NOTES TO FINANCIAL STATEMENTS

(UNAUDITED)

NOTE 1 -BUSINESS ACTIVITY AND SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The unaudited financial statements included herein have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission for interim reporting. Accordingly, they do not include all the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation have been included. Operating results for the nine month period ended October 31, 2007 are not necessarily indicative of the results that may be expected for the year ended January 31, 2008. The information contained in the balance sheet as of January 31, 2007 was derived from the Company's audited financial statements for the year then ended.

Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

Nature of Business

Titan Machinery Inc. is engaged in the retail sale, service and rental of agricultural and industrial machinery through stores in North Dakota, South Dakota, Minnesota, and Iowa.

Redeemable Securities

The Company does not have sole control over the redemption features of our Convertible Preferred stock and therefore classifies all such stock as Redeemable Securities, which is excluded from Stockholders' Equity. The Company determined the redemption of these instruments to be probable based upon the Company's decision to file a registration statement and initiate a public offering. Accordingly, the Company accrued all accumulated dividends on Preferred stock as an increase to Redeemable Securities.

Lease Accounting

The Company periodically purchases equipment from its primary supplier which is subsequently sold to and leased back from a financing group. The Company records the sale of the equipment at the time units are sold to the financing group. Under the sale leaseback program, the lease period is four months or less and lease expense is recognized over the leasing period. The Company recognizes the entire sales transaction and gross profit on these units at the time of sale to the financing group due to the short leaseback period.

Recently Issued Accounting Pronouncements

In June 2006, the FASB issued Financial Interpretation No. 48, Accounting for Uncertainty in Income Taxes – an interpretation of FASB Statement No. 109 (FIN 48). This Interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. It also provides guidance on recognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. For the Company, the Statement is effective for fiscal years beginning after December 15, 2006. The Company adopted FIN 48 as of February 1, 2007. The adoption of FIN 48 had no impact on the Company's financial position, results of operations, or cash flows.

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements (SFAS 157). This standard defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. This standard applies under other accounting pronouncements that require or permit fair value measurements, but does not require any new fair value measurements. SFAS No. 157 is effective for the fiscal year beginning after November 15, 2007. The Company is in the process of evaluating the effect that the adoption of this standard will have on the Company's financial statements.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities (SFAS 159). SFAS 159 provides companies with an option to report selected financial assets and liabilities at fair value and establishes presentation and disclosure requirements designed to facilitate comparisons between companies that choose different measurement attributes for similar types of assets and liabilities. SFAS 159 is effective for fiscal years beginning after November 15, 2007. The Company is in the process of evaluating the effect that the adoption of this standard will have on the Company's financial statements.

In December 2007, the FASB issued SFAS No. 141 (Revised 2007), Business Combinations (SFAS 141R). SFAS 141 (Revised) provides additional guidance on improving the relevance, representational faithfulness, and comparability of the financial information that a reporting entity provides in its financial reports about a business combination and its effects. SFAS 141 (Revised) applies prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. The Company is in the process of evaluating the effect that the adoption of this standard will have on the Company's financial statements.

In December 2007, the FASB issued SFAS No. 160, Noncontrolling Interests in Consolidated Financial Statements. SFAS 160 applies to all entities that prepare consolidated financial statements and have an outstanding noncontrolling interest in one or more subsidiaries. SFAS 160 amends ARB No. 51 to establish accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. SFAS 160 is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008. The Company is in the process of evaluating the effect that the adoption of this standard will have on the Company's financial statements.

Earnings Per Share

Basic earnings per share were computed by dividing income available to common shareholders by the weighted average number of shares of common stock outstanding during the three and nine month periods. Accumulated preferred dividends, which were unpaid as of October 31, 2007, were subtracted from net income to arrive at income available to common shareholders.

Edgar Filing: Titan Machinery Inc. - Form 10-Q

Diluted earnings per share were computed by dividing income available to common shareholders plus assumed conversions by the weighted-average common shares outstanding after adjusting for potential dilution related to the conversion of all dilutive securities into common stock. All potentially dilutive securities were included in the computation of diluted earnings per share in the current period ending October 31, 2007.

Stock Options

The Company implemented the 2005 Equity Incentive Plan, a stock-based compensation plan, during the year ended January 31, 2006. In November 2007, the plan was amended to increase the number of shares available under the plan from 500,000 to 1,000,000 shares. The purpose of the plan is to provide incentive compensation to participants for services that have been or will be performed for continuing as employees or Board of Director members of the Company. Under the plan, the Company may grant options for up to 1,000,000 shares of common stock under all forms of awards including restricted stock. The Company has elected early adoption of SFAS 123(R) to account for the stock options using the fair value method.

The following is a summary of stock option activity for the nine months ended October 31, 2007:

	Number of Options	Weighted Average Exercise Price	Aggregate Intrinsic Value
Outstanding at January 31, 2007	114,917	\$ 3.93	\$ 204,700
Granted	93,335	7.07	302,200
Exercised			
Forfeited			
Outstanding at October 31, 2007	208,252	\$ 5.34	\$ 506,900
Options exercisable at October 31, 2007	49,086	\$ 4.41	\$ 89,671

The fair value of each option granted is estimated using the Black-Scholes option pricing model. The following assumptions were made in estimating fair value:

Assumption	Fixed Plan
Dividend Yield	0%
Risk-free interest rate	4.0 to 4.9%
Expected life	6 - 10 years
Expected volatility	14 - 22%

Expected volatility is based upon management's best estimate of the value of the shares based upon the Company's internal market. The expected life assumptions for options currently granted is based upon the average expected term of service by directors and contractual term of the agreements for employees.

The following is a summary of the status of options outstanding and exercisable at October 31, 2007 under the fixed share-based payment plan:

Outstanding Options			Exercisable Options		
Exercise Price	Number	Weighted Average Remaining Contractual Life	Exercise Price	Number	Weighted Average Exercise Price
\$ 4.00	9,250	9 years	\$ 4.00	9,250	\$ 4.00
4.50	119,002	10 years	4.50	39,836	4.50
7.50	80,000	10 years	7.50		7.50

That cost is expected to be recognized over a weighted-average period of 6 years. Outstanding shares of restricted stock under the plan totaled 10,906 at October 31, 2007.

NOTE 9 - FAIR VALUE OF FINANCIAL INSTRUMENTS

The fair value of a financial instrument is generally defined as the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced liquidation sale. Quoted market prices are generally not available for the Company's financial instruments. Accordingly, fair values are based on judgments regarding anticipated cash flows, future expected loss experience, current economic conditions, risk characteristics of various financial instruments and other factors. These estimates involve uncertainties and matters of judgment, and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates. As explained in Note 1, actual results could differ from the estimates.

The carrying amount of cash, receivables, payables, short-term debt and other current liabilities approximates fair value because of the short maturity and/or frequent repricing of those instruments. Based upon current borrowing rates with similar maturities, the fair value of the long-term debt approximates the carrying value as of October 31, 2007 and January 31, 2007.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with our interim consolidated financial statements and related notes included in Item 1 of Part 1 of this Quarterly Report, and the audited consolidated financial statements and notes thereto and Management's Discussion and Analysis of Financial Condition and Results of Operations contained in our Registration Statement on Form S-1, as amended, filed in connection with our initial public offering.

Critical Accounting Policies

Our most critical accounting policies, which are those that require significant judgment, include: revenue recognition, inventories, intangible assets and goodwill. A more in-depth description of these can be found in the Management's Discussion and Analysis of Financial Condition and Results of Operation and Note 1 of the audited financial statements contained in our Registration Statement on Form S-1, as amended, filed in connection with our initial public offering.

Overview

We own and operate one of the largest networks of full service agricultural and construction equipment stores in North America. We are the world's largest retail dealer of Case IH Agriculture equipment and a major retail dealer of New Holland Agriculture, Case Construction and New Holland Construction equipment in the U.S. We sell and rent agricultural and construction equipment, sell parts, and service the equipment operating in the areas surrounding our stores.

Our net income was \$2.7 million or \$0.36 per diluted share in the quarter ended October 31, 2007, compared to \$0.8 million or \$0.13 per diluted share in the quarter ended October 31, 2006. Significant factors impacting the quarter were:

- Strong revenue growth due to acquisitions, same-store sales and a successful manufacturer leasing program;
- Increase in gross profits due to increased revenues; gross profit margin percent decrease due to higher sales mix of equipment relative to higher gross margin parts and service revenue; and
- Operating expenses were lower as a percentage of sales and increased in total dollars.

Results of Operations

Comparative financial data for each of our four sources of revenue are expressed below. The results for these periods include the operating results of the acquisitions made during these periods. The period-to-period comparisons included below are not necessarily indicative of future results (dollars in thousands):

Other, including trucking and rental	\$ 2,518	\$ 2,247	\$ 271	12.1%

The increase in revenue for the three months ended October 31, 2007 was due to the following three items impacting the current quarter results and not the prior year: acquisitions contributing to current period revenue, sales associated with a special manufacturer leasing program, and same-store sales growth. Acquisitions contributed \$18.1 million in total revenue or 34.2% of the increase while the lease sales totaled \$16.0 million, or 30.0% of the increase. The remaining increase of \$18.9 million is attributable to same-store sales growth of 24.0%, which is reflective of the strong market for our products and our growing market share.

The increase in cost of revenue for the three months ended October 31, 2007 was primarily due to the increased revenue. Acquisitions contributed \$14.9 million to the cost of revenue for the three months ending October 31, 2007, while the leasing program added another \$14.4 million, which was 36.8% and 35.6%, respectively, of the total increase in cost of revenue. The remainder of the increase is reflective of the increase in same-store sales. As a percentage of revenue, cost of revenue was 84.6% for the third quarter of fiscal 2008, compared to 83.3% for the third quarter of fiscal 2007. This percentage of revenue increase was attributable to growth in lower margin equipment revenue relative to parts and services revenue.

Same-store gross profits provided the remainder of the gross profit improvement during the third quarter of fiscal 2008 primarily due to the increase in same-store sales. Gross profit margins were 15.4% for the third quarter of fiscal 2008, compared to 16.7% for the third quarter of fiscal 2007. This percentage decrease was attributable to growth in lower margin equipment revenue relative to parts and services revenue.

As a percentage of total revenue, operating expenses decreased to 10.9% for the third quarter of fiscal 2008 from 13.2% for the third quarter of fiscal 2007. Sources of Liquidity

Edgar Filing: Titan Machinery Inc. - Form 10-Q

Our primary sources of liquidity are cash flow from operations, proceeds from our public offering, proceeds from the issuance of debt and our borrowings under the Bremer, CNH Capital, and GE credit facilities. We expect that ongoing requirements for debt service and capital expenditures will be funded from these sources.

Adequacy of Capital Resources

Edgar Filing: Titan Machinery Inc. - Form 10-Q

Our primary uses of cash have been to fund our strategic acquisitions, finance the purchase of inventory, meet debt service requirements and fund operating activities, working capital, payments due under building space operating leases and manufacturer floor plan payable.

Based on our current operational performance, we believe our cash flow from operations, the proceeds from our public offering, available cash and available borrowings under the existing credit facilities will adequately provide our liquidity needs for, at a minimum, the next 12 months.

Certain Information Concerning Off-Balance Sheet Arrangements

Edgar Filing: Titan Machinery Inc. - Form 10-Q

We do not have any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. We are, therefore, not exposed to any financing, liquidity, market or credit risk that could arise if we had engaged in these relationships. In the normal course of our business activities, we lease rental equipment under operating leases.

Information Regarding Forward-Looking Statements

Edgar Filing: Titan Machinery Inc. - Form 10-Q

The Private Securities Litigation Reform Act of 1995 provides a safe harbor for forward-looking statements. Such forward-looking information is included in this Form 10-Q, including the MD&A section, as well as in our Registration Statement on Form S-1, as amended, that was filed with the Securities and Exchange Commission, and in other materials filed or to be filed by the Company with the Securities and Exchange Commission (as well as information included in oral statements or other written statements made or to be made by the Company).

Forward-looking statements include all statements based on future expectations and specifically include, among other things, all statements relating to our beliefs that our market share is growing and our expectations and beliefs with respect to the uses and adequacy of our capital resources. Any statements that are not based upon historical facts, including the outcome of events that have not yet occurred and our expectations for future performance, are forward-looking statements. The words potential, believe, estimate, expect, intend, may, could, plan, anticipate, and similar words and expressions are intended to identify forward-looking statements. Such statements are based upon the current beliefs and expectations of our management. Such forward-looking information involves important risks and uncertainties that could significantly affect anticipated results in the future and, accordingly, such results may differ from those expressed in any forward-looking statements made by or on behalf of the Company. These risks and uncertainties include our ability to successfully implement our acquisition strategy and successfully integrate newly-acquired dealerships, the accuracy of management's estimates and beliefs regarding the strength of the agriculture and construction industries within our geographic footprint, and the accuracy of management's beliefs with respect to the uses and adequacy of our capital resources, as well as those matters identified and discussed in our Registration Statement on Form S-1, as amended, filed in connection with our initial public offering under the section titled Risk Factors.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to market risk from changes in interest rates. Market risk is the potential loss arising from adverse changes in market rates and prices such as interest rates. For fixed rate debt, interest rate changes affect the fair value of financial instruments but do not impact earnings or cash flows. Conversely, for floating rate debt, interest rate changes generally do not affect the fair market value but do impact future earnings and cash flows, assuming other factors are held constant. During fiscal 2007, we renegotiated and/or signed several new credit facilities. Many of these credit agreements are floating rate facilities now containing minimum rates of interest to be charged. We have also entered into fixed rate financing. Based upon balances and interest rates as of October 31, 2007, holding other variables constant, a one percentage point increase in interest rates for the next 12-month period would decrease pre-tax earnings and cash flow by approximately \$561,000. Conversely, a one percentage point decrease in interest rates for the next 12-month period would result in an increase to pre-tax earnings and cash flow of approximately \$561,000. At October 31, 2007, we had variable rate floorplan notes payable of \$111.7 million, of which approximately \$44.6 million was interest-bearing, variable notes payable and long-term debt of \$11.6 million, and fixed rate notes payable and long-term debt of \$20.8 million.

Our policy is not to enter into derivatives or other financial instruments for trading or speculative purposes.

ITEM 1A. RISK FACTORS

In addition to the other information set forth in this Quarterly Report, including the important information in the Information Regarding Forward-Looking Statements section, you should carefully consider the Risk Factors discussed in our Registration Statement on Form S-1, as amended, as filed with the United States Securities and Exchange Commission on December 5, 2007. We believe the transaction was exempt from the registration requirements of the Securities Act by virtue of Section 4(2) thereof and Regulation D promulgated thereunder, based on the limited number of offerees in the offering, representations and warranties made by the offerees in the particular transactions, or the identity of such offerees as accredited investors.

On December 11, 2007, we closed the initial public offering of our common stock, pursuant to which we sold 5,442,395 shares of our common stock and selling stockholders sold 1,457,605 shares. We received net proceeds, after expenses, from the IPO of approximately \$42 million. Offering expenses related to the IPO included an underwriting discount of approximately \$3.2 million and other offering expenses of approximately \$1.0 million. We used \$441,027 of the proceeds from the IPO to pay accrued cash dividends upon the conversion of all of our outstanding preferred stock, \$142,424 to repay subordinated debentures, and \$7.5 million to repay the subordinated note issued to CNH Capital issued January 31, 2006. We intend to use the remaining proceeds from the IPO to fund potential acquisitions of CNH agricultural and construction equipment dealerships and for general corporate purposes, including working capital needs.
