Notes to Investment Portfolio:

* Security Valuation:

Debt securities generally are valued by pricing services approved by the Fund's Board of Trustees, based upon market transactions for normal, institutional-size trading units of similar securities. The services may use various pricing techniques which take into account appropriate factors such as yield, quality, coupon rate, maturity, type of issue, trading characteristics and other data, as well as broker quotes. Debt securities for which quotations are readily available are valued at an over-the-counter or exchange bid quotation. Certain debt securities, which tend to be more thinly traded and of lesser quality, are priced based on fundamental analysis of the financial condition of the issuer and the estimated value of any collateral. Valuations developed through pricing techniques may vary from the actual amounts realized upon sale of the securities, and the potential variation may be greater for those securities valued using fundamental analysis.

Short-term debt obligations maturing within 60 days are valued at amortized cost, which approximates market value.

Futures contracts are valued at the settlement price established each day by the board of trade or exchange on which they are traded.

Restricted securities and investments for which market quotations are not readily available, or quotations which management believes are not appropriate, are valued at fair value as determined in good faith under consistently applied procedures established by and under the general supervision of the Board of Trustees.

- (a) Denotes a restricted security, which is subject to restrictions on resale under federal securities laws. At February 28, 2005, the value of this security represents 0.7% of net assets.

- (b) Security purchased on a delayed delivery basis.
- (c) The Fund has been informed that each issuer has placed direct obligations of the U.S. Government in an irrevocable trust, solely for the payment of principal and interest.
- (d) Zero coupon bond.
- (e) A portion of the security with a market value of \$2,041,903 is pledged as collateral for open futures contracts.
- (f) Variable rate demand note. This security is payable upon demand and is secured by letters of credit or other credit support agreements from banks. The interest rate changes periodically and the interest rate shown reflects the rate as of February 28, 2005.
- (g) Cost for federal income tax purposes is \$60,462,542.
- (h) Unrealized appreciation and depreciation at February 28, 2005 based on cost of investments for federal income tax purposes was:
