(Mark One)

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2007

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____
Commission file number: 001-32958

Crystal River Capital, Inc.

(Exact name of registrant as specified in its charter)

Maryland
(State or other jurisdiction of incorporation or organization)

20-2230150
(I.R.S. Employer Identification No.)

**Three World Financial Center,
200 Vesey Street, 10th Floor
New York, New York**
(Address of principal executive offices)

10281-1010
(Zip Code)

Registrant's telephone number, including area code: **(212) 549-8400**

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Common Stock, \$0.001 par value	New York Stock Exchange
Securities registered pursuant to Section 12(g) of the Act: None	

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer
(Do not check if a smaller
reporting company)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

MARKET VALUE

The aggregate market value of the outstanding common stock held by non-affiliates of the registrant was approximately \$553.3 million as of June 29, 2007 based on the closing sale price on the New York Stock Exchange on that date and the outstanding common stock as of the date hereof.

OUTSTANDING STOCK

As of March 12, 2008, there were 24,704,945 outstanding shares of common stock. The common stock is listed on the New York Stock Exchange (trading symbol "CRZ").

DOCUMENTS INCORPORATED BY REFERENCE

Part III incorporates information by reference from the registrant's definitive proxy statement to be filed with the Securities and Exchange Commission (the "Commission") within 120 days after the close of the registrant's fiscal year.

EXPLANATORY NOTE

Except where the context suggests otherwise in this report, the terms "Crystal River," "we," "us" and "our" refer to Crystal River Capital, Inc. and its subsidiaries; "Hyperion Brookfield Crystal River" and "our Manager" refer to our external manager, Hyperion Brookfield Crystal River Capital Advisors, LLC; "Hyperion Brookfield" refers to Hyperion Brookfield Asset Management, Inc., the parent company of Hyperion Brookfield Crystal River; "Brookfield Sub-Advisor" refers to Brookfield Crystal River Capital L.P., a sub-advisor that has been retained by us and Hyperion Brookfield Crystal River; "Brookfield" refers to Brookfield Asset Management Inc., formerly known as Brascan Corporation, the indirect parent company of Hyperion Brookfield and Brookfield Sub-Advisor, together with its subsidiaries; and "Ranieri & Co." refers to Ranieri & Co., Inc., another sub-advisor that has been retained by us and Hyperion Brookfield Crystal River. References in this report to the rating of a debt security reflects the lowest of the credit ratings for such security issued by each of Fitch, Inc., Moody's Investors Service, Inc. and Standard & Poor's Ratings Services, a division of The McGraw-Hill Companies, Inc.

FORWARD-LOOKING INFORMATION

Some of the statements under "Risk Factors," "Business," "Management's Discussion and Analysis of Financial Condition and Results of Operations" and elsewhere in this Annual Report on Form 10-K constitute forward-looking statements. Forward-looking statements relate to expectations, beliefs, projections, future plans and strategies, anticipated events or trends and similar expressions concerning matters that are not historical facts. In some cases, you can identify forward-looking statements by terms such as "anticipate," "believe," "could," "estimate," "expect," "intend," "may," "plan," "goal," "objective," "potential," "project," "should," "will" and "would" or the negative of these terms or other comparable terminology.

The forward-looking statements are based on our beliefs, assumptions and expectations of our future performance, taking into account all information currently available to us. These beliefs, assumptions and expectations can change as a result of many possible events or factors, not all of which are known to us or are within our control. If a change occurs, the performance of our portfolio and our business, financial condition, liquidity and results of operations may vary materially from those expressed, anticipated or contemplated in our forward-looking statements. You should carefully consider these risks before you invest in our common stock, along with the following factors that could cause actual results to vary from our forward-looking statements:

the factors referenced in this report, including those set forth below in Item 1A and in "Item 1. Business" and "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations;"

general volatility of the securities markets in which we invest and the market price of our common stock;

changes in our business strategy;

availability, terms and deployment of capital;

availability of qualified personnel;

changes in our industry, interest rates, the debt securities markets or the general economy;

increased rates of default and/or decreased recovery rates on our investments;

increased prepayments of the mortgage and other loans underlying our mortgage-backed or other asset-backed securities;

changes in governmental regulations, tax law and rates and similar matters;

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

our expected financings and investments;

the adequacy of our cash resources and working capital;

changes in generally accepted accounting principles by standard-setting bodies;

availability of investment opportunities in real estate-related and other securities; and

the degree and nature of our competition.

PART I

Item 1. Business.

Crystal River is a Maryland corporation that invests in commercial real estate, real estate loans and instruments, real estate-related securities, such as commercial and residential mortgage-backed securities, and various other asset classes. Our objective is to generate sustainable current income and long-term capital appreciation to our investors. To achieve this objective, we currently are investing primarily in commercial real estate, whole mortgage loans, junior interests in mortgage loans known as B Notes, mezzanine loans, commercial mortgage-backed securities, or CMBS, mortgage-backed securities issued by U.S. Government sponsored agencies, or Agency MBS, and non-Agency residential mortgage-backed securities, or non-Agency RMBS. We also have invested in and intend in the future to invest in diversified asset-backed securities, or ABS, including aircraft and consumer obligations, and collateralized debt obligations, or CDOs. Finally, we have made and intend to continue to make selective debt and/or equity investments in certain alternative assets, which may include power generating facilities, timber and private equity funds managed by certain of our affiliates that invest in such assets, to diversify our portfolio and enhance our risk adjusted returns. We are externally managed and advised by wholly-owned subsidiaries of Brookfield. We have elected and qualified to be taxed as a real estate investment trust, or REIT, under the Internal Revenue Code since the 2005 tax year. To maintain our tax status as a REIT, we have distributed, and intend to continue to distribute, at least 90% of our taxable income, and have tailored our balance sheet investment program to originate or acquire loans and investments to produce a portfolio that meets the asset and income tests necessary to maintain qualification as a REIT.

We were organized on January 25, 2005 by Hyperion Brookfield, which may be deemed to be our promoter, and completed a private offering of our common stock in March 2005, in which we raised net proceeds of approximately \$405.6 million. In August 2006, we completed our initial public offering, in which we sold 7.5 million shares of our stock and raised net proceeds of \$158.6 million.

We currently target and expect to continue to target asset classes that provide consistent, stable risk-adjusted returns. We expect to continue to leverage our investments to enhance returns on our investments. We make portfolio allocation decisions based on various factors, including expected cash yield, relative value, risk-adjusted returns, current and projected credit fundamentals, current and projected macroeconomic considerations, current and projected supply and demand, credit and market risk concentration limits, liquidity, cost and availability of financing and hedging activities, as well as maintaining our REIT qualification and our exclusion from regulation under the Investment Company Act of 1940. These factors place significant limits on the amount of certain of our targeted investments such as private equity funds, non-real estate loans, aircraft and consumer ABS, non-real estate-related CDOs and other equity investments that we may include in our portfolio.

Our common stock, par value \$0.001 per share, which we refer to as the Common Stock, is traded on the New York Stock Exchange under the symbol "CRZ". We establish our dividend by analyzing the long-term sustainability of earnings given existing market conditions and the current composition of our portfolio. This includes an analysis of our credit loss assumptions, general level of interest rates and projected hedging costs.

We are managed by Hyperion Brookfield Crystal River Capital Advisors, LLC, which we refer to as the Manager, a subsidiary of Brookfield Asset Management Inc., a publicly traded (NYSE:BAM) asset management company with \$95 billion of assets under management at December 31, 2007. The Manager provides an operating platform that incorporates significant asset origination, risk management, and operational capabilities.

Beginning in 2007, we determined that we operate in two reportable segments: a Securities, Loans and Other segment and a Commercial Real Estate segment. See Note 18 to our consolidated financial

statements contained elsewhere herein for certain financial information relating to our segments for the year ended December 31, 2007.

Current market conditions continue to remain challenging. Recently, the market for Agency MBS has come under pressure from a few market participants' forced sales of significant amounts of highly-leveraged holdings, which in turn has caused a dip in market prices of Agency MBS and led to increased margin requirements from financing sources. Fundamentally, we believe the credit quality of such securities are implicitly backed by the U.S. Government, but we believe that the increased supply due to the de-leveraging of portfolios by our competitors could drive further selling pressure in the sector. With respect to the non-Agency RMBS market, we believe that the fundamentals have clearly changed for the worse. Prices on most securities other than Agency MBS continue to decline, but to a lesser extent than what was noted in the latter half of 2007. On the positive side, the U.S. Government has taken the initiative of lowering interest rates set by the Federal Reserve, which is expected to help reduce borrowing costs for individuals and corporations alike, and result in more stable earnings for financial institutions. While pricing for non-Agency RMBS assumes significant losses on securities, we believe that these government measures, combined with lower interest rates, are expected to help contain losses and enable banks and other financial institutions to recover from the aftermath of the credit crisis currently being experienced in the financial markets.

Our Manager

We are externally managed and advised by Hyperion Brookfield Crystal River, a wholly-owned subsidiary of Brookfield that was formed on January 25, 2005 solely for the purpose of serving as our manager, whose officers consist of investment professionals and employees of Hyperion Brookfield or one or more of its affiliates. As of December 31, 2007, Hyperion Brookfield Crystal River had no employees and we and Hyperion Brookfield Crystal River had no independent officers and were entirely dependent on Hyperion Brookfield for the day-to-day management of our operations. While our directors periodically review our investment guidelines and our investment portfolio, other than any investments involving our affiliates or our sub-advisors' affiliates or investments proposed by Brookfield Sub-Advisor, which they are required to review and approve prior to such investments being made, they do not review all of our proposed investments. Our officers, as employees of Hyperion Brookfield or one of its affiliates, have been delegated the responsibility to review and make investments consistent with our investment strategy. Hyperion Brookfield Crystal River did not have any experience managing a REIT prior to its entering into a management agreement with us and it currently does not provide management or other services to entities other than us. Prior to our formation, Hyperion Brookfield had no prior experience managing a REIT. Today, Hyperion Brookfield employs approximately 70 professionals and is dedicated to providing investment management services for institutional clients and mutual funds through the management of core fixed income portfolios as well as separately managed portfolios of RMBS, CMBS and ABS. As of December 31, 2007, Hyperion Brookfield and its affiliates managed approximately \$22.5 billion in assets for institutional clients, closed-end investment companies and CDOs.

We and our Manager believe that the most significant opportunities for out-performance exist between and within our target asset classes, as well as among individual investments. Our Manager will strive to identify and capitalize on relative value anomalies through the assessment of relationships between supply and demand, changes in interest rates and associated prepayment expectations, market volatility and investor trends. We and our Manager believe that, on a long-term basis, this investment approach will provide attractive risk-adjusted returns.

We believe our relationship with Brookfield, Hyperion Brookfield, our Manager and our sub-advisors provides us with substantial benefits in sourcing, underwriting and managing our investments. Our Manager is responsible for administering our business activities and day-to-day operations and uses the resources of Hyperion Brookfield to support our operations. We believe that our management agreement and

sub-advisory agreements provide us access to broad referral networks, experience in capital markets, credit analysis, debt structuring, hedging and asset management, as well as corporate operations and governance. Our Manager, together with our sub-advisors, has well-respected, established portfolio management resources for each of our targeted asset classes and an extensive, mature infrastructure supporting those resources. Our Manager's and our sub-advisors' portfolio management resources and infrastructure are fully scalable to service our company's activities. We also expect to benefit from our Manager's comprehensive risk management, which addresses not only the risks of portfolio loss, such as risks relating to price volatility, position sizing and leverage, but also the operational risks such as execution of transactions, clearing of transactions, recording of transactions, and monitoring of positions that can have major adverse impacts on investment programs.

Our Manager and our sub-advisors have senior management teams with extensive experience in identifying and financing, hedging and managing commercial real estate, real estate loans and instruments, and real estate-related securities, such as CMBS, Agency MBS and RMBS. Clifford Lai, our president and chief executive officer, also is the chairman of Hyperion Brookfield.

Our Manager is not obligated to dedicate certain of its employees exclusively to us nor is it obligated to dedicate any specific portion of its time to our business. Moreover, none of our Manager's employees are contractually dedicated to our Manager's obligations to us under our management agreement.

Our Investment Strategy

Relative Value Philosophy

Hyperion Brookfield Crystal River's investment strategy is consistent with Hyperion Brookfield's investment philosophy, which is predicated on the concept of relative value. We and Hyperion Brookfield believe that the most significant opportunities for out-performance exist between and within sectors, as well as among individual investments. The investment process begins with a macroeconomic assessment of the market. Included in the market assessment is the analysis of the interest rate environment, the phase of the real estate cycle, consumer credit trends, supply and demand relationships, as well as a review of any recently released or pending economic data. Hyperion Brookfield seeks to determine the relative merits of sectors by combining the analysis of historical relationships with the firm's anticipated outlook for the market. Portfolio managers evaluate fundamental and technical developments in each sector, along with current offerings, recent transactions and market clearing levels and yield spread levels to provide a relative value outlook. The portfolio manager will closely examine yield spread histories across sectors and yield spread histories within sectors, along with fundamental credit analyses and option-adjusted spread analyses to examine call features and options. Hyperion Brookfield's analytical platform is designed not only to identify technical and fundamental changes across sectors, but also to quantify whether such changes in relative

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

value are temporary, and therefore represent an investment opportunity, or are more permanent. This analysis is utilized to determine optimal areas to allocate credit risk in the portfolio across sectors and maturities and to maximize yield and total return expectations. The portfolio manager will analyze the risks of the various sectors, specifically, the outlook for delinquencies, housing affordability, consumer debt, collateral value appreciation, and loss severities for residential and commercial property. Hyperion Brookfield's investment philosophy has historically been successful at identifying and exploiting relative value opportunities over a complete market cycle.

The most important component of Hyperion Brookfield's relative value investment strategy is security selection, a process that is the result of both quantitative and qualitative inputs, as well as the experience of the portfolio managers. Members of the investment team, utilizing Hyperion Brookfield's proprietary analytics, determine the relative strengths of various securities based on applicable criteria such as issuer, issue, vintage, credit rating, structure, and geographic exposure. The security selection process focuses on four primary areas: the analysis of credit strength, the analysis of security structure, the determination of relative value, and a surveillance function. The analysis of credit strength entails the assessment of loan level attributes such as a security's loan-to-value ratio, ratios like borrower's debt to income, or debt coverage, and loan features and location, as well as trend level attributes such as vintage and issuer. Security structure involves the comprehensive examination of a security's structural attributes such as credit support, triggers, single asset, conduit, large loan, as well as its yield maintenance provisions and prepayment lock-outs. After these first two analyses, the relative value of a security versus other candidates is determined through the evaluation of such aspects as yield spread and liquidity. Finally, after purchase, a surveillance function begins that uses such analytical tools as Hyperion Brookfield's proprietary credit filters and shortfall model to determine whether a security continues to perform as expected.

Our objective is to provide attractive returns to our investors through a combination of dividends and capital appreciation. To achieve this objective, we opportunistically invest in a diversified investment portfolio of real estate securities and various other asset classes. We believe that this strategy permits us to be opportunistic and invest in those assets that generate attractive risk-adjusted returns, subject to maintaining our REIT status and exclusion from regulation under the Investment Company Act. Accordingly, we have not adopted policies that require us to establish or maintain any specific asset allocations, and our targeted allocations will vary from time to time as determined by our management team, subject to the oversight of our board of directors.

We benefit from the full range of experience and depth of resources developed by Hyperion Brookfield and its affiliates in managing approximately \$22.5 billion of assets as of December 31, 2007. We believe this experience allows us to create a diversified portfolio that will provide attractive returns to investors. We rely on Hyperion Brookfield's expertise in identifying assets within our target asset classes that will have limited price volatility risk, yet will provide consistent, stable margins. We expect to make portfolio allocation decisions based on various factors, including expected cash yield, relative value, risk-adjusted returns, current and projected credit fundamentals, current and projected macroeconomic considerations, current and projected supply and demand, credit and market risk concentration limits, liquidity, cost of financing and financing availability, as well as maintaining our REIT qualification and exclusion from regulation under the Investment Company Act.

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

Our Target Asset Classes

Our targeted asset classes and the principal investments we expect to make in each are as follows:

Asset Class	Principal Investments
Commercial Real Estate	Direct Property Ownership REIT Common and Preferred Stock investment Preferred Equity Investments Joint Ventures
Mortgages and Other Real Estate Debt	Mortgage Loans Bridge Loans B Notes Mezzanine Loans Land Loans Construction Loans Construction Mezzanine Loans
MBS	
CMBS	Investment Grade CMBS (Senior and Subordinated) Below-Investment Grade CMBS (Rated and Non-Rated)
Agency MBS	Agency Adjustable Rate Mortgages ("ARMs")
RMBS	Non-Agency ARMs Investment Grade RMBS Below-Investment Grade RMBS Non-Conforming Loans Other RMBS
Other asset-backed securities	CDOs Consumer ABS Aircraft ABS
Alternative Assets	Hydroelectric, Gas- and Coal-Fired Power Generating Facilities Timber Other Equity Investments

Our net investment income is generated primarily from the net spread, or difference, between the interest income we earn on our investment portfolio and the cost of our borrowings and hedging activities. Our net investment income will vary based upon, among other things, the difference between the interest rates earned on our various interest-earning assets and the borrowing costs of the liabilities used to finance those investments.

Although we intend to focus on the investments described above, our investment decisions depend on prevailing market conditions. We have not adopted any policy that establishes specific asset allocations among our targeted asset classes. As a result, we cannot predict the percentage of our assets that will be invested in each asset class or whether we will invest in other classes or investments. Our board of directors does not and will not review all of our proposed investments, but will review our

portfolio at least quarterly and will review our investment strategy and policies at least annually. We may change our investment strategy and policies and the percentage of assets that may be invested in each asset class, or in the case of securities, in a single issuer, without a vote of our stockholders.

The following discusses the principal investments we have made and that we expect to make.

Direct Real Property Ownership. We currently, and expect to continue to, make direct investments in income-producing commercial real estate either within or outside the United States. Such investments may include office, multi-family residential, retail and industrial properties. We may acquire ownership of commercial property that we will own and operate or otherwise acquire controlling and non-controlling interests in commercial property through joint ventures and similar arrangements. We currently expect to leverage our direct real estate investments in the range of three to eight times the amount of our equity allocated to the asset class. As of December 31, 2007, we had \$234.8 million of direct investments in real property. In connection with our direct real property ownership, we have recorded rent enhancement receivables totaling \$16.3 million as of December 31, 2007. Intangible assets and liabilities recorded in connection with our direct real property ownership totaled \$81.2 million and \$77.7 million, respectively, as of December 31, 2007.

Whole Mortgage Loans and Bridge Loans. We currently, and may continue to, originate or purchase whole loans secured by first mortgages which provide long-term mortgage financing to commercial property developers and owners that generally have maturity dates ranging from three to ten years. We also may originate or purchase first mortgage loans that provide interim or bridge financing until permanent mortgage financing can be obtained. The maturity dates on bridge loans are generally less than five years. In some cases, we may originate and fund a first mortgage loan with the intention of selling the senior tranche and retaining the B Note or mezzanine loan tranche. As of December 31, 2007, we had originated 2.9% of the aggregate principal amount of whole mortgage loans and bridge loans that we held. We currently, and expect to continue to, leverage our investments in whole mortgage loans and bridge loans in the range of zero to eight times the amount of our equity allocated to the asset class. As of December 31, 2007, we had approximately \$118.0 million in whole loans with a weighted average coupon rate of 5.73%.

Commercial Real Estate Subordinated Loans. We currently, and may continue to, invest in commercial real estate subordinated loans, which we refer to as B Notes, that may be rated by at least one nationally recognized rating agency. The subordination of a B Note typically is evidenced by an inter-creditor agreement with the holder of the related A Note. B Notes share certain credit characteristics with subordinated CMBS, in that both reflect an interest in a first mortgage and are subject to more credit risk with respect to the underlying mortgage collateral than the corresponding senior securities or the A Notes, as the case may be. As opposed to a typical CMBS secured by a large pool of mortgage loans, B Notes typically are secured by a single property, and the associated credit risk is concentrated in that single property. B Notes also share certain credit characteristics with second mortgages, in that both are subject to more credit risk with respect to the underlying mortgage collateral than the corresponding first mortgage or the A Note, as the case may be. We intend to continue to acquire B Notes in negotiated transactions with the originators, as well as in the secondary market. We currently expect to leverage our investments in B Notes in the range of zero to four times the amount of our equity allocated to the asset class. As of December 31, 2007, we had \$0 of investments in B Notes.

Mezzanine Loans. We currently, and may continue to, originate or purchase mezzanine loans which are subordinated to a first mortgage loan on a property and are senior to the borrower's equity in the property. These loans are made to the owner of the property and are secured by pledges of ownership interests in the property and/or the property owner. The mezzanine lender can foreclose on

the pledge interests and thereby succeed to ownership of the property subject to the lien of the first mortgage. As of December 31, 2007, we had purchased 100% of the aggregate principal amount of mezzanine loans that we held. We currently expect to continue to leverage our investments in mezzanine loans in the range of zero to three times the amount of our equity allocated to the asset class. As of December 31, 2007, we had \$31.9 million in mezzanine loans with a weighted average coupon rate of 9.78%.

Construction Loans and Construction Mezzanine Loans. We currently, and may continue to, originate, or acquire participations in, construction or rehabilitation loans on commercial properties that generally provide 85% to 90% of total project costs and are secured by first lien mortgages. Alternatively, we may make mezzanine loans to finance construction or rehabilitation where our security is subordinate to the first lien mortgage. Construction loans generally would provide us with fees and interest income at risk adjusted rates and potentially a percentage of net operating income or gross revenues from the property, payable to us on an ongoing basis, and a percentage of any increase in value of the property, payable upon maturity or refinancing of the loan. As of December 31, 2007, we had originated 100% of the aggregate principal amount of construction loans and construction mezzanine loans that we held, which includes those loans in which we participated in the original syndication. We currently expect to continue to leverage our investments in construction loans and construction mezzanine loans in the range of zero to four times the amount of our equity allocated to the asset class. As of December 31, 2007, we had approximately \$20.9 million in construction loans with a weighted average coupon rate of 12.49%.

Commercial Mortgage Backed Securities. We invest in CMBS that are secured by, or evidence ownership interests in, a single commercial mortgage loan, or a partial or entire pool of mortgage loans secured by commercial properties. These securities may be senior, subordinated, investment grade or non-investment grade. We expect the majority of our CMBS investments to be rated by at least one nationally recognized rating agency, and to consist of securities that are part of a capital structure or securitization where the rights of such class to receive principal and interest are subordinated to senior classes but senior to the rights of lower rated classes of securities. We currently, and intend to continue to, invest in CMBS that will yield high current interest income and where we consider the return of principal to be likely. We currently, and intend to continue to, acquire CMBS from private originators of, or investors in, mortgage loans, including savings and loan associations, mortgage banks, commercial banks, finance companies, investment banks and other entities. We expect to enter into interest rate swaps, futures, options or other strategies to reduce the impact of changes in interest and financing rates for these investments. We currently leverage our investments in CMBS in the range of zero to five times the amount of our equity allocated to the asset class. As of December 31, 2007, we had approximately \$399.4 million in CMBS with a weighted average coupon rate of 5.29%.

Agency Mortgage Backed Securities. We intend to continue to invest in Agency MBS. Agency MBS are securities that represent participations in, are secured by or payable from, mortgage loans secured by residential real property, which include agency mortgage pass-through certificates and agency collateralized mortgage obligations, or CMOs. We have entered into, and expect to continue to enter into, interest rate swaps, futures, options or other strategies to reduce the impact of changes in interest and financing rates for these investments. Adjustable rate mortgages, or ARMS, have interest rates that reset periodically, typically every six or 12 months. Because the interest rates on ARMS adjust periodically based on market conditions, ARMS tend to have interest rates that do not significantly deviate from current market rates. This, in turn, can cause ARMS to have less price sensitivity to interest rates. Hybrid ARMS have interest rates that have an initial fixed period (typically two, three, five, seven or ten years) and thereafter reset at regular intervals in a manner similar to traditional ARMS. The investment characteristics of pass-through MBS differ from those of traditional fixed-income securities. Mortgage prepayments are affected by factors including the level of interest rates,

general economic conditions, the location and age of the mortgage, and other social and demographic conditions. Generally, prepayments on pass-through MBS increase during periods of falling mortgage interest rates and decrease during periods of stable or rising mortgage interest rates. Reinvestment of prepayments may occur at higher or lower interest rates than the original investment, thus affecting the yield on our portfolio. We currently leverage our investments in Agency MBS in the range of up to 15 times the amount of our equity allocated to this asset class. As of December 31, 2007, we had approximately \$1,246.7 million in Agency MBS with a weighted average coupon rate of 5.62%.

Residential Mortgage Backed Securities. We currently own, and in the future may invest in, Non-Agency RMBS. Non-Agency MBS are debt obligations issued by special purpose vehicles which are backed by residential mortgage loans that generally are not eligible for agency purchase. Non-Agency RMBS generally are issued as CMOs and are backed by pools of whole mortgage loans. Non-Agency RMBS generally are securitized in senior and subordinated structures, or structured with one or more of the types of credit enhancement. We have entered into, and expect to continue to enter into, interest rate swaps, futures, options or other strategies to reduce the impact of changes in interest and financing rates for these investments. Adjustable rate mortgages, or ARMS, have interest rates that reset periodically, typically every six or 12 months. Because the interest rates on ARMS adjust periodically based on market conditions, ARMS tend to have interest rates that do not significantly deviate from current market rates. This, in turn, can cause ARMS to have less price sensitivity to interest rates. Hybrid ARMS have interest rates that have an initial fixed period (typically two, three, five, seven or ten years) and thereafter reset at regular intervals in a manner similar to traditional ARMS. The investment characteristics of pass-through RMBS differ from those of traditional fixed-income securities. Mortgage prepayments are affected by factors including the level of interest rates, general economic conditions, the location and age of the mortgage, and other social and demographic conditions. Generally, prepayments on pass-through RMBS increase during periods of falling mortgage interest rates and decrease during periods of stable or rising mortgage interest rates. Reinvestment of prepayments may occur at higher or lower interest rates than the original investment, thus affecting the yield on our portfolio. We leverage our RMBS investments in the range of zero to five times the amount of our equity allocated to the asset class. As of December 31, 2007, we had approximately \$168.4 million in RMBS with a weighted average coupon rate of 6.92%.

Preferred Equity Investments. We may make preferred equity investments in entities that directly or indirectly own income-producing commercial real estate. These preferred equity investments are not secured, but holders have priority relative to common equity holders on cash flow distributions and proceeds of capital events. In addition, preferred holders can often enhance their position and protect their equity position with lender-type covenants that limit the entity's activities and grant us the right to control the property after default subject to the lien of the first mortgage. We currently expect to leverage our preferred equity investments in the range of zero to five times the amount of our equity allocated to the asset class. As of December 31, 2007, we had \$0 in preferred equity investments.

REIT Common and Preferred Stock Investments. We may invest in public and private issuances of common and preferred stock issued by REITs. We currently expect to leverage our investments in REIT preferred stock in the range of zero to three times the amount of our equity allocated to the asset class, subject to applicable margin requirements. As of December 31, 2007, we had \$0 of investments in REIT common stock and REIT preferred stock.

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

Other Equity Investments. Subject to maintaining our qualification as a REIT, we also may invest from time to time in equity securities, which may or may not be related to real estate. These investments may include direct purchases of private equity as well as purchases of interests in private equity funds, which may be managed by affiliates of our Manager. We will follow a value-oriented investment approach and focus on the anticipated future cash flows generated by the underlying business, discounted by an appropriate rate to reflect both the risk of achieving those cash flows and the alternative uses for the capital to be invested. We will also consider other factors such as the strength of management, the liquidity of the investment, the underlying value of the assets owned by the issuer, and prices of similar or comparable securities. We currently expect that we may hold all, or at least a significant portion, of our other equity investments through our taxable REIT subsidiary, or TRS. To the extent that we do so, the income from such investments will be subject to corporate income tax. We currently expect to leverage our other equity investments in the range of zero to three times the amount of our equity allocated to the asset class. As of December 31, 2007, we had \$36.2 million of other equity investments.

Consumer Asset-Backed Securities. We have invested in, and may in the future continue to invest in, investment grade and non-investment grade consumer ABS. Consumer ABS are generally securities for which the underlying collateral consists of assets such as home equity loans, credit card receivables and auto loans. Aircraft ABS are generally collateralized by aircraft leases. Issuers of consumer and aircraft ABS generally are special purpose entities owned or sponsored by banks and finance companies, captive finance subsidiaries of non-financial corporations or specialized originators such as credit card lenders. We expect that a significant amount of the consumer and aircraft ABS that we hold at any time will be rated between A1/A and B1/B+ and will have an explicit rating from at least one nationally-recognized statistical rating agency. We currently expect to leverage our investments in consumer ABS in the range of zero to 15 times the amount of our equity allocated to the asset class. As of December 31, 2007, we had \$0 of investments in consumer ABS.

Collateralized Debt Obligations. We currently, and may continue to, invest in the debt and equity tranches of CDOs to gain exposure to corporate bonds, ABS and other instruments. Because of Hyperion Brookfield's experience in structuring and managing CDOs, we believe we have a competitive advantage in analyzing investment opportunities in CDOs. In general, CDOs are issued by special purpose vehicles that hold a portfolio of debt obligation securities. The CDO vehicle issues tranches of debt securities of different seniority, and equity to fund the purchase of the portfolio. The debt tranches are typically rated based on collateral quality, diversification and structural subordination. The equity securities issued by the CDO vehicle are the "first loss" piece of the CDO vehicle's capital structure, but they are also generally entitled to all residual amounts available for payment after the CDO vehicle's obligations to the debt holders have been satisfied. Some CDO vehicles are "synthetic," in which the credit risk to the collateral pool is transferred to the CDO vehicle by means of a credit derivative such as a credit default swap. We currently expect to leverage our investments in CDOs in the range of one to three times the amount of our equity allocated to the asset class. As of December 31, 2007, we had approximately \$0.7 million in preferred equity of CDOs.

Power and Timber. We may make investments in income-producing timber and power generation assets. These investments may be in the form of either debt or equity interests. We may acquire these investments directly or participate with others through the syndication of debt positions, or in partnerships with other investors in equity ownership. These investments may be made in Brookfield's major geographic focus, namely, the United States and Canada, or elsewhere. Investments in power generation may relate to electricity generating facilities, such as hydroelectric, gas- or coal-fired power generating facilities. Investments in timber may be through freehold or leasehold interests, and will vary with respect to timber type, including hardwood and softwood, and age distribution. We currently expect to leverage our power and timber investments in the range of zero to eight times the amount of our equity allocated to the asset class. As of December 31, 2007, we had \$0 of investments in power or timber.

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

Other Investments. As discussed above, we may invest opportunistically in other types of investments within Hyperion Brookfield's core competencies, including those discussed below.

High Yield Corporate Bonds, Investment Grade Corporate Bonds and Related Derivatives. High yield corporate bonds are debt obligations of corporations and other non-governmental entities rated below Baa or BBB. Investment grade corporate bonds are debt obligations of corporations and other non-governmental entities rated Baa/BBB or higher. To the extent we invest in these bonds, we expect that a material amount of the holdings will not be secured by mortgages or liens on assets. A substantial portion of the investment grade corporate bonds we hold may have an interest-only payment schedule, with the principal amount staying outstanding and at risk until the bond's maturity.

Government Bonds and Related Derivatives. We may invest in bonds issued or guaranteed by the U.S. government or any instrumentality thereof, as well as bonds of major non-U.S. governments and their instrumentalities. We may invest in these bonds both for cash management purposes and as part of hedging and arbitrage strategies that involve the use of interest rate derivatives, such as swaps, options, caps, floors and futures.

Other Fixed Income-Related Instruments. We may engage in the purchase and sale of derivative instruments, such as exchange-listed and over-the-counter put and call options on securities, financial futures, equity indices, and other financial instruments, either as outright investments, for hedging purposes or in connection with other strategies.

We likely will hold at least some of the corporate bonds, government bonds and derivative instruments in which we invest for strategic purposes through our TRS. To the extent that we do so, the income from such bonds and instruments will be subject to corporate income tax. As of December 31, 2007, we had approximately \$1.6 million in other investments.

Investment Sourcing

We recognize that investing in our targeted asset classes is highly competitive, and that Hyperion Brookfield Crystal River will compete with many other investment managers for profitable investment opportunities in these areas. Accordingly, we believe the ability to identify and source such opportunities is very important to our success, and distinguishes us from many REITs with a similar focus to ours. We think that the combined and complementary strengths of Hyperion Brookfield and Brookfield Sub-Advisor in this regard give us a competitive advantage over such REITs.

Hyperion Brookfield currently sources many of its clients' investments, and Hyperion Brookfield Crystal River sources many of our investments, through Hyperion Brookfield's close relationships with a large and diverse group of financial intermediaries, ranging from major investment banks and brokerage firms to specialty dealers and financial sponsors. On a combined basis, these firms extensively cover our targeted asset classes. Hyperion Brookfield also sources many investments from traditional sources, using proprietary deal screening procedures and credit analytics.

Brookfield has over 25 years of experience operating and investing in real estate, hydroelectric, gas- and coal-fired power generating facilities and timber assets. Based on its long history of ownership within these asset classes and its high transaction volume, we believe that Brookfield, as an owner/operator, has developed the specialized internal resources and expertise to properly evaluate opportunities in these asset classes and to manage them. We expect that Brookfield will, from time to time, through Brookfield Sub-Advisor, provide us with the opportunity to acquire assets from its extensive portfolio, to finance Brookfield's and its affiliates' portfolio assets and to co-invest with Brookfield and its affiliates in assets that meet our investment objective.

Investment Process

To evaluate, invest and manage our investments in commercial real estate, CMBS, RMBS and other ABS, Hyperion Brookfield Crystal River utilizes Hyperion Brookfield's proprietary analytical methods in performing scenario analysis to forecast cash flows and expected total returns under different interest rate and credit assumptions. Simulation analysis is also performed to provide a broader array of potential patterns of return over different interest rate and credit scenarios. Such analysis may be applied to individual securities or to an entire portfolio. Hyperion Brookfield Crystal River also performs relative value analyses of individual securities based on yield, credit rating, average life, expected duration and option-adjusted spreads. Other considerations in Hyperion Brookfield Crystal River's investment process include analysis of fundamental economic trends, suitability for investment by a REIT, consumer borrowing trends, home price appreciation and relevant regulatory developments.

Our investments in real estate assets and other alternative asset classes will be recommended and, if approved by our board of directors, closed and managed by Brookfield Sub-Advisor.

To evaluate, invest and manage investments in real estate, Brookfield Sub-Advisor, through its affiliates, will utilize its experience and strong track record as an operator of commercial properties. Relying on Brookfield's local presence in offices in the United States, Canada, Brazil and the United Kingdom, we expect that Brookfield Sub-Advisor is well positioned to underwrite and analyze real estate investments throughout North America, including the analysis of market conditions and building specific issues (including lease and structural analysis). Other considerations in the investment process will include valuation and analyses of economic conditions and demographic trends as well as supply and demand considerations.

To evaluate, invest and manage investments in hydroelectric, gas- and coal-fired power generating facilities, Brookfield Sub-Advisor, through its affiliates, will utilize its experience as an owner and operator of hydroelectric, gas- and coal-fired power generating facilities. With Brookfield's operations in Canada, the United States and Brazil, we expect that Brookfield Sub-Advisor is well-positioned to underwrite and analyze investment opportunities in these regions including an analysis of current market conditions and property specific issues, such as in the case of hydro-electric generating facilities, structural assessments of dams and generating facilities, water flows and water storage capability, water use agreements, and turbines. Other considerations in the investment process include, but are not limited to, an analysis of market supply and demand, and an evaluation of the relative competitiveness of the sources of supply in the market, including but not limited to, as applicable, nuclear, coal-fired, gas-fired, hydroelectric, wind and emerging alternative forms of electricity generation.

Brookfield, through its affiliates, owns and manages timber operations in Canada, the United States and Brazil. Relying on Brookfield's presence in these markets, we believe that Brookfield Sub-Advisor has the capability to underwrite and analyze investment opportunities for us. Considerations in the investment process include but are not limited to, the forest density, age and anticipated harvesting and silviculture costs.

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

Our Portfolio

As of December 31, 2007, we had a portfolio of approximately \$2.3 billion consisting primarily of Agency MBS, CMBS, commercial real estate and RMBS, as shown in the following chart:

	Carrying Value	Percent of Total Investments	Weighted Average			Constant Prepayment Rate(2)
			Coupon	Months to Reset(1)	Yield to Maturity	
(In thousands)						
Commercial MBS:						
Investment grade CMBS	\$ 182,227	8.1%	5.84%		11.57%	
Below investment grade CMBS	217,183	9.6	5.03		18.95	
Total Commercial MBS	399,410	17.7	5.29		15.58	
Agency MBS:						
3/1 hybrid adjustable rate	252,874	11.2	5.39	17.21	5.14	36.87%
5/1 hybrid adjustable rate	993,808	44.0	5.68	41.18	4.93	37.34
Total Agency MBS	1,246,682	55.2	5.62	36.30	4.98	37.24
Non-Agency Residential MBS:						
Non-Agency Prime MBS:						
Investment grade	13,657	0.6	5.53	45.17	10.99	27.03
Below investment grade	102,064	4.5	6.88	12.60	45.60	26.40
Total Non-Agency Prime MBS	115,721	5.1	6.79	14.88	41.51	26.44
Non-Agency Sub-prime MBS:						
Investment grade	18,983	0.8	6.79	4.17	125.15	32.01
Below investment grade	33,718	1.5	7.63	0.45	157.48	31.75
Total Non-Agency Sub-prime MBS	52,701	2.3	7.13	2.65	145.84	31.91
Total RMBS	168,422	7.4	6.92	10.17	74.16	28.55
CDO Preferred Stock	732	0.0				
Total Securities	1,815,246	80.3	5.69		13.73	
Real estate loans, net	170,780	7.6	7.46		6.31	
Commercial real estate, net	234,763	10.4				
Other investments	37,761	1.7	0.12		12.22	
Total investments	\$ 2,258,550	100.0%				

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

- (1) Represents number of months before conversion to floating rate.
- (2) Represents the estimated percentage of principal that will be prepaid over the next 12 months based on historical principal paydowns.

We have invested a substantial portion of our capital in Agency MBS pending the full implementation of our diversified investment strategy. The portion of our portfolio invested in Agency MBS is currently, and we expect it to continue to be, in the range of up to 75% of our assets, depending on factors such as relative value and our views on the credit fundamentals of commercial versus residential real estate, in an effort to create a more diversified, less correlated portfolio of investments, which may include investments in non-U.S. dollar denominated securities, subject to the availability of appropriate investment opportunities. However, our portfolio in its current form does not fully balance the interest rate or mark-to-market risks inherent in our MBS investments, and we will not be able to eliminate all of our portfolio risk through asset allocation. Future dividends and capital appreciation are not guaranteed. Our investments will depend on prevailing market conditions and trends. We have not adopted any policy that establishes specific asset allocations among our targeted asset classes, and our targeted allocations will vary from time to time. As a result, we cannot predict the percentage of our assets that will be invested in each asset class or whether we will invest in other classes or investments. We currently, and generally expect to continue to, incur total leverage of up to

five times the amount of our equity for most investments other than Agency MBS, which we anticipate we generally may lever up to 15 times the amount of our equity allocated to this asset class. Our overall long-term average portfolio leverage is four to six times the amount of our equity. We may change our investment strategy and policies and the percentage of assets that may be invested in each asset class, or in the case of securities, in a single issuer, without a vote of our stockholders.

As of December 31, 2007, we had entered into master repurchase agreements with various counterparties and as of such date, we had outstanding obligations under repurchase agreements with ten counterparties totaling approximately \$1,276.1 million with a weighted average borrowing rate of 5.03%. In addition to repurchase agreements, we rely on credit facilities with multiple counterparties for capital needed to fund our other investments, including a \$100 million secured revolving credit facility with an affiliate of our Manager that expires in May 2009. In November 2005, we closed our first CDO financing transaction, which we refer to as our CDO 2005-1 transaction and in January 2007, we closed our second CDO financing transaction, which we refer to as CDO 2006-1. We have no restriction on the amount of leverage that we may use.

As of December 31, 2007, we had hedged a portion of the liabilities financing our investment portfolio by entering into a combination of one-, two-, three-, five- and ten-year interest rate swaps and caps. The total notional par value of such swaps and caps was approximately \$1,079.3 million.

Risk Management

Risk management is a cornerstone of Hyperion Brookfield's portfolio management system and we believe these risk management capabilities distinguish us from many of our competitors. Through our management agreement with Hyperion Brookfield Crystal River, we benefit from Hyperion Brookfield's comprehensive risk management program, which addresses not only the risks of portfolio loss, such as risks relating to price volatility, position sizing and leverage, but also the operational risks that can have major adverse impacts on investment programs. Operational risks include execution of transactions, clearing of transactions, recording of transactions, position monitoring, supervision of traders, portfolio valuation, counterparty credit and approval, custodian relationships, trader authorization, accounting and regulatory.

Our Financing Strategy

Leverage Strategy. We use leverage to increase potential returns to our stockholders. We use leverage for the purpose of financing our portfolio and do not expect to speculate on changes in interest rates. However, our use of leverage may also have the effect of increasing losses when economic conditions are unfavorable. While we have identified our leverage targets for each principal investment detailed above, our investment policies require no minimum or maximum leverage and we may increase the amount of leverage we incur above our targeted range for individual asset classes. Our investment guidelines and our portfolio and leverage are periodically reviewed by our board of directors as part of their ongoing oversight of our Manager's activities and performance.

Hyperion Brookfield has broad experience in using leverage to enhance portfolio returns, and we believe this experience will help us enhance our returns. Hyperion Brookfield's leverage experience includes the following:

The CDOs that Hyperion Brookfield co-structures and manages are significantly leveraged vehicles. The principal amount of the debt securities issued by the CDOs is much greater than the equity tranches, which function as a "first loss" piece.

Hyperion Brookfield uses total return swaps, which are leveraged instruments, to enhance investment returns.

For its closed-end bond fund, Hyperion Brookfield trades various derivative instruments that are inherently leveraged, such as interest rate futures, options and swaps.

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

Repurchase Agreements. We finance certain of our MBS through the use of repurchase agreements. These agreements allow us to borrow against MBS we own. We sell our MBS to a counterparty and agree to repurchase the same MBS from the counterparty at a price equal to the original sales price plus an interest factor. These agreements are accounted for as debt, secured by the underlying assets. During the term of a repurchase agreement, we earn the principal and interest on the related MBS and pay interest to the counterparty.

Repurchase agreements are one of the primary vehicles we use to achieve our desired amount of leverage for our MBS. We intend to continue to maintain formal relationships with multiple counterparties for the purpose of obtaining financing on favorable terms. Our repurchase agreement counterparties are commercial and investment banks with whom we have agreements in place that cover the terms of our transactions.

As of December 31, 2007, we had entered into master repurchase agreements with various counterparties and as of such date, we had outstanding obligations under repurchase agreements with ten counterparties totaling approximately \$1,276.1 million with a weighted average borrowing rate of 5.03%.

Warehouse Facilities. In addition to repurchase agreements, we rely on credit facilities for capital needed to fund our other investments. These facilities, referred to as warehouse lines or warehouse facilities, are typically lines of credit from other financial institutions that we can draw from to fund our investments. Warehouse lines are typically collateralized loans made to investors who invest in securities and loans that in turn pledge the resulting securities and loans to the warehouse lender. Third party custodians, usually large banks, typically hold the securities and loans funded with the warehouse facility borrowings, including the securities, loans, notes, mortgages and other important loan documentation, for the benefit of the lender who is deemed to own the securities and loans and, if there is a default under the warehouse line, for the benefit of the warehouse lender.

The pool of assets in a warehouse facility typically must meet certain requirements, including term, average life, investment rating, agency rating and sector diversity requirements. There are also certain requirements relating to portfolio performance, including required minimum portfolio yield and limitations on delinquencies and charge-offs. Failure to comply with these requirements could result in either the need to post additional collateral or cancellation of the financing facility.

We intend to continue to maintain formal relationships with multiple counterparties for the purpose of maintaining warehouse lines on favorable terms to the extent such financing is available in the market.

As of December 31, 2007, we had no outstanding borrowings under warehouse lines. In August 2007, we entered into a \$100.0 million secured revolving credit facility with an affiliate of our Manager, in order to provide us with additional liquidity.

Term Financing CDOs. We intend to continue to finance certain of our assets using term financing strategies, including CDOs and other match-funded financing structures. CDOs are multiple class debt securities, or bonds, secured by pools of assets, such as mortgage-backed securities and corporate debt. Unlike typical securitization structures, the underlying assets may be sold, subject to certain limitations, without a corresponding pay-down of the CDO provided the proceeds are reinvested in qualifying assets. As a result, CDOs enable the sponsor to actively manage, subject to certain limitations, the pool of assets. We believe CDO financing structures, when available, may be an appropriate financing vehicle for our targeted non-residential real estate asset classes, because they will enable us to obtain long-term cost of funds and minimize the risk that we have to refinance our liabilities prior to the maturities of our investments while giving us the flexibility to manage credit risk and, subject to certain limitations, to take advantage of profit opportunities.

As of December 31, 2007, other than as discussed below with respect to our CDO 2005-1 and our CDO 2006-1 transactions, we had no outstanding borrowings under term financing structures.

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

On November 30, 2005, we closed a \$295.3 million private placement of CDOs, our first sponsored CDO financing. We invested the net proceeds from the financing in accordance with our investment objectives and strategies described in this report. In 2006 and 2007, we prepaid an aggregate of \$48.9 million of floating rate CDOs issued in the CDO 2005-1 transaction from the proceeds of real estate loans owned by CDO 2005-1 that were prepaid by the borrower, and from our available cash.

On January 17, 2007, we closed a \$339.6 million private placement of CDOs, our second sponsored CDO financing. We invested the net proceeds from the financing in accordance with our investment objectives and strategies described in this report.

Total Return Swaps. Subject to maintaining our REIT qualification, we may finance certain of our investments using total return swaps, which are swaps in which the non-floating rate side is based on the total return of an equity or fixed income instrument with a life longer than the swap. Total return swaps allow an investor to gain exposure to an underlying loan without actually owning the loan. In these swaps, the total return (interest, fees and capital gains/losses on an underlying loan) is paid to an investor in exchange for a floating rate payment. The investor pays a fraction of the value of the total amount of the loan that is referenced in the swap as collateral posted with the swap counterparty. The total return swap, therefore, is a leveraged investment in the underlying loan.

We generally enter into total return swaps with one-, two- or three-year maturities. Because swap maturities may not correspond with the maturities of the assets underlying the swap, we may wish to renew many of the swaps as they mature. However, there is a limited number of providers of such swaps, and there is no assurance the initial swap providers will choose to renew the swaps, and, if they do not renew, that we would be able to obtain suitable replacement providers.

Total return swaps will not be qualifying assets or produce qualifying income for purposes of the REIT asset and income tests. We may enter into total return swaps through a TRS, which may cause the income from such swaps to be subject to corporate income tax. As of December 31, 2007, we had not engaged in any total return swaps.

Our Hedging and Interest Rate Risk Management Strategy

Repurchase agreements generally have maturities of 30 to 90 days and the weighted average life of the RMBS we own is generally longer. The difference in maturities, in addition to reset dates and reference indices, creates potential interest rate risk.

We expect to utilize derivative financial instruments to hedge all or a portion of the interest rate risk associated with certain types of our borrowings. Under the federal income tax laws applicable to REITs, we generally will be able to enter into certain transactions to hedge indebtedness that we may incur, or plan to incur, to acquire or carry real estate assets, provided that our total gross income from such hedges and other non-qualifying sources must not exceed 25% of our total gross income.

We engage in a variety of interest rate management techniques that seek to mitigate changes in interest rates or potentially other influences on the values of our assets. Because of the tax rules applicable to REITs, we may be required to implement certain of these techniques through a TRS that is fully subject to corporate income taxation. However, no assurances can be given that these investment and leverage strategies can successfully be implemented. Our interest rate management techniques may include:

puts and calls on securities or indices of securities;

Eurodollar futures contracts and options on such contracts;

interest rate swaps and/or swaptions; and

other similar transactions.

These techniques may also be used in an attempt to protect us against declines in the market value of our assets that result from general trends in debt markets.

We may, from time to time, enter into interest rate swap agreements to offset the potential adverse effects of rising interest rates under certain short-term repurchase agreements. The interest rate swap agreements have historically been structured such that we receive payments based on a variable interest rate and make payments based on a fixed interest rate. The cost of such swap agreements is *de minimis* as these swaps often trade in a very liquid market and are based on the yield curve, and as the yield curve flattens, the swap agreements become accretive to our results from operations. The variable interest rate on which payments are received is calculated based on various reset mechanisms for LIBOR. The repurchase agreements generally have maturities of 30 to 90 days and carry interest rates that correspond to LIBOR rates for those same periods. The swap agreements effectively fix our borrowing cost and are not held for speculative or trading purposes. Interest rate management techniques do not eliminate risk but seek to mitigate interest rate risk.

As of December 31, 2007, we had hedged a portion of the liabilities related to our investment portfolio by entering into a combination of one-, two-, three-, five- and ten-year interest rate swaps and caps. The total notional par value of such swaps and caps was approximately \$1,079.3 million.

Resolution of Potential Conflicts of Interest in Allocation of Investment Opportunities

Hyperion Brookfield will abide by its conflicts of interest policy and thus will offer us the right to participate in all investment opportunities that it determines are appropriate for us in view of our investment objectives, policies and strategies and other relevant factors, subject to the exception that, in accordance with Hyperion Brookfield's conflict of interest policy described below, we might not participate in each such opportunity but will on an overall basis equitably participate with Hyperion Brookfield's other clients in all such opportunities. Hyperion Brookfield allocates investments to eligible accounts, including Crystal River, based on current demand according to the market value of the account (which is the amount of available capital that, consistent with such account's investment parameters, may be invested in a proposed investment). An account has current demand if it has positive market value. If the investment cannot fulfill the pro rata allocation or be allocated in marketable portions, the investment is allocated on a rotational basis to accounts with current demand, with an emphasis placed on those accounts that were excluded in prior allocations, but without any preference given to accounts based on their market value. The rotational system is determined by Hyperion Brookfield's investment committee and is overseen by its chief compliance officer to ensure fair and equitable investment allocation to all accounts in accordance with the Investment Advisers Act. As of December 31, 2007, Hyperion Brookfield managed 26 client accounts that had investment strategies that overlapped our investment strategy.

Unlike Hyperion Brookfield, Brookfield Sub-Advisor is not bound by Hyperion Brookfield's conflict of interest policy and thus is not obligated to offer us any specific investment opportunities. Any decision to do so will be entirely within Brookfield Sub-Advisor's discretion and it can be expected that some investments that are appropriate for us in view of our investment criteria will not be offered to us and will be made by affiliates of Brookfield without our participation.

Hyperion Brookfield historically has managed accounts with similar or overlapping investment strategies and has a conflict-resolution system in place so that we may share equitably with other Hyperion Brookfield client accounts in all investment opportunities, particularly those involving a security with limited supply, that may be suitable for our company and such other client accounts.

The chairman of Hyperion Brookfield's investment committee oversees its conflict-resolution system, and Hyperion Brookfield's chief compliance officer regularly monitors the procedural aspects of the program. The program places particular emphasis on the equitable allocation of scarce investment opportunities, which are situations where Hyperion Brookfield is unable to obtain the full amount of

the securities that it wishes to purchase for the relevant client accounts, such as newly-issued debt instruments.

In these situations, Hyperion Brookfield's policy is to first determine and document the amount of the security it wishes to purchase for each of the participating accounts, based on the size, objectives of the accounts, current client demand and other relevant factors. Hyperion Brookfield then places an order for the total of these amounts. If Hyperion Brookfield is able to obtain only partial execution of the order, its policy calls for the allocation of the purchased securities in the same proportion that it would have allocated a full execution of the order. The policy permits departure from such proportional allocation only if the allocation would result in an inefficiently small amount of the security being purchased for an account. In that case, the policy provides for a "rotational" protocol of allocating subsequent partial executions so that, on an overall basis, each account is treated equitably.

Other conflict-resolution policies of Hyperion Brookfield and the terms of our management agreement with Hyperion Brookfield Crystal River that will apply to the management of our company include controls for:

Split price executions These are situations where Hyperion Brookfield places an order for multiple clients and the order is executed at different prices. Hyperion Brookfield's policy is that the executions are to be allocated to the participating accounts so that each account receives the same average price.

Cross trades These are trades where Hyperion Brookfield places an order for a client account to buy (or sell) a particular security and places a simultaneous or virtually simultaneous order for another client account to sell (or buy) the same security. In such case, under Hyperion Brookfield's policies, the pair of transactions must be approved by the chairman of the investment committee and executed at the prevailing market price as determined by an independent broker-dealer.

Principal transactions Under the terms of our management agreement with Hyperion Brookfield Crystal River, we have agreed not to acquire an investment from, sell an investment to or make any co-investment with any proprietary account of Hyperion Brookfield, Brookfield or any of their respective affiliates, which we refer to as related persons, or any account advised by any related person, or borrow funds from or lend funds to any related person or invest in any investment vehicle advised by any related person unless the transaction is on terms no less favorable than can be obtained on an arm's length basis from unrelated third parties based on prevailing market prices, other reliable indicators of fair market value or an independent valuation or appraisal and has been approved in advance by a majority of our independent directors. If we invest in an investment vehicle advised by a related person, including, for example, a private investment fund managed by an affiliate of Brookfield, and the asset class of such investment is one that we are professionally staffed to underwrite, we expect, although no assurance can be given, that our Manager and/or such affiliate would waive any base and incentive management fees relating to such investment in excess of the base and incentive management fees that we would owe our Manager in respect of such investment had we made the investment directly and not through such affiliate.

Our Manager may engage other parties, including its affiliates or any of our sub-advisors and/or any of their respective affiliates, to provide services to us or our subsidiaries, including asset management, property management, leasing, financing and disposition and/or similar services customarily provided to a business similar to ours, provided that, such services are provided at market rates with standard market terms and, in the case of a sub-advisor or an affiliate of either our Manager or a sub-advisor, the party providing the services has sufficient qualifications and experience to perform the services at a level of quality comparable to non-affiliated service providers in the area, the cost to our Manager is no less favorable than can be obtained from an unrelated third party on an arm's

length basis and any such arrangements are approved in advance by a majority of our independent directors.

Policies with Respect to Certain Other Activities

If our board of directors determines that additional funding is required, we may raise such funds through additional offerings of equity or debt securities or the retention of cash flow (subject to provisions in the Internal Revenue Code concerning distribution requirements and the taxability of undistributed REIT taxable income) or a combination of these methods. In the event that our board of directors determines to raise additional equity capital, it has the authority, without stockholder approval, to issue additional common stock or preferred stock in any manner and on such terms and for such consideration as it deems appropriate, at any time.

We have not in the past but may in the future offer equity or debt securities in exchange for property and to repurchase or otherwise reacquire our shares and may engage in such activities in the future.

In addition, we have in the past and may in the future borrow money to finance the acquisition of investments. We intend to use traditional forms of financing, such as repurchase agreements and warehouse facilities. We also intend to utilize structured financing techniques, such as CDOs, to create attractively priced non-recourse financing at an all-in borrowing cost that is lower than that provided by traditional sources of financing and that provide long-term, floating rate financing. Our investment guidelines and our portfolio and leverage are periodically reviewed by our board of directors as part of their oversight of our Manager.

We have in the past and may in the future, subject to gross income and asset tests necessary for REIT qualification, invest in securities of other REITs, other entities engaged in real estate activities or securities of other issuers, we have not made in the past but may in the future make such investments for the purpose of exercising control over such entities.

We engage in the purchase and sale of investments. We have in the past and may in the future make loans to third parties in the ordinary course of business for investment purposes. We will not underwrite the securities of other issuers.

We intend to furnish our stockholders with annual reports containing consolidated financial statements audited by our independent registered public accounting firm, and we expect to file quarterly reports containing unaudited consolidated financial statements for each of the first three quarters of each fiscal year with the Commission.

Our board of directors may change any of these policies without prior notice to you or a vote of our stockholders.

Operating and Regulatory Structure

We have elected and qualified to be taxed as a REIT for federal income tax purposes commencing with our taxable year ended December 31, 2005 and expect to qualify as a REIT in subsequent tax years. Our qualification as a REIT will depend upon our ability to meet, on a continuing basis, various complex requirements under the Internal Revenue Code relating to, among other things, the sources of our gross income, the composition and values of our assets, our distribution levels and the concentration of ownership of our capital stock. We believe that we were organized and have operated in conformity with the requirements for qualification and taxation as a REIT under the Internal Revenue Code, and that our intended manner of operation will enable us to continue to meet the requirements for qualification and taxation as a REIT.

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

As a REIT, we generally will not be subject to federal income tax on the REIT taxable income that we distribute currently to our stockholders. If we fail to qualify as a REIT in any taxable year, we will be subject to federal income tax at regular corporate rates for that year and for the next four tax years (unless we satisfy the IRS that certain limited cure provisions apply). Even if we qualify for federal taxation as a REIT, we may be subject to some federal, state and local taxes on our income or property. Crystal River Capital TRS Holdings, Inc., our TRS, is a regular taxable corporation that is subject to federal, state and local income tax on its income.

Our investment activities are managed by Hyperion Brookfield Crystal River and supervised by our board of directors. In exchange for its services, we pay Hyperion Brookfield Crystal River an annual base management fee determined by our stockholders' equity but not by our performance, as well as an incentive management fee based on our performance.

We and Hyperion Brookfield Crystal River have retained Brookfield Sub-Advisor as a sub-advisor with respect to investments in mortgages and other real estate debt, real estate and other real estate-related, yield-oriented assets and Ranieri & Co. as a sub-advisor with respect to senior level guidance and relationships. Each sub-advisor evaluates potential investments, recommends suitable investments and, on our behalf, closes each investment approved by us and, in the case of certain transactions, the independent members of our board of directors.

Exclusion from Regulation Under the Investment Company Act

We intend to continue to operate our business so as to be excluded from regulation under the Investment Company Act. Because we conduct our business directly and through wholly-owned subsidiaries, we must ensure not only that we, but also each of our subsidiaries, qualify for an exclusion from regulation under the Investment Company Act.

For purposes of the ensuing discussion "we" and "our" refer to Crystal River Capital, Inc. alone and not its subsidiaries.

We are excluded from regulation under Section 3(c)(5)(C) of the Investment Company Act, a provision designed for companies that do not issue redeemable securities and are primarily engaged in the business of purchasing or otherwise acquiring mortgages and other liens on and interests in real estate. To qualify for this exemption, we will need to ensure that at least 55% of our assets consist of mortgage loans and other assets that are considered the functional equivalent of mortgage loans for purposes of the Investment Company Act, which we refer to as qualifying real estate assets, and that at least 80% of our assets consist of qualifying real estate assets and real estate-related assets. We do not intend to issue redeemable securities. We also may rely on an exclusion under Section 3(c)(6) of the Investment Company Act if, from time to time, we engage in our business through one or more majority-owned subsidiaries.

Based on no-action letters issued by the Division of Investment Management of the Commission, which we refer to as the Division, we classify our investment in residential mortgage loans as qualifying real estate assets, as long as the loans are "fully secured" by an interest in real estate. That is, if the loan-to-value ratio of the loan is equal to or less than 100%, then we consider the mortgage loan a qualifying real estate asset. We do not consider loans with loan-to-value ratios in excess of 100% to be qualifying real estate assets for the 55% test, but only real estate-related assets for the 80% test.

We also consider Agency MBS such as agency whole pool certificates to be qualifying real estate assets. An agency whole pool certificate is a certificate issued or guaranteed by Fannie Mae, Freddie Mac or Ginnie Mae that represents the entire beneficial interest in the underlying pool of mortgage loans. By contrast, an agency certificate that represents less than the entire beneficial interest in the underlying mortgage loans is not considered to be a qualifying real estate asset for purposes of the 55% test, but constitutes a real estate-related asset for purposes of the 80% test.

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

We will treat our ownership interest in pools of whole loan MBS, in cases in which we acquire the entire beneficial interest in a particular pool, as qualifying real estate assets based on no-action positions of the Division. As of December 31, 2007 such assets comprise in excess of 50.0% of our total assets. We generally do not expect our investments in CMBS and other RMBS investments to constitute qualifying real estate assets for the 55% test, unless such treatment is consistent with guidance of the Division or the Commission. Instead, these investments generally will be classified as real estate-related assets for purposes of the 80% test. We do not expect that our investments in CDOs, ABS, credit default swaps and total return swaps will constitute qualifying real estate assets, although we may treat our equity interests in a CDO issuer that we determine is a "majority owned subsidiary" and that is excluded from Investment Company Act regulation under Section 3(c)(5)(C) of the Investment Company Act as qualifying real estate assets, consistent with guidance of the Division and the Commission. Moreover, to the extent that these investments are not backed by mortgage loans or other interests in real estate, they will constitute miscellaneous assets, which can constitute no more than 20% of our assets.

We also invest in other types of RMBS, CMBS, B Notes and mezzanine loans, which we will not treat as qualifying real estate assets for purposes of determining our eligibility for the exclusion provided by Section 3(c)(5)(C) unless such treatment is consistent with guidance of the Commission or the Division. We have not requested no-action or other interpretative guidance or applied for an exemptive order with respect to the treatment of such assets. In the absence of guidance of the Commission or the Division that otherwise supports the treatment of such investments as qualifying real estate assets, we will treat them, for purposes of determining our eligibility for the exclusion provided by Section 3(c)(5)(C), as real estate-related assets or miscellaneous assets as appropriate. Any additional guidance from the Division could provide additional flexibility to us, or it could further inhibit our ability to pursue the investment strategy we have chosen.

As of December 31, 2007, our investments in Agency MBS whole pool certificates comprise in excess of 50.0% of our assets, and coupled with our whole mortgage loan investments and real property investments, comprise in excess of 60.0% of our assets. Such qualifying real estate assets, coupled with our real estate-related assets, comprise in excess of 85.0% of our assets as of December 31, 2007. We monitor our assets to ensure that at least 55% of our assets consist of qualifying real estate assets, and that at least 80% of our assets consist of qualifying real estate assets and real estate-related assets. We expect, when required due to the mix of our investments, to acquire pools of whole loan RMBS for compliance purposes. Investments in such pools may not represent an optimum use of our investable capital when compared to the available investments we target pursuant to our investment strategy.

Competition

Our results from operations depends, in large part, on our ability to acquire assets at favorable spreads or with favorable returns over our borrowing costs. In acquiring real estate-related assets, we compete with other specialty finance companies, REITs, savings and loan associations, banks, mortgage bankers, insurance companies, mutual funds, institutional investors, investment banking firms, other lenders, governmental bodies and other entities. In addition, there are numerous specialty finance companies with similar asset acquisition objectives, and others may be organized in the future. The effect of the existence of additional REITs may be to increase competition for the available supply of mortgage assets suitable for purchase. Many of our competitors are significantly larger than us, have access to greater capital and other resources and may have other advantages over us. In addition to existing companies, other companies may be organized for similar purposes, including companies organized as REITs focused on purchasing real estate equity or debt investments. A proliferation of such companies may increase the competition for equity capital and thereby adversely affect the market price of our common stock. In addition, some of our competitors may have higher risk tolerances or

different risk assessments, which could allow them to consider a wider variety of investments and establish more relationships than us.

We have had and expect to continue to have access to Brookfield's and Hyperion Brookfield Crystal River's and our sub-advisors' professionals and their industry expertise, which we believe provides us with a competitive advantage and help us assess investment risks and determine appropriate pricing for certain potential investments. In addition, we expect that these relationships will enable us to learn about, and compete more effectively for, financing opportunities with attractive companies in the industries in which we seek to invest. For additional information concerning the competitive risks we face, see "Item 1A. Risk Factors Risks Related To Our Business and Investment Strategy We operate in a highly competitive market for investment opportunities."

Government Regulation

Our activities, including the financing of our operations, are subject to a variety of federal and state regulations. In addition, a majority of states have ceilings on interest rates chargeable to certain customers in financing transactions.

Employees

As of December 31, 2007, we had no full-time employees.

Code of Business Conduct and Ethics and Corporate Governance Documents

We have adopted a code of business conduct and ethics that applies to all of our officers, including our principal executive officer and principal financial and accounting officer, and all of the employees of our Manager. This code of business conduct and ethics is designed to comply with SEC regulations and New York Stock Exchange corporate governance rules related to codes of conduct and ethics and is posted on our corporate website at <http://www.crystalriverreit.com>. In addition, our corporate governance guidelines and charters for our audit, compensation and corporate governance committees of the board of directors are posted on our corporate website. Copies of our code of business conduct and ethics, our corporate governance guidelines and our committee charters are also available free of charge, upon request directed to Investor Relations, Crystal River Capital, Inc., Three World Financial Center, 200 Vesey Street, 10th Floor, New York, NY 10281-1010.

Website Access to Reports

We maintain a website at <http://www.crystalriverreit.com>. Through our website, we make available, free of charge, our annual proxy statement, annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended, as soon as reasonably practicable after we electronically file such material with, or furnish it to, the SEC. The SEC maintains a website that contains these reports at <http://www.sec.gov>.

Item 1A. Risk Factors.

Risks Related to Our Business and Investment Strategy

Periods of adverse market volatility could adversely affect our liquidity.

During periods of increased adverse market volatility, such as the recent disruption in the global liquidity markets, we are exposed to the risk that the availability under our funding sources may decline and/or we may have to post additional margin collateral, which may have a material adverse impact on our available liquidity. As a result, our contingent liquidity reserves may not be sufficient in the event of a material adverse change in the credit markets and related market price market volatility. For

example, at December 31, 2007, we were required to post additional margin collateral of \$15.7 million relating to our repurchase financing, \$18.3 million relating to our use of interest rate swaps and caps and \$32.9 million relating to our use of CDS. Additionally, demands on liquidity may result in deleveraging of the portfolio, which could adversely impact our earnings.

The weakness in the mortgage market has caused us to expect increased losses related to our holdings.

The sub-prime market has been severely affected by changes in the lending landscape. Access to mortgages for sub-prime borrowers has been and is expected to remain substantially limited for the foreseeable future. This limitation on financing is expected to have an impact on all sub-prime borrowers, especially those whose interest rates on loans are resetting and is expected to result in increased default rates. The severity of the liquidity limitation was largely unanticipated by the markets. As well, the liquidity issues also affect prime and alt-a Non-Agency lending, with mortgage rates remaining much higher and many product types being severely curtailed. At the margin, this has an impact on new demand for homes, which will compress the home ownership rates and weigh heavily on future home price performance. There is a strong correlation between home price growth rates and mortgage loan delinquencies. This comes in addition to the delinquency pressures in the sub-prime market resulting from weaker underwriting, which put many sub-prime lenders out of business in 2006 and 2007. The market deterioration has caused us to expect increased losses related to our holdings and has resulted in a lower market value for our holdings. We believe that, at this time, the underlying losses in the sub-prime market have not fully manifested themselves in the securitizations. For the year ended December 31, 2007, we had impairments on RMBS totaling \$128.7 million, which included impairments on sub-prime RMBS totaling \$81.1 million.

While fundamentals on commercial real estate have remained positive, prices on CMBS have declined and yield spreads on CMBS have widened. This widening has forced interest rates on commercial real estate mortgages wider and the higher mortgage rate environment could depress prices on commercial real estate properties that require financing over the near term. Prices also are suffering from poor technicals as balance sheet deleveraging caused by the credit crisis are causing forced selling into the market. Prices on new issue BBBs CMBS are down in excess of 20% during the first two months of 2008. For the year ended December 31, 2007, we had impairments on CMBS totaling \$174.9 million, of which \$154.6 million is related generally to wider yield spreads affecting market values of the CMBS.

Our investment portfolio is heavily concentrated in agency adjustable-rate MBS and we cannot assure you that we will be successful in achieving a more diversified portfolio.

As of December 31, 2007, approximately 55.0% of our investment portfolio consisted of Agency Adjustable Rate MBS. One of our key strategic objectives is to achieve a more diversified portfolio of investments that delivers attractive risk-adjusted returns. We cannot assure you that we will be successful in diversifying our investment portfolio, and even if we are successful in diversifying our investment portfolio it is likely that approximately 50.0-60.0% of our fully leveraged assets will be Agency MBS. If we are unable to achieve a more diversified portfolio, we will be particularly exposed to the investment risks that relate to investments in Agency adjustable-rate MBS, and we may suffer losses if investments in adjustable-rate MBS decline in value.

We leverage our investments, which may negatively affect our return on our investments and may reduce cash available for distribution.

We intend to continue to leverage our investments through borrowings, generally through the use of warehouse facilities, bank credit facilities, repurchase agreements, secured loans, securitizations, including the issuance of CDOs (when possible), loans to entities in which we hold, directly or indirectly, interests in pools of assets, and other borrowings. We are not limited in the amount of

leverage we may use. The percentage of leverage varies depending on our ability to obtain credit facilities and the lenders' and rating agencies' estimate of the stability of the investments' cash flow. Our return on our investments and cash available for distribution to our stockholders may be reduced to the extent that changes in market conditions increase the cost of our financing relative to the income that can be derived from the assets acquired. Our debt service payments will reduce cash flow available for distributions to stockholders. We may not be able to meet our debt service obligations and, to the extent that we cannot, we risk the loss of some or all of our assets to foreclosure or sale to satisfy the obligations. We leverage certain of our assets through repurchase agreements. A decrease in the value of these assets may lead to margin calls which we will have to satisfy. We may not have the funds available to satisfy any such margin calls and may have to sell assets at a time when we might not otherwise choose to do so.

Further, credit facility providers and warehouse facility providers may require us to maintain a certain amount of uninvested cash or to set aside unlevered assets sufficient to maintain a specified liquidity position, which would allow us to satisfy our collateral obligations. As a result, we may not be able to leverage our assets as fully as we would choose, which could reduce our return on assets. In the event that we are unable to meet these collateral obligations, our financial condition could deteriorate rapidly and we could be forced to sell investments at a loss.

We may be required to post significant amounts of cash collateral at any time to satisfy our margin requirements under many of our financing arrangements, which could adversely affect our liquidity, results of operations and financial condition.

We finance certain of our investments with debt, such as repurchase agreements, and derivatives, that are subject to margin calls. Under the terms of these agreements, the value of assets underlying the debt is marked-to-market by the lender at the lender's discretion, including on a daily basis. If the value of the underlying asset declines, the lender has the ability to require us to post additional margin cash or other liquid collateral to compensate for the decline in value of the asset. (Conversely, if the value of the underlying asset increases, a portion of the margin we previously posted may be returned to us.) We typically are required to post additional margin in response to any margin call within 24 hours in order to avoid defaulting under the terms of the financing arrangement.

We are subject to margin calls at any time, and being forced to post additional margin could adversely affect our business in a number of ways. Posting additional margin would decrease our cash available to make other, higher yielding investments (thereby decreasing our return on equity) or to satisfy other obligations, including future margin calls. If we do not have the funds available, or otherwise elect not, to satisfy any future margin calls, we could be forced to sell one or more investments at a loss. Moreover, we may be unable, in light of market conditions or other factors, to sell sufficient assets to satisfy the margin requirements within the timeframe required by lenders, which would entitle them to seize the underlying asset and seek payment from us for any shortfall between the value of our obligation to the lender and the value of the asset surrendered. Such a situation would likely result in a rapid deterioration of our financial condition and possibly necessitate a filing for protection under the United States Bankruptcy Code.

The occurrence of recent adverse developments in the mortgage finance and credit markets may adversely affect our business, our liquidity and our stock price.

In recent months, the mortgage industry has come under enormous pressure due to numerous economic and industry-related factors. Many companies operating or investing in the mortgage sector have failed and others are facing serious operating and financial challenges. At the same time, many MBS have been downgraded and delinquencies and credit performance of mortgage loans in the industry have deteriorated. We faced significant challenges during the second half of 2007 due to these adverse conditions in the mortgage industry and the difficulties we experienced in pricing and financing

some of our MBS, and are continuing to face these challenges in 2008. There is no assurance that these conditions have stabilized or that they will not worsen. Recent adverse changes in the mortgage finance and credit markets have eliminated or reduced the availability, or increased the cost, of significant sources of funding for us. Beginning in August 2007 and continuing through the current date, the fair value of our RMBS and CMBS assets as well as our derivative instruments have decreased, while our margin requirements on our financing have increased. The price of our common stock declined significantly as a result of these events and the impact on our results of our operations. There is no assurance that our stock price will not decline further if, among other things, MBS prices continue to decline. In addition, significant decreases in the prices of our MBS may decrease the carrying value of those investments, which if significant, could reduce our stockholders' equity below the levels required to be maintained pursuant to some of the instruments governing our borrowing arrangements with third parties. If this occurred, and we were not successful in obtaining amendments to or waivers of those covenants, we could default under those agreements. An event of default or termination event under these agreements would give the lender/counterparty the option to accelerate our indebtedness to them. If we are required to repay outstanding borrowings and were unable to negotiate favorable terms of replacement financing, cash will be negatively affected. This may reduce the amount of capital available for investing and/or may negatively affect our ability to distribute dividends. In addition, we may have to sell assets at a time when we might not otherwise choose to do so.

We have a limited operating history and limited experience as a REIT, and we may not be able to successfully operate our business or generate sufficient revenue to make or sustain dividends to stockholders.

We were recently organized and have a limited operating history and limited experience operating as a REIT. We are subject to all of the business risks and uncertainties associated with any new business, including the risk that we will not achieve our investment objectives and that the value of your investment could decline substantially. Our ability to achieve attractive risk-adjusted returns is dependent on our ability both to generate sufficient cash flow to pay an attractive dividend and to achieve capital appreciation, and we cannot assure you we will do either. There can be no assurance that we will be able to generate sufficient revenue from operations to pay our operating expenses and make or sustain dividends to stockholders.

We are dependent on Hyperion Brookfield Crystal River and our sub-advisors and may not find suitable replacements if Hyperion Brookfield Crystal River terminates the management agreement.

We are externally managed by Hyperion Brookfield Crystal River. Most of our officers are employees of Hyperion Brookfield or certain of its affiliates. We have no separate facilities and are completely reliant on Hyperion Brookfield Crystal River, which has significant discretion as to the implementation of our operating policies and strategies. We are subject to the risk that Hyperion Brookfield Crystal River will terminate the management agreement, thereby triggering a termination of our sub-advisors, and that no suitable replacements will be found to manage us. We believe that our success depends to a significant extent upon the experience of Hyperion Brookfield Crystal River's executive officers, whose continued service is not guaranteed. If Hyperion Brookfield Crystal River terminates the management agreement, we may not be able to execute our business plan and may suffer losses, which could materially decrease cash available for distribution to our stockholders.

Hyperion Brookfield Crystal River has limited prior experience managing a REIT and we cannot assure you that Hyperion Brookfield Crystal River's past experience will be sufficient to successfully manage our business as a REIT.

The federal income tax laws impose numerous constraints on the operations of REITs. Our Manager's and its employees' limited experience in managing a portfolio of assets under REIT and Investment Company Act of 1940, or the Investment Company Act, constraints may hinder their ability to achieve our investment objective. In addition, maintaining our REIT qualification limits the types of investments we are able to make. Our investors are not acquiring an interest in any of Hyperion Brookfield's other managed entities or Hyperion Brookfield Crystal River or their respective subsidiaries through this offering. We can offer no assurance that Hyperion Brookfield through Hyperion Brookfield Crystal River will replicate its historical success or its management team's success in its previous endeavors, and we caution you that our investment returns could be substantially lower than the returns achieved by funds managed by Hyperion Brookfield or Hyperion Brookfield's other endeavors.

We are dependent upon Hyperion Brookfield's key personnel and the resources of our sub-advisors for our success and the departure of any of these key personnel or the elimination of resources of our sub-advisors could negatively affect our performance.

We depend on the diligence, skill and network of business contacts of the senior management of Hyperion Brookfield, who direct the management activities of Hyperion Brookfield Crystal River. The senior management of Hyperion Brookfield evaluates, negotiates, structures, closes and monitors our investments. Our continued success will depend on the continued service of the senior management team of Hyperion Brookfield. The departure of any of the senior managers of Hyperion Brookfield, or of a significant number of the investment professionals or principals of Hyperion Brookfield or Hyperion Brookfield Crystal River, could have a material adverse effect on our performance. In addition, we can offer no assurance that Hyperion Brookfield Crystal River will remain as our manager or that we will continue to have access to Hyperion Brookfield's principals and professionals or their information and deal flow. We also depend on the resources of our sub-advisors in connection with sourcing and managing our investments and executing our investment strategy.

Our base management fee is payable regardless of our performance, which could lead to conflicts of interest with our Manager.

Hyperion Brookfield Crystal River is entitled to receive a base management fee that is based on the amount of our equity (as defined in the management agreement), regardless of the performance of our portfolio. Hyperion Brookfield Crystal River's entitlement to substantial non-performance based compensation might reduce its incentive to devote its time and effort to seeking investments that provide attractive risk-adjusted returns for our portfolio. This in turn could hurt our ability to make distributions to our stockholders.

Hyperion Brookfield Crystal River's incentive fee may induce it to make certain investments, including speculative investments, that increase the risk of our investment portfolio.

Hyperion Brookfield Crystal River's entitlement to an incentive fee may cause it to invest in high-risk investments. In addition to its base management fee, Hyperion Brookfield Crystal River is entitled to receive incentive compensation based entirely upon our achievement of targeted levels of net income. In evaluating investments and other management strategies, the opportunity to earn incentive compensation based on net income may lead Hyperion Brookfield Crystal River to place undue emphasis on the maximization of net income at the expense of other criteria, such as preservation of capital, in order to achieve higher incentive compensation. Investments with higher

yield potential generally are riskier or more speculative. This could result in increased risk to the value of our investment portfolio.

Hyperion Brookfield Crystal River manages our portfolio pursuant to very broad investment guidelines and our board of directors does not approve each investment decision made by Hyperion Brookfield Crystal River, which may result in our making riskier investments with which you do not agree and which could cause our operating results and the value of our common stock to decline.

Hyperion Brookfield Crystal River is authorized to follow very broad investment guidelines. Although our directors periodically review our investment guidelines and our investment portfolio, other than any investments involving our affiliates or our sub-advisors' affiliates or investments proposed by Brookfield Sub-Advisor, which they are required to review and approve prior to such investment being made, they do not review all of our proposed investments. In addition, in conducting periodic reviews, our directors may rely primarily on information provided to them by Hyperion Brookfield Crystal River or Brookfield Sub-Advisor. Furthermore, Hyperion Brookfield Crystal River and Brookfield Sub-Advisor may use complex strategies in structuring transactions for us and those transactions may be difficult or impossible to unwind. Subject to maintaining our REIT qualification and our exemption from regulation under the Investment Company Act, Hyperion Brookfield Crystal River has great latitude within the broad investment guidelines in determining the types of investments it makes for us.

The failure of our management to deploy our capital effectively could result in unfavorable returns, could have a material negative impact on our business, financial condition, liquidity and results of operations, could materially decrease cash available for distribution to our stockholders and could cause the value of our common stock to decline.

We may change our investment strategy and asset allocation without stockholder consent, which may result in riskier investments or in lower distributions to you.

We have not adopted a policy as to the amounts to be invested in each of our intended investments, including securities rated below investment grade. Subject to our intention to invest in a portfolio that allows us to qualify as a REIT and remain eligible for an exclusion from regulation as an investment company under the Investment Company Act, we may change our investment strategy or asset allocation, including the percentage of assets that may be invested in each class, or in the case of securities, in a single issuer, at any time without the consent of our stockholders, which could result in our making investments that are different from, and possibly riskier than, the investments described in this report. A change in our investment strategy may increase our exposure to interest rate risk, default risk, real estate market fluctuations and liquidity risk, all of which could negatively affect the market price of our common stock and our ability to make distributions to you.

There are conflicts of interest in our relationship with Hyperion Brookfield Crystal River, which could result in decisions that are not in the best interests of our stockholders.

We are entirely dependent on Hyperion Brookfield Crystal River for our day-to-day management and have no independent officers. Our chairman of the board, chief executive officer and president, chief financial officer and vice president and general counsel also serve as officers and/or directors of Hyperion Brookfield or certain of its affiliates. As a result, our management agreement with Hyperion Brookfield Crystal River was negotiated between related parties, and its terms, including fees payable, may not be as favorable to us as if it had been negotiated with an unaffiliated third party.

Termination of the management agreement with Hyperion Brookfield Crystal River without cause is difficult and costly. The management agreement provides that it may only be terminated without cause following the initial term expiring on December 31, 2008, annually upon the affirmative vote of

at least two-thirds of our independent directors, or by a vote of the holders of at least a majority of the outstanding shares of our common stock, based upon:

unsatisfactory performance by Hyperion Brookfield Crystal River that is materially detrimental to us or

a determination that the management fee payable to Hyperion Brookfield Crystal River is not fair, subject to Hyperion Brookfield Crystal River's right to prevent such a termination by accepting a mutually acceptable reduction of management fees.

Hyperion Brookfield Crystal River will be provided 180 days' prior notice of any such termination and will be paid a termination fee equal to the amount of two times the sum of the average annual base management fee and the average annual incentive compensation earned by Hyperion Brookfield Crystal River during the two 12-month periods immediately preceding the date of termination, calculated as of the end of the most recently completed fiscal quarter prior to the date of termination. These provisions may increase the effective cost to us of terminating the management agreement, thereby restricting our ability to terminate Hyperion Brookfield Crystal River without cause.

The ability of Hyperion Brookfield and its officers and employees to engage in other business activities may reduce the time Hyperion Brookfield Crystal River spends managing us.

The management compensation structure that we have agreed to with Hyperion Brookfield Crystal River may cause Hyperion Brookfield Crystal River to invest in potentially higher yielding investments. Investments with higher yield potential generally are riskier or more speculative. The compensation we pay Hyperion Brookfield Crystal River consists of both a base management fee that is not tied to our performance and an incentive management fee that is based entirely on our performance. The risk of the base management fee component is that it may not sufficiently incentivize Hyperion Brookfield Crystal River to generate attractive risk-adjusted returns for us. The risk of the incentive fee component is that it may cause Hyperion Brookfield Crystal River to place undue emphasis on the maximization of GAAP net income at the expense of other criteria, such as preservation of capital, in order to achieve a higher incentive fee. This could result in increased risk to the value of our investment portfolio. Subject to certain limitations, Hyperion Brookfield Crystal River will receive at least 10% of its incentive fee in the form of shares of our common stock, and, at Hyperion Brookfield Crystal River's option, may receive up to 100% of its incentive fee in the form of shares of our common stock. Hyperion Brookfield Crystal River has agreed not to sell such shares prior to one year after the date such shares are issued. Hyperion Brookfield Crystal River has the right in its discretion to allocate these shares to its officers, employees and other individuals who provide services to us. However, any of these shares that Hyperion Brookfield Crystal River allocates will be subject to the same one-year restriction on sale. Any such shares received would have the benefit of registration rights.

Hyperion Brookfield and our sub-advisors are not contractually obligated to dedicate their time to us and may engage in other activities that compete with us, which may result in conflicts of interest that could cause our results of operations to be lower or result in increased risk to the value of our investment portfolio.

The ability of Hyperion Brookfield, Brookfield Sub-Advisor and Ranieri & Co. and their respective officers and employees to engage in other business activities may result in conflicts of interest and, with respect to Brookfield Sub-Advisor and Ranieri & Co., may reduce the time they spend acting as a sub-advisor to us. In addition, the management compensation structure that we and our Manager have agreed to with Brookfield Sub-Advisor may cause Brookfield Sub-Advisor to source potentially higher yielding investments. Investments with higher yield potential generally are riskier or more speculative. The compensation our Manager pays Brookfield Sub-Advisor is equal to 20% of the base management fee and incentive management fees we pay to our Manager. In addition, for a 15-year period ending in

April 2020, an affiliate of Ranieri & Co. will receive 20% of the base and incentive management fees and termination fees we pay to our Manager, net of sub-advisor fees. The base management fee is not tied to our performance and the incentive management fee is based entirely on our performance. The risk of the base management fee component is that it may not sufficiently incentivize Brookfield Sub-Advisor or Ranieri & Co. to generate attractive risk-adjusted returns for us in the investments that they source for us. The risk of the incentive fee component is that it may cause Brookfield Sub-Advisor or Ranieri & Co. to place undue emphasis on the maximization of GAAP net income at the expense of other criteria, such as preservation of capital, in order to achieve a higher incentive fee. This could result in increased risk to the value of our investment portfolio.

We may compete with existing and future investment vehicles for access to Hyperion Brookfield and our sub-advisors and their affiliates, which may reduce investment opportunities available to us.

Brookfield currently sponsors several investment vehicles, including one in which we have invested, and Hyperion Brookfield manages one investment vehicle, Brascan Adjustable Rate Trust, with investment focuses that overlap our investment focus. In addition, at December 31, 2007, Hyperion Brookfield managed 26 client accounts and mutual funds with investment focuses that overlap our investment focus, and each of Brookfield and Hyperion Brookfield may in the future sponsor or manage other investment vehicles that have overlapping focuses with our investment focus. Accordingly, we compete for access to the benefits that we expect our relationship with Hyperion Brookfield Crystal River and our sub-advisors and their affiliates to provide and to the time of their investment professionals to carry out and facilitate our investment activities. Our rights to participate in investment opportunities are subject to Hyperion Brookfield's conflict of interest policy. Brookfield is not subject to Hyperion Brookfield's conflict of interest policy and is not obligated to offer us any investment opportunities and any decision to do so will be entirely within its discretion. In addition, we may make investments that are senior or junior to participations in, or have rights and interests different from or adverse to, the investments made by other vehicles or accounts managed by Hyperion Brookfield or Brookfield. Our interests in such investments may conflict with the interests of such other vehicles or accounts in related investments at the time of origination or in the event of a default or restructuring of the investment. If a default occurs with respect to such an investment, Hyperion Brookfield Crystal River will advise our independent directors, who will direct Hyperion Brookfield Crystal River with respect to the resolution or disposition of the investment.

Our failure to manage future growth effectively may have a material negative impact on our business, financial condition and results of operations.

Our ability to achieve our investment objective depends on our ability to grow, which depends, in turn, on the senior management team of Hyperion Brookfield and its ability to identify and invest in securities that meet our investment criteria. Accomplishing this result on a cost-effective basis is largely a function of Hyperion Brookfield's structuring of our investment process; its ability to provide competent, attentive and efficient services to us; and our access to financing on acceptable terms. Our ability to grow is also dependent upon Hyperion Brookfield's ability to successfully hire, train, supervise and manage new employees. We may not be able to manage growth effectively or to achieve growth at all. Any failure to manage our future growth effectively could have a material negative impact on our business, financial condition and results of operations.

When we obtain financing, lenders can impose restrictions on us that affect our ability to incur additional debt, our capability to make distributions to stockholders and our flexibility to determine our operating policies. Loan documents we have executed contain, and loan documents we may execute in the future may contain, negative covenants that limit, among other things, our ability to repurchase stock, distribute more than a certain amount of our funds from operations, and employ leverage beyond certain amounts. Some of our master repurchase agreements in effect as of the date of this

report contain negative covenants requiring us to maintain certain levels of net asset value, tangible net worth and available funds and comply with interest coverage ratios, leverage ratios and distribution limitations.

We may acquire investments from Hyperion Brookfield and Brookfield or their affiliates or otherwise participate in investments in which they have an interest or for which they have a related investment, which could result in conflicts of interest.

We expect that we will continue to acquire investments from Hyperion Brookfield and Brookfield or their affiliates, make investments that finance their investments or make co-investments with them. These transactions are not and will not be the result of arm's length negotiations and involve conflicts between our interests and the interest of Hyperion Brookfield, Brookfield and their respective affiliates in obtaining favorable terms and conditions. There can be no assurance that any procedural protections, such as obtaining market prices, other reliable indicators of fair market value, independent valuations or appraisals and the prior approval of our independent directors, will be sufficient to ensure that the consideration we pay for these investments will not exceed their fair market value.

We operate in a highly competitive market for investment opportunities and we may not be able to identify and make investments that are consistent with our investment objectives.

A number of entities compete with us to make the types of investments that we plan to make. We compete with other REITs, public and private funds, commercial and investment banks and commercial finance companies. Many of our competitors are substantially larger and have considerably greater financial, technical and marketing resources than we do. Several other REITs have recently raised, or are expected to raise, significant amounts of capital, and may have investment objectives that overlap with ours, which may create competition for investment opportunities. Some competitors may have a lower cost of funds and access to funding sources that are not available to us. In addition, some of our competitors may have higher risk tolerances or different risk assessments, which could allow them to consider a wider variety of investments and establish more relationships than us. We cannot assure you that the competitive pressures we face will not have a material negative impact on our business, financial condition and results of operations. Also, as a result of this competition, we may not be able to take advantage of attractive investment opportunities from time to time, and we can offer no assurance that we will be able to identify and make investments that are consistent with our investment objective.

Failure to procure adequate capital and funding would negatively affect our results and may, in turn, negatively affect the market price of shares of our common stock and our ability to distribute dividends.

We depend upon the availability of adequate funding and capital for our operations. As a REIT, we are required to distribute annually at least 90% of our REIT taxable income, determined without regard to the deduction for dividends paid and excluding net capital gain, to our stockholders and are therefore not able to retain significant amounts of our earnings for new investments. However, Crystal River Capital TRS Holdings, Inc., our TRS, is able to retain earnings for investment in new capital, subject to the REIT requirements that place a limitation on the relative value of TRS stock and securities owned by a REIT. The failure to secure acceptable financing could reduce our taxable income, as our investments would no longer generate the same level of net interest income due to the lack of funding or increase in funding costs. A reduction in our taxable income would reduce our liquidity and our ability to make distributions to our stockholders. We cannot assure you that any, or sufficient, funding or capital will be available to us in the future on terms that are acceptable to us. Therefore, in the event that we cannot obtain sufficient funding on acceptable terms, there may be a negative impact on the market price of our common stock and our ability to make distributions.

If we issue senior securities, we will be subject to additional restrictive covenants and limitations on our operating flexibility, which could materially decrease cash available for distribution to our stockholders.

If we decide to issue senior securities in the future, it is likely that they will be governed by an indenture or other instrument containing covenants that will restrict our operating flexibility. Holders of senior securities may be granted specific rights, including but not limited to the right to hold a perfected security interest in certain of our assets, the right to accelerate payments due under the indenture, rights to restrict dividend payments, and rights to require approval to sell assets. Additionally, any convertible or exchangeable securities that we issue in the future may have rights, preferences and privileges more favorable than those of our common stock. We, and indirectly our stockholders, will bear the cost of issuing and servicing such securities.

We may not be able to successfully complete securitization transactions, which could inhibit our ability to grow our business and could negatively affect our results of operations.

In addition to issuing senior securities to raise capital as described above, we may, to the extent consistent with the REIT requirements, seek to securitize certain of our portfolio investments to generate cash for funding new investments. This would involve creating a special-purpose vehicle, contributing a pool of our assets to the entity, and selling interests in the entity on a non-recourse basis to purchasers (whom we would expect to be willing to accept a lower interest rate to invest in investment grade loan pools). We would retain all or a portion of the equity in the securitized pool of portfolio investments. We have initially financed our investments with relatively short-term credit facilities and reverse repurchase arrangements. We use these short-term facilities to finance the acquisition of securities until a sufficient quantity of securities is accumulated, at which time we intend to refinance these facilities through a securitization, such as a CDO issuance, or other long-term financing. As a result, we are subject to the risk that we may not be able to acquire, during the period that our short-term facilities are available, a sufficient amount of eligible securities to maximize the efficiency of a CDO issuance. We also bear the risk that we may not be able to obtain short-term credit facilities or may not be able to renew any short-term credit facilities after they expire should we find it necessary to extend our short-term credit facilities to allow more time to seek and acquire the necessary eligible securities for a long-term financing. The inability to renew our short-term credit facilities may require us to seek more costly financing for our investments or to liquidate assets.

In addition, conditions in the capital markets may make the issuance of a CDO impractical when we do have a sufficient pool of collateral. In this regard, as discussed in the "Trends" section of Part II, Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations of this Form 10-K (our "MD&A"), the dislocations in the sub-prime market have rippled throughout the structured finance markets. Yield spreads on CMBS and prime Non-Agency RMBS widened dramatically during the third and fourth quarters of 2007, resulting in significant negative market value adjustments and impairments to our assets. The issuance of CDOs, which has been a key financing tool for us and our peers, has come to a halt, cutting off an attractive financing alternative for the time being. Downgrades of structured securities by the rating agencies are likely to continue through 2008. Large-scale downgrades have the potential to cause another liquidity crisis similar to that of July and August 2007, as the downgrades could trigger forced sales of MBS by structured investment vehicles, or SIVs, and asset-backed commercial paper issuers, or ABCPs. The inability to securitize our portfolio could hurt our performance and ability to grow our business. At the same time, the securitization of our portfolio investments might expose us to losses, as the residual portfolio investments in which we do not sell interests will tend to be riskier and more likely to generate losses.

We expect that the use of CDO financings with over-collateralization requirements may have a negative impact on our cash flow.

The terms of our initial CDO financing, CDO 2005-1, required that the principal amount of assets must exceed the principal balance of the related bonds by a certain amount, which is commonly referred to as "over-collateralization." We expect that the terms of CDOs that we may issue in the future generally will provide for over-collateralization and that, if certain delinquencies and/or losses exceed specified levels, which we will establish based on the analysis by the rating agencies (or any financial guaranty insurer) of the characteristics of the assets collateralizing the bonds, the required level of over-collateralization may be increased or may be prevented from decreasing as would otherwise be permitted if losses or delinquencies did not exceed those levels. Other tests (based on delinquency levels or other criteria) may restrict our ability to receive net cash proceeds from assets collateralizing the obligations. We cannot assure you that the performance tests will be satisfied. In advance of completing negotiations with the rating agencies or other key transaction parties on our future CDO financings, we cannot assure you of the actual terms of the CDO delinquency tests, over-collateralization terms, cash flow release mechanisms or other significant factors regarding the calculation of net income to us. Failure to obtain favorable terms with regard to these matters may materially and adversely affect the availability of net cash proceeds to us. If our assets fail to perform as anticipated, our over-collateralization or other credit enhancement expense associated with our CDO financings will increase.

An increase in our borrowing costs relative to the interest we receive on our assets may negatively affect our profitability and thus our cash available for distribution to our stockholders.

As our repurchase agreements and other short-term borrowings mature, we will be required either to enter into new borrowings or to sell certain of our investments at times when we might not otherwise choose to do so. An increase in short-term interest rates at the time that we seek to enter into new borrowings would reduce the spread between our returns on our assets and the cost of our borrowings. This would negatively affect our returns on our assets that are subject to prepayment risk, including our MBS, which might reduce earnings and, in turn, cash available for distribution to our stockholders.

We may not be able to renew the total return swaps that we enter into, which could adversely affect our leveraging strategy.

In the future, we may leverage certain of our investments through the use of total return swaps, which are swaps in which the non-floating rate side is based on the total return of an equity or fixed income instrument with a life longer than the swap. We may wish to renew many of the swaps, which are for specified terms, as they mature. However, there is a limited number of providers of such swaps, and there is no assurance the initial swap providers will choose to renew the swaps, and, if they do not renew, that we would be able to obtain suitable replacement providers. Providers may choose not to renew our total return swaps for a number of reasons, including:

increases in the provider's cost of funding;

insufficient volume of business with a particular provider;

our desire to invest in a type of swap that the provider does not view as economically attractive due to changes in interest rates or other market factors; or

our inability to agree with a provider on terms.

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

Furthermore, our ability to invest in total return swaps, other than through a TRS, may be severely limited by the REIT qualification requirements because total return swaps are not qualifying assets and do not produce qualifying income for purposes of the REIT asset and income tests.

Hedging against interest rate exposure may adversely affect our earnings, which could reduce our cash available for distribution to our stockholders.

Subject to maintaining our qualification as a REIT and our exemption from regulation under the Investment Company Act, we often pursue various hedging strategies to seek to reduce our exposure to losses from adverse changes in interest rates. Our hedging activity varies in scope based on the level and volatility of interest rates, the type of assets held, and other changing market conditions. Interest rate hedging may fail to protect or could adversely affect us because, among other things:

interest rate hedging can be expensive, particularly during periods of rising and volatile interest rates;

available interest rate hedges may not correspond directly with the interest rate risk for which protection is sought;

the duration of the hedge may not match the duration of the related liability;

the amount of income that a REIT may earn from hedging transactions (other than through TRSs) to offset interest rate losses is limited by federal tax provisions governing REITs;

the credit quality of the party owing money on the hedge may be downgraded to such an extent that it impairs our ability to sell or assign our side of the hedging transaction; and

the party owing money in the hedging transaction may default on its obligation to pay.

Our hedging activity may adversely affect our earnings, which could reduce our cash available for distribution to our stockholders. We may utilize instruments such as forward contracts and interest rate swaps, caps, collars and floors and credit default swaps to seek to hedge against mismatches between the cash flows on our assets and the interest payments on our liabilities or fluctuations in the relative values of our portfolio positions, in each case resulting from changes in market interest rates. Hedging against a decline in the values of our portfolio positions does not eliminate the possibility of fluctuations in the values of such positions or prevent losses if the values of such positions decline. However, such hedging can establish other positions designed to gain from those same developments, thereby offsetting the decline in the value of such portfolio positions. Such hedging transactions may also limit the opportunity for gain if the values of the portfolio positions should increase. Moreover, it may not be possible to hedge against an interest rate fluctuation that is so generally anticipated that we are not able to enter into a hedging transaction at an acceptable price.

Although we may enter into hedging transactions to seek to reduce interest rate risks, unanticipated changes in interest rates may result in poorer overall investment performance than if we had not engaged in any such hedging transactions. In addition, the degree of correlation between price movements of the instruments used in a hedging strategy and price movements in the portfolio positions being hedged may vary. Moreover, for a variety of reasons, we may not seek to establish a perfect correlation between such hedging instruments and the portfolio holdings being hedged. Any such imperfect correlation may prevent us from achieving the intended hedge and expose us to risk of loss.

In addition, by entering into derivative contracts in connection with hedging transactions, we could be required to fund cash payments in certain circumstances. These potential payments will be contingent liabilities and therefore may not appear on our balance sheet. Our ability to fund these contingent liabilities will depend on the liquidity of our assets and access to capital at the time, and the need to fund these contingent liabilities could adversely affect our financial condition.

Our failure to achieve adequate operating cash flow could reduce our cash available for distribution to our stockholders.

As a REIT, we must distribute annually at least 90% of our REIT taxable income to our stockholders, determined without regard to the deduction for dividends paid and excluding net capital gain. Our ability to make and sustain cash distributions is based on many factors, including the return on our investments, operating expense levels and certain restrictions imposed by Maryland law. Some of the factors are beyond our control and a change in any such factor could affect our ability to pay future dividends, which may also have a negative impact on our stock price. No assurance can be given as to our ability to pay distributions.

Loss of Investment Company Act exclusion would adversely affect us and could cause a decline in the market price of our common stock and limit our ability to distribute dividends.

Because registration as an investment company would significantly affect our ability to engage in certain transactions or to organize ourselves in the manner we are currently organized, we intend to maintain our qualification for certain exclusions from registration under the Investment Company Act. Because we conduct our business directly and through wholly-owned subsidiaries, we must ensure not only that we, but also that each of our subsidiaries, qualify for an exclusion or exemption from regulation under the Investment Company Act.

For purposes of the ensuing discussion "we" and "our" refer to Crystal River Capital, Inc. alone and not its subsidiaries.

We rely on the exclusion provided by Section 3(c)(5)(C) of the Investment Company Act (and potentially Section 3(c)(6) if, from time to time, we engage in business through one or more majority-owned subsidiaries).

Section 3(c)(5)(C), as interpreted by the staff of the Commission, requires us to invest at least 55% of our assets in "mortgages and other liens on and interests in real estate," referred to as qualifying real estate assets, and at least 80% of our assets in qualifying real estate assets plus real estate-related assets. We will treat our direct ownership interests in real property (held in the form of fee interests) and our whole mortgage loans as qualifying real estate assets. In addition, we will treat our ownership interest in pools of whole loan MBS, in cases in which we acquire the entire beneficial interest in a particular pool, as qualifying real estate assets based on no-action positions of the Division.

We also invest in other types of RMBS, CMBS, B Notes and mezzanine loans, which we will not treat as qualifying real estate assets for purposes of determining our eligibility for the exclusion provided by Section 3(c)(5)(C) unless such treatment is consistent with guidance provided by the Commission or the Division. We have not requested no-action or other interpretative guidance or applied for an exemptive order with respect to the treatment of such assets. In the absence of guidance of the Commission or the Division that otherwise supports the treatment of such investments as qualifying real estate assets, we will treat them, for purposes of determining our eligibility for the exclusion provided by Section 3(c)(5)(C), as real estate-related assets or miscellaneous assets, as appropriate.

As of December 31, 2007, our investments in MBS whole pool certificates comprise in excess of 50.0% of our assets, and coupled with our commercial real estate and whole mortgage loan investments, comprise in excess of 60.0% of our assets. Such qualifying real estate assets, coupled with our real estate-related assets, comprise in excess of 85.0% of our assets as of December 31, 2007. We monitor our assets to ensure that at least 55% of our assets consist of qualifying real estate assets, and that at least 80% of our assets consist of qualifying real estate assets and real estate-related assets. We expect, when required due to the mix of our investments, to acquire pools of whole loan MBS for

compliance purposes. Investments in such pools may not represent an optimum use of our investable capital when compared with the available investments we target pursuant to our investment strategy.

If we fail to satisfy the requirements provided in the Investment Company Act to preserve our exclusion from regulation under the Investment Company Act, we could be required to materially restructure our activities and to register as an investment company under the Investment Company Act, which could have a material adverse effect on our operating results. Further, if it were established that we were an unregistered investment company, there would be a risk that we would be subject to monetary penalties and injunctive relief in an action brought by the Commission, that we would be unable to enforce contracts with third parties, and that third parties could seek to obtain rescission of transactions undertaken during the period it was established that we were an unregistered investment company.

Rapid changes in the values of our MBS and other real estate related investments may make it more difficult for us to maintain our qualification as a REIT or exclusion from regulation under the Investment Company Act, which may cause us to change our mix of portfolio investments which may not produce optimal returns consistent with our investment strategy.

If the market value or income potential of our MBS and other real estate related investments declines as a result of increased interest rates, prepayment rates or other factors, we may need to increase our real estate investments and income and/or liquidate our non-qualifying assets in order to maintain our REIT qualification or exclusion from regulation under the Investment Company Act. If the decline in real estate asset values and/or income occurs quickly, this may be especially difficult to accomplish. This difficulty may be exacerbated if the assets that we need to sell to comply with the requirements for qualification as a REIT or to qualify for an exclusion from regulations under the Investment Company Act have no pre-existing trading market and cannot easily be sold. To the extent that the assets we need to sell are composed of subordinated MBS, individually- negotiated loans, loan participations or mezzanine loans where there is no established trading market, we may have difficulty selling such investments quickly for their fair value. Accordingly, we may have to make investment decisions that we otherwise would not make absent the REIT and Investment Company Act considerations.

We are highly dependent on communications and information systems operated by Hyperion Brookfield or by third parties, and systems failures could significantly disrupt our business, which may, in turn, negatively affect the market price of our common stock and our ability to pay dividends.

Our business is highly dependent on communications and information systems, including all of Hyperion Brookfield's proprietary analytical systems and models and certain third-party systems and models. Any failure or interruption of our systems or the systems operated by Hyperion Brookfield or by third parties on which we rely, as we experienced as part of system-wide interruptions following the September 11, 2001 terrorist attacks and the East Coast electrical power blackout in August 2003, could cause delays or other problems in our securities trading activities, including MBS trading activities, which could have a material adverse effect on our operating results and negatively affect the market price of our common stock and our ability to pay dividends.

Terrorist attacks and other acts of violence or war may affect the market for our common stock, the industry in which we conduct our operations and our profitability.

The terrorist attacks on September 11, 2001 disrupted the U.S. financial markets, including the real estate capital markets, and negatively affected the U.S. economy in general. Any future terrorist attacks, the anticipation of any such attacks, the consequences of any military or other response by the U.S. and its allies, and other armed conflicts could cause consumer confidence and spending to decrease or result in increased volatility in the United States and worldwide financial markets and economy. The economic impact of these events could also adversely affect the credit quality of some of

our loans and investments and the property underlying our ABS securities. Some of our loans and investments are more susceptible to the adverse effects discussed above than others, such as hotel loans, which may experience a significant reduction in occupancy rates following any future attacks. We may suffer losses as a result of the adverse impact of any future attacks and these losses may adversely affect our performance and revenues and may result in volatility of the value of our securities. A prolonged economic slowdown, a recession or declining real estate values could impair the performance of our investments and harm our financial condition, increase our funding costs, limit our access to the capital markets or result in a decision by lenders not to extend credit to us. We cannot assure you that there will not be further terrorist attacks against the United States or U.S. businesses, and we cannot predict the severity of the effect that such future events would have on the U.S. financial markets, the economy or our business. The types of losses described above resulting from these types of events are uninsurable.

In addition, the events of September 11 created significant uncertainty regarding the ability of real estate owners of high-profile assets to obtain insurance coverage protecting against terrorist attacks at commercially reasonable rates, if at all. With the enactment of the Terrorism Risk Insurance Act of 2002 (TRIA), and the subsequent enactment of the Terrorism Risk Insurance Extension Act of 2005 and the Terrorism Risk Insurance Revision and Extension Act of 2007, which extended TRIA through the end of 2017, insurers must make terrorism insurance available under their property and casualty insurance policies, but this legislation does not regulate the pricing of such insurance. The absence of affordable insurance coverage may adversely affect the general real estate lending market, lending volume and the market's overall liquidity and it may reduce the number of suitable investment opportunities available to us and the pace at which we are able to make investments. If the properties in which we invest are unable to obtain affordable insurance coverage, the value of those investments could decline, and in the event of an uninsured loss, we could lose all or a portion of our investment.

Risks Related to Our Investments

Our real estate investments are subject to risks particular to real property, any of which could reduce our returns on such investments and limit our cash available for distribution to our stockholders.

We own assets secured by real estate and also own real estate directly. Real estate investments will be subject to various risks, including:

acts of God, including hurricanes, earthquakes, floods and other natural disasters, which may result in uninsured losses;

acts of war or terrorism, including the consequences of terrorist attacks, such as those that occurred on September 11, 2001;

adverse changes in national and local economic and market conditions;

changes in governmental laws and regulations, fiscal policies and zoning ordinances and the related costs of compliance with laws and regulations, fiscal policies and ordinances;

costs of remediation and liabilities associated with environmental conditions such as indoor mold; and

the potential for uninsured or underinsured property losses.

If any of these or similar events occurs, it may reduce our return from an affected property or investment and reduce or eliminate our ability to make distributions to stockholders.

The mortgage loans we invest in and the mortgage loans underlying the MBS and asset-backed securities we invest in are subject to delinquency, foreclosure and loss, which could result in losses to us.

Commercial mortgage loans are secured by multifamily or commercial property and are subject to risks of delinquency and foreclosure, and risks of loss that are greater than similar risks associated with

loans made on the security of single-family residential property. The ability of a borrower to repay a loan secured by an income-producing property typically is dependent primarily upon the successful operation of such property rather than upon the existence of independent income or assets of the borrower. If the net operating income of the property is reduced, the borrower's ability to repay the loan may be impaired. Net operating income of an income-producing property can be affected by, among other things: tenant mix, success of tenant businesses, property management decisions, property location and condition, competition from comparable types of properties, changes in laws that increase operating expense or limit rents that may be charged, any need to address environmental contamination at the property, the occurrence of any uninsured casualty at the property, changes in national, regional or local economic conditions and/or specific industry segments, declines in regional or local real estate values, declines in regional or local rental or occupancy rates, increases in interest rates, real estate tax rates and other operating expenses, changes in governmental rules, regulations and fiscal policies, including environmental legislation, acts of God, terrorism, social unrest and civil disturbances.

Residential mortgage loans are secured by single-family residential property or 2-4 family residential property and are subject to risks of delinquency, foreclosure, and loss. The ability of a borrower to repay a loan secured by a residential property is dependent upon the income or assets of the borrower. A number of factors, including a general economic downturn, payment increases under the terms of the loan, acts of God, terrorism, social unrest and civil disturbances, may impair a borrower's ability to repay its loans. ABS are bonds or notes backed by loans and/or other consumer financial assets. The ability to repay these loans or other financial assets is dependant upon the income or assets of the borrower, or revenue produced by the assets in the case of commercial assets.

In the event of any default under a mortgage loan held directly by us, we will bear a risk of loss of principal to the extent of any deficiency between the value of the collateral to be liquidated and the principal and accrued interest of the mortgage loan and other costs, which could have a material adverse effect on our cash flow from operations. In the event of the bankruptcy of a mortgage loan borrower, the mortgage loan to such borrower will be deemed to be secured only to the extent of the value of the underlying collateral at the time of bankruptcy (as determined by the bankruptcy court), and the lien securing the mortgage loan will be subject to the avoidance powers of the bankruptcy trustee or debtor-in-possession to the extent the lien is unenforceable under state law, which could result in a total loss of our investment.

Foreclosure of a mortgage loan can be an expensive and lengthy process, which could have a substantial negative effect on our anticipated return on the foreclosed mortgage loan. RMBS evidence interests in, or are secured by, pools of residential mortgage loans and CMBS evidence interests in, or are secured by, a single commercial mortgage loan or a pool of commercial mortgage loans. Accordingly, the MBS in which we invest are subject to all of the risks of the underlying mortgage loans.

In addition, residential mortgage borrowers may not be prevented by the terms of their mortgage loans from prepaying their loans in whole or in part at any time. Borrowers prepay their mortgages for many reasons, but typically, when interest rates decline or when home prices rise, borrowers tend to prepay at faster rates. To the extent that the underlying mortgage borrowers in any of our mortgage loan pools or the pools underlying any of our mortgage-backed securities prepay their loans, we will likely receive funds that will have to be reinvested, and we may need to reinvest those funds at less desirable rates of return.

Approximately 2.3% of our investment portfolio as of December 31, 2007 was comprised of mortgage-backed securities collateralized by sub-prime residential mortgages. Sub-prime residential mortgage loans are generally loans to credit impaired borrowers and borrowers that are ineligible to qualify for loans from conventional mortgage sources due to credit characteristics, higher debt-to-income ratios or less than full documentation standards. Loans to lower credit grade borrowers generally experience higher-than-average default rates than do conforming mortgage loans. Material

differences in expected default rates, loss severities and/or prepayments on the sub-prime mortgage loans from what was estimated in connection with the original underwriting of such loans could cause reductions in our income and adversely affect our operating results, with respect to our investments in mortgage-backed securities. If we underestimate the extent of losses that our investments in mortgage-backed securities will incur, then our business, financial condition, liquidity and results of operations could be adversely affected. We are not aware of any defaults in our portfolio as of the date of this report. For a description of the recent weakness in the sub-prime market, see "Part II. Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations Trends Weakness of mortgage market."

We may not be able to identify satisfactory alternative investments to successfully balance the interest rate or mark-to-market risk inherent in our MBS investments, which could result in losses to us.

As of December 31, 2007, greater than 50.0% of our investment portfolio consisted of Agency Adjustable Rate MBS and greater than 7.0% of our investment portfolio consisted of Non-Agency RMBS. If we are not able to identify and acquire satisfactory alternative investments, our portfolio will be concentrated in a less diversified portfolio of MBS investments. This would increase our dependence on these investments and increase our interest rate and mark-to-market risk inherent in MBS investments, which could have a material adverse effect on our operating results and negatively affect the market price of our common stock and our ability to pay dividends.

An increase in the yield spread of our assets may cause the market price of our common stock to drop.

One of the factors that investors may consider in deciding whether to buy or sell shares of our common stock is the relative yield spread differential between the assets that we own and their valuation relative to comparable duration Treasuries. An increase in the yield spread differential could lower the book value of our assets, which could lower the value of our common stock.

Our investments in CMBS generally are subordinated and could subject us to increased risk of losses.

In general, losses on an asset securing a mortgage loan included in a securitization will be borne first by the equity holder of the property, then by a cash reserve fund or letter of credit provided by the borrower, if any, then by the "first loss" subordinated security holder and then by the "second loss" subordinated security holder. In the event of default and the exhaustion of any equity support, reserve fund, letter of credit and any classes of securities junior to those in which we invest, we may not be able to recover all of our investment in the securities we purchase. In addition, if the underlying mortgage portfolio has been overvalued by the originator, or if the values subsequently decline and, as a result, less collateral is available to satisfy interest and principal payments due on the related MBS, the securities in which we invest may effectively become the "first loss" position behind the more senior securities, which may result in significant losses to us and may be in excess of our underwriting assumptions.

The prices of lower credit quality securities are generally less sensitive to interest rate changes than more highly rated investments but more sensitive to adverse economic downturns or individual issuer developments. A projection of an economic downturn, for example, could cause a decline in the price of lower credit quality securities because the ability of obligors of mortgages underlying MBS to make principal and interest payments or to refinance may be impaired. In this case, existing credit support in the securitization structure may be insufficient to protect us against loss of our principal on these securities.

Although we seek to match fund our investments to limit refinance risk and lock in net spreads, we do not employ this strategy with respect to certain of our investments, which increases the risks related to refinancing these investments.

A key to our investment strategy is to finance our investments using match funded financing structures, which match assets and liabilities with respect to maturities and interest rates. This limits our refinance risk, including the risk of being able to refinance an investment or refinance on favorable terms. We generally use match funded financing structures, such as CDOs, to finance our investments in real estate securities and loans. However, our Manager may elect for us to bear a level of refinancing risk on a short term or longer term basis, such as is the case with investments financed with repurchase agreements, when, based on all of the relevant factors, bearing such risk is advisable. This is generally the case with respect to the Agency MBS and some of the Non-Agency RMBS in which we invest. The decision not to match fund certain investments exposes us to additional refinancing risks that may not apply to our other investments.

In addition, we anticipate that, in most cases, for any period during which our floating rate assets are not match funded with respect to maturity, the income from such assets may respond more slowly to interest rate fluctuations than the cost of our borrowings. Because of this dynamic, interest income from such investments may rise more slowly than the related interest expense, with a consequent decrease in our net income. Interest rate fluctuations resulting in our interest expense exceeding interest income would result in operating losses for us from these investments.

Accordingly, if we do not or are unable to match fund our investments with respect to maturities and interest rates, we will be exposed to the risk that we may not be able to finance or refinance our investments on economically favorable terms or may have to liquidate assets at a loss.

We may not be able to finance our investments on a long term basis on attractive terms, including by means of securitization, which may require us to seek more costly financing for our investments or to liquidate assets.

When we acquire a portfolio of securities and loans which we finance on a short term basis with a view to securitization or other long term financing, we bear the risk of being unable to securitize the assets or otherwise finance them on a long term basis at attractive prices or in a timely matter, or at all. If it is not possible or economical for us to securitize or otherwise finance such assets on a long term basis, we may be unable to pay down our short term borrowings, or be required to liquidate the assets at a loss in order to do so.

As of December 31, 2007, we had approximately \$1,327.0 million of indebtedness maturing during 2008, including \$1,215.7 million of reverse repurchase financing on Agency MBS. When this indebtedness becomes due, any inability to refinance this indebtedness on similar terms could have a material impact on our liquidity, our ability to pay future dividends and our ability to maintain our REIT status. Some of our investments securing these obligations are illiquid and this lack of liquidity could significantly impede our ability to realize the value at which such investments are carried if we are required to sell them to satisfy debt maturities.

Our assets may include high yield and subordinated corporate securities that have greater risks of loss than secured senior loans and if those losses are realized, they could negatively affect our earnings, which could materially decrease cash available for distribution to our stockholders.

Our assets may include high yield and subordinated securities that involve a higher degree of risk than long-term senior secured loans. First, the high yield securities may not be secured by mortgages or liens on assets. Even if secured, these high yield securities may have higher loan-to-value ratios than a senior secured loan. Furthermore, our right to payment and the security interest may be subordinated to the payment rights and security interests of the senior lender. Therefore, we may be limited in our ability to enforce our rights to collect these loans and to recover any of the loan balance through a foreclosure of collateral.

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

Certain of these high yield and subordinated securities may have an interest only payment schedule, with the principal amount remaining outstanding and at risk until the maturity of the obligation. In this case, a borrower's ability to repay its obligation may be dependent upon a liquidity event that will enable the repayment of the obligation.

In addition to the above, numerous other factors may affect a company's ability to repay its obligation, including the failure to meet its business plan, a downturn in its industry or negative economic conditions. A deterioration in a company's financial condition and prospects may be accompanied by deterioration in the collateral for the obligation. Losses in our high yield and subordinated securities could negatively affect our earnings, which could materially decrease cash available for distribution to our stockholders.

High yield and subordinated securities from highly leveraged companies may have a greater risk of loss which, in turn, could materially decrease cash available for distribution to our stockholders.

Leverage may have material adverse consequences to the companies in which we will hold investments. These companies may be subject to restrictive financial and operating covenants. The leverage may impair these companies' ability to finance their future operations and capital needs. As a result, these companies' flexibility to respond to changing business and economic conditions and to business opportunities may be limited. A leveraged company's income and net assets will tend to increase or decrease at a greater rate than if borrowed money were not used. As a result, leveraged companies have a greater risk of loss. Losses on our investments could negatively affect our earnings, which could materially decrease cash available for distribution to our stockholders.

We may continue to invest in the equity securities of CDOs, and such investments involve various significant risks, including that CDO equity receives distributions from the CDO only if the CDO generates enough income to first pay the holders of its debt securities and its expenses.

We may continue to invest in the equity securities of CDOs. A CDO is a special-purpose vehicle that purchases collateral (such as ABS) that is expected to generate a stream of interest or other income. The CDO issues various classes of securities that participate in that income stream, typically one or more classes of debt instruments and a class of equity securities. The equity is usually entitled to all of the income generated by the CDO after the CDO pays all of the interest due on the debt securities and its expenses. However, there will be little or no income available to the CDO equity if there are defaults by the issuers of the underlying collateral and those defaults exceed a certain amount. In that event, the value of our investment in the CDO's equity could decrease substantially. In addition, the equity securities of CDOs are generally illiquid, and because they represent a leveraged investment in the CDO's assets, the value of the equity securities will generally have greater fluctuations than the values of the underlying collateral.

We may enter into warehouse agreements in connection with investments in the equity securities of CDOs structured for us and, if the investment in a CDO is not consummated, the warehoused collateral will be sold and we must bear any loss resulting from the purchase price of the collateral exceeding the sale price.

In connection with future investment in CDOs that Hyperion Brookfield structures for us, we expect to enter into warehouse agreements with investment banks or other financial institutions, pursuant to which the institution initially will finance the purchase of the collateral that will be transferred to the CDO. Hyperion Brookfield will select the collateral. If the CDO transaction is not consummated, the institution would liquidate the warehoused collateral and we would have to pay any amount by which the original purchase price of the collateral exceeds its sale price, subject to negotiated caps, if any, on our exposure. In addition, regardless of whether the CDO transaction is consummated, if any of the warehoused collateral is sold before the consummation, we will have to bear any resulting loss on the sale. The amount at risk in connection with the warehouse agreements

supporting our investments in CDOs generally is the amount that we have agreed to invest in the equity securities of the CDOs. Although we would expect to complete the CDO transaction within about three to nine months after the warehouse agreement is signed, we cannot assure you that we would in fact be able to complete any such transaction or complete it within the expected time period.

We may lose money on our repurchase transactions if the counterparty to the transaction defaults on its obligation to resell the underlying security back to us at the end of the transaction term, or if the value of the underlying security has declined as of the end of that term or if we default on our obligations under the repurchase agreement.

When we engage in a repurchase transaction, we generally sell securities to the transaction counterparty and receive cash from the counterparty. The counterparty is obligated to resell the securities back to us at the end of the term of the transaction, which is typically 30-90 days. Because the cash we receive from the counterparty when we initially sell the securities to the counterparty is less than the value of those securities (typically between 95-97% of that value), if the counterparty defaults on its obligation to resell the securities back to us, we would incur a loss on the transaction equal to between 3-5% of the value of the securities (assuming there was no change in the value of the securities). We would also lose money on a repurchase transaction if the value of the underlying securities has declined as of the end of the transaction term, as we would have to repurchase the securities for their initial value but would receive securities worth less than that amount. Any losses we incur on our repurchase transactions could negatively affect our earnings, and thus decrease our cash available for distribution to our stockholders.

If we default on one of our obligations under a repurchase transaction, the counterparty can terminate the transaction and cease entering into any other repurchase transactions with us. In that case, we would likely need to establish a replacement repurchase facility with another repurchase dealer to continue to leverage our portfolio and carry out our investment strategy. There is no assurance we would be able to establish a suitable replacement facility.

Investments in mezzanine loans involve greater risks of loss than senior loans secured by income-producing properties.

Investments in mezzanine loans take the form of subordinated loans secured by second mortgages on the underlying property or loans secured by a pledge of the ownership interests in the entity that directly or indirectly owns the property. These types of investments involve a higher degree of risk than a senior mortgage loan because the investment may become unsecured as a result of foreclosure by the senior lender. In the event of a bankruptcy of the entity providing the pledge of its ownership interests as security, we may not have full recourse to the assets of the property owning entity, or the assets of the entity may not be sufficient to satisfy our mezzanine loan. If a borrower defaults on our mezzanine loan or debt senior to our loan, or in the event of a borrower bankruptcy, our mezzanine loan will be satisfied only after the senior debt is paid in full. As a result, we may not recover some or all of our investment, which could result in losses. In addition, mezzanine loans may have higher loan to value ratios than conventional mortgage loans, resulting in less equity in the property and increasing the risk of loss of principal.

Increases in interest rates and shifts in the yield curve could negatively affect the value of our investments, which could result in reduced earnings or losses and negatively affect the cash available for distribution to our stockholders.

We invest indirectly in mortgage loans by purchasing MBS. Under a normal yield curve, an investment in MBS will decline in value if long-term interest rates increase. Despite Fannie Mae, Freddie Mac or Ginnie Mae guarantees of certain of the MBS we own, those guarantees do not protect us from declines in market value caused by changes in interest rates. Declines in market value may

ultimately reduce earnings or result in losses to us, which may negatively affect cash available for distribution to our stockholders.

A significant risk associated with our investment in MBS is the risk that both long-term and short-term interest rates will increase significantly. If long-term rates increase significantly, the market value of these MBS would decline and the duration and weighted average life of the investments would increase. We could realize a loss if the securities were sold. At the same time, an increase in short-term interest rates would increase the amount of interest owed on the repurchase agreements we may enter into in order to finance the purchase of MBS.

Market values of our investments may decline without any general increase in interest rates for a number of reasons, such as increases in defaults, increases in voluntary prepayments for those investments that are subject to prepayment risk, and widening of credit spreads.

We remain subject to losses on our mortgage portfolio despite the significant concentration of highly-rated MBS in our portfolio.

A significant portion of our current assets are invested in MBS that either are agency-backed or are rated investment grade by at least one rating agency. Although highly-rated MBS generally are subject to a lower risk of default than lower credit quality MBS and may benefit from third-party credit enhancements such as insurance or corporate guarantees, there is no assurance that such MBS will not be subject to credit losses or downgrades. Furthermore, ratings are subject to change over time as a result of a number of factors, including greater than expected delinquencies, defaults or credit losses, or a deterioration in the financial strength of corporate guarantors, any of which may reduce the market value of such securities. Furthermore, ratings do not take into account the reasonableness of the issue price, interest rate risk, prepayment risk, extension risk or other risks associated with such MBS. As a result, although we attempt to mitigate our exposure to credit risk in our mortgage portfolio on a relative basis by focusing on highly-rated MBS, we cannot completely eliminate credit risk and remain subject to other risks to our investment portfolio that could cause us to suffer losses, which may harm the market price of our common stock.

Some of our portfolio investments are recorded at fair value as estimated by management and reviewed by our board of directors and, as a result, there is uncertainty as to the value of these investments.

Some of our portfolio investments are in the form of securities that are not publicly traded. The fair value of securities and other investments that are not publicly traded is not readily determinable. We value these investments quarterly at fair value as determined under policies approved by our board of directors. Because such valuations are inherently uncertain, may fluctuate over short periods of time and may be based on estimates, our determinations of fair value may differ materially from the values that would have been used if a ready market for these securities existed. The value of our common stock could be adversely affected if our determinations regarding the fair value of these investments are materially higher than the values that we ultimately realize upon their disposal.

The value of investments denominated or quoted in international currencies may decrease due to fluctuations in the relative rates of exchange among the currencies of different nations and by exchange control regulations.

If we make investments denominated or quoted in foreign currencies, our investment performance may be negatively affected by a devaluation of that currency. Further, our investment performance may be negatively affected by currency exchange rates because the U.S. dollar value of investments denominated or quoted in another currency may increase or decrease in response to changes in the value of the currency in relation to the U.S. dollar.

Declines in the market values of our investments may adversely affect periodic reported results and credit availability, which may reduce earnings and, in turn, cash available for distribution to our stockholders.

A substantial portion of our assets are classified for accounting purposes as "available-for-sale." Changes in the market values of those assets are directly charged or credited to stockholders' equity. As a result, a decline in values may reduce the book value of our assets. Moreover, if the decline in value of an available-for-sale security is other than temporary, such decline will reduce earnings. In this regard, for the year ended December 31, 2007, we recorded an impairment charge on 130 RMBS, 59 Agency MBS, 131 CMBS and two preferred stock investments. The total impairment charge for the year ended December 31, 2007 was \$317.9 million, which was reclassified out of other comprehensive income. The impairment of 22 of the 130 RMBS and seven of the 131 CMBS, totaling \$59.5 million and \$11.2 million, respectively, for that period is attributed to the decline in the projected yields related to changes in the cash flow assumptions, such as timing and prepayments, on the underlying assets. The impairment of the remaining 108 of the 130 RMBS, 115 of the 131 CMBS and both of the preferred stock investments, totaling \$69.3 million, \$154.6 million and \$3.7 million, respectively, for that period is attributed to other than temporary declines in market values and is primarily a consequence of wider spreads affecting market values of the securities. The impairment of the 59 Agency MBS and the remaining nine of the 131 CMBS, totaling \$10.6 million and \$9.1 million, respectively, for that period is a result of our intent not to hold these securities to recovery where cost exceeds market value.

All of our repurchase agreements are subject to bilateral margin calls in the event that the collateral securing our obligations under those facilities exceeds or does not meet our collateralization requirements. The analysis of sufficiency of collateralization is undertaken daily, and the thresholds for adjustment range from \$100,000 to \$500,000. As of December 31, 2007, on a net basis, the fair value of the collateral, including restricted cash, securing our obligations under repurchase agreements exceeded the amount of such obligations, including accrued interest on those obligations, by approximately \$169.3 million. However, during the third and fourth quarters of 2007, due to the deterioration in the market value of our assets, we received margin calls under several of our repurchase agreements, which resulted in our having to tap our financing sources to post additional collateral.

A further decline in the market value of our assets may adversely affect us particularly in instances where we have borrowed money based on the market value of those assets. If the market value of those assets declines, the lender may require us to post additional collateral to support the loan. If we were unable to post the additional collateral, we would have to sell the assets at a time when we might not otherwise choose to do so. A reduction in credit available may reduce our earnings and, in turn, cash available for distribution to stockholders.

The lack of liquidity in our investments may harm our business.

We have made investments and, subject to maintaining our REIT qualification and our exemption from regulation under the Investment Company Act, expect to make additional investments in assets and securities that are not publicly traded. A portion of these securities may be subject to legal and other restrictions on resale or will otherwise be less liquid than publicly traded securities. The illiquidity of our investments, such as commercial real estate, subordinated MBS or investments in timber or power generating assets, may make it difficult for us to sell such investments if the need arises. In addition, if we are required to liquidate all or a portion of our portfolio quickly, we may realize significantly less than the value at which we have previously recorded our investments. Moreover, we may face other restrictions on our ability to liquidate an investment in a business entity to the extent that we or Hyperion Brookfield Crystal River has or could be attributed with material nonpublic information regarding such business entity. As a result, our ability to vary our portfolio in response to changes in economic and other conditions may be relatively limited.

Failure to comply with negative covenants contained in our repurchase facilities and other funding agreements will limit available financing under these agreements.

We obtain a significant portion of our funding through the use of repurchase facilities. Certain of our repurchase facility agreements include negative covenants that, if breached, may cause transactions to be terminated early. Except as noted below, the repurchase facility agreements do not include negative covenants other than those contained in the standard master repurchase agreement as published by the Bond Market Association. Three of our master repurchase agreements, which accounted for approximately \$387.6 million of our liabilities as of December 31, 2007, provide that they may be terminated if, among other things, certain material decreases in net asset value occur, we lose our REIT status or our Manager is terminated. An event of default or termination event under the standard master repurchase agreement or the additional provisions explained above would give our counterparty the option to terminate all repurchase transactions existing with us and make any amount due by us to the counterparty payable immediately. If we are required to terminate outstanding repurchase transactions and are unable to negotiate favorable terms of replacement financing, cash will be negatively affected. This may reduce the amount of capital available for investing and/or may negatively affect our ability to distribute dividends. In addition, we may have to sell assets at a time when we might not otherwise choose to do so.

We may not be able to acquire eligible investments for a CDO issuance, or we may not be able to issue CDO securities on attractive terms, which may require us to seek more costly financing for our investments or to liquidate assets.

We intend to continue to acquire debt instruments and finance them on a non-recourse long-term basis, such as through the issuance of CDOs. During the period that we are acquiring these assets, we intend to finance our purchases through relatively short-term credit facilities. We use short-term warehouse lines of credit to finance the acquisition of instruments until a sufficient quantity is accumulated, at which time we may refinance these lines through a securitization, such as a CDO issuance, or other long-term financing. As a result, we are subject to the risk that we will not be able to acquire, during the period that our warehouse facility is available, a sufficient amount of eligible assets to maximize the efficiency of a CDO issuance. In addition, conditions in the capital markets may make the issuance of CDOs less attractive to us when we do not have a sufficient pool of collateral. If we are unable to issue a CDO to finance these assets, we may be required to seek other forms of potentially less attractive financing or otherwise to liquidate the assets.

A prolonged economic slowdown, a recession or declining real estate values could impair the performance of our investments and harm our operating results.

Many of our investments may be susceptible to economic slowdowns or recessions, which could lead to financial losses in our investments and a decrease in revenues, net income and assets. Unfavorable economic conditions also could increase our funding costs, limit our access to the capital markets or result in a decision by lenders not to extend credit to us. These events could prevent us from increasing investments and have a negative impact on our operating results. As of the date of this report, many analysts are predicting that the United States economy has entered into a recession. In addition, the value of real estate assets has declined in many parts of the country in recent months.

We may be exposed to environmental liabilities with respect to properties to which we take title, which could impair the performance of our investments and harm our operating results.

In the course of our business, we have and may continue to take title to real estate, and, we could be subject to environmental liabilities with respect to these properties. In these circumstances, we may be held liable to a governmental entity or to third parties for property damage, personal injury, investigation, and clean-up costs incurred by these parties in connection with environmental

contamination, or we may be required to investigate or clean up hazardous or toxic substances or chemical releases at a property. The costs associated with investigation or remediation activities could be substantial. If we ever become subject to significant environmental liabilities, our business, financial condition, liquidity and results of operations could be materially and adversely affected.

Hedging instruments often are not traded on regulated exchanges, guaranteed by an exchange or its clearing house, or regulated by any U.S. or foreign governmental authorities and involve risks and costs that could expose us to unexpected economic losses in the future.

The cost of using hedging instruments increases as the period covered by the instrument increases and during periods of rising and volatile interest rates. We may increase our hedging activity and thus increase our hedging costs during periods when interest rates are volatile or rising and hedging costs have increased. We expect that from time to time, in addition to the interest rate swaps, credit default swaps and currency swaps into which we had entered as of December 31, 2007, we may in the future enter into forward contracts and cash flow swaps as part of our hedging strategy.

In addition, hedging instruments involve risk because they often are not traded on regulated exchanges, guaranteed by an exchange or its clearing house, or regulated by any U.S. or foreign governmental authorities. Consequently, there are no requirements with respect to record keeping, financial responsibility or segregation of customer funds and positions. Furthermore, the enforceability of agreements underlying derivative transactions may depend on compliance with applicable statutory, commodity and other regulatory requirements and, depending on the identity of the counterparty, applicable international requirements. The business failure of a hedging counterparty with whom we enter into a hedging transaction will most likely result in a default. Default by a party with whom we enter into a hedging transaction may result in the loss of unrealized profits and force us to cover our resale commitments, if any, at the then current market price. Although generally we will seek to reserve the right to terminate our hedging positions, it may not always be possible to dispose of or close out a hedging position without the consent of the hedging counterparty, and we may not be able to enter into an offsetting contract to cover our risk. We cannot assure you that a liquid secondary market will exist for hedging instruments purchased or sold, and we may be required to maintain a position until exercise or expiration, which could result in losses.

Subject to maintaining our qualification as a REIT, part of our investment strategy involves entering into derivative contracts that could require us to fund cash payments in the future under certain circumstances, *e.g.*, the early termination of the derivative agreement caused by an event of default or other early termination event, or the decision by a counterparty to request margin securities it is contractually owed under the terms of the derivative contract. The amount due would be equal to the unrealized loss of the open swap positions with the respective counterparty and could also include other fees and charges. These economic losses will be reflected in our financial results of operations, and our ability to fund these obligations will depend on the liquidity of our assets and access to capital at the time. The need to fund these obligations could negatively affect our financial condition.

Prepayment rates could negatively affect the value of our MBS, which could result in reduced earnings or losses and negatively affect the cash available for distribution to our stockholders.

In the case of residential mortgage loans, there are seldom any restrictions on borrowers' abilities to prepay their loans. Homeowners tend to prepay mortgage loans faster when interest rates decline. Consequently, owners of the loans have to reinvest the money received from the prepayments at the lower prevailing interest rates. Conversely, homeowners tend not to prepay mortgage loans when interest rates increase. Consequently, owners of the loans are unable to reinvest money that would have otherwise been received from prepayments at the higher prevailing interest rates. This volatility in prepayment rates may affect our ability to maintain targeted amounts of leverage on our mortgage-

backed securities portfolio and may result in reduced earnings or losses for us and negatively affect the cash available for distribution to our stockholders.

Despite Fannie Mae, Freddie Mac or Ginnie Mae guarantees of principal and interest related to certain of the MBS we own, those guarantees do not protect investors against prepayment risks.

Our Manager's due diligence may not reveal all of an entity's liabilities and may not reveal other weaknesses in its business, which could lead to investment losses.

Before investing in a company, our Manager assesses the strength and skills of the company's management and other factors that our Manager believes are material to the performance of the investment. In making the assessment and otherwise conducting customary due diligence, our Manager relies on the resources available to it and, in some cases, an investigation by third parties. This process is particularly important and subjective with respect to newly organized entities because there may be little or no information publicly available about the entities. There can be no assurance that our Manager's due diligence processes will uncover all relevant facts or that any current or future investment will be successful and not result in investment losses.

We, or other owners of income-producing real property, may not be able to relet or renew leases of properties on favorable terms.

We are subject to the risk that upon expiration of leases for space located at any income-producing property that we purchase or that serves as collateral for MBS securities that we purchase, the space may not be relet or, if relet, the terms of the renewal or reletting (including the cost of required renovations or concessions to tenants) may be less favorable than the expiring lease terms. Any of these situations may result in extended periods where there is a significant decline in revenues or no revenues generated by a property. If we, or the other owners of such properties, are unable to relet or renew leases for all or substantially all of the space at any such properties, if the rental rates upon such renewal or reletting are significantly lower than expected, or if reserves for these purposes prove inadequate, we may be required to reduce or eliminate distributions to our stockholders.

Insurance on commercial real estate may not cover all losses.

There are certain types of losses, generally of a catastrophic nature, such as earthquakes, floods, hurricanes, terrorism or acts of war, that may be uninsurable or not economically insurable. Inflation, changes in building codes and ordinances, environmental considerations and other factors, including terrorism or acts of war, also might make the insurance proceeds insufficient to repair or replace a property if it is damaged or destroyed. Under such circumstances, the insurance proceeds received might not be adequate to restore our economic position with respect to the affected real property. Any uninsured loss could result in both loss of cash flow from and the asset value of the affected property.

Any investments in timber assets will expose us to special risks.

We may invest in timber assets. The demand for and supply of standing timber continually fluctuates, which leads to significant volatility in timber prices. Availability of timber supplies is influenced by many factors, including changes in weather patterns and harvest strategies of industry participants, pest infestations and forest fires. Such factors will affect the volume of any timber assets we may harvest and, as is typical in the industry, we will not maintain insurance for any loss of standing timber as a result of natural disasters. The timber industry is subject to extensive environmental regulation, including protected species regulation, which may restrict timber harvesting from time to time and may lead to increased costs of harvesting, all of which will affect the performance of any timber assets in which we invest.

Any investments in power generation assets will expose us to special risks.

We may invest in power generation assets. The demand for and supply of electricity continually fluctuates, which leads to significant volatility in electricity prices both intra-day and seasonally. Availability of electricity is influenced by many factors, including production strategies of industry participants that take into account the cost and volume of energy inputs such as coal, uranium or gas required to generate electricity relative to the market price of electricity, adverse weather variations that affect primarily hydroelectric facilities, equipment failures, and the current regulatory environment and availability of transmission, all of which will affect the performance of any power generation assets in which we invest.

Risks Related to Our Organization and Structure

Our charter and bylaws contain provisions that may inhibit potential takeover bids that you and other stockholders may consider favorable, and the market price of our common stock may be lower as a result.

Our charter and bylaws contain provisions that may have an anti-takeover effect, inhibit a change in our board of directors and prevent stockholders from receiving a premium on their shares. These provisions include the following:

There are ownership limits and restrictions on transferability and ownership in our charter. In order to qualify as a REIT for each taxable year after 2005, not more than 50% of the value of our outstanding stock may be owned, directly or constructively, by five or fewer individuals during the second half of any calendar year and our shares must be beneficially owned by 100 or more persons during at least 335 days of a taxable year of 12 months or during a proportionate part of a shorter taxable year. To assist us in satisfying these tests, our charter generally prohibits any person from beneficially or constructively owning more than 9.8% in value or number of shares, whichever is more restrictive, of any class or series of our outstanding capital stock, subject to important exceptions. These restrictions may:

discourage a tender offer or other transactions or a change in the composition of our board of directors or control that might involve a premium price for our shares or otherwise be in the best interests of our stockholders; or

result in shares issued or transferred in violation of such restrictions being automatically transferred to a trust for a charitable beneficiary and thereby resulting in a forfeiture of ownership of the additional shares.

Our charter permits our board of directors to issue stock with terms that may discourage a third party from acquiring us. Our charter permits our board of directors to amend the charter without stockholder approval to increase the total number of authorized shares of stock or the number of shares of any class or series and to issue common or preferred stock having preferences, conversion or other rights, voting powers, restrictions, limitations as to distributions, qualifications, or terms or conditions of redemption as determined by our board of directors. Thus, our board of directors could authorize the issuance of stock with terms and conditions that could have the effect of discouraging a takeover or other transaction in which holders of some or a majority of our shares might receive a premium for their shares over the then-prevailing market price of our shares.

Maryland Control Share Acquisition Act. Maryland law provides that "control shares" of a corporation acquired in a "control share acquisition" will have no voting rights except to the extent approved by a vote of two-thirds of the votes eligible to be cast on the matter under the Maryland Control Share Acquisition Act. "Control shares" means voting shares of stock that, if aggregated with all other shares of stock owned by the acquiror or in respect of which the

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

acquiror is able to exercise or direct the exercise of voting power (except solely by virtue of a revocable proxy), would entitle the acquiror to exercise voting power in electing directors within one of the following ranges of voting power: one-tenth or more but less than one-third, one-third or more but less than a majority, or a majority or more of all voting power. A "control share acquisition" means the acquisition of control shares, subject to certain exceptions.

If voting rights or control shares acquired in a control share acquisition are not approved at a stockholders' meeting or if the acquiring person does not deliver an acquiring person statement as required by the Maryland Control Share Acquisition Act, then subject to certain conditions and limitations, the issuer may redeem any or all of the control shares for fair value. If voting rights of such control shares are approved at a stockholders' meeting and the acquiror becomes entitled to vote a majority of the shares of stock entitled to vote, all other stockholders may exercise appraisal rights. Our bylaws contain a provision exempting acquisitions of our shares from the Maryland Control Share Acquisition Act. However, our board of directors may amend our bylaws in the future to repeal or modify this exemption, in which case any control shares of our company acquired in a control share acquisition will be subject to the Maryland Control Share Acquisition Act.

Business combinations. Under Maryland law, "business combinations" between a Maryland corporation and an interested stockholder or an affiliate of an interested stockholder are prohibited for five years after the most recent date on which the interested stockholder becomes an interested stockholder. These business combinations include a merger, consolidation, share exchange, or, in circumstances specified in the statute, an asset transfer or issuance or reclassification of equity securities. An interested stockholder is defined as:

any person who beneficially owns 10% or more of the voting power of the corporation's shares; or

an affiliate or associate of the corporation who, at any time within the two-year period prior to the date in question, was the beneficial owner of 10% or more of the voting power of the then outstanding voting stock of the corporation.

A person is not an interested stockholder under the statute if the board of directors approved in advance the transaction by which such person otherwise would have become an interested stockholder. However, in approving a transaction, the board of directors may provide that its approval is subject to compliance, at or after the time of approval, with any terms and conditions determined by our board of directors.

After the five-year prohibition, any business combination between the Maryland corporation and an interested stockholder generally must be recommended by the board of directors of the corporation and approved by the affirmative vote of at least:

80% of the votes entitled to be cast by holders of outstanding shares of voting stock of the corporation; and

two-thirds of the votes entitled to be cast by holders of voting stock of the corporation other than shares held by the interested stockholder with whom or with whose affiliate the business combination is to be effected or held by an affiliate or associate of the interested stockholder.

These super-majority vote requirements do not apply if the corporation's common stockholders receive a minimum price, as defined under Maryland law, for their shares in the form of cash or other consideration in the same form as previously paid by the interested stockholder for its shares.

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

The statute permits various exemptions from its provisions, including business combinations that are exempted by the board of directors prior to the time that the interested stockholder becomes an interested stockholder. Our board of directors has adopted a resolution that provides that any business combination between us and any other person is exempted from the provisions of the Act, provided that the business combination is first approved by the board of directors. This resolution, however, may be altered or repealed in whole or in part at any time. If this resolution is repealed, or the board of directors does not otherwise approve a business combination, this statute may discourage others from trying to acquire control of us and increase the difficulty of consummating any offer.

Staggered board. Our board of directors is divided into three classes of directors. The current terms of the directors expire in 2008, 2009 and 2010. Directors of each class are chosen for three-year terms upon the expiration of their current terms, and each year one class of directors is elected by the stockholders. The staggered terms of our directors may reduce the possibility of a tender offer or an attempt at a change in control, even though a tender offer or change in control might be in the best interests of our stockholders.

Our charter and bylaws contain other possible anti-takeover provisions. Our charter and bylaws contain other provisions that may have the effect of delaying, deferring or preventing a change in control of us or the removal of existing directors and, as a result, could prevent our stockholders from being paid a premium for their common stock over the then-prevailing market price.

Our rights and the rights of our stockholders to take action against our directors and officers are limited, which could limit your recourse in the event of actions not in your best interests.

Our charter limits the liability of our directors and officers to us and our stockholders for money damages, except for liability resulting from:

actual receipt of an improper benefit or profit in money, property or services; or

a final judgment based upon a finding of active and deliberate dishonesty by the director or officer that was material to the cause of action adjudicated.

In addition, our charter permits us to agree to indemnify our present and former directors and officers for actions taken by them in those capacities to the maximum extent permitted by Maryland law. Our bylaws require us to indemnify each present or former director or officer, to the maximum extent permitted by Maryland law, in the defense of any proceeding to which he or she is made, or threatened to be made, a party by reason of his or her service to us. In addition, we may be obligated to fund the defense costs incurred by our directors and officers.

Our access to confidential information may restrict our ability to take action with respect to some investments, which, in turn, may negatively affect the potential return to stockholders.

We, directly or through Hyperion Brookfield, Hyperion Brookfield Crystal River or Brookfield may obtain confidential information about the companies in which we have invested or may invest. If we do possess confidential information about such companies, there may be restrictions on our ability to dispose of, increase the amount of, or otherwise take action with respect to an investment in those companies. Our management of investment funds could create a conflict of interest to the extent Hyperion Brookfield Crystal River is aware of inside information concerning potential investment targets. We have implemented compliance procedures and practices designed to ensure that inside information is not used for making investment decisions on behalf of the funds and to monitor funds invested. We cannot assure you, however, that these procedures and practices will be effective. In

addition, this conflict and these procedures and practices may limit the freedom of Hyperion Brookfield Crystal River to make potentially profitable investments, which could negatively affect our operations. These limitations imposed by access to confidential information could therefore negatively affect the potential market price of our common stock and the ability to distribute dividends.

Tax Risks

Complying with REIT requirements may cause us to forego otherwise attractive opportunities.

To qualify as a REIT for federal income tax purposes, we must continually satisfy various tests regarding the sources of our income, the nature and diversification of our assets, the amounts we distribute to our stockholders and the ownership of our stock. To meet these tests, we may be required to forego investments we might otherwise make. This difficulty may be exacerbated by the illiquid nature of many of our non-real estate assets. Thus, compliance with the REIT requirements may hinder our investment performance.

The "taxable mortgage pool" rules may increase the taxes that we or our stockholders may incur, and may limit the manner in which we effect future securitizations.

Certain of our securitizations have resulted in the creation of taxable mortgage pools for federal income tax purposes. As a REIT, so long as we own 100% of the equity interests in a taxable mortgage pool, we generally would not be adversely affected by the characterization of the securitization as a taxable mortgage pool. Certain categories of stockholders, however, such as non-U.S. persons eligible for treaty benefits, stockholders with net operating losses, and certain tax-exempt stockholders that are subject to unrelated business income tax, could be subject to increased taxes on a portion of their dividend income from us attributable to the taxable mortgage pool that is characterized as "excess inclusion income." In addition, to the extent that our stock is owned by tax-exempt "disqualified organizations," such as certain government-related entities and charitable remainder trusts that are not subject to tax on unrelated business income, we may incur a corporate level tax on the excess inclusion income from the taxable mortgage pool. In that case, we may reduce the amount of our distributions to any disqualified organization whose stock ownership gave rise to the tax. The Internal Revenue Service has not given clear guidance as to the appropriate method for the calculation of excess inclusion income and, absent such clear guidance, we have calculated excess inclusion income based upon what we believe to be a reasonable method. Our estimation of excess inclusion income is disclosed in our year end financial statements. In addition, pursuant to recently issued guidance from the Internal Revenue Service, we are required to allocate excess inclusion income to our shareholders in proportion to dividends paid and to inform our shareholders of the amount and character of the excess inclusion income allocated to them. Given the lack of guidance, there can be no assurances that we have calculated excess inclusion income in a manner satisfactory to the Internal Revenue Service.

We are effectively precluded from selling equity interests in these securitizations to outside investors, or selling any debt securities issued in connection with these securitizations that might be considered to be equity interests for tax purposes. These limitations may prevent us from using certain techniques to maximize our returns from securitization transactions. In certain instances, we have pledged our equity interests in these taxable mortgage pools as collateral under our repurchase agreements, subjecting the pools to the potential loss of their tax-exempt status in the event that we were forced to sell our interests or our interests were foreclosed upon by a third party that was not afforded the same exemption as us.

Failure to qualify as a REIT would subject us to U.S. federal income tax, which would reduce the cash available for distribution to our stockholders.

We operate in a manner that is intended to cause us to qualify as a REIT for federal income tax purposes. However, the federal income tax laws governing REITs are extremely complex, and administrative interpretations of the federal income tax laws governing qualification as a REIT are limited. Qualifying as a REIT requires us to meet various tests regarding the nature of our assets and our income, the ownership of our outstanding stock, and the amount of our distributions on an ongoing basis. Although we operate in such a manner so as to qualify as a REIT, given the highly complex nature of the rules governing REITs, the ongoing importance of factual determinations, and the possibility of future changes in our circumstances, no assurance can be given that we will so qualify for any particular year.

If we fail to qualify as a REIT in any calendar year and we do not qualify for certain statutory relief provisions, we would be required to pay federal income tax on our taxable income. We might need to borrow money or sell assets in order to pay that tax. Our payment of income tax would decrease the amount of our income available for distribution to our stockholders. Furthermore, if we fail to maintain our qualification as a REIT and we do not qualify for certain statutory relief provisions, we no longer would be required to distribute substantially all of our REIT taxable income to our stockholders. Unless our failure to qualify as a REIT were excused under federal tax laws, we could not re-elect REIT status until the fifth calendar year following the year in which we failed to qualify.

Failure to make required distributions would subject us to tax, which would reduce the cash available for distribution to our stockholders and could adversely affect our ability to execute our business plan.

In order to qualify as a REIT, we must distribute to our stockholders, each calendar year, at least 90% of our REIT taxable income, determined without regard to the deduction for dividends paid and excluding net capital gain. To the extent that we satisfy the 90% distribution requirement, but distribute less than 100% of our taxable income, we will be subject to federal corporate income tax on our undistributed income. In addition, we will incur a 4% nondeductible excise tax on the amount, if any, by which our distributions in any calendar year are less than the sum of:

85% of our ordinary taxable income for that year;

95% of our capital gain net income for that year; and

100% our undistributed taxable income from prior years.

We intend to continue to distribute our net taxable income to our stockholders in a manner intended to satisfy the 90% distribution requirement and to avoid both corporate income tax and the 4% nondeductible excise tax. However, there is no requirement that domestic TRSs distribute their after-tax net income to their parent REIT or their stockholders and Crystal River Capital TRS Holdings, Inc., our TRS, may determine not to make any distributions to us.

Our taxable income may substantially differ from our net income as determined based on accounting principles generally accepted in the United States, or U.S. GAAP, because, for example, realized capital losses will be deducted in determining our U.S. GAAP net income, but may not be deductible in computing our taxable income. In addition, we may invest in assets that generate taxable income in excess of economic income or in advance of the corresponding cash flow from the assets, which we refer to as phantom income. Although some types of phantom income are excluded to the extent they exceed 5% of our REIT taxable income in determining the 90% distribution requirement, we will incur corporate income tax and the 4% nondeductible excise tax with respect to any phantom income items if we do not distribute those items on an annual basis. As a result of the foregoing, we

may generate less cash flow than taxable income in a particular year. In that event, we may be required to use cash reserves, incur debt on a short-term or long-term basis, or liquidate non-cash assets at rates or times that we regard as unfavorable to satisfy the distribution requirement and to avoid corporate income tax and the 4% nondeductible excise tax in that year. Because certain of our assets may generate substantial mismatches between taxable income and available cash, the requirement to distribute a substantial portion of our net taxable income could cause us to: (i) sell assets in adverse market conditions, (ii) borrow on unfavorable terms or (iii) distribute amounts that would otherwise be invested in future acquisitions, capital expenditures or repayment of debt, in order to comply with REIT requirements.

Dividends payable by REITs do not qualify for the reduced tax rates.

Legislation enacted in 2003 generally reduces the maximum tax rate for dividends payable to domestic stockholders that are individuals, trusts and estates to 15% (through 2008). Dividends payable by REITs, however, are generally not eligible for the reduced rates. Although this legislation does not adversely affect the taxation of REITs or dividends paid by REITs, the more favorable rates applicable to regular corporate dividends could cause investors who are individuals, trusts and estates to perceive investments in REITs to be relatively less attractive than investments in the stocks of non-REIT corporations that pay dividends, which could adversely affect the value of the stock of REITs, including our common stock.

Our ownership of and relationship with our TRS will be limited, and a failure to comply with the limits would jeopardize our REIT status and may result in the application of a 100% excise tax.

A REIT may own up to 100% of the stock of one or more TRSs. A TRS may earn income that would not be qualifying income if earned directly by the parent REIT. Both the subsidiary and the REIT must jointly elect to treat the subsidiary as a TRS. A corporation of which a TRS directly or indirectly owns more than 35% of the voting power or value of the stock will automatically be treated as a TRS. Overall, no more than 20% of the value of a REIT's assets may consist of stock or securities of one or more TRSs. A TRS will pay federal, state and local income tax at regular corporate rates on any income that it earns. In addition, the TRS rules limit the deductibility of interest paid or accrued by a TRS to its parent REIT to assure that the TRS is subject to an appropriate level of corporate taxation. The rules also impose a 100% excise tax on certain transactions between a TRS and its parent REIT that are not conducted on an arm's length basis.

Our TRS, Crystal River Capital TRS Holdings, Inc., as a domestic TRS, will pay federal, state and local income tax on its taxable income, and its after-tax net income is available for distribution to us but is not required to be distributed to us. The aggregate value of the TRS stock and securities owned by us should be less than 20% of the value of our total assets (including the TRS stock and securities). Furthermore, we monitor the value of our investments in TRSs for the purpose of ensuring compliance with the rule that no more than 20% of the value of our assets may consist of TRS stock and securities (which is applied at the end of each calendar quarter). In addition, we scrutinize all of our transactions with TRSs for the purpose of ensuring that they are entered into on arm's length terms in order to avoid incurring the 100% excise tax described above. There can be no complete assurance, however, that we will be able to comply with the 20% limitation discussed above or to avoid application of the 100% excise tax discussed above.

Complying with REIT requirements may limit our ability to hedge effectively.

The REIT provisions of the Internal Revenue Code substantially limit our ability to hedge MBS and related borrowings. Under these provisions, our annual gross income from qualifying and non-qualifying hedges, together with any other income not generated from qualifying real estate assets,

cannot exceed 25% of our gross income. In addition, our aggregate gross income from non-qualifying hedges, fees, and certain other non-qualifying sources cannot exceed 5% of our annual gross income. As a result, we might have to limit our use of advantageous hedging techniques or implement those hedges through Crystal River Capital TRS Holdings, Inc. This could increase the cost of our hedging activities or expose us to greater risks associated with changes in interest rates than we would otherwise want to bear.

The tax on prohibited transactions will limit our ability to engage in transactions, including certain methods of securitizing mortgage loans, that would be treated as sales for federal income tax purposes.

A REIT's net income from prohibited transactions is subject to a 100% tax. In general, prohibited transactions are sales or other dispositions of property, other than foreclosure property, but including mortgage loans, held primarily for sale to customers in the ordinary course of business. We might be subject to this tax if we were able to sell or securitize loans in a manner that was treated as a sale of the loans for federal income tax purposes. Therefore, in order to avoid the prohibited transactions tax, we may choose not to engage in certain sales of loans and may limit the structures we utilize for our securitization transactions even though such sales or structures might otherwise be beneficial to us.

It may be possible to reduce the impact of the prohibited transaction tax and the holding of assets not qualifying as real estate assets for purposes of the REIT asset tests by conducting certain activities, holding non-qualifying REIT assets or engaging in CDO transactions through our TRSSs, subject to certain limitations. To the extent that we engage in such activities through TRSSs, the income associated with such activities may be subject to full corporate income tax.

We may be subject to adverse legislative or regulatory tax changes that could reduce the market price of our common stock.

At any time, the federal, state or local income tax laws or regulations governing REITs or the administrative interpretations of those laws or regulations may be amended. We cannot predict when or if any new tax law, regulation or administrative interpretation, or any amendment to any existing tax law, regulation or administrative interpretation, will be adopted, promulgated or become effective and any such law, regulation or interpretation may take effect retroactively. We and our stockholders could be adversely affected by any such change in, or any new, tax law, regulation or administrative interpretation.

If we make distributions in excess of our current and accumulated earnings and profits, those distributions will be treated as a return of capital, which will reduce the adjusted basis of your stock, and to the extent such distributions exceed your adjusted basis, you may recognize a capital gain.

Unless you are a tax-exempt entity, distributions that we make to you generally will be subject to tax as ordinary income to the extent of our current and accumulated earnings and profits as determined for federal income tax purposes. If the amount we distribute to you exceeds your allocable share of our current and accumulated earnings and profits, the excess will be treated as a return of capital to the extent of your adjusted basis in your stock, which will reduce your basis in your stock but will not be subject to tax. To the extent the amount we distribute to you exceeds both your allocable share of our current and accumulated earnings and profits and your adjusted basis, this excess amount will be treated as a gain from the sale or exchange of a capital asset.

Item 1B. Unresolved Staff Comments.

None.

Item 2. Properties.

Our investments in real estate assets as of December 31, 2007 consist of our interests in properties that are consolidated in our consolidated financial statements. The following table sets forth the information with respect to our real estate assets as of December 31, 2007:

Property Name	Location	Type	% Owned	Date Acquired	Net Rentable Square Feet	Percentage Leased
Chase Tower Phoenix	Phoenix, AZ	Office	100.0%	March 20,2007	724,000	100.0%
1111 Fannin	Houston, TX	Office	100.0	March 20,2007	428,600	100.0
JPM Chase Call Center	Arlington, TX	Office	100.0	Sept. 25, 2007	176,000	100.0

2007 Acquisitions

On March 20, 2007, we acquired a 100% interest in the Chase Tower Phoenix, a 724,000 square-foot, single-tenant office building with a 1,905 space parking garage located in Phoenix, Arizona and 1111 Fannin Street, a 428,600 square-foot, single-tenant office building located in Houston, Texas, each of which is leased on a triple-net basis to JPMorgan Chase under leases expiring in 2021. The gross purchase price was approximately \$234.7 million, funded at closing with a \$198.5 million fixed-rate mortgage loan maturing in April 2017 at 5.509% (hedged rate 5.65%), interest-only for the first ten years, and cash on hand.

On September 25, 2007, we acquired a 100% interest in the JPMorgan Chase Call Center, a 176,000 square-foot, single-tenant office building located in Arlington, Texas leased on a triple-net basis to JPMorgan Chase under a lease expiring in 2027. The gross purchase price was approximately \$26.5 million, funded at closing with a \$20.9 million fixed-rate mortgage loan maturing in October 2017 at 6.29%, interest-only for the first three years, and cash on hand.

Principal Executive and Administrative Offices

Our principal executive and administrative offices are located in office space leased at Three World Financial Center, 200 Vesey Street, 10th Floor, New York, New York 10281-1010 and are provided by our Manager in accordance with the Management Agreement. Our telephone number is (212) 549-8400 and our website address is <http://www.crystalriverreit.com>.

Item 3. Legal Proceedings.

We are not party to any material litigation or legal proceedings, or to the best of our knowledge, any threatened litigation or legal proceedings, which, in our opinion, individually or in the aggregate, would have a material adverse effect on our results of operations or financial condition.

Item 4. Submission of Matters to a Vote of Security Holders.

None.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

Our common stock is listed for trading on the New York Stock Exchange under the symbol "CRZ." The table below sets forth, for the calendar quarters indicated, the reported high and low sale prices for the common stock as reported on the NYSE composite transaction tape and the per share cash dividends declared on the common stock.

	<u>High</u>	<u>Low</u>	<u>Dividend</u>
2007			
Fourth Quarter	\$ 18.20	\$ 12.56	\$ 0.68
Third Quarter	25.58	9.71	0.68
Second Quarter	29.48	24.25	0.68
First Quarter	29.24	23.72	0.68
2006			
Fourth Quarter	\$ 25.55	\$ 21.57	\$ 0.66
Third Quarter (from July 28, 2006)	23.00	21.30	0.60

The last reported sale price of our common stock on March 12, 2008 as reported on the NYSE composite transaction tape was \$11.04. As of March 12, 2008, there were 17 holders of record of our common stock. Cede & Co. is the holder of record for 24,600,700 shares of our common stock and it holds such shares as nominee for The Depository Trust Company.

We generally intend to distribute each year substantially all of our taxable income (which does not necessarily equal net income as calculated in accordance with generally accepted accounting principles) to our shareholders so as to comply with the REIT provisions of the Internal Revenue Code. We intend to make dividend distributions quarterly and, if necessary for REIT qualification purposes, we may need to distribute any taxable income remaining after the distribution of the final regular quarterly dividend each year, together with the first regular quarterly dividend payment of the following taxable year or, at our discretion, in a special dividend distributed prior thereto. Furthermore, we seek to set our recurring dividend at a level that we believe is comfortably sustainable.

Our dividend policy is subject to revision at the discretion of our board of directors. All distributions will be made at the discretion of our board of directors and will depend upon our taxable income, our financial condition, our maintenance of REIT status and other factors as our board of directors deems relevant.

Information relating to the dividends we declared in 2006 and 2007 is as follows:

Fiscal Period	Dividend Amount per Share	Declaration Date	Record Date	Payment Date	Total Distribution	Dividend Type
(in millions)						
First quarter 2006	\$ 0.725	03/31/2006	03/31/2006	04/17/2006	\$ 12.7	Regular
Second quarter 2006	0.725	06/23/2006	06/30/2006	07/21/2006	12.7	Regular
Third quarter 2006	0.600	09/22/2006	10/04/2006	10/27/2006	15.0	Regular
Fourth quarter 2006	0.660	12/11/2006	12/29/2006	01/26/2007	16.5	Regular
First quarter 2007	0.680	03/19/2007	03/30/2007	04/27/2007	17.0	Regular
Second quarter 2007	0.680	06/13/2007	06/29/2007	07/27/2007	17.0	Regular
Third quarter 2007	0.680	09/10/2007	09/28/2007	10/26/2007	16.9	Regular
Fourth quarter 2007	0.680	12/12/2007	12/31/2007	01/28/2008	16.8	Regular

For the year ended December 31, 2007, we declared dividends of \$2.72 per share, of which \$2.59 represented distributions of taxable earnings and profits and \$0.13 represented a return of capital. All distributions through December 31, 2006 represented distributions of taxable earnings and profits; none

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

represented a return of capital, and all distributions from and including October 13, 2005 were funded primarily from operating cash flows, and as necessary, to a lesser extent from the sale or repayment of our investments or from borrowings under our credit facilities or master repurchase agreements, and were not funded out of the offering proceeds from our March 2005 private offering or our August 2006 initial public offering. We cannot assure you that we will have sufficient cash available for future quarterly distributions at this level, or at all. See "Item 1A. Risk Factors."

Equity Compensation Plan Information

The following table provides information about the securities authorized for issuance under our equity compensation plans as of December 31, 2007:

Plan category	Number of securities to be issued upon exercise of outstanding options, warrants and rights(1)	Weighted-average exercise price of outstanding options, warrants and rights	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))(2)
	(a)	(b)	(c)
Equity compensation plans approved by stockholders	130,000	25.00	2,398,680
Equity compensation plans not approved by stockholders(3)			
Total	130,000	25.00	2,398,680

(1)

There are no outstanding warrants or rights.

(2)

Amounts exclude any securities to be issued upon exercise of outstanding options. Includes 42,419 shares of common stock to be issued in respect of deferred stock units and restricted stock units issued to certain of our independent directors.

(3)

We do not have any equity compensation plans that have not been approved by stockholders.

We did not repurchase, or purchase on behalf of any affiliated purchaser, any shares of our common stock during the year ended December 31, 2006. The following table shows our stock repurchase activity during the fourth quarter of 2007.

Period	Total Number of Shares Purchased(1)	Average Price Paid Per Share(2)	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs(1)
October 1 31, 2007	59,700	17.24	234,700	1,765,300
November 1 30, 2007	64,600	13.39	299,300	1,700,700
December 1 31, 2007			299,300	1,700,700

(1)

On August 7, 2007, our board of directors authorized and announced the repurchase of 2,000,000 shares of our common stock in open-market or in privately negotiated transactions. The amount and timing of purchases will depend upon a number of factors, including the price and availability of our shares and general market conditions. This program has no expiration date but may be

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

terminated by our board of directors at any time. We purchased an aggregate of 299,300 shares during the periods indicated above under this program. There were 1,700,700 shares remaining for repurchase under this program as of the filing date of this Annual Report on Form 10-K.

(2)

Includes brokerage commissions.

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

Item 6. Selected Financial Data.

The following table sets forth selected consolidated financial data, which was derived from our historical consolidated financial statements included in this Annual Report on Form 10-K for the periods then ended.

You should read the following information together with "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" and the consolidated financial statements and the notes thereto, which begins on Page F-1 of this Form 10-K.

	Year Ended December 31, 2007	Year Ended December 31, 2006	March 15, 2005 (commencement of operations) to December 31, 2005

Total assets	\$ 2,479,438	\$ 3,774,645	\$ 2,669,769
Long-term obligations:			
Debt collateralized debt obligations	486,608	194,396	227,500
Debt notes payable, related party			35,000
Debt junior subordinated notes	51,550		
Debt mortgages payable	219,380		
Debt senior mortgage-backed notes, related party	99,815		
Debt secured revolving credit facility, related party	67,319		
Total long-term obligations	924,672	194,396	262,500
Stockholders' equity	110,592	556,314	381,429

(1) Includes \$555, \$1,024 and \$627, respectively, of stock based compensation.

(2) Includes \$584, \$324 and \$81, respectively, of stock based compensation.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion should be read in conjunction with the consolidated financial statements and notes thereto appearing elsewhere in this Annual Report on Form 10-K. Historical results set forth are not necessarily indicative of our future financial position and results of operations.

Overview

We are a specialty finance company formed on January 25, 2005 by Hyperion Brookfield to invest in commercial real estate, real estate loans, real estate related securities, such as commercial and residential mortgage-backed securities, and various other asset classes. We commenced operations in March 2005. We have elected and qualified to be taxed as a REIT for federal income tax purposes commencing with our taxable year ended December 31, 2005 and expect to qualify as a REIT in subsequent tax years. We invest in financial assets and intend to construct an investment portfolio that is leveraged where appropriate to seek to achieve attractive risk-adjusted returns and that is structured to comply with the various federal income tax requirements for REIT status and to qualify for an exclusion from regulation under the Investment Company Act of 1940, which we refer to as the Investment Company Act. Our current focus is on the following asset classes:

Commercial real estate, commercial real estate-related securities (principally CMBS), Agency MBS and RMBS;

Whole mortgage loans, bridge loans, B Notes and mezzanine loans; and

Other ABS, including CDOs and consumer ABS.

We completed a private offering of 17,400,000 shares of our common stock in March 2005 in which we raised net proceeds of approximately \$405.6 million. We completed our initial public offering of 7,500,000 shares of our common stock, which we refer to as our IPO, in August 2006 in which we raised net proceeds of approximately \$158.6 million. We have fully invested the proceeds from the March 2005 private offering and our IPO, and, as of December 31, 2007, have a portfolio of commercial real estate, MBS and other investments of approximately \$2.3 billion, which we may reallocate from time to time to achieve our optimal portfolio allocation for prevailing market conditions. We are externally managed by Hyperion Brookfield Crystal River. Hyperion Brookfield Crystal River is a wholly-owned subsidiary of Hyperion Brookfield.

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

We earn revenues and generate cash through our investments. We use a substantial amount of leverage to seek to enhance our returns. We finance each of our investments with different degrees of leverage with a goal of financing long-term assets with long-term financing. The cost of borrowings to finance our investments comprises a significant portion of our operating expenses. Our net income will depend, in large part, on our ability to control this particular operating expense in relation to our revenues.

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

A variety of industry and economic factors may impact our financial condition and operating performance. These factors include:

- interest rate trends,
- rates of prepayment on mortgages underlying our MBS,
- delinquency and loss trends in RMBS and our commercial real estate investments,
- valuation of residential and commercial properties,
- competition, and
- other market developments.

In addition, a variety of factors relating to our business may also impact our financial condition and operating performance. These factors include:

- our leverage,
- our access to funding and borrowing capacity,
- our borrowing costs,
- our hedging activities,
- the market value of our investments, and
- REIT requirements and the requirements to qualify for an exemption from regulation under the Investment Company Act.

Our Business Model

Our interest, dividend and rental income net of interest expense, which we refer to as our net investment income, is generated primarily from the net spread, or difference, between the interest, dividend and rental income we earn on our investment portfolio and the cost of our borrowings and hedging activities. Our net investment income will vary based upon, among other things, the difference between the interest rates earned on our various interest-earning assets and the borrowing costs of the liabilities used to finance those investments. Other than our investments in Agency MBS, we generally attempt to match fund our assets in order to match the maturity of the investments with the maturity of the financing sources used to make such investments. Although we do not match fund Agency MBS due to their average 30 year maturities, we utilize interest rate swaps to hedge a portion of our interest rate exposure to these securities. We also utilize CDO financings or other securitizations when available, where match funding occurs as a result of cash flows from the collateral pool paying the interest on the debt securities issued by the CDO or other securitization structure.

We anticipate that, for any period during which our assets are not match-funded, such assets could reprice slower or faster than the corresponding liabilities. Consequently, changes in interest rates, particularly short-term interest rates, may significantly influence our net income. Increases in these rates could tend to decrease our net income and the market value of our assets, and could possibly result in operating losses for us or limit or eliminate our ability to make distributions to our stockholders.

The yield on our assets may be affected by a difference between the actual prepayment rates and our projections. Prepayments on loans and securities may be influenced by changes in market interest rates and a variety of economic, geographic and other factors beyond our control, and

consequently, such prepayment rates cannot be predicted with certainty. To the extent we have acquired assets at a premium or discount, a change in prepayment rates may affect our anticipated yield. Under certain

interest rate and prepayment scenarios we may fail to recoup fully our cost of acquisition of certain assets.

Certain of our investments, including RMBS and subordinate CMBS, currently generate substantial mismatches between taxable income and available cash. In order to meet the requirement to distribute a substantial portion of our net taxable income, we may need to borrow, sell assets or raise additional equity capital.

In periods of declining interest rates, which we are currently experiencing, we expect the prepayments on our investments, including our RMBS, to increase. If we are unable to reinvest the proceeds of such prepayments at comparable yields, our net investment income may suffer. In periods of rising interest rates, prepayment rates on our investments, including our Agency MBS and RMBS, will likely slow, causing the expected lives of these investments to increase. This may cause our net investment income to decrease as our borrowing and hedging costs rise while our interest income on those assets remains constant. Interest rate declines, however, generally do not affect the prepayment rates on CMBS as the underlying loans in the CMBS typically are protected from prepayment rates.

Although we use hedging to mitigate some of our interest rate risk, we do not hedge all of our exposure to changes in interest rates and prepayment rates, as there are practical limitations to our ability to insulate the portfolio from all of the negative consequences associated with changes in short-term interest rates while still seeking to provide an attractive net spread on our portfolio.

In addition, our returns have been and will continue to be affected by the credit performance of our CMBS and Non-Agency RMBS investments. If credit losses on our investments or the loans underlying our investments increase, it may have an adverse affect on our performance.

Hyperion Brookfield Crystal River is entitled to receive a base management fee that is based on the amount of our equity (as defined in the management agreement), regardless of the performance of our portfolio. Accordingly, the payment of our base management fee is not primarily dependent on our profitability (except to the extent that our equity is affected) and may provide us with an incentive to incur losses. We and our Manager have agreed that during 2008, we will pay our base management fee to our Manager in shares of our common stock valued at the weighted average closing price during the last five trading days of the applicable fiscal quarter.

Our ability to maintain our dividends and grow our business is dependent on our ability to invest our capital on a timely basis at yields which exceed our cost of capital. The primary market factor that bears on this is credit spreads.

Generally speaking, compression of credit spreads can increase the unrealized gains on our current investments and reduce our net investment income, but also reduce the yields available on potential new investments, while widening credit spreads reduce the realized and unrealized gains on our current investments (or cause realized and unrealized losses) and can increase the net investment income available on potential new investments.

During 2007, credit spreads widened. The widening of credit spreads and increasing interest rates caused a significant increase in the net unrealized losses on our available for sale securities. Net unrealized losses initially are recorded in accumulated other comprehensive loss. We periodically evaluate our portfolio of available for sale securities for impairment and reclassify such unrealized losses to impairments on available for sale securities in our statement of operations when appropriate, which in the second half of 2007 caused our book value per share to decrease. One of the key drivers for the widening of credit spreads has been the recent disruption in the sub-prime mortgage lending sector. Furthermore, this widening of credit spreads has spilled over to the CMBS sector as well as to the financing market.

In addition to widening credit spreads, the recent disruption in the sub-prime mortgage lending sector has adversely affected the market in which we operate in a number of other ways. For example,

the market disruption has reduced the trading activity for many real estate securities, resulting in less liquid markets for those securities. As the securities we hold are marked to market at the end of each quarter, the decreased liquidity and concern over market conditions have resulted in lower valuations of substantially all of our CMBS, RMBS and preferred equity investments in the second half of 2007. These lower valuations have affected us by, among other things, decreasing our net book value and in contributing to our decision to record other than temporary non-cash impairments (discussed below in " Critical Accounting Policies Valuation of MBS and ABS"). In addition, Standard & Poor's and Moody's recently have issued a series of credit rating downgrades on various real estate securities. While neither the number nor the amount of our securities that were downgraded was material, we and other market participants may face additional downgrades of our securities in the future. Through March 10, 2008, 14 of the sub-prime RMBS that we owned at December 31, 2007, which had an aggregate carrying value of \$9.0 million at December 31, 2007, had been downgraded below their lowest rating at December 31, 2007.

We do not currently know the full extent to which this recent disruption will affect us or the markets in which we operate. If the disruption continues, we may experience continued tightening of liquidity, additional impairment charges and increased margin requirements as well as challenges in raising additional capital and obtaining investment financing on attractive terms. Future market developments may continue to have a materially negative impact on our business or results of operations. Based on our cash balances and available financing, we believe that we have sufficient liquidity in the current market environment. Moreover, these developments may produce a number of attractive investment opportunities to us in the future.

Trends

We believe the following trends may also affect our business:

Uncertain interest rate environment We believe that the market disruption in the third and fourth quarters of 2007 will have a dramatic effect on the economy in the coming quarters. Weakness in the residential real estate market and lending environment in general should result in a slowdown in the economy. The Federal Reserve has reacted by easing Monetary Policy and the government is expected to enact certain fiscal policies in an effort to increase consumer demand, all of which we believe should help the economy avoid a prolonged recession.

With respect to our existing MBS portfolio, which is heavily concentrated in 3/1 and 5/1 hybrid adjustable-rate Agency MBS, a decline in interest rates would benefit us by reducing our funding costs but it might cause prepayments to rise rapidly, in which case we then would be in the position of having to reinvest at lower yields. On the other hand, interest rate increases could result in decreases in our net investment income, as there is a timing mismatch between the reset dates on our MBS portfolio and the maturities of the financing utilized for these investments. At the current prices, our Agency MBS may be limited in price appreciation as interest rates fall, whereas the value of our interest rate hedges may continue to decrease in value.

We currently have invested and intend to continue to invest in hybrid adjustable-rate Agency MBS and Non-Agency RMBS that are based on mortgages with periodic interest rate caps. The financing of these MBS is short term in nature and does not include the benefit of an interest rate cap. This mismatch could result in a decrease in our net investment income if rates increase sharply after the initial fixed-rate period and our interest cost increases more than the interest rate earned on our MBS due to the related interest rate caps. With respect to our existing and future floating rate investments, we believe such interest rate increases could result in increases in our net investment income because our floating rate assets are greater in amount than the related liabilities.

However, we would expect that our fixed-rate assets would decline in value in a rising interest rate environment and our net interest spreads on fixed-rate assets could decline in a rising interest rate

environment to the extent they are financed with floating rate debt. We have engaged in interest rate swaps to hedge a portion of the risk associated with increases in interest rates and will continue to actively monitor the relationship between funding costs and prepayments. However, because we do not hedge 100% of the amount of short-term financing outstanding, increases in interest rates could result in a decline in the value of our portfolio, net of hedges. Similarly, decreases in interest rates could result in an increase in the value of our portfolio.

Liquidity Managing liquidity has become a priority for our company. Whereas most of our assets, such as the commercial real estate properties and the assets held by our CDOs have been financed with long-term liabilities, some of our assets are financed short-term while they are in transition toward longer-term financing solutions. These short-term financings typically are collateralized reverse repurchase agreements. As asset values decline, margin calls from our financing counterparties place demands on our cash and other liquidity sources. This can force us to sell assets and deleverage the balance sheet, which could negatively impact earnings and negatively impact our ability to make distributions to our stockholders.

Weakness of mortgage market The sub-prime market has been severely affected by changes in the lending landscape; for now and for the foreseeable future, access to mortgages for sub-prime borrowers has been substantially limited. This limitation on financing is expected to have an impact on all mortgage loans that are resetting and is expected to result in increased default rates. The severity of the liquidity limitation was largely unanticipated by the markets. As well, the liquidity issues also affect prime and alt-a Non-Agency lending, with mortgage rates remaining much higher and the origination of many product types being completely curtailed. At the margin, this has an impact on new demand for homes, which will compress the home ownership rates and weigh heavily on future home price performance. There is a strong correlation between home price growth rates and mortgage loan delinquencies. This comes in addition to the delinquency pressures in the sub-prime market resulting from weaker underwriting, which put many sub-prime lenders out of business in 2006 and 2007. The market deterioration has caused us to expect increased losses related to our holdings over time, but in the immediate period, has resulted in a decline in the market values of our assets. We continually monitor and adjust our cash flow assumptions in light of current and projected market conditions, and we believe that results in an accurate representation of value on our balance sheet.

We believe that, at this time, the underlying losses in the sub-prime market have not fully manifested themselves in the securitizations. Accordingly, there are a number of factors that can help to mitigate issues before they fully impact the market. The government does have a number of programs that it can utilize to help the conditions in the mortgage industry. Increasing the lending capacity of Federal National Mortgage Association, Federal Home Loan Mortgage Corporation and Government National Mortgage Association, expanding guidelines for government programs such as FHA Secure, enacting tax legislation for debt forgiveness, lowering of interest rates by the Federal Reserve and Fiscal Stimulus are all programs that could dampen the issues that currently exist in the mortgage market. As of December 31, 2007, we had \$52.7 million of exposure to sub-prime RMBS.

Structured finance transactions The dislocations in the sub-prime market have rippled throughout the structured finance markets. Despite continued positive fundamental performance, yield spreads on CMBS and prime Non-Agency RMBS have widened dramatically during 2007, resulting in significant negative mark to market adjustments to our assets. The issuance of CDOs, which has been a key financing tool for us and our peers, has come to a halt, cutting off an attractive financing alternative for the time being.

Downgrades of structured securities by the rating agencies are likely to continue through the first half of 2008. Large-scale downgrades have the potential to cause another liquidity crisis similar to that of July and August 2007, as the downgrades could trigger forced sales of MBS by structured investment vehicles, or SIVs, and asset-backed commercial paper issuers, or ABCPs.

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

Steepening yield curve In reaction to the distress in the markets, interest rates were lower across the yield curve with rates for shorter maturities falling more than rates for longer maturity bonds. With respect to our MBS portfolio, we believe that a steeper yield curve could result in an increase in our net investment income, as the financing of our MBS investments is usually shorter in term than the fixed-rate period of our MBS portfolio, which is heavily weighted toward 3/1 and 5/1 hybrid adjustable-rate Agency MBS. Similarly, we believe that a flattening of the yield curve could result in a decrease in our net investment income. A flattening of the shape of the yield curve results in a smaller gap between the rate we pay on the swaps and rate we receive. Furthermore, a flattening of the shape of the yield curve could result in a decrease in our hedging costs because we pay a fixed rate and receive a floating rate under the terms of our swap agreements. Similarly, a steepening of the shape of the yield curve could result in an increase in our hedging costs.

Spread widening and diminution of market value of available for sale securities The credit crisis has resulted in a decline in prices (spread widening) across many asset classes, including municipal bonds, corporate bonds, Agency MBS, bank loans, RMBS and CMBS. Price declines in RMBS and CMBS have been the most severe, in some cases falling by over 60% in value in the span of a few months. The cause of the devaluations are twofold: first, in the RMBS market, the fundamentals have deteriorated as increased delinquencies and foreclosures have plagued the market, and second, deleveraging of balance sheets have caused selling of securities which has put downward pressure on prices. This decline in value impacts us in a number of ways. It impacts book value as our available for sale securities are carried at fair value and the decline in values are reflected in our book values either through the balance sheet in other comprehensive income, or through the income statement as an impairment of available for sale securities. Lower valuations for our assets may cause our lenders to initiate margin calls, which places demands on our liquidity facilities. Finally, lower values may be an indication of deteriorating fundamentals and increased credit losses over and above that of our underwriting.

Recently, the Agency MBS market has come under pressure from sales into the market of Agency MBS serving as collateral due to increased margin requirements from dealers. This could require us to post additional collateral and/or cash, which could adversely affect our liquidity. Fundamentally, we believe the credit quality of Agency MBS are implicitly backed by the U.S. Government, but we are concerned about the poor technicals that could drive further selling pressure in the sector.

Prepayment rates Typically, as interest rates fall, prepayment rates rise. However, this cycle could be different as the decline in housing market activity could keep prepayment rates low. Prepayment rates also may be affected by other factors, including, without limitation, conditions in the housing and financial markets, general economic conditions and the relative interest rates on adjustable-rate and fixed-rate mortgage loans. If prepayment rates increase, our current portfolio, which is heavily weighted towards hybrid adjustable-rate mortgages, could cause decreases in our net investment income relating to our MBS portfolio as we reinvest at lower yields.

Competition We expect to face increased competition for our targeted investments. However, we expect that the size and growth of the market for these investments will continue to provide us with a variety of investment opportunities. In addition, we believe that bank lenders will continue their historical lending practices, requiring low loan-to-value ratios and high debt service coverage ratios, which will provide opportunities to lenders like us to provide corporate mezzanine financing.

For a discussion of additional risks relating to our business, see the risk factors disclosed under Part I, "Item 1A. Risk Factors."

Critical Accounting Policies

Our financial statements are prepared in accordance with U.S. GAAP. These accounting principles require us to make some complex and subjective decisions and assessments. These include fair market

value of certain assets, amount and timing of credit losses, prepayment assumptions, and other items that affect the reported amounts of certain assets and liabilities as of the date of the consolidated financial statements and the reported amounts of certain revenues and expenses during the reported period. It is likely that changes in these estimates (*e.g.*, market values change due to changes in supply and demand, credit performance, prepayments, interest rates, or other reasons; yields change due to changes in credit outlook and loan prepayments) will occur in the near future. Our most critical accounting policies involve decisions and assessments that could affect our reported assets and liabilities as well as our reported revenues and expenses. We believe that all of the decisions and assessments upon which our financial statements are based were reasonable at the time made based upon information available to us at that time. We rely on the experience of Hyperion Brookfield and Crystal River's management and its analysis of historical and current market data in order to arrive at what we believe to be reasonable estimates. See Note 2 to our consolidated financial statements contained elsewhere herein for a complete discussion of our accounting policies. Our estimates are inherently subjective in nature and actual results could differ from our estimates and differences may be material. We have identified our most critical accounting policies to be the following:

Investment Consolidation

For each investment we make, we evaluate the underlying entity that issued the securities we acquired or to which we made a loan in order to determine the appropriate accounting. We refer to guidance in Statement of Financial Accounting Standards ("SFAS") No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities* ("SFAS 140"), and FASB Interpretation No. (FIN) 46R, *Consolidation of Variable Interest Entities* ("FIN 46R"), in performing our analysis. FIN 46R addresses the application of Accounting Research Bulletin No. 51, *Consolidated Financial Statements*, to certain entities in which voting rights are not effective in identifying an investor with a controlling financial interest. An entity is subject to consolidation under FIN 46R if the investors either do not have sufficient equity at risk for the entity to finance its activities without additional subordinated financial support, are unable to direct the entity's activities, or are not exposed to the entity's losses or entitled to its residual returns ("variable interest entities" or "VIEs"). Variable interest entities within the scope of FIN 46R are required to be consolidated by their primary beneficiary. The primary beneficiary of a VIE is determined to be the party that absorbs a majority of the VIE's expected losses, receives the majority of the VIE's expected returns, or both.

Our ownership of the subordinated classes of CMBS and RMBS from a single issuer may provide us with the right to control the foreclosure/workout process on the underlying loans, which we refer to as the Controlling Class CMBS and RMBS. There are certain exceptions to the scope of FIN 46R, one of which provides that an investor that holds a variable interest in a qualifying special-purpose entity ("QSPE") is not required to consolidate that entity unless the investor has the unilateral ability to cause the entity to liquidate. SFAS 140 sets forth the requirements for an entity to qualify as a QSPE. To maintain the QSPE exception, the special-purpose entity must initially meet the QSPE criteria and must continue to satisfy such criteria in subsequent periods. A special-purpose entity's QSPE status can be impacted in future periods by activities undertaken by its transferor(s) or other involved parties, including the manner in which certain servicing activities are performed. To the extent that our CMBS or RMBS investments were issued by a special-purpose entity that meets the QSPE requirements, we record those investments at the purchase price paid. To the extent the underlying special-purpose entities do not satisfy the QSPE requirements, we follow the guidance set forth in FIN 46R as the special-purpose entities would be determined to be VIEs.

We have analyzed the pooling and servicing agreements governing each of our Controlling Class CMBS and RMBS investments and we believe that the terms of those agreements are industry standard and are consistent with the QSPE criteria. However, there is uncertainty with respect to QSPE treatment for those special-purpose entities due to ongoing review by regulators and accounting standard setters (including the project of the Financial Accounting Standards Board ("FASB") to

amend SFAS 140 and the recently added FASB project on servicer discretion in a QSPE), potential actions by various parties involved with the QSPE (discussed in the paragraph above) and varying and evolving interpretations of the QSPE criteria under SFAS 140. We also have evaluated each of our Controlling Class CMBS and RMBS investments for which we own a greater than 50% interest in the subordinated class as if the special-purpose entities that issued such securities are not QSPEs. Using the fair value approach to calculate expected losses or residual returns, we have concluded that we would not be the primary beneficiary of any of the underlying special-purpose entities. Additionally, the standard setters continue to review the FIN 46R provisions related to the computations used to determine the primary beneficiary of VIEs. Future guidance from regulators and standard setters may require us to consolidate the special-purpose entities that issued the CMBS and RMBS in which we have invested as described in the section titled "Variable Interest Entities" in Note 2 to our consolidated financial statements included elsewhere herein.

Our maximum exposure to loss as a result of our investment in these QSPEs totaled \$162.0 million as of December 31, 2007.

Revenue Recognition

The most significant source of our revenue comes from interest income on our securities and loan investments. Interest income on loans and securities investments is recognized over the life of the investment using the effective interest method. Mortgage loans will generally be originated or purchased at or near par value and interest income will be recognized based on the contractual terms of the debt instrument. Any loan fees or acquisition costs on originated loans will be deferred and recognized over the term of the loan as an adjustment to the yield. Interest income on MBS is recognized on the effective interest method as required by Emerging Issues Task Force ("EITF") 99-20, *Recognition of Interest Income and Impairment on Purchased and Retained Beneficial Interests in Securitized Financial Assets* ("EITF 99-20"). Under EITF 99-20, management estimates, at the time of purchase, the future expected cash flows and determines the effective interest rate based on these estimated cash flows and our purchase prices. Subsequent to the purchase and on a quarterly basis, these estimated cash flows are updated and a revised yield is calculated based on the current amortized cost of the investment. In estimating these cash flows, there are a number of assumptions that are subject to uncertainties and contingencies. These include the rate and timing of principal payments (including prepayments, repurchases, defaults and liquidations), the pass through or coupon rate and interest rate fluctuations. In addition, interest payment shortfalls have to be estimated due to delinquencies on the underlying mortgage loans and the timing and magnitude of credit losses on the mortgage loans underlying the securities. These uncertainties and contingencies are difficult to predict and are subject to future events that may affect management's estimates and our interest income. When current period cash flow estimates are lower than the previous period and fair value is less than an asset's carrying value, we will write down the asset to fair market value and record an impairment charge in current period earnings.

Through its extensive experience in investing in MBS, Hyperion Brookfield has developed models based on historical data in order to estimate the lifetime prepayment speeds and lifetime credit losses for pools of mortgage loans. The models are based primarily on loan characteristics, such as loan-to-value ratios ("LTV"), borrower credit scores, loan type, loan rate, property type, etc., and also include other qualitative factors such as the loan originator and servicer. Once the models have been used to project the base case prepayment speeds and to project the base case cumulative loss, those outputs are used to create yield estimates and to project cash flows.

Because mortgage assets amortize over long periods of time (*i.e.*, 25 to 30 years in the case of RMBS assets or 10 years in the case of CMBS assets), the expected lifetime prepayment experience and the expected lifetime credit losses projected by the models are subject to modification in light of actual experience assessed from time to time. For each of the purchased mortgage pools, our Manager

tracks the actual monthly prepayment experience and the monthly loss experience, if any. To the extent that the actual performance trend over a 6-12 month period of time does not reasonably approximate the expected lifetime trend, in consideration of the seasoning of the asset, our Manager may make adjustments to the assumptions and revise yield estimates and projected cash flows.

The following hypothetical example reflects the impact of a change in the historical prepayment experience:

Assumptions:
 Price = 101.75% of par
 Current Face = \$1,000,000
 Investment at cost = \$1,017,500

Constant Prepayment Rate	Yield	Annual Income	Percent Difference
6%	5.54%	\$ 57,129.30	14%
15%	5.09%	\$ 52,481.09	5%
20%	4.85%	\$ 49,978.37	0%
40%	3.97%	\$ 40,754.16	(18)%
60%	3.06%	\$ 31,394.35	(37)%

We have retained substantially all of the risks and benefits of ownership of our rental properties and therefore we account for leases with our tenants as operating leases. The total amount of contractual rent that we receive from operating leases is recognized on a straight-line basis over the term of the lease; and a straight-line or free rent receivable, as applicable, is recorded for the difference between the rental revenue recorded and the contractual amount received. In addition to base rent, the tenants in our commercial real estate properties also pay substantially all operating costs.

Expense reimbursement income arising from tenant leases which provide for the recovery of all or a portion of the operating expenses and real estate expenses of the respective property is accrued in the same period as the related expenses are incurred. These recoverable expenses are included in expenses as commercial real estate expenses.

Income arising from the operation of parking garages is recognized when the parking spaces are occupied. Expenses related to the operation of parking garages are included in expenses as commercial real estate expenses.

Loan Loss Provisions

We purchase and originate mezzanine loans and commercial mortgage loans to be held as long-term investments. We evaluate each of these loans for possible impairment on a quarterly basis. Impairment occurs when it is deemed probable that we will not be able to collect all amounts due according to the contractual terms of the loan. Upon determination of impairment, we will establish a reserve for loan losses and a corresponding charge to earnings through the provision for loan losses. Significant judgments are required in determining impairment, which include assumptions regarding the value of the real estate or partnership interests that secure the mortgage loans.

Valuations of MBS and ABS

Our MBS and ABS have fair values as determined with reference to price estimates provided by independent pricing services and dealers in the securities. Different judgments and assumptions used in pricing could result in different estimates of value.

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

When the fair value of an available-for-sale security is less than its amortized cost for an extended period, we consider whether there is an other than temporary impairment in the value of the security. If, in our judgment, an other than temporary impairment exists, the cost basis of the security is written down to the then-current fair value, and the unrealized loss is transferred from accumulated other comprehensive loss as an immediate reduction of current earnings (as if the loss had been realized in the period of other than temporary impairment). The determination of other than temporary impairment is a subjective process, and different judgments and assumptions could affect the timing of loss realization.

We consider the following factors when determining an other than temporary impairment for a security or investment:

The length of time and the extent to which the market value has been less than the amortized cost;

The underlying fundamentals of the relevant market and the outlook for such market for the near future; and

Our intent to hold the security for a period of time sufficient to allow for any anticipated recovery in market value.

Periodically, all available for sale securities are evaluated for other than temporary impairment in accordance with SFAS No. 115, *Accounting for Certain Investments in Debt and Equity Securities* ("SFAS 115"), Emerging Issues Task Force No. 99-20, *Recognition of Interest Income and Impairment on Purchased and Retained Beneficial Interest in Securitized Financial Assets* ("EITF 99-20") and SEC Staff Accounting Bulletin No. 59, which has been codified as SAB Topic 5.M, *Other Than Temporary Impairment of Certain Investments in Debt and Equity Securities* ("SAB 59"). An impairment that is an "other than temporary impairment" is a decline in the fair value of an investment below its amortized cost attributable to factors that indicate the decline will not be recovered over the investment's remaining life. Other than temporary impairments result in reducing the security's carrying value to its fair value through the statement of operations, which also creates a new carrying value for the investment. We compute a revised yield based on the future estimated cash flows as described in "Revenue Recognition" above. Significant judgments are required in determining impairment, which include making assumptions regarding the estimated prepayments, loss assumptions and the changes in interest rates.

The determination of other than temporary impairment is made at least quarterly. If we determine an impairment to be other than temporary we will need to realize a loss that would have an impact on future income. Under the guidance provided by SFAS 115, a security is impaired when its fair value is less than its amortized cost and we do not intend to hold that security until we recover its amortized cost or until its maturity. For the year ended December 31, 2007, we identified 59 Agency MBS and nine CMBS that were determined to be impaired under the guidance provided by SFAS 115-1 because we no longer have the intent to hold these securities until they recover their value or until maturity and accordingly, have designated them for possible sale. In connection with the impairment of these 68 securities, we recorded impairment charges of \$19.7 million in our statement of operations that was other than temporary. In addition, we recorded an impairment charge on 22 RMBS and seven CMBS under EITF 99-20 totaling \$70.6 million for the year ended December 31, 2007. We determined these securities to be impaired under EITF 99-20 because of the decline in the projected yields related to changes in the cash flow assumptions, such as timing and prepayments, on the underlying assets. Under the accounting rules of SAB 59, we recognized impairments totaling \$227.6 million on 108 RMBS, 115 CMBS and two preferred stock investments. These impairments are attributed to other than temporary declines in market values and are primarily a consequence of wider spreads affecting market values of the securities. As of December 31, 2007, we still owned 279 of these impaired securities.

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

Valuations of CDO Assets and Liabilities

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* ("SFAS 159"). SFAS 159 permits entities to choose to measure many financial instruments and certain other items at fair value to improve financial reporting by providing entities with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. SFAS 159 also establishes presentation and disclosure requirements designed to facilitate comparisons between entities that choose different measurement attributes for similar types of assets and liabilities. SFAS 159 is effective for financial statements issued for fiscal periods beginning after November 15, 2007. SFAS 159 will be effective for us beginning January 1, 2008, and will have the following effect at adoption (dollars in thousands):

	Historical December 31, 2007	At date of adoption	Cumulative effect adjustment
Collateralized debt obligations ("CDOs")	\$ 486,608	\$ 299,034	\$ 187,574
Deferred financing costs on CDOs, net of accumulated amortization	8,152		(8,152)
Net unrealized holding gains on available for sale securities within our CDO entities reclassified to declared dividends in excess of operations			1,670
			\$ 181,092
Total cumulative effect adjustment			\$ 181,092

In addition, we have \$290.9 million of notional interest rate positions relating to our CDOs that no longer qualify for hedge accounting at the date of adoption. Subsequent changes in fair value and net cash settlements prospectively will be recorded in our statement of operations.

Commercial Real Estate

Commercial properties held for investment are carried at cost less accumulated depreciation. In accordance with SFAS No. 141, *Business Combinations*, upon acquisition, we allocate the purchase price to the components of the commercial properties acquired: the amount allocated to land is based on its estimated fair value; buildings and existing tenant improvements are recorded at depreciated replacement cost; above- and below-market in-place operating leases are determined based on the present value of the difference between the rents payable under the contractual terms of the leases and estimated market rents; lease origination costs for in-place operating leases are determined based on the estimated costs that would be incurred to put the existing leases in place under the same terms and conditions; and tenant relationships are measured based on the present value of the estimated avoided net costs if a tenant were to renew its lease at expiry, discounted by the probability of such renewal. Based on these estimates, we allocate the initial purchase price to the applicable assets and liabilities. As final information regarding fair value of the assets acquired and liabilities assumed is received and estimates are refined, appropriate adjustments are made to the purchase price allocation. The allocations are finalized within twelve months of the acquisition date.

Depreciation on buildings is provided on a straight-line basis over the useful lives of the properties to a maximum of 40 years. Depreciation is determined with reference to each rental property's carried value, remaining estimated useful life and residual value. Acquired tenant improvements, above- and below-market in-place operating leases and lease origination costs are amortized on a straight-line basis over the remaining terms of the leases. The value associated with acquired tenant relationships is amortized on a straight-line basis over the expected term of the relationships. All other tenant improvements and re-leasing costs are deferred and amortized on a straight-line basis over the terms of

the leases to which they relate. Depreciation on buildings and amortization of deferred leasing costs and tenant improvements that are determined to be assets of the company are recorded in depreciation and amortization expense. All above- and below-market tenant leases and tenant relationships are amortized to revenue. Above- and below-market ground leases are amortized to commercial real estate expenses.

Properties are reviewed for impairment whenever events or changes in circumstances indicate the carrying value may not be recoverable. For commercial properties, an impairment loss is recognized when a property's carrying value exceeds its undiscounted future net cash flow. The impairment is measured as the amount by which the carrying value exceeds the estimated fair value. Projections of future cash flow take into account the specific business plan for each property and management's best estimate of the most probable set of economic conditions anticipated to prevail in the market.

We assess fair value based on estimated cash flow projections that utilize appropriate discount and capitalization rates and available market information. Estimates of future cash flows are based on a number of factors including the historical operating results, known trends, and market/economic conditions that may affect the property. Application of these assumptions requires the exercise of judgment as to future uncertainties and, as a result, actual results could differ from these estimates.

Accounting For Derivative Financial Instruments and Hedging Activities

Our policies permit us to enter into derivative contracts, including interest rate swaps, currency swaps, interest rate caps and interest rate swap forwards, as a means of mitigating our interest rate risk on forecasted interest expense associated with the benchmark rate on forecasted rollover/reissuance of repurchase agreements, or hedged items, for a specified future time period. We currently intend to use interest rate derivative instruments to mitigate interest rate risk rather than to enhance returns.

In the normal course of business, we use a variety of derivative instruments to manage, or hedge, interest rate risk. We require that hedging derivative instruments be effective in reducing the interest rate risk exposure that they are designated to hedge. This effectiveness is essential for qualifying for hedge accounting. Some derivative instruments are associated with an anticipated transaction. In those cases, hedge effectiveness criteria also require that it be probable that the underlying transaction occurs. Instruments that meet these hedging criteria are formally designated as hedges at the inception of the derivative contract.

To determine the fair value of derivative instruments, we use a variety of methods and assumptions that are based on market conditions and risks existing at each balance sheet date. For the majority of financial instruments including most derivatives, long-term investments and long-term debt, standard market conventions and techniques such as discounted cash flow analysis, option-pricing models, replacement cost, and termination cost are used to determine fair value. All methods of assessing fair value result in a general approximation of value, and such value may never actually be realized.

In the normal course of business, we are exposed to the effect of interest rate changes and limit these risks by following established risk management policies and procedures including the use of derivatives. To address exposure to interest rates, we use derivatives primarily to hedge the mark-to-market risk of our liabilities with respect to certain of our assets.

SFAS 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended by FASB No. 149, requires us to recognize all derivatives on the balance sheet at fair value. Derivatives that are not hedges must be adjusted to fair value through income. If a derivative is a hedge, depending on the nature of the hedge, changes in the fair value of the derivative will either be offset against the change in fair value of the hedged asset, liability, or firm commitment through earnings, or recognized in other comprehensive income until the hedged item is recognized in earnings. The ineffective portion of a derivative's change in fair value will be immediately recognized in earnings. SFAS 133 may increase or

decrease reported net income and stockholders' equity prospectively, depending on future changes in fair value.

At December 31, 2007, we were a party to 19 interest rate swaps and caps with a notional par value of approximately \$1,079.3 million; the fair value of our net liability relating to interest rate swaps and caps was approximately \$24.3 million, which is included in our derivative assets and derivative liabilities, and we had accrued interest payable of approximately \$4.1 million on our interest rate swaps and caps at such date. We entered into these interest rate swaps and caps to seek to mitigate our interest rate risk for the specified future time period, which is defined as the term of the swap and cap contracts. Based upon the market value of these interest rate swap and cap contracts, our counterparties may request additional margin collateral or we may request additional collateral from our counterparties to ensure that an appropriate margin account balance is maintained at all times through the expiration of the contracts.

During the third quarter of 2007, we sold two investments denominated in foreign currencies, and we terminated the corresponding currency swaps for a realized and unrealized loss of \$5.1 million. As of December 31, 2007, we did not have any currency swaps included in our derivative balances.

As of December 31, 2007, we had eight credit default swaps ("CDS") with a notional par value of \$75.0 million that are reflected on our balance sheet as a derivative liability at their fair value of approximately \$32.9 million. The fair value of the CDS depends on a number of factors, primarily premium levels, which are dependent on interest rate spreads. The CDS contracts are valued either by an independent third party pricing service or by using internally developed and tested market-standard pricing models that calculate the net present value of differences between future premiums on currently quoted market CDS and the contractual future premiums on our CDS contracts. During the year ended December 31, 2007, we closed out four CDS on single names in an aggregate notional amount of \$35.0 million, with a realized loss of approximately \$7.4 million, and nine CDS on the CMBX in an aggregate notional amount of \$135.0 million, with a realized loss of approximately \$32.6 million.

The components of our derivative assets and derivative liabilities relating to CDS as of December 31, 2007 and 2006 are as follows:

	December 31, 2007		December 31, 2006	
	Assets	Liabilities	Assets	Liabilities
(In thousands)				
Single names	\$	\$ 32,908	\$ 3,305	\$
CMBX				
ABX				
Total	\$	\$ 32,908	\$ 3,305	\$

We account for derivative and hedging activities in accordance with SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended ("SFAS 133"). SFAS 133 requires recognizing all derivative instruments as either assets or liabilities in the balance sheet at fair value. The accounting for changes in fair value (*i.e.*, gains or losses) of a derivative instrument depends on whether it has been designated and qualifies as part of a hedging relationship and further, on the type of hedging relationship. For those derivative instruments that are designated and qualify as hedging instruments, we must designate the hedging instrument, based upon the exposure being hedged, as a fair value hedge, cash flow hedge or a hedge of a net investment in a foreign operation. We have no fair value hedges or hedges of a net investment in foreign operations.

For derivative instruments that are designated and qualify as a cash flow hedge (*i.e.*, hedging the exposure to variability in expected future cash flows that is attributable to a particular risk), the effective portion of the gain or loss on the derivative instrument is reported as a component of other comprehensive income and reclassified into earnings in the same line item associated with the

forecasted transaction in the same period or periods during which the hedged transaction affects earnings (for example, in "interest expense" when the hedged transactions are interest cash flows associated with floating-rate debt). The remaining gain (loss) on the derivative instrument in excess of the cumulative changes in the present value of future cash flows of the hedged item, if any, is recognized in the realized and unrealized gain (loss) on derivatives in current earnings during the period of change. For derivative instruments not designated as hedging instruments, the gain or loss is recognized in realized and unrealized gain (loss) on derivatives in the current earnings during the period of change. Income and/or expense from interest rate swaps are recognized as a net adjustment to interest expense. We account for income and expense from interest rate swaps on an accrual basis over the period to which the payment and/or receipt relates.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires us to make a significant number of estimates in the preparation of the financial statements. These estimates include determining the fair market value of certain investments and derivative liabilities, amount and timing of credit losses, prepayment assumptions, allocation of purchase price to tangible and intangible assets on property acquisitions, and other items that affect the reported amounts of certain assets and liabilities as of the date of the consolidated financial statements and the reported amounts of certain revenues and expenses during the reported period. It is likely that changes in these estimates (*e.g.*, market values change due to changes in supply and demand, credit performance, prepayments, interest rates, or other reasons; yields change due to changes in credit outlook and loan prepayments) will occur in the near future. Our estimates are inherently subjective in nature and actual results could differ from our estimates and differences may be material.

Share-Based Payments

We account for share-based compensation issued to members of our board of directors, our Manager and certain of our senior executives using the fair value based methodology in accordance with SFAS No. 123R, *Accounting for Stock Based Compensation* ("SFAS 123R"). We do not have any employees, although we believe that members of our board of directors are deemed to be employees for purposes of interpreting and applying accounting principles relating to share-based compensation. We record as compensation costs the restricted common stock that we issued to members of our board of directors at fair value as of the grant date and we amortize the cost into expense over the applicable vesting period using the straight-line method. We recorded compensation costs for restricted common stock and common stock options that we issued to our Manager and that were reallocated to employees of our Manager and its affiliates that provide services to us at fair value as of the grant date and we remeasure the amount on subsequent reporting dates to the extent that the restricted common stock and/or common stock options are unvested. Prior to our initial public offering and listing on the New York Stock Exchange, unvested restricted stock was valued using appraised value, and subsequent to our initial public offering and listing, we used the closing price as reported on the New York Stock Exchange. Unvested common stock options are valued using a Binomial pricing model and assumptions based on observable market data for comparable companies. The assumptions we use in determining share-based compensation, including expected stock price volatility, dividend yield, risk free interest rate and the expected life of the options, are subject to judgments and the results of our operations would change if different assumptions were utilized. We amortize compensation expense related to the restricted common stock and common stock options that we granted to our Manager using the graded vesting attribution method in accordance with SFAS 123R.

Because we remeasure the amount of compensation costs associated with the unvested restricted common stock and unvested common stock options that we issued to our Manager and certain of our senior executives as of each reporting period, our share-based compensation expense reported in our

statements of operations will change based on the fair value of our common stock and this may result in earnings volatility.

Income Taxes

We operate in a manner that we believe will allow us to be taxed as a REIT and, as a result, we do not expect to pay substantial corporate-level income taxes. Many of the requirements for REIT qualification, however, are highly technical and complex. If we were to fail to meet these requirements and do not qualify for certain statutory relief provisions, we would be subject to federal income tax, which could have a material adverse impact on our results of operations and amounts available for distributions to our stockholders. In addition, Crystal River TRS Holdings, Inc., our TRS, is subject to corporate-level income taxes.

Our policy for interest and penalties on material uncertain tax positions recognized in our consolidated financial statements is to classify these as interest expense and operating expense, respectively. However, in accordance with Financial Interpretation Number 48, *Accounting for Uncertainty in Income Taxes* (FIN 48), we assessed our tax positions for all open tax years (Federal, years 2005 to 2006 and State, years 2005 to 2006) as of December 31, 2007 and concluded that we have no material FIN 48 liabilities to be recognized at this time.

Financial Condition

All of our assets at December 31, 2007 were acquired with the net proceeds of approximately \$405.6 million from our March 2005 private offering of 17,400,000 shares of our common stock, the net proceeds of approximately \$158.6 million from our August 2006 initial public offering of 7,500,000 shares of our common stock, the net proceeds of approximately \$48.6 million from our March 2007 issuance of trust preferred securities and our use of leverage.

Mortgage-Backed Securities

Some of our mortgage investment strategy involves buying higher coupon, higher premium dollar priced bonds, which takes on more prepayment risk (particularly call or prepayment risk) than lower dollar-priced strategies. However, we believe that the potential benefits of this strategy include higher income, wider spreads, and lower hedging costs due to the shorter option-adjusted duration of the higher coupon security.

The table below summarizes our MBS investments at December 31, 2007:

	CMBS	Agency MBS	RMBS
	_____	_____	_____
	(In thousands)		
Amortized cost	\$ 398,797	\$ 1,238,769	\$ 166,801
Unrealized gains	613	7,975	1,621
Unrealized losses		(62)	
	_____	_____	_____
Fair value	\$ 399,410	\$ 1,246,682	\$ 168,422
	_____	_____	_____

As of December 31, 2007, the CMBS, Agency MBS and RMBS in our portfolio purchased at a net premium or discount to their par value and our portfolio had a weighted average amortized cost of 47.9%, 100.5% and 46.1% of face amount, respectively. The CMBS and RMBS were valued below par at December 31, 2007 because we are investing in lower-rated bonds in the credit structure. Certain of the securities held at December 31, 2007 are valued below cost. Other than securities with respect to which impairments have been recorded, we do not believe any such securities are other than temporarily impaired at December 31, 2007.

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

Our MBS holdings were as follows at December 31, 2007:

	Estimated Asset Value(1)	Percent of Total Investments	Weighted Average			Constant Prepayment Rate(4)
			Coupon	Months to Reset(2)	Market Yield to Maturity(3)	
(In thousands)						
CMBS:						
Investment grade CMBS	\$ 182,227	8.1%	5.84%		11.57%	
Below investment grade CMBS	217,183	9.6	5.03		18.95	
Total CMBS	\$ 399,410	17.7%	5.29		15.58	
Agency MBS:						
3/1 hybrid adjustable rate	\$ 252,874	11.2%	5.39	17.21	5.14	36.87%
5/1 hybrid adjustable rate	993,808	44.0	5.68	41.18	4.93	37.34
Total Agency MBS	\$ 1,246,682	55.2%	5.62	36.30	4.98	37.24
Non-Agency RMBS:						
Non-Agency Prime MBS:

Below investment grade	102,064	4.5	6.88	12.60	45.60	26.40
Total Non-Agency Prime MBS	115,721	5.1	6.79	14.88	41.51	26.44
Non-Agency Sub-prime MBS:						
Investment grade	18,983	0.8	6.79	4.17	125.15	32.01
Below investment grade	33,718	1.5	7.63	0.45	157.48	31.75
Total Non-Agency Sub-prime MBS	52,701	2.3	7.13	2.65	145.84	31.91
Total Non-Agency RMBS	\$ 168,422	7.4%	6.92	10.17	74.16	28.55

- (1) All securities listed in this chart are carried at their estimated fair value.
- (2) Represents number of months before conversion to floating rate.
- (3) Non loss adjusted yield
- (4) Represents the estimated percentage of principal that will be prepaid over the next 12 months based on historical principal paydowns.

The estimated weighted average lives of the MBS in the tables above are based upon our prepayment expectations, which are based on both proprietary and subscription-based financial models.

Our prepayment projections consider current and expected trends in interest rates, interest rate volatility, steepness of the yield curve, the mortgage rate of the outstanding loan, time to reset and the spread margin of the reset.

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

The table below summarizes the credit ratings of our MBS investments at December 31, 2007:

	CMBS	Agency MBS	RMBS	Total
	(In thousands)			
AAA	\$	\$ 1,246,682	\$	\$ 1,246,682
AA				
A				
BBB	182,227		32,640	214,867
BB	99,817		54,586	154,403
B	62,112		65,151	127,263
CCC	5,130		800	5,930
CC				
C			1,519	1,519
Not rated	50,124		13,726	63,850
Total	\$ 399,410	\$ 1,246,682	\$ 168,422	\$ 1,814,514

Actual maturities of MBS are generally shorter than stated contractual maturities, as they are affected by the contractual lives of the underlying mortgages, periodic payments of principal, and prepayments of principal. The stated contractual final maturity of the mortgage loans underlying our portfolio of MBS ranges up to 30 years, but the expected maturity is subject to change based on the prepayments of the underlying loans. As of December 31, 2007, the average final contractual maturity of the mortgage portfolio is 2036.

The constant prepayment rate, or CPR, attempts to predict the percentage of principal that will be prepaid over the next 12 months based on historical principal paydowns. As interest rates rise, the rate of refinancings typically declines, which we believe may result in lower rates of prepayment and, as a result, a lower portfolio CPR.

As of December 31, 2007, some of the mortgages underlying our Agency MBS had fixed interest rates for the weighted average lives of approximately 36.3 months, after which time the interest rates reset and become adjustable. The average length of time until contractual maturity of those mortgages as of December 31, 2007 was 28.5 years.

After the reset date, interest rates on our hybrid adjustable-rate Agency MBS float based on spreads over various LIBOR and Treasury indices. These interest rates are subject to caps that limit the amount the applicable interest rate can increase during any year, known as an annual cap, and through the maturity of the applicable security, known as a lifetime cap. The weighted average annual cap for the portfolio is an increase of 1.91%; the weighted average maximum increases and decreases for the portfolio are 6.12%. Additionally, the weighted average maximum increases and decreases for Agency hybrid MBS in the first year that the rates are adjustable are 4.11%.

The following table summarizes our CMBS, Agency MBS and RMBS according to their estimated weighted average life classifications as of December 31, 2007:

Weighted Average Life	CMBS		Agency MBS		RMBS	
	Fair Value	Amortized Cost	Fair Value	Amortized Cost	Fair Value	Amortized Cost
	(In thousands)					
Less than one year	\$	\$	\$	\$	\$ 14,933	\$ 14,400
Greater than one year and less than five years	2,058	2,058	1,246,682	1,238,769	109,198	108,505
Greater than five years	397,352	396,739			44,291	43,896
Total	\$ 399,410	\$ 398,797	\$ 1,246,682	\$ 1,238,769	\$ 168,422	\$ 166,801

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

The estimated weighted-average lives of the MBS in the tables above are based upon prepayment models obtained through subscription-based financial information service providers. The prepayment model considers current yield, forward yield, steepness of the yield curve, current mortgage rates, the mortgage rate of the outstanding loan, loan age, margin and volatility.

The actual weighted average lives of the MBS in our investment portfolio could be longer or shorter than the estimates in the table above depending on the actual prepayment rates experienced over the lives of the applicable securities and are sensitive to changes in both prepayment rates and interest rates.

Equity Securities

Our investment policies allow us to acquire equity securities, including common and preferred shares issued by other real estate investment trusts. At December 31, 2007, we held two investments in equity securities, totaling \$0.7 million. These investments are classified as available for sale and thus carried at fair value on our balance sheet with changes in fair value recognized in accumulated other comprehensive income until realized or determined to be other than temporarily impaired.

Changes in Carrying Value of Available for Sale Securities

The following sets forth information regarding the changes in the carrying value of our available for sale securities during the year ended December 31, 2007:

Activity During Year Ended December 31, 2007

Security Description	December 31, 2006 Estimated Fair Value	Net Purchases/ (Sales)	Principal Paydowns	Discount/ (Premium) Amortization	Impairments	Temporary Mark-to- Market Adjustments	December 31, 2007 Estimated Fair Value

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

Real Estate Loans

At December 31, 2007, our real estate loans are reported at their amortized cost of \$170.8 million. These investments are periodically reviewed for impairment. As of December 31, 2007, we recorded a loan loss reserve on one of our real estate loans.

In 2005, we originated a \$9.5 million mezzanine construction loan to develop luxury residential condominiums in Portland, Oregon. In September 2007, we entered into an agreement with the borrower and the senior lender to increase both the mezzanine construction loan and the senior loan that requires additional capital contributions from the project equity holder to cover the remaining costs to complete the project. The mezzanine construction loan bears interest at an annual rate of 16% and had a maturity date of November 2007, which was subsequently extended until May 2008. Under the amended agreement governing the terms of the loan, interest on the loan was paid in cash through March 2006, was capitalized through September 2007, and will be paid in cash through May 2008. We advanced an additional \$5.7 million, including capitalized interest of \$1.1 million during the year ended December 31, 2007.

The financing structures that we offer to the borrowers on certain of our real estate loans involve the creation of entities that could be deemed VIEs and therefore, could be subject to FIN 46R. The September 2007 agreement to provide additional financing discussed above triggered a reconsideration event under FIN 46R. This loan was determined to be a VIE; however, we concluded that we are not the primary beneficiary. For additional information, please see Note 4 to our consolidated financial statements. Our management has evaluated the remainder of our real estate loans and has concluded that none of the remaining real estate loans are VIEs that are subject to the consolidation rules of FIN 46R.

Currently, the projected total costs to complete the project have increased from \$41.4 million to \$59.4 million, including capitalized interest. As of December 31, 2007, of the 70 units available, 47 units have been sold.

We have evaluated the financial merits of the project by reviewing the projected unit sales and estimated construction costs and evaluating other collateral available to us (and the expected cost of realizing any recovery on that collateral) under the terms of the loan. We believe that it is probable that we will not recover the entire loan balance, including the capitalized interest, through the satisfaction of future cash flows from sales and other available collateral. Accordingly, based on our analysis, we have recorded provision for loan loss of \$4.5 million related to this loan during the year ended December 31, 2007. We will continue to monitor the status of this loan. However, housing prices, in particular condominium prices, may fall, unit sales may lag projections and construction costs may increase, all of which may increase the risk of recovery on our loan. No assurance can be given that we will not be required to record additional loan loss reserves with respect to this loan in the future depending on the borrower's ability to complete the project without additional cost overruns. In the event that we determine that it is probable that we will not be able to recover the current carrying value of this loan, additional loan loss reserves would be recorded.

Commercial Real Estate

At December 31, 2007, our commercial real estate is reported at cost of approximately \$239.5 million, net of accumulated depreciation of approximately \$4.7 million.

The table below summarizes our commercial real estate investments at December 31, 2007:

	Office	Total
(In thousands)		
Land	\$ 17,428	\$ 17,428
Building and improvements	222,045	222,045
	239,473	239,473
Commercial real estate, at cost	239,473	239,473
Accumulated depreciation	(4,710)	(4,710)
	234,763	234,763
Commercial real estate, net of depreciation	\$ 234,763	\$ 234,763

Interest and Principal Paydown Receivable

At December 31, 2007, we had interest and principal paydown receivables of approximately \$12.7 million. The total interest and principal paydown receivable amount consisted of approximately \$11.2 million relating to our MBS and approximately \$1.5 million relating to other investments.

Hedging Instruments and Derivative Activities

There can be no assurance that our hedging activities will have the desired beneficial impact on our results of operations or financial condition. Moreover, no hedging activity can completely insulate us from the risks associated with changes in interest rates and prepayment rates. We generally intend to hedge as much of the interest rate risk as Hyperion Brookfield Crystal River determines is in the best interests of our stockholders, after considering the cost of such hedging transactions and our desire to maintain our status as a REIT. Our policies do not contain specific requirements as to the percentages or amount of interest rate risk that our Manager is required to hedge.

As of December 31, 2007, we had engaged in interest rate swaps and interest rate caps as a means of mitigating our interest rate risk on forecasted interest expense associated with repurchase agreements for a specified future time period, which is the term of the swap or cap contract. An interest rate swap is a contractual agreement entered into by two counterparties under which each agrees to make periodic payments to the other for an agreed period of time based upon a notional amount of principal. Under the most common form of interest rate swap, a series of payments calculated by applying a fixed rate of interest to a notional amount of principal is exchanged for a stream of payments similarly calculated but using a floating rate of interest. This is a fixed-floating interest rate swap. We hedge our floating rate debt by entering into fixed-floating interest rate swap agreements whereby we swap the floating rate of interest on the liability we are hedging for a fixed rate of interest. An interest rate swap forward is an interest rate swap based on an interest rate to be set at an agreed future date. As of December 31, 2007, we were a party to interest rate swaps and caps with maturities ranging from January 2008 to July 2021 with a notional par amount of approximately \$1,079.3 million. Under the swap agreements in place at December 31, 2007, we receive interest at rates that reset periodically, generally every three months, and pay a rate fixed at the initiation of and for the life of the swap agreements. The current market value of interest rate swaps is heavily dependent on the current market fixed rate, the corresponding term structure of floating rates (known as the yield curve) as well as the expectation of changes in future floating rates. As expectations of future floating rates change, the market value of interest rate swaps changes. Based on the daily market value of those interest rate swaps and interest rate swap forward contracts, our counterparties may request additional margin collateral or we may request additional collateral from our counterparties to ensure that an appropriate margin account balance is maintained at all times through the maturity of the contracts. At December 31, 2007, the net realized and unrealized loss on interest rate swap and cap contracts recorded in accumulated other comprehensive income was \$25.2 million due to an increase in prevailing market interest rates.

As of December 31, 2007, we had engaged in credit default swaps, or CDS, which are accounted for as derivatives. CDS are derivative securities that attempt to replicate the credit risk involved with owning a particular unrelated third party security, which we refer to as a reference obligation. We enter into CDS on three types of securities: RMBS, CMBS and the CMBX and ABX indices. Investing in assets through CDS subjects us to additional risks. When we enter into a CDS with respect to an asset, we do not have any legal or beneficial interest in the reference obligation but have only a contractual relationship with the counterparty, typically a broker-dealer or other financial institution, and do not have the benefit of any collateral or other security or remedies that would be available to holders of the reference obligation or the right to receive information regarding the underlying obligors or issuers of the reference obligation. In addition, in the event of insolvency of a CDS counterparty, we would be treated as a general creditor of the counterparty to the extent the counterparty does not post collateral

and, therefore, we may be subject to significant counterparty credit risk. As of December 31, 2007, we were party to CDS with three counterparties. CDS are relatively new instruments, the terms of which may contain ambiguous provisions that are subject to interpretation, with consequences that could be adverse to us.

Currently, we are both the seller and the buyer of protection. The seller of protection through CDS is exposed to those risks associated with owning the underlying reference obligation. The seller, however, does not receive periodic interest payments, but instead it receives periodic premium payments for assuming the credit risk of the reference obligation. These risks are called "credit events" and generally consist of failure to pay principal, failure to pay interest, write-downs, implied write-downs and distressed ratings downgrades of the reference obligation.

For some CDS, upon the occurrence of a credit event with respect to a reference obligation, the buyer of protection may have the option to deliver the reference obligation to the seller of protection in part or in whole at par or to elect cash settlement. In this event, should the buyer of protection elect cash settlement for a credit event that has occurred, it will trigger a payment, the amount of which is based on the proportional amount of failure or write-down. In the case of a distressed ratings downgrade, the buyer of protection must deliver the reference obligation to the seller of protection, and there is no cash settlement option. In most cases, however, the CDS is a PAUG (pay as you go) CDS, in which case, at the point a write-down or an interest shortfall occurs, the protection seller pays the protection buyer a cash amount, and the contract remains outstanding until such time as the reference obligation has a factor of zero. In most of these instances, it will create a loss for the protection seller.

As of December 31, 2007, we were a party to eight credit default swaps with maturities ranging from June 2035 to October 2042 with a notional par amount of \$75.0 million. At December 31, 2007, the fair value of our net liability relating to credit default swap contracts was \$32.9 million, compared to a net asset of \$3.3 million at December 31, 2006, primarily as a result of an increase in the credit spreads of the CDS. During the year ended December 31, 2007, we closed out four CDS on single names in an aggregate notional amount of \$35.0 million, with a realized loss of approximately \$7.4 million, and nine CDS on the CMBX in an aggregate notional amount of \$135.0 million, with a realized loss of approximately \$32.6 million.

During the third quarter of 2007, we sold two investments denominated in foreign currencies. In connection with these sales, we terminated two corresponding foreign currency swaps and had a realized and unrealized loss on the termination totaling \$5.1 million. As of December 31, 2007, we did not have any foreign currency swaps in place.

Liabilities

We have entered into repurchase agreements to finance some of our purchases of available for sale securities and real estate loans. These agreements are secured by our available for sale securities and real estate loans and bear interest rates that have historically moved in close relationship to LIBOR. As of December 31, 2007, we had established numerous borrowing arrangements with various investment banking firms and other lenders. As of December 31, 2007, we were utilizing 11 of those arrangements.

At December 31, 2007, we had outstanding obligations under repurchase agreements with ten counterparties totaling approximately \$1,276.1 million with weighted average current borrowing rates of 5.03%, all of which have maturities of between seven and 43 days. We intend to seek to renew these repurchase agreements as they mature under the then-applicable borrowing terms of the counterparties to the repurchase agreements. At December 31, 2007, the repurchase agreements were secured by available for sale securities and equity investments and cash with an estimated fair value of approximately \$1,411.1 million and had weighted average maturities of 24 days. The net amount at risk, defined as fair value of the collateral, including restricted cash, minus repurchase agreement liabilities

and accrued interest expense, with all counterparties was approximately \$169.3 million at December 31, 2007.

At December 31, 2007, our wholly-owned subsidiary, CRZ ABCP Financing LLC, had outstanding \$99.8 million of senior mortgage-backed notes to an affiliate of our Manager. The senior mortgage-backed notes are collateralized by commercial whole mortgage loans. Senior mortgage-backed notes in the aggregate principal amount of \$101.5 million were issued to an affiliate of our Manager with floating coupons with varying interest rate spreads over the three-month LIBOR rate. Interest on the senior mortgage-backed notes is payable monthly. The senior mortgage-backed notes mature in April 2017 and the outstanding principal is due at maturity. Early repayments of the underlying mortgage loans require repayment of a portion of the senior mortgage-backed notes. The senior mortgage-backed notes are treated as a secured financing, and are non recourse to us. Proceeds from the sale of the senior mortgage-backed notes issued were used to repay outstanding debt under our repurchase agreements.

At December 31, 2007, we had \$51.6 million of junior subordinated notes outstanding. The junior subordinated notes are the sole assets owned by our subsidiary trust, Crystal River Preferred Trust I, and mature in April 2037. We have the right to redeem these notes at par on or after April 2012. Interest is payable quarterly at a fixed rate of 7.68% (ten-year LIBOR plus 2.75%) through April 2012 and thereafter at a floating rate equal to three-month LIBOR plus 2.75%.

At December 31, 2007, we had \$219.4 million of mortgage loans outstanding with a weighted-average borrowing rate of 5.58% that are secured by our commercial properties located in Houston, Texas, Phoenix, Arizona, and Arlington, Texas.

At December 31, 2007, we had \$67.3 million of borrowings outstanding under our secured revolving credit facility with an affiliate of our Manager that provides for borrowings of up to \$100.0 million in the aggregate and expires in May 2009. The secured facility bears interest at LIBOR + 2.50%. At December 31, 2007, we pledged \$37.3 million of interest in our equity investment in a private equity fund, \$21.0 million of mezzanine real estate loans and \$9.0 million of real estate construction loans as collateral under this facility.

Stockholders' Equity

Stockholders' equity at December 31, 2007 was approximately \$110.6 million and included \$9.7 million of net unrealized holdings gains on securities available for sale and \$25.2 million of net unrealized and realized losses on interest rate agreements accounted for as cash flow hedges presented as a component of accumulated other comprehensive income (loss).

Results of Operations For the Year Ended December 31, 2007 compared to the Year Ended December 31, 2006

Summary

Our net loss for the year ended December 31, 2007 was \$345.9 million or \$13.86 per weighted average basic and diluted share outstanding, compared with net income of \$46.9 million or \$2.27 per weighted average basic and diluted share outstanding for the year ended December 31, 2006. Net income decreased by \$392.8 million, or 837.5%, from 2006 to 2007, while net income per weighted average basic and diluted share outstanding decreased by \$16.13 or 710.6%, from 2006 to 2007 as the weighted average number of shares of our common stock outstanding increased from 20,646,637 for 2006 to 24,962,708 for 2007.

Revenues

The following table sets forth information regarding our revenues:

	Year Ended December 31,		Variance	
	2007	2006	Amount	%
(In millions)				
Revenues				
Interest income:				
Commercial MBS	\$ 45.3	\$ 25.7	\$ 19.6	76.3%
Agency MBS	102.1	104.0	(1.9)	(1.8)
Non-Agency RMBS	43.7	48.0	(4.3)	(9.0)
ABS	3.0	4.0	(1.0)	(25.0)
Real estate loans	17.1	11.9	5.2	43.7
Other interest and dividend income	8.7	7.6	1.1	14.5
	<u>219.9</u>	<u>201.2</u>	<u>18.7</u>	<u>9.3</u>
Total interest and dividend income	219.9	201.2	18.7	9.3
Rental income, net	16.2		16.2	n/a
	<u>236.1</u>	<u>201.2</u>	<u>34.9</u>	<u>17.4</u>
Total revenues	\$ 236.1	\$ 201.2	\$ 34.9	17.4

Interest income for the year ended December 31, 2007 with respect to CMBS and real estate loans increased \$19.6 million, or 76.3% and \$5.2 million, or 43.7%, respectively, over interest income for 2006 because of the higher balance of CMBS and real estate loans contained in our investment portfolio during 2007. Interest income for the year ended December 31, 2007 with respect to Non-Agency RMBS decreased \$4.3 million, or 9.0%, over interest income for 2006 because we had fewer investments in that asset class during 2007. Interest income for the year ended December 31, 2007 with respect to Agency MBS decreased \$1.9 million, or 1.8%, over interest income for 2006 because we sold a large portion of our Agency MBS investments during 2007 after initially increasing that component of our investment portfolio after our August 2006 IPO. For the year ended December 31, 2007, we also had income of \$16.2 million relating to rental income from our commercial property investments, which were made in 2007.

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

Expenses

The following table sets forth information regarding our total expenses:

	Year Ended December 31,		Variance	
	2007	2006	Amount	%
(In millions)				
Expenses				
Interest expense:				
Repurchase agreements	\$ 115.4	\$ 135.7	\$ (20.3)	(15.0)%
Interest rate swaps	(9.2)	(11.9)	2.7	(22.7)
CDO notes	29.7	12.1	17.6	145.5
Senior mortgage-backed notes, related party	4.0		4.0	n/a
Mortgages payable	9.1		9.1	n/a
Junior subordinated notes	3.1		3.1	n/a
Short-term debt	0.6	0.6		0.0
Secured revolving credit facility, related party	0.3		0.3	n/a
Margin borrowing	0.1	0.5	(0.4)	(80.0)
Notes payable, related party		0.2	(0.2)	(100.0)
Amortization of deferred financing costs	3.4	2.0	1.4	70.0
Other	0.3	0.4	(0.1)	(25.0)
Total interest expense	156.8	139.6	17.2	12.3
Management fees and incentive fees, related party	6.5	7.9	(1.4)	(17.7)
Professional fees	3.9	2.7	1.2	44.4

Insurance expense	0.9	0.4	0.5	125.0
Directors' fees	0.7	0.5	0.2	40.0
Public company expense	0.5	0.2	0.3	150.0
Commercial real estate expenses	1.0		1.0	n/a
Provision for loan loss	4.5		4.5	n/a
Other expenses	0.6	0.4	0.2	50.0
Total expenses	\$ 184.3	\$ 151.7	\$ 32.6	21.5

Interest expense relating to repurchase agreements, including with related parties, for the year ended December 31, 2007 decreased \$20.3 million, or 15.0%, over 2006 because approximately \$217.3 million of CMBS that was being financed with repurchase agreements in 2006 was financed through CDO 2006-1 in 2007 and because of lower repurchase agreement borrowings related to Agency MBS as a result of our sale during 2007 of approximately \$1.6 billion of Agency MBS. Interest expense relating to CDO notes for the year ended December 31, 2007 increased \$17.6 million, or 145.5%, over 2006 as a result of added interest expense from our second CDO financing, which closed in January 2007, and because interest rates were higher in 2007 than in 2006. Interest income from interest rate swaps for the year ended December 31, 2007 decreased \$2.7 million, or 22.7%, over 2006 because although interest rates in 2007 were higher than in 2006, we had more notional amount of interest rate swaps in place during 2007. For the year ended December 31, 2007, we also had interest expense relating to junior subordinated notes, mortgages payable, senior mortgage-backed notes, related party, and secured revolving credit facility, related party, totaling \$16.5 million as we first utilized these financing sources in 2007.

Expenses for 2007 also included base management fees and incentive fees of approximately \$5.9 million, and amortization of approximately \$0.6 million related to restricted stock and options

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

granted to our Manager. Expenses for 2006 also included base management fees and incentive fees of approximately \$6.9 million and amortization of approximately \$1.0 million related to restricted stock and options granted to our Manager. Management fee expenses decreased primarily due to the \$345.9 million net loss in 2007, which reduced the management fee for the third and fourth quarters of 2007, which was partially offset by the increase in stockholders' equity in late 2006 as a result of our initial public offering. For the year ended December 31, 2007, professional fees totaled \$3.9 million, which included approximately \$1.0 million of fees relating to compliance with the internal control over financial reporting provisions of the Sarbanes-Oxley Act of 2002, which we incurred in 2007 since this was the first year we were required to comply with those provisions. In addition, for the year ended December 31, 2007, we also had depreciation and amortization expense of \$8.9 million and commercial real estate expenses of \$1.0 million relating to our commercial property investments, which were made in 2007, and we incurred a \$4.5 million loan loss relating to one of our construction loans.

Our Manager has waived its right to request reimbursement from us of third-party expenses that it incurs through December 31, 2007, which amount otherwise would have been required to be reimbursed. The management agreement with Hyperion Brookfield Crystal River, which was negotiated before our business model was implemented, provides that we will reimburse our Manager for certain third party expenses that it incurs on our behalf, including rent and utilities. Hyperion Brookfield incurs such costs and did not allocate any such expenses to our Manager in 2005, 2006 or 2007 as our Manager's use of such services was deemed to be immaterial. Hyperion Brookfield currently is determining the amount of such rent and utility costs that will be allocated to our Manager commencing January 1, 2008, and we will be responsible for reimbursing such costs allocable to our operations absent any further waiver of reimbursement by our Manager. There are no contractual limitations on our obligation to reimburse our Manager for third party expenses and our Manager may incur such expenses consistent with the grant of authority provided to it pursuant to the management agreement without any additional approval of our board of directors being required. In addition, our Manager may defer our reimbursement obligation from any quarter to a future period; provided, however, that we will record any necessary accrual for any such reimbursement obligations when required by U.S. GAAP, and our Manager has advised us that it will promptly invoice us for such reimbursements consistent with sound financial accounting policies.

Other Revenues (Expenses)

Other expenses for 2007 totaled approximately \$397.7 million, compared with other expenses of \$2.6 million for 2006, an increase of \$395.1 million. Other expenses for the year ended December 31, 2007 consisted primarily of \$85.0 million of realized and unrealized loss on derivatives, primarily as a result of realized and unrealized losses on CDS of \$76.1 million, a \$5.1 million realized and unrealized loss on our settlement of two foreign currency swaps, a \$5.2 million increase in unrealized losses on economic hedges, \$1.7 million of realized net loss on the sale of securities available for sale, real estate loans and other investments, and a \$317.9 million loss on impairment of securities available for sale, which was comprised of a \$19.7 million impairment relating to CMBS and Agency MBS that we no longer intend to hold to maturity or until the recovery of our cost, and a \$70.6 million impairment relating to CMBS, Non-Agency RMBS and preferred stock investments, which was caused by adverse changes in cash flow assumptions and a \$227.6 million impairment caused by an other than temporary decline in market values due to spread widening. This decrease was offset in part by \$2.6 million of income from equity investments and \$4.3 million of realized foreign currency exchange gain. Other expenses for the year ended December 31, 2006 consisted primarily of a \$10.4 million loss on impairments of securities available for sale and \$2.1 million of realized net losses on securities available for sale, which was offset in part by \$10.3 million of realized and unrealized gains on derivatives (which included an unrealized gain of \$6.9 million on CDS and an unrealized gain of \$2.0 million on foreign currency swaps) and a \$0.6 million unrealized foreign currency exchange gain.

Income Tax Expense

We have made an election to be taxed as a REIT under Section 856(c) of the Internal Revenue Code of 1986, as amended, commencing with the tax year ended December 31, 2005. As a REIT, we generally are not subject to federal income tax. To maintain qualification as a REIT, we must distribute at least 90% of our REIT taxable income to our shareholders and meet certain other requirements. If we fail to qualify as a REIT in any taxable year, we will be subject to federal income tax on our taxable income at regular corporate rates. We may also be subject to certain state and local taxes on our income and property. Under certain circumstances, federal income and excise taxes may be due on our undistributed taxable income.

At December 31, 2007 and 2006, we were in compliance with all REIT requirements and, accordingly, have not provided for income tax expense on our REIT taxable income for the year ended December 31, 2007 or for the year ended December 31, 2006. We also have a domestic taxable REIT subsidiary that is subject to tax at regular corporate rates. The deferred tax benefit is attributable to the mark to market adjustments for net operating loss deductions, credit default swaps, and accrued management fees associated with our investment in a private equity fund held in the TRS. Our total income tax benefit for the year ended December 31, 2007 of \$0.9 million is included in the "other" caption in other revenues (expenses), which is a reversal of previously established deferred tax liability.

As of December 31, 2007, we recorded a \$15.5 million valuation allowance on deferred tax assets of \$15.5 million attributable to market value adjustments on credit default swaps and income tax net operating losses relating to our TRS. The valuation allowance is based on management's estimate that our TRS is not expected to generate sufficient taxable income to recover the deferred tax assets. As of December 31, 2006 we had a deferred tax liability of \$0.9 million attributable to market value adjustments on foreign currency swaps held in our TRS, which is included in accounts payable, accrued expenses and cash collateral payable. As of December 31, 2007, we had net operating loss carryforward and capital loss carryforward of approximately \$0.7 million and \$32.6 million, respectively. The net operating loss carryforward expires in 2027 and the capital loss carryforward expires in 2012.

Results of Operations For the Year Ended December 31, 2006 compared to the Period March 15, 2005 (commencement of operations) to December 31, 2005

Please note that, due to the fact that we only had nine and one half months of operations during the period March 15, 2005 (commencement of operations) to December 31, 2005, our results from the 2005 period are not comparable to our results for the year ended December 31, 2006.

Summary

Our net income for the year ended December 31, 2006 was \$46.9 million or \$2.27 per weighted average basic and diluted share outstanding, compared with \$13.9 million or \$0.80 per weighted average basic and diluted share outstanding for the period March 15, 2005 (commencement of operations) to December 31, 2005, which for purposes of this discussion we refer to as 2005. Net income increased by \$33.0 million, or 236.4%, from 2005 to 2006, but net income per weighted average basic and diluted share outstanding only increased by \$1.47, or 183.8%, from 2005 to 2006 because the weighted average number of shares of our common stock outstanding increased from 17,487,500 in 2005 to 20,646,637 in 2006.

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

Revenues

The following table sets forth information regarding our revenues:

	Year Ended December 31, 2006	March 15, 2005 (commencement of operations) to December 31, 2005	Variance	
			Amount	%
(In millions)				
Revenues				
Interest income:				
Commercial MBS	\$ 25.7	\$ 6.3	\$ 19.4	307.9%
Agency MBS	104.0	44.9	59.1	131.6
Non-Agency RMBS	48.0	21.4	26.6	124.3
ABS	4.0	2.3	1.7	73.9
Real estate loans	11.9	3.6	8.3	230.6
Other interest and dividend income	7.6	1.1	6.5	590.9
Total interest and dividend income	201.2	79.6	121.6	152.8
Rental income, net				n/a
Total revenues	\$ 201.2	\$ 79.6	\$ 121.6	152.8

Interest income for the year ended December 31, 2006 with respect to CMBS, Agency MBS, Non-Agency RMBS, ABS and real estate loans increased \$19.4 million, or 307.9%, \$59.1 million, or 131.6%, \$26.6 million, or 124.3%, \$1.7 million, or 73.9%, and \$8.3 million, or 230.6%, respectively, over interest income for 2005 because the 2005 results only represent a partial year, and because in 2006, our portfolio included more higher-yielding commercial real estate investments, including CMBS, B Notes and mezzanine loans.

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

Expenses

The following table sets forth information regarding our total expenses:

	Year Ended December 31, 2006	March 15, 2005 (commencement of operations) to December 31, 2005	Variance	
			Amount	%
(In millions)				
Expenses

Commercial real estate expenses				n/a
Provision for loan loss				n/a
Other expenses	0.4	0.4	0.0	0.0
Total expenses	\$ 151.7	\$ 56.9	\$ 94.8	166.6

Interest expense relating to repurchase agreements and notes, including with related parties, for the year ended December 31, 2006 increased \$92.5 million, or 214.1%, over 2005 because we financed a larger investment portfolio in 2006 and interest rates in 2006 were higher than in 2005. Interest expense relating to CDO notes for the year ended December 31, 2006 increased \$10.4 million, or 611.8%, over 2005 because our first CDO financing closed in December 2005. Interest expense from interest rate swaps for the year ended December 31, 2006 decreased \$15.1 million, or 471.9%, over 2005 due to an increase in interest rates during 2006. Interest expense increased in 2006 because the 2005 results only represent a partial year and due to increases in LIBOR during the first half of the year and an increase in the size of the portfolio being financed from 2005 to 2006 as a result of our initial public offering that closed in August 2006. The portion of interest expense comprised of net periodic payments received from interest rate swaps increased in 2006 as a result of increases in LIBOR during the first half of 2006.

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

Expenses for 2006 also included base management fees and incentive fees of approximately \$6.9 million and amortization of approximately \$1.0 million related to restricted stock and options granted to our Manager. Expenses for 2005 also included base management fees of approximately \$4.8 million and amortization of approximately \$0.6 million related to restricted stock and options granted to our Manager. Management fee expenses increased primarily due to a full year of operations in 2006 and the increase in stockholders' equity in 2006 as a result of our initial public offering.

Our Manager waived its right to request reimbursement from us of third-party expenses that it incurs through December 31, 2007, which amount otherwise would have been required to be reimbursed. The management agreement with Hyperion Brookfield Crystal River, which was negotiated before our business model was implemented, provides that we will reimburse our Manager for certain third party expenses that it incurs on our behalf, including rent and utilities. Hyperion Brookfield incurs such costs and did not allocate any such expenses to our Manager in 2005, 2006 or 2007 as our Manager's use of such services was deemed to be immaterial.

Other Revenues (Expenses)

Other expenses for 2006 totaled approximately \$2.6 million, compared with \$8.8 million for 2005, a decrease of \$6.2 million, or 70.1%. Other expenses for 2006 consisted primarily of a \$10.4 million loss on impairment of securities available for sale and \$2.1 million of realized net losses on the sale of securities available for sale and real estate loans, which was offset in part by \$10.3 million of realized and unrealized gains on derivatives (which included an unrealized gain of \$6.9 million on CDS and an unrealized gain of \$2.0 million on foreign currency swaps) and a \$0.6 million foreign currency exchange gain. Other expenses for 2005 totaled approximately \$8.8 million, which consisted primarily of \$2.5 million of realized and unrealized losses on derivatives, \$0.5 million of realized net losses on the sale of real estate loans and securities available for sale and \$5.8 million of losses on impairment of securities available for sale. Impairment losses increased by \$4.6 million due primarily to impairments related to the sale of available for sale securities that were sold in order to deploy capital into higher yielding assets. Realized and unrealized gains on derivatives increased in 2006 due to increases in LIBOR.

Income Tax Expense

At December 31, 2006 and 2005, we were in compliance with all REIT requirements and, accordingly, have not provided for income tax expense on our REIT taxable income for the year ended December 31, 2006 or for the period March 15, 2005 (commencement of operations) to December 31, 2005. We also have a domestic taxable REIT subsidiary that is subject to tax at regular corporate rates. The deferred tax benefit is attributable to the mark to market adjustments for net operating loss deductions, credit default swaps, and accrued management fees associated with our investment in a private equity fund held in the TRS. Our total income tax expense for the year ended December 31, 2006 of \$0.9 million is included in the "other" caption in other revenues (expenses), which represents future tax expense relating to unrealized gains on our foreign currency swaps.

Liquidity and Capital Resources

Capital is required to fund our investment activities and operating expenses. We believe we currently have sufficient access to capital resources and will continue to use a significant amount of our available capital resources to fund our existing business plan. Our capital resources include cash on hand, cash flow from operations, principal and interest payments received from investments, borrowings under credit facilities, reverse repurchase agreements, CDOs, junior subordinated debenture issuances, and proceeds from stock offerings.

We held cash and cash equivalents of approximately \$27.5 million at December 31, 2007, which excludes restricted cash of approximately \$68.7 million that is used to collateralize certain of our

repurchase facilities (\$15.7 million), interest rate swaps and caps (\$18.3 million), CDS (\$32.9 million) and certain other obligations.

Our operating activities provided net cash of approximately \$35.1 million for the year ended December 31, 2007 primarily as a result of realized and unrealized loss on derivatives of \$88.8 million, non-cash impairment charges relating to available for sale securities of \$317.9 million, provision for loan loss of \$4.5 million, non-cash depreciation and amortization of stock based compensation, deferred financing costs and real estate assets of \$13.5 million, an increase in the return on investment from equity investments of \$2.6 million, and a realized net loss on available for sale securities, real estate loans and other investments of \$1.7 million. Operating activities provided further net cash from a net decrease in interest receivable of \$7.9 million. This was offset in part by a net loss of \$345.9 million and other non-cash activities, including accretion of a net discount on available for sale securities and real estate loans of \$19.4 million, a gain on foreign currency translation of \$4.3 million, amortization of intangible liabilities and deferred gains on derivatives of \$6.3 million, income from equity investments of \$2.6 million, accretion of interest on real estate loans of \$2.5 million and the reversal of a deferred tax liability of \$0.9 million. The increase in cash was also further offset by a net decrease in accounts payable and accrued liabilities, due to Manager and interest payable of \$17.6 million, a net increase in other receivables, prepaid expenses and other assets of \$2.7 million and \$1.9 million of payments on the settlement of derivatives.

Our operating activities provided net cash of approximately \$45.2 million for the year ended December 31, 2006 primarily as a result of net income of \$46.9 million, non-cash impairment charges relating to available for sale securities of \$10.4 million, and a net increase in accounts payable and accrued liabilities, due to Manager and interest payable of approximately \$13.5 million, offset in part by non-cash unrealized gains on derivatives of \$8.2 million, non-cash accretion of discount on assets of \$9.9 million, non-cash foreign currency exchange gain of \$0.5 million, an increase in interest receivable of \$10.3 million and the payment on settlement of a derivative of \$0.9 million.

Our operating activities provided net cash of approximately \$30.3 million during 2005 primarily as a result of net income of \$13.9 million, non-cash impairment charges relating to available for sale securities of \$5.8 million, non-cash unrealized losses on derivatives of \$2.6 million and an increase of \$23.3 million of accounts payable and accrued liabilities, due to Manager and interest payable, which was partially offset by \$3.8 million of accretion of discount on purchased securities and an increase of \$12.1 million of interest receivable.

Our investing activities provided net cash of \$860.7 million for the year ended December 31, 2007 primarily from proceeds received from the sale of securities available for sale of \$1,643.1 million, proceeds from the sale of real estate loans and other investments of \$78.2 million, proceeds from the redemption of real estate loans of \$37.0 million, proceeds from rent enhancement of \$1.8 million, principal repayments from available for sale securities and real estate loans totaling \$398.5 million, net proceeds received from acquisition of credit default swaps of \$4.9 million and return of capital from equity investments of \$5.9 million. This was partially offset by the purchase of securities available for sale of \$893.1 million, the purchase and funding of equity investments of \$42.1 million, the acquisition of commercial real estate and real estate loans totaling \$291.4 million, net cash paid to terminate swaps of \$48.0 million, net deposits of restricted cash for credit default swaps of \$32.9 million and net deposits of restricted cash for investment of \$1.0 million.

Our investing activities used net cash of \$892.7 million for the year ended December 31, 2006 primarily from the purchase of securities available for sale of \$1,972.6 million and the funding or purchase of real estate loans and other investments totaling \$164.1 million, which was partially offset by receipt of principal paydowns on securities available for sale and real estate loans of approximately \$536.1 million and \$708.5 million of proceeds from the sale of securities available for sale and the repayment of real estate loans.

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

Our investing activities used net cash of \$2,619.7 million during 2005 primarily from the purchase of securities available for sale of \$2,772.9 million and the funding or purchase of real estate loans totaling \$174.9 million, which was partially offset by receipt of principal paydowns on securities available for sale of approximately \$297.1 million and \$32.5 million of proceeds from the sale of securities available for sale and real estate loans.

Our financing activities used net cash of \$907.3 million for the year ended December 31, 2007 primarily due to net payments on repurchase agreements, including with related parties, of \$1,592.3 million, dividends paid of \$67.4 million, principal repayments of CDOs and senior mortgage-backed securities of \$34.4 million, payments of deferred financing costs of \$9.4 million, payments on the settlement of designated derivatives of \$10.0 million and the repurchase of common stock of \$4.5 million. This was partially offset by the issuance of CDOs of \$325.0 million, the issuance of senior mortgage-backed notes to a related party of \$101.5 million, proceeds from mortgage notes payable of \$219.4 million, proceeds from junior subordinated debentures of \$50.0 million, proceeds from borrowings under secured revolving credit facility with a related party of \$67.3 million, net receipts from restricted cash of \$44.7 million and proceeds from the settlement of derivatives of \$4.9 million.

Our financing activities provided net cash of \$865.1 million for the year ended December 31, 2006 primarily from the net proceeds from borrowings under repurchase agreements, including with related parties, of \$874.2 million and the issuance of common stock, net of offering costs, of \$159.2 million, partially offset by principal repayments on CDOs of \$33.1 million, repayment of a note payable to a related party of \$35.0 million, dividend payments of approximately \$40.4 million and net deposits of \$61.0 million of restricted cash used to collateralize certain financings.

Our financing activities provided net cash of \$2,610.9 million during 2005 primarily from the issuance of common stock, net of offering costs, of \$405.6 million, net proceeds from borrowings under repurchase agreements, including with related parties, of \$1,994.3 million, net proceeds from a note payable to a related party of \$35.0 million and net proceeds from CDO offerings of \$227.5 million, partially offset by dividend payments of \$27.1 million and the deposit of \$18.5 million of restricted cash used to collateralize certain financings.

Our source of funds as of December 31, 2007, excluding our March 2005 and August 2006 common stock offerings and our March 2007 trust preferred offering, consisted of net proceeds from repurchase agreements totaling approximately \$1,276.1 million with a weighted average current borrowing rate of 5.03% and borrowings under our secured revolving credit facility, which we used to finance the acquisition of securities available for sale and to provide margin with respect to such borrowings, and proceeds from mortgages payable of \$219.4 million, which we used to finance a portion of the purchase price for commercial real estate. We expect to continue to borrow funds in the form of repurchase agreements and credit facilities and to the extent we purchase additional commercial real estate, mortgage loans. As of the date of this report, we have established approximately 19 borrowing arrangements with various investment banking firms and other lenders, 11 of which were in use on December 31, 2007. Increases in short-term interest rates or widening of interest rate spreads could negatively affect the valuation of our mortgage-related assets, which could limit our borrowing ability or cause our lenders to initiate margin calls. Amounts due upon maturity of our repurchase agreements will be funded primarily through the rollover/reissuance of repurchase agreements and monthly principal and interest payments received on our mortgage-backed securities.

For our short-term (one year or less) and long-term liquidity, which includes investing and compliance with collateralization requirements under our repurchase agreements (if the pledged collateral decreases in value or in the event of margin calls created by prepayments of the pledged collateral), we also rely on the cash flow from operations, primarily monthly principal and interest payments to be received on our mortgage-backed securities, cash flow from the sale of securities, rental income from our commercial real estate investments as well as any primary securities offerings authorized by our board of directors.

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

Based on our current portfolio, leverage rate and available borrowing arrangements, we believe that the net proceeds of our initial public offering, which closed in August 2006, and our first trust preferred offering, which closed in March 2007, together with existing equity capital, combined with the cash flow from operations and the utilization of borrowings, will be sufficient to enable us to meet anticipated short-term (one year or less) liquidity requirements such as to fund our investment activities, pay fees under our management agreement, fund our distributions to stockholders and pay general corporate expenses. However, an increase in prepayment rates substantially above our expectations could cause a temporary liquidity shortfall due to the timing of the necessary margin calls on the financing arrangements and the actual receipt of the cash related to principal paydowns. If our cash resources are at any time insufficient to satisfy our liquidity requirements, we may have to sell debt or additional equity securities. If required, the sale of MBS or real estate loans at prices lower than their carrying value would result in losses and reduced income.

In November 2007, we and Signature Bank amended the terms of our previously unsecured credit facility to convert the facility to a secured revolving credit facility that provided for borrowings of up to \$12.0 million in the aggregate. The facility was secured by a real estate loan that we own that has a carrying value of \$19.0 million. The credit facility was terminated when the real estate loan that collateralized the borrowing was prepaid in November 2007.

In August 2007, we entered into a \$100.0 million unsecured 364-day credit facility with Brookfield US Corporation, an affiliate of our Manager. Indebtedness outstanding under the unsecured credit facility bore interest at LIBOR + 4.00%. In November 2007, we and Brookfield US Corporation amended the terms of the facility, effective as of September 30, 2007, to convert the facility to a secured revolving credit facility that provides for borrowings of up to \$100.0 million in the aggregate and expires in May 2009. On March 7, 2008, we and Brookfield US Corporation amended the terms of the facility, effective as of December 31, 2007, to extend the term of the facility from November 2008 to May 2009, to revise the financial covenant relating to minimum net worth and to eliminate the financial covenants relating to minimum net income (as defined in the facility), a maximum leverage ratio and interest rate sensitivity. The secured facility bears interest at LIBOR + 2.50%. The credit facility and the amendments were approved by the independent members of our board of directors. As of December 31, 2007, we owed \$67.3 million under this facility.

Our ability to meet our long-term (greater than one year) liquidity and capital resource requirements in excess of our borrowing capacity will be subject to obtaining additional debt financing and equity capital. We may increase our capital resources by making public offerings of equity securities, possibly including classes of preferred stock or common stock, or by issuing commercial paper, medium-term notes, CDOs, mortgage-backed notes, collateralized mortgage obligations and senior or subordinated notes. Such financing will depend on market conditions for capital raises and for the investment of any proceeds. If we are unable to renew, replace or expand our sources of financing on substantially similar terms, it may have an adverse effect on our business and results of operations. Upon liquidation, holders of our debt securities and shares of preferred stock and lenders with respect to other borrowings will receive a distribution of our available assets prior to the holders of our common stock.

We generally seek to borrow between four and eight times the amount of our equity. At December 31, 2007, our total debt was approximately \$2.2 billion, which represented a leverage ratio of approximately 19.9 times the amount of our equity. After giving pro forma effect to the adoption of SFAS 159, which would have, among other things, caused us to decrease the carrying value of our CDO liabilities to their fair value, our leverage ratio at December 31, 2007 would have been approximately 7.5 times our equity.

In March 2007, our unconsolidated statutory trust, Crystal River Preferred Trust I, issued \$50.0 million of trust preferred securities to a third party investor. The trust preferred securities have a 30-year term, maturing in April 2037, are redeemable at par on or after April 2012 and pay interest at

a fixed rate of 7.68% for the first five years ending April 2012, and thereafter, at a floating rate of three month LIBOR plus 2.75%.

Off-Balance Sheet Arrangements

As of December 31, 2007, we did not maintain any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance, or special-purpose or variable interest entities, established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. As of December 31, 2007, we had one outstanding commitment to fund a real estate construction loan of \$1.0 million, and during the year ended December 31, 2007, advances of \$0.6 million had been made under that commitment. As of December 31, 2007, we had a \$36.2 million equity investment in BREF One, LLC, which is discussed in more detail in Note 7 to our audited consolidated financial statements contained elsewhere herein. As of December 31, 2007, we had unfunded commitments to fund our investment in BREF One totaling \$1.5 million.

Contractual Obligations and Commitments

As of March 15, 2005, we had entered into a management agreement with Hyperion Brookfield Crystal River. Hyperion Brookfield Crystal River is entitled to receive a base management fee, incentive compensation, reimbursement of certain expenses and, in certain circumstances, a termination fee, all as described in the management agreement. In March 2008, we announced that we and our Manager had agreed that our base management fee would be paid in shares of our common stock, instead of cash, during 2008. See " Related Party Transactions." Such fees and expenses do not have fixed and determinable payments and therefore have not been included in the table below.

As of December 31, 2007, we had an outstanding commitment to fund a real estate construction loan of \$1.0 million. During the year ended December 31, 2007, we made advances totaling \$0.6 million under this commitment. See Note 10 to our consolidated financial statements included elsewhere herein. In addition, we had an outstanding capital commitment in connection with our investment in a private equity fund totaling \$1.5 million.

The following table sets forth information about our contractual obligations as of December 31, 2007:

Contractual Obligations	Payment due by Period				
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
(In thousands)					
Long-Term Debt Obligations					
Repurchase obligations	\$ 1,276,121	\$ 1,276,121	\$	\$	\$
Collateralized debt obligations	486,608	50,864	58,066	29,383	348,295
Junior subordinated notes	51,550				51,550
Mortgage payable	219,380		40	506	218,834
Senior mortgage-backed notes	99,815				99,815
Secured revolving credit facility, related party	67,319		67,319		
Unfunded loan commitments	999	999			
Total(1)	\$ 2,201,792	\$ 1,327,984	\$ 125,425	\$ 29,889	\$ 718,494

(1) We also are subject to interest rate swaps for which we can not estimate future payments due.

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

The following table presents certain information regarding our repurchase obligations as of December 31, 2007:

Repurchase Agreement Counterparties	Amount at Risk(1)	Weighted Average Maturity of Repurchase Agreement in Days
	(In millions)	
Bear, Stearns & Co. Inc.	\$ 53.5	12
Citigroup Global Markets Inc.	7.5	11
Credit Suisse First Boston LLC/Credit Suisse First Boston (Europe) Limited	54.2	39
Deutsche Bank Securities Inc.	7.9	42
Goldman, Sachs & Co	0.7	7
Greenwich Capital Markets, Inc.	4.4	16
Lehman Brothers Inc.	9.3	10
Merrill Lynch, Pierce, Fenner & Smith Incorporated	6.8	17
Morgan Stanley & Co. Incorporated	12.1	14
Wachovia Bank, National Association.	12.9	29
Total	\$ 169.3	24

- (1) Equal to the fair value of collateral, including restricted cash and accrued interest receivable on collateral, minus repurchase agreement liabilities and accrued interest expense.

The repurchase agreements for our repurchase facilities generally do not include substantive provisions other than those contained in the standard master repurchase agreement as published by the Bond Market Association. As noted below, some of our master repurchase agreements that were in effect as of the date of this report contain negative covenants requiring us to maintain certain levels of net asset value, tangible net worth and available funds and comply with interest coverage ratios, leverage ratios and distribution limitations. Three of our master repurchase agreements, which accounted for approximately \$387.6 million of our liabilities as of December 31, 2007, provide that they may be terminated if, among other things, certain material decreases in net asset value occur, we lose our REIT status or our Manager is terminated. Generally, if we violate one of these covenants, the counterparty to the master repurchase agreement has the option to declare an event of default, which would accelerate the repurchase date. If such option is exercised, then all of our obligations would come due, including either purchasing the securities or selling the securities, as the case may be. The counterparty to the master repurchase agreement, if the buyer in such transaction, for example, will be entitled to keep all income paid after the exercise, which will be applied to the aggregate unpaid repurchase price and any other amounts owed by us, and we are required to deliver any purchased securities to the counterparty.

Our master repurchase agreements with Credit Suisse First Boston, LLC and Credit Suisse First Boston, (Europe) Limited each contain a restrictive covenant that would trigger an event of default if our stockholders' equity declines:

commencing in 2008, by 60% or more from our stockholders' equity as of the prior December 31, or

below \$100.0 million.

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

Our master repurchase agreement with Wachovia Bank, National Association, which expires on March 31, 2008, contains the following restrictive covenants:

We may not permit the ratio of the sum of adjusted EBITDA (as defined in the master repurchase agreement) to interest expense to be less than 1.25 to 1.00.

We may not permit our debt to equity ratio to be greater than 10:1.

We may not declare or make any payment on account of, or set apart assets for, a sinking or other analogous fund for the purchase, redemption, defeasance, retirement or other acquisition of any of our equity interests, or make any other distribution in respect thereof, either directly or indirectly, whether in cash or property or in our obligations, except, so long as there is no default, event of default or margin deficit (as defined in the agreement) that has occurred and is continuing. We may (i) make such payments solely to the extent necessary to preserve our status as a REIT and (ii) make additional payments in an amount equal to 100% of funds from operations.

Our tangible net worth may not be less than the sum of \$300.0 million plus the proceeds from all subsequent equity issuances, net of investment banking fees, legal fees, accountants' fees, underwriting discounts and commissions and other customary fees and expenses that we actually incur.

We may not permit the amount of our cash and cash equivalents at any time to be less than \$15.0 million, after giving effect to any requested repurchase transaction.

Certain of our repurchase agreements and our revolving credit facility contain financial covenants, including maintaining our REIT status and maintaining a specific net asset value or worth. We were in compliance with all our financial covenants as of December 31, 2006. Effective as of December 31, 2007, we and many of our counterparties amended the terms of our secured revolving credit facility and several of our repurchase agreements to reset certain financial covenants that we otherwise would have failed to meet as of December 31, 2007. After giving effect to all such amendments, as of December 31, 2007, with respect to one debt obligation, we failed to meet three financial covenants, one of which related to a sub-limit on borrowings under that facility, and two of which related to our leverage ratio and our tangible net worth. Had we been able to carry our CDO liabilities at their fair value, as we will upon our 2008 adoption of SFAS 159, we would have complied with the leverage ratio and tangible net worth covenants. We obtained a waiver with respect to these financial covenants that were not met. As a result, we were in compliance with or have obtained the necessary waivers with respect to all our financial covenants as of December 31, 2007.

REIT Taxable Income

We intend to continue to make regular quarterly distributions of all or substantially all of our REIT taxable income to holders of our common stock. In order to maintain our qualification as a REIT and to avoid corporate-level income tax on the income we distribute to our stockholders, we are required to distribute at least 90% of our REIT taxable income (which includes net short-term capital gains) on an annual basis. This requirement may affect our liquidity and capital resources.

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

REIT taxable income is calculated according to the requirements of the Internal Revenue Code, rather than GAAP. The following table reconciles GAAP net loss to estimated REIT taxable income for the year ended December 31, 2007:

	<u>(In thousands)</u>
GAAP net loss	\$ (345,878)
Adjustments to GAAP net loss:	
Net loss of our Taxable REIT Subsidiary	35,467
Share based compensation	414
Net tax adjustments related to interest income	2,840
Book derivative loss in excess of tax loss	40,691
Capital loss limitation	9,056
Impairment losses not deductible for tax purposes	317,931
Loan loss allowance not deductible for tax purposes	4,500
GAAP/tax difference on rent escalation and lease amortization	(996)
Other	691
	<hr/>
Net adjustments to GAAP net loss	410,594
	<hr/>
REIT taxable income	\$ 64,716
	<hr/>

The following table reconciles GAAP net income to estimated REIT taxable income for the year ended December 31, 2006:

	<u>(In thousands)</u>
GAAP net income	\$ 46,917
Adjustments to GAAP net income:	
Deferred income tax expense	900
Share based compensation	187
Net tax adjustments related to interest income	7,061
Book derivative income in excess of tax income	(8,811)
Capital loss limitation	2,128

	<hr/>
Net adjustments to GAAP to net income	14,010

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

(In thousands)

REIT taxable income	\$	27,958
---------------------	----	--------

We believe that the presentation of our REIT taxable income is useful to investors because it demonstrates to investors the minimum amount of distributions we must make in order to maintain our qualification as a REIT and not be obligated to pay federal and state income taxes. However, beyond our intent to distribute to our stockholders at least 90% of our REIT taxable income on an annual basis to maintain our REIT qualification, we do not expect that the amount of distributions we make will necessarily correlate to our REIT taxable income. Rather, we expect to determine the amount of distributions we make based on our cash flow and what we believe to be an appropriate and competitive dividend yield relative to other specialty finance companies and mortgage REITs. REIT taxable income will not necessarily bear any close relation to cash flow. Accordingly, we do not consider REIT taxable income to be a reliable measure of our liquidity although the related distribution requirement can impact our liquidity and capital resources. Moreover, there are limitations associated with REIT taxable income as a measure of our financial performance over any period. As a result, REIT taxable income should not be considered as a substitute for our GAAP net income as a measure of our financial performance.

Impact of Inflation

Our operating results depend in part on the difference between the interest income earned on our interest-earning assets and the interest expense incurred in connection with our interest-bearing liabilities. Changes in the general level of interest rates prevailing in the economy in response to changes in the rate of inflation or otherwise can affect our income by affecting the spread between our interest-earning assets and interest-bearing liabilities, as well as, among other things, the value of our interest-earning assets. Interest rates are highly sensitive to many factors, including governmental monetary and tax policies, domestic and international economic and political considerations, and other factors beyond our control. We employ the use of correlated hedging strategies to limit the effects of changes in interest rates on our operations, including engaging in interest rate swaps to minimize our exposure to changes in interest rates. There can be no assurance that we will be able to adequately protect against the foregoing risks or that we will ultimately realize an economic benefit from any hedging contract into which we enter. Our financial statements are prepared in accordance with GAAP and our distributions are determined by our board of directors consistent with our obligation to distribute to our stockholders at least 90% of our REIT taxable income on an annual basis to maintain our REIT qualification; in each case, our activities and balance sheet are measured with reference to historical cost and or fair market value without considering inflation.

Quantitative and Qualitative Disclosures about Market Risk.

The principal objective of our asset/liability management activities is to maximize net investment income, while minimizing levels of interest rate risk. Net investment income and interest expense are subject to the risk of interest rate fluctuations. To mitigate the impact of fluctuations in interest rates, we use interest rate swaps to effectively convert variable rate liabilities to fixed-rate liabilities for proper matching with fixed-rate assets. Each derivative used as a hedge is matched with an asset or liability with which it has a high correlation. The swap agreements are generally held-to-maturity and we do not use derivative financial instruments for trading purposes. We use interest rate swaps to effectively convert variable rate debt to fixed-rate debt for the financed portion of fixed-rate assets. The differential to be paid or received on these agreements is recognized as an adjustment to the interest expense related to debt and is recognized on the accrual basis.

As of December 31, 2007, the primary component of our market risk was interest rate risk, as described below. Although we do not seek to avoid risk completely, we do believe the risk can be quantified from historical experience and we seek to actively manage that risk, to earn sufficient compensation to justify taking those risks and to maintain capital levels consistent with the risks we undertake.

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

Interest Rate Risk We are subject to interest rate risk in connection with most of our investments and our related debt obligations, which are generally repurchase agreements of limited duration that are periodically refinanced at current market rates. We mitigate this risk through utilization of derivative contracts, primarily interest rate swap agreements. With respect to our commercial real estate investments, we manage interest rate risk through the use of fixed-rate mortgage loans.

Yield Spread Risk Most of our investments are also subject to yield spread risk. The majority of these securities are fixed-rate securities, which are valued based on a market credit spread over the rate payable on fixed-rate U.S. Treasuries of like maturity. In other words, their value is dependent on the yield demanded on such securities by the market, as based on their credit relative to U.S. Treasuries. An excessive supply of these securities combined with reduced demand will generally cause the market to require a higher yield on these securities, resulting in the use of a higher or "wider" spread over the benchmark rate (usually the applicable U.S. Treasury security yield) to value these securities. Under these conditions, the value of our real estate securities portfolio would tend to decrease. Conversely, if the spread used to value these securities were to decrease or "tighten," the value of our real estate securities would tend to increase. Such changes in the market value of our real estate securities portfolio may affect our net equity or cash flow either directly through their impact on unrealized gains or losses on available-for-sale securities by diminishing our ability to realize gains on such securities, or indirectly through their impact on our ability to borrow and access capital.

Effect on Net Investment Income We fund a portion of our investments with short-term borrowings under repurchase agreements. During periods of rising interest rates, the borrowing costs associated with those investments tend to increase while the income earned on such investments could remain substantially unchanged. This results in a narrowing of the net interest spread between the related assets and borrowings and may even result in losses.

On December 31, 2007, we were party to 16 interest rate swap contracts and three interest rate cap contracts. The following table summarizes the expiration dates of these contracts and their notional amounts (in thousands):

Expiration Date	Notional Amount
2008	\$ 296,000
2009	200,000
2011	30,000
2012	40,000
2013	50,413
2015	14,000
2016	45,000
2017	13,000
2018	240,467
2020	109,045
2021	41,388
TOTAL	\$ 1,079,313

Hedging techniques are partly based on assumed levels of prepayments of our fixed-rate and hybrid adjustable-rate RMBS. If prepayments are slower or faster than assumed, the life of the RMBS will be longer or shorter, which would reduce the effectiveness of any hedging strategies we may use and may cause losses on such transactions. Hedging strategies involving the use of derivative securities are highly complex and may produce volatile returns.

Extension Risk We invest in Agency MBS and RMBS, some of which have interest rates that are fixed for the first few years of the loan (typically three, five, seven or 10 years) and thereafter reset periodically on the same basis as adjustable-rate Agency MBS and RMBS. We compute the projected

weighted average life of our Agency MBS and RMBS based on assumptions regarding the rate at which the borrowers will prepay the underlying mortgages. In general, when a fixed-rate or hybrid adjustable-rate residential mortgage-backed security is acquired with borrowings, we may, but are not required to, enter into an interest rate swap agreement or other hedging instrument that effectively fixes our borrowing costs for a period close to the anticipated average life of the fixed-rate portion of the related Agency MBS and RMBS. This strategy is designed to protect us from rising interest rates because the borrowing costs are fixed for the duration of the fixed-rate portion of the related residential mortgage-backed security.

However, if prepayment rates decrease in a rising interest rate environment, the life of the fixed-rate portion of the related Agency MBS and RMBS could extend beyond the term of the swap agreement or other hedging instrument. This could have a negative impact on our results from operations, as borrowing costs would no longer be fixed after the end of the hedging instrument while the income earned on the Agency MBS and RMBS would remain fixed. This situation may also cause the market value of our Agency MBS and RMBS to decline, with little or no offsetting gain from the related hedging transactions. In extreme situations, we may be forced to sell assets to maintain adequate liquidity, which could cause us to incur losses.

Hybrid Adjustable-Rate Agency MBS Interest Rate Cap Risk We also invest in hybrid adjustable-rate Agency MBS, which are based on mortgages that are typically subject to periodic and lifetime interest rate caps and floors, which limit the amount by which the security's interest yield may change during any given period. However, our borrowing costs pursuant to our repurchase agreements will not be subject to similar restrictions. Therefore, in a period of increasing interest rates, interest rate costs on our borrowings could increase without limitation by caps, while the interest-rate yields on our hybrid adjustable-rate Agency MBS would effectively be limited by caps. This problem will be magnified to the extent we acquire hybrid adjustable-rate Agency MBS that are not based on mortgages which are fully indexed. In addition, the underlying mortgages may be subject to periodic payment caps that result in some portion of the interest being deferred and added to the principal outstanding. This could result in our receipt of less cash income on our hybrid adjustable-rate Agency MBS than we need in order to pay the interest cost on our related borrowings. These factors could lower our net investment income or cause a net loss during periods of rising interest rates, which would harm our financial condition, cash flows and results of operations.

Interest Rate Mismatch Risk We intend to continue to fund a substantial portion of our investments with borrowings that, after the effect of hedging, have interest rates based on indices and repricing terms similar to, but of somewhat shorter maturities than, the interest rate indices and repricing terms of our investments. Thus, we anticipate that in most cases the interest rate indices and repricing terms of our mortgage assets and our funding sources will not be identical, thereby creating an interest rate mismatch between assets and liabilities. Therefore, our cost of funds would likely rise or fall more quickly than would our earnings rate on assets. During periods of changing interest rates, such interest rate mismatches could negatively impact our financial condition, cash flows and results of operations. To mitigate interest rate mismatches, we may utilize hedging strategies discussed above.

Our analysis of risks is based on management's experience, estimates, models and assumptions. These analyses rely on models that utilize estimates of fair value and interest rate sensitivity. Actual economic conditions or implementation of investment decisions by our management may produce results that differ significantly from the estimates and assumptions used in our models and the projected results shown in this Annual Report on Form 10-K.

Prepayment Risk Prepayments are the full or partial repayment of principal prior to the original term to maturity of a mortgage loan and typically occur due to refinancing of mortgage loans. Prepayment rates for existing RMBS generally increase when prevailing interest rates fall below the market rate existing when the underlying mortgages were originated. In addition, prepayment rates on

adjustable-rate and hybrid adjustable-rate RMBS generally increase when the difference between long-term and short-term interest rates declines or becomes negative. Prepayments of RMBS could harm our results of operations in several ways. Some adjustable-rate mortgages underlying our adjustable-rate RMBS may bear initial "teaser" interest rates that are lower than their "fully-indexed" rates, which refers to the applicable index rates plus a margin. In the event that such an adjustable-rate mortgage is prepaid prior to or soon after the time of adjustment to a fully-indexed rate, the holder of the related RMBS would have held such security while it was less profitable and lost the opportunity to receive interest at the fully-indexed rate over the expected life of the adjustable-rate RMBS. Additionally, we currently own mortgage assets that were purchased at a premium. The prepayment of such assets at a rate faster than anticipated would result in a write-off of any remaining capitalized premium amount and a consequent reduction of our net investment income by such amount. Finally, in the event that we are unable to acquire new mortgage assets to replace the prepaid assets, our financial condition, cash flow and results of operations could be negatively affected.

Credit Risk Our portfolio of commercial real estate loans and securities is subject to a high degree of credit risk. Credit risk is the exposure to loss from debtor defaults. Default rates are subject to a wide variety of factors, including, but not limited to, property performance, property management, supply and demand factors, construction trends, consumer behavior, regional economics, interest rates, the strength of the United States economy and other factors beyond our control.

All loans are subject to a certain probability of default. We underwrite our CMBS and RMBS investments assuming the underlying loans will suffer a certain dollar amount of defaults and the defaults will lead to some level of realized losses. Loss adjusted yields are computed based on these assumptions and applied to each class of security supported by the cash flow on the underlying loans. The most significant variables affecting loss adjusted yields include, but are not limited to, the number of defaults, the severity of loss that occurs subsequent to a default and the timing of the actual loss. The different rating levels of CMBS will react differently to changes in these assumptions. The lowest rated securities are generally more sensitive to changes in timing of actual losses. The higher rated securities are more sensitive to the severity of losses.

We generally assume that substantially all of the principal of a non-rated security will not be recoverable over time. The timing and the amount of the loss of principal are the key assumptions to determine the economic yield of these securities. Timing is of paramount importance because we will assume substantial losses of principal on the non-rated securities, therefore the longer the principal balance remains outstanding the more interest the holder receives to support a greater economic return. Alternatively, if principal is lost faster than originally assumed, there is less opportunity to receive interest and a lower return or loss may result.

If actual principal losses on the underlying loans exceed assumptions, the higher rated securities will be affected more significantly as a loss of principal may not have been assumed. We expect that most if not all principal will be recovered with respect to classes rated B or higher.

We manage credit risk through the underwriting process, establishing loss assumptions and monitoring of loan performance. Before acquiring an interest in the controlling class security (represented by a majority ownership interest in the most subordinate tranche) in a proposed pool of loans, we perform a rigorous analysis of all of the proposed underlying loans. Information from this review is then used to establish loss assumptions. We assume that a certain portion of the loans will default and calculate an expected or loss adjusted yield based on that assumption. After the securities have been acquired, we monitor the performance of the loans, as well as external factors that may affect their value.

Factors that indicate a higher loss severity or acceleration of the timing of an expected loss will cause a reduction in the expected yield and therefore reduce our earnings. Furthermore, we may be

required to write down a portion of the accreted cost basis of the affected assets through a charge to income.

We will also invest in commercial real estate loans, primarily mezzanine loans, bridge loans, B-notes, loans to real estate companies, whole mortgage loans, first mortgage participations and net leased real estate. We may also invest in residential mortgages and related securities. These investments will be subject to credit risk. The extent of our credit risk exposure will be dependent on risks associated with commercial and residential real estate. Property values and net operating income derived from such properties are subject to volatility and may be affected adversely by a number of factors, including, but not limited to, national, regional and local economic conditions (which may be adversely affected by industry slowdowns and other factors); local real estate conditions (such as an oversupply of housing, retail, industrial, office or other commercial space); changes or continued weakness in specific industry segments; construction quality, age and design; demographic factors; retroactive changes to building or similar codes; and increases in operating expenses (such as energy costs). In the event a borrower's net operating income decreases, the borrower may have difficulty repaying our loans, which could result in losses to us. In addition, decreases in property values reduce the value of the collateral and the potential proceeds available to a borrower to repay our loans, which could also cause us to suffer losses. When we underwrite the origination of a commercial real estate loan, we do not underwrite to an expected loss; when we underwrite the purchase of a commercial real estate loan, we may underwrite to an expected loss based on the price of the loan.

Effect on Fair Value Another component of interest rate risk is the effect changes in interest rates will have on the market value of our assets. We face the risk that the market value of our assets will increase or decrease at different rates than that of our liabilities, including our hedging instruments. We primarily assess our interest rate risk by estimating the duration of our assets and the duration of our liabilities. Duration essentially measures the market price volatility of financial instruments as interest rates change. We generally calculate duration using various financial models and empirical data. Different models and methodologies can produce different duration numbers for the same securities.

The following interest rate sensitivity analysis is measured using an option-adjusted spread model combined with a proprietary prepayment model. We shock the curve up and down 100 basis points and analyze the change in interest rates, prepayments and cash flows through a Monte Carlo simulation. We then calculate an average price for each scenario, which is used in our risk management analysis.

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

The following sensitivity analysis table shows the estimated impact on the fair value of our interest rate-sensitive investments, repurchase agreement liabilities, CDO liabilities, senior mortgage-backed notes, mortgages payable, junior subordinated notes and swaps, at December 31, 2007, assuming rates instantaneously fall 100 basis points and rise 100 basis points:

(1) The fair value of all of our available-for-sale investments is included.

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

- (2) The fair value of the repurchase agreements would not change materially due to the short-term nature of these instruments.

n/m = not meaningful

It is important to note that the impact of changing interest rates on fair value can change significantly when interest rates change beyond 100 basis points from current levels. Therefore, the volatility in the fair value of our assets could increase significantly when interest rates change beyond 100 basis points. In addition, other factors affect the fair value of our interest rate-sensitive investments and hedging instruments, such as the shape of the yield curve, market expectations as to future interest rate changes and other market conditions. Accordingly, in the event of changes in actual interest rates, the change in the fair value of our assets would likely differ from that shown above, and such difference might be material and adverse to our stockholders.

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

Currency Risk In August 2007, we sold a commercial real estate loan that was denominated in Canadian dollars and in September 2007, we sold an investment that was denominated in British pounds. The corresponding repo debt and foreign currency swaps related to these investments were also terminated. As a result of these sales, we no longer had any foreign currency exposure as of December 31, 2007. However, from time to time, we may make other investments that are denominated in a foreign currency through which we may be subject to foreign currency exchange risk.

Changes in currency rates can adversely affect the fair values and earnings of our non-U.S. holdings. We attempt to mitigate this impact by utilizing currency swaps on our foreign currency-denominated investments or foreign currency forward commitments to hedge the net exposure.

Related Party Transactions

We have entered into a management agreement, as amended (the "Agreement"), with our Manager. The initial term of the Agreement expires in December 2008. After the initial term, the Agreement will be automatically renewed for a one-year term each anniversary date thereafter unless we or our Manager terminate the Agreement. The Agreement provides that our Manager will provide us with investment management services and certain administrative services and will perform our day-to-day operations. The monthly base management fee for such services is equal to 1.5% of one-twelfth of our equity, as defined in the Agreement, payable in arrears. In March 2008, we and our Manager agreed that during 2008, we would the base management fee in shares of our common stock, rather than in cash.

In addition, under the Agreement, our Manager earns a quarterly incentive fee equal to 25% of the amount by which the quarterly net income per share, as defined in the Agreement (which principally excludes the effect of stock compensation and the unrealized change in derivatives), exceeds an amount equal to the product of the weighted average of the price per share of the common stock we issued in our March 2005 private offering and in our IPO and the price per share of common stock in any subsequent offerings by us, multiplied by the higher of (i) 2.4375% or (ii) 25% of the then applicable 10 year Treasury note rate plus 0.50%, multiplied by the then weighted average number of outstanding shares for the quarter. The incentive fee is paid quarterly. The Agreement provides that 10% of the incentive management fee is to be paid in shares of our common stock (providing that such payment does not result in our Manager owning directly or indirectly more than 9.8% of our issued and outstanding common stock) and the balance is to be paid in cash. Our Manager may, at its sole discretion, elect to receive a greater percentage of its incentive management fee in shares of our common stock. The incentive management fees included in our consolidated statements of operations that were incurred during the years ended December 31, 2007 and 2006 and during the period March 15, 2005 (commencement of operations) to December 31, 2005 were \$0.1 million, \$0.1 million and \$0 million, respectively.

The Agreement may be terminated upon the affirmative vote of at least two-thirds of the independent members of our board of directors after the expiration of the initial term and by providing at least 180 days prior notice based upon either: (i) unsatisfactory performance by our Manager that is materially detrimental to us, or (ii) a determination by the independent members of our board of directors that the management fees payable to our Manager are not fair (subject to our Manager's right to prevent a compensation termination by agreeing to a mutually acceptable reduction of the management fees). If we terminate the Agreement, then we must pay our Manager a termination fee equal to twice the sum of the average annual base and incentive fees earned by our Manager during the two twelve-month periods immediately preceding the date of termination, calculated as of the end of the most recently completed fiscal quarter prior to the date of termination.

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

We issued to our Manager 84,000 shares of our restricted common stock and granted options to purchase 126,000 shares of our common stock for a 10 year period at a price of \$25 per share in March 2005. We issued to one of our executive officers 30,000 shares of restricted common stock in March 2006. 10,000 of such shares vested on March 15, 2007 and the remaining 20,000 shares were forfeited in April 2007 when the executive officer to whom such shares were issued resigned from his position with us. We issued to one of our directors 2,000 shares of restricted stock in November 2006 and 2,000 shares of restricted stock in May 2007, both of which vest on the first anniversary of the date of issuance. For the years ended December 31, 2007 and 2006 and the period March 15, 2005 (commencement of operations) to December 31, 2005, the base management expense was \$5.8 million, \$6.8 million and \$4.8 million, respectively. Included in the management fee expense for the years ended December 31, 2007 and 2006 and the period March 15, 2005 (commencement of operations) to December 31, 2005 was \$0.6 million, \$1.0 million and \$0.6 million, respectively, of amortization of stock-based compensation related to restricted stock and options granted.

The Agreement provides that we are required to reimburse our Manager for certain expenses incurred by our Manager on our behalf provided that such costs and reimbursements are no greater than that which would be paid to outside professionals or consultants on an arm's length basis. For the years ended December 31, 2007 and 2006 and the period March 15, 2005 (commencement of operations) to December 31, 2005, we were not charged any reimbursable costs by our Manager.

In January 2007, we purchased a \$28.5 million investment in BREF One, LLC (the "Fund"), a real estate finance fund sponsored by Brookfield Asset Management Inc. ("Brookfield"), the indirect parent of our Manager, and managed by a Brookfield subsidiary, and incurred a \$10.4 million unfunded capital commitment to the Fund. The acquisition was made from two subsidiaries of Brookfield. As of December 31, 2007, the unfunded commitment totaled \$1.5 million. In addition, income from the equity investment in the Fund for the year ended December 31, 2007 was \$2.6 million.

In February 2007, we entered into a sale and purchase agreement with BREOF BNK Fannin LP and BREOF BNK Phoenix LLC, two subsidiaries of a real estate opportunity fund sponsored by Brookfield and managed by a Brookfield subsidiary, to acquire two commercial properties as described in Note 5 to our financial statements for a total value of \$234.7 million. We paid the purchase price for the properties with the proceeds from a \$198.5 million mortgage loan from an external lender that bears interest at an annual fixed rate of 5.509% and matures on April 1, 2017 and with available cash. In addition to the sale and purchase agreement, we entered into rent enhancement agreements with BREOF BNK Fannin LP and BREOF BNK Phoenix LLC under which we will receive monthly rent enhancement payments through 2015 totaling \$15.9 million.

In April 2007, we issued \$115.0 million of senior mortgage-backed notes through a newly-formed subsidiary, CRZ ABCP Financing LLC. We retained \$9.3 million of senior subordinated mortgage-backed notes and \$4.3 million of subordinated mortgage-backed notes. CRZ ABCP Financing LLC holds assets, consisting of commercial whole mortgage loans, which serve as collateral for the mortgage-backed notes. Senior mortgage-backed notes in the aggregate principal amount of \$101.5 million were issued to an affiliate of our Manager with floating coupons with an interest rate of three-month LIBOR plus 0.35%. Interest on the senior mortgage-backed notes is payable monthly. The senior mortgage-backed notes mature in April 2017 and the outstanding principal is due at maturity. Early repayments of the underlying mortgage loans require repayment of a portion of the senior mortgage-backed notes. The senior mortgage-backed notes are treated as a secured financing, and are non recourse to us. Proceeds from the sale of the senior mortgage-backed notes issued were used to repay outstanding debt under our repurchase agreements. As of December 31, 2007, the mortgage-backed notes were collateralized by real estate loans with a carrying value of \$114.6 million.

In August 2007, we entered into a \$100.0 million unsecured 364-day credit facility with Brookfield US Corporation, an affiliate of our Manager. Indebtedness outstanding under the unsecured credit

facility bore interest at LIBOR + 4.00%. In November 2007, we and Brookfield US Corporation amended the terms of the facility, effective as of September 30, 2007, to convert the facility to a secured revolving credit facility that provides for borrowings of up to \$100.0 million in the aggregate and expires in May 2009. On March 7, 2008, we and Brookfield US Corporation amended the terms of the facility, effective as of December 31, 2007, to extend the term of the facility from November 2008 to May 2009, to revise the financial covenant relating to minimum net worth and to eliminate the financial covenants relating to minimum net income (as defined in the facility), a maximum leverage ratio and interest rate sensitivity. The secured facility bears interest at LIBOR + 2.50%. The credit facility and the amendments were approved by the independent members of our board of directors. The credit agreement contains customary representations, warranties and covenants, including covenants limiting dividends, liens, mergers, asset sales and other fundamental changes. In addition, the credit agreement contains additional covenants, which include maintaining a certain minimum net worth. As of December 31, 2007, we owed \$67.3 million under this facility.

In August 2007, we sold one whole loan to an affiliate of our Manager at its carrying value plus accrued interest receivable, for total proceeds of \$45.4 million.

In September 2007, we entered into a sale and purchase agreement with BREF BNK2 Arlington LP, a subsidiary of a real estate opportunity fund sponsored by Brookfield and managed by a Brookfield subsidiary, to acquire one commercial property as described in Note 5 to our financial statements for a total value of \$26.5 million. We paid the purchase price for the property with the proceeds from a \$20.9 million mortgage loan from an external lender that bears interest at an annual fixed rate of 6.29% and matures on October 1, 2017 and with available cash. In addition to the sale and purchase agreement, we entered into rent enhancement agreements with BREF BNK2 Arlington LP under which we will receive monthly rent enhancement payments through 2019 totaling \$6.9 million.

We and our Manager have entered into sub-advisory agreements with other affiliated entities and the fees payable under such agreements will be paid from any management fees earned by our Manager. In addition, certain of these affiliated sub-advisory entities introduced investments to us for purchase that we acquired for a total of \$289.0 million and \$21.4 million during the years ended December 31, 2007 and 2006, respectively. The purchase price of three commercial real estate properties that we purchased from an affiliate of our Manager, at a total cost of approximately \$260.5 million, were determined as part of a competitive bid process, and the purchase price of our investment in a private equity fund managed by an affiliate of our Manager, at a total initial cost of approximately \$28.5 million, was acquired at its book value assuming hypothetical liquidation. All such acquisitions were approved in advance by the independent members of our board of directors.

Risk Management

To the extent consistent with maintaining our REIT status, we seek to manage our interest rate risk exposure to protect our portfolio of RMBS and other mortgage securities and related debt against the effects of major interest rate changes. We generally seek to manage our interest rate risk by:

monitoring and adjusting, if necessary, the reset indices and interest rates related to our MBS and our borrowings;

attempting to structure our borrowing agreements to have a range of different maturities, terms, amortizations and interest rate adjustment periods;

using derivatives, financial futures, swaps, options, caps, floors and forward sales, to adjust the interest rate sensitivity of our MBS and our borrowings; and

actively managing, on an aggregate basis, the interest rate indices, interest rate adjustment periods, and gross reset margins of our MBS and the interest rate indices and adjustment periods of our borrowings.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk.

See the discussion of quantitative and qualitative disclosures about market risk in the "Quantitative and Qualitative Disclosures About Market Risk" section of Management's Discussion and Analysis of Financial Condition and Results of Operations in Item 7 above.

Item 8. Financial Statements and Supplementary Data.

The financial statements required by this item and the reports of the independent accountants thereon appear on pages F-2 to F-63. See accompanying Index to the Consolidated Financial Statements on page F-1. The supplementary financial data required by Item 302 of Regulation S-K appears in Note 19 to the consolidated financial statements.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

None

Item 9A. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure based closely on the definition of "disclosure controls and procedures" in Rule 13a-15(e). In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Also, we have investments in certain unconsolidated entities. As we do not control these entities, our disclosure controls and procedures with respect to such entities are necessarily substantially more limited than those we maintain with respect to our consolidated subsidiaries.

As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and our Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of the end of the period covered by this report.

Management's Annual Report on Internal Control over Financial Reporting

We are responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rules 13a-15(f) and 15d-15(f). Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting as of December 31, 2007 based on the framework in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission

(COSO). Based on that evaluation, we concluded that our internal control over financial reporting was effective as of December 31, 2007.

Attestation Report of Registered Public Accounting Firm

Our independent registered public accounting firm, Ernst & Young LLP, independently assessed the effectiveness of our internal control over financial reporting. Ernst & Young's report appears on page F-3 of this Form 10-K.

Changes in Internal Controls

There have been no significant changes in our "internal control over financial reporting" (as defined in Rule 13a-15(f) of the Exchange Act) that occurred during the year ended December 31, 2007 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. Other Information.

On March 7, 2008, we and Brookfield US Corporation amended the terms of our Amended and Restated Revolving Credit Agreement. See the sixteenth paragraph under "Liquidity and Capital Resources" in Item 7 for information concerning the amendment.

PART III

Item 10. Directors, Executive Officers and Corporate Governance.

The information required by Items 401, 405 and 406 and paragraphs (c)(3), (d)(4) and (d)(5) of Item 407 of Regulation S-K is incorporated herein by reference to the Company's definitive proxy statement to be filed not later than April 29, 2008 with the Securities and Exchange Commission pursuant to Regulation 14A under the Exchange Act.

Item 11. Executive Compensation.

The information required by Item 402 and paragraphs (e)(4) and (e)(5) of Item 407 of Regulation S-K is incorporated herein by reference to the Company's definitive proxy statement to be filed not later than April 29, 2008 with the Securities and Exchange Commission pursuant to Regulation 14A under the Exchange Act.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

The information required by Items 201(d) and 403 of Regulation S-K is incorporated herein by reference to the Company's definitive proxy statement to be filed not later than April 29, 2008 with the Securities and Exchange Commission pursuant to Regulation 14A under the Exchange Act.

Item 13. Certain Relationships and Related Transactions, and Director Independence.

The information required by Items 404 and 407(a) of Regulation S-K is incorporated herein by reference to the Company's definitive proxy statement to be filed not later than April 29, 2008 with the Securities and Exchange Commission pursuant to Regulation 14A under the Exchange Act.

Item 14. Principal Accounting Fees and Services.

The information required by Item 9(e) of Schedule 14A is incorporated herein by reference to the Company's definitive proxy statement to be filed not later than April 29, 2008 with the Securities and Exchange Commission pursuant to Regulation 14A under the Exchange Act.

MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL STATEMENTS

Crystal River Capital, Inc.'s management is responsible for the integrity and objectivity of all financial information included in this Annual Report. The consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America. The financial statements include amounts that are based on the best estimates and judgments of management. All financial information in this Annual Report on Form 10-K is consistent with that in the consolidated financial statements.

Ernst & Young LLP, an independent registered public accounting firm, has audited these consolidated financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States) and has expressed herein its unqualified opinion on those financial statements.

The Audit Committee of the Board of Directors, which oversees Crystal River Capital, Inc.'s financial reporting process on behalf of the Board of Directors, is composed entirely of independent directors (as defined by the New York Stock Exchange). The Audit Committee meets periodically with management, the independent accountants, and the internal auditors to review matters relating to the Company's financial statements and financial reporting process, annual financial statement audit, engagement of independent accountants, internal audit function, system of internal controls, and legal compliance and ethics programs as established by Crystal River Capital, Inc.'s management and the Board of Directors. The internal auditors and the independent accountants periodically meet alone with the Audit Committee and have access to the Audit Committee at any time.

**REPORT OF INDEPENDENT REGISTERED PUBLIC
ACCOUNTING FIRM**

The Board of Directors and Shareholders of Crystal River Capital, Inc. and Subsidiaries

We have audited the accompanying consolidated balance sheets of Crystal River Capital, Inc. and Subsidiaries (the "Company") as of December 31, 2007 and 2006, and the related consolidated statements of operations, shareholders' equity and cash flows for each of the two years in the period ended December 31, 2007 and for the period March 15, 2005 (commencement of operations) to December 31, 2005. Our audits also included the financial statement schedules listed in the Index as Item 15(a)(2). These financial statements and schedules are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedules based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of the Company at December 31, 2007 and 2006, and the consolidated results of its operations and its cash flows for each of the two years in the period ended December 31, 2007 and for the period March 15, 2005 (commencement of operations) to December 31, 2005, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the financial statement schedules referred to above, when considered in relation to the basic financial statements taken as a whole, present fairly, in all material respects, the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2007, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated March 12, 2008 expressed an unqualified opinion thereon.

/s/ Ernst & Young LLP

New York, New York
March 12, 2008

**REPORT OF INDEPENDENT REGISTERED PUBLIC
ACCOUNTING FIRM**

The Board of Directors and Shareholders of Crystal River Capital, Inc. and Subsidiaries

We have audited Crystal River Capital, Inc. and Subsidiaries' (the "Company") internal control over financial reporting as of December 31, 2007, based on criteria established in Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). The Company's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control Over Financial Reporting, under Item 9A. Our responsibility is to express an opinion on the effectiveness of the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2007, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets as of December 31, 2007 and 2006, and the related consolidated statements of operations, shareholders' equity, and cash flows for each of the two years in the period ended December 31, 2007 and for the period March 15, 2005 (commencement of operations) to December 31, 2005 and our report dated March 12, 2008 expressed an unqualified opinion thereon.

Crystal River Capital, Inc. and Subsidiaries

Notes to Consolidated Financial Statements

December 31, 2007

(dollars in thousands, except per share data)

1. ORGANIZATION

References herein to "we," "us" or "our" refer to Crystal River Capital, Inc. and its subsidiaries unless the context specifically requires otherwise.

We are a Maryland corporation that was formed in January 2005 for the purpose of acquiring and originating a diversified portfolio of commercial and residential real estate assets and structured finance investments. We commenced operations on March 15, 2005, when we completed an offering of 17,400,000 shares of common stock (the "Private Offering"), and we completed our initial public offering of 7,500,000 shares of common stock (the "Public Offering") on August 2, 2006, as more fully explained in Note 16. We are externally managed and are advised by Hyperion Brookfield Crystal River Capital Advisors, LLC (the "Manager") as more fully explained in Note 14.

We have elected to be taxed as a Real Estate Investment Trust ("REIT") under the Internal Revenue Code for the 2005 tax year. To maintain our tax status as a REIT, we plan to distribute at least 90% of our taxable income. In view of our election to be taxed as a REIT, we have tailored our balance sheet investment program to originate or acquire loans and investments to produce a portfolio that meets the asset and income tests necessary to maintain qualification as a REIT.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation

Our consolidated financial statements include the accounts of Crystal River Capital, Inc., three wholly-owned subsidiaries created in connection with our collateralized debt obligations and senior mortgage-backed notes, wholly-owned subsidiaries established for financing purposes, three wholly-owned subsidiaries established to own interests in real property and our domestic taxable REIT subsidiary ("TRS"). All significant intercompany balances and transactions have been eliminated in consolidation.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States ("GAAP") requires us to make a significant number of estimates in the preparation of the financial statements. These estimates include determining the fair market value of certain investments and derivative liabilities, amount and timing of credit losses, prepayment assumptions, allocation of purchase price to tangible and intangible assets or property acquisitions, and other items that affect the reported amounts of certain assets and liabilities as of the date of the consolidated financial statements and the reported amounts of certain revenues and expenses during the reported period. It is likely that changes in these estimates (*e.g.*, market values change due to changes in supply and demand, credit performance, prepayments, interest rates, or other reasons; yields change due to changes in credit outlook and loan prepayments) will occur in the near future. Our estimates are inherently subjective in nature and actual results could differ from our estimates and differences may be material.

Crystal River Capital, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

December 31, 2007

(dollars in thousands, except per share data)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Cash and Cash Equivalents

We classify highly liquid investments with original maturities of 90 days or less from the date of purchase as cash equivalents. Cash and cash equivalents may include cash and short term investments. Short term investments are stated at cost, which approximates their fair value, and may consist of investments in money market accounts.

Restricted Cash

Restricted cash consists primarily of funds held on deposit with brokers to serve as collateral for repurchase agreements, certain interest rate swap and credit default swap agreements and funds held by the trustee for CDO II (See Note 9).

Securities

We invest in U.S. Agency mortgage-backed securities ("Agency MBS"), Non-Agency residential mortgage-backed securities ("Non-Agency RMBS"), commercial mortgage-backed securities ("CMBS") and other real estate debt and equity instruments. We account for our available for sale securities (Agency MBS, CMBS, RMBS, asset-backed securities ("ABS") and other real estate and equity instruments), which we refer to as our AFS investments, in accordance with Statement of Financial Accounting Standards ("SFAS") No. 115, *Accounting for Certain Investments in Debt and Equity Securities* ("SFAS 115"). We classify our securities as available for sale because we may dispose of them prior to maturity in response to changes in the market, liquidity needs or other events, even though we do not hold the securities for the purpose of selling them in the near future.

All investments classified as available for sale are reported at fair value, based on quoted market prices provided by independent pricing sources, when available, or from quotes provided by dealers who make markets in certain securities, or from our management's estimates in cases where the investments are illiquid. In making these estimates, our management utilizes pricing information obtained from dealers who make markets in these securities. However, under certain circumstances we may adjust these values based on our knowledge of the securities and the underlying collateral. Our management also uses a discounted cash flow model, which utilizes prepayment and loss assumptions based upon historical experience, economic factors and the characteristics of the underlying cash flow to substantiate the fair value of the securities. The assumed discount rate is based upon the yield of comparable securities. The determination of future cash flows and the appropriate discount rates are inherently subjective and, as a result, actual results may vary from our management's estimates.

Unrealized gains and losses are recorded as a component of accumulated other comprehensive income (loss) in stockholders' equity.

Periodically, all available for sale securities are evaluated for other than temporary impairment in accordance with SFAS 115 and Emerging Issues Task Force ("EITF") No. 99-20, *Recognition of Interest Income and Impairment on Purchased and Retained Beneficial Interests in Securitized Financial Assets* ("EITF 99-20"). An impairment that is an "other than temporary impairment" is a decline in the fair value of an investment below its amortized cost attributable to factors that indicate that the decline will

Crystal River Capital, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

December 31, 2007

(dollars in thousands, except per share data)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

not be recovered over the remaining life of the investment. Other than temporary impairments result in reducing the carrying value of the security to its fair value through the statement of operations, which also creates a new carrying value for the investment. We compute a revised yield based on the future estimated cash flows as described in the section titled "Revenue Recognition" below. Significant judgments, including making assumptions regarding the estimated prepayments, loss assumptions, changes in interest rates and whether the decline in a security's fair value will be recovered over the remaining life of the investment, are required in determining impairment.

Real Estate Loans

Real estate loans are carried at cost, net of unamortized loan origination costs and fees, discounts, repayments, sales of partial interests in loans and unfunded commitments, unless the loan is deemed to be impaired. We account for our real estate loans in accordance with SFAS No. 91, *Accounting for Nonrefundable Fees and Costs Associated with Originating or Acquiring Loans and Initial Direct Costs of Leases* ("SFAS 91").

Real estate loans are evaluated for possible impairment on a periodic basis in accordance with SFAS No. 114, *Accounting by Creditors For Impairment of a Loan - an Amendment of FASB Statement No. 5 and 15* ("SFAS 114"). Impairment occurs when we determine it is probable that we will not be able to collect all amounts due according to the contractual terms of the loan. Upon determination of impairment, we establish a reserve for loan losses and recognize a corresponding charge to the statement of operations through a provision for loan losses. Significant judgments are required in determining impairment, including making assumptions regarding the value of the loan and the value of the real estate, partnership interest or other collateral that secures the loan, current economic conditions, the potential for natural disasters, loan portfolio composition, delinquency trends, credit losses to date on underlying loans and remaining credit protection. If the credit performance of our real estate loans is different than expected, we adjust the allowance for loan losses to a level deemed appropriate by management to provide for estimated losses inherent in the real estate loan portfolio. Once a loan is 90 days or more delinquent, or a borrower declares bankruptcy, we adjust the value of our accrued interest receivable to what we believe to be collectible and stop accruing interest on that loan.

Commercial Real Estate

Commercial properties held for investment are carried at cost less accumulated depreciation. In accordance with SFAS No. 141, *Business Combinations*, upon acquisition, we allocate the purchase price to the components of the commercial properties acquired: the amount allocated to land is based on its estimated fair value; buildings and existing tenant improvements are recorded at depreciated replacement cost; above- and below-market in-place operating leases are determined based on the present value of the difference between the rents payable under the contractual terms of the leases and estimated market rents; lease origination costs for in-place operating leases are determined based on the estimated costs that would be incurred to put the existing leases in place under the same terms and conditions; and tenant relationships are measured based on the present value of the estimated avoided net costs if a tenant were to renew its lease at expiry, discounted by the probability of such renewal.

Crystal River Capital, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

December 31, 2007

(dollars in thousands, except per share data)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Depreciation on buildings is provided on a straight-line basis over the useful lives of the properties to a maximum of 40 years. Depreciation is determined with reference to each rental property's carried value, remaining estimated useful life and residual value. Acquired tenant improvements, above- and below-market in-place operating leases and lease origination costs are amortized on a straight-line basis over the remaining terms of the leases. The value associated with acquired tenant relationships is amortized on a straight-line basis over the expected term of the relationships. All other tenant improvements and re-leasing costs are deferred and amortized on a straight-line basis over the terms of the leases to which they relate. Depreciation on buildings and amortization of deferred leasing costs and tenant improvements that are determined to be assets of the company are recorded in depreciation and amortization expense. All above- and below-market tenant leases and tenant relationships are amortized to revenue. Above- and below-market ground leases are amortized to commercial real estate expenses.

Properties are reviewed for impairment whenever events or changes in circumstances indicate the carrying value may not be recoverable. For commercial properties, an impairment loss is recognized when a property's carrying value exceeds its undiscounted future net cash flow. The impairment is measured as the amount by which the carrying value exceeds the estimated fair value. Projections of future cash flow take into account the specific business plan for each property and management's best estimate of the most probable set of economic conditions anticipated to prevail in the market. We recorded no impairment losses on our commercial real estate investments during the year ended December 31, 2007.

Accounting For Derivative Financial Instruments and Hedging Activities

We account for our derivative and hedging activities in accordance with SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities* ("SFAS 133") and SFAS No. 149, *Amendment of Statement 133 on Derivative Instruments and Hedging Activities* ("SFAS 149"). SFAS 133 and SFAS 149 require us to recognize all derivative instruments at their fair value as either assets or liabilities on our balance sheet. The accounting for changes in fair value (*i.e.*, gains or losses) of a derivative instrument depends on whether we have designated it, and whether it qualifies, as part of a hedging relationship and on the type of hedging relationship. For those derivative instruments that are designated and qualify as hedging instruments, we must designate the hedging instrument, based upon the exposure being hedged, as a fair value hedge, a cash flow hedge or a hedge of a net investment in a foreign operation. We have no fair value hedges or hedges of a net investment in foreign operations as of December 31, 2007 or 2006.

For derivative instruments that are designated and qualify as a cash flow hedge (*i.e.*, hedging the exposure to variability in expected future cash flows that are attributable to a particular risk), the effective portion of the gain or loss on the derivative instrument is reported as a component of other comprehensive income and reclassified into earnings in the same line item associated with the forecasted transaction in the same period or periods during which the hedged transaction affects earnings (*i.e.*, in "interest expense" when the hedged transactions are interest cash flows associated with floating-rate debt). The remaining gain or loss on the derivative instrument in excess of the cumulative changes in the present value of future cash flows of the hedged item, if any, is recognized in the

Crystal River Capital, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

December 31, 2007

(dollars in thousands, except per share data)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

realized and unrealized gain (loss) on derivatives in current earnings during the period of change. For derivative instruments not designated as hedging instruments (including foreign currency swaps and credit default swaps), the gain or loss is recognized in realized and unrealized gain (loss) on derivatives in the current earnings during the period of change. Income and/or expense from interest rate swaps are recognized as an adjustment to interest expense. We account for income and expense from interest rate swaps on an accrual basis over the period to which the payments and/or receipts relate.

Dividends to Stockholders

We record dividends to stockholders on the declaration date. The actual dividend and its timing are at the discretion of our board of directors. During the year ended December 31, 2007, we declared dividends in the amount of \$67,796, or \$2.72 per share, of which \$16,799 was distributed on January 28, 2008 to our stockholders of record as of December 31, 2007, and of which \$29 related to dividends on deferred stock units. Of the \$2.72 per share dividend declared in 2007, \$2.59 represented distributions of taxable earnings and profits and \$0.13 represented a return of capital. During the year ended December 31, 2006, we declared dividends in the amount of \$56,968, or \$2.71 per share, of which \$16,514 was distributed on January 26, 2007 to our stockholders of record as of December 29, 2006, and of which \$34 related to dividends on deferred stock units. All of our dividends declared in 2006 represented distributions of taxable earnings and profits. For the period March 15, 2005 (commencement of operations) to December 31, 2005, we declared and paid dividends in the amount of \$27,105, or \$1.55 per share. All of our dividends declared in 2005 represented distributions of taxable earnings and profits.

Organization Costs

We expensed our costs of organization as incurred.

Offering Costs

Offering costs that were incurred in connection with the Private Offering and the Public Offering are reflected as a reduction of additional paid-in-capital. Certain offering costs that were incurred in connection with the Public Offering were initially capitalized to prepaid expenses and other assets and were recorded as a reduction of additional paid-in-capital when we completed the Public Offering in August 2006.

Trust Preferred Securities

Trusts that we form for the sole purpose of issuing trust preferred securities are not consolidated in our financial statements in accordance with Financial Interpretation No. 46R ("FIN 46R") as we have determined that we are not the primary beneficiary of such trusts. Our investment in the common securities of such trusts is included in other investments in our consolidated financial statements.

Crystal River Capital, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

December 31, 2007

(dollars in thousands, except per share data)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Revenue Recognition

Interest income for our available for sale securities and real estate loans is recognized over the life of the investment using the effective interest method and recorded on the accrual basis. Interest income on mortgage-backed securities ("MBS") is recognized using the effective interest method as required by EITF 99-20. Real estate loans generally are originated or purchased at or near par value, and interest income is recognized based on the contractual terms of the loan instruments. Any loan fees or acquisition costs on originated loans or securities are capitalized and recognized as a component of interest income over the life of the investment utilizing the straight-line method, which approximates the effective interest method. Interest income during the years ended December 31, 2007 and 2006 included prepayment fees received of \$278 and \$1,633, respectively, from real estate loans.

Under EITF 99-20, at the time of purchase, our management estimates the future expected cash flows and determines the effective interest rate based on these estimated cash flows and the purchase price. As needed, we update these estimated cash flows and compute a revised yield based on the current amortized cost of the investment. In estimating these cash flows, there are a number of assumptions that are subject to uncertainties and contingencies, including the rate and timing of principal payments (including prepayments, repurchases, defaults and liquidations), the pass-through or coupon rate and interest rate fluctuations. In addition, interest payment shortfalls due to delinquencies on the underlying mortgage loans and the timing and the magnitude of credit losses on the mortgage loans underlying the securities have to be judgmentally estimated. These uncertainties and contingencies are difficult to predict and are subject to future events that may impact our management's estimates and our interest income.

We record security transactions, other than repurchases of our own stock, on the trade date. Realized gains and losses from security transactions are determined based upon the specific identification method and recorded as gain (loss) on sale of available for sale securities in the statements of operations.

We account for accretion of discounts or premiums on available for sale securities and real estate loans using the effective interest yield method. Such amounts have been included as a component of interest income in the statements of operations.

We may sell all or a portion of our real estate investments to a third party. To the extent the fair value received for an investment differs from the amortized cost of that investment and control of the asset that is sold is surrendered making it a "true sale," as defined under SFAS No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities* a replacement of FASB Statement No. 125 ("SFAS 140"), a gain or loss on the sale will be recorded in the statements of operations as realized net gain (loss) on sale of real estate investment. To the extent a real estate investment is sold that has any fees that were capitalized at the time the investment was made and were being recognized over the term of the investment, the unamortized fees are recognized at the time of sale and included in any gain or loss on sale of real estate investments.

We have retained substantially all of the risks and benefits of ownership of our rental properties and therefore we account for leases with our tenants as operating leases. The total amount of

Crystal River Capital, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

December 31, 2007

(dollars in thousands, except per share data)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

contractual rent that we receive from operating leases is recognized on a straight-line basis over the term of the lease; and a straight-line or free rent receivable, as applicable, is recorded for the difference between the rental revenue recorded and the contractual amount received. In addition to base rent, the tenants in our commercial real estate properties also pay substantially all operating costs.

Expense reimbursement income arising from tenant leases that provide for the recovery of all or a portion of the operating expenses and real estate expenses of the respective property is accrued in the same period as the related expenses are incurred. These recoverable expenses are included in expenses as commercial real estate expenses.

Income arising from the operation of our parking garages is recognized when the parking spaces are occupied. Expenses related to the operation of the parking garage are included in expenses as commercial real estate expenses.

Dividend income on preferred stock is recorded on the dividend declaration date.

Interest in Equity Investment

We account for our investment in BREF One, LLC, a real estate finance fund, under the equity method of accounting since we own more than a minor interest in the fund, but do not unilaterally control the fund and are not considered to be the primary beneficiary under FIN 46R. The investment was recorded initially at cost, and subsequently adjusted for equity in net income (loss) and cash contributions and distributions to reflect the investment at its book value assuming hypothetical liquidation.

Income Taxes

We have elected to be taxed as a REIT under the Internal Revenue Code and the corresponding provisions of state law. To qualify as a REIT, we must distribute at least 90% of our annual REIT taxable income to stockholders within the statutory timeframe. Accordingly, we generally will not be subject to federal or state income tax to the extent that we make qualifying distributions to our stockholders and provided we satisfy the REIT requirements, including certain asset, income, distribution and stock ownership tests. If we were to fail to meet these requirements, we would be subject to federal, state and local income taxes, which could have a material adverse impact on our results of operations and amounts available for distribution to our stockholders.

The dividends paid deduction of a REIT for qualifying dividends to our stockholders is computed using our taxable income as opposed to using our financial statement net income. Some of the significant differences between financial statement net income and taxable income include the timing of recording unrealized gains/realized gains associated with certain assets, the book/tax basis of assets, interest income, impairment, straight-line amortization of rental leases, credit loss recognition related to certain assets (asset-backed mortgages), accounting for derivative instruments and stock compensation and amortization of various costs (including start up costs).

SFAS No. 109, *Accounting for Income Taxes* ("SFAS 109"), establishes financial accounting and reporting standards for the effect of income taxes that result from an organization's activities during the

Crystal River Capital, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

December 31, 2007

(dollars in thousands, except per share data)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

current and preceding years. SFAS 109 requires that income taxes reflect the expected future tax consequences of temporary differences between the carrying amounts of assets and liabilities for book and tax purposes. A deferred tax asset or liability for each temporary difference is determined based upon the tax rates that the organization expects to be in effect when the underlying items of income and expense are realized. A deferred tax valuation allowance is established if it is more likely than not that all or a portion of the deferred tax assets will not be realized.

The differences between GAAP net income and taxable income are generally attributable to differing treatment, including timing related thereto, of unrealized/realized gains and losses associated with certain assets, the bases, income, impairment, and/or credit loss recognition related to certain assets, primarily CMBS, accounting for derivative instruments, accounting for lease income on net leased real estate assets, and amortization or various costs. The distinction between GAAP net income and taxable income is important to our stockholders because dividends or distributions, if any, are declared and paid on the basis of annual estimates of taxable income or loss. We do not pay Federal income taxes on income that we distribute on a current basis, provided that we satisfy the requirements for qualification as a REIT under the Internal Revenue Code. We calculate our taxable income or loss as if we were a regular domestic corporation. This taxable income or loss level determines the amount of dividends, if any, that we are required to distribute over time to reduce or eliminate our tax liability pursuant to REIT requirements.

Income on CMBS investments is computed for GAAP purposes based upon a yield, which assumes credit losses will occur (See "Revenue Recognition" for further discussion). The yield to compute our taxable income does not assume there would be credit losses, as a loss can only be deducted for tax purposes when it has occurred. Furthermore, due diligence expense incurred related to the acquisition of CMBS and loan investments not originated are required to be expensed as incurred for GAAP purposes but are included as a component of the cost basis of the asset and amortized for tax purposes. In addition, straight line rental income recognized for GAAP purposes is not recognized for tax purposes as taxable income is generally based on contractual rental income.

We have a wholly-owned domestic taxable REIT subsidiary that has made a joint election with us to be treated as our TRS. Our TRS is a separate entity subject to federal income tax under the Internal Revenue Code. For the years ended December 31, 2007 and 2006 and the period March 15, 2005 (commencement of operations) to December 31, 2005, we recorded current net income tax expense of \$0, \$151 (federal income tax of \$93 and state and local income tax of \$58) and \$0, respectively, which is included in other expenses. For the years ended December 31, 2007 and 2006 and the period March 15, 2005 (commencement of operations) to December 31, 2005, we recorded a net deferred tax benefit (expense) of \$900, \$(900) and \$0, respectively, which is included in other expenses.

Crystal River Capital, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

December 31, 2007

(dollars in thousands, except per share data)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

As of December 31, 2007, we recorded a \$15,530 valuation allowance on deferred tax assets of \$15,530 attributable to mark to market adjustments on credit default swaps and income tax net operating losses relating to our TRS. The valuation allowance is based on management's estimate that our TRS is not expected to generate sufficient taxable income to recover the deferred tax assets. As of December 31, 2006 we had a deferred tax liability of \$900 attributable to mark to market adjustments on foreign currency swaps held in our TRS, which is included in accounts payable, accrued expenses and cash collateral payable. As of December 31, 2007, we had net operating loss carryforward and capital loss carryforward of approximately \$725 and \$32,614, respectively. The net operating loss carryforward expires in 2027 and the capital loss carryforward expires in 2012.

In June 2006, the Financial Accounting Standards Board ("FASB") issued Financial Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* ("FIN 48"). This interpretation clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with SFAS 109. This interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. This interpretation was effective January 1, 2007. The adoption of FIN 48 did not materially affect our consolidated financial statements.

Our policy for interest and penalties on material uncertain tax positions recognized in our consolidated financial statements is to classify these as interest expense and operating expense, respectively. In accordance with FIN 48, we assessed our tax positions for all open tax years (Federal, years 2005 to 2006 and State, years 2005 to 2006) as of December 31, 2007 and concluded that we have no material FIN 48 liabilities to be recognized at this time.

Deferred Financing Costs

Deferred financing costs represent commitment fees, legal and other third party costs associated with obtaining commitments for financing that result in a closing of such financing. These costs are amortized over the terms of the respective agreements using the effective interest method or a method that approximates the effective interest method and the amortization is reflected in interest expense. Unamortized deferred financing costs are expensed when the associated debt is refinanced or repaid before maturity. Costs incurred in seeking financing transactions that do not close are expensed in the period in which it is determined that the financing will not close.

Earnings per Share

We compute basic and diluted earnings per share in accordance with SFAS No. 128, *Earnings Per Share* ("SFAS 128"). Basic earnings per share ("EPS") is computed based on net income divided by the weighted average number of shares of common stock and other participating securities outstanding during the period. Diluted EPS is based on net income divided by the weighted average number of shares of common stock plus any additional shares of common stock attributable to stock options, provided that the options have a dilutive effect.

(dollars in thousands, except per share data)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Variable Interest Entities

In January 2003, the FASB issued Interpretation No. 46, *Consolidation of Variable Interest Entities - An Interpretation of ARB No. 51* ("FIN 46"). FIN 46 provides guidance on identifying entities for which control is achieved through means other than through voting rights and on determining when and which business enterprise should consolidate a variable interest entity ("VIE") when such enterprise would be determined to be the primary beneficiary. In addition, FIN 46 requires that both the primary beneficiary and all other enterprises with a significant variable interest in a VIE make additional disclosures. In December 2003, the FASB issued a revision of FIN 46, Interpretation No. 46R ("FIN 46R"), to clarify the provisions of FIN 46. FIN 46R states that a VIE is subject to consolidation if the investors in the entity being evaluated under FIN 46R either do not have sufficient equity at risk for the entity to finance its activities without additional subordinated financial support, are unable to direct the entity's activities, or are not exposed to the entity's losses or entitled to its residual returns. VIEs within the scope of FIN 46R are required to be consolidated by their primary beneficiary. The primary beneficiary of a VIE is determined to be the party that absorbs a majority of the VIE's expected losses, receives the majority of the VIE's expected returns, or both.

Our ownership of the subordinated classes of CMBS and RMBS from a single issuer may provide us with the right to control the foreclosure/workout process on the underlying loans, which we refer to as the Controlling Class CMBS and RMBS. There are certain exceptions to the scope of FIN 46R, one of which provides that an investor that holds a variable interest in a qualifying special-purpose entity ("QSPE") is not required to consolidate that entity unless the investor has the unilateral ability to cause the entity to liquidate. SFAS 140 sets forth the requirements for an entity to qualify as a QSPE. To maintain the QSPE exception, the special-purpose entity must initially meet the QSPE criteria and must continue to satisfy such criteria in subsequent periods. A special-purpose entity's QSPE status can be impacted in future periods by activities undertaken by its transferor(s) or other involved parties, including the manner in which certain servicing activities are performed. To the extent that our CMBS or RMBS investments were issued by a special-purpose entity that meets the QSPE requirements, we record those investments at the purchase price paid. To the extent the underlying special-purpose entities do not satisfy the QSPE requirements, we follow the guidance set forth in FIN 46R as the special purpose entities would be determined to be VIEs.

We have analyzed the pooling and servicing agreements governing each of our Controlling Class CMBS and RMBS investments for which we own a greater than 50% interest in the subordinated class and we believe that the terms of those agreements are industry standard and are consistent with the QSPE criteria. However, there is uncertainty with respect to QSPE treatment for those special-purpose entities due to ongoing review by regulators and accounting standard setters (including the project of the Financial Accounting Standards Board ("FASB") to amend SFAS 140 and the recently added FASB project on servicer discretion in a QSPE), potential actions by various parties involved with the QSPE (discussed in the paragraph above) and varying and evolving interpretations of the QSPE criteria under SFAS 140. We also have evaluated each of our Controlling Class CMBS and RMBS investments as if the special-purpose entities that issued such securities are not QSPEs. Using the fair value approach to calculate expected losses or residual returns, we have concluded that we would not be the primary beneficiary of any of the underlying special-purpose entities. Additionally, the standard setters continue

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

Our maximum exposure to loss as a result of our investment in these QSPEs totaled \$161,950 and \$241,314 as of December 31, 2007 and 2006, respectively.

The financing structures that we offer to the borrowers on certain of our real estate loans involve the creation of entities that could be deemed VIEs and therefore, could be subject to FIN 46R. In

F-20

Crystal River Capital, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

December 31, 2007

(dollars in thousands, except per share data)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

September 2007, we entered into an agreement to provide additional financing relating to an existing mezzanine construction loan, which triggered a reconsideration event under FIN 46R. This loan was determined to be a VIE; however, we concluded that we are not the primary beneficiary. Our management has evaluated the remainder of our real estate loans and has concluded that none of the remaining real estate loans are VIEs that are subject to the consolidation rules of FIN 46R. See Note 4.

Stock Based Compensation

We account for stock-based compensation in accordance with the provisions of SFAS No. 123R, *Accounting for Stock-Based Compensation* ("SFAS 123R"), which establishes accounting and disclosure requirements using fair value based methods of accounting for stock-based compensation plans. Compensation expense related to grants of stock and stock options are recognized ratably over the vesting period of such grants based on the estimated fair value on the grant date.

Stock compensation awards granted to the Manager and certain employees of the manager's affiliates are accounted for in accordance with EITF 96-18, *Accounting For Equity Instruments That Are Issued to Other Than Employees for Acquiring, or in Conjunction with Selling, Goods and Services*, which requires us to measure the fair value of the equity instrument using the stock prices and other measurement assumptions as of the earlier of either the date at which a performance commitment by the counterparty is reached or the date at which the counterparty's performance is complete.

Concentration of Credit Risk and Other Risks and Uncertainties

Our investments are primarily concentrated in MBS that pass through collections of principal and interest from the underlying mortgages and there is a risk that some borrowers on the underlying mortgages will default. Therefore, MBS may bear some exposure to credit losses. Our maximum exposure to loss due to credit risk if all parties to our AFS investments failed completely to perform according to the terms of the contracts as of December 31, 2007 and 2006 is \$1,815,246 and \$3,342,608, respectively. Our real estate loans and other investments may bear some exposure to credit losses. Our maximum exposure to loss due to credit risk if parties to the real estate loans, related and unrelated, and other investments failed completely to perform according to the terms of the loans as of December 31, 2007 and 2006 is \$208,541 and \$257,803, respectively.

We bear certain other risks typical in investing in a portfolio of MBS. Principal risks potentially affecting our financial position, income and cash flows include the risk that: (i) interest rate changes can negatively affect the market values of our MBS, (ii) interest rate changes can influence decisions made by borrowers in the mortgages underlying the securities to prepay those mortgages, which can negatively affect both the cash flows from, and the market value of, our MBS and (iii) adverse changes in the market value of our MBS and/or our inability to renew short term borrowings would result in the need to sell securities at inopportune times and cause us to realize losses.

Other financial instruments that potentially subject us to concentrations of credit risk consist primarily of cash and cash equivalents and real estate loans. We place our cash and cash equivalents in

Crystal River Capital, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

December 31, 2007

(dollars in thousands, except per share data)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

excess of insured amounts with high quality financial institutions. The collateral securing our real estate loans and other investments are located in the United States.

Credit risk also arises from the possibility that tenants may be unable to fulfill their lease commitments. We have a significant concentration of rental revenue from our commercial properties given that JPMorgan Chase is the sole tenant of all three properties. Therefore, we are subject to concentration of credit risk, and the inability of this tenant to make its lease payments could have an adverse effect on us. Our exposure to this credit risk is mitigated since we have long-term leases in place for all three properties with a tenant that has an investment grade credit rating.

Other Comprehensive Income (Loss)

Comprehensive income (loss) consists of net income and other comprehensive income. Our other comprehensive income (loss) is comprised primarily of unrealized gains and losses on securities available for sale and net unrealized and deferred gains and losses on certain derivative investments accounted for as cash flow hedges.

Repurchase Agreements

In repurchase agreements, we transfer securities to a counterparty under an agreement to repurchase the same securities at a fixed price in the future. These agreements are accounted for as secured financing transactions as we maintain effective control over the transferred securities and the transfer meets the other criteria for such accounting. The transferred securities are pledged by us as collateral to the counterparty.

In February 2008, the Financial Accounting Standards Board ("FASB") amended SFAS 140 through its issuance of FASB Staff Position No. FAS 140-3, *Accounting for Transfers of Financial Assets and Repurchase Financing Transactions* ("FSP 140-3"), relating to repurchase financings for financial assets previously transferred between the same counterparties, that is entered into contemporaneously with, or in contemplation of, the initial transfer. FSP 140-3 establishes criteria to determine the accounting treatment of transactions involving the transfer, and subsequent repurchase financing, of financial assets with the same counterparty. Transactions that do not meet the criteria of FSP 140-3 do not qualify for QSPE accounting treatment under SFAS 140 and will be treated as a derivative, requiring further evaluation under SFAS 133.

Foreign Currency Transactions

We conform to the requirements of SFAS No. 52, *Foreign Currency Translation* ("SFAS 52"). SFAS 52 requires us to record realized and unrealized gains and losses from transactions denominated in a currency other than our functional currency (U.S. dollar) in determining net income.

Segment Reporting

SFAS No. 131, *Disclosures about Segments of an Enterprise and Related Information* ("SFAS 131") establishes standards on reporting operating segments in interim and annual financial reports. SFAS 131 defines an operating segment as a component of an enterprise for which discrete financial

Crystal River Capital, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(dollars in thousands, except per share data)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

information is available and is reviewed regularly by the chief operating decision-maker, or decision making group, to evaluate performance and make operating decisions. We have identified our chief operating decision-maker as our chief executive officer. We have determined that we operate in two reportable segments: a Securities, Loans and Other Investments segment and a Commercial Real Estate segment. The reportable segments were determined based on the allocation of our investment portfolio between investment activity and commercial real estate operations in which separate performance data is produced and analyzed by management and the chief operating decision-maker.

Recently Adopted Accounting Pronouncements

In April 2006, the FASB issued FSP FIN 46(R)-6, *Determining the Variability to be Considered When Applying FASB Interpretation No. 46(R)* ("FIN 46(R)-6"). FIN 46(R)-6 addresses the approach to determine the variability to consider when applying FIN 46(R). The variability that is considered in applying FIN 46R may affect (i) the determination as to whether an entity is a VIE, (ii) the determination of which interests are variable in the entity, (iii) if necessary, the calculation of expected losses and residual returns on the entity and (iv) the determination of which party is the primary beneficiary of the VIE. Thus, determining the variability to be considered is necessary to apply the provisions of FIN 46R. FIN 46(R)-6 is required to be prospectively applied to entities in which we first become involved after July 1, 2006 and would be applied to all existing entities with which we are involved if and when a "reconsideration event" (as described in FIN 46) occurs. We adopted FIN 46(R)-6 during the quarter ended September 30, 2006. The adoption of FIN 46(R)-6 did not have a material effect on our consolidated financial statements.

In February 2006, the FASB issued SFAS No. 155, *Accounting for Certain Hybrid Instruments* ("SFAS 155"). SFAS 155 is an amendment of SFAS 133 and SFAS 140 that allows financial instruments that have embedded derivatives to be accounted for as a whole (eliminating the need to bifurcate the derivative from its host) if the holder elects to account for the whole instrument on a fair value basis. SFAS 155 also clarifies which interest-only strips and principal-only strips are not subject to the requirements of SFAS 133 and establishes a requirement to evaluate interests in securitized financial assets to identify interests that are freestanding derivatives or that are hybrid financial instruments that contain an embedded derivative requiring bifurcation. Finally, SFAS 155 amends SFAS 140 to eliminate the prohibition on a qualifying special-purpose entity from holding a derivative financial instrument that pertains to a beneficial interest other than another derivative financial instrument. We adopted SFAS 155 during the quarter ended March 31, 2007. The adoption of SFAS 155 did not have a material effect on our consolidated financial statements.

In March 2006, the FASB issued SFAS No. 156, *Accounting for Servicing of Financial Assets - an amendment of FASB Statement No. 140* ("SFAS 156"). SFAS 156 requires: (i) an entity to recognize a servicing asset or servicing liability each time it undertakes an obligation to service a financial asset by entering into a servicing contract under certain conditions, (ii) all separately recognized servicing assets and servicing liabilities to be initially measured at fair value, if practicable, and (iii) permits an entity to choose either the amortization method or the fair value measurement method for subsequent measurement of each class of separately recognized servicing assets and servicing liabilities. We adopted SFAS 156 during the quarter ended March 31, 2007. The adoption of SFAS 156 did not have a material effect on our consolidated financial statements.

(dollars in thousands, except per share data)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Recently Issued Accounting Pronouncements Not Yet Adopted

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements* ("SFAS 157"). SFAS 157 clarifies the definition of fair value, establishes a framework for measuring fair value in GAAP and requires expanded financial statement disclosures about fair value measurements for assets and liabilities. SFAS 157 requires companies to disclose the fair value of their financial instruments according to a fair value hierarchy as defined in the standard. SFAS 157 is effective for fiscal periods beginning after November 15, 2007. SFAS 157 will be effective for us beginning January 1, 2008, and we are currently evaluating the effects of SFAS 157 on our consolidated financial statements.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* ("SFAS 159"). SFAS 159 permits entities to choose to measure many financial instruments and certain other items at fair value to improve financial reporting by providing entities with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. SFAS 159 also establishes presentation and disclosure requirements designed to facilitate comparisons between entities that choose different measurement attributes for similar types of assets and liabilities. SFAS 159 is effective for financial statements issued for fiscal periods beginning after November 15, 2007. SFAS 159 will be effective for us beginning January 1, 2008, and will have the following effect at adoption:

	Historical December 31, 2007	At date of adoption	Cumulative effect adjustment
Collateralized debt obligations ("CDOs")	\$ 486,608	\$ 299,034	\$ 187,574
Deferred financing costs on CDOs, net of accumulated amortization	8,152		(8,152)
Net unrealized holding gains on available for sale securities within our CDO entities reclassified to declared dividends in excess of operations			1,670
Total cumulative effect adjustment			\$ 181,092

In addition, we have \$290,880 of notional interest rate positions relating to our CDOs that no longer qualify for hedge accounting at the date of adoption. Subsequent changes in fair value and net cash settlements prospectively will be recorded in our statement of operations.

In June 2007, the American Institute of Certified Public Accountants ("AICPA") issued Statement of Position ("SOP") 07-1, *Clarification of the Scope of the Audit and Accounting Guide for Investment Companies and Accounting for Parent Companies and Equity Method Investors for Investments in Investment Companies* ("SOP 07-1"). This SOP provides guidance for determining whether an entity is within the scope of the AICPA Audit and Accounting Guide *Investment Companies* (the "Guide"). Entities that are within the scope of the Guide are required, among other things, to carry their investments at fair value, with changes in fair value included in earnings. The effective date of SOP 07-1 has been indefinitely deferred. We are currently evaluating this new guidance and have not

Crystal River Capital, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(dollars in thousands, except per share data)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

determined whether we will be required to apply the provisions of the Guide in presenting our consolidated financial statements if and when such deferral ends.

In December 2007, the FASB issued SFAS No. 141(R), *Business Combinations* ("SFAS 141(R)"), which replaces SFAS No. 141, *Business Combinations*, and requires a company to recognize the assets acquired, the liabilities assumed, and any non-controlling interest in the acquired entity to be measured at their fair values as of the acquisition date. SFAS 141(R) also requires acquisition costs to be expensed as incurred and does not permit certain restructuring activities previously allowed under EITF Issue No. 95-3 to be recorded as a component of purchase accounting. SFAS 141(R) applies prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. We are currently evaluating the effect the adoption of SFAS 141(R) may have on our consolidated financial statements.

In December 2007, the FASB issued SFAS No. 160, *Accounting for Noncontrolling Interests in Consolidated Financial Statements - an amendment of Accounting Research Bulletin No. 51* ("SFAS 160"). SFAS 160 clarifies the classification of non-controlling interests in consolidated statements of financial position and the accounting for and reporting of transactions between a company and holders of such non-controlling interests. Under SFAS 160, non-controlling interests are considered equity and should be reported as an element of consolidated equity. The current practice of classifying minority interests within a mezzanine section of the statement of financial position will be eliminated. Under SFAS 160, net income will encompass the total income of all consolidated subsidiaries and will require separate disclosure on the face of the statement of operations of income (loss) attributable to the controlling and non-controlling interests. Increases and decreases in the non-controlling ownership interest amount will be accounted for as equity transactions. When a subsidiary is deconsolidated, any retained, non-controlling equity investment in the former subsidiary and the gain or loss on the deconsolidation of the subsidiary must be measured at fair value. SFAS 160 is effective for fiscal years beginning after December 15, 2008 and earlier application is prohibited. We are currently evaluating the effect the adoption of SFAS 160 may have on our consolidated financial statements.

Presentation

Certain reclassifications have been made in the presentation of the prior period's consolidated financial statements to conform to the 2007 presentation.

Asset-Backed Securities ("ABS")

Edgar Filing: Crystal River Capital, Inc. - Form 10-K

Aircraft ABS generally are collateralized by aircraft leases. Issuers of consumer and aircraft ABS generally are special-purpose entities owned or sponsored by banks and finance companies, captive finance subsidiaries of non-financial corporations or specialized originators such as credit card lenders. During the year ended December 31, 2007, we sold all three of our ABS investments for proceeds of \$34,311 and realized a loss of \$456. As of December 31, 2007, we had no investments in ABS.

(dollars in thousands, except per share data)

3. AVAILABLE FOR SALE SECURITIES (Continued)

As of December 31, 2007, the three AAA rated securities that we held that had unrealized losses had been in a loss position for more than 12 months. As of December 31, 2007, the one BB rated security that we held that had unrealized losses had been in a loss position for less than 12 months. The unrealized losses on our securities are primarily the result of market factors, rather than credit impairment, and we have performed credit analyses in relation to such securities that support our belief that the carrying values of such securities are fully recoverable over their expected holding period. Because we have the ability and intent to hold these investments until a recovery of fair value, which may be maturity, we do not consider these investments to be other than temporarily impaired at December 31, 2007. Although our management expects to hold these securities until their recovery, there is no assurance that such securities will not be sold or at what price, if any, they might be sold.

For available for sale securities with unrealized losses, the following table sets forth the amortized cost, fair value and unrealized loss for such securities that we owned as of December 31, 2006:

Security Rating	Number of Securities	Amortized Cost	Fair Value	Unrealized Loss
AAA	68	\$ 1,221,778	\$ 1,209,656	\$ 12,122
AA				
A	1	4,363	4,182	181
BBB	24	133,211	131,090	2,121
BB	41	110,688	107,814	2,874
B	36	60,327	58,664	1,663
Not rated	6	9,652	8,992	660
Total	176	\$ 1,540,019	\$ 1,520,398	\$ 19,621

As of December 31, 2006, we held 47 securities, with unrealized losses totaling \$1,878, that had been in a loss position for 12 months or less. As of December 31, 2006, we also held 129 securities, with unrealized losses totaling \$17,743, that had been in a loss position for more than 12 months. The unrealized losses on our securities were primarily the result of market factors, rather than credit impairment, and we performed credit analyses in relation to such securities that supported our belief that the carrying values of such securities were fully recoverable over their expected holding period. Because we had the ability and intent to hold these investments until a recovery of fair value, which may be maturity, we did not consider these investments to be other than temporarily impaired at December 31, 2006.

Other Than Temporary Impairments

For the year ended December 31, 2007, we recorded an impairment charge totaling \$317,931 on 130 RMBS, 59 Agency MBS, 131 CMBS and two preferred stock investments, which was reclassified out of other comprehensive income. The impairment of 22 of the 130 RMBS and seven of the 131 CMBS, totaling \$59,454 and \$11,162, respectively, is attributed to the decline in the projected yields related to changes in the cash flow assumptions, such as timing and prepayments, on the underlying assets. The impairment of the remaining 108 of the 130 RMBS, 115 of the 131 CMBS and both of the preferred stock investments, totaling \$69,291, \$154,630 and \$3,712, respectively, is attributed to other than temporary declines in market values and is primarily a consequence of wider spreads affecting

Crystal River Capital, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(dollars in thousands, except per share data)

3. AVAILABLE FOR SALE SECURITIES (Continued)

market values of the securities. The impairment of the remaining nine of 131 CMBS and 59 Agency MBS, totaling \$9,126 and \$10,556, respectively, is the result of our intent not to hold these securities to recovery where cost exceeds market value. At December 31, 2007, of the investments that we impaired during 2007, we still owned 130 RMBS, 17 Agency MBS, 130 CMBS and two preferred stock investments.

For the year ended December 31, 2006, we recorded an impairment charge totaling \$10,389 on 17 RMBS, nine Agency MBS and four CMBS, which was reclassified out of other comprehensive income. The impairment of all of the 17 RMBS and one of the four CMBS, totaling \$3,182 and \$282, respectively, is attributed to the decline in the projected yields related to changes in the cash flow assumptions, such as timing and prepayments, on the underlying assets. The impairment of the remaining three of four CMBS and nine Agency MBS, totaling \$3,915 and \$3,010, respectively, is the result of our intent not to hold these securities to recovery where cost exceeds market value. At December 31, 2006, of the investments that we impaired during 2006, we still owned 17 RMBS and two CMBS, and we did not sell any of these 19 securities during 2007.

For the period March 15, 2005 (commencement of operations) to December 31, 2005, we recorded an impairment charge of \$5,782 on nine Agency MBS, which was reclassified out of other comprehensive income. The impairment of the nine Agency MBS is the result of our intent not to hold these securities to recovery where cost exceeds market value. The nine Agency MBS impaired in 2005 were sold in 2006.

Sale of Available for Sale Securities

During the year ended December 31, 2007, we sold 36 securities for proceeds of \$828,670 and realized a gain of \$2,881 and we sold 40 securities for proceeds of \$814,460 and realized a loss of \$4,426. During the year ended December 31, 2006, we sold 22 securities for proceeds of \$182,744 and realized a gain of \$1,571, we sold three securities at their carrying value for proceeds of \$7,991 and we sold 16 securities for proceeds of \$469,675 and realized a loss of \$3,699. During the period March 15, 2005 (commencement of operations) through December 31, 2005, we sold one security for proceeds of \$374 and realized a gain of \$4.

4. REAL ESTATE LOANS

We invest in mezzanine loans, B Notes, construction loans and whole loans. A mezzanine loan is a loan that is subordinated to a first mortgage loan on a property and is senior to the borrower's equity in the properties. Mezzanine loans are made to the property's owner and are secured by pledges of ownership interests in the property and/or the property owner. The mezzanine lender can foreclose on the pledged interests and thereby succeed to ownership of the property subject to the lien of the first mortgage.

A subordinated commercial real estate loan, which we refer to as a B Note, may be rated by at least one nationally recognized rating agency. A B Note is typically a privately negotiated loan that is secured by a first mortgage on a single large commercial property or group of related properties; and is subordinated to an A Note secured by the same first mortgage on the same property.

Crystal River Capital, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

December 31, 2007

(dollars in thousands, except per share data)

4. REAL ESTATE LOANS (Continued)

A construction loan represents a participation in a construction or rehabilitation loan on a commercial property that generally provides 85% to 90% of total project costs and is secured by a first lien mortgage on the property. Alternatively, mezzanine loans can be used to finance construction or rehabilitation where the security is subordinate to the first mortgage lien. Construction loans and mezzanine loans used to finance construction or rehabilitation generally would provide fees and interest income at risk-adjusted rates.

A whole mortgage loan is a loan secured by a first lien mortgage that provides mortgage financing to commercial and residential property owners and developers. Generally, mortgage loans have maturities that range from three to 10 years for commercial properties and up to 30 years for residential properties.

The following is a summary of our real estate loans as of December 31, 2007 and 2006:

Loan Type	Number of Loans	Face Value	Carrying Value	Weighted Average Interest Rate	Maturity Range	Weighted Average Yearse to Maturity
December 31, 2007						
Whole loans	14	\$ 116,559	\$ 118,015	5.73%	11/2009-8/2016	7.4
Construction loans	2	25,370	20,872	12.49	5/2008-7/2008	0.4
Mezzanine loans	3	31,923	31,893	9.78	10/2008-8/2016	7.1
	<u>19</u>	<u>\$ 173,852</u>	<u>\$ 170,780</u>	<u>7.46</u>	<u>5/2008-8/2016</u>	<u>6.3</u>
December 31, 2006						
Whole loans	16	\$ 198,942	\$ 200,605	6.06%	11/2009-7/2021	8.9
Construction loans	2	20,052	20,056	11.48	11/2007-7/2008	1.3
Mezzanine loans	2	16,923	17,009	9.75	7/2008-2/2016	6.6
	<u>20</u>	<u>\$ 235,917</u>	<u>\$ 237,670</u>	<u>6.78</u>	<u>11/2007-7/2021</u>	<u>8.1</u>

The carrying values of our loans as of December 31, 2007 and 2006 include unamortized underwriting fees of \$192 and \$180, respectively.

The maturities of our real estate loans as of December 31, 2007 are as follows: \$31,625 in 2008, \$4,152 in 2009, \$3,075 in 2010, \$3,384 in 2011, \$7,946 in 2012 and \$119,170 thereafter.

In 2005, we originated a \$9,450 mezzanine construction loan to develop luxury residential condominiums in Portland, Oregon. In September 2007, we entered into an agreement with the borrower and the senior lender to increase both the mezzanine construction loan and the senior loan that requires additional capital contributions from the project equity holder to cover the remaining costs to complete the project. The mezzanine construction loan bears interest at an annual rate of 16% and had a maturity date of November 2007, which was subsequently extended until May 2008. Under the amended agreement governing the terms of the loan, interest on the loan was paid in cash through March 2006, was capitalized through September 2007, and will be paid in cash through May 2008. We advanced an additional \$5,712, including capitalized interest of \$1,105, during the year ended December 31, 2007.

Crystal River Capital, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(dollars in thousands, except per share data)

4. REAL ESTATE LOANS (Continued)

The financing structures that we offer to the borrowers on certain of our real estate loans involve the creation of entities that could be deemed VIEs and therefore, could be subject to FIN 46R. The September 2007 agreement to provide additional financing discussed above triggered a reconsideration event under FIN 46R. This loan was determined to be a VIE; however, we concluded that we are not the primary beneficiary. Our maximum exposure to loss under this agreement as of December 31, 2007 totaled \$9,270.

Currently, the projected total costs to complete the project have increased from \$41,400 to \$59,393, including capitalized interest. As of December 31, 2007, of the 70 units available, 47 units have been sold.

We have evaluated the financial merits of the project by reviewing the projected unit sales and estimated construction costs and evaluating other collateral available to us (and the expected cost of realizing any recovery on that collateral) under the terms of the loan. We believe that it is probable that we will not recover the entire loan balance, including the capitalized interest, through the satisfaction of future cash flows from sales and other available collateral. Accordingly, based on our analysis, we have recorded provision for loan loss of \$4,500 related to this loan during the year ended December 31, 2007. We will continue to monitor the status of this loan. However, housing prices, in particular condominium prices, may fall, unit sales may lag projections and construction costs may increase, all of which may increase the risk of recovery on our loan. No assurance can be given that we will not be required to record additional loan loss reserves with respect to this loan in the future depending on the borrower's ability to complete the project without additional cost overruns. In the event that we determine that it is probable that we will not be able to recover the current carrying value of this loan, additional loan loss reserves will be recorded.

We pledge our real estate loans to secure our collateralized debt obligations, senior mortgage backed notes, repurchase agreements and secured revolving credit facility. The fair value of the real estate loans that we pledged as collateral as of December 31, 2007 and 2006 is summarized as follows:

Pledged as Collateral:	December 31,	
	2007	2006
For borrowings under collateralized debt obligations	\$ 18,000	\$ 18,000
For borrowings under senior mortgage-backed notes, related party	112,874	
For borrowings under repurchase agreements		159,219
For borrowings under secured revolving credit facility, related party	34,587	
Total	\$ 147,461	\$ 177,219

As of December 31, 2007 and 2006, our real estate loans included non-U.S. dollar denominated assets with a carrying value of \$0 and \$42,885, respectively.

5. ACQUISITIONS

Houston and Phoenix properties

On March 20, 2007, we acquired two properties located in Houston, Texas and Phoenix, Arizona totaling approximately 428,600 and 724,000 square feet, respectively, from an affiliate of our Manager for an aggregate purchase price of \$234,710. Both properties are leased on a triple net basis to one tenant under leases that expire in 2021. In addition to the sale and purchase agreement, we entered into rent enhancement agreements with the seller under which we will receive payments through 2015 totaling \$15,905. The present value of such payments is recorded as other receivables (net of amortization) totaling \$11,865 on our balance sheet as of December 31, 2007, which partially offsets the below-market lease terms.

The following is a summary of the allocation of purchase price to each major class of asset and liability:

Commercial real estate	\$	213,835
Intangible assets		81,082
Intangible liabilities		(73,804)
Rent enhancement receivable		13,597
		<hr/>
Total	\$	234,710
		<hr/>

The transaction was financed with a \$198,500 mortgage loan that bears interest at an annual rate of 5.509% (hedged rate 5.65%) and matures on April 1, 2017. We incurred financing costs of \$209, which have been deferred and are being amortized over the term of the loan.

Arlington property

On September 25, 2007, we acquired a property located in Arlington, Texas totaling approximately 176,000 square feet from an affiliate of our Manager for a purchase price of \$26,494. The property is leased on a triple net basis to the same tenant as the Houston and Phoenix properties under a lease that expires in 2027. In addition to the sale and purchase agreement, we entered into a rent enhancement agreement with the seller under which we will receive payments through 2019 totaling \$6,902. The present value of such payments is recorded as other receivables totaling \$4,446 on our balance sheet as of December 31, 2007, which partially offsets the below-market lease terms.

The following is a summary of the allocation of purchase price to each major class of asset and liability:

Commercial real estate	\$	25,638
Intangible assets		4,368
Intangible liabilities		(7,998)
Rent enhancement receivable		4,486
		<hr/>
Total	\$	26,494
		<hr/>

The transaction was financed with a \$20,880 mortgage loan that bears interest at an annual rate of 6.29% and matures on October 1, 2017. We incurred financing costs of \$98, which have been deferred and are being amortized over the term of the loan.

Crystal River Capital, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

December 31, 2007

(dollars in thousands, except per share data)

6. COMMERCIAL REAL ESTATE

The components of commercial real estate as of December 31, 2007 are as follows:

	December 31, 2007
Land	\$ 17,428
Buildings and improvements	222,045
Commercial properties	239,473
Less: Accumulated depreciation	(4,710)
Total	\$ 234,763

The depreciation expense related to commercial real estate included in the operating results for the year ended December 31, 2007 was \$4,710.

The following is a schedule of future minimum rent payments to be received under the leases at the three properties acquired:

	Rent Payments
2008	\$ 11,150
2009	11,373
2010	11,600
2011	11,832
2012	12,068
Thereafter	126,461

7. OTHER INVESTMENTS

The components of other investments as of December 31, 2007 and 2006 are as follows:

	December 31, 2007	December 31, 2006
Investment in foreign credit facility	\$	\$ 20,133
Investment in trust preferred securities	1,550	
Interest in equity investment	36,211	
Total other investments	\$ 37,761	\$ 20,133

The interest in equity investment represents an investment in a private equity fund that invests in real estate investments. The fund is managed by an affiliate of our Manager and the investment was approved by the independent members of our board of directors. In addition to the initial investment of \$28,462 in January 2007, we agreed to a future capital commitment of \$10,392. Certain distributions from the private equity fund are classified as recallable by the fund. Distributions totaled \$8,494 with recallable capital amounts totaling \$4,776 for the year ended December 31, 2007. As of December 31, 2007, we had made additional capital contributions of \$13,633 and our unfunded commitment totaled

Crystal River Capital, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

December 31, 2007

(dollars in thousands, except per share data)

7. OTHER INVESTMENTS (Continued)

\$1,535. Income from the interest in equity investment for the year ended December 31, 2007 can be broken down in the following components:

	Year Ended December 31, 2007
Income from equity investment before management and promote fees	\$ 3,416
Management fee	(225)
Promote fee	(581)
Income from equity investment	\$ 2,610

In August 2006, we acquired a participation interest in an unsecured loan. The face value of the loan at December 31, 2006 was £10,000 (\$20,133), it bore interest at the rate of LIBOR plus 688 basis points and did not have any stated maturity date. The loan was non-US dollar denominated. In connection with this loan, we paid \$568 (£300) to secure this loan, and we amortized this amount over the expected loan term of eight years. Amortization totaled \$51 and \$24, respectively, for the years ended December 31, 2007 and 2006. In September 2007, we sold our investment in foreign credit facility for total proceeds of \$23,118 and realized a gain of \$42.

8. INTANGIBLE ASSETS AND INTANGIBLE LIABILITIES

The intangible assets and liabilities arose on the acquisition of the commercial real estate properties in March 2007 and September 2007.

As of December 31, 2007, the components of intangible assets are as follows:

	December 31, 2007	Weighted Average Life (Years)
Lease origination costs	\$ 82,228	14.4
Below-market ground lease	2,919	58.3
Mineral rights	303	
Total	85,450	
Less: Accumulated amortization	(4,276)	
Intangible assets	\$ 81,174	

The amortization of lease origination costs for the year ended December 31, 2007 was \$4,237 and is included in depreciation and amortization expense. The amortization of below-market ground lease, which is included in commercial real estate expenses, for the year ended December 31, 2007 was \$39. The estimated amortization of these intangible assets is \$5,633 per year for each of the next five years.

Below market leases, net of amortization, which are classified as intangible liabilities, are \$77,745 as of December 31, 2007. The amortization of intangible liabilities included in rental income for the year ended December 31, 2007 was \$4,057. The estimated amortization is \$5,480 per year for each of the next five years.

9. DEBT AND OTHER FINANCING ARRANGEMENTS

The following is a summary of our debt as of December 31, 2007 and 2006:

Type of Debt:	2007	2006
Repurchase agreements	\$ 1,276,121	\$ 2,723,643
Repurchase agreements, related party		144,806
Collateralized debt obligations	486,608	194,396
Senior mortgage-backed notes, related party	99,815	
Junior subordinated notes held by trust that issued trust preferred securities	51,550	
Mortgages payable	219,380	
Secured revolving credit facility, related party	67,319	
Total Debt	\$ 2,200,793	\$ 3,062,845

Repurchase Agreements

As of December 31, 2007, we had entered into master repurchase agreements with various counterparties to finance certain of our asset purchases on a short term basis. Under these agreements, we sell our assets to the counterparties and agree to repurchase those assets on a certain date at a repurchase price generally equal to the original sales price plus accrued interest. The counterparties will purchase each asset financed under the facility at a percentage of the asset's value on the date of origination, which is the purchase rate, and we will pay interest to the counterparty at short term interest rates (usually based on one-month LIBOR) plus a pricing spread. We have agreed to a schedule of purchase rates and pricing spreads with these counterparties that generally are based upon the class and credit rating of the asset being financed. The facilities are recourse to us. For financial reporting purposes, we characterize all of the borrowings under these facilities as balance sheet financing transactions.

Under the repurchase agreements, we are required to maintain adequate collateral with these counterparties. If the market value of the collateral we have pledged declines, then the counterparty may require us to provide additional collateral to secure our obligations under the repurchase agreement. As of December 31, 2007 and 2006, we were required to provide additional collateral in the amount of \$15,661 and \$62,075, respectively, which is included in restricted cash on the balance sheet.

9. DEBT AND OTHER FINANCING ARRANGEMENTS (Continued)

backed securities and other mutually agreed upon collateral and bears interest at varying rates over LIBOR based upon the type of asset included in the repurchase obligation. In November 2005, the Bank increased the borrowing capacity to \$275,000. In August 2007, we and the Bank agreed to decrease the borrowing capacity to \$100,000. As of December 31, 2007 and 2006, the unused amount under the Master Repurchase Agreement was \$86,521 and \$275,000, respectively.

Collateralized Debt Obligations ("CDOs")

In November 2005, we issued approximately \$377,904 of CDOs ("CDO I") through two newly-formed subsidiaries, Crystal River CDO 2005-1, Ltd. (the "2005 Issuer") and Crystal River CDO 2005-1 LLC (the "2005 Co-Issuer"). CDO I consists of \$227,500 of investment grade notes and \$67,750 of non-investment grade notes, each with a final contractual maturity date of March 2046, which were co-issued by the 2005 Issuer and the 2005 Co-Issuer, and \$82,654 of preference shares, which were issued by the 2005 Issuer. We retained all of the non-investment grade securities, the preference shares and the common shares in the 2005 Issuer. The 2005 Issuer holds assets, consisting primarily of whole loans, CMBS and RMBS, which serve as collateral for CDO I. Investment grade notes in the aggregate principal amount of \$217,500 were issued with floating coupons with a combined weighted average interest rate of three-month LIBOR plus 0.58% and these notes were hedged at an annual rate of 5.068% to protect CDO I from increases in short-term interest rates. In addition, \$10,000 of investment grade notes were issued with a fixed coupon rate of 6.02%. CDO I may be replenished, pursuant to certain rating agency guidelines relating to credit quality and diversification, with substitute collateral for loans that are repaid during the first five years of CDO I. Thereafter, CDO I's securities will be retired in sequential order from the senior-most to junior-most as loans are repaid. We incurred approximately \$5,906 of issuance costs, which is amortized over the average life of CDO I. The 2005 Issuer and 2005 Co-Issuer are consolidated in our financial statements. The investment grade notes are treated as a secured financing, and are non recourse to us. Proceeds from the sale of the investment grade notes issued were used to repay outstanding debt under our repurchase agreements. As of December 31, 2007 and 2006, CDO I was collateralized by available for sale securities with fair values of \$164,855 and \$257,814, respectively, and real estate loans with carrying values of \$0 and \$18,000, respectively.

In January 2007, we issued approximately \$390,338 of CDOs ("CDO II") through two newly-formed subsidiaries, Crystal River Capital Resecuritization 2006-1 Ltd. (the "2006 Issuer") and Crystal River Capital Resecuritization 2006-1 LLC (the "2006 Co-Issuer"). CDO II consists of \$324,956 of investment grade notes and \$14,638 of non-investment grade notes, each with a final maturity date of September 2047, which were co-issued by the 2006 Issuer and the 2006 Co-Issuer, and \$19,517 of non-investment grade notes and \$31,227 of preference shares, which were issued by the 2006 Issuer. The 2006 Issuer initially held cash totaling \$58,600 that was designated for the future funding of additional investments. As of December 31, 2007, all of such cash had been invested. We retained all of the non-investment grade securities, the preference shares and the common shares in the 2006 Issuer. The 2006 Issuer holds assets, consisting of CMBS, which serve as collateral for CDO II. Investment grade notes in the aggregate principal amount of \$324,956 were issued with floating coupons with a combined weighted average interest rate of three-month LIBOR plus 0.57% and these notes were hedged at an annual rate of 4.955% to protect CDO II from increase in short-term interest rates. We incurred approximately \$6,006 of issuance costs, which is being amortized over the average life of CDO

Crystal River Capital, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(dollars in thousands, except per share data)

9. DEBT AND OTHER FINANCING ARRANGEMENTS (Continued)

II. The 2006 Issuer and the 2006 Co-Issuer are consolidated in our financial statements. The investment grade notes are treated as a secured financing, and are non recourse to us. Proceeds from the sale of the investment grade notes issued were used to repay outstanding debt under our repurchase agreements. As of December 31, 2007, CDO II was collateralized by available for sale securities with a fair value of \$233,826.

Senior Mortgage-Backed Notes, Related Party

In April 2007, we issued \$115,000 of senior mortgage-backed notes through a newly-formed subsidiary, CRZ ABCP Financing LLC. We retained \$9,250 of senior subordinated mortgage-backed notes and \$4,250 of subordinated mortgage-backed notes. CRZ ABCP Financing LLC holds assets, consisting of commercial whole mortgage loans, which serve as collateral for the mortgage-backed notes. Senior mortgage-backed notes in the aggregate principal amount of \$101,500 were issued to an affiliate of our Manager with floating coupons with an interest rate of three-month LIBOR plus 0.35%. Interest on the senior mortgage-backed notes is payable monthly. The senior mortgage-backed notes mature in April 2017 and the outstanding principal is due at maturity. Early repayments of the underlying mortgage loans require repayment of a portion of the senior mortgage-backed notes. The senior mortgage-backed notes are treated as a secured financing, and are non recourse to us. Proceeds from the sale of the senior mortgage-backed notes issued were used to repay outstanding debt under our repurchase agreements. As of December 31, 2007, the mortgage-backed notes were collateralized by real estate loans with a carrying value of \$114,636. We incurred financing costs of \$611, which have been deferred and are being amortized over the term of the senior mortgage-backed notes.

Junior Subordinated Notes Held by Trust that Issued Trust Preferred Securities

In March 2007, we formed Crystal River Preferred Trust I ("Trust I") for the purpose of issuing trust preferred securities. In March 2007, Trust I issued \$50,000 of trust preferred securities to an unaffiliated investor and \$1,550 of trust common securities to us for \$1,550. The combined proceeds were invested by Trust I in \$51,550 of junior subordinated notes issued by us. The junior subordinated notes are the sole assets of Trust I and mature in April 2037, but are callable by us at par on or after April 2012. Interest is payable quarterly at a fixed rate of 7.68% (ten-year LIBOR plus 2.75%) through April 2012 and thereafter at a floating rate equal to three-month LIBOR plus 2.75%. We incurred financing costs of \$1,356, which have been deferred and are being amortized over the term of the junior subordinated notes.

Mortgages Payable

In March 2007, we financed a portion of our purchase of two office buildings located in Houston, Texas and Phoenix, Arizona, with a \$198,500 mortgage loan that bears interest at an annual rate of 5.509% and matures on April 1, 2017. The mortgage provides for payments of interest only throughout the term of the loan and the entire principal is due at maturity. We incurred financing costs of \$209, which have been deferred and are being amortized over the term of the loan. In September 2007, we financed a portion of our purchase of one office building located in Arlington, Texas with a \$20,880 mortgage loan that bears interest at an annual rate of 6.29% and matures on October 1, 2017. The mortgage provides for payments of interest only until October 1, 2010, after which we will be required to make monthly payments of \$129 in respect of principal and interest. We will be required to pay the

remaining principal and accrued interest at maturity. We incurred financing costs of \$98, which have been deferred and are being amortized over the term of the loan.

Revolving Credit Facilities

In March 2006, we entered into an unsecured credit facility with Signature Bank that provides for borrowings of up to \$31,000 in the aggregate. In November 2007, we and Signature Bank amended the terms of the facility to convert the facility to a secured revolving credit facility that provides for borrowings of up to \$12,000 in the aggregate. The facility was secured by a real estate loan that we owned that had a carrying value of \$19,000. The underlying collateral was repaid in November 2007 and we and Signature terminated the unsecured credit facility effective with the repayment of such collateral.

In August 2007, we entered into a \$100,000 unsecured 364-day credit facility with Brookfield US Corporation (f/k/a Brascan (U.S.) Corp.), an affiliate of our Manager. Indebtedness outstanding under the unsecured credit facility bore interest at LIBOR + 4.00%. In November 2007, we and Brookfield US Corporation amended the terms of the facility, effective as of September 30, 2007, to convert the facility to a secured revolving credit facility that provides for borrowings of up to \$100,000 in the aggregate and expires in May 2009. On March 7, 2008, we and Brookfield US Corporation amended the terms of the facility, effective as of December 31, 2007, to extend the term of the facility from November 2008 to May 2009, to revise the financial covenant relating to minimum net worth and to eliminate the financial covenants relating to minimum net income (as defined in the facility), a maximum leverage ratio and interest rate sensitivity. The secured facility bears interest at LIBOR + 2.50%. The credit facility and the amendments were approved by the independent members of our board of directors. The credit agreement contains customary representations, warranties and covenants, including covenants limiting dividends, liens, mergers, asset sales and other fundamental changes. In addition, the credit agreement contains additional covenants, which include maintaining a certain minimum net worth. We incurred financing costs of \$8, which have been deferred and are being amortized over the term of the secured revolving credit facility.

Restrictive Covenants and Maturities

Certain of our repurchase agreements and our revolving credit facilities contain financial covenants, including maintaining our REIT status and maintaining a specific net asset value or worth. We were in compliance with all our financial covenants as of December 31, 2006. Effective as of December 31, 2007, we and many of our counterparties amended the terms of our secured revolving credit facility and several of our repurchase agreements to reset certain financial covenants that we otherwise would have failed to meet as of December 31, 2007. After giving effect to all such amendments, as of December 31, 2007, with respect to one debt obligation, we failed to meet three financial covenants, one of which related to a sub-limit on borrowings under that facility, and two of which related to our leverage ratio and our tangible net worth. Had we been able to carry our CDO liabilities at their fair value, as we will upon our 2008 adoption of SFAS 159, we would have complied with the leverage ratio and tangible net worth covenants. We obtained a waiver with respect to these financial covenants that were not met. As a result, we were in compliance with or have obtained the necessary waivers with respect to all our financial covenants as of December 31, 2007.

10. COMMITMENTS AND CONTINGENCIES

We invest in real estate construction loans. During the years ended December 31, 2007 and 2006, we made advances totaling \$6,318, including capitalized interest of \$1,105, and \$3,816, respectively, under these commitments. As of December 31, 2007 and 2006, we had outstanding commitments to fund real estate construction loans of \$999 and \$24,050, respectively.

In January 2007, we made a \$28,462 investment in a private equity fund that invests in real estate investments. The fund is managed by an affiliate of our Manager and the investment was approved by the independent members of our board of directors. In connection with that investment, we agreed to a future capital commitment of \$10,392. Certain distributions from the private equity fund may be recalled by the fund's manager for reinvestment purposes. Distributions during the year ended December 31, 2007 totaled \$8,494, which included \$4,776 that was subject to recall by the fund's manager. As of December 31, 2007, the unfunded commitment totaled \$1,535.

11. RISK MANAGEMENT TRANSACTIONS

Our objectives in using derivatives include reducing our exposure to interest expense movements through our use of interest rate swaps, reducing our exposure to foreign currency movements through our use of foreign currency swaps, and generating additional yield for investing through our use of credit default swaps.

Crystal River Capital, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(dollars in thousands, except per share data)

11. RISK MANAGEMENT TRANSACTIONS (Continued)

The fair value of our derivatives at December 31, 2007 and 2006 consisted of the following:

	December 31, 2007	December 31, 2006
Derivative Assets:		
Interest rate swaps	\$ 370	\$ 13,410
Interest rate caps	16	334
Foreign currency swaps		2,744
Credit default swaps		3,305
Interest receivable swaps and caps	174	1,072
	<u>560</u>	<u>20,865</u>
Total derivative assets	\$ 560	\$ 20,865
Derivative Liabilities:		
Interest rate swaps	\$ 24,736	\$ 2,448
Foreign currency swaps		764
Credit default swaps	32,908	
Interest payable swaps and caps	4,085	7,936
	<u>61,729</u>	<u>11,148</u>
Total derivative liabilities	\$ 61,729	\$ 11,148

The notional amount of our interest rate swap open positions and interest rate cap open positions as of December 31, 2007 and 2006 were as follows:

	December 31, 2007	December 31, 2006
Interest rate swaps on reverse repurchase agreements	\$ 479,388	\$ 1,285,433
Interest rate caps on reverse repurchase agreements	200,000	200,000
Interest rate swaps on mortgage-backed notes	109,045	
Interest rate swaps on CDO notes	50,413	52,069
Interest rate swaps on CDO II notes	240,467	240,467
	<u>1,079,313</u>	<u>1,777,969</u>
	\$ 1,079,313	\$ 1,777,969

As of December 31, 2007 and 2006, we had unhedged repurchase agreements totaling \$596,733 and \$1,383,016, respectively.

The change in unrealized gains (loss) on interest rate swaps and caps designated as cash flow hedges is separately disclosed in the statement of changes in stockholders' equity. As of December 31, 2007 and 2006, unrealized gains (losses) aggregating \$(23,100) and \$7,169, respectively, on active cash flow hedges were recorded in accumulated other comprehensive income (loss). The net deferred gains (losses) on settled swaps for the years ended December 31, 2007 and 2006 and for the period March 15, 2005 (commencement of operations) to December 31, 2005 were \$(3,143), \$1,719 and \$1,090, respectively, and are being amortized into earnings through interest expense.

Crystal River Capital, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

December 31, 2007

(dollars in thousands, except per share data)

11. RISK MANAGEMENT TRANSACTIONS (Continued)

For the years ended December 31, 2007 and 2006 and for the period March 15, 2005 (commencement of operations) to December 31, 2005, the amount of net realized gains on settled swaps amortized from accumulated other comprehensive income (loss) into earnings was \$1,457, \$310 and \$17, respectively. In the same periods, an additional \$770, \$415 and \$165, respectively, relating to other comprehensive income on active swaps and the premium on interest rate caps also was amortized into earnings through interest expense.

In August 2007, we sold a commercial real estate loan that was denominated in Canadian dollars and in September 2007, we sold an investment that was denominated in British pounds. In connection with these sales, we terminated two corresponding foreign currency swaps and recorded a total realized and unrealized loss of \$5,149 on the termination of the swaps. As of December 31, 2007, we did not have any foreign currency swaps in place.

The components of realized and unrealized gain (loss) on derivatives are as follows:

	Year Ended December 31, 2007	Year Ended December 31, 2006	March 15, 2005 (commencement of operations) to December 31, 2005
Realized/unrealized gains (losses) on credit default swaps ("CDS")	\$ (76,141)	\$ 6,933	\$ (3,593)
Realized/unrealized gains (losses) on foreign currency swaps ("FCS")	(5,149)	1,439	(308)
Unrealized gains on hedge ineffectiveness	(1,227)	386	382
Unrealized gains (losses) on economic hedges not designated for hedge accounting	(3,105)	450	803
Net realized losses on settlement of interest rate swaps	(1,089)	(698)	(80)
Premium earned on CDS	2,212	1,499	299
Periodic payments received on FCS		338	
Swap transaction expense	(452)		
Net realized and unrealized gains (losses) on derivatives	\$ (84,951)	\$ 10,347	\$ (2,497)

As of December 31, 2007 and 2006, we were required to provide collateral in respect of our interest rate swaps in the amount of \$18,276 and \$17,408, respectively, which is included in restricted cash on the balance sheet.

The maturities of the notional amounts of our interest rate swaps and caps outstanding as of December 31, 2007 are as follows: \$296,000 in 2008, \$200,000 in 2009, \$30,000 in 2011, \$40,000 in 2012, \$50,413 in 2013, \$14,000 in 2015, \$45,000 in 2016, \$13,000 in 2017, \$240,467 in 2018, \$109,045 in 2020 and \$41,388 in 2021.

As of December 31, 2007 and 2006, we held various credit default swaps, as the protection buyer and seller, with notional amounts of \$75,000 and \$110,000, respectively. A credit default swap ("CDS")

Crystal River Capital, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

December 31, 2007

(dollars in thousands, except per share data)

11. RISK MANAGEMENT TRANSACTIONS (Continued)

is a financial instrument used to transfer the credit risk of a reference entity from one party to another for a specified period of time. In a standard CDS contract, one party, referred to as the protection buyer, purchases credit default protection from another party, referred to as the protection seller, for a specific notional amount of obligations of a reference entity. In these transactions, the protection buyer pays a premium to the protection seller. The premium generally is paid monthly in arrears, but may be paid in full up front in the case of a CDS with a short maturity. Generally, if a credit event occurs during the term of the CDS, the protection seller pays the protection buyer the notional amount and takes delivery of the reference entity's obligation. CDS are generally unconditional, irrevocable and non-cancelable. During the year ended December 31, 2007, we closed out four CDS on single names in an aggregate notional amount of \$35,000, with a realized loss of approximately \$7,358, and nine CDS on the CMBX in an aggregate notional amount of \$135,000, with a realized loss of approximately \$32,614. As of December 31, 2007, we had posted cash of \$32,908 as collateral in connection with our single name CDS.

12. STOCKHOLDERS' EQUITY AND LONG-TERM INCENTIVE PLAN

In March 2005, we completed the Private Offering in which we sold 17,400,000 shares of common stock, \$0.001 par value, at an offering price of \$25 per share, including the purchase of 400,000 shares of common stock by the initial purchasers/placement agents pursuant to an over-allotment option. We received proceeds from these transactions in the amount of \$405,613, net of underwriting commissions, placement agent fees and other offering costs totaling \$29,387. In August 2006, we completed the Public Offering in which we sold 7,500,000 shares of common stock at an offering price of \$23 per share. The proceeds received from the Public Offering were \$158,599, which was net of underwriting and other offering costs of \$13,901. Each share of common stock entitles its holder to one vote per share. Officers, directors and entities affiliated with our Manager owned 1,916,473 and 1,981,967 shares of our common stock as of December 31, 2007 and 2006, respectively.

In March 2005, we adopted a Long-Term Incentive Plan (the "Plan") which provides for awards under the Plan in the form of stock options, stock appreciation rights, restricted and unrestricted stock awards, restricted stock units, deferred stock units and other performance awards. Our Manager and our officers, employees, directors, advisors and consultants who provide services to us are eligible to receive awards under the Plan. The Plan has a term of 10 years and, based on awards since adoption, limits awards through December 31, 2007 to a maximum of 2,502,180 shares of common stock. For subsequent periods, the maximum number of shares of common stock that may be subject to awards granted under the Plan can increase by 10% of the difference between the number of shares of common stock outstanding at the end of the current calendar year and the prior calendar year. In no event will the total number of shares that can be issued under the Plan exceed 10,000,000.

In connection with the Plan, a total of 84,000 shares of restricted common stock and 126,000 stock options (exercise price of \$25 per share) were granted to our Manager in March 2005. The Manager subsequently transferred these shares and options to certain of its officers and employees, certain of our directors and other individuals associated with our Manager who provide services to us. The restrictions on the restricted common stock lapse and full rights of ownership vest for one-third of the restricted shares and options on each of the first three anniversary dates of issuance. Vesting is predicated on the continuing involvement of our Manager in providing services to us. In addition, 3,500

Crystal River Capital, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(dollars in thousands, except per share data)

12. STOCKHOLDERS' EQUITY AND LONG-TERM INCENTIVE PLAN (Continued)

shares of unrestricted stock were granted to the independent members of our board of directors in March 2005 in lieu of cash remunerations. The independent members of our board of directors fully vested in the shares on the date of grant.

For the year ended December 31, 2006, we issued a total of 38,000 shares of restricted common stock. Of this amount, 30,000 shares were issued to one of our senior executives. The restrictions on the restricted common stock lapse and full rights of ownership vest for one-third of the restricted shares on each of the first three anniversary dates of issuance. The remaining 8,000 shares of restricted common stock were granted to an independent member of our board of directors and one of our Manager's employees. The director received two separate 2,000 share grants and with respect to one such grant, vested one-third immediately and will vest in the remaining shares ratably on the second and third anniversary dates of issuance, and with respect to the other grant, will vest all such shares on the first anniversary of issuance. In addition, for the year ended December 31, 2006, we issued 14,000 deferred stock units to certain other independent members of our board of directors. Of this amount, 8,000 deferred stock units were issued in lieu of cash remunerations. These independent members of our board of directors fully vested in these units at the date of grant. The remaining 6,000 deferred stock units became one-third vested to the members of our board of directors immediately and will vest in the remaining units ratably on the second and third anniversary dates of issuance. In August 2006, one of our Manager's employees who owned 4,000 shares of restricted common stock resigned prior to the vesting of any of such shares. In accordance with the agreement pursuant to which those shares were issued, upon his resignation, those shares of restricted common stock were forfeited back to us. In March 2006, we granted 4,000 stock options (exercise price of \$25 per share) to one of our directors.

During the year ended December 31, 2007, a former senior executive officer resigned and forfeited 20,000 shares of restricted common stock that were issued during the year ended December 31, 2006 and had not vested as of the date of his resignation.

During the year ended December 31, 2007, we issued 2,000 shares of restricted common stock to an independent member of our board of directors. In addition, during the year ended December 31, 2007, we also issued 20,730 deferred stock units and restricted stock units to certain independent members of our board of directors. Of these amounts, 16,637 deferred stock units and restricted stock units and 2,000 shares of restricted stock were issued in lieu of cash remunerations. These independent members of our board of directors fully vested in the deferred stock units at the date of grant.

The fair value of unvested shares of the restricted stock issued to our Manager, directors and employees of our Manager's affiliates as of December 31, 2007 and 2006 was \$443 and \$2,281, respectively, and the fair value of unvested stock options granted as of December 31, 2007 and 2006 was \$9 (\$0.21 per share) and \$228 (\$2.63 per share), respectively. For the years ended December 31, 2007 and 2006 and for the period March 15, 2005 (commencement of operations) to December 31, 2005, \$643, \$1,066 and \$708, respectively, was expensed relating to the amortization of the restricted stock and the stock options. For the years ended December 31, 2007 and 2006 and for the period March 15, 2005 (commencement of operations) to December 31, 2005, \$497, \$282 and \$0, respectively, was expensed relating to the amortization of deferred stock units. We expect to recognize approximately \$219 in compensation expense based on outstanding unvested grants for the year ended December 31, 2008.

Crystal River Capital, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

December 31, 2007

(dollars in thousands, except per share data)

12. STOCKHOLDERS' EQUITY AND LONG-TERM INCENTIVE PLAN (Continued)

The Binomial option pricing model was used for pricing our stock options with the following assumptions as of December 31, 2007 and December 31, 2006:

	December 31, 2007	December 31, 2006
Strike price	\$ 25.00	\$ 25.00
Dividend yield	19.67%	10.75%
Expected volatility	31.0%	22.0%
Risk free interest rate	5.0%	5.0%
Expected life of options	6 years	6 years

Option valuation models require the input of highly subjective assumptions including the expected stock price volatility. Our stock options have characteristics that are significantly different from those of traded options and changes in the subjective input assumptions could materially affect the fair value estimate.

Restricted stock activity from inception is as follows:

	Number of Shares of Restricted Stock	Weighted Average Fair Value
Non-vested stock awards, March 15, 2005		
Granted	84,000	\$ 25.00
Vested		
Forfeited		
Non-vested stock awards, December 31, 2005	84,000	25.00
Granted	38,000	24.86
Vested	(28,662)	25.00
Forfeited	(4,000)	25.00
Non-vested stock awards, December 31, 2006	89,338	24.94
Granted	2,000	26.85
Vested	(40,667)	24.87
Forfeited	(20,000)	25.00
Non-vested stock awards, December 31, 2007	30,671	25.12
Price range of stock awards outstanding		\$22.31 \$26.85

The following table shows our stock repurchase activity during 2007.

Period	Total Number of Shares Purchased(1)	Average Price Paid Per Share(2)	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs(1)
August 21 31, 2007	55,400	\$ 14.48	55,400	1,944,600
September 1 30, 2007	119,600	15.28	175,000	1,825,000
October 1 31, 2007	59,700	17.24	234,700	1,765,300
November 1 30, 2007	64,600	13.39	299,300	1,700,700
December 1 31, 2007			299,300	1,700,700

(1)

On August 7, 2007, our board of directors authorized and announced the repurchase of 2,000,000 shares of our common stock in open-market or in privately negotiated transactions. The amount and timing of purchases will depend upon a number of factors, including the price and availability of our shares and general market conditions. This program has no expiration date but may be terminated by our board of directors at any time. We purchased an aggregate of 299,300 shares during the periods indicated above under this program. There are 1,700,700 shares remaining for repurchase under this program as of December 31, 2007.

(dollars in thousands, except per share data)

12. STOCKHOLDERS' EQUITY AND LONG-TERM INCENTIVE PLAN (Continued)

- (2) Includes brokerage commissions.

Accumulated other comprehensive income for the years ended December 31, 2007 and 2006 and the period ended December 31, 2005 was comprised of the following:

	Year Ended December 31, 2007	Year Ended December 31, 2006	March 15, 2005 (commencement of operations) to December 31, 2005
Net unrealized gains (losses) on available for sale securities	\$ 9,737	\$ 3,561	\$ (23,447)
Net realized and unrealized gains (losses) on interest rate swap and cap agreements accounted for as cash flow hedges	(25,218)	9,651	11,705
Total other comprehensive income (loss)	\$ (15,481)	\$ 13,212	\$ (11,742)

13. FINANCIAL RISKS

We are subject to various risks, including credit, interest rate and market risk. We are subject to interest rate risk to the extent that our interest-bearing liabilities mature or re-price at different speeds, or different bases, than our interest-earning assets. Credit risk is the risk of default on our investments that results in a counterparty's failure to make payments according to the terms of the contract.

Market risk reflects changes in the value of the securities and real estate loans due to changes in interest rates or other market factors, including the rate of prepayments of principal and the value of the collateral underlying our available for sale securities and real estate loans.

As of December 31, 2007 and 2006, the mortgage loans in the underlying collateral pools for all securities we owned were secured by properties predominantly in California (22% in 2007, 23% in 2006), Florida (10% in 2007, 10% in 2006), Arizona (8% in 2007, 5% in 2006), New York (7% in 2007, 5% in 2006) and Texas (7% in 2007, 2% in 2006). All other states or countries comprise individually less than 5% as of December 31, 2007 and 2006.

14. RELATED PARTY TRANSACTIONS

We have entered into a management agreement, as amended (the "Agreement"), with our Manager. The initial term of the Agreement expires in December 2008. After the initial term, the Agreement will be automatically renewed for a one-year term each anniversary date thereafter unless we or our Manager terminate the Agreement. The Agreement provides that our Manager will provide us with investment management services and certain administrative services and will perform our day-to-day operations. The monthly base management fee for such services is equal to 1.5% of one-twelfth of our equity, as defined in the Agreement, payable in arrears.

Crystal River Capital, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

December 31, 2007

(dollars in thousands, except per share data)

14. RELATED PARTY TRANSACTIONS (Continued)

In addition, under the Agreement, our Manager earns a quarterly incentive fee equal to 25% of the amount by which the quarterly net income per share, as defined in the Agreement (which principally excludes the effect of stock compensation and the unrealized change in derivatives), exceeds an amount equal to the product of the weighted average of the price per share of the common stock we issued in the Private Offering and in the Public Offering and the price per share of common stock in any subsequent offerings by us, multiplied by the higher of (i) 2.4375% or (ii) 25% of the then applicable 10 year Treasury note rate plus 0.50%, multiplied by the then weighted average number of outstanding shares for the quarter. The incentive fee is paid quarterly. The Agreement provides that 10% of the incentive management fee is to be paid in shares of our common stock (providing that such payment does not result in our Manager owning directly or indirectly more than 9.8% of our issued and outstanding common stock) and the balance is to be paid in cash. Our Manager may, at its sole discretion, elect to receive a greater percentage of its incentive management fee in shares of our common stock. The incentive management fees included in our consolidated statements of operations that were incurred during the years ended December 31, 2007 and 2006 and the period March 15, 2005 (commencement of operations) to December 31, 2005 were \$124, \$68 and \$0, respectively. In accordance with the Agreement, we issued to our Manager shares of our common stock in respect of 10% of such incentive management fees, which totaled 445 shares and 300 shares for the years ended December 31, 2007 and 2006, respectively.

The Agreement may be terminated upon the affirmative vote of at least two-thirds of the independent members of our board of directors after the expiration of the initial term and by providing at least 180 days prior notice based upon either: (i) unsatisfactory performance by our Manager that is materially detrimental to us, or (ii) a determination by the independent members of our board of directors that the management fees payable to our Manager are not fair (subject to our Manager's right to prevent a compensation termination by agreeing to a mutually acceptable reduction of the management fees). If we terminate the Agreement, then we must pay our Manager a termination fee equal to twice the sum of the average annual base and incentive fees earned by our Manager during the two twelve-month periods immediately preceding the date of termination, calculated as of the end of the most recently completed fiscal quarter prior to the date of termination.

We issued to our Manager 84,000 shares of our restricted common stock and granted options to purchase 126,000 shares of our common stock for a 10 year period at a price of \$25 per share in March 2005. We issued to one of our executive officers 30,000 shares of restricted common stock in March 2006. 10,000 of such shares vested on March 15, 2007 and the remaining 20,000 shares were forfeited in April 2007 when the executive officer to whom such shares were issued resigned from his position with us. We issued to one of our directors 2,000 shares of restricted stock in November 2006 and 2,000 shares of restricted stock in May 2007, both of which vest on the first anniversary of the date of issuance. For the years ended December 31, 2007 and 2006 and for the period March 15, 2005 (commencement of operations) to December 31, 2005, the base management expense was \$5,823, \$6,830 and \$4,821, respectively. Included in the management fee expense for the years ended December 31, 2007 and 2006 and the period March 15, 2005 (commencement of operations) to December 31, 2005 is \$555, \$1,024 and \$627, respectively, of amortization of stock-based compensation related to restricted stock and options granted.

Crystal River Capital, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

December 31, 2007

(dollars in thousands, except per share data)

14. RELATED PARTY TRANSACTIONS (Continued)

The Agreement provides that we are required to reimburse our Manager for certain expenses incurred by our Manager on our behalf provided that such costs and reimbursements are no greater than that which would be paid to outside professionals or consultants on an arm's length basis. For the years ended December 31, 2007 and 2006 and the period March 15, 2005 (commencement of operations) to December 31, 2005, we were not charged any reimbursable costs by our Manager.

In January 2007, we purchased a \$28,462 investment in BREF One, LLC (the "Fund"), a real estate finance fund sponsored by Brookfield Asset Management Inc. ("Brookfield"), the indirect parent of our Manager, and managed by a Brookfield subsidiary, and incurred a \$10,392 unfunded capital commitment to the Fund. The acquisition was made from two subsidiaries of Brookfield. As of December 31, 2007, the unfunded commitment totaled \$1,535. In addition, income from the equity investment in the Fund for the year ended December 31, 2007 was \$2,610.

In February 2007, we entered into a sale and purchase agreement with BREF OF BNK Fannin LP and BREF OF BNK Phoenix LLC, two subsidiaries of a real estate opportunity fund sponsored by Brookfield and managed by a Brookfield subsidiary, to acquire two commercial properties as described in Note 5 to these financial statements for a total purchase price of \$234,710. We paid the purchase price for the properties with the proceeds from a \$198,500 mortgage loan from an external lender that bears interest at an annual rate of 5.509% and matures on April 1, 2017 and with available cash. In addition to the sale and purchase agreement, we entered into rent enhancement agreements with BREF OF BNK Fannin LP and BREF OF BNK Phoenix LLC under which we will receive monthly rent enhancement payments through 2015 totaling \$15,905.

In April 2007, we issued \$115,000 of senior mortgage-backed notes through a newly-formed subsidiary, CRZ ABCP Financing LLC. We retained \$9,250 of senior subordinated mortgage-backed notes and \$4,250 of subordinated mortgage-backed notes. CRZ ABCP Financing LLC holds assets, consisting of commercial whole mortgage loans, which serve as collateral for the mortgage-backed notes. Senior mortgage-backed notes in the aggregate principal amount of \$101,500 were issued to an affiliate of our Manager with floating coupons with an interest rate of three-month LIBOR plus 0.35%. Interest on the senior mortgage-backed notes is payable monthly. The senior mortgage-backed notes mature in April 2017 and the outstanding principal is due at maturity. Early repayments of the underlying mortgage loans require repayment of a portion of the senior mortgage-backed notes. The senior mortgage-backed notes are treated as a secured financing, and are non recourse to us. Proceeds from the sale of the senior mortgage-backed notes issued were used to repay outstanding debt under our repurchase agreements. As of December 31, 2007, the mortgage-backed notes were collateralized by real estate loans with a carrying value of \$114,637.

In August 2007, we entered into a \$100,000 unsecured 364-day credit facility with Brookfield US Corporation (f/k/a Brascan (U.S.) Corp.), an affiliate of our Manager. Indebtedness outstanding under the unsecured credit facility bore interest at LIBOR + 4.00%. In November 2007, we and Brookfield US Corporation amended the terms of the facility, effective as of September 30, 2007, to convert the facility to a secured revolving credit facility that provides for borrowings of up to \$100,000 in the aggregate and expires in May 2009. On March 7, 2008, we and Brookfield US Corporation amended the terms of the facility, effective as of December 31, 2007, to extend the term of the facility from November 2008 to May 2009, to revise the financial covenant relating to minimum net worth and to

Crystal River Capital, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

December 31, 2007

(dollars in thousands, except per share data)

14. RELATED PARTY TRANSACTIONS (Continued)

eliminate the financial covenants relating to minimum net income (as defined in the facility), a maximum leverage ratio and interest rate sensitivity. The secured facility bears interest at LIBOR + 2.50%. The credit facility and the amendments were approved by the independent members of our board of directors. The credit agreement contains customary representations, warranties and covenants, including covenants limiting dividends, liens, mergers, asset sales and other fundamental changes. In addition, the credit agreement contains additional covenants, which include maintaining a certain minimum net worth. As of December 31, 2007, we owed \$67,319 under this credit facility.

In August 2007, we sold one whole loan to an affiliate of our Manager at its carrying value plus accrued interest receivable, for total proceeds of \$45,369.

In September 2007, we entered into a sale and purchase agreement with BREOF BNK2 Arlington LP, a subsidiary of a real estate opportunity fund sponsored by Brookfield and managed by a Brookfield subsidiary, to acquire one commercial property as described in Note 5 to these financial statements for a total purchase price of \$26,494. We paid the purchase price for the property with the proceeds from a \$20,880 mortgage loan from an external lender that bears interest at an annual rate of 6.29% and matures on October 1, 2017 and with available cash. In addition to the sale and purchase agreement, we entered into rent enhancement agreements with BREOF BNK2 Arlington LP under which we will receive monthly rent enhancement payments through 2019 totaling \$6,902.

The following amounts from related party transactions are included in our statement of operations for the years ended December 31, 2007 and 2006 and the period March 31, 2005 (commencement of operations) to December 31, 2005:

	Year Ended December 31, 2007	Year Ended December 31, 2006	March 15, 2005 (commencement of operations) to December 31, 2005
Interest income from real estate loans to related parties	\$ 1,517	\$ 2,395	\$
Interest expense on indebtedness to related parties	8,891	3,115	453
Interest income from rent enhancement receivables from related parties	606		
Income from equity investment in private investment fund managed by related party	2,610

(dollars in thousands, except per share data)

14. RELATED PARTY TRANSACTIONS (Continued)

The following amounts from related party transactions are included in our balance sheets as of December 31, 2007 and 2006:

	December 31, 2007	December 31, 2006
Real estate loans to related parties	\$	\$ 42,885
Interest receivable from real estate loans to related parties		1,134
Interest payable on indebtedness to related parties	483	117
Rent enhancement receivable from related parties	16,311	
Investment in private investment fund managed by related party	36,211	
Senior mortgage-backed notes, related party	99,815	
Repurchase agreements, related party		144,806
Secured revolving credit facility, related party	67,319	

We and our Manager have entered into sub-advisory agreements with other affiliated entities and the fees payable under such agreements will be paid from any management fees earned by our Manager. In addition, certain of these affiliated sub-advisory entities introduced investments to us for purchase that we acquired for a total of \$289,009 and \$21,986 during the years ended December 31, 2007 and 2006, respectively. The purchase price of three commercial real estate properties that we purchased from an affiliate of our Manager, at a total cost of \$260,543, were determined as part of a competitive bid process, and the purchase price of our investment in a private equity fund managed by an affiliate of our Manager, at a total initial cost of \$28,462, was acquired at its book value assuming hypothetical liquidation. All such acquisitions were approved in advance by the independent members of our board of directors.

15. EARNINGS PER SHARE

The following table sets forth the calculation of basic and diluted EPS for the years ended December 31, 2007 and 2006 and the period ended December 31, 2005 (in thousands, except share and per share amounts):

	Year Ended December 31, 2007			Year Ended December 31, 2006			Period Ended December 31, 2005		
	Net Loss	Weighted Average Number of Shares Outstanding	Per Share Amount	Net Income	Weighted Average Number of Shares Outstanding	Per Share Amount	Net Income	Weighted Average Number of Shares Outstanding	Per Share Amount
Basic EPS:									
Net earnings (loss) per share of common stock	\$ (345,878)	24,962,708	\$ (13.86)	\$ 46,917	20,646,637	\$ 2.27	\$ 13,948	17,487,500	\$ 0.80
Effect of Dilutive Securities:									
Options outstanding for the purchase of common stock									
Diluted EPS:									
Net earnings (loss) per share of common stock and assumed conversions	\$ (345,878)	24,962,708	\$ (13.86)	\$ 46,917	20,646,637	\$ 2.27	\$ 13,948	17,487,500	\$ 0.80

At December 31, 2007, 2006 and 2005, options to purchase a total of 130,000 shares of common stock, 130,000 shares of common stock and 126,000 shares of common stock, respectively, have been excluded from the computation of diluted EPS as they were determined to be antidilutive.

16. INITIAL PUBLIC OFFERING

In August 2006, we completed the Public Offering, in which we sold 7,500,000 shares of common stock, \$0.001 par value, at an offering price of \$23 per share. We received proceeds from this transaction in the amount of \$162,409, net of underwriting commissions and discounts but before other offering costs in the amount of \$3,810. Each share of common stock entitles its holder to one vote per share. An affiliate of the parent of our Manager purchased 1,000,000 shares of our common stock in the Public Offering. Our outstanding shares totaled 25,019,500 after the closing of the Public Offering.

17. FAIR VALUE OF FINANCIAL INSTRUMENTS

We are required to disclose the fair value of our financial instruments for which it is practical to estimate that value under SFAS No. 107, *Disclosure about Fair Value of Financial Instruments* ("SFAS 107"). SFAS 107 defines the fair value of a financial instrument as the amount at which such financial instrument could be exchanged in a current transaction between willing parties, in other than a forced sale or liquidation. For certain of our financial instruments, fair values are not readily available since there are no active trading markets as characterized by current exchanges between willing parties. Accordingly, we derive or estimate fair value using various valuation techniques, such as computing the present value of estimated future cash flows using discount rates commensurate with the risks involved. However, the determination of estimated cash flows may be subjective and imprecise. Changes in assumptions or estimation methodologies can have a material effect on these estimated fair

Crystal River Capital, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

December 31, 2007

(dollars in thousands, except per share data)

17. FAIR VALUE OF FINANCIAL INSTRUMENTS (Continued)

values. In that regard, the derived fair value estimates may not be substantiated by comparison to independent markets, and in many cases, may not be realized in immediate settlement of the instrument. The fair values indicated below are indicative of the interest rate, prepayment and loss assumptions as of December 31, 2007 and 2006, and may not take into consideration the effects of subsequent interest rate, prepayment or loss assumption fluctuations, or changes in the values of underlying collateral. The fair value of cash and cash equivalents, restricted cash, receivables, prepaid expenses and other assets, accounts payable, accrued expenses and cash collateral payable, due to Manager, due to broker, dividends payable and interest payable approximate their carrying values due to the short maturities of these items.

The carrying amounts and estimated fair values of our other financial instruments as of December 31, 2007 and 2006 were as follows:

	December 31, 2007		December 31, 2006	
	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
Assets:				
Available for sale securities	\$ 1,815,246	\$ 1,815,246	\$ 3,342,608	\$ 3,342,608
Real estate loans	170,780	170,402	237,670	235,900
Other investments	37,761	37,175	20,133	20,133
Derivative assets	560	560	20,865	20,865
Liabilities:				
Repurchase agreements	1,276,121	1,276,121	2,723,643	2,723,643
Repurchase agreements, related party			144,806	144,806
Collateralized debt obligations	486,608	299,034	194,396	194,396
Junior subordinated notes	51,550	32,068		
Mortgages payable	219,380	217,660		
Senior mortgage-backed notes, related party	99,815	92,271		
Secured revolving credit facility, related party	67,319	67,319		
Derivative liabilities	61,729	61,729	11,148	11,148

The methodologies used and key assumptions made to estimate fair values are as follows:

Available for sale securities The fair value of securities available for sale is estimated by obtaining broker quotations, where available, based upon reasonable market order indications or a good faith estimate thereof. For securities where market quotes are not readily obtainable, management may also estimate values, and considers factors including the credit characteristics and term of the underlying security, market yields on securities with similar credit ratings, and sales of similar securities, where available.

Real estate loans The fair value of our loan portfolio is estimated by using a discounted cash flow analysis, utilizing scheduled cash flows and discount rates estimated by management to approximate those that a willing buyer and seller might use.

Crystal River Capital, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

December 31, 2007

(dollars in thousands, except per share data)

17. FAIR VALUE OF FINANCIAL INSTRUMENTS (Continued)

Other investments The fair value of our interest in equity investments is estimated by using the book value assuming hypothetical liquidation. The fair value of our interest in trust preferred securities is estimated using a discounted cash flow analysis, based on management's estimates of market interest rates.

Derivative assets and liabilities The fair value of our derivative assets and liabilities is estimated using current market quotes and third-party quotations, where available.

Repurchase agreements Management believes that the stated interest rates approximate market rates (when compared to similar credit facilities with similar credit risk). Accordingly, the fair value of the repurchase agreement is estimated to be equal to the outstanding principal amount.

Collateralized debt obligations The fair value of collateralized debt obligations is estimated using a discounted cash flow analysis, based on management's estimates of market interest rates. For mortgages where we have an early prepayment right, management also considers the prepayment amount in evaluating the fair value.

Junior subordinated notes The fair value of our junior subordinated notes is estimated using a discounted cash flow analysis, based on management's estimates of market interest rates.

Senior mortgage-backed notes, related party The fair value of our senior mortgage-backed notes are estimated using a discounted cash flow analysis, based on management's estimates of market interest rates.

Secured revolving credit facility, related party Management believes that the stated interest rates approximate market rates (when compared to similar credit facilities with similar credit risk). Accordingly, the fair value of the secured revolving credit facility, related party, is estimated to be equal to the outstanding principal amount.

Mortgages payable The fair value of our mortgage notes is estimated using a discounted cash flow analysis, based on management's estimates of market interest rates.

18. SEGMENT REPORTING

We determined that we operate in two reportable segments: a Securities, Loans and Other segment and a Commercial Real Estate segment. The accounting policies of the segments are the same as those described in the summary of significant accounting policies as discussed in Note 2. The reportable segments were determined based on the allocation of our investment portfolio between investment activity and commercial real estate operations in which separate performance data is produced and analyzed by management and our chief operating decision-maker.

Our Securities, Loans and Other segment includes all of our investment activities related to securities, real estate loans and equity investments. Our Commercial Real Estate segment includes all of our activities related to the ownership and leasing of the three properties that we acquired in 2007 as described in Note 5.

Crystal River Capital, Inc. and Subsidiaries

Notes to Consolidated Financial Statements

(1)

In our Form 10-Q filings for the quarters ended September 30, 2007, June 30, 2007 and March 31, 2007, we included certain realized and unrealized gains (losses) on interest rate derivative instruments as an element of interest income (expense). In this Form 10-K, those amounts, totaling \$80 for the quarter ended September 30, 2007, \$1,186 for the quarter ended June 30, 2007 and \$(16) for the quarter ended March 31, 2007, respectively, have been reclassified from interest income (expense) to an element of other revenues (expenses).

Basic and diluted earnings per share are computed independently for each of the periods. Accordingly, the sum of the quarterly earnings per share amounts may not agree to the total for the year.

20. SUBSEQUENT EVENTS

In March 2008, we declared a quarterly dividend of \$0.68 per share, which will be paid on April 29, 2008 to our stockholders of record as of March 31, 2008.

During the period January 1, 2008 to March 12, 2008, we closed out six CDS on single names in an aggregate notional amount of \$55,000. In the first quarter of 2008, we estimate that we will recognize losses of approximately \$30,258 on these CDS related to our closing out these six CDS, of which \$19,780 was accrued in 2007 as an unrealized loss. Following these transactions, the Company has a total of \$20,000 of single name CDS exposure remaining.

During the period March 7, 2008 to March 12, 2008, we sold approximately \$688,400 of Agency MBS securities for cash proceeds totaling approximately \$673,600, which after repayment of debt and return of margin cash provided net cash of approximately \$17,000, and incurred a realized loss of approximately \$14,800.

On March 12, 2008, we sold our interest in BREF One, LLC to an affiliate of our Manager at its book value, assuming hypothetical liquidation, and incurred no gain or loss. We were released from our future funding commitment with respect to that investment in connection with the sale, which was approved by the independent members of our board of directors.
