## Agilent Technologies Research Laboratories

Agilent Technologies Research Laboratories ("Research Labs") is our research organization based in Santa Clara, California, with offices in Europe and Asia. The Research Labs create competitive advantage through high-impact technology, driving market leadership and growth in Agilent's core businesses and expanding Agilent's footprint into adjacent markets. At the cross-roads of the organization, the Research Labs are able to identify and enable synergies across Agilent's businesses to create competitive differentiation and compelling customer value.

The technical staff have advanced degrees that cover a wide range of scientific and engineering fields, including biology, chemistry, distributed measurement, image processing, mathematics, nano/microfabrication, microfluidics, software, informatics, physics and physiology.

## Table of Contents

### Global Infrastructure Organization

We provide support to our businesses through our global infrastructure organization. This support includes services in the areas of finance, legal, workplace services, human resources and information technology. Generally, these organizations are centrally operated from Santa Clara, California, with services provided worldwide. As of the end of October 2016, our global infrastructure organization employed approximately 2,500 people worldwide.

### Agilent Order Fulfillment Organizations

Our order fulfillment and supply chain organization ("OFS") centralizes all order fulfillment and supply chain operations in our businesses. OFS provides resources for manufacturing, engineering and strategic sourcing to our respective businesses. In general, OFS employees are dedicated to specific businesses and the associated costs are directly allocated to those businesses.

The following discussions of Research and Development, Backlog, Intellectual Property, Materials, Environmental, International Operations and Acquisition and Disposal of Material Assets include information common to each of our businesses.

### Research and Development

Research and development ("R&D") expenditures were \$329 million in 2016, \$330 million in 2015 and \$358 million in 2014, the vast majority of which was company-sponsored. We anticipate that we will continue to have significant R&D expenditures in order to maintain our competitive position with a continuing flow of innovative, high-quality products and services.

### Backlog

We believe that backlog is not a meaningful indicator of future business prospects for our business segments since a significant portion of our revenue for a given quarter is derived from the current quarter's orders. Therefore, we believe that backlog information is not material to an understanding of our business.

### Intellectual Property

We generate patent and other intellectual property rights covering significant inventions and other innovations in order to create a competitive advantage. While we believe that our licenses, patents and other intellectual property rights have value, in general no single license, patent or other intellectual property right is in itself material. In addition, our intellectual property rights may be challenged, invalidated or circumvented or may otherwise not provide significant competitive advantage.

### Materials

Our life sciences and applied markets, diagnostics and genomics and Agilent CrossLab businesses all purchase materials from thousands of suppliers on a global basis. Some of the parts that require custom design work are not readily available from alternate suppliers due to their unique design or the length of time necessary for design work. Our long-term relationships with suppliers allow us to proactively manage technology road maps and product discontinuance plans and monitor their financial health. Even so, some suppliers may still extend their lead times, limit supplies, increase prices or cease to produce necessary parts for our products. If these are unique components, we may not be able to find a substitute quickly or at all. To address the potential disruption in our supply chain, we use a number of techniques, including qualifying multiple sources of supply and redesign of products for alternative

components. In addition, while we generally attempt to keep our inventory at minimal levels, we do purchase incremental inventory as circumstances warrant to protect the supply chain.

#### Environmental

Our R&D, manufacturing and distribution operations involve the use of hazardous substances and are regulated under international, federal, state and local laws governing health and safety and the environment. We apply strict standards for protection of the environment and occupational health and safety to sites inside and outside the U.S., even if not subject to regulation imposed by foreign governments. We believe that our properties and operations at our facilities comply in all material respects with applicable environmental laws and occupational health and safety laws. However, the risk of environmental liabilities cannot be completely eliminated and there can be no assurance that the application of environmental and health and safety laws to Agilent will not require us to incur significant expenditures. We are also regulated under a number of international, federal, state, and local laws regarding recycling, product packaging and product content requirements. The environmental, product content/disposal and recycling laws are gradually becoming more stringent and may cause us to incur significant expenditures in the future.

## Table of Contents

In connection with the sale of several of our businesses, we have agreed to indemnify the buyers of such business, their respective affiliates and other related parties against certain damages that they might incur in the future. The continuing indemnifications primarily cover damages relating to liabilities of the business that Agilent retained and did not transfer to the buyers as well as other specified items, including potential liabilities for environmental matters. In our opinion, the fair value of these indemnification obligations was not material as of October 31, 2016.

We maintain a comprehensive Environmental Site Liability insurance policy which may cover certain clean-up costs or legal claims related to environmental contamination. This policy covers specified active, inactive and divested locations.

### International Operations

Our net revenue originating outside the U.S., as a percentage of our total net revenue, was approximately 70 percent in fiscal 2016, 70 percent in fiscal 2015 and 75 percent in fiscal 2014, the majority of which was from customers other than foreign governments. Annual revenues derived from China were approximately 20 percent in fiscal 2016, 16 percent in fiscal 2015 and 13 percent in fiscal 2014. Revenues from external customers are generally attributed to countries based on where we ship the products or provide the services.

Long-lived assets located outside of the U.S., as a percentage of our total long-lived assets, was approximately 44 percent in fiscal year 2016 and 49 percent in fiscal year 2015.

Most of our sales in international markets are made by foreign sales subsidiaries. In countries with low sales volumes, sales are made through various representatives and distributors. However, we also sell into international markets directly from the U.S.

Our international business is subject to risks customarily encountered in foreign operations, including interruption to transportation flows for delivery of parts to us and finished goods to our customers, changes in a specific country's or region's political or economic conditions, trade protection measures, import or export licensing requirements, consequences from changes in tax laws and regulatory requirements, difficulty in staffing and managing widespread operations, differing labor regulations, differing protection of intellectual property and geopolitical turmoil, including terrorism and war. We are also exposed to foreign currency exchange rate risk inherent in our sales commitments, anticipated sales and expenses, and assets and liabilities denominated in currencies other than the local functional currency, and may also become subject to interest rate risk inherent in any debt we incur, or investment portfolios we hold. There may be an increased risk of political unrest in regions where we have significant manufacturing operations such as Southeast Asia. However, we believe that our international diversification provides stability to our worldwide operations and reduces the impact on us of adverse economic changes in any single country. Financial information about our international operations is contained in Note 19, "Segment Information", to our consolidated financial statements.

### Acquisition and Disposal of Material Assets

On September 19, 2013, Agilent announced plans to separate into two publicly traded companies, one comprising of the life sciences, diagnostics and chemical analysis businesses that retained the Agilent name, and the other one that comprised of the electronic measurement business that was renamed Keysight Technologies, Inc. ("Keysight"). Keysight was incorporated in Delaware as a wholly-owned subsidiary of Agilent on December 6, 2013. On November 1, 2014, we completed the distribution of 100% of the outstanding common shares of Keysight to Agilent stockholders who received one share of Keysight common stock for every two shares of Agilent held as of the close of business on the record date, October 22, 2014.

Executive Officers of the Registrant

The names of our current executive officers and their ages, titles and biographies appear below:

Henrik Ancher-Jensen, 51, has served as Senior Vice President, Agilent and President, Order Fulfillment since September 2013. From September 2012 to September 2013, Mr. Ancher-Jensen served as our Vice President, Global Product Supply, Diagnostics and Genomics Group. From September 2010 to September 2012 he served as Corporate Vice President, Global Operations of Dako A/S, a Danish diagnostics company, and as Dako's Vice President, Supply Chain and Chief Information Officer from 2006 to September 2010. Prior to joining Dako, he spent more than 15 years in senior management roles and management consulting with Chr. Hansen, Deloitte Consulting and NVE.

Mark Doak, 61, has served as our Senior Vice President, Agilent and President, Agilent CrossLab Group (formerly a group within the Life Sciences & Applied Markets Group) since September 2014. From August 2008 to September 2014, Mr. Doak

Table of Contents

served as our Vice President and General Manager of the Services and Support Division. Prior to that, he held several senior management positions across functions in marketing, quality and services.

Rodney Gonsalves, 51, has served as our Vice President, Corporate Controllershship and Chief Accounting Officer since May 2015. From September 2009 to May 2015, Mr. Gonsalves served as Vice President and operational CFO for various business groups within the Company, most recently for the Life Sciences and Applied Markets Group. From January 2007 to August 2009 he served as our vice president of Investor Relations. Prior to assuming this position, Mr. Gonsalves served in various capacities for Agilent, including as controller, corporate governance and customer financing in Agilent's Global Infrastructure Organization, and controller for the Photonics Systems Business Unit. Prior to joining Agilent, Mr. Gonsalves held a variety of positions in finance with Hewlett- Packard Co. Mr. Gonsalves holds a master's degree in business administration from Santa Clara University in California.

Dominique P. Grau 57, has served as our Senior Vice President, Human Resources since August 2014. From May 2012 to August 2014 Mr. Grau served as Vice President, Worldwide Human Resources. Prior to that, he served as Vice President, Compensation, Benefits and HR Services from May 2006 to May 2012. Mr. Grau had previously served in various capacities for Agilent and Hewlett-Packard Company.

Didier Hirsch, 65, has served as our Senior Vice President and Chief Financial Officer since July 2010 and served as interim Chief Financial Officer from April 2010 to July 2010. Prior to that he served as Vice President, Corporate Controllershship and Tax from November 2006 to July 20, 2010 and as Chief Accounting Officer from November 2007 to July 20, 2010. From April 2003 to October 2006, Mr. Hirsch served as Vice President and Controller. Prior to assuming this position, Mr. Hirsch served as Vice President and Treasurer from September 1999 to April 2003. Mr. Hirsch had joined Hewlett Packard Company in 1989 as Director of Finance and Administration of Hewlett Packard France. In 1993, he became Director of Finance and Administration of Hewlett Packard Asia Pacific, and in 1996 Director of Finance and Administration of Hewlett Packard Europe, Middle East, and Africa. Mr. Hirsch serves on the Board of Directors of Logitech International and Knowles Corporation.

Patrick K. Kaltenbach, 53, has served as Senior Vice President, Agilent and President, Life Sciences and Applied Markets Group since November 2014. From January 2014 to November 2014 he served as Vice President and General Manager of the Life Sciences Products and Solutions organization. Prior to that he served as Vice President and General Manager of the Liquid Phase Division from December 2012 to January 2014. From July 2010 to December 2012 he served as Vice President and General Manager of the Liquid Phase Separations Business. Prior to that he served as General Manager of the Liquid Chromatography Business from February 2008 to July 2010. Mr. Kaltenbach has held various positions in R&D management and senior management beginning at Hewlett-Packard Co.

Michael R. McMullen, 55, has served as Chief Executive Officer since March 2015 and as President since September 2014. From September 2014 to March 2015 he also served as Chief Operating Officer. From September 2009 to September 2014 he served as Senior Vice President, Agilent and President, Chemical Analysis Group. From January 2002 to September 2009, he served as our Vice President and General Manager of the Chemical Analysis Solutions Unit of the Life Sciences and Chemical Analysis Group. Prior to assuming this position, from March 1999 to December 2001, Mr. McMullen served as Country Manager for Agilent's China, Japan and Korea Life Sciences and Chemical Analysis Group. Prior to this position, Mr. McMullen served as our Controller for the Hewlett Packard Company and Yokogawa Electric Joint Venture from July 1996 to March 1999.

Michael Tang, 42, has served as our Senior Vice President, General Counsel and Secretary since January 2016. From May 2015 to January 2016 he served as Vice President, Assistant General Counsel and Secretary and from November 2013 to April 2015 he served as Vice President, Assistant General Counsel and Assistant Secretary. From March 2012 to October 2013 he served as Business Development Manager in Agilent's Corporate Development group. From

November 2009 to February 2012 he served as Senior Counsel. From August 2006 to October 2009 he served in various capacities in Agilent's legal department. Prior to joining Agilent, Mr. Tang represented public and private technology companies in a broad range of corporate and securities matters at Wilson Sonsini Goodrich & Rosati, a Palo Alto, California, law firm and Fenwick & West LLP, a Mountain View, California, law firm.

Jacob Thaysen, 41, has served as Senior Vice President, Agilent and President, Diagnostics and Genomics Group since November 2014. From October 2013 to November 2014 he served as Vice President and General Manager of the Diagnostics and Genomics business. Prior to that he served as Vice President and General Manager of the Genomics Solutions unit from January 2013 to October 2013. Before joining Agilent, he was Corporate Vice President of R&D at Dako A/S, a Danish diagnostics company from April 2011 to January 2013. His previous positions at Dako include Vice President, System Development, R&D from March 2010 to April 2011, Vice President, Strategic Marketing from April 2009 to March 2010 and Vice President, Global

Table of Contents

Sales Operations from August 2008 to March 2009. Prior to Dako, Mr. Thaysen worked as a management consultant and Chief Technical Officer and founder of a high-tech start-up company.

Investor Information

We are subject to the informational requirements of the Securities Exchange Act of 1934 (“Exchange Act”). Therefore, we file periodic reports, proxy statements and other information with the Securities and Exchange Commission (“SEC”). Such reports, proxy statements and other information may be read and copied by visiting the Public Reference Room of the SEC at 100 F Street N.E., Washington, D.C. 20549. You may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. In addition, the SEC maintains an Internet site (<http://www.sec.gov>) that contains reports, proxy and information statements and other information regarding issuers that file electronically.

You can access financial and other information at our Investor Relations website. The address is [www.investor.agilent.com](http://www.investor.agilent.com). We make available, free of charge, copies of our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act as soon as reasonably practicable after filing such material electronically or otherwise furnishing it to the SEC.

Our Amended and Restated Corporate Governance Standards, the charters of our Audit and Finance Committee, our Compensation Committee, our Executive Committee and our Nominating/Corporate Governance Committee, as well as our Standards of Business Conduct (including code of ethics provisions that apply to our principal executive officer, principal financial officer, principal accounting officer and senior financial officers) are available on our website at [www.investor.agilent.com](http://www.investor.agilent.com) under “Corporate Governance”. These items are also available in print to any stockholder in the United States and Canada who requests them by calling (877) 942-4200. This information is also available by writing to the company at the address on the cover of this Annual Report on Form 10-K.

ITEM 1A. RISK FACTORS

Our operating results and financial condition could be harmed if the markets into which we sell our products decline or do not grow as anticipated.

Visibility into our markets is limited. Our quarterly sales and operating results are highly dependent on the volume and timing of orders received during the fiscal quarter, which are difficult to forecast and may be cancelled by our customers. A large amount of our orders are back-end loaded toward the end of our second and fourth fiscal quarters and their timing may be influenced by the sales incentive programs we have in place. In addition, our revenue and earnings forecasts for future fiscal quarters are often based on the expected seasonality of our markets. However, the markets we serve do not always experience the seasonality that we expect. Any decline in our customers' markets or in general economic conditions would likely result in a reduction in demand for our products and services. Also, if our customers' markets decline, we may not be able to collect on outstanding amounts due to us. Such declines could harm our consolidated financial position, results of operations, cash flows and stock price, and could limit our profitability. Also, in such an environment, pricing pressures could intensify. Since a significant portion of our operating expenses is relatively fixed in nature due to sales, research and development and manufacturing costs, if we were unable to respond quickly enough these pricing pressures could further reduce our operating margins.

## Table of Contents

If we do not introduce successful new products and services in a timely manner to address increased competition through frequent new product and service introductions, rapid technological changes and changing industry standards, our products and services will become obsolete, and our operating results will suffer.

We generally sell our products in industries that are characterized by increased competition through frequent new product and service introductions, rapid technological changes and changing industry standards. In addition, many of the markets in which we operate are seasonal. Without the timely introduction of new products, services and enhancements, our products and services will become technologically obsolete over time, in which case our revenue and operating results would suffer. The success of our new products and services will depend on several factors, including our ability to:

- properly identify customer needs and predict future needs;
- innovate and develop new technologies, services and applications;
- successfully commercialize new technologies in a timely manner;
- manufacture and deliver our products in sufficient volumes and on time;
- differentiate our offerings from our competitors' offerings;
- price our products competitively;
- anticipate our competitors' development of new products, services or technological innovations; and
- control product quality in our manufacturing process.

General economic conditions may adversely affect our operating results and financial condition.

Our business is sensitive to negative changes in general economic conditions, both inside and outside the United States. Slower global economic growth and uncertainty in the markets in which we operate may adversely impact our business resulting in:

- reduced demand for our products, delays in the shipment of orders, or increases in order cancellations;
- increased risk of excess and obsolete inventories;
- increased price pressure for our products and services; and
- greater risk of impairment to the value, and a detriment to the liquidity, of our investment portfolio.

Failure to adjust our purchases due to changing market conditions or failure to accurately estimate our customers' demand could adversely affect our income.

Our income could be harmed if we are unable to adjust our purchases to reflect market fluctuations, including those caused by the seasonal nature of the markets in which we operate. The sale of our products and services are dependent, to a large degree, on customers whose industries are subject to seasonal trends in the demand for their products. During a market upturn, we may not be able to purchase sufficient supplies or components to meet increasing product demand, which could materially affect our results. In the past we have seen a shortage of parts for some of our products. In addition, some of the parts that require custom design are not readily available from alternate suppliers due to their unique design or the length of time necessary for design work. Should a supplier cease manufacturing such a component, we would be forced to reengineer our product. In addition to discontinuing parts, suppliers may also extend lead times, limit supplies or increase prices due to capacity constraints or other factors. In order to secure components for the production of products, we may continue to enter into non-cancelable purchase commitments with vendors, or at times make advance payments to suppliers, which could impact our ability to adjust our inventory to declining market demands. If demand for our products is less than we expect, we may experience additional excess and obsolete inventories and be forced to incur additional expenses.

Demand for some of our products and services depends on the capital spending policies of our customers, research and development budgets and on government funding policies.

Our customers include pharmaceutical companies, laboratories, universities, healthcare providers, government agencies and public and private research institutions. Many factors, including public policy spending priorities, available resources, mergers and consolidations, spending priorities, institutional and governmental budgetary policies and product and economic cycles, have a significant effect on the capital spending policies of these entities. Fluctuations in the research and development budgets at these organizations could have a significant effect on the demand for our products and services. Research and development budgets fluctuate due to changes in available resources, consolidation, spending priorities, general economic conditions and institutional and governmental budgetary policies. The timing and amount of revenue from customers that rely on government funding or research may vary significantly due to factors that can be difficult to forecast, including changes in spending authorizations and budgetary priorities for our products and services. If demand for our products and services is adversely affected, our revenue and operating results would suffer.

## Table of Contents

Economic, political, foreign currency and other risks associated with international sales and operations could adversely affect our results of operations.

Because we sell our products worldwide, our business is subject to risks associated with doing business internationally. We anticipate that revenue from international operations will continue to represent a majority of our total revenue. International revenue and costs are subject to the risk that fluctuations in foreign currency exchange rates could adversely affect our financial results when translated into U.S. dollars for financial reporting purposes. The unfavorable effects of changes in foreign currency exchange rates has decreased revenues by approximately 2 percentage points in the year ended October 31, 2016. In addition, many of our employees, contract manufacturers, suppliers, job functions and manufacturing facilities are located outside the United States. Accordingly, our future results could be harmed by a variety of factors, including:

- interruption to transportation flows for delivery of parts to us and finished goods to our customers;
- changes in foreign currency exchange rates;
- changes in a specific country's or region's political, economic or other conditions;
- trade protection measures and import or export licensing requirements;
- negative consequences from changes in tax laws including changes to U.S. tax legislation that could materially increase our effective tax rate;
- difficulty in staffing and managing widespread operations;
- differing labor regulations;
- differing protection of intellectual property;
- unexpected changes in regulatory requirements; and
- geopolitical turmoil, including terrorism and war.

We centralized most of our accounting and tax processes to two locations: India and Malaysia. These processes include general accounting, cost accounting, accounts payable, accounts receivables and tax functions. If conditions change in those countries, it may adversely affect operations, including impairing our ability to pay our suppliers and collect our receivables. Our results of operations, as well as our liquidity, may be adversely affected and possible delays may occur in reporting financial results.

Additionally, we must comply with complex foreign and U.S. laws and regulations, such as the U.S. Foreign Corrupt Practices Act, the U.K. Bribery Act, and other local laws prohibiting corrupt payments to governmental officials, anti-competition regulations and sanctions imposed by the U.S. Office of Foreign Assets Control and other similar laws and regulations. Violations of these laws and regulations could result in fines and penalties, criminal sanctions, restrictions on our business conduct and on our ability to offer our products in one or more countries, and could also materially affect our brand, our ability to attract and retain employees, our international operations, our business and our operating results. Although we have implemented policies and procedures designed to ensure compliance with these laws and regulations, there can be no assurance that our employees, contractors, or agents will not violate our policies.

In addition, although the majority of our products are priced and paid for in U.S. dollars, a significant amount of certain types of expenses, such as payroll, utilities, tax, and marketing expenses, are paid in local currencies. Our hedging programs reduce, but do not always entirely eliminate, within any given twelve-month period, the impact of currency exchange rate movements, and therefore fluctuations in exchange rates, including those caused by currency controls, could impact our business, operating results and financial condition by resulting in lower revenue or increased expenses. However, for expenses beyond that twelve-month period, our hedging strategy does not mitigate our exposure. In addition, our currency hedging programs involve third party financial institutions as counterparties. The weakening or failure of financial institution counterparties may adversely affect our hedging programs and our

financial condition through, among other things, a reduction in available counterparties, increasingly unfavorable terms, and the failure of the counterparties to perform under hedging contracts.

## Table of Contents

Our strategic initiatives could have long-term adverse effects on our business and we may not realize the operational or financial benefits from such actions.

We have implemented multiple strategic initiatives across our businesses to adjust our cost structure, and we may engage in similar activities in the future. These strategic initiatives and our regular ongoing cost reduction activities may distract management, could slow improvements in our products and services and limit our ability to increase production quickly if demand for our products increases. In addition, delays in implementing our strategic initiatives, unexpected costs or failure to meet targeted improvements may diminish the operational and financial benefits we realize from such actions. Any of the above circumstances could have an adverse effect on our business and financial statements.

Our business will suffer if we are not able to retain and hire key personnel.

Our future success depends partly on the continued service of our key research, engineering, sales, marketing, manufacturing, executive and administrative personnel. If we fail to retain and hire a sufficient number of these personnel, we will not be able to maintain or expand our business. The markets in which we operate are very dynamic, and our businesses continue to respond with reorganizations, workforce reductions and site closures. We believe our pay levels are very competitive within the regions that we operate. However, there is an intense competition for certain highly technical specialties in geographic areas where we continue to recruit, and it may become more difficult to hire and retain our key employees.

Our acquisitions, strategic investments and alliances, joint ventures, exiting of businesses and divestitures may result in financial results that are different than expected.

In the normal course of business, we frequently engage in discussions with third parties relating to possible acquisitions, strategic investments and alliances, joint ventures and divestitures, and generally expect to complete several transactions per year. In addition, we may decide to exit a particular business within our product portfolio. As a result of such transactions, our financial results may differ from our own or the investment community's expectations in a given fiscal quarter, or over the long term. We may have difficulty developing, manufacturing and marketing the products of a newly acquired company in a way that enhances the performance of our combined businesses or product lines. Transactions such as acquisitions have resulted, and may in the future result, in unexpected significant costs and expenses. In the future, we may be required to record charges to earnings during the period if we determine there is an impairment of goodwill or intangible assets, up to the full amount of the value of the assets, or, in the case of strategic investments and alliances, consolidate results, including losses, of third parties or write down investment values or loans and convertible notes related to the strategic investment. In addition, acquisitions and strategic investments and alliances may require us to integrate and collaborate with a different company culture, management team and business infrastructure. Depending on the size and complexity of an acquisition, our successful integration of the entity depends on a variety of factors, including introducing new products and meeting revenue targets as expected, the retention of key employees and the retention of key customers.

The integration of acquired businesses is likely to result in our systems and internal controls becoming increasingly complex and more difficult to manage. Any difficulties in the assimilation of acquired businesses into our control system could harm our operating results or cause us to fail to meet our financial reporting obligations.

A successful divestiture depends on various factors, including our ability to effectively transfer liabilities, contracts, facilities and employees to the purchaser, identify and separate the intellectual property to be divested from the intellectual property that we wish to keep and reduce fixed costs previously associated with the divested assets or business. In addition, if customers of the divested business do not receive the same level of service from the new owners, this may adversely affect our other businesses to the extent that these customers also purchase other Agilent

products. In exiting a business, we may still retain liabilities associated with the support and warranty of those businesses. All of these efforts require varying levels of management resources, which may divert our attention from other business operations. If we do not realize the expected benefits or synergies of such transactions, our consolidated financial position, results of operations, cash flows and stock price could be negatively impacted.

If we fail to maintain an effective system of internal controls, we may not be able to accurately report our financial results, which could lead to a loss of investor confidence in our financial statements and have an adverse effect on our stock price.

Effective internal controls are necessary for us to provide reliable and accurate financial statements and to effectively prevent fraud. We devote significant resources and time to comply with the internal control over financial reporting requirements of the Sarbanes Oxley Act of 2002 and continue to enhance our controls. In our Annual Report on Form 10-K for our fiscal year ended October 31, 2015, management concluded that, because of a material weakness in our internal control over financial reporting related to the accounting for income taxes, our disclosure controls and procedures were not effective as of October 31, 2015. We remediated the material weakness for income tax as of October 31, 2016. However, we cannot be certain that we will be able to

Table of Contents

prevent future significant deficiencies or material weaknesses. Inadequate internal controls could cause investors to lose confidence in our reported financial information, which could have a negative effect on investor confidence in our financial statements, the trading price of our stock and our access to capital.

Integrating Dako A/S may be more difficult, costly or time consuming than expected and our business and financial condition may be materially impaired.

We may not achieve the desired benefits from our acquisition and integration of Dako. In addition, the operation of Dako within Agilent may be a difficult, costly and time-consuming process that involves a number of risks, including, but not limited to:

- our response to significant competitive pressure;
- difficulties in meeting new product timelines;
- the ability to grow in emerging markets;
- increased exposure to certain governmental regulations and compliance requirements;
- increased costs to address certain governmental regulations and compliance issues, such as the U.S. Food and Drug Administration (“FDA”) warning letter received in August 2013 which has now been lifted by the FDA;
- increased costs and use of resources; and
- difficulties in the assimilation of different corporate cultures, practices and sales and distribution methodologies, as well as in the assimilation and retention of geographically dispersed, decentralized operations and personnel.

Even if we are able to successfully operate Dako within Agilent, we may not be able to realize the revenue and other synergies and growth that we anticipated from the acquisition in the time frame that we expected, and the costs of achieving these benefits may be higher than what we expected. As a result, the Dako acquisition and integration may not contribute to our earnings as expected, we may not achieve our operating margin targets when expected, or at all, and we may not achieve the other anticipated strategic and financial benefits of this transaction.

Our customers and we are subject to various governmental regulations, compliance with or changes in such regulations may cause us to incur significant expenses, and if we fail to maintain satisfactory compliance with certain regulations, we may be forced to recall products and cease their manufacture and distribution, and we could be subject to civil or criminal penalties.

Our customers and we are subject to various significant international, federal, state and local regulations, including but not limited to regulations in the areas of health and safety, packaging, product content, employment, labor and immigration, import/export controls, trade restrictions and anti-competition. These regulations are complex, change frequently and have tended to become more stringent over time. We may be required to incur significant expenses to comply with these regulations or to remedy any violations of these regulations. Any failure by us to comply with applicable government regulations could also result in the cessation of our operations or portions of our operations, product recalls or impositions of fines and restrictions on our ability to carry on or expand our operations. In addition, because many of our products are regulated or sold into regulated industries, we must comply with additional regulations in marketing our products. We develop, configure and market our products to meet customer needs created by these regulations. Any significant change in these regulations could reduce demand for our products, force us to modify our products to comply with new regulations or increase our costs of producing these products. If demand for our products is adversely affected or our costs increase, our business would suffer.

Our products and operations are also often subject to the rules of industrial standards bodies, like the International Standards Organization, as well as regulation by other agencies such as the FDA. We also must comply with work safety rules. If we fail to adequately address any of these regulations, our businesses could be harmed.

We are subject to extensive regulation by the FDA and certain similar foreign regulatory agencies, and failure to comply with such regulations could harm our reputation, business, financial condition and results of operations.

A number of our products are subject to regulation by the FDA and certain similar foreign regulatory agencies. In addition, a number of our products may in the future be subject to regulation by the FDA and certain similar foreign regulatory agencies. These regulations govern a wide variety of product-related activities, from quality management, design and development to labeling, manufacturing, promotion, sales and distribution. If we or any of our suppliers or distributors fail to comply with FDA and other applicable regulatory requirements or are perceived to potentially have failed to comply, we may face, among other things, warning letters, adverse publicity affecting both us and our customers; investigations or notices of non-compliance, fines, injunctions, and civil penalties; import or export restrictions; partial suspensions or total shutdown of production facilities or the imposition of operating restrictions; increased difficulty in obtaining required FDA clearances or approvals or foreign equivalents; seizures or recalls of our products or those of our customers; or the inability to sell our products. Any such FDA or other regulatory

Table of Contents

agency actions could disrupt our business and operations, lead to significant remedial costs and have a material adverse impact on our financial position and results of operations.

Some of our products are subject to particularly complex regulations such as regulations of toxic substances and failure to comply with such regulations could harm our business.

Some of our products and related consumables are used in conjunction with chemicals whose manufacture, processing, distribution and notification requirements are regulated by the U.S. Environmental Protection Agency (“EPA”) under the Toxic Substances Control Act, and by regulatory bodies in other countries under similar laws. The Toxic Substances Control Act regulations govern, among other similar things, the testing, manufacture, processing and distribution of chemicals, the testing of regulated chemicals for their effects on human health and safety and import and export of chemicals. The Toxic Substances Control Act prohibits persons from manufacturing any chemical in the United States that has not been reviewed by EPA for its effect on health and safety, and placed on an EPA inventory of chemical substances. We must ensure conformance of the manufacturing, processing, distribution of and notification about these chemicals to these laws and adapt to regulatory requirements in all applicable countries as these requirements change. If we fail to comply with the notification, record-keeping and other requirements in the manufacture or distribution of our products, then we could be subject to civil penalties, criminal prosecution and, in some cases, prohibition from distributing or marketing our products until the products or component substances are brought into compliance.

Our business may suffer if we fail to comply with government contracting laws and regulations.

We derive a portion of our revenue from direct and indirect sales to U.S., state, local, and foreign governments and their respective agencies. Such contracts are subject to various procurement laws and regulations, and contract provisions relating to their formation, administration and performance. Failure to comply with these laws, regulations or provisions in our government contracts could result in the imposition of various civil and criminal penalties, termination of contracts, forfeiture of profits, suspension of payments, or suspension from future government contracting. If our government contracts are terminated, if we are suspended from government work, or if our ability to compete for new contracts is adversely affected, our business could suffer.

Our retirement and post retirement pension plans are subject to financial market risks that could adversely affect our future results of operations and cash flows.

We have significant retirement and post retirement pension plan assets and obligations. The performance of the financial markets and interest rates impact our plan expenses and funding obligations. Significant decreases in market interest rates, decreases in the fair value of plan assets and investment losses on plan assets will increase our funding obligations, and adversely impact our results of operations and cash flows.

The impact of consolidation and acquisitions of competitors is difficult to predict and may harm our business.

The life sciences industry is intensely competitive and has been subject to increasing consolidation. Consolidation in our industries could result in existing competitors increasing their market share through business combinations and result in stronger competitors, which could have a material adverse effect on our business, financial condition and results of operations. We may not be able to compete successfully in increasingly consolidated industries and cannot predict with certainty how industry consolidation will affect our competitors or us.

If we are unable to successfully manage the consolidation and streamlining of our manufacturing operations, we may not achieve desired efficiencies and our ability to deliver products to our customers could be disrupted.

Although we utilize manufacturing facilities throughout the world, we have been consolidating, and may continue to consolidate, our manufacturing operations to certain of our plants to achieve efficiencies and gross margin improvements. Additionally, we typically consolidate the production of products from our acquisitions into our supply chain and manufacturing processes, which are technically complex and require expertise to operate. If we are unable to establish processes to efficiently and effectively produce high quality products in the consolidated locations, we may not achieve the anticipated synergies and production may be disrupted, which could adversely affect our business and operating results.

Our operating results may suffer if our manufacturing capacity does not match the demand for our products.

Because we cannot immediately adapt our production capacity and related cost structures to rapidly changing market conditions, when demand does not meet our expectations, our manufacturing capacity may exceed our production requirements. If, during a general market upturn or an upturn in one of our segments, we cannot increase our manufacturing capacity to meet

## Table of Contents

product demand, we may not be able to fulfill orders in a timely manner which could lead to order cancellations, contract breaches or indemnification obligations. This inability could materially and adversely limit our ability to improve our results. By contrast, if during an economic downturn we had excess manufacturing capacity, then our fixed costs associated with excess manufacturing capacity would adversely affect our income, margins, and operating results.

Dependence on contract manufacturing and outsourcing other portions of our supply chain, including logistics and third-party package delivery services, may adversely affect our ability to bring products to market and damage our reputation. Dependence on outsourced information technology and other administrative functions may impair our ability to operate effectively.

As part of our efforts to streamline operations and to cut costs, we outsource aspects of our manufacturing processes and other functions and continue to evaluate additional outsourcing. If our contract manufacturers or other outsourcers fail to perform their obligations in a timely manner or at satisfactory quality levels, our ability to bring products to market and our reputation could suffer. For example, during a market upturn, our contract manufacturers may be unable to meet our demand requirements, which may preclude us from fulfilling our customers' orders on a timely basis. The ability of these manufacturers to perform is largely outside of our control. If one or more of the third-party package delivery providers experiences a significant disruption in services or institutes a significant price increase, we may have to seek alternative providers, our costs could increase and the delivery of our products could be prevented or delayed. Additionally, changing or replacing our contract manufacturers, logistics providers or other outsourcers could cause disruptions or delays. In addition, we outsource significant portions of our information technology ("IT") and other administrative functions. Since IT is critical to our operations, any failure to perform on the part of our IT providers could impair our ability to operate effectively. In addition to the risks outlined above, problems with manufacturing or IT outsourcing could result in lower revenue and unexecuted efficiencies, and impact our results of operations and our stock price. Much of our outsourcing takes place in developing countries and, as a result, may be subject to geopolitical uncertainty.

Environmental contamination from past operations could subject us to unreimbursed costs and could harm on-site operations and the future use and value of the properties involved, and environmental contamination caused by ongoing operations could subject us to substantial liabilities in the future.

Certain properties transferred to Keysight Technologies, Inc. ("Keysight") as part of the separation are undergoing remediation by HP Inc. and Hewlett-Packard Enterprise (formerly Hewlett-Packard Company) (together "HP") for subsurface contaminations that were known at the time of our separation from HP. HP has agreed to retain the liability for this subsurface contamination, perform the required remediation and indemnify Keysight with respect to claims arising out of that contamination. HP will have access to those Keysight properties to perform remediation. While HP has agreed to minimize interference with on-site operations at those properties, remediation activities and subsurface contamination may require Keysight to incur unreimbursed costs and could harm on-site operations and the future use and value of the properties. We cannot be sure that Keysight will not seek additional reimbursement from us for that interference or unreimbursed costs. We cannot be sure that HP will continue to fulfill its indemnification or remediation obligations, in which case Keysight may seek indemnification from us. In addition, the determination of the existence and cost of any additional contamination caused by us prior to the separation could involve costly and time-consuming negotiations and litigation.

Other than those properties currently undergoing remediation by HP, we have agreed to indemnify HP, with respect to any liability associated with contamination from past operations, and Keysight, with respect to any liability associated with contamination prior to the separation, at, respectively, properties transferred from HP to us and properties transferred by us to Keysight. While we are not aware of any material liabilities associated with any potential subsurface contamination at any of those properties, subsurface contamination may exist, and we may be exposed to

material liability as a result of the existence of that contamination.

Our current and historical manufacturing processes involve, or have involved, the use of substances regulated under various international, federal, state and local laws governing the environment. As a result, we may become subject to liabilities for environmental contamination, and these liabilities may be substantial. While we have divested substantially all of our semiconductor related businesses to Avago Technologies Ltd. and Advantest Corporation and regardless of indemnification arrangements with those parties, we may still become subject to liabilities for historical environmental contamination related to those businesses. Although our policy is to apply strict standards for environmental protection at our sites inside and outside the United States, even if the sites outside the United States are not subject to regulations imposed by foreign governments, we may not be aware of all conditions that could subject us to liability.

As part of our acquisition of Varian, Inc. ("Varian") we assumed the liabilities of Varian, including Varian's costs and potential liabilities for environmental matters. One such cost is our obligation, along with the obligation of Varian Semiconductor Equipment Associates, Inc. ("VSEA") to each indemnify Varian Medical Systems, Inc. ("VMS") for certain costs relating to (a) environmental

Table of Contents

investigation, monitoring and/or remediation activities at certain facilities previously operated by Varian Associates, Inc. ("VAI") and third-party claims made in connection with environmental conditions at those facilities, and (b) EPA or third-party claims alleging that VAI or VMS is a potentially responsible party under the Comprehensive Environmental Response Compensation and Liability Act of 1980, as amended, in connection with certain sites to which VAI allegedly shipped manufacturing waste for recycling, treatment or disposal. Although any ultimate liability arising from environmental-related matters could result in significant expenditures that, if aggregated and assumed to occur within a single fiscal year, could be material to our financial statements, the likelihood of such occurrence is considered unlikely. Based on information currently available and our best assessment of the ultimate amount and timing of environmental-related events, management believes that the costs of environmental-related matters are unlikely to have a material adverse effect on our financial condition or results of operations.

Regulations related to "conflict minerals" may cause us to incur additional expenses and could limit the supply and increase the cost of certain metals used in manufacturing our products.

We are subject to the rules of the Securities and Exchange Commission ("SEC") which require disclosures by public companies of specified minerals, known as conflict minerals, that are necessary to the functionality or production of products manufactured or contracted to be manufactured. The rule, which requires an annual disclosure report to be filed with the SEC by May 31st of each year, requires companies to perform due diligence, disclose and report whether or not such minerals originate from the Democratic Republic of Congo or an adjoining country. There are costs associated with complying with these disclosure requirements, including for diligence in regards to the sources of any conflict minerals used in our products, in addition to the cost of remediation and other changes to products, processes, or sources of supply as a consequence of such verification activities. In addition, our ongoing implementation of these rules could adversely affect the sourcing, supply, and pricing of materials used in our products. The rule could affect sourcing at competitive prices and availability in sufficient quantities of certain minerals used in the manufacture of our products, including tin, tantalum, gold and tungsten. The number of suppliers who provide conflict-free minerals may be limited. In addition, there may be material costs associated with complying with the disclosure requirements, such as costs related to the due diligence process of determining the source of certain minerals used in our products, as well as costs of possible changes to products, processes, or sources of supply as a consequence of such verification activities. As our supply chain is complex and we use contract manufacturers for some of our products, we may not be able to sufficiently verify the origins of the relevant minerals used in our products through the due diligence procedures that we implement, which may harm our reputation. We may also encounter challenges to satisfy those customers who require that all of the components of our products be certified as conflict-free, which could place us at a competitive disadvantage if we are unable to do so.

Third parties may claim that we are infringing their intellectual property and we could suffer significant litigation or licensing expenses or be prevented from selling products or services.

From time to time, third parties may claim that one or more of our products or services infringe their intellectual property rights. We analyze and take action in response to such claims on a case by case basis. Any dispute or litigation regarding patents or other intellectual property could be costly and time-consuming due to the complexity of our technology and the uncertainty of intellectual property litigation and could divert our management and key personnel from our business operations. A claim of intellectual property infringement could force us to enter into a costly or restrictive license agreement, which might not be available under acceptable terms or at all, could require us to redesign our products, which would be costly and time-consuming, and/or could subject us to significant damages or to an injunction against the development and sale of certain of our products or services. Our intellectual property portfolio may not be useful in asserting a counterclaim, or negotiating a license, in response to a claim of intellectual property infringement. In certain of our businesses we rely on third party intellectual property licenses and we cannot ensure that these licenses will continue to be available to us in the future on favorable terms or at all.

Third parties may infringe our intellectual property and we may suffer competitive injury or expend significant resources enforcing our rights.

Our success depends in large part on our proprietary technology, including technology we obtained through acquisitions. We rely on various intellectual property rights, including patents, copyrights, trademarks and trade secrets, as well as confidentiality provisions and licensing arrangements, to establish our proprietary rights. If we do not enforce our intellectual property rights successfully our competitive position may suffer which could harm our operating results.

Our pending patent applications, and our pending copyright and trademark registration applications, may not be allowed or competitors may challenge the validity or scope of our patents, copyrights or trademarks. In addition, our patents, copyrights, trademarks and other intellectual property rights may not provide us a significant competitive advantage.

We may need to spend significant resources monitoring our intellectual property rights and we may or may not be able to detect infringement by third parties. Our competitive position may be harmed if we cannot detect infringement and enforce our

## Table of Contents

intellectual property rights quickly or at all. In some circumstances, we may choose to not pursue enforcement because an infringer has a dominant intellectual property position or for other business reasons. In addition, competitors might avoid infringement by designing around our intellectual property rights or by developing non-infringing competing technologies. Intellectual property rights and our ability to enforce them may be unavailable or limited in some countries which could make it easier for competitors to capture market share and could result in lost revenues. Furthermore, some of our intellectual property is licensed to others which allow them to compete with us using that intellectual property.

Changes in tax laws, unfavorable resolution of tax examinations, or exposure to additional income tax liabilities could have a material adverse effect on our results of operations, financial condition and liquidity.

We are subject to income taxes in both the U.S. and various foreign jurisdictions. Governments in the jurisdictions in which we operate implement changes to tax laws and regulations from time to time. Any changes in corporate income tax laws relating to transfer pricing or repatriation of capital, any changes in the interpretation of existing tax laws and regulations, or any implementation of tax laws relating to proposals to curb base erosion and profit shifting or proposals for fundamental U.S. and foreign corporate tax reform, could lead to increases in overall tax liability, which could materially impact our effective tax rate and have a significant adverse impact on our results of operations. We are also subject to ongoing tax examinations of our tax returns by the U.S. Internal Revenue Service and other tax authorities in various jurisdictions. We regularly assess the likelihood of adverse outcomes resulting from ongoing tax examinations to determine the adequacy of our provision for income taxes. These assessments can require a high degree of judgment and estimation. Intercompany transactions associated with the sale of inventory, services, intellectual property and cost share arrangements are complex and affect our tax liabilities. The calculation of our tax liabilities involves dealing with uncertainties in the application of complex tax laws and regulations in multiple jurisdictions. There can be no assurance that the outcomes from ongoing tax examinations will not have an adverse effect on our operating results and financial condition. A difference in the ultimate resolution of tax uncertainties from what is currently estimated could have an adverse effect on our operating results and financial condition.

If tax incentives change or cease to be in effect, our income taxes could increase significantly.

Agilent benefits from tax incentives extended to its foreign subsidiaries to encourage investment or employment. Several jurisdictions have granted Agilent tax incentives which require renewal at various times in the future. The incentives are conditioned on achieving various thresholds of investments and employment, or specific types of income. Agilent's taxes could increase if the incentives are not renewed upon expiration. If Agilent cannot or does not wish to satisfy all or parts of the tax incentive conditions, we may lose the related tax incentive and could be required to refund tax incentives previously realized. As a result, our effective tax rate could be higher than it would have been had we maintained the benefits of the tax incentives.

We have substantial cash requirements in the United States while most of our cash is generated outside of the United States. The failure to maintain a level of cash sufficient to address our cash requirements in the United States could adversely affect our financial condition and results of operations.

Although the cash generated in the United States from our operations should cover our normal operating requirements and debt service requirements, a substantial amount of additional cash is required for special purposes such as the maturity of our debt obligations, our stock repurchase program, our declared dividends and acquisitions of third parties. Our business operating results, financial condition, and strategic initiatives could be adversely impacted if we were unable to address our U.S. cash requirements through the efficient and timely repatriations of overseas cash or other sources of cash obtained at an acceptable cost.

We have outstanding debt and may incur other debt in the future, which could adversely affect our financial condition, liquidity and results of operations.

We currently have outstanding an aggregate principal amount of \$1.9 billion in senior unsecured notes. We also are party to a five-year unsecured revolving credit facility which expires in September 2019. On June 9, 2015, we increased the commitments under the existing credit facility by \$300 million so that the aggregate commitments under the facility now total \$700 million and retained a provision that allows us to further increase commitments to the credit facility by \$300 million in the aggregate, subject to certain conditions. As of October 31, 2016, we had no borrowings outstanding under the facility. We may borrow additional amounts in the future and use the proceeds from any future borrowing for general corporate purposes, other future acquisitions, expansion of our business or repurchases of our outstanding shares of common stock.

Our incurrence of this debt, and increases in our aggregate levels of debt, may adversely affect our operating results and financial condition by, among other things:

## Table of Contents

increasing our vulnerability to downturns in our business, to competitive pressures and to adverse economic and industry conditions;  
requiring the dedication of an increased portion of our expected cash flows from operations to service our indebtedness, thereby reducing the amount of expected cash flows available for other purposes, including capital expenditures, acquisitions, stock repurchases and dividends; and  
limiting our flexibility in planning for, or reacting to, changes in our business and our industry.

Our current revolving credit facility imposes restrictions on us, including restrictions on our ability to create liens on our assets and the ability of our subsidiaries to incur indebtedness, and requires us to maintain compliance with specified financial ratios. Our ability to comply with these ratios may be affected by events beyond our control. In addition, the indenture governing our senior notes contains covenants that may adversely affect our ability to incur certain liens or engage in certain types of sale and leaseback transactions. If we breach any of the covenants and do not obtain a waiver from the lenders, then, subject to applicable cure periods, our outstanding indebtedness could be declared immediately due and payable.

If we suffer a loss to our factories, facilities or distribution system due to catastrophe, our operations could be seriously harmed.

Our factories, facilities and distribution system are subject to catastrophic loss due to fire, flood, terrorism or other natural or man-made disasters. In particular, several of our facilities could be subject to a catastrophic loss caused by earthquake due to their locations. Our production facilities, headquarters and Agilent Technologies Laboratories in California, and our production facilities in Japan, are all located in areas with above-average seismic activity. If any of these facilities were to experience a catastrophic loss, it could disrupt our operations, delay production, shipments and revenue and result in large expenses to repair or replace the facility. If such a disruption were to occur, we could breach agreements, our reputation could be harmed, and our business and operating results could be adversely affected. In addition, since we have consolidated our manufacturing facilities, we are more likely to experience an interruption to our operations in the event of a catastrophe in any one location. Although we carry insurance for property damage and business interruption, we do not carry insurance or financial reserves for interruptions or potential losses arising from earthquakes or terrorism. Also, our third party insurance coverage will vary from time to time in both type and amount depending on availability, cost and our decisions with respect to risk retention. Economic conditions and uncertainties in global markets may adversely affect the cost and other terms upon which we are able to obtain third party insurance. If our third party insurance coverage is adversely affected, or to the extent we have elected to self-insure, we may be at a greater risk that our operations will be harmed by a catastrophic loss.

If we experience a significant disruption in, or breach in security of, our information technology systems, or if we fail to implement new systems and software successfully, our business could be adversely affected.

We rely on several centralized information technology systems throughout our company to provide products and services, keep financial records, process orders, manage inventory, process shipments to customers and operate other critical functions. Our information technology systems may be susceptible to damage, disruptions or shutdowns due to power outages, hardware failures, computer viruses, attacks by computer hackers, telecommunication failures, user errors, catastrophes or other unforeseen events. Our information technology systems also may experience interruptions, delays or cessations of service or produce errors in connection with system integration, software upgrades or system migration work that takes place from time to time. If we were to experience a prolonged system disruption in the information technology systems that involve our interactions with customers or suppliers, it could result in the loss of sales and customers and significant incremental costs, which could adversely affect our business. In addition, security breaches of our information technology systems could result in the misappropriation or unauthorized disclosure of confidential information belonging to us or to our employees, partners, customers or suppliers, which could result in our suffering significant financial or reputational damage.

Adverse conditions in the global banking industry and credit markets may adversely impact the value of our cash investments or impair our liquidity.

As of October 31, 2016, we had cash and cash equivalents of approximately \$2,289 million invested or held in a mix of money market funds, time deposit accounts and bank demand deposit accounts. Disruptions in the financial markets may, in some cases, result in an inability to access assets such as money market funds that traditionally have been viewed as highly liquid. Any failure of our counterparty financial institutions or funds in which we have invested may adversely impact our cash and cash equivalent positions and, in turn, our results and financial condition.

## Table of Contents

We could incur significant liability if the distribution of Keysight common stock to our shareholders is determined to be a taxable transaction.

We have received an opinion from outside tax counsel to the effect that the separation and distribution of Keysight qualifies as a transaction that is described in Sections 355(a) and 368(a)(1)(D) of the Internal Revenue Code. The opinion relies on certain facts, assumptions, representations and undertakings from Keysight and us regarding the past and future conduct of the companies' respective businesses and other matters. If any of these facts, assumptions, representations or undertakings are incorrect or not satisfied, our shareholders and we may not be able to rely on the opinion of tax counsel and could be subject to significant tax liabilities. Notwithstanding the opinion of tax counsel, we have received, the IRS could determine on audit that the separation is taxable if it determines that any of these facts, assumptions, representations or undertakings are not correct or have been violated or if it disagrees with the conclusions in the opinion. If the separation is determined to be taxable for U.S. federal income tax purposes, our shareholders that are subject to U.S. federal income tax and we could incur significant U.S. federal income tax liabilities.

We may be exposed to claims and liabilities as a result of the separation with Keysight.

We entered into a separation and distribution agreement and various other agreements with Keysight to govern the separation and the relationship of the two companies going forward. These agreements provide for specific indemnity and liability obligations and could lead to disputes between us. The indemnity rights we have against Keysight under the agreements may not be sufficient to protect us. In addition, our indemnity obligations to Keysight may be significant and these risks could negatively affect our financial condition.

We cannot assure you that we will continue to pay dividends on our common stock.

Since the first quarter of fiscal year 2012, we have paid a quarterly dividend on our common stock. The timing, declaration, amount and payment of any future dividends fall within the discretion of our Board of Directors and will depend on many factors, including our available cash, estimated cash needs, earnings, financial condition, operating results, capital requirements, as well as limitations in our contractual agreements, applicable law, regulatory constraints, industry practice and other business considerations that our Board of Directors considers relevant. A change in our dividend program could have an adverse effect on the market price of our common stock.

### Item 1B. Unresolved Staff Comments

None.

### Item 2. Properties

As of October 31, 2016 we owned or leased a total of approximately 5.6 million square feet of space worldwide. Of that, we owned approximately 4.1 million square feet and leased the remaining 1.5 million square feet. Our sales and support facilities occupied a total of approximately 0.7 million square feet. Our manufacturing plants, R&D facilities and warehouse and administrative facilities occupied approximately 4.9 million square feet. All of our businesses share sales offices throughout the world.

Information about each of our businesses appears below:

Life Sciences & Applied Markets Group. Our life sciences and applied markets business has manufacturing and R&D facilities in Australia, China, Germany, Italy, Malaysia, Singapore, United Kingdom and the United States.

Diagnostics and Genomics Group. Our diagnostics and genomics business has manufacturing and R&D facilities in Denmark, Germany, Malaysia and the U.S.

Agilent CrossLab Group. Our Agilent CrossLab business has manufacturing and R&D facilities in Australia, China, Germany, Japan, Netherlands, United Kingdom and the United States.

Item 3. Legal Proceedings

We are involved in lawsuits, claims, investigations and proceedings, including, but not limited to, intellectual property, commercial and employment matters, which arise in the ordinary course of business. There are no matters pending that we currently

Table of Contents

believe are probable or reasonably possible of having a material impact to our business, consolidated financial condition, results of operations or cash flows.

## Item 4. Mine Safety Disclosures

Not applicable.

## PART II

## Item 5. Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Our common stock is listed on the New York Stock Exchange with the ticker symbol "A". The following table sets forth the high and low sale prices and the dividend declarations per quarter for the 2015 and 2016 fiscal years as reported in the consolidated transaction reporting system for the New York Stock Exchange:

Fiscal 2015	High	Low	Dividends
First Quarter (ended January 31, 2015)	\$42.99	\$37.68	\$ 0.10
Second Quarter (ended April 30, 2015)	\$43.59	\$37.71	\$ 0.10
Third Quarter (ended July 31, 2015)	\$42.93	\$38.48	\$ 0.10
Fourth Quarter (ended October 31, 2015)	\$41.35	\$33.12	\$ 0.10

Fiscal 2016	High	Low	Dividends
First Quarter (ended January 31, 2016)	\$42.48	\$36.01	\$ 0.115
Second Quarter (ended April 30, 2016)	\$42.00	\$34.15	\$ 0.115
Third Quarter (ended July 31, 2016)	\$48.18	\$40.39	\$ 0.115
Fourth Quarter (ended October 31, 2016)	\$48.63	\$43.11	\$ 0.115

As of December 1, 2016, there were 24,949 common stockholders of record.

During fiscal 2016, we issued four quarterly dividends of \$0.115 per share. All decisions regarding the declaration and payment of dividends are at the discretion of our Board of Directors and will be evaluated regularly in light of our financial condition, earnings, growth prospects, funding requirements, applicable law, and any other factors that our Board deems relevant. The information required by this item with respect to equity compensation plans is included under the caption Equity Compensation Plans in our proxy statement for the annual meeting of stockholders to be held March 15, 2017, to be filed with the Securities and Exchange Commission pursuant to Regulation 14A, and is incorporated herein by reference.

## STOCK PRICE PERFORMANCE GRAPH

The graph below shows the cumulative total stockholder return on our common stock with the cumulative total return of the S&P 500 Index; our Current Peer Group Index <sup>(a)</sup> and our Old Peer Group Index <sup>(b)</sup> assuming an initial investment of \$100 on October 31, 2011 and the reinvestment of all dividends. We have selected Danaher Corporation to replace the entire S&P Industrials Sector as we believe Danaher more closely matches our company characteristics than the majority of the companies included in the S&P Industrials Sector, which was previously included in the Old Peer Group Index. Agilent's stock price performance shown in the following graph is not indicative of future stock price performance. The data for this performance graph was compiled for us by Standard and Poor's.

Company Name / Index	Base Period	INDEXED RETURNS					
		Years					
		Ending	Ending	Ending	Ending	Ending	
		10/31/11	10/31/12	10/31/13	10/31/14	10/31/15	10/31/16
Agilent Technologies	100	97.81	139.39	153.23	145.42	169.58	
S&P 500	100	115.21	146.52	171.82	180.75	188.90	
New Peer Group	100	120.61	160.47	200.11	210.61	205.57	
Old Peer Group	100	118.15	159.32	193.66	201.90	203.76	

(a) Our New Peer Group Index includes all companies in the S&P 500 Healthcare Sector, Materials Sector and Danaher. In July, Danaher was moved from the S&P Industrial Sector to the S&P Healthcare Sector.

(b) Our Old Peer Group Index includes all companies in the S&P 500 Healthcare Sector, Materials Sector and Industrials Sector.

(c) On November 1, 2014, we completed the spin-off of our electronic measurement business into an independent publicly traded company called Keysight Technologies, Inc. The cumulative returns of our common stock have been adjusted to reflect the spin-off.

Table of Contents

## ISSUER PURCHASES OF EQUITY SECURITIES

The table below summarizes information about the Company's purchases, based on trade date; of its equity securities registered pursuant to Section 12 of the Exchange Act during the quarterly period ended October 31, 2016. The total number of shares of common stock purchased by the Company during the fiscal year ended October 31, 2016 is 10,829,981 shares.

Period	Total Number of Shares of Common Stock Purchased(1)	Weighted Average Price Paid per Share of Common Stock(2)	Total Number of Shares of Common Stock Purchased as Part of Publicly Announced Plans or Programs(1)	Maximum Approximate Dollar Value of Shares of Common Stock that May Yet Be Purchased Under the Plans or Programs (in millions)(1)
Aug. 1, 2016 through Aug. 31, 2016	—	—	—	\$ 850
Sep. 1, 2016 through Sep. 30, 2016	447,978	45.25	447,978	\$ 830
Oct. 1, 2016 through Oct. 31, 2016	710,874	\$ 44.83	710,874	\$ 798
Total	1,158,852	\$ 45.00	1,158,852	

On May 28, 2015, we announced that our board of directors had approved a new share repurchase program (the "2015 repurchase program"). The 2015 repurchase program authorizes the purchase of up to \$1.14 billion of our common stock through and including November 1, 2018. The 2015 repurchase program does not require the company to acquire a specific number of shares and may be suspended or discontinued at any time. All such shares and related costs, except for 150,000 shares purchased in October 2016 that had not settled as of October 31, 2016, are held as treasury stock and accounted for using the cost method.

(2) The weighted average price paid per share of common stock does not include the cost of commissions.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion should be read in conjunction with the consolidated financial statements and notes thereto included elsewhere in this Annual Report on Form 10-K. This report contains forward-looking statements including, without limitation, statements regarding trends, seasonality and growth in, and drivers of, the markets we sell into, our strategic direction, our future effective tax rate and tax valuation allowance, earnings from our foreign subsidiaries, lease and site service income from Keysight, the impact of foreign currency movements on our performance, our hedging programs, indemnification, new product and service introductions, the ability of our products to meet market needs, adoption of our products, changes to our manufacturing processes, the use of contract manufacturers and out sourcing and third-party package delivery services, source and supply of materials used in our products, the impact of local government regulations on our ability to pay vendors or conduct operations, our liquidity position, our ability to generate cash from operations, growth in our businesses, our investments, including in research and development, the potential impact of adopting new accounting pronouncements, our financial results, our operating margin, our sales, our purchase commitments, our capital expenditures, our contributions to our pension plans and other defined benefit plans, our strategic initiatives, our cost-control activities and other cost saving initiatives, uncertainties relating to Food and Drug Administration ("FDA") and other regulatory approvals, the integration of our acquisitions and other transactions, impairment of goodwill and other intangible assets, write-down of investment values or loans and convertible notes, our stock repurchase program, our declared dividends, and the existence of economic instability, that involve risks and uncertainties. Our actual results could differ materially from the results contemplated by these forward-looking statements due to various factors, including those discussed in Part I Item 1A and elsewhere in this Form 10-K.

Overview and Executive Summary

Agilent Technologies Inc. ("we", "Agilent" or the "company"), incorporated in Delaware in May 1999, is a global leader in life sciences, diagnostics and applied chemical markets, providing application focused solutions that includes instruments, software, services and consumables for the entire laboratory workflow.

In November 2015, we completed the acquisition of Seahorse Bioscience ("Seahorse"), a leader in providing instruments and assay kits for measuring cell metabolism and bioenergetics for \$242 million in cash. Seahorse's technology enables researchers to better understand cell health, function and signaling, and how the cell may be impacted by the introduction of a specific drug, by providing real-time kinetics to unlock essential cellular bioenergetics data. The financial results of Seahorse have been included within Agilent's consolidated financial statements from November 1, 2015.

On March 2, 2016, Agilent made a preferred stock investment in Lasergen for \$80 million. Agilent's initial ownership stake was 48 percent and we have also joined the board of Lasergen and signed a collaboration agreement. We have the option to acquire all of the remaining shares of Lasergen until March 2, 2018, for additional consideration of \$105 million. Lasergen is a Variable Interest Entity ("VIE"), however, we do not consolidate the entity in our financial statements because we do not have the power to direct the activities of the VIE that most significantly impact the VIE's economic performance nor are we the primary beneficiary. Because of the nature of the preferred stock of Lasergen that we own, we account for this investment under the cost method.

On August 1, 2016 we completed the acquisition of substantially all of the assets of iLab Solutions LLC ("iLab"), a cloud-based solutions provider for core laboratory management. iLab's offerings enables customers to easily and accurately book time in shared facilities, to bill and invoice for projects, to manage studies, to generate reports and business intelligence, and to schedule instrument reservations across multiple projects. The purchase price was \$26 million in cash. The financial results of iLab have been included within Agilent's consolidated financial statements from August 1, 2016.

Agilent's net revenue of \$4,202 million in 2016 increased 4 percent when compared to 2015. Foreign currency movements for 2016 had an unfavorable impact of approximately 2 percentage points compared to 2015. Agilent's net revenue of \$4,038 million was flat in 2015 when compared to 2014.

The life sciences and applied markets business brings together Agilent's analytical laboratory instrumentation and informatics. Revenue increased 1 percent in 2016 when compared to 2015. Foreign currency movements had an unfavorable impact of approximately 2 percentage points in 2016 when compared to 2015. For the year ended October 31, 2016 and excluding the impact of foreign currency movements, acquisitions and the NMR business our performance within the life sciences market continued to show strong revenue growth from the pharmaceutical and biotechnology markets. Within the applied markets, and excluding the impact of foreign currency movements and the NMR business, there was strong growth in both the environmental and food markets, but revenue from sales to other applied markets was weak with a decline in revenue from sales to the chemical and energy markets. Revenue decreased 2 percent in 2015 when compared to 2014. For the year ended October 31, 2015 and

Table of Contents

excluding the impact of currency movements and the NMR business, our performance within the life sciences business showed consistent revenue growth from sales to the pharmaceutical and biotechnology market partially offset by a decrease in the revenue generated from sales to the life sciences research market. Within applied markets and excluding the impact of currency movements and the NMR business, there was weakness in the chemical and energy markets in the year ended October 31, 2015 when compared to the prior year.

The diagnostics and genomics business includes genomics, nucleic acid contract manufacturing and the pathology, companion diagnostics and reagent partnership businesses. Revenue increased 7 percent in 2016 when compared to 2015. Foreign currency movements had an unfavorable impact of approximately 1 percentage points in 2016 when compared to 2015. Excluding the impact of foreign currency movements and acquisitions, growth in revenue from sales to the diagnostics and clinical markets continued to be strong, led by our companion diagnostics and genomics businesses in the year ended October 31, 2016 when compared to the prior year. Revenue was flat in 2015 when compared to 2014. Excluding foreign currency movements, our growth in revenue from sales to the diagnostics and clinical markets was strong in the year ended October 31, 2015 when compared to the prior year.

The Agilent CrossLab business combines our analytical laboratory services and consumables business. Revenue increased 7 percent in 2016 when compared to 2015. Foreign currency movements had an unfavorable impact of approximately 2 percentage points in 2016 when compared to 2015. Excluding the impact of foreign currency movements and acquisitions, there was growth in sales to all key markets. The pharmaceutical and biotechnology markets led all the markets in revenue and revenue growth along with very strong revenue growth from the food markets. In addition, we saw moderate growth from the environmental market and modest revenue growth from the chemical and energy markets. Revenue increased 2 percent in 2015 when compared to 2014. Excluding the impact of foreign currency movements there was growth in sales to all key end markets, in particular, the pharmaceutical and biotechnology market in the year ended October 31, 2015 when compared to the prior year. Within the applied markets revenue in chemical and energy end markets were slower but still reported growth when adjusted for currency movements.

Net income from continuing operations was \$462 million in 2016 compared to net income from continuing operations of \$438 million and \$232 million in 2015 and 2014, respectively. As of October 31, 2016 and 2015 we had cash and cash equivalents balances of \$2,289 million and \$2,003 million, respectively.

On November 22, 2013 we announced that our board of directors had authorized a share repurchase program. The existing program is designed to reduce or eliminate dilution resulting from issuance of stock under the company's employee equity incentive programs to target maintaining a weighted average share count of approximately 335 million diluted shares. For the years ended October 31, 2016, 2015 and 2014 we repurchased 2.4 million shares for \$98 million, 6 million shares for \$267 million and 4 million shares for \$200 million, respectively. All such shares and related costs are held as treasury stock and accounted for using the cost method.

On May 28, 2015 we announced that our board of directors had approved a new share repurchase program (the "2015 repurchase program"). The 2015 share repurchase program authorizes the purchase of up to \$1.14 billion of our common stock through and including November 1, 2018. The 2015 repurchase program does not require the company to acquire a specific number of shares and may be suspended or discontinued at any time. During the year ended October 31, 2016, upon the completion of our previous repurchase program, we repurchased approximately 8.3 million shares for \$336 million under this authorization. All such shares and related costs are held as treasury stock and accounted for using the cost method.

For the years ended October 31, 2016, 2015 and 2014 cash dividends of \$150 million, \$133 million and \$176 million were paid on the company's outstanding common stock, respectively. On November 16, 2016, we declared a quarterly dividend of \$0.132 per share of common stock, or approximately \$43 million which will be paid on January 25, 2017

to shareholders of record as of the close of business on January 3, 2017. The timing and amounts of any future dividends are subject to determination and approval by our board of directors.

Looking forward, we expect to continue to focus on the growth of the operating margin in our businesses by simplifying our operations, differentiating product solutions and improving our customer's experience. We anticipate returning a significant proportion of our cash flow to shareholders through our dividend and share repurchase programs. End market growth outlook in today's uncertain political and economic environment is unpredictable and challenging. However, we expect continued strength in the pharmaceutical markets and solid growth in the food and environmental markets but we remain uncertain about the growth in the chemical and energy markets. The unfavorable effects of changes in foreign currency exchange rates has decreased revenue by approximately 2 percentage points for the year ended October 31, 2016. Costs and expenses, incurred in local currency, were subject to the favorable effects due to changes in foreign currency exchange rates reducing our overall net exposure. The impact of foreign currency exchange rates movements can be positive or negative in any period and is calculated by applying the prior period foreign currency exchange rates to the current year period. We anticipate that changes in foreign currency exchange rates

## Table of Contents

will continue to have an unfavorable impact on our performance for the near future.

### Critical Accounting Policies and Estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the U.S. requires management to make estimates and assumptions that affect the amounts reported in our consolidated financial statements and accompanying notes. Management bases its estimates on historical experience and various other assumptions believed to be reasonable. Although these estimates are based on management's best knowledge of current events and actions that may impact the company in the future, actual results may be different from the estimates. An accounting policy is deemed to be critical if it requires an accounting estimate to be made based on assumptions about matters that are highly uncertain at the time the estimate is made, and if different estimates that reasonably could have been used or changes in the accounting estimate that are reasonably likely to occur could materially change the financial statements. Our critical accounting policies are those that affect our financial statements materially and involve difficult, subjective or complex judgments by management. Those policies are revenue recognition, inventory valuation, share-based compensation, retirement and post-retirement plan assumptions, valuation of goodwill and purchased intangible assets and accounting for income taxes.

**Revenue recognition.** We enter into agreements to sell products (hardware or software), services, and other arrangements (multiple element arrangements) that include combinations of products and services. Revenue from product sales, net of trade discounts and allowances, is recognized provided that persuasive evidence of an arrangement exists, delivery has occurred, the price is fixed or determinable, and collectability is reasonably assured. Delivery is considered to have occurred when title and risk of loss have transferred to the customer. Revenue is reduced for estimated product returns, when appropriate. For sales that include customer-specified acceptance criteria, revenue is recognized after the acceptance criteria have been met. For products that include installation, if the installation meets the criteria to be considered a separate element, product revenue is recognized upon delivery, and recognition of installation revenue occurs when the installation is complete. Otherwise, neither the product nor the installation revenue is recognized until the installation is complete. Revenue from services is deferred and recognized over the contractual period or as services are rendered and accepted by the customer. We allocate revenue to each element in our multiple-element arrangements based upon their relative selling prices. We determine the selling price for each deliverable based on a selling price hierarchy. The selling price for a deliverable is based on our vendor specific objective evidence (VSOE) if available, third-party evidence (TPE) if VSOE is not available, or estimated selling price (ESP) if neither VSOE nor TPE is available. Revenue from the sale of software products that are not required to deliver the tangible product's essential functionality are accounted for under software revenue recognition rules. Revenue allocated to each element is then recognized when the basic revenue recognition criteria for that element have been met. The amount of product revenue recognized is affected by our judgments as to whether an arrangement includes multiple elements.

We use VSOE of selling price in the selling price allocation in all instances where it exists. VSOE of selling price for products and services is determined when a substantial majority of the selling prices fall within a reasonable range when sold separately. TPE of selling price can be established by evaluating largely interchangeable competitor products or services in standalone sales to similarly situated customers. As our products contain a significant element of proprietary technology and the solution offered differs substantially from that of competitors, it is difficult to obtain the reliable standalone competitive pricing necessary to establish TPE. ESP represents the best estimate of the price at which we would transact a sale if the product or service were sold on a standalone basis. We determine ESP for a product or service by using historical selling prices which reflect multiple factors including, but not limited to customer type, geography, market conditions, competitive landscape, gross margin objectives and pricing practices. The determination of ESP is made through consultation with and approval by management. We may modify or develop new pricing practices and strategies in the future. As these pricing strategies evolve changes may occur in ESP. The aforementioned factors may result in a different allocation of revenue to the deliverables in multiple element

arrangements, which may change the pattern and timing of revenue recognition for these elements but will not change the total revenue recognized for the arrangement.

**Inventory valuation.** We assess the valuation of our inventory on a periodic basis and make adjustments to the value for estimated excess and obsolete inventory based upon estimates about future demand and actual usage. Such estimates are difficult to make under most economic conditions. The excess balance determined by this analysis becomes the basis for our excess inventory charge. Our excess inventory review process includes analysis of sales forecasts, managing product rollovers and working with manufacturing to maximize recovery of excess inventory. If actual market conditions are less favorable than those projected by management, additional write-downs may be required. If actual market conditions are more favorable than anticipated, inventory previously written down may be sold to customers, resulting in lower cost of sales and higher income from operations than expected in that period. In the fourth quarter of 2014, Agilent announced it is exiting the NMR business, and as a result, recorded an excess inventory charge of \$30 million. For the year ended October 31, 2015 and 2016 additional excess inventory charges were recorded in respect of the exiting of the NMR business of \$4 million and \$2 million, respectively.

Table of Contents

Share-based compensation. We account for share-based awards in accordance with the authoritative guidance. Under the authoritative guidance, share-based compensation expense is primarily based on estimated grant date fair value and is recognized on a straight line basis. The fair value of share-based awards for employee stock option awards was estimated using the Black-Scholes option pricing model. No stock options were granted in 2016. Shares granted under the Long-Term Performance Program based on Total Shareholders Return ("LTPP-TSR") were valued using the Monte Carlo simulation model. The estimated fair value of restricted stock unit awards and LTPP based on Operating Margin ("LTPP-OM") is determined based on the market price of Agilent's common stock on the date of grant adjusted for expected dividend yield. The compensation cost for LTPP (OM) reflects the cost of awards that are probable to vest at the end of the performance period. The Employee Stock Purchase Plan ("ESPP") allows eligible employees to purchase shares of our common stock at 85 percent of the fair market value at the purchase date. All awards granted in 2016 to our senior management employees have a one year post-vest holding restriction and the value of these awards are adjusted for this.

Both the Black-Scholes and Monte Carlo simulation fair value models require the use of highly subjective and complex assumptions, including the option's expected life and the price volatility of the underlying stock. No options were granted in 2016. Due to the separation of Keysight on November 1, 2014, expected volatility for grants of options in 2015 was based on a 5.5 year average historical stock price volatility of a group of our peer companies. We believe our historical volatility prior to the separation of Keysight is no longer relevant. In developing our estimated life of our employee stock options of 5.8 years for 2014, we considered the historical option exercise behavior of our executive employees who were granted the majority of the options in the annual grants, which we believed was representative of future behavior. See Note 4, "Share-based Compensation," to the consolidated financial statements for more information. For the grants awarded under the 2009 stock plan after November 1, 2010, we increased the period available to retirement eligible employees to exercise their options from three years at retirement date to the full contractual term of ten years.

The assumptions used in calculating the fair value of share-based awards represent our best estimates, but these estimates involve inherent uncertainties and the application of management judgment. Although we believe the assumptions and estimates we have made are reasonable and appropriate, changes in assumptions could materially impact our reported financial results.

In the third quarter of fiscal year 2016, the company elected to early adopt new guidance that changes the accounting for certain aspects of share-based payments to employees. For additional details related to the new guidance see Note 2, "New Accounting Pronouncements."

Retirement and post-retirement benefit plan assumptions. Retirement and post-retirement benefit plan costs are a significant cost of doing business. They represent obligations that will ultimately be settled sometime in the future and therefore are subject to estimation. Pension accounting is intended to reflect the recognition of future benefit costs over the employees' average expected future service to Agilent based on the terms of the plans and investment and funding decisions. To estimate the impact of these future payments and our decisions concerning funding of these obligations, we are required to make assumptions using actuarial concepts within the framework of accounting principles generally accepted in the U.S. Two critical assumptions are the discount rate and the expected long-term return on plan assets. Other important assumptions include, expected future salary increases, expected future increases to benefit payments, expected retirement dates, employee turnover, retiree mortality rates, and portfolio composition. We evaluate these assumptions at least annually.

The discount rate is used to determine the present value of future benefit payments at the measurement date - October 31 for both U.S. and non-U.S. plans. For 2015 and 2016, the U.S. discount rates were based on the results of matching expected plan benefit payments with cash flows from a hypothetically constructed bond portfolio. In 2016, discount rates for the U.S. Plans decreased 75 basis points from the previous year. For 2016 and 2015, the discount

rate for non-U.S. plans was generally based on published rates for high quality corporate bonds and in 2016, decreased 60 basis points to 110 basis points from the previous year. If we changed our discount rate by 1 percent, the impact would be less than \$1 million on U.S. pension expense and \$16 million on non-U.S. pension expense. Lower discount rates increase present values of the pension benefit obligation and subsequent year pension expense; higher discount rates decrease present values of the pension benefit obligation and subsequent year pension expense.

The company uses alternate methods of amortization as allowed by the authoritative guidance which amortizes the actuarial gains and losses on a consistent basis for the years presented. For U.S. Plans, gains and losses are amortized over the average future lifetime of participants using the corridor method. For most Non-U.S. Plans and U.S. Post-Retirement Benefit Plans, gains and losses are amortized using a separate layer for each year's gains and losses. The expected long-term return on plan assets is estimated using current and expected asset allocations as well as historical and expected returns. Plan assets are valued at fair value. If we changed our estimated return on assets by 1 percent, the impact would be \$4 million on U.S. pension expense and \$7 million on non-U.S. pension expense. For 2016, actual return on assets was below expectations which, along with contributions during the year, increased next year's pension cost as well as resulting in a degradation of the funded status at year end. The net

## Table of Contents

periodic pension and post-retirement benefit costs recorded in continuing operations were \$3 million in 2016, \$26 million in 2015 and \$15 million in 2014. The year ended October 31, 2016, included a \$16 million gain on curtailment and settlement.

**Goodwill and Purchased Intangible Assets.** Under the authoritative guidance we have the option to perform a qualitative assessment to determine whether further impairment testing is necessary. The accounting standard gives an entity the option to first assess qualitative factors to determine whether performing the two-step test is necessary. If an entity believes, as a result of its qualitative assessment, that it is more-likely-than-not (i.e. greater than 50% chance) that the fair value of a reporting unit is less than its carrying amount, the quantitative impairment test will be required. Otherwise, no further testing will be required.

The guidance includes examples of events and circumstances that might indicate that a reporting unit's fair value is less than its carrying amount. These include macro-economic conditions such as deterioration in the entity's operating environment or industry or market considerations; entity-specific events such as increasing costs, declining financial performance, or loss of key personnel; or other events such as an expectation that a reporting unit will be sold or a sustained decrease in the stock price on either an absolute basis or relative to peers.

If it is determined, as a result of the qualitative assessment, that it is more-likely-than-not that the fair value of a reporting unit is less than its carrying amount, the provisions of authoritative guidance require that we perform a two-step impairment test on goodwill. In the first step, we compare the fair value of each reporting unit to its carrying value. The second step (if necessary) measures the amount of impairment by applying fair-value-based tests to the individual assets and liabilities within each reporting unit. As defined in the authoritative guidance, a reporting unit is an operating segment, or one level below an operating segment. We aggregate components of an operating segment that have similar economic characteristics into our reporting units.

In fiscal year 2016, we assessed goodwill impairment for our three reporting units which consisted of three segments: life sciences and applied markets, diagnostics and genomics and Agilent CrossLab. We performed a qualitative test for goodwill impairment of the three reporting units, as of September 30, 2016. Based on the results of our qualitative testing, we believe that it is more-likely-than-not that the fair value of these reporting units are greater than their respective carrying values. Each quarter we review the events and circumstances to determine if goodwill impairment is indicated. There was no impairment of goodwill during the years ended October 31, 2016, 2015 and 2014.

Purchased intangible assets consist primarily of acquired developed technologies, proprietary know-how, trademarks, and customer relationships and are amortized using the best estimate of the asset's useful life that reflect the pattern in which the economic benefits are consumed or used up or a straight-line method ranging from 6 months to 15 years. In-process research and development ("IPR&D") is initially capitalized at fair value as an intangible asset with an indefinite life and assessed for impairment thereafter. When the IPR&D project is complete, it is reclassified as an amortizable purchased intangible asset and is amortized over its estimated useful life. If an IPR&D project is abandoned, Agilent will record a charge for the value of the related intangible asset to Agilent's consolidated statement of operations in the period it is abandoned.

Agilent's indefinite-lived intangible assets are IPR&D intangible assets. The accounting guidance allows a qualitative approach for testing indefinite-lived intangible assets for impairment, similar to the issued impairment testing guidance for goodwill and allows the option to first assess qualitative factors (events and circumstances) that could have affected the significant inputs used in determining the fair value of the indefinite-lived intangible asset to determine whether it is more-likely-than-not (i.e. greater than 50% chance) that the indefinite-lived intangible asset is impaired. An organization may choose to bypass the qualitative assessment for any indefinite-lived intangible asset in any period and proceed directly to calculating its fair value. We performed a qualitative test for impairment of indefinite-lived intangible assets as of September 30, 2016. Based on the results of our qualitative testing, we believe

that it is more-likely-than-not that the fair value of these indefinite-lived intangible assets is greater than their respective carrying values. Each quarter we review the events and circumstances to determine if impairment of indefinite-lived intangible asset is indicated. In the years ended October 31, 2016, 2015 and 2014, we recorded an impairment of \$4 million, \$3 million and \$4 million, respectively, due to the cancellation of certain IPR&D projects. In addition, in the year ended October 31, 2014, we also recorded \$12 million of impairment of other intangibles due to the exit of our NMR business.

Accounting for income taxes. We must make certain estimates and judgments in determining income tax expense for financial statement purposes. These estimates and judgments occur in the calculation of tax credits, benefits and deductions, and in the calculation of certain tax assets and liabilities which arise from differences in the timing of recognition of revenue and expense for tax and financial statement purposes, as well as interest and penalties related to uncertain tax positions. Significant changes to these estimates may result in an increase or decrease to our tax provision in a subsequent period.

Significant management judgment is also required in determining whether deferred tax assets will be realized in full or in part. When it is more-likely-than-not that all or some portion of specific deferred tax assets such as net operating losses or foreign tax credit carryforwards will not be realized, a valuation allowance must be established for the amount of the deferred tax assets

## Table of Contents

that cannot be realized. We consider all available positive and negative evidence on a jurisdiction-by-jurisdiction basis when assessing whether it is more likely than not that deferred tax assets are recoverable. We consider evidence such as our past operating results, the existence of losses in recent years and our forecast of future taxable income. In the fourth quarter of fiscal 2012 we released the valuation allowance for the majority of our U.S. deferred tax assets. At October 31, 2016, we continue to recognize a valuation allowance for certain U.S. and U.S state and foreign deferred tax assets. We intend to maintain a valuation allowance in these jurisdictions until sufficient positive evidence exists to support its reversal.

We have not provided for all U.S. federal income and foreign withholding taxes on the undistributed earnings of some of our foreign subsidiaries because we intend to reinvest such earnings indefinitely. Should we decide to remit this income to the U.S. in a future period, our provision for income taxes will increase materially in that period.

The calculation of our tax liabilities involves dealing with uncertainties in the application of complex tax law and regulations in a multitude of jurisdictions. Although the guidance on the accounting for uncertainty in income taxes prescribes the use of a recognition and measurement model, the determination of whether an uncertain tax position has met those thresholds will continue to require significant judgment by management. In accordance with the guidance on the accounting for uncertainty in income taxes, for all U.S. and other tax jurisdictions, we recognize potential liabilities for anticipated tax audit issues based on our estimate of whether, and the extent to which, additional taxes and interest will be due. The ultimate resolution of tax uncertainties may differ from what is currently estimated, which could result in a material impact on income tax expense. If our estimate of income tax liabilities proves to be less than the ultimate assessment, a further charge to expense would be required. If events occur and the payment of these amounts ultimately proves to be unnecessary, the reversal of the liabilities would result in tax benefits being recognized in the period when we determine the liabilities are no longer necessary. We include interest and penalties related to unrecognized tax benefits within the provision for income taxes on the consolidated statements of operations.

As a part of our accounting for business combinations, intangible assets are recognized at fair values and goodwill is measured as the excess of consideration transferred over the net estimated fair values of assets acquired. Impairment charges associated with goodwill are generally not tax deductible and will result in an increased effective income tax rate in the period that any impairment is recorded. Amortization expenses associated with acquired intangible assets are generally not tax deductible and therefore deferred tax liabilities have been recorded for non-deductible amortization expenses as a part of the accounting for business combinations.

## Adoption of New Pronouncements

See Note 2, "New Accounting Pronouncements," to the consolidated financial statements for a description of new accounting pronouncements.

## Foreign Currency

Our revenues, costs and expenses, and monetary assets and liabilities are exposed to changes in foreign currency exchange rates as a result of our global operating and financing activities. The unfavorable effects of changes in foreign currency exchange rates has decreased revenue by approximately 2 percentage points for the year ended October 31, 2016 and 6 percentage points for the year ended October 31, 2015. Costs and expenses, incurred in local currency, were subject to the favorable effects due to changes in foreign currency exchange rates for the years ended October 31, 2016 and 2015, reducing our overall net exposure. The impact of foreign currency exchange rates movements can be positive or negative in any period and is calculated by applying the prior period foreign currency exchange rates to the current year period. We hedge revenues, expenses and balance sheet exposures that are not denominated in the functional currencies of our subsidiaries on a short term and anticipated basis. We do experience

some fluctuations within individual lines of the consolidated statement of operations and balance sheet because our hedging program is not designed to offset the currency movements in each category of revenues, expenses, monetary assets and liabilities. Our hedging program is designed to hedge currency movements on a relatively short-term basis (up to a rolling twelve-month period). Therefore, we are exposed to currency fluctuations over the longer term. To the extent that we are required to pay for all, or portions, of an acquisition price in foreign currencies, Agilent may enter into foreign exchange contracts to reduce the risk that currency movements will impact the U.S. dollar cost of the transaction.

Table of Contents

## Results from Operations

## Net Revenue

	Years Ended			2016 over 2015 % Change	2015 over 2014 % Change
	October 31, 2016	2015	2014		
	(in millions)				
Net revenue:					
Products	\$3,227	\$3,146	\$3,185	3%	(1)%
Services and other	\$975	\$892	\$863	9%	4%
Total net revenue	\$4,202	\$4,038	\$4,048	4%	—

	Years Ended			2016 over 2015 Ppts Change	2015 over 2014 Ppts Change
	October 31, 2016	2015	2014		
% of total net revenue:					
Products	77 %	78 %	79 %	(1) ppt	(1) ppt
Services and other	23 %	22 %	21 %	1 ppt	1 ppt
Total	100%	100%	100%		

Agilent's net revenue of \$4,202 million in October 31, 2016 increased 4 percent when compared to 2015. Foreign currency movements for 2016 had an unfavorable impact of approximately 2 percentage points compared to 2015. Agilent's net revenue of \$4,038 million was flat in 2015 when compared to 2014.

Services and other revenue includes revenue generated from servicing our installed base of products, warranty extensions and consulting including companion diagnostics. Services and other revenue increased 9 percent in 2016 as compared to 2015. The service and other revenue growth is impacted by a portion of the revenue being driven by the current and previously installed product base. Service and other revenue increased due to increased service contract repairs, compliance services and preventative maintenance, and strong companion diagnostics revenue. Services and other revenue increased 4 percent in 2015 as compared to 2014.

## Net Revenue By Segment

	Years Ended			2016 over 2015 % Change	2015 over 2014 % Change
	October 31, 2016	2015	2014		
	(in millions)				
Net revenue by segment:					
Life sciences and applied markets	\$2,073	\$2,046	\$2,078	1%	(2)%
Diagnostics and genomics	\$709	\$662	\$663	7%	—
Agilent CrossLab	\$1,420	\$1,330	\$1,307	7%	2%
Total net revenue	\$4,202	\$4,038	\$4,048	4%	—

The life sciences and applied markets business brings together Agilent's analytical laboratory instrumentation and informatics. Revenue increased 1 percent in 2016 when compared to 2015. Foreign currency movements had an unfavorable impact of approximately 2 percentage points in 2016 when compared to 2015. For the year ended October 31, 2016 and excluding the impact of foreign currency movements, acquisitions and the NMR business our performance within the life sciences market continued to show strong revenue growth from the pharmaceutical and

biotechnology markets. Within the applied markets, and excluding the impact of foreign currency movements and the NMR business, there was strong growth in both the environmental and food markets, but revenue from sales to other applied markets was weak with a decline in revenue from sales to the chemical and energy markets. Revenue decreased 2 percent in 2015 when compared to 2014. For the year ended October 31, 2015 and excluding the impact of currency movements and the NMR business, our performance within the life sciences business showed consistent revenue growth from sales to the pharmaceutical and biotechnology market partially offset by a decrease in the revenue generated from sales to the life sciences research market. Within applied markets and excluding the impact of currency movements and the NMR business, there was weakness in the chemical and energy markets in the year ended October 31, 2015 when compared to the prior year.

Table of Contents

The diagnostics and genomics business includes genomics, nucleic acid contract manufacturing and the pathology, companion diagnostics and reagent partnership businesses. Revenue increased 7 percent in 2016 when compared to 2015. Foreign currency movements had an unfavorable impact of approximately 1 percentage points in 2016 when compared to 2015. Excluding the impact of foreign currency movements and acquisitions, growth in revenue from sales to the diagnostics and clinical research markets continued to be strong, led by our companion diagnostics and genomics businesses in the year ended October 31, 2016 when compared to the prior year. Revenue was flat in 2015 when compared to 2014. Excluding foreign currency movements, our growth in revenue from sales to the diagnostics and clinical markets was strong in the year ended October 31, 2015 when compared to the prior year.

The Agilent CrossLab business combines our analytical laboratory services and consumables business. Revenue increased 7 percent in 2016 when compared to 2015. Foreign currency movements had an unfavorable impact of approximately 2 percentage points in 2016 when compared to 2015. Excluding the impact of foreign currency movements and acquisitions, there was growth in sales to all key markets. The pharmaceutical and biotechnology markets led all the markets in revenue and revenue growth along with very strong revenue growth from the food markets. In addition, we saw moderate growth from the environmental market and modest revenue growth from the chemical and energy markets. Revenue increased 2 percent in 2015 when compared to 2014. Excluding the impact of foreign currency movements there was growth in sales to all key end markets, in particular, the pharmaceutical and biotechnology market in the year ended October 31, 2015 when compared to the prior year. Within the applied markets revenue in chemical and energy end markets were slower but still reported growth when adjusted for currency movements.

## Costs and Expenses

	Years Ended			2016 over 2015 Change	2015 over 2014 Change
	October 31, 2016	2015	2014		
Gross margin on products	54.6%	52.5%	50.8%	2 ppts	2 ppts
Gross margin on services and other	44.5%	43.8%	41.6%	1 ppt	2 ppts
Total gross margin	52.3%	50.5%	48.8%	2 ppts	2 ppts
Operating margin	14.6%	12.9%	10.4%	2 ppts	3 ppts
(in millions)					
Research and development	\$329	\$330	\$358	— (8)%	
Selling, general and administrative	\$1,253	\$1,189	\$1,199	5% (1)%	

Total gross margin for the year ended October 31, 2016 increased 2 percentage points when compared to last year. Increases in total gross margins for the year ended October 31, 2016 were as a result of the exit of the NMR business, several margin improvement initiatives, lower logistics costs, lower costs to address the now lifted FDA warning letter offset by increased wages and variable pay. Total gross margins for the year ended October 31, 2015 increased 2 percentage points when compared the prior year. Increases in total gross margins for the year ended October 31, 2015 were the result of lower intangible asset amortization, favorable product mix and improved manufacturing efficiencies partially offset by the impact of unfavorable currency movements and wage increases.

Total operating margin increased 2 percentage points for the year ended October 31, 2016, when compared to last year. Operating margins increased due to improvements in gross margin and the impact of an employee pension curtailment gain offset by the increased acquisition and integrations costs, the impairment charge for investment-related loans and increased wages and variable pay. Total operating margins increased 3 percentage points for the year ended October 31, 2015, when compared to last year. Operating margins improved due to increased gross margins and reduced expenses on lower revenue compared to last year.

Gross inventory charges, included in continuing operations, were \$20 million in 2016, \$30 million in 2015 and \$46 million in 2014. Sales of previously written down inventory, included in continuing operations, were \$9 million in 2016, \$13 million in 2015 and \$8 million in 2014.

Our research and development efforts focus on potential new products and product improvements covering a wide variety of technologies, none of which is individually significant to our operations. Our research seeks to improve on various technical competencies in software, systems and solutions, life sciences and diagnostics. In each of these research fields, we conduct research that is focused on specific product development for release in the short-term as well as other research that is intended to be the foundation for future products over a longer time-horizon. Most of our product development research is designed to improve products already in production, focus on major new product releases, and develop new product segments for the future. Due to

Table of Contents

the breadth of research and development projects across all of our businesses, there are a number of drivers of this expense. We remain committed to invest significantly in research and development and have focused our development efforts on key strategic opportunities to align our business with available markets and position ourselves to capture market share.

Research and development expenses was relatively flat for the year ended October 31, 2016 when compared with last year. Research and development expenditures increased by a \$4 million in-process research and development (IPR&D) impairment charge mostly offset by the impact of an employee pension curtailment gain. Research and development expenses decreased 8 percent for the year ended October 31, 2015 when compared with last year. R&D expenditure decreased due to the impact of foreign currency movements, savings from the exit from the NMR business and transformation initiatives, offset by wage increases.

Selling, general and administrative expenses increased 5 percent in 2016 compared to 2015. Selling, general and administrative expenses increased due to acquisition and integration costs related to recently acquired businesses, higher wages and variable pay and an impairment charge related to equity method investment loans offset by the impact of an employee pension curtailment gain. Selling, general and administrative expenses decreased 1 percent in 2015 compared to 2014. There were increases in expenditure mostly due to the impact of wage increases, higher commissions and costs associated with business improvement and transformation initiatives more than offset by favorable foreign currency movements and the decline in NMR expenses due to the exiting of that business together with a decrease in pre separation expenses related to the separation of Keysight.

Interest expense for the years ended October 31, 2016, 2015 and 2014 was \$72 million, \$66 million and \$110 million, respectively, and relates to the interest charged on our senior notes and the amortization of the deferred loss recorded upon termination of the forward starting interest rate swap contracts offset by the amortization of deferred gains recorded upon termination of interest rate swap contracts. The decrease in interest expense in 2015 compared with 2014 is due to debt redemptions as part of the debt repositioning as a result of the separation of the Keysight business.

At October 31, 2016, our headcount was approximately 12,500 compared to 11,800 in 2015.

## Other income (expense), net

For the year ended October 31, 2016 other income (expense), net includes an \$18 million expense related to the impairment of an investment and \$12 million of income in respect of the provision of certain site service costs to, and lease income from, Keysight. The costs associated with these services are reported within income from operations. Agilent expects to receive lease income and site service income from Keysight over the next 3-4 years of approximately \$12 million per year. For the year ended October 31, 2015, other income (expense), net included \$25 million of income in respect of the provision of certain IT and site service costs to, and lease income from, Keysight. For the year ended October 31, 2014 other income (expense) net, included a net loss on the early redemption of senior notes of \$89 million.

## Income Taxes

	Years Ended		
	October 31,		
	2016	2015	2014
	(in millions)		
Provision (benefit) for income taxes	\$82	\$42	\$(3)

For 2016, the company's effective tax rate from continuing operations was 15.1 percent. The income tax expense from continuing operations was \$82 million. The income tax provision from continuing operations for the year ended October 31, 2016 included net discrete tax expense of \$17 million. The net discrete tax expense for the year ended October 31, 2016, included \$5 million of tax benefit for the extension of the U.S. research and development tax credit attributable to the company's prior fiscal year, \$6 million of tax expense related to the curtailment gain recognized with respect to the U.S. retirement plan and Supplemental Benefits Plan, \$18 million of tax expense related to the establishment of a valuation allowance on an equity method impairment that would generate a capital loss when realized, and a net \$2 million of other discrete tax benefit. Included in the net \$2 million discrete tax benefit are \$9 million of out-of-period correcting tax expense entries recorded in the second and fourth quarters of the fiscal year of 2016 associated with German return-to-provision corrections. These are offset by an \$11 million out-of-period tax benefit associated with an adjustment to the deferred tax liability for unremitted foreign earnings. The out-of-period corrections were determined to be immaterial to the previously issued and current period financial statements.

For 2015, the company's effective tax rate from continuing operations was 8.7 percent. The income tax expense from continuing operations was \$42 million. The income tax benefit for the year ended October 31, 2015 included a net discrete benefit

Table of Contents

of \$55 million primarily due to the settlement of an Internal Revenue Service ("IRS") audit in the U.S. and the recognition of tax expense related to the repatriation of dividends.

For 2014, the company's effective tax rate from continuing operations was (1.3) percent. The income tax benefit from continuing operations was \$3 million. The income tax benefit for the year ended October 31, 2014 included a net discrete benefit of \$33 million primarily due to the settlement of an Internal Revenue Service ("IRS") audit in the U.S. and the recognition of tax expense related to the repatriation of dividends.

Agilent enjoys tax holidays in several different jurisdictions, most significantly in Singapore. The tax holidays provide lower rates of taxation on certain classes of income and require various thresholds of investments and employment or specific types of income in those jurisdictions. The tax holidays are due for renewal between 2018 and 2023. As a result of the incentives, the impact of the tax holidays decreased income taxes by \$86 million, \$65 million, and \$27 million in 2016, 2015, and 2014, respectively. The benefit of the tax holidays on net income per share (diluted) was approximately \$0.26, \$0.19, and \$0.08 in 2016, 2015 and 2014, respectively.

In accordance with the guidance on the accounting for uncertainty in income taxes, for all U.S. and other tax jurisdictions, we recognize potential liabilities for anticipated tax audit issues based on our estimate of whether, and the extent to which, additional taxes and interest will be due. If our estimate of income tax liabilities proves to be less than the ultimate assessment, a further charge to expense would be required. If events occur and the payment of these amounts ultimately proves to be unnecessary, the reversal of the liabilities would result in tax benefits being recognized in the period when we determine the liabilities are no longer necessary. We include interest and penalties related to unrecognized tax benefits within the provision for income taxes on the consolidated statements of operations.

On November 1, 2014, Agilent transferred deferred tax assets of \$237 million, deferred tax liabilities of \$37 million, current income tax payable of \$40 million, and other long-term liabilities related to uncertain tax positions totaling \$8 million to Keysight as part of its separation from Agilent. A current prepaid income tax asset of \$19 million and long-term prepaid income tax asset of \$3 million related to sales of intercompany assets was also transferred to Keysight upon separation from Agilent. In addition, for the year ended October 31, 2015, a \$6 million return to provision adjustment for Keysight associated with bonus depreciation was recognized through retained earnings.

In the U.S., tax years remain open back to the year 2012 for federal income tax purposes and the year 2000 for significant states. On September 22, 2015, we reached an agreement with the Internal Revenue Service ("IRS") for the tax years 2008 through 2011. During the first quarter of 2016, we made a payment of approximately \$9 million of tax plus interest as part of closing the exam. In 2015, we reclassified a portion of other long-term liabilities to other accrued liabilities related to uncertain tax positions of continuing operations that we expected to pay within the next twelve months. This amount was partially offset by a prepaid tax account of approximately \$3 million that the IRS allowed as an offset to the \$12 million in incremental taxes. The settlement resulted in the recognition, within the continuing operations, of previously unrecognized tax benefits of \$119 million, offset by a tax liability on foreign distributions of approximately \$99 million principally related to the repatriation of foreign earnings.

On January 29, 2014, we reached an agreement with the IRS for the tax years 2006 through 2007. The settlement resulted in the recognition, within the continuing operations, of previously unrecognized tax benefits of \$111 million, offset by a tax liability on foreign distributions of approximately \$75 million principally related to the repatriation of foreign earnings.

In other major jurisdictions where the company conducts business, the tax years generally remain open back to the year 2003. With these jurisdictions and the U.S., it is reasonably possible that there could be significant changes to our unrecognized tax benefits in the next twelve months due to either the expiration of a statute of limitation or a tax audit

settlement which will be partially offset by an anticipated tax liability related to unremitted foreign earnings, where applicable. Given the number of years and numerous matters that remain subject to examination in various tax jurisdictions, management is unable to estimate the range of possible changes to the balance of our unrecognized tax benefits.

On July 27, 2015, the U.S. Tax Court issued an opinion in *Altera Corp. v. Commissioner* related to the treatment of stock-based compensation expense in an intercompany cost-sharing arrangement. A final decision was entered by the U.S. Tax Court on December 1, 2015. At this time, the U.S. Department of the Treasury has not withdrawn the requirement from its regulations to include stock-based compensation. The IRS notified the U.S. Court of Appeals for the Ninth Circuit on February 19, 2016 of its intent to appeal the Tax Court's decision in the case. We concluded that no adjustment to our consolidated financial statements is appropriate at this time due to the uncertainties with respect to the ultimate resolution of this case.

Table of Contents

## Segment Overview

Through October 31, 2016, we have three business segments comprised of the life sciences and applied markets business, diagnostics and genomics business and the Agilent CrossLab business.

## Life Sciences and Applied Markets

Our life sciences and applied markets business provides application-focused solutions that include instruments and software that enable customers to identify, quantify and analyze the physical and biological properties of substances and products, as well as enable customers in the clinical and life sciences research areas to interrogate samples at the molecular level. Key product categories include: liquid chromatography ("LC") systems and components; liquid chromatography mass spectrometry ("LCMS") systems; gas chromatography ("GC") systems and components; gas chromatography mass spectrometry ("GCMS") systems; inductively coupled plasma mass spectrometry ("ICP-MS") instruments; atomic absorption ("AA") instruments; microwave plasma-atomic emission spectrometry ("MP-AES") instruments; inductively coupled plasma optical emission spectrometry ("ICP-OES") instruments; cell analysis plate based assays; laboratory software and informatics systems; laboratory automation and robotic systems; dissolution testing; vacuum pumps and measurement technologies.

## Net Revenue

	Years Ended			2016 over 2015 Change	2015 over 2014 Change
	October 31, 2016	2015	2014		
Net revenue	\$2,073	\$2,046	\$2,078	1%	(2)%

(in millions)

Life science and applied markets business revenue in 2016 increased 1 percent compared to 2015. Foreign currency movements for 2016 had an unfavorable impact of 2 percentage points on revenue growth when compared to the same period last year. Geographically, revenue declined 6 percent in the Americas with a 1 percentage point unfavorable currency impact. Revenue declined 8 percent in Europe with a 4 percentage point unfavorable currency impact. Revenue grew 7 percent in Japan with an 8 percentage point favorable currency impact. Revenue grew 14 percent in Asia Pacific excluding Japan with a 1 percentage point unfavorable currency impact. Strong growth in China led the geographic portfolio during 2016, and helped offset softness in the Americas and Europe. Liquid chromatography products revenue continued solid growth on strength in the pharmaceutical market. Revenue from mass spectrometry had instances of strength, particularly in China, which were offset by continued declines in revenue in the chemical and energy markets as well as diagnostic and clinical market declines in the Americas. Life science and applied markets business revenue in 2015 decreased 2 percent compared to 2014. During 2015 we exited the research products business, which reduced overall life sciences and applied markets growth by 2 percentage points. Product revenue results were otherwise solid across the rest of the product portfolio. Strength in the Americas and Europe pharmaceutical business were offset by softness in applied markets and life science research.

End market performance reflected mixed growth across markets in 2016. Pharmaceutical market growth continued to be robust in 2016 driven by continuing technology refresh programs. The growth led the way for life sciences and diagnostics markets, which were offset somewhat by lower diagnostic and clinical sales, notably in the US related to a slowdown in pain management related sales. Food and environmental markets, driven by strong sales in China, were areas of good growth in an otherwise weak applied market sector. Chemical and energy markets continued their declines throughout 2016 as oil prices remain low. Markets were also mixed for 2015 with pharmaceutical growth offset by delayed capital spending in life science research markets, and chemical and energy weakness from low oil prices.

Looking forward, we are optimistic about our growth opportunities in the life sciences and applied markets as our broad portfolio of products and solutions are well suited to address customer needs. We expect strong sales funnels given a number of significant new product introductions in the next few quarters as we continue to invest in expanding and improving our applications and solutions portfolio. We remain concerned about short term prospects in chemical and energy markets, but are confident in our product portfolio to address customer needs when the market does recover.

Table of Contents

## Gross Margin and Operating Margin

The following table shows the life sciences and applied markets business' margins, expenses and income from operations for 2016 versus 2015, and 2015 versus 2014.

	Years Ended			2016 over 2015 Change	2015 over 2014 Change		
	October 31, 2016	2015	2014				
Total gross margin	58.6%	56.2%	55.8%	2 ppts	—		
Operating margin (in millions)	20.7%	18.6%	17.7%	2 ppts	1 ppt		
Research and development			\$195	\$192	\$215	2%	(10)%
Selling, general and administrative			\$590	\$576	\$576	2%	—
Income from operations			\$429	\$380	\$369	13%	3%

Gross margin increased 2 percentage points in 2016 compared to 2015. The exit of our research products division contributed 1 percentage point to gross margin improvement with the rest a combination of reduced warranty costs and improved efficiencies in logistics offset by wage increases and variable pay. Gross margins were flat in 2015 compared to 2014. Increases for wages and materials were largely offset by improvement in operational efficiencies.

Research and development expenses increased 2 percent in 2016 when compared to 2015. Acquisitions roughly offset savings from the research products division exit, with growth coming from wage increases, variable pay and targeted investments. Research and development expenses decreased 10 percent in 2015 when compared to 2014. Excluding NMR, 2015 research and development expenses were down 4 percent from 2014 impacted by our transformation initiatives.

Selling, general and administrative expenses increased 2 percent in 2016 compared to 2015. Acquisitions roughly offset savings from the research products division exit, with growth coming from wage increases and variable pay. Selling, general and administrative expenses were flat in 2015 compared to 2014. Excluding NMR, selling, general and administrative expenses grew 3 percent primarily due to dis-synergies in infrastructure costs from the separation of Keysight.

Operating margin increased 2 percentage points in 2016 compared to 2015. The exit of our research products division contributed 2 percentage point to operating margin improvement, with gross margin improvements from lower warranty and logistics costs making up the difference. Operating margins increased by 1 percentage point in 2015 compared to 2014. Expenses declined more than revenue to help with the improvement.

## Income from Operations

Income from operations in 2016 increased by \$49 million or 13 percent compared to 2015 on a revenue increase of \$27 million. The exit of our research products division contributed roughly 40 percent of the improvement with revenue growth and improved gross margins making up the difference. Income from operations in 2015 increased by \$11 million or 3 percent compared to 2014 on a revenue decrease of \$32 million.

## Diagnostics and Genomics

Our diagnostics and genomics business includes genomics, nucleic acid contract manufacturing and the pathology, companion diagnostics and reagent partnership businesses.

Our diagnostics and genomics business is comprised of five areas of activity providing solutions that include reagents, instruments, software and consumables, which enable customers in the clinical and life sciences research areas to interrogate samples at the cellular and molecular level. First, our genomics business includes arrays for DNA mutation detection, genotyping, gene copy number determination, identification of gene rearrangements, DNA methylation profiling, gene expression profiling, as well as next generation sequencing ("NGS") target enrichment and genetic data management and interpretation support software. Second, our nucleic acid solutions business provides equipment and expertise focused on production of synthesized oligonucleotides under pharmaceutical good manufacturing practices ("GMP") conditions for use as active pharmaceutical ingredients ("API") in an emerging class of drugs that utilize nucleic acid molecules for disease therapy. Next, our pathology solutions business is focused on product offerings to cancer diagnostics and anatomic pathology workflows. The broad portfolio of offerings includes immunohistochemistry ("IHC"), in situ hybridization ("ISH"), hematoxylin and eosin ("H&E") staining and

Table of Contents

special staining. We also collaborate with a number of major pharmaceutical companies to develop new potential pharmacodiagnosics, also known as companion diagnostics, which may be used to identify patients most likely to benefit from a specific targeted therapy. Finally, the reagent partnership business is a provider of reagents used for turbidimetry and flow cytometry.

## Net Revenue

	Years Ended			2016 over 2015 Change	2015 over 2014 Change
	October 31, 2016	2015	2014		
	(in millions)				
Net revenue	\$709	\$662	\$663	7%	—

Diagnostics and genomics business revenue in 2016 increased 7 percent compared to 2015. Foreign currency movements for 2016 had an unfavorable currency impact of 1 percentage point on revenue growth when compared to the same period last year. Geographically, revenue grew 11 percent in the Americas with no currency impact. Revenue grew 1 percent in Europe with a 4 percentage point unfavorable currency impact. Revenue grew 6 percent in Japan with an 8 percentage point favorable currency impact. Revenue grew 17 percent in Asia Pacific excluding Japan with a 2 percentage point unfavorable currency impact. The performance in Americas and Europe were assisted by positive growth in sales in genomics (particularly target enrichment and arrays), strength in pathology business, continued demand in the nucleic acid solutions and good momentum in the companion diagnostic business. Growth in Asia Pacific excluding Japan reflected strong growth in China. Diagnostics and genomics business revenue in 2015 was flat compared to 2014, significantly impacted by currency.

The 7 percent revenue growth was due to positive growth from all businesses. This was led by continued growth momentum in the next generation sequencing (target enrichment portfolio) solution offering in the research and clinical research markets and an increase in the CGH products portfolio and good revenue performance in companion diagnostics business working with our pharmaceutical partners. Nucleic acid business saw continued market demand in the nucleic acid solutions business related to therapeutic oligo programs. The pathology business saw steady growth due to continued growth in our Omnis instrument placements and steady growth in the reagent revenues including traction in our PD-L1 assays. The end markets in diagnostics and clinical research remain strong and growing driven by an aging population and lifestyle. The positive local currency revenue growth in 2015 was also driven by demand in the nucleic acid solutions, good revenue performance in pathology and companion diagnostics businesses as well as next generation sequencing solution offering within the genomics business.

Looking forward, we are optimistic about our growth opportunities in the diagnostics markets and continue to invest in expanding and improving our applications and solutions portfolio. We remain positive about our growth in these markets, as adoption of our SureSelect and HaloPlex sequencing target enrichment solutions continue, and Omnis instruments and reagents, PD-L1 assays and SureFISH gain traction with our customers in clinical oncology applications. Market demand in the nucleic acid solutions business related to therapeutic oligo programs continues to be strong. Our nucleic acid business is expanding into a new site to accommodate future production needs. We will continue to invest in research and development, and seek to expand our position in developing countries and emerging markets.

Table of Contents

## Gross Margin and Operating Margin

The following table shows the diagnostics and genomics business's margins, expenses and income from operations for 2016 versus 2015, and 2015 versus 2014.

	Years Ended			2016 over 2015 Change	2015 over 2014 Change
	October 31, 2016	2015	2014		
Total gross margin	54.6%	54.4%	56.4%	—	(2) ppts
Operating margin (in millions)	16.0%	13.3%	14.0%	3 ppts	(1) ppt
Research and development			\$83	\$78	\$86 6% (10)%
Selling, general and administrative			\$190	\$195	\$195 (2)% —
Income from operations			\$114	\$88	\$93 29% (5)%

Gross margin was flat in 2016 when compared to 2015. Favorable gross margins due to higher volumes and lower inventory charges were fully offset by unfavorable currency movements and wage increases. Gross margins decreased by 2 percentage points in 2015 compared to 2014. Gross margins reflected unfavorable currency movement impact, change in business mix, higher inventory charges, and wage increases.

Research and development expenses increased 6 percent in 2016 when compared to 2015 however, remained flat as a percentage of revenue. This reflected increase in wages and benefits and increased spending around the development of clinical applications and solutions were partially offset by favorable currency movements. Research and development expenses decreased 10 percent in 2015 when compared to 2014; however, remained flat as a percentage of revenue. The decline was mainly due to favorable currency movements and business improvement initiatives partially offset by wage increases.

Selling, general and administrative expenses decreased 2 percent in 2016 when compared to 2015, reflecting favorable currency movements, reduced expenses due to business improvement initiatives partially offset by wages and variable pay increases. Selling, general and administrative expenses were flat in 2015 compared to 2014, favorable currency movements, and business improvement initiatives and were offset by higher allocated infrastructure expenses following the Keysight separation and wage increases.

Operating margin increased 3 percentage points in 2016 when compared to 2015. The increase was due to higher volumes, lower inventory charges, better selling expenses partially offset by wage and benefits increases. Operating margins decreased by 1 percentage point in 2015 compared to 2014. The reduction was due to lower gross margins due to higher inventory charges and wage increases.

## Income from Operations

Income from operations in 2016 increased by \$26 million or 29 percent when compared to 2015 on a revenue increase of \$47 million. The increase was due to higher volumes and reduced selling and general administration expenses. Income from operations in 2015 decreased by \$5 million or 5 percent compared to 2014 on a revenue decrease of \$1 million. The reduction was due to lower gross margins.

## Agilent CrossLab

The Agilent CrossLab business spans the entire lab with its extensive consumables and services portfolio, which is designed to improve customer outcomes. The majority of the portfolio is vendor neutral, meaning Agilent can serve

and supply customers regardless of their instrument purchase choices. Solutions range from chemistries and supplies to services and software helping to connect the entire lab. Key product categories in consumables include GC and LC columns, sample preparation products, custom chemistries, and a large selection of laboratory instrument supplies. Services include startup, operational, training and compliance support, as well as asset management and consultative services that help increase customer productivity. Custom service and consumable bundles are tailored to meet the specific application needs of various industries and to keep instruments fully operational and compliant with the respective industry requirements.

Table of Contents

## Net Revenue

	Years Ended			2016 over 2015 Change	2015 over 2014 Change
	October 31, 2016	2015	2014		
	(in millions)				
Total net revenue	\$1,420	\$1,330	\$1,307	7%	2%

Agilent CrossLab business revenue in 2016 increased 7 percent when compared to 2015. Foreign currency movements for 2016 had an unfavorable impact of 2 percentage points when compared to 2015. Revenue growth in 2016 was led by increases in enterprise service contracts, LC small molecule columns, remarketed instruments, and bio-columns. Geographically, revenue grew 6 percent in the Americas with a 2 percentage point unfavorable currency impact. Revenue grew 3 percent in Europe with a 4 percentage point unfavorable currency impact. Revenue declined 4 percent in Japan with a 7 percentage point favorable currency impact due to macroeconomic conditions. Revenue grew 16 percent in Asia Pacific excluding Japan with a 4 percentage point unfavorable currency impact due to continued strength in China. Agilent CrossLab business revenue in 2015 increased 2 percent compared to 2014. Revenue growth in 2015 was led by strength in the overall aftermarket service agreement business, the remarketed instrument business, and our chemistries portfolio of LC columns and sample preparation products.

Agilent CrossLab business saw positive revenue growth in all the key end markets after accounting for the unfavorable currency movements in 2016. Revenue growth was led by the pharmaceutical and biotechnology market, as well as the food market. Revenue growth was slowest in the forensics market and the life science research market, but neither represented a large share of revenue in the Agilent CrossLab business. Agilent CrossLab business saw positive revenue growth in all the key end markets after accounting for the unfavorable currency impact in 2015 compared to 2014. Growth was led by the pharmaceutical and biotechnology markets. Revenue in chemical and emery end markets were slower but still reported growth, adjusted for currency movements.

Looking forward, we expect continued strength in the pharmaceutical and biotechnology markets to drive growth in the near term. From a geographical stand point, we remain optimistic on the market growth and market penetration opportunities in China. Other factors for near term revenue growth will rely on upcoming product launches from our consumables pipeline, as well as on our investment in our laboratory enterprise offerings.

## Gross Margin and Operating Margin

The following table shows the Agilent CrossLab business's margins, expenses and income from operations for 2016 versus 2015 and 2015 versus 2014.

	Years Ended			2016 over 2015 Change	2015 over 2014 Change
	October 31, 2016	2015	2014		
Total gross margin	49.4%	49.6%	48.5%	—	1 ppt
Operating margin	22.3%	22.5%	23.0%	—	(1) ppt
(in millions)					
Research and development		\$46	\$46	\$45	— 3%
Selling, general and administrative		\$339	\$315	\$287	7% 10%
Income from operations		\$316	\$299	\$301	6% (1)%

Gross margin was flat in 2016 when compared to 2015, due to the higher sales volume and several margin improvement initiatives helping to offset the higher wages, unfavorable currency movements and a less favorable currency hedging results. Gross margin increased by 1 percentage point in 2015 compared to 2014, primarily due to the favorable currency hedging gains recognized in 2015, which were partially offset by higher logistic costs.

Research and development expenses was flat in 2016 when compared to 2015, due to wage increases being offset by moderate favorable currency movements. Research and development expenses increased 3 percent in 2015 when compared to 2014, due to higher project expenses and wage increases.

Selling, general and administrative expenses increased 7 percent in 2016 when compared to 2015, primarily due to higher orders driving higher field selling costs, wage increases and larger investments into marketing and the sales channel. Selling,

## Table of Contents

general and administrative expenses increased 10 percent in 2015 compared to 2014, due to the increase in allocated infrastructure costs following our separation of Keysight and wage increases.

Operating margin was flat in 2016 when compared to 2015, due to the higher sales volume helping to offset the higher wages, unfavorable currency movements less favorable currency hedging results, and increased selling, general and administrative expenses. Operating margin decreased by 1 percentage point in 2015 when compared to 2014, due to the increase in allocated infrastructure costs following our separation of Keysight, which were partially offset by the favorable currency hedging gains recognized in 2015.

### Income from Operations

Income from operations in 2016 increased by \$17 million or 6 percent when compared to 2015 on a revenue increase of \$90 million, representing an incremental operating margin of 19 percent. This increase was driven primarily by volume offset by currency and higher selling, general and administrative expenses. Income from operations in 2015 decreased by \$2 million or 1 percent compared to 2014 on a revenue increase of \$23 million, representing an operating margin decrement. This decrease was primarily due to the favorable volume increase being offset by the increase in allocated infrastructure costs following our separation of Keysight.

### Financial Condition

#### Liquidity and Capital Resources

Our financial position as of October 31, 2016 consisted of cash and cash equivalents of \$2,289 million as compared to \$2,003 million as of October 31, 2015.

As of October 31, 2016, approximately \$2,181 million of our cash and cash equivalents is held outside of the U.S. in our foreign subsidiaries. Most of the amounts held outside of the U.S. could be repatriated to the U.S. but, under current law, would be subject to U.S. federal and state income taxes, less applicable foreign tax credits. Agilent has accrued for U.S. federal and state tax liabilities on the earnings of its foreign subsidiaries except when the earnings are considered indefinitely reinvested outside of the U.S. Repatriation could result in additional material U.S. federal and state income tax payments in future years. We utilize a variety of funding strategies in an effort to ensure that our worldwide cash is available in the locations in which it is needed.

We believe our cash and cash equivalents, cash generated from operations, and ability to access capital markets and credit lines will satisfy, for at least the next twelve months, our liquidity requirements, both globally and domestically, including the following: working capital needs, capital expenditures, business acquisitions, stock repurchases, cash dividends, contractual obligations, commitments, principal and interest payments on debt, and other liquidity requirements associated with our operations.

#### Net Cash Provided by Operating Activities

Net cash provided by operating activities was \$793 million in 2016 as compared to \$512 million provided in 2015 and \$731 million provided in 2014. For the year ended October 31, 2014 net cash provided by operating activities included the cash provided by Keysight operating activities. We paid approximately \$67 million of net taxes in 2016, as compared to \$129 million in net taxes in 2015 and net taxes of \$131 million in 2014. Income taxes, including those paid for the Keysight business, were paid by Agilent for the year ended October 31, 2014. The decrease in taxes paid for the year ended October 31, 2016 was primarily due to no taxes paid related to the separation and to a lesser extent due to some refund of taxes. Cash paid for income taxes for the year ended October 31, 2015 included tax payments related to the separation. Operating cash flows in 2014 were impacted by pre-separation costs and separation related taxes, the redemption of senior notes including payments related to accrued interest and the timing of the purchase of shares under the employee stock purchase plan. For the years ended October 31, 2016, 2015 and 2014 other assets and

liabilities provided cash of \$10 million and used cash of \$249 million and \$26 million, respectively. The increase in the usage of cash for the year ended October 31, 2015 in other assets and liabilities was largely the result of contributions to defined benefit plans, changes in interest and restructuring accruals, income tax liabilities and transaction tax assets and liabilities.

In 2016, the change in accounts receivable used cash of \$33 million, \$24 million in 2015, and \$119 million in 2014. For the year ended October 31, 2014 the change in accounts receivable included \$25 million of cash used by Keysight. Days' sales outstanding as of October 31, were 51 days in 2016, 53 days in 2015 and 49 days in 2014. The change in accounts payable used cash of \$15 million in 2016, used cash of \$26 million in 2015 and provided cash of \$50 million in 2014. For the year ended October 31, 2014 the change in accounts payable included \$32 million of cash provided by Keysight. Cash used in inventory was \$7 million in 2016, in \$24 million in 2015 and \$99 million in 2014. For the years ended October 31, 2014 the change in inventory included \$31 million of cash used by Keysight. Inventory days on-hand decreased to 92 days in 2016 compared to 97 days in 2015 and

Table of Contents

106 days in 2014.

We contributed zero, \$15 million and \$30 million to our U.S. defined benefit plans in 2016, 2015 and 2014, respectively. For the year ended October 31, 2014 we contributed \$15 million to our U.S. defined benefit plans on behalf of Keysight. We contributed \$24 million, \$25 million and \$72 million to our non-U.S. defined benefit plans in 2016, 2015 and 2014, respectively. For the year ended October 31, 2014 we contributed \$41 million to our non-U.S. defined benefit plans on behalf of Keysight. We contributed less than \$1 million in both 2016 and 2015 and \$1 million in 2014 to our U.S. post-retirement benefit plans. Our non-U.S. defined benefit plans are generally funded ratably throughout the year. Total contributions in 2016 were \$24 million or 40 percent less than 2015. Our annual contributions are highly dependent on the relative performance of our assets versus our projected liabilities, among other factors. We expect to contribute approximately \$26 million to our U.S. and \$20 million non-U.S. defined benefit plans and nothing to our U.S. post-retirement benefit plans during 2017.

Net Cash Used in Investing Activities

Net cash used in investing activities in 2016 was \$238 million and in 2015 was \$400 million as compared to net cash used of \$230 million in 2014. For the year ended October 31, 2014 cash used in investing activities included \$82 million of cash used by Keysight.

Investments in property, plant and equipment were \$139 million in 2016, \$98 million in 2015 and \$205 million in 2014. For the year ended October 31, 2014 investments in plant and equipment included \$70 million related to Keysight. Proceeds from sale of property, plant and equipment were zero in 2016, \$12 million in 2015 and \$14 million in 2014. In 2016 we invested \$261 million in acquisitions of businesses and intangible assets, net of cash acquired compared to \$74 million in 2015 and \$13 million in 2014. In 2016 we made a payment of \$80 million for the purchase of a cost method investment in Lasergen compared to zero outlay in 2015 and 2014. We made a loan to our equity method investment of \$3 million in 2016 and zero in both 2015 and 2014. Change in restricted cash and cash equivalents was \$245 million inflow in 2016, \$240 million outflow in 2015 (both changes related to our Seahorse Biosciences acquisition) and \$4 million in 2014, respectively.

Net Cash Used in Financing Activities

Net cash used in financing activities in 2016 was \$268 million compared to \$1,089 million in 2015 and \$117 million in 2014, respectively. The increase in cash used in 2015 when compared to 2014 was largely due to the net cash transferred to Keysight.

Treasury stock repurchases

On November 22, 2013 we announced that our board of directors had authorized a share repurchase program. The existing program is designed to reduce or eliminate dilution resulting from issuance of stock under the company's employee equity incentive programs to target maintaining a weighted average share count of approximately 335 million diluted shares. For the years ended October 31, 2016, 2015 and 2014 we repurchased 2.4 million shares for \$98 million, 6 million shares for \$267 million and 4 million shares for \$200 million, respectively. All such shares and related costs are held as treasury stock and accounted for using the cost method.

On May 28, 2015 we announced that our board of directors had approved a new share repurchase program (the "2015 repurchase program"). The 2015 share repurchase program authorizes the purchase of up to \$1.14 billion of our common stock through and including November 1, 2018. The 2015 repurchase program does not require the company to acquire a specific number of shares and may be suspended or discontinued at any time. During the year ended October 31, 2016, upon the completion of our previous repurchase program, we repurchased approximately 8.3

million shares for \$336 million under this authorization. All such shares and related costs are held as treasury stock and accounted for using the cost method. As of October 31, 2016, we had remaining authorization to repurchase up to \$804 million of our common stock under this program.

#### Dividends

For the years ended October 31, 2016, 2015 and 2014 cash dividends of \$150 million, \$133 million and \$176 million were paid on the company's outstanding common stock, respectively. On November 16, 2016, we declared a quarterly dividend of \$0.132 per share of common stock, or approximately \$43 million which will be paid on January 25, 2017 to shareholders of record as of the close of business on January 3, 2017. The timing and amounts of any future dividends are subject to determination and approval by our board of directors.

Table of Contents

Credit Facility

On September 15, 2014, Agilent entered into a credit agreement with a financial institution which provides for a \$400 million five-year unsecured credit facility that will expire on September 15, 2019. On June 9, 2015, the commitments under the existing credit facility were increased by \$300 million so that the aggregate commitments under the facility now total \$700 million. For the year ended October 31, 2016, we borrowed \$255 million and repaid \$255 million by October 31, 2016. As of October 31, 2016, the company had no borrowings outstanding under the facility. We were in compliance with the covenants for the credit facility during the years ended October 31, 2016 and 2015. As of December 20, 2016, the company had borrowings of \$65 million outstanding under this credit facility and may borrow more during fiscal year 2017.

Long-term debt

In October 2007, the company issued an aggregate principal amount of \$600 million in senior notes ("2017 senior notes"). The 2017 senior notes were issued at 99.60% of their principal amount. The notes will mature on November 1, 2017, and bear interest at a fixed rate of 6.50% per annum. The interest is payable semi-annually on May 1st and November 1st of each year and payments commenced on May 1, 2008.

On November 25, 2008, we terminated two interest rate swap contracts associated with our 2017 senior notes that represented the notional amount of \$400 million. The asset value, including interest receivable, upon termination was approximately \$43 million and the amount to be amortized at October 31, 2016 was \$1 million. The gain is being deferred and amortized to interest expense over the remaining life of the 2017 senior notes.

In July 2010, the company issued an aggregate principal amount of \$500 million in senior notes ("2020 senior notes"). The 2020 senior notes were issued at 99.54% of their principal amount. The notes will mature on July 15, 2020, and bear interest at a fixed rate of 5.00% per annum. The interest is payable semi-annually on January 15th and July 15th of each year, payments commenced on January 15, 2011.

On August 9, 2011, we terminated our interest rate swap contracts related to our 2020 senior notes that represented the notional amount of \$500 million. The asset value, including interest receivable, upon termination for these contracts was approximately \$34 million and the amount to be amortized at October 31, 2016 was \$15 million. The gain is being deferred and amortized to interest expense over the remaining life of the 2020 senior notes.

In September 2012, the company issued an aggregate principal amount of \$400 million in senior notes ("2022 senior notes"). The 2022 senior notes were issued at 99.80% of their principal amount. The notes will mature on October 1, 2022, and bear interest at a fixed rate of 3.20% per annum. The interest is payable semi-annually on April 1st and October 1st of each year, payments commenced on April 1, 2013.

In June 2013, the company issued aggregate principal amount of \$600 million in senior notes ("2023 senior notes"). The 2023 senior notes were issued at 99.544% of their principal amount. The notes will mature on July 15, 2023 and bear interest at a fixed rate of 3.875% per annum. The interest is payable semi-annually on January 15th and July 15th of each year and payments will commence January 15, 2014.

On September 15, 2016, the company issued aggregate principal amount of \$300 million in senior notes ("2026 senior notes"). The 2026 senior notes were issued at 99.624%% of their principal amount. The notes will mature on

Edgar Filing: OSI SYSTEMS INC - Form 10-Q

September 22, 2026 and bear interest at a fixed rate of 3.050% per annum. The interest is payable semi-annually on March 22nd and September 22nd of each year and payments will commence March 22, 2017.

In 2016, we paid approximately \$37 million, of our mortgage debt, secured on buildings in Denmark, to a Danish financial institution. The gain recognized upon early payment was not material. No balance exists on this debt as of October 31, 2016.

Table of Contents

## Off Balance Sheet Arrangements and Other

We have contractual commitments for non-cancelable operating leases. See Note 15, "Commitments and Contingencies", to our consolidated financial statements for further information on our non-cancelable operating leases.

Our liquidity is affected by many factors, some of which are based on normal ongoing operations of our business and some of which arise from fluctuations related to global economics and markets. Our cash balances are generated and held in many locations throughout the world. Local government regulations may restrict our ability to move cash balances to meet cash needs under certain circumstances. We do not currently expect such regulations and restrictions to impact our ability to pay vendors and conduct operations throughout our global organization.

## Contractual Commitments

Our cash flows from operations are dependent on a number of factors, including fluctuations in our operating results, accounts receivable collections, inventory management, and the timing of tax and other payments. As a result, the impact of contractual obligations on our liquidity and capital resources in future periods should be analyzed in conjunction with such factors.

The following table summarizes our total contractual obligations at October 31, 2016 for Agilent operations and excludes amounts recorded in our consolidated balance sheet (in millions):

	Less than one year	One to three years	Three to five years	More than five years
Operating leases	\$38	\$ 60	\$ 22	\$ 26
Commitments to contract manufacturers and suppliers	359	3	—	—
Other purchase commitments	62	—	—	—
Retirement plans	45	—	—	—
Total	\$504	\$ 63	\$ 22	\$ 26

Operating leases. Commitments under operating leases relate primarily to leasehold property, see Note 15, "Commitments and Contingencies".

Commitments to contract manufacturers and suppliers. We purchase components from a variety of suppliers and use several contract manufacturers to provide manufacturing services for our products. During the normal course of business, we issue purchase orders with estimates of our requirements several months ahead of the delivery dates. The above amounts represent the commitments under the open purchase orders with our suppliers that have not yet been received. However, our agreements with these suppliers usually provide us the option to cancel, reschedule, and adjust our requirements based on our business needs prior to firm orders being placed. We expect to fulfill most of our purchase commitments for inventory within one year.

In addition to the above mentioned commitments to contract manufacturers and suppliers, in the past we recorded a liability for firm, non-cancelable and unconditional purchase commitments for quantities in excess of our future demand forecasts consistent with our policy relating to excess inventory. As of October 31, 2016, the liability for our firm, non-cancelable and unconditional purchase commitments was less than \$1 million compared to \$5 million, as of October 31, 2015 and \$10 million as of October 31, 2014. These amounts are included in other accrued liabilities in our consolidated balance sheet.

Other purchase commitments. We have categorized "other purchase commitments" related to contracts with professional services suppliers. Typically, we can cancel contracts without penalties. For those contracts that are not cancelable without penalties, we are disclosing the termination fees and costs or commitments for continued spending that we are obligated to pay to a supplier under each contract's termination period before such contract can be cancelled. Our contractual obligations with these suppliers under "other purchase commitments" were approximately \$62 million within the next year.

Retirement Plans. Commitments under the retirement plans relate to expected contributions to be made to our U.S. and non-U.S. defined benefit plans and to our post-retirement medical plans for the next year only. Contributions after next year are impractical to estimate.

We had no material off-balance sheet arrangements as of October 31, 2016 or October 31, 2015.

Table of Contents

## On Balance Sheet Arrangements

The following table summarizes our total contractual obligations at October 31, 2016 related to our long-term debt and interest expense (in millions):

	Less than one year	One to three years	Three to five years	More than five years
Senior notes	\$ —	\$ 100	\$ 500	\$ 1,300
Interest expense	77	144	116	106
Total	\$ 77	\$ 244	\$ 616	\$ 1,406

Other long-term liabilities include \$190 million and \$227 million of liabilities for uncertain tax positions as of October 31, 2016 and October 31, 2015, respectively. We are unable to accurately predict when these amounts will be realized or released. However, it is reasonably possible that there could be significant changes to our unrecognized tax benefits in the next twelve months due to either the expiration of a statute of limitations or a tax audit settlement.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to foreign currency exchange rate risks inherent in our sales commitments, anticipated sales, and assets and liabilities denominated in currencies other than the functional currency of our subsidiaries. We hedge future cash flows denominated in currencies other than the functional currency using sales forecasts up to twelve months in advance. Our exposure to exchange rate risks is managed on an enterprise-wide basis. This strategy utilizes derivative financial instruments, including option and forward contracts, to hedge certain foreign currency exposures with the intent of offsetting gains and losses that occur on the underlying exposures with gains and losses on the derivative contracts hedging them. We do not currently and do not intend to utilize derivative financial instruments for speculative trading purposes. To the extent that we are required to pay for all, or portions, of an acquisition price in foreign currencies, we may enter into foreign exchange contracts to reduce the risk that currency movements will impact the cost of the transaction.

Our operations generate non-functional currency cash flows such as revenues, third party vendor payments and inter-company payments. In anticipation of these foreign currency cash flows and in view of volatility of the currency market, we enter into such foreign exchange contracts as are described above to manage our currency risk. Approximately 54 percent of our revenue in 2016, 57 percent of our revenue in 2015 and 61 percent of our revenues in 2014 were generated in U.S. dollars. The unfavorable effects of changes in foreign currency exchange rates, principally as a result of the strength of the U.S. dollar, has decreased revenue by approximately 2 percentage points in the year ended October 31, 2016. The impact of foreign currency movements is calculated by applying the prior period foreign currency exchange rates to the current year period.

We performed a sensitivity analysis assuming a hypothetical 10 percent adverse movement in foreign exchange rates to the hedging contracts and the underlying exposures described above. As of October 31, 2016 and 2015, the analysis indicated that these hypothetical market movements would not have a material effect on our consolidated financial position, results of operations, statement of comprehensive income or cash flows.

We are also exposed to interest rate risk due to the mismatch between the interest expense we pay on our loans at fixed rates and the variable rates of interest we receive from cash, cash equivalents and other short-term investments. We have issued long-term debt in U.S. dollars or foreign currencies at fixed interest rates based on the market conditions at the time of financing. We believe that the fair value of our fixed rate debt changes when the underlying market rates of interest change, and we may use interest rate swaps to modify such market risk.

We performed a sensitivity analysis assuming a hypothetical 10 percent adverse movement in interest rates relating to the underlying fair value of our fixed rate debt. As of October 31, 2016 and 2015, the sensitivity analyses indicated that a hypothetical 10 percent adverse movement in interest rates would result in an immaterial impact to the fair value of our fixed interest rate debt.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Stockholders and Board of Directors of Agilent Technologies, Inc.:

In our opinion, the accompanying consolidated balance sheets and the related consolidated statements of operations, comprehensive income, equity and cash flows present fairly, in all material respects, the financial position of Agilent Technologies, Inc. and its subsidiaries at October 31, 2016 and October 31, 2015, and the results of their operations and their cash flows for each of the three years in the period ended October 31, 2016 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the index appearing under item 15(a)(2) presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of October 31, 2016, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements and financial statement schedule, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control over Financial Reporting. Our responsibility is to express opinions on these financial statements, on the financial statement schedule, and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

As discussed in Note 2 to the consolidated financial statements, the Company changed the manner in which it accounts for deferred income taxes and share-based payments in 2016.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become

inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

AGILENT TECHNOLOGIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. OVERVIEW AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

**Overview.** Agilent Technologies Inc. ("we", "Agilent" or the "company"), incorporated in Delaware in May 1999, is a global leader in life sciences, diagnostics and applied chemical markets, providing application focused solutions that includes instruments, software, services and consumables for the entire laboratory workflow.

**Keysight Separation.** On November 1, 2014, we completed the distribution of 100% of the outstanding common shares of Keysight Technologies, Inc. ("Keysight") to Agilent stockholders who received one share of Keysight common stock for every two shares of Agilent held as of the close of business on the record date, October 22, 2014. The historical results of operations and the financial position of Keysight are included in the consolidated financial statements of Agilent and are reported as discontinued operations within this Form 10-K.

**Exit of Nuclear Magnetic Resonance Business.** During the fourth quarter of fiscal year 2014, we made the decision to cease the manufacture and sale of our nuclear magnetic resonance ("NMR") product line within our life sciences and applied markets segment. In connection with the exit from this business, we recorded approximately \$6 million and \$68 million in restructuring and other related costs in 2015 and 2014, respectively. The exit of the NMR business was completed in fiscal year 2016.

**Basis of presentation.** The accompanying financial data has been prepared by us pursuant to the rules and regulations of the U.S. Securities and Exchange Commission ("SEC") and is in conformity with U.S. generally accepted accounting principles ("GAAP"). Our fiscal year end is October 31. Unless otherwise stated, all years and dates refer to our fiscal year.

**Principles of consolidation.** The consolidated financial statements include the accounts of the company and our wholly- and majority-owned subsidiaries. All significant intercompany accounts and transactions have been eliminated.

**Use of estimates.** The preparation of financial statements in accordance with U.S. GAAP requires management to make estimates and assumptions that affect the amounts reported in our consolidated financial statements and accompanying notes. Management bases its estimates on historical experience and various other assumptions believed to be reasonable. Although these estimates are based on management's best knowledge of current events and actions that may impact the company in the future, actual results may be different from the estimates. Our critical accounting policies are those that affect our financial statements materially and involve difficult, subjective or complex judgments by management. Those policies are revenue recognition, valuation of goodwill and purchased intangible assets, inventory valuation, share-based compensation, retirement and post-retirement plan assumptions and accounting for income taxes.

**Revenue recognition.** We enter into agreements to sell products (hardware and/or software), services and other arrangements (multiple element arrangements) that include combinations of products and services.

We recognize revenue, net of trade discounts and allowances, provided that (1) persuasive evidence of an arrangement exists, (2) delivery has occurred, (3) the price is fixed or determinable and (4) collectability is reasonably assured. Delivery is considered to have occurred when title and risk of loss have transferred to the customer for products, or when the service has been provided. We consider the price to be fixed or determinable when the price is not subject to refund or adjustments. At the time of the transaction, we evaluate the creditworthiness of our customers to determine the appropriate timing of revenue recognition. Provisions for discounts, warranties, returns, extended payment terms, and other adjustments are provided for in the period the related sales are recorded.

Product revenue. Our product revenue is generated predominantly from the sales of various types of analytical instrumentation. Product revenue, including sales to resellers and distributors, is reduced for estimated returns when appropriate. For sales or arrangements that include customer-specified acceptance criteria, including those where acceptance is required upon achievement of performance milestones, revenue is recognized after the acceptance criteria have been met. For products that include installation, if the installation meets the criteria to be considered a separate element, product revenue is recognized upon delivery, and recognition of installation revenue is delayed until the installation is complete. Otherwise, neither the product nor the installation revenue is recognized until the installation is complete.

Where software is licensed separately, revenue is recognized when the software is delivered and has been transferred to the customer or, in the case of electronic delivery of software, when the customer is given access to the licensed software programs.

## Table of Contents

We also evaluate whether collection of the receivable is probable, the fee is fixed or determinable and whether any other undelivered elements of the arrangement exist on which a portion of the total fee would be allocated based on vendor-specific objective evidence.

Service revenue. Revenue from services includes extended warranty, customer and software support including, Software as a Service (SaaS) due to recent acquisitions, consulting including companion diagnostics and training and education. Service revenue is deferred and recognized over the contractual period or as services are rendered and accepted by the customer. For example, customer support contracts are recognized ratably over the contractual period, while training revenue is recognized as the training is provided to the customer. In addition, the four revenue recognition criteria described above must be met before service revenue is recognized.

Revenue recognition for arrangements with multiple deliverables. Our multiple-element arrangements are generally comprised of a combination of measurement instruments, installation or other start-up services, and/or software and/or support or services. Hardware and software elements are typically delivered at the same time and revenue is recognized upon delivery once title and risk of loss pass to the customer. Delivery of installation, start-up services and other services varies based on the complexity of the equipment, staffing levels in a geographic location and customer preferences, and can range from a few days to a few months. Service revenue is deferred and recognized over the contractual period or as services are rendered and accepted by the customer. Revenue from the sale of software products that are not required to deliver the tangible product's essential functionality are accounted for under software revenue recognition rules which require vendor specific objective evidence (VSOE) of fair value to allocate revenue in a multiple element arrangement. Our arrangements generally do not include any provisions for cancellation, termination, or refunds that would significantly impact recognized revenue.

We have evaluated the deliverables in our multiple-element arrangements and concluded that they are separate units of accounting if the delivered item or items have value to the customer on a standalone basis and for an arrangement that includes a general right of return relative to the delivered item(s), delivery or performance of the undelivered item(s) is considered probable and substantially in our control. We allocate revenue to each element in our multiple-element arrangements based upon their relative selling prices. We determine the selling price for each deliverable based on a selling price hierarchy. The selling price for a deliverable is based on VSOE if available, third-party evidence (TPE) if VSOE is not available, or estimated selling price (ESP) if neither VSOE nor TPE is available. Revenue allocated to each element is then recognized when the basic revenue recognition criteria for that element have been met.

We use VSOE of selling price in the selling price allocation in all instances where it exists. VSOE of selling price for products and services is determined when a substantial majority of the selling prices fall within a reasonable range when sold separately. TPE of selling price can be established by evaluating largely interchangeable competitor products or services in standalone sales to similarly situated customers. As our products contain a significant element of proprietary technology and the solution offered differs substantially from that of competitors, it is difficult to obtain the reliable standalone competitive pricing necessary to establish TPE. ESP represents the best estimate of the price at which we would transact a sale if the product or service were sold on a standalone basis. We determine ESP for a product or service by using historical selling prices which reflect multiple factors including, but not limited to customer type, geography, market conditions, competitive landscape, gross margin objectives and pricing practices. The determination of ESP is made through consultation with and approval by management. We may modify or develop new pricing practices and strategies in the future. As these pricing strategies evolve changes may occur in ESP. The aforementioned factors may result in a different allocation of revenue to the deliverables in multiple element arrangements, which may change the pattern and timing of revenue recognition for these elements but will not change the total revenue recognized for the arrangement.

For sales arrangements that include equipment lease along with other products or services, revenue is allocated to the different elements based on the Revenue Recognition for Multiple Element Arrangements. Each of these contracts is

evaluated as a lease arrangement, either as an operating lease or a capital (sales-type) lease using lease classification guidance.

Deferred revenue. Deferred revenue represents the amount that is allocated to undelivered elements in multiple element arrangements. We limit the revenue recognized to the amount that is not contingent on the future delivery of products or services or meeting other specified performance conditions.

Accounts receivable, net. Trade accounts receivable are recorded at the invoiced amount and do not bear interest. Such accounts receivable has been reduced by an allowance for doubtful accounts, which is our best estimate of the amount of probable credit losses in our existing accounts receivable. We determine the allowance based on customer specific experience and the aging of such receivables, among other factors. The allowance for doubtful accounts as of October 31, 2016 and 2015 was not material.

## Table of Contents

We do not have any off-balance-sheet credit exposure related to our customers. Accounts receivable are also recorded net of product returns.

Shipping and handling costs. Our shipping and handling costs charged to customers are included in net revenue, and the associated expense is recorded in cost of products for all periods presented.

Inventory. Inventory is valued at standard cost, which approximates actual cost computed on a first-in, first-out basis, not in excess of market value. We assess the valuation of our inventory on a periodic basis and make adjustments to the value for estimated excess and obsolete inventory based on estimates about future demand. The excess balance determined by this analysis becomes the basis for our excess inventory charge. Our excess inventory review process includes analysis of sales forecasts, managing product rollovers and working with manufacturing to maximize recovery of excess inventory.

Goodwill and purchased intangible assets. Under the authoritative guidance we have the option to perform a qualitative assessment to determine whether further impairment testing is necessary. The accounting standard gives an entity the option to first assess qualitative factors to determine whether performing the two-step test is necessary. If an entity believes, as a result of its qualitative assessment, that it is more-likely-than-not (i.e. greater than 50% chance) that the fair value of a reporting unit is less than its carrying amount, the quantitative impairment test will be required. Otherwise, no further testing will be required.

The guidance includes examples of events and circumstances that might indicate that a reporting unit's fair value is less than its carrying amount. These include macro-economic conditions such as deterioration in the entity's operating environment or industry or market considerations; entity-specific events such as increasing costs, declining financial performance, or loss of key personnel; or other events such as an expectation that a reporting unit will be sold or a sustained decrease in the stock price on either an absolute basis or relative to peers.

If it is determined, as a result of the qualitative assessment, that it is more-likely-than-not that the fair value of a reporting unit is less than its carrying amount, the provisions of authoritative guidance require that we perform a two-step impairment test on goodwill. In the first step, we compare the fair value of each reporting unit to its carrying value. The second step (if necessary) measures the amount of impairment by applying fair-value-based tests to the individual assets and liabilities within each reporting unit. As defined in the authoritative guidance, a reporting unit is an operating segment, or one level below an operating segment. We aggregate components of an operating segment that have similar economic characteristics into our reporting units.

In fiscal year 2016, we assessed goodwill impairment for our three reporting units which consisted of three segments: life sciences and applied markets, diagnostics and genomics and Agilent CrossLab. We performed a qualitative test for goodwill impairment of the three reporting units, as of September 30, 2016. Based on the results of our qualitative testing, we believe that it is more-likely-than-not- that the fair value of these reporting units are greater than their respective carrying values. Each quarter we review the events and circumstances to determine if goodwill impairment is indicated. There was no impairment of goodwill during the years ended October 31, 2016, 2015 and 2014.

Purchased intangible assets consist primarily of acquired developed technologies, proprietary know-how, trademarks, and customer relationships and are amortized using the best estimate of the asset's useful life that reflect the pattern in which the economic benefits are consumed or used up or a straight-line method ranging from 6 months to 15 years. In-process research and development ("IPR&D") is initially capitalized at fair value as an intangible asset with an indefinite life and assessed for impairment thereafter. When the IPR&D project is complete, it is reclassified as an amortizable purchased intangible asset and is amortized over its estimated useful life. If an IPR&D project is abandoned, Agilent will record a charge for the value of the related intangible asset to Agilent's consolidated statement of operations in the period it is abandoned.

Agilent's indefinite-lived intangible assets are IPR&D intangible assets. The accounting guidance allows a qualitative approach for testing indefinite-lived intangible assets for impairment, similar to the issued impairment testing guidance for goodwill and allows the option to first assess qualitative factors (events and circumstances) that could have affected the significant inputs used in determining the fair value of the indefinite-lived intangible asset to determine whether it is more-likely-than-not (i.e. greater than 50% chance) that the indefinite-lived intangible asset is impaired. An organization may choose to bypass the qualitative assessment for any indefinite-lived intangible asset in any period and proceed directly to calculating its fair value. We performed a qualitative test for impairment of indefinite-lived intangible assets as of September 30, 2016. Based on the results of our qualitative testing, we believe that it is more-likely-than-not that the fair value of these indefinite-lived intangible assets is greater than their respective carrying values. Each quarter we review the events and circumstances to determine if impairment of indefinite-lived intangible asset is indicated. Based on triggering events in the years ended October 31, 2016, 2015 and 2014, we recorded an impairment of \$4 million, \$3 million and \$4 million, respectively due to the cancellation of certain IPR&D projects. In addition,

Table of Contents

in the year ended October 31, 2014, we also recorded \$12 million of impairment of other intangibles due to the exit of our NMR business.

**Share-based compensation.** For the years ended 2016, 2015 and 2014, we accounted for share-based awards made to our employees and directors including employee stock option awards, restricted stock units, employee stock purchases made under our Employee Stock Purchase Plan ("ESPP") and performance share awards under Agilent Technologies, Inc. Long-Term Performance Program ("LTPP") using the estimated grant date fair value method of accounting. Under the fair value method, we recorded compensation expense, in continuing operations, for all share-based awards of \$60 million in 2016, \$55 million in 2015 and \$59 million in 2014. For the stock option grants in 2015 and long term performance plan grants in 2016 and 2015 we used a volatility measure derived from a selection of our peer companies. In prior periods, we used Agilent stock historical volatility. We currently consider this method to not be reflective of our future volatility due to the separation of Keysight. See Note 4, "Share-based compensation" for additional information.

**Retirement and post-retirement plans.** Substantially all of our employees are covered under various defined benefit and/or defined contribution retirement plans. Additionally, we sponsor post-retirement health care benefits for our eligible U.S. employees. Assumptions used to determine the benefit obligations and the expense for these plans are derived annually. See Note 13, "Retirement plans and post-retirement pension plans" for additional information.

**Taxes on income.** Income tax expense or benefit is based on income or loss before taxes. Deferred tax assets and liabilities are recognized principally for the expected tax consequences of temporary differences between the tax bases of assets and liabilities and their reported amounts. See Note 5, "Income Taxes" for more information.

**Warranty.** Our standard warranty terms typically extend for one year from the date of delivery. We accrue for standard warranty costs based on historical trends in warranty charges as a percentage of net product revenue. The accrual is reviewed regularly and periodically adjusted to reflect changes in warranty cost estimates. Estimated warranty charges are recorded within cost of products at the time products are sold. See Note 14, "Guarantees".

**Advertising.** Advertising costs are generally expensed as incurred and amounted to \$30 million in 2016, \$25 million in 2015 and \$31 million in 2014.

**Research and development.** Costs related to research, design and development of our products are charged to research and development expense as they are incurred.

**Sales taxes.** Sales taxes collected from customers and remitted to governmental authorities are not included in our revenue.

**Net income per share.** Basic net income per share is computed by dividing net income - the numerator - by the weighted average number of common shares outstanding - the denominator - during the period excluding the dilutive effect of stock options and other employee stock plans. Diluted net income per share gives effect to all potential common shares outstanding during the period unless the effect is anti-dilutive. The dilutive effect of share-based awards is reflected in diluted net income per share by application of the treasury stock method, which includes consideration of unamortized share-based compensation expense and the dilutive effect of in-the-money options and non-vested restricted stock units. Under the treasury stock method, the amount the employee must pay for exercising stock options and unamortized share-based compensation expense are assumed proceeds to be used to repurchase hypothetical shares. See Note 6, "Net Income Per Share".

**Cash, cash equivalents and short term investments.** We classify investments as cash equivalents if their original or remaining maturity is three months or less at the date of purchase. Cash equivalents are stated at cost, which

approximates fair value.

As of October 31, 2016, approximately \$2,181 million of our cash and cash equivalents is held outside of the U.S. in our foreign subsidiaries. Under current tax laws, the cash could be repatriated to the U.S. but most of it would be subject to U.S. federal and state income taxes, less applicable foreign tax credits. Our cash and cash equivalents mainly consist of short term deposits held at major global financial institutions, institutional money market funds, and similar short duration instruments with original maturities of 90 days or less. We continuously monitor the creditworthiness of the financial institutions and institutional money market funds in which we invest our funds.

We classify investments as short-term investments if their original maturities are greater than three months and their remaining maturities are one year or less. Currently, we have no short-term investments.

Table of Contents

Variable interest entities. We make a determination upon entering into an arrangement whether an entity in which we have made an investment is considered a Variable Interest Entity (“VIE”). The company evaluates its investments in privately held companies on an ongoing basis. We have determined that as of October 31, 2016 there were no VIE’s required to be consolidated in the company’s consolidated financial statements because we do not have a controlling financial interest in any of the VIE’s that we have invested in nor are we the primary beneficiary. We account for these investments under either the equity or cost method, depending on the circumstances. We periodically reassess whether we are the primary beneficiary of a VIE. The reassessment process considers whether we have acquired the power to direct the most significant activities of the VIE through changes in governing documents or other circumstances. We also reconsider whether entities previously determined not to be VIEs have become VIEs, based on changes in facts and circumstances including changes in contractual arrangements and capital structure. During 2016, we wrote down an equity method investment to its fair value of zero, resulting in an impairment charge of \$18 million. In addition, we recorded an impairment of \$7 million of uncollectible loans related to this equity method investment. As of October 31, 2016, the carrying value of our investments in VIE’s was \$80 million with a maximum exposure of \$80 million. The investments are included on the long term investments line of the consolidated balance sheet.

During the year ended October 31, 2016, Agilent made a preferred stock investment in Lasergen for \$80 million. Agilent’s initial ownership stake was 48 percent and we have also joined the board of Lasergen and signed a collaboration agreement. We have the option to acquire all of the remaining shares of Lasergen until March 2, 2018, for additional consideration of \$105 million. Lasergen is a VIE, however, we do not consolidate the entity in our financial statements because we do not have the power to direct the activities of the VIE that most significantly impact the VIE's economic performance. Because of the nature of the preferred stock of Lasergen that we own, we account for this investment under the cost method. As of October 31, 2016, both the carrying value and maximum exposure of the Lasergen investment was \$80 million. The maximum exposure is equal to the carrying value because we do not have future funding commitments.

Fair value of financial instruments. The carrying values of certain of our financial instruments including cash and cash equivalents, accounts receivable, accounts payable, accrued compensation and other accrued liabilities approximate fair value because of their short maturities. The fair value of long-term equity investments is determined using quoted market prices for those securities when available. For those long-term equity investments accounted for under the cost or equity method, their carrying value approximates their estimated fair value. Equity method investments are reported at the amount of the company’s initial investment and adjusted each period for the company’s share of the investee’s income or loss and dividend paid. The fair value of our long-term debt, calculated from quoted prices which are primarily Level 1 inputs under the accounting guidance fair value hierarchy, exceeds the carrying value by approximately \$96 million and \$30 million as of October 31, 2016 and 2015, respectively. The fair value of foreign currency contracts used for hedging purposes is estimated internally by using inputs tied to active markets. These inputs, for example, interest rate yield curves, foreign exchange rates, and forward and spot prices for currencies are observable in the market or can be corroborated by observable market data for substantially the full term of the assets or liabilities. See also Note 11, "Fair Value Measurements" for additional information on the fair value of financial instruments.

Concentration of credit risk. Financial instruments that potentially subject Agilent to significant concentration of credit risk include money market fund investments, time deposits and demand deposit balances. These investments are categorized as cash and cash equivalents. In addition, Agilent has credit risk from derivative financial instruments used in hedging activities and accounts receivable. We invest in a variety of financial instruments and limit the amount of credit exposure with any one financial institution. We have a comprehensive credit policy in place and credit exposure is monitored on an ongoing basis.

Credit risk with respect to our accounts receivable is diversified due to the large number of entities comprising our customer base and their dispersion across many different industries and geographies. Credit evaluations are performed on customers requiring credit over a certain amount and we sell the majority of our products through our direct sales

force. Credit risk is mitigated through collateral such as letter of credit, bank guarantees or payment terms like cash in advance. No single customer accounted for more than 10 percent of combined accounts receivable as of October 31, 2016, or 2015.

Derivative instruments. Agilent is exposed to global foreign currency exchange rate and interest rate risks in the normal course of business. We enter into foreign exchange hedging contracts, primarily forward contracts and purchased options and, in the past, interest rate swaps to manage financial exposures resulting from changes in foreign currency exchange rates and interest rates. In the vast majority of cases, these contracts are designated at inception as hedges of the related foreign currency or interest exposures. Foreign currency exposures include committed and anticipated revenue and expense transactions and assets and liabilities that are denominated in currencies other than the functional currency of the subsidiary. Interest rate exposures are associated with the company's fixed-rate debt. For option contracts, we exclude time value from the measurement of effectiveness. To qualify for hedge accounting, contracts must reduce the foreign currency exchange rate and interest rate risk otherwise inherent in the amount and duration of the hedged exposures and comply with established risk management policies; foreign exchange hedging contracts generally mature within twelve months and interest rate swaps, if any, mature at the same time as the maturity

Table of Contents

of the debt. In order to manage foreign currency exposures in a few limited jurisdictions we may enter into foreign exchange contracts that do not qualify for hedge accounting. In such circumstances, the local foreign currency exposure is offset by contracts owned by the parent company. We do not use derivative financial instruments for speculative trading purposes.

All derivatives are recognized on the balance sheet at their fair values. For derivative instruments that are designated and qualify as a fair value hedge, changes in value of the derivative are recognized in the consolidated statement of operations in the current period, along with the offsetting gain or loss on the hedged item attributable to the hedged risk. For derivative instruments that are designated and qualify as a cash flow hedges, changes in the value of the effective portion of the derivative instrument is recognized in comprehensive income (loss), a component of stockholders' equity. Amounts associated with cash flow hedges are reclassified and recognized in income when either the forecasted transaction occurs or it becomes probable the forecasted transaction will not occur. Derivatives not designated as hedging instruments are recorded on the balance sheet at their fair value and changes in the fair values are recorded in the income statement in the current period. Derivative instruments are subject to master netting arrangements and are disclosed gross in the balance sheet. Changes in the fair value of the ineffective portion of derivative instruments are recognized in earnings in the current period. Ineffectiveness in 2016, 2015 and 2014 was not material. Cash flows from derivative instruments are classified in the statement of cash flows in the same category as the cash flows from the hedged or economically hedged item, primarily in operating activities.

**Property, plant and equipment.** Property, plant and equipment are stated at cost less accumulated depreciation. Additions, improvements and major renewals are capitalized; maintenance, repairs and minor renewals are expensed as incurred. When assets are retired or disposed of, the assets and related accumulated depreciation and amortization are removed from our general ledger, and the resulting gain or loss is reflected in the consolidated statement of operations. Buildings and improvements are depreciated over the lesser of their useful lives or the remaining term of the lease and machinery and equipment over three to ten years. We use the straight-line method to depreciate assets.

**Leases.** We lease buildings, machinery and equipment under operating leases for original terms ranging generally from one year to twenty years. Certain leases contain renewal options for periods up to six years. In addition, we lease equipment to customers in connection with our diagnostics business using both capital and operating leases. As of October 31, 2016 and 2015 our diagnostics and genomics segment has approximately \$15 million and \$11 million, respectively, of lease receivables related to capital leases and approximately \$23 million and \$31 million, respectively, of net assets for operating leases. We depreciate the assets related to the operating leases over their estimated useful lives.

**Capitalized software.** We capitalize certain internal and external costs incurred to acquire or create internal use software. Capitalized software is included in property, plant and equipment and is depreciated over three to five years once development is complete.

**Impairment of long-lived assets.** We continually monitor events and changes in circumstances that could indicate carrying amounts of long-lived assets, including intangible assets, may not be recoverable. When such events or changes in circumstances occur, we assess the recoverability of long-lived assets by determining whether the carrying value of such assets will be recovered through undiscounted expected future cash flows. If the total of the undiscounted future cash flows is less than the carrying amount of those assets, we recognize an impairment loss based on the excess of the carrying amount over the fair value of the assets.

**Employee compensation and benefits.** Amounts owed to employees, such as accrued salary, bonuses and vacation benefits are accounted for within employee compensation and benefits. The total amount of accrued vacation benefit was \$92 million and \$86 million as of October 31, 2016, and 2015, respectively.

Foreign currency translation. We translate and remeasure balance sheet and income statement items into U.S. dollars. For those subsidiaries that operate in a local currency functional environment, all assets and liabilities are translated into U.S. dollars using current exchange rates at the balance sheet date; revenue and expenses are translated using monthly exchange rates which approximate to average exchange rates in effect during each period. Resulting translation adjustments are reported as a separate component of accumulated other comprehensive income (loss) in stockholders' equity.

For those subsidiaries that operate in a U.S. dollar functional environment, foreign currency assets and liabilities are remeasured into U.S. dollars at current exchange rates except for non-monetary assets and capital accounts which are remeasured at historical exchange rates. Revenue and expenses are generally remeasured at monthly exchange rates which approximate average exchange rates in effect during each period. Gains or losses from foreign currency remeasurement are included in consolidated net income. Net gains or losses resulting from foreign currency transactions, including hedging gains and losses, are reported in other income (expense), net and was \$5 million loss for fiscal year 2016, \$9 million loss for 2015 and \$4 million loss for 2014, respectively.

## 2. NEW ACCOUNTING PRONOUNCEMENTS

## Recently Adopted Accounting Pronouncements

In November 2015, the Financial Accounting Standards Board (“FASB”) issued ASU 2015-17 Balance Sheet Classification of Deferred Taxes, to simplify accounting for deferred taxes. Beginning on November 1, 2017 and including the interim periods following that date, we will be required to present all deferred tax balances as non-current. Existing GAAP guidance requires us to record deferred tax balances as either current or non-current in accordance with the classification of the underlying attributes. Early adoption of this guidance is permitted and may be applied either prospectively or retrospectively to all periods presented. We adopted this guidance at the end of the period ended April 30, 2016 prospectively and therefore, the October 31, 2016 consolidated balance sheet reflects the new disclosure requirements but prior periods have not been adjusted.

In March 2016, the FASB issued ASU 2016-09 Improvements to Employee Share-Based Payment Accounting, that changes the accounting for certain aspects of share-based payments to employees. The new guidance requires excess tax benefits and tax deficiencies to be recorded in the income statement when the awards vest or are settled. In addition, cash flows related to excess tax benefits will no longer be separately classified as a financing activity apart from other income tax cash flows. The standard also allows us to repurchase more of an employee’s shares for tax withholding purposes without triggering liability accounting, clarifies that all cash payments made on an employee’s behalf for withheld shares should be presented as a financing activity on our cash flows statement, and provides an accounting policy election to account for forfeitures as they occur. The amendments also remove the requirement to delay the recognition of an excess tax benefit until it reduces current taxes payable. Under the new guidance the benefit will be recorded when it arises with a cumulative effect adjustment to opening retained earnings for previously unrecognized benefits. The new guidance is effective for us beginning November 1, 2017. We elected to early adopt the new guidance in the third quarter of fiscal year 2016, on a retrospective basis.

The impact of adoption was the recognition of tax shortfalls of \$2 million in our provision for income taxes for fiscal year 2016. Additional amendments to the accounting for income taxes was the recognition of the windfall tax benefits as a cumulative effect adjustment to opening retained earnings of \$196 million together with an increase in deferred tax assets included in other assets of \$98 million, an increase in additional paid in capital of \$4 million, a reduction in other accrued liabilities of \$1 million and a decrease of \$99 million in other long term liabilities. There was no impact from minimum statutory withholding tax requirements to retained earnings as of November 1, 2015. We have elected to continue to estimate forfeitures expected to occur to determine the amount of compensation cost to be recognized in each period. The adoption of the new guidance did not have a significant impact on the calculation of diluted weighted average shares.

We elected to apply the presentation requirements for cash flows related to excess tax benefits and employee taxes paid for withheld shares retrospectively to all periods presented. The presentation requirements for cash flows impacted our previously reported consolidated statement of cash flows for fiscal years 2015 and 2014 as follows:

	Year Ended October 31, 2015		Year Ended October 31, 2014	
	As Reported	As Adjusted	As Reported	As Adjusted
	(in millions)			
Consolidated Statement of Cash Flows:				
Net cash provided by operating activities	\$491	\$512	\$711	\$731
Net cash used in financing activities	\$(1,068)	\$(1,089)	\$(97)	\$(117)

#### New Accounting Pronouncements Not Yet Adopted

In April 2014, the FASB issued amendments to the guidance on discontinued operations. The guidance changes the criteria for reporting discontinued operations while enhancing disclosures in this area. Under the new guidance, only disposals representing a strategic shift in operations should be presented as discontinued operations. Those strategic shifts should have a major effect on the organization's operations and financial results. Examples include a disposal of a major geographic area, a major line of business, or a major equity method investment. Additionally, the new guidance requires expanded disclosures about discontinued operations that will provide financial statement users with more information about the assets, liabilities, income, expenses of discontinued operations and of the pre-tax income attributable to a disposal of a significant part of an organization that does not qualify for

Table of Contents

discontinued operations reporting. The new guidance is effective for Agilent prospectively for all disposals (or classifications as held for sale) of components of an entity that occur after November 1, 2016.

The disposal of Keysight meets the definition of a discontinued operation under both the existing and amended accounting guidance. The historical results of operations and the financial position of Keysight are included in the consolidated financial statements of Agilent and are reported as discontinued operations within this Form 10-K.

In May 2014, the FASB issued amendments to the accounting guidance related to revenue recognition, Topic 606, Revenue from contracts with customers. The objective of the amendments was to significantly enhance comparability and clarify principles of revenue recognition practices across entities, industries, jurisdictions and capital markets. In July 2015, the FASB amended the effective date. In March 2016, the FASB clarified the implementation guidance on principal versus agent considerations. In April 2016, the FASB clarified certain aspects of identifying performance obligations and licensing implementation guidance. In May 2016, the FASB provided additional guidance related to disclosure of remaining performance obligations, as well as other amendments to guidance on collectibility, non-cash consideration and the presentation of sales and other similar taxes collected from customers. The amendments are effective for us beginning fiscal 2019. Early adoption is permitted for us beginning November 1, 2017. The company expects to adopt this guidance on November 1, 2018. We are currently in the assessment phase to determine the adoption method and are evaluating the impact of these amendments on our consolidated financial statements and disclosures.

In April 2015, the FASB issued amendments to simplify the presentation of debt issuance costs. The amendments require that debt issuance costs related to a recognized debt liability to be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The recognition and measurement guidance for debt issuance costs remain unchanged. The amendments are effective for us beginning November 1, 2016, and for interim periods within that year. We do not expect the impact of adopting the amendments to be material on our consolidated financial statements and disclosures.

In September 2015, the FASB issued guidance intended to simplify accounting for adjustments to provisional amounts recorded in connection with business combinations. Beginning in November 1, 2017 and in the interim periods from November 1, 2018, adjustments will be recorded in the period that they are determined rather than applied retrospectively via revision to the period of acquisition and each period thereafter. We do not expect this guidance to have a material impact on our consolidated financial statements and disclosures.

In January 2016, the FASB issued amendments to address certain aspects of recognition, measurement, presentation, and disclosure of financial instruments. The standard requires entities to measure equity investments that do not result in consolidation and are not accounted for under the equity method at fair value and recognize any changes in fair value in net income. The provisions under this amendment are effective for us beginning November 1, 2018, and for interim periods within that year. Early adoption is not permitted. We are evaluating the impact of adopting this guidance on our consolidated financial statements and disclosures.

In February 2016, the FASB issued guidance which amends the existing accounting standards for leases. Consistent with existing guidance, the recognition, measurement, and presentation of expenses and cash flows arising from a lease by a lessee primarily will depend on its classification. Under the new guidance, a lessee will be required to recognize right-of-use assets and lease liabilities on the balance sheet. The new guidance is effective for us beginning November 1, 2020, and for interim periods within that year. Early adoption is permitted and we will be required to adopt using a modified retrospective approach. We are evaluating the timing of adoption and the impact of this guidance on our consolidated financial statements and disclosures.

In March 2016, the FASB issued amendments to simplify the transition to the equity method of accounting. The amendments require that the equity method investor add the cost of acquiring the additional interest in the investee to the current basis of the investor's previously held interest and adopt the equity method of accounting as of the date the investment becomes qualified for equity method accounting. The amendments are effective for us beginning November 1, 2017, and for interim periods within that year. We currently do not expect material impact of this amendment on our consolidated financial statements and disclosures.

In August 2016, the FASB issued amendments to address eight specific cash flow issues with the objective of reducing the existing diversity in practice. The amendments are effective for us beginning November 1, 2018, and for interim periods within that year. Early adoption is permitted. If we decide to early adopt the amendments, we will be required to adopt all of the amendments in the same period. We are evaluating the timing of our adoption and the impact of the amendments on our consolidated statement of cash flows and disclosures.

In October 2016, the FASB issued amendments to improve the accounting for the income tax consequences of intra-entity transfers of assets other than inventory. The amendments are effective for us beginning November 1, 2018, and for interim periods within that year. Early adoption is permitted and should be applied on a modified retrospective basis through a cumulative-effect

Table of Contents

adjustment directly to retained earnings as of the beginning of the period of adoption. We are evaluating the timing of our adoption and the impact of the amendments on our consolidated financial statements and disclosures.

In November 2016, the FASB issued amendments to require amounts generally described as restricted cash and restricted cash equivalents be included with cash and cash equivalents when reconciling the beginning-of-period and end-of-period total amounts shown on the statement of cash flows. The amendments are effective for us beginning November 1, 2018, and for interim periods within that year. Early adoption is permitted. We are evaluating the timing of our adoption and the impact of the amendments on our consolidated statement of cash flows and disclosures.

Other amendments to GAAP in the U.S. that have been issued by the FASB or other standards-setting bodies that do not require adoption until a future date are not expected to have a material impact on our consolidated financial statements upon adoption.

### 3. DISCONTINUED OPERATIONS

On September 19, 2013, Agilent announced its intention to separate its electronic measurement business, Keysight, which was previously a separate reportable segment, into a stand-alone publicly traded company. Keysight was incorporated in Delaware as a wholly-owned subsidiary of Agilent on December 6, 2013. On November 1, 2014, we completed the distribution of 100% of the outstanding common stock of Keysight to Agilent stockholders, who received one share of Keysight common stock for every two shares of Agilent common stock held as of the close of business on the record date, October 22, 2014. The separation agreement ensured that Keysight had approximately \$700 million of total cash and cash equivalents immediately following distribution. For the year ended October 31, 2015, we transferred a total amount of cash and cash equivalents of \$734 million to Keysight.

The historical results of operations and statement of financial position of Keysight have been presented as discontinued operations in the consolidated financial statements and prior periods have been restated. Discontinued operations include results of Keysight's business except for certain allocated corporate overhead costs and certain costs associated with transition services provided by Agilent to Keysight. Discontinued operations also includes other costs incurred by Agilent to separate Keysight. These costs include transaction charges, advisory and consulting fees and information system expenses.

The following table summarizes results from discontinued operations of Keysight included in the consolidated statement of operations:

	Years Ended	
	October 31,	
	2015	2014
	(in millions)	
Net revenue	\$—	\$2,933
Costs and expenses	39	2,521
Operating income (loss)	(39 )	412
Other income (expense), net	—	5
Income (loss) from discontinued operations before tax	(39 )	417
Provision (benefit) for income taxes	(2 )	100
Net income (loss) from discontinued operations	\$(37)	\$317

Net income (loss) from discontinued operations includes transaction, information systems and other costs to effect the separation of \$39 million and \$178 million for the years ended October 31, 2015 and 2014, respectively. In the year ended October 31, 2015 only those costs incurred to effect the separation have been included. No income or expense

has been recorded for the Keysight business after separation from Agilent on November 1, 2014.

In addition, \$332 million of accumulated other comprehensive loss, net of income taxes, primarily related to pension and other post-retirement benefits plans and currency translation was also transferred to Keysight together with \$28 million of additional paid in capital related to share based compensation windfall tax benefits. The removal of Keysight net assets and equity related adjustments is presented as a reduction in Agilent's retained earnings and represents a non cash financing activity excluding cash

## Table of Contents

transferred. See Note 5 "Income Taxes" for tax implications and adjustments due to the distribution and Note 4 "Share Based Compensation" for changes to share based compensation awards as a result of the distribution of Keysight.

Under the terms of the Transition Services Agreement, we agreed to provide administrative, site services, information technology systems and various other corporate and support services to Keysight over the period of 12-18 months after the separation on a cost or cost-plus basis. The most significant component of the service income is the provision of IT services that was completed by the end of the second quarter of 2015. In total we recorded income for all services provided to Keysight of approximately \$12 million in fiscal year 2015. In addition, Agilent expects to receive lease income together with site service income from Keysight over the next 3-4 years of approximately \$12 million per year. In the year ended October 31, 2016 and 2015 other income (expense), net includes \$12 million and \$25 million of income in respect of the provision of services to, and lease income from Keysight.

#### 4. SHARE-BASED COMPENSATION

Agilent accounts for share-based awards in accordance with the provisions of the accounting guidance which requires the measurement and recognition of compensation expense for all share-based payment awards made to our employees and directors including employee stock option awards, restricted stock units, employee stock purchases made under our ESPP and performance share awards granted to selected members of our senior management under the LTTP based on estimated fair values.

##### Description of Share-Based Plans

**Employee stock purchase plan.** Effective November 1, 2000, we adopted the ESPP. The ESPP allows eligible employees to contribute up to ten percent of their base compensation to purchase shares of our common stock at 85 percent of the closing market price at purchase date. Shares authorized for issuance in connection with the ESPP are subject to an automatic annual increase of the lesser of one percent of the outstanding shares of common stock of Agilent on November 1, or an amount determined by the Compensation Committee of our Board of Directors. Under the terms of the ESPP, in no event shall the number of shares issued under the ESPP exceed 75 million shares.

Under our ESPP, employees purchased 696,178 shares for \$23 million in 2016, 346,472 shares for \$12 million in 2015 and 1,604,406 shares for \$73 million in 2014. As of October 31, 2016, the number of shares of common stock authorized and available for issuance under our ESPP was 45,168,192.

**Incentive compensation plans.** On November 19, 2008 and March 11, 2009, the Compensation Committee of Board of Directors and the stockholders, respectively, approved the Agilent Technologies, Inc. 2009 Stock Plan (the "2009 Stock Plan") to replace the Company's 1999 Stock Plan and 1999 Stock Non-Employee Director Stock Plan and subsequently reserved 25 million shares of Company common stock that may be issued under the 2009 Plan, plus any shares forfeited or cancelled under the 1999 Stock Plan. The 2009 Stock Plan provides for the grant of awards in the form of stock options, stock appreciation rights ("SARs"), restricted stock, restricted stock units ("RSUs"), performance shares and performance units with performance-based conditions on vesting or exercisability, and cash awards. The 2009 Plan has a term of ten years. As of October 31, 2016, 10,316,082 shares were available for future awards under the 2009 Stock Plan.

Stock options granted under the 2009 Stock Plans may be either "incentive stock options", as defined in Section 422 of the Internal Revenue Code, or non-statutory. Options generally vest at a rate of 25 percent per year over a period of four years from the date of grant and generally have a maximum contractual term of ten years. The exercise price for stock options is generally not less than 100 percent of the fair market value of our common stock on the date the stock award is granted. No options were granted during the year ended October 31, 2016.

Effective November 1, 2003, the Compensation Committee of the Board of Directors approved the LTPP, which is a performance stock award program administered under the 2009 Stock Plan, for the company's executive officers and other key employees. Participants in this program are entitled to receive unrestricted shares of the company's stock after the end of a three-year period, if specified performance targets are met. Certain LTPP awards are generally designed to meet the criteria of a performance award with the performance metrics and peer group comparison based on the Total Stockholders' Return ("TSR") set at the beginning of the performance period. Effective November 1, 2015, the Compensation Committee of the Board of Directors approved another type of performance stock award, for the company's executive officers and other key employees. Participants in this program are also entitled to receive unrestricted shares of the company's stock after the end of a three-year period, if specified performance targets based on Operating Margin ("OM") over the three-year period are met. All LTPP awards granted after November 1, 2015, are subject to a one-year post-vest holding period.

Table of Contents

Based on the performance metrics the final LTTP award may vary from zero to 200 percent of the target award. The maximum contractual term for awards under the LTTP program is three years and the maximum award value cannot exceed 300 percent of the grant date target value. We consider the dilutive impact of these programs in our diluted net income per share calculation only to the extent that the performance conditions are expected to be met.

We also issue restricted stock units under our share-based plans. The estimated fair value of the restricted stock unit awards granted under the Stock Plans is determined based on the market price of Agilent's common stock on the date of grant adjusted for expected dividend yield. Restricted stock units generally vest, with some exceptions, at a rate of 25 percent per year over a period of four years from the date of grant.

In connection with the separation of Keysight Technologies on November 1, 2014 and in accordance with the Employee Matters Agreement we made certain adjustments to the exercise price and number of our share-based compensation awards with the intention of preserving the intrinsic value of the awards prior to the separation. Exercisable and non-exercisable stock options converted to those of the entity where the employee is working post-separation. Restricted stock units awards and long-term performance plan grants were adjusted to provide holders restricted stock units and long-term performance plan grants in the company that employs such employee following the separation. These adjustments to our stock-based compensation awards did not have a material impact on compensation expense.

## Impact of Share-based Compensation Awards

We have recognized compensation expense based on the estimated grant date fair value method under the authoritative guidance. For all share-based awards we have recognized compensation expense using a straight-line amortization method. As the guidance requires that share-based compensation expense be based on awards that are ultimately expected to vest, estimated share-based compensation has been reduced for estimated forfeitures.

The impact on our results for share-based compensation was as follows:

	Years Ended		
	October 31,		
	2016	2015	2014
	(in millions)		
Cost of products and services	\$14	\$11	\$13
Research and development	6	5	7
Selling, general and administrative	40	39	39
Share-based compensation expense in continuing operations	60	55	59
Share-based compensation expense in discontinued operations	—	—	39
Total share-based compensation expense	\$60	\$55	\$98

At October 31, 2016 and 2015 there was no share-based compensation capitalized within inventory. The weighted average grant date fair value of options, granted in 2015 and 2014 was \$10.58 and \$18.73 per share, respectively. No stock options were granted in 2016.

Included in the 2016, 2015 and 2014 expense is incremental expense for acceleration of share-based compensation related to the announced workforce reduction plan of zero, \$2 million and \$1 million, respectively. Upon termination of the employees impacted by workforce reduction, the non-vested Agilent awards held by these employees immediately vests. Employees have a period of up to three months in which to exercise the Agilent options before such options are cancelled.

### Valuation Assumptions

For all periods presented, the fair value of share based awards for employee stock option awards was estimated using the Black-Scholes option pricing model. For all periods presented, shares granted under the LTPP (TSR) were valued using a Monte Carlo simulation. The ESPP allows eligible employees to purchase shares of our common stock at 85 percent of the fair market value at the purchase date.

The estimated fair value of restricted stock unit awards and LTPP (OM) was determined based on the market price of Agilent's common stock on the date of grant adjusted for expected dividend yield and as appropriate, a discount related to the one-year post vesting. The compensation cost for LTPP (OM) reflects the cost of awards that are probable to vest at the end of the performance period.

Table of Contents

The following assumptions were used to estimate the fair value of employee stock options and LTPP grants.

	Years Ended October 31,		
	2016	2015	2014
<b>Stock Option Plans:</b>			
Weighted average risk-free interest rate	—	1.75%	1.69%
Dividend yield	—	1%	1%
Weighted average volatility	—	28%	39%
Expected life	—	5.5 years	5.8 years
<b>LTPP:</b>			
Volatility of Agilent shares	24%	25%	36%
Volatility of selected peer-company shares	14%-50%	12%-57%	13%-57%
Price-wise correlation with selected peers	35%	37%	47%

Both the Black-Scholes and Monte Carlo simulation fair value models require the use of highly subjective and complex assumptions, including the option's expected life and the price volatility of the underlying stock. Due to the separation of Keysight on November 1, 2014, expected volatility for grants of options in 2015 was based on a 5.5 year average historical stock price volatility of a group of our peer companies. For the volatility of our 2016 and 2015 LTPP (TSR) grants, we used the 3-year average historical stock price volatility of a group of our peer companies. We believe our historical volatility prior to the separation of Keysight is no longer relevant to use. For the grants of options and LTPP (TSR) prior to November 1, 2014, the expected stock price volatility assumption was determined using the historical volatility of Agilent's stock over the most recent historical period equivalent to the expected life of the stock options and LTPP (TSR).

All LTPP awards granted in 2016 to our senior management employees have a one-year post-vest holding restriction. The estimated discount associated with post-vest holding restrictions is calculated using the Finnerty model. The model calculates the potential lost value if the employee were able to sell the shares during the lack of marketability period, instead of being required to hold the shares. The model used the 3-year average historical stock price volatility of a group of our peer companies and an expected dividend yield to compute the discount. The grants made during 2016 have a discount of 5.5 percent while computing the fair value.

Table of Contents

## Share-based Payment Award Activity

## Employee Stock Options

The following table summarizes employee stock option award activity of our employees and directors for 2016.

	Options Outstanding	Weighted Average Exercise Price
	(in thousands)	
Outstanding at October 31, 2015	5,712	\$ 31
Granted	—	\$ —
Exercised	(1,547 )	\$ 25
Cancelled/Forfeited/Expired	(59 )	\$ 33
Outstanding at October 31, 2016	4,106	\$ 33

Forfeited and expired options from total cancellations in 2016 were as follows:

	Options Cancelled	Weighted Average Exercise Price
	(in thousands)	
Forfeited	31	\$ 38
Expired	28	\$ 28
Total Options Cancelled during 2016	59	\$ 33

The options outstanding and exercisable for equity share-based payment awards at October 31, 2016 were as follows:

Range of Exercise Prices	Options Outstanding			Options Exercisable				
	Number Outstanding	Weighted Average Remaining Contractual Life	Weighted Average Exercise Price	Aggregate Intrinsic Value	Number Exercisable	Weighted Average Remaining Contractual Life	Weighted Average Exercise Price	Aggregate Intrinsic Value
	(in thousands)	(in years)	(in thousands)	(in thousands)	(in thousands)	(in years)	(in thousands)	
\$0 - 25	361	2.4	\$ 18	\$ 9,268	361	2.4	\$ 18	\$ 9,268
\$25.01 - 30	1,633	5.0	\$ 26	28,095	1,324	4.7	\$ 26	22,741
\$30.01 - 40	898	7.1	\$ 39	3,995	439	7.1	\$ 39	1,957
\$40.01 - over	1,214	8.0	\$ 41	3,259	302	8.0	\$ 41	815
	4,106	6.1	\$ 33	\$ 44,617	2,426	5.2	\$ 29	\$ 34,781

The aggregate intrinsic value in the table above represents the total pre-tax intrinsic value, based on the company's closing stock price of \$43.57 at October 31, 2016, which would have been received by award holders had all award

holders exercised their awards that were in-the-money as of that date. The total number of in-the-money awards exercisable at October 31, 2016 was approximately 2.4 million.

Table of Contents

The following table summarizes the aggregate intrinsic value of options exercised and the fair value of options granted in 2016, 2015 and 2014:

	Aggregate Intrinsic Value  (in thousands)	Weighted Average Exercise Price	Per Share Value Using Black-Scholes Model
Options exercised in fiscal 2014	\$ 98,075	\$ 30	
Black-Scholes per share value of options granted during fiscal 2014			\$ 19
Options exercised in fiscal 2015	\$ 33,258	\$ 24	
Black-Scholes per share value of options granted during fiscal 2015			\$ 11
Options exercised in fiscal 2016	\$ 26,913	\$ 25	
Black-Scholes per share value of options granted during fiscal 2016			\$ —

As of October 31, 2016, the unrecognized share-based compensation costs for outstanding stock option awards, net of expected forfeitures, was approximately \$2 million which is expected to be amortized over a weighted average period of 1.7 years. The amount of cash received from the exercise of share-based awards granted was \$62 million in 2016, \$58 million in 2015 and \$188 million in 2014. See Note 5, "Income Taxes" for the tax impact on share-based award exercises.

## Non-vested Awards

The following table summarizes non-vested award activity in 2016 primarily for our LTTP and restricted stock unit awards.

	Shares  (in thousands)	Weighted Average Grant Price
Non-vested at October 31, 2015	2,417	\$ 36
Granted	1,732	\$ 40
Vested	(607 )	\$ 35
Forfeited	(94 )	\$ 39
Change in LTTP shares in the year due to not meeting performance conditions	(386 )	\$ 28
Non-vested at October 31, 2016	3,062	\$ 40

As of October 31, 2016, the unrecognized share-based compensation costs for non-vested restricted stock awards, net of expected forfeitures, was approximately \$45 million which is expected to be amortized over a weighted average period of 2.5 years. The total fair value of restricted stock awards vested was \$21 million for 2016, \$31 million for 2015 and \$54 million for 2014.

In the third quarter of fiscal year 2016, the company elected to early adopt new guidance that changes the accounting for certain aspects of share-based payments to employees. For additional details related to the new guidance see Note 2, "New Accounting Pronouncements."

Table of Contents

## 5. INCOME TAXES

The domestic and foreign components of income from continuing operations before taxes are:

	Years Ended October 31, 2016 2015 2014 (in millions)		
U.S. operations	\$27	\$77	\$(72)
Non-U.S. operations	517	403	301
Total income from continuing operations before taxes	\$544	\$480	\$229

The provision (benefit) for income taxes is comprised of:

	Years Ended October 31, 2016 2015 2014 (in millions)		
U.S. federal taxes:			
Current	\$(1)	\$(91)	\$17
Deferred	19	97	(80)
Non-U.S. taxes:			
Current	77	62	176
Deferred	(14)	(27)	(111)
State taxes, net of federal benefit:			
Current	3	1	—
Deferred	(2)	—	(5)
Total provision (benefit)	\$82	\$42	\$(3)

The income tax provision (benefit) does not reflect potential future tax savings resulting from excess deductions associated with our various share-based award plans.

The significant components of deferred tax assets and deferred tax liabilities included on the consolidated balance sheet are:

	October 31, 2016 2015 Deferred Deferred Deferred Deferred Tax Tax Tax Tax Assets Liabilities Assets Liabilities (in millions)			
Inventory	\$13	\$ —	\$13	\$ —
Intangibles	—	92	—	95

Share-based compensation	41	—	39	—
Deferred revenue	42	—	41	—
Other	12	—	4	—
Subtotal	595	145	417	128
Tax valuation allowance	(129 )	—	(131 )	—
Total deferred tax assets or deferred tax liabilities	\$466	\$ 145	\$286	\$ 128

The increase in 2016 as compared to 2015 for the deferred tax asset relating to pension benefits is due mainly to the tax effect of changes in pension plans recognized in other comprehensive income (loss). The increase in net operating losses and

Table of Contents

tax credits is due mainly to the early adoption of Accounting Standard Update (“ASU”) 2016-09 “Improvements to Employees Share-Based Payment Accounting”.

Agilent records U.S. income taxes on the undistributed earnings of foreign subsidiaries unless the subsidiaries' earnings are considered indefinitely reinvested outside the U.S. As of October 31, 2016 the Company recognized a \$53 million deferred tax liability for the overall residual tax expected to be imposed upon the repatriation of unremitted foreign earnings that are not considered permanently reinvested. As of October 31, 2016, the cumulative amount of undistributed earnings considered indefinitely reinvested was \$5.5 billion. No deferred tax liability has been recognized on the basis difference created by such earnings since it is our intention to utilize those earnings in the company’s foreign operations. Because of the availability of U.S. foreign tax credits, the determination of the unrecognized deferred tax liability on these earnings is not practicable.

In November 2015, the FASB issued guidance to simplify accounting for deferred taxes. Beginning on November 1, 2017 and including the interim periods following that date, we will be required to present all deferred tax balances as non-current. Prior GAAP guidance required us to record deferred tax balances as either current or non-current in accordance with the classification of the underlying attributes. Early adoption of this guidance was permitted and could be applied either prospectively or retrospectively to all periods presented. We adopted this guidance at the end of the period ended April 30, 2016 prospectively. Therefore, the October 31, 2016 consolidated balance sheet reflects the new disclosure requirements but prior periods have not been adjusted.

The breakdown between current and long-term deferred tax assets and deferred tax liabilities was as follows for the years 2016 and 2015:

	October 31,	
	2016	2015
	(in millions)	
Current deferred tax assets (included within other current assets)	\$—	\$84
Long-term deferred tax assets (included within other assets)	386	180
Current deferred tax liabilities (included within other accrued liabilities)	—	(10 )
Long-term deferred tax liabilities (included within other long-term liabilities)	(65 )	(96 )
Total	\$321	\$158

Valuation allowances require an assessment of both positive and negative evidence when determining whether it is more likely than not that deferred tax assets are recoverable. Such assessment is required on a jurisdiction by jurisdiction basis. As of October 31, 2016, we continued to maintain a valuation allowance of \$129 million until sufficient positive evidence exists to support reversal. The valuation allowance is mainly related to deferred tax assets for California R&D credits, net operating losses in the Netherlands and capital losses in the U.S. and Australia.

At October 31, 2016, we had federal net operating loss carryforwards of approximately \$19 million and \$142 million tax credit carryforwards. The federal net operating losses expire in years beginning 2020 through 2034. At October 31, 2016, we had state net operating loss carryforwards of approximately \$200 million which expire in years beginning 2017 through 2033, if not utilized. In addition, we had net state tax credit carryforwards of \$36 million that do not expire. All of the federal and some of the state net operating loss carryforwards are subject to change of ownership limitations provided by the Internal Revenue Code and similar state provisions. At October 31, 2016, we also had foreign net operating loss carryforwards of approximately \$296 million. Of this foreign loss, \$148 million will expire in years beginning 2017 through 2026, if not utilized. The remaining \$148 million has an indefinite life. Some of the foreign losses are subject to annual loss limitation rules. These annual loss limitations in the U.S. and foreign jurisdictions may result in the expiration or reduced utilization of the net operating losses.

In March 2016, the Financial Accounting Standards Board (“FASB”) issued amendments that change the accounting for certain aspects of share-based payments to employees. The new guidance requires excess tax benefits and tax deficiencies to be recorded in the income statement when the awards vest or are settled. Under the new guidance the benefit will be recorded when it arises with a cumulative effect adjustment to opening retained earnings for previously unrecognized benefits. The new guidance is effective for us beginning November 1, 2017, with early adoption permitted. We elected to early adopt the new guidance in the third quarter of fiscal year 2016, on a retrospective basis, which required us to reflect any adjustments as of November 1, 2015, the beginning of the annual period that includes the interim period of adoption. The impact of adoption on previously reported quarterly results was the recognition of tax shortfalls of \$2 million in our provision for income taxes for the first quarter of fiscal year 2016. Additional amendments to the accounting for income taxes on previously reported quarterly results was the recognition of the windfall tax benefits as a cumulative effect adjustment to opening retained earnings of \$196 million together with an increase in deferred tax assets included in other assets of \$98 million, an increase in additional paid in

Table of Contents

capital of \$4 million, a reduction in other accrued liabilities of \$1 million and a decrease of \$99 million in other long term liabilities. See Note 2 "New Accounting Pronouncements" for additional information.

The differences between the U.S. federal statutory income tax rate and our effective tax rate are:

	Years Ended October		
	31,		
	2016	2015	2014
	(in millions)		
Profit before tax times statutory rate	\$190	\$167	\$80
State income taxes, net of federal benefit	2	(8 )	(7 )
Non-U.S. income taxed at different rates	(68 )	(72 )	(39 )
Change in unrecognized U.S. tax benefits	(27 )	(116 )	(111)
Repatriation of foreign earnings	—	68	75
Valuation allowances	18	(2 )	2
Adjustments to earnings of foreign subsidiaries	(11 )	—	—
Adjustment to income taxes payable	—	—	(6 )
Other, net	(22 )	5	3
Provision (benefit) for income taxes	\$82	\$42	\$(3 )
Effective tax rate	15.1 %	8.7 %	(1.3)%

Agilent enjoys tax holidays in several different jurisdictions, most significantly in Singapore. The tax holidays provide lower rates of taxation on certain classes of income and require various thresholds of investments and employment or specific types of income in those jurisdictions. The tax holidays are due for renewal between 2018 and 2023. As a result of the incentives, the impact of the tax holidays decreased income taxes by \$86 million, \$65 million, and \$27 million in 2016, 2015, and 2014, respectively. The benefit of the tax holidays on net income per share (diluted) was approximately \$0.26, \$0.19, and \$0.08 in 2016, 2015 and 2014, respectively.

For 2016, the company's effective tax rate from continuing operations was 15.1%. The income tax expense from continuing operations was \$82 million. The income tax provision from continuing operations for the year ended October 31, 2016 included net discrete tax expense of \$17 million. The net discrete tax expense for the year ended October 31, 2016 included \$5 million of tax benefit for the extension of the U.S. research and development tax credit attributable to the company's prior fiscal year, \$6 million of tax expense related to the curtailment gain recognized with respect to the U.S. retirement plan and Supplemental Benefits Plan, \$18 million of tax expense related to the establishment of a valuation allowance on an equity method impairment that would generate a capital loss when realized, and a net \$2 million of other discrete tax benefit. Included in the net \$2 million discrete tax benefit are \$9 million of out-of-period correcting tax expense entries recorded in the second and fourth quarters of fiscal year 2016 associated with German return-to-provision corrections. These are offset by an \$11 million out-of-period correcting tax benefit associated with an adjustment to the deferred tax liability for unremitted foreign earnings. The out-of-period corrections were determined to be immaterial to the previously issued and current period financial statements.

For 2015, the company's effective tax rate from continuing operations was 8.7 percent. The income tax expense from continuing operations was \$42 million. The income tax expense from continuing operations for the year ended October 31, 2015 included net discrete tax benefits of \$55 million primarily due to the settlement of an Internal Revenue Service ("IRS") audit in the U.S. and the recognition of tax expense related to the repatriation of dividends.

For 2014, the company's effective tax rate from continuing operations was (1.3) percent. The income tax benefit from continuing operations was \$3 million. The income tax benefit for the year ended October 31, 2014 included a net

discrete benefit of \$33 million Internal Revenue Service ("IRS") audit in the U.S. and the recognition of tax expense related to the repatriation of dividends.

Table of Contents

The breakdown between current and long-term income tax assets and liabilities, excluding deferred tax assets and liabilities, was as follows for the years 2016 and 2015:

	October 31,	
	2016	2015
	(in millions)	
Current income tax assets (included within other current assets)	\$83	\$104
Long-term income tax assets (included within other assets)	19	20
Current income tax liabilities (included within other accrued liabilities)	(49 )	(62 )
Long-term income tax liabilities (included within other long-term liabilities)	(190 )	(227 )
Total	\$(137)	\$(165)

The calculation of our tax liabilities involves dealing with uncertainties in the application of complex tax law and regulations in a multitude of jurisdictions. Although the guidance on the accounting for uncertainty in income taxes prescribes the use of a recognition and measurement model, the determination of whether an uncertain tax position has met those thresholds will continue to require significant judgment by management. In accordance with the guidance on the accounting for uncertainty in income taxes, for all U.S. and other tax jurisdictions, we recognize potential liabilities for anticipated tax audit issues based on our estimate of whether, and the extent to which, additional taxes and interest will be due. The ultimate resolution of tax uncertainties may differ from what is currently estimated, which could result in a material impact on income tax expense. If our estimate of income tax liabilities proves to be less than the ultimate assessment, a further charge to expense would be required. If events occur and the payment of these amounts ultimately proves to be unnecessary, the reversal of the liabilities would result in tax benefits being recognized in the period when we determine the liabilities are no longer necessary.

The aggregate changes in the balances of our unrecognized tax benefits including all federal, state and foreign tax jurisdictions are as follows:

	2016	2015	2014
	(in millions)		
Balance, beginning of year	\$289	\$417	\$512
Additions for tax positions related to the current year	31	33	45
Additions for tax positions from prior years	1	3	11
Reductions for tax positions from prior years	(27 )	(156 )	(141 )
Settlements with taxing authorities	—	(4 )	(2 )
Statute of limitations expirations	(1 )	(4 )	(8 )
Balance, end of year	\$293	\$289	\$417

As of October 31, 2016, we had \$293 million of unrecognized tax benefits of which \$271 million, if recognized, would affect our effective tax rate.

We recognized a tax expense of \$2 million, a tax benefit of \$2 million and a tax benefit \$10 million of interest and penalties related to unrecognized tax benefits in 2016, 2015 and 2014, respectively. Interest and penalties accrued as of October 31, 2016 and 2015 were \$25 million and \$24 million, respectively.

On November 1, 2014, Agilent transferred deferred tax assets of \$237 million, deferred tax liabilities of \$37 million, current income tax payable of \$40 million, and other long-term liabilities related to uncertain tax positions totaling \$8 million to Keysight as part of its separation from Agilent. A current prepaid income tax asset of \$19 million and long-term prepaid income tax asset of \$3 million related to sales of intercompany assets was also transferred to Keysight upon separation from Agilent.

In the U.S., tax years remain open back to the year 2012 for federal income tax purposes and the year 2000 for significant states. On September 22, 2015, we reached an agreement with the Internal Revenue Service ("IRS") for the tax years 2008 through 2011. During the first quarter of 2016, we made a payment of approximately \$9 million of tax plus interest as part of closing the exam. This amount was partially offset by a prepaid tax account of approximately \$3 million that the IRS allowed as an offset to the \$12 million in incremental taxes. The settlement resulted in the recognition, within the continuing operations, of previously unrecognized tax benefits of \$119 million, offset by a tax liability on foreign distributions of approximately \$99 million principally related to the repatriation of foreign earnings.

Table of Contents

On January 29, 2014 we reached an agreement with the IRS for the tax years 2006 through 2007. The settlement resulted in the recognition, within the continuing operations, of previously unrecognized tax benefits of \$111 million, offset by a tax liability on foreign distributions of approximately \$75 million principally related to the repatriation of foreign earnings.

In other major jurisdictions where the company conducts business, the tax years generally remain open back to the year 2001. With these jurisdictions and the U.S., it is reasonably possible that there could be significant changes to our unrecognized tax benefits in the next twelve months due to either the expiration of a statute of limitation or a tax audit settlement which will be partially offset by an anticipated tax liability related to unremitted foreign earnings, where applicable. Given the number of years and numerous matters that remain subject to examination in various tax jurisdictions, management is unable to estimate the range of possible changes to the balance of our unrecognized tax benefits.

On July 27, 2015, the U.S. Tax Court issued an opinion in *Altera Corp. v. Commissioner* related to the treatment of stock-based compensation expense in an intercompany cost-sharing arrangement. A final decision was entered by the U.S. Tax Court on December 1, 2015. At this time, the U.S. Department of the Treasury has not withdrawn the requirement from its regulations to include stock-based compensation. The IRS notified the U.S. Court of Appeals for the Ninth Circuit on February 19, 2016 of its intent to appeal the Tax Court's decision in the case. We concluded that no adjustment to our consolidated financial statements is appropriate at this time due to the uncertainties with respect to the ultimate resolution of this case.

## 6. NET INCOME PER SHARE

The following is a reconciliation of the numerators and denominators of the basic and diluted net income per share computations for the periods presented below.

	Years Ended		
	October 31,		
	2016	2015	2014
	(in millions)		
Numerator:			
Income from continuing operations	\$462	\$438	\$232
Income (loss) from discontinued operations	\$—	\$(37)	\$317
Net income	462	401	549
Denominators:			
Basic weighted average shares	326	333	333
Potential common shares — stock options and other employee stock plans <sup>3</sup>	2	5	
Diluted weighted average shares	329	335	338

In connection with the separation of Keysight on November 1, 2014 and in accordance with the Employee Matters Agreement we made certain adjustments to the exercise price and number of our share-based compensation awards. These adjustments to our share-based awards did not have a material impact on our dilutive weighted average shares.

The dilutive effect of share-based awards is reflected in diluted net income per share by application of the treasury stock method, which includes consideration of unamortized share-based compensation expense and the dilutive effect of in-the-money options and non-vested restricted stock units. Under the treasury stock method, the amount the employee must pay for exercising stock options and unamortized share-based compensation expense collectively are assumed proceeds to be used to repurchase hypothetical shares. An increase in the fair market value of the company's common stock can result in a greater dilutive effect from potentially dilutive awards. The total number of share-based awards issued in 2016, 2015 and 2014 were 3 million, 3 million and 6 million, respectively.

We exclude stock options with exercise prices greater than the average market price of our common stock from the calculation of diluted earnings per share because their effect would be anti-dilutive. For 2016, 2015 and 2014, options to purchase 842,200, 1.2 million and 1,500 shares respectively were excluded from the calculation of diluted earnings per share. In addition, we also exclude from the calculation of diluted earnings per share, stock options, ESPP, LTTP and restricted stock awards whose combined exercise price and unamortized fair value collectively were greater than the average market price of our common stock because their effect would also be anti-dilutive. For the year ended 2016, 2015 and 2014, options to purchase 229,600, 368,900 and 383,200 shares respectively were excluded from the calculation of diluted earnings per share.

Table of Contents

## 7. INVENTORY

	October 31,	
	2016	2015
	(in millions)	
Finished goods	\$339	\$362
Purchased parts and fabricated assemblies	194	179
Inventory	\$533	\$541

Inventory-related excess and obsolescence charges, included in continuing operations, of \$20 million were recorded in total cost of products in 2016, \$30 million in 2015 and \$46 million in 2014, respectively. We record excess and obsolete inventory charges for both inventory on our site as well as inventory at our contract manufacturers and suppliers where we have non-cancellable purchase commitments.

## 8. PROPERTY, PLANT AND EQUIPMENT, NET

	October 31,	
	2016	2015
	(in millions)	
Land	\$53	\$53
Buildings and leasehold improvements	757	705
Machinery and equipment	420	405
Software	176	171
Total property, plant and equipment	1,406	1,334
Accumulated depreciation and amortization	(767 )	(730 )
Property, plant and equipment, net	\$639	\$604

There were no asset impairments in 2016 and 2015. Asset impairments other than related to our exit of the NMR business were zero in 2014. Asset impairments in connection with the exit of the NMR business were \$7 million in 2014. Depreciation expenses were \$95 million in 2016, \$98 million in 2015 and \$120 million in 2014.

## 9. GOODWILL AND OTHER INTANGIBLE ASSETS

The goodwill balances at October 31, 2016, 2015 and 2014 and the movements in 2016 and 2015 for each of our reportable segments are shown in the table below:

	Life Sciences Diagnostics and Applied Genomics Markets			Agilent CrossLab	Total
	(in millions)				
Goodwill as of October 31, 2014	\$668	\$ 1,345	\$ 494		\$2,507
Foreign currency translation impact	(18 )	(166 )	(12 )		(196 )
Goodwill arising from acquisitions	—	55	—		55
Goodwill as of October 31, 2015	\$650	\$ 1,234	\$ 482		\$2,366
Foreign currency translation impact	3	(11 )	3		(5 )
Goodwill arising from acquisitions	137	—	19		156

Goodwill as of October 31, 2016    \$790    \$ 1,223    \$ 504    \$2,517

As of September 30, 2016, we assessed goodwill impairment for our reporting units and no impairment of goodwill was indicated.

---

Table of Contents

The component parts of other intangible assets at October 31, 2016 and 2015 are shown in the table below:

	Other Intangible Assets		
	Gross Carrying Amount	Accumulated Amortization and Impairments	Net Book Value
	(in millions)		
As of October 31, 2015:			
Purchased technology	\$746	\$ 476	\$ 270
Trademark/Tradename	141	50	91
Customer relationships	230	168	62
Total amortizable intangible assets	\$1,117	\$ 694	\$ 423
In-Process R&D	22	—	22
Total	\$1,139	\$ 694	\$ 445
As of October 31, 2016:			
Purchased technology	\$823	\$ 572	\$ 251
Backlog	1	1	—
Trademark/Tradename	149	61	88
Customer relationships	263	211	52
Total amortizable intangible assets	\$1,236	\$ 845	\$ 391
In-Process R&D	17	—	17
Total	\$1,253	\$ 845	\$ 408

In 2016, we acquired Seahorse Bioscience, a leader in providing instruments and assay kits for measuring cell metabolism and bioenergetics, for \$242 million and iLab Solutions LLC ("iLab"), a cloud-based solutions provider for core laboratory management for \$26 million. We have not included the pro forma impact of these acquisitions since they are not material to our current or prior period results. In 2016, we recorded additions to goodwill of \$156 million and to other intangible assets of \$121 million related to these acquisitions. During the year other intangible assets decreased \$2 million, due to the impact of foreign exchange translation.

In 2015, we recorded additions to goodwill of \$55 million and to intangible assets of \$13 million related to a single acquisition of the company, Cartegenia. During the year other intangible assets decreased \$58 million, due to the impact of foreign exchange translation. During 2015, we also removed the gross carrying amount of \$246 million and the related accumulated amortization of fully amortized intangible assets which were no longer being used.

In addition, we recorded \$4 million, \$3 million and \$4 million of impairments of other intangibles related to the cancellation of in-process research and development projects during 2016, 2015 and 2014, respectively.

Amortization of intangible assets was \$152 million in 2016, \$156 million in 2015, and \$189 million in 2014.

Future amortization expense related to existing finite-lived purchased intangible assets for the next five fiscal years and thereafter is estimated below:

Estimated future amortization expense:

(in millions)

2017	\$ 112
2018	\$ 82
2019	\$ 58
2020	\$ 47
2021	\$ 35

Thereafter

\$57

Table of Contents

## 10. INVESTMENTS

The following table summarizes the company's equity investments as of October 31, 2016 and 2015 (net book value):

	October 31,	
	2016	2015
	(in millions)	
Long-Term		
Cost method investments	\$ 104	\$ 23
Trading securities	31	35
Equity method investments	—	28
Total	\$ 135	\$ 86

Cost method investments consist of non-marketable equity securities and a fund and are accounted for at historical cost. Approximately \$80 million relates to our variable interest entity investment, see Note 1, "Overview and Summary of Significant Accounting Policies". Trading securities are reported at fair value, with gains or losses resulting from changes in fair value recognized currently in earnings. Equity method investments are reported at the amount of the company's initial investment and adjusted each period for the company's share of the investee's income or loss and dividend paid.

All of our investments, excluding trading securities, are subject to periodic impairment review. The impairment analysis requires significant judgment to identify events or circumstances that would likely have significant adverse effect on the future value of the investment. We consider various factors in determining whether an impairment is other-than-temporary, including the severity and duration of the impairment, forecasted recovery, the financial condition and near-term prospects of the investee, and our ability and intent to hold the investment for a period of time sufficient to allow for any anticipated recovery in market value. During the year ended October 31, 2016, we have identified certain events and circumstances that indicates the decline in value of an equity method investment is other-than-temporary. As a result, we have written down the investment to its fair value of zero, resulting in an impairment charge of approximately \$18 million.

Amounts included in other income (expense), net for the appropriate share of loss on equity method investments and other than temporary impairments were as follows:

	Years Ended		
	October 31,	2015	2014
	(in millions)		
Equity method investments - share of losses	\$(10)	\$(9)	\$(7)
Equity method investments - other than temporary impairments	(18 )	—	—
Total	\$(28)	\$(9)	\$(7)

Net unrealized gains on our trading securities portfolio were \$1 million in 2016, \$2 million in 2015 and \$2 million in 2014.

## 11. FAIR VALUE MEASUREMENTS

The authoritative guidance defines fair value as the price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When determining the fair value measurements for assets and liabilities required or permitted to be recorded at fair value, we consider the

principal or most advantageous market and assumptions that market participants would use when pricing the asset or liability.

#### Fair Value Hierarchy

The guidance establishes a fair value hierarchy that prioritizes the use of inputs used in valuation techniques into three levels. A financial instrument's categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement. There are three levels of inputs that may be used to measure fair value:

Level 1 — applies to assets or liabilities for which there are quoted prices in active markets for identical assets or liabilities.

Table of Contents

Level 2 — applies to assets or liabilities for which there are inputs other than quoted prices included within level 1 that are observable, either directly or indirectly, for the asset or liability such as: quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in less active markets; or other inputs that can be derived principally from, or corroborated by, observable market data.

Level 3 — applies to assets or liabilities for which there are unobservable inputs to the valuation methodology that are significant to the measurement of the fair value of the assets or liabilities.

## Financial Assets and Liabilities Measured at Fair Value on a Recurring Basis

Financial assets and liabilities measured at fair value on a recurring basis as of October 31, 2016 were as follows:

	Fair Value Measurement at October 31, 2016 Using			
	Quoted Prices in Active Markets for Identical Assets (Level 1)		Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
	October 2016	October 31, 2016		
	(in millions)			
Assets:				
Short-term				
Cash equivalents (money market funds)	\$ 1,482	\$ 1,482	\$ —	\$ —
Derivative instruments (foreign exchange contracts)	9	—	9	—
Long-term				
Trading securities	31	31	—	—
Total assets measured at fair value	\$ 1,522	\$ 1,513	\$ 9	\$ —
Liabilities:				
Short-term				
Derivative instruments (foreign exchange contracts)	\$ 8	\$ —	\$ 8	\$ —
Long-term				
Deferred compensation liability	31	—	31	—
Total liabilities measured at fair value	\$ 39	\$ —	\$ 39	\$ —

Table of Contents

Financial assets and liabilities measured at fair value on a recurring basis as of October 31, 2015 were as follows:

	Fair Value Measurement at October 31, 2015 Using			
	Quoted Prices in Active Markets for Identical Assets (Level 1)		Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
	October 31, 2015			
	(in millions)			
Assets:				
Short-term				
Cash equivalents (money market funds)	\$1,411	\$1,411	\$ —	\$ —
Derivative instruments (foreign exchange contracts)	4	—	4	—
Long-term				
Trading securities	35	35	—	—
Total assets measured at fair value	\$1,450	\$1,446	\$ 4	\$ —
Liabilities:				
Short-term				
Derivative instruments (foreign exchange contracts)	\$5	\$—	\$ 5	\$ —
Long-term				
Deferred compensation liability	35	—	35	—
Total liabilities measured at fair value	\$40	\$—	\$ 40	\$ —

Our money market funds and trading securities are generally valued using quoted market prices and therefore are classified within level 1 of the fair value hierarchy. Our derivative financial instruments are classified within level 2, as there is not an active market for each hedge contract, but the inputs used to calculate the value of the instruments are tied to active markets. Our deferred compensation liability is classified as level 2 because although the values are not directly based on quoted market prices, the inputs used in the calculations are observable.

Trading securities and deferred compensation liability are reported at fair value, with gains or losses resulting from changes in fair value recognized currently in net income. Certain derivative instruments are reported at fair value, with unrealized gains and losses, net of tax, included in stockholders' equity. Realized gains and losses from the sale of these instruments are recorded in net income.

#### Assets and Liabilities Measured at Fair Value on a Non-Recurring Basis

##### Long-Lived Assets

For assets measured at fair value on a non-recurring basis, the following table summarizes the impairments included in net income for the years ended October 31, 2016, 2015 and 2014:

Years Ended  
October 31,

2016 2015 2014  
(in millions)

Long-lived assets held and used \$4 \$ 3 \$ 23

Long-lived assets held for sale \$—\$ — \$ —

Long-lived assets held and used with a carrying amount of \$4 million were written down to their fair value of zero, resulting in an impairment charge of \$4 million, which was included in net income for 2016. Long-lived assets held and used with a carrying amount of \$3 million were written down to their fair value of zero, resulting in an impairment charge of \$3 million, which was included in net income for 2015. Long-lived assets held and used with a carrying amount of \$23 million were written down to their fair value of zero, resulting in an impairment charge of \$23 million, which was included in net income for 2014.

## Table of Contents

The impairment charge in 2016 and 2015 of \$4 million and \$3 million, respectively, relates to IPR&D projects that were abandoned and written down to their fair value of zero. The impairment charge in 2014 includes \$19 million relating to the exit of a business and \$4 million related to various IPR&D projects that were abandoned and written down to their fair value of zero.

There were no impairments of long-lived assets held for sale in 2016, 2015 and 2014.

Fair values for the impaired long-lived assets were measured using level 2 inputs.

## 12. DERIVATIVES

We are exposed to foreign currency exchange rate fluctuations and interest rate changes in the normal course of our business. As part of risk management strategy, we use derivative instruments, primarily forward contracts, purchased options, and interest rate swaps, to hedge economic and/or accounting exposures resulting from changes in foreign currency exchange rates and interest rates.

### Fair Value Hedges

We are exposed to interest rate risk due to the mismatch between the interest expense we pay on our loans at fixed rates and the variable rates of interest we receive from cash, cash equivalents and other short-term investments. We have issued long-term debt in U.S. dollars at fixed interest rates based on the market conditions at the time of financing. The fair value of our fixed rate debt changes when the underlying market rates of interest change, and, in the past, we have used interest rate swaps to change our fixed interest rate payments to U.S. dollar LIBOR-based variable interest expense to match the floating interest income from our cash, cash equivalents and other short term investments. As of October 31, 2016, all interest rate swap contracts had either been terminated or had expired.

On November 25, 2008, we terminated two interest rate swap contracts associated with our 2017 senior notes that represented the notional amount of \$400 million. On October 20, 2014 we prepaid \$500 million out of \$600 million principal of our 2017 senior notes and fully amortized the associated proportionate deferred gain to other income (expense). The remaining gain to be amortized related to the \$100 million of 2017 senior notes at October 31, 2016 was \$1 million. On August 9, 2011, we terminated five interest rate swap contracts related to our 2020 senior notes that represented the notional amount of \$500 million. The gain to be amortized at October 31, 2016 was \$15 million. All deferred gains from terminated interest rate swaps are being amortized over the remaining life of the respective senior notes.

### Cash Flow Hedges

We enter into foreign exchange contracts to hedge our forecasted operational cash flow exposures resulting from changes in foreign currency exchange rates. These foreign exchange contracts, carried at fair value, have maturities between one and twelve months. These derivative instruments are designated and qualify as cash flow hedges under the criteria prescribed in the authoritative guidance. The changes in the fair value of the effective portion of the derivative instrument are recognized in accumulated other comprehensive income. Amounts associated with cash flow hedges are reclassified to cost of sales in the consolidated statement of operations when the forecasted transaction occurs. If it becomes probable that the forecasted transaction will not occur, the hedge relationship will be de-designated and amounts accumulated in other comprehensive income will be reclassified to other income (expense) in the current period. Changes in the fair value of the ineffective portion of derivative instruments are recognized in other income (expense) in the consolidated statement of operations in the current period. We record the premium paid (time value) of an option on the date of purchase as an asset. For options designated as cash flow hedges, changes in

the time value are excluded from the assessment of hedge effectiveness and are recognized in other income (expense) over the life of the option contract. Ineffectiveness in 2016, 2015 and 2014 was not significant. For the years ended October 31, 2016, 2015 and 2014 gains and losses recognized in earnings due to de-designation of cash flow hedge contracts were not significant.

In July 2012, Agilent executed treasury lock agreements for \$400 million in connection with future interest payments to be made on our 2022 senior notes issued on September 10, 2012. We designated the treasury lock as a cash flow hedge. The treasury lock contracts were terminated on September 10, 2012 and we recognized a deferred gain in accumulated other comprehensive income which is being amortized to interest expense over the life of the 2022 senior notes. The remaining gain to be amortized related to the treasury lock agreements at October 31, 2016 was \$2 million.

Table of Contents

In February 2016, Agilent executed three forward-starting pay fixed/receive variable interest rate swaps for the notional amount of \$300 million in connection with future interest payments to be made on our 2026 senior notes issued on September 15, 2016. These derivative instruments were designated and qualified as cash flow hedges under the criteria prescribed in the authoritative guidance. The swap arrangements were terminated on September 15, 2016 with a payment of \$10 million and we recognized this as a deferred loss in accumulated other comprehensive income which is being amortized to interest expense over the life of the 2026 senior notes. The remaining loss to be amortized related to the interest rate swap agreements at October 31, 2016 was \$9 million.

## Other Hedges

Additionally, we enter into foreign exchange contracts to hedge monetary assets and liabilities that are denominated in currencies other than the functional currency of our subsidiaries. These foreign exchange contracts are carried at fair value and do not qualify for hedge accounting treatment and are not designated as hedging instruments. Changes in value of the derivative are recognized in other income (expense) in the consolidated statement of operations, in the current period, along with the offsetting foreign currency gain or loss on the underlying assets or liabilities.

Our use of derivative instruments exposes us to credit risk to the extent that the counterparties may be unable to meet the terms of the agreement. We do, however, seek to mitigate such risks by limiting our counterparties to major financial institutions which are selected based on their credit ratings and other factors. We have established policies and procedures for mitigating credit risk that include establishing counterparty credit limits, monitoring credit exposures, and continually assessing the creditworthiness of counterparties.

A number of our derivative agreements contain threshold limits to the net liability position with counterparties and are dependent on our corporate credit rating determined by the major credit rating agencies. The counterparties to the derivative instruments may request collateralization, in accordance with derivative agreements, on derivative instruments in net liability positions.

The aggregate fair value of all derivative instruments with credit-risk-related contingent features that were in a net liability position as of October 31, 2016, was \$4 million. The credit-risk-related contingent features underlying these agreements had not been triggered as of October 31, 2016.

There were 46 foreign exchange forward contracts open as of October 31, 2016 and designated as cash flow hedges. There were 165 foreign exchange forward contracts open as of October 31, 2016 not designated as hedging instruments. The aggregated notional amounts by currency and designation as of October 31, 2016 were as follows:

Currency	Derivatives		
	Designated as Cash Flow Hedges	Not Designated as Hedging Instruments	Forward Contracts
	USD	USD	DKK
	Buy/(Sell)	Buy/(Sell)	Buy/(Sell)
	(in millions)		
Euro	\$(32 )	\$106	\$(57 )
British Pound	(22 )	(2 )	(3 )
Canadian Dollar	(17 )	—	(4 )
Australian Dollars	3	12	(4 )

Malaysian Ringgit	—	(3	)	—		
Japanese Yen	(46	)	15	(4	)	
American Dollar	—	—	(49	)		
Other	(5	)	(6	)	(14	)
	\$(119)	\$122	\$	(135	)	

Table of Contents

Derivative instruments are subject to master netting arrangements and are disclosed gross in the balance sheet in accordance with the authoritative guidance. The gross fair values and balance sheet location of derivative instruments held in the consolidated balance sheet as of October 31, 2016 and 2015 were as follows:

## Fair Values of Derivative Instruments

Asset Derivatives	Fair Value		Liability Derivatives	Fair Value	
	October 31, 2016	October 31, 2015		October 31, 2016	October 31, 2015
Balance Sheet Location			Balance Sheet Location		
(in millions)					
Derivatives designated as hedging instruments:					
Cash flow hedges					
Foreign exchange contracts					
Other current assets	\$ 5	\$ 2	Other accrued liabilities	\$ 3	\$ 1
	\$ 5	\$ 2		\$ 3	\$ 1
Derivatives not designated as hedging instruments:					
Foreign exchange contracts					
Other current assets	\$ 4	\$ 2	Other accrued liabilities	\$ 5	\$ 4
Total derivatives	\$ 9	\$ 4		\$ 8	\$ 5

The effect of derivative instruments for foreign exchange contracts designated as hedging instruments and not designated as hedging instruments in our consolidated statement of operations were as follows:

	2016	2015	2014
	(in millions)		
Derivatives designated as hedging instruments:			
Cash Flow Hedges			
Loss on interest rate swaps recognized in other comprehensive income (loss)	\$(9)	\$—	\$—
Gain (loss) recognized in accumulated other comprehensive income (loss)	\$(1)	\$11	\$13
Gain (loss) reclassified from accumulated other comprehensive income (loss) into cost of sales	\$(3)	\$18	\$(1)
Derivatives not designated as hedging instruments:			
Gain (loss) recognized in other income (expense), net within continuing operations	\$1	\$(21)	\$(20)

The estimated net amount of existing gain at October 31, 2016 that is expected to be reclassified from other comprehensive income to the cost of sales within the next twelve months is \$4 million.

## 13. RETIREMENT PLANS AND POST RETIREMENT PENSION PLANS

General. Substantially all of our employees are covered under various defined benefit and/or defined contribution retirement plans. Additionally, we sponsor post-retirement health care benefits for our eligible U.S. employees.

Agilent provides U.S. employees, who meet eligibility criteria under the Agilent Technologies, Inc. Retirement Plan (the "RP"), defined benefits which are based on an employee's base or target pay during the years of employment and on length of service. For eligible service through October 31, 1993, the benefit payable under the Agilent Retirement Plans is reduced by any amounts due to the eligible employee under the Agilent defined contribution Deferred Profit-Sharing Plan (the "DPSP"), which was closed to new participants as of November 1993. Effective November 1, 2014, Agilent's U.S. defined benefit retirement plan is closed to new entrants including new employees, new transfers to the U.S. payroll and rehires. As of April 30, 2016, benefits under the RP were frozen. See Plan Amendments below.

As of October 31, 2016 and 2015, the fair value of plan assets of the DPSP was \$157 million and \$169 million, respectively. Note that the projected benefit obligation for the DPSP equals the fair value of plan assets.

Table of Contents

In addition to the DPSP, in the U.S., Agilent maintains a Supplemental Benefits Retirement Plan ("SBRP"), supplemental unfunded non-qualified defined benefit plan to provide benefits that would be provided under the RP but for limitations imposed by the Internal Revenue Code. The RP and the SBRP comprise the "U.S. Plans" in the tables below.

Eligible employees outside the U.S. generally receive retirement benefits under various retirement plans based upon factors such as years of service and/or employee compensation levels. Eligibility is generally determined in accordance with local statutory requirements.

401(k) defined contribution plan. Eligible Agilent U.S. employees may participate in the Agilent Technologies, Inc. 401(k) Plan. During the six months ended April 30, 2016, we provided matching contributions to employees up to a maximum of 6 percent of an employee's annual eligible compensation. Effective May 1, 2016, we provide matching contributions to employees up to a maximum of 6 percent of an employee's annual eligible compensation and an additional transitional company contribution for certain eligible employees equal to 3 percent, 4 percent or 5 percent of an employee's annual eligible compensation due to the RP benefits being frozen. The maximum contribution to the 401(k) Plan is 50 percent of an employee's annual eligible compensation, subject to regulatory limitations.

Post-retirement medical benefit plans. In addition to receiving retirement benefits, Agilent U.S. employees who meet eligibility requirements as of their termination date may participate in the Agilent Technologies, Inc. Health Plan for Retirees. Eligible retirees who were less than age 50 as of January 1, 2005 and who retire after age 55 with 15 or more years of service are eligible for a fixed amount which can be utilized to pay for either sponsored plans and/or individual medicare plans. Effective January 1, 2012, employees who were at least age 50 as of January 1, 2005 and who retire after age 55 with 15 or more years of service are eligible for fixed dollar subsidies and stipends. Grandfathered retirees receive a fixed monthly subsidy toward pre-65 premium costs (subsidy capped at 2011 levels) and a fixed monthly stipend post-65. The subsidy amounts will not increase. In addition, any new employee hired on or after November 1, 2014, will not be eligible to participate in the retiree medical plans upon retiring. Current eligible employees will continue to participate in the retiree medical program in place as of November 1, 2014. Retirees will maintain the retiree medical benefits they are eligible for as of November 1, 2014. As of April 30, 2016, benefits under this plan were changed - see Plan Amendments below.

Plan Amendments. In 2016, we made changes to our U.S. Retirement Plan and Supplemental Benefits Retirement Plan ("U.S. Plans"). Effective April 30, 2016, benefit accruals under the U.S. Plans were frozen. Any pension benefit earned in the U.S. Plans through April 30, 2016 remained fully vested, and there were no additional benefit accruals after April 30, 2016. In addition, active employees who have not met the eligibility requirement for the Retiree Medical Account (RMA) under the U.S. Post Retirement Benefit Plan - 55 years old with at least 15 years of Agilent service - as of April 30, 2016 - will only be eligible for 50 percent of the current RMA reimbursement amount upon retirement.

Due to these plan amendments, we recorded a curtailment gain of \$15 million in the U.S. Plans during the year ended October 31, 2016. In addition, we recognized a settlement gain of \$1 million related to the U.S. Supplemental Benefits Retirement Plan during the year ended October 31, 2016.

Table of Contents

Components of net periodic cost. The company uses alternate methods of amortization as allowed by the authoritative guidance which amortizes the actuarial gains and losses on a consistent basis for the years presented. For U.S. Plans, gains and losses are amortized over the average future lifetime of participants using the corridor method. For most Non-U.S. Plans and U.S. Post-Retirement Benefit Plans, gains and losses are amortized using a separate layer for each year's gains and losses. For the years ended October 31, 2016, 2015 and 2014, components of net periodic benefit cost and other amounts recognized in other comprehensive income were comprised of:

	Pensions						U.S. Post-Retirement Benefit Plans		
	U.S. Plans			Non-U.S. Plans			2016	2015	2014

In Japan, Agilent has employees' pension fund plans, which are defined benefit pension plans established under the Japanese Welfare Pension Insurance Law (JWPIL). The plans are composed of (a) a substitutional portion based on the pay-related part of the old-age pension benefits prescribed by JWPIL (similar to social security benefits in the United States) and (b) a corporate portion based on a contributory defined benefit pension arrangement established at the discretion of the company. As required by law, Agilent will disburse the substitutional portion of Agilent's plans to the government. In December 2016, Agilent has received approval from the Japanese government to disburse the substitutional portion of Agilent's plans, equal to \$27 million. We anticipate that Agilent will recognize a settlement gain in the first quarter of 2017 on the payment of the substitutional portion.

Table of Contents

In connection with the separation of Keysight Technologies on November 1, 2014, Agilent transferred certain liabilities and assets of the U.S. and Non-U.S. defined benefit pension plans, and U.S. Post-Retirement Benefit Plans to similar plans created for Keysight Technologies employees. Total transfers are as follows:

	U.S. Defined Benefit Plans (in millions)	Non-U.S. Defined Benefit Plans (in millions)	U.S. Post-Retirement Benefit Plans
Fair value of plan assets transferred to Keysight	\$490	\$ 1,327	\$ 187
Benefit obligation transferred to Keysight	\$514	\$ 1,429	\$ 206

The amounts in accumulated other comprehensive income expected to be recognized by Agilent as components of net expense during 2017 are as follows:

	U.S. Defined Benefit Plans (in millions)	Non-U.S. Defined Benefit Plans (in millions)	U.S. Post-Retirement Benefit Plans
Amortization of net prior service cost (benefit)	\$—	\$ —	\$ (9 )
Amortization of actuarial net loss (gain)	\$3	\$ 35	\$ 11

Investment policies and strategies as of October 31, 2016 and 2015. In the U.S., target asset allocations for our retirement and post-retirement benefit plans are approximately 80 percent to equities and approximately 20 percent to fixed income investments. Our DPSP target asset allocation is approximately 60 percent to equities and approximately 40 percent to fixed income investments. Approximately, 5 percent of our U.S. equity portfolio consists of limited partnerships. The general investment objective for all our plan assets is to obtain the optimum rate of investment return on the total investment portfolio consistent with the assumption of a reasonable level of risk. Specific investment objectives for the plans' portfolios are to: maintain and enhance the purchasing power of the plans' assets; achieve investment returns consistent with the level of risk being taken; and earn performance rates of return in accordance with the benchmarks adopted for each asset class. Outside the U.S., our target asset allocation is from 37 to 60 percent to equities, from 40 to 60 percent to fixed income investments, and from zero to 6 percent to real estate investments and from zero to 7 percent to cash, depending on the plan. All plans' assets are broadly diversified. Due to fluctuations in equity markets, our actual allocations of plan assets at October 31, 2016 and 2015 differ from the target allocation. Our policy is to bring the actual allocation in line with the target allocation.

Equity securities include exchange-traded common stock and preferred stock of companies from broadly diversified industries. Fixed income securities include a global portfolio of corporate bonds of companies from diversified industries, government securities, mortgage-backed securities, asset-backed securities, derivative instruments and other. Other investments include a group trust consisting primarily of private equity partnerships. Portions of the cash and cash equivalent, equity, and fixed income investments are held in commingled funds.

**Fair Value.** The measurement of the fair value of pension and post-retirement plan assets uses the valuation methodologies and the inputs as described in Note 11, "Fair Value Measurements".

**Cash and Cash Equivalents** - Cash and cash equivalents consist of short-term investment funds. The funds also invest in short-term domestic fixed income securities and other securities with debt-like characteristics emphasizing short-term maturities and quality. Cash and cash equivalents are classified as Level 1 investments except when the

cash and cash equivalents are held in commingled funds, which have a daily net value derived from quoted prices for the underlying securities in active markets; these are classified as Level 2 investments.

Equity - Some equity securities consisting of common and preferred stock are held in commingled funds, which have daily net asset values derived from quoted prices for the underlying securities in active markets; these are classified as Level 2 investments. Commingled funds which have quoted prices in active markets are classified as Level 1 investments.

Fixed Income - Some of the fixed income securities are held in commingled funds, which have daily net asset values derived from the underlying securities; these are classified as Level 2 investments. Commingled funds which have quoted prices in active markets are classified as Level 1 investments.

Table of Contents

Other Investments - Other investments includes property based pooled vehicles which invest in real estate. Market net asset values are regularly published in the financial press or on corporate websites and so these investments are classified as Level 2. Other investments also includes partnership investments where, due to their private nature, pricing inputs are not readily observable. Asset valuations are developed by the general partners that manage the partnerships. These valuations are based on proprietary appraisals, application of public market multiples to private company cash flows, utilization of market transactions that provide valuation information for comparable companies and other methods. Holdings of limited partnerships are classified as Level 3.

The following tables present the fair value of U.S. Defined Benefit Plans assets classified under the appropriate level of the fair value hierarchy as of October 31, 2016 and 2015.

	Fair Value Measurement at October 31, 2016 Using Quoted Prices in Significant Active Other Markets for Inputs Identifiable Assets (Level 1)				Significant Unobservable Inputs (Level 3)
	(in millions)

Table of Contents

The table below presents the combined projected benefit obligation ("PBO"), accumulated benefit obligation ("ABO") and fair value of plan assets, grouping plans using comparisons of the PBO and ABO relative to the plan assets for continuing operations as of October 31, 2016 or 2015.

	2016		2015	
	Benefit Obligation	Fair Value of Plan Assets	Benefit Obligation	Fair Value of Plan Assets
	PBO	PBO	PBO	PBO
	(in millions)			
U.S. defined benefit plans where PBO exceeds the fair value of plan assets	\$434	\$ 341	\$415	\$ 347
U.S. defined benefit plans where fair value of plan assets exceeds PBO	—	—	—	—
Total	\$434	\$ 341	\$415	\$ 347
Non-U.S. defined benefit plans where PBO exceeds or is equal to the fair value of plan assets	\$970	\$ 741	\$771	\$ 623
Non-U.S. defined benefit plans where fair value of plan assets exceeds PBO	32	33	129	155
Total	\$1,002	\$ 774	\$900	\$ 778
	ABO		ABO	
U.S. defined benefit plans where ABO exceeds the fair value of plan assets	\$434	\$ 341	\$389	\$ 347
U.S. defined benefit plans where the fair value of plan assets exceeds ABO	—	—	—	—
Total	\$434	\$ 341	\$389	\$ 347
Non-U.S. defined benefit plans where ABO exceeds or is equal to the fair value of plan assets	\$737	\$ 542	\$732	\$ 623
Non-U.S. defined benefit plans where fair value of plan assets exceeds ABO	226	232	127	155
Total	\$963	\$ 774	\$859	\$ 778

Contributions and estimated future benefit payments. During fiscal year 2017, we expect to contribute \$26 million to the U.S. defined benefit plans, \$20 million to plans outside the U.S., and zero to the Post-Retirement Medical Plans. The following table presents expected future benefit payments for the next 10 years:

	U.S. Defined Benefit Plans (in millions)	Non-U.S. Defined Benefit Plans	U.S. Post-Retirement Benefit Plans
2017	\$27	\$ 48	\$ 8
2018	\$25	\$ 22	\$ 8
2019	\$26	\$ 24	\$ 8
2020	\$28	\$ 25	\$ 7
2021	\$27	\$ 27	\$ 7
2022 - 2026	\$137	\$ 168	\$ 35

Assumptions. The assumptions used to determine the benefit obligations and expense for our defined benefit and post-retirement benefit plans are presented in the tables below. The expected long-term return on assets below represents an estimate of long-term returns on investment portfolios consisting of a mixture of equities, fixed income

and alternative investments in proportion to the asset allocations of each of our plans. We consider long-term rates of return, which are weighted based on the asset classes (both historical and forecasted) in which we expect our pension and post-retirement funds to be invested. Discount rates reflect the current rate at which pension and post-retirement obligations could be settled based on the measurement dates of the plans - October 31. The U.S. discount rates at October 31, 2016 and 2015, were determined based on the results of matching expected plan benefit payments with cash flows from a hypothetically constructed bond portfolio. The non-U.S. rates were generally

Table of Contents

based on published rates for high-quality corporate bonds. The range of assumptions that were used for the non-U.S. defined benefit plans reflects the different economic environments within various countries.

Assumptions used to calculate the net periodic cost in each year were as follows:

	For years ended October 31,		
	2016	2015	2014
U.S. defined benefit plans:			
Discount rate	4.20%	4.00%	4.00-4.50%
Average increase in compensation levels	3.50%	3.50%	3.50%
Expected long-term return on assets	7.50%	8.00%	8.00%
Non-U.S. defined benefit plans:			
Discount rate	0.77-3.76%	1.50-4.00%	1.50-4.50%
Average increase in compensation levels	2.25-4.00%	2.50-3.25%	2.50-3.25%
Expected long-term return on assets	4.25-6.50%	4.00-6.50%	4.00-6.50%
U.S. post-retirement benefits plans:			
Discount rate	4.00%	4.00%	4.00-4.25%
Expected long-term return on assets	7.50%	8.00%	8.00%
Current medical cost trend rate	7.00%	8.00%	8.00%
Ultimate medical cost trend rate	3.50%	3.50%	3.50%
Medical cost trend rate decreases to ultimate rate in year	2029	2028	2028

Assumptions used to calculate the benefit obligation were as follows:

	As of the Years Ending	
	October 31,	
	2016	2015
U.S. defined benefit plans:		
Discount rate	3.75%	4.20%
Average increase in compensation levels	N/A	3.50%
Non-U.S. defined benefit plans:		
Discount rate	0.40-2.62%	0.77-3.76%
Average increase in compensation levels	2.00-4.25%	2.25-4.00%
U.S. post-retirement benefits plans:		
Discount rate	3.50%	4.00%
Current medical cost trend rate	6.00%	7.00%
Ultimate medical cost trend rate	3.50%	3.50%
Medical cost trend rate decreases to ultimate rate in year	2029	2029

Health care trend rates do not have a significant effect on the total service and interest cost components or on the post-retirement benefit obligation amounts reported for the U.S. Post-Retirement Benefit Plan for the year ended October 31, 2016.

#### 14. GUARANTEES

##### Standard Warranty

We accrue for standard warranty costs based on historical trends in warranty charges as a percentage of net product shipments. The accrual is reviewed regularly and periodically adjusted to reflect changes in warranty cost estimates.

Estimated warranty charges are recorded within cost of products at the time products are sold. The standard warranty accrual balances are held in other accrued and other long-term liabilities on our consolidated balance sheet. Our standard warranty terms typically extend between one and three years from the date of delivery, depending on the product.

A summary of the standard warranty accrual activity is shown in the table below. The standard warranty accrual balances are held in other accrued and other long-term liabilities.

	October 31, 2016 2015 (in millions)	
Balance as of October 31, 2015 and 2014	\$31	\$30
Accruals for warranties including change in estimates	53	53
Settlements made during the period	(49 )	(52 )
Balance as of October 31, 2016 and 2015	\$35	\$31
Accruals for warranties due within one year	34	29
Accruals for warranties due after one year	1	2
Balance as of October 31, 2016 and 2015	\$35	\$31

## Indemnifications in Connection with Transactions

In connection with various divestitures, acquisitions, spin-offs and other transactions, we have agreed to indemnify certain parties, their affiliates and/or other related parties against certain damages and expenses that might occur in the future. These indemnifications may cover a variety of liabilities, including, but not limited to, employee, tax, environmental, intellectual property, litigation and other liabilities related to the business conducted prior to the date of the transaction. In our opinion, the fair value of these indemnification obligations was not material as of October 31, 2016.

## Indemnifications to Officers and Directors

Our corporate by-laws require that we indemnify our officers and directors, as well as those who act as directors and officers of other entities at our request, against expenses, judgments, fines, settlements and other amounts actually and reasonably incurred in connection with any proceedings arising out of their services to Agilent and such other entities, including service with respect to employee benefit plans. In addition, we have entered into separate indemnification agreements with each director and each board-appointed officer of Agilent which provide for indemnification of these directors and officers under similar circumstances and under additional circumstances. The indemnification obligations are more fully described in the by-laws and the indemnification agreements. We purchase standard insurance to cover claims or a portion of the claims made against our directors and officers. Since a maximum obligation is not explicitly stated in our by-laws or in our indemnification agreements and will depend on the facts and circumstances that arise out of any future claims, the overall maximum amount of the obligations cannot be reasonably estimated. Historically, we have not made payments related to these obligations, and the fair value for these indemnification obligations was not material as of October 31, 2016.

## Other Indemnifications

As is customary in our industry and as provided for in local law in the U.S. and other jurisdictions, many of our standard contracts provide remedies to our customers and others with whom we enter into contracts, such as defense, settlement, or payment of judgment for intellectual property claims related to the use of our products. From time to time, we indemnify customers, as well as our suppliers, contractors, lessors, lessees, companies that purchase our businesses or assets and others with whom we enter into contracts, against combinations of loss, expense, or liability arising from various triggering events related to the sale and the use of our products and services, the use of their

goods and services, the use of facilities and state of our owned facilities, the state of the assets and businesses that we sell and other matters covered by such contracts, usually up to a specified maximum amount. In addition, from time to time we also provide protection to these parties against claims related to undiscovered liabilities, additional product liability or environmental obligations. In our experience, claims made under such indemnifications are rare and the associated estimated fair value of the liability was not material as of October 31, 2016.

In connection with the sale of several of our businesses, we have agreed to indemnify the buyers of such business, their respective affiliates and other related parties against certain damages that they might incur in the future. The continuing indemnifications primarily cover damages relating to liabilities of the businesses that Agilent retained and did not transfer to the buyers, as well as other specified items. In our opinion, the fair value of these indemnification obligations was not material as of October 31, 2016.

Table of Contents

## 15. COMMITMENTS AND CONTINGENCIES

**Operating Lease Commitments:** We lease certain real and personal property from unrelated third parties under non-cancelable operating leases. Future minimum lease payments under operating leases at October 31, 2016 were \$38 million for 2017, \$35 million for 2018, \$25 million for 2019, \$14 million for 2020, \$8 million for 2021 and \$26 million thereafter. Future minimum lease income under leases at October 31, 2016 was \$11 million for 2017, \$10 million for 2018, \$9 million for 2019, and \$19 million thereafter. Certain leases require us to pay property taxes, insurance and routine maintenance, and include escalation clauses. Total rent expense was \$61 million in 2016, \$65 million in 2015 and \$55 million in 2014.

**Contingencies:** We are involved in lawsuits, claims, investigations and proceedings, including, but not limited to, patent, commercial and environmental matters, which arise in the ordinary course of business. There are no matters pending that we currently believe are reasonably possible of having a material impact to our business, consolidated financial condition, results of operations or cash flows.

## 16. SHORT-TERM DEBT

## Credit Facilities

On September 15, 2014, Agilent entered into a credit agreement with a financial institution which provides for a \$400 million five-year unsecured credit facility that will expire on September 15, 2019. On June 9, 2015, the commitments under the existing credit facility were increased by \$300 million so that the aggregate commitments under the facility now total \$700 million. For the year ended October 31, 2016, we borrowed \$255 million and repaid \$255 million by October 31, 2016. As of October 31, 2016, the company had no borrowings outstanding under the facility. We were in compliance with the covenants for the credit facility during the years ended October 31, 2016 and 2015.

As of December 20, 2016, the company had borrowings of \$65 million outstanding under this credit facility and may borrow more during fiscal year 2017.

## 17. LONG-TERM DEBT

## Senior Notes

The following table summarizes the company's long-term senior notes and the related interest rate swaps:

	October 31, 2016			October 31, 2015		
	Amortized Principal	Swap	Total	Amortized Principal	Swap	Total
	(in millions)					
2017 Senior Notes	100	1	101	100	2	102
2020 Senior Notes	499	15	514	499	19	518
2022 Senior Notes	400	—	400	399	—	399
2023 Senior Notes	598	—	598	598	—	598
2026 Senior Notes	299	—	299	—	—	—
Total	\$1,896	\$ 16	\$1,912	\$1,596	\$ 21	\$1,617

## 2017 Senior Notes

In October 2007, the company issued an aggregate principal amount of \$600 million in senior notes ("2017 senior notes"). The 2017 senior notes were issued at 99.60% of their principal amount. The notes will mature on November 1, 2017, and bear interest at a fixed rate of 6.50% per annum. The interest is payable semi-annually on May 1st and November 1st of each year and payments commenced on May 1, 2008.

On November 25, 2008, we terminated two interest rate swap contracts associated with our 2017 senior notes that represented the notional amount of \$400 million. The asset value, including interest receivable, upon termination was approximately \$43 million and the amount to be amortized at October 31, 2016 was \$1 million. The gain is being deferred and amortized to interest expense over the remaining life of the 2017 senior notes.

Table of Contents

On October 20, 2014, we settled the redemption of \$500 million of the \$600 million outstanding aggregate principal amount of our 2017 senior notes due November 1, 2017 that had been called for redemption on September 19, 2014. The redemption price of approximately \$580 million included a \$80 million prepayment penalty computed in accordance with the terms of the 2017 senior notes as the present value of the remaining scheduled payments of principal and unpaid interest related to \$500 million partial redemption. The prepayment penalty less partial amortization of previously deferred interest rate swap gain of approximately \$14 million together with \$2 million of amortization of debt issuance costs and discount was disclosed in other income (expense), net in the condensed consolidated statement of operations. We also paid accrued and unpaid interest of \$15 million on the 2017 senior notes up to but not including the redemption date.

2020 Senior Notes

In July 2010, the company issued an aggregate principal amount of \$500 million in senior notes ("2020 senior notes"). The 2020 senior notes were issued at 99.54% of their principal amount. The notes will mature on July 15, 2020, and bear interest at a fixed rate of 5.00% per annum. The interest is payable semi-annually on January 15th and July 15th of each year, payments commenced on January 15, 2011.

On August 9, 2011, we terminated our interest rate swap contracts related to our 2020 senior notes that represented the notional amount of \$500 million. The asset value, including interest receivable, upon termination for these contracts was approximately \$34 million and the amount to be amortized at October 31, 2016 was \$15 million. The gain is being deferred and amortized to interest expense over the remaining life of the 2020 senior notes.

2022 Senior Notes

In September 2012, the company issued an aggregate principal amount of \$400 million in senior notes ("2022 senior notes"). The 2022 senior notes were issued at 99.80% of their principal amount. The notes will mature on October 1, 2022, and bear interest at a fixed rate of 3.20% per annum. The interest is payable semi-annually on April 1st and October 1st of each year, payments commenced on April 1, 2013.

2023 Senior Notes

In June 2013, the company issued aggregate principal amount of \$600 million in senior notes ("2023 senior notes"). The 2023 senior notes were issued at 99.544% of their principal amount. The notes will mature on July 15, 2023 and bear interest at a fixed rate of 3.875% per annum. The interest is payable semi-annually on January 15th and July 15th of each year and payments will commence January 15, 2014.

2026 Senior Notes

On September 15, 2016, the company issued aggregate principal amount of \$300 million in senior notes ("2026 senior notes"). The 2026 senior notes were issued at 99.624%% of their principal amount. The notes will mature on September 22, 2026 and bear interest at a fixed rate of 3.050% per annum. The interest is payable semi-annually on March 22nd and September 22nd of each year and payments will commence March 22, 2017.

In February 2016, Agilent executed three forward-starting pay fixed/receive variable interest rate swaps for the notional amount of \$300 million in connection with future interest payments to be made on our 2026 senior notes issued on September 15, 2016. The swap arrangements were terminated on September 15, 2016 with a payment of \$10 million and we recognized this as a deferred loss in accumulated other comprehensive income which is being amortized to interest expense over the life of the 2026 senior notes. The remaining loss to be amortized related to the

interest rate swap agreements at October 31, 2016 was \$9 million.

Other debt

In 2016, we paid approximately \$37 million of our mortgage debt, secured on buildings in Denmark, to a Danish financial institution. The gain recognized upon early payment was not material. No balance exists on this debt as of October 31, 2016.

Table of Contents

## 18. STOCKHOLDERS' EQUITY

## Stock Repurchase Program

On November 22, 2013 we announced that our board of directors had authorized a share repurchase program. The program was designed to reduce or eliminate dilution resulting from issuance of stock under the company's employee equity incentive programs to target maintaining a weighted average share count of approximately 335 million diluted shares. For the year ended October 31, 2016, we repurchased 2.4 million shares for \$98 million, which completed the purchases under this authorization. For the year ended October 31, 2015 we repurchased approximately 6 million shares for \$267 million. For the year ended October 31, 2014 we repurchased 4 million shares for \$200 million. All such shares and related costs are held as treasury stock and accounted for using the cost method.

On May 28, 2015 we announced that our board of directors had approved a new share repurchase program (the "2015 repurchase program"). The 2015 share repurchase program authorizes the purchase of up to \$1.14 billion of our common stock through and including November 1, 2018. The 2015 repurchase program does not require the company to acquire a specific number of shares and may be suspended or discontinued at any time. During the year ended October 31, 2016, upon the completion of our previous repurchase program, we repurchased approximately 8.3 million shares for \$336 million under this authorization. All such shares and related costs are held as treasury stock and accounted for using the cost method. As of October 31, 2016, we had remaining authorization to repurchase up to \$804 million of our common stock under this program.

In the first quarter of 2017, we repurchased approximately 2.5 million shares for \$111 million under the 2015 repurchase program. In addition, we retired 292.5 million treasury shares at an aggregate cost of \$10.6 billion, which represents all our previously repurchased shares over the past 11 years and our November 2016 repurchases. Also the retirement resulted in a decrease of \$6.7 billion to retained earnings and a decrease of \$3.9 billion to additional paid-in-capital.

## Cash Dividends on Shares of Common Stock

During the year ended October 31, 2016, cash dividends of \$0.46 per share, or \$150 million were declared and paid on the company's outstanding common stock. During the year ended October 31, 2015, cash dividends of \$0.40 per share, or \$133 million were declared and paid on the company's outstanding common stock. During the year ended October 31, 2014, cash dividends of \$0.53 per share, or \$176 million were declared and paid on the company's outstanding common stock.

On November 16, 2016, we declared a quarterly dividend of \$0.132 per share of common stock, or approximately \$43 million which will be paid on January 25, 2017 to shareholders of record as of the close of business on January 3, 2017. The timing and amounts of any future dividends are subject to determination and approval by our board of directors.

## Accumulated other comprehensive income (loss)

The following table summarizes the components of our accumulated other comprehensive income (loss) as of October 31, 2016 and 2015, net of tax effect:

	October 31,
	2016 2015
	(in millions)

Edgar Filing: OSI SYSTEMS INC - Form 10-Q

Foreign currency translation, net of tax expense of \$(5) and \$(2) for 2016 and 2015, respectively	(197 )	(189 )
Unrealized losses on defined benefit plans, net of tax benefit of \$176 and \$126 for 2016 and 2015, respectively	(305 )	(204 )
Unrealized gains (losses) on derivative instruments, net of tax (expense) benefit of \$2 and \$(2) for 2016 and 2015, respectively	(1 )	2
Total accumulated other comprehensive loss	\$(503)	\$(391)

Table of Contents

Changes in accumulated other comprehensive income (loss) by component and related tax effects for the years ended October 31, 2016 and 2015 were as follows (in millions):

	Unrealized gain on investments (in millions)	Foreign currency translation	Net defined benefit pension cost and post retirement plan costs	Prior service credits	Actuarial Losses	Unrealized gains (losses) on derivatives	Total
As of October 31, 2014	\$17	\$ 156		\$255	\$ (771 )	\$ 9	\$(334)
Transfer to Keysight	(17 )	(9 )		(83 )	444	(3 )	332
Balance after transfer to Keysight	—	147		172	(327 )	6	(2 )
Other comprehensive income (loss) before reclassifications	—	(360 )		—	(90 )	11	(439 )
Amounts reclassified out of accumulated other comprehensive income	—	—		(17 )	35	(18 )	—
Tax benefit	—	24		6	17	3	50
Other comprehensive loss	—	(336 )		(11 )	(38 )	(4 )	(389 )
As of October 31, 2015	\$—	\$ (189 )		\$161	\$ (365 )	\$ 2	\$(391)
Other comprehensive income (loss) before reclassifications	—	(5 )		6	(171 )	(10 )	(180 )
Amounts reclassified out of accumulated other comprehensive income	—	—		(29 )	43	3	17
Tax (expense) benefit	—	(3 )		8	42	4	51
Other comprehensive loss	—	(8 )		(15 )	(86 )	(3 )	(112 )
As of October 31, 2016	\$—	\$ (197 )		\$146	\$ (451 )	\$ (1 )	\$(503)

Table of Contents

Reclassifications out of accumulated other comprehensive income (loss) for the years ended October 31, 2016 and 2015 were as follows (in millions):

Details about accumulated other comprehensive income components	Amounts Reclassified from other comprehensive income		Affected line item in statement of operations
	2016	2015	
Unrealized gains and (losses) on derivatives	(3 )	18	Cost of products
	(3 )	18	Total before income tax
	—	(6 )	(Provision)/benefit for income tax
	(3 )	12	Total net of income tax
Net defined benefit pension cost and post retirement plan costs:			
Actuarial net loss	(43 )	(35 )	
Prior service benefit	29	17	
	(14 )	(18 )	Total before income tax
	4	5	(Provision)/benefit for income tax
	(10 )	(13 )	Total net of income tax
Total reclassifications for the period	\$ (13 )	\$ (1 )	

Amounts in parentheses indicate reductions to income and increases to other comprehensive income.

Reclassifications of prior service benefit and actuarial net loss in respect of retirement plans and post retirement pension plans are included in the computation of net periodic cost (see Note 13 "Retirement Plans and Post Retirement Pension Plans").

## 19. SEGMENT INFORMATION

Description of segments. We are a global leader in life sciences, diagnostics and applied chemical markets, providing application focused solutions that include instruments, software, services and consumables for the entire laboratory workflow. In the first fiscal quarter of 2015, we completed the separation of our electronic measurement business. See Note 3, "Discontinued Operations" for further information.

Agilent has three business segments comprised of the life sciences and applied markets business, diagnostics and genomics business and the Agilent CrossLab business each of which comprises a reportable segment. The three operating segments were determined based primarily on how the chief operating decision maker views and evaluates our operations. Operating results are regularly reviewed by the chief operating decision maker to make decisions about resources to be allocated to the segment and to assess its performance. Other factors, including market separation and customer specific applications, go-to-market channels, products and services and manufacturing are considered in determining the formation of these operating segments.

A description of our three reportable segments is as follows:

Our life sciences and applied markets business provides application-focused solutions that include instruments and software that enable customers to identify, quantify and analyze the physical and biological properties of substances and products, as well as enable customers in the clinical and life sciences research areas to interrogate samples at the molecular level. Key product categories include: liquid chromatography ("LC") systems and components; liquid chromatography mass spectrometry ("LCMS") systems; gas chromatography ("GC") systems and components; gas chromatography mass spectrometry ("GCMS") systems; inductively coupled plasma mass spectrometry ("ICP-MS") instruments; atomic absorption ("AA") instruments; microwave plasma-atomic emission spectrometry ("MP-AES") instruments; inductively coupled plasma optical emission spectrometry ("ICP-

Table of Contents

OES") instruments; cell analysis plate based assays; laboratory software and informatics systems; laboratory automation; dissolution testing; vacuum pumps and measurement technologies.

Our diagnostics and genomics business is comprised of five areas of activity providing solutions that include reagents, instruments, software and consumables, which enable customers in the clinical and life sciences research areas to interrogate samples at the cellular and molecular level. First, our genomics business includes arrays for DNA mutation detection, genotyping, gene copy number determination, identification of gene rearrangements, DNA methylation profiling, gene expression profiling, as well as next generation sequencing ("NGS") target enrichment and genetic data management and interpretation support software. Second, our nucleic acid solutions business provides equipment and expertise focused on production of synthesized oligonucleotides under pharmaceutical good manufacturing practices ("GMP") conditions for use as active pharmaceutical ingredients ("API") in an emerging class of drugs that utilize nucleic acid molecules for disease therapy. Next, our pathology solutions business is focused on product offerings to cancer diagnostics and anatomic pathology workflows. The broad portfolio of offerings includes immunohistochemistry ("IHC"), in situ hybridization ("ISH"), hematoxylin and eosin ("H&E") staining and special staining. We also collaborate with a number of major pharmaceutical companies to develop new potential pharmacodiagnosics, also known as companion diagnostics, which may be used to identify patients most likely to benefit from a specific targeted therapy. Finally, the reagent partnership business is a provider of reagents used for turbidimetry and flow cytometry.

The Agilent CrossLab business spans the entire lab with its extensive consumables and services portfolio, which is designed to improve customer outcomes. The majority of the portfolio is vendor neutral, meaning Agilent can serve and supply customers regardless of their instrument purchase choices. Solutions range from chemistries and supplies to services and software helping to connect the entire lab. Key product categories in consumables include GC and LC columns, sample preparation products, custom chemistries, and a large selection of laboratory instrument supplies. Services include startup, operational, training and compliance support, as well as asset management and consultative services that help increase customer productivity. Custom service and consumable bundles are tailored to meet the specific application needs of various industries and to keep instruments fully operational and compliant with the respective industry requirements.

A significant portion of the segments' expenses arise from shared services and infrastructure that we have historically provided to the segments in order to realize economies of scale and to efficiently use resources. These expenses, collectively called corporate charges, include legal, accounting, real estate, insurance services, information technology services, treasury, other corporate infrastructure expenses and costs of centralized research and development. Charges are allocated to the segments, and the allocations have been determined on a basis that we consider to be a reasonable reflection of the utilization of services provided to or benefits received by the segments. Corporate charges previously allocated to our electronic measurement business, but not classified within discontinued operations, were not reallocated to our other segments. These charges are presented below as a component of the reconciliation between segments' income from operations and Agilent's income from continuing operations and are classified as unallocated corporate charges. In addition, we do not allocate amortization and impairment of acquisition-related intangible assets, restructuring and transformational expenses, acquisition and integration costs and certain other charges to the operating margin for each segment because management does not include this information in its measurement of the performance of the operating segments.

The following tables reflect the results of our reportable segments under our management reporting system. The performance of each segment is measured based on several metrics, including segment income from operations. These results are used, in part, by the chief operating decision maker in evaluating the performance of, and in allocating resources to, each of the segments.

Table of Contents

The profitability of each of the segments is measured after excluding restructuring and asset impairment charges, investment gains and losses, interest income, interest expense, acquisition and integration costs, non-cash amortization and other items as noted in the reconciliations below.

	Life Sciences and Applied Markets (in millions)	Diagnostics and Genomics	Agilent CrossLab	Total Segments
Year ended October 31, 2016:				
Total net revenue	\$2,073	\$ 709	\$ 1,420	\$ 4,202
Income from operations	\$429	\$ 114	\$ 316	\$ 859
Depreciation expense	\$36	\$ 31	\$ 28	\$ 95
Share-based compensation expense	\$29	\$ 10	\$ 21	\$ 60
Year ended October 31, 2015:				
Total net revenue	\$2,046	\$ 662	\$ 1,330	\$ 4,038
Income from operations	\$380	\$ 88	\$ 299	\$ 767
Depreciation expense	\$27	\$ 37	\$ 34	\$ 98
Share-based compensation expense	\$27	\$ 9	\$ 18	\$ 54
Year ended October 31, 2014:				
Total net revenue	\$2,078	\$ 663	\$ 1,307	\$ 4,048
Income from operations	\$369	\$ 93	\$ 301	\$ 763
Depreciation expense	\$29	\$ 43	\$ 33	\$ 105
Share-based compensation expense	\$29	\$ 9	\$ 18	\$ 56

For the year ended October 31, 2014, depreciation expense and share-based compensation expense excludes unallocated corporate charges.

The following table reconciles reportable segments' income from operations to Agilent's total enterprise income before taxes:

	Years Ended October 31, 2016 2015 2014 (in millions)		
Total reportable segments' income from operations	\$859	\$767	\$763
Restructuring and business exit related costs	(11 )	(12 )	(66 )

Table of Contents

The following table presents assets and capital expenditures directly managed by each segment. Unallocated assets primarily consist of cash, cash equivalents, accumulated amortization of other intangibles and other assets.

	Life Sciences and Applied Markets (in millions)	Diagnostics and Genomics	Agilent CrossLab	Total Segments
As of October 31, 2016:				
Assets	\$ 1,687	\$ 1,960	\$ 1,082	\$ 4,729
Capital expenditures	\$ 53	\$ 41	\$ 45	\$ 139
As of October 31, 2015:				
Assets	\$ 1,539	\$ 2,027	\$ 1,008	\$ 4,574
Capital expenditures	\$ 28	\$ 33	\$ 37	\$ 98

The following table reconciles segment assets to Agilent's total assets:

	October 31, 2016 2015 (in millions)	
Total reportable segments' assets	\$4,729	\$4,574
Cash, cash equivalents and short-term investments	2,289	2,003
Short-term restricted cash and cash equivalents	—	242
Prepaid expenses	92	105
Investments	135	86
Long-term and other receivables	92	104
Other	465	365
Total assets	\$7,802	\$7,479

The other category primarily includes deferred tax assets and long-term investments which are not allocated to the segments.

The following table represents total revenue by product category:

	Years Ended October 31, 2016 2015 2014 (in millions)		
Instrumentation	\$1,871	\$1,827	\$1,839
Analytical lab services	910	843	831
Analytical lab consumables	510	489	476
Diagnostics and genomics solutions	709	662	663
Informatics and other	202	217	239
Total	\$4,202	\$4,038	\$4,048

The following table presents summarized information for net revenue and long-lived assets by geographic region. Revenues from external customers are generally attributed to countries based upon the customer's location. Long lived assets consist of property, plant, and equipment, long-term receivables and other long-term assets excluding intangible assets. The rest of the world primarily consists of rest of Asia and Europe.

## 20. SUBSEQUENT EVENT

On December 19, 2016 we signed an agreement to acquire 100 percent of the stock of Multiplicom NV (“Multiplicom”), a leading European diagnostics company with state-of-the-art genetic testing technology and products, for approximately €68 million in cash. Multiplicom, headquartered in Belgium, develops, manufactures and commercializes molecular diagnostic assays, provided as kits, which enable personalized medicine. The acquisition is expected to be completed by mid-January, subject to local laws and regulations and customary closing conditions. The financial results of Multiplicom will be included within Agilent's from the date of the close, which is expected to be during the first quarter of 2017.

The above quarterly financial data includes Keysight which is presented as discontinued operations. See Note 3, "Discontinued Operations" for additional information. In addition, the first quarter of fiscal year 2016 has been adjusted to include an additional \$2 million of tax expense as a result of our early adoption of Accounting Standard Update (ASU) 2016-09 "Improvements to Employees Share-based Payment Accounting", in the third quarter of fiscal year 2016. Please refer to Note 2, "New Accounting Pronouncements."

## Table of Contents

### Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

### Item 9A. Controls and Procedures

#### Evaluation of Disclosure Controls and Procedures

Our management has evaluated, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, the effectiveness of our disclosure controls and procedures as of October 31, 2016, pursuant to and as required by Rule 13a-15(b) under the Securities Exchange Act of 1934 ("Exchange Act"). Based on that evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that, as of October 31, 2016, the company's disclosure controls and procedures, as defined by Rule 13a-15(e) under the Exchange Act, were effective and designed to ensure that (i) information required to be disclosed in the company's reports filed under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and (ii) information is accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosures.

#### Management's Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f). Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we assessed the effectiveness of our internal control over financial reporting based on the framework in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"). As a result of that assessment, management concluded that our internal control over financial reporting was effective as of October 31, 2016 based on criteria in Internal Control - Integrated Framework (2013) issued by the COSO.

The effectiveness of our internal control over financial reporting as of October 31, 2016 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report which appears in Item 8 of this Annual Report on Form 10-K.

#### Remediation of Material Weakness in Internal Control Over Financial Reporting

During the year ended October 31, 2015, management identified certain errors in the tax accounts, primarily related to prior years, and disclosed a material weakness in our controls over the accounting for income taxes.

To remediate the material weakness described above, during fiscal 2016, we designed and implemented additional rigorous reviews and other controls and enhanced and revised the design of existing controls and procedures to validate the inputs and outputs for the significant tax accounting processes, as well as enhancing the tax accounting expertise within the tax function. During the fourth quarter of fiscal 2016, we successfully completed the testing necessary to conclude that the controls were operating effectively and have concluded that the material weakness has been remediated.

#### Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting that occurred during Agilent's last fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

### Item 9B. Other Information

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

Information regarding our directors appears under “Proposal No. 1 - Election of Directors” in our Proxy Statement for the Annual Meeting of Stockholders (“Proxy Statement”), to be held March 15, 2017. That portion of the Proxy Statement is

105

---

Table of Contents

incorporated by reference into this report. Information regarding our executive officers appears in Item 1 of this report under “Executive Officers of the Registrant.” Information regarding our Audit and Finance Committee and our Audit and Finance Committee’s financial expert appears under “Audit and Finance Committee Report” and “Board Structure and Compensation” in our Proxy Statement. That portion of the Proxy Statement is incorporated by reference into this report.

There were no material changes to the procedures by which security holders may recommend nominees to our Board of Directors. Information regarding our code of ethics (the company’s Standards of Business Conduct) applicable to our principal executive officer, our principal financial officer, our controller and other senior financial officers appears in Item 1 of this report under “Investor Information.” We will post amendments to or waivers from a provision of the Standards of Business Conduct with respect to those persons on our website at [www.investor.agilent.com](http://www.investor.agilent.com).

Compliance with Section 16(a) of the Exchange Act

Information about compliance with Section 16(a) of the Exchange Act appears under “Section 16(a) Beneficial Ownership Reporting Compliance” in the Proxy Statement. That portion of the Proxy Statement is incorporated by reference into this report.

Item 11. Executive Compensation

Information about compensation of our named executive officers appears under “Executive Compensation”, “Compensation Committee Interlocks and Insider Participation” in the Proxy Statement. Information about compensation of our directors appears under “Director Compensation” and “Compensation Committee Report” and “Stock Ownership Guidelines” in the Proxy Statement. Those portions of the Proxy Statement are incorporated by reference into this report.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Information about security ownership of certain beneficial owners and management appears under "Common Stock Ownership of Certain Beneficial Owners and Management" in the Proxy Statement. That portion of the Proxy Statement is incorporated by reference into this report.

EQUITY COMPENSATION PLAN INFORMATION

The following table summarizes information about our equity compensation plans as of October 31, 2016. All outstanding awards relate to our common stock.

Plan Category	Number of Securities to be Issued upon Exercise of Outstanding Options, Warrants and Rights	Weighted-average Exercise Price of Outstanding Options, Warrants and Rights	Number of Securities Remaining Available for Future Issuance under Equity Compensation Plans (Excluding Securities Reflected in Column (a))
	(a)	(b)	(c)

Edgar Filing: OSI SYSTEMS INC - Form 10-Q

Equity compensation plans approved by security holders (1)(2)(3)	7,168,592	\$	33	55,484,274
Equity compensation plans not approved by security holders	—	—		—
Total	7,168,592	\$	33	55,484,274

(1) The number of securities remaining available for future issuance in column (c) includes 45,168,192 shares of common stock authorized and available for issuance under the Agilent Technologies, Inc. Employee Stock Purchase Plan ("423(b) Plan"). The number of shares authorized for issuance under the 423(b) Plan is subject to an automatic annual increase of the lesser of one percent of the outstanding common stock of Agilent or an amount determined by the Compensation Committee of our Board of Directors. Under the terms of the 423(b) Plan, in no event shall the aggregate number of shares issued under the Plan exceed 75 million shares.

(2) We issue securities under our equity compensation plans in forms other than options, warrants or rights. On November 19, 2008 and March 11, 2009, the Board and the stockholders, respectively, approved the Agilent Technologies, Inc. 2009 Stock Plan ("2009 Plan") to replace the company's 1999 Plan and 1999 Non-Employee Director Stock Plan for awards of stock-based incentive compensation to our employees (including officers), directors and consultants. The 2009 Plan provides for

the grant of awards in the form of stock options, stock appreciation rights, restricted stock, restricted stock units, performance shares and performance units with performance-based conditions to vesting or exercisability, and cash awards. The 2009 Plan has a term of ten years.

We issue securities under our equity compensation plans in forms which do not require a payment by the recipient (3) to us at the time of exercise or vesting, including restricted stock, restricted stock units and performance units.

Accordingly, the weighted-average exercise price in column (b) does not take these awards into account.

#### Item 13. Certain Relationships and Related Transactions, and Director Independence

Information about certain relationships and related transactions appears under "Related Person Transaction Policy and Procedures" in the Proxy Statement. Information about director independence appears under the heading "Board Structure and Compensation — Director Independence" in the Proxy Statement. Each of those portions of the Proxy Statement is incorporated by reference into this report.

#### Item 14. Principal Accounting Fees and Services

Information about principal accountant fees and services as well as related pre-approval policies appears under "Fees Paid to PricewaterhouseCoopers" and "Policy on Audit and Finance Committee Preapproval of Audit and Permissible Non-Audit Services of Independent Registered Auditors" in the Proxy Statement. Those portions of the Proxy Statement are incorporated by reference into this report.

### PART IV

#### Item 15. Exhibits and Financial Statement Schedules

(a) The following documents are filed as part of this report:

1. Financial Statements.

See Index to Consolidated Financial Statements under Item 8 on Page 51 of this report.

2. Financial Statement Schedule.

Table of Contents

The following additional financial statement schedule should be considered in conjunction with our consolidated financial statements. All other schedules have been omitted because the required information is either not applicable or not sufficiently material to require submission of the schedule:

## SCHEDULE II

SCHEDULE II  
VALUATION AND QUALIFYING ACCOUNTS

Column A	Column B	Column C	Column D	Column E
Description	Balance at Beginning of Period	Additions Charged to Expenses or Other Accounts*	Deductions Credited to Expenses or Other Accounts**	Balance at End of Period
	(in millions)			
2016				
Tax valuation allowance	\$ 131	\$ 22	\$ (24 )	\$ 129
2015				
Tax valuation allowance	\$ 134	\$ 6	\$ (9 )	\$ 131
2014				
Tax valuation allowance	\$ 131	\$ 3	\$ —	\$ 134

\* Additions include current year additions charged to expenses and current year build due to increases in net deferred tax assets, return to provision true-ups, other adjustments and OCI impact to deferred taxes.

\*\* Deductions include current year releases credited to expenses and current year reductions due to decreases in net deferred tax assets, return to provision true-ups, other adjustments and OCI impact to deferred taxes.
