CHINA XD PLASTICS COMPANY LIMITED AND SUBSIDIARIES  
NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Note 1 - Basis of presentation, significant concentrations and risks

(a) Basis of presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("US GAAP"). Certain information and footnote disclosures normally included in financial statements prepared in accordance with US GAAP have been condensed or omitted as permitted by rules and regulations of the United States Securities and Exchange Commission. The condensed consolidated balance sheet as of December 31, 2011 was derived from the audited consolidated financial statements of China XD Plastics Company Limited ("China XD Plastics") and subsidiaries (the "Company"). The accompanying unaudited condensed consolidated financial statements should be read in conjunction with the consolidated balance sheet of the Company as of December 31, 2011, and the related consolidated statements of comprehensive income, changes in equity and cash flows for the year then ended, included in the Company's Annual Report on Form 10-K filed with the SEC.

In the opinion of the management, all adjustments (which include normal recurring adjustments) necessary to present a fair statement of the financial position as of June 30, 2012, the results of operations for the three-month periods ended June 30, 2012 and 2011, and the results of operations and cash flows for the six-month periods ended June 30, 2012 and 2011, have been made.

The preparation of consolidated financial statements in accordance with US GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Significant items subject to such estimates and assumptions include the recoverability of the carrying amounts of property, plant and equipment, the realizability of inventories and deferred income tax assets, the useful lives of property, plant and equipment, the collectibility of accounts receivable, the fair values of financial instruments and stock-based compensation awards, and the accruals for tax uncertainties and other contingencies. The current economic environment has increased the degree of uncertainty inherent in those estimates and assumptions.

(b) Significant concentrations and risks

Sales concentration

The Company sells its products, substantially through approved distributors in the PRC. The Company's sales are highly concentrated. Sales to five and four major distributors, which individually exceeded 10% of the Company's revenues, accounted for approximately 76% and 75% of the Company's revenues for the three-month periods ended June 30, 2012 and 2011, respectively. Sales to four major distributors, which individually exceeded 10% of the Company's revenues, accounted for approximately 69% and 74% of the Company's revenues for the six-month periods ended June 30, 2012 and 2011, respectively.

The Company expects revenues from these distributors to continue to represent a substantial portion of its revenues in the future. Any factors adversely affecting the automobile industry in the PRC or the business operations of these customers will have a material effect on the Company's business, financial position and results of operations.

Purchase concentration

The principal raw materials used for the Company's production of modified plastics products are plastic resins, such as polypropylene, ABS and polyamide. The Company purchases substantially all of its raw materials through three distributors. Raw material purchases from these three suppliers, which individually exceeded 10% of the Company's total raw material purchases, accounted for approximately 99% and 99% of the Company's total raw material purchases for the three-month periods ended June 30, 2012 and 2011, respectively, and 99% and 97% of the Company's total raw material purchase for the six-month periods ended June 30, 2012 and 2011, respectively. Management believes that other suppliers could provide similar raw materials on comparable terms. A change in suppliers, however, could cause a delay in manufacturing and a possible loss of sales, which would adversely affect the Company's business, financial position and results of operations.

The majority owner of a major raw material supplier that supplied approximately 26% and 27% of the Company's total raw material purchases for the three-month periods ended June 30, 2012 and 2011, respectively, and 26% and 25% of the Company's total raw material purchases for the six-month periods ended June 30, 2012 and 2011, respectively, is also the majority owner of a sales distributor of the Company, as well as the major equipment distributor to the Company. Sales to this customer were approximately 14% and 13% of the Company's total revenues for the three-month periods ended June 30, 2012 and 2011, respectively, and 15% and 13% of the Company's total revenues for the six-month periods ended June 30, 2012 and 2011, respectively. Purchases from this major equipment distributor accounted for 99% and nil of the Company's total equipment purchases for the six-month ended June 30, 2012 and 2011, respectively.

#### Cash concentration

Cash, cash equivalents and restricted cash maintained at banks consist of the following:

	June 30, 2012 US\$	December 31, 2011 US\$
RMB denominated bank deposits with financial institutions in the PRC	160,839,738	137,503,064
US dollar denominated bank deposits with a financial institution in the U.S.	111,398	36,280
US dollar denominated bank deposits with financial institutions in the PRC	-	8,589,666
US dollar denominated bank deposits with a financial institution in Hong Kong Special Administrative Region	153,899	478,832

The bank deposits with financial institutions in the PRC are uninsured by the government authority. To limit exposure to credit risk relating to bank deposits, the Company primarily places bank deposits with large financial institutions in the PRC with acceptable credit rating.

Cash that is restricted as to withdrawal or usage is reported as restricted cash in the condensed consolidated balance sheets and is not included as cash and cash equivalents in the condensed consolidated statements of cash flows. Restricted cash of US\$18,888,714 and US\$11,128,106 as of June 30, 2012 and December 31, 2011, respectively, represents short-term bank deposits that are pledged as security for bills payable relating to purchase of raw materials. Upon maturity and pay off of the bills payable, which is generally within 6 months, the cash becomes available for use by the Company. The net cash flows from the pledged bank deposits, which relate to purchases of raw materials, are reported within cash flows from operating activities in the condensed consolidated statements of cash flows.

## Note 10 - Income tax

In 2008, Harbin Xinda Macromolecule Material Co., Ltd. (“Harbin Xinda”) was qualified as an Advanced and New Technology Enterprise (“ANTE”). In 2011, Harbin Xinda renewed its ANTE qualification, which entitled it to the preferential income tax rate of 15% from January 1, 2011 to December 31, 2013. In December 2011, Heilongjiang Xinda Enterprise Group Co., Ltd. (“Xinda Group”) was established and is subject to income tax at 25%. ### Overview

China XD Plastics Company Limited ("China XD", "we", and the "Company", and "us" or "our" shall be interpreted accordingly) is one of the leading specialty chemical companies engaged in the research, development, manufacture and sale of modified plastics primarily for automotive applications in China. Through our wholly-owned operating subsidiaries in China, we develop modified plastics using our proprietary technology, manufacture and sell our products primarily for use in the fabrication of automobile parts and components. We have received 227 certifications from manufacturers in the automobile industry as of June 30, 2012. We are the only company certified as a National Enterprise Technology Center in modified plastics industry in Heilongjiang province. Our Research and Development (the "R&D") team consists of 96 professionals and 15 consultants, including two consultants who are members of Chinese Academy of Engineering, and one consultant who is the former chief scientist of Specialty Plastics Engineering Institute of Jilin University. As a result of the integration of our academic and technological expertise, we have a portfolio of 43 patents, one of which we have obtained the patent rights and the remaining 42 of which we have applications pending in China as of June 30, 2012.

Our products include seven categories: polypropylene (PP), acrylonitrile butadiene styrene (ABS), modified engineering plastics, polyamides (PA or nylon), environment-friendly plastics, specialty engineering plastics and polyether ether ketone (PEEK). The Company's products are primarily used in the production of exterior and interior trim and functional components of more than 20 automobile brands and 70 automobile models manufactured in China, including Audi, Volkswagen, BMW, GM Mazda, Toyota, Cherry, Geely and Hafei new energy vehicles. Our research

center is dedicated to the research and development of modified plastics, and benefits from its cooperation with well-known scientists from prestigious universities in China. We operate three manufacturing bases in Harbin, Heilongjiang in the PRC. As of June 30, 2012, we had approximately 255,000 metric tons of production capacity across 58 automatic production lines utilizing German twin-screw extruding systems, automatic weighing systems and Taiwan conveyer systems. In addition, there are three additional workshops which are currently under construction in our third production base and expected to be completed in the second half of 2012 and which could support our production capacity expansion beyond 2012.

Highlights for the three months ended June 30, 2012 include:

- Revenue was \$144.7 million, an increase of 64.0% from \$88.2 million in the second quarter of 2011
- Gross profit was \$35.3 million, an increase of 60.0% from \$22.0 million in the second quarter of 2011
- Gross profit margin was 24.4%, compared to 25.0% in the second quarter of 2011
- Net income was \$22.8 million, compared to \$14.4 million in the second quarter of 2011
- Total volume shipped was 53,866 metric tons, up 48.1% from 36,367 metric tons in the second quarter of 2011

### Revenues

Revenues were US\$144.7 million in the second quarter ended June 30, 2012, an increase of US\$56.5 million, or 64.0%, compared to US\$88.2 million in the same period of last year, due to approximately 48.1% increase in sales volume and 11.5% increase in the average selling price of our products on a constant dollar basis. The increase of sales volume was driven by the strong demand of modified plastics in the PRC market and higher penetration of our business in our existing markets supported by our newly installed twenty production lines in December 2011, as well as the marketing efforts to develop new customers. Such increase in demand was driven by increasing demand for middle and high-end automobiles by Chinese consumers, continuing substitution of imported modified plastics by domestic suppliers, as well as the increase of plastic content on the per-vehicle-basis in China. The increase of average selling price was due to the shift of product mix towards higher-end products as well as higher raw material prices that we have been able to effectively pass through to our customers.

The following table summarizes the breakdown of metric tons (MT) by product mix:

(in MTs, except percentage)	Sales Volume					
	For the Three Months Ended June 30,					
	2012		2011		Change in MT	Change in %

Total sales volume	53,866	100 %	36,367	100 %	17,499	48.1 %

The Company has shifted product mix from traditional Modified Polypropylene (PP) to higher-end products such as Environmental Friendly Plastics, Engineering Plastics, Polyamide (PA) and Alloy Plastics, primarily due to (i) the increasing demand of advanced modified plastics in luxury automobile models in China, (ii) the stronger demand promoted by Chinese government for clean energy vehicles and (iii) stronger sales of higher-end cars made by automotive manufacturers from China and Germany, US and Japanese joint ventures, which tend to use more and higher-end modified plastics in quantity per vehicle in China.

## Gross Profit and Gross Margin

(in millions, except percentage)	Three Months Ended June 30,		Change	
	2012	2011	Amount	%
Gross Profit	\$ 35.3	\$ 22.0	\$ 13.3	60.0%
Gross Margin	24.4%	25.0%		(0.6)%

Gross profit was US\$35.3 million in the second quarter ended June 30, 2012 compared to US\$22.0 million in the same period of 2011, representing an increase of 60.0%. Our gross margin decreased to 24.4% in the second quarter ended June 30, 2012 from 25.0% during the same quarter of 2011. The decrease was mainly attributed to increase of the price of raw materials, increase of depreciation, and increase of production related payroll expenses this year, partially offset by our efforts in developing and selling more higher value-added automotive modified plastics towards high-end products as a percentage of total sales in the second quarter ended June 30, 2012.

## General and Administrative Expenses

(in millions, except percentage)	Three Months Ended June 30,		Change	
	2012	2011	Amount	%
General and Administrative Expenses	\$ 3.0	\$ 1.7	\$ 1.3	77.8%
as a percentage of revenues	2.1%	1.9%		0.2%

General and administrative (G&A) expenses were US\$3.0 million in the second quarter ended June 30, 2012 compared to US\$1.7 million in the same period in 2011, representing an increase of 77.8%, or US\$1.3 million. This increase is primarily due to increase of payroll resulting from raised average salary and increased headcount in the three-month period ended June 30, 2012. On a percentage basis, G&A expenses in the second quarter of 2012 increased to 2.1% of revenues from 1.9% in the same period of 2011.

## Research and Development Expenses

(in millions, except percentage)	Three Months Ended June 30,		Change	
	2012	2011	Amount	%
Research and Development Expenses	\$ 4.6	\$ 3.0	\$ 1.6	51.5%
as a percentage of revenues	3.2%	3.5%		(0.3)%

Research and development (“R&D”) expenses were US\$4.6 million during the quarter ended June 30, 2012 compared with US\$3.0 million during the same period in 2011, an increase of US\$1.6 million, or 51.5%, reflecting increased research and development activities on new products in order to obtain product certifications for automotive applications from automobile manufacturers as well as other non-automotive applications.

As of June 30, 2012, the number of ongoing research and development projects is 113. We expect to complete and realize economic benefits on approximately 30% of the projects in the near term. The remaining projects are expected to be carried out for a longer period. The majority of the projects are in the field of modified plastics in automotive applications and the rest are in advanced fields such as ships, airplanes, high-speed rail, medical devices, etc.

## Operating Income

Total operating income was US\$27.6 million in the quarter ended June 30, 2012 compared to US\$17.1 million in the same period of 2011, representing an increase of 61.8% or US\$10.5 million. This increase is primarily due to higher gross profit, partially offset by higher G&A and R&D expenses.

as a percentage of revenues	0.3%	(0.5)%		0.8%	

Net interest income was US\$0.5 million in the quarter ended June 30, 2012, compared to net interest expenses of US\$0.5 million in the same period of 2011, primarily due to US\$1.4 million interest income generated from time deposits in the second quarter of 2012.

## Change in Fair Value of Warrants Liabilities

Change in fair value of warrants liabilities was a gain of US\$1.5 million in the quarter ended June 30, 2012, compared to a gain of US\$2.2 million in the same period of 2011, primarily due to the change of fair value of warrants driven by the fluctuation of our stock price in respective periods. On a percentage basis, change in fair value of warrants liabilities in the second quarter of 2012 decreased to 1.0% of revenues from 2.5% in the second quarter of 2011.

Income Tax Expense	(6.8)	(4.5)	(2.3)	53.2%	
Effective income tax rate	23.2%	23.8%		(0.6)%	

The effective income tax rates for the three-month periods ended June 30, 2012 and 2011 were 23.2% and 23.8%, respectively. The effective income tax rate for the three-month period ended June 30, 2012 differs from the PRC statutory income tax rate of 25% primarily due to the additional 50% deduction against taxable income for certain research and development expenses incurred by our research centers.

Our PRC subsidiaries have US\$161.0 million of cash and cash equivalents and restricted cash as of June 30, 2012, which is planned to be permanently reinvested in the PRC. The distributions from our PRC subsidiaries are subject to the U.S. federal income tax at 34%, less any applicable foreign tax credits. Due to our policy of indefinitely reinvesting our earnings in our PRC business, we have not provided for deferred income tax liabilities on undistributed earnings of our PRC subsidiaries.

## Net Income

As a result of the above factors, we had a net income of US\$22.8 million in the second quarter of 2012, compared to net income of US\$14.4 million in the same quarter of 2011.

Edgar Filing: China XD Plastics Co Ltd - Form 10-Q

Six Months Ended June 30, 2012 compared to six months ended June 30, 2011

Revenues

Revenues were US\$267.8 million for the six months ended June 30, 2012, an increase of US\$103.5 million, or 63.0%, compared to US\$164.3 million in the same period of last year, due to approximately 40.6% increase in sales volume and 15.1% increase in the average selling price of our products on a constant dollar basis. The increase of sales volume was driven by the strong demand of modified plastics in the PRC market and higher penetration of our business in our existing markets supported by our newly installed twenty production lines in December 2011, as well as the marketing efforts to develop new customers. Such increase in demand was driven by increasing demand for middle and high-end automobiles by Chinese consumers, continuing substitution of imported modified plastics by domestic suppliers, as well as the increase of plastic content on the per-vehicle-basis in China. The increase of average selling price was due to the shift of product mix towards higher-end products as well as higher raw material prices that we have been able to effectively pass through to our customers.

The Company has shifted product mix from traditional Modified Polypropylene (PP) to higher-end products such as Environmental Friendly Plastics, Engineering Plastics, Polyamide (PA) and Alloy Plastics, primarily due to (i) the increasing demand of advanced modified plastics in luxury automobile models in China, (ii) the stronger demand promoted by Chinese government for clean energy vehicles and (iii) stronger sales of higher-end cars made by automotive manufacturers from China and Germany, US and Japanese joint ventures, which tend to use more and higher-end modified plastics in quantity per vehicle in China.

#### Gross Profit and Gross Margin

(in millions, except percentage)	Six Months Ended		Change	
	2012	2011	Amount	%
Gross Profit	\$ 66.5	\$ 40.6	\$ 25.9	64.0%
Gross Margin	24.8%	24.7%		0.1%

Gross profit was US\$66.5 million for the six months ended June 30, 2012 compared to US\$40.6 million in the same period of 2011, representing an increase of 64.0%. Our gross margin increased to 24.8% during the six months ended June 30, 2012 from 24.7% during the period of 2011. The increase was mainly attributed to the higher proportion of sales of our high-end products as a percentage of total sales in the six months ended June 30, 2012 as a result of our efforts in developing and selling more higher value-added automotive modified plastics.

#### General and Administrative Expenses

(in millions, except percentage)	Six Months Ended		Change	
	2012	2011	Amount	%
General and Administrative Expenses	\$ 5.4	\$ 3.1	\$ 2.3	70.9%
as a percentage of revenues	2.0%	1.9%		0.1%

General and administrative (G&A) expenses were US\$5.4 million for the six months ended June 30, 2012 compared to US\$3.1 million in the same period in 2011, representing an increase of 70.9%, or US\$2.3 million. This increase is primarily due to increase of payroll resulting from raised average salary and increased headcount. On a percentage basis, G&A expenses for the six months ended June 30, 2012 increased to 2.0% of revenues from 1.9% in the same period of 2011.

#### Research and Development Expenses

(in millions, except percentage)	Six Months Ended		Change	
	2012	2011	Amount	%
Research and Development Expenses	\$ 7.1	\$ 5.3	\$ 1.8	32.6%
as a percentage of revenues	2.6%	3.2%		(0.6)%

Research and development (“R&D”) expenses were US\$ 7.1 million for the six months ended June 30, 2012 compared with US\$5.3 million during the same period in 2011, an increase of US\$ 1.8 million, or 32.6%, reflecting increased R&D activities on new products in order to obtain product certifications for automotive applications from automobile manufacturers as well as other non-automotive applications.

As of June 30, 2012, the number of ongoing research and development projects is 113. We expect to complete and to realize economic benefits on approximately 30% of the projects in the near term. The remaining projects are expected

to be carried out for a longer period. The majority of the projects are in the field of modified plastics in automotive applications and the rest are in advanced fields such as ships, airplanes, high-speed rail, medical devices, etc.

#### Operating Income

Total operating income was US\$53.9 million for the six months ended June 30, 2012 compared to US\$31.7 million in the same period of 2011, representing an increase of 70.3% or US\$22.2 million. This increase is primarily due to higher gross profit, partially offset by higher G&A and R&D expenses.

## Other Income (Expense)

## Interest Income (Expenses)

(in millions, except percentage)	Six Months Ended June 30,		Change	
	2012	2011	Amount	%
Interest Income	\$ 2.4	\$ -	\$ 2.4	N/A
Interest Expenses	(1.4)	(0.8)	(0.6)	69.9%
Net Interest Income (Expenses)	\$ 1.0	\$ (0.8)	\$ 1.8	(228.4)%
as a percentage of revenues	0.4%	(0.5)%		0.9%

Net interest income was US\$1.0 million for the six months ended June 30, 2012, compared to net interest expenses of US\$0.8 million in the same period of 2011, primarily due to US\$2.4 million interest income generated from time deposits for the six months ended June 30, 2012.

## Change in Fair Value of Warrants Liabilities

(in millions, except percentage)	Six Months Ended June 30,		Change	
	2012	2011	Amount	%
Change in Fair Value of Warrants Liabilities	\$ 1.9	\$ 2.7	\$ (0.8)	(31.0)%
as a percentage of revenues	0.7%	1.6%		(0.9)%

Change in fair value of warrants liabilities was a gain of US\$1.9 million for the six months ended June 30, 2012, compared to a gain of US\$2.7 million in the same period of 2011, primarily due to the change of fair value of warrants driven by the fluctuation of our stock price in respective periods. On a percentage basis, change in fair value of warrants liabilities for the six months ended June 30, 2012 decreased to 0.7% of revenues from 1.6% in the same period of 2011.

## Income Taxes

(in millions, except percentage)	Six Months Ended June 30,		Change	
	2012	2011	Amount	%
Income before Income Taxes	\$ 56.8	\$ 33.7	\$ 23.1	68.7%
Income Tax Expense	(13.5)	(7.4)	(6.1)	82.4%
Effective income tax rate	23.7%	21.9%		1.8%

The increase of the effective income tax rates in the six-month period ended June 30, 2012 when compared to the same period in 2011 is primarily due to an internal reorganization, in which Harbin Xinda Macromolecule Material Co., Ltd. ("Harbin Xinda") was merged into an entity established in December 2011, Heilongjiang Xinda Enterprise Group Co., Ltd., which was subject to an income tax rate of 25% pre-merger. Harbin Xinda was an Advanced and New Technology Enterprise and was entitled to a preferential income tax rate of 15% in 2011. The post-merger entity is subject to an income tax rate of 25%.

## Net Income

As a result of the above factors, we had a net income of US\$43.3 million for the six months ended June 30, 2012 compared to net income of US\$26.3 million in the same period of 2011.

Selected Balance Sheet Data at June 30, 2012 and December 31, 2011:

Income tax payable	7.7	5.8	1.9	31.7%
Stockholders' equity	215.5	173.9	41.6	23.9%

Our financial condition continues to improve as measured by an increase of 23.9% in stockholders' equity as of June 30, 2012 compared to December 31, 2011. Inventories increased by 29.6% which is in line with the increase in the sales demand.

## LIQUIDITY AND CAPITAL RESOURCES

Historically, our primary uses of cash have been to finance working capital needs and capital expenditures for new production capacity. We have financed these requirements primarily from cash generated from operations, short-term bank borrowings, and the issuance of our convertible preferred stocks and other equity financings. As of June 30, 2012 and December 31, 2011, we had US\$ 142.2 million and US\$135.5 million, respectively, in cash and cash equivalents, which were primarily deposited with banks in China (including Hong Kong). As of June 30, 2012, we had US\$47.2 million outstanding short-term bank loans, including US\$15.7 million unsecured loans under the line of credit, US\$7.9 million loans secured by time deposits, and US\$23.6 million loans secured by accounts receivable. These loans bear a weighted average interest rate of 6.5% per annum and have terms of no longer than one year and do not contain any renewal terms. We have historically been able to make repayments when due. In addition, we obtained a line of credit for RMB120 million (approximately US\$18.9 million) with Bank of China under a financing agreement dated on June 20, 2012. As of June 30, 2012 the unused line of credit amounted to RMB70 million (approximately US\$11.0 million).

We expect that we will be able to meet our needs to fund operations, capital expenditures and other commitments in the next 12 months primarily with our cash and cash equivalents, operating cash flows and bank borrowings.

We may, however, require additional cash resources due to changes in business conditions or other future developments. If these sources are insufficient to satisfy our cash requirements, we may seek to sell additional equity or debt securities or obtain a credit facility. The sale of additional equity or equity-linked securities could result in additional dilution to stockholders. The incurrence of indebtedness would result in increased debt service obligations and could result in operating and financial covenants that would restrict operations. Financing may not be available in amounts or on terms acceptable to us, or at all.

The following table sets forth a summary of our cash flows for the periods indicated.

(in millions US\$)	Six Months Ended	
	June 30,	
	2012	2011
Net cash provided by operating activities	29.4	32.0
Net cash used in investing activities	(37.5)	(17.6)
Net cash provided by financing activities	16.1	9.1
Effect of foreign currency exchange rate changes on cash and cash equivalents	(1.3)	0.7
Net increase in cash and cash equivalents	6.7	24.2
Cash and cash equivalents at the beginning of period	135.5	22.7
Cash and cash equivalents at the end of period	142.2	46.9

### Operating Activities

Net cash provided by operating activities decreased to US\$29.4 million for the six months ended June 30, 2012 from US\$32.0 million in the same period of last year, primarily due to (i) increase of approximately US\$70 million in cash operating expenditures, including raw material purchases, rental and personnel costs, and (ii) the increase of approximately US\$10 million income tax payment in the six months ended June 30, 2012, which were partially offset by the increase of approximately US\$78 million in cash collected from our customers in the six months ended June 30, 2012 resulting from increasing sales during the period.

### Investing Activities

Net cash used in the investing activities was US\$37.5 million for the six months ended June 30, 2012 as compared to US\$17.6 million for the same period of last year, mainly due to the increase of US\$19.9 million purchase and deposits for property, plant and equipment and land use rights in order to expand the production capacity.

### Financing Activities

Net cash provided by the financing activities was US\$16.1 million for the six months ended June 30, 2012, as compared to US\$9.1 million for the same period of last year. We had US\$70.4 million new borrowings of short-term bank loans from local banks, which was offset by US\$54.3 million repayment of bank borrowings for the six months period ended June 30, 2012.

As of June 30, 2012, our cash balance was US\$142.2 million, compared to US\$ 135.5 million at December 31, 2011.

Days Sales Outstanding (DSO) has decreased from 34 days for the six months ended June 30, 2011 to 32 days for the six months ended June 30, 2012 as a result of continuous efforts on collection of accounts receivable. The average DSO for the automotive modified plastic industry is generally 90 days based on our industry experience.

Industry Standard Customer and Supplier Payment Terms (days) as below:

	Six months ended June 30, 2012	Year ended December 31, 2011
Customer Payment Term	Payment in advance/up to 90 days	Payment in advance/up to 90 days
Supplier Payment Term	Payment in advance/up to 30 days	Payment in advance/up to 30 days

Inventory turnover days increased from 32 days for the six months ended June 30, 2011 to 46 days for the six months ended June 30, 2012, due to inventory buildup in anticipation of increasing demand from our customers in the following quarters.

The Company is required to pay deposits to the suppliers for the principal raw materials ordered. The Company's decision to make advanced orders of raw materials is mainly based upon (1) the demand and supply situation in the raw materials market, and (2) the forecasted demand of products. All of the raw materials relating to advances to suppliers as of June 30, 2012 have been subsequently received by the Company in July 2012.

Based on past performance and current expectations, we believe our cash, cash equivalents and cash generated from operating activities and bank borrowings will satisfy our working capital needs, capital expenditures and other liquidity requirements associated with our operations for at least the next 12 months.

The majority of the Company's revenues and expenses were denominated primarily in Renminbi ("RMB"), the currency of the People's Republic of China. There is no assurance that exchange rates between the RMB and the U.S. Dollar will remain stable. The Company does not engage in currency hedging. Inflation has not had a material impact on the Company's business.

## Legal Proceedings

None.

## Off-Balance Sheet Arrangements

We have not engaged in any off-balance sheet transactions.

## Item 3. Quantitative and Qualitative Disclosures about Market Risks

## Interest Rate Risk

We are exposed to interest rate risk primarily with respect to our short-term bank loans. Although the interest rates, which are based on the banks' prime rates with respect to our short-term loans are fixed for the terms of the loans, increase in interest rates will increase the cost of new borrowings and our interest expense.

A hypothetical 1.0% increase in the annual interest rates for all of our credit facilities under which we had outstanding borrowings as of June 30, 2012 would decrease income before income taxes by approximately US\$0.24 million for the six months ended June 30, 2012. Management monitors the banks' prime rates in conjunction with our cash requirements to determine the appropriate level of debt balances relative to other sources of funds. We have not entered into any hedging transactions in an effort to reduce our exposure to interest rate risk.

## Foreign Currency Exchange Rates

Substantially all of our revenues and expenses are denominated in RMB. We face foreign currency rate translation risks when our results are translated to U.S. dollars.

The RMB was relatively stable against the U.S. dollar at approximately 8.28 RMB to the \$1.00 U.S. dollar until July 21, 2005 when the Chinese currency regime was altered resulting in a 2.1% revaluation versus the U.S. dollar. From July 21, 2005 to June 30, 2010, the RMB exchange rate was no longer linked to the U.S. dollar but rather to a basket of currencies with a 0.3% margin of fluctuation resulting in further appreciation of the RMB against the U.S. dollar. Since June 30, 2009, the exchange rate had remained stable at 6.8307 RMB to 1.00 U.S. dollar until June 30, 2010 when the Chinese Central Bank allowed a further appreciation of the RMB by 0.43% to 6.7980 RMB to 1.00 U.S. dollar. On June 30, 2012, the RMB traded at 6.3530 RMB to 1.00 U.S. dollar.

There remains international pressure on the Chinese government to adopt an even more flexible currency policy and the exchange rate of RMB is subject to changes in China's government policies which are, to a large extent, dependent on the economic and political development both internationally and locally and the demand and supply of RMB in the domestic market. There can be no assurance that such exchange rate will continue to remain stable in the future amongst the volatility of currencies, globalization and the unstable economies in recent years. Since (i) our revenues and net income of our PRC operating entities are denominated in RMB, and (ii) the payment of dividends, if any, will be in U.S. dollars, any decrease in the value of RMB against U.S. dollars would adversely affect the value of the shares and dividends payable to stockholders, in U.S. dollars.

Item 4. Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures

The Company's management has evaluated, under the supervision and with the participation of the Company's Chief Executive Officer and Chief Financial Officer, the effectiveness of the design and operations of the Company's disclosure controls and procedures (as defined in Securities Exchange Act Rule 13a-15(e)), as of the end of the period covered by this report. Based on that evaluation, the Company's Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures were not effective because of weaknesses in our internal control over financial reporting as disclosed in our Annual Report on Form 10-K for the fiscal year ended December 31, 2011.

Notwithstanding management's assessment that our internal control over financial reporting was ineffective as of June 30, 2012 due to a material weakness and a significant deficiency as identified in our Annual Report on Form 10-K for the fiscal year ended December 31, 2011, we believe that our unaudited consolidated financial statements included in this Quarterly Report present fairly our financial position, results of operations and cash flows for the fiscal quarter ended June 30, 2012 in all material respects.

(b) Changes in internal controls.

There was no change in our internal control over financial reporting that occurred during the fiscal quarter ended June 30, 2012 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.
