The Alternative Energy Business

Arcadian's major asset is the Altamont Wind Generation Facility, which is an existing electricity generation facility located on approximately 4000 acres in the Altamonte Pass, east of San Francisco, CA (the "Wind Farm"). The Wind Farm has approximately 1300 wind turbines at present which were installed in the 1980's, approximately 600 of which are still operable. The Wind Farm will have to be re-powered in order to make its operation economically feasible. The Company plans to re-power the Wind Farm with new 950 KW state-of-the-art turbines. The Wind Farm is zoned and permitted for up to 114 megawatts, and the infrastructure includes the wind turbines, 300 miles of transmission lines, a 150 MW substation and an interconnection to the PG&E grid. The ground leases extend to 2036 with options to renew. The cost to produce electricity is approximately 4.5 cents per KWH, and is eligible for up to 3.5 cents of tax credits. Sale price of the electricity should be in the range of 6.9 cents per KWH with annual revenue in the \$5 Million range without calculating green tickets or tax credits and other incentives.

The Company is in the planning stages to re-power and activate its Wind Farm. In 2003, Pacific Gas and Electric Company emerged from Chapter 11 Reorganization proceedings thereby eliminating one obstacle to re-powering the Wind Farm. However, the State of California has not yet established regulations for the re-powering of wind farms pursuant to California's Renewals Portfolio Standard law ("RPS"). The Company is working with industry groups to obtain RPS implementation rules critical to the success of wind energy

Sun Electronics is conducting Photovoltaics research and development and other solar and energy related technologies.

Sun Volt is currently engaged in the sale and construction of alternative energy products and power from generators and other sources of co-generation and the development and the sale of coal recourses discussed below under the heading "The Coal Business".

First Washington earns fees on the origination of real estate mortgage loans in the Washington D. C. area and, until December 31, 2004, in California's Central Valley through its branch office Yosemite Mortgage. First Washington specializes in residential mortgage loans. First Washington has seven full time employees. First Washington obtains customers through direct contact by telephone, the internet and referrals from existing customers.

The Real Estate Business

Opportunity Knocks is in the business of acquiring, refurbishing and selling real estate. Initially, Opportunity Knocks will utilize the expertise and some of the employees of First Washington to operate its business. Opportunity Knocks specializes in acquiring, refurbishing and selling of HUD properties. Opportunity Knocks will utilize the HUD gifting program to attract first time home buyers who might not otherwise be able to qualify for a home mortgage. Opportunity Knocks shares office space with First Washington.

The Coal Business

The Company determined in 2004 that coal would be a profitable commodity in the energy sector in future years because of the increased prices and demand resulting from public and private utilities modifying their power plants from natural gas to coal. The United States Produces in excess of 50% of it's electricity from coal and will continue to do so well into the future and coal

Edgar Filing: KORE HOLDINGS, INC - Form 10KSB

will continue to be used for furnace heating in the manufacture of cement and other products. The Company is negotiating a number of coal acquisitions and projects. The Company has determined that the most profitable segment of the industry is the reclamation of coal fines that are estimated at over 2 Billion tons.

The real property and coal is in the heart of the Western Illinois coal fields, commonly known as the " Western Coal District" including all of Knox, Stark, Peoria, and Fulton Counties. These fields have been recognized as the earliest and largest known coal-bearing regions in the United States. They were part of the once active Truax-Traer Mining Company lands, when during the active mining period from 1920 to the middle 1940's, all coal materials mined that were less than two inches in size were considered coal fines and were then deposited on the site. The Truax company also brought in coal fines from other remote mining activities in a ten mile radius of the Fiatt site and deposited them in the "coal" piles on the Fiatt acreage. This method of coal fines disposal accounts for the massive deposits of recoverable coal reserves on the property. The Company will market the coal through its subsidiary Sun Volt. The company determined in 2004 that coal would be a profitable commodity in the energy sector in future years because of the increased prices and demand resulting from public and private utilities modifying their power plants from natural gas to coal. The United States Produces in excess of 50% of its electricity from coal and will continue to do so and coal will continue to be used for furnace heating in the manufacture of cement and other products. The Company is negotiating a number of other coal acquisitions and projects. The Company has determined that the most profitable segment of the industry is the reclamation of coal fines that are estimated at over 2 Billion tons. There are a number of environmental and permitting issues that need to be resolved by the Company before coal can be shipped from the site. These issues are currently being addressed but no definitive timetable for clearance has yet been released by the State of Illinois. The Company is currently updating an engineering study which will enable the issuance of site permits and reclamation bond in order to start shipments and processing of the coal.

In that regard, during 2003, it disposed of two of its subsidiary branch offices which were under performing. The Company believes it will be successful in increasing revenue and reducing all costs in the future. However, there can be no assurance that the Company will be successful in doing this.

The Company is actively seeking to expand its mortgage business by opening additional branch offices.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Stockholders of
Kore Holdings, Inc., and Subsidiaries
Oakhurst, California

We have audited the accompanying consolidated balance sheets of Kore Holdings, Inc., and subsidiaries, (formerly Volt Inc. and Subsidiaries), (the "Company") as of September 30, 2005 and the related consolidated statements of operations, changes in stockholders' equity (deficit), and cash flows for the years then ended. These consolidated financial statements are the responsibility of management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit

Edgar Filing: KORE HOLDINGS, INC - Form 10KSB

includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall consolidated financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Kore Holdings, Inc., and subsidiaries, (formerly Volt Inc., and subsidiaries) as of September 30, 2005, and the consolidated results of its operations, changes in stockholders' equity (deficit), and cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

Effective March 31, 2001, Deerbrook Publishing Group, Inc. entered into an agreement to spin off its subsidiaries; Inter Arts, Inc. and Cimmaron Studios, Inc. As of March 31, 2001, the Company ceased its printing and publishing business and the shares of stock of its former operating subsidiaries were distributed to certain shareholders. The Company did not spin off Deerbrook Publishing, Deerbrook Publishing changed its name to Volt, Inc. when on April 6, 2001, Denis C. Tseklenis acquired 127,995 shares of the company's common stock, \$.001 par value per share, which constituted approximately 53% of the company's issued and outstanding common stock for \$255,000 and there was a change in control. At this time, the Company effected a 1 for 100 reverse stock split for its \$.001 par value common stock.

In May 2001, Mr. Tseklenis sold shares of stock of Arcadian Renewable Power, which owns the wind farm to the Company in exchange for 1,000,000 shares of Preferred Convertible Stock. The wind farm had a historical value of \$5,700,000.

On May 17, 2002, the Company acquired First Washington Financial Corporation, a company that provides financial services in Bethesda, Maryland ("First Washington"). First Washington is a mortgage company whose emphasis lies in residential mortgages in the greater Washington D.C. service area. The combination was treated as a purchase with First Washington becoming a wholly owned subsidiary of Volt, Inc. Volt, Inc. recognized an intangible asset (goodwill) which represented the amount of value received over the net assets acquired. The operations of First Washington are included in the consolidated statements of income for the year ended September 30, 2002 from the date of inception May 17, 2002 to September 30, 2002. There was no predecessor entity of First Washington. The fair value of the transaction was recorded based on the number of shares issued to First Washington (2,000,000) at the fair value of the stock of Volt on the date of acquisition net of a discount since the stock issued in the acquisition was restricted stock (\$1.50). The cost of the net assets purchased and liabilities assumed approximated zero, however, the value of \$3,000,000 is based on the mortgage company's future earnings.

The Company has acquired Opportunity Knocks, LLC. during the third fiscal quarter of 2002 to rehab HUD homes and other properties in Washington, D.C., Maryland and Virginia under the HUD Gift Program. This acquisition was done simultaneously with the acquisition of First Washington, and Opportunity Knocks is a wholly owned subsidiary of the Company.

NOTE 2- SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Recent Accounting Pronouncement

On October 3, 2001, the FASB issued Statement of Financial Accounting Standards No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets" ("SFAS 144"), that is applicable to financial statements issued for fiscal years beginning after December 15, 2001. The FASB's new rules on asset impairment supersede SFAS 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of" and portions of Accounting Principles Board Opinion 30, "Reporting the Results of Operations." This Standard provides a single accounting model for long-lived assets to be disposed of and significantly changes the criteria that would have to be met to classify an asset as held-for-sale. Classification as held-for-sale is an important distinction since such assets are not depreciated and are stated at the lower of fair value and carrying amount. This Standard also requires expected future operating losses from discontinued operations to be displayed in the period(s) in which the losses are incurred, rather than as of the measurement date presently required. The Company has reclassified the 2004 Statement of Operations and Cash Flows in accordance with the FASB.

On December 16, 2004, FASB issued Statement of Financial Accounting Standards No. 153, Exchanges of Non-monetary Assets, an amendment of APB Opinion No. 29, Accounting for Non-monetary Transactions (" SFAS 153"). This statement amends APB Opinion 29 to eliminate the exception for non-monetary exchanges of similar productive assets and replaces it with a general exception for exchanges of non-monetary assets that do not have commercial substance. Under SFAS 153, if a non-monetary exchange of similar productive assets meets a

Edgar Filing: KORE HOLDINGS, INC - Form 10KSB

commercial-substance criterion and fair value is determinable, the transaction must be accounted for at fair value resulting in recognition of any gain or loss. SFAS 153 is effective for non-monetary transactions in fiscal periods that begin after June 15, 2005. The Company does not anticipate that the implementation of this standard will have a material impact on its financial position, results of operations or cash flows.
