PART I. FINANCIAL INFORMATION

Item 1. Financial Statements

Introductory Comments

The Condensed Consolidated Financial Statements of DST Systems, Inc. ("DST" or the "Company") included herein have been prepared by the Company, without audit, pursuant to the rules and regulations of the United States Securities and Exchange Commission. Certain information and note disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted pursuant to such rules and regulations, although the Company believes that the disclosures are adequate to enable a reasonable understanding of the information presented. These Condensed Consolidated Financial Statements should be read in conjunction with the Company's audited financial statements and the notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2007.

The results of operations for the three and six months ended June 30, 2008, are not necessarily indicative of the results to be expected for the full year 2008.

DST Systems, Inc.

Notes to Condensed Consolidated Financial Statements

(unaudited)

1. Summary of Accounting Policies

The Condensed Consolidated Financial Statements of DST Systems, Inc. ("DST" or the "Company") included herein have been prepared by the Company, without audit, pursuant to the rules and regulations of the United States Securities and Exchange Commission. Certain information and note disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") have been condensed or omitted pursuant to such rules and regulations, although the Company believes that the disclosures are adequate to enable a reasonable understanding of the information presented. The Condensed Consolidated Balance Sheet as of December 31, 2007 has been derived from the audited Consolidated Balance Sheet at that date, but does not include all of the information and notes required by GAAP for complete financial statements. These Condensed Consolidated Financial Statements should be read in conjunction with the Company's audited financial statements and the notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2007.

In the opinion of management, the accompanying unaudited condensed consolidated financial statements contain all adjustments (consisting of normal interim closing procedures) necessary to present fairly the financial position of the Company and its subsidiaries at June 30, 2008, and the results of operations for the three and six months ended June 30, 2008 and 2007, and cash flows for the six months ended June 30, 2008 and 2007.

Certain amounts in the prior year's financial statements have been reclassified to conform to the current year presentation.

The results of operations for the three and six months ended June 30, 2008, are not necessarily indicative of the results to be expected for the full year 2008.

2. Other Current Assets

Included in other current assets are the following items (in millions):

	June 30, 2008	December 31, 2007
Income tax recoverable	\$ 8.8	\$ 29.8

Edgar Filing: DST SYSTEMS INC - Form 10-Q

Prepaid expenses	22.8	29.6
Inventories	15.1	16.0
Other	7.9	8.9
Receivable from Asurion	39.2	39.2
	\$ 54.6	\$ 123.5

Table of Contents**3. Investments**

Investments are as follows (in millions):

	2008 Ownership Percentage	June 30, 2008	Carrying Value December 31, 2007
Available-for-sale securities:			
State Street Corporation	3%	\$ 723.7	\$ 918.4
Computershare Ltd.	5%	261.4	256.0
Euronet Worldwide	4%	31.8	56.5
Other available-for-sale securities		223.7	279.2
		1,240.6	1,510.1
Unconsolidated affiliates:			
Boston Financial Data Services	50%	161.6	151.0
International Financial Data Services, U.K.	50%	63.5	57.3
International Financial Data Services, Canada	50%	27.1	24.4
Argus Health Systems	50%	16.6	16.1
Unconsolidated real estate affiliates		97.7	62.3
Other unconsolidated affiliates		9.2	9.8
		375.7	320.9
Other:			
Trading securities		45.5	51.3
Held-to-maturity		3.3	3.7
Investments, at cost		75.8	54.3
		124.6	109.3
Total investments		\$ 1,740.9	\$ 1,940.3

The following table summarizes certain information related to the Company's available-for-sale securities (in millions):

	June 30, 2008	December 31, 2007
Book cost basis	\$ 431.7	\$ 466.3
Gross unrealized gains	822.9	1,053.9
Gross unrealized losses	(14.0)	(10.1)
Market value	\$ 1,240.6	\$ 1,510.1

Edgar Filing: DST SYSTEMS INC - Form 10-Q

Table of Contents

The following table summarizes the fair value and gross unrealized losses of the Company's investments by the length of time that the securities have been in a continuous loss position, as of June 30, 2008 (in millions):

	Less than 12 months		Greater than 12 months		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
Common stock	\$ 110.7	\$ 13.8	\$ 0.9	\$ 0.2	\$ 111.6	\$ 14.0

Future adverse changes in market conditions or poor operating results of underlying investments could result in losses or an inability to recover the carrying value of the investments. These may not be reflected in an investment's current carrying value, thereby possibly requiring an impairment charge in the future. Such a charge could have a material effect on the Company's financial position and results of operations.

The Company recognized \$15.8 million and \$26.0 million of investment impairments for the three and six months ended June 30, 2008 and \$1.5 million and \$2.0 million for the three and six months ended June 30, 2007, which the Company believed were other than temporary. Impairments recorded during the three and six months ended June 30, 2008 and 2007 relate to available-for-sale and cost method investments in the Investments and Other Segment and the Financial Services Segment. A decline in a security's net realizable value that is other than temporary is treated as a loss based on quoted or derived market value and is reflected in other income (expense), net line in the statement of income.

The Company provides a cash management service for full service mutual fund transfer agency clients, whereby end of day available client bank balances are invested overnight by and in the name of the Company into credit-quality money market funds. Invested balances are returned to the full service mutual fund transfer agency client accounts the following business day. The Company had \$151.1 million and \$177.4 million of transfer agency investments and deposits at June 30, 2008 and December 31, 2007, respectively.

The following table summarizes equity in earnings (losses) of unconsolidated affiliates (in millions):

	For the Three Months Ended June 30,		For the Six Months Ended June 30,	
	2008	2007	2008	2007
BFDS	\$ 4.7	\$ 8.1	\$ 10.6	\$ 16.0
IFDS, U.K.	2.9	3.9	5.9	7.4
IFDS, Canada	1.9	0.1	2.4	2.5
Argus	0.1	0.7	0.4	1.9
Other	2.0	(0.8)	1.0	(2.4)
Asurion		10.5		21.9
	\$ 11.6	\$ 22.5	\$ 20.3	\$ 47.3

In June 2008, the Company loaned \$34.5 million at variable rates of interest, secured by real estate and maturing on December 31, 2012, to an unconsolidated real estate joint venture. The other partner in the joint venture guaranteed 60% of the loan balance.

Table of Contents

4. Fair Value Measurements

Effective January 1, 2008, the Company adopted SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities Including an amendment of FASB Statement No. 115. The Company did not elect the fair value measurement option under SFAS 159 for any of its financial assets or liabilities and, as a result, there was no impact on the Company's condensed consolidated financial statements.

On January 1, 2008, DST adopted Statement of Financial Accounting Standard (SFAS) No. 157, Fair Value Measurements (SFAS 157), which defines fair value, establishes a framework for measuring fair value under generally accepted accounting principles, and expands disclosures about fair value measurements. SFAS 157 does not require any new fair value measurements, but provides guidance on how to measure fair value by providing a fair value hierarchy based on the source of the information. The FASB delayed the effective date to first quarter 2009 for nonfinancial assets and liabilities recognized or disclosed at fair value in the financial statements on a nonrecurring basis, in accordance with FASB Staff Position SFAS 157-2, Effective Date of FASB Statement No. 157. Management is currently evaluating the financial reporting requirements for these assets and liabilities and has not yet determined the impact on the consolidated financial statements. SFAS 157 establishes a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value. These tiers include: Level 1, defined as observable inputs such as quoted prices in active markets; Level 2, defined as inputs other than quoted prices in active markets that are either directly or indirectly observable; and Level 3, defined as unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions.

As of June 30, 2008, the Company held certain investment assets that are required to be measured at fair value on a recurring basis. These investments include the Company's available-for-sale and trading securities whereby fair value is determined using quoted prices in active markets. Accordingly, the fair value measurements of these investments have been classified as Level 1 in the table below.

Table of Contents

The following table presents assets and liabilities measured at fair value on a recurring basis (in millions):

	Fair Value Measurements at Reporting Date Using			
	6/30/2008	Quoted prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Available-for-sale securities	\$ 1,240.6	\$ 1,240.6	\$	\$
Trading securities	45.5	45.5		
Total	\$ 1,286.1	\$ 1,286.1	\$	\$

At June 30, 2008, one of DST's unconsolidated affiliates had an interest rate swap with a fair market value liability of \$14.8 million (DST's proportionate share is \$7.4 million). The unconsolidated affiliate used inputs from quoted prices for similar assets and liabilities in active markets and other observable inputs directly or indirectly related to the measurement of the interest rate swap. The fair value measurement of the interest rate swap has been classified as Level 2 by the unconsolidated affiliate. The above table presents only assets and liabilities measured at fair value for which the Company controls, and accordingly excludes items held by unconsolidated affiliates.

5. Goodwill and Intangible Assets

Goodwill

The following table summarizes the changes in the carrying amount of goodwill for the six months ended June 30, 2008, by segment (in millions):

	December 31, 2007	Acquisitions	Disposals	Other	June 30, 2008
Financial Services	\$ 108.5	\$ 0.4	\$	\$ (0.5)	\$ 108.4
Output Solutions	9.4				9.4
Total	\$ 117.9	\$ 0.4	\$	\$ (0.5)	\$ 117.8

Intangible Assets

The following table summarizes intangible assets for the six months ended June 30, 2008, by segment (in millions):

Edgar Filing: DST SYSTEMS INC - Form 10-Q

	June 30, 2008		December 31, 2007	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Amortizable intangible assets:				
Customer relationships	\$ 36.7	\$ 6.4	\$ 36.7	\$ 4.6
Other	3.8	1.6	3.8	1.4
Total	\$ 40.5	\$ 8.0	\$ 40.5	\$ 6.0

Amortization of intangible assets for the three and six months ended June 30, 2008 was approximately \$1.0 million and \$2.0 million, respectively. Amortization of intangibles for the three and six months ended June 30, 2007 was approximately \$0.5 million and \$1.1 million, respectively. The Company estimates that amortization expense attributable to intangible assets recorded as of June 30, 2008 will be approximately \$1.9 million for the remainder of 2008, \$3.6 million for 2009, \$3.1 million for 2010, \$3.0 million for 2011, \$2.8 million for 2012 and \$18.1 million thereafter.

Table of Contents

6. Debt

Senior Convertible Debentures

Holders of the Company's senior convertible debentures were eligible to convert these bonds during the three months ended March 31, 2008 and June 30, 2008 as a result of DST's common stock trading above 120% of the applicable conversion price (\$49.08) for at least 20 trading days during the period of 30 consecutive trading days ended December 31, 2007 and March 31, 2008. Actual conversions for the six months ended June 30, 2008 have been less than \$0.1 million and the Company used cash to settle the principal portion of these conversions. The senior debentures continue to be convertible through September 30, 2008 as the stock price conversion feature was still in effect at June 30, 2008. Conversion rights, and ultimate classification as a current or non-current liability, for subsequent quarters will be a function of future DST stock prices. At June 30, 2008 and December 31, 2007, the Company had \$839.8 million of senior convertible debentures outstanding all of which is classified as a current liability.

Syndicated Line of Credit

The Company amended its \$600 million syndicated line of credit facility as of June 16, 2008 to extend an expiring provision that allowed liens on real property securing indebtedness. At June 30, 2008 and December 31, 2007, the Company had \$438.9 million and \$48.7 million, respectively, of indebtedness under the syndicated line of credit facility.

Equipment Credit Facility

The Company entered into a \$50 million unsecured credit facility with a vendor in June 2008. Proceeds from loans made under the credit facility can be used to make purchases of the vendor's eligible equipment, software or services. Loans under this credit facility must be made prior to June 30, 2010, the draw period termination date. The maturity date for each loan under this credit facility is the earlier of i) the first day of the second calendar month following the third anniversary of the loan date or ii) August 1, 2013. Interest rates applicable to the loans under this credit facility are generally based on offshore LIBOR rate plus an applicable margin of 0.40% to 0.85%. The applicable margin is based on a grid schedule that adjusts borrowing costs up or down based upon the Company's consolidated leverage ratio. At June 30, 2008, \$0.4 million was outstanding under the equipment credit facility.

7. Income Taxes

In general, the Company records income tax expense during interim periods based on its best estimate of the full year's effective tax rate. Certain items, however, are given discrete period treatment and, as a result, the tax effects of such items are reported in full in the relevant interim period. The Company's effective tax rate was 36.3% and 20.9% for the three and six months ended June 30, 2008, respectively, compared to 31.9% and 32.9% for the three and six months ended June 30, 2007, respectively. The higher effective tax rate for the three months ended June 30, 2008, compared to the same period in the prior year, is primarily due to a net increase in the Company's liabilities for FIN 48, Accounting for Uncertainty in Income Taxes—an Interpretation of FASB No. 109. The lower effective tax rate for the six months ended June 30, 2008,

Edgar Filing: DST SYSTEMS INC - Form 10-Q

compared to the same period in the prior year, is primarily due to an income tax benefit of approximately \$23.9 million resulting from a net reduction in the Company's liabilities for FIN 48, (including approximately \$10.4 million of interest and penalties). The net decrease in FIN 48 liabilities is principally related to the resolution of an IRS examination matter (associated with a transaction that the Company consummated in the 2000 tax year) that was resolved in DST's favor. The full year 2008 effective tax rate can be affected as a result of variances among the estimates and amounts of full year sources of taxable income (e.g., domestic consolidated, joint venture and/or international), the realization of tax credits (e.g., historic rehabilitation, research and experimentation and state incentive), adjustments which may arise from the resolution of tax matters under review and the Company's assessment of its liability for unrecognized tax benefits.

Table of Contents**8. Stockholders Equity***Earnings per share*

The computation of basic and diluted earnings per share is as follows (in millions, except per share amounts):

	For the Three Months Ended June 30,		For the Six Months Ended June 30,	
	2008	2007	2008	2007
Net income	\$ 49.9	\$ 72.8	\$ 122.1	\$ 138.2
Dilutive securities at unconsolidated affiliates		(0.6)		(1.1)
Net income for dilutive computation	\$ 49.9	\$ 72.2	\$ 122.1	\$ 137.1
Average common shares outstanding (excluding restricted stock)	51.6	61.6	53.8	62.4
Incremental shares from assumed conversions of stock options, vesting of stock based compensation and debenture conversion	6.4	10.2	7.3	9.4
Average diluted shares outstanding	58.0	71.8	61.1	71.8
Basic earnings per share	\$ 0.97	\$ 1.18	\$ 2.27	\$ 2.22
Diluted earnings per share	\$ 0.86	\$ 1.01	\$ 2.00	\$ 1.91

The Company had approximately 53.3 million and 63.4 million shares outstanding at June 30, 2008 and 2007, respectively. For financial reporting purposes, however, unvested restricted shares in the amount of 2.6 million and 2.5 million at June 30, 2008 and 2007, respectively, are excluded from the determination of average common shares outstanding used in the calculation of basic earnings per share in the above table. There were no anti-dilutive shares from options to purchase common stock during the three and six months ended June 30, 2008 and 2007, respectively. The Company has issued convertible senior debentures that if converted in the future would have a potentially dilutive effect on the Company's stock. The Series A debentures are convertible into 11.0 million shares of common stock and the Series B debentures are convertible into 6.1 million shares of common stock, subject to adjustment. The Company intends to settle any conversions with cash for the principal and accrued and unpaid interest and issue common stock for any conversion value amount over the principal and accrued and unpaid interest amounts. Related to the debentures, the calculation of diluted earnings per share includes an incremental amount of shares assumed to be issued for the conversion spread when the Company's average daily stock price exceeds \$49.08 per share. There was additional dilution of approximately 3.5 million shares and 4.4 million shares for the three and six months ended June 30, 2008 and 6.5 million shares and 5.9 million shares for the three and six months ended June 30, 2007, related to the Company's average daily share price exceeding \$49.08 per share.

Stock repurchases

On May 12, 2008, DST's Board of Directors authorized the repurchase of an additional 5.0 million shares under the existing share repurchase authorization plan. The Company repurchased 1,998,421 shares of DST common stock for \$121.7 million or approximately \$60.90 per share

Edgar Filing: DST SYSTEMS INC - Form 10-Q

during the three months ended June 30, 2008. For the six months ended June 30, 2008, the Company had repurchased 7,623,665 shares of DST common stock for \$516.6 million at an average cost of \$67.76 per share. At June 30, 2008, approximately 4.2 million shares remained under the existing share repurchase authorization plan.

Table of Contents*Comprehensive income (loss)*

Components of comprehensive income (loss) consist of the following (in millions):

	For the Three Months Ended June 30,		For the Six Months Ended June 30,	
	2008	2007	2008	2007
Net income	\$ 49.9	\$ 72.8	\$ 122.1	\$ 138.2
Other comprehensive income (loss):				
Unrealized gains (losses) on investments:				
Unrealized holding gains (losses) arising during the period	(169.8)	72.8	(261.3)	98.2
Proportional share of unconsolidated affiliate interest rate swap	7.1	5.9	(0.5)	6.3
Less reclassification adjustments for net (gains) losses included in net income	0.1	(3.9)	10.6	(8.1)
Foreign currency translation adjustments	7.4	7.2	8.8	12.7
Deferred income taxes	61.2	(28.9)	91.5	(37.4)
Other comprehensive income (loss)	(94.0)	53.1	(150.9)	71.7
Comprehensive income (loss)	\$ (44.1)	\$ 125.9	\$ (28.8)	\$ 209.9

9. Accounts Receivable Securitization Program

On May 22, 2008, the Company renewed its \$200 million accounts receivable securitization program with a third party multi-seller asset-backed commercial paper conduit. The first amendment to the receivables purchase agreement (originally dated May 24, 2007) extends the conduit's purchase commitment until May 21, 2009. At June 30, 2008 and December 31, 2007, the total outstanding undivided interest in the receivables held by the conduit was \$100 million and \$70 million, respectively.

10. Commitments and Contingencies

The Company and its subsidiaries are involved in various legal proceedings arising in the normal course of their businesses. While the ultimate outcome of these legal proceedings cannot be predicted with certainty, it is the opinion of management that the final outcome in such proceedings, in the aggregate, would not have a material adverse effect on the consolidated financial condition, results of operations and cash flows of the Company.

The Company has letters of credit of \$6.2 million and \$3.3 million outstanding at June 30, 2008 and December 31, 2007, respectively. Letters of credit are secured by the Company's debt facility.

Edgar Filing: DST SYSTEMS INC - Form 10-Q

The Company has entered into agreements with certain officers whereby upon defined circumstances constituting a change in control of the Company, certain benefit entitlements are automatically funded and such officers are entitled to specific cash payments upon termination of employment.

The Company has established trusts to provide for the funding of corporate commitments and entitlements of Company officers, directors, employees and others in the event of a change in control of the Company. Assets held in such trusts at June 30, 2008 were not significant.

The Company has entered into an agreement to guarantee 50% of the obligations of a 50% owned joint venture as a tenant under a real estate lease for an office building. The initial term of the lease is 10 years and 7 months, commencing March 1, 2007 and expiring September 30, 2017, with two five-year options to extend. The base rent for the initial term is \$4.8 million per year, plus all operating expenses for the building.

Table of Contents

The Company has entered into an agreement to guarantee 50% of a \$6.1 million line of credit provided to a 50% owned real estate joint venture. The line of credit becomes due and the Company's guarantee thereof expires on June 16, 2009. In April 2008, this line of credit was repaid.

The Company entered into an agreement to guarantee \$2.0 million plus any enforcement costs related to a \$32.0 million mortgage loan to a 33% owned real estate joint venture. The \$32.0 million loan matures on July 1, 2010. At June 30, 2008, total borrowings on the loan were \$28.6 million and the Company's guarantee totaled \$2.0 million.

The Company's 50% owned joint ventures are generally governed by shareholder or partnership agreements. The agreements generally entitle the Company to elect one-half of the directors to the board in the case of corporations and to have 50% voting/managing interest in the case of partnerships. The agreements generally provide that the Company or the other party has the option to establish a price payable in cash, or a promise to pay cash, for all of the other's ownership in the joint venture and to submit an offer, in writing, to the other party to sell to the other party all of its ownership interests in the joint venture or to purchase all ownership interests owned by the other party at such offering price. The party receiving the offer generally has a specified period of time to either accept the offer to purchase, or to elect to purchase the offering party's interest at the offering price. The Company cannot estimate the potential aggregate offering price that it could be required to receive or elect to pay in the event this option becomes operable; however, the amount could be material.

Guarantees

In addition to the guarantees entered into as mentioned above, the Company has also guaranteed certain obligations of certain joint ventures under service agreements entered into by the joint ventures and their customers. The amount of such obligations is not stated in the agreements. Depending on the negotiated terms of the guaranty and/or the underlying service agreement, the Company's liability under the guaranty may be subject to time and materiality limitations, monetary caps and other conditions and defenses.

In certain instances in which the Company licenses proprietary systems to customers, the Company gives certain warranties and infringement indemnities to the licensee, the terms of which vary depending on the negotiated terms of each respective license agreement, but which generally warrant that such systems will perform in accordance with their specifications. The amount of such obligations is not stated in the lease agreements. The Company's liability for breach of such warranties may be subject to time and materiality limitations, monetary caps and other conditions and defenses.

From time to time, the Company enters into agreements with unaffiliated parties containing indemnification provisions, the terms of which vary depending on the negotiated terms of each respective agreement. The amount of such obligations is not stated in the agreements. The Company's liability under such indemnification provisions may be subject to time and materiality limitations, monetary caps and other conditions and defenses. Such indemnity obligations include the following:

The Company has entered into purchase and service agreements with its vendors, and consulting agreements with providers of consulting services to the Company, pursuant to which the Company has agreed to indemnify certain of such vendors and consultants, respectively, against third party claims arising from the Company's use of the vendor's product or the services of the vendor or consultant.

Edgar Filing: DST SYSTEMS INC - Form 10-Q

In connection with the acquisition or disposition of subsidiaries, operating units and business assets by the Company, the Company has entered into agreements containing indemnification provisions, the terms of which vary depending on the negotiated terms of each respective agreement, but which are generally described as follows: (i) in connection with acquisitions made by the Company, the Company has agreed to indemnify the seller against third-party claims made against the seller relating to the subject subsidiary, operating unit or asset and arising after the closing of the transaction, and (ii) in connection with dispositions made by the Company, the Company has agreed to indemnify the buyer against damages incurred by the buyer due to the buyer's reliance on representations and warranties relating to the subject subsidiary, operating unit or business assets in the disposition agreement if such representations or warranties were untrue when made, or due to any breach of the representations, warranties, agreements or covenants contained in the agreement.

Table of Contents

The Company has entered into agreements with certain third parties, including banks and escrow agents, which provide software escrow, fiduciary and other services to the Company or to its benefit plans or customers. Under such agreements, the Company has agreed to indemnify such service providers for third party claims relating to the carrying out of their respective duties under such agreements.

The Company has entered into agreements with lenders providing financing to the Company pursuant to which the Company agrees to indemnify such lenders for third party claims arising from or relating to such financings. In connection with real estate mortgage financing, the Company has entered into environmental indemnity agreements in which the Company has agreed to indemnify the lenders for any damage sustained by the lenders relating to any environmental contamination on the subject properties.

In connection with the acquisition or disposition of real estate by the Company, the Company has entered into real estate contracts containing indemnification provisions, the terms of which vary depending on the negotiated terms of each respective contract, but which are generally described as follows: (i) in connection with acquisitions by the Company, the Company has agreed to indemnify the seller against third-party claims made against the seller arising from the Company's on-site inspections, tests and investigations of the subject property made by the Company as part of its due diligence and against third-party claims relating to the operations on the subject property after the closing of the transaction, and (ii) in connection with dispositions by the Company, the Company has agreed to indemnify the buyer for damages incurred by the buyer due to the buyer's reliance on representations and warranties relating to the subject property made by the Company in the real estate contract if such representations or warranties were untrue when made and against third-party claims relating to operations on the subject property prior to the closing of the transaction.

In connection with the leasing of real estate by the Company, as landlord and as tenant, the Company has entered into occupancy leases containing indemnification provisions, the terms of which vary depending on the negotiated terms of each respective lease, but which are generally described as follows: (i) in connection with leases in which the Company is the tenant, the Company has agreed to indemnify the landlord against third party claims relating to the Company's occupancy of the subject property, including claims arising from loss of life, bodily injury and/or damage to property thereon, and (ii) in connection with leases in which the Company is the landlord, the Company has agreed to indemnify the tenant against third party claims to the extent occasioned wholly or in part by any negligent act or omission of the Company or arising from loss of life, bodily injury and/or damage to property in or upon any of the common areas or other areas under the Company's control.

At June 30, 2008 and December 31, 2007, the Company had not accrued any liability on the aforementioned guarantees or indemnifications as they relate to future performance criteria or indirect guarantees of indebtedness of others in accordance with FIN 45, *Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others*.

11. Accounting Standards

Accounting for Convertible Debt Instruments

In May 2008, the FASB issued FASB Staff Position (FSP) No. APB 14-1, *Accounting for Convertible Debt Instruments that may be Settled in Cash upon Conversion (Including Partial Cash Settlement)*. This FSP clarifies that issuers of convertible debt instruments that may be settled in cash upon conversion (including partial cash settlement) should separately account for the liability and equity components in a manner that will

Edgar Filing: DST SYSTEMS INC - Form 10-Q

reflect the entity's nonconvertible debt borrowing rate when interest cost is recognized in subsequent periods. The FSP will be effective for financial statements issued for fiscal years beginning after December 15, 2008, and early adoption is not permitted. This FSP shall be applied retrospectively to all periods presented. DST is still evaluating the impact of this FSP and currently believes that the adoption of this proposed standard would result in higher interest expense on DST's senior convertible debentures and may cause the separation of the debt and equity components of the senior convertible debentures on the Condensed Consolidated Balance Sheet.

Table of Contents

Earnings Per Share

The Financial Accounting Standards Board (the FASB) previously issued an exposure draft on a proposed accounting standard that would amend SFAS No. 128, Earnings per Share (SFAS 128), to clarify guidance for mandatorily convertible instruments, the treasury stock method, contingently issuable shares, and contracts that may be settled in cash or shares.

The proposed amendment, which is designed for convergence with international accounting standards, would require the use of the if-converted method from the date of issuance of the convertible debentures. The proposed amendment would remove the ability of a company to support the presumption that the convertible securities will be satisfied in cash and not converted into shares of common stock. Accordingly, the Company's stated intention to settle conversions of its convertible debentures with cash for the principal and accrued and unpaid interest and issue common stock for any conversion value amount over the principal and accrued and unpaid interest amounts would no longer be accepted under SFAS 128, if amended as proposed. The final standard has yet to be issued. Retrospective application would be required for all changes to SFAS 128, except that retrospective application would be prohibited for contracts that were either settled in cash prior to adoption or modified prior to adoption to require cash settlement. For DST, adoption of this statement, as proposed, will require retroactive restatement of the Company's diluted earnings per share calculations subsequent to the issuance of the convertible debentures. In calculating diluted earnings per share under the revised SFAS 128 if-converted method included in the exposure draft, the Company would need to increase net income for the interest expense associated with the convertible debentures, net of tax, and increase the incremental shares assumed to be issued upon conversion by 17.1 million shares (less shares already included in diluted earnings per share), the amount of shares that would be issued if all of the senior convertible debentures would be converted to equity. The revised SFAS 128 exposure draft also contains other EPS computational changes (e.g., treasury stock method considerations) that may have an effect on the Company's diluted earnings per share calculation. DST is continuing to monitor the FASB's progress towards finalizing this proposed accounting standard.

The proposed change in accounting principle would affect the calculation of diluted earnings per share during the period the debentures are outstanding, but would not affect DST's ability to ultimately settle the convertible debentures in cash, shares or any combination thereof.

The estimated impact of this new accounting standard reflects the Company's current estimates based upon the exposure draft in its current form. There may be material differences between these estimates and the actual impact of the standard when issued as final.

12. Segment Information

The Company's operating business units offer sophisticated information processing and software services and products. The Company has elected to organize and report on these business units as two operating Segments (Financial Services and Output Solutions). In addition, investments in equity securities, private equity fund investments, and certain financial interests, and the Company's real estate subsidiaries and affiliates have been aggregated into an Investments and Other Segment.

In first quarter 2008, the Company changed the measurement of certain cost components of its Output Solutions Segment. The Output Solutions Segment leases its Connecticut, Missouri and California production facilities from the Investments and Other Segment. Beginning in 2008, the

Edgar Filing: DST SYSTEMS INC - Form 10-Q

Company began reporting financial results for the Output Solutions Segment on the basis that the Output Solutions Segment owned (instead of leased) these three production facilities. Management believes this action will improve its ability to analyze the Output Solutions Segment operating results taking into consideration the special purpose nature of the production plants. Reported results for the Output Solutions Segment and the Elimination Adjustments for periods prior to 2008 have been restated to reflect this change. The Company's restated segment results for the three and six months ended June 30, 2007 and the years ended December 31, 2007, 2006 and 2005 are included in the tables below. The Investments and Other Segment continues to present rental revenues from the Output Solutions Segment along with the related depreciation expense associated with the properties, while the elimination of the inter-segment activity is included in the Elimination Adjustments. The impact of this change increased Output

Table of Contents

Solutions income from operations by \$2.0 million and \$3.7 million for the three and six months ended June 30, 2008, compared to \$1.9 million and \$3.7 million for the three and six months ended June 30, 2007. The impact of this change correspondingly increased the Segment Eliminations loss from operations by \$2.0 million and \$3.7 million for the three and six months ended June 30, 2008, compared to \$1.9 million and \$3.7 million for the three and six months ended June 30, 2007.

Information concerning total assets by reporting segment is as follows (in millions):

	June 30, 2008	December 31, 2007
Financial Services	\$ 1,553.4	\$ 1,770.9
Output Solutions	242.5	261.0
Investments and Other	1,412.3	1,651.7
Elimination Adjustments	(195.1)	(287.7)
	\$ 3,013.1	\$ 3,395.9

The Company evaluates the performance of its Segments based on income before income taxes, non-recurring items and interest expense. Intersegment revenues are reflected at rates prescribed by the Company and may not be reflective of market rates.

Included in costs and expenses in the Investments and Other Segment for the three and six months ended June 30, 2007 is a gain of \$12.4 million related to the sale of certain real property.

Summarized financial information concerning the Segments is shown in the following tables (in millions):

Edgar Filing: DST SYSTEMS INC - Form 10-Q

Table of Contents

	For the Three Months Ended June 30, 2008					Consolidated Total
	Financial Services	Output Solutions	Investments/ Other	Elimination Adjustments

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The discussions set forth in this Quarterly Report on Form 10-Q contain statements concerning potential future events. Such forward-looking statements are based upon assumptions by the Company's management, as of the date of this Quarterly Report, including assumptions about risks and uncertainties faced by the Company. In addition, management may make forward-looking statements orally or in other writings, including, but not limited to, in press releases, in the annual report to shareholders and in the Company's other filings with the Securities and Exchange Commission (SEC). Readers can identify these forward-looking statements by the use of such verbs as expects, anticipates, believes or similar verbs or conjugations of such verbs. If any of management's assumptions prove incorrect or should unanticipated circumstances arise, the Company's actual results could materially differ from those anticipated by such forward-looking statements. The differences could be caused by a number of factors or combination of factors including, but not limited to, those factors referred to below in Part II, Item 1A, Risk Factors. Readers are strongly encouraged to consider the factors referred to in such section and any amendments or modifications thereof when evaluating any forward-looking statements concerning the Company. The Company's reports filed with or furnished to the SEC on Form 8-K, Form 10-K, Form 10-Q and other forms and any amendments to those reports, may be obtained by contacting the SEC's Public Reference Branch at 1-800-SEC-0330 or by accessing the forms electronically, free of charge, through the SEC's Internet website at <http://www.sec.gov> or through the Company's Internet website, as soon as reasonably practicable after filing with the SEC, at <http://www.dstsystems.com>. The Company will not update any forward-looking statements in this Quarterly Report to reflect future events or developments.

The information contained in this Management's Discussion and Analysis of Financial Condition and Results of Operations should be read in conjunction with the Condensed Consolidated Financial Statements and Notes thereto included in this Form 10-Q and the audited consolidated financial statements and notes thereto in the Company's Annual Report on Form 10-K for the year ended December 31, 2007.

INTRODUCTION

The business units of DST Systems, Inc. (DST or the Company) offer sophisticated information processing and software services and products. These business units are reported as two operating Segments (Financial Services and Output Solutions). In addition, investments in equity securities, private equity funds, and certain financial interests, and the Company's real estate subsidiaries and affiliates have been aggregated into an Investments and Other Segment.

Financial Services

The Company's Financial Services Segment provides sophisticated information processing and computer software services and products using proprietary software systems primarily to mutual funds, investment managers, insurance companies, healthcare providers, banks, brokers, financial planners, real estate partnerships, providers of healthcare plans, third party administrators, medical practice groups and healthcare providers. The Company's proprietary software systems include mutual fund shareowner, subaccount and unit trust recordkeeping systems for U.S. and international mutual fund companies; a defined-contribution participant recordkeeping system for the U.S. retirement plan market; investment management systems offered to U.S. and international investment managers and fund accountants; a business process management and customer contact system offered to mutual funds, insurance companies, brokerage firms, banks, healthcare payers, healthcare providers, cable television operators and mortgage servicing organizations; and healthcare claims administration processing systems and services, including consumer directed healthcare administration solutions, offered to providers of healthcare plans, third party administrators and medical practice groups.

The Financial Services Segment distributes its services and products on a direct basis and through subsidiaries and joint venture affiliates in the U.S., United Kingdom (U.K.), Canada, Europe, Australia, India, South Africa and Asia-Pacific and, to a lesser degree, distributes such services and products through various strategic alliances.

Table of Contents

Output Solutions

The Company's Output Solutions Segment provides single source, integrated print and electronic statement and billing output solutions. The Output Solutions Segment also offers a variety of related professional services, including marketing and personalization services, and postal optimization solutions. The Output Solutions Segment also provides electronic presentment, payment and distribution solutions.

The Output Solutions Segment conducts its operations from five production facilities located throughout North America and the U.K. DST Output is among the largest First-Class mailers in the U.S. and is one of the largest users of continuous, high-speed, full-color inkjet printing systems. DST Output Canada offers customer communications and document automation solutions to the Canadian market. DST International Output provides personalized print and electronic communications principally in the U.K.

The Output Solutions Segment distributes its products directly to customers and through relationships in which its services are combined with or offered concurrently through providers of data processing services. The Output Solutions Segment's products are also distributed or bundled with product offerings to customers of the Financial Services Segment.

In first quarter 2008, the Company changed the measurement of certain cost components of its Output Solutions Segment. The Output Solutions Segment leases its Connecticut, Missouri and California production facilities from the Investments and Other Segment. Beginning in 2008, the Company began reporting financial results for the Output Solutions Segment on the basis that the Output Solutions Segment owned (instead of leased) these three production facilities. Management believes this action will improve its ability to analyze the Output Solutions Segment operating results taking into consideration the special purpose nature of the production plants. Reported results for the Output Solutions Segment and the Elimination Adjustments for periods prior to 2008 have been restated to reflect this change. The Company's restated segment results for the three and six months ended June 30, 2007 are included in the information that follows. The Investments and Other Segment continues to present rental revenues from the Output Solutions Segment along with the related depreciation expense associated with the properties, while the elimination of the inter-segment activity is included in the Elimination Adjustments.

Investments and Other

The Investments and Other Segment holds investments in equity securities, private equity funds, and certain financial interests, and the Company's real estate subsidiaries and affiliates. The assets held by the Investments and Other Segment are primarily passive in nature. The Investments and Other Segment holds investments in equity securities with a market value of approximately \$1.2 billion at June 30, 2008, including approximately 11.3 million shares of State Street Corporation (State Street), 29.6 million shares of Computershare and 1.9 million shares of Euronet Worldwide, Inc., with a market value of \$723.7 million, \$261.4 million and \$31.8 million, respectively, based on closing exchange values at June 30, 2008. Additionally, the Company owns and operates real estate mostly in the U.S. and U.K., which is held primarily for lease to the Company's other business Segments. The Company is a partner in certain real estate joint ventures that lease office space to the Company, certain of its unconsolidated affiliates and unrelated third parties.

Table of Contents**RESULTS OF OPERATIONS**

The following table summarizes the Company's operating results (in millions, except per share amounts):

	For the Three Months Ended June 30,		For the Six Months Ended June 30,	
	2008	2007	2008	2007
Revenues				
Operating revenues

Table of Contents

Consolidated revenues

Consolidated total revenues (including out-of-pocket (OOP) reimbursements) for the three and six months ended June 30, 2008, increased \$5.9 million or 1.0% and \$8.4 million or 0.7%, respectively, compared to the same periods in 2007. Consolidated operating revenues for the three months ended June 30, 2008, increased \$9.4 million or 2.3% as compared to the same period in 2007, primarily from increases in mutual fund shareowner processing revenues, AWD software license fees, and AWD and DST Health Solutions professional services, partially offset by lower Output Solutions operating revenues. Consolidated operating revenues for the six months ended June 30, 2008, increased \$14.0 million or 1.7% as compared to the same period in 2007, primarily from the increases in mutual fund shareowner processing services, partially offset by lower Output Solutions operating revenues attributable to lower images produced and a \$3.1 million contract termination fee in first quarter 2007.

Consolidated OOP reimbursements during the three and six months ended June 30, 2008 decreased \$3.5 million or 2.3% and \$5.6 million or 1.8%, respectively, compared to 2007. Higher Financial Services OOP reimbursement revenues during the three and six months ended June 30, 2008 were offset by lower Output Solutions OOP reimbursement revenues resulting from changes in customer postage programs.

Income from operations

Consolidated income from operations for the three months ended June 30, 2008 was \$83.0 million, a decrease of \$6.9 million or 7.7% compared to the same period in 2007, attributable to lower contributions from the Investments and Other Segment which recorded a \$12.4 million gain in 2007 from the sale of office buildings, and lower contributions from international financial services operations in 2008 due to decreased demand for AWD and investment management software and services and higher personnel costs, partially offset by higher contributions from mutual fund shareowner processing and AWD software license fee revenues in 2008. Consolidated income from operations for the six months ended June 30, 2008 was \$167.4 million, a decrease of \$2.1 million or 1.2% compared to the same period in 2007, attributable to lower contributions from the Investments and Other Segment which recorded a \$12.4 million gain in 2007 from the sale of office buildings, lower contributions from international financial services operations in 2008 due to decreased demand for AWD and investment management software and services and higher personnel costs, lower software license fee revenues, partially offset by higher contributions from mutual fund shareowner processing in 2008.

Interest expense

Interest expense for the three and six months ended June 30, 2008 was \$13.8 million and \$26.5 million, respectively, a decrease of \$5.6 million or 28.9% and \$11.1 million or 29.5%, respectively, compared to the same periods in 2007, primarily from lower average interest rates and lower average debt balances. Share repurchase activities during the three and six months ended June 30, 2008 significantly increased debt levels, which is expected to increase interest expense in future quarters. Costs associated with the accounts receivable securitization program are included in other income (expense), as mentioned below.

Other income (expense), net

Other income (expense), net for the three months ended June 30, 2008 was a \$2.5 million expense, versus income of \$13.9 million in the same period in 2007. During the three months ended June 30, 2008, the Company recorded \$15.8 million of investment impairments and \$9.8 million of gains from the sale of investments as compared to the three months ended June 30, 2007 when the Company recorded \$1.5 million of investment impairments and \$6.2 million of gains from the sale of investments. Absent net gains (losses) on securities and other investments, other income decreased \$5.7 million for the three months ended June 30, 2008 primarily attributable to increased unrealized losses on marketable securities designated as trading in the amount of \$3.8 million, lower other income resulting from a \$1.5 million gain recorded in second quarter 2007 from the favorable settlement of a prior business acquisition dispute, and higher program fees for the accounts receivable securitization program initiated in second quarter 2007.

Table of Contents

Other income (expense), net for the six months ended June 30, 2008 was a \$6.9 million expense, versus income of \$26.7 million in the same period in 2007. During the six months ended June 30, 2008, the Company recorded \$26.0 million of investment impairments and \$9.5 million of gains from the sale of investments as compared to the six months ended June 30, 2007 when the Company recorded \$2.0 million of investment impairments and \$10.0 million of gains from the sale of investments. Absent net gains (losses) on securities and other investments, other income decreased \$9.1 million for the three months ended June 30, 2008 primarily attributable to increased unrealized losses on marketable securities designated as trading in the amount of \$7.3 million, lower other income resulting from gains of \$2.5 million recorded during the six months ended June 30, 2007 from the favorable settlement of a prior business acquisition dispute and the recovery of a Chapter 11 bankruptcy claim of an amount due from a previous customer, higher program fees for the accounts receivable securitization program initiated in second quarter 2007, partially offset by higher dividend income in 2008.

Equity in earnings (losses) of unconsolidated affiliates

The following table summarizes the Company's equity in earnings (losses) of unconsolidated affiliates (in millions):

	For the Three Months Ended June 30,		For the Six Months Ended June 30,	
	2008	2007	2008	2007
BFDS	\$ 4.7	\$ 8.1	\$ 10.6	\$ 16.0
IFDS, U.K.	2.9	3.9	5.9	7.4
IFDS, Canada	1.9	0.1	2.4	2.5
Argus	0.1	0.7	0.4	1.9
Other	2.0	(0.8)	1.0	(2.4)
Asurion		10.5		21.9
	\$ 11.6	\$ 22.5	\$ 20.3	\$ 47.3

Equity in earnings of unconsolidated affiliates declined \$10.9 million and \$27.0 million for the three and six months ended June 30, 2008, as compared to the same periods for 2007. No equity in earnings of Asurion was recorded in 2008 versus \$10.5 million and \$21.9 million for the three and six months ended June 30, 2007, and lower equity in earnings of BFDS, IFDS and Argus were recorded. As previously announced, DST sold the majority of its equity interest in Asurion on July 2, 2007 and now accounts for this investment under the cost basis.

Certain of the Company's joint ventures and, to a lesser extent, the Company, derive investment earnings related to cash balances maintained on behalf of customers. Average daily balances invested by the joint ventures were \$1.4 billion during both the three months ended June 30, 2008 and 2007. Average interest rates earned on the balances declined from 4.94% in second quarter 2007 to 2.09% in second quarter 2008. The net effect of these fluctuations resulted in an approximate \$10.5 million decline in interest earnings by the joint ventures, which resulted in a decrease of DST's equity of earnings of unconsolidated affiliates of approximately \$3.2 million during second quarter 2008. Average daily balances invested by the joint ventures were \$1.4 billion during both the six months ended June 30, 2008 and 2007. Average interest rates earned on the balances declined from 5.0% during the six months ended June 30, 2007 to 2.75% for the same period in 2008. The net effect of these fluctuations resulted in an approximate \$16.2 million decline in interest earnings by the joint ventures, which resulted in a decrease of DST's equity of earnings of unconsolidated affiliates of approximately \$4.9 million during the six months ended June 30, 2008.

DST's equity in BFDS earnings for the three and six months ended June 30, 2008 decreased \$3.4 million and \$5.4 million, respectively, compared to the same periods in 2007. The decline in earnings for the three and six months

Table of Contents

ended June 30, 2008 is primarily attributable to lower investment earnings resulting from lower interest rates on cash balances maintained by BFDS on behalf of customers and costs associated with a reduction in staffing levels. DST's equity in IFDS U.K. earnings for the three and six months ended June 30, 2008 decreased \$1.0 million and \$1.5 million, respectively, compared to the same periods in 2007, primarily from higher compensation costs and higher income taxes. Accounts serviced by IFDS U.K. were 5.8 million at June 30, 2008, unchanged from March 31, 2008, December 31, 2007 and June 30, 2007.

DST's equity in IFDS Canada earnings for the three and six months ended June 30, 2008 increased \$1.8 million and decreased \$0.1 million, respectively, compared to the same periods in 2007, primarily due to higher operating revenues associated with higher shareowner accounts, partially offset by increased costs associated with new customer conversions. Accounts serviced by IFDS Canada were 10.7 million at June 30, 2008, a decrease of 200,000 or 1.8% from March 31, 2008, an increase of 3.2 million accounts or 42.7% from December 31, 2007 and an increase of 3.3 million or 44.6% from June 30, 2007, primarily from the January 2008 conversion of a new remote mutual fund client with approximately 3.2 million accounts.

DST's equity in Argus Health Systems earnings for the three and six months ended June 30, 2008 decreased \$0.6 million and \$1.5 million, respectively, as compared to the same periods in 2007. The decline in earnings during the three months ended June 30, 2008 is primarily attributable to lower investment earnings from lower interest rates on cash balances maintained by Argus on behalf of customers. The decline in earnings for the six months ended June 30, 2008 is attributable to lower investment earnings due to a reduction in interest rates and higher operating costs in connection with the processing of higher volumes of claims.

The Other category in the table above includes principally various real estate joint ventures. DST's equity in other unconsolidated affiliates during the three and six months ended June 30, 2008 increased \$2.8 million and \$3.4 million, respectively, as compared to the same periods in the prior year, primarily attributable to a gain from the early extinguishment of debt at a real estate joint venture and higher rental revenues and cost efficiencies on various real estate joint ventures.

Income taxes

In general, the Company records income tax expense during interim periods based on its best estimate of the full year's effective tax rate. Certain items, however, are given discrete period treatment and, as a result, the tax effects of such items are reported in full in the relevant interim period. The Company's effective tax rate was 36.3% and 20.9% for the three and six months ended June 30, 2008, respectively, compared to 31.9% and 32.9% for the three and six months ended June 30, 2007, respectively. The higher effective tax rate for the three months ended June 30, 2008, compared to the same period in the prior year, is primarily due to a net increase in the Company's liabilities for FIN 48,

Accounting for Uncertainty in Income Taxes—an Interpretation of FASB No. 109. The lower effective tax rate for the six months ended June 30, 2008, compared to the same period in the prior year, is primarily due to an income tax benefit of approximately \$23.9 million resulting from a net reduction in the Company's liabilities for FIN 48, (including approximately \$10.4 million of interest and penalties). The net decrease in FIN 48 liabilities is principally related to the resolution of an IRS examination matter (associated with a transaction that the Company consummated in the 2000 tax year) that was resolved in DST's favor. Excluding the effects of discrete period items, the Company estimates its recurring tax rate for the remainder of 2008 to be 35.5%. The full year 2008 effective tax rate can be affected as a result of variances among the estimates and amounts of full year sources of taxable income (e.g., domestic consolidated, joint venture and/or international), the realization of tax credits (e.g., historic rehabilitation, research and experimentation and state incentive), adjustments which may arise from the resolution of tax matters under review and the Company's assessment of its liability for unrecognized tax benefits.

Table of Contents**Business Segment Comparisons****FINANCIAL SERVICES SEGMENT****Revenues**

Financial Services Segment total revenues for the three and six months ended June 30, 2008 were \$313.5 million and \$618.1 million, an increase of \$18.1 million or 6.1% and \$30.9 million or 5.3%, as compared to the same periods in 2007. Financial Services Segment operating revenues for the three months ended June 30, 2008 were \$294.5 million, an increase of \$14.3 million or 5.1%, as compared to the same period in 2007, primarily from higher mutual fund shareowner processing services from higher levels of accounts serviced, higher AWD software license fees, and higher AWD and DST Health Solutions professional services. Financial Services Segment operating revenues for the six months ended June 30, 2008 were \$581.3 million, an increase of \$25.6 million or 4.6%, as compared to the same period in 2007, primarily from higher mutual fund shareowner processing services from higher levels of accounts serviced, partially offset by lower software license fee revenues from decreased demand.

U.S. operating revenues for the three months ended June 30, 2008 were \$255.0 million, an increase of \$14.2 million or 5.9%, as compared to the same period in 2007, primarily from higher mutual fund shareowner processing services, AWD software license fees and AWD and DST Health Solutions professional services. U.S. operating revenues for the six months ended June 30, 2008 were \$503.9 million, an increase of \$27.1 million or 5.7%, as compared to the same period in 2007, primarily from higher mutual fund shareowner processing services. U.S. mutual fund servicing revenues during the three and six months ended June 30, 2008 increased approximately 5.3% and 5.6%, respectively, as compared to the same periods in 2007.

The following table summarizes mutual fund shareowner accounts serviced (in millions):

	June 30, 2008	March 31, 2008	December 31, 2007	June 30, 2007
Registered accounts:				
Non tax-advantaged	67.0	68.1	71.0	66.6
Tax-advantaged	47.4	46.9	46.2	42.1
	114.4	115.0	117.2	108.7
Subaccounts				
Subaccounts	5.4	4.9	1.9	1.5
Total	119.8	119.9	119.1	110.2

Total accounts serviced at June 30, 2008 were 119.8 million, a decrease of 100,000 accounts as compared to March 31, 2008, an increase of 700,000 accounts or 0.6% from December 31, 2007 and an increase of 9.6 million accounts or 8.7% as compared to June 30, 2007.

Edgar Filing: DST SYSTEMS INC - Form 10-Q

Registered accounts represent individually registered shareowner accounts (both tax-advantaged and non tax-advantaged) on the books of the transfer agent. Total registered accounts decreased 600,000 accounts or 0.5% from the comparable amount at March 31, 2008, comprised of conversions to non-DST subaccounting platforms of 1.6 million and conversions to DST's subaccounting platform of 200,000, partially offset by net account growth of existing clients of 1.1 million and new client account conversions of 100,000. The 2.8 million decrease in total registered accounts from December 31, 2007 is comprised of conversions to non-DST subaccounting platforms of 5.0 million, conversions to DST subaccounting platform of 0.3 million, partially offset by account growth from existing clients of 1.9 million and new client account conversions of 0.6 million. The 5.7 million increase in total registered accounts from June 30, 2007 is primarily attributable to new account conversions and account growth from existing clients.

Table of Contents

Tax-advantaged accounts are comprised of accounts used for individual and corporate retirement savings plans and for individual education savings plans. Included in tax-advantaged accounts are Individual Retirement Accounts or IRAs, defined contribution retirement accounts, and Educational Savings Plan Accounts, which include both Coverdell and Section 529 college plan savings accounts. Tax-advantaged accounts were 47.4 million at June 30, 2008, an increase of 500,000 or 1.1% as compared to March 31, 2008 and an increase of 1.2 million or 2.6% as compared to December 31, 2007. The increase is primarily attributable to net account growth from existing clients. The 5.3 million increase in tax-advantaged accounts serviced from June 30, 2007 is primarily attributable to new account conversions and account growth from existing clients. Tax-advantaged accounts represent 41.4% of total registered accounts serviced at June 30, 2008.

Subaccounts represent individual mutual fund account positions maintained on behalf of broker/dealers using DST's subaccounting platform (TA2000 Subaccounting). Subaccounts serviced were 5.4 million at June 30, 2008, an increase of 0.5 million subaccounts or 10.2% as compared to March 31, 2008. The 0.5 million increase in subaccounts serviced during the three months ended June 30, 2008 is comprised of conversions of new subaccounting clients of 0.2 million from non-DST platforms, conversions of 0.2 million registered accounts from TA2000 and net account growth from existing subaccounting clients of 0.1 million. The 3.5 million increase in total subaccounts from December 31, 2007 is comprised of 3.1 million of conversions of new subaccounting clients from non-DST platforms, conversions of 0.3 million of registered accounts from TA2000 and net account growth from existing subaccounting clients of 0.1 million.

During the quarter ended June 30, 2008, DST received two new client commitments totaling approximately 0.2 million registered accounts and 0.3 million subaccounts, based on current levels. The Company anticipates that 1.9 million new registered accounts will convert to TA2000 in third quarter 2008 and 0.2 million new registered accounts will convert in first quarter 2009. The Company also anticipates that 1.3 million registered accounts will convert to subaccounting platforms during the remainder of 2008, of which 0.8 million will convert to TA2000 Subaccounting and 0.5 million will convert to non-DST subaccounting platforms. The Company also expects that 3.7 million new subaccounts will convert to TA2000 Subaccounting from non-DST platforms in 2008 and 0.3 million new client subaccounts will convert during 2009 and 2010.

In summary, based on accounts serviced at June 30, 2008 and the conversion activity previously described (and without taking into account any other changes in accounts serviced during the remainder of 2008), total accounts serviced at December 31, 2008 are estimated to be 124.9 million, which are comprised of 115.0 million registered accounts and 9.9 million subaccounts. The actual number of accounts estimated to convert to and from various DST systems, as well as the timing of those events, is dependent upon a number of factors. Actual results could differ from the Company's estimates.

Defined contribution (DC) participants represent the number of participants processed on DST's TA2000/TRAC platform. DC participants were 4.5 million at June 30, 2008, a decrease of 0.4 million or 8.2% compared to March 31, 2008 and an increase of 0.3 million or 7.1% from June 30, 2007. The decline in participants during second quarter 2008 represents a seasonal movement of terminated participants and new participant enrollments. The Company has also received notice that an existing TRAC client will internalize its participant accounting which will result in the loss of approximately 1.0 million participants in third quarter 2008.

Active U.S. AWD workstations were 93,700 at June 30, 2008, an increase of 1.0% over March 31, 2008 levels and an increase of 1.6% as compared to December 31, 2007.

International operating revenues for the three months ended June 30, 2008 were \$39.5 million an increase of \$0.1 million, as compared to the same period in 2007, primarily from higher international professional services revenue, mostly offset by lower AWD and investment

Edgar Filing: DST SYSTEMS INC - Form 10-Q

management accounting software and service revenues, primarily from reduced demand. International operating revenues for the six months ended June 30, 2008 were \$77.4 million, a decrease of \$1.5 million, as compared to the same period in 2007, primarily from lower AWD and investment management license fees and service revenues, partially offset by higher international professional

Table of Contents

services revenues. Active international AWD workstations were 35,600 at June 30, 2008, an increase of 0.3% as compared to March 31, 2008 and December 31, 2007 levels.

Financial Services Segment software license fee revenues are derived principally from DST International (investment management systems), AWD (workflow management and CRM solutions) and DST Health Solutions (medical claims processing systems). Operating revenues include approximately \$15.6 million and \$26.7 million of software license fee revenues for the three and six months ended June 30, 2008, an increase of \$2.9 million and a decrease of \$2.7 million, respectively, compared to the same periods in 2007. The increase during the three months ended June 30, 2008 is attributable to higher AWD software license fees, partially offset by lower investment management software license fees. The decrease during the six months ended June 30, 2008 is primarily attributable to lower investment management software license fees. While license revenues are not a significant percentage of DST's total operations, they can significantly impact earnings in the period in which they are recognized. Revenues and operating results from individual license sales depend heavily on the timing, size and nature of the contract.

Costs and expenses

Financial Services Segment costs and expenses (including OOP costs) during the three and six months ended June 30, 2008 increased \$11.4 million or 5.5% and \$17.1 million or 4.1%, respectively, compared to the same periods in 2007. Costs and expenses in the Financial Services Segment are primarily comprised of compensation and benefits costs, reimbursable operating expenses and other costs. Reimbursable operating expenses included in costs and expenses were \$19.0 million and \$36.8 million during the three and six months ended June 30, 2008, an increase of \$3.8 million and \$5.3 million, respectively, as compared to the same periods in 2007. Excluding reimbursable operating expenses, costs and expenses increased \$7.6 million during the three months ended June 30, 2008 to \$199.7 million, primarily from higher personnel and travel costs incurred to support new business growth, partially offset by lower ASI merger integration costs in 2008. Excluding reimbursable operating expenses, costs and expenses increased \$11.8 million during the six months ended June 30, 2008 to \$397.2 million, for the same reasons mentioned above.

Depreciation and amortization

Financial Services Segment depreciation and amortization costs for the three and six months ended June 30, 2008 increased \$1.1 million or 5.7% and \$2.6 million or 6.9%, respectively, as compared to the same periods in 2007. The increase was primarily from depreciation expense on new asset additions.

Income from operations

Financial Services Segment income from operations for the three and six months ended June 30, 2008 was \$74.5 million and \$143.9 million, an increase of \$5.6 million or 8.1% and \$11.2 million or 8.4%, respectively, as compared to the same periods in 2007, primarily from higher mutual fund shareowner processing services, partially offset by lower software license fee revenues, lower contributions from international operations and higher depreciation expense.

OUTPUT SOLUTIONS SEGMENT

Revenues

Output Solutions Segment total revenues for the three and six months ended June 30, 2008 were \$258.4 million and \$540.3 million, a decrease of \$11.9 million or 4.4% and \$22.0 million or 3.9%, respectively, as compared to the same periods in 2007. Output Solutions Segment operating revenues for the three and six months ended June 30, 2008 were \$131.1 million and \$273.8 million, a decrease of \$4.7 million or 3.5% and \$11.2 million or 3.9%, respectively, as compared to the same periods in 2007, primarily from lower U.S. images produced and a contract termination fee of \$3.1 million recorded in 2007. Out-of-pocket revenues for the three and six months ended June 30, 2008

Table of Contents

were \$127.3 million and \$266.5 million, a decrease of \$7.2 million or 5.4% and \$10.8 million or 3.9%, respectively, as compared to the same periods in 2007, attributable to changes in customer postage programs.

Output Solutions Segment images produced for the three and six months ended June 30, 2008 totaled 3.4 billion and 7.2 billion, a decrease of 1.0 billion or 22.7% and 1.4 billion or 16.3%, respectively, as compared to the same periods in 2007. The decrease in images is due to certain telecommunications clients reducing the amount of transaction information included on invoices thereby lowering total images produced. The Company expects this trend to continue in 2008. If the amount of detail included in these billing statements declines in the future, this could reduce the number of pages included in a package mailed, which may adversely impact Output Solutions revenues and profitability. Operating revenue per image increased 23.9% from second quarter 2007.

Items mailed during the three and six months ended June 30, 2008 totaled 575.2 million and 1,193.6 million, an increase of 3.8% and 3.4%, respectively, as compared to the same periods in 2007 primarily due to the conversion of a new telecommunications client during fourth quarter 2007 and higher volumes from other existing clients. Items mailed are reflective of the number of our clients underlying accounts/subscribers/customers who receive their communications via paper.

Costs and expenses

Output Solutions Segment costs and expenses (including OOP costs) during the three and six months ended June 30, 2008 decreased \$10.6 million or 4.2% and \$19.8 million or 3.8%, respectively, as compared to the same periods in 2007. Costs and expenses in the Output Solutions Segment are primarily comprised of reimbursable operating expenses, compensation and benefits costs, material costs (principally paper and ink) and other operating costs. Reimbursable operating expenses included in costs and expenses were \$127.3 million and \$266.5 million during the three and six months ended June 30, 2008, a decrease of \$7.2 million and \$10.8 million, respectively, as compared to 2007, attributable to changes in customer postage programs. Excluding reimbursable operating expenses, costs and expenses decreased \$3.4 million during the three months ended June 30, 2008 to \$114.2 million, primarily from lower material and lower leased equipment costs resulting from the implementation of owned digital print and insertion technologies, partially offset by higher compensation and benefit related costs. Excluding reimbursable operating expenses, costs and expenses decreased \$9.0 million during the six months ended June 30, 2008 to \$233.9 million, for the same reasons mentioned above.

Depreciation and amortization

Output Solutions Segment depreciation and amortization during the three and six months ended June 30, 2008 decreased \$1.2 million or 11.2% and \$1.8 million or 8.8%, respectively, compared to the same periods in 2007. The decrease during the three months ended June 30, 2008 is due to certain assets becoming fully depreciated during the period. The decrease during the six months ended June 30, 2008 is attributable to certain assets becoming fully depreciated during the period and from the Company's use of accelerated depreciation methods on printers and inserters.

Income from operations

Edgar Filing: DST SYSTEMS INC - Form 10-Q

Output Solutions Segment income from operations for the three months ended June 30, 2008 was \$7.4 million, a decrease of \$0.1 million or 1.3%, as compared to the same period in 2007. Decreases in operating revenues during the quarter were substantially offset by lower costs and expenses and lower depreciation and amortization. Output Solutions Segment income from operations for the six months ended June 30, 2008 was \$21.2 million, a decrease of \$0.4 million or 1.9%, as compared to the same period in 2007, primarily for the same reasons mentioned above and a contract termination fee of \$3.1 million recorded in 2007.

Table of Contents

INVESTMENTS AND OTHER SEGMENT

Revenues

Investments and Other Segment total revenues, including out-of-pocket reimbursements, were \$15.2 million and \$30.3 million for the three and six months ended June 30, 2008, a decrease of \$0.6 million or 3.8% and \$1.4 million or 4.4%, respectively, as compared to the same periods in 2007. Revenues are primarily derived from real estate activities. The majority of the real estate revenues are derived from the lease of facilities to the Company's other business segments. Operating revenues (excluding out-of-pocket reimbursements) were \$15.1 million and \$30.1 million for the three and six months ended June 30, 2008, a decrease of \$0.6 million or 3.8% and \$1.4 million or 4.4%, respectively, as compared to the same periods in 2007, primarily due to reduced rental income resulting from the sale of office buildings in second quarter 2007 and the sale of other properties in first quarter 2007.

Costs and expenses

Occupancy costs are the single largest costs included in costs and expenses in the Investments and Other Segment. Investments and Other Segment costs and expenses increased \$12.0 million and \$12.1 million during the three and six months ended June 30, 2008, respectively, as compared to the same periods in 2007. Included in costs and expenses during the three and six months ended June 30, 2007 is a \$12.4 million gain resulting from the sale of office buildings. Absent this gain, costs and expenses decreased \$0.4 million and \$0.3 million during the three and six months ended June 30, 2008, respectively, attributable to lower rental activities in 2008.

Depreciation and amortization

Investments and Other Segment depreciation and amortization decreased \$0.3 million and \$0.6 million during the three and six months ended June 30, 2008, respectively, as compared to the same periods in 2007, primarily from sale of properties in 2007.

Income from operations

Investments and Other Segment income from operations was \$3.1 million and \$6.0 million for the three and six months ended June 30, 2008, a decrease of \$12.3 million or 79.9% and \$12.9 million or 68.3%, respectively, compared to the same periods in 2007, primarily attributable to a \$12.4 million gain from the sale of office buildings in the second quarter 2007, lower rental income associated with the sale of properties, partially offset by lower depreciation expense.

Table of Contents

LIQUIDITY AND CAPITAL RESOURCES

Sources and Uses of Cash

The Company's primary source of liquidity has historically been cash provided by operations. Principal uses of cash are operations, reinvestment in the Company's proprietary technologies, capital expenditures, stock repurchases, and payments on debt. Information on the Company's consolidated cash flows for the six months ended June 30, 2008 and 2007 is presented in the Condensed Consolidated Statement of Cash Flows, categorized by operating activities, investing activities, and financing activities.

Operating Activities

Cash flows provided by operating activities were \$207.8 million and \$351.6 million for the six months ended June 30, 2008 and 2007, respectively. The decrease in operating cash flows during 2008 is attributable to lower activity under the accounts receivable securitization program, higher payments of accounts payable and accrued liabilities (including accrued compensation and benefits) and higher payments of income taxes, partially offset by decreases in accounts receivable. The Company had \$115.4 million of cash and cash equivalents at June 30, 2008, an increase of \$6.0 million from December 31, 2007. Operating cash flows during 2008 resulted principally from net income of \$122.1 million and non-cash items included in the determination of net income, including depreciation and amortization expense of \$61.6 million and equity in earnings of unconsolidated affiliates of \$20.3 million. Significant working capital related adjustments to net income include decreases in accounts payable and accrued liabilities of \$38.1 million, decreases in accounts receivable of \$36.3 million, increases in income taxes payable of \$10.6 million and proceeds from accounts receivable securitizations of \$30.0 million.

Cash Management Service

The Company provides a cash management service for full service mutual fund transfer agency clients, whereby end of day available client bank balances are invested overnight by and in the name of the Company into credit-quality money market funds. All invested balances are returned to the full service mutual fund transfer agency client accounts the following business day. The Company had \$151.1 million and \$177.4 million of mutual fund transfer agency client investments and deposits at June 30, 2008 and December 31, 2007, respectively.

Investing Activities

Cash flows used by investing activities were \$38.4 million and \$8.5 million during the six months ended June 30, 2008 and 2007, respectively. Proceeds from the collection of the remaining Asurion sale proceeds and higher proceeds from the sale of investments during 2008 were more than offset by higher advances to unconsolidated affiliates and lower proceeds from the sale of properties.

Edgar Filing: DST SYSTEMS INC - Form 10-Q

The Company advanced \$34.9 million to unconsolidated affiliates during the six months ended June 30, 2008, including \$34.5 million to an unconsolidated real estate joint venture, but received net proceeds in the amount of \$33.2 million principally from the repayment of loans by unconsolidated affiliates during the six months ended June 30, 2007. Related to the \$34.5 million advance during the six months ended June 30, 2008, the other partner in the joint venture guaranteed 60% of the balance of this loan, which is secured by real estate, has variable rates of interest and matures on December 31, 2012. DST determined that this unconsolidated real estate joint venture is not a variable interest entity and, as a result, should not be consolidated.

Table of Contents*Capital Expenditures*

The following table summarizes capital expenditures by segment (in millions):

	For the Six Months Ended June 30,			
	2008		2007	
Financial Services Segment	\$	21.3	\$	24.7
Output Solutions Segment		9.9		11.8
Investments and Other Segment		7.0		8.5
	\$	38.2	\$	45.0

Investments and Other Segment capital expenditures are primarily buildings and building improvements. In July 2008, the Investments and Other Segment purchased the DST International Output production facility, which was previously leased, and office buildings for approximately \$20.5 million. Future capital expenditures are expected to be funded primarily by cash flows from operating activities, secured term notes or draws from bank lines of credit, as required.

Investments

The Company made \$59.0 million of investments in available-for-sale securities and other investments during the six months ended June 30, 2008, as compared to \$73.0 million during the six months ended June 30, 2007. During the six months ended June 30, 2008, the Company received \$54.9 million from the sale of investments in available-for-sale securities and other investments as compared to \$33.9 million in the comparable 2007 period.

Proceeds from the Sale of Asurion

DST sold the majority of its equity interest in Asurion on July 3, 2007 and received cash proceeds of \$986.3 million and estimated receivables of approximately \$39.2 million. The receivable was paid in full in June 2008.

Financing Activities

Cash flows used by financing activities were \$163.4 million and \$309.4 million for the six months ended June 30, 2008 and 2007, respectively. Cash outflows from share repurchases of \$521.3 million were offset by \$388.2 million of cash inflows from borrowings on revolving credit facilities during the six months ended June 30, 2008 as compared to cash outflows from share repurchases of \$297.9 million and borrowings on revolving credit lines of \$74.3 million during the six months ended June 30, 2007.

Common Stock Issuances and Repurchases

The Company received proceeds of \$3.7 million and \$66.8 million from the issuance of common stock upon the exercise of employee stock options during the six months ended June 30, 2008 and 2007, respectively. The decrease in proceeds from stock option exercises is attributable to lower volumes of stock options exercised in 2008 as compared to the 2007 period.

On May 12, 2008, DST's Board of Directors authorized the repurchase of an additional 5.0 million shares under the existing share repurchase authorization plan. The plan allows, but does not require, the repurchase of common stock in open market and private transactions through December 31, 2009. The Company may enter into one or more plans with its brokers or banks for pre-authorized purchases within defined limits pursuant to Rule 10b5-1 to affect all or a portion of such share repurchases. The Company repurchased approximately 7,623,665

Table of Contents

shares of DST common stock for \$516.6 million or approximately \$67.76 per share during the six months ended June 30, 2008. Cash flows from operations and borrowings on debt facilities were used to repurchase these shares. At June 30, 2008, the Company had approximately 4.2 million shares remaining under the existing share repurchase authorization plan.

Payments made for tax withholding obligations arising from the exercise of options to purchase the Company's stock are included in common stock repurchased in the Condensed Consolidated Statement of Cash Flows. The amount of such share withholdings for option exercises was \$4.7 million and \$38.8 million during the six months ended June 30, 2008 and 2007, respectively.

Off Balance Sheet Obligations

As of June 30, 2008, the Company had no material off balance sheet arrangements, other than the Company's accounts receivable securitization program. On May 22, 2008, the Company renewed its \$200 million accounts receivable securitization program with a third party multi-seller asset-backed commercial paper conduit. The first amendment to the receivables purchase agreement (originally dated May 24, 2007) extends the conduit's purchase commitment until May 21, 2009. At June 30, 2008 and December 31, 2007, the total outstanding undivided interest in the receivables held by the conduit was \$100 million and \$70 million, respectively.

Financing Sources

The Company has used the following primary sources of financing: the syndicated line of credit facility; convertible debentures; subsidiary line of credit facilities; secured promissory notes; and loans from unconsolidated affiliates. The Company has also utilized bridge loans to augment the above sources of debt financing. The Company's borrowings under its line of credit facilities increased \$388.2 million during the six months ended June 30, 2008. The Company had \$1,416.6 million and \$1,061.1 million of debt outstanding at June 30, 2008 and December 31, 2007, respectively.

Senior Convertible Debentures

Holders of the Company's senior convertible debentures were eligible to convert these bonds during the three months ended March 31, 2008 and June 30, 2008 as a result of DST's common stock trading above 120% of the applicable conversion price (\$49.08) for at least 20 trading days during the period of 30 consecutive trading days ended December 31, 2007 and March 31, 2008. Actual conversions for the six months ended June 30, 2008 have been less than \$0.1 million and the Company used cash to settle the principal portion of these conversions. The senior debentures continue to be convertible through September 30, 2008 as the stock price conversion feature was still in effect at June 30, 2008. Conversion rights, and ultimate classification as a current or non-current liability, for subsequent quarters will be a function of future DST stock prices. At June 30, 2008 and December 31, 2007, the Company had \$839.8 million of senior convertible debentures outstanding all of which is classified as a current liability.

On July 10, 2008, the Company announced a notice of put right in connection with \$300 million aggregate principal amount of 3.625% Series B convertible senior debentures due 2023. Series B convertible senior debenture holders may require the Company to purchase the debentures on

Edgar Filing: DST SYSTEMS INC - Form 10-Q

August 15, 2008, for cash, at a purchase price equal to the accreted principal amount of the debentures to be purchased plus any accrued and unpaid cash interest to August 15, 2008. Should any puts occur, the Company anticipates funding the purchases by using cash flow from operations, available cash, capacity under credit facilities, or investments.

Syndicated Line of Credit

The Company amended its \$600 million syndicated line of credit facility as of June 16, 2008 to extend an expiring provision that allowed liens on real property securing indebtedness. At June 30, 2008 and December 31, 2007, the Company had \$438.9 million and \$48.7 million, respectively, of indebtedness under the syndicated line of credit facility.

Table of Contents

Equipment Credit Facility

The Company entered into a \$50 million unsecured credit facility with a vendor in June 2008. Proceeds from loans made under the credit facility can be used to make purchases of the vendor's eligible equipment, software or services. Loans under this credit facility must be made prior to June 30, 2010, the draw period termination date. The maturity date for each loan under this credit facility is the earlier of i) the first day of the second calendar month following the third anniversary of the loan date or ii) August 1, 2013. Interest rates applicable to the loans under this credit facility are generally based on offshore LIBOR rate plus an applicable margin of 0.40% to 0.85%. The applicable margin is based on a grid schedule that adjusts borrowing costs up or down based upon the Company's consolidated leverage ratio. At June 30, 2008, \$0.4 million was outstanding under the equipment credit facility.

Overall Liquidity

The Company believes that its existing cash balances and other current assets, together with cash provided by operating activities and, as necessary, the Company's bank and revolving credit facilities, will suffice to meet the Company's operating and debt service requirements and other current liabilities for at least the next 12 months. Further, the Company believes that its longer term liquidity and capital requirements will also be met through cash provided by operating activities, bank credit facilities and available-for-sale securities.

Guarantees

The Company has guaranteed certain obligations of certain joint ventures under service agreements entered into by the joint ventures and their customers. The amount of such obligations is not stated in the agreements. Depending on the negotiated terms of the guaranty and/or the underlying service agreement, the Company's liability under the guaranty may be subject to time and materiality limitations, monetary caps and other conditions and defenses.

In certain instances in which the Company licenses proprietary systems to customers, the Company gives certain warranties and infringement indemnities to the licensee, the terms of which vary depending on the negotiated terms of each respective license agreement, but which generally warrant that such systems will perform in accordance with their specifications. The amount of such obligations is not stated in the lease agreements. The Company's liability for breach of such warranties may be subject to time and materiality limitations, monetary caps and other conditions and defenses.

From time to time, the Company enters into agreements with unaffiliated parties containing indemnification provisions, the terms of which vary depending on the negotiated terms of each respective agreement. The amount of such obligations is not stated in the agreements. The Company's liability under such indemnification provisions may be subject to time and materiality limitations, monetary caps and other conditions and defenses. Such indemnity obligations include the following:

The Company has entered into purchase and service agreements with its vendors, and consulting agreements with providers of consulting services to the Company, pursuant to which the Company has agreed to indemnify certain of such vendors and consultants, respectively, against

Edgar Filing: DST SYSTEMS INC - Form 10-Q

third party claims arising from the Company's use of the vendor's product or the services of the vendor or consultant.

In connection with the acquisition or disposition of subsidiaries, operating units and business assets by the Company, the Company has entered into agreements containing indemnification provisions, the terms of which vary depending on the negotiated terms of each respective agreement, but which are generally described as follows: (i) in connection with acquisitions made by the Company, the Company has agreed to indemnify the seller against third party claims made against the seller relating to the subject subsidiary, operating unit or asset and arising after the closing of the transaction, and (ii) in connection with dispositions made by the Company, the Company has agreed to indemnify the buyer against damages incurred by the buyer due to the buyer's reliance on representations and warranties relating to the subject subsidiary, operating unit or business assets in the disposition agreement if such representations or warranties were untrue when made, or due to any breach of the representations, warranties, agreements or covenants contained in the agreement.

Table of Contents

The Company has entered into agreements with certain third parties, including banks and escrow agents, which provide software escrow, fiduciary and other services to the Company or to its benefit plans or customers. Under such agreements, the Company has agreed to indemnify such service providers for third party claims relating to the carrying out of their respective duties under such agreements.

The Company has entered into agreements with lenders providing financing to the Company pursuant to which the Company agrees to indemnify such lenders for third party claims arising from or relating to such financings. In connection with real estate mortgage financing, the Company has entered into environmental indemnity agreements in which the Company has agreed to indemnify the lenders for any damage sustained by the lenders relating to any environmental contamination on the subject properties.

In connection with the acquisition or disposition of real estate by the Company, the Company has entered into real estate contracts containing indemnification provisions, the terms of which vary depending on the negotiated terms of each respective contract, but which are generally described as follows: (i) in connection with acquisitions by the Company, the Company has agreed to indemnify the seller against third party claims made against the seller arising from the Company's on-site inspections, tests and investigations of the subject property made by the Company as part of its due diligence and against third party claims relating to the operations on the subject property after the closing of the transaction, and (ii) in connection with dispositions by the Company, the Company has agreed to indemnify the buyer for damages incurred by the buyer due to the buyer's reliance on representations and warranties relating to the subject property made by the Company in the real estate contract if such representations or warranties were untrue when made and against third party claims relating to operations on the subject property prior to the closing of the transaction.

In connection with the leasing of real estate by the Company, as landlord and as tenant, the Company has entered into occupancy leases containing indemnification provisions, the terms of which vary depending on the negotiated terms of each respective lease, but which are generally described as follows: (i) in connection with leases in which the Company is the tenant, the Company has agreed to indemnify the landlord against third party claims relating to the Company's occupancy of the subject property, including claims arising from loss of life, bodily injury and/or damage to property thereon, and (ii) in connection with leases in which the Company is the landlord, the Company has agreed to indemnify the tenant against third party claims to the extent occasioned wholly or in part by any negligent act or omission of the Company or arising from loss of life, bodily injury and/or damage to property in or upon any of the common areas or other areas under the Company's control.

At June 30, 2008 and December 31, 2007, the Company had not accrued any liability on the aforementioned guarantees or indemnifications as they relate to future performance criteria or indirect guarantees of indebtedness of others in accordance with FIN 45, Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others.

OTHER

Comprehensive income (loss)

The Company's comprehensive loss totaled \$44.1 million and \$28.8 million for the three and six months ended June 30, 2008, respectively, as compared to comprehensive income of \$125.9 million and \$209.9 million for the three and six months ended June 30, 2007. Comprehensive income (loss) includes net income of \$49.9 million and \$122.1 million for the three and six months ended June 30, 2008, respectively, as

Edgar Filing: DST SYSTEMS INC - Form 10-Q

compared to \$72.8 million and \$138.2 million for the three and six months ended June 30, 2007, and other comprehensive loss of \$94.0 million and \$150.9 million for the three and six months ended June 30, 2008, respectively, as compared to other comprehensive income of \$53.1 million and \$71.7 million for the three and six months ended June 30, 2007. Other comprehensive income consists of unrealized gains and losses on available-for-sale securities, net of deferred taxes, reclassifications for net gains and losses included in net income, foreign currency translation adjustments, and the Company's share of an unconsolidated affiliate interest rate swap. The principal difference between net income and comprehensive income is the net change in unrealized gains and losses on available-for-sale securities.

Table of Contents

Other than temporary impairments

At June 30, 2008, the Company's available-for-sale securities had unrealized holding losses of \$14.0 million. If it is determined that a reduction in a security's net realizable value is other than temporary, a realized loss will be recognized in the statement of operations and the cost basis of the security reduced to its estimated fair value. The Company does not believe that the unrealized losses at June 30, 2008 are other than temporary.

The Company recognized investment impairments which the Company believed were other than temporary of \$15.8 million and \$26.0 million for the three and six months ended June 30, 2008, respectively, as compared to \$1.5 million and \$2.0 million for the same periods in 2007. The impairments were for available-for-sale and cost method investments in the Investments and Other Segment and Financial Services Segment. A decline in a security's net realizable value that is other than temporary is treated as a loss based on quoted market value and is reflected in the other income (expense), net in the condensed consolidated statement of income.

Seasonality

Generally, the Company does not have significant seasonal fluctuations in its business operations. Processing and Output Solutions volumes for mutual fund customers are usually highest during the quarter ended March 31 due primarily to processing year-end transactions and printing and mailing of year-end statements and tax forms during January. The Company has historically added operating equipment in the last half of the year in preparation for processing year-end transactions, which has the effect of increasing costs for the second half of the year. Revenues and operating results from individual license sales depend heavily on the timing and size of the contract.

Accounting Standards

Earnings Per Share

The Financial Accounting Standards Board (the FASB) previously issued an exposure draft on a proposed accounting standard that would amend SFAS No. 128, Earnings per Share (SFAS 128), to clarify guidance for mandatorily convertible instruments, the treasury stock method, contingently issuable shares, and contracts that may be settled in cash or shares.

The proposed amendment, which is designed for convergence with international accounting standards, would require the use of the if-converted method from the date of issuance of the convertible debentures. The proposed amendment would remove the ability of a company to support the presumption that the convertible securities will be satisfied in cash and not converted into shares of common stock. Accordingly, the Company's stated intention to settle conversions of its convertible debentures with cash for the principal and accrued and unpaid interest and issue common stock for any conversion value amount over the principal and accrued and unpaid interest amounts would no longer be accepted under SFAS 128, if amended as proposed. The final standard has yet to be issued. Retrospective application would be required for all changes to SFAS 128, except that retrospective application would be prohibited for contracts that were either settled in cash prior to adoption or modified prior to adoption to require cash settlement. For DST, adoption of this statement, as proposed, will require retroactive restatement of the Company's

Edgar Filing: DST SYSTEMS INC - Form 10-Q

diluted earnings per share calculations subsequent to the issuance of the convertible debentures. In calculating diluted earnings per share under the revised SFAS 128 if converted method included in the exposure draft, the Company would need to increase net income for the interest expense associated with the convertible debentures, net of tax, and increase the incremental shares assumed to be issued upon conversion by 17.1 million shares (less shares already included in diluted earnings per share), the amount of shares that would be issued if all \$840 million of convertible debentures would be converted to equity. Under this if converted method, diluted earnings per share would have been \$0.77 and \$0.94 (versus reported diluted earnings per share of \$0.86 and \$1.01) for the three months ended June 30, 2008 and 2007, respectively, and \$1.79 and \$1.77 (versus reported diluted earnings per share of \$2.00 and \$1.91) for the six months ended June 30, 2008 and 2007, respectively. The above pro-forma information presents only the effect on diluted earnings per share of the if converted method included in the exposure draft, but does not include any

Table of Contents

other computational changes (e.g., treasury stock method considerations) discussed in the exposure draft. DST is continuing to monitor the FASB's progress towards finalizing this proposed accounting standard.

The proposed change in accounting principle would affect the calculation of diluted earnings per share during the period the debentures are outstanding, but would not affect DST's ability to ultimately settle the convertible debentures in cash, shares or any combination thereof.

The estimated impact of this new accounting standard reflects the Company's current estimates based upon the exposure draft in its current form. There may be material differences between these estimates and the actual impact of the standard when issued as final.

Accounting for Convertible Debt Instruments

In May 2008, the FASB issued FASB Staff Position (FSP) No. APB 14-1, Accounting for Convertible Debt Instruments that may be Settled in Cash upon Conversion (Including Partial Cash Settlement). This FSP clarifies that issuers of convertible debt instruments that may be settled in cash upon conversion (including partial cash settlement) should separately account for the liability and equity components in a manner that will reflect the entity's nonconvertible debt borrowing rate when interest cost is recognized in subsequent periods. The FSP will be effective for financial statements issued for fiscal years beginning after December 15, 2008, and early adoption is not permitted. This FSP shall be applied retrospectively to all periods presented. DST is still evaluating the impact of this FSP and currently believes that the adoption of this proposed standard would result in higher interest expense on DST's senior convertible debentures and may cause the separation of the debt and equity components of the senior convertible debentures on the Condensed Consolidated Balance Sheet.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

In the operations of its businesses, the Company's financial results can be affected by changes in equity pricing, interest rates and currency exchange rates. Changes in interest rates and exchange rates have not materially impacted the consolidated financial position, results of operations or cash flow of the Company. Changes in equity values of the Company's investments have had a material effect on the Company's comprehensive income and consolidated financial position.

Available-for-sale equity price risk

The Company's investments in available-for-sale equity securities are subject to price risk. The fair value of the Company's available-for-sale investments as of June 30, 2008 was approximately \$1.2 billion. The impact of a 10% change in fair value of these investments would be approximately \$75.5 million to comprehensive income. As discussed under Management's Discussion and Analysis of Financial Condition and Results of Operations - Comprehensive income (loss) above, net unrealized gains on the Company's investments in available-for-sale securities have had a material effect on the Company's comprehensive income and consolidated financial position.

Interest rate risk

The Company and certain of its joint ventures derive a certain amount of their service revenues from investment earnings related to cash balances maintained in transfer agency customer bank accounts for which the Company is the agent. The balances maintained in the bank accounts are subject to fluctuation. At June 30, 2008, the Company and its joint ventures had approximately \$1.5 billion of cash balances maintained in such accounts, of which \$1.4 billion was maintained at the joint ventures. The Company estimates that a 50 basis point change in interest earnings rate would increase or decrease consolidated net income, on an annual basis, by approximately \$2.1 million.

At June 30, 2008, the Company had approximately \$1.4 billion of debt, of which \$539.9 million was subject to variable interest rates (Federal Funds rates, LIBOR rates, prime rates). At June 30, 2008, the Company s

Table of Contents

proportional share of an unconsolidated affiliate's interest rate swap was a loss of \$11.7 million. The Company estimates that a 10% increase in interest rates would not be material to the Company's consolidated pretax income or to the fair value of its debt.

In addition to the financial instruments listed above, the program fees incurred on proceeds from the sale of receivables under the Company's accounts receivable securitization program are determined based on variable interest rates associated with commercial paper.

Foreign currency exchange rate risk

The operation of the Company's subsidiaries in international markets results in exposure to movements in currency exchange rates. The principal currencies involved are the British pound, Canadian dollar, Australian dollar, Thai baht and Indian rupee. Currency exchange rate fluctuations have not historically materially affected the consolidated financial results of the Company. At June 30, 2008, the Company's international subsidiaries had approximately \$219.0 million in total consolidated assets, and for the three and six months ended June 30, 2008, these international subsidiaries produced approximately \$4.0 million and \$3.1 million in net loss, respectively. The Company estimates that a 10% change in exchange rates could change total consolidated assets by approximately \$21.9 million. Furthermore, a 10% change in exchange rates based upon historical earnings in international operations could change consolidated net income by approximately \$0.3 million.

The Company's international subsidiaries use the local currency as the functional currency. The Company translates all assets and liabilities at balance sheet date exchange rates and income and expense accounts at average rates during the period. While it is generally not the Company's practice to enter into derivative contracts, from time to time the Company and its subsidiaries do utilize forward foreign currency exchange contracts to minimize the impact of currency movements.

Item 4. Controls and Procedures

Disclosure Controls and Procedures

The Company maintains disclosure controls and procedures designed to ensure that information required to be disclosed in the reports it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, including without limitation, controls and procedures designed to ensure that information required to be disclosed in reports that it files under the Exchange Act is accumulated and communicated to the Company's management, including its Chief Executive and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. Based on an evaluation of the Company's disclosure controls and procedures as of the end of the period covered by this report conducted by the Company's management, with the participation of the Chief Executive and Chief Financial Officer, the Chief Executive and Chief Financial Officer believe that these controls and procedures were effective as of June 30, 2008.

Internal Control over Financial Reporting

Edgar Filing: DST SYSTEMS INC - Form 10-Q

There were no changes in the Company's internal control over financial reporting (as defined in Rules 13(a)-15(f) and 15(d)-15(f) under the Exchange Act) during the quarter ended June 30, 2008, that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Item 4T. Controls and Procedures

Not applicable.

Table of Contents

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

The Company and its subsidiaries are involved in various legal proceedings arising in the normal course of their businesses. While the ultimate outcome of such legal proceedings cannot be predicted with certainty, management believes, after consultation with legal counsel, that the final outcome in such proceedings, in the aggregate, would not have a material adverse effect on the consolidated financial condition, results of operations or cash flows of the Company.

Item 1A. Risk Factors

There are many risks and uncertainties that can affect our future business, financial performance or share price. Many of these are beyond our control. A description follows of some of the important factors that could have a material negative impact on our future business, operating results, financial condition or share price. This discussion includes a number of forward-looking statements. You should refer to the description of the qualifications and limitations on forward-looking statements in the first paragraph under Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations of this Form 10-Q. The risk factors have not changed materially from the date of our annual report on Form 10-K for the year ended December 31, 2007.

Unless otherwise indicated or the context otherwise requires, reference in this section to we, ours, us or similar terms means the Company, together with its subsidiaries. The level of importance of each of the following trends and risks may vary from time to time, and the trends and risks are not listed in any specific order of importance. These risks, however, are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or operating results.

Trends or events affecting our clients or their industries could decrease the demand for our products and services.

We derive our consolidated revenues from the delivery of products and services to clients in the mutual fund, investment management, healthcare, telecommunications and utilities, video/broadband/satellite TV, other financial service (i.e. brokerage, insurance, banking, financial planning and mortgage) and other industries. A decline or lack of growth in demand for our products and services in any of the industries we serve could adversely affect our business and earnings. Demand for our products and services among companies in those industries could decline for many reasons. Consolidation or limited growth in an industry could reduce the number of our clients and potential clients. Events that adversely affect our clients' businesses, rates of growth or numbers of customers they serve, including decreased demand for our customers products and services, adverse conditions in our customers' markets or adverse economic conditions generally, could decrease demand for our products and services and the number of transactions we process. We cannot always predict the needs of changing industries or whether potential customers will accept our products or services. Concentrating our resources based on trends or events that do not occur as we expected could negatively impact any of our various businesses.

The demand for our products and services could decrease if we do not continually address our and our clients' technology and capacity requirements.

Our clients use computer technology-based products and services in the complex and rapidly changing markets in which they operate. We must substantially invest in technology and systems to meet customer demand for transaction processing and volume capacities. If we do not meet clients' technology and capacity demands in advance of our competitors or if the investments we make are not cost-effective or do not result in successful products or services, our businesses could be adversely affected.

Table of Contents

Damage to our facilities or declining real estate values could impact our operations or financial condition.

We own, lease and manage real estate as part of our business. The performance of our services also depends upon facilities that house central computer operations or operating centers or in which we process information, images, bills or statements. Declining property values in the markets in which we own investment properties may adversely affect our financial condition. Significant damage to any of our operating facilities could interrupt the operations at those facilities and interfere with our ability to serve customers.

We may be unable to attract and retain capable technical personnel for our processing businesses or quality executives to manage the complex structure of our business.

Our success depends on recruiting and retaining adept management and personnel with expertise in software and systems development and the types of computer hardware and software we utilize. Losing key personnel or not hiring qualified personnel could have a material adverse effect on our operations. Companies in our industry compete fiercely for qualified management and technical personnel. We cannot guarantee that we will be able to adequately compete for or keep qualified personnel. Lack of qualified management could increase the risk of unfavorable business strategies, especially in a complex business like ours with multiple segments and operating entities. Lack of qualified technical personnel could also affect our ability to develop the systems and services our clients demand.

Our businesses are subject to substantial competition.

We are subject to intense competition from other established service providers in all industries we serve. Competitors may offer more appealing pricing structures. Some of our clients have developed or are developing the in-house capacity to perform the transaction processing, recordkeeping, and output services they have paid us to perform. Some of our competitors and clients have greater financial and human resources and access to capital than we do.

Our failure to successfully compete in any of our operating segments could have a material adverse effect on our financial results. Competition could also affect the revenue mix of services we provide, resulting in decreased revenues in lines of business with higher profit margins.

An increase in subaccounting services performed by brokerage firms could adversely impact our revenues.

Our mutual fund transfer agency competition includes brokerage firms that perform subaccounting services for customers who purchase or sell shares of our clients' mutual funds. A brokerage firm typically maintains an omnibus account with us that represents the aggregate number of shares of a mutual fund owned by the brokerage firm's customers. The omnibus account structure results in fewer mutual fund shareowner accounts on our systems, which adversely affects our revenues.

Edgar Filing: DST SYSTEMS INC - Form 10-Q

We offer subaccounting services to brokerage firms that perform mutual fund shareowner subaccounting. As the recordkeeping functions in connection with subaccounting are more limited than traditional shareowner accounting, the fees charged are generally lower on a per unit basis. There is a risk that clients who determine to use the omnibus accounting structure of brokerage firms would convert accounts currently on our traditional recordkeeping system to our subaccounting system, or to the subaccounting systems of other transfer agents, which could result in lower revenues.

We and companies in which we own a significant interest are subject to government regulation. Any regulatory violations could adversely affect our business.

A number of our businesses are subject to U.S. or foreign regulatory oversight, as well as recordkeeping and reporting obligations. Any violation of those obligations or related laws or regulations could expose us or those businesses to costly fines or sanctions or damage our reputation, which could adversely affect our business or financial performance.

Table of Contents

Our clients are subject to government regulation that could affect our business.

Our clients are subject to extensive government regulation, including investment adviser, broker/dealer and financial and healthcare privacy regulations. Any violation by our clients of applicable laws and regulations could diminish their business or financial condition and thus their demand for our products and services. Demand could also decrease if we do not continue to offer products and services that help our clients comply with regulations.

We operate internationally and are thus exposed to foreign political, economic and other conditions that could adversely affect our revenues from or support by foreign operations.

Consolidated revenues from our subsidiaries in Asia, Australia, Canada, Europe and elsewhere outside the U.S. are an important element of our revenues. Inherent risks in our international business activities could decrease our international sales and have a material adverse effect on our overall financial condition, results of operations and cash flow. These risks include potentially unfavorable foreign economic conditions, political conditions or national priorities, foreign government regulation, potential expropriation of assets by foreign governments, the failure to bridge cultural differences, and limited or prohibited access to our foreign operations and the support they provide. We may also have difficulty repatriating profits or be adversely affected by exchange rate fluctuations in our international business.

Various events may cause our financial results to fluctuate from quarter to quarter or year to year. The nature of these events might inhibit our ability to anticipate and act in advance to counter them.

We cannot always control when and whether events occur, that could cause varying financial results. Unfavorable results may occur that we did not anticipate or take advance action to address. The various reasons our quarterly and annual results may fluctuate include unanticipated economic conditions and costs for starting up significant client operations, for hiring staff, and for developing products. Our results may also vary as a result of pricing pressures, increased cost of supplies, timing of license fees, the evolving and unpredictable markets in which our products and services are sold, changes in accounting principles, and competitors' new products or services.

Our revenues and profit margins could decrease if clients cancel contracts, fail to renew contracts, renegotiate contracts or use our services at less than anticipated rates.

Client contract terminations, non-renewals, renegotiations or under- utilization of our services could decrease our revenues and profit margins. We derive revenue by selling products and services under long-term contracts. We cannot unilaterally extend the terms of these contracts when they expire. Some of these contracts contain termination for convenience clauses, which enable clients to cancel the agreements by providing written notice to us. Any failure to extend these contracts under their current terms, or any early termination of these contracts by customers, could adversely affect our business.

Claims against us, including claims for the lost market value of securities and class action claims, could cause significant liability and damage our reputation and business prospects.

Our proprietary applications and related services involve the processing of financial transactions for our clients and their customers. The dollar amount of transactions processed is vastly higher than the revenues derived from providing these services. We may be subject to damage claims, including class-action claims, for delays in transaction processing; for calculation errors, errors resulting in disclosure of confidential information, or other processing or operational errors; or for mismanagement of claims or other processes. Because of the sensitive nature of the financial and healthcare transactions we process, our liability and alleged damages may significantly exceed the fees we receive for performing the service at issue. Litigation can include class action claims based, among other theories, upon various regulatory requirements and consumer protection and privacy laws that class action plaintiffs may attempt to use to assert private rights of action. Any of these claims and related settlements

Table of Contents

or judgments could affect our profitability, damage our reputation, decrease demand for our services, or cause us to make costly operating changes.

We are substantially dependent on our intellectual property rights, and a claim for infringement or a requirement to indemnify a client for infringement could adversely affect us.

We have made substantial investments in software and other intellectual property on which our business is highly dependent. Any loss of our intellectual property rights, or any significant claim of infringement or indemnity for violation of the intellectual property rights of others, could have a material adverse effect on our financial condition, results of operations and cash flow. We rely on patent, trade secret and copyright laws, nondisclosure agreements, and other contractual and internal security measures to protect our proprietary technology. We cannot guarantee these measures will be effective. Our products and services rely on technology developed by others, including open source software, and we have no control over possible infringement of someone else's intellectual property rights by the provider of this technology. The owner of the rights could seek damages from us rather than or in addition to the persons who provide the technology to us. We could be subject at any time to intellectual property infringement claims that are costly to evaluate and defend. Our clients may also face infringement claims, allege that such claims relate to our products and services, and seek indemnification from us.

Failure to protect the confidential information of our clients could hurt our business.

We often maintain trade secrets and proprietary information, including sensitive financial and personal health information of our clients customers, electronically. A material breach of our security systems and procedures could lead to significant claims for liability, cause our customers to reconsider using our services and products, damage our reputation, or otherwise have a material adverse effect on us. We maintain systems and procedures to protect against unauthorized access to electronic information and computer viruses, but we cannot guarantee these systems and procedures will always protect us. Rapid advances in technology may prevent us from anticipating all potential security threats, and the limits of technology and skills or the prohibitive cost of more advanced security solutions might prevent us from addressing these threats.

We do not control certain businesses in which we have significant ownership.

We invest in joint ventures and other unconsolidated affiliates as part of our business strategy, and part of our net income is derived from our pro rata share of the earnings of those businesses. Despite owning significant equity interests in those companies and having directors on their boards, we do not control their operations, strategies or financial decisions. The other owners may have economic, business or legal interests or goals that are inconsistent with our goals or the goals of the businesses we co-own. Our pro rata share of any losses due to unfavorable performance of those companies could impact our financial statements.

We own interests in companies under agreements that may inhibit our ability to sell our interests and the other owners may ask us to increase our investment.

Edgar Filing: DST SYSTEMS INC - Form 10-Q

We own interests in Boston Financial Data Services, International Financial Data Services Limited Partnership, International Financial Data Services Limited, Argus Health Systems, Inc. and various real estate joint ventures. Our interests in these companies are subject to buy/sell arrangements, which may restrict our ability to sell our interests when we believe it is prudent to do so. These arrangements may also require that we purchase the other owners' interests to prevent someone else from acquiring them. The businesses or other owners may encourage us to increase our investment in or make contributions to the businesses at an inopportune time.

The financial results of our reinsurance subsidiary could be adversely affected if actual loss experience exceeds estimated loss experience.

Our subsidiary, Vermont Western Assurance, Inc., which we refer to as Vermont Western, reinsures a portion of the risk in connection with replacing lost stock certificates for registered shareholders of unrelated companies. Vermont Western utilizes underwriting procedures and actuarial advisors to assess risk and establish reserves

Table of Contents

against loss. Vermont Western does not control clients' loss experience. Vermont Western could inaccurately assess risk at any time and actual loss experience could exceed estimates. Vermont Western's results, if unfavorable, could have a material adverse effect on our financial condition, operating results or cash flow.

We hold equity investments in companies that operate in various industries, and the value of those investments could decrease.

We hold significant investments in available-for-sale equity securities of other companies or other financial interests that are subject to fluctuations in market prices. A significant decline in the value of our equity investments could have a material adverse effect on our financial condition or results of operations. We may not always be able to resell those investments at higher prices than we paid for them or than the value of the consideration used to acquire them.

Various plans, agreements, laws and organizational documents may make more difficult or prevent a change in control.

Provisions in our Certificate of Incorporation, Bylaws, certain plans and agreements, and applicable laws could make it more difficult for a party to make a tender offer for our shares or complete a takeover, which is not approved by our Board of Directors. The provisions include:

- super-majority stockholder approval required for certain actions
- staggered terms for directors
- specific procedures for stockholders to nominate new directors
- cumulative voting in election of directors
- the Board's authority to issue and set the terms of preferred stock
- a stockholders' rights plan giving stockholders' rights to purchase preferred stock if certain changes in our ownership occur

- various rights of debenture holders, joint venture co-owners, lenders and certain customers and executives in the event of a change in control
- public reporting of ownership and of changes in ownership by stockholders with at least a 5% interest in us
- legal restrictions on business combinations with certain stockholders

Because of contractual commitments, a change in control could affect our operating results and weaken our management retention and incentive tools.

A change in control of the Company would trigger various rights and obligations in service agreements with our customers, in agreements governing our joint ventures, and in incentive award and employment agreements with our management. A change in control could also allow some clients to terminate their agreements with us or to obtain rights to use our processing software. We are parties to joint venture agreements that allow other co-owners to buy our equity interests if we undergo a change in control. A change in control or a termination of employment without cause or their resignation for good reason (each as defined in applicable agreements) after a change in control could accelerate certain restricted stock and other awards we have granted to our management employees. This award vesting may decrease an employee's incentive to continue employment with us. Certain executive officers have agreements with us that require us to continue to employ them for three years after a change in control or to pay certain amounts if we terminate their employment without cause or they resign.

Table of Contents

for good reason following a change in control. The executives might not be incented to achieve results for the new owners of our business, and the cost of keeping the executives on the payroll might deter potential new owners from acquiring us or hinder new owners from hiring replacement management.

Our equity incentive and stockholders rights plans could have a dilutive effect on our common stock.

Our directors, officers and certain managers have received restricted stock and options to purchase our common stock as part of their compensation. These equity grants could have a dilutive effect on our common stock. A change of control would trigger the right of stockholders under our stockholders rights plan to purchase 1/1000th shares of our preferred stock for each share of our common stock, which could be dilutive in value to common stockholders who do not exercise those rights.

Conversion of our debentures could have a dilutive effect on our common stock or affect our liquidity.

In August 2003, we issued \$840 million aggregate principal amount of convertible senior debentures. Issuing common stock to settle conversions could be dilutive to the price of our common stock, and settlement of conversions for cash could affect our financial condition, operating results and cash flow. The debentures are convertible into shares of common stock under specified circumstances, which we refer to as Conversion Triggers. We cannot accurately predict when certain Conversion Triggers outside of our control may occur. To satisfy a conversion notice subsequent to a Conversion Trigger, we must deliver our common stock unless we properly notify the holder that we will settle with cash or a combination of cash and shares of common stock. How we settle a conversion notice will depend on liquidity, financial needs, or other circumstances existing at the time of a Conversion Trigger.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Stock repurchases

The following table sets forth information with respect to shares of Company common stock purchased by the Company during the three months ended June 30, 2008.

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares That May Yet Be Purchased Under the Plans or Programs
April 1 - April 30	720,747(1)	61.73	720,200	518,756(2)
May 1 - May 31	593,067(1)	60.08	579,221	4,939,535(2)
June 1 - June 30	701,586(1)	60.75	699,000	4,240,535(2)

- (1) For the three months ended June 30, 2008, the Company purchased, in accordance with the 2005 Equity Incentive Plan (formerly the 1995 Stock Option and Performance Award Plan), 16,979 shares of its common stock for participant income tax withholding in conjunction with stock option exercises, as requested by the participants. These purchases were not made under the publicly announced repurchase plans or programs, but were allowed by the rules of the Compensation Committee of the DST Board of Directors. Of these shares, 547 shares were purchased in April 2008, 13,846 shares were purchased in May 2008 and 2,586 shares were purchased in June 2008.
- (2) On May 12, 2008, DST's Board of Directors authorized the repurchase of an additional 5.0 million shares under the existing share repurchase authorization plan. The plan allows, but does not require, the repurchase of common stock in open market and private transactions through December 31, 2009. The Company may enter into one or more plans with its brokers or banks for pre-authorized purchases within defined limits pursuant to Rule 10b5-1 to effect all or a portion of such share repurchases.

Table of Contents

Item 3. Defaults Upon Senior Securities

None.

Item 4. Submission of Matters to a Vote of Security Holders

The Company held its Annual Meeting of Stockholders on May 13, 2008. Proxies for the meeting were solicited pursuant to Regulation 14A under the Securities Exchange Act of 1934, as amended; there was no solicitation in opposition to management's nominees for directors as listed in such Proxy Statement and all such nominees were elected. Listed below is each matter voted on at the Company's Annual Meeting. Each of these matters is fully described in the Company's Definitive Proxy Statement dated March 24, 2008. A total of 48,271,995 shares of common stock, or 85.06% of the shares of Common Stock outstanding on the record date, were present in person or by proxy at the annual meeting. These shares were voted on the following matters as follows:

1) Election of three directors for terms ending in 2011:

	George L. Argyros	Thomas A. McDonnell	M. Jeannine Strandjord
For	45,433,804	45,506,046	46,949,584
Withheld	2,838,191	2,765,949	1,322,411
Total	48,271,995	48,271,995	48,271,995

The terms of office of Directors Thomas A. McCullough, William C. Nelson and Travis E. Reed will expire at the Annual Meeting of Stockholders in 2009. The terms of office of Directors A. Edward Allinson, Michael G. Fitt and Robert T. Jackson will expire at the Annual Meeting of Stockholders in 2010.

2) Ratification of the DST Audit Committee's Selection of Independent Registered Public Accounting Firm:

For	47,585,113
Against	408,908
Abstaining	277,974
Total	48,271,995

Based upon votes required for approval, each of these matters passed.

Edgar Filing: DST SYSTEMS INC - Form 10-Q

If a stockholder desires to have a proposal included in DST's Proxy Statement for the annual meeting of stockholders to be held in 2009, the Corporate Secretary of DST must receive such proposal on or before November 24, 2008, and the proposal must comply with the applicable SEC laws and rules and the procedures set forth in the DST By-laws.
