Forward Looking Statements

References in this report to the Company, we, us, or our are intended to refer to Australian Oil & Gas Corporation. This annual report contains certain statements that may be deemed forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (Securities Act), and Section 21E of the U.S. Securities Exchange Act of 1934, as amended (Exchange Act). Readers of this annual report are cautioned that such forward-looking statements are not guarantees of future performance and that actual results, developments and business decisions may differ from those envisaged by such forward-looking statements.

All statements, other than statements of historical facts, so included in this annual report that address activities, events or developments that the Company intends, expects, projects, believes or anticipates will or may occur in the future, including, without limitation: statements regarding the Company's business strategy, plans and objectives and statements expressing beliefs and expectations regarding the ability of the Company to successfully raise the additional capital necessary to meet its obligations, the ability of the Company to secure the permits, licences and leases necessary to facilitate anticipated drilling activities and the ability of the Company to attract additional working interest owners to participate in the exploration and development of oil and gas reserves, are forward-looking statements within the meaning of the Securities Act and the Exchange Act. These forward-looking statements are and will be based on management's then-current views and assumptions regarding future events.

PART I

ITEM 1. DESCRIPTION OF BUSINESS

General

Since August 2003, Australian Oil & Gas Corporation has been seeking to develop oil and gas exploration opportunities in the offshore waters within the jurisdiction of Australia.

We are the successor in bankruptcy to Synergy Technologies Corporation (Synergy) which filed a petition for relief under Chapter 11 (Chapter 11 Filing) of the U.S. Bankruptcy Code in the U.S. Bankruptcy Court for the Southern District of New York (the Bankruptcy Court) on November 13, 2002. During March 2003, Synergy sold substantially all of its assets to World Energy Systems Corporation. On July 30, 2003, the Bankruptcy Court confirmed Synergy's Plan of Reorganization, as accepted by the corporation's creditors and equity interest holders in accordance with the provisions of the Bankruptcy Code. The Company incorporated in Delaware on August 6th, 2003. The Plan became effective on August 11, 2003 (the Effective Date).

Upon the confirmation of the Plan, we adopted a Fresh Start Accounting method.

A complete description of the Plan is set forth in our quarterly report on Form 10-QSB for the period ended September 30, 2003.

We commenced business operations as a developer of oil and gas opportunities on August 11, 2003. Since that date we have been engaged primarily in the assessment and investigation of petroleum natural resource properties. The Company has no proven petroleum reserves and has had no revenues since its inception.

Description of Business

The Company seeks oil and gas exploration opportunities in offshore waters within the territorial boundaries of Australia.

To gain control of offshore exploration areas in Australia, a Petroleum Exploration Permit (Permit) must be granted by the Designated Authority, acting pursuant to the Petroleum (Submerged Lands) Act of the Commonwealth of Australia (the Act). A Permit provides rights to the holder to undertake exploration, including seismic surveys and drilling, in the defined area of a Permit. A Permit is granted for an initial six year period. Under the terms of a Permit, the exploration work program nominated for the first three years must be met. The Permit holder may withdraw from the Permit after the third permit year, or at the end of any subsequent Permit years, provided that all the exploration work obligations up to the date of withdrawal have been met.

It should be noted that, provided all work commitments are carried out, Australian petroleum exploration permits may be renewed for two further 5-year terms, upon relinquishment of 50% of the area of a permit at the end of the first 6-year term, and again at the end of the second 5-year permit term. Any Retention Lease or Production License is excluded from the calculation of the area to be relinquished. Permits therefore, have a potential 16-year life, subject to these requirements.

The holder of a Permit may not construct any installation in the Permit or abandon, suspend or complete any well without the written approval of the Designated Authority. A Permit requires the holder to comply with the Act, the regulations and all directions made there under and to carry out operations with adequate measures for the protection of the environment and to carry insurance as directed by the Designated Authority. A Permit incurs a modest yearly rental figure. The figure is calculated by multiplying the number of graticular blocks contained within a Permit by the figure deemed by the Designated Authority, currently approximately Australian \$50 \$70 dollars.

A Permit is granted by the Designated Authority following a competitive tender program, based on the best work program offered. The experience of the directors and the technical and financial resources of the applicant is taken into consideration before a decision is made. The Company considers that it satisfies the Designated Authority s requirements and believes that it will be able to secure large tracts of acreage. Our President, Mr.E.G.Albers, has a track record in successfully bidding for exploration permits, and on subsequently progressing exploration and developments with major international companies.

For the most part, major companies have dominated the offshore exploration industry in Australia. More recently, new and independent operators have become increasingly active. We are encouraged by this increased activity and by the diversity of geological concepts being developed.

Increasing availability of sophisticated off-the-shelf technologies from service companies and of expert technical advice from consultants, all aided by the latest computing power, allow companies such as ours to make a fully-fledged entry into this environment. There is a worldwide pool of rig operators, seismic service companies and technical consultants upon which we can draw for products and specialist expertise, allowing us to participate and meet our goals.

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

Our strategy is to acquire and control strategic areas which have potential to be farmed-out/or developed in conjunction with major industry players: it being recognised that the Company lacks the resources to fully explore and develop areas on its own behalf.

As a development stage enterprise, the Company relies on infusions of cash through the advances of Great Missenden Holdings Pty Ltd, a family company associated with our President, Mr.E.G.Albers. When we require further funds for our programs, it is our intention that the additional funds would be raised in a manner deemed most expedient by the Board of Directors at the time, taking into account budgets, share market conditions and the interest of industry in co-participation in our programs. When additional funds for exploration are required, it is our plan that they could be raised by any one or a combination of the following manners: stock placements, pro-rata issue to stockholders, and/or a further issue of stock to the public. Should these methods not be considered to be viable, or in the best interests of stockholders, then it would be our intention to meet our obligations by either partial sale of our interests or farm out, the latter courses of action being part of managements overall strategy. Should funds be required for appraisal or development purposes we would, in addition, look to project loan finance.

Oil and Gas Acreage

On July 6, 2004, our wholly owned subsidiary, Gascorp, Inc (Gascorp), with other affiliated joint venturers, was granted by the Australian Government, a petroleum exploration permit, AC/P33, for an initial 6-year term, effective from June 25, 2004. Gascorp holds a 20% interest in the permit, in joint venture with its affiliates; Natural Gas Corporation Pty Ltd (40%) and Auralandia N.L. (40%), the designated Operator.

In June 2004, we entered into a preliminary, non binding share purchase agreement to acquire 100% of the outstanding shares of Alpha Oil & Natural Gas Pty Ltd (Alpha), a company incorporated in Australia. The acquisition of Alpha is being made to cost-effectively acquire a 20% interest in the permits of the Browse Joint Venture, being permits WA-332-P, WA-333-P, WA-341-P and WA-342-P. It is anticipated that the acquisitions of Alpha will be completed during the second quarter of 2006.

In September 2004, we entered into a preliminary, non binding share purchase agreement to acquire all of the outstanding shares of Nations Natural Gas Pty Ltd (Nations), with the exception of 100,000 shares held by Alpha Oil & Gas Pty Ltd (Alpha). The acquisition of Nations is being made to cost-effectively acquire a 30% interest in the permits of the National Gas Consortium, being permits NT/P62, NT/P63, NT/P64, and NT/P65. It is anticipated that the acquisitions of Nations will be completed during the second quarter of 2006.

On October 13, 2005, we were granted by the Designated Authority in relation to the offshore area adjacent to the Northern Territory of Australia, a petroleum exploration permit, NT/P70, for an initial 6-year term, effective from October 10, 2005. The Company holds a 100% interest in the permit.

On October 18, 2005, the Designated Authority in relation to the offshore area adjacent to the Territory of Ashmore and Cartier Islands (an Australian Territory), granted our wholly owned subsidiary, Gascorp Inc., together with its affiliated joint venturers, NGC and Auralandia, petroleum exploration permit AC/P35. Gascorp holds a 20% interest in the permit, in joint venture with its affiliates; Natural Gas Corporation Pty Ltd (40%) and Auralandia N.L. (40%), the designated Operator.

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

See Item 2 Description of Properties of this report for more information concerning our intentions with respect to oil and gas properties.

Reserve Estimates

The Company has no oil and gas reserves at the present time.

Production

The Company has had no oil and gas production to date.

Productive Wells and Acreage

The Company has no productive wells or productive acreage at the present time.

Underdeveloped Acreage

See Item 2 "Description of Properties".

Drilling Activity

We have no immediate plans to engage in any exploratory oil or gas drilling on acreage for our own account. However, if additional financing can be obtained, we may engage in well drilling, depending upon the cost of the well drilling, the terms of any participation, future farm-out, joint venture or similar arrangements, which may be entered into.

Current Activities and Plans

Our current activities relate solely to our intention to become an active participant in oil and gas exploration in the offshore areas of Australia, as described above. (See also Item 2 Description of Properties).

Competitive Factors

The acquisition of oil and gas interests is competitive. We anticipate that we will continue to encounter strong competition from many established companies with greater financial, personnel and informational resources. Competition from such companies, together with rising prices of oil and gas, may escalate the cost of acquiring properties from others beyond the range of prices we can afford. If valuable oil and gas deposits are discovered on our properties, their marketability will depend on numerous factors, including available equipment for which there is strong demand and other supplies of oil and gas.

Environmental Compliance and Risk

Since the Company is engaged in the natural resources industry, environmental regulation may have a significant impact upon our operations and may necessitate significant capital outlays, which, in turn, may materially affect the earning power of the Company. Certain operations in the exploratory and production phase of oil and gas exploration are potentially hazardous to the environment. Exploratory drilling in natural areas are sources of environmental regulation; and reclamation requirements, must be satisfied. Further, if recovery methods are utilized which involve the construction of a plant or similar hardware to implement the recovery system, the environmental impact of such a system must be disclosed in an Environmental Impact Statement; and compliance could adversely affect future operations and revenues. Although we do not anticipate that we will be the operator on any oil and gas properties, others who may drill and operate such properties will face possible environmental regulations, which could affect our liabilities.

Employees

As of December 31, 2005, we employed four persons, namely the three directors, and one other person, each on a part time basis. Additionally, we retain geologists and consultants on a contract or fee basis, as and when their services are required.

ITEM 2. DESCRIPTION OF PROPERTY

Our office, located at 2480 North Tolemac Way, Prescott, Arizona, has nominal square footage and, as yet, the rent for the office space has not been determined, but will not be more than a nominal amount per month. We also have the use of premises in Australia at Level 25, 500 Collins Street, Melbourne, Victoria. The office space is taken on a non-exclusive basis, with no rent payable, but the usage of the premises is included in the charges Setright Oil & Gas Pty Ltd., an affiliate of the Company by virtue of common management, makes in respect to the administration of the Company.

Vulcan Joint Venture

Our wholly owned subsidiary, Gascorp, Inc (Gascorp), with other affiliated joint venturers, was granted by the Australian Government a petroleum exploration permit, AC/P33, for an initial 6-year term from June 25, 2004. Gascorp holds a 20% interest in the permit, in joint venture with its affiliates; Natural Gas Corporation Pty Ltd (NGC) (40%) and Auralandia N.L. (Auralandia) (40%), the designated Operator. AC/P33 is within the territory of Ashmore and Cartier Islands, an Australian offshore territory. On October 18, 2005, the Designated Authority in relation to the offshore area adjacent to the Territory of Ashmore and Cartier Islands granted Gascorp together with its affiliated joint venturers, NGC and Auralandia, petroleum exploration permit AC/P35 which is located adjacent to AC/P33. We hold a 20% interest in the permit, subject to the same joint venture arrangements.

AC/P33 and AC/P35 are located on the eastern margin of the Vulcan Sub-basin; one of a number of proven petroliferous sub-basins which together comprise the North West Shelf hydrocarbon province of Australia. AC/P33 includes the undeveloped Oliver oil and gas accumulation, drilled by the now plugged and suspended Oliver-1 well. AC/P33 comprises five graticular blocks, totaling approximately 400 km² (98,800 acres). In the first three years of the initial 6-year term of permit AC/P33, the joint venture participants plan to obtain a range of pertinent existing reports and open file seismic data, and with this data, to map, interpret and revise analyses and concepts which presently exist for the area. The joint venture has committed to the enhancement of existing seismic data around the Oliver and the Oliver NE feature, and will examine various techniques for their potential use as direct hydrocarbon indicators. The joint venture plans to acquire 80 km² (19,760 acres) of new enhanced parameter 3D seismic survey. It is intended that the survey will be conducted over the Oliver and Oliver NE features. Should the joint venture so decide, it can elect to enter the second three years of the initial permit and drill one exploration well and perform further interpretational work. Geological and geophysical evaluation of the permit continues.

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

AC/P35 is located immediately to the north of AC/P33. It comprises 46 graticular blocks, totaling approximately 3410 km² (842,645 acres). There have been five wells drilled in the area, with two having oil and gas indications, all of which were plugged and abandoned. In the first three years of the initial 6-year term of the AC/P35 permit, we plan to obtain a range of pertinent existing reports and open file seismic data. In the third year, we presently plan to shoot 250 km² of 3D seismic survey. Should we so decide, we can elect to enter the second three years of the initial permit term and drill one exploration well and perform further interpretational work. Geological and geophysical evaluation of the permit has commenced.

Browse Joint Venture

In June 2004, we entered into a preliminary, non binding share purchase agreement to acquire 100% of the outstanding shares of Alpha Oil & Natural Gas Pty Ltd (Alpha), a company incorporated in Australia. The acquisition of Alpha is being made to cost-effectively acquire a 20% interest in the permits of the Browse Joint Venture, being permits WA-332-P, WA-333-P, WA-341-P and WA-342-P (Permits). The foreign shareholders of Alpha shall, upon conclusion of formal documentation and satisfaction of all conditions, be entitled to receive 2,000,002 shares of common stock of AOGC as consideration for Alpha.

The Permits of the Browse Joint Venture are contiguous and are located in the offshore Browse Basin, a part of the North West Shelf of Australia. They cover a total area of 11,080 km² (2,726,760 acres).

The Browse Basin region, off the coast of Western Australia, has a 40-year history of exploration. It is an established petroleum sub-province and it forms a part of the extensive series of continental margin sedimentary basins that, together, comprise the North West Shelf hydrocarbon province of Australia. The Browse Basin has been host to a series of major gas, gas condensate and oil discoveries which began with the 1971 discovery at Scott Reef-1. The first discovery at Scott Reef-1 was followed, over the years, by major discoveries at Brewster, Brecknock, and Brecknock South. In a later phase of exploration, oil discoveries were made at Gwydion and Cornea. The latest major discoveries in the Browse Basin have been made at Dinichthys, Titanichthys and Gorganichthys (the Ichthys Gas/Condensate Fields). The latter, a giant 556.02 MMBL condensate and 10.7 TCF gas field is approximately 50 kilometers to the west of the Permits. The Permits lie up-dip of these major central Browse Basin gas, and gas/condensate discoveries. For the most part they lie on trend with the Crux Field and with basin margin oil and gas accumulations at Gwydion and the Cornea. The permits are presently lightly explored. There is one well on the boundary of WA-332-P (Prudhoe-1), one well in WA-333-P (Rob Roy-1), two wells-Heywood-1 and Buccaneer-1 in WA-341-P, and a total of fourteen wells in WA-342-P, mostly associated with the undeveloped Cornea oil and gas accumulation.

In the first three year term of the Permits, the Browse Joint Venture has committed to obtain available open file reports and basic 2D and 3D seismic data acquired by earlier efforts of previous explorers. This includes approximately 1,100 km² of high quality 3D seismic known as the Cornea 3D survey which is held by the Browse Joint Venture. The data sets will be integrated with the acquisition and processing of the recent 1400 km² Braveheart 2D seismic survey to infill the existing grid of data, with lead specific coverage. Should the Browse Joint Venture so decide, it can elect to enter a second three year permit term and in which it has indicated it will drill one well in each permit. Geological and geophysical evaluation of the Permits is continuing.

National Gas Consortium

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

In September 2004, we entered into a preliminary, non binding share purchase agreement to acquire all of the outstanding shares of Nations Natural Gas Pty Ltd (Nations), with the exception of 100,000 shares held by Alpha Oil & Gas Pty Ltd (Alpha). The acquisition of Nations is being made to cost-effectively acquire a 30% interest in the permits of the National Gas Consortium, being permits NT/P62, NT/P63, NT/P64, and NT/P65 (Permits). The foreign shareholders of Nations shall, upon conclusion of formal documentation and satisfaction of all conditions, be entitled to receive 2,100,001 shares of common stock of AOGC as consideration for Nations.

The Permits of the National Gas Consortium are located in the Australian eastern Timor Sea region of the Bonaparte Basin, offshore Northern Territory, and cover a total area of approximately 14,875 km². The Timor Sea covers a huge area, over a million square kilometers, underlain by sedimentary basins with potential for new hydrocarbon discoveries. The region has a long history of oil discovery dating back to the Jabiru-1 discovery in 1983, which alerted the (Australian) domestic and international petroleum industries to the significant oil potential of the region. Since that time there have been numerous oil and wet gas discoveries in the northern Bonaparte Basin, including the Laminaria, Corallina and Bayu-Undan fields, and the giant gas fields of Greater Sunrise and Evans Shoal.

The Bonaparte Gulf is a major emerging oil and gas province, with a developing emphasis in gas processing for the export market. Discoveries made over the past few years are expected to lead to the area providing substantial gas production and revenue, through value-added gas projects covering a wide spectrum of gas to liquids processes and technologies.

In the first three year term of the Permits, the National Gas Consortium has committed to reprocess 750 km of 2D seismic data and shoot 500 km of new 2D seismic survey within each permit. Geological and geophysical evaluation of the Permits is continuing.

It is anticipated that the acquisitions of Alpha and Nations will be completed during the second quarter of 2006.

NT/P70 Bonaparte Gulf

On October 13, 2005, we were informed by the Designated Authority in relation to the offshore area adjacent to the Northern Territory of Australia of the grant of petroleum exploration permit NT/P70 (formerly known as release area NT04-3) for an initial 6-year term, effective from October 10, 2005. The Company holds a 100% interest in the permit.

NT/P70 covers an area of 7370 km² (1,821,200 acres) and is located in the eastern Timor Sea, about 300 km north of Darwin, and 250 km northeast of the proposed Darwin to Bayu-Undan gas pipeline. The Greater Sunrise, Lynedoch and Evans Shoal gas accumulations are located to the west of the permit area.

The permit has been designated as a frontier area by the Australian Government attracting an exploration incentive which allows immediate uplift to 150% tax deductibility on Australian Petroleum Resource Rent Tax (PRRT).

In the first three years of the initial 6-year term of the NT/P70 permit, we plan to obtain a range of pertinent existing reports and open file seismic data and, with this data, to map, interpret and revise analyses and concepts which presently exist for the area. In the third year, we presently plan to shoot 300 km² of 3D seismic survey, and a 700 line km 2D seismic survey. Should we so decide, we can elect to enter the second three years of the initial permit term and drill one exploration well and perform further interpretational work.

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

The geological concept for a significant oil and gas play within NT/P70 was brought to the Company on a confidential basis by independent consultants. The Company has agreed to grant an overriding royalty in respect of any hydrocarbons that might ultimately be produced from NT/P70. There have been no wells drilled in the permit, but a course grid of 2D seismic is available.

ITEM 3. LEGAL PROCEEDINGS

None

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

No matter was submitted to a vote of security holders during the period covered by this report.

PART II

ITEM 5. MARKET FOR COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND SMALL BUSINESS ISSUER PURCHASERS OF EQUITY SECURITIES

Market Information

Our common stock trades on the OTC Bulletin Board under the trading symbol AOGC. The prices set forth below reflect the quarterly high and low bid prices for shares of common stock since the Company's stock commenced trading. These quotations reflect inter-dealer prices, without retail markup, markdown or commission, and may not represent actual transactions.

Period	High Sale or Bid	Low Sale or Bid
4th Quarter 2003	\$0.25	\$0.01
1st Quarter 2004	\$0.17	\$0.09
2nd Quarter 2004	\$0.10	\$0.05
3rd Quarter 2004	\$0.08	\$0.04
4th Quarter 2004	\$0.06	\$0.05
1st Quarter 2005	\$0.20	\$0.05
2nd Quarter 2005	\$0.11	\$0.07
3rd Quarter 2005	\$0.18	\$0.09
4th Quarter 2005	\$0.20	\$0.08

As at December 31, 2005, there were 4 market makers in our common stock.

As at December 31, 2005, there were approximately 212 holders of record of our common stock.

The Company has not paid any cash dividends on its common stock and does not anticipate paying cash dividends in the foreseeable future. We intend to retain any earnings to finance the growth of the business. There can be no assurance that we will ever pay cash dividends.

Recent Sales of Unregistered Securities

On the 22nd of December, 2005, the Company issued 2,500,000 shares of common stock. The shares were issued to Mr.E.G.Albers as compensation for his services during the year, and were issued pursuant to a private placement in reliance on Section 4(2) of the Securities Act of 1933.

Share Repurchase Program

The Company does not maintain any stock repurchase program involving purchases of the Company's common stock by or on behalf of the Company that would require disclosure under Item 703 of the Regulation S-B.

ITEM 6. PLAN OF OPERATION

RISK FACTORS

The business operations of the Company will be subject to risks, which may impact adversely on its future performance. These risks may adversely affect the value of our assets and this may affect the value of any Stock in the Company.

The following are some of the important factors that could affect our financial performance or could cause actual results to differ materially from estimates contained in our forward-looking statements. The important factors are not exclusive.

Our future performance is difficult to evaluate because we have a limited operating history and do not own or have development agreements for any oil or natural gas properties.

We began operations in August 2003 and have a limited operating and financial history. As a result, there is little historical financial and operating information available to help you evaluate our performance or an investment in our common stock.

Potential conflicts of interest may cause us to enter into less favorable agreements than we might have obtained from third parties.

Some of our directors are also directors or executive officers of other oil and natural gas companies, which may from time to time compete with us for farm-ins, working interest partners, or property acquisitions. We also may seek to negotiate farm-in agreements or working interest agreements with companies whose boards of directors include individuals who are directors or executive officers of our company. Under Delaware law, a director that has an interest in a contract or proposed contract or agreement shall disclose his interest in such contract or agreement and shall refrain from voting on any matter in respect of such contract or agreement. Nevertheless, we may enter into agreements with such other companies that are not as favorable as that which we might have obtained from unrelated third parties.

We will require additional capital in the future, which may not be available or may only be available on unfavorable terms.

Our future capital requirements depend on many factors, including the amount of property under development and our profitability. To the extent that the funds generated by future operations are insufficient to fund operating and capital requirements, we will need to raise additional funds through financings or curtail our growth and reduce our exploration activities. Any equity or debt financing, if available at all, may be on terms that are not favorable to us. In the case of equity financings, dilution to our stockholders could result, and in any case such securities may have rights, preferences and privileges that are senior to those of the shares offered hereby. If we cannot obtain adequate capital on favorable terms or at all, our business, operating results and financial condition could be adversely affected.

Estimates of future cash flows may prove to be inaccurate, resulting in a reduction of our working capital.

Estimates of future net cash flows from interests we may develop in oil and natural gas reserves, prepared by independent engineers, will be based upon estimates of oil and natural gas reserves and the percentage of those reserves which can be recovered and produced with current technology. These estimates will include assumptions as to the prices received for the sale of oil and natural gas. Any one or all of those estimates may be inaccurate, which could materially affect resulting future net cash flows and working capital.

We depend on our executive officers for critical management decisions and industry contacts but have no employment agreements or key person insurance with these individuals.

We are dependent upon the continued services of our executive officers. We do not have employment agreements with any of these individuals and do not carry key person insurance on their lives. The loss of the services of any of our executive officers, through incapacity or otherwise, could have a material adverse effect on our business and would require us to seek and retain other qualified personnel.

Drilling for and producing oil and natural gas are high risk activities with many uncertainties that could adversely affect our business, financial condition or results of operations.

Oil and natural gas exploration activities are subject to numerous risks beyond our control, including the risk that drilling will not result in commercially viable oil or natural gas reserves. Our decisions to develop or otherwise exploit prospects or properties will depend in part on the evaluation of data obtained through geophysical and geological analyses, production data and engineering studies, the results of which are often inconclusive or subject to varying interpretations. Reserve estimates depend on many assumptions that may turn out to be inaccurate. Our cost of drilling, completing and operating wells will be uncertain before drilling commences. Overruns in budgeted expenditures are common risks that can make a particular project uneconomical. Further, many factors may curtail, delay or cancel drilling, including the following:

- delays imposed by or resulting from compliance with regulatory requirements;
- pressure or irregularities in geological formations;
- equipment failures or accidents;
- adverse weather conditions;
- reductions in oil and natural gas prices;
- title problems; and
- limitations in the market for oil and natural gas.

We may incur substantial losses and be subject to substantial liability claims as a result of any future oil and natural gas operations.

We are not insured against risks. Losses and liabilities arising from uninsured and underinsured events could materially and adversely affect our business, financial condition or results of operations. When we commence these activities, our oil and natural gas exploration activities will be subject to all of the operating risks associated with drilling for and producing oil and natural gas, including the possibility of:

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

environmental hazards, such as uncontrollable flows of oil, natural gas, brine, well fluids, toxic gas or other pollution into the environment, including groundwater and shoreline contamination;
abnormally pressured formations;
mechanical difficulties, such as stuck oilfield drilling and service tools and casing collapse;
fires and explosions;
personal injuries and death; and
natural disasters.

Any of these risks could adversely affect our ability to operate or result in substantial losses to our company. We may elect not to obtain insurance if we believe that the cost of available insurance is excessive relative to the risks presented. In addition, pollution and environmental risks generally are not fully insurable. If a significant accident or other event occurs and is not fully covered by insurance, then it could adversely affect us.

Market conditions or operational impediments may hinder our access to oil and natural gas markets or delay our production.

Market conditions or the unavailability of satisfactory oil and natural gas transportation arrangements may hinder our access to oil and natural gas markets or delay our production. The availability of a ready market for our future oil and natural gas production will depend on a number of factors, including the demand for and supply of oil and natural gas and the proximity of reserves to pipelines and terminal facilities. Our ability to market our production (when and if we have production) will depend in substantial part on the availability and capacity of gathering systems, pipelines and processing facilities owned and operated by third parties. Our failure to obtain such services on acceptable terms could materially harm our business. We may be required to shut-in wells for a lack of a market or because of inadequacy or unavailability of natural gas pipeline or gathering system capacity. If that were to occur, then we would be unable to realize revenue from those wells until production arrangements were made to deliver our production to market.

We are subject to complex laws that can affect the cost, manner or feasibility of doing business.

Exploration, production and sale of oil and natural gas are subject to extensive Australian and international laws and regulations. We may be required to make large expenditures to comply with governmental regulations. Matters subject to regulation include:

discharge permits for drilling operations;
drilling bonds;
the spacing of wells;
unitization and pooling of properties; and
taxation.

Under these laws, we could be liable for personal injuries, property damage and other damages. Failure to comply with these laws may also result in the suspension or termination of our operations and subject us to administrative, civil and criminal penalties. Moreover, these laws could change in ways that substantially increase our costs of doing business. Any such liabilities, penalties, suspensions, terminations or regulatory changes could materially and adversely affect our financial condition and results of operations.

Our operations may incur substantial liabilities to comply with the environmental laws and regulations.

Our oil and natural gas operations will be subject to stringent Australian and international laws and regulations relating to the release or disposal of materials into the environment or otherwise relating to environmental protection. These laws and regulations may require the acquisition of a permit before drilling commences, restrict the types, quantities, and concentration of substances that can be released into the environment in connection with drilling and production activities, limit or prohibit drilling activities on certain lands lying within wilderness, wetlands, and other protected areas, and impose substantial liabilities for pollution resulting from our operations. Failure to comply with these laws and regulations may result in the assessment of administrative, civil, and criminal penalties, incurrence of investigatory or remedial obligations, or the imposition of injunctive relief. Changes in environmental laws and regulations occur frequently, and any changes that result in more stringent or costly waste handling, storage, transport, disposal or cleanup requirements could require us to make significant expenditures to maintain compliance, and may otherwise have a material adverse effect on our results of operations, competitive position, or financial condition as well. Under these environmental laws and regulations, we could be held strictly liable for the removal or remediation of previously released materials or property contamination regardless of whether we were responsible for the release of such materials or if our operations were standard in the industry at the time they were performed.

Competition in the oil and natural gas industry is intense, which may adversely affect our ability to compete.

We operate in a highly competitive environment for developing properties, marketing of oil and natural gas and securing trained personnel. Many of our competitors possess and employ financial, technical and personnel resources substantially greater than ours, which can be particularly important in the areas in which we operate. Those companies may be able to pay more for productive oil and natural gas properties and prospects and to evaluate, bid for and purchase a greater number of properties and prospects than our financial or personnel resources permit. Our ability to acquire additional prospects and to find and develop reserves in the future will depend on our ability to evaluate and select suitable properties and to consummate transactions in a highly competitive environment. In addition, there is substantial competition for capital available for investment in the oil and natural gas industry. We may not be able to compete successfully in the future in acquiring prospective reserves, developing reserves, marketing hydrocarbons, attracting and retaining quality personnel and raising additional capital.

We may depend on industry partners and could be seriously harmed if they do not perform satisfactorily, which is usually not within our control.

Because we have few employees and no revenues, we will continue to be largely dependent on industry partners for the success of our oil and gas exploration projects. We could be seriously harmed if our industry partners do not perform satisfactorily on projects that affect us. It is likely that we will have no control over factors that would influence the performance of our partners.

We are controlled by a small number of principal stockholders who may exercise a proportionately larger influence on the company than its stockholders with smaller holdings.

We are controlled by a small number of principal stockholders who may cause events to occur that are not in the interests of the Company's stockholders with smaller holdings. Our President, Mr. E.G. Albers, and entities controlled by him, own approximately 53% of the outstanding common stock. Accordingly, Mr. Albers has effective control over the election of the Company's directors and significant influence over our management, operations and affairs, including the ability to prevent or cause a change in control of the Company.

Anti-takeover provisions of the certificate of incorporation, bylaws and Delaware law could adversely impact a potential acquisition by third parties that may ultimately be in the financial interests of the company's stockholders.

Our certificate of incorporation, bylaws and the Delaware General Corporation Law contain provisions that may discourage unsolicited takeover proposals. These provisions could have the effect of inhibiting fluctuations in the market price of the Company's shares that could result from actual or rumored takeover attempts, preventing changes in its management or limiting the price that investors may be willing to pay for shares of Common Stock. These provisions, among other things, authorize the board of directors to designate the terms of and to issue new series of preferred stock, to limit the personal liability of directors, and to require the Company to indemnify directors and officers to the fullest extent permitted by applicable law and to impose restrictions on business combinations with some interested parties.

The market price of our common stock is highly volatile.

The market price of our Common Stock has been and is expected to continue to be highly volatile. Prices for our common stock will be influenced by many factors and may fluctuate widely as a result of factors beyond our control. General factors which will bear on the price of our common stock include the depth and liquidity of the market for the common stock, investor perception of us and our technologies and general economic and market conditions.

Our common stock is traded over the counter, which may deprive shareholders of the full value of their shares.

Our Common Stock is quoted via the Over The Counter Bulletin Board (OTCBB). As such, our Common Stock may have fewer market makers, lower trading volumes and larger spreads between bid and asked prices than securities listed on an exchange such as the New York Stock Exchange or the NASDAQ Market. These factors may result in higher price volatility and less market liquidity for the Common Stock.

A low market price may severely limit the potential market for our common stock.

Our Common Stock is currently trading at a price substantially below \$5.00 per share, subjecting trading in the stock to certain SEC rules requiring additional disclosures by broker-dealers. These rules generally apply to any non-NASDAQ equity security that has a market price of less than \$5.00 per share, subject to certain exceptions (a penny stock). Such rules require the delivery, prior to any penny stock transaction, of a disclosure schedule explaining the penny stock market and the risks associated therewith and impose various sales practice requirements on broker-dealers who sell penny stocks to persons other than established customers and institutional or wealthy investors. For these types of transactions, the broker-dealer must make a special suitability determination for the purchaser and have received the purchaser's written consent to the transaction prior to the sale. The broker-dealer also must disclose the commissions payable to the broker-dealer, current bid and offer quotations for the penny stock and, if the broker-dealer is the sole market maker, the broker-dealer must disclose this fact and the broker-dealer's presumed control over the market. Such information must be provided to the customer orally or in writing before or with the written confirmation of trade sent to the customer. Monthly statements must be sent disclosing recent price information for the penny stock held in the account and information on the limited market in penny stocks. The additional burdens imposed upon broker-dealers by such requirements could discourage broker-dealers from effecting transactions in our Common Stock.

Management's Discussion and Analysis or Plan of Operation**General**

Australian Oil & Gas Corporation is an independent energy company focused on exploration and development of oil and natural gas reserves. Our core business is directed at the acquisition of interests in oil and gas prospects in the off-shore areas in Australia's territorial waters. Since August 2003, when current management began operating the company, we have not conducted any substantive business operations. Management has been seeking to identify opportunities in oil and gas exploration in Australia, but has not yet concluded its investigation or made any decision as to the company's future operations other than as disclosed elsewhere herein. Accordingly, we have no results of operations to report.

We rely on the considerable experience in the oil and gas industry of our President, Mr.E.G.Albers and our consultants, to identify and conduct initial analyses of properties in which we may acquire an interest. We devote essentially all of our resources to the identification of large tract oil and gas properties and seek to keep our overhead at a minimum level through the retention of carefully selected consultants, contractors and service companies. We use proven technologies to evaluate prospects before acquiring a working interest. Generally, we expect to invest in projects at different levels of participation, principally as a minority owner, so that daily operating responsibility will rest with experienced, high quality partners and contractors.

To date, we have, together with certain other affiliated joint venturers, been awarded by the Australian authorities, petroleum exploration permits with respect to ACP/33 and ACP/35 and NT/P70. We hold a 20% interest in permits ACP/33 and ACP/35. We hold a 100% interest in NT/P70. We have also entered into non-binding preliminary share purchase agreements to acquire Alpha Oil & Natural Gas Pty Ltd and Nations Natural Gas Pty Ltd. Alpha holds a 20% interest in the permits of the Browse Joint Venture, being permits WA-332-P, WA-333-P, WA-341-P and WA-342-P. Nations holds a 30% interest in the permits of the National Gas Consortium, being permits NT/P62, NT/P63, NT/P64 and NT/P65. As of the date of this report, we have not finalized these acquisitions. It is anticipated that these transactions will be completed by the end of second quarter of 2006.

Liquidity and Capital Resources

The following table reflects our working capital position at December 2005:

Current assets	\$10,000
Current liabilities	\$122,000
Working capital deficit	(\$112,000)
Current ratio	

The Company relies on infusions of cash through the advances of Great Missenden Holdings Pty Ltd, a family company associated with our President, Mr.E.G.Albers. When we require further funds, it is our intention that the additional funds would be raised in a manner deemed most expedient by the Board of Directors at the time, taking into account budgets, share market conditions and the interest of industry in co-participation in our programs. When additional funds for exploration are required, it is our plan that they could be raised by any one or a combination of the following manners: stock placements, pro-rata issue to stockholders, and/or a further issue of stock to the public. Should these methods not be considered to be viable, or in the best interests of stockholders, then it would be our intention to meet our obligations by either partial sale of our interests or farm out, the latter courses of action being part of managements overall strategy. Should funds be required for appraisal or development purposes we would, in addition, look to project loan finance.

Our cash requirements for the next 12 months to support the operations, will be approximately \$330,000. This figure includes office administration of \$80,000, and payments of approximately \$250,000 for ACP/33 and ACP/35, the Permits of the Browse Joint Venture and of the National Gas Consortium and NT/P70. Management believes it is reasonably likely that it will be able to generate cash to support its operations during the next twelve months through advances from Great Missenden Holdings Pty Ltd (GMH) or through the sale of additional shares of our common stock, or the sale of permit interests.

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

As the Company's capital resources are limited, the board plans to remunerate Mr.E.G.Albers by the issue of common stock in lieu of cash payments. Specifically, during the fourth quarter 2005, the Company issued 2,500,000 shares of common stock to Mr.E.G.Albers for his services in relation for the period January 1, 2005, to December 31, 2005. A further 2,000,000 shares of common stock are to be issued to him for his services between January 1, 2006, and December 31, 2006 and a further 1,500,000 shares of common stock are to be issued for his services for the period from January 1, 2007 to 31 December, 2007.

Off-Balance Sheet Arrangements

The Company does not have any off-balance sheet arrangements as defined in Item 303(c) of Regulation S-B and it is not anticipated that the Company will enter into any off-balance sheet arrangements.

Critical Accounting Policies

Management has identified the accounting policies described below as critical to our business operations and the understanding of the results of operations. The impact and any associated risks related to these policies on our business operations are discussed throughout this section where such policies affect our reported and expected financial results. The preparation of this Annual Report requires us to make estimates and assumptions that affect the reported amount of assets and liabilities, revenues and expenses of the Company during the reporting period and contingent assets and liabilities as of the date of our financial statements. There can be no assurance that the actual results will not differ from those estimates.

Undeveloped oil and gas properties:

We will utilize the successful efforts method of accounting for undeveloped mineral interests and oil and gas properties. Capitalized costs are to be charged to operations at the time the Company determined that no economic reserves existed. Costs of carrying and retaining undeveloped properties are to be charged to expense when incurred. Proceeds from the sale of undeveloped properties are to be treated as a recovery of cost. Proceeds in excess of the capitalized cost realized in the sale of any such properties, if any, are to be recognized as gain to the extent of the excess.

Impairment of long-lived assets:

We will evaluate the potential impairment of long-lived assets in accordance with Statement of Financial Accounting Standards No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets. We will annually review the amount of recorded long-lived assets for impairment. If the carrying amount of a long-lived asset is not recoverable from our undiscounted cash flows, we will recognize an impairment loss in such period.

ITEM 7. FINANCIAL STATEMENTS

Our financial statements for the fiscal year ending December 31, 2005 are attached hereto beginning on page F1.

ITEM 8. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Not applicable.

ITEM 8A CONTROLS AND PROCEDURES

As required by Rule 13a-15 under the Securities Exchange Act of 1934 (the Exchange Act), we carried out an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures as of December 31, 2005. This evaluation was carried out under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective in timely alerting management to material information relating to us required to be included in our periodic SEC filings. There have been no significant changes in our internal controls or in other factors that could significantly affect internal controls subsequent to the date we carried out our evaluation.

Disclosure controls and procedures are controls and other procedures that are designed to ensure that information required to be disclosed in our reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed in our reports filed under the Exchange Act is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure.

ITEM 8B OTHER INFORMATION

Not applicable

PART III

ITEM 9. DIRECTORS, EXECUTIVE OFFICERS, PROMOTERS AND CONTROL PERSONS; COMPLIANCE WITH SECTION 16(a) OF THE EXCHANGE ACT

Set forth below are the names of each of the officers of the Registrant and the position held:

<u>Name</u>	<u>Age</u>	<u>Position</u>
Ernest Geoffrey Albers	61	President, Treasurer and Director
William Ray Hill	55	Director, Vice President
Mark Anthony Muzzin	43	Director, Vice President

Ernest Geoffrey Albers has been our President and Treasurer and a director since August 2003. Mr. Albers is a company director with over 30 years experience as a lawyer and administrator in corporate law, petroleum exploration and resource sector investment. During this period Mr. Albers has sponsored the formation of companies that have made the original Maari (Moki) oilfield discovery in New Zealand, the Yolla Gas/Condensate discovery in Bass Strait, the Evans Shoal gasfield discovery/appraisal in the Timor Sea and the SE Gobe oilfield development in Papua New Guinea. Mr Albers is Chairman of Rocky Mountain Minerals, Inc., and Octanex NL. He is a director of Bass Strait Oil Company Ltd and various other private and public companies. He is a member of the Petroleum Exploration Society of Australia and a member of the APPEA Exploration Committee and a Fellow of the Institute of Directors in Australia.

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

W. Ray Hill has been a director of the Company since August 2003. Mr. Hill founded Rocky Mountain Minerals, Inc. in 1978 and is currently President and director. Mr. Hill is President and Director of The Zonia Company, an Arizona real estate development company. Mr. Hill is the founder and President of Geowest Corporation, which is involved in the development of a solid waste construction and demolition landfill. In 1988 Mr. Hill founded Citizens Recycle & Collection, a solid waste hauling and Transfer Company, which was acquired by Waste Management, Inc. in 1996.

Mark A. Muzzin was appointed a director of the Company on November 16, 2005. Mr Muzzin has had over 19 years of commercial experience and holds a B.A. degree from Latrobe University, Melbourne, Australia. His career commenced in the mid eighties for a London stock broking firm and has consulted for two of the major banks in Australia in the share custodian area. He has been involved in many capital raising activities for resource companies in Australia and is a consultant for various oil and gas companies. He is a director in a number of Australian public and private companies. He is Managing Director of Goldsbrough Limited and is a member of the Petroleum Exploration Society of Australia.

Audit Committee Matters

The Company does not currently maintain separate standing committees, including an Audit Committee, of the Board of Directors, because of the small size of the Board and of the Company. As a result, the entire Board of Directors acts as an Audit Committee for the purpose of overseeing the Company's accounting and financial reporting processes, and the audits of the financial statements by our independent registered public accounting firm.

Prior to his resignation from the Board of Directors in November 2005, David B. Hill qualified as an audit committee financial expert under Item 401(e) of Regulation S-K because of his experience and credentials as a certified public accountant. However, since Mr. Hill's resignation from the Board, we do not have an audit committee financial expert serving on our Board of Directors because no current member of the Board has the requisite experience and education to qualify as an audit committee financial expert as defined in Item 401 of Regulation S-B and because we are a start up oil and gas exploration company with no revenues to date. However, in the future the current members of the Board intend to consider such qualifications in making future nominations of persons to join our Board of Directors.

Code of Ethics

Because we are a start up oil and gas exploration company with no revenues to date, we have not yet adopted a Code of Ethics as defined in Item 406 of Regulation S-K. The Board of Directors intends, however, to adopt a code of ethics for its principal executive, financial and accounting officers on or before December 31, 2006 and will file the code of ethics as an exhibit to the Company next annual report on Form 10-KSB.

Section 16(A) Beneficial Ownership Reporting Compliance

Section 16(a) of the Securities Act of 1934 requires our officers and directors, and greater than 10% stockholders, to file reports of ownership and changes in ownership of our securities with the Securities and Exchange Commission. Copies of the reports are required by SEC regulation to be furnished to us.

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

Based solely upon a review of Forms 3 and 4 furnished to the Company, the Company is not aware of any director, officer, or beneficial owner of more than ten percent of the Common Stock of the Company, who failed to file, on a timely basis, reports required by Section 16(a) of the Securities Exchange Act of 1934, except that Mr.E.G.Albers failed to timely file a Form 4 for his December 22, 2005 acquisition of shares from the Company.

ITEM 10. EXECUTIVE COMPENSATION

Summary Compensation Table

The following table sets forth certain information concerning the annual and long-term compensation of the person serving as our chief executive officer since his appointment in August 2003. No other executive officers received annual compensation in excess of \$100,000 during that time.

<u>Name and Principal Position</u>	<u>Year</u>	<u>Salary</u>	<u>Other Annual Compensation</u>	<u>Securities/ Underlying Options</u>	<u>All Other Compensation</u>
E. Geoffrey Albers, Chief Executive Officer	2005	-0-	-0-	-0-	* \$250,000

* Represents the value of the 2,500,000 shares issued on the 22nd of December, 2005, @ 10 cents per share, to Mr.E.G.Albers, for compensation described herein. The shares were issued pursuant to a private placement in reliance on Section 4(2) of the Securities Act of 1933. (See Exhibit 10.3).

Option Grants in the Last Fiscal Year

The Company does not have a stock option plan and has not granted any options during the last fiscal year.

Compensation of Directors

The Company does not compensate its directors for serving in such capacity.

Fiscal Year-End Option Numbers and Values

The Company does not have a stock option plan and has not granted any options during the last fiscal year.

Equity Compensation Plan Information

The Company does not have a stock option plan and has not granted any options during the last fiscal year.

ITEM 11. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The following table sets forth, as of December 31, 2005, certain information with respect to the beneficial ownership of shares of common stock by (i) officer of our company, (ii) each director of our company, (iii) each person known to us to be the beneficial owner of more than 5 percent of our outstanding shares of common stock, and (iv) our directors and executive officers as a group.

Beneficial Owner	Number of Shares ⁽¹⁾	Percent of Class ⁽²⁾
Ernest Geoffrey Albers ⁽³⁾	15,800,000	53.0
William Ray Hill	100,000	0.36
Mark Anthony Muzzin	Nil	0.00
All officers and directors as a group (3 persons)	15,900,000	53.36%

- (1) The number of shares and the percentage of the class beneficially owned by the entities above is determined under rules promulgated by the SEC and the information is not necessarily indicative of beneficial ownership for any other purpose. Under such rules, beneficial ownership includes any shares as to which the individual has sole or shared voting power or investment power and also any shares which the individual has the right to acquire within 60 days through the exercise of any stock option or other right. The inclusion herein of such shares, however, does not constitute an admission that the named stockholder is a direct or indirect beneficial owner of such shares. Unless otherwise indicated, each person or entity named in the table has sole voting power and investment power (or shares such power with his or her spouse) with respect to all shares of capital stock listed as beneficially owned by such person or entity.
- (2) Percentages are based upon the total 29,800,528 outstanding shares of Common Stock combined with the number of shares of Common Stock beneficially owned by each person or entity.
- (3) Includes shares of common stock registered in the names of Mr. Albers family members and affiliates.

ITEM 12. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Set forth below is information regarding transactions between executive officers, directors and significant shareholders of the Company during the most recent fiscal year and for the prior fiscal year.

Some of our directors and officers are engaged in various aspects of oil and gas exploration and development for their own account and through other entities in which they are directors and or shareholders. Furthermore, as described in this Item 12, certain of our directors and officers are involved in transactions with the Company. We have no policy prohibiting, nor does our Certificate of Incorporation prohibit, transactions between the Company and our officers and directors. We may enter into cost-sharing arrangements with respect to the drilling of its oil and gas properties. Directors and officers may participate, from time to time, in these arrangements and such transactions may be on a non-promoted basis (actual costs), although they have participated mainly on a promoted basis, but must be approved by a majority of the disinterested directors of the Board of Directors.

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

Mr. Albers, the President and a director, and Mr. Mark A Muzzin, a director, each have interests in certain of the oil and gas properties under option to the Company. The affiliates paid for their proportionate share of all costs to acquire, develop and operate these properties.

Mr. E Geoffrey Albers is a director and shareholder of each of Great Missenden Holdings Pty Ltd and of Setright Oil & Gas Pty Ltd. Effective from April 4, 2005, in return for the previous advances of \$212,000, the Company issued to Great Missenden Holdings Pty Ltd 212 Series I Convertible Notes of \$1,000 each, with an interest coupon of 10% per annum, convertible into shares of Common Stock at any time on or before December 31, 2007 on the basis of 12,500 shares of Common Stock for every \$1,000 Convertible Note or part thereof. Effective from April 26, 2005, Great Missenden Holdings Pty Ltd approved a further \$100,000 Line of Credit to the Company in return for the issue to Great Missenden Holdings of 100 Series II Convertible Notes of \$1,000 each with an interest rate of 10% per annum, convertible into shares of Common Stock at any time on or before 31 December, 2008 on the basis of 10,000 shares of Common Stock for every \$1,000 Series II Convertible Notes or part thereof. As at December 31, 2005, an amount of \$38,000 had been drawn down pursuant to the \$100,000 Line of Credit, which were converted into these Series II Convertible Notes. A total charge of \$6,165 by way of interest on all advances from Great Missenden Holdings Pty Ltd was incurred during the quarter. For the quarter ended December 31, 2005, Setright Oil & Gas Pty Ltd charged the Company \$5,525 for the provision of accounting and administrative services rendered by third parties for the benefit of the Company, but not including services rendered by Mr. E Geoffrey Albers, who is to be remunerated separately. At December 31, 2005, an aggregate amount of \$20,845 was recorded as a liability to Setright Oil & Gas Pty Ltd.

We also have the use of premises in Australia at Level 25, 500 Collins Street, Melbourne, Victoria. The office space is taken on a nonexclusive basis, with no rent payable, but the usage of the premises is included in the charges Setright Oil & Gas Pty Ltd makes in respect to the administration of the Company.

With regard to exploration permits ACP/33 and ACP/35, Mr. Albers is a director and shareholder in the joint venture participants; namely Natural Gas Corporation Pty Ltd and Auralandia N.L.

With regard to the non-binding agreement to acquire an interest in the Browse Joint Venture, Mr. Albers is a director and shareholder in each of Batavia Oil & Gas Pty Ltd and Hawkestone Oil Pty Ltd. He is a major shareholder in Alpha Oil & Natural Gas Pty Ltd and Goldsborough Energy Pty Ltd., a subsidiary of Goldsborough Limited. All of these companies are the holders of the Browse Joint Venture.

Mr. Mark A Muzzin is a director of Goldsborough Energy Pty Ltd, a subsidiary of Goldsborough Limited.

With regard to the non-binding agreement to acquire an interest in the National Gas Consortium, Mr. Albers is a director and shareholder in each of National Oil & Gas Pty Ltd, Australian Natural Gas Pty Ltd and Nations Natural Gas Pty Ltd.

PART IV

ITEM 13. EXHIBITS

EXHIBIT LIST

December 31, 2005

Exhibits required by Item 601 of Regulation S-B.

- 3.1 Certificate of Incorporation of the Company, dated August 6, 2003.
- 3.2 By-laws of the Company.
- 10.1 Agreement to acquire Nations Natural Gas Pty Ltd
- 10.2 Agreement to acquire Alpha Oil & Gas Pty Ltd
- 10.3 Deed of appointment for E.G. Albers
- 10.4 Services agreement with Setright Oil & Gas Pty Ltd
- 31 Certification of Chief Executive Officer and Chief Financial Officer pursuant to Pursuant to Rule 13a-14 under the Securities Exchange Act of 1934
- 32 Certification of Chief Executive and Chief Financial Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

(a) Audit Fees

Our principal accountant, Demetrius & Company L.L.C., billed us aggregate fees in the amounts of approximately \$12,100 and \$12,000 respectively for the fiscal years ended 2005 and 2004. These amounts were billed for professional services that Demetrius & Company, L.L.C. provided for the audit of our annual financial statements, review of the financial statements included in our report on 10-QSB and other services typically provided by an accountant in connection with statutory and regulatory filings or engagements for those fiscal years.

(b) Audit Related Fees

There were no fees billed to us for the fiscal year ended December 31, 2005 for assurance and other services related to the performance of the audit or review of our financial statements.

(c) Tax Fees

There were \$1,500 accrued fees for the fiscal year ended December 31, 2005 for tax compliance, tax advice, and tax planning.

(d) All Other Fees

There were no other fees billed to us for the fiscal year ended December 31, 2005.

(e) Audit Committee s Pre-Approval Practice

Inasmuch as the Company does not have an audit committee, its board of directors performs the functions of its audit committee. Section 10A(i) of the Securities Exchange act of 1934 prohibits our auditors from performing audit services for us as well as any services not considered to be audit services unless such services are pre-approved by the board of directors (in lieu of the audit committee) or unless the services meet certain de minimis standards.

(e) Audit Committee s Pre-Approval Practice

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

The board of directors has adopted resolutions that provide that the board must:

Preapprove all audit services that the auditor may provide to us or any subsidiary (including, without limitation, providing comfort letters in connection with securities underwritings or statutory audits) as required by Section 10A(i) (1) (A) of the Securities Exchange Act of 1934 (as amended by the Sarbanes-Oxley Act of 2002).

Preapprove all non-audit services (other than certain de minimis services described in Section 10A(i) (1) (B) of the Securities Exchange Act of 1934 (as amended by the Sarbanes-Oxley Act of 2002) that the auditors propose to provide to us or any of its subsidiaries.

The board of directors considers at each of its meetings whether to approve any audit services or non-audit services. In some cases, management may present the request; in other cases, the auditors may present the request. The board of directors has approved Demetrius & Company LLC performing our audit for the 2004 and 2005 fiscal years.

The percentage of the fees for audit, audit-related, tax and other services were as set forth in the following table:

Percentage of total fees paid to Demetrius & Company LLC Fiscal Year 2005

Audit fees	80%
Audit-related fees	Nil
Tax fees	20%
All other fees	Nil

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders
of Australian Oil & Gas Corporation (A Development Stage Enterprise)

We have audited the accompanying consolidated balance sheet of Australian Oil & Gas Corporation (A Development Stage Enterprise) as of December 31, 2005, and the related consolidated statements of operations, stockholders' equity (deficit) and cash flows for the year ended December 31, 2005, for the year ended December 31, 2004 and the period from inception (August 6, 2003) to December 31, 2005. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Australian Oil & Gas Corporation (A Development Stage Enterprise) as of December 31, 2005, and the results of its operations and its cash flows for the year ended December 31, 2005, for the year ended December 31, 2004, and the period from inception (August 6, 2003) to December 31, 2005 in conformity with accounting principles generally accepted in the United States of America.

The accompanying consolidated financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 1 to the consolidated financial statements, the Company has suffered losses since inception and has a working capital deficit. These conditions raise substantial doubt about its ability to continue as a going concern. Management's plans in regard to these matters are also described in Note 2. The consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

/s/ Demetrius & Company, L.L.C.

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

Australian Oil & Gas Corporation
(a development stage enterprise)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2005

NOTE 1: ORGANIZATION

Australian Oil & Gas Corporation (the Company) was incorporated on August 6, 2003, and began operations on August 11, 2003 pursuant to the terms of a Plan of Reorganization (Plan) of Synergy Technologies Corporation (Synergy) and is considered to be a crude petroleum and natural gas company in the exploratory stage and a development stage company as defined by SFAS No. 7, and since inception, has been engaged in the assessment of oil and gas exploration properties.

The authorized capital stock of the Australian Oil & Gas Corporation consists of 75,000,000 shares of common stock (AOG Common Stock), \$0.001 par value. All stock options, warrants, leases and executory contracts of Synergy were cancelled pursuant to the Plan. Unsecured claims with respect to Synergy received 3,000,000 shares of AOG Common Stock plus payment of \$90,000 pursuant to the Plan. Equity holders of Synergy received one share of AOG Common Stock for each 10 Synergy shares held, for a total of 4,800,550 of AOG Common Stock pursuant to the Plan. The Plan Funder received 19,500,000 shares of AOG Common Stock in return for funding the Plan.

As at the effective date of the Plan, the following adjustments were made to assets, liabilities and stockholders' equity (deficit) of Synergy to eliminate all assets and liabilities on the effective date. More particularly, cash in the aggregate of \$299,692, was paid to holders of general unsecured claims in respect to \$90,000 and to settle accounts payable of \$209,692. Holders of general unsecured claims secured 3,000,000 shares of AOG Common stock.

The accumulated deficit of \$60,713,606 of Synergy was eliminated on the cancellation of all outstanding securities of Synergy and the issuance of 4,800,550 shares of AOG Common Stock on the basis of (1) share of AOG Common Stock for every ten (10) shares of the common stock of Synergy.

The Company has two wholly owned subsidiaries; Gascorp, Inc. and Nations LNG, inc. both incorporated in Delaware.

NOTE 2: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The Company has adopted Fresh Start Accounting. All dollar amounts used herein refer to U.S. dollars unless otherwise indicated. These statements are prepared using Generally Accepted Accounting Principles of the United States of America. All significant transactions between the parent and consolidated affiliates have been eliminated.

F.7.

Basis of presentation

The financial statements have been prepared on a going concern basis which contemplates the realization of assets and liquidation of liabilities in the ordinary course of business. As shown in the accompanying financial statements, the Company has incurred losses and at December 31, 2005 had minimal cash. As a development stage enterprise, the Company relies on infusions of cash through the advance of capital from Great Missenden Holdings Pty Ltd, the Plan funder and issuance of equity capital. As a result, substantial doubt exists about the Company's ability to continue to fund future operations using its existing resources.

Future plans for additional funding of activities include the sale of the Company's common stock and further loans from Great Missenden Holdings Pty Ltd.

Basis of Consolidation

The consolidation financial statements include all majority-owned subsidiaries over which we exercise control. Investments where we exercise significant influence but do not control (generally a 20% to 50% ownership interest), are accounted for under the equity method of accounting. All material intercompany transactions and balances have been eliminated.

Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and footnotes thereto. Actual results could differ from those estimates.

Undeveloped mineral interests and oil and gas properties

The Company will utilize the "successful efforts" method of accounting for undeveloped oil and gas properties. Capitalized costs will be charged to operations at the time the Company determines that no economic reserves exist.

Costs of carrying and retaining undeveloped properties are to be charged to expense when incurred.

Proceeds from the sale of undeveloped properties are to be treated as a recovery of cost. Proceeds in excess of the capitalised cost realised in the sale of any such properties, if any, are to be recognized as gain to the extent of the excess.

Income taxes

The Company will provide for income taxes utilizing the liability approach under which deferred income taxes are provided based upon enacted tax laws and rates applicable to the periods in which the taxes became payable.

F.8.

Cash equivalents

For purposes of the statements of cash flows, the Company will consider all highly liquid debt instruments purchased with a maturity of three months or less to be cash equivalents.

Impairment of long-lived assets

The Company will evaluate the potential impairment of long-lived assets in accordance with Statement of Financial Accounting standards No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets. The Company will annually review the amount of recorded long-lived assets for impairment. If the carrying amount of a long-lived asset is not recoverable from its undiscounted cash flows, the Company will recognize an impairment loss in such period.

Concentrations of credit risk

Financial instruments which potentially subject the Company to concentrations of credit risk consist principally of cash and cash equivalents. The Company will place its cash with high quality financial institutions.

Newly enacted accounting pronouncements

The Company does not anticipate the adoption of recently issued accounting pronouncements will have a significant impact on its results of operations, financial position or cash flows.

NOTE 3: INCOME TAXES

The Company does not anticipate that any of the past net operating loss carry forwards for tax purposes attributable to Synergy will be able to be used to offset future taxable income.

The benefits of net operating losses will not be recognized until management determines that realization is more likely than not to occur. Accordingly, management has established a valuation allowance to offset the tax benefits of net operating losses for all periods presented. At December 31, 2005 the Company had net operating loss carryforwards of approximately \$256,000, expiring through 2024.

NOTE 4: BASIC LOSS PER COMMON SHARE

Basic loss per common share is based on the weighted average number of shares of common stock outstanding 29,800,528 shares in 2005 during the period from inception to December 31, 2005.

NOTE 5: RELATED PARTY TRANSACTION

Mr. E Geoffrey Albers is a director and shareholder of each of Great Missenden Holdings Pty Ltd and of Setright Oil & Gas Pty Ltd. Effective from April 4, 2005, in return for the previous advances of \$212,000, the Company issued to Great Missenden Holdings Pty Ltd 212 Series I Convertible Notes of \$1,000 each, with an interest coupon of 10% per annum,

F.9.

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

convertible into shares of Common Stock at any time on or before December 31, 2007 on the basis of 12,500 shares of Common Stock for every \$1,000 Convertible Note or part thereof. Effective from April 26, 2005, Great Missenden Holdings Pty Ltd approved a further \$100,000 Line of Credit to the Company in return for the issue to Great Missenden Holdings of 100 Series II Convertible Notes of \$1,000 each with an interest rate of 10% per annum, convertible into shares of Common Stock at any time on or before 31 December, 2008 on the basis of 10,000 shares of Common Stock for every \$1,000 Series II Convertible Notes or part thereof. As at December 31, 2005, an amount of \$38,000 had been drawn down pursuant to the \$100,000 Line of Credit, which were converted into these Series II Convertible Notes. A total charge of \$21,057 by way of interest on all advances from Great Missenden Holdings Pty Ltd was incurred during the year. For the year ended December 31, 2005, Setright Oil & Gas Pty Ltd charged the Company \$20,845 for the provision of accounting and administrative services rendered by third parties for the benefit of the Company, but not including services rendered by Mr. E Geoffrey Albers, who is to be remunerated separately.

We also have the use of premises in Australia at Level 25, 500 Collins Street, Melbourne, Victoria. The office space is taken on a nonexclusive basis, with no rent payable, but the usage of the premises is included in the charges Setright Oil & Gas Pty Ltd makes in respect to the administration of the Company.

With regard to exploration permits ACP/33 and ACP/35, Mr. Albers is a director and shareholder in the joint venture participants; namely Natural Gas Corporation Pty Ltd and Auralandia N.L.

With regard to the non-binding share purchase agreement to acquire an interest in the Browse Joint Venture, Mr. Albers is a director and shareholder in each of Batavia Oil & Gas Pty Ltd and Hawkestone Oil Pty Ltd. He is a major shareholder in Alpha Oil & Natural Gas Pty Ltd and Goldsbrough Energy Pty Ltd., a subsidiary of Goldsbrough Limited. All of these companies are the holders of the Browse Joint Venture.

Mr. Mark A. Muzzin is a director of Goldsbrough Energy Pty Ltd, a subsidiary of Goldsbrough Limited.

With regard to the non-binding share purchase agreement to acquire an interest in the National Gas Consortium, Mr. Albers is a director and shareholder in each of National Oil & Gas Pty Ltd, Australian Natural Gas Pty Ltd and Nations Natural Gas Pty Ltd.

NOTE 6: NON CURRENT LIABILITIES

At December 31, 2005, the Company recorded a liability to Great Missenden Holdings Pty Ltd and to Setright Oil & Gas Pty Ltd of \$21,507 as set out in Note 5 Related Party Transaction.

NOTE 7: COMMON STOCK

On the effective date of the Plan the following changes in common stock were effected:

the issuance of 19,500,000 shares of AOG Common Stock to the nominees of Great Missenden Holdings Pty Ltd in consideration of supplying funding for the Plan (herein referred to as the Plan Funder) and its agreement to contribute up to

F.10.

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

\$150,000 in loan funds to AOG during the two-year period after the effective date of the Plan.
the issuance of 4,800,550 shares of AOG Common Stock on the basis of (1) share of AOG Common Stock for every ten (10) shares of common stock of Synergy;
the issuance of an aggregate of 3,000,000 shares of AOG Common Stock to all holders of Synergy general unsecured claims on the basis of .86299 of one share for each dollar of the amount of allowed unsecured claims.

On December 22, 2005, 2,500,000 shares of Common stock were issued to EG Albers under the terms of his employment contract (see Exhibit 10.3).

The Company now has 29,800,528 shares of Common Stock on Issue.

With regard to the previously reported number Common Stock issued, our stock transfer agent has advised us that their records show a discrepancy of 22 shares of Common Stock, due to the elimination of fractions of shares upon the consolidation resulting from Synergy's Plan of Reorganization.

NOTE 8: COMMITMENTS AND CONTINGENCIES

Insurance

The Company is without insurance pertaining to various potential risks with respect to its properties, including general liability, because it is presently not able to obtain insurance for such risks at rates and on terms, which it considers reasonable. The financial position of the Company in future periods could be adversely affected if uninsured losses were to be incurred.

Acquisitions of Alpha Oil & Natural Gas Pty Ltd and Nations Natural Gas Pty Ltd

In June 2004, we entered into a preliminary, non binding share purchase agreement to acquire 100% of the outstanding shares of Alpha Oil & Natural Gas Pty Ltd (Alpha), a company incorporated in Australia. The acquisition of Alpha is being made to cost-effectively acquire a 20% interest in the permits of the Browse Joint Venture, being permits WA-332-P, WA-333-P, WA-341-P and WA-342-P.

In September 2004, we entered into a preliminary, non binding share purchase agreement to acquire all of the outstanding shares of Nations Natural Gas Pty Ltd (Nations), with the exception of 100,000 shares held by Alpha Oil & Gas Pty Ltd (Alpha). The acquisition of Nations is being made to cost-effectively acquire a 30% interest in the permits of the National Gas Consortium, being permits NT/P62, NT/P63, NT/P64, and NT/P65.

It is anticipated that the acquisitions of Alpha and Nations will be completed during the second quarter of 2006.

F.11.
