**CURRENT REPORT**

The following information is furnished pursuant to both Item 2.02 and Item 8.01 of Form 8-K and is furnished to replace the gross margin numbers included in the Form 8-K filed on April 2, 2012.

**Item 2.02. Results of Operations and Financial Condition.**

**Item 8.01. Other Events.**

The following information is furnished pursuant to both Item 2.02 and Item 8.01 of Form 8-K.

**Summary.** W. R. Grace & Co. ( Grace ) previously operated its business under two operating segments, Grace Davison and Grace Construction Products. In the 2012 first quarter, Grace announced a realignment of its business into three operating segments: Grace Catalysts Technologies, Grace Materials Technologies, and Grace Construction Products. Grace made this change to align its operating segments more closely with the markets it serves, and to better position its businesses to realize operational efficiencies and reduce overhead costs. Grace Catalysts Technologies includes catalysts and related technologies used in refining, petrochemical, and other chemical manufacturing applications. Grace s Advanced Refining Technologies joint venture is managed in this segment. Grace Materials Technologies includes engineered materials, coatings, and sealants used in industrial, consumer, pharmaceutical, and packaging applications. Grace Construction Products includes specialty construction chemicals and specialty building materials used in commercial, infrastructure, and residential construction. Together, Grace Catalysts Technologies and Grace Materials Technologies comprise the former Grace Davison operating segment.

**Revised Analysis of Operations Presentation.** Grace intends to begin reporting revised segment operating results effective with the release of earnings information for the 2012 first quarter. Grace has provided in the following tables revised quarterly and annual financial results for 2010 and 2011 under the new operating segment structure. The net sales, segment operating income, margin, and other financial information for Grace Catalysts Technologies and Grace Materials Technologies is new information. No changes have been made to the financial information of Grace Construction Products or of total Grace.

Grace defines Adjusted EBIT (a non-GAAP financial measure) to be net income adjusted for interest income and expense, income taxes, net Chapter 11- and asbestos-related costs, restructuring expenses and related asset impairments, divestment expenses, and gains and losses on sales of product lines and other investments. Grace defines Adjusted EBITDA (a non-GAAP financial measure) to be Adjusted EBIT adjusted for depreciation and amortization.

Grace uses Adjusted EBIT as a performance measure in significant business decisions and in determining certain incentive compensation. Grace uses Adjusted EBIT as a performance measure because it provides improved period-to-period comparability for decision making and compensation purposes, and because it better measures the ongoing earnings results of strategic and operating decisions by excluding the earnings effects of net Chapter 11- and asbestos-related costs, and any restructuring or divestment activities.

Adjusted EBIT and Adjusted EBITDA do not purport to represent income or cash flow measures as defined under U.S. GAAP, and should not be used as alternatives to such measures as an indicator of Grace's performance. These measures are provided to investors and others to improve the period-to-period comparability and peer-to-peer comparability of Grace's financial results, and to ensure that investors understand the information Grace uses to evaluate the performance of its businesses. In the tables above, Grace has provided a reconciliation of these non-GAAP measures to the most directly comparable financial measure calculated and presented in accordance with U.S. GAAP.

Adjusted EBIT has material limitations as an operating performance measure because it excludes Chapter 11- and asbestos-related costs and may exclude income and expenses from restructuring and divestment activities, which historically have been material components of Grace's net income. Adjusted EBITDA also has material limitations as an operating performance measure, as it excludes the impact of depreciation and amortization expense. Grace's business is substantially dependent on the successful deployment of capital, and depreciation and amortization expense is a necessary element of costs. Grace compensates for the limitations of these measurements by using these indicators together with net income as measured under U.S. GAAP when evaluating its results of operations.

Adjusted EBIT and Adjusted EBITDA should be used together with net income measured under U.S. GAAP when evaluating Grace's results of operations.
