - Income Taxes.

Fourth Quarter Results

The following table sets forth selected quarterly data:

	Three Months Ended		
	December 31, 2018 (Unaudited)	September 30, 2018 (Unaudited)	December 31, 2017 (Unaudited)
	(Dollars in millions)		
Net interest income	\$152	\$ 124	\$ 107
Provision (benefit) for loan losses	(5)	(2)	2
Total noninterest income	98	107	124
Total noninterest expense	189	173	178
Provision for income taxes	12	12	96
Net income	\$54	\$ 48	\$ (45)
Adjusted net income (1)	\$42	\$ 49	\$ 35
Income per share:			
Basic	\$0.94	\$ 0.84	\$ (0.79)
Diluted	\$0.93	\$ 0.83	\$ (0.79)
Adjusted diluted (1)	\$0.72	\$ 0.85	\$ 0.60

(1) For further information, see MD&A - Use of Non-GAAP Financial Measures.

Fourth Quarter 2018 compared to Third Quarter 2018

Net income for the three months ended December 31, 2018 was \$54 million, or \$0.93 per diluted share, as compared to \$48 million, or \$0.83 per diluted share, for the three months ended September 30, 2018. The \$6 million increase in net income was primarily due to the following:

Net interest income rose \$28 million, primarily due to \$29 million of hedging gains reclassified from AOCI in conjunction with the payment of long-term FHLB advances. Excluding this gain, net interest income remained relatively flat, reflecting seasonal declines in LHFS and warehouse loans largely offset by an expanded net interest margin driven by one month of the lower cost deposits acquired from the Wells Fargo branch acquisition.

Noninterest income decreased \$9 million, primarily due to a decrease in net gain on loan sales driven by 36 percent lower fallout-adjusted lock volume partially offset by a 9 basis points improvement in margin. The decrease in fallout-adjusted locks reflected anticipated seasonal factors and overall lower mortgage volume.

Noninterest expense increased by \$16 million, primarily due to \$14 million of expenses attributable to the Wells Fargo branch acquisition, which included integration costs, advertising, and legal and consulting fees, partially offset by lower commissions reflecting lower mortgage volume.

Fourth Quarter 2018 compared to Fourth Quarter 2017

Net income for the three months ended December 31, 2018 was \$54 million, or \$0.93 per diluted share, as compared to a net loss of \$45 million, or \$0.79 per diluted share, for the three months ended December 31, 2017. The fourth quarter 2017 included a non-cash charge of \$80 million to the provision for income taxes, due to the revaluation of our net deferred tax asset under the new Tax Cuts and Jobs Act. Excluding this charge, the increase in net income was primarily due to the following:

Net interest income rose \$45 million, primarily due to \$29 million of hedging gains reclassified from AOCI in conjunction with the payment of long-term FHLB advances. Excluding this gain, the increase in net interest income was driven by a \$1.6 billion increase in average LHFI, led by equal growth in our commercial and consumer loan

portfolios. The increase in net interest income was further the result of a 23 basis point increase in net interest margin, excluding the hedging gains, primarily due to an increase in market rates, a higher yielding loan portfolio, and continued deposit price discipline coupled with the benefit of one month of lower cost Wells Fargo deposits. Noninterest income decreased \$26 million, due to a \$45 million decrease in net gain on loan sales primarily driven by secondary margin compression partially offset by an improvement in securitization performance. The decrease in net gain on loan sales was offset by a \$14 million increase in net return on MSRs, resulting from lower prepayments and stronger valuations, along with a higher average MSR balance.

Noninterest expense increased \$11 million, primarily due to \$14 million of expenses related to the Wells Fargo branch acquisition which included integration costs, advertising, and legal and consulting fees.

Operating Segments

Our operations are conducted through three operating segments: Community Banking, Mortgage Originations, and Mortgage Servicing. The Other segment includes the remaining reported activities. The operating segments have been determined based on the products and services offered and reflect the manner in which financial information is currently evaluated by management. Each of the operating segments is complementary to each other and because of the interrelationships of the segments, the information presented is not indicative of how the segments would perform if they operated as independent entities.

For detail on each segment's objectives, strategies, and priorities, please read this section in conjunction with Note 23 - Segment Information.

Community Banking

Our Community Banking segment services commercial, governmental and consumer customers in our banking footprint which spans throughout Michigan, Indiana, California, Wisconsin, Ohio and contiguous states. We also serve home builders, correspondents, and commercial customers on a national basis. The Community Banking segment originates loans, and provides deposit and fee based services to consumer, business, and mortgage lending customers.

Our commercial customers are from a diversified range of industries including financial, insurance, service, manufacturing, and distribution. We offer financial products to these customers for use in their normal business operations, as well as providing financing of working capital, capital investments, and equipment. Additionally, our commercial real estate business supports income producing real estate and home builders. The Community Bank also offers warehouse lines of credit to non-bank mortgage lenders.

Our Community Banking segment has seen continued growth, both organically and through strategic acquisitions. Our commercial loan portfolio has grown 18 percent in the last twelve months, to \$5.0 billion, at December 31, 2018, boosted by the Santander warehouse business acquisition. Average deposits for the year ended December 31, 2018 have increased to \$8.9 billion, compared to \$7.5 billion, for the year ended December 31, 2017. The DCB branch acquisition and the acquisition of the 52 Wells Fargo branches in the fourth quarter 2018, expanded our banking footprint and added \$2.2 billion in deposits as of December 31, 2018 to the Community Banking segment. For further information on our banking acquisitions, see Note 2 - Acquisitions.

33

2018 compared to 2017

The Community Banking segment reported net income of \$96 million for the year ended December 31, 2018, compared to net income of \$39 million for the year ended December 31, 2017. The \$57 million increase was primarily due to \$76 million higher net interest income, primarily driven by a \$1.2 billion increase in average commercial loans due to organic growth in our CRE and C&I portfolios and enhanced by the acquisition of the Santander warehouse business during 2018. Through this growth the loan portfolios have retained high credit quality, resulting in \$2 million lower provision year over year. Noninterest income also increased \$7 million, primarily from higher deposit fees driven by the acquisitions of DCB and Wells Fargo branches, as well as the sale of our wealth management business. To support our investments relating to organic growth, acquisitions, and the diversification of our product offerings such as Indirect Lending, our operating costs increased \$26 million, primarily due to increases in compensation and benefits, occupancy and equipment and FDIC premiums.

2017 compared to 2016

The Community Banking segment reported net income of \$39 million for the year ended December 31, 2017, compared to net income of \$46 million for the year ended December 31, 2016. The \$7 million decrease was primarily due to a \$15 million increase in noninterest expense primarily driven by higher compensation and benefits expense to support strategic growth initiatives and increased FDIC premiums due to higher balances. In addition, the provision for loan losses increased \$14 million and noninterest income decreased \$13 million, driven by a decrease in net gain on loan sales, primarily due to the sale of performing residential loans out of the LHFI portfolio during 2016. These were partially offset by an increase in net interest income of \$32 million primarily due to loan growth as our CRE and C&I portfolios increased by \$671 million and \$427 million, respectively, during the year ended December 31, 2017.

Mortgage Originations

We are a leading national originator of residential first mortgages. Our Mortgage Origination segment originates and acquires one-to-four family residential mortgage loans primarily to sell, or in some instances, to hold in our LHFI portfolio in the Community Banking segment. We may hold certain mortgage loans we originate, including jumbo loans or non-conforming loans, in our LHFI portfolio which will generate interest income in the Community Banking segment. The Community Banking segment purchases these loans from the Mortgage Origination segment which results in the recognition of a gain on loan sales by the Mortgage Origination segment and a loss on loan sales in the Community Banking segment. We utilize multiple distribution channels to originate or acquire mortgage loans on a national scale.

Average number of FTE employees	1,517	1,440	1,063	

(1) Fallout-adjusted refers to mortgage rate lock commitments which are adjusted by a percentage of mortgage loans in the pipeline that are not expected to close based on previous historical experience and the level of interest rates.

2018 compared to 2017

The Mortgage Originations segment reported net income of \$83 million for the year ended December 31, 2018, compared to \$110 million for the year ended December 31, 2017. The \$27 million decrease was primarily due to a \$66 million decrease in net gain on loan sales driven by a 17 basis point decline in net gain on loan sale margin and \$2.2 billion lower fallout-adjusted rate locks. The decrease in volume was primarily driven by overall lower mortgage market volume. Additionally, continued excess operating capacity across the industry and pricing competition continues to put pressure on our mortgage business. Lower margin was primarily driven by secondary margin compression and a shift in channel mix toward the lower margin, but lower cost delegated correspondent channel, partially offset by an improvement in securitization performance. The decrease in net gain on loan sales was partially offset by a \$14 million increase in net return on MSR primarily driven by lower prepayments and stronger valuations, along with a higher average MSR balance.

2017 compared to 2016

The Mortgage Originations segment reported net income of \$110 million for the year ended December 31, 2017, compared to \$119 million for the year ended December 31, 2016. During 2017, we acquired Opes Advisors, a California based retail mortgage originator, which contributed to a \$68 million increase in noninterest expense driven by higher compensation and benefits, as well as higher commissions resulting from increased mortgage volume. In addition, net gain on loan sales decreased \$32 million driven by a 21 basis point decrease in margin resulting from competitive factors and a shift in product mix with higher correspondent volume resulting from our acquisition of Stearns Lending. These decreases were partially offset by a \$48 million increase in net return on MSR and a \$39 million increase in net interest income resulting from increased mortgage volume and longer turn times to take

advantage of attractive spreads.

Total	\$32,465	\$34,408	\$32,417	\$29,368	\$24,585

Correspondent. In the correspondent channels, an unaffiliated bank or mortgage company completes the loan paperwork and also funds the loan at closing. After the bank or mortgage company has funded the transaction, we purchase the loan at an agreed upon price. We perform a full review of each loan, whether purchased in bulk or not, purchasing only those loans that were originated in accordance with our underwriting guidelines. Correspondents apply to the Bank and may be approved for delegated underwriting authority. Delegated correspondents assume the risks associated with the underwriting of the loan and earn more on loans sold compared to non-delegated correspondents. Non-delegated correspondents earn commissions and administrative fees for closing and funding loans which are then underwritten by the Bank. Loans originated through the correspondent lending channel typically result in a lower gain on sale margin but also have lower costs. At December 31, 2018, we had active relationships with 558 delegated correspondents and 601 non-delegated correspondents servicing borrowers in all 50 states.

Broker. In a broker transaction, an unaffiliated mortgage broker completes several steps of the loan origination process including the loan paperwork, but the loans are underwritten by us on a loan-level basis to our underwriting standards and we fund and close the loan in the Bank's name, thereby becoming the lender of record. At December 31, 2018, we had active broker relationships with nearly 900 mortgage brokers servicing borrowers in all 50 states.

Retail. In our distributed retail channel, loans are originated through our nationwide network of stand-alone home loan centers. At December 31, 2018, we maintained 75 retail locations in 24 states representing the combined retail branches of Flagstar Bank and its Opes Advisors mortgage division. In a direct-to-consumer lending transaction, loans are originated through our direct-to-consumer team or from one of our two national call centers, both of which may leverage our existing customer relationships. When loans are originated on a retail basis, most aspects of the lending process are completed internally, including the origination documentation (inclusive of customer disclosures), as well as the funding of the transactions, which typically results in higher internal costs but also higher gain on sale margins.

Mortgage Servicing

The Mortgage Servicing segment services loans when we hold the MSR asset, and subservices mortgage loans for others through a scalable servicing platform on a fee for service basis. We may also collect ancillary fees and earn income through the use of noninterest bearing escrows. The loans we service generate custodial deposits which provide a stable funding source which supports interest-earning asset generation in the Community Bank and Mortgage Origination segments. Revenue for serviced and subserviced loans is earned on a contractual fee basis, with the fees varying based on our responsibilities and the delinquency status of the underlying loans. The Mortgage Servicing segment also services residential mortgages for our LHF portfolio in the Community Banking segment and

our own MSR portfolio in the Mortgage Originations segment for which it earns intersegment revenue on a fee per loan basis.

Average number of FTE employees	228	199	194

2018 compared to 2017

The Mortgage Servicing segment reported a net loss of \$6 million for the year ended December 31, 2018, compared to a net loss of \$15 million for the year ended December 31, 2017. The improvement was primarily due to growth in our subservicing business, which increased by nearly 400,000 loans, or 87 percent, for the year ended December 31, 2018 compared to the year ended December 31, 2017. The increase in loan servicing volume drove higher noninterest income, including a \$19 million increase in loan administration income and a \$9 million increase in ancillary fees, offset by a decrease in net interest income, driven by higher interest paid on custodial balances and an increase in noninterest expense to support the growth in volume.

2017 compared to 2016

The Mortgage Servicing segment reported a net loss of \$15 million for the year ended December 31, 2017, compared to a net loss of \$13 million for the year ended December 31, 2016. The decrease in net interest income was primarily due to higher amounts paid to subservice clients for custodial balances which is driven by higher market rates and increased volume. This decrease was partially offset by higher noninterest income primarily due to an increase in the number of loans subserviced for others, which grew by nearly 90,000 loans, or 40.8 percent, for the year ended December 31, 2017 as compared to the year ended December 31, 2016.

The following table presents residential loans serviced and the number of accounts associated with those loans.

	December 31, 2018		December 31, 2017		December 31, 2016	
	Unpaid Principal Balance (1)	Number of accounts	Unpaid Principal Balance (1)	Number of accounts	Unpaid Principal Balance (1)	Number of accounts
	(Dollars in millions)					
Residential loan servicing						
Subserviced for others (2)	\$146,040	705,149	\$65,864	309,814	\$43,127	220,075

Edgar Filing: FLAGSTAR BANCORP INC - Form 10-K

Serviced for others	21,592	88,434	25,073	103,137	31,207	133,270
Serviced for own loan portfolio (3)	7,192	32,920	7,013	29,493	5,816	29,244
Total residential loans serviced	\$174,824	826,503	\$97,950	442,444	\$80,150	382,589

(1) UPB, net of write downs, does not include premiums or discounts.

(2) Includes temporary short-term subservicing performed as a result of sales of servicing-released MSRs. Includes repossessed assets.

(3) Includes LHFI (residential first mortgage and home equity), LHFS (residential first mortgage), loans with government guarantees (residential first mortgage), and repossessed assets.

At December 31, 2018, the number of residential loans serviced and the UPB of those loans increased by 384,059 and \$76.9 billion, respectively, compared to December 31, 2017. Loans subserviced for others drove the increase in total residential loans serviced growing by 395,335 loans and \$80.2 billion UPB. We continue to grow our subservicing business by onboarding non-Flagstar originated loans and through the sale of MSRs that were originated by Flagstar where we continue to subservice the underlying loans. Of the \$28.8 billion UPB of MSRs sold during 2018, we retained subservicing on 100 percent of these sales. Our continued growth in our subservicing business and the strength of our platform has made us the 6th largest subservicer in the nation with capacity for further growth.

Other

The Other segment includes the treasury functions, which include the impact of interest rate risk management, balance sheet funding activities and the investment securities portfolios, as well as other expenses of a corporate nature, including corporate staff, risk management, and legal expenses. In addition, the Other segment includes revenue and expenses not directly assigned or allocated to the Community Banking, Mortgage Originations or Mortgage Servicing segments.

Key Metrics

Average number of FTE employees

1,049,976 932

(1) Includes offsetting adjustments made to reclassify income and expenses relating to operating leases and custodial deposits for subservicing clients.

2018 compared to 2017

The Other segment reported net income of \$14 million for the year ended December 31, 2018, compared to net loss of \$71 million for the year ended December 31, 2017. The increase in net income was primarily due to the charge to the provision for income taxes during the fourth quarter of 2017 of approximately \$80 million, resulting from the new tax legislation that required revaluation of our DTAs at a lower corporate statutory rate. In addition, net interest income increased \$36 million primarily due to \$29 million of hedging gains reclassified from AOCI. Noninterest income also increased \$9 million as the result of higher dividend income on FHLB stock and a FHLB stock supplemental dividend which we received in the first quarter of 2018. These increases were partially offset by an increase of \$28 million in noninterest expense primarily due to acquisition related expenses from the Wells Fargo branches and additional expenses to support business growth.

2017 compared to 2016

The Other segment reported net loss of \$71 million for the year ended December 31, 2017, as compared to net income of \$19 million for the year ended December 31, 2016. The decrease in net income was primarily due to the charge to the provision for income taxes of approximately \$80 million, resulting from the new tax legislation that required revaluation of our DTAs at a lower corporate statutory rate. In addition, the year ended December 31, 2016 saw an increase in noninterest income primarily due to the \$24 million decrease in the fair value of the DOJ settlement liability.

RISK MANAGEMENT

Certain risks are inherent in our business and include, but are not limited to, credit, regulatory compliance, legal, reputation, liquidity, market, operational, and strategic. We continually invest in our risk management activities which are focused on ensuring we properly identify, measure and manage such risks across the entire enterprise to maintain safety and soundness and maximize profitability. We hold capital to protect from unexpected losses arising from these risks.

A discussion of risks affecting us can be found in the Risk Factors section included in Item 1A. of this Form 10-K.

Credit Risk

Credit risk is the risk of loss to us arising from an obligor's inability or failure to meet contractual payment or performance terms. We provide loans, extend credit, and enter into financial derivative contracts, all of which have related credit risk.

We maintain credit limits, in compliance with regulatory requirements. Under the Home Owners Loan Act (HOLA), the Bank may not make a loan or extend credit to a single or related group of borrowers in excess of 15 percent of Tier 1 and Tier 2 capital plus any portion of the allowance for loan losses not included in the Tier 2 capital. This limit was \$256 million as of December 31, 2018. We maintain a more conservative maximum internal Bank credit limit than required by HOLA, of \$100 million to any one borrower/obligor relationship, with the exception of warehouse borrower/obligor relationships, which have a higher internal Bank limit of \$125 million as all advances are fully collateralized by residential mortgage loans. We have a tracking and reporting process to monitor lending concentration levels and all credit exposures to a single borrower that exceed \$50 million must be approved by the Board of Directors.

Our commercial loan portfolio has been built on our relationship-based lending strategy. We provide financing and banking products to our commercial customers in our core banking footprint and will follow those established

customer relationships to meet their financing needs in areas outside of our footprint. We have also formed relationship lending on a national scale through our home builder finance and warehouse lending businesses. At December 31, 2018, we had \$5 billion in our commercial loan portfolio with our home builder finance and warehouse lending businesses accounting for 43 percent of the total. Of the remaining commercial loans in our portfolio, the majority of CRE and C&I loans were with customers who have established relationships within our core banking footprint. For all of our commercial loans, we use strict underwriting standards and adhere to granular concentration limits to manage the credit risk in our portfolio.

We have built our consumer loan portfolio by adding high quality first mortgage loans to our balance sheet making up 74.2 percent of our total consumer loan portfolio. We have also grown our home equity loans and lines of credit as well as our other consumer loan portfolio. The consumer loan portfolio has been built on strong underwriting criteria and within concentration limits intended to diversify our risk profile.

Loans held-for-investment

The following table summarizes loans held-for-investment by category:

	At December 31,				
	2018	2017	2016	2015	2014
	(Dollars in millions)				
Consumer loans					
Residential first mortgage	\$2,999	\$2,754	\$2,327	\$3,100	\$2,193
Home equity (1)	731	664	443	519	406

Total commercial loans	5,044	4,270	3,267	2,702	1,818
Total loans held-for-investment	\$9,088	\$7,713	\$6,065	\$6,352	\$4,448

(1) Includes second mortgages, HELOCs, and HELOANs.

Loans held-for-investment increased \$1.4 billion at December 31, 2018, from December 31, 2017. The increase was primarily due to continued growth in our Community Banking segment, along with our 2018 acquisitions boosting warehouse lending and consumer loans.

We continue to strengthen our Community Banking segment by growing interest earning assets. Our commercial loan portfolio has grown \$774 million, or 18.1 percent, since December 31, 2017, led by a \$317 million increase in our warehouse loans, primarily due to our Santander warehouse business acquisition. Our consumer loan portfolio has increased \$601 million, or 17.5 percent, since December 31, 2017, led by a \$289 million increase in other consumer loans primarily due to new product offerings and a \$245 million increase in residential first mortgage loans.

The following table provides a comparison of activity in our LHFI portfolio:

	For the Years Ended December 31,				
	2018	2017	2016	2015	2014
	(Dollars in millions)				
Balance, beginning of year	\$7,713	\$6,065	\$6,352	\$4,448	\$4,056

Loans transferred to repossessed assets	(7)	(2)	(8)	(14)	(22)
Balance, end of year	\$9,088	\$7,713	\$6,065	\$6,352	\$4,448

Residential first mortgage loans. We originate or purchase various types of conforming and non-conforming fixed and adjustable rate loans underwritten using Fannie Mae and Freddie Mac guidelines for the purpose of purchasing or refinancing owner occupied and second home properties. We typically hold certain mortgage loans in LHFI that do not qualify for sale to the Agencies or that have an attractive yield and risk profile. The LTV requirements on our residential first mortgage loans vary depending on occupancy, property type, loan amount, and FICO scores. Loans with LTVs exceeding 80 percent are required to obtain mortgage insurance.

The following table presents our total residential first mortgage LHFIs by major category:

(1)LTVs reflect loan balance at the date reported, as a percentage of property values as appraised at loan origination.

(2)FICO scores are updated at least on a quarterly basis or more frequently if available.

The following table presents our total residential first mortgage LHFIs as of December 31, 2018, by year of origination:

	2018	2017	2016	2015	2014 and Prior	Total
	(Dollars in millions)					
Residential first mortgage loans	\$679	\$729	\$570	\$646	\$375	\$2,999
Percent of total	22.6 %	24.3 %	19.0 %	21.5 %	12.5 %	100.0 %

Home equity. Our home equity portfolio includes HELOANS, second mortgage loans, and HELOCs. These loans require full documentation and are underwritten and priced in an effort to ensure credit quality and loan profitability. Our debt-to-income ratio on HELOANS is capped at 43 percent and for HELOCs is capped at 45 percent. We currently limit the maximum CLTV to 89.99 percent and FICO scores to a minimum of 660. Second mortgage loans/HELOANS are fixed rate loans and are available with terms up to 20 years. HELOC loans are variable-rate loans that contain a 10-year interest only draw period followed by a 20-year amortizing period. At December 31, 2018, HELOCs and HELOANS in a first lien position totaled \$129 million.

Other consumer loans. Our other consumer loan portfolio consists of secured and unsecured loans originated through our branches and our indirect lending business. At December 31, 2018, other consumer loans increased to \$314 million compared to \$25 million at December 31, 2017. This increase is primarily due to growth of \$154 million in our indirect lending business, as Flagstar has established relationships with dealers for the origination of boat and recreational vehicle consumer loans, and an increase in unsecured consumer loans resulting from new product growth and the addition of \$74 million of acquired loans from Wells Fargo.

Commercial real estate loans. The commercial real estate portfolio contains loans collateralized by diversified property types which are primarily income producing in the normal course of business. The majority of our retail exposure is to

neighborhood strip centers and single tenant locations, which include drug stores, and we have no loans collateralized by malls. Generally, the maximum LTV is 80 percent, or 85 percent for owner-occupied real estate, and debt service coverage of 1.20 to 1.35 times. At December 31, 2018, our average LTV and average debt service coverage for our CRE portfolio was 53 percent and 1.95 times, respectively. Our CRE loans earn interest at a variable rate.

We have established a national home builder finance program and at December 31, 2018, our commercial portfolio contained \$718 million in outstanding home builder loans. The majority of these loans are collateralized and included in either the single family residence or land residential categories of our CRE portfolio while the remaining loans are unsecured and included in our C&I portfolio.

The following table presents our home builder finance commitments and outstanding balances by loan category.

	At December 31,	
	2018	2017
	(Dollars in millions)	
Commitments	\$1,422	\$1,284
Outstanding balance (UPB)		
Commercial real estate	\$591	\$497
Commercial and industrial	127	104
Total outstanding balance (UPB)	\$718	\$601

The following table presents our total CRE LHFI by collateral location and collateral type:

	MI	TX	CO	CA	FL	Other	Total	% by collateral type	
	(Dollars in millions)								
December 31, 2018									
Single family residence (1)	\$17	\$102	\$130	\$67	\$79	\$63	\$458	21.3	%
Owner occupied	261	4	—	27	5	55	352	16.4	%
Retail (2)	185	1	4	7	—	99	296	13.8	%
Multi family	106	35	18	7	37	40	243	11.3	%
Office	175	—	—	16	3	21	215	10.0	%

Hotel/motel	92	17	—	9	—	33	151	7.0	%
Senior Living facility	17	25	—	—	—	65	107	5.0	%
Industrial	47	—	—	—	—	37	84	3.9	%
All other (4)	37	3	1	2	8	27	78	3.5	%
Total	\$941	\$232	\$172	\$162	\$158	\$487	\$2,152	100.0	%
Percent by state	43.7 %	10.8 %	8.0 %	7.5 %	7.3 %	22.7 %	100.0 %		

(1)Includes home builder loans secured by SFR 1-4 properties whether under construction or completed.

(2)Includes multipurpose retail space, neighborhood centers, strip centers and single-use retail space

(3)Includes home builder loans secured by land. Land residential includes development and unimproved vacant land.

(4)All other primarily includes: parking garage, non-profit, mini-storage facilities, data centers, movie theater, etc.

Commercial and industrial loans. Commercial and industrial LHFI facilities typically include lines of credit and term loans and leases to businesses for use in normal business operations to finance working capital, equipment and capital purchases, acquisitions and expansion projects. We lend to customers with a history of profitability and a long-term business model. Generally, leverage conforms to industry standards and the minimum debt service coverage is 1.20

times. The majority of our C&I loans earn interest at a variable rate.

The following table presents our total C&I LHFIs by borrower's geographic location and industry type:

	MI	CA	OH	IN	WI	TX	FL	CT	Other	Total	% by industry
	(Dollars in millions)										
December 31, 2018

Warehouse lending. We have a national platform with relationship managers across the country. We offer warehouse lines of credit to other mortgage lenders which allow the lender to fund the closing of residential mortgage loans. Each extension, advance, or draw-down on the line is fully collateralized by residential mortgage loans and is paid off when the lender sells the loan to an outside investor or, in some instances, to the Bank.

The following table presents our warehouse advance amount of loans sold to the Bank:

	For the Years Ended	
	December 31, 2018	2017
UPB of warehouse loans sold to the bank	\$8,590	\$10,824
Loans sold to the bank as a percentage of advances	25.5 %	37.4 %

Underlying mortgage loans are predominantly originated using the Agencies' underwriting standards. The guideline for debt to tangible net worth is 15 to 1. The aggregate committed amount of adjustable-rate warehouse lines of credit granted to other mortgage lenders at December 31, 2018 was \$3.8 billion, of which \$1.5 billion was outstanding, compared to \$2.8 billion at December 31, 2017, of which \$1.1 billion was outstanding. This increase is primarily due to our acquisition of the warehouse lending business from Santander Bank in March of 2018.

Loan Principal Payments

The following tables set forth the expected repayment of our LHFI, both as fixed rate and adjustable-rate loans:

December 31, 2018

	Within 1 Year	1 Year to 5 Years	Over 5 Years	Totals (1)
--	------------------	-------------------------	-----------------	---------------

(Dollars in millions)

Fixed Rate Loans

Residential first mortgage	\$13	\$41	\$234	\$288
Home Equity	7	31	70	108
Other consumer	18	69	223	310
Commercial real estate	17	64	—	81
Commercial and industrial	48	205	61	314
Total fixed rate loans	\$103	\$410	\$588	\$1,101

Adjustable Rate Loans

Residential first mortgage	\$58	\$257	\$2,373	\$2,688
Home Equity	9	41	561	611
Commercial real estate	630	1,466	—	2,096
Commercial and industrial	227	893	—	1,120
Warehouse lending	1,506	—	—	1,506
Total adjustable rate loans	\$2,430	\$2,657	\$2,934	\$8,021

(1) UPB, net of write downs, does not include premiums or discounts.

Credit Quality

Trends in certain credit quality characteristics in our loan portfolios, remain strong and are a result of our focus on effectively managing credit risk through our careful underwriting standards and processes. The credit quality of our loan portfolios is demonstrated by low delinquency levels, minimal charge-offs and low levels of nonperforming loans.

For all loan categories within the consumer and commercial loan portfolio, loans are placed on nonaccrual status when any portion of principal or interest is 90 days past due (or nonperforming), or earlier when we become aware of information indicating that collection of principal and interest is in doubt. While it is the goal of management to collect on loans, we attempt to work out a satisfactory repayment schedule or modification with past due borrowers and will undertake foreclosure proceedings if the delinquency is not satisfactorily resolved. Our practices regarding past due loans are designed to both assist borrowers in meeting their contractual obligations and minimize losses incurred by the Bank. When a loan is placed on nonaccrual status, the accrued interest income is reversed. Loans return to accrual status when principal and interest become current and are anticipated to be fully collectible.

Nonperforming Assets

The following table sets forth certain information about our nonperforming assets:

	At December 31,				
	2018	2017	2016	2015	2014
	(Dollars in millions)				
LHFI					
Consumer Loans					
Residential first mortgages	\$11	\$12	\$18	\$27	\$72
Home equity	1	1	4	2	2
Commercial Loans					
Commercial and industrial	—	—	—	2	—
Total nonperforming LHFI	12	13	22	31	74
TDRs					
Consumer Loans					
Residential first mortgages	8	12	11	27	43
Home equity	2	4	7	8	3
Total nonperforming TDRs	10	16	18	35	46
Total nonperforming LHFI and TDRs (1)	22	29	40	66	120
Real estate and other nonperforming assets, net	7	8	14	17	19
LHFS	10	9	6	12	15
Total nonperforming assets	\$39	\$46	\$60	\$95	\$154
Nonperforming assets to total assets (2)	0.16%	0.22%	0.39%	0.61%	1.41 %
Nonperforming LHFI and TDRs to LHFI	0.24%	0.38%	0.67%	1.05%	2.71 %
Nonperforming assets to LHFI and repossessed assets (2)	0.32%	0.48%	0.90%	1.32%	3.12 %

(1) Includes less than 90 days past due performing loans placed on nonaccrual. Interest is not being accrued on these loans.

(2) Ratio excludes LHFS.

At December 31, 2018, we had \$39 million of nonperforming assets compared to \$46 million of nonperforming assets at December 31, 2017. This decrease was primarily due to a \$6 million reduction in TDRs primarily resulting from principal payments and payoffs during the year ended December 31, 2018. As reflected in the table above, our nonperforming loans have decreased substantially and we have experienced continued improvements in our credit quality ratios since December 31, 2014. The overall improvement in our nonperforming assets and credit quality ratios is due to our continued effort to grow our loan portfolio with strong credit quality loans, combined with a slowing emergence of nonperforming loans driven by decreased levels of delinquencies.

In addition to our focus on improving our loan portfolio with strong credit quality loans, we have historically reduced our balance sheet risk by selling nonperforming loans. During the year ended December 31, 2018, sales of nonperforming and TDR loans were de minimis. The following table sets forth the UPB of nonperforming loans and TDRs sold in prior years:

	For the Years Ended			
	2018	2017	2016	2015
	December 31,			
	(Dollars in millions)			
Nonperforming loans	\$—	\$14	\$110	\$109
TDRs	—	11	—	327
Total sales of nonperforming loans and TDRs	\$—	\$25	\$110	\$436

Delinquencies

The following table sets forth our performing LHFI which are past due 30-89 days:

	For the Years Ended December 31,				
	2018	2017	2016	2015	2014
	(Dollars in millions)				
Performing loans past due 30-89:					
Consumer loans					
Residential first mortgage	\$6	\$4	\$6	\$10	\$37
Home equity	1	1	3	3	7
Other	—	—	1	1	—
Total performing loans past due 30-89 days	\$7	\$5	\$10	\$14	\$44

As a result of our continued focus on growing our loan portfolio with high quality loans, early stage delinquencies remained low as loans 30 to 89 days past due were \$7 million and \$5 million at December 31, 2018 and December 31, 2017, respectively.

Troubled debt restructurings (held-for-investment)

Troubled debt restructurings ("TDRs") are modified loans in which a borrower demonstrates financial difficulties and for which a concession has been granted as a result. Nonperforming TDRs are included in nonaccrual loans. TDRs remain in nonperforming status until a borrower has made at least six consecutive months of payments. Performing TDRs are not considered to be nonaccrual so long as we believe that all contractual principal and interest due under the restructured terms will be collected.

The following table sets forth a summary of TDRs by performing status:

	For the Years Ended December 31,				
	2018	2017	2016	2015	2014
	(Dollars in millions)				
Performing TDRs					
Residential first mortgage	\$22	\$19	\$22	\$49	\$306
Home equity	22	24	45	52	56
Total performing TDRs	44	43	67	101	362
Nonperforming TDRs					
Nonperforming TDRs	3	5	8	7	29
Nonperforming TDRs at inception but performing for less than six months	7	11	10	28	17
Total nonperforming TDRs	10	16	18	35	46
Total TDRs	\$54	\$59	\$85	\$136	\$408
ALLL on consumer TDR loans	\$10	\$13	\$9	\$15	\$81

At December 31, 2018, our total TDR loans decreased to \$54 million compared to \$59 million at December 31, 2017, primarily due to principal payments and payoffs out-pacing new additions. Of our total TDR loans, 82.0 percent were in performing status at December 31, 2018. For further information, see Note 5 - Loans Held-for-Investment.

Allowance for Loan Losses

The ALLL represents management's estimate of probable losses that are inherent in our LHFI portfolio but which have not yet been realized. For further information, see Note 1 - Description of Business, Basis of Presentation, and Summary of Significant Accounting Standards and Note 5 - Loans Held-for-Investment.

The ALLL was \$128 million and \$140 million at December 31, 2018 and 2017, respectively. The decrease from December 31, 2017 was primarily driven by continued strong credit quality, including low levels of net charge-offs and delinquencies, offset by growth in the LHFI portfolio.

The ALLL as a percentage of LHFI decreased to 1.4 percent as of December 31, 2018 from 1.8 percent as of December 31, 2017. This decrease is attributable to loan growth of \$1.4 billion UPB, consisting of high credit quality assets in both the consumer and commercial loan portfolios, including growth in our lower risk, fully collateralized warehouse portfolio, in addition to sustained low levels charge-offs and delinquencies. At December 31, 2018, both our consumer loan portfolio and our commercial loan portfolio had a 1.4 percent allowance coverage.

The following table sets forth certain information regarding the allocation of our ALLL to each loan category:

December 31, 2018					
Investment Loan Portfolio	Percent of Portfolio	Allowance Amount	Allowance as a Percentage of Loan Portfolio		
			(Dollars in millions)		
Consumer loans					
Residential first mortgage	\$2,991	32.9 %	\$ 38	1.3	%
Home equity	729	8.0 %	15	2.1	%
Other consumer	314	3.5 %	3	1.0	%
Total consumer loans	4,034	44.4 %	56	1.4	%
Commercial loans					
Commercial real estate	2,152	23.7 %	48	2.2	%
Commercial and industrial	1,433	15.8 %	18	1.3	%
Warehouse lending	1,459	16.1 %	6	0.4	%
Total commercial loans	5,044	55.6 %	72	1.4	%
Total loans held-for-investment (1)	\$9,078	100.0 %	\$ 128	1.4	%

(1) Excludes loans carried under the fair value option.

The following tables set forth certain information regarding our ALLL and the ALLL allocation over the past five years:

Does not include \$7 million provision expense recorded in the Consolidated Statements of Operations to reserve (1) for repossessed loans with government guarantees at December 31, 2016. There was no provision for loan losses for repossessed loans with government guarantees recorded during the years ended December 31, 2018, 2017, 2015, and 2014.

(2)Excludes loans carried at fair value.

The following table provides information on our charge-offs, net of recoveries:

	For the Years Ended December 31,				
	2018	2017	2016	2015	2014
	(Dollars in millions)				
Charge-offs, net of recoveries	\$ 4	\$ 8	\$ 30	\$ 91	\$ 42
Charge-offs associated with loans with government guarantees	2	4	14	3	—
	—	1	8	69	15

Charge-offs
 associated with the
 sale or transfer of
 nonperforming
 loans and TDRs

Charge-offs, net of recoveries, adjusted	\$ 2	\$ 3	\$ 8	\$ 19	\$ 27
--	------	------	------	-------	-------

Net Charge-offs for the year ended December 31, 2018 decreased to \$4 million compared to \$8 million for the year ended December 31, 2017. As a percentage of average LHFII, net charge-offs for the year ended December 31, 2018 decreased to 0.04 percent from 0.12 percent for the year ended December 31, 2017.

Market Risk

Market risk is the risk of reduced earnings and/or declines in the net market value of the balance sheet due to changes in market prices. Our primary market risk is interest rate risk which impacts our net interest income, fee income related to interest sensitive activities such as mortgage origination and servicing income, and loan and deposit demand.

We are subject to interest rate risk due to:

- The maturity or repricing of assets and liabilities at different times or for different amounts
- Differences in short-term and long-term market interest rate changes
- The remaining maturity of various assets or liabilities may shorten or lengthen as interest rates change

Our Asset/Liability Committee ("ALCO"), which is composed of our executive officers and certain members of other management, monitors interest rate risk on an on-going basis in accordance with policies approved by our Board of Directors. The ALCO reviews interest rate positions and considers the impact projected interest rate scenarios have on earnings, capital, liquidity, business strategies, and other factors. However, management has the latitude to change interest rate positions within certain limits if, in management's judgment, the change will enhance profitability or minimize risk.

To assess and manage interest rate risk, sensitivity analysis is used to determine the impact on earnings and the net market value of the balance sheet across various interest rate scenarios, balance sheet trends, and strategies.

Net interest income sensitivity

Management uses a simulation model to analyze the sensitivity of net interest income to changes in interest rates across various interest rate scenarios which demonstrates the level of interest rate risk inherent in the existing balance sheet. The analysis holds the current balance sheet values constant and does not take into account management intervention. In addition, we assume certain correlation rates, often referred to as a "deposit beta," of interest-bearing deposits, wherein the rates paid to customers change relative to changes in benchmark interest rates. The effect on net interest income over a 12 month time horizon due to hypothetical changes in market interest rates is presented in the table below. In this interest rate shock simulation, as of the periods presented, interest rates have been adjusted by instantaneous parallel changes rather than in a ramp simulation which applies interest rate changes over time. All rates, short-term and long-term, are changed by the same amount (e.g. plus or minus 200 basis points) resulting in the shape of the yield curve remaining unchanged. For the scenarios simulated, our established Board policy limit on the change in net interest income, is 15 percent. At December 31, 2018 and December 31, 2017, the results of the simulation were within the Board policy limits.

December 31, 2018

Net

Scenario	interest	\$ Change	% Change
	Income		

(Dollars in millions)

200	\$503	\$25	5.2 %
Constant	478	—	— %
(200)	449	(29)	(6.1)%

December 31, 2017

Net

Scenario	interest	\$ Change	% Change
	Income		

(Dollars in millions)

200	\$449	\$16	3.6	%
Constant	433	—	—	%
(200)	397	(37)	(8.5)	%

In the net interest income simulations, our balance sheet exhibits slight asset sensitivity. When interest rates rise our net interest income increases. Conversely, when interest rates fall our net interest income decreases. At December 31, 2018, the \$45 million increase in the net interest income in the constant scenario as compared to December 31, 2017, was primarily driven by growth in our net interest earning assets along with a decrease in our cost of funding.

As of December 31, 2018 we have also projected the potential impact to net interest income in a hypothetical "bear flattener" interest rate scenario, in which short-term interest rates have been instantaneously increased by 100 basis points while holding the longer term interest rates constant. Over a 12-month and 24-month period, based on our existing balance sheet, the simulation resulted in a loss of \$15 million and \$134 million, respectively.

The net interest income sensitivity analysis has certain limitations and makes various assumptions. Key elements of this interest rate risk exposure assessment include maintaining a static balance sheet and parallel rate shocks. The direction of future interest rates not moving in a parallel manner across the yield curve, how the balance sheet will respond and shift based on a change in future interest rates and how the Company will respond are not included in this analysis and limit the predictive value of these scenarios.

Economic value of equity

Management also utilizes Economic Value of Equity (EVE), a point in time analysis of the economic value of our current balance sheet position, which measures interest rate risk over a longer term. The EVE calculation represents a hypothetical valuation of equity, and is defined as the market value of assets, less the market value of liabilities, adjusted for the market value of off-balance sheet instruments. The assessment of both short-term earnings (Net Interest Income Sensitivity) and long-term valuation (EVE) approaches provides a more comprehensive analysis of interest rate risk exposure than either Net Interest Income Sensitivity or EVE alone.

There are assumptions and inherent limitations in any methodology used to estimate the exposure to changes in market interest rates and as such, sensitivity calculations used in this analysis are hypothetical and should not be considered to be predictive of future results. This analysis evaluates risks to the current balance sheet only and does not incorporate future growth assumptions. Additionally, the analysis assumes interest rate changes are instantaneous and the new rate environment is constant but does not include actions management may undertake to manage risk in response to interest rate changes. Each rate scenario reflects unique prepayment and repricing assumptions. Management derives these assumptions by considering published market prepayment expectations, repricing characteristics, our historical experience, and our asset and liability management strategy. This analysis assumes that changes in interest rates may not affect or could partially affect certain instruments based on their characteristics.

The following table is a summary of the changes in our EVE that are projected to result from hypothetical changes in market interest rates as well as our internal policy limits for changes in our EVE based on the different scenarios. The interest rates, as of the dates presented, are adjusted by instantaneous parallel rate increases and decreases as indicated in the scenarios shown in the table below.

December 31, 2018					December 31, 2017					Policy Limits
Scenario	EVE	EVE%	\$ Change	% Change	Scenario	EVE	EVE%	\$ Change	% Change

100	1,794	9.8 %	(46)	(2.5)%	100	2,089	12.4 %	(24)	(1.2)%	7.5 %
Current	1,840	10.0 %	—	— %	Current	2,113	12.6 %	—	— %	— %
(100)	1,849	10.1 %	9	0.5 %	(100)	2,082	12.4 %	(31)	(1.5)%	7.5 %

Our balance sheet exhibits liability sensitivity in a rising interest rate scenario. The decrease in EVE is the result of the amount of liabilities that would be expected to reprice exceeding the amount of assets repriced in the +200 scenario. At December 31, 2018 and December 31, 2017, for each scenario shown, the percentage change in our EVE is within our internal policy limit.

Derivative financial instruments

As a part of our risk management strategy, we use derivative financial instruments to minimize fluctuation in earnings caused by market risk. We use forward sales commitments to hedge our unclosed mortgage origination pipeline and

funded mortgage LHFS. All of our derivatives and mortgage loan production originated for sale are accounted for at fair market value. Changes to mortgage commitments are based on changes in fair value of the underlying loan, which is impacted most significantly by changes in interest rates and changes in the probability that the loan will not fund within the terms of the commitment, referred to as a fallout factor or, inversely, a pull-through rate. Market risk on interest rate lock commitments and mortgage LHFS is managed using corresponding forward sale commitments. The adequacy of these hedging strategies, the ability to fully or partially hedge market risk, rely on various assumptions or projections, including a fallout factor, which is based on a statistical analysis of our actual rate lock fallout history. For further information, see Note 12 - Derivative Financial Instruments and Note 22 - Fair Value Measurements.

Mortgage Servicing Rights (MSRs)

Our MSRs are sensitive to interest rate volatility and are highly susceptible to prepayment risk, basis risk, market volatility and changes in the shape of the yield curve. We utilize derivatives, including interest rate swaps and swaptions, as part of our overall hedging strategy to manage the impact of changes in the fair value of the MSRs, however these risk management strategies do not completely eliminate repricing risk. Our hedging strategies rely on assumptions and projections regarding assets and general market factors, many of which are outside of our control. For further information, see Note 11 - Mortgage Servicing Rights and Note 12 - Derivative Financial Instruments.

Liquidity Risk

Liquidity risk is the risk that we will not have sufficient funds, at a reasonable cost, to meet current and future cash flow needs as they become due. The liquidity of a financial institution reflects its ability to, at a reasonable cost, meet loan requests, to accommodate possible outflows in deposits and to take advantage of interest rate and market opportunities. The ability of a financial institution to meet current financial obligations is a function of the balance sheet structure, the ability to liquidate assets and access to various sources of funds.

Parent Company Liquidity

The Company currently obtains its liquidity primarily from dividends from the Bank. The primary uses of the Company's liquidity are debt service, operating expenses, the repurchase of common stock and the payment of cash dividends, which will commence in the first quarter of 2019. At December 31, 2018, the Company held \$201 million of cash at the Bank, or 3.2 years of future cash outflows, dividend payments, share repurchases and debt service coverage when excluding the redemption of \$250 million of senior notes which mature on July 15, 2021.

The OCC and the FRB regulates all capital distributions made by the Bank, directly or indirectly, to the holding company, including dividend payments. Whether an application or notice is required is based on a number of factors including whether the institution qualifies for expedited treatment under the OCC rules and regulations or if the total amount of all capital distributions (including each proposed capital distribution) for the applicable calendar year exceeds net income for that year to date plus the retained net income for the preceding two years, or the Bank would not be at least adequately capitalized following the dividend. Additional restrictions on dividends apply if the Bank fails the QTL test. At December 31, 2018, as reported to the OCC, we passed the QTL test. For the year ended December 31, 2018, we paid dividends of \$34 million from the Bank to the Bancorp. At December 31, 2018, the Bank is able to pay dividends without regulatory approval up to approximately \$177 million.

Bank Liquidity

Our primary sources of funding are deposits from retail and government customers, custodial deposits related to loans we service and FHLB borrowings. We use the FHLB of Indianapolis as a significant source for funding our residential mortgage origination business due to the flexibility in terms which allows us to borrow or repay borrowings as daily cash needs require. The amount we can borrow, or the value we receive for the assets pledged to our liquidity providers, varies based on the amount and type of pledged collateral, as well as the perceived market value of the assets and the "haircut" of the market value of the assets. That value is sensitive to the pricing and policies of our liquidity providers and can change with little or no notice.

Further, other sources of liquidity include our LHFS portfolio and unencumbered investment securities. We primarily originate agency-eligible LHFS and therefore the majority of new residential first mortgage loan originations are readily convertible to cash, either by selling them as part of our monthly agency sales, RMBS, private party whole

loan sales, or by pledging them to the FHLB and borrowing against them. In addition, we have the ability to sell unencumbered investment securities or use them as collateral. At December 31, 2018, we had \$1.3 billion available in unencumbered investment securities.

Our liquidity position is continuously monitored and adjustments are made to the balance between sources and uses of funds as deemed appropriate. We balance the liquidity of our loan assets to our available funding sources. Our LHFI portfolio is funded with stable core deposits whereas our warehouse loans and LHFS may be funded with FHLB borrowings and custodial deposits. Warehouse loans are typically more liquid than other loan assets, as loans are paid within a short amount of time, when the lender sells the loan to an outside investor or, in some instances, to the Bank. As not all asset categories require the

same level of liquidity, our loan-to-deposit ratio shows how we manage our liquidity position, how much liquidity we have and the agility of our balance sheet. The Company's HFI loan-to-deposit ratio was 73 percent at December 31, 2018. Excluding warehouse loans, which have draws that typically pay off within a few weeks, and custodial deposits, which represent mortgage escrow accounts on deposit with the Bank, the HFI loan-to-deposit ratio was 72 percent at December 31, 2018.

As governed and defined by our Board liquidity policy, we maintain adequate excess liquidity levels appropriate to cover unanticipated liquidity needs. In addition to this liquidity, we also maintain targeted minimum levels of unused borrowing capacity as another cushion against unexpected liquidity needs. Each business day, we forecast 90 days of daily cash needs. This allows us to determine our projected near term daily cash fluctuations and also to plan and adjust, if necessary, future activities. As a result, in an adverse environment, we believe we would be able to make adjustments to operations as required to meet the liquidity needs of our business, including adjusting deposit rates to increase deposits, planning for additional FHLB borrowings, accelerating sales of LHFS (agencies and/or private), selling LHFI or investment securities, borrowing through the use of repurchase agreements, reducing originations, making changes to warehouse funding facilities, or borrowing from the discount window.

Management is not aware of any events that are reasonably likely to have a material adverse effect on our liquidity.

The following table presents primary sources of funding as of the dates indicated:

	December 31, 2018	December 31, 2017	Change
	(Dollars in millions)		
Retail deposits	\$8,854	\$ 6,497	\$2,357

Money market demand accounts	173	1.4 %	102	1.1 %	71
Total commercial deposits	1,730	13.9 %	1,057	11.8 %	673
Total retail deposits	\$8,854	71.5 %	\$6,497	72.7 %	\$2,357
Government deposits					
Demand deposit accounts	\$326	2.6 %	\$251	2.8 %	\$75
Savings accounts	567	4.6 %	446	5.0 %	121
Certificates of deposit/CDARS (1)	309	2.5 %	376	4.2 %	(67)
Total government deposits	1,202	9.7 %	1,073	12.0 %	129
Wholesale deposits	583	4.7 %	43	0.5 %	540
Custodial deposits (3)	1,741	14.1 %	1,321	14.8 %	420
Total deposits (4)	\$12,380	100.0 %	\$8,934	100.0 %	\$3,446

(1) The aggregate amount of certificates of deposit with a minimum denomination of \$100,000 was approximately \$1.9 billion and \$1.4 billion at December 31, 2018 and December 31, 2017, respectively.

(2) Includes deposits from commercial and business banking customers.

(3) Represents investor custodial accounts and escrows controlled by us in connection with loans serviced or subserviced for others and that have been placed on deposit with the Bank.

(4) Total exposure to uninsured deposits over \$250,000 was approximately \$2.8 billion and \$2.6 billion at December 31, 2018 and December 31, 2017, respectively.

Total deposits increased \$3.4 billion, or 39 percent, at December 31, 2018, compared to December 31, 2017, primarily due to \$1.8 billion and \$614 million of deposits added during 2018 from the Wells Fargo Bank and Desert Community Bank branch acquisitions, respectively. In addition, custodial deposits increased \$420 million, driven by an 87 percent increase in serviced accounts along with a \$540 million increase in wholesale deposits.

We utilize local governmental agencies and other public units, as an additional source for deposit funding. We are not required to hold collateral against our government deposits from Michigan government entities as allowed by the Michigan Business and Growth Fund. At December 31, 2018, we were required to hold \$93 million in collateral for our government deposits in California that were in excess of \$250,000. In Indiana, Wisconsin and Ohio, we may be required to hold collateral against our government deposits based on a variety of factors including, but not limited to, the size of individual deposits and external bank ratings. At December 31, 2018, collateral held on government deposits in these states was de minimis. Government deposit accounts included \$309 million of certificates of deposit

with maturities typically less than one year and \$893 million in checking and savings accounts at December 31, 2018.

Custodial deposits arise due to our servicing or subservicing of loans for others and represent the investor custodial accounts on deposit with the Bank. These deposits require us to credit the MSR owner interest against subservicing income. This cost is a component of net loan administration income.

We participate in the CDARS program, through which certain customer CDs are exchanged for CDs of similar amounts from other participating banks and customers may receive FDIC insurance up to \$50 million. This program helps the

Bank secure larger deposits and attract and retain customers. At December 31, 2018, we had \$177 million of total CDs enrolled in the CDARS program, a decrease of \$13 million from December 31, 2017.

The following table indicates the scheduled maturities of our certificates of deposit with a minimum denomination of \$100,000 by acquisition channel as of December 31, 2018:

	Retail Deposits	Government Deposits	Total
	(Dollars in millions)		
Twelve months or less	\$1,166	\$ 288	\$1,454
One to two years	335	12	347
Two to three years	29	1	30
Three to four years	6	1	7
Four to five years	14	—	14
Thereafter	20	—	20
Total	\$1,570	\$ 302	\$1,872

FHLB Advances

The FHLB provides loans, also referred to as advances, on a fully collateralized basis, to savings banks and other member financial institutions. We are required to maintain a minimum amount of qualifying collateral securing FHLB advances. In the event of default, the FHLB advance is similar to a secured borrowing, whereby the FHLB has the right to sell the pledged collateral to settle the fair value of the outstanding advances.

We rely upon advances from the FHLB as a source of funding for the origination or purchase of loans for sale in the secondary market and for providing duration specific short-term and long-term financing. The outstanding balance of FHLB advances fluctuates from time to time depending on our current inventory of mortgage LHFS and the availability of lower cost funding sources. Our current portfolio includes short-term fixed rate advances and long-term fixed rate advances.

We are currently authorized through a resolution of our Board of Directors to apply for advances from the FHLB using approved loan types as collateral, which includes residential first mortgage loans, home equity lines of credit, and commercial real estate loans. As of December 31, 2018, our Board of Directors has authorized and approved a line of credit with the FHLB of up to \$10.0 billion, which is further limited based on our total assets and qualified collateral, as determined by the FHLB. At December 31, 2018, we had \$3.1 billion of advances outstanding and an additional \$2.8 billion of collateralized borrowing capacity available at the FHLB. In the fourth quarter of 2018, \$1.1 billion of our outstanding long-term FHLB advances were repaid with proceeds from the Wells Fargo branch acquisition.

Federal Reserve Discount Window

We have arrangements with the FRB of Chicago to borrow from its discount window. The discount window is a borrowing facility that we may utilize for short-term liquidity needs arising from special or unusual circumstances. The amount we are allowed to borrow is based on the lendable value of the collateral that we provide. To collateralize the line, we pledge investment securities and loans that are eligible based on FRB of Chicago guidelines.

At December 31, 2018, we pledged collateral, which included commercial loans, municipal bonds, and agency bonds, to the Federal Reserve Discount Window amounting to \$448 million with a lendable value of \$409 million. At December 31, 2017, we pledged collateral to the Federal Reserve Discount Window amounting to \$467 million with a lendable value of \$433 million. We do not typically utilize this available funding source and at December 31, 2018

and December 31, 2017, we had no borrowings outstanding against this line of credit.

Debt

As part of our overall capital strategy, we previously raised capital through the issuance of junior subordinated notes to our special purpose trusts formed for the offerings, which issued Tier 1 qualifying preferred stock (trust preferred securities). The trust preferred securities are callable by us at any time. Interest is payable on a quarterly basis; however, we may defer interest payments for up to 20 quarters without default or penalty. At December 31, 2018, we are current on all interest payments.

For further information, see Note 14 - Borrowings.

55

Contractual Obligations

We have various financial obligations, some of which are contractual obligations, which require future cash payments. For further information on each item, see Note 1 - Description of Business, Basis of Presentation, and Summary of Significant Accounting Standards, Note 10 - Premises and Equipment, Note 13 - Deposit Accounts and Note 14 - Borrowings.

The following table summarizes contractual obligations at December 31, 2018, and the future periods in which the obligations are expected to be settled in cash:

	Less than 1 Year	1-3 Years	3-5 Years	More than 5 Years	Total
	(Dollars in millions)				
Deposits without stated maturities	\$7,361	\$ —	\$ —	\$ —	\$7,361
Certificates of deposits	2,509	705	37	28	3,279
Short-term FHLB advances and other borrowings	3,244	—	—	—	3,244
Long-term FHLB advances	50	—	—	100	150
Senior notes	—	248	—	—	248
Trust preferred securities	—	—	—	247	247
Operating leases	9	10	3	3	25
DOJ litigation settlement	—	—	—	118	118
Other (1)	24	12	—	1	37
Total	\$13,197	\$ 975	\$ 40	\$ 497	\$14,709

(1) Includes contracts with vendors and commitments to various limited partnerships that invest in housing projects qualifying for the low income housing tax credit.

Operational Risk

Operational risk is the risk of loss due to human error; inadequate or failed internal systems and controls; violations of, or noncompliance with, laws, rules and regulations, prescribed practices, or ethical standards; and external influences such as market conditions, fraudulent activities, disasters, and security risks. We continuously strive to adapt our system of internal controls to ensure compliance with laws, rules, and regulations, and to improve the oversight of our operational risk.

We evaluate internal systems, processes, and controls to mitigate loss from cyber-attacks and, to date, have not experienced any material losses. The goal of this framework is to implement effective operational risk techniques and strategies, minimize operational and fraud losses, and enhance our overall performance.

Loans with government guarantees

Substantially all of our loans with government guarantees continue to be insured or guaranteed by the FHA or the U.S. Department of Veterans Affairs. In the event of a government guaranteed loan borrower default, Flagstar has a unilateral option to repurchase loans sold to GNMA that are 90 days past due and recover losses through a claims process from the insurer. Nonperforming repurchased loans in this portfolio earn interest at a rate based upon the 10-year U.S. Treasury note rate from the time the underlying loan becomes delinquent, which is not paid by the FHA until claimed. Additionally, if the Bank cures the loan, it can be re-sold to GNMA. If not, the Bank can begin the process of collecting the government guarantee by filing a claim in accordance with established guidelines. Certain loans within our portfolio may be subject to indemnifications and insurance limits which expose us to limited credit

risk.

During the year ended December 31, 2018, we experienced net charge-offs of \$2 million related to loans with government guarantees and have reserved for the remaining risks within other assets and as a component of our ALLL on residential first mortgages. These additional expenses or charges arise due to insurance limits on VA insured loans and FHA property foreclosure and preservation requirements that may result in a loss in excess of all, or part of, the guarantee.

Our loans with government guarantees portfolio totaled \$392 million at December 31, 2018, as compared to \$271 million at December 31, 2017. The increase is primarily due to new purchases out-pacing loans transferred to LHFS and resold to Ginnie Mae.

For further information, see Note 6 - Loans with Government Guarantees.

56

Regulatory Risks

Supervisory Agreement

The Supervisory Agreement originally dated January 27, 2010, was lifted by the Federal Reserve on August 14, 2018. For further information and a complete description of all of the terms of the Supervisory Agreement, please refer to the copy of the Supervisory Agreement filed with the SEC as an exhibit to our 2016 Form 10-K for the year ended December 31, 2016.

Department of Justice Settlement Agreement

On February 24, 2012, the Bank entered into a Settlement Agreement with the DOJ under which we made an initial payment of \$15 million and agreed to make future payments totaling \$118 million in annual increments of up to \$25 million upon meeting all of the following conditions which are evaluated quarterly and include: (a) the reversal of the DTA valuation allowance, which occurred at the end of 2013; (b) the repayment of the Fixed Rate Cumulative Perpetual Preferred Stock, Series C (the "TARP Preferred"), which occurred in July 2016; and (c) the Bank having a Tier 1 Leverage Capital Ratio of 11 percent or greater as filed in the Call Report with the OCC. At December 31, 2018, the Company had a Tier 1 Leverage Capital Ratio of 8.67 percent.

No payment would be required until six months after the Bank files its Call Report first reporting that its Tier 1 Leverage Capital Ratio was 11 percent or greater. If all other conditions were then satisfied, an initial annual payment of \$25 million would be due at that time. The next annual payment is only made if all conditions continue to be satisfied, otherwise payments are delayed until all such conditions are again met. Further, making such a payment must not violate any material banking regulatory requirement, and the OCC must not object in writing. The combination of (a) future dividends from the Bank to Bancorp and (b) continued growth in earning assets at the Bank are expected to continue to limit the growth rate of the Bank's Tier 1 Leverage Capital Ratio, which could have an impact on the timing of expected cash flows under the Settlement Agreement.

Consistent with our business and regulatory requirements, Flagstar shall seek in good faith to fulfill the conditions, and will not undertake any conduct or fail to take any action the purpose of which is to frustrate or delay our ability to fulfill any of the conditions.

Additionally, if the Bank or Bancorp become party to a business combination in which the Bank and Bancorp represent less than 33.3 percent of the resulting company's assets, annual payments would commence twelve months after the date of that business combination.

The Settlement Agreement meets the definition of a financial instrument for which we elected the fair value option. We consider the assumptions a market participant would make to transfer the liability and evaluate the potential ways we might satisfy the Settlement Agreement and our estimates of the likelihood of these outcomes, which may change over time. The fair value of the liability is subject to significant uncertainty and is impacted by forecasted estimates of the timing of potential payments, which are impacted by estimates of equity, earnings, timing and amount of dividends and growth of the balance sheet and their related impacts on forecasted Tier 1 Leverage Capital Ratio, the likelihood of the Bank or Bancorp being a party to a business combination resulting in terms which would require payments to commence, or any other means by which a payment could be made. For further information on the fair value to the liability, see Note 22 - Fair Value Measurements.

Capital

Management actively reviews and manages our capital position and strategy. We conduct quarterly capital stress tests and capital adequacy assessments which utilize internally defined scenarios. These analyses are designed to help management and the Board better understand the integrated sensitivity of various risk exposures through quantifying the potential financial and capital impacts of hypothetical stressful events and scenarios. We make adjustments to our balance sheet composition taking into consideration potential business risks, regulatory requirements and the flexibility to support future growth. We prudently manage our capital position and work with our regulators to ensure that our capital levels are appropriate considering our risk profile.

The capital standards we are subject to include requirements contemplated by the Dodd-Frank Act as well as guidelines reached by Basel III. These risk-based capital adequacy guidelines are intended to measure capital adequacy with regard to a banking organization's balance sheet, including off-balance sheet exposures such as unused portions of loan

commitments, letters of credit, and recourse arrangements. Our capital ratios are maintained at levels in excess of those considered to be "well-capitalized" by regulators. Tier 1 leverage was 8.29 percent at December 31, 2018 providing a 329 basis point stress buffer above the minimum level needed to be considered "well-capitalized." Additionally, total risk-based capital to RWA was 13.63 percent at December 31, 2018 providing a 363 basis point stress buffer above the minimum level needed to be considered "well-capitalized".

Dodd-Frank Act Section 171, commonly known as the Collins Amendment, established minimum Tier 1 leverage and risk-based capital requirements for insured depository institutions, depository institution holding companies, and non-bank financial companies that are supervised under the Federal Reserve. Under the amendment, certain hybrid securities, such as trust preferred securities, may be included in Tier 1 capital for bank holding companies that had total assets below \$15 billion as of December 31, 2009. As we were below \$15 billion in assets as of December 31, 2009, the trust preferred securities classified as long term debt on our balance sheet will be included as Tier 1 capital, unless we complete an acquisition of a depository institution holding company or a depository institution, and we report total assets greater than \$15 billion in the quarter in which the acquisition occurs. Should that event occur, our trust preferred securities would be included in Tier 2 capital.

Regulatory Capital Simplification

The Bank and Flagstar have been subject to the capital requirements of the Basel III rules since January 1, 2015. On October 27, 2017, the agencies issued a notice of proposed rulemaking ("NPR") which would simplify certain aspects of the Basel III capital rules. The agencies expect that the capital treatment and transition provisions for items covered by this final rule will change once the simplification proposal is finalized and effective. Specifically, the proposal would increase the individual limit on MSRs and temporary difference DTAs to 25 percent of CET1 and eliminate the aggregate 15 percent CET1 deduction threshold for MSRs and temporary difference DTAs. In response to comments received from bankers and trade associations, the regulators may change these proposed rules prior to issuing them and it is uncertain when the rules will be issued in their final form. We are currently managing our capital in anticipation of the approval of the proposed rule.

For the period presented, the following table sets forth our capital ratios under the current rules and proposed capital simplification rules, as well as our excess capital over well-capitalized minimums under both rules.

Flagstar Bancorp	Actual		Well-Capitalized Under Prompt Corrective Action Provisions		Under Proposed Capital Simplification		Excess Capital Over Well-Capitalized Minimum (1)	
	Amount	Ratio	Amount	Ratio	Amount	Ratio	Current Rule	Capital Simplification Rules
(Dollars in millions)								
December 31, 2018								
Tier 1 leverage capital (to adjusted avg. total assets)	\$1,505	8.29 %	\$ 908	5.0 %	\$ 1,627	8.90 %	\$ 597	\$ 713
Common equity Tier 1 capital (to RWA)	1,265	10.54 %	780	6.5 %	1,387	10.97 %	485	565
Tier 1 capital (to RWA)	1,505	12.54 %	960	8.0 %	1,627	12.87 %	545	616
Total capital (to RWA)	1,637	13.63 %	1,201	10.0 %	1,758	13.91 %	436	495

(1) Excess capital is the difference between the actual capital ratios under either the current rule or the proposed capital simplification rules and the well-capitalized minimum ratio, multiplied by the relevant asset base.

As presented in the table above, our constraining capital ratio is our total capital to risk weighted assets at 13.63 percent. It would take a \$436 million after-tax loss, with the balance sheet remaining constant, for our total risk-based capital ratio to fall below the level considered to be "well-capitalized" and an after-tax loss of \$495 million, under the proposed capital simplification rules.

In preparation for the NPR, the Basel III implementation phase-in has been halted for the treatment of MSRs and certain DTAs. The agencies issued a final rule that will maintain the capital rules' 2017 transition provisions for several regulatory capital deductions and certain other requirements that are subject to multi-year phase-in schedules in the regulatory capital rules. Specifically, the final rule will maintain the capital rules' 2017 transition provisions at 80 percent for the regulatory capital treatment of the following items: (i) MSRs, (ii) DTAs arising from temporary differences that could not be realized through net operating loss carrybacks, (iii) investments in the capital of unconsolidated financial institutions, and (iv) minority interests. As of December 31, 2018, we had \$290 million in MSRs, \$48 million in DTAs arising from temporary differences and no material investments in unconsolidated financial institutions or minority interest. This final rule will

maintain the 2017 transition provisions for certain items for non-advanced approach banks. For additional information on our capital requirements, see Note 20 - Regulatory Capital.

59

Use of Non-GAAP Financial Measures

In addition to results presented in accordance with GAAP, this report includes non-GAAP financial measures such as tangible book value per share, tangible common equity to assets ratio, adjusted net income, adjusted diluted earnings per share, adjusted net interest income, adjusted net interest margin and adjusted interest rate spread. We believe these non-GAAP financial measures provide additional information that is useful to investors in helping to understand the underlying performance and trends of the Company.

Non-GAAP financial measures have inherent limitations, which are not required to be uniformly applied and are not audited. Readers should be aware of these limitations and should be cautious with respect to the use of such measures. To mitigate these limitations, we have practices in place to ensure that these measures are calculated using the appropriate GAAP or regulatory components in their entirety and to ensure that our performance is properly reflected to facilitate consistent period-to-period comparisons. Our method of calculating these non-GAAP measures may differ from methods used by other companies. Although we believe the non-GAAP financial measures disclosed in this report enhance investors' understanding of our business and performance, these non-GAAP measures should not be considered in isolation, or as a substitute for those financial measures prepared in accordance with GAAP. Where non-GAAP financial measures are used, the most directly comparable GAAP or regulatory financial measure, as well as the reconciliation to the most directly comparable GAAP or regulatory financial measure, can be found in this report.

Tangible book value per share, tangible common equity to assets ratio, adjusted net income, adjusted diluted earnings per share, adjusted net interest income, adjusted net interest margin, adjusted interest rate spread and adjusted noninterest expense. The Company believes that tangible book value per share, tangible common equity to assets ratio, adjusted earnings, and adjusted diluted earnings per share provides a meaningful representation of its operating performance on an ongoing basis. Management uses these measures to assess performance of the Company against its peers and evaluate overall performance. The Company believes these non-GAAP financial measures provide useful information for investors, securities analysts and others because it provides a tool to evaluate the Company's performance on an ongoing basis and compared to its peers.

The following tables provide a reconciliation of non-GAAP financial measures.

(1) Under the terms of the Series C Preferred Stock, we elected to defer dividends beginning with the February 2012 dividend. Although, while being deferred, the impact was not included in net income from continuing operations, the deferral did impact net income applicable to common stock for the purpose of calculating earnings per share. In July 2016, we ended the deferral and brought current our previously deferred dividends and redeemed the stock.

Accounting and Reporting Developments

For further information of recently issued accounting pronouncements and their expected impact on our Consolidated Financial Statements, see Note 1 - Description of Business, Basis of Presentation, and Summary of Significant

Accounting Standards.

Critical Accounting Estimates

Our Consolidated Financial Statements are prepared in accordance with U.S. GAAP and reflect general practices within our industry. Our significant accounting policies are described in Note 1 - Description of Business, Basis of Presentation, and Summary of Significant Accounting Standards. Some of our significant accounting policies require complex judgments and estimates to determine values of assets and liabilities. The more judgmental, uncertain and complex estimates are further discussed below. These estimates are based on information available to management as of the date of the Consolidated Financial Statements. Accordingly, as this information changes, future financial statements could reflect different estimates or judgments.

Allowance for Loan Losses

The ALLL represents management's estimate of probable credit losses inherent in our LHFI portfolio. The ALLL is sensitive to a variety of internal factors, such as the mix and level of loan balances outstanding, TDR volume, net charge-off experience, as well as external factors, such as, property values, the general health of the economy, unemployment rates, bankruptcy filings, peer data, etc. Management considers these variables and all other available information when establishing the final level of the allowance. These variables and others have the ability to result in actual loan losses that differ from the originally estimated amounts.

The ALLL includes a component related to specifically identified impaired loans (TDR and NPL loans) and a collectively evaluated model-based component. For further discussion on the methodologies used in determining our allowance, see Note 1 - Description of Business, Basis of Presentation, and Summary of Significant Accounting Standards.

Specifically identified component

The specifically identified component of the ALLL related to performing TDR loans is generally measured as the difference between the recorded investment in the specific loan and the present value of the cash flows expected to be collected, discounted at the loan's original effective interest rate. Estimating the timing and amounts of future cash flow projections is highly judgmental and based upon assumptions including default rates, prepayment probability and loss severities. All of these estimates and assumptions require significant management judgment and certain assumptions are highly subjective.

Specifically identified collateral dependent NPL loans are generally measured as the difference between the recorded investment in the impaired loan and the underlying collateral value less estimated costs to sell. These estimates are dependent on third party property valuations which may be influenced by factors such as the current and future level of home prices, the duration of current overall economic conditions, and other macroeconomic and portfolio-specific factors.

Model based component

The model-based component of the ALLL is calculated on our non-impaired consumer and commercial LHFI portfolio by applying average historical loss rates experienced during an identified look back period to outstanding principal balances over an estimated loss emergence period. For portfolios that do not have adequate loss experience and purchased portfolios, we utilize peer loss data in determining the ALLL. The loss emergence period represents the time period between the date at which the loss is estimated to have been incurred and the ultimate realization of that loss (by a charge-off). Estimated loss emergence periods may vary by product and may change over time; management applies judgment in estimating loss emergence periods, using available credit information and trends.

The historical loss model calculation is then adjusted by taking other qualitative factors into consideration, such as current economic events that have occurred but may not yet be reflected in the historical loss estimates and model imprecision. These adjustments are determined by analyzing the historical loss experience for each major product segment and its underlying credit characteristics. It is difficult to predict whether historical loss experience is indicative of future loss levels, therefore, management applies judgment in making adjustments deemed necessary based on the following factors: changes in lending policies and procedures, changes in economic and business conditions, changes in the nature and volume of the portfolio, changes in lending management, changes in credit quality statistics, changes in the quality of the loan review system, changes in the value of underlying collateral for collateral-dependent loans, the potential impact of payment recasts, changes in concentrations of credit, and other internal or external factor changes. The application of different inputs into the model calculation and the assumptions used by management to adjust the model calculation are subject to significant management judgment and may result in actual loan losses that differ from the originally estimated amounts.

Fair Value Measurements

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value is based on quoted market prices in an active market, or if market prices are not available, is estimated using models employing techniques such as matrix pricing or discounting expected cash flows.

The significant assumptions used in the models are independently verified against observable market data where possible. Where observable market data is not available, the estimate of fair value becomes more subjective and involves a high degree of judgment. In this circumstance, fair value is estimated based on our judgment regarding the value that market participants would assign to the asset or liability. Therefore, the results cannot be determined with precision and may not be realized in an actual sale or immediate settlement of the asset or liability. Additionally, there are inherent limitations to any valuation technique, and changes in the underlying assumptions used, including discount rates and estimates of future cash flows, could significantly affect the results of current or future values.

A portion of our assets and liabilities are carried at fair value on the Consolidated Statements of Financial Condition. The majority of these assets and liabilities are measured at fair value on a recurring basis, however, certain assets are measured at fair value on a nonrecurring basis based on the fair value of the underlying collateral.

For further information regarding the valuation of our financial instruments, including those that utilize unobservable inputs, see Note 1 - Description of Business, Basis of Presentation, and Summary of Significant Accounting Standards and Note 22 - Fair Value Measurements.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

A discussion regarding our management of market risk is included in "Market Risk" in this report in Part II, Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of Flagstar Bancorp, Inc.

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated statements of financial condition of Flagstar Bancorp, Inc. and its subsidiaries (the “Company”) as of December 31, 2018 and 2017, and the related consolidated statements of operations, comprehensive income, stockholders’ equity and cash flows for each of the three years in the period ended December 31, 2018, including the related notes (collectively referred to as the “consolidated financial statements”). We also have audited the Company's internal control over financial reporting as of December 31, 2018, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2018 and 2017, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2018 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2018, based on criteria established in Internal Control - Integrated Framework (2013) issued by the COSO.

Basis for Opinions

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on the Company’s consolidated financial statements and on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

/s/ PricewaterhouseCoopers LLP
Detroit, Michigan
February 28, 2019

We have served as the Company's auditor since 2015.

Flagstar Bancorp, Inc.
Notes to the Consolidated Financial Statements

Note 1 - Description of Business, Basis of Presentation, and Summary of Significant Accounting Policies

Description of Business

Flagstar Bancorp, Inc., is a savings and loan holding company founded in 1993. The Company's business is primarily conducted through its principal subsidiary, Flagstar Bank, FSB (the "Bank"), a federally chartered stock savings bank founded in 1987. We are one of the largest banks headquartered in Michigan. When we refer to "Flagstar", "the Company", "we", "our", or "us," we mean Flagstar Bancorp, Inc. and our consolidated subsidiaries.

The Company is subject to regulation, examination and supervision by the Board of Governors of the Federal Reserve ("Federal Reserve"). The Bank is subject to regulation, examination and supervision by the OCC of the U.S. Department of the Treasury, the CFPB and the FDIC. The Bank is a member of the FHLB of Indianapolis and its deposits are insured by the FDIC through the Deposit Insurance Fund.

Consolidation and Basis of Presentation

The accounting and financial reporting policies of us and our subsidiaries conform to accounting principles generally accepted in the United States. Additionally, where applicable the policies conform to the accounting and reporting guidelines prescribed by regulatory authorities. Certain prior period amounts have been reclassified to conform to the current period presentation. The preparation of the Consolidated Financial Statements, requires management to make estimates and assumptions that affect reported amounts of assets and liabilities, revenues and expenses and disclosures of contingent assets and liabilities. Actual results could be materially different from these estimates.

Subsequent Events

We have evaluated all subsequent events for potential recognition and disclosure through the filing date of this Form 10-K.

Cash, Cash Equivalents and Restricted Cash

Cash and cash equivalents include cash on hand, amounts due from correspondent banks and the FRB, and short-term investments that have a maturity at the date of acquisition of three months or less and are readily convertible to cash. Restricted cash includes cash that the Bank pledges as maintenance margin on centrally cleared derivatives and is included in other assets on the Consolidated Statements of Financial Condition.

Investment Securities

We measure securities classified as AFS at fair value, with unrealized gains and losses, net of tax, included in other comprehensive income (loss) in stockholders' equity. We recognize realized gains and losses on AFS securities when securities are sold. The cost of securities sold is based on the specific identification method. Any gains or losses realized upon the sale of a security are reported in other noninterest income in the Consolidated Statements of Operations. The fair value of investment securities is based on observable market prices, when available. If observable market prices are not available, our valuations are based on alternative methods, including: quotes for similar fixed-income securities, matrix pricing, or discounted cash flow methods. The fair values, obtained through an independent third party utilizing a pricing service, are compared to independent pricing sources on a quarterly basis.

For further information, see Note 3 - Investment Securities and Note 22 - Fair Value Measurements.

Investment securities HTM are carried at amortized cost and adjusted for amortization of premiums and accretion of discounts using the interest method. Transfers of investment securities into the HTM category from the AFS category are accounted for at fair value at the date of transfer. Any related unrealized holding gain (loss), net of tax, that was included in the transfer is retained in other comprehensive income (loss) and is amortized as an adjustment to interest income over the remaining life of the securities.

We evaluate AFS and HTM investment securities for OTTI on a quarterly basis. An OTTI is considered to have occurred when the fair value of a debt security is below its amortized costs and we (1) have the intent to sell the security, (2) will more likely than not be required to sell the security before recovery of its amortized cost, or (3) do not expect to recover the

Flagstar Bancorp, Inc.
Notes to the Consolidated Financial Statements

entire amortized cost basis of the security. Investments that have an OTTI are written down through a charge to earnings for the amount representing the credit loss on the security. Gains and losses related to all other factors are recognized in other comprehensive income (loss). For the three years ended December 31, 2018, we did not recognize any OTTI losses.

Investment securities transactions are recorded on the trade date for purchases and sales. Interest earned on investment securities, including the amortization of premiums and the accretion of discounts, are determined using the effective interest method over the period of maturity and recorded in interest income in the Consolidated Statements of Operations. For further information, see Note 3 - Investment Securities.

Loans Held-for-Sale

We classify loans as LHFS when we originate or purchase loans that we intend to sell. We have elected the fair value option for the majority of our LHFS. We estimate the fair value of mortgage loans based on quoted market prices for securities backed by similar types of loans, where available, or by discounting estimated cash flows using observable inputs inclusive of interest rates, prepayment speeds and loss assumptions for similar collateral. LHFS that are recorded at lower of cost or fair value may be carried at fair value on a nonrecurring basis when the fair value is less than cost. For further information, see Note 22 - Fair Value Measurements.

Loans that are transferred into the LHFS portfolio from the LHFI portfolio, due to a change in intent, are recorded at the lower of cost or fair value. Gains or losses recognized upon the sale of loans are determined using the specific identification method.

Loans Held-for-Investment

We classify loans that we have the intent and ability to hold for the foreseeable future or until maturity as LHFI. Loans held-for-investment are reported at their amortized cost, which includes the outstanding principal balance adjusted for any unamortized premiums, discounts, deferred fees and costs. Premiums and discounts on purchased loans and non-refundable loan origination and commitment fees, net of direct costs of originating or acquiring loans, are deferred and recognized over the estimated lives of the related loans as an adjustment to the loans' effective yield, which is included in interest income on loans in the Consolidated Statements of Operations.

Loans originally classified as LHFS, for which we have elected the fair value option, and subsequently transferred to LHFI continue to be measured and reported at fair value on a recurring basis. Changes in fair value are recorded to other noninterest income on the Consolidated Statements of Operations. The fair value of these loans is determined using the same methods described above for LHFS. For further information, see Note 22 - Fair Value Measurements.

When loans originally classified as LHFS or as LHFI are reclassified due to a change in intent or ability to hold, cash flows associated with the loans are classified in the Consolidated Statements of Cash Flows as operating or investing, as appropriate, in accordance with the initial classification of the loans.

Past Due and Impaired Loans

Loans are considered to be past due when any payment of principal or interest is 30 days past the scheduled payment date. While it is the goal of management to collect on loans, we attempt to work out a satisfactory repayment schedule or modification with past due borrowers and will undertake foreclosure proceedings if the delinquency is not satisfactorily resolved. Our practices regarding past due loans are designed to both assist borrowers in meeting their

contractual obligations and minimize losses incurred by the bank.

We cease the accrual of interest on all classes of consumer and commercial loans upon the earlier of, becoming 90 days past due, or when doubt exists as to the ultimate collection of principal or interest (classified as nonaccrual or nonperforming loans). When a loan is placed on nonaccrual status, the accrued interest income is reversed against interest income and the loan may only return to accrual status when principal and interest become current and are anticipated to be fully collectible.

Loans are considered impaired if it is probable that payment of interest and principal will not be made in accordance with the original contractual terms of the loan agreement or when any portion of principal or interest is 90 days past due. This classification includes both performing and nonperforming modified loans. For further information, see Note 5 - Loans Held-for-Investment.

Flagstar Bancorp, Inc.
Notes to the Consolidated Financial Statements

When a loan is considered impaired, the accrual of interest income is discontinued until the receipt of principal and interest is no longer in doubt. Interest income is recognized on impaired loans using a cost recovery method unless amounts contractually due are not in doubt. Cash received on impaired loans is applied entirely against principal until the loan has been collected in full, after which time any additional cash receipts are recognized as interest income.

Loan Modifications (Troubled Debt Restructurings)

We may modify certain loans in both our consumer and commercial loan portfolios to retain customers or to maximize collection of the outstanding loan balance. We have programs designed to assist borrowers by extending payment dates or reducing the borrower's contractual payments. All loan modifications are made on a case-by-case basis. Our standards relating to loan modifications consider, among other factors, minimum verified income requirements, cash flow analysis, and collateral valuations. TDRs result in those instances in which a borrower demonstrates financial difficulty and for which a concession has been granted, which includes reductions of interest rate, extensions of amortization period, principal and/or interest forgiveness and other actions intended to minimize the economic loss and to avoid foreclosure or repossession of collateral. These loans are classified as nonperforming TDRs if the loan was nonperforming prior to the restructuring, or based upon the results of a contemporaneous credit evaluation. Such loans will continue on nonaccrual status until the borrower has established a willingness and ability to make the restructured payments for at least six months, after which they will be classified as performing TDRs and begin to accrue interest. Performing and nonperforming TDRs remain impaired as interest and principal will not be received in accordance with the original contractual terms of the loan agreement.

Some loan modifications classified as TDRs may not ultimately result in the full collection of principal and interest, as modified, but may give rise to potential incremental losses. We measure impairments using a discounted cash flow method for performing TDRs and measure impairment based on collateral values for nonperforming TDRs.

Allowance for Loan Losses

The allowance for loan losses represents management's estimate of probable losses in our LHFI portfolio, excluding loans carried under the fair value option. We establish an allowance when (a) available information indicates that it is probable that a loss has occurred and (b) the amount of the loss can be reasonably estimated. The allowance provides for probable losses that have been specifically identified (TDR and NPL loans) and for probable losses believed to be inherent in the loan portfolio which are collectively evaluated through a model-based component. Management applies judgment and assigns qualitative factors to each loan portfolio segment based on consideration of the following factors: changes in lending policies and procedures, changes in economic and business conditions, changes in the nature and volume of the portfolio, changes in lending management, changes in credit quality statistics, changes in the quality of the loan review system, changes in the value of underlying collateral for collateral-dependent loans, changes in concentrations of credit, and other internal or external factor changes.

A specific allowance is established on impaired loans when it is probable all amounts due will not be collected pursuant to the original contractual terms of the loan and the recorded investment in the loan exceeds its fair value. The required allowance is measured using either the present value of the expected future cash flows discounted at the loan's effective interest rate or the fair value of the collateral less estimated costs to sell if the loan is collateral dependent.

A general allowance is established for losses inherent on non-impaired loans by segmenting the portfolio based upon common risk characteristics. The general loss is then determined by using a historical loss model which utilizes our loss history by specific product, or if the product is not sufficiently seasoned, per readily available industry peer loss

data. The loss model utilizes average historical loss rates experienced during an identified look back period to outstanding principal balances over an estimated loss emergence period that represents the time period between the date at which the loss is estimated to have been incurred and the ultimate realization of that loss (by a charge-off). In addition to the loss history or peer data, we also include a qualitative adjustment that considers economic risks, industry and geographic concentrations and other factors not adequately captured in our methodology.

Consumer loans secured by real estate are charged-off to the estimated fair value of the collateral when a loss is confirmed or at 180 days past due, whichever is sooner. Loss confirming events include, but are not limited to, bankruptcy (unsecured), continued delinquency, foreclosure or receipt of an asset valuation indicating a collateral deficiency and the asset is the sole source of repayment. For consumer loans not secured by real estate, the charge-off is taken upon the earlier of the confirmation of a loss or 120 days past due.

Flagstar Bancorp, Inc.
Notes to the Consolidated Financial Statements

Commercial loans are evaluated on a loan level basis and either charged-off or written down to net realizable value if a loss confirming event has occurred. Loss confirming events include, but are not limited to, bankruptcy (unsecured), continued delinquency, foreclosure, or receipt of an asset valuation indicating a collateral deficiency and that asset is the sole source of repayment.

Transfers of Financial Assets

Our recognition of gain or loss on the sale of loans for which we surrender control is accounted for as a sale to the extent that 1) the transferred assets are legally isolated from us or our consolidated affiliates, even in bankruptcy or other receivership, 2) the transferee has the right to pledge or exchange the assets with no conditions that constrain the transferee and provide more than a trivial benefit to the Company, and 3) we do not maintain the obligation or unilateral ability to reclaim or repurchase the assets. If the sale criteria are met, the transferred financial assets are removed from the Consolidated Statements of Financial Condition and a gain or loss on sale is recognized.

Variable Interest Entities

An entity that has a controlling financial interest in a variable interest entity (VIE) is referred to as the primary beneficiary and consolidates the VIE. An entity is deemed to have a controlling financial interest and is the primary beneficiary of a VIE if it has both the power to direct the activities of the VIE that most significantly impact the VIE's economic performance and an obligation to absorb losses or the right to receive benefits that could potentially be significant to the VIE. For further information, see Note 8 - Variable Interest Entities.

Repossessed Assets

Repossessed assets include one-to-four family residential property, commercial property and one-to-four family homes under construction that were acquired through foreclosure or acceptance of a deed-in-lieu of foreclosure. Repossessed assets are initially recorded in other assets at the estimated fair value of the collateral less estimated costs to sell. Losses arising from the initial acquisition of such properties are charged against the ALLL at the time of transfer. Subsequent valuation adjustments to reflect fair value, as well as gains and losses on disposal of these properties, are charged to other noninterest expense within noninterest expense in the Consolidated Statements of Operations as incurred. For further information, see Note 7 - Repossessed Assets and Note 22 - Fair Value Measurements.

Loans with Government Guarantees

We originate government guaranteed loans which are pooled and sold as Ginnie Mae MBS. Pursuant to Ginnie Mae servicing guidelines, we have the unilateral right to repurchase loans 90 days or more past due securitized in Ginnie Mae pools. As a result, once the delinquency criteria have been met, and regardless of whether the repurchase option has been exercised, we account for the loans as if they had been repurchased. We recognize the loans and corresponding liability as loans with government guarantees and other liabilities, respectively, in the Consolidated Statements of Financial Condition. If the loan is repurchased, the liability is cash settled and the loan with government guarantee remains. Once repurchased, we may collect losses through a claims process with the government agency, as an approved lender.

Federal Home Loan Bank Stock

We own stock in the FHLB of Indianapolis, as required to permit us to obtain membership in and to borrow from the FHLB. No market quotes exist for the stock. The stock is redeemable at par and is carried at cost.

Premises and Equipment

Premises and equipment are carried at cost less accumulated depreciation. Land is carried at historical cost. Depreciation is calculated on a straight-line basis over the estimated useful lives of the assets which generally ranges from three to thirty years. Capitalized software is amortized on a straight-line basis over its useful life, which generally ranges from three to seven years. Software expenditures, repair and maintenance costs that are considered general, administrative, or of a maintenance nature are expensed as incurred.

Flagstar Bancorp, Inc.
Notes to the Consolidated Financial Statements

Goodwill and Intangible Assets

The excess of the cost of an acquisition over the fair value of the net assets acquired consists primarily of goodwill, core deposit intangibles and other identifiable intangible assets.

Goodwill is not amortized, but rather tested annually for impairment, or more frequently as events occur or circumstances change that would indicate the fair value is below the carrying amount. The Company may assess qualitative factors to determine whether it is more-likely-than-not the fair value is less than its carrying amount. If the Company concludes based on the qualitative assessment that goodwill may be impaired, a quantitative one-step impairment test would then be applied. An impairment loss would be recognized for any excess of carrying value over fair value of the goodwill.

Intangible assets subject to amortization are amortized over the estimated life, using a method that approximates the time the economic benefits are realized by the Company. Intangible assets are reviewed for impairment at least annually and whenever events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable.

Amortization expense on intangible assets was \$5 million and less than \$1 million for the years ended December 31, 2018 and December 31, 2017, respectively. The estimated future aggregate amortization expense on intangible assets for the years ended 2019, 2020, 2021, 2022, and 2023 is \$15 million, \$13 million, \$11 million, \$9 million, and \$7 million, respectively.

Mortgage Servicing Rights

We purchase and originate mortgage loans for sale to the secondary market and sell the loans on either a servicing-retained or servicing-released basis. If we retain the right to service the loan, an MSR is created at the time of sale which is recorded at fair value. We use an internal valuation model that utilizes an option-adjusted spread and other assumptions to determine the fair value of MSRs which include anticipated prepayment speeds (also known as the constant prepayment rate), product type (i.e., conventional, government, balloon), fixed or adjustable rate of interest, interest rate, term (i.e., 15 or 30 years), servicing costs per loan, discount rate and estimate of ancillary income such as late fees and prepayment fees.

Management obtains third-party valuations of the MSR portfolio on a quarterly basis from independent valuation services to assess the reasonableness of the fair value calculated by our internal valuation model. Changes in the fair value of our mortgage servicing rights are reported on the Consolidated Statements of Operations in net return on mortgage servicing. For further information, see Note 11 - Mortgage Servicing Rights and Note 22 - Fair Value Measurements.

We periodically enter into agreements to sell certain of our MSRs, which qualify as sales transactions. A transfer of servicing rights related to loans previously sold qualifies as a sale at the date on which title passes, if substantially all risks and rewards of ownership have irrevocably passed to the transferee and any protection provisions retained by the transferor are minor and can be reasonably estimated. In addition, if a sale is recognized and only minor protection provisions exist, a liability is accrued for the estimated obligation associated with those provisions.

Servicing Fee Income

Servicing fee income, late fees and ancillary fees received on loans for which we own the MSR, are included in the net return on mortgage servicing asset line of the Consolidated Statements of Operations. The fees are based on the

outstanding principal and are recorded as income when earned. Subservicing fees, which are included in loan administration income on the Consolidated Statements of Operations are based on a contractual monthly amount per loan including late fees and other ancillary income.

Derivatives

We utilize derivative instruments to manage the fair value changes in our MSR's, interest rate lock commitments and LHFS portfolio which are exposed to price and interest rate risk, facilitate asset/liability management, minimize the variability of future cash flows on long-term debt, and to meet the needs of our customers. All derivatives are recognized on the Consolidated Statements of Financial Condition as other assets and liabilities, as applicable, at their estimated fair value. For those derivatives designated as qualified cash flow hedges, changes in the fair value of the derivatives, to the extent effective as a hedge, are recorded in accumulated other comprehensive income, net of income taxes, and reclassified into earnings concurrently with the earnings of the hedged item. For derivative instruments designated as qualified fair value hedges, which are used to hedge the exposure of fair value changes of an asset or liability attributable to a particular risk, the gain or loss on the derivative instrument, as well as the offsetting gain or loss on the hedged item attributable to the hedged risk, are recognized in current earnings during the period of the change in fair values. For all other derivatives, changes in the fair value of the

Flagstar Bancorp, Inc.
Notes to the Consolidated Financial Statements

derivative are recognized immediately in earnings. A majority of these derivatives are subject to master netting agreements and cleared through a Central Counterparty Clearing House, which mitigates non-performance risk with counterparties and enables us to settle activity on a net basis.

We use interest rate swaps, swaptions, futures, and forward loan sale commitments to mitigate the impact of fluctuations in interest rates and interest rate volatility on the fair value of the MSRs. Changes in their fair value are reflected in current period earnings under the net return on mortgage servicing asset. These derivatives are valued based on quoted prices for similar assets in an active market with inputs that are observable.

We also enter into various derivative agreements with customers and correspondents in the form of interest-rate lock commitments and forward purchase contracts which are commitments to originate or purchase mortgage loans whereby the interest rate on the loan is determined prior to funding and the customers have locked into that interest rate. The derivatives are valued using internal models that utilize market interest rates and other unobservable inputs. Changes in the fair value of these commitments due to fluctuations in interest rates that are to be originated to our LHFS portfolio are economically hedged through the use of forward loan sale commitments of MBS. The gains and losses arising from this derivative activity are reflected in current period earnings under the net gain on loan sales. Interest rate lock commitments are valued using internal models with significant unobservable market parameters. Forward loan sale commitments are valued based on quoted prices for similar assets in an active market with inputs that are observable.

At certain times we may also enter into various derivative agreements with correspondents in the form of forward purchase contracts at the time the correspondent customer enters into an interest-rate lock commitment. The derivatives are valued using internal models that utilize market interest rates and other unobservable inputs.

We may utilize interest rate swaps to hedge the forecasted cash flows from our underlying variable-rate FHLB advances and forecasted FHLB advances in qualifying cash flow hedge accounting relationships. Changes in the fair value of derivatives designated as cash flow hedges are recorded in other comprehensive income on the Consolidated Statement of Financial Condition and reclassified into interest expense concurrently with the interest expense on the debt. Interest rate swaps are valued based on quoted prices for similar assets in an active market with inputs that are observable. These hedges are evaluated for effectiveness using regression analysis at the time they are designated and throughout the hedge period. For forecasted FHLB advances being hedged, we evaluate the likelihood of the transaction occurring based on the current facts and circumstances each reporting period to ensure the hedge relationship still qualifies for hedge accounting. If we de-designate a hedge relationship or determine that an interest rate swap no longer qualifies for hedge accounting, changes in fair value are no longer recorded in other comprehensive income. The effective amounts previously recorded in other comprehensive income are recognized in earnings over the remaining life of the hedged item as an adjustment to yield, until the point it is determined the underlying transaction is probable to not occur, at which point it is reclassified immediately into earnings.

We utilize interest rate swaps to manage fair value changes of our fixed-rate certificates of deposit in a qualifying fair value hedge accounting relationship. Changes in the fair value of derivatives designated as fair value hedges, as well as the change in fair value of the hedged item, are recognized in current period earnings. The corresponding adjustment is recorded as a basis adjustment to the hedged item and hedging instrument. Interest rate swaps are valued based on quoted prices for similar assets in an active market with inputs that are observable. These hedges are evaluated for effectiveness using regression analysis at the time they are designated and throughout the hedge period. If the Company determines an interest rate swap no longer qualifies for fair value hedge accounting or is de-designated, the hedged item will no longer be adjusted for changes in fair value and the amounts previously recorded as a basis adjustment are recognized in earnings over the remaining life of the hedged item as an adjustment

to yield. If a previously hedged item is extinguished or sold, the remaining basis adjustment of the hedged item for prior fair value hedges will be reclassified to current period earnings.

To assist our customers in meeting their needs to manage interest rate risk, we enter into interest rate swap derivative contracts. To economically hedge this risk, we enter into offsetting derivative contracts to effectively eliminate the interest rate risk associated with these contracts.

For additional information regarding the accounting for derivatives, see Note 12 - Derivative Financial Instruments and for additional information on recurring fair value disclosures, see Note 22 - Fair Value Measurements.

Flagstar Bancorp, Inc.
Notes to the Consolidated Financial Statements

Income Taxes

We evaluate two components of income tax expense: current and deferred. Current income tax expense represents our estimated taxes to be paid or refunded for the current period. Deferred taxes are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. DTAs and liabilities are measured using enacted tax rates that will apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on DTAs and liabilities of a change in tax rates is recognized as income or expense in the period that includes the enactment date. We evaluate our DTAs to determine if, based on all available evidence, it is more likely than not that they will be realized. If it is determined that it is more likely than not that the deferred taxes will not be realized, we establish a valuation allowance. For further information, see Note 19 - Income Taxes.

Representation and Warranty Reserve

When we sell mortgage loans into the secondary mortgage market, we make customary representations and warranties to the purchasers about various characteristics of each loan. For eligible loans sold to the Agencies after December 31, 2014, these representations and warranties generally expire after 36 months. If a defect in the origination process is identified, we may be required to either repurchase the loan, pay a fee or indemnify the purchaser for losses. Upon the sale of a loan, the Company recognizes a liability for that guarantee at its fair value as a reduction of our net gain on loan sales. Subsequent to the sale, the liability is re-measured on an ongoing basis based upon an estimate of probable future losses. These estimates are based on our most recent data including loss severity on repurchased and indemnified loans, repurchase requests and other factors. Changes to our previous estimates are recorded in noninterest income in the Consolidated Statements of Operations. An estimate of the fair value of the guarantee associated with the mortgage loans is recorded in other liabilities in the Consolidated Statements of Financial Condition, and was \$7 million at December 31, 2018, as compared to \$15 million at December 31, 2017.

Advertising Costs

Advertising costs are expensed in the period they are incurred and are included as part of other noninterest expense in the Consolidated Statements of Operations. Advertising expenses totaled \$26 million, \$16 million, and \$11 million for the years ended December 31, 2018, 2017 and 2016, respectively.

Stock-Based Compensation

All share-based payments to employees, including grants of employee stock options and restricted stock units, are classified as equity with expenses being recognized in compensation and benefits in the Consolidated Statements of Operations based on their fair values. The amount of compensation is measured at the grant date and is expensed over the requisite service period, which is normally the vesting period, and for the year ended December 31, 2018, any forfeitures were recognized as they occurred. In addition to share-based payments to employees, the discount provided to employees through the Employee Stock Purchase Plan is also recognized as stock-based compensation. For further information, see Note 18 - Stock-Based Compensation.

Department of Justice Litigation Settlement

The executed settlement agreement with the DOJ representing the obligation to make future additional payments establishes a legally enforceable contract with a stipulated payment plan that meets the definition of a financial liability. We have elected the fair value option to account for this financial liability included in other liabilities on the

Consolidated Financial Statements. For additional information on the valuation and terms of the DOJ litigation settlement, see Note 21 - Legal Proceedings, Contingencies and Commitments and Note 22 - Fair Value Measurements.

Flagstar Bancorp, Inc.

Recently Issued Accounting Pronouncements

Adoption of New Accounting Standards

We adopted the following accounting standard updates (ASU) during 2018, none of which had a material impact to our financial statements:

Standard	Description	Effective Date
ASU 2018-13	Fair Value Measurement (Topic 820): Disclosure Framework—Changes to the Disclosure Requirements for Fair Value Measurement	December 31, 2018
ASU 2018-03	Technical Corrections and Improvements to Financial Instruments—Overall (Subtopic 825-10) - Update to 2016-01	January 1, 2018
ASU 2018-02	Income Statement-Reporting Comprehensive Income (Topic 220); Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income	January 1, 2019
ASU 2017-09	Update 2017-09—Compensation—Stock Compensation (Topic 718): Scope of Modification Accounting	January 1, 2018
ASU 2017-05	Other Income - Gains and Losses from the De-recognition of Non-financial Assets (Subtopic 610-20): Clarifying the Scope of Asset De-recognition Guidance and Accounting for Partial Sales of Non-financial Assets	January 1, 2018
ASU 2017-01	Business Combinations (Topic 805): Clarifying the Definition of a Business	January 1, 2018
ASU 2016-18	Statement of Cash Flows (Topic 230): Restricted Cash	January 1, 2018
ASU 2016-16	Income Taxes (Topic 740): Intra-Entity Transfers of Assets Other Than Inventory	January 1, 2018
ASU 2016-15	Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments	January 1, 2018
ASU 2016-01	Financial Instruments - Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities	January 1, 2018

Accounting Standards Adopted which had a Material Impact

The following ASUs have been adopted which impact our significant accounting policies and/or have a significant financial impact:

Revenue from Contracts with Customers - In May 2014, FASB issued ASU No. 2014-09, "Revenue from Contracts with Customers (Topic 606)." Under the amended guidance, an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration in exchange for those goods or services.

Effective January 1, 2018, we have adopted the requirements of ASU 2014-09, Revenue from Contracts with Customers (Topic 606) and all related amendments. We have implemented the guidance utilizing the modified retrospective approach which did not have a material impact on the Company's financial position or results of operations. We undertook a process to evaluate all of our significant revenue sources under the new standard. As lease contracts and financial instruments, which include loans and securities, are excluded from the scope of this standard, the majority of our revenue falls outside of the scope of Topic 606.

The adoption of this guidance does not result in changes to how revenue is recognized or the timing of recognition from our method prior to adoption. Revenue is recognized when obligations, under the terms of a contract with our customer, are satisfied, which generally occurs when services are performed. Revenue is measured as the amount of consideration we expect to receive in exchange for providing services.

The disaggregation of our revenue from contracts with customers is provided below.

		For the Years Ended December 31,	
	Location of Revenue (1)	2018	2017
		(Dollars in millions)	
Deposit account and other banking income	Deposit fees and charges	\$ 16	\$ 15
Interchange fees	Deposit fees and charges	5	3
Interchange fees	Other noninterest income	1	1
Wealth management	Other noninterest income	9	7
Total		\$ 31	\$ 26

(1) Recognized within the Community Banking segment.

Flagstar Bancorp, Inc.
Notes to the Consolidated Financial Statements

Deposit account and other banking income - We charge depositors various deposit account service fees including those for outgoing wires, overdrafts, stop payments, and ATM fees. These fees are generated from a depositor's option to purchase services offered under the contract and are only considered a contract when the depositor exercises their option to purchase these account services. Therefore we deem the term of our contracts with depositors to be day-to-day and do not extend beyond the services already provided. Deposit account and other banking fees are recorded at the point in time we perform the requested service.

Interchange income - We collect interchange fee income when debit cards that we have issued to our customers, are used in merchant transactions. Our performance obligation is satisfied and revenue is recognized at the point we initiate the payment of funds from a customer's account to a merchant account.

Merchant fee income - We receive a percentage of merchant fees based upon card transactions processed through point of sale terminals at referred merchant locations. Our performance obligation is satisfied when our referral of a merchant to a payment processing vendor results in an executed agreement between the merchant and the vendor. Merchant fee revenue is recognized as received. Merchant fee income was less than \$1 million for the years ended December 31, 2018 and December 31, 2017.

Wealth management revenue - We earn commission income through a revenue share program based on a tiered percentage of total gross commissions generated from the sales of investment and insurance services to Flagstar customers. Commissions are earned and our performance obligation has been satisfied at the point of sale or trade execution. Our portion of earned commissions is calculated, paid and recognized as revenue on a monthly basis.

We also receive revenue from portfolio management services. We receive payment for portfolio management services in advance at the beginning of each quarter for services to be performed over the quarter which results an insignificant revenue liability. We recognize this revenue over the quarter on a straight-line basis, as we believe this is the most appropriate method to measure progress towards satisfaction of the performance obligation.

Derivatives and Hedging - In August 2017, the FASB issued ASU 2017-12, Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities. The amendments were designed to more closely align hedge accounting requirements with users' risk management strategies. ASU 2017-12 is effective for fiscal years beginning after December 15, 2018 and early adoption is permitted. The Company early adopted this ASU during the first quarter of 2018. The guidance provides a broader range of hedge accounting opportunities and simplifies documentation requirements for our existing cash flow hedge relationships. In conjunction with adoption of this ASU, the Company elected to transfer \$144 million of investment securities from HTM to AFS during the first quarter of 2018, as permitted by the standard, which resulted in an insignificant impact to AOCI.

Accounting Standards Issued But Not Yet Adopted

The following ASUs have been issued and are expected to result in a significant change to our significant accounting policies and/or have a significant financial impact:

Credit Losses - In June 2016, the FASB issued ASU 2016-13, Financial Instruments - Credit Losses (Topic 326). The ASU alters the current method for recognizing credit losses within the reserve account. Currently, we use the incurred loss method, whereas the new guidance requires financial assets to be presented at the net amount expected to be collected (i.e., net of expected credit losses). The measurement of expected credit losses should be based on relevant information about past events, including historical experience, current conditions, and reasonable and supportable

forecasts that affect the collectability of the reported amount. ASU 2016-13 is effective for fiscal years beginning after December 15, 2019.

Our cross-functional implementation team continues to execute on its project plan and is currently finalizing the development of our credit loss models which we expect to be capable of running a CECL parallel production in the second half of 2019 and will be ready for the adoption of the standard in the first quarter of 2020. We are currently evaluating the impact the adoption of the guidance will have on our Consolidated Financial Statements, and highlight that any impact will be contingent upon the underlying characteristics of the affected portfolio and macroeconomic and internal forecasts at adoption date. We do not expect any material allowance on held to maturity securities since the majority of this portfolio consists of agency-backed securities that inherently have an immaterial risk of credit loss.

Flagstar Bancorp, Inc.
Notes to the Consolidated Financial Statements

Leases - In February 2016, the FASB issued ASU 2016-02, Leases (Topic 842) which supersedes Topic 840. The guidance requires lessees to recognize substantially all leases on their balance sheet as a right-of-use asset and a lease liability. For income statement purposes, the FASB retained a dual model, requiring leases to be classified as either operating or finance. Classification will be based on criteria that are largely similar to those applied under current lease accounting guidance. ASU 2016-02 is effective retrospectively for fiscal years beginning after December 15, 2018 and early adoption is permitted. Additional guidance per ASU 2018-11 provides the practical expedient of forgoing the restatement of comparative periods and we intend on exercising this option. Upon adoption and implementation, we will gross up assets and liabilities due to the recognition of lease liabilities and right of use assets associated with the underlying lease contracts. Further, we will elect the short-term lease exception, which allows entities to not apply the recognition requirements of ASC 842 to short-term leases. The adoption of the guidance will impact our total assets and total liabilities in the Consolidated Statements of Financial Condition by approximately 0.1 percent given our current inventory of leases.

The following ASUs have been issued and are not expected to have a material impact on our Consolidated Financial Statements and/or significant accounting policies:

Standard	Description	Effective Date
ASU 2018-20	Leases (Topic 842): Narrow-Scope Improvements for Lessors	January 1, 2019
ASU 2018-19	Codification Improvements to Topic 326, Financial Instruments—Credit Losses	January 1, 2020
ASU 2018-18	Collaborative Arrangements (Topic 808): Clarifying the Interaction between Topic 808 and Topic 606	January 1, 2020
ASU 2018-17	Consolidation (Topic 810): Targeted Improvements to Related Party Guidance for Variable Interest Entities	January 1, 2020
ASU 2018-16	Derivatives and hedging (Topic 815): Inclusion of the Secured Overnight Financing Rate (SOFR) Overnight Index Swap (OIS) Rate as a Benchmark Interest Rate for Hedge Accounting Purposes	January 1, 2020
ASU 2018-15	Intangibles—Goodwill and Other—Internal-Use Software (Subtopic 350-40): Customer’s Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That Is a Service Contract (a consensus of the FASB Emerging Issues Task Force)	January 1, 2020
ASU 2018-11	Leases (Topic 842): Targeted Improvements	January 1, 2019
ASU 2018-10	Codification Improvements to Topic 842, Leases	January 1, 2019
ASU 2018-07	Compensation—Stock Compensation (Topic 718): Improvements to Nonemployee Share-Based Payment Accounting	January 1, 2019
ASU 2017-11	Earnings Per Share (Topic 260); Distinguishing Liabilities from Equity (Topic 480); Derivatives and Hedging (Topic 815): (Part I) Accounting for Certain Financial Instruments with Down Round Features, (Part II) Replacement of the Indefinite Deferral for Mandatorily Redeemable Financial Instruments of Certain Nonpublic Entities and Certain Mandatorily Redeemable Non-controlling Interests with a Scope. Intangibles - Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment

January 1,
2020

Note 2 - Acquisitions

Wells Fargo Branch Acquisition

On November 30, 2018, the Company completed the acquisition of 52 Wells Fargo branches in Indiana, Michigan, Wisconsin and Ohio. These branches provide us with high-quality, low-cost deposits, allowing for balance sheet growth and further expansion of our banking footprint.

The following table summarizes the preliminary allocation of the purchase price to the fair value of assets acquired and liabilities assumed as of the acquisition date. We deem the initial valuation of the assets and liabilities to be provisional and have left the measurement period open. These fair values may be adjusted in a future period, not to exceed one year after the acquisition date, to reflect new facts and circumstances which existed as of the acquisition date.

80

Flagstar Bancorp, Inc.

Notes to the Consolidated Financial Statements

	(Dollars in millions)
Assets acquired:	
Cash	\$ 9
Loans	107
Core deposit intangible (CDI)	60
Other assets	23
Total assets	199
Liabilities assumed:	
Deposits	1,760
Total liabilities	1,760
Fair value of net liabilities assumed	(1,561)
Cash consideration (received)	(1,499)
Goodwill	\$ 62

As a result of the transaction, we recognized \$62 million of goodwill, which was calculated as the excess of the consideration exchanged and the liabilities assumed as compared to the fair value of the identifiable net assets acquired. The goodwill was assigned to our Community Banking segment and is expected to be deductible for tax purposes.

The CDI represents the value of the relationships with deposit customers and was measured using the income method using a discounted cash flow methodology which gave consideration to attrition rates, alternative cost of funds, net maintenance cost, and other costs associated with the deposit base. The CDI will be amortized over its estimated useful life of approximately 10 years utilizing an accelerated method.

Acquisition-related costs to the Wells Fargo branch acquisition were expensed as incurred and amounted to \$15 million for the year ended December 31, 2018. These costs were recorded in noninterest expense in the Consolidated Statement Operations and primarily included integration costs, marketing, legal and consulting fees.

The following table presents unaudited pro forma information as if the acquisition of the Wells Fargo branches had occurred on January 1, 2017. This pro forma information includes certain adjustments and assumptions including, but not limited to, reclassifications from 2018 net income to 2017 net income related to acquisition-related expenses of \$15 million and hedging gains of \$29 million. The pro forma information is not necessarily indicative of the results of operations that would have occurred had the transaction been completed on the assumed date.

	For the Years Ended December 31, 2018	2017
	(Dollars in millions)	
Net interest income	\$540	\$482
Net income	\$196	\$83

Other 2018 Acquisitions

On March 12, 2018, the Company closed on the purchase of the mortgage loan warehouse business from Santander Bank, strengthening and diversifying our mortgage warehouse business by adding \$499 million in outstanding warehouse draws and \$1.7 billion in commitments. Additionally, on March 19, 2018, the Company closed on the Desert Community Bank branch acquisition, with \$614 million in deposits and \$59 million in loans, expanding our banking footprint and providing additional deposit funding. Together, these acquisitions increased goodwill and intangible assets by \$51 million.

2017 Acquisitions

On February 28, 2017, the Company completed the acquisition of the delegated correspondent lending platform, along with certain related assets, of Stearns Lending, allowing us to expand our market share in the correspondent mortgage lending channel. Additionally, on May 15, 2017, the Company completed the acquisition of certain assets of Opes Advisors, a California based retail mortgage originator, positioning us to increase our distributed retail mortgage lending channel. Together, these acquisitions increased goodwill and intangible assets by \$21 million.

Flagstar Bancorp, Inc.
Notes to the Consolidated Financial Statements

Note 3 - Investment Securities

The following table presents our investment securities:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
(Dollars in millions)				
December 31, 2018				
Available-for-sale securities				
Agency - Commercial	\$1,413	\$ 4	\$ (43)	\$1,374
Agency - Residential	686	—	(24)	662
Corporate debt obligations	41	—	—	41
Municipal obligations	33	—	(1)	32
Other MBS	32	—	—	32
Certificates of Deposit	1			1
Total available-for-sale securities (1)	\$2,206	\$ 4	\$ (68)	\$2,142
Held-to-maturity securities				
Agency - Commercial	\$349	\$ —	\$ (13)	\$336
Agency - Residential	354	—	(9)	345
Total held-to-maturity securities (1)	\$703	\$ —	\$ (22)	\$681
December 31, 2017				
Available-for-sale securities				
Agency - Commercial	\$1,004	\$ —	\$ (17)	\$987

Held-to-maturity securities				
Agency - Commercial	\$526	\$ —	\$ (9)	\$517
Agency - Residential	413	—	(6)	407
Total held-to-maturity securities (1)	\$939	\$ —	\$ (15)	\$924

(1) There were no securities of a single issuer, which are not governmental or government-sponsored, that exceeded 10 percent of stockholders' equity at December 31, 2018 or December 31, 2017.

Management evaluates our securities portfolio each quarter to determine if any security is considered to be other than temporarily impaired. In making this evaluation, management considers our ability and intent to hold securities to recover current market losses. Agency securities, which are either explicitly or implicitly backed by the federal government, comprised 96 percent of our total securities at December 31, 2018. This factor is considered when evaluating our investment securities for OTTI. During the years ended December 31, 2018, 2017 and 2016, we had no OTTI.

Available-for-sale securities

We purchased \$340 million of AFS securities, which were comprised of U.S. government sponsored agency MBS, certificates of deposit, and corporate debt obligations during the year ended December 31, 2018. In addition, we retained \$33 million of passive interests in our own private MBS during the year ended December 31, 2018. We purchased \$904 million of AFS securities, which included U.S. government sponsored agency MBS, corporate debt

obligations and municipal obligations during the year ended December 31, 2017.

We had no sales of AFS securities during the year ended December 31, 2018. During the year ended December 31, 2017, we sold \$289 million of U.S. government sponsored agency securities, which resulted in a gain of \$3 million, compared to \$291 million of U.S. government sponsored agency securities, which resulted in a gain of \$4 million during the year ended December 31, 2016.

Flagstar Bancorp, Inc.
Notes to the Consolidated Financial Statements

Held-to-maturity securities

In conjunction with adoption of ASU 2017-12 (Targeted Improvements to Accounting for Hedging Activities) the Company elected to transfer \$144 million of investment securities from HTM to AFS during the first quarter of 2018, as permitted by the standard, which resulted in a de minimis impact to OCI.

There were no purchases of HTM securities during the year ended December 31, 2018 and December 31, 2017. We purchased \$15 million of HTM securities, which included U.S. government sponsored agency MBS during the year ended December 31, 2016. We had no sales of HTM securities during the years ending December 31, 2018, 2017 and 2016, respectively.

The following table summarizes, by duration, the unrealized loss positions on investment securities:

	Unrealized Loss Position with Duration 12 Months and Over			Unrealized Loss Position with Duration Under 12 Months		
	Fair Value	Number of Securities	Unrealized Loss	Fair Value	Number of Securities	Unrealized Loss
(Dollars in millions)

Due after one year through five years	60	59	2.51	%	10	10	2.45	%
Due after five years through 10 years	59	59	4.41	%	11	11	2.21	%
Due after 10 years	2,086	2,023	2.66	%	682	660	2.47	%

Total	\$2,206	\$2,142	\$703	\$681
-------	---------	---------	-------	-------

We pledge investment securities, primarily agency collateralized and municipal taxable mortgage obligations, to collateralize lines of credit and/or borrowings. We had pledged investment securities of \$1.9 billion and, \$2.0 billion, at December 31, 2018 and 2017 respectively.

83

Flagstar Bancorp, Inc.
Notes to the Consolidated Financial Statements

Note 4 - Loans Held-for-Sale

The majority of our mortgage loans originated as LHFS are ultimately sold into the secondary market on a whole loan basis or by securitizing the loans into agency, government, or private label mortgage-backed securities. At December 31, 2018 and 2017, LHFS totaled \$3.9 billion and \$4.3 billion, respectively. For the years ended December 31, 2018, 2017 and 2016, we had net gains on loan sales associated with LHFS of \$197 million, \$267 million, and \$301 million, respectively.

At December 31, 2018 and 2017, \$137 million and \$21 million, respectively, of LHFS were recorded at lower of cost or fair value. We elected the fair value option for the remainder of the loans in the portfolio.

Note 5 - Loans Held-for-Investment

The following table presents our Loans-held-for-investment:

	December 31, 2018	December 31, 2017
	(Dollars in millions)	
Consumer loans		
Residential first mortgage	\$2,999	\$ 2,754
Home Equity	731	664
Other	314	25
Total consumer loans	4,044	3,443
Commercial loans		
Commercial real estate	2,152	1,932
Commercial and industrial	1,433	1,196
Warehouse lending	1,459	1,142
Total commercial loans	5,044	4,270
Total loans held-for-investment	\$9,088	\$ 7,713

The following table presents the UPB of our loan sales and purchases in the loans held-for-investment portfolio:

	For the Year Ended		
	2018	2017	2016
	(Dollars in millions)		
Loans Sold (1)			
Performing loans	\$ 158	\$ 102	\$ 1,194
Nonperforming loans	—	25	110
Total performing and nonperforming loans sold	\$ 158	\$ 127	\$ 1,304
Net gain associated with loan sales (2)	\$ 2	\$ 2	\$ 12
Loans Purchased			
Residential first mortgage loans	3	8	175
HELOC	—	250	—
Other consumer	34	—	—
Total loans purchased	\$ 37	\$ 258	\$ 175
Premium associated with loans purchased	\$ —	\$ 9	\$ 1

(1) Upon a change in our intent, the loans were transferred to LHFS and subsequently sold.

(2) Recorded in net gain on loan sales on Consolidated Statement of Operations.

In addition to the loans sold as presented above, during the year ended December 31, 2018, we transferred residential first mortgage loans with \$116 million UPB to LHFS, upon a change in our intent. We have entered into an agreement to sell these loans which we expect to settle in the first quarter 2019.

We have pledged certain LHFI, LHFS, and loans with government guarantees to collateralize lines of credit and/or borrowings with the FRB of Chicago and the FHLB of Indianapolis. At December 31, 2018 and 2017, we pledged loans of \$6.8 billion and \$7.1 billion, respectively.

Flagstar Bancorp, Inc.
Notes to the Consolidated Financial Statements

Commercial and industrial	—	—	—	—	1,196	1,196
Warehouse lending	—	—	—	—	1,142	1,142
Total commercial loans	—	—	—	—	4,270	4,270
Total loans (2)	\$3	\$ 2	\$ 29	\$ 34	\$7,679	\$7,713

(1) Includes less than 90 days past due performing loans which are deemed nonaccrual. Interest is not being accrued on these loans.

(2) Includes \$3 million and \$4 million of past due loans accounted for under the fair value option at December 31, 2018 and 2017, respectively.

Interest that would have been accrued on impaired loans if such loans had been current in accordance with their original terms, totaled approximately \$1 million, \$1 million and \$2 million during the years ended December 31, 2018, 2017 and 2016, respectively. At December 31, 2018 and 2017, we had no loans 90 days or greater past due and still accruing interest.

Troubled Debt Restructurings

The following table provides a summary of TDRs by type and performing status:

	TDRs		
	Performing	Nonperforming	Total
	(Dollars in millions)		
December 31, 2018			
Consumer loans			
Residential first mortgage	\$22	\$ 8	\$ 30
Home equity	22	2	24
Total TDRs (1)(2)	\$44	\$ 10	\$ 54
December 31, 2017			
Consumer loans			
Residential first mortgage	\$19	\$ 12	\$ 31
Home Equity	24	4	28
Total TDRs (1)(2)	\$43	\$ 16	\$ 59

(1)The ALLL on TDR loans totaled \$10 million and \$13 million at December 31, 2018 and 2017, respectively.

(2)Includes \$3 million of TDR loans accounted for under the fair value option at both December 31, 2018 and 2017.

The following table provides a summary of newly modified TDRs:

	New TDRs			Increase (Decrease) in Allowance at Modification
	Number of Accounts	Pre-Modification Principal Balance	Unpaid Post-Modification Principal Balance (1)	
	(Dollars in millions)			
Year Ended December 31, 2018				
Residential first mortgages	14	\$ 3	\$ 3	\$ —
Home equity (2)(3)	17	1	1	—
Total TDR loans	31	\$ 4	\$ 4	\$ —
Year Ended December 31, 2017				
Residential first mortgages	16	\$ 4	\$ 4	\$ —
Home equity (2)(3)	82	6	5	(1)
Total TDR loans	98	\$ 10	\$ 9	\$ (1)
Year Ended December 31, 2016				
Residential first mortgages	23	\$ 4	\$ 5	\$ —
Home equity (2)(3)	143	9	8	—
Commercial & Industrial	1	2	1	—
Total TDR loans	167	\$ 15	\$ 14	\$ —

(1) Post-modification balances include past due amounts that are capitalized at modification date.

(2)Home equity post-modification UPB reflects write downs.

(3)Includes loans carried at fair value option.

During the years ended December 31, 2018, 2017, and 2016, there were zero, one, and eight, newly modified TDR loans which had been modified in the preceding 12 months that subsequently defaulted in those periods, respectively. The UPB associated with those TDR loans was zero in the year ended December 31, 2018 and less than \$1 million, in

the aggregate, in each of the years ended December 31, 2017 and 2016. There was no increase or decrease in the allowance associated with these TDRs at subsequent default. All TDRs within consumer and commercial loan portfolios are considered subsequently defaulted when greater than 90 days past due. Subsequent default is defined as a payment re-defaulted within 12 months of the restructuring date.

Credit Quality

We utilize an internal risk rating system which is applied to all consumer and commercial loans. Descriptions of our internal risk ratings as they relate to credit quality follow the ratings used by the U.S. bank regulatory agencies as listed below.

Pass. Pass assets are not impaired nor do they have any known deficiencies that could impact the quality of the asset.

Watch. Watch assets are defined as pass rated assets that exhibit elevated risk characteristics or other factors that deserve management's close attention and increased monitoring. However, the asset does not exhibit a potential or well-defined weakness that would warrant a downgrade to criticized or adverse classification.

Special mention. Assets identified as special mention possess credit deficiencies or potential weaknesses deserving management's close attention. Special mention assets have a potential weakness or pose an unwarranted financial risk that, if not corrected, could weaken the assets and increase risk in the future. Special mention assets are criticized, but do not expose an institution to sufficient risk to warrant adverse classification.

Flagstar Bancorp, Inc.
Notes to the Consolidated Financial Statements

Substandard. Assets identified as substandard are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Assets so classified must have a well-defined weakness or weaknesses that jeopardize the full collection or liquidation of the debt. They are characterized by the distinct possibility that we will sustain some loss if the deficiencies are not corrected. For home equity loans and other consumer loans, we evaluate credit quality based on the aging and status of payment activity and any other known credit characteristics that call into question full repayment of the asset. Substandard loans may be placed on either accrual or non-accrual status.

Doubtful. An asset classified as doubtful has all the weaknesses inherent in one classified substandard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable. A doubtful asset has a high probability of total or substantial loss, but because of specific pending events that may strengthen the asset, its classification as loss is deferred. Doubtful borrowers are usually in default, lack adequate liquidity or capital, and lack the resources necessary to remain an operating entity. Pending events can include mergers, acquisitions, liquidations, capital injections, the perfection of liens on additional collateral, the valuation of collateral, and refinancing. Generally, pending events should be resolved within a relatively short period and the ratings will be adjusted based on the new information. Due to the high probability of loss, doubtful assets are placed on non-accrual.

Loss. An asset classified as loss is considered uncollectible and of such little value that the continuance as a bankable asset is not warranted. This classification does not mean that an asset has absolutely no recovery or salvage value, but, rather that it is not practical or desirable to defer writing off the asset even though partial recovery may be affected in the future.

Consumer Loans

Consumer loans consist of open and closed end loans extended to individuals for household, family, and other personal expenditures, and includes consumer loans, and loans to individuals secured by their personal residence, including first mortgage, home equity, and home improvement loans. Because consumer loans are usually relatively small-balance, homogeneous exposures, consumer loans are rated primarily on payment performance. Payment performance is a proxy for the strength of repayment capacity and loans are generally classified based on their payment status rather than by an individual review of each loan.

In accordance with regulatory guidance, we assign risk ratings to consumer loans in the following manner:

- Consumer loans are classified as Watch once the loan becomes 60 days past due.
- Open and closed-end consumer loans 90 days or more past due are classified Substandard.

Commercial Loans

Management conducts periodic examinations which serve as an independent verification of the accuracy of the ratings assigned. Loan grades are based on different factors within the borrowing relationship: entity sales, debt service coverage, debt/total net worth, liquidity, balance sheet and income statement trends, management experience, business stability, financing structure, and financial reporting requirements. The underlying collateral is also rated based on the specific type of collateral and corresponding LTV. The combination of the borrower and collateral risk ratings results in the final rating for the borrowing relationship.

Note 6 - Loans with Government Guarantees

Substantially all loans with government guarantees are insured or guaranteed by the FHA or U.S. Department of Veterans Affairs. FHA loans earn interest at a rate based upon the 10-year U.S. Treasury note rate at the time the underlying loan becomes delinquent, which is not paid by the FHA or the U.S. Department of Veterans Affairs until claimed. Certain loans within our portfolio may be subject to indemnifications and insurance limits which exposes us to limited credit risk. We have reserved for these risks within other assets and as a component of our ALLL on residential first mortgages.

At December 31, 2018 and December 31, 2017, respectively, loans with government guarantees totaled \$392 million and \$271 million.

Reposessed assets and the associated claims related to government guaranteed loans are recorded in other assets and totaled \$50 million and \$84 million at December 31, 2018 and December 31, 2017, respectively.

Note 7 - Reposessed Assets

Reposessed assets include the following:

	December 31, 2018 2017	
	(Dollars in millions)	
One-to-four family properties	\$ 5	\$ 5
Commercial properties	2	3
Total reposessed assets	\$ 7	\$ 8

The following schedule provides the activity for reposessed assets:

For the Years
Ended
December 31,

	2018	2017	2016
	(Dollars in millions)		
Beginning balance	\$8	\$14	\$17
Additions, net	10	18	19
Disposals	(8)	(14)	(19)
Net (write down) gain on disposal	(3)	(9)	(2)
Transfers out	—	(1)	(1)
Ending balance	\$7	\$8	\$14

Flagstar Bancorp, Inc.
Notes to the Consolidated Financial Statements

Note 8 - Variable Interest Entities

We have no consolidated VIEs as of December 31, 2018 and December 31, 2017.

In connection with our securitization activities, we have retained a five percent interest in the investment securities of certain trusts ("other MBS") and are contracted as the sub-servicer of the underlying loans, compensated based on market rates, which constitutes a continuing involvement in these trusts. Although we have a variable interest in these securitization trusts, we are not their primary beneficiary due to the relative size of our investment in comparison to the total amount of securities issued by the VIE and our inability to direct activities that most significantly impact the VIE's economic performance. As a result, we have not consolidated the assets and liabilities of the VIE in our Statements of Financial Condition. The Bank's maximum exposure to loss is limited to our investment in the VIE, as well as the standard representations and warranties made in conjunction with the loan transfer. See Note 3 - Investment Securities and Note 22 - Fair Value Measurements, for additional information.

In addition, we have a continuing involvement, but are not the primary beneficiary for an unconsolidated VIE related to the FSTAR 2007-1 mortgage securitization trust. In accordance with the settlement agreement with MBIA, there is no further recourse to us related to FSTAR 2007-1, unless MBIA fails to meet their obligations. At December 31, 2018 and 2017, the FSTAR 2007-1 mortgage securitization trust included 1,513 loans and 1,911 loans, respectively, with an aggregate principal balance of \$49 million and \$65 million, respectively.

Note 9 - Federal Home Loan Bank Stock

Our investment in FHLB stock was \$303 million at both December 31, 2018 and December 31, 2017. As a member of the FHLB, we are required to hold shares of FHLB stock in an amount equal to at least one percent of the aggregate UPB of our mortgage loans, home purchase contracts and similar obligations at the beginning of each year or 4.5 percent of our total FHLB advances, whichever is greater. We had no required stock purchases during the year ended December 31, 2018, and \$123 million and \$10 million in required stock purchases during the years ended December 31, 2017 and 2016, respectively. We had no redemptions of FHLB stock during the years ended December 31, 2018, 2017 and 2016. Dividends received on the stock equaled \$15 million, \$9 million and \$7 million for the years ended December 31, 2018, 2017 and 2016, respectively. These dividends were recorded in the Consolidated Statements of Operations as other noninterest income.

Note 10 - Premises and Equipment

The following presents our premises and equipment balances and estimated useful lives:

	Estimated Useful Lives	December 31, 2018 2017 (Dollars in millions)	
Land	N/A	\$74	\$61
Computer hardware and software	3 - 7 years	366	300
Office buildings and improvements	15 - 31.5 years	185	159
Furniture, fixtures and equipment	5 - 7 years	57	63
Leased equipment	3 - 10 years	50	40
Total		732	623
Less accumulated depreciation		(342)	(293)

Flagstar Bancorp, Inc.
Notes to the Consolidated Financial Statements

The following outlines our minimum contractual lease obligations:

	December 31, 2018
	(Dollars in millions)
2019	\$ 9
2020	6
2021	4
2022	2
2023	1
Thereafter	3
Total	\$ 25

Note 11 - Mortgage Servicing Rights

We have investments in MSR that result from the sale of loans to the secondary market for which we retain the servicing. We account for MSR at their fair value. A primary risk associated with MSR is the potential reduction in fair value as a result of higher than anticipated prepayments due to loan refinancing prompted, in part, by declining interest rates or government intervention. Conversely, these assets generally increase in value in a rising interest rate environment to the extent that prepayments are slower than anticipated. We utilize derivatives as economic hedges to offset changes in the fair value of the MSR resulting from the actual or anticipated changes in prepayments stemming from changing interest rate environments. There is also a risk of valuation decline due to higher than expected increases in default rates, which we do not believe can be effectively managed using derivatives. For further information regarding the derivative instruments utilized to manage our MSR risks, see Note 12 - Derivative Financial Instruments.

Changes in the fair value of residential first mortgage MSR were as follows:

	For the Years Ended December 31,		
	2018	2017	2016
	(Dollars in millions)		
Balance at beginning of period	\$291	\$335	\$296
Additions from loans sold with servicing retained	356	288	228
Reductions from sales	(339)	(310)	(84)
Changes in fair value due to (1):			
Decrease in MSR value due to pay-offs, pay-downs, and run-off	(16)	(22)	(62)
Changes in estimates of fair value (2)	(2)	—	(43)
Fair value of MSR at end of period	\$290	\$291	\$335

(1) Changes in fair value are included within net return (loss) on mortgage servicing rights on the Consolidated Statements of Operations.

(2) Represents estimated MSR value change resulting primarily from market-driven changes.

The following table summarizes the hypothetical effect on the fair value of servicing rights using adverse changes of 10 percent and 20 percent to the weighted-average of certain significant assumptions used in valuing these assets:

	December 31, 2018	December 31, 2017
	Fair value	Fair value
	impact due to	impact due to

Flagstar Bancorp, Inc.
Notes to the Consolidated Financial Statements

Contractual servicing and subservicing fees. Contractual servicing and subservicing fees, including late fees and other ancillary income are presented below. Contractual servicing fees are included within net (loss) return on mortgage servicing rights on the Consolidated Statements of Operations. Contractual subservicing fees including late fees and other ancillary income are included within loan administration income on the Consolidated Statements of Operations. Subservicing fee income is recorded for fees earned on subserviced loans, net of third party subservicing costs.

The following table summarizes income and fees associated with owned mortgage servicing rights:

	For the Years Ended December 31, 2018 2017 2016 (Dollars in millions)		
Net return (loss) on mortgage servicing rights			
Servicing fees, ancillary income and late fees (1)	\$65	\$60	\$81
Changes in fair value	(18)	(22)	(109)
Gain (loss) on MSR derivatives (2)	(5)	(8)	—
Net transaction costs	(6)	(8)	2
Total return (loss) included in net return on mortgage servicing rights	\$36	\$22	\$(26)

(1) Servicing fees are recorded on the accrual basis. Ancillary income and late fees are recorded on a cash basis.

(2) Changes in the derivatives utilized as economic hedges to offset changes in fair value of the MSRs.

The following table summarizes income and fees associated with our mortgage loans subserviced for others:

	For the Years Ended December 31, 2018 2017 2016 (Dollars in millions)		
Loan administration income on mortgage loans subserviced			
Servicing fees, ancillary income and late fees (1)	\$54	\$35	\$29
Other servicing charges	(31)	(14)	(11)
Total income on mortgage loans subserviced, included in loan administration	\$23	\$21	\$18

(1) Servicing fees are recorded on the accrual basis. Ancillary income and late fees are recorded on cash basis.

Note 12 - Derivative Financial Instruments

Derivative financial instruments are recorded at fair value in other assets and other liabilities on the Consolidated Statements of Financial Condition. Our policy is to present its derivative assets and derivative liabilities on the Consolidated Statement of Financial Condition on a gross basis, even when provisions allowing for set-off are in place. However, for derivative contracts cleared through certain central clearing parties, variation margin payments are recognized as settlements. We are exposed to non-performance risk by the counterparties to our various derivative financial instruments. A majority of our derivatives are centrally cleared through a Central Counterparty Clearing House or consist of residential mortgage interest rate lock commitments further limiting our exposure to non-performance risk. We believe that the non-performance risk inherent in our remaining derivative contracts is minimal based on credit standards and the collateral provisions of the derivative agreements.

Derivatives not designated as hedging instruments: We maintain a derivative portfolio of interest rate swaps, futures and forward commitments used to manage exposure to changes in interest rates, MSR asset values and to meet the needs of customers. We also enter into interest rate lock commitments, which are commitments to originate mortgage loans whereby the interest rate on the loan is determined prior to funding and the customers have locked into that interest rate. Market risk on interest rate lock commitments and mortgage LHFS is managed using corresponding forward sale commitments. Changes in fair value of derivatives not designated as hedging instruments are recognized in the Consolidated Statements of Income.

Derivatives designated as hedging instruments: We have designated certain interest rate swaps as fair value hedges of fixed-rate certificates of deposit.

During the second quarter of 2018, we de-designated all of our remaining cash flow hedge relationships. We evaluate the probability of hedged transactions occurring on at least a quarterly basis relating to amounts deferred in OCI. Changes in the fair value of derivatives designated as cash flow hedges are recorded in other comprehensive income (loss) on the Consolidated Statement of Financial Condition and reclassified into interest expense in the same period in which the hedge transaction is

Flagstar Bancorp, Inc.
Notes to the Consolidated Financial Statements

recognized in earnings. At December 31, 2018 and December 31, 2017, we had zero and \$2 million (net of tax), respectively, of unrealized gains on derivatives classified as cash flow hedges recorded in accumulated other comprehensive income (loss).

Derivatives that are designated in hedging relationships are assessed for effectiveness using regression analysis at inception and throughout the hedge period. All designated hedge relationships were and are expected to be highly effective as of December 31, 2018. Cash flows and the profit impact associated with designated hedges are reported in the same category as the underlying hedged item.

During the fourth quarter of 2018, we completed the Wells Fargo branch acquisition. This acquisition resulted in the addition of \$1.8 billion of deposits and significantly changed the composition of our balance sheet. We settled all of our variable LIBOR based long-term FHLB borrowings and determined that our forecasted interest payments were probable not to occur. As a result, we reclassified \$29 million of hedging gains that had been deferred in OCI from de-designated hedging relationships immediately into income. We have no losses estimated to be reclassified from other comprehensive income into earnings during the next 12 months.

The following tables present the notional amount, estimated fair value and maturity of our derivative financial instruments:

	December 31, 2018 (1)		
	Notional Amount	Fair Value (2)	Expiration Dates
	(Dollars in millions)

(1) Variation margin pledged to or received from a Central Counterparty Clearing House to cover the prior days fair value of open positions, is considered settlement of the derivative position for accounting purposes.

The fair value basis adjustment on our hedged CDs is included in interest bearing deposits on our Consolidated Statements of Operations. The carrying amount of our hedged CDs was \$30 million at December 31, 2018 and zero at December 31, 2017 and the cumulative amount of fair value hedging adjustment included in the carrying amount of the hedged CDs was de minimis at December 31, 2018 and zero at December 31, 2017.

At December 31, 2018, we pledged a total of \$53 million related to derivative financial instruments, consisting of \$30 million of cash collateral on derivative liabilities and \$23 million of maintenance margin on centrally cleared derivatives and had an obligation to return cash of \$14 million on derivative assets. We pledged a total of \$26 million related to derivative financial instruments, consisting of \$7 million of cash collateral on derivative liabilities and \$19 million of maintenance margin on centrally cleared derivatives and had an obligation to return cash of \$18 million on derivative assets at December 31, 2017. Within the Consolidated Statements of Financial Condition, the collateral related to derivative activity is included in other assets and liabilities and the cash pledged as maintenance is restricted and included in other assets.

Note 13 - Deposit Accounts

The deposit accounts are as follows:

	December 31,	
	2018	2017
	(Dollars in millions)	
Retail deposits		
Branch retail deposits		
Demand deposit accounts	\$1,297	\$560
Savings accounts	2,812	3,295
Money market demand accounts	628	91
Certificates of deposit/CDARS	2,387	1,494
Total branch retail deposits	7,124	5,440
Commercial deposits (1)		
Demand deposit accounts	1,243	697
Savings accounts	314	258
Money market demand accounts	173	102
Total commercial retail deposits	1,730	1,057
Total retail deposits	8,854	6,497
Government deposits		
Demand deposit accounts	326	251
Savings accounts	567	446
Certificates of deposit/CDARS	309	376
Total government deposits (2)	1,202	1,073
Wholesale deposits	583	43
Custodial deposits (3)	1,741	1,321
Total deposits	\$12,380	\$8,934

(1) Includes deposits from commercial and business banking customers.

(2) Government deposits include funds from municipalities and schools.

(3) These accounts represent a portion of the investor custodial accounts and escrows controlled by us in connection with loans serviced or subserviced for others and that have been placed on deposit with the Bank.

The following indicates the scheduled maturities for certificates of deposit with a minimum denomination of \$250,000:

	December 31,	
	2018	2017
	(Dollars in millions)	
Three months or less	\$251	\$159
Over three months to six months	165	128
Over six months to twelve months	229	173
One to two years	139	167
Thereafter	33	31
Total	\$817	\$658

Note 14 - Borrowings

Federal Home Loan Bank Advances and Other Borrowings

The following is a breakdown of our FHLB advances and other borrowings outstanding:

	December 31, 2018		December 31, 2017	
	Amount	Rate	Amount	Rate
	(Dollars in millions)			
Short-term fixed rate term advances	\$2,993	2.52%	\$4,260	1.40%
Other short-term borrowings	251	2.87%	—	—%
Total short-term Federal Home Loan Bank advances and other borrowings	3,244		4,260	
Long-term LIBOR adjustable advances	—	—%	1,130	1.76%
Long-term fixed rate advances (1)	150	1.53%	275	1.41%
Total long-term Federal Home Loan Bank advances	150		1,405	
Total Federal Home Loan Bank advances and other borrowings	\$3,394		\$5,665	

(1) Includes the current portion of fixed rate advances of \$50 million and \$125 million at December 31, 2018 and December 31, 2017, respectively.

During the year ended December 31, 2018, \$1.1 billion of outstanding long-term FHLB advances were repaid.

The following table contains detailed information on our FHLB advances and other borrowings:

	For the Years Ended December 31,		
	2018	2017	2016
	(Dollars in millions)		
Maximum outstanding at any month end	\$5,740	\$5,665	\$3,557
Average outstanding balance	4,713	4,590	2,833
Average remaining borrowing capacity	2,089	1,195	1,137
Weighted average interest rate	1.96%	1.30%	1.16%

The following table outlines the maturity dates of our FHLB advances and other borrowings:

Total Trust Preferred Securities	247		247	
Total other long-term debt	\$495		\$494	

Senior Notes

On July 11, 2016, we issued \$250 million of senior notes ("Senior Notes") which mature on July 15, 2021. Prior to June 15, 2021, we may redeem some or all of the Senior Notes at a redemption price equal to the greater of 100 percent of the aggregate principal amount of the notes to be redeemed or the sum of the present values of the remaining scheduled payments discounted to the redemption date on a semi-annual basis using a discount rate equal to the Treasury Rate plus 0.50 percent, in addition to accrued and unpaid interest.

Trust Preferred Securities

We sponsor nine trust subsidiaries, which issued preferred stock to third party investors. We issued junior subordinated debt securities to those trusts, which we have included in long-term debt. The junior subordinated debt securities are the sole assets of those trusts. The trust preferred securities are callable by us at any time. Interest is payable quarterly; however, we may defer interest payments for up to 20 quarters without default or penalty. As of December 31, 2018, we had no deferred interest.

Note 15 - Warrants

May Investor Warrant

We granted warrants (the "May Investor Warrants") on January 30, 2009 under anti-dilution provisions applicable to certain investors (the "May Investors") in our May 2008 private placement capital raise.

During the year ended December 31, 2017, a total of 237,627 May Investor Warrants were exercised, resulting in the issuance of 154,313 shares of Common Stock. As of December 31, 2018 and December 31, 2017, there were no remaining May Investor Warrants outstanding and there is no related liability.

TARP Warrant

On January 30, 2009, in conjunction with the sale of 266,657 shares of TARP Preferred, we issued a warrant to purchase up to approximately 645,138 shares of Common Stock at an exercise price of \$62.00 per share (the "Warrant").

The Warrant was exercisable through January 30, 2019 and has expired without being exercised.

100

Flagstar Bancorp, Inc.
Notes to the Consolidated Financial Statements

Note 16 - Accumulated Other Comprehensive Income (Loss)

The following table sets forth the components in accumulated other comprehensive income (loss):

	For the Years Ended December 31,		
	2018	2017	2016
	(Dollars in millions)		
Investment Securities			
Beginning balance	\$(18)	\$(8)	\$5
Unrealized loss	(30)	(19)	(10)
Less: Tax benefit	(7)	(7)	(3)
Net unrealized loss	(23)	(12)	(7)
Reclassifications out of AOCI (1)	(1)	3	(9)
Less: Tax (benefit) provision	—	1	(3)
Net unrealized gain (loss) reclassified out of AOCI	(1)	2	(6)
Reclassification of certain income tax effects (2)	(5)	—	—
Other comprehensive loss, net of tax	(29)	(10)	(13)
Ending balance	\$(47)	\$(18)	\$(8)
Cash Flow Hedges			
Beginning balance	\$2	\$1	\$(3)
Unrealized gain (loss)	27	5	(13)
Less: Tax (benefit) provision	7	1	(5)
Net unrealized gain (loss)	20	4	(8)
Reclassifications out of AOCI (1) (3)	(30)	(5)	19
Less: Tax (benefit) provision	(8)	(2)	7
Net unrealized gain (loss) reclassified out of AOCI	(22)	(3)	12
Other comprehensive income/(loss), net of tax	(2)	1	4
Ending balance	\$—	\$2	\$1

(1) Reclassifications are reported in other noninterest income in the Consolidated Statement of Operations.

(2) Income tax effects of the Tax Cuts and Jobs Act are reclassified from AOCI to retained earnings due to early adoption of ASU 2018-02.

(3) The year ended December 31, 2018, includes \$29 million of hedging gains reclassified from AOCI to net interest income in conjunction with the payment of long-term FHLB advances.

Note 17 - Earnings Per Share

Basic earnings per share, excluding dilution, is computed by dividing earnings available to common stockholders by the weighted average number of shares of common stock outstanding during the period. Diluted earnings per share reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised and converted into common stock or resulted in the issuance of common stock that could then share in our earnings.

Flagstar Bancorp, Inc.
Notes to the Consolidated Financial Statements

The following table sets forth the computation of basic and diluted earnings per share of common stock:

	For the Years Ended December 31,		
	2018	2017	2016
	(In millions, except share data)		
Net income	\$187	\$ 63	\$ 171
Deferred cumulative preferred stock dividends	—	—	(18)
Net income applicable to common stockholders	\$187	\$ 63	\$ 153
Weighted Average Shares			
Weighted average common shares outstanding	57,520,289	59,093,868	56,569,307
Effect of dilutive securities			
May Investor Warrants	—	12,287	138,314
Stock-based awards	802,661	1,072,188	890,046
Weighted average diluted common shares	58,322,950	71,381,343	57,597,667
Earnings per common share			
Basic earnings per common share	\$3.26	\$ 1.11	\$ 2.71
Effect of dilutive securities			
May Investor Warrants	—	—	(0.01)
Stock-based awards	(0.05)	(0.02)	(0.04)
Diluted earnings per common share	\$3.21	\$ 1.09	\$ 2.66

Under the terms of the TARP Preferred, the Company elected to defer payments of preferred stock dividends beginning with the February 2012 dividend. Although, while being deferred, the impact was not included in quarterly net income from continuing operations, the deferral did impact net income applicable to common stock for the purpose of calculating earnings per share, as shown above. On July 29, 2016, we completed the \$267 million redemption of TARP Preferred.

Note 18 - Stock-Based Compensation

Our Board of Directors participates in stock-based and other incentive compensation plans. Certain key employees, officers, directors and others are eligible to receive stock awards. Awards that may be granted under the plan include stock options, cash-settled stock appreciation rights, restricted stock, restricted stock units, and other awards. Under the current plan, the exercise price of any award granted must be at least equal to the fair market value of common stock on the date of grant. Non-qualified stock options granted to directors expire 5 years from the date of grant. Grants other than non-qualified stock options have term limits set by the Board of Directors in the applicable agreement. Stock appreciation rights generally expire 7 years from the date of grant. Awards still outstanding under any of the prior plans will continue to be governed by their respective terms.

The compensation expense recognized related to stock-based compensation was \$11 million, during each of the years ended December 31, 2018, 2017 and 2016, respectively.

Stock Options

The following table summarizes stock option activity:

	For the Years Ended December 31,		
	2018 (1)	2017	2016

	Number of Shares	Weighted Average Exercise Price	Number of Shares	Weighted Average Exercise Price	Number of Shares	Weighted Average Exercise Price
Options outstanding, beginning of year	40,718	\$ 80.00	45,791	\$ 80.00	53,284	\$ 80.00
Options canceled, forfeited and expired	(4,625)	80.00	(5,073)	80.00	(7,493)	80.00
Options outstanding, end of year	36,093	\$ 80.00	40,718	\$ 80.00	45,791	\$ 80.00
Options vested or expected to vest, end of year	36,093	\$ 80.00	40,718	\$ 80.00	45,791	\$ 80.00
Options exercisable, end of year	17,991	\$ 80.00	20,286	\$ 80.00	23,576	\$ 80.00

(1) All outstanding options at December 31, 2018 are vested or expected to vest and have a weighted average remaining contractual life of 1.1 years.

Flagstar Bancorp, Inc.
Notes to the Consolidated Financial Statements

The total intrinsic value of options exercised during the years ended December 31, 2018, 2017 and 2016, was zero. Additionally, there was no aggregate intrinsic value of options outstanding and exercised at December 31, 2018, 2017 and 2016.

Restricted Stock and Restricted Stock Units

We have issued restricted stock units to officers, directors and certain employees under our long term incentive program (LTIP). Restricted stock units generally will vest in 3 increments on each annual anniversary of the date of grant beginning with the first anniversary or vest after three years subject to service and performance conditions.

On October 20, 2015, our Board approved and adopted the Flagstar Bancorp, Inc. Executive Long-Term Incentive Program ("ExLTIP"). The ExLTIP provides for payouts to certain executives only if our stock achieves and sustains a specified market performance within ten years of the grant date. The ExLTIP awards were made in the form of restricted stock units under and subject to the terms of the 2016 Flagstar Bancorp, Inc. Stock and Incentive Plan, which was approved at the May 24, 2016 annual shareholder meeting. With the achievement of the performance hurdles and satisfactory quality reviews, installments were paid out in May 2017 and May 2018. The remaining three installments will be made annually on the vesting date anniversary.

With the achievement of the performance-based ExLTIP, on March 20, 2018, the Board of Directors approved the adoption of the 2018 Executive Long Term Incentive Program II ("2018 ExLTIP II"). The 2018 ExLTIP II was provided to certain executives and is comprised of RSUs which are dependent on stock performance, time-based RSUs for which vesting is based on service over a four years period and RSUs that are performance and time vested with the same terms as those granted to other employees under the existing LTIP.

At December 31, 2018, the maximum number of shares of common stock that may be issued were 1,481,288 shares. The total fair value of awards vested during the years ended December 31, 2018, 2017, 2016 was \$9 million, \$7 million, and \$3 million, respectively. As of December 31, 2018, the total unrecognized compensation cost related to non-vested awards was \$29 million with a weighted average expense recognition period of 2.6 years.

The following table summarizes restricted stock activity:

	For the Years Ended December 31,		2017		2016	
	2018	Weighted Average Grant-Date Fair Value per Share	Number of Shares	Weighted Average Grant-Date Fair Value per Share	Number of Shares	Weighted Average Grant-Date Fair Value per Share
Restricted Stock and Restricted Stock Units						
Non-vested balance at beginning of period	1,290,450	\$ 20.52	1,461,910	\$ 17.68	1,299,985	\$ 16.36
Granted	875,352	34.32	357,058	28.06	310,209	22.97
Vested	(401,379)	23.04	(385,454)	17.36	(134,767)	15.78
Canceled and forfeited	(143,855)	21.46	(143,064)	18.89	(13,517)	17.24
Non-vested balance at end of period	1,620,568	\$ 27.27	1,290,450	\$ 20.52	1,461,910	\$ 17.68

2017 Employee Stock Purchase Plan

The Employee Stock Purchase Plan ("2017 ESPP") was approved on March 20, 2017 by our Board of Directors ("the Board") and on May 23, 2017 by our shareholders. The 2017 ESPP became effective July 1, 2017 and will remain effective until terminated by the Board. A total of 800,000 shares of the Company's common stock are reserved and authorized for issuance for purchase under the 2017 ESPP. There were 114,385 and 48,032 shares issued under the 2017 ESPP during the years ended December 31, 2018 and 2017, respectively, and the associated compensation expense was de minimis for both periods.

Incentive Compensation Plans

We had an expense of \$30 million, \$33 million and \$33 million for the years ended December 31, 2018, 2017 and 2016, respectively, for annual employee incentive payments and commission based payments.

Flagstar Bancorp, Inc.
Notes to the Consolidated Financial Statements

Note 19 - Income Taxes

Components of the provision for income taxes consist of the following:

	For the Years Ended December 31, 2018 2017 2016 (Dollars in millions)		
Current			
Federal	\$—	\$2	\$4
State	1	—	—
Total current income tax expense	1	2	4
Deferred			
Federal	47	66	84
Federal impact of tax reform	—	80	—
State	(3)	—	(1)
Total deferred income tax expense	44	146	83
Total income tax expense	\$45	\$148	\$87

Our effective tax rate differs from the statutory federal tax rate. The following is a summary of such differences:

	For the Years Ended December 31, 2018 2017 2016 (Dollars in millions)		
Provision at statutory federal income tax rate (1)	\$49	\$74	\$90
Increases (decreases) resulting from:			
Non-deductible compensation	2	—	—
Bank Owned Life Insurance	(2)	(3)	(3)
State income tax benefit, net of federal income tax effect (includes valuation allowance)	(2)	—	(1)
Restricted stock compensation	(1)	(2)	—
Tax Reform	—	80	—
Warrant expense (income)	—	—	1
Other	(1)	(1)	—
Provision for income taxes	\$45	\$148	\$87
Effective tax provision rate	19.4%	70.1 %	33.7%

(1) The statutory federal income tax rate was 21 percent for the year ended December 31, 2018 and 35 percent for both the years ended December 31, 2017 and 2016.

The decrease in our income tax provision and effective tax provision rate during the year ended December 31, 2018 as compared to the year ended December 31, 2017, was primarily due to the 2017 tax legislation which resulted in a charge to the provision for income taxes in 2017 of approximately \$80 million due to the revaluation of our DTAs at a lower corporate statutory rate.

Flagstar Bancorp, Inc.
Notes to the Consolidated Financial Statements

Temporary differences and carry forwards that give rise to DTAs and liabilities are comprised of the following:

	December 31, 2018 2017 (Dollars in millions)	
Deferred tax assets		
Net operating loss carryforwards (Federal and State)	\$58	\$110
Allowance for loan losses	40	43
Litigation settlement	14	14
Accrued compensation	10	10
General business credits	7	3
Contingent consideration	3	6
Mortgage loan servicing rights	3	—
Representation and warranty reserves	2	3
Loan deferred fees and costs	1	2
Non-accrual interest revenue	1	1
Deferred interest	1	1
Other	3	2
Total	143	195
Valuation allowance	(14)	(20)
Total net	129	175
Deferred tax liabilities		
Mark-to-market adjustments	(11)	(10)
Premises and equipment	(8)	(14)
Commercial lease financing	(4)	(9)
State and local taxes	(3)	(3)
Mortgage loan servicing rights	—	(3)
Total	(26)	(39)
Net deferred tax asset	\$103	\$136

We have not provided deferred income taxes for the Bank's pre-1988 tax bad debt reserve at December 31, 2018 of approximately \$4 million because it is not anticipated that this temporary difference will reverse in the foreseeable future. Such reserves would only be taken into taxable income if the Bank, or a successor institution, liquidates, redeems shares, pays dividends in excess of earnings, or ceases to qualify as a bank for tax purposes.

During the years ended December 31, 2018 and 2017, we had federal net operating loss carry forwards of \$154 million and \$381 million, respectively. These carry forwards, if unused, expire in calendar years 2029 through 2037. As a result of a change in control occurring on January 30, 2009, Section 382 of the Internal Revenue Code places an annual limitation on the use of our new operating loss carry forwards that existed at that time. At December 31, 2018 we had \$86 million of net operating loss carry forwards subject to certain annual use limitations which expire in calendar years 2029 through 2030.

We regularly evaluate the need for DTA valuation allowances based on a more likely than not standard as defined by generally accepted accounting principles. The ability to realize DTAs depends on the ability to generate sufficient taxable income within the carryback or carryforward periods provided for in the tax law for each applicable tax jurisdiction.

We had a total state DTA before valuation allowance of \$32 million which includes total state net operating loss carryforwards of \$516 million at December 31, 2018. In connection with our ongoing assessment of deferred taxes, we analyzed each state net operating loss separately and determined the amount of such net operating loss, estimated the amount which we expected to expire unused, and recorded a valuation allowance to reduce the DTA for state net operating losses to the amount which is more likely than not to be realized. At December 31, 2018, the net state DTAs which will more likely than not be realized, was \$18 million. We have a valuation allowance of \$14 million due to state loss carryover limitations.

We will continue to regularly assess the realizability of our DTAs. Changes in earnings performance and future earnings projections, among other factors, may cause us to adjust our valuation allowance.

Flagstar Bancorp, Inc.
Notes to the Consolidated Financial Statements

Our income tax returns are subject to review and examination by federal, state and local government authorities. On an ongoing basis, numerous federal, state and local examinations are in progress and cover multiple tax years. At December 31, 2018, the Internal Revenue Service had completed an examination of us through the taxable year ended December 31, 2013. The years open to examination by state and local government authorities vary by jurisdiction.

We recognize interest and penalties related to uncertain tax positions in income tax expense. For the years ended December 31, 2018, 2017 and 2016, we did not recognize any interest income, interest expense, or increase or decreases to uncertain income tax positions of greater than \$1 million, individually or in aggregate.

Note 20 - Regulatory Capital

We, along with the Bank, must meet specific capital guidelines that involve quantitative measures of the Bank's assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. The Bank's capital amounts and classifications are also subject to qualitative judgments by regulators. Failure to meet minimum capital requirements can initiate certain mandatory, and possibly additional discretionary actions by regulators that could have a material effect on the Consolidated Financial Statements. On January 1, 2015, the Basel III rules became effective and include transition provisions through 2018. In preparation for the expected capital simplification rules, the Basel III implementation phase-in has been halted, as the agencies issued a final rule that will maintain the capital rules' 2017 transition provisions for several regulatory capital deductions and certain other requirements that are subject to multi-year phase-in schedules in the regulatory capital rules. For additional information, see Item 1. Business and Item 1A. Risk Factors.

To be categorized as "well-capitalized," the Company and the Bank must maintain minimum tangible capital, Tier 1 capital, common equity Tier 1, and total capital ratios as set forth in the table below. We, along with the Bank, are considered "well-capitalized" at both December 31, 2018 and December 31, 2017.

The following tables present the regulatory capital ratios as of the dates indicated:

Flagstar Bancorp	Actual		For Capital Adequacy Purposes			Well-Capitalized Under Prompt Corrective Action Provisions	
	Amount	Ratio	Amount	Ratio		Amount	Ratio
(Dollars in millions)							
December 31, 2018

Note 21 - Legal Proceedings, Contingencies and Commitments

Legal Proceedings

We and our subsidiaries are subject to various pending or threatened legal proceedings arising out of the normal course of business operations. In addition, the Bank is routinely named in civil actions throughout the country by borrowers and former borrowers relating to the origination, purchase, sale, and servicing of mortgage loans. From time to time, governmental agencies also conduct investigations or examinations of various practices of the Bank. In the course of such investigations or examinations, the Bank cooperates with such agencies and provides information as requested.

We assess the liabilities and loss contingencies in connection with pending or threatened legal and regulatory proceedings on at least a quarterly basis and establish accruals when we believe it is probable that a loss may be incurred and that the amount of such loss can be reasonably estimated. Once established, litigation accruals are adjusted, as appropriate, in light of additional information.

At December 31, 2018, we do not believe that the amount of any reasonably possible losses in excess of any amounts accrued with respect to ongoing proceedings or any other known claims will be material to our financial statements, or that the ultimate outcome of these actions will have a material adverse effect on our financial condition, results of operations or cash flows.

DOJ litigation settlement

In 2012, the Bank entered into a Settlement Agreement with the DOJ which meets the definition of a financial liability (the "DOJ Liability").

In accordance with the Settlement Agreement, we made an initial payment of \$15 million and agreed to make future annual payments totaling \$118 million in annual increments of up to \$25 million upon meeting all conditions, which

are evaluated quarterly and include: (a) the reversal of the DTA valuation allowance, which occurred at the end of 2013; (b) the repayment of the Fixed Rate Cumulative Perpetual Preferred Stock, Series C (the "TARP Preferred"), which occurred in the third quarter of 2016; and (c) the Bank's Tier 1 Leverage Capital Ratio equals 11 percent or greater as filed in the Call Report with the OCC.

No payment would be required until six months after the Bank files its Call Report with the OCC first reporting that its Tier 1 Leverage Capital Ratio was 11 percent or greater. If all other conditions were then satisfied, an initial annual payment would be due at that time. The next annual payment is then only made if such other conditions continue to be satisfied, otherwise payments are delayed until all such conditions are met. Further, making such a payment must not violate any material banking regulatory requirement, and the OCC must not object in writing.

Flagstar Bancorp, Inc.
Notes to the Consolidated Financial Statements

Consistent with our business and regulatory requirements, Flagstar shall seek in good faith to fulfill the conditions, and will not undertake any conduct or fail to take any action the purpose of which is to frustrate or delay our ability to fulfill any of the above conditions.

Additionally, if the Bank and Bancorp become party to a business combination in which the Bank or Bancorp represent less than 33.3 percent of the resulting company's assets, annual payments must commence twelve months after the date of that business combination.

The Settlement Agreement meets the definition of a financial instrument for which we elected the fair value option. We consider the assumptions a market participant would make to transfer the liability and evaluate the potential ways we might satisfy the Settlement Agreement and our estimates of the likelihood of these outcomes, which may change over time. The fair value of the liability is subject to significant uncertainty and is impacted by forecasted estimates of the timing of potential payments, some of which are impacted by inputs including estimates of equity, earnings, timing and amount of dividends and growth of the balance sheet and their related impacts on forecasted Tier 1 Leverage Capital Ratio, and the likelihood and types of potential business combinations. For further information on the fair value to the liability, see Note 22 - Fair Value Measurements.

Other litigation accruals

At December 31, 2018 and December 31, 2017, excluding the fair value liability relating to the DOJ litigation settlement, our total accrual for contingent liabilities and settled litigation was \$2 million and \$1 million, respectively.

Commitments

The following table is a summary of the contractual amount of significant commitments:

	December 31,	
	2018	2017
	(Dollars in millions)	
Commitments to extend credit		
Mortgage loan interest-rate lock commitments	\$2,293	\$3,667
Warehouse loan commitments	2,334	1,618
Commercial and industrial commitments	918	695
Other commercial commitments	1,260	1,021
HELOC commitments	429	283
Other consumer commitments	108	15
Standby and commercial letters of credit	63	50

Commitments to extend credit are agreements to lend to a customer as long as there is not a violation of any condition established in the contract. Since many of these commitments expire without being drawn upon, the total commitment amounts do not necessarily represent future cash flow requirements. Commitments generally have fixed expiration dates or other termination clauses. We evaluate each customer's credit worthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by us, upon extension of credit is based on management's credit evaluation of the counterparties.

These instruments involve, to varying degrees, elements of credit and interest rate risk beyond the amount recognized on the Consolidated Statements of Financial Condition. Our exposure to credit losses in the event of nonperformance

by the other party to the financial instrument for commitments to extend credit and standby letters of credit is represented by the contractual amount of those instruments. We utilize the same credit policies in making commitments and conditional obligations as we do for balance sheet instruments. The types of credit we extend are as follows:

Mortgage loan interest-rate lock commitments. We enter into mortgage interest-rate lock commitments with our customers. These commitments are considered to be derivative instruments and the fair value of these commitments is recorded in the Consolidated Statements of Financial Condition in other assets. For further information, see Note 12 - Derivative Financial Instruments.

Warehouse loan commitments. Lines of credit provided to mortgage originators to fund loans they originate and then sell. The proceeds of the sale of the loans are used to repay the draw on the line used to fund the loans. See Note 2 - Acquisitions, for further information on our mortgage loan warehouse business acquisition.

Flagstar Bancorp, Inc.
Notes to the Consolidated Financial Statements

Commercial and industrial and other commercial commitments. Conditional commitments issued under various terms to lend funds to business and other entities. These commitments include revolving credit agreements, term loan commitments and short-term borrowing agreements. Many of these loan commitments have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of these commitments are expected to expire without being funded, the total commitment amounts do not necessarily represent future liquidity requirements.

HELOC commitments. Commitments to extend, originate or purchase credit are primarily lines of credit to consumers and have specified rates and maturity dates. Many of these commitments also have adverse change clauses, which allow us to cancel the commitment due to deterioration in the borrowers' creditworthiness or a decline in the collateral value.

Other consumer commitments. Conditional commitments issued to accommodate the financial needs of customers. The commitments are made under various terms to lend funds to consumers, which include revolving credit agreements, term loan commitments and short-term borrowing agreements.

Standby and commercial letters of credit. Conditional commitments issued to guarantee the performance of a customer to a third party. Standby letters of credit generally are contingent upon the failure of the customer to perform according to the terms of the underlying contract with the third party, while commercial letters of credit are issued specifically to facilitate commerce and typically result in the commitment being drawn on when the underlying transaction is consummated between the customer and the third party. These financial standby letters of credit irrevocably obligate the bank to pay a third party beneficiary when a customer fails to repay an outstanding loan or debt instrument.

We maintain a reserve for the estimate of probable credit losses inherent in unfunded commitments to extend credit. Unfunded commitments to extend credit include unfunded loans with available balances, new commitments to lend that are not yet funded, and standby and commercial letters of credit. A reserve balance of \$3 million at December 31, 2018 and December 31, 2017, respectively, is reflected in other liabilities on the Consolidated Statements of Financial Condition.

Note 22 - Fair Value Measurements

We utilize fair value measurements to record or disclose the fair value on certain assets and liabilities. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability through an orderly transaction between market participants at the measurement date. The determination of fair values of financial instruments often requires the use of estimates. In cases where quoted market values in an active market are not available, we use present value techniques and other valuation methods to estimate the fair values of our financial instruments. These valuation models rely on market-based parameters when available, such as interest rate yield curves or credit spreads. Unobservable inputs may be based on management's judgment, assumptions and estimates related to credit quality, our future earnings, interest rates and other relevant inputs. These valuation methods require considerable judgment and the resulting estimates of fair value can be significantly affected by the assumptions made and methods used.

Valuation Hierarchy

U.S. GAAP establishes a three-level valuation hierarchy for disclosure of fair value measurements. The hierarchy is based on the transparency of the inputs used in the valuation process with the highest priority given to quoted prices available in active markets and the lowest priority to unobservable inputs where no active market exists, as discussed

below.

Level 1 - Quoted prices (unadjusted) for identical assets or liabilities in active markets in which we can participate as of the measurement date;

Level 2 - Quoted prices for similar instruments in active markets, and other inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument; and

Level 3 - Unobservable inputs that reflect our own assumptions about the assumptions that market participants would use in pricing an asset or liability.

A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input within the valuation hierarchy that is significant to the overall fair value measurement. Transfers between levels of the fair value hierarchy are recognized at the end of the reporting period.

Liabilities							
DOJ litigation settlement	\$(84)	\$ 24	\$ —	\$—	\$ —	\$ —	\$(60)

(1) There were no unrealized gains/losses recorded in OCI during the years ended December 31, 2018, 2017 and 2016.

(2)

We utilized swaptions, futures, forward agency and loan sales and interest rate swaps to manage the risk associated with mortgage servicing rights and rate lock commitments. Gains and losses for individual lines do not reflect the effect of our risk management activities related to such Level 3 instruments.

- (3) Rate lock commitments are reported on a fallout adjusted basis. Transfers out of Level 3 represent the settlement value of the commitments that are transferred to LHFS, which are classified as Level 2 assets.

Edgar Filing: FLAGSTAR BANCORP INC - Form 10-K

Flagstar Bancorp, Inc.
Notes to the Consolidated Financial Statements

The following tables present the quantitative information about recurring Level 3 fair value financial instruments and the fair value measurements as of:

	Fair Value	Valuation Technique	Unobservable Input	Range (Weighted Average)
	(Dollars in millions)			
December 31, 2018				
Assets				
Loans held-for-investment				
Home equity	\$2	Discounted cash flows	Discount rate Constant prepayment rate Constant default rate	7.2% - 10.8% (9.0%) 13.6% - 20.3% (16.9%) 3.0% - 4.6% (3.8%)
Mortgage servicing rights	\$290	Discounted cash flows	Option adjusted spread Constant prepayment rate Weighted average cost to service per loan	2.1% - 25.9% (5.4%) 0% - 10.7% (9.6%) \$67 - \$95 (\$86)
Rate lock commitments (net)	\$20	Consensus pricing	Origination pull-through rate	75.0% - 87.2% (76.8%)
Liabilities				
DOJ litigation settlement	\$(60)	Discounted cash flows	See description below	See description below
Contingent consideration	\$(6)	Discounted cash flows	Beta Equity volatility	0.6 - 1.6 (1.1) 26.6% - 58.9% (40.0%)
	Fair Value	Valuation Technique	Unobservable Input	Range (Weighted Average)
	(Dollars in millions)			
December 31, 2017				
Assets				
Loans held-for-investment				
Home equity	\$4	Discounted cash flows	Discount rate Constant prepayment rate Constant default rate	7.2% - 10.8% (9.0%) 5.1% - 7.7% (6.4%) 3.0% - 4.5% (3.6%)
Mortgage servicing rights	\$291	Discounted cash flows	Option adjusted spread Constant prepayment rate Weighted average cost to service per loan	5.0% - 7.5% (6.3%) 8.0% - 11.8% (9.9%) \$58 - \$87 (\$73)
Rate lock commitments (net)	\$24	Consensus pricing	Origination pull-through rate	64.7% - 97.1% (82.0%)
Liabilities				
DOJ litigation settlement	\$(60)	Discounted cash flows	See description below	See description below
Contingent consideration	\$(25)	Discounted cash flows	Beta Equity volatility	0.6 - 1.6 (1.1) 26.6% - 58.9% (40.0%)

(1) Unobservable inputs were weighted by their relative fair value of the instruments.

(2) Unobservable inputs were not weighted as only one instrument exists.

Recurring Significant Unobservable Inputs

Home equity. The most significant unobservable inputs used in the fair value measurement of the home equity loans are discount rates, constant prepayment rates, and default rates. The constant prepayment and default rates are based on a 12 month historical average. Significant increases (decreases) in the discount rate in isolation result in a significantly lower (higher) fair value measurement. Increases (decreases) in prepay rates in isolation result in a higher (lower) fair value and increases (decreases) in default rates in isolation result in a lower (higher) fair value.

MSRs. The significant unobservable inputs used in the fair value measurement of the MSRs are option adjusted spreads, prepayment rates, and cost to service. Significant increases (decreases) in all three assumptions in isolation result in a significantly lower (higher) fair value measurement. Weighted average life (in years) is used to determine the change in fair value of MSRs. For December 31, 2018 and December 31, 2017 the weighted average life (in years) for the entire MSR portfolio was 5.2 and 6.0, respectively.

DOJ litigation settlement. The significant unobservable inputs used in the fair value measurement of the DOJ litigation settlement include assumptions that a market participant would make to transfer the liability and probability-weighted estimates of the potential ways we might satisfy the Settlement Agreement. For further information on the fair value inputs related to the DOJ litigation settlement, see Note 21 - Legal Proceedings, Contingencies and Commitments.

Rate lock commitments. The significant unobservable input used in the fair value measurement of the rate lock commitments is the pull through rate. The pull through rate is a statistical analysis of our actual rate lock fallout history to determine

Flagstar Bancorp, Inc.

Notes to the Consolidated Financial Statements

the sensitivity of the residential mortgage loan pipeline compared to interest rate changes and other deterministic values. New market prices are applied based on updated loan characteristics and new fallout ratios (i.e., the inverse of the pull through rate) are applied accordingly. Significant increases (decreases) in the pull through rate in isolation result in a significantly higher (lower) fair value measurement.
