**FIRST FINANCIAL FUND, INC.**

**Notes to Schedule of Investments**

**June 30, 2006 (Unaudited)**

**Note 1. Valuation and Investment Practices**

*Securities Valuation:* Securities for which market quotations are readily available, including securities listed on national securities exchanges and those traded over-the-counter, are valued at the last quoted sales price on the valuation date on which the security is traded. If such securities were not traded on the valuation date, but market quotations are readily available, they are valued at the most recently quoted bid price provided by an independent pricing service or by principal market makers. Securities traded on NASDAQ are valued at the NASDAQ Official Closing Price ( NOCP ). Where market quotations are not readily available or where the pricing agent or market maker does not provide a valuation or methodology, or provides a valuation or methodology that, in the judgment of the adviser, does not represent fair value ( Fair Value Securities ), securities are valued at fair value by a Pricing Committee appointed by the Board of Directors, in consultation with the adviser. In such circumstances, the adviser makes an initial written recommendation to the Pricing Committee regarding valuation methodology for each Fair Value Security. Thereafter, the adviser conducts periodic reviews of each Fair Value Security to consider whether the respective methodology and its application is appropriate and recommends methodology changes when appropriate. Prior to implementation, the Pricing Committee reviews and makes a determination regarding each initial methodology recommendation and any subsequent methodology changes. All methodology recommendations and any changes are reviewed by the entire Board of Directors on a quarterly basis.

Short-term securities which mature in more than 60 days are valued at current market quotations. Short-term securities which mature in 60 days or less are valued at amortized cost, which approximates fair value.

*Repurchase Agreements:* The Fund may enter into repurchase agreement transactions with United States financial institutions. It is the Fund's policy that its custodian take possession of the underlying collateral securities, the value of which exceeds the principal amount of the repurchase transaction, including accrued interest. To the extent that any repurchase transaction exceeds one business day, the value of the collateral is marked-to-market on a daily basis to maintain the adequacy of the collateral. The value of the collateral at the time of the execution must be at least equal to 102% of the total amount of the repurchase obligations, including interest. If the seller defaults, and the value of the collateral declines or if bankruptcy proceedings are commenced with respect to the seller of the security, realization of the collateral by the Fund may be delayed or limited.

*Foreign Currency:* The books and records of the Fund are maintained in US dollars. Foreign currencies, investments and other assets and liabilities denominated in foreign currencies are translated into US dollars at the exchange rate prevailing at the end of the period, and purchases and sales of investment securities, income and expenses transacted in foreign currencies are translated at the exchange rate on the dates of such transactions. Foreign currency gains and losses result from fluctuations in exchange rates between trade date and settlement date on securities transactions, foreign currency transactions and the difference between the amounts of interest and dividends recorded on the books of the Fund and the amounts actually received. The portion of foreign currency gains and losses related to fluctuation in the exchange rates between the initial purchase trade date and subsequent sale trade date is included in gains and losses on investment securities sold.

*Securities Transactions and Net Investment Income:* Securities transactions are recorded on the trade date. Realized gains or losses on sales of securities are calculated on the identified cost basis. Dividend income is recorded on the ex-dividend date, or for certain foreign securities, when the information becomes available

---

to the portfolios. Interest income including amortization of premium and accretion of discount on debt securities, as required, is recorded on the accrual basis, using the effective interest method.

The actual amounts of dividend income and return of capital received from investments in real estate trusts ( REITS ) and registered investment companies ( RICS ) at calendar year-end are determined after the end of the fiscal year. The Fund therefore estimates these amounts for accounting purposes until the actual characterization of REIT and RIC distributions is known. Distributions received in excess of the estimate are recorded as a reduction of the cost of investments.

**Note 2. Unrealized Appreciation/ (Depreciation)**

On June 30, 2006, based on cost of \$361,999,171 for federal income tax purposes aggregate gross unrealized appreciation for all securities in which there is an excess of value over tax cost was \$90,794,494 and aggregate gross unrealized depreciation for all securities in which there is an excess of tax cost over value was \$15,970,234.

**Note 3. Transactions With Affiliated Companies**

Transactions during the period with companies in which the Fund owned at least 5% of the voting securities were as follows:
