Note: Korea refers to South Korea

ANZ's Asian strategy comprises two components

ANZ Network

Meeting core Corporate & Institutional banking requirements of

Customers in Aust & NZ into Asia

Asian customers into Aust. & NZ

Customers intra Asian trade

Strong focus on trade finance

Leveraging specialist Institutional skills in Asia

Corporate & Structured Finance

Project Finance

Retail Partnerships

Opportunities for ANZ to add value i.e. retail banking and risk management capabilities

Focus largely on markets where higher economic growth rates than Aust/NZ underbanked and immature

Seeking partners with good footprints in their markets

Three large growth opportunities exist in Asia

Growth Opportunity	Asia		
Structural Change	China as the manufacturing centre	Intensive infrastructure investment	Rapid growth in saving and spending

Our people agenda is the key to our success

Do we have our best talent in the roles where they will have the biggest impact?

Job Fit

Do we have enough talent to fund our growth initiatives?

Are our employees engaged?

Culture

Are leaders and team members communicating effectively both within and across businesses?

Leadership

Are our leaders engaged and inspiring employees with a growth mindset?

Talent

Does our culture engender innovation and collaboration to support our growth ambitions?

Performance

Are our people focused on the right measures of performance to drive growth?

So where does this take us?

Asia is a very attractive growth story

Asian network a key competitive advantage for ANZ

Maintain a clear leadership position amongst Australasian banks

Summary

Panin Bank's underlying profit growth is strong

The partnership continues to add value to ANZ with market value well in excess of book

2006 performance adversely impacted by increased interest rate environment

Success of Panin partnership underlies ANZ model

transformation of business mix to consumer/SME

significant investment in products, people and distribution

continuing improvement to risk management and other infrastructure/capabilities

Panin Bank is well placed for continued growth and future industry consolidation

Additional Information

[LOGO]

Panin has established itself as a leading player in the motor vehicle finance business

Strong Growth in Loans & Customers

[CHART]

41% increase in car loan outstandings in 2005.

Car sales slowed after reduction of fuel subsidy and increase in interest rates in 4Q05.

Sales strategy focused on leveraging strong dealer relationships

Panin now operating 23 car loan centres across 15 cities.

Car loan sales management operated through specialised business unit and specialists co-located with dealers

Credit decisions retained by local branches

>90% car loan sales sourced through car dealer relationships

Dealer Relationships

[LOGO]

Honda, Toyota and Nissan comprise >80% of sales in Panin target car market.

[LOGO]

Good momentum in home loans, despite increased competition

Solid Home Loan growth

[CHART]

57% growth in outstandings in 2005, excellent result in view of downturn following interest rate rises in Sept-05

Market growth has slowed, however beginning to show signs of recovery

Relationships built through network and external parties

56% of home loans sourced through connections with land developers and real estate brokers. Broker shares in up-front fee but no impact on NIM.

New connections being established on regular basis.

Major connections include

Brokers (>100 offices combined)

[LOGO]

Land Developers

[LOGO]

[LOGO]

SME growing strongly following increased focus key medium term growth engine

Exceptional Lending growth in 2005

[CHART]

122% growth in SME outstandings in 2005.

Only 21% of Indonesia's 40 million SMEs are serviced by formal banking sector strong opportunity for further growth.

Specialist focus on SME

Until 2005 had received little attention.

Jan 2005 dedicated SME lending director appointed. Total balances have grown 122% since specialist model introduced

Panin now operating 20 SMART centres across 8 cities, and growing.

SMART centres located in business hubs with 5+ specialist account officers.

Sales tactics include direct targeting of competitor customers and up-sell offers to existing Panin SME customers.

Loans are well secured

Panin Bank and the Indonesian Reksa/bond market

The Reksa Product is a mutual fund type investment typically invested in domestic government bonds. Customers were attracted to the investment because of its higher yield.

[CHART]

Panin Reksa outstandings peaked at IDR 9.7Tn early 2004.

As rates started to rise, Reksa customers surrendered their holdings.

Most banks, including Panin, held the redeemed bonds.

As at 31 Dec 05 Panin's Reksa outstandings were minimal.

ANZ's equity accounted profit is impacted by a number of variables

**Solid underlying NPAT growth
(ANZ equity accounted profits A\$m)**

[CHART]

Amount reported by ANZ as equity accounted profit impacted by:

ANZ records share of income from Panin on a 3 month lagged basis due to market sensitivity.

Exchange rate volatility

Withholding tax changes

Differences between statutory and management accounts eg tax

Differing accounting treatments eg Provisions raised when investment written down

Strong balance sheet growth, good growth in consumer lending

Assets

[CHART]

Liabilities

[CHART]

Collapse of mutual fund market in '05 saw bonds returned to banks.

IDR money market deposits required to fund bonds.

NIM squeezed as BI increased rates 5.3% in 6 weeks.

Inflation jumped from 8% to 18% in 6 months.

Indonesia's banking sector has recovered strongly

Strong capitalisation, liquidity, asset quality, all likely to improve further as economy strengthens

Under-penetrated banking sector:

Loans/GDP at 25% amongst lowest globally

Consumer Loans/GDP at ~10% amongst Asia's lowest

Asia's fastest loan growth +19.8% '04, +22.9% '05, 5 year CAGR +22%

Loan growth reflected in home and car finance, new investment, higher exports and new appetite for infrastructure projects (+US\$75b forecast to 2010)

Margins contracting but from relatively high levels

Very high (~35%) sector foreign ownership implies improved management practices underpinning aggressive growth

More consolidation amongst remaining 130+ banks likely to drive further productivity gains

Risks to growth include high competition, rising inflation, uncertain credit quality (vis-à-vis strong loans growth), security issues, etc.

International Partnership Strategy

How do we deliver the Strategy

Current Profile

-> **Challenges facing the business**

What does success look like

The development of equity partnerships with local banks in Asia focuses on mitigating five key investment risks

Key investment risks		Managing these risks
1	Transaction	Transaction experience Modest initial investments Due Diligence
2	Financial	Partner s agreement on upside (targets) Involvement in capital/financial decisions Ensuring ANZ value-add adds value
3	Business	Partner selection/agreement on strategy Secondments/involvement in management HQ resources actively support execution
4	Governance	Board seat, Board Committee membership Independent relationships with regulators Public listing/strong liquidity
5	Country Specific/Political	In-country experience Relationships with local government

and management of equity partnerships takes a longer term view on specific business risks

Key Business risks		Managing these risks
1	Management	Existing in-house expertise/mechanism ANZ approach to best practice governance Partner s agreement on Board seats, Board Committee
2	Credit Risk	ANZ appointments to key credit risk roles Training + development resources tailored to local conditions ANZ credit risk methodology adapted to local conditions
3	Operations	HQ actively resources support Secondments/involvement in management Training & development programs to identify and develop talent for partnership executive roles
4	Brand	Centralised risk control/management mechanism Proactive IP control 5 years + business strategic plan
5	Country Specific/Market	In-country experience

Our strategy is to build a portfolio of investments that is expected to have a reduced risk profile

We recognize that partnership investments have a different risk profile than our existing markets. And, our strategy reflects this

Across a range of investments, the overall risk profile of the portfolio can be managed down through diversification

ANZ Pacific is a good example of how individual investments can be combined to reduce overall volatility and create a portfolio with relatively lower risk
