VALERO ENERGY CORPORATION AND SUBSIDIARIES  
CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. BASIS OF PRESENTATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

As used in this report, the terms “Valero,” “we,” “us,” or “our” may refer to Valero Energy Corporation, one or more of its consolidated subsidiaries, or all of them taken as a whole.

These unaudited financial statements have been prepared in accordance with United States (U.S.) generally accepted accounting principles (GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X of the Securities Exchange Act of 1934. Accordingly, they do not include all of the information and notes required by U.S. GAAP for complete financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation have been included. All such adjustments are of a normal recurring nature unless disclosed otherwise. Financial information for the three and six months ended June 30, 2013 and 2012 included in these Condensed Notes to Consolidated Financial Statements is derived from our unaudited financial statements. Operating results for the three and six months ended June 30, 2013 are not necessarily indicative of the results that may be expected for the year ending December 31, 2013.

The balance sheet as of December 31, 2012 has been derived from our audited financial statements as of that date. For further information, refer to our financial statements and notes thereto included in our annual report on Form 10-K for the year ended December 31, 2012.

Significant Accounting Policies

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires us to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates. On an ongoing basis, we review our estimates based on currently available information. Changes in facts and circumstances may result in revised estimates.

Comprehensive Income

In February 2013, the provisions of Accounting Standards Codification (ASC) Topic 220, “Comprehensive Income,” were amended to require an entity to disclose information about the amounts reclassified out of accumulated other comprehensive income and into net income. An entity is required to present information on the face of the statement of income or in the notes to the financial statements about the effects on net income from significant amounts reclassified out of accumulated other comprehensive income if those amounts were required to be reclassified into net income in their entirety in the same reporting period they were initially charged to other comprehensive income. For other significant amounts that were not required to be reclassified into net income in their entirety in the same reporting period they were initially charged to other comprehensive income, a cross-reference is required in the notes to the financial statements to the disclosures that provide additional details about those amounts. These provisions were effective for interim and annual reporting periods beginning after December 15, 2012. The adoption of this guidance effective January 1, 2013 did not affect our financial position or results of operations, but resulted in additional disclosures, which are included in Note 7.

Table of Contents

VALERO ENERGY CORPORATION AND SUBSIDIARIES  
CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Balance Sheet Offsetting Arrangements

In December 2011, the provisions of ASC Topic 210, "Balance Sheet," were amended to require an entity to disclose information about offsetting and related arrangements to enable users of its financial statements to understand the effect of these arrangements on its financial position. In January 2013, the provisions of ASC Topic 210 were further amended to clarify that the scope of the previous amendment only applies to derivative instruments, including bifurcated derivatives, repurchase agreements and reverse repurchase agreements, and securities borrowing and securities lending transactions that are either eligible for offset in the balance sheet or are subject to an agreement similar to a master netting agreement. The guidance requires entities to disclose both gross information and net information about assets and liabilities within the scope of the amendment. These provisions were effective for interim and annual reporting periods beginning on or after January 1, 2013. The adoption of this guidance effective January 1, 2013 did not affect our financial position or results of operations, but resulted in additional disclosures, which are included in Note 12.

Other

The statement of cash flows for the six months ended June 30, 2012, which was included in our Form 10 Q for the quarterly period ended June 30, 2012, reflected an incorrect classification of \$160 million in proceeds on a note receivable related to the sale of our Paulsboro Refinery in December 2010. We previously reflected such proceeds as a component of cash flows from operating activities rather than as a component of cash flows from investing activities. The statement of cash flows for the six months ended June 30, 2012 included in this Form 10-Q for the quarterly period ended June 30, 2013 has been corrected to properly reflect the classification of those proceeds.

New Accounting Pronouncements

In July 2013, the provisions of ASC Topic 740, "Income Taxes," were amended to provide specific guidance on the financial statement presentation of an unrecognized tax benefit when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists at the reporting date. The amendment requires entities to present an unrecognized tax benefit as a reduction to the deferred tax asset generated by the net operating loss carryforward, similar tax loss, or tax credit carryforward, if such items are available to be used to offset the unrecognized tax benefit. These provisions are effective for interim and annual reporting periods beginning after December 15, 2013 and should be applied prospectively to all unrecognized tax benefits that exist at the effective date, with retrospective application permitted. The adoption of this guidance effective January 1, 2014 will not affect our financial position or results of operations, nor will it require any additional disclosures, but may result in a change in presentation to our consolidated balance sheets.

Table of Contents

VALERO ENERGY CORPORATION AND SUBSIDIARIES  
CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

2. SEPARATION OF RETAIL BUSINESS

On May 1, 2013, we completed the separation of our retail business by creating an independent public company named CST Brands, Inc. (CST) and distributing 80 percent of the outstanding shares of CST common stock to our stockholders on May 1, 2013. Each Valero stockholder received one share of CST common stock for every nine shares of Valero common stock held at the close of business on the record date of April 19, 2013. Fractional shares of CST common stock were not distributed, but instead were aggregated and sold in the open market at prevailing rates with net cash proceeds then distributed pro rata to each Valero stockholder who was entitled to receive fractional shares.

In connection with the separation, we received an aggregate of \$1.05 billion in cash, consisting of \$550 million from the issuance of short-term debt to a third-party financial institution on April 16, 2013 and \$500 million distributed to us by CST on May 1, 2013. The cash distributed to us by CST was borrowed by CST on May 1, 2013 under its senior secured credit facility. See Note 5 for further discussion of that credit facility. Also on May 1, 2013, CST issued \$550 million of its senior unsecured bonds to us, and we exchanged those bonds with the third-party financial institution in satisfaction of our short-term debt. Immediately prior to May 1, 2013, subsidiaries of CST held \$315 million of cash, and CST retained that cash following the distribution on May 1, 2013. Also in connection with the separation, we incurred a tax liability of approximately \$189 million primarily related to the manner in which the transaction is treated for tax purposes in Canada, and most of these taxes will not be paid until the first half of 2014. Therefore, the cash we received as a result of the separation, net of our tax liability, was \$546 million. We also incurred \$30 million in costs during the three months ended June 30, 2013 to effect the separation, which are included in general and administrative expenses. We expect to liquidate the remaining 20 percent of the outstanding shares of CST common stock that we own within 18 months of the date of separation.

We also entered into long-term motor fuel supply agreements with CST in the U.S. and Canada. The nature and significance of our agreements to supply motor fuel to CST through 2028 represents a continuation of activities with CST for accounting purposes. As such, the historical results of operations of our retail business have not been reported as discontinued operations in our statements of income.

Selected historical results of operations of our retail business prior to the separation are disclosed in Note 10. Subsequent to May 1, 2013, our share of CST's results of operations associated with our retained 20 percent equity interest in CST is reflected in "other income (expense), net" and our equity investment in CST, which is accounted for under the equity method, is included in "deferred charges and other assets, net." Our share of income taxes incurred directly by CST is reported in the equity in earnings from CST, and as such is not included in income taxes in our statements of income.

Table of ContentsVALERO ENERGY CORPORATION AND SUBSIDIARIES  
CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The following table presents the carrying values of the major categories of assets and liabilities of our retail business, immediately preceding its separation on May 1, 2013, which are excluded from our consolidated balance sheet as of June 30, 2013 (in millions):

Assets		
Cash and temporary cash investments	\$315	
Credit card receivables from Valero	44	
Other receivables, net	109	
Inventories	170	
Deferred income taxes	14	
Prepaid expenses and other	13	
Total current assets	665	
Property, plant and equipment, at cost	1,891	
Accumulated depreciation	(611	)
Property, plant and equipment, net	1,280	
Intangible assets, net	38	
Deferred charges and other assets, net	205	
Total assets	\$2,188	
Liabilities		
Current portion of capital lease obligations	\$2	
Trade payable to Valero	242	
Other accounts payable	96	
Accrued expenses	31	
Taxes other than income taxes	20	
Total current liabilities	391	
Debt and capital lease obligations, less current portion	1,053	
Deferred income taxes	83	
Other long-term liabilities	112	
Total liabilities	\$1,639	

We retained certain environmental and other liabilities related to our former retail business and we have indemnified CST for certain self-insurance liabilities related to its employees and property.

VALERO ENERGY CORPORATION AND SUBSIDIARIES  
CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

3. IMPAIRMENTS

Aruba Refinery

In March 2012, we suspended the operations of the Aruba Refinery because of its inability to generate positive cash flows on a sustained basis subsequent to its restart in January 2011 and the sensitivity of its profitability to sour crude oil differentials, which had narrowed significantly in the fourth quarter of 2011. Shortly thereafter, we received a non-binding offer to purchase the refinery for \$350 million, plus working capital as of the closing date. Because of our decision to suspend the operations and the possibility of selling the refinery, we evaluated the refinery for potential impairment as of March 31, 2012 and concluded that it was impaired. We recognized an asset impairment loss of \$595 million in March 2012. We did not, however, classify the Aruba Refinery as “held for sale” in our balance sheet because all of the accounting criteria required for that classification had not been met.

In September 2012, we decided to reorganize the Aruba Refinery into a crude oil and refined products terminal in response to the withdrawal of the non-binding offer to purchase the refinery. We bifurcated the idled crude oil processing units and related infrastructure (refining assets) from the terminal assets and evaluated the refining assets for potential impairment as of September 30, 2012. We concluded that the refining assets were impaired and recognized an asset impairment loss of \$308 million in September 2012. We also recognized an asset impairment loss of \$25 million related to materials and supplies inventories that supported the refining operations, resulting in a total asset impairment loss of \$333 million that was recognized in September 2012 related to the Aruba Refinery. The terminal assets were not impaired.

We have continued to maintain the refining assets to allow them to be restarted and do not consider them to be abandoned. Therefore, we have not reflected the Aruba Refinery as a discontinued operation in our financial statements. It is possible, however, that we may abandon these assets in the future. Should we ultimately decide to abandon these assets, we may be required under our land lease agreement with the Government of Aruba to dismantle and remove the abandoned assets, which would require us to recognize an asset retirement obligation, that would be immediately charged to expense. We do not expect these amounts to be material to our financial position or results of operations.

The variation in the customary relationship between income tax expense and income before income tax expense for the six months ended June 30, 2012 was primarily due to not recognizing a tax benefit associated with the asset impairment loss of \$595 million related to the Aruba Refinery as we do not expect to realize this tax benefit.

Cancelled Capital Project

In March 2012, we wrote down the carrying value of equipment associated with a permanently cancelled capital project at one of our refineries, resulting in an asset impairment loss of \$16 million.

Table of ContentsVALERO ENERGY CORPORATION AND SUBSIDIARIES  
CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

## 4. INVENTORIES

Inventories consisted of the following (in millions):

	June 30, 2013	December 31, 2012
Refinery feedstocks	\$2,641	\$2,458
Refined products and blendstocks	3,446	2,995
Ethanol feedstocks and products	139	191
Convenience store merchandise	—	112
Materials and supplies	220	217
Inventories	\$6,446	\$5,973

As of June 30, 2013 and December 31, 2012, the replacement cost (market value) of last in, first out (LIFO) inventories exceeded their LIFO carrying amounts by approximately \$6.3 billion and \$6.7 billion, respectively.

## 5. DEBT

## Bank Debt and Credit Facilities

We have a \$3 billion revolving credit facility (the Revolver) that has a maturity date of December 2016. The Revolver has certain restrictive covenants, including a maximum debt-to-capitalization ratio of 60 percent. As of June 30, 2013 and December 31, 2012, our debt-to-capitalization ratios, calculated in accordance with the terms of the Revolver, were 19 percent and 23 percent, respectively. We believe that we will remain in compliance with this covenant. In addition to the Revolver, one of our Canadian subsidiaries has a committed revolving credit facility under which it may borrow and obtain letters of credit up to C\$50 million.

During the six months ended June 30, 2013, we had no borrowings or repayments under our Revolver. During the six months ended June 30, 2012, we borrowed and repaid \$1.1 billion under our Revolver. We had no borrowings or repayments under the Canadian revolving credit facility during the six months ended June 30, 2013 and 2012. As of June 30, 2013 and December 31, 2012, we had no borrowings outstanding under the Revolver or the Canadian revolving credit facility.

On March 20, 2013, in anticipation of the separation of our retail business as described in Note 2, CST entered into a credit agreement providing for \$800 million of senior secured credit facilities (consisting of a \$500 million term loan facility and a revolving credit facility with an aggregate principal amount of up to \$300 million). Borrowings under the term loan and revolving credit facilities bear interest at the London Interbank Offered Rate (LIBOR) plus a margin or an alternate base rate, as defined in the agreement, plus a margin. The credit agreement matures on May 1, 2018 and has certain restrictive covenants. This credit agreement and related credit facilities were retained by CST after the separation from us. Therefore, we have no rights to obtain credit under nor any liabilities in connection with this credit agreement and related credit facilities.

Table of ContentsVALERO ENERGY CORPORATION AND SUBSIDIARIES  
CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

On April 16, 2013, also in anticipation of the separation of our retail business, we borrowed \$550 million under a short-term debt agreement with a third-party financial institution. On May 1, 2013, CST issued \$550 million of its senior unsecured bonds to us, and we exchanged those bonds with the third-party financial institution in satisfaction of our short-term debt.

We had outstanding letters of credit under our committed lines of credit as follows (in millions):

	Borrowing Capacity	Expiration	Amounts Outstanding	
			June 30, 2013	December 31, 2012
Letter of credit facilities	\$ 550	June 2014	\$ 250	\$ 418
Revolver	\$ 3,000	December 2016	\$ 59	\$ 59
Canadian revolving credit facility	C\$50	November 2013	C\$9	C\$10

As of June 30, 2013 and December 31, 2012, we had \$87 million and \$275 million, respectively, of letters of credit outstanding under our uncommitted short-term bank credit facilities.

**Non-Bank Debt**

During the six months ended June 30, 2013, the following activity occurred:

- in June 2013, we made a scheduled debt repayment of \$300 million related to our 4.75% notes; and
- in January 2013, we made a scheduled debt repayment of \$180 million related to our 6.7% senior notes.

During the six months ended June 30, 2012, the following activity occurred:

- in June 2012, we remarketed and received proceeds of \$300 million related to the 4.0% Gulf Opportunity Zone Revenue Bonds Series 2010 issued by the Parish of St. Charles, State of Louisiana, which are due December 1, 2040, but are subject to mandatory tender on June 1, 2022;
- in April 2012, we made scheduled debt repayments of \$4 million related to our Series 1997A 5.45% industrial revenue bonds and \$750 million related to our 6.875% notes; and
- in March 2012, we exercised the call provisions on our Series 1997 5.6%, Series 1998 5.6%, Series 1999 5.7%, Series 2001 6.65%, and Series 1997A 5.45% industrial revenue bonds, which were redeemed on May 3, 2012 for \$108 million, or 100 percent of their outstanding stated values.

**Accounts Receivable Sales Facility**

We have an accounts receivable sales facility with a group of third-party entities and financial institutions to sell up to \$1.5 billion of eligible trade receivables on a revolving basis. In July 2013, we amended this facility to extend the maturity date to July 2014. Proceeds from the sale of receivables under this facility are reflected as debt. Under this program, one of our marketing subsidiaries (Valero Marketing) sells eligible receivables, without recourse, to another of our subsidiaries (Valero Capital), whereupon the receivables are no longer owned by Valero Marketing. Valero Capital, in turn, sells an undivided percentage ownership interest in the eligible receivables, without recourse, to the third-party entities and financial institutions. To the extent that Valero Capital retains an ownership interest in the receivables it has purchased from Valero Marketing, such interest is included in our financial statements solely as a result of the consolidation of the financial statements of Valero Capital with those of Valero Energy Corporation; the receivables are not available to satisfy the claims of the creditors of Valero Marketing or Valero Energy Corporation.

Table of ContentsVALERO ENERGY CORPORATION AND SUBSIDIARIES  
CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Changes in the amounts outstanding under our accounts receivable sales facility were as follows (in millions):

	Six Months Ended	
	June 30,	
	2013	2012
Balance as of beginning of period	\$ 100	\$ 250
Proceeds from the sale of receivables	—	1,300
Repayments	—	(1,450)
Balance as of end of period	\$ 100	\$ 100

**Capitalized Interest**

Capitalized interest was \$45 million and \$53 million for the three months ended June 30, 2013 and 2012, respectively, and \$85 million and \$105 million for the six months ended June 30, 2013 and 2012, respectively.

**6. COMMITMENTS AND CONTINGENCIES****Environmental Matter**

We are involved, together with several other companies, in an environmental cleanup in the Village of Hartford, Illinois (the Village) and the adjacent shutdown refinery site, which we acquired as part of a prior acquisition. In cooperation with some of the other companies, we have been conducting initial mitigation and cleanup response pursuant to an administrative order issued by the U.S. Environmental Protection Agency (EPA). The EPA is seeking further cleanup obligations from us and other potentially responsible parties for the Village. In parallel with the Village cleanup, we are also in litigation with the State of Illinois Environmental Protection Agency and other potentially responsible parties relating to the remediation of the shutdown refinery site. In each of these matters, we have various defenses and rights for contribution from the other potentially responsible parties. We have accrued for our own expected contribution obligations. However, because of the unpredictable nature of these cleanups and the methodology for allocation of liabilities, it is reasonably possible that we could incur a loss in a range of \$0 to \$200 million in excess of the amount of our accrual to ultimately resolve these matters. Factors underlying this estimated range are expected to change from time to time, and actual results may vary significantly from this estimate.

**Litigation Matters**

We are party to claims and legal proceedings arising in the ordinary course of business. We have not recorded a loss contingency liability with respect to some of these matters because we have determined that it is remote that a loss has been incurred. For other matters, we have recorded a loss contingency liability where we have determined that it is probable that a loss has been incurred and that the loss is reasonably estimable. These loss contingency liabilities are not material to our financial position. We re-evaluate and update our loss contingency liabilities as matters progress over time, and we believe that any changes to the recorded liabilities will not be material to our financial position or results of operations.

**One-Time Severance Benefits**

As described in Note 3, we decided to reorganize the Aruba Refinery into a crude oil and refined products terminal in September 2012 resulting in a decrease in required personnel for our operations in Aruba. We notified 495 employees in September 2012 of the termination of their employment effective November 15,

Table of ContentsVALERO ENERGY CORPORATION AND SUBSIDIARIES  
CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

2012. Benefits to each terminated employee consisted primarily of a cash payment based on a formula that considers the employee's current compensation and years of service, among other factors. We recognized a severance liability of \$41 million in September 2012, which approximated fair value. We paid \$31 million of these benefits in the fourth quarter of 2012 and we paid the remaining termination benefits of \$10 million during the first quarter of 2013.

## 7.EQUITY

## Reconciliation of Balances

The following is a reconciliation of the beginning and ending balances of equity attributable to our stockholders, equity attributable to the noncontrolling interests, and total equity for the six months ended June 30, 2013 and 2012 (in millions):

	2013			2012			
	Valero Stockholders' Equity	Non- controlling Interests	Total Equity	Valero Stockholders' Equity	Non- controlling Interest	Total Equity	
Balance as of beginning of period	\$18,032	\$63	\$18,095	\$16,423	\$22	\$16,445	
Net income (loss)	1,120	(3	) 1,117	399	(1	) 398	
Dividends	(220	) —	(220	) (166	) —	(166	)
Stock-based compensation expense	25	—	25	20	—	20	
Tax deduction in excess of stock-based compensation expense	27	—	27	3	—	3	
Transactions in connection with stock-based compensation plans:							
Stock issuances	43	—	43	11	—	11	
Stock repurchases	(196	) —	(196	) (136	) —	(136	)
Stock repurchases under buyback program	(364	) —	(364	) —	—	—	
Separation of retail business	(499	) —	(499	) —	—	—	
Contributions from noncontrolling interests	—	45	45	—	25	25	
Other comprehensive income (loss)	(48	) —	(48	) 23	—	23	
Balance as of end of period	\$17,920	\$105	\$18,025	\$16,577	\$46	\$16,623	

The noncontrolling interests relate to third-party ownership interests in two joint venture companies, whose financial statements we consolidate due to our controlling interests.

CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

## Share Activity

Activity in the number of shares of common stock and treasury stock was as follows for the six months ended June 30, 2013 and 2012 (in millions):

	2013		2012		
	Common Stock	Treasury Stock	Common Stock	Treasury Stock	
Balance as of beginning of period	673	(121	) 673	(117	)
Transactions in connection with stock-based compensation plans:					
Stock issuances	—	3	—	1	
Stock purchases	—	(5	) —	(6	)
Stock repurchases under buyback program	—	(8	) —	—	
Balance as of end of period	673	(131	) 673	(122	)

## Common Stock Dividends

On July 25, 2013, our board of directors declared a quarterly cash dividend of \$0.225 per common share payable on September 11, 2013 to holders of record at the close of business on August 14, 2013.

## Accumulated Other Comprehensive Income (Loss)

Changes in accumulated other comprehensive income (loss) by component, net of tax, were as follows for the six months ended June 30, 2013 (in millions):

	Foreign Currency Translation Adjustment	Defined Benefit Pension Items	Gains and (Losses) on Cash Flow Hedges	Total	
Balance as of December 31, 2012	\$665	\$(558	) \$1	\$108	
Other comprehensive income (loss) before reclassifications	(268	) 214	(6	) (60	)
Amounts reclassified from accumulated other comprehensive income (loss)	—	9	3	12	
Net other comprehensive income (loss)	(268	) 223	(3	) (48	)
Separation of retail business	(159	) —	—	(159	)
Balance as of June 30, 2013	\$238	\$(335	) \$(2	) \$(99	)

Table of ContentsVALERO ENERGY CORPORATION AND SUBSIDIARIES  
CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Gains (losses) reclassified out of accumulated other comprehensive income (loss) and into net income were as follows (in millions):

Details about Accumulated Other Comprehensive Income (Loss) Components	Three Months Ended June 30, 2013	Six Months Ended June 30, 2013	Affected Line Item in the Statement of Income
Amortization of items related to defined benefit pension plans:			
Net actuarial loss	\$ (15)	) \$ (29)	) (a)
Prior service credit	9	15	(a)
	(6)	) (14)	) Total before tax
	2	5	Tax benefit
	\$ (4)	) \$ (9)	) Net of tax
Losses on cash flow hedges:			
Commodity contracts	\$ (8)	) \$ (5)	) Cost of sales
	(8)	) (5)	) Total before tax
	3	2	Tax benefit
	\$ (5)	) \$ (3)	) Net of tax
Total reclassifications for the period	\$ (9)	) \$ (12)	) Net of tax

(a) These accumulated other comprehensive income (loss) components are included in the computation of net periodic benefit cost, as further discussed in Note 8. Net periodic benefit cost is reflected in operating expenses and general and administrative expenses.

Table of ContentsVALERO ENERGY CORPORATION AND SUBSIDIARIES  
CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

## 8. EMPLOYEE BENEFIT PLANS

The components of net periodic benefit cost related to our defined benefit plans were as follows (in millions) :

	Pension Plans		Other Postretirement Benefit Plans	
	2013	2012	2013	2012
Three months ended June 30:				
Service cost	\$35	\$35	\$3	\$3
Interest cost	22	23	5	6
Expected return on plan assets	(34	) (31	—	—
Amortization of:				
Net actuarial loss	15	9	—	—
Prior service credit	(6	) —	(3	) (6
Net periodic benefit cost	\$32	\$36	\$5	\$3
Six months ended June 30:				
Service cost	\$71	\$70	\$6	\$6
Interest cost	44	46	9	11
Expected return on plan assets	(66	) (62	—	—
Amortization of:				
Net actuarial loss	29	17	—	—
Prior service cost (credit)	(9	) 1	(6	) (11
Net periodic benefit cost	\$69	\$72	\$9	\$6

On February 15, 2013, we announced changes to certain of our U.S. qualified pension plans that cover the majority of our U.S. employees who work in our refining segment and corporate operations. Benefits under our primary pension plan will change from a final average pay formula to a cash balance formula with staged effective dates that commence either on July 1, 2013 or January 1, 2015 depending on the age and service of the affected employees. All final average pay benefits will be frozen as of December 31, 2014, with all future benefits to be earned under the new cash balance formula. These plan amendments resulted in a \$328 million decrease to pension liabilities and a related increase to other comprehensive income during the six months ended June 30, 2013. The benefit of this remeasurement will be amortized into income through 2025.

As a result of these plan amendments, management reduced its discretionary contributions to our pension plans by \$100 million, resulting in expected contributions to our pension plans of \$45 million for 2013. During the six months ended June 30, 2013 and 2012, we contributed \$18 million and \$16 million, respectively, to our pension plans and \$8 million and \$10 million, respectively, to our other postretirement benefit plans.

CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

## 9. EARNINGS PER COMMON SHARE

Earnings per common share were computed as follows (dollars and shares in millions, except per share amounts):

	Three Months Ended June 30,			
	2013		2012	
	Restricted Stock	Common Stock	Restricted Stock	Common Stock
Earnings per common share:				
Net income attributable to Valero stockholders		\$466		\$831
Less dividends paid:				
Common stock		109		82
Nonvested restricted stock		—		1
Undistributed earnings		\$357		\$748
Weighted-average common shares outstanding	3	543	3	550
Earnings per common share:				
Distributed earnings	\$0.20	\$0.20	\$0.15	\$0.15
Undistributed earnings	0.66	0.66	1.35	1.35
Total earnings per common share	\$0.86	\$0.86	\$1.50	\$1.50
Earnings per common share – assuming dilution:				
Net income attributable to Valero stockholders		\$466		\$831
Weighted-average common shares outstanding		543		550
Common equivalent shares:				
Stock options		3		3
Performance awards and nonvested restricted stock		2		2
Weighted-average common shares outstanding – assuming dilution		548		555
Earnings per common share – assuming dilution		\$0.85		\$1.50

Table of ContentsVALERO ENERGY CORPORATION AND SUBSIDIARIES  
CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

	Six Months Ended June 30,			
	2013		2012	
	Restricted Stock	Common Stock	Restricted Stock	Common Stock
Earnings per common share:				
Net income attributable to Valero stockholders		\$1,120		\$399
Less dividends paid:				
Common stock		219		165
Nonvested restricted stock		1		1
Undistributed earnings		\$900		\$233
Weighted-average common shares outstanding	3	546	3	550
Earnings per common share:				
Distributed earnings	\$0.40	\$0.40	\$0.30	\$0.30
Undistributed earnings	1.64	1.64	0.42	0.42
Total earnings per common share	\$2.04	\$2.04	\$0.72	\$0.72
Earnings per common share – assuming dilution:				
Net income attributable to Valero stockholders		\$1,120		\$399
Weighted-average common shares outstanding		546		550
Common equivalent shares:				
Stock options		4		4
Performance awards and nonvested restricted stock		2		2
Weighted-average common shares outstanding – assuming dilution		552		556
Earnings per common share – assuming dilution		\$2.03		\$0.72

The following table reflects potentially dilutive securities (in millions) that were excluded from the calculation of “earnings per common share – assuming dilution” as the effect of including such securities would have been antidilutive. Stock options were excluded from weighted-average common shares outstanding – assuming dilution because the exercise price of the stock option was greater than the average market price of our common shares during each reporting period.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
Stock options	3	6	3	6

## 10. SEGMENT INFORMATION

As discussed in Note 2, we completed the separation of our retail business on May 1, 2013. Segment activity related to our retail business prior to the separation is reflected in the retail segment results below. Motor fuel sales to CST (our former retail business), which were eliminated in consolidation prior to the separation, are reported as refining segment operating revenues from external customers after May 1, 2013.

The following table reflects activity related to our reportable segments (in millions):

	Refining	Retail	Ethanol	Corporate	Total
Three months ended June 30, 2013:					
Operating revenues from external customers	\$31,564	\$979	\$1,491	\$—	\$34,034
Intersegment revenues	671	—	15	—	686
Operating income (loss)	921	39	95	(247)	) 808
Three months ended June 30, 2012:					
Operating revenues from external customers	30,488	3,062	1,112	—	34,662
Intersegment revenues	2,203	—	46	—	2,249
Operating income (loss)	1,364	172	5	(180)	) 1,361
Six months ended June 30, 2013:					
Operating revenues from external customers	61,117	3,896	2,495	—	67,508
Intersegment revenues	2,876	—	70	—	2,946
Operating income (loss)	2,133	81	109	(454)	) 1,869
Six months ended June 30, 2012:					
Operating revenues from external customers	61,638	5,997	2,194	—	69,829
Intersegment revenues	4,458	—	60	—	4,518
Operating income (loss)	1,245	212	14	(354)	) 1,117

Table of ContentsVALERO ENERGY CORPORATION AND SUBSIDIARIES  
CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Total assets by reportable segment were as follows (in millions):

	June 30, 2013	December 31, 2012
Refining	\$40,527	\$39,490
Retail	—	2,043
Ethanol	867	929
Corporate	2,783	2,015
Total assets	\$44,177	\$44,477

## 11. SUPPLEMENTAL CASH FLOW INFORMATION

In order to determine net cash provided by operating activities, net income is adjusted by, among other things, changes in current assets and current liabilities as follows (in millions):

	Six Months Ended		
	June 30, 2013	2012	
Decrease (increase) in current assets:			
Receivables, net	\$412	\$1,927	
Inventories	(824	) 198	
Income taxes receivable	31	(79	)
Prepaid expenses and other	2	(15	)
Increase (decrease) in current liabilities:			
Accounts payable	625	(1,413	)
Accrued expenses	(44	) (60	)
Taxes other than income taxes	268	67	
Income taxes payable	(26	) (60	)
Changes in current assets and current liabilities	\$444	\$565	

The above changes in current assets and current liabilities differ from changes between amounts reflected in the applicable balance sheets for the respective periods for the following reasons:

the amounts shown above exclude changes in cash and temporary cash investments, deferred income taxes, and current portion of debt and capital lease obligations, as well as the effect of certain noncash investing and financing activities discussed below;

the amounts shown above for the six months ended June 30, 2013 exclude the change in current assets and current liabilities resulting from the separation of our retail business as described in Note 2;

amounts accrued for capital expenditures and deferred turnaround and catalyst costs are reflected in investing activities when such amounts are paid;

amounts accrued for common stock purchases in the open market that are not settled as of the balance sheet date are reflected in financing activities when the purchases are settled and paid; and

Table of ContentsVALERO ENERGY CORPORATION AND SUBSIDIARIES  
CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

certain differences between balance sheet changes and the changes reflected above result from translating foreign currency denominated balances at the applicable exchange rates as of each balance sheet date.

There were no significant noncash investing activities for the six months ended June 30, 2013. Noncash financing activities for the six months ended June 30, 2013 included the exchange of CST's senior unsecured bonds with the third-party financial institution in satisfaction of our short-term debt as described in Note 2.

There were no significant noncash investing or financing activities for the six months ended June 30, 2012.

Cash flows related to interest and income taxes were as follows (in millions):

	Six Months Ended	
	June 30,	
	2013	2012
Interest paid in excess of amount capitalized	\$ 160	\$ 164
Income taxes paid, net	243	204

## 12. FAIR VALUE MEASUREMENTS

## General

GAAP requires that certain assets and liabilities be measured at fair value on a recurring or nonrecurring basis in our balance sheets, which are presented below under "Recurring Fair Value Measurements" and "Nonrecurring Fair Value Measurements." Recurring fair value measurements of assets or liabilities are those that GAAP requires or permits in the balance sheet at the end of each reporting period, such as derivative financial instruments. Nonrecurring fair value measurements of assets or liabilities are those that GAAP requires or permits in the balance sheet in particular circumstances, such as the impairment of property, plant and equipment.

GAAP also requires the disclosure of the fair values of financial instruments when an option to elect fair value accounting has been provided, but such election has not been made. A debt obligation is an example of such a financial instrument. The disclosure of the fair values of financial instruments not recognized at fair value in our balance sheet is presented below under "Other Financial Instruments."

GAAP provides a framework for measuring fair value and establishes a three-level fair value hierarchy that prioritizes inputs to valuation techniques based on the degree to which objective prices in external active markets are available to measure fair value. Following is a description of each of the levels of the fair value hierarchy.

Level 1 - Observable inputs, such as unadjusted quoted prices in active markets for identical assets or liabilities.

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. These include quoted prices for similar assets or liabilities in active markets and quoted prices for identical or similar assets or liabilities in markets that are not active.

Table of ContentsVALERO ENERGY CORPORATION AND SUBSIDIARIES  
CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Level 3 - Unobservable inputs for the asset or liability. Unobservable inputs reflect our own assumptions about what market participants would use to price the asset or liability. The inputs are developed based on the best information available in the circumstances, which might include occasional market quotes or sales of similar instruments or our own financial data such as internally developed pricing models, discounted cash flow methodologies, as well as instruments for which the fair value determination requires significant judgment.

## Recurring Fair Value Measurements

The tables below present information (in millions) about our assets and liabilities recognized at their fair values in our balance sheets categorized according to the fair value hierarchy of the inputs utilized by us to determine the fair values as of June 30, 2013 and December 31, 2012.

We have elected to offset the fair value amounts recognized for multiple similar derivative contracts executed with the same counterparty, including any related cash collateral assets or obligations as shown below; however, fair value amounts by hierarchy level are presented on a gross basis in the tables below. We have no derivative contracts that are subject to master netting arrangements that are reflected gross on the balance sheet.

June 30, 2013

	Fair Value Hierarchy			Total Gross Fair Value	Effect of Counter- party Netting	Effect of Cash Collateral Netting	Net Carrying Value on Balance Sheet	Cash Collateral Paid or Received Not Offset
	Level 1	Level 2	Level 3					
Assets:

Foreign currency contracts	1	—	—	1	N/A	N/A	1	N/A
<b>Total</b>	<b>\$1,139</b>	<b>\$80</b>	<b>\$—</b>	<b>\$1,219</b>	<b>\$(1,189 )</b>	<b>\$(13 )</b>	<b>\$17</b>	

A description of our assets and liabilities recognized at fair value along with the valuation methods and inputs we used to develop their fair value measurements are as follows:

Commodity derivative contracts consist primarily of exchange-traded futures and swaps, and as disclosed in Note 13, some of these contracts are designated as hedging instruments. These contracts are measured at fair value using the market approach. Exchange-traded futures are valued based on quoted prices from the exchange and are categorized in Level 1 of the fair value hierarchy. Swaps are priced using third-party broker quotes, industry pricing services, and exchange-traded curves, with appropriate consideration of counterparty credit risk, but because they have contractual terms that are not identical to exchange-traded futures instruments with a comparable market price, these financial instruments are categorized in Level 2 of the fair value hierarchy.

Physical purchase contracts represent the fair value of firm commitments to purchase crude oil feedstocks and the fair value of fixed-price corn purchase contracts, and as disclosed in Note 13, some of these contracts are designated as hedging instruments. The fair values of these firm commitments and purchase contracts are measured using a market approach based on quoted prices from the commodity exchange or an independent pricing service and are categorized in Level 2 of the fair value hierarchy.

Renewable Identification Numbers (RINs) fixed-price contracts represent the fair value of fixed-price purchase and sale contracts of RINs entered into for trading purposes. The fair values of these contracts are measured using a market approach based on quoted prices from an independent pricing service and are categorized in Level 2 of the fair

value hierarchy.

23

---

Table of ContentsVALERO ENERGY CORPORATION AND SUBSIDIARIES  
CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Investments of certain benefit plans consist of investment securities held by trusts for the purpose of satisfying a portion of our obligations under certain U.S. nonqualified benefit plans. The assets categorized in Level 1 of the fair value hierarchy are measured at fair value using a market approach based on quoted prices from national securities exchanges. The assets categorized in Level 3 of the fair value hierarchy represent insurance contracts, the fair value of which is provided by the insurer.

Foreign currency contracts consist of foreign currency exchange and purchase contracts entered into by our international operations to manage our exposure to exchange rate fluctuations on transactions denominated in currencies other than the local (functional) currencies of those operations. These contracts are valued based on quoted prices from the exchange and are categorized in Level 1 of the fair value hierarchy.

Our biofuels blending obligation represents a liability for the purchase of biofuel credits (primarily RINs in the U.S.) needed to satisfy our obligation to blend biofuels into the products we produce. To the degree we are unable to blend at percentages required under various governmental and regulatory programs, we must purchase biofuel credits to comply with these programs. These programs are further described in Note 13 under "Compliance Program Risk." This liability is based on our deficit in biofuel credits as of the balance sheet date, if any, after considering any biofuel credits acquired or under contract, and is equal to the product of the biofuel credits deficit and the market price of these credits as of the balance sheet date. This liability is categorized in Level 2 of the fair value hierarchy and is measured at fair value using the market approach based on quoted prices from an independent pricing service.

There were no transfers between Level 1 and Level 2 for assets and liabilities held as of June 30, 2013 and December 31, 2012 that were measured at fair value on a recurring basis.

There was no activity during the three and six months ended June 30, 2013 and 2012 related to the fair value amounts categorized in Level 3 as of June 30, 2013 and December 31, 2012.

**Nonrecurring Fair Value Measurements**

There were no assets or liabilities that were measured at fair value on a nonrecurring basis as of June 30, 2013.

The table below presents the fair value of certain assets that were measured at fair value on a nonrecurring basis as of December 31, 2012 (in millions).

	Fair Value Hierarchy			Total Fair Value as of December 31, 2012
	Level 1	Level 2	Level 3	
Cancelled capital project	\$—	\$—	\$2	\$2
Property, plant and equipment of convenience stores	—	—	8	8

There were no liabilities that were measured at fair value on a nonrecurring basis as of December 31, 2012.

Table of ContentsVALERO ENERGY CORPORATION AND SUBSIDIARIES  
CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

During the six months ended June 30, 2012, we recognized asset impairment losses of \$595 million and \$16 million related to our Aruba Refinery and certain equipment associated with a permanently cancelled capital project at one of our refineries, respectively. These impairment losses resulted from the fair value measurement of those assets on a nonrecurring basis as of March 31, 2012. As discussed in Note 3, we concluded that the Aruba Refinery was impaired as of March 31, 2012. As a result, we were required to determine the fair value of the Aruba Refinery and to write down its carrying value to that amount. We determined that the best measure of the refinery's fair value at that time was the \$350 million offer received and accepted. The fair value of the Aruba Refinery was measured using the market approach and was categorized in Level 3 within the fair value hierarchy. The carrying value of the Aruba Refinery's long-lived assets as of March 31, 2012 was \$945 million; therefore, we recognized an asset impairment loss of \$595 million in March 2012.

## Other Financial Instruments

Financial instruments that we recognize in our balance sheets at their carrying amounts are shown in the table below (in millions):

	June 30, 2013		December 31, 2012	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Financial assets:				
Cash and temporary cash investments	\$2,398	\$2,398	\$1,723	\$1,723
Equity investment in CST	114	465	—	—
Financial liabilities:				
Debt (excluding capital leases)	6,522	7,736	7,000	8,621

The methods and significant assumptions used to estimate the fair value of these financial instruments are as follows:

- The fair value of cash and temporary cash investments approximates the carrying value due to the low level of credit risk of these assets combined with their short maturities and market interest rates (Level 1).

- The fair value of our equity investment in CST is determined using the market approach based on the quoted price of CST stock from a national securities exchange (Level 1).

- The fair value of debt is determined primarily using the market approach based on quoted prices provided by third-party brokers and vendor pricing services (Level 2).

13. PRICE RISK MANAGEMENT ACTIVITIES

General

We are exposed to market risks related to the volatility in the price of commodities, interest rates, and foreign currency exchange rates. We enter into derivative instruments to manage some of these risks, including derivative instruments related to the various commodities we purchase or produce, interest rate swaps, and foreign currency exchange and purchase contracts, as described below under “Risk Management Activities by Type of Risk.” These derivative instruments are recorded as either assets or liabilities measured at their fair values (see Note 12), as summarized below under “Fair Values of Derivative Instruments.” In addition, the effect of these derivative instruments on our income is summarized below under “Effect of Derivative Instruments on Income and Other Comprehensive Income.”

When we enter into a derivative instrument, it is designated as a fair value hedge, a cash flow hedge, an economic hedge, or a trading derivative. The gain or loss on a derivative instrument designated and qualifying as a fair value hedge, as well as the offsetting loss or gain on the hedged item attributable to the hedged risk, is recognized currently in income in the same period. The effective portion of the gain or loss on a derivative instrument designated and qualifying as a cash flow hedge is initially reported as a component of other comprehensive income and is then recorded into income in the period or periods during which the hedged forecasted transaction affects income. The ineffective portion of the gain or loss on the cash flow derivative instrument, if any, is recognized in income as incurred. For our economic hedges (derivative instruments not designated as fair value or cash flow hedges) and for derivative instruments entered into by us for trading purposes, the derivative instrument is recorded at fair value and changes in the fair value of the derivative instrument are recognized currently in income. The cash flow effects of all of our derivative instruments are reflected in operating activities in our statements of cash flows for all periods presented.

We are also exposed to market risk related to the volatility in the price of credits needed to comply with various governmental and regulatory programs. To manage this risk, we enter into contracts to purchase these credits when prices are deemed favorable. Some of these contracts are derivative instruments; however, we elect the normal purchase and sale exception and do not record these contracts at their fair values.

Risk Management Activities by Type of Risk

Commodity Price Risk

We are exposed to market risks related to the volatility in the price of crude oil, refined products (primarily gasoline and distillate), grain (primarily corn), soybean oil, and natural gas used in our operations. To reduce the impact of price volatility on our results of operations and cash flows, we use commodity derivative instruments, including futures, swaps, and options. We use the futures markets for the available liquidity, which provides greater flexibility in transacting our hedging and trading operations. We use swaps primarily to manage our price exposure. Our positions in commodity derivative instruments are monitored and managed on a daily basis by a risk control group to ensure compliance with our stated risk management policy that has been approved by our board of directors.

For risk management purposes, we use fair value hedges, cash flow hedges, and economic hedges. In addition to the use of derivative instruments to manage commodity price risk, we also enter into certain commodity derivative instruments for trading purposes. Our objective for entering into each type of hedge or trading derivative is described below.

Table of ContentsVALERO ENERGY CORPORATION AND SUBSIDIARIES  
CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Fair Value Hedges – Fair value hedges are used to hedge price volatility in certain refining inventories and firm commitments to purchase inventories. The level of activity for our fair value hedges is based on the level of our operating inventories, and generally represents the amount by which our inventories differ from our previous year-end LIFO inventory levels.

As of June 30, 2013, we had the following outstanding commodity derivative instruments that were entered into to hedge crude oil and refined product inventories and commodity derivative instruments related to the physical purchase of crude oil and refined products at a fixed price. The information presents the notional volume of outstanding contracts by type of instrument and year of maturity (volumes in thousands of barrels).

Derivative Instrument	Notional Contract Volumes by Year of Maturity 2013
Crude oil and refined products:	
Futures – long	8,062
Futures – short	10,954
Physical contracts - long	2,892

Cash Flow Hedges – Cash flow hedges are used to hedge price volatility in certain forecasted feedstock and refined product purchases, refined product sales, and natural gas purchases. The objective of our cash flow hedges is to lock in the price of forecasted feedstock, refined product, or natural gas purchases or refined product sales at existing market prices that we deem favorable.

As of June 30, 2013, we had the following outstanding commodity derivative instruments that were entered into to hedge forecasted purchases or sales of crude oil and refined products. The information presents the notional volume of outstanding contracts by type of instrument and year of maturity (volumes in thousands of barrels).

Derivative Instrument	Notional Contract Volumes by Year of Maturity 2013
Crude oil and refined products:	
Futures – long	7,938
Futures – short	5,527
Physical contracts – short	2,411

Economic Hedges – Economic hedges represent commodity derivative instruments that are not designated as fair value or cash flow hedges and are used to manage price volatility in certain (i) refinery

Table of ContentsVALERO ENERGY CORPORATION AND SUBSIDIARIES  
CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

feedstock, refined product, and corn inventories, (ii) forecasted refinery feedstock, refined product, and corn purchases, and refined product sales, and (iii) fixed-price corn purchase contracts. Our objective for entering into economic hedges is consistent with the objectives discussed above for fair value hedges and cash flow hedges. However, the economic hedges are not designated as a fair value hedge or a cash flow hedge for accounting purposes, usually due to the difficulty of establishing the required documentation at the date that the derivative instrument is entered into that would allow us to achieve “hedge deferral accounting.”

As of June 30, 2013, we had the following outstanding commodity derivative instruments that were used as economic hedges and commodity derivative instruments related to the physical purchase of corn at a fixed price. The information presents the notional volume of outstanding contracts by type of instrument and year of maturity (volumes in thousands of barrels, except those identified as natural gas contracts that are presented in billions of British thermal units, corn contracts that are presented in thousands of bushels, and soybean oil contracts that are presented in thousands of pounds).

Derivative Instrument	Notional Contract Volumes by Year of Maturity	
	2013	2014
Crude oil and refined products:		
Swaps – long	3,510	—
Swaps – short	2,585	—
Futures – long	39,316	58
Futures – short	53,514	—
Natural gas:		
Options – long	10,750	—
Corn:		
Futures – long	28,405	5
Futures – short	49,030	1,180
Physical contracts – long	21,678	1,215
Soybean oil:		
Futures – long	5,220	—
Futures – short	27,900	—

Table of ContentsVALERO ENERGY CORPORATION AND SUBSIDIARIES  
CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Trading Derivatives – Our objective for entering into commodity and other derivative instruments for trading purposes is to take advantage of existing market conditions related to future results of operations and cash flows.

As of June 30, 2013, we had the following outstanding commodity and other derivative instruments that were entered into for trading purposes. The information presents the notional volume of outstanding contracts by type of instrument and year of maturity (volumes represent thousands of barrels, except those identified as natural gas contracts that are presented in billions of British thermal units, corn contracts that are presented in thousands of bushels, and RINs contracts that are presented in thousands of gallons).

Derivative Instrument	Notional Contract Volumes by Year of Maturity	
	2013	2014
Crude oil and refined products:		
Swaps – long	26,255	21,135
Swaps – short	26,255	21,135
Futures – long	99,886	37,527
Futures – short	99,311	37,927
Options – long	26,321	—
Options – short	25,256	—
Natural gas:		
Futures – long	1,700	—
Futures – short	750	—
Options – long	1,700	—
Corn:		
Swaps – long	145	—
Swaps – short	145	—
Futures – long	5,620	—
Futures – short	5,620	—
Other:		
RINs fixed-price contracts – short	25,000	—

## Interest Rate Risk

Our primary market risk exposure for changes in interest rates relates to our debt obligations. We manage our exposure to changing interest rates through the use of a combination of fixed-rate and floating-rate debt. In addition, at times we have used interest rate swap agreements to manage our fixed to floating interest rate position by converting certain fixed-rate debt to floating-rate debt. We had no interest rate derivative instruments outstanding as of June 30, 2013 or December 31, 2012, or during the three and six months ended June 30, 2013 and 2012.

Table of Contents

VALERO ENERGY CORPORATION AND SUBSIDIARIES  
CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Foreign Currency Risk

We are exposed to exchange rate fluctuations on transactions entered into by our international operations that are denominated in currencies other than the local (functional) currencies of those operations. To manage our exposure to these exchange rate fluctuations, we use foreign currency exchange and purchase contracts. These contracts are not designated as hedging instruments for accounting purposes, and therefore they are classified as economic hedges. As of June 30, 2013, we had commitments to purchase \$581 million of U.S. dollars. These commitments matured on or before July 31, 2013, resulting in an immaterial loss in the third quarter of 2013.

Compliance Program Price Risk

We are exposed to market risk related to the volatility in the price of credits needed to comply with various governmental and regulatory programs. The most significant programs impacting our operations are those that require us to blend biofuels into the products we produce, and we are subject to such programs in most of the countries in which we operate. These countries set annual quotas for the percentage of biofuels that must be blended into the motor fuels consumed in these countries. As a producer of motor fuels from petroleum, we are obligated to blend biofuels into the products we produce at a rate that is at least equal to the applicable quota. To the degree we are unable to blend at the applicable rate, we must purchase biofuel credits (primarily RINs in the U.S.). We are exposed to the volatility in the market price of these credits, and we manage that risk by purchasing biofuel credits when prices are deemed favorable. Due to rising RINs prices in the U.S. during the six months ended June 30, 2013, we purchased a portion of our expected RINs obligation for 2013. The cost of meeting our obligations under these compliance programs was \$137 million and \$59 million for the three months ended June 30, 2013 and 2012, respectively, and \$267 million and \$126 million for the six months ended June 30, 2013 and 2012, respectively. These amounts are reflected in cost of sales.

## Fair Values of Derivative Instruments

The following tables provide information about the fair values of our derivative instruments as of June 30, 2013 and December 31, 2012 (in millions) and the line items in the balance sheets in which the fair values are reflected. See Note 12 for additional information related to the fair values of our derivative instruments.

As indicated in Note 12, we net fair value amounts recognized for multiple similar derivative contracts executed with the same counterparty under master netting arrangements, including cash collateral assets and obligations. The tables below, however, are presented on a gross asset and gross liability basis, which results in the reflection of certain assets in liability accounts and certain liabilities in asset accounts.

	Balance Sheet Location	June 30, 2013 Asset Derivatives	Liability Derivatives

**Market and Counterparty Risk**

Our price risk management activities involve the receipt or payment of fixed price commitments into the future. These transactions give rise to market risk, which is the risk that future changes in market conditions may make an instrument less valuable. We closely monitor and manage our exposure to market risk on a daily basis in accordance with policies approved by our board of directors. Market risks are monitored by a risk control group to ensure compliance with our stated risk management policy. Concentrations of customers in the refining industry may impact our overall exposure to counterparty risk because these customers may be similarly affected by changes in economic or other conditions. In addition, financial services companies are the counterparties in certain of our price risk management activities, and such financial services companies may be adversely affected by periods of uncertainty and illiquidity in the credit and capital markets.

There were no material amounts due from counterparties in the refining or financial services industry as of June 30, 2013 or December 31, 2012. We do not require any collateral or other security to support derivative instruments into which we enter. We also do not have any derivative instruments that require us to maintain a minimum investment-grade credit rating.

Table of ContentsVALERO ENERGY CORPORATION AND SUBSIDIARIES  
CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

## Effect of Derivative Instruments on Income and Other Comprehensive Income

The following tables provide information about the gain or loss recognized in income and other comprehensive income on our derivative instruments and the line items in the financial statements in which such gains and losses are reflected (in millions).

Derivatives in Fair Value Hedging Relationships	Location of Gain (Loss) Recognized in Income on Derivatives	Three Months Ended		Six Months Ended	
		June 30, 2013	2012	June 30, 2013	2012
Commodity contracts:					
Gain (loss) recognized in income on derivatives	Cost of sales	\$(20	) \$87	\$(21	) \$(180
Gain (loss) recognized in income on hedged item	Cost of sales	22	(91	) 22	137
Gain (loss) recognized in income on derivatives (ineffective portion)	Cost of sales	2	(4	) 1	(43

For fair value hedges, no component of the derivative instruments' gains or losses was excluded from the assessment of hedge effectiveness for the three and six months ended June 30, 2013 and 2012. There were no amounts recognized in income for hedged firm commitments that no longer qualified as fair value hedges during the three or six months ended June 30, 2013. We recognized a gain of \$28 million in income for hedged firm commitments that no longer qualified as fair value hedges during the three and six months ended June 30, 2012.

Derivatives in Cash Flow Hedging Relationships	Location of Gain (Loss) Recognized in Income on Derivatives	Three Months Ended		Six Months Ended	
		June 30, 2013	2012	June 30, 2013	2012
Commodity contracts:					
Gain (loss) recognized in OCI on derivatives (effective portion)		\$(10	) \$(31	) \$(9	) \$16
Gain (loss) reclassified from accumulated OCI into income (effective portion)	Cost of sales	(8	) (12	) (5	) 36
Gain (loss) recognized in income on derivatives (ineffective portion)	Cost of sales	(2	) 31	(3	) 26

Table of ContentsVALERO ENERGY CORPORATION AND SUBSIDIARIES  
CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

For cash flow hedges, no component of the derivative instruments' gains or losses was excluded from the assessment of hedge effectiveness for the three and six months ended June 30, 2013 and 2012. For the three and six months ended June 30, 2013, cash flow hedges primarily related to forward sales of gasoline and distillates, and associated forward purchases of crude oil, with \$2 million of cumulative after-tax losses on cash flow hedges remaining in accumulated other comprehensive income. We estimate that \$3 million of the deferred loss as of June 30, 2013 will be reclassified into cost of sales over the next 12 months as a result of hedged transactions that are forecasted to occur. For the three and six months ended June 30, 2013 and 2012, there were no amounts reclassified from accumulated other comprehensive income into income as a result of the discontinuance of cash flow hedge accounting.

Derivatives Designated as Economic Hedges and Other Derivative Instruments	Location of Gain (Loss) Recognized in Income on Derivatives	Three Months Ended June 30,		Six Months Ended June 30,	
		2013	2012	2013	2012
Commodity contracts	Cost of sales	\$246	\$574	\$281	\$423
Foreign currency contracts	Cost of sales	11	1	36	(22)
Total		\$257	\$575	\$317	\$401
Trading Derivatives	Location of Gain (Loss) Recognized in Income on Derivatives	Three Months Ended June 30,		Six Months Ended June 30,	
		2013	2012	2013	2012
Commodity contracts	Cost of sales	\$3	\$8	\$5	\$4
RINs fixed-price contracts	Cost of sales	(7	) —	(20	) —

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

CAUTIONARY STATEMENT FOR THE PURPOSE OF SAFE HARBOR PROVISIONS OF THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995

This Form 10-Q, including without limitation our discussion below under the heading "OVERVIEW AND OUTLOOK," includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. You can identify our forward-looking statements by the words "anticipate," "believe," "expect," "plan," "intend," "estimate," "project," "projection," "predict," "budget," "forecast," "target," "could," "should," "may," and similar expressions.

These forward-looking statements include, among other things, statements regarding:

- future refining margins, including gasoline and distillate margins;
- future ethanol margins;
- expectations regarding feedstock costs, including crude oil differentials, and operating expenses;
- anticipated levels of crude oil and refined product inventories;
- our anticipated level of capital investments, including deferred refinery turnaround and catalyst costs and capital expenditures for environmental and other purposes, and the effect of those capital investments on our results of operations;
- anticipated trends in the supply of and demand for crude oil and other feedstocks and refined products globally and in the regions where we operate;
- expectations regarding environmental, tax, and other regulatory initiatives; and
- the effect of general economic and other conditions on refining and ethanol industry fundamentals.

We based our forward-looking statements on our current expectations, estimates, and projections about ourselves and our industry. We caution that these statements are not guarantees of future performance and involve risks, uncertainties, and assumptions that we cannot predict. In addition, we based many of these forward-looking statements on assumptions about future events that may prove to be inaccurate. Accordingly, our actual results may differ materially from the future performance that we have expressed or forecast in the forward-looking statements. Differences between actual results and any future performance suggested in these forward-looking statements could result from a variety of factors, including the following:

- acts of terrorism aimed at either our facilities or other facilities that could impair our ability to produce or transport refined products or receive feedstocks;
- political and economic conditions in nations that produce crude oil or consume refined products;
- demand for, and supplies of, refined products such as gasoline, diesel fuel, jet fuel, petrochemicals, and ethanol;
- demand for, and supplies of, crude oil and other feedstocks;
- the ability of the members of the Organization of Petroleum Exporting Countries (OPEC) to agree on and to maintain crude oil price and production controls;
- the level of consumer demand, including seasonal fluctuations;
- refinery overcapacity or undercapacity;
- our ability to successfully integrate any acquired businesses into our operations;
- the actions taken by competitors, including both pricing and adjustments to refining capacity in response to market conditions;
- the level of competitors' imports into markets that we supply;
- accidents, unscheduled shutdowns, or other catastrophes affecting our refineries, machinery, pipelines, equipment, and information systems, or those of our suppliers or customers;

Table of Contents

- changes in the cost or availability of transportation for feedstocks and refined products;
- the price, availability, and acceptance of alternative fuels and alternative-fuel vehicles;
- the levels of government subsidies for ethanol and other alternative fuels;
- delay of, cancellation of, or failure to implement planned capital projects and realize the various assumptions and benefits projected for such projects or cost overruns in constructing such planned capital projects;
- earthquakes, hurricanes, tornadoes, and irregular weather, which can unforeseeably affect the price or availability of natural gas, crude oil, grain and other feedstocks, and refined products and ethanol;
- rulings, judgments, or settlements in litigation or other legal or regulatory matters, including unexpected environmental remediation costs, in excess of any reserves or insurance coverage;
- legislative or regulatory action, including the introduction or enactment of legislation or rulemakings by governmental authorities, including tax and environmental regulations, such as those to be implemented under the California Global Warming Solutions Act (also known as AB 32) and the United States (U.S.) Environmental Protection Agency's (EPA) regulation of greenhouse gases, which may adversely affect our business or operations;
- changes in the credit ratings assigned to our debt securities and trade credit;
- changes in currency exchange rates, including the value of the Canadian dollar, the pound sterling, and the euro relative to the U.S. dollar; and
- overall economic conditions, including the stability and liquidity of financial markets.

Any one of these factors, or a combination of these factors, could materially affect our future results of operations and whether any forward-looking statements ultimately prove to be accurate. Our forward-looking statements are not guarantees of future performance, and actual results and future performance may differ materially from those suggested in any forward-looking statements. We do not intend to update these statements unless we are required by the securities laws to do so.

All subsequent written and oral forward-looking statements attributable to us or persons acting on our behalf are expressly qualified in their entirety by the foregoing. We undertake no obligation to publicly release any revisions to any such forward-looking statements that may be made to reflect events or circumstances after the date of this report or to reflect the occurrence of unanticipated events.

Table of Contents

## OVERVIEW AND OUTLOOK

## Overview

For the second quarter of 2013, we reported net income attributable to Valero stockholders of \$466 million, or \$0.85 per share (assuming dilution), compared to \$831 million, or \$1.50 per share (assuming dilution), for the second quarter of 2012.

The decrease in net income attributable to Valero stockholders of \$365 million was primarily due to the decrease of \$553 million in our operating income as outlined by business segment in the following table (in millions):

	Three Months Ended June 30,		
	2013	2012	Change
Operating income (loss) by business segment:			
Refining	\$921	\$1,364	\$(443 )
Retail	39	172	(133 )
Ethanol	95	5	90
Corporate	(247 )	(180 )	(67 )
Total	\$808	\$1,361	\$(553 )

The \$443 million decrease in refining segment operating income in the second quarter of 2013 compared to the second quarter of 2012 was primarily due to lower refining margins in each of our regions. The decrease in refining margins was the result of significantly lower discounts for sour crude oils, higher costs of biofuel credits (primarily Renewable Identification Numbers (RINs) needed to comply with the U.S. federal Renewable Fuel Standard (RFS)), and higher natural gas costs.

On May 1, 2013, we completed the separation of our retail business, creating an independent public company named CST Brands, Inc. (CST), and as a result, we no longer operate a retail business. Therefore, retail segment operating income for the second quarter of 2013 reflects the operations of our former retail business for only the month of April 2013, which is the primary reason for the \$133 million decrease in retail segment operating income in the second quarter of 2013 compared to the second quarter of 2012. The separation of our retail business is more fully discussed in Note 2 of Condensed Notes to Consolidated Financial Statements.

Our ethanol segment operating income in the second quarter of 2013 increased \$90 million compared to the second quarter of 2012 due to higher gross margins per gallon and higher production volumes. Ethanol prices increased quarter over quarter due to a decrease in the supply of ethanol resulting from lower industry production volumes throughout 2012 and the first quarter of 2013. Demand for ethanol, however, remained consistent and drove the increase in ethanol prices as supplies were decreasing. We increased our production of ethanol in the second quarter of 2013 to capture the improved economics of higher gross margins per gallon during the quarter.

For the first six months of 2013, we reported net income attributable to Valero stockholders of \$1.1 billion, or \$2.03 per share (assuming dilution), compared to \$399 million, or \$0.72 per share (assuming dilution), for the first six months of 2012.

Table of Contents

The increase in net income attributable to Valero stockholders of \$721 million was primarily due to the increase of \$752 million in our operating income as outlined by business segment in the following table (in millions):

	Six Months Ended June 30,		
	2013	2012	Change
Operating income (loss) by business segment:			
Refining	\$2,133	\$1,245	\$888
Retail	81	212	(131 )
Ethanol	109	14	95
Corporate	(454 )	(354 )	(100 )
Total	\$1,869	\$1,117	\$752

The results for the first six months of 2012 were significantly impacted by asset impairment losses of \$611 million primarily related to our Aruba Refinery, which are further discussed in Note 3 of Condensed Notes to Consolidated Financial Statements. Excluding these noncash asset impairment losses, total operating income for the first six months of 2012 would have been \$1.7 billion and the increase in total operating income and refining segment operating income in the first six months of 2013 compared to the first six months of 2012 would have been \$141 million and \$277 million, respectively.

The \$277 million increase in refining segment operating income in the first six months of 2013 compared to the first six months of 2012 was primarily due to higher refining margins in most of our regions, which resulted from improved gasoline and distillate margins. These improvements, however, were negatively impacted by higher costs of biofuel credits (primarily RINs in the U.S.), and higher natural gas costs during the second quarter of 2013. The \$131 million decrease in retail segment operating income in the first six months of 2013 compared to the first six months of 2012 was primarily due to the separation of our retail business on May 1, 2013, as previously discussed, and the reasons for the \$95 million increase in ethanol segment operating income between the six-month periods are also consistent with those previously discussed.

**Outlook**

During 2011, 2012 and the first quarter of 2013, our refining segment benefited from processing heavy sour crude oils (such as Maya crude oil) due to the favorable discounts between the price of this type of crude oil and the price of Brent crude oil. Because the market for refined products generally tracks the price of Brent crude oil, which is a benchmark sweet crude oil, we benefit when we process crude oils that are priced at a discount to Brent crude oil. During the second quarter of 2013, the discount in the price of heavy sour crude oils compared to the price of Brent crude oil narrowed significantly and negatively impacted our refining margins. For the remainder of 2013, we expect the discounts on heavy sour crude oils to improve as heavy Canadian crude oils are transported into the U.S. Gulf Coast region and increased offshore production in the U.S. Gulf Coast is anticipated. Energy markets and margins are volatile, and we expect them to continue to be volatile in the near to mid-term.

We are obligated to blend biofuels into the products we produce, and because we are unable to blend biofuels at the applicable rates, we must purchase biofuel credits (primarily RINs in the U.S.) in the open market and are therefore exposed to the volatility in the market price of these credits. During the first six months of 2013, the market price of RINs increased significantly, resulting in higher costs. As further discussed in Note 13 of Condensed Notes to Consolidated Financial Statements, the cost of meeting our obligations under various biofuel blending compliance programs was \$267 million for the first six months of 2013. We estimate that the cost of meeting our obligation for the full year of 2013 will be between \$600 million and \$800 million based on recent prices for these biofuel credits and our estimate of the expected purchase requirement.

We continue to evaluate forming a master limited partnership for our portfolio of logistics assets.

Operating expenses	0.32	0.28	0.04
Depreciation and amortization expense	0.03	0.03	—
Total operating costs per gallon of production	0.35	0.31	0.04
Operating income per gallon of production	\$0.30	\$0.01	\$0.29

See note references below.

The following notes relate to references on pages 39 through 43.

- On May 1, 2013, we completed the separation of our retail business to CST. This transaction is more fully discussed in Note 2 of Condensed Notes to Consolidated Financial Statements. As a result and effective May 1, 2013, our results of operations no longer include those of CST, except for our share of CST's results of operations (a) associated with the equity interest in CST retained by us, which is reflected in "other income (expense), net" in the three months ended June 30, 2013. The nature and significance of our post-separation participation in the supply of motor fuel to CST represents a continuation of activities with CST for accounting purposes. As such, the historical results of operations related to CST have not been reported as discontinued operations in the statements of income. Throughput margin per barrel represents operating revenues less cost of sales of our refining segment divided by (b) throughput volumes. Gross margin per gallon of production represents operating revenues less cost of sales of our ethanol segment divided by production volumes.
- (c) Other products primarily include petrochemicals, gas oils, No. 6 fuel oil, petroleum coke, sulfur, and asphalt.

- The regions reflected herein contain the following refineries: the U.S. Gulf Coast region includes the Aruba, Corpus Christi East, Corpus Christi West, Houston, Meraux, Port Arthur, St. Charles, Texas City, and Three Rivers (d) Refineries; the U.S. Mid-Continent region includes the Ardmore, McKee, and Memphis Refineries; the North Atlantic region includes the Pembroke and Quebec City Refineries; and the U.S. West Coast region includes the Benicia and Wilmington Refineries.

## General

Operating revenues decreased \$628 million (or 2 percent) in the second quarter of 2013 compared to the second quarter of 2012 primarily as a result of lower average refined product prices between the two periods related to our refining segment operations. Operating income decreased \$553 million in the second quarter of 2013 compared to the second quarter of 2012 primarily due to a \$443 million decrease in refining segment operating income, a \$133 million decrease in retail segment operating income, and a \$62 million increase in general and administrative expenses. These decreases in operating income, however, were partially offset by a \$90 million increase in ethanol segment operating income. The reasons for these changes in the operating results of our segments and general and administrative expenses, as well as other items that affected our income, are discussed below.

Table of Contents

Refining

Refining segment operating income decreased \$443 million from \$1.4 billion in the second quarter of 2012 to \$921 million in the second quarter of 2013 due to a \$374 million decrease in refining margin, a \$38 million increase in operating expenses, and a \$31 million increase in depreciation and amortization expense.

Refining margin decreased \$374 million (a \$1.37 per barrel decrease) for the second quarter of 2013 compared to the second quarter of 2012 primarily due to the following:

Lower discounts on heavy sour crude oils - Because the market for refined products generally tracks the price of Brent crude oil, which is a benchmark sweet crude oil, we benefit when we process crude oils that are priced at a discount to Brent crude oil. During the second quarter of 2013, the discount in the price of heavy sour crude oils compared to the price of Brent crude oil narrowed significantly. For example, Maya crude oil, which is a sour crude oil, sold at a discount of \$5.46 per barrel to Brent crude oil during the second quarter of 2013 compared to a discount of \$9.86 per barrel during the second quarter of 2012, representing an unfavorable decrease of \$4.40 per barrel. Therefore, the lower discount on the sour crude oils we processed negatively impacted our refining margin. We estimate that the decrease in the discounts for heavy sour crude oils that we processed had a negative impact to our refining margin of approximately \$195 million, quarter versus quarter.

Higher costs of biofuel credits - As more fully described in Note 13 of Condensed Notes to Consolidated Financial Statements, we must purchase biofuel credits in order to meet our biofuel blending obligations under various government and regulatory compliance programs, and the cost of these credits (primarily RINs in the U.S.) increased by \$78 million from \$59 million in the second quarter of 2012 to \$137 million in the second quarter of 2013. This increase was due to an increase in the market price of RINs caused by an ongoing expectation in the market of a shortage in available RINs by early next year when the RFS requires increased volumes of biofuel to be blended into refined products and a resulting increase in demand for RINs.

Higher natural gas prices - During the second quarter of 2013, natural gas prices increased to an average market price of \$4.00 per mmBtu from \$2.24 per mmBtu in the second quarter of 2012, resulting in an increase in natural gas costs and a corresponding decrease in our refining margin of approximately \$57 million. Natural gas prices increased in 2013 due to a reduced supply of natural gas combined with the expected increase in demand from power generation plants as they switch from coal to natural gas. We use natural gas as a feedstock to produce hydrogen that is used in the refining process; therefore, the cost of natural gas impacts our refining margin as well as our operating expenses, which are discussed below.

The increase of \$38 million in operating expenses was primarily due to a \$50 million increase in energy costs related to higher natural gas costs and an \$18 million increase in maintenance expenses due to higher maintenance activities in the second quarter of 2013 related to outages at our Meraux and Port Arthur Refineries. These increases were partially offset by a \$23 million decrease in operating expenses incurred by our Aruba Refinery, whose operations were suspended in March 2012.

The increase of \$31 million in depreciation and amortization expense was due to additional depreciation expense associated with new capital projects that began operating subsequent to the second quarter of 2012, consisting primarily of the new hydrocracker at our Port Arthur Refinery that began operating in late 2012.

Table of Contents

Retail

Retail segment operating income was \$39 million for the second quarter of 2013 compared to \$172 million for the second quarter of 2012. The \$133 million decrease was primarily due to the separation of our retail business on May 1, 2013, which is more fully described in Note 2 of Notes to Consolidated Financial Statements. As a result of the separation, retail segment operating income for the second quarter of 2013 reflects the operations of our former retail business for only the month of April 2013.

Ethanol

Ethanol segment operating income was \$95 million in the second quarter of 2013 compared to \$5 million in the second quarter of 2012. The \$90 million increase in operating income was primarily due to a \$108 million increase in gross margin (a \$0.33 per gallon increase), partially offset by a \$17 million increase in operating expenses. Gross margin increased primarily due to higher ethanol prices combined with increased ethanol production volumes between the second quarter of 2012 and the second quarter of 2013. Ethanol prices increased quarter over quarter due to a decrease in the supply of ethanol in the market. The decrease in supply resulted from reduced production in 2012 and early 2013 as the industry responded to a narrowing of gross margins, which were due to higher corn prices primarily caused by the drought in the corn-producing regions of the U.S. Mid-Continent that began in the second quarter of 2012. By the first quarter of 2013, ethanol inventory levels in the U.S. had declined to their lowest level in over three years and as a result, prices increased significantly beginning late in the first quarter of 2013. These price increases and increased demand resulted in higher production volumes, and our production volumes increased by 156,000 gallons per day between the comparable periods.

The \$17 million increase in operating expenses during the second quarter of 2013 was due to a \$17 million increase in energy costs primarily resulting from higher natural gas prices during the second quarter of 2013.

Corporate Expenses and Other

General and administrative expenses increased \$62 million from the second quarter of 2012 to the second quarter of 2013 primarily due to \$52 million of environmental and legal reserves that were recorded in the second quarter of 2013 and \$30 million for transaction costs related to the separation of our retail business on May 1, 2013. These increases were partially offset by decreases in various other miscellaneous expenses.

“Interest and debt expense, net of capitalized interest” for the second quarter of 2013 increased \$4 million from the second quarter of 2012. This increase was primarily due to an \$8 million decrease in capitalized interest due to a corresponding decrease in capital expenditures, partially offset by a \$13 million favorable impact from the decrease in average borrowings between the quarters.

Income tax expense decreased \$176 million from the second quarter of 2012 to the second quarter of 2013 mainly as a result of lower income before income tax expense. Income tax expense for the three months ended June 30, 2013 also included \$9 million incurred as a result of the separation of our retail business on May 1, 2013.

## Retail and Ethanol Operating Highlights

(millions of dollars, except per gallon amounts)

	Six Months Ended June 30,		
	2013	2012	Change
Retail:			
Operating income	\$81	\$212	\$(131 )
Ethanol:			
Operating income	\$109	\$14	\$95
Production (thousand gallons per day)	3,112	3,415	(303 )
Gross margin per gallon of production (c)	\$0.55	\$0.33	\$0.22
Operating costs per gallon of production:			
Operating expenses	0.32	0.28	0.04
Depreciation and amortization expense	0.04	0.03	0.01
Total operating costs per gallon of production	0.36	0.31	0.05
Operating income per gallon of production	\$0.19	\$0.02	\$0.17

See note references below.

The following notes relate to references on pages 46 through 50.

- On May 1, 2013, we completed the separation of our retail business to CST. This transaction is more fully discussed in Note 2 of Condensed Notes to Consolidated Financial Statements. As a result and effective May 1, 2013, our results of operations no longer include those of CST, except for our share of CST's results of operations (a) associated with the equity interest in CST retained by us, which is reflected in "other income (expense), net" in the six months ended June 30, 2013. The nature and significance of our post-separation participation in the supply of motor fuel to CST represents a continuation of activities with CST for accounting purposes. As such, the historical results of operations related to CST have not been reported as discontinued operations in the statements of income. Asset impairment losses for the six months ended June 30, 2012 include a \$595 million loss on the write down of the Aruba Refinery and a \$16 million loss related to equipment associated with a permanently cancelled capital project at another refinery. The asset impairment loss related to the Aruba Refinery resulted from our decision in March 2012 to suspend refining operations at the refinery. Subsequently, in September 2012, we suspended (b) refining operations indefinitely and reorganized the refinery into a crude oil and refined products terminal; however, we continue to maintain the refining assets to allow them to be restarted and do not consider them abandoned. The total asset impairment loss of \$611 million (\$605 million after taxes) is reflected in refining segment operating income for the six months ended June 30, 2012, but it is excluded from operating costs per barrel and operating income per barrel for the refining segment and U.S. Gulf Coast region. Throughput margin per barrel represents operating revenues less cost of sales of our refining segment divided by (c) throughput volumes. Gross margin per gallon of production represents operating revenues less cost of sales of our ethanol segment divided by production volumes.
- (d) Other products primarily include petrochemicals, gas oils, No. 6 fuel oil, petroleum coke, and asphalt. The regions reflected herein contain the following refineries: the U.S. Gulf Coast region includes the Corpus Christi East, Corpus Christi West, Texas City, Houston, Three Rivers, St. Charles, Aruba, Port Arthur, and Meraux (e) Refineries; the U.S. Mid-Continent region includes the McKee, Ardmore, and Memphis Refineries; the North Atlantic region includes the Pembroke and Quebec City Refineries; and the U.S. West Coast region includes the Benicia and Wilmington Refineries.

Table of Contents

General

Operating revenues decreased \$2.3 billion (or 3 percent) in the first six months of 2013 compared to the first six months of 2012 primarily as a result of lower average refined product prices between the two periods related to our refining segment operations. However, operating income increased \$752 million in the first six months of 2013 compared to the first six months of 2012 primarily due to an \$888 million increase in refining segment operating income and a \$95 million increase in ethanol segment operating income, partially offset by a \$131 million decrease in retail segment operating income and a \$74 million increase in general and administrative expenses. The reasons for these changes in the operating results of our segments and general and administrative expenses, as well as other items that affected our income, are discussed below.

Refining

Refining segment operating income increased \$888 million from \$1.2 billion in the first six months of 2012 to \$2.1 billion in the first six months of 2013. This increase, however, was largely the result of \$611 million in asset impairment losses in the first six months of 2012 primarily related to our Aruba Refinery, which is more fully described in Note 3 of Condensed Notes to Consolidated Financial Statements. Excluding the prior year asset impairment losses, refining segment operating income increased \$277 million due to a \$279 million increase in refining margin and a \$50 million decrease in operating expenses, partially offset by a \$52 million increase in depreciation and amortization expense.

Refining margin increased \$279 million (a \$0.72 per barrel increase) in the first six months of 2013 compared to the first six months of 2012, primarily due to the following:

Increase in gasoline and distillate margins - We experienced improved gasoline and distillate margins throughout all our regions for the first six months of 2013 compared to the first six months of 2012. For example, the WTI-based benchmark reference margin for U.S. Mid-Continent conventional 87 gasoline was \$24.97 per barrel for the first six months of 2013 compared to \$22.80 per barrel for the first six months of 2012, representing a favorable increase of \$2.17 per barrel. In addition the WTI-based benchmark reference margin for U.S. Mid-Continent ultra-low-sulfur diesel (a type of distillate) was \$32.39 per barrel for the first six months of 2013 as compared to \$29.03 per barrel for the first six months of 2012, representing a favorable increase of \$3.36 per barrel. We estimate that the increases in gasoline and distillate margins per barrel in the first six months of 2013 compared to the first six months of 2012 had a positive impact to our refining margin of approximately \$130 million and \$400 million, respectively, for all refining regions.

Higher costs of biofuel credits - As more fully described in Note 13 of Condensed Notes to Consolidated Financial Statements, we must purchase biofuel credits in order to meet our biofuel blending obligation under various government and regulatory compliance programs, and the cost of these credits (primarily RINs in the U.S.) increased by \$141 million from \$126 million for the first six months of 2012 to \$267 million in the first six months of 2013. This increase was due to an increase in the market price of RINs caused by an ongoing expectation in the market of a shortage in available RINs by early next year when the RFS requires increased volumes of biofuel to be blended into refined products and a resulting increase in demand for RINs.

Higher natural gas prices - During the first six months of 2013, natural gas prices increased to an average market price of \$3.72 per mmBtu from \$2.32 per mmBtu in the first six months of 2012, resulting in an increase in natural gas costs and a corresponding decrease in our refining margin of approximately \$83 million. Natural gas prices increased in 2013 due to a reduced supply of natural gas combined with the expected increase in demand from power generation plants as they switch from coal to natural gas. We use natural gas as a feedstock to produce hydrogen that is used in the refining process; therefore, the

## Table of Contents

cost of natural gas impacts our refining margin as well as our operating expenses, which are discussed below.

The decrease of \$50 million in operating expenses was primarily due to a \$65 million decrease in operating expenses incurred by the Aruba Refinery, whose operations were suspended in March 2012, a \$41 million decrease in maintenance expenses due to higher maintenance activities in the first quarter of 2012, and a \$43 million decrease in insurance and other expense primarily due to a \$32 million decrease in insurance reserves related to the favorable settlement of a lawsuit. These decreases were partially offset by a \$111 million increase in energy costs related to higher natural gas costs.

The increase of \$52 million in depreciation and amortization expense was due to additional depreciation expense associated with new capital projects that began operating subsequent to the second quarter of 2012, consisting primarily of the new hydrocracker at our Port Arthur Refinery that began operating in late 2012.

### Retail

Retail segment operating income was \$81 million for the first six months of 2013 compared to \$212 million for the first six months of 2012. The \$131 million decrease was primarily due to the separation of our retail business on May 1, 2013, which is more fully described in Note 2 of Notes to Consolidated Financial Statements. As a result of the separation, retail segment operating income for the first six months of 2013 reflects the operations of our former retail business for the first four months of 2013.

### Ethanol

Ethanol segment operating income was \$109 million in the first six months of 2013 compared to \$14 million in the first six months of 2012. The \$95 million increase in operating income was primarily due to a \$104 million increase in gross margin (a \$0.22 per gallon increase), partially offset by a \$7 million increase in operating expenses.

Gross margin increased primarily due to higher ethanol prices between the first six months of 2012 and the first six months of 2013. Gross margin per gallon was \$0.55 per gallon for the first six months of 2013 compared to \$0.33 per gallon for the first six months of 2012. Ethanol prices increased period over period due to a decrease in the supply of ethanol in the market. The decrease in supply resulted from reduced production in 2012 and early 2013 as the industry responded to a narrowing of gross margins, which were due to higher corn prices primarily caused by the drought in the corn-producing regions of the U.S. Mid-Continent that began in the second quarter of 2012. By the first quarter of 2013, ethanol inventory levels in the U.S. had declined to their lowest level in over three years and as a result, prices increased significantly beginning late in the first quarter of 2013. These price increases and increased demand resulted in higher industry production volumes. Despite the increase in production that occurred during the second quarter of 2013, our ethanol production decreased 303,000 gallons per day in the first six months of 2013 compared to the first six months of 2012 because three plants that were idled during the last half of 2012 did not restart production until late in the first quarter of 2013.

The \$7 million increase in operating expenses during the first six months of 2013 compared to the first six months of 2012 was primarily due to an increase in energy costs compared to the first six months of 2012 resulting from the higher natural gas prices during the first six months of 2013.

### Corporate Expenses and Other

General and administrative expenses increased \$74 million from the first six months of 2012 to the first six months of 2013 primarily due to \$52 million of environmental and legal reserves that were recorded in the second quarter of 2013 and \$30 million for transaction costs related to the separation of our retail business

Table of Contents

on May 1, 2013. These increases were partially offset by decreases in various other miscellaneous expenses. The increase in corporate depreciation and amortization expense was primarily due to \$20 million of losses incurred on the sale of certain corporate property.

“Interest and debt expense, net of capitalized interest” for the first six months of 2013 decreased \$12 million from the first six months of 2012. This decrease was primarily due to a \$26 million favorable impact from the decrease in average borrowings and a \$12 million write-off of unamortized debt discounts related to the early redemption of certain industrial revenue bonds in the first quarter of 2012, partially offset by a \$20 million decrease in capitalized interest due to a corresponding decrease in capital expenditures between the two periods.

Income tax expense increased \$69 million from the first six months of 2012 to the first six months of 2013 mainly as a result of higher income before income tax expense. However, the variation in the customary relationship between income tax expense and income before income tax expense for the six months ended June 30, 2012 was primarily due to not recognizing the tax benefits associated with the asset impairment loss of \$595 million related to the Aruba Refinery as we did not expect to realize a tax benefit from these losses. Income tax expense for the six months ended June 30, 2013 also included \$9 million incurred as a result of the separation of our retail business on May 1, 2013.

**LIQUIDITY AND CAPITAL RESOURCES****Cash Flows for the Six Months Ended June 30, 2013 and 2012**

Net cash provided by operating activities for the first six months of 2013 of \$2.8 billion was generated primarily from operating income discussed above under “RESULTS OF OPERATIONS” combined with favorable changes in current assets and current liabilities. Net cash provided by operating activities for the first six months of 2012 was also \$2.8 billion and was generated from operating income excluding the asset impairment losses combined with favorable changes in current assets and current liabilities. The changes in cash provided by or used in working capital during the first six months of 2013 and 2012 are shown in Note 11 of Condensed Notes to Consolidated Financial Statements.

The net cash provided by operating activities combined with \$735 million of net cash received in connection with the separation of our retail business (consisting of \$550 million of proceeds on short-term debt, a \$500 million cash distribution from CST less \$315 million of cash retained by CST) were used mainly to:

- fund \$1.7 billion of capital expenditures and deferred turnaround and catalyst costs;
- make scheduled long-term note repayments of \$480 million;
- purchase common stock for treasury of \$560 million;
- pay common stock dividends of \$220 million; and
- increase available cash on hand by \$675 million.

The net cash provided by operating activities during the first six months of 2012 combined with \$160 million of proceeds on a note receivable related to the sale of the Paulsboro Refinery, \$300 million of proceeds from the remarketing of the 4.0% Gulf Opportunity Zone Revenue Bonds Series 2010, \$1.1 billion in borrowings under our revolving credit facility, and \$1.3 billion of proceeds from the sale of receivables under our accounts receivable sales facility were used mainly to:

- fund \$1.7 billion of capital expenditures and deferred turnaround and catalyst costs;
- redeem our Series 1997 5.6%, Series 1998 5.6%, Series 1999 5.7%, Series 2001 6.65%, and Series 1997A 5.45% industrial revenue bonds for \$108 million;
- make scheduled long-term note repayments of \$754 million;
- repay borrowings under our revolving credit facility of \$1.1 billion;

## Table of Contents

make a repayment under our accounts receivable sales facility of \$1.5 billion;  
purchase common stock for treasury of \$147 million;  
pay common stock dividends of \$166 million; and  
increase available cash on hand by \$271 million.

### Capital Investments

Our operations, especially those of our refining segment, are highly capital intensive. Each of our refineries comprises a large base of property assets, consisting of a series of interconnected, highly integrated and interdependent crude oil processing facilities and supporting logistical infrastructure (Units), and these Units are improved continuously. The cost of improvements, which consist of the addition of new Units and betterments of existing Units, can be significant. We have historically acquired our refineries at amounts significantly below their replacement costs, whereas our improvements are made at full replacement value. As such, the costs for improving our refinery assets increase over time and are significant in relation to the amounts we paid to acquire our refineries. We plan for these improvements by developing a multi-year capital program that is updated and revised based on changing internal and external factors.

We make improvements to our refineries in order to maintain and enhance their operating reliability, to meet environmental obligations with respect to reducing emissions and removing prohibited elements from the products we produce, or to enhance their profitability. Reliability and environmental improvements generally do not increase the throughput capacities of our refineries. Improvements that enhance refinery profitability may increase throughput capacity, but many of these improvements allow our refineries to process different types of crude oil and refine crude oil into products with higher market values. Therefore, many of our improvements do not increase throughput capacity significantly.

During the six months ended June 30, 2013, we expended \$1.2 billion for capital expenditures and \$449 million for deferred turnaround and catalyst costs. Capital expenditures for the six months ended June 30, 2013 included \$40 million of costs related to environmental projects.

For 2013, we expect to incur approximately \$2.85 billion for capital investments of which approximately \$100 million is for environmental projects and approximately \$650 million is for deferred turnaround and catalyst costs. The capital expenditure estimate excludes expenditures related to strategic business acquisitions. We continuously evaluate our capital budget and make changes as conditions warrant.

### Contractual Obligations

As of June 30, 2013, our contractual obligations included debt, capital lease obligations, operating leases, purchase obligations, and other long-term liabilities. There were no material changes outside the ordinary course of our business with respect to these contractual obligations during the six months ended June 30, 2013.

As of June 2013, we had an accounts receivable sales facility with a group of third-party entities and financial institutions to sell eligible trade receivables on a revolving basis up to \$1.5 billion. In July 2013, we amended this facility to extend the maturity date to July 2014.

Table of Contents

Our debt and financing agreements do not have rating agency triggers that would automatically require us to post additional collateral. However, in the event of certain downgrades of our senior unsecured debt to below investment grade ratings by Moody's Investors Service, Standard & Poor's Ratings Services, and Fitch Ratings, the cost of borrowings under some of our bank credit facilities and other arrangements would increase. All of our ratings on our senior unsecured debt are at or above investment grade level as follows:

Rating Agency	Rating
Moody's Investors Service	Baa2 (stable outlook)
Standard & Poor's Ratings Services	BBB (negative outlook)
Fitch Ratings	BBB (stable outlook)

We cannot provide assurance that these ratings will remain in effect for any given period of time or that one or more of these ratings will not be lowered or withdrawn entirely by a rating agency. We note that these credit ratings are not recommendations to buy, sell, or hold our securities and may be revised or withdrawn at any time by the rating agency. Each rating should be evaluated independently of any other rating. Any future reduction below investment grade or withdrawal of one or more of our credit ratings could have a material adverse impact on our ability to obtain short- and long-term financing and the cost of such financings.

**Other Commercial Commitments**

As of June 30, 2013, we had outstanding letters of credit under our committed lines of credit as follows (in millions):

	Borrowing Capacity	Expiration	Outstanding Letters of Credit
Letter of credit facilities	\$ 550	June 2014	\$ 250
Revolving credit facility	\$ 3,000	December 2016	\$ 59
Canadian revolving credit facility	C\$50	November 2013	C\$9

As of June 30, 2013, we had no amounts borrowed under our revolving credit facilities. The letters of credit outstanding as of June 30, 2013 expire during 2013 and 2014.

**Other Matters Impacting Liquidity and Capital Resources****Pension Plan Funded Status**

In February 2013, we announced amendments to certain of our pension plans that reduced our benefit costs and obligations for 2013 and future years, as further discussed in Note 8 of Condensed Notes to Consolidated Financial Statements. As a result of these plan amendments, management reduced its discretionary contributions to our pension plans by \$100 million, resulting in expected contributions to our pension plans of \$45 million for 2013. In addition, we plan to contribute approximately \$21 million to our other postretirement benefit plans during 2013.

**Stock Purchase Programs**

As of June 30, 2013, we have approvals under common stock purchase programs to purchase approximately \$3.0 billion of our common stock.

## Table of Contents

### Environmental Matters

Our operations are subject to extensive environmental regulations by governmental authorities relating to the discharge of materials into the environment, waste management, pollution prevention measures, greenhouse gas emissions, and characteristics and composition of gasolines and distillates. Because environmental laws and regulations are becoming more complex and stringent and new environmental laws and regulations are continuously being enacted or proposed, the level of future expenditures required for environmental matters could increase in the future. In addition, any major upgrades in any of our operating facilities could require material additional expenditures to comply with environmental laws and regulations. See Note 6 of Condensed Notes to Consolidated Financial Statements for a further discussion of our environmental matters.

### Tax Matters

As of June 30, 2013, the Internal Revenue Service (IRS) has ongoing tax audits related to our U.S. federal tax returns from 2002 through 2009. We have received Revenue Agent Reports in connection with all of these audits, and we are vigorously contesting certain tax positions and assertions from the IRS. We have made significant progress during the six months ended June 30, 2013 in resolving certain of these matters with the IRS and have agreed to settle the audit related to the 2004 and 2005 tax years for a group of our subsidiaries. We expect to finalize the settlement agreement within the next six months for an amount consistent with the recorded amount of unrecognized tax benefits associated with that audit. We are continuing to work with the IRS to resolve the remaining matters and we believe that they will also be resolved for amounts that do not exceed the recorded amounts of unrecognized tax benefits associated with these matters. As of June 30, 2013, the total amount of unrecognized tax benefits was \$386 million, with \$8 million reflected in "income taxes payable" and \$378 million reflected in "other long-term liabilities", and this total amount did not change significantly during the six months ended June 30, 2013. We do not believe that settlement agreements related to the remaining audits will be finalized and that cash will be paid to the IRS in connection with such settlements within the next 12 months, but the complexity of these matters makes it difficult to predict the timing of their resolution. Should we ultimately settle for amounts consistent with our estimates, we believe that we will have sufficient cash on hand at that time to make such payments.

### Cash Held by Our International Subsidiaries

We operate in countries outside the U.S. through subsidiaries incorporated in these countries, and the earnings of these subsidiaries are taxed by the countries in which they are incorporated. We intend to reinvest these earnings indefinitely in our international operations even though we are not restricted from repatriating such earnings to the U.S. in the form of cash dividends. Should we decide to repatriate such earnings, we would incur and pay taxes on the amounts repatriated. In addition, such repatriation could cause us to record deferred tax expense that could significantly impact our results of operations. We believe, however, that a substantial portion of our international cash can be returned to the U.S. without significant tax consequences through means other than a repatriation of earnings. As of June 30, 2013, \$995 million of our cash and temporary cash investments was held by our international subsidiaries.

### Financial Regulatory Reform

In July 2010, President Obama signed into law the Dodd-Frank Wall Street Reform and Consumer Protection Act (Wall Street Reform Act). Key provisions of the Wall Street Reform Act create new statutory requirements that require most derivative instruments to be traded on exchanges and routed through clearinghouses, as well as impose new recordkeeping and reporting responsibilities on market participants. While certain final rules implementing the Wall Street Reform Act became effective in the fourth quarter of 2012, others continue to become effective in 2013 and 2014. Although we cannot predict the ultimate impact of these rules, which may result in higher clearing costs and more reporting requirements with respect to our derivative activities, we believe they will not have a material impact on our financial position, results of operations, or liquidity.

Table of Contents

Concentration of Customers

Our refining and marketing operations have a concentration of customers in the refining industry and customers who are refined product wholesalers and retailers. These concentrations of customers may impact our overall exposure to credit risk, either positively or negatively, in that these customers may be similarly affected by changes in economic or other conditions. However, we believe that our portfolio of accounts receivable is sufficiently diversified to the extent necessary to minimize potential credit risk. Historically, we have not had any significant problems collecting our accounts receivable.

Sources of Liquidity

We believe that we have sufficient funds from operations and, to the extent necessary, from borrowings under our credit facilities, to fund our ongoing operating requirements. We expect that, to the extent necessary, we can raise additional funds from time to time through equity or debt financings in the public and private capital markets or the arrangement of additional credit facilities. However, there can be no assurances regarding the availability of any future financings or additional credit facilities or whether such financings or additional credit facilities can be made available on terms that are acceptable to us.

CRITICAL ACCOUNTING POLICIES

The preparation of financial statements in accordance with U.S. generally accepted accounting principles requires us to make estimates and assumptions that affect the amounts reported in our financial statements and accompanying notes. Actual results could differ from those estimates. Our critical accounting policies are disclosed in our annual report on Form 10-K for the year ended December 31, 2012.

Table of Contents

## Item 3. Quantitative and Qualitative Disclosures About Market Risk

## COMMODITY PRICE RISK

We are exposed to market risks related to the volatility in the price of crude oil, refined products (primarily gasoline and distillate), grain (primarily corn), and natural gas used in our operations. To reduce the impact of price volatility on our results of operations and cash flows, we use commodity derivative instruments, including swaps, futures, and options to hedge:

inventories and firm commitments to purchase inventories generally for amounts by which our current year inventory levels (determined on a last-in, first-out (LIFO) basis) differ from our previous year-end LIFO inventory levels and forecasted feedstock and refined product purchases, refined product sales, natural gas purchases, and corn purchases to lock in the price of those forecasted transactions at existing market prices that we deem favorable.

We use the futures markets for the available liquidity, which provides greater flexibility in transacting our hedging and trading operations. We use swaps primarily to manage our price exposure. We also enter into certain commodity derivative instruments for trading purposes to take advantage of existing market conditions related to future results of operations and cash flows.

Our positions in commodity derivative instruments are monitored and managed on a daily basis by a risk control group to ensure compliance with our stated risk management policy that has been approved by our board of directors.

The following sensitivity analysis includes all positions at the end of the reporting period with which we have market risk (in millions):

	Derivative Instruments Held For	
	Non-Trading	Trading
	Purposes	Purposes
June 30, 2013:		
Gain (loss) in fair value resulting from:		
10% increase in underlying commodity prices	\$(157	) \$(9
10% decrease in underlying commodity prices	154	(11
December 31, 2012:		
Gain (loss) in fair value resulting from:		
10% increase in underlying commodity prices	(131	) (9
10% decrease in underlying commodity prices	135	(1

See Note 13 of Condensed Notes to Consolidated Financial Statements for notional volumes associated with these derivative contracts as of June 30, 2013.

Table of Contents

## INTEREST RATE RISK

The following table provides information about our debt instruments, excluding capital lease obligations (dollars in millions), the fair values of which are sensitive to changes in interest rates. Principal cash flows and related weighted-average interest rates by expected maturity dates are presented. We had no interest rate derivative instruments outstanding as of June 30, 2013 or December 31, 2012.

	June 30, 2013						There- after	Total	Fair Value
