I am pleased with our performance for the 2007 Fiscal Year given the challenges we anticipated at the beginning of the year and duly experienced. And while we weren't immune from constrained capital expenditure in the Hard Drive Industry, our competitive differentiation and business fundamentals in both of our businesses remain strong," said Steve Barber, CEO of Xyratex. The results for the year support our strong position in the industries we serve and our ongoing effort and focus in expanding our partnerships with our existing customers and in developing partnerships with new customers. We are confident that the fundamentals within the markets we serve are positive and that our technology and strong execution will benefit us over the longer term.

### **Stock Repurchase Plan**

The Board of Directors has recently authorized a stock repurchase plan. According to the terms of the plan, the Company may repurchase up to \$30 million of its outstanding common stock following the cessation of the current black-out period on January 11, 2008. As of November 30, 2007, Xyratex had 29.9 million shares outstanding.

Stock repurchase transactions authorized under the plan will occur from time to time in the open market, through block trades or otherwise. Management and the Board of Directors will exercise discretion with respect to the timing and amount of any shares repurchased, based on their evaluation of a variety of factors, including current market conditions. Repurchases may be commenced or suspended at any time without prior notice. Additionally, Xyratex may initiate repurchases under a Rule 10b5-1 plan, which would permit shares to be repurchased when the Company would otherwise be precluded from doing so under insider-trading laws. The repurchase program will be funded using the Company's available cash resources, and it is intended that the repurchase program will be Rule 10b-18 compliant.

Non-GAAP earnings per share excludes non-cash equity compensation, amortization of intangible assets, certain other acquisition related charges and related taxation expense.
- These projections reflect continued capital spending constraints in the Hard Drive Industry.

(1) Non-GAAP net income and diluted earnings per share excludes (a) amortization of intangible assets, (b) equity compensation expense, (c) specified non-recurring or non-cash items, such as income from sale of a product line, the effect of a reduction in the income tax rate in the United Kingdom and the effect of changes in exchange rates on the income tax benefit, and (d) the related tax effects. Reconciliation of non-GAAP net income and diluted earnings per share to GAAP net income and GAAP diluted earnings per share is included in a table immediately following the condensed consolidated statements of cash flow below.

The intention in providing these non-GAAP measures is to provide supplemental information regarding the Company's operational performance whilst recognizing that they have material limitations and that they should only be referred to with reference to the corresponding GAAP

measure.

---

The Company believes that the provision of these non-GAAP financial measures is useful to investors and investment analysts because it enables comparison to the Company's historical operating results, those of competitors and other industry participants and also provides transparency to the measures used by management in operational and financial decision making. In relation to the specific items excluded: (a) intangible assets represent costs incurred by the acquired business prior to acquisition, are not cash costs and will not be replaced when the assets are fully amortized and therefore the exclusion of these costs provides management and investors with better visibility of the costs required to generate revenue over time; (b) equity compensation expense is non-cash in nature, is outside the control of management during the period in which the expense is incurred and in addition has not been measured consistently as a result of the implementation of FAS 123R; (c) the income from the sale of the product line is non-recurring and does not form part of the Company's core operations, the income tax expense resulting from the effect on the deferred tax asset of a reduction in the income tax rate in the United Kingdom is non-recurring and the beneficial effect of changes in exchange rates on deferred tax balances is non-cash and is not comparable across periods or with other companies; (d) the exclusion of the related tax effects of excluding items (a) to (c) is necessary to show the effect on net income of the change in tax expense that would have been recorded if these items had not been incurred.
