Securities registered pursuant to Section 12(b) of the Act:

Title of Class	Name of each exchange on which registered
Common Stock, \$1.00 par value	The Nasdaq Stock Market
Preferred Securities of Old Second Capital Trust I	The Nasdaq Stock Market

Securities registered pursuant to Section 12(g) of the Act:

Preferred Share Purchase Rights

(Title of Class)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Edgar Filing: OLD SECOND BANCORP INC - Form 10-K

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by Reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer
Non-accelerated filer
(Do not check if smaller reporting company)

Accelerated filer
Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Exchange Act Rule 12b-2). Yes No

The aggregate market value of the voting and non-voting common equity held by non-affiliates of the registrant, on June 30, 2010, the last business day of the registrant's most recently completed second fiscal quarter, was approximately \$26.5 million. The number of shares outstanding of the registrant's common stock, par value \$1.00 per share, was 14,058,425 at March 11, 2011.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Company's Annual Report for the fiscal year ended December 31, 2010 are incorporated by reference into Parts I, II and IV.

Portions of the Company's Proxy Statement for the 2011 Annual Meeting of Stockholders are incorporated by reference into Part III.

PART I

Item 1. Business

General

Old Second Bancorp, Inc. (the Company or the Registrant) was organized under the laws of Delaware on September 8, 1981. It is a registered bank holding company under the Bank Holding Company Act of 1956 (the BHCA). The Company's office is located at 37 South River Street, Aurora, Illinois 60507.

The Company conducts a full service community banking and trust business through its wholly owned subsidiaries, which are together referred to as the Company:

- Old Second National Bank (the Bank).
- Old Second Capital Trust I, which was formed for the exclusive purpose of issuing trust preferred securities in an offering that was completed in July 2003.
- Old Second Capital Trust II, which was formed for the exclusive purpose of issuing trust preferred securities in an offering that was completed in April 2007.
- Old Second Affordable Housing Fund, L.L.C., which was formed for the purpose of providing down payment assistance for home ownership to qualified individuals.
- Station I, LLC, a wholly owned subsidiary of Old Second National Bank, which was formed in August 2008 to hold property acquired by the Bank through foreclosure or in the ordinary course of collecting a debt previously contracted.
- Station II, LLC, a wholly owned subsidiary of Old Second National Bank, which was formed in August 2008 to hold property acquired by the Bank through foreclosure or in the ordinary course of collecting a debt previously contracted.
- River Street Advisors, LLC, a wholly-owned subsidiary of Old Second National Bank, which was formed in August 2010 to provide investment advisory/management services.

Inter-company transactions and balances are eliminated in consolidation. The Company provided financial services through its twenty-seven banking locations that are located throughout the Chicago metropolitan area. These locations included retail offices located in Cook, Kane, Kendall, DeKalb, DuPage, LaSalle, Will and southwestern Cook counties in Illinois as of December 31, 2010. The Company expanded its franchise into Cook County and the traditionally higher growth markets of the south Chicago suburbs by adding additional retail locations through acquisition in February 2008.

Business of the Company and its Subsidiaries

The Bank's full service banking businesses includes the customary consumer and commercial products and services that banks provide including demand, NOW, money market, savings, time deposit, individual retirement and Keogh deposit accounts; commercial, industrial, consumer and real estate lending, including installment loans, student loans, agricultural loans, lines of credit and overdraft checking; safe deposit operations; trust services; wealth management services, and an extensive variety of additional services tailored to the needs of individual customers, such as the acquisition of U.S. Treasury notes and bonds, the sale of traveler's checks, money orders, cashier's checks and foreign currency, direct deposit, discount brokerage, debit cards, credit cards, and other special services. The Bank also offers a full complement of electronic banking services such as Internet banking and corporate cash management products including remote deposit capture, investment sweep accounts, zero balance accounts, automated tax payments, ATM access, telephone banking, lockbox, automated clearing house transactions, account

Table of Contents

reconciliation, controlled disbursement, detail and general information reporting, wire transfers, vault services for currency and coin, and checking accounts. Commercial and consumer loans are made to corporations, partnerships and individuals, primarily on a secured basis. Commercial lending focuses on business, capital, construction, inventory and real estate lending. Installment lending includes direct and indirect loans to consumers and commercial customers. Additionally, the Bank provides a wide range of trust, investment, agency, and custodial services for individual, corporate, and not-for-profit clients. These services include the administration of estates and personal trusts, as well as the management of investment accounts for individuals, employee benefit plans, and charitable foundations. The Bank also originates residential mortgages, offering a wide range of products including conventional, government, and jumbo loans. Secondary marketing of those mortgages is also handled at the Bank.

Operating segments are components of a business about which separate financial information is available and that are evaluated regularly by the Company's management in deciding how to allocate resources and assess performance. Public companies are required to report certain financial information about operating segments. The Company's management evaluates the operations of the Company as one operating segment, Community Banking. As a result, disclosure of separate segment information is not required. The Company offers the products and services described above to its external customers as part of its customary banking business.

Market Area

The Bank is the principal operating subsidiary of the Company. The Bank's primary market area is Aurora, Illinois, its surrounding communities as well as southwestern Cook County. The city of Aurora is located in northeastern Illinois, approximately 40 miles west of Chicago. Aurora is strategically situated on U.S. Interstate 88 and is centrally located near our banking offices in Kane, Kendall, DeKalb, DuPage, LaSalle, and Will counties in Illinois. Based upon the most recent 2009 U.S. census estimates, these counties together represent a market of more than 2.4 million people. Likewise, the City of Aurora has a reported population of 197,889 residents per 2010 recently released U.S. census data. Aurora is the second largest city in the State of Illinois located primarily in Kane County but also areas in DuPage, Will and Kendall counties. Aurora saw a 38% population increase from the 2000 U.S. census count.

Lending Activities

In 2009, the Company received an investment from the U.S. Department of Treasury through the Capital Purchase Program. While the Company remains committed to using these funds to enable the Bank to continue to make loans to qualified borrowers in its market areas, management of capital and existing asset quality was emphasized over generating loan growth throughout 2010. In addition, management intends to make future reductions to portfolio concentrations in real estate in keeping with the requirements of the Memorandum of Understanding between the Bank and the OCC provided in Note 20 Regulatory & Capital Matters and Note 26 Regulatory Matters to the Consolidated Financial Statements. In 2010, the Bank originated approximately \$488.1 million in loans, which included residential mortgage loans of just over \$357.3 million that were subsequently sold to investors.

General. The Bank provides a broad range of commercial and retail lending services to corporations, partnerships, individuals and government agencies. The Bank actively markets its services to qualified borrowers. Lending officers actively solicit the business of new borrowers entering our market areas as well as long-standing members of the local business community. The Bank has established lending policies that include a number of underwriting factors to be considered in making a loan, including location, amortization, loan to value ratio, cash flow, pricing, documentation and the credit history of the borrower. The Bank's loan portfolios are comprised primarily of loans in the areas of commercial real estate, residential real estate, construction, general commercial and consumer lending.

Table of Contents

As of December 31, 2010, residential mortgages made up approximately 33% of its loan portfolio, commercial real estate loans comprised approximately 49%, construction lending comprised approximately 8%, general commercial loans comprised approximately 10%, and consumer and other lending comprised less than 1%. It is the Bank's policy to comply at all times with the various consumer protection laws and regulations including, but not limited to, the Equal Credit Opportunity Act, the Fair Housing Act, the Community Reinvestment Act, the Truth in Lending Act, and the Home Mortgage Disclosure Act. The Bank does not discriminate in application procedures, loan availability, pricing, structure, or terms on the basis of race, color, religion, national origin, sex, marital status, familial status, handicap, age (provided the applicant has the legal capacity to enter into a binding contract), whether income is derived from public assistance, whether a borrower resides, or his property is located, in a low- or moderate-income area, or whether a right was exercised under the Consumer Credit Protection Act. The Bank strives to offer all of its credit services throughout its primary market area, including low- and moderate-income areas.

Commercial Loans. As noted above, the Bank is an active commercial lender, primarily located in the Chicago metropolitan area. The areas of emphasis include loans to wholesalers, manufacturers, building contractors, developers, business services companies and retailers. The Bank provides a wide range of business loans, including lines of credit for working capital and operational purposes and term loans for the acquisition of equipment and other purposes. Collateral for these loans generally includes accounts receivable, inventory, equipment and real estate. In addition, the Bank may take personal guarantees to help assure repayment. Loans may be made on an unsecured basis if warranted by the overall financial condition of the borrower. Commercial lines of credit are generally for one year and have floating rates. Commercial term loans range principally from one to eight years with the majority falling in the one to five year range. Interest rates are primarily fixed although some have interest rates that change based on the Prime Rate or LIBOR. There was relatively no change in the percentage of the portfolio attributed to commercial loans in 2010. While management would like to continue to diversify the loan portfolio, overall demand for working capital and equipment financing was muted in our primary market areas in 2010. Repayment of commercial loans is largely dependent upon the cash flows generated by the operations of the commercial enterprise. The Bank's underwriting procedures identify the sources of those cash flows and seek to match the repayment terms of the commercial loans to the sources. Secondary repayment sources are typically found in collateralization and guarantor support.

Commercial Real Estate Loans. A large portion of the loan portfolio is comprised of commercial real estate loans. As of December 31, 2010 approximately \$387.0 million, or 47.1%, of the total commercial real estate loan portfolio of \$821.1 million was to owner occupied borrowers. A primary repayment risk for a commercial real estate loan is interruption or discontinuance of cash flows from operations. Such cash flows are usually derived from rent in the case of nonowner occupied commercial properties, and repayment could also be influenced by economic events, which may or may not be under the control of the borrower, or changes in governmental regulations that negatively impact the future cash flow and market values of the affected properties. The Bank is not focused on commercial real estate lending at this time. Repayment risk can also arise from general downward shifts in the valuations of classes of properties over a given geographic area such as the price adjustments that have been observed by the Company beginning in 2008. Property valuations could continue to be affected by changes in demand and other economic factors, which could further influence cash flows associated with the borrower and/or the property. The Bank attempts to mitigate these risks through staying apprised of market conditions and by maintaining underwriting practices that provide for adequate cash flow margins and multiple repayment sources as well as remaining in regular contact with the borrowers. In most cases, the Bank has collateralized these loans and/or has taken personal guarantees to help assure repayment. Commercial real estate loans are primarily made based on the identified cash flow of the borrower and/or the property at origination and secondarily on the underlying real estate acting as collateral. Additional credit support is provided by the borrower for most of these loans and the

Table of Contents

probability of repayment is based on the liquidation of the real estate and enforcement of a personal guarantee, if any exists.

Construction Loans. The Bank originates loans to finance the construction of residential and commercial properties located in its market area although such activity was limited in the current economic environment, as such loans in this category decreased from \$273.7 million at December 31, 2009 to \$129.6 million at December 31, 2010. The Bank uses underwriting and construction loan guidelines for financing where reputable contractors are involved. Construction loans are structured most often to be converted to permanent loans at the end of the construction phase or, infrequently, to be paid off upon receiving financing from another financial institution. Construction loans are generally limited to locally known markets and construction lending is typically based upon cost supplemented by information based on the appraised value of the property, as determined by an independent appraiser, and an analysis of the potential marketability and profitability of the project, and identification of a cash flow source to service the permanent loan, or verification of a refinancing source. Construction loans generally have terms of up to 12 months, with extensions as needed. The Bank disburses loan proceeds in increments as construction progresses and as inspections warrant.

Construction loans have traditionally afforded the Bank the opportunity to increase the interest rate sensitivity of its loan portfolio and to receive yields higher than those obtainable on ARM loans secured by existing residential properties. These higher yields corresponded to the higher risks management estimated to be associated with construction lending.

Construction development loans involve additional risks and few new development loans are being sought in the current economic environment. Development lending often involves the disbursement of substantial funds with repayment dependent, in part, on the success of the ultimate project rather than the ability of the borrower or guarantor to repay principal and interest. This involves more risk than other lending because it is based on future estimates of value and economic circumstances. While appraisals are required prior to funding, and advances are limited to the value determined by the appraisal, there is the possibility of an unforeseen event affecting the value and/or costs of the project. Development loans are primarily used for single-family developments, where the sale of lots and houses are tied to customer preferences and interest rates. If the borrower defaults prior to completion of the project, the Bank may be required to fund additional amounts so that another developer can complete the project. The Bank is located in an area where a large amount of development activity has occurred as rural and semi-rural areas were being suburbanized. This type of growth presents some economic risks should a sustained shift occur in the local demand for housing as has occurred in conjunction with recent economic conditions. The Bank has attempted to address these risks by closely monitoring local real estate activity, adhering to proper underwriting procedures, closely monitoring construction projects, and by limiting the amount of construction development lending. Activity in this sector slowed considerably with the downward economic trends in real estate and other markets that the Company has experienced since 2008. With the current rates of unemployment and downward valuations in this and other real estate sectors, the Company anticipates that both demand and lending activity will continue to be flat in 2011. Very few construction loans were made in 2009 and 2010 compared to prior years due to the unfavorable economic environment for new home sales.

Residential Real Estate Loans. Residential first mortgage loans, second mortgages, and home equity line of credit mortgages are included in this category. First mortgage loans may include fixed rate loans that are generally sold to investors. The Bank is a direct seller to Federal National Mortgage Association (FNMA), several large financial institutions, and to other investors and periodically retains servicing rights for sold mortgages. Management believes that selling of mortgage servicing can provide the Company with a relatively steady source of income. The periodic retention of such servicing rights also allows the Bank an opportunity to have regular contact with mortgage customers and can help to

Table of Contents

solidify community involvement. Other loans that are not sold include adjustable rate mortgages, lot loans, and constructions loans that are held in portfolio by the Bank. Home equity lending has continued to slow in the past year but is still a significant portion of the Bank's business.

Consumer Loans. The Bank also provides many types of consumer loans including motor vehicle, home improvement, home equity, signature loans and small personal credit lines. Consumer loans typically have shorter terms and lower balances with higher yields as compared to other loans, but generally carry higher risks of default. Consumer loan collections are dependent on the borrower's continuing financial stability, and thus are more likely to be affected by adverse personal circumstances.

Competition

The market area is highly competitive and the Bank's lines of business and activities require us to compete with many other companies. A number of these financial institutions are affiliated with large bank holding companies headquartered outside of our principal market area as well as other institutions that are based in Aurora's surrounding communities and in Chicago, Illinois. All of these financial institutions operate banking offices in the greater Aurora area or actively compete for customers within the Company's market area. The Bank also faces competition from finance companies, insurance companies, credit unions, mortgage companies, securities brokerage firms, United States Government securities, money market funds, loan production offices and other providers of financial services. Many of our non-bank competitors are not subject to the same extensive Federal regulations that govern bank holding companies and banks. Such non-bank competitors may, as a result, have certain advantages over us in providing some services.

The Bank competes for loans principally through the range and quality of the client service and responsiveness to client needs that it provides, in addition to competing on interest rates and loan fees. Management believes that its long-standing presence in the community and personal one-on-one service philosophy enhances its ability to compete favorably in attracting and retaining individual and business customers. The Bank actively solicits deposit-related clients and competes for deposits by offering personal attention, competitive interest rates, and professional services made available through practiced bankers and multiple delivery channels that fit the needs of its market.

The Bank is subject to vigorous competition from other financial institutions in the market. The bank operated 27 branches and 1 satellite facility in the seven counties of Kane, Kendall, LaSalle, Will, DeKalb, DuPage and southwestern Cook County as of December 31, 2010. As of June 30, 2010, the bank was the deposit market leader in Kane and Kendall counties where it has a concentrated number of branches, facing competition from over 216 branches representing 43 different FDIC financial institutions per June 30, 2010 FDIC share of deposit data. The Bank's branches in the remaining counties face many of these same competitors as well as competition from other non-FDIC insured credit unions and financial service firms. Competition for residential mortgage lending also includes a number of mortgage brokerage operations as well as traditional banks, thrifts and credit unions. The Bank's wealth management division includes traditional trust services as well as investment advisory, brokerage, and employee benefit administration services. This diverse array of products and services allows us to compete against other larger banks as well as specialized brokerage companies. The financial services industry is also likely to become more competitive as further technological advances enable more companies to provide financial services without having a physical presence in our market. These technological advances may diminish the importance of depository institutions and other financial intermediaries in the transfer of funds between parties.

Table of Contents

Employees

At December 31, 2010, the Company employed 522 full-time equivalent employees. The Company places a high priority on staff development, which involves extensive training, including customer service training. New employees are selected on the basis of both technical skills and customer service capabilities. None of the Company's employees are covered by a collective bargaining agreement with the Company.

Internet

The Company maintains a corporate web site at <http://www.oldsecond.com>. The Company makes available free of charge on or through its web site the Annual Report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act as soon as reasonably practicable after the Company electronically files such material with, or furnishes it to, the Securities and Exchange Commission. Many of the Company's policies, committee charters and other investor information including our Code of Business Conduct and Ethics, are available on the web site. The Company will also provide copies of its filings free of charge upon written request to: J. Douglas Cheatham, Executive Vice President and Chief Financial Officer, Old Second Bancorp, Inc., 37 South River Street, Aurora, Illinois 60507.

Table of Contents

SUPERVISION AND REGULATION

General

Financial institutions, their holding companies and their affiliates are extensively regulated under federal and state law. As a result, the growth and earnings performance of the Company may be affected not only by management decisions and general economic conditions, but also by requirements of federal and state statutes and by the regulations and policies of various bank regulatory authorities, including the Office of the Comptroller of the Currency (the OCC), the Board of Governors of the Federal Reserve System (the Federal Reserve) and the Federal Deposit Insurance Corporation (the FDIC). Furthermore, taxation laws administered by the Internal Revenue Service and state taxing authorities, accounting rules developed by the Financial Accounting Standards Board (the FASB) and securities laws administered by the Securities and Exchange Commission (the SEC) and state securities authorities have an impact on the business of the Company. The effect of these statutes, regulations, regulatory policies and accounting rules may be significant, and cannot be predicted with a high degree of certainty.

Federal and state banking laws impose a comprehensive system of supervision, regulation and enforcement on the operations of financial institutions, their holding companies and affiliates that is intended primarily for the protection of the FDIC-insured deposits and depositors of banks, rather than shareholders. These federal and state laws, and the regulations of the bank regulatory authorities issued under them, affect, among other things, the scope of business, the kinds and amounts of investments banks may make, reserve requirements, capital levels relative to operations, the nature and amount of collateral for loans, the establishment of branches, the ability to merge, consolidate and acquire, dealings with insiders and affiliates and the payment of dividends. In addition, turmoil in the credit markets in recent years prompted the enactment of unprecedented legislation that has allowed the U.S. Treasury Department to make equity capital available to qualifying financial institutions to help restore confidence and stability in the U.S. financial markets, which imposes additional requirements on institutions in which the U.S. Treasury Department invests.

The following is a summary of the material elements of the supervisory and regulatory framework applicable to the Company and Old Second National Bank (the Bank). It does not describe all of the statutes, regulations and regulatory policies that apply, nor does it restate all of the requirements of those that are described. Moreover, Congress recently enacted fundamental reforms to our bank regulatory framework, the majority of which will be implemented over time by various regulatory agencies, making their impact difficult to predict. See Financial Regulatory Reform below.

Financial Regulatory Reform

On July 21, 2010, President Obama signed the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act) into law. The Dodd-Frank Act represents a sweeping reform of the supervisory and regulatory framework applicable to financial institutions and capital markets in the United States, certain aspects of which are described below in more detail. The Dodd-Frank Act creates new federal governmental entities responsible for overseeing different aspects of the U.S. financial services industry, including identifying emerging systemic risks. It also shifts certain authorities and responsibilities among federal financial institution regulators, including the supervision of holding company affiliates and the regulation of consumer financial services and products. In particular, and among other things, the Dodd-Frank Act: creates a Bureau of Consumer Financial Protection authorized to regulate providers of consumer credit, savings, payment and other consumer financial products and services; narrows the scope of federal preemption of state consumer laws enjoyed by national banks and federal savings associations and expands the authority of state attorneys general to bring actions to

Table of Contents

enforce federal consumer protection legislation; imposes more stringent capital requirements on bank holding companies and subjects certain activities, including interstate mergers and acquisitions, to heightened capital conditions; significantly expands underwriting requirements applicable to loans secured by 1-4 family residential real property; restricts the interchange fees payable on debit card transactions for issuers with \$10 billion in assets or greater; requires the originator of a securitized loan, or the sponsor of a securitization, to retain at least 5% of the credit risk of securitized exposures unless the underlying exposures are qualified residential mortgages or meet certain underwriting standards to be determined by regulation; creates a Financial Stability Oversight Council as part of a regulatory structure for identifying emerging systemic risks and improving interagency cooperation; provides for enhanced regulation of advisers to private funds and of the derivatives markets; enhances oversight of credit rating agencies; and prohibits banking agency requirements tied to credit ratings.

Numerous provisions of the Dodd-Frank Act are required to be implemented through rulemaking by the appropriate federal regulatory agencies over the next few years. It is not clear what form such regulations will ultimately take or if certain provisions of the Dodd-Frank Act will be amended prior to their implementation. Furthermore, while the reforms primarily target systemically important financial service providers, their influence is expected to filter down in varying degrees to smaller institutions over time. As a result, in many respects, the ultimate impact of the Dodd-Frank Act will not be fully known for years, and no current assurance may be given that the Dodd-Frank Act, or any other new legislative changes, will not have a negative impact on the results of operations and financial condition of the Company and the Bank.

The Increasing Importance of Capital

While capital has historically been one of the key measures of the financial health of both holding companies and depository institutions, its role is becoming fundamentally more important in the wake of the financial crisis. Not only will capital requirements increase, but the type of instruments that constitute capital will also change, and, as a result of the Dodd-Frank Act, after a phase-in period, bank holding companies will have to hold capital under rules as stringent as those for insured depository institutions. Moreover, the actions of the international Basel Committee on Banking Supervision, a committee of central banks and bank supervisors, to reassess the nature and uses of capital in connection with an initiative called Basel III, discussed below, will likely have a significant impact on the capital requirements applicable to U.S. bank holding companies and depository institutions.

Required Capital Levels. As indicated above, the Dodd-Frank Act mandates the Federal Reserve to establish minimum capital levels for bank holding companies on a consolidated basis that are as stringent as those required for insured depository institutions. The components of Tier 1 capital will be restricted to capital instruments that are currently considered to be Tier 1 capital for insured depository institutions. As a result, the proceeds of trust preferred securities will be excluded from Tier 1 capital unless such securities were issued prior to May 19, 2010 by bank holding companies with less than \$15 billion of assets. As the Company has assets of less than \$15 billion, it will be able to maintain its trust preferred proceeds as capital but it will have to comply with new capital mandates in other respects, and it will not be able to raise Tier 1 capital in the future through the issuance of trust preferred securities.

Under current federal regulations, the Bank is subject to, and, after a phase-in period, the Company will be subject to, the following minimum capital standards: (i) a leverage requirement consisting of a minimum ratio of Tier 1 capital to total assets of 3% for the most highly-rated banks with a minimum requirement of at least 4% for all others; and (ii) a risk-based capital requirement consisting of a minimum ratio of total capital to total risk-weighted assets of 8% and a minimum ratio of Tier 1 capital to total risk-weighted assets of 4%. For this purpose, Tier 1 capital consists primarily of common stock, noncumulative perpetual preferred stock and related surplus less intangible assets (other than

Table of Contents

certain loan servicing rights and purchased credit card relationships). Total capital consists primarily of Tier 1 capital plus Tier 2 capital, which includes other non-permanent capital items such as certain other debt and equity instruments that do not qualify as Tier 1 capital and a portion of the Bank's allowance for loan and lease losses.

The capital requirements described above are minimum requirements. Federal law and regulations provide various incentives for banking organizations to maintain regulatory capital at levels in excess of minimum regulatory requirements. For example, a banking organization that is well-capitalized may qualify for exemptions from prior notice or application requirements otherwise applicable to certain types of activities, may qualify for expedited processing of other required notices or applications and may accept brokered deposits. Additionally, one of the criteria that determines a bank holding company's eligibility to operate as a financial holding company (see Acquisitions, Activities and Changes in Control below) is a requirement that all of its depository institution subsidiaries be well-capitalized. Under the Dodd-Frank Act, that requirement is extended such that, as of July 21, 2011, bank holding companies, as well as their depository institution subsidiaries, will have to be well-capitalized in order to operate as financial holding companies. Under the capital regulations of the Federal Reserve, in order to be well-capitalized a banking organization must maintain a ratio of total capital to total risk-weighted assets of 10% or greater, a ratio of Tier 1 capital to total risk-weighted assets of 6% or greater and a ratio of Tier 1 capital to total assets of 5% or greater.

Higher capital levels may also be required if warranted by the particular circumstances or risk profiles of individual banking organizations. For example, the Federal Reserve's capital guidelines contemplate that additional capital may be required to take adequate account of, among other things, interest rate risk, or the risks posed by concentrations of credit, nontraditional activities or securities trading activities. Further, any banking organization experiencing or anticipating significant growth would be expected to maintain capital ratios, including tangible capital positions (*i.e.*, Tier 1 capital less all intangible assets), well above the minimum levels. See The Bank Enforcement Actions for a discussion regarding the heightened capital requirements that the Bank has agreed to maintain.

It is important to note that certain provisions of the Dodd-Frank Act and Basel III, discussed below, will ultimately establish strengthened capital standards for banks and bank holding companies, will require more capital to be held in the form of common stock and will disallow certain funds from being included in a Tier 1 capital determination. Once fully implemented, these provisions may represent regulatory capital requirements which are meaningfully more stringent than those outlined above.

Prompt Corrective Action. A banking organization's capital plays an important role in connection with regulatory enforcement as well. Federal law provides the federal banking regulators with broad power to take prompt corrective action to resolve the problems of undercapitalized institutions. The extent of the regulators' powers depends on whether the institution in question is adequately capitalized, undercapitalized, significantly undercapitalized or critically undercapitalized, in each case as defined by regulation. Depending upon the capital category to which an institution is assigned, the regulators' corrective powers include: (i) requiring the institution to submit a capital restoration plan; (ii) limiting the institution's asset growth and restricting its activities; (iii) requiring the institution to issue additional capital stock (including additional voting stock) or to be acquired; (iv) restricting transactions between the institution and its affiliates; (v) restricting the interest rate the institution may pay on deposits; (vi) ordering a new election of directors of the institution; (vii) requiring that senior executive officers or directors be dismissed; (viii) prohibiting the institution from accepting deposits from correspondent banks; (ix) requiring the institution to divest certain subsidiaries; (x) prohibiting the payment of principal or interest on subordinated debt; and (xi) ultimately, appointing a receiver for the institution.

Table of Contents

As of December 31, 2010, the Bank exceeded its minimum regulatory capital requirements under OCC capital adequacy guidelines. However, as discussed under The Bank Enforcement Actions, the Bank has agreed with the OCC to maintain certain heightened regulatory capital ratios. As of December 31, 2010, the Bank exceeded the heightened total capital to total risk-weighted assets ratio to which it had agreed, but was not in compliance with the agreed-upon Tier 1 capital to total assets ratio. As of December 31, 2010, the Company had regulatory capital in excess of the Federal Reserve's minimum requirements.

Basel III. The current risk-based capital guidelines that apply to the Bank and will apply to the Company are based upon the 1988 capital accord of the international Basel Committee on Banking Supervision, a committee of central banks and bank supervisors, as implemented by the U.S. federal banking agencies on an interagency basis. In 2008, the banking agencies collaboratively began to phase-in capital standards based on a second capital accord, referred to as Basel II, for large or core international banks (generally defined for U.S. purposes as having total assets of \$250 billion or more or consolidated foreign exposures of \$10 billion or more). Basel II emphasized internal assessment of credit, market and operational risk, as well as supervisory assessment and market discipline in determining minimum capital requirements.

On September 12, 2010, the Group of Governors and Heads of Supervision, the oversight body of the Basel Committee on Banking Supervision, announced agreement to a strengthened set of capital requirements for banking organizations in the United States and around the world, known as Basel III. The agreement is currently supported by the U.S. federal banking agencies. As agreed to, Basel III is intended to be fully-phased in on a global basis on January 1, 2019. However, the ultimate timing and scope of any U.S. implementation of Basel III remains uncertain. As agreed to, Basel III would require, among other things: (i) an increase in minimum required common equity to 7% of total assets; (ii) an increase in the minimum required amount of Tier 1 capital from the current level of 4% of total assets to 8.5% of total assets; (iii) an increase in the minimum required amount of Total Capital, from the current level of 8% to 10.5%. Each of these increased requirements includes 2.5% attributable to a capital conservation buffer to be phased in from January 2016 until January 1, 2019. The purpose of the conservation buffer is to ensure that banks maintain a buffer of capital that can be used to absorb losses during periods of financial and economic stress. There will also be a required countercyclical buffer to achieve the broader goal of protecting the banking sector from periods of excess aggregate credit growth.

Pursuant to Basel III, certain deductions and prudential filters, including minority interests in financial institutions, mortgage servicing rights and deferred tax assets from timing differences, would be deducted in increasing percentages beginning January 1, 2014, and would be fully deducted from common equity by January 1, 2018. Certain instruments that no longer qualify as Tier 1 capital, such as trust preferred securities, also would be subject to phase-out over a 10-year period beginning January 1, 2013.

The Basel III agreement calls for national jurisdictions to implement the new requirements beginning January 1, 2013. At that time, the U.S. federal banking agencies, including the Federal Reserve and OCC, will be expected to have implemented appropriate changes to incorporate the Basel III concepts into U.S. capital adequacy standards. Although the Basel III changes, as implemented in the United States, will likely result in generally higher regulatory capital standards, it is difficult at this time to predict how any new standards will ultimately be applied to the Company and the Bank.

Table of Contents

The Company

General. The Company, as the sole shareholder of the Bank, is a bank holding company. As a bank holding company, the Company is registered with, and is subject to regulation by, the Federal Reserve under the Bank Holding Company Act of 1956, as amended (the "BHCA"). In accordance with Federal Reserve policy, and as now codified by the Dodd-Frank Act, the Company is legally obligated to act as a source of financial strength to the Bank and to commit resources to support the Bank in circumstances where the Company might not otherwise do so. Under the BHCA, the Company is subject to periodic examination by the Federal Reserve. The Company is required to file with the Federal Reserve periodic reports of the Company's operations and such additional information regarding the Company and its subsidiaries as the Federal Reserve may require.

Acquisitions, Activities and Change in Control. The primary purpose of a bank holding company is to control and manage banks. The BHCA generally requires the prior approval of the Federal Reserve for any merger involving a bank holding company or any acquisition by a bank holding company of another bank or bank holding company. Subject to certain conditions (including deposit concentration limits established by the BHCA and the Dodd-Frank Act), the Federal Reserve may allow a bank holding company to acquire banks located in any state of the United States. In approving interstate acquisitions, the Federal Reserve is required to give effect to applicable state law limitations on the aggregate amount of deposits that may be held by the acquiring bank holding company and its insured depository institution affiliates in the state in which the target bank is located (provided that those limits do not discriminate against out-of-state depository institutions or their holding companies) and state laws that require that the target bank have been in existence for a minimum period of time (not to exceed five years) before being acquired by an out-of-state bank holding company. Furthermore, in accordance with the Dodd-Frank Act, as of July 21, 2011, bank holding companies must be well-capitalized in order to effect interstate mergers or acquisitions. For a discussion of the capital requirements, see "The Increasing Importance of Capital" above.

The BHCA generally prohibits the Company from acquiring direct or indirect ownership or control of more than 5% of the voting shares of any company that is not a bank and from engaging in any business other than that of banking, managing and controlling banks or furnishing services to banks and their subsidiaries. This general prohibition is subject to a number of exceptions. The principal exception allows bank holding companies to engage in, and to own shares of companies engaged in, certain businesses found by the Federal Reserve prior to November 11, 1999 to be "so closely related to banking ... as to be a proper incident thereto." This authority would permit the Company to engage in a variety of banking-related businesses, including the ownership and operation of a savings association, or any entity engaged in consumer finance, equipment leasing, the operation of a computer service bureau (including software development), and mortgage banking and brokerage. The BHCA generally does not place territorial restrictions on the domestic activities of non-bank subsidiaries of bank holding companies.

Additionally, bank holding companies that meet certain eligibility requirements prescribed by the BHCA and elect to operate as financial holding companies may engage in, or own shares in companies engaged in, a wider range of nonbanking activities, including securities and insurance underwriting and sales, merchant banking and any other activity that the Federal Reserve, in consultation with the Secretary of the Treasury, determines by regulation or order is financial in nature or incidental to any such financial activity or that the Federal Reserve determines by order to be complementary to any such financial activity and does not pose a substantial risk to the safety or soundness of depository institutions or the financial system generally. At present, the Company is not operating as a financial holding company.

Federal law also prohibits any person or company from acquiring "control" of an FDIC-insured depository institution or its holding company without prior notice to the appropriate federal bank regulator. "Control" is conclusively presumed to exist upon the acquisition of 25% or more of the outstanding voting securities of a bank or bank holding company, but may arise under certain circumstances between 10% and 24.99% ownership.

Table of Contents

Capital Requirements. Bank holding companies are required to maintain minimum levels of capital in accordance with Federal Reserve capital adequacy guidelines, as affected by the Dodd-Frank Act and Basel III. For a discussion of capital requirements, see [The Increasing Importance of Capital](#) above.

Emergency Economic Stabilization Act of 2008. Events in the U.S. and global financial markets over the past several years, including deterioration of the worldwide credit markets, have created significant challenges for financial institutions throughout the country. In response to this crisis affecting the U.S. banking system and financial markets, on October 3, 2008, the U.S. Congress passed, and the President signed into law, the Emergency Economic Stabilization Act of 2008 (the [EESA](#)). The EESA authorized the Secretary of the United States Department of Treasury ([Treasury](#)) to implement various temporary emergency programs designed to strengthen the capital positions of financial institutions and stimulate the availability of credit within the U.S. financial system. Financial institutions participating in certain of the programs established under the EESA are required to adopt Treasury's standards for executive compensation and corporate governance.

The TARP Capital Purchase Program. On October 14, 2008, Treasury announced that it would provide Tier 1 capital (in the form of perpetual preferred stock) to eligible financial institutions. This program, known as the TARP Capital Purchase Program (the [CPP](#)), allocated \$250 billion from the \$700 billion authorized by the EESA to Treasury for the purchase of senior preferred shares from qualifying financial institutions (the [CPP Preferred Stock](#)). Under the program, eligible institutions were able to sell equity interests to the Treasury in amounts equal to between 1% and 3% of the institution's risk-weighted assets. The CPP Preferred Stock is non-voting and pays dividends at the rate of 5% per annum for the first five years and thereafter at a rate of 9% per annum. In conjunction with the purchase of the CPP Preferred Stock, the Treasury received warrants to purchase common stock from the participating public institutions with an aggregate market price equal to 15% of the preferred stock investment. Participating financial institutions are required to adopt Treasury's standards for executive compensation and corporate governance for the period during which Treasury holds equity issued under the CPP. These requirements are discussed in more detail in the Compensation Discussion and Analysis section in the Company's proxy statement, which is incorporated by reference in this Form 10-K.

Pursuant to the CPP, on January 16, 2009, the Company entered into a Letter Agreement with Treasury, pursuant to which the Company issued (i) 73,000 shares of the Company's Fixed Rate Cumulative Perpetual Preferred Stock, Series B and (ii) a warrant to purchase 815,339 shares of the Company's common stock for an aggregate purchase price of \$73.0 million in cash. The Company's federal regulators and the Treasury's Office of the Inspector General maintain significant oversight over the Company as a participating institution, to evaluate how it is using the capital provided and to ensure that it strengthens its efforts to help its borrowers avoid foreclosure, which is one of the core aspects of the EESA.

Dividends. The Company's ability to pay dividends to its shareholders may be affected by both general corporate law considerations and policies of the Federal Reserve applicable to bank holding companies. As a Delaware corporation, the Company is subject to the limitations of the Delaware General Corporation Law (the [DGCL](#)). The DGCL allows the Company to pay dividends only out of its surplus (as defined and computed in accordance with the provisions of the DGCL) or, if the Company has no such surplus, out of its net profits for the fiscal year in which the dividend is declared and/or the preceding fiscal year. Additionally, policies of the Federal Reserve caution that a bank holding company should not pay cash dividends unless its net income available to common shareholders over the past year has been sufficient to fully fund the dividends and the prospective rate of earnings retention appears consistent with its capital needs, asset quality, and overall financial condition. The Federal Reserve also

Table of Contents

possesses enforcement powers over bank holding companies and their non-bank subsidiaries to prevent or remedy actions that represent unsafe or unsound practices or violations of applicable statutes and regulations. Among these powers is the ability to proscribe the payment of dividends by banks and bank holding companies. Given recent developments concerning the Bank described further below, the Federal Reserve has notified the Company that it will place restrictions on its ability to pay dividends.

Furthermore, the Company's ability to pay dividends on its common stock is restricted by the terms of certain of its other securities. For example, under the terms of certain of the Company's junior subordinated debentures, it may not pay dividends on its capital stock unless all accrued and unpaid interest payments on the subordinated debentures have been fully paid. Additionally, the terms of the CPP Preferred Stock provide that no dividends on any common or preferred stock that ranks equal to or junior to the CPP Preferred Stock may be paid unless and until all accrued and unpaid dividends for all past dividend periods on the CPP Preferred Stock have been fully paid. On August 31, 2010, the Company announced that it had elected to begin deferring the interest payments due on the junior subordinated debentures described above, as well as the dividend payments due on the CPP Preferred Stock, and therefore may not pay common stock dividends until such time as these deferred payments have been made in full.

Federal Securities Regulation. The Company's common stock is registered with the SEC under the Securities Act of 1933, as amended, and the Securities Exchange Act of 1934, as amended (the Exchange Act). Consequently, the Company is subject to the information, proxy solicitation, insider trading and other restrictions and requirements of the SEC under the Exchange Act.

Corporate Governance. The Dodd-Frank Act addresses many investor protection, corporate governance and executive compensation matters that will affect most U.S. publicly traded companies. The Dodd-Frank Act will increase stockholder influence over boards of directors by requiring companies to give stockholders a non-binding vote on executive compensation and so-called "golden parachute" payments, and authorizing the SEC to promulgate rules that would allow stockholders to nominate and solicit voters for their own candidates using a company's proxy materials. The legislation also directs the Federal Reserve to promulgate rules prohibiting excessive compensation paid to bank holding company executives, regardless of whether the Company is publicly traded.

The Bank

General. The Bank is a national bank, chartered by the OCC under the National Bank Act. The deposit accounts of the Bank are insured by the FDIC's Deposit Insurance Fund (the DIF) to the maximum extent provided under federal law and FDIC regulations, and the Bank is a member of the Federal Reserve System. As a national bank, the Bank is subject to the examination, supervision, reporting and enforcement requirements of the OCC, the chartering authority for national banks. The FDIC, as administrator of the DIF, also has regulatory authority over the Bank.

Enforcement Actions. On October 20, 2009, the Bank entered into a Memorandum of Understanding (MOU) with the OCC, in which the Bank agreed, among other things, to: (i) implement a variety of programs and policies to reduce its level of credit risk, including a policy to address certain concentrations of credit; and (ii) limit its amount of brokered deposits to 4.50% of total deposits, unless the prior written consent of the OCC is granted to exceed such level. In addition to the MOU, the Bank also agreed with the OCC to maintain regulatory capital ratios at levels in excess of the general minimums required to be considered "well capitalized" under applicable OCC regulations. Specifically, the Bank's board of directors agreed to achieve a minimum Tier 1 capital to total assets ratio of 8.75% and a minimum total capital to total risk-weighted assets ratio of 11.25% by December 31, 2009, and to maintain such minimum ratios thereafter. The Bank achieved these heightened regulatory capital ratios

Table of Contents

by December 31, 2009 and remained in compliance with them through March 31, 2010. However, at December 31, 2010, these regulatory capital ratios were 8.10% and 11.63%, respectively, and therefore the Bank was not in compliance with the required ratio of Tier 1 capital to total assets. As a result of the Bank's failure to be in full compliance with the agreed-upon capital ratios, as well as the Bank's continuing financial difficulties and heightened levels of nonperforming loans, management expects that the OCC will replace the current MOU with a formal regulatory enforcement action.

Deposit Insurance. As an FDIC-insured institution, the Bank is required to pay deposit insurance premium assessments to the FDIC. The FDIC has adopted a risk-based assessment system whereby FDIC-insured depository institutions pay insurance premiums at rates based on their risk classification. An institution's risk classification is assigned based on its capital levels and the level of supervisory concern the institution poses to the regulators.

On November 12, 2009, the FDIC adopted a final rule that required insured depository institutions to prepay on December 30, 2009, their estimated quarterly risk-based assessments for the fourth quarter of 2009 and for all of 2010, 2011, and 2012. On December 31, 2009, the Bank paid the FDIC \$20.1 million in prepaid assessments. An institution's prepaid assessments were calculated based on the institution's actual September 30, 2009 assessment base, adjusted quarterly by an estimated 5 percent annual growth rate through the end of 2012. The FDIC also used the institution's total base assessment rate in effect on September 30, 2009, increasing it by an annualized 3 basis points beginning in 2011. The FDIC began to offset prepaid assessments on March 30, 2010, representing payment of the regular quarterly risk-based deposit insurance assessment for the fourth quarter of 2009. Any prepaid assessment not exhausted after collection of the amount due on June 30, 2013, will be returned to the institution.

Amendments to the Federal Deposit Insurance Act also revise the assessment base against which an insured depository institution's deposit insurance premiums paid to the DIF will be calculated. Under the amendments, the assessment base will no longer be the institution's deposit base, but rather its average consolidated total assets less its average tangible equity. This may shift the burden of deposit insurance premiums toward those large depository institutions that rely on funding sources other than U.S. deposits. Additionally, the Dodd-Frank Act makes changes to the minimum designated reserve ratio of the DIF, increasing the minimum from 1.15% to 1.35% of the estimated amount of total insured deposits, and eliminating the requirement that the FDIC pay dividends to depository institutions when the reserve ratio exceeds certain thresholds. The FDIC is given until September 3, 2020 to meet the 1.35 reserve ratio target. Several of these provisions could increase the Bank's FDIC deposit insurance premiums.

The Dodd-Frank Act permanently increases the maximum amount of deposit insurance for banks, savings institutions and credit unions to \$250,000 per insured depositor, retroactive to January 1, 2009. Furthermore, the legislation provides that non-interest bearing transaction accounts have unlimited deposit insurance coverage through December 31, 2013. This temporary unlimited deposit insurance coverage replaces the Transaction Account Guarantee Program (TAGP) that expired on December 31, 2010. It covers all depository institution noninterest-bearing transaction accounts, but not low interest-bearing accounts. Unlike TAGP, there is no special assessment associated with the temporary unlimited insurance coverage, nor may institutions opt-out of the unlimited coverage.

FICO Assessments. The Financing Corporation (FICO) is a mixed-ownership governmental corporation chartered by the former Federal Home Loan Bank Board pursuant to the Competitive Equality Banking Act of 1987 to function as a financing vehicle for the recapitalization of the former Federal Savings and Loan Insurance Corporation. FICO issued 30-year noncallable bonds of approximately \$8.1 billion that mature in 2017 through 2019. FICO's authority to issue bonds ended on

Table of Contents

December 12, 1991. Since 1996, federal legislation has required that all FDIC-insured depository institutions pay assessments to cover interest payments on FICO's outstanding obligations. These FICO assessments are in addition to amounts assessed by the FDIC for deposit insurance. During the year ended December 31, 2010, the FICO assessment rate was approximately 0.01% of deposits.

Supervisory Assessments. National banks are required to pay supervisory assessments to the OCC to fund the operations of the OCC. The amount of the assessment is calculated using a formula that takes into account the bank's size and its supervisory condition. During the year ended December 31, 2010, the Bank paid supervisory assessments to the OCC totaling \$691,000.

Capital Requirements. Banks are generally required to maintain capital levels in excess of other businesses. For a discussion of capital requirements, see "The Increasing Importance of Capital," as well as "Enforcement Actions."

Dividend Payments. The primary source of funds for the Company is dividends from the Bank. Under the National Bank Act, a national bank may pay dividends out of its undivided profits in such amounts and at such times as the bank's board of directors deems prudent. Without prior OCC approval, however, a national bank may not pay dividends in any calendar year that, in the aggregate, exceed the bank's year-to-date net income plus the bank's retained net income for the two preceding years.

The payment of dividends by any financial institution is affected by the requirement to maintain adequate capital pursuant to applicable capital adequacy guidelines and regulations, and a financial institution generally is prohibited from paying any dividends if, following payment thereof, the institution would be undercapitalized. As described above, the Bank exceeded its minimum capital requirements under applicable OCC guidelines as of December 31, 2010, but failed to comply with one of two heightened regulatory capital requirements to which it agreed. No dividends were available to be paid by the Bank as of December 31, 2010. The OCC may prohibit the payment of dividends generally by a Bank if it determines such payment would constitute an unsafe or unsound practice.

Insider Transactions. The Bank is subject to certain restrictions imposed by federal law on covered transactions between the Bank and its affiliates. The Company is an affiliate of the Bank for purposes of these restrictions, and covered transactions subject to the restrictions include extensions of credit to the Company, investments in the stock or other securities of the Company and the acceptance of the stock or other securities of the Company as collateral for loans made by the Bank. The Dodd-Frank Act enhances the requirements for certain transactions with affiliates as of July 21, 2011, including an expansion of the definition of covered transactions and an increase in the amount of time for which collateral requirements regarding covered transactions must be maintained.

Certain limitations and reporting requirements are also placed on extensions of credit by the Bank to its directors and officers, to directors and officers of the Company and its subsidiaries, to principal shareholders of the Company and to related interests of such directors, officers and principal shareholders. In addition, federal law and regulations may affect the terms upon which any person who is a director or officer of the Company or the Bank or a principal shareholder of the Company may obtain credit from banks with which the Bank maintains a correspondent relationship.

Safety and Soundness Standards. The federal banking agencies have adopted guidelines that establish operational and managerial standards to promote the safety and soundness of federally insured depository institutions. The guidelines set forth standards for internal controls, information systems, internal audit systems, loan documentation, credit underwriting, interest rate exposure, asset growth, compensation, fees

and benefits, asset quality and earnings.

Table of Contents

In general, the safety and soundness guidelines prescribe the goals to be achieved in each area, and each institution is responsible for establishing its own procedures to achieve those goals. If an institution fails to comply with any of the standards set forth in the guidelines, the institution's primary federal regulator may require the institution to submit a plan for achieving and maintaining compliance. If an institution fails to submit an acceptable compliance plan, or fails in any material respect to implement a compliance plan that has been accepted by its primary federal regulator, the regulator is required to issue an order directing the institution to cure the deficiency. Until the deficiency cited in the regulator's order is cured, the regulator may restrict the institution's rate of growth, require the institution to increase its capital, restrict the rates the institution pays on deposits or require the institution to take any action the regulator deems appropriate under the circumstances. Noncompliance with the standards established by the safety and soundness guidelines may also constitute grounds for other enforcement action by the federal banking regulators, including cease and desist orders and civil money penalty assessments.

As described in further detail above, the Bank is currently subject to a MOU with the OCC pursuant to which it has agreed to implement a variety of programs and policies to reduce its level of credit risk. In addition, the Bank agreed to maintain certain regulatory capital ratios at levels in excess of the general minimums required to be considered well capitalized under applicable OCC regulations. As a result of the Bank's failure to be in full compliance with the agreed-upon capital ratios as of December 31, 2010, as well as the Bank's continuing financial difficulties and heightened levels of nonperforming loans, management expects that the OCC will replace the current MOU with a formal regulatory enforcement action. See Enforcement Actions for further detail.

Branching Authority. National banks headquartered in Illinois, such as the Bank, have the same branching rights in Illinois as banks chartered under Illinois law, subject to OCC approval. Illinois law grants Illinois-chartered banks the authority to establish branches anywhere in the State of Illinois, subject to receipt of all required regulatory approvals.

Federal law permits state and national banks to merge with banks in other states subject to: (i) regulatory approval; (ii) federal and state deposit concentration limits; and (iii) state law limitations requiring the merging bank to have been in existence for a minimum period of time (not to exceed five years) prior to the merger. The establishment of new interstate branches or the acquisition of individual branches of a bank in another state (rather than the acquisition of an out-of-state bank in its entirety) has historically been permitted only in those states the laws of which expressly authorize such expansion. However, the Dodd-Frank Act permits well-capitalized banks to establish branches across state lines without these impediments effective as of the day after its enactment, July 22, 2010.

Financial Subsidiaries. Under federal law and OCC regulations, national banks are authorized to engage, through financial subsidiaries, in any activity that is permissible for a financial holding company and any activity that the Secretary of the Treasury, in consultation with the Federal Reserve, determines is financial in nature or incidental to any such financial activity, except (i) insurance underwriting, (ii) real estate development or real estate investment activities (unless otherwise permitted by law), (iii) insurance company portfolio investments and (iv) merchant banking. The authority of a national bank to invest in a financial subsidiary is subject to a number of conditions, including, among other things, requirements that the bank must be well-managed and well-capitalized (after deducting from capital the bank's outstanding investments in financial subsidiaries). The Bank has not applied for approval to establish any financial subsidiaries.

Transaction Account Reserves. Federal Reserve regulations, as presently in effect, require depository institutions to maintain reserves against their transaction accounts (primarily NOW and regular checking accounts), as follows: for transaction accounts aggregating more than \$10.7 million to \$58.8

Table of Contents

million, the reserve requirement is 3% of total transaction accounts; and for transaction accounts aggregating in excess of \$58.8 million, the reserve requirement is \$1.443 million plus 10% of the aggregate amount of total transaction accounts in excess of \$58.8 million. The first \$10.7 million of otherwise reservable balances are exempted from the reserve requirements. These reserve requirements are subject to annual adjustment by the Federal Reserve. The Bank is in compliance with the foregoing requirements.

Consumer Financial Services. There are numerous developments in federal and state laws regarding consumer financial products and services that impact the Bank's business. Importantly, the current structure of federal consumer protection regulation applicable to all providers of consumer financial products and services will change on July 21, 2011. In this regard, the Dodd-Frank Act creates a new Consumer Financial Protection Bureau (the Bureau) with extensive powers to supervise and enforce consumer protection laws. The Bureau has broad rule-making authority for a wide range of consumer protection laws that apply to all providers of consumer products and services, including the Bank, as well as the authority to prohibit unfair, deceptive or abusive acts and practices. The Bureau has examination and enforcement authority over providers with more than \$10 billion in assets. Banks and savings institutions with \$10 billion or less in assets, like the Bank, will continue to be examined by their applicable bank regulators. The Dodd-Frank Act also generally weakens the federal preemption available for national banks and federal savings associations, and gives state attorneys general the ability to enforce applicable federal consumer protection laws. It is unclear what changes will be promulgated by the Bureau and what effect, if any, such changes would have on the Bank.

The Dodd-Frank Act contains additional provisions that affect consumer mortgage lending. First, the new law significantly expands underwriting requirements applicable to loans secured by 1-4 residential real property and augments federal law combating predatory lending practices. In addition to numerous new disclosure requirements, the Dodd-Frank Act imposes new standards for mortgage loan originations on all lenders, including banks and savings associations, in an effort to strongly encourage lenders to verify a borrower's ability to repay. Most significantly, the new standards limit the total points and fees that the Bank and/or a broker may charge on conforming and jumbo loans to 3% of the total loan amount. Also, the Dodd-Frank Act, in conjunction with the Federal Reserve's final rule on loan originator compensation effective April 1, 2011, prohibits certain compensation payments to loan originators and prohibits steering consumers to loans not in their interest because it will result in greater compensation for a loan originator. These standards may result in a myriad of new system, pricing and compensation controls in order to ensure compliance and to decrease repurchase requests and foreclosure defenses. In addition, the Dodd-Frank Act generally requires lenders or securitizers to retain an economic interest in the credit risk relating to loans the lender sells and other asset-backed securities that the securitizer issues if the loans have not complied with the ability to repay standards. The risk retention requirement generally will be 5%, but could be increased or decreased by regulation.

Federal and state laws further impact mortgage foreclosures and loan modifications, many of which laws have the effect of delaying or impeding the foreclosure process. Legislation has been introduced in the U.S. Senate that would amend the Bankruptcy Code to permit bankruptcy courts to compel servicers and homeowners to enter mediation before initiating foreclosure. While legislation compelling loan modifications in Chapter 13 bankruptcies was approved by the House in 2010, the legislation was not approved by the Senate, and the requirement was not included in the Dodd-Frank Act or any other legislative or regulatory reforms. The scope, duration and terms of potential future legislation with similar effect continue to be discussed.

Illinois has enacted several laws that impact the timing of foreclosures and encourage loan modification efforts, and there is momentum for further legislation to prevent foreclosures through loss mitigation and ensure that documents submitted to the court are authentic and free from deceit and fraud.

Table of Contents

Attorney General Lisa Madigan proposed a foreclosure bill in November 2010, which would require banks, among other requirements, to: (i) comply with applicable federal, State, local or contractual loss mitigation program, and if no program results in a modification, the bank must review the mortgage under the other programs utilized by the bank; (ii) prove that the affiant has personal knowledge of the facts; (iii) produce detailed affidavits on efforts to find missing notes; (iv) provide a loss mitigation affidavit describing steps a bank took to assess a mortgage loan's eligibility for modification under designated federal programs. Proceedings must be stayed until the court determines that a lender has complied with these requirements. The Bank cannot predict whether such legislation will be passed or the impact, if any, it would have on the Bank's business. In the meantime, the Illinois Department of Financial and Professional Regulation released a press release on December 14, 2010 seeking voluntary compliance from Illinois lenders and loan servicers to a 9-point affidavit plan to ensure the integrity of foreclosure affidavits.

GUIDE 3 STATISTICAL DATA REQUIREMENTS

The statistical data required by Guide 3 of the Guides for Preparation and Filing of Reports and Registration Statements under the Securities Exchange Act of 1934 is set forth in the following pages. This data should be read in conjunction with the consolidated financial statements, related notes and Management's Discussion and Analysis of Financial Condition and Results of Operations as set forth in the 2010 Annual Report incorporated herein by reference (attached hereto as Exhibit 13.1). All dollars in the tables are expressed in thousands.

Table of Contents

The following table sets forth certain information relating to the Company's average consolidated balance sheets and reflects the yield on average earning assets and cost of average liabilities for the years indicated. Dividing the related interest by the average balance of assets or liabilities derives rates. Average balances are derived from daily balances.

**ANALYSIS OF AVERAGE BALANCES,
TAX EQUIVALENT INTEREST AND RATES**

Years ended December 31, 2010, 2009 and 2008

	2010			2009			2008		
	Average Balance	Interest	Rate	Average Balance	Interest	Rate	Average Balance	Interest	Rate
