MARKET AND INDUSTRY DATA AND FORECASTS

Market and industry data and other statistical information and forecasts used throughout this Annual Report on Form 10-K (this Annual Report) are based on independent industry publications, government publications and reports by market research firms or other published independent sources. We have not sought or obtained the approval or endorsement of the use of this third-party information. Some data also is based on our good faith estimates, which are derived from our review of internal surveys, as well as independent sources. Forecasts are particularly likely to be inaccurate, especially over long periods of time.

Table of Contents

Unless the context otherwise indicates, all references in this Annual Report to the Company, we, us, our or ours or similar words are to Hilltop Holdings Inc. and its direct and indirect wholly owned subsidiaries, references to Hilltop refer solely to Hilltop Holdings Inc., references to PlainsCapital refer to PlainsCapital Corporation (a wholly owned subsidiary of Hilltop), references to the Bank refer to PlainsCapital Bank (a wholly owned subsidiary of PlainsCapital), references to FNB refer to First National Bank, references to First Southwest refer to First Southwest Holdings, LLC (a wholly owned subsidiary of the Bank) and its subsidiaries as a whole, references to FSC refer to First Southwest Company (a wholly owned subsidiary of First Southwest), references to PrimeLending refer to PrimeLending, a PlainsCapital Company (a wholly owned subsidiary of the Bank) and its subsidiaries as a whole, and references to NLC refer to National Lloyds Corporation, formerly known as NLASCO, Inc., (a wholly owned subsidiary of Hilltop) and its subsidiaries as a whole.

FORWARD-LOOKING STATEMENTS

This Annual Report and the documents incorporated by reference into this report include forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, or the Exchange Act, as amended by the Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical fact, included in this Annual Report that address results or developments that we expect or anticipate will or may occur in the future, and statements that are preceded by, followed by or include, words such as anticipates, believes, could, estimates, expects, forecasts, goal, intends, may, might, plans, seeks, should, target, view or would or the negative of these words and phrases or similar words or phrases, including such things as our business strategy, our financial condition, our litigation, our efforts to make strategic acquisitions, our proposal to acquire SWS Group, Inc. ("SWS"), our revenue, our liquidity and sources of funding, market trends, operations and business, expectations concerning mortgage loan origination volume, anticipated changes in our revenues or earnings, the effects of government regulation applicable to our operations, the appropriateness of our allowance for loan losses and provision for loan losses, and the collectability of loans are forward-looking statements.

These forward-looking statements are based on our beliefs, assumptions and expectations of our future performance taking into account all information currently available to us. These beliefs, assumptions and expectations are subject to risks and uncertainties and can change as a result of many possible events or factors, not all of which are known to us. If an event occurs, our business, business plan, financial condition, liquidity and results of operations may vary materially from those expressed in our forward-looking statements. Certain factors that could cause actual results to differ include, among others:

- risks associated with merger and acquisition integration;
- our ability to estimate loan losses;
- changes in the default rate of our loans;
- risks associated with concentration in real estate related loans;

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

- our ability to obtain reimbursements for losses on acquired loans under loss-share agreements with the Federal Deposit Insurance Corporation (the FDIC);
- changes in general economic, market and business conditions in areas or markets where we compete;
- severe catastrophic events in our geographic area;
- changes in the interest rate environment;
- cost and availability of capital;
- changes in state and federal laws, regulations or policies affecting one or more of our business segments, including changes in regulatory fees, deposit insurance premiums, capital requirements and the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act);
- our ability to use net operating loss carry forwards to reduce future tax payments;
- approval of new, or changes in, accounting policies and practices;
- changes in key management;

Table of Contents

- competition in our banking, mortgage origination, financial advisory and insurance segments from other banks and financial institutions as well as insurance companies, mortgage bankers, investment banking and financial advisory firms, asset-based non-bank lenders and government agencies;
- risks related to our proposal to acquire SWS;
- failure of our insurance segment reinsurers to pay obligations under reinsurance contracts;
- our ability to use excess cash in an effective manner, including the execution of successful acquisitions; and
- our participation in governmental programs, including the Small Business Lending Fund (SBLF).

For a more detailed discussion of these and other factors that may affect our business and that could cause the actual results to differ materially from those anticipated in these forward-looking statements, see Item 1A, Risk Factors, and Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, herein. We caution that the foregoing list of factors is not exhaustive, and new factors may emerge, or changes to the foregoing factors may occur, that could impact our business. All subsequent written and oral forward-looking statements concerning our business attributable to us or any person acting on our behalf are expressly qualified in their entirety by the cautionary statements above. We do not undertake any obligation to update any forward-looking statement, whether written or oral, relating to the matters discussed in this Annual Report except to the extent required by federal securities laws.

Table of Contents

PART I

Item 1. Business.

Company Background

Beginning in 1995, we operated as several companies under the name Affordable Residential Communities or ARC, a Maryland corporation. We engaged in the business of acquiring, renovating, repositioning and operating manufactured home communities, as well as certain related businesses.

In January 2007, we acquired NLC, a property and casualty insurance holding company.

On July 31, 2007, we sold substantially all of the operating assets used in our manufactured home communities business and our retail sales and financing business to American Residential Communities LLC. In conjunction with this transaction, we transferred to the buyer the rights to the Affordable Residential Communities name, changed our name to Hilltop Holdings Inc., and moved our headquarters to Dallas, Texas. As a result, our primary operations from August 2007 through November 2012 were limited to providing fire and homeowners insurance to low value dwellings and manufactured homes primarily in Texas and other areas of the southern United States through NLC. NLC operates through its wholly owned subsidiaries, National Lloyds Insurance Company (NLIC) and American Summit Insurance Company (ASIC).

On November 30, 2012, we acquired PlainsCapital Corporation through a plan of merger (the PlainsCapital Merger) whereby PlainsCapital Corporation merged into our wholly owned subsidiary, which continued as the surviving entity under the name PlainsCapital Corporation. Concurrent with the consummation of the PlainsCapital Merger, we became a financial holding company registered under the Bank Holding Company Act of 1956 (the Bank Holding Company Act), as amended by the Gramm-Leach-Bliley Act of 1999 (the Gramm-Leach-Bliley Act).

On September 13, 2013, the Bank assumed substantially all of the liabilities, including all of the deposits, and acquired substantially all of the assets, of FNB from the FDIC, as receiver, and reopened former FNB branches acquired from the FDIC under the PlainsCapital Bank name (the FNB Transaction).

We intend to make acquisitions with certain of the remaining proceeds from the American Residential Communities transaction and, if necessary or appropriate, from additional equity or debt financing sources.

Following the PlainsCapital Merger, our primary line of business has been to provide business and consumer banking services from offices located throughout central, north and west Texas through the Bank. The acquisition of FNB's expansive branch network allows the Bank to further develop its Texas footprint through expansion into the Rio Grande Valley, Houston, Corpus Christi, Laredo and El Paso markets, among

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

others. In addition to the Bank, our other subsidiaries have specialized areas of expertise that allow us to provide an array of financial products and services such as mortgage origination, insurance and financial advisory services.

At December 31, 2013, on a consolidated basis, we had total assets of \$8.9 billion, total deposits of \$6.7 billion, total loans, including loans held for sale, of \$5.6 billion and stockholders' equity of \$1.3 billion. Our operating results beginning December 1, 2012 include the banking, mortgage origination and financial advisory operations acquired in the PlainsCapital Merger and the results of our banking operations beginning September 14, 2013 include the operations acquired in the FNB Transaction.

Our common stock is listed on the New York Stock Exchange, or NYSE, under the symbol HTH.

Our principal office is located at 200 Crescent Court, Suite 1330, Dallas, Texas 75201, and our telephone number at that location is (214) 855-2177. Our internet address is www.hilltop-holdings.com. Our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act are available on our website at <http://ir.hilltop-holdings.com/> under the tab SEC Filings as soon as reasonably practicable after we electronically file such reports with, or furnish them to, the Securities and Exchange Commission (the SEC). The references to our website in this Annual Report are inactive textual references only. The information on our website is not incorporated by reference into this Annual Report.

Table of Contents

Organizational Structure

Our organizational structure is comprised of two primary operating business units, NLC (insurance) and PlainsCapital (financial services and products). Within the PlainsCapital unit are three primary wholly owned operating subsidiaries: the Bank, PrimeLending and First Southwest. The following provides additional details regarding our updated organizational structure at December 31, 2013.

Geographic Dispersion of our Businesses

The Bank provides traditional banking services, residential mortgage lending, wealth and investment management, treasury management and capital equipment leasing. Substantially all of our banking operations are in Texas, and as a result of the FNB Transaction, the Bank has a presence in every major market in Texas.

For the year ended December 31, 2013, approximately 66% of PrimeLending's origination volume was concentrated in nine states (none of the other states in which PrimeLending operated during 2013 had volume of 3% or more). The following table is a summary of the origination volume by state for the year ended December 31, 2013 (dollars in thousands).

		Volume	% of Total
Texas	\$	2,660,810	22.6%
California		2,082,184	17.7%
North Carolina		618,802	5.2%

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

Virginia	466,531	4.0%
Florida	456,643	3.9%
Arizona	392,006	3.3%
Maryland	385,215	3.3%
Ohio	383,518	3.2%
Washington	360,100	3.0%
All other states	3,986,753	33.8%
\$	11,792,562	100.0%

Table of Contents

Our insurance products are distributed through a broad network of independent agents and a select number of managing general agents, referred to as MGAs, which are concentrated in five states (none of the other states in which we operated during 2013 had gross written premiums of 3% or more). The following table sets forth our total gross written premiums by state for the periods shown (dollars in thousands).

	Year Ended December 31,					
	2013	% of Total	2012	% of Total	2011	% of Total
Texas	\$ 125,696	69.1%	\$ 118,361	69.5%	\$ 117,046	73.0%
Oklahoma	16,494	9.1%	15,398	9.1%	10,804	6.7%
Arizona	15,904	8.7%	13,914	8.2%	12,376	7.7%
Tennessee	10,589	5.8%	10,527	6.2%	9,489	5.9%
Georgia	6,393	3.5%	5,454	3.2%	4,380	2.7%
All other states	6,892	3.8%	6,547	3.8%	6,346	4.0%
Total	\$ 181,968	100.0%	\$ 170,201	100.0%	\$ 160,441	100.0%

FSC, a diversified investment banking firm and a registered broker-dealer, competes for business nationwide. Public finance financial advisory revenues, of which 76% are from entities located in Texas, represent a significant portion of total segment revenues.

Business Segments

Under U.S. generally accepted accounting principles (GAAP), our two business units are comprised of four reportable business segments organized primarily by the core products offered to the segments' respective customers: banking, mortgage origination, insurance and financial advisory. These segments reflect the manner in which operations are managed and the criteria used by our chief operating decision maker function to evaluate segment performance, develop strategy and allocate resources. Our chief operating decision maker function consists of the President and Chief Executive Officer of Hilltop and the Chief Executive Officer of PlainsCapital.

For more financial information about each of our business segments, see Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, herein. See also Note 30 in the notes to our consolidated financial statements included under Item 8, Financial Statements and Supplementary Data.

Banking

The banking segment includes the operations of the Bank and, since September 14, 2013, the operations acquired in the FNB Transaction. At December 31, 2013, our banking segment had \$8.0 billion in assets and total deposits of \$6.7 billion. The primary sources of our deposits are residents and businesses located in Texas.

Business Banking. Our business banking customers primarily consist of agribusiness, energy, health care, institutions of higher education, real estate (including construction and land development) and wholesale/retail trade companies. We provide these customers with extensive banking

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

services, such as Internet banking, business check cards and other add-on services as determined on a customer-by-customer basis. Our treasury management services, which are designed to reduce the time, burden and expense of collecting, transferring, disbursing and reporting cash, are also available to our business customers. We offer these business customers lines of credit, equipment loans and leases, letters of credit, agricultural loans, commercial real estate loans and other loan products.

Table of Contents

The table below sets forth a distribution of the banking segment's non-covered and covered loans, classified by portfolio segment and segregated between those considered to be purchased credit impaired (PCI) loans and all other originated or acquired loans at December 31, 2013 (dollars in thousands). PCI loans showed evidence of credit deterioration that makes it probable that all contractually required principal and interest payments will not be collected. The banking segment's loan portfolio includes covered loans acquired in the FNB Transaction that are subject to loss-share agreements with the FDIC, while all other loans held by the Bank are referred to as non-covered loans. The commercial and industrial non-covered loans category includes a \$1.3 billion warehouse line of credit extended to PrimeLending, of which \$1.0 billion was drawn at December 31, 2013, as well as term loans at First Southwest that had an outstanding balance of \$23.0 million at December 31, 2013. Amounts advanced against the warehouse line and the First Southwest term loans are included in the table below, but are eliminated from the consolidated balance sheets.

	Loans, excluding PCI Loans	PCI Loans	Total Loans	% of Total Non-Covered Loans
Non-covered loans				
Commercial and industrial:				
Secured	\$ 2,229,778	\$ 35,372	\$ 2,265,150	53.3%
Unsecured	106,855	1,444	108,299	2.6%
Real estate:				
Secured by commercial properties	1,012,613	36,255	1,048,868	24.7%
Secured by residential properties	406,593	2,995	409,588	9.6%
Construction and land development:				
Residential construction loans	65,079		65,079	1.5%
Commercial construction loans and land development	279,655	19,817	299,472	7.0%
Consumer	51,067	4,509	55,576	1.3%
Total non-covered loans	\$ 4,151,640	\$ 100,392	\$ 4,252,032	100.0%

	Loans, excluding PCI Loans	PCI Loans	Total Loans	% of Total Covered Loans
Covered loans				
Commercial and industrial:				
Secured	\$ 24,913	\$ 28,520	\$ 53,433	5.3%
Unsecured	3,620	9,890	13,510	1.4%
Real estate:				
Secured by commercial properties	54,143	365,306	419,449	41.7%
Secured by residential properties	169,161	199,372	368,533	36.6%
Construction and land development:				
Residential construction loans	7,463	4,705	12,168	1.2%
Commercial construction loans and land development	17,913	121,363	139,276	13.8%
Total covered loans	\$ 277,213	\$ 729,156	\$ 1,006,369	100.0%

Our lending policies seek to achieve the goal of establishing an asset portfolio that will provide a return on stockholders' equity sufficient to maintain capital to assets ratios that meet or exceed established regulations. In support of that goal, we have designed our underwriting standards to determine:

- That our borrowers possess sound ethics and competently manage their affairs;

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

- That we know the source of the funds the borrower will use to repay the loan;
- That the purpose of the loan makes economic sense; and
- That we identify relevant risks of the loan and determine that the risks are acceptable.

We implement our underwriting standards according to the facts and circumstances of each particular loan request, as discussed below.

Commercial and industrial loans are primarily made within Texas and are underwritten on the basis of the borrower's ability to service the debt from cash flow from an operating business. In general, commercial and industrial loans involve more credit risk than residential and commercial mortgage loans and, therefore, usually yield a higher return. The increased risk in commercial and industrial loans results primarily from the type of collateral securing these loans, which typically includes commercial real estate, accounts receivable, equipment and inventory. Additionally, increased risk arises from the expectation that commercial and industrial loans generally will be serviced principally from operating cash flow of the

Table of Contents

business, and such cash flows are dependent upon successful business operations. Historical trends have shown these types of loans to have higher delinquencies than mortgage loans. As a result of the additional risk and complexity associated with commercial and industrial loans, such loans require more thorough underwriting and servicing than loans to individuals. To manage these risks, our policy is to attempt to secure commercial and industrial loans with both the assets of the borrowing business and other additional collateral and guarantees that may be available. In addition, depending on the size of the credit, we actively monitor the financial condition of the borrower by analyzing the borrower's financial statements and assessing certain financial measures, including cash flow, collateral value and other appropriate credit factors. We also have processes in place to analyze and evaluate on a regular basis our exposure to industries, products, market changes and economic trends.

The Bank also offers term financing on commercial real estate properties that include retail, office, multi-family, industrial, warehouse and non-owner occupied single family residences. Commercial mortgage lending can involve high principal loan amounts, and the repayment of these loans is dependent, in large part, on a borrower's on-going business operations or on income generated from the properties that are leased to third parties. Accordingly, we apply the measures described above for commercial and industrial loans to our commercial real estate lending, with increased emphasis on analysis of collateral values. As a general practice, the Bank requires its commercial mortgage loans to (i) be secured with first lien positions on the underlying property, (ii) generate adequate equity margins, (iii) be serviced by businesses operated by an established management team and (iv) be guaranteed by the principals of the borrower. The Bank seeks lending opportunities where cash flow from the collateral provides adequate debt service coverage and/or the guarantor's net worth is comprised of assets other than the project being financed.

The Bank offers construction financing for (i) commercial, retail, office, industrial, warehouse and multi-family developments, (ii) residential developments and (iii) single family residential properties. Construction loans involve additional risks because loan funds are advanced upon the security of a project under construction, and the project is of uncertain value prior to its completion. If the Bank is forced to foreclose on a project prior to completion, it may not be able to recover the entire unpaid portion of the loan. Additionally, it may be required to fund additional amounts to complete a project and may have to hold the property for an indeterminate period of time. Because of uncertainties inherent in estimating construction costs, the market value of the completed project and the effects of governmental regulation on real property, it can be difficult to accurately evaluate the total funds required to complete a project and the related loan-to-value ratio. As a result of these uncertainties, construction lending often involves the disbursement of substantial funds with repayment dependent, in part, on the success of the ultimate project rather than the ability of a borrower or guarantor to repay the loan. We generally require that the subject property of a construction loan for commercial real estate be pre-leased, since cash flows from the completed project provide the most reliable source of repayment for the loan. Loans to finance these transactions are generally secured by first liens on the underlying real property. The Bank conducts periodic completion inspections, either directly or through an agent, prior to approval of periodic draws on these loans.

In addition to the real estate lending activities described above, a portion of the Bank's real estate portfolio consists of single family residential mortgage loans typically collateralized by owner occupied properties located in its market areas. These residential mortgage loans are generally secured by a first lien on the underlying property and have maturities up to thirty years. At December 31, 2013, the Bank had \$582.6 million in one-to-four family residential loans, which represented 12.9% of its total loans held for investment.

Personal Banking. We offer a broad range of personal banking products and services for individuals. Similar to our business banking operations, we also provide our personal banking customers with a variety of add-on features such as check cards, safe deposit boxes, Internet banking, bill pay, overdraft privilege services, gift cards and access to automated teller machine (ATM) facilities throughout the United States. We offer a variety of deposit accounts to our personal banking customers including savings, checking, interest-bearing checking, money market and certificates of deposit.

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

We loan to individuals for personal, family and household purposes, including lines of credit, home improvement loans, home equity loans, credit cards and loans for purchasing and carrying securities. At December 31, 2013, we had \$55.6 million of loans for these purposes, which are shown in the non-covered loans table above as Consumer.

Wealth and Investment Management. Our private banking team personally assists high net worth individuals and their families with their banking needs, including depository, credit, asset management, and trust and estate services. We offer trust and asset management services in order to assist these customers in managing, and ultimately transferring, their wealth. Our wealth management services provide personal trust, investment management and employee benefit plan administration services, including estate planning, management and administration, investment portfolio management, employee benefit accounts and individual retirement accounts.

Table of Contents

Mortgage Origination

Our mortgage origination segment operates through a wholly owned subsidiary of the Bank, PrimeLending. Founded in 1986, PrimeLending is a residential mortgage banker licensed to originate and close loans in all 50 states and the District of Columbia. At December 31, 2013, it operated from over 300 locations in 42 states, originating approximately 23% of its mortgages from its Texas locations and approximately 18% of its mortgages from locations in California. The mortgage lending business is subject to seasonality, as we typically experience increased loan origination volume from purchases of homes during the spring and summer, when more people tend to move and buy or sell homes, and the overall demand for mortgage loans is driven largely by the applicable interest rates at any given time.

PrimeLending handles loan processing, underwriting and closings in-house. Mortgage loans originated by PrimeLending are funded through a warehouse line of credit maintained with the Bank. PrimeLending sells substantially all mortgage loans it originates to various investors in the secondary market, the majority with servicing released. While PrimeLending's loan origination volume decreased during the third and fourth quarters of 2013 compared to the first and second quarters of 2013, PrimeLending increased the amount of loans on which it retained servicing between the same periods. As mortgage loans are sold in the secondary market, PrimeLending pays down its warehouse line of credit with the Bank. Loans sold are subject to certain standard indemnification provisions with investors, including the repurchase of loans sold and the repayment of sales proceeds to investors under certain conditions.

Our mortgage lending underwriting strategy, driven in large measure by secondary market investor standards, seeks primarily to originate conforming loans. Our underwriting practices include:

- granting loans on a sound and collectible basis;
- obtaining a balance between maximum yield and minimum risk;
- ensuring that primary and secondary sources of repayment are adequate in relation to the amount of the loan; and
- ensuring that each loan is properly documented and, if appropriate, adequately insured.

Since its inception, PrimeLending has grown from a staff of 20 individuals producing approximately \$80 million in annual closed mortgage loan volume to a staff of approximately 2,600 producing \$11.8 billion in 2013. PrimeLending offers a variety of loan products catering to the specific needs of borrowers seeking purchase or refinancing options, including 30-year and 15-year fixed rate conventional mortgages, adjustable rate mortgages, jumbo loans, and Federal Housing Administration (FHA) and Veteran Affairs (VA) loans. Mortgage loans originated by PrimeLending are secured by a first lien on the underlying property. PrimeLending does not currently originate subprime loans (which we define to be loans to borrowers having a Fair Isaac Corporation (FICO) score lower than 620 on conventional mortgages and VA loans or 600 on FHA loans or loans that do not comply with applicable agency or investor-specific underwriting guidelines).

Insurance

The operations of NLC comprise our insurance segment. NLC specializes in providing fire and limited homeowners insurance for low value dwellings and manufactured homes primarily in Texas and other areas of the south, southeastern and southwestern United States. NLC's product lines also include enhanced homeowners products offering higher coverage limits with distribution restricted to select agents. NLC targets underserved markets through a broad network of independent agents currently operating in 14 states and a select number of MGAs, which require underwriting expertise that many larger carriers have been unwilling to develop given the relatively small volume of premiums produced by local agents.

Ratings. Many insurance buyers, agents and brokers use the ratings assigned by A.M. Best and other rating agencies to assist them in assessing the financial strength and overall quality of the companies from which they purchase insurance. The ratings for NLIC and ASIC of A (Excellent) were affirmed by A.M. Best in April 2013. An A rating is the third highest of 16 rating categories used by A.M. Best. In evaluating a company's financial and operating performance, A.M. Best reviews a company's profitability, leverage and liquidity, as well as its book of business, the adequacy and soundness of its reinsurance, the quality and estimated market value of its assets, the adequacy of its liabilities for losses and loss adjustment expenses (LAE), the adequacy of its surplus, its capital structure, the experience and competence of its management and its market presence. This rating assignment is subject to the ability to meet A.M. Best's expectations as to performance and capitalization on an ongoing basis, and is subject to revocation or revision at any time at the sole discretion of A.M. Best. NLC cannot ensure that NLIC and ASIC will maintain their present ratings.

Product Lines. NLC's business is conducted in two product lines: personal lines and commercial lines. The personal lines include homeowners, dwelling fire, manufactured home, flood and vacant policies. The commercial lines include

Table of Contents

commercial multi-peril, builders risk, builders risk renovation, sports liability and inland marine policies.

The NLC companies specialize in writing fire and homeowners insurance coverage for low value dwellings and manufactured homes. The vast majority of NLC's property coverage is written on policies that provide actual cash value payments, as opposed to replacement cost. Under actual cash value policies, the insured is entitled to receive only the cost of replacing or repairing damaged or destroyed property with comparable new property, less depreciation. Replacement cost does not include such a deduction for depreciation. In 2010, NLC expanded its homeowners insurance products to include replacement cost coverage, which also includes limited water coverage. These new products have been marketed and sold primarily in Texas. The development and implementation of these new products contributed to the premium growth at NLC since 2011. Rate increases and exposure management are expected to moderate future policy growth.

Underwriting and Pricing. NLC applies its regional expertise, underwriting discipline and a risk-adjusted, return-on-equity-based approach to capital allocation to primarily offer short-tail insurance products in its target markets. NLC's underwriting process involves securing an adequate level of underwriting information from its independent agents, identifying and evaluating risk exposures and then pricing the risks it chooses to accept. Management reviews pricing on an ongoing basis to monitor any emerging issues on a specific coverage or geographic territory.

Catastrophe Exposure. NLC maintains a comprehensive risk management strategy, which includes actively monitoring its catastrophe prone territories by zip code to ensure a diversified book of risks. NLC utilizes software and risk support from its reinsurance brokers to analyze its portfolio and catastrophe exposure. Biannually, NLC has its entire portfolio analyzed by its reinsurance broker who utilizes hurricane and severe storm models to predict risk.

Reinsurance. NLC purchases reinsurance to reduce its exposure to liability on individual risks and claims and to protect against catastrophe losses. NLC's management believes that less volatile, yet reasonable returns are in the long-term interest of NLC.

Reinsurance involves an insurance company transferring, or ceding, a portion of its risk to another insurer, the reinsurer. The reinsurer assumes the exposure in return for a portion of the premium. The ceding of risk to a reinsurer does not legally discharge the primary insurer from its liability for the full amount of the policies on which it obtains reinsurance. Accordingly, the primary insurer remains liable for the entire loss if the reinsurer fails to meet its obligations under the reinsurance agreement, and as a result, the primary insurer is exposed to the risk of non-payment by its reinsurers. In formulating its reinsurance programs, NLC believes that it is selective in its choice of reinsurers and considers numerous factors, the most important of which are the financial stability of the reinsurer, its history of responding to claims and its overall reputation.

NLC purchases catastrophe excess of loss reinsurance to a limit that exceeds the Hurricane 200-year return time as modeled by RMS Risk Link v.13.0 and equals the Hurricane 500-year return time as modeled by AIR Classic v.15.0.

Liabilities for Unpaid Losses and Loss Adjustment Expenses. NLC's liabilities for losses and loss adjustment expenses include liabilities for reported losses, liabilities for incurred but not reported, or IBNR, losses and liabilities for LAE, less a reduction for reinsurance recoverables related to those liabilities. The amount of liabilities for reported claims is based primarily on a claim-by-claim evaluation of coverage, liability, injury severity or scope of property damage, and any other information considered relevant to estimating exposure presented by the claim. The amounts of liabilities for IBNR losses and LAE are estimated on the basis of historical trends, adjusted for changes in loss costs, underwriting

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

standards, policy provisions, product mix and other factors. Estimating the liability for unpaid losses and LAE is inherently judgmental and is influenced by factors that are subject to significant variation. Liabilities for LAE are intended to cover the ultimate cost of settling claims, including investigation and defense of lawsuits resulting from such claims. Based upon the contractual terms of the reinsurance agreements, reinsurance recoverables offset, in part, NLC's gross liabilities.

Significant periods of time can elapse between the occurrence of an insured loss, the reporting of the loss to the insurer and the insurer's payment of that loss. NLC's liabilities for unpaid losses represent the best estimate at a given point in time of what it expects to pay claimants, based on facts, circumstances and historical trends then known. During the loss settlement period, additional facts regarding individual claims may become known and, consequently, it often becomes necessary to refine and adjust the estimates of liability.

Loss Development. The following tables set forth the annual calendar year-end reserves of NLIC and ASIC since 2004 and the subsequent development of these reserves through December 31, 2013. These tables present accident year development data. The first line of each table shows, for the years indicated, net liability, including IBNR, as originally estimated. The next section sets forth the re-estimates in later years of incurred losses, including payments, for the years indicated. The

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

Table of Contents

changes in the original estimate are caused by a combination of factors, including: (1) claims being settled for amounts different than originally estimated; (2) the net liability being increased or decreased for claims remaining open as more information becomes known about those individual claims; and (3) more or fewer claims being reported after December 31, 2004 than had occurred prior to that date. The bottom section of the table shows, by year, the cumulative amounts of net losses and LAE paid as of the end of each succeeding year.

The net cumulative redundancy (deficiency) represents, as of December 31, 2013, the difference between the latest re-estimated net liability and the net liability as originally estimated for losses and LAE retained by us. A redundancy means the original estimate was higher than the current estimate; and a deficiency means that the original estimate was lower than the current estimate. The following loss development tables for NLIC and ASIC are presented net of reinsurance recoverable (in thousands).

Table of Contents

Please refer to Note 28 in the notes to consolidated financial statements for a reconciliation of the reserves presented in the tables above to the reserves for losses and loss adjustment expenses set forth in the consolidated balance sheets at December 31, 2013 and 2012.

Current loss reserve development has been generally favorable with the exception of accident year 2012. Accident years 2007 through 2011 have shown cumulative favorable loss development of \$3.8 million through December 31, 2013. Accident year 2012 had net unfavorable loss development of \$0.5 million, with unfavorable development of \$0.8 million at NLIC, offset by favorable loss development of \$0.3 million at ASIC. The unfavorable loss development at NLIC is significantly attributable to extraordinary increases in losses from wind and hail losses and storms that occurred in Texas during 2012.

The following table is a reconciliation of the gross liability to net liability for losses and loss adjustment expenses (in thousands).

	2007	2008	2009	December 31, * 2010	2011	2012	2013
Gross unpaid losses	\$ 18,091	\$ 34,023	\$ 33,780	\$ 58,882	\$ 44,835	\$ 34,012	\$ 27,468
Reinsurance recoverable	(2,692)	(14,613)	(21,102)	(43,773)	(25,083)	(10,385)	(4,508)
Net unpaid losses	\$ 15,399	\$ 19,410	\$ 12,678	\$ 15,109	\$ 19,752	\$ 23,627	\$ 22,960

* Information is not presented for the periods ended prior to January 31, 2007, as that is the date Hilltop Holdings Inc. acquired the insurance operations.

The methods that our actuaries utilize to estimate ultimate loss and LAE amounts are the paid and reported loss development method and the paid and reported Bornhuetter-Ferguson method (the BF method). Insured losses for a given accident year change in value over time as additional information on claims is received, as claim conditions change and as new claims are reported. This process is commonly referred to as loss development. To project ultimate losses and LAE, our actuaries examine the paid and reported losses and LAE for each accident year and multiply these values by a loss development factor. The selected loss development factors are based upon a review of the loss development patterns indicated in the companies' historical loss triangles and applicable insurance industry loss development factors.

The BF method is a procedure that weights an expected ultimate loss and LAE amount, and the result of the loss development method. This method is useful when loss data is immature or sparse because it is not as sensitive as the loss development method to unusual variations in the paid or reported amounts. The BF method requires an initial estimate of expected ultimate losses and LAE. For each year, the expected ultimate losses and LAE is based on a review of the ultimate loss ratios indicated in the companies' historical data and applicable insurance industry ultimate loss ratios. Each loss development factor, paid or reported, implies a certain percent of the ultimate losses and LAE is still unpaid or unreported. The amounts of unpaid or unreported losses and LAE by year are estimated as the percentage unpaid or unreported, times the expected ultimate loss and LAE amounts. To project ultimate losses and LAE, the actual paid or reported losses and LAE to date are added to the estimated unpaid or unreported amounts.

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

The results of each actuarial method performed by year are reviewed to select an ultimate loss and LAE amount for each accident year. In general, more weight is given to the loss development projections for more mature accident periods and more weight is given to the BF methods for less mature accident periods.

The combination of the methodologies described above is used for all insurance lines of business, regardless of whether the line is a short-tailed or long-tailed line of business, though specific parameter selections within the methods vary to reflect the nature of the underlying line of business. ASIC and NLIC specialize in writing fire and extended coverage for low-value dwellings, mobile homes and homeowners, which generally are considered short-tailed coverages. In addition, ASIC and NLIC write a small amount of commercial risks, which are still predominantly property coverages, along with some low-limit liability coverages.

The reserve analysis performed by our actuaries provides preliminary central estimates of the unpaid losses and LAE. At each quarter-end, the results of the reserve analysis are summarized and discussed with our senior management. The senior management group considers many factors in determining the amount of reserves to record for financial statement purposes. These factors include the extent and timing of any recent catastrophic events, historical pattern and volatility of the actuarial indications, the sensitivity of the actuarial indications to changes in paid and reported loss patterns, the consistency of claims

Table of Contents

handling processes, the consistency of case reserving practices, changes in our pricing and underwriting, and overall pricing and underwriting trends in the insurance market.

In arriving at our best estimate of the unpaid losses and LAE, and based on management discussion with our actuaries, we would consider reasonably likely changes in the key assumptions, such as the underlying loss development pattern or the expected loss ratio, to have an impact on our best estimate by plus or minus 10%. At December 31, 2013, this equates to approximately plus or minus \$2.3 million, or 1.8% of insurance segment equity, and 2.1% of calendar year 2013 insurance losses.

Financial Advisory

Our financial advisory segment operates through First Southwest. FSC, a wholly owned subsidiary of First Southwest, is a diversified investment banking firm and a registered broker-dealer with the SEC and the Financial Industry Regulatory Authority (FINRA). First Southwest's primary focus is on providing public finance services.

At December 31, 2013, First Southwest employed approximately 400 people and maintained 25 locations nationwide, nine of which are in Texas. At December 31, 2013, First Southwest had consolidated assets of \$520.4 million, maintained \$118.9 million in equity capital and had more than 1,600 public sector clients.

First Southwest has four primary lines of business: (i) public finance, (ii) capital markets, (iii) correspondent clearing services, and (iv) asset management.

Public Finance. First Southwest's public finance group represents its largest department. This group advises cities, counties, school districts, utility districts, tax increment zones, special districts, state agencies and other governmental entities nationwide. In addition, the group provides specialized advisory and investment banking services for airports, convention centers, healthcare institutions, institutions of higher education, housing, industrial development agencies, toll road authorities, and public power and utility providers.

Capital Markets. Through its capital markets group, First Southwest trades fixed income securities to support sales and other customer activities, underwrites tax-exempt and taxable fixed income securities and trades equities on an agency basis on behalf of its retail and institutional clients. In addition, First Southwest provides asset and liability management advisory services to community banks.

Correspondent Clearing Services. The correspondent clearing services group offers omnibus and fully disclosed clearing services to FINRA member firms for trade executing, clearing and back office services. Services are provided to approximately 80 correspondent firms.

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

Asset Management. First Southwest Asset Management is an investment advisor registered under the Investment Advisers Act of 1940 providing state and local governments with advice and assistance with respect to arbitrage rebate compliance, portfolio management and local government investment pool administration. In the area of arbitrage rebate, First Southwest Asset Management advises municipalities with respect to the emerging regulations relating to arbitrage rebates. Further, First Southwest Asset Management assists governmental entities with the complexities of investing public funds in the fixed income markets. As an investment adviser registered with the SEC, First Southwest Asset Management promotes cash management-based investment strategies that seek to adhere to the standards imposed by the fiduciary responsibilities of investment officers of public funds. At December 31, 2013, First Southwest Asset Management served as investment manager of \$6.9 billion in short-term fixed income portfolios of municipal governments and investment adviser for \$5.6 billion invested by municipal governments, and a group within FSC served as administrator for local government investment pools totaling \$7.7 billion.

Competition

We face significant competition with respect to the business segments in which we operate and the geographic markets we serve. Many of our competitors have substantially greater financial resources, lending limits and larger branch networks than we do, and offer a broader range of products and services.

Our lending and mortgage origination competitors include commercial banks, savings banks, savings and loan associations, credit unions, finance companies, pension trusts, mutual funds, insurance companies, mortgage bankers and brokers, brokerage and investment banking firms, asset-based non-bank lenders, government agencies and certain other non-financial institutions. Competition for deposits and in providing lending and mortgage origination products and services to businesses

Table of Contents

in our market area is intense and pricing is important. Other factors encountered in competing for savings deposits are convenient office locations, interest rates and fee structures of products offered. Direct competition for savings deposits also comes from other commercial bank and thrift institutions, money market mutual funds and corporate and government securities that may offer more attractive rates than insured depository institutions are willing to pay. Competition for loans includes such additional factors as interest rates, loan origination fees and the range of services offered by the provider. We seek to distinguish ourselves from our competitors through our commitment to personalized customer service and responsiveness to customer needs while providing a range of competitive loan and deposit products and other services.

Our insurance business competes with a large number of other companies in its selected lines of business, including major U.S. and non-U.S. insurers, regional companies, mutual companies, specialty insurance companies, underwriting agencies and diversified financial services companies. The personal lines market in Texas is dominated by a few large carriers and their subsidiaries and affiliates. We seek to distinguish ourselves from our competitors by targeting underserved market segments that provide us with the best opportunity to obtain favorable policy terms, conditions and pricing.

We also face significant competition for financial advisory services on a number of factors, including price, perceived expertise, quality of advice, range of services, innovation and local presence. Our financial advisory business competes directly with numerous other financial advisory and investment banking firms, broker-dealers and banks, including large national and major regional firms and smaller niche companies, some of whom are not broker-dealers and, therefore, are not subject to the broker-dealer regulatory framework.

Employees

At December 31, 2013, we employed approximately 4,550 people, substantially all of which are full-time. None of our employees are represented by any collective bargaining unit or a party to any collective bargaining agreement.

Government Supervision and Regulation

General

We are subject to extensive regulation under federal and state laws. The regulatory framework is intended primarily for the protection of customers and clients of our financial advisory services, depositors, borrowers, the insurance funds of the FDIC and the Securities Investment Protection Corporation (the "SIPC") and the banking system as a whole, and not for the protection of our stockholders or creditors. In many cases, the applicable regulatory authorities have broad enforcement power over bank holding companies, banks and their subsidiaries, including the power to impose substantial fines and other penalties for violations of laws and regulations. The following discussion describes the material elements of the regulatory framework that applies to us and our subsidiaries. References in this Annual Report to applicable statutes and regulations are brief summaries thereof, do not purport to be complete, and are qualified in their entirety by reference to such statutes and regulations.

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

Recent Regulatory Developments. New regulations and statutes are regularly proposed and/or adopted that contain wide-ranging proposals for altering the structures, regulations and competitive relationships of financial institutions operating and doing business in the United States. Certain of these recent proposals and changes are described below.

On July 21, 2010, President Obama signed into law the Dodd-Frank Act. The Dodd-Frank Act aims to restore responsibility and accountability to the financial system by significantly altering the regulation of financial institutions and the financial services industry. Most of the provisions contained in the Dodd-Frank Act have delayed effective dates. Full implementation of the Dodd-Frank Act will require many new rules to be issued by federal regulatory agencies over the next several years, which will profoundly affect how financial institutions will be regulated in the future. The ultimate effect of the Dodd-Frank Act and its implementing regulations on the financial services industry in general, and on us in particular, is uncertain at this time.

The Dodd-Frank Act, among other things:

- Established the Consumer Financial Protection Bureau (the CFPB), an independent organization within the Federal Reserve which has the authority to promulgate consumer protection regulations applicable to all entities offering consumer financial products or services, including banks and mortgage originators. The CFPB has broad rule-making authority for a wide range of consumer protection laws, including the authority to prohibit unfair, deceptive or abusive acts and practices. The CFPB has exclusive examination authority and primary enforcement authority with respect to financial institutions with total assets of more than \$10.0 billion and their affiliates for

Table of Contents

purposes of federal consumer protection laws. After June 30, 2011, a financial institution becomes subject to the CFPB's exclusive examination authority and primary enforcement authority after it has reported total assets of greater than \$10.0 billion in its quarterly call reports for four consecutive quarters.

- Established the Financial Stability Oversight Council, tasked with the authority to identify and monitor institutions and systems which pose a systemic risk to the financial system, and to impose standards regarding capital, leverage, liquidity, risk management, and other requirements for financial firms.
- Changed the base for FDIC insurance assessments.
- Increased the minimum reserve ratio for the Deposit Insurance Fund from 1.15% to 1.35% (the FDIC subsequently increased it by regulation to 2.00%).
- Permanently increased the deposit insurance coverage amount from \$100,000 to \$250,000.
- Directed the Federal Reserve to establish interchange fees for debit cards pursuant to a restrictive reasonable and proportional cost per transaction standard.
- Limits the ability of banking organizations to sponsor or invest in private equity and hedge funds and to engage in proprietary trading in a provision known as the Volcker Rule.
- Grants the U.S. government authority to liquidate or take emergency measures with respect to troubled nonbank financial companies that fall outside the existing resolution authority of the FDIC, including the establishment of an orderly liquidation fund.
- Increases regulation of asset-backed securities, including a requirement that issuers of asset-backed securities retain at least 5% of the risk of the asset-backed securities.
- Increases regulation of consumer protections regarding mortgage originations, including banker compensation, minimum repayment standards, and prepayment consideration.

- Establishes new disclosure and other requirements relating to executive compensation and corporate governance.

On June 21, 2010, the Federal Reserve Board, the Office of the Comptroller of the Currency, the Office of Thrift Supervision and the FDIC jointly issued comprehensive final guidance on incentive compensation policies (the Incentive Compensation Guidance) intended to ensure that the incentive compensation policies of banking organizations do not undermine the safety and soundness of such organizations by encouraging excessive risk-taking. The Incentive Compensation Guidance sets expectations for banking organizations concerning their incentive compensation arrangements and related risk-management, control and governance processes. The Incentive Compensation Guidance, which covers all employees that have the ability to materially affect the risk profile of an organization, either individually or as part of a group, is based upon three primary principles: (i) balanced risk-taking incentives, (ii) compatibility with effective controls and risk management, and (iii) strong corporate governance. Any deficiencies in compensation practices that are identified may be incorporated into the organization's supervisory ratings, which can affect its ability to make acquisitions or perform other actions. In addition, under the Incentive Compensation Guidance, a banking organization's federal supervisor may initiate enforcement action if the organization's incentive compensation arrangements pose a risk to the safety and soundness of the organization.

On April 14, 2011, the Federal Reserve Board and various other federal agencies published a notice of proposed rulemaking implementing provisions of the Dodd-Frank Act that would require reporting of incentive-based compensation arrangements by a covered financial institution and prohibit incentive-based compensation arrangements at a covered financial institution that provide excessive compensation or that could expose the institution to inappropriate risks that could lead to material financial loss. The Dodd-Frank Act defines covered financial institution to include, among other entities, a depository institution or depository institution holding company that has \$1 billion or more in assets. There are enhanced requirements for institutions with more than \$50 billion in assets. The proposed rule states that it is consistent with the Incentive Compensation Guidance.

On January 10, 2013, the CFPB issued a final rule to implement the qualified mortgage, or QM provisions of the Dodd-Frank Act requiring mortgage lenders to consider consumers' ability to repay home loans before extending them credit. The final rule describes certain minimum requirements for creditors making ability-to-repay determinations, but does not dictate that they follow particular underwriting models. Lenders will be presumed to have complied with the ability-to-repay rule if they issue qualified mortgages, which are generally defined as mortgage loans prohibiting or limiting certain risky features. Loans that do not meet the ability-to-repay standard can be challenged in court by borrowers who default and the

Table of Contents

absence of ability-to-repay status can be used against a creditor in foreclosure proceedings. The CFPB's QM rule took effect on January 10, 2014.

We cannot predict whether or in what form any proposed regulation or statute will be adopted or the extent to which our business may be affected by any new regulation or statute.

Hilltop

Hilltop is a legal entity separate and distinct from PlainsCapital and its other subsidiaries. On November 30, 2012, concurrent with the consummation of the PlainsCapital Merger, Hilltop became a financial holding company registered under the Bank Holding Company Act, as amended by the Gramm-Leach-Bliley Act. Accordingly, it is subject to supervision, regulation and examination by the Federal Reserve Board. The Dodd-Frank Act, Gramm-Leach-Bliley Act, the Bank Holding Company Act and other federal laws subject financial and bank holding companies to particular restrictions on the types of activities in which they may engage and to a range of supervisory requirements and activities, including regulatory enforcement actions for violations of laws and regulations.

Changes of Control. Federal and state laws impose additional notice, approval and ongoing regulatory requirements on any investor that seeks to acquire direct or indirect control of a regulated holding company, such as Hilltop. These laws include the Bank Holding Company Act, the Change in Bank Control Act and the Texas Insurance Code. Among other things, these laws require regulatory filings by an investor that seeks to acquire direct or indirect control of a regulated holding company. The determination whether an investor controls a regulated holding company is based on all of the facts and circumstances surrounding the investment. As a general matter, an investor is deemed to control a depository institution or other company if the investor owns or controls 25% or more of any class of voting stock. Subject to rebuttal, an investor may be presumed to control the regulated holding company if the investor owns or controls 10% or more of any class of voting stock. Accordingly, these laws would apply to a person acquiring 10% or more of Hilltop's common stock. Furthermore, these laws may discourage potential acquisition proposals and may delay, deter or prevent change of control transactions, including those that some or all of our stockholders might consider to be desirable.

Regulatory Restrictions on Dividends; Source of Strength. It is the policy of the Federal Reserve Board that bank holding companies should pay cash dividends on common stock only out of income available over the past year and only if prospective earnings retention is consistent with the organization's expected future needs and financial condition. The policy provides that bank holding companies should not maintain a level of cash dividends that undermines the bank holding company's ability to serve as a source of strength to its banking subsidiaries. The Dodd-Frank Act requires the regulatory agencies to issue regulations requiring that all bank and savings and loan holding companies serve as a source of financial and managerial strength to their subsidiary depository institutions by providing capital, liquidity and other support in times of financial stress; however, no such proposals have yet been published.

Under Federal Reserve Board policy, a bank holding company is expected to act as a source of financial strength to each of its banking subsidiaries and commit resources to their support. Such support may be required at times when, absent this Federal Reserve Board policy, a holding company may not be inclined to provide it. As discussed herein, a bank holding company, in certain circumstances, could be required to guarantee the capital plan of an undercapitalized banking subsidiary.

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

Scope of Permissible Activities. Under the Bank Holding Company Act, Hilltop and PlainsCapital generally may not acquire a direct or indirect interest in, or control of more than 5% of, the voting shares of any company that is not a bank or bank holding company. Additionally, the Bank Holding Company Act may prohibit Hilltop from engaging in activities other than those of banking, managing or controlling banks or furnishing services to, or performing services for, its subsidiaries, except that it may engage in, directly or indirectly, certain activities that the Federal Reserve Board has determined to be closely related to banking or managing and controlling banks as to be a proper incident thereto. In approving acquisitions or the addition of activities, the Federal Reserve Board considers, among other things, whether the acquisition or the additional activities can reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh such possible adverse effects as undue concentration of resources, decreased or unfair competition, conflicts of interest or unsound banking practices.

Notwithstanding the foregoing, the Gramm-Leach-Bliley Act, effective March 11, 2000, eliminated the barriers to affiliations among banks, securities firms, insurance companies and other financial service providers and permits bank holding companies to become financial holding companies and thereby affiliate with securities firms and insurance companies and engage in other activities that are financial in nature. The Gramm-Leach-Bliley Act defines financial in nature to include: securities underwriting; dealing and market making; sponsoring mutual funds and investment companies;

Table of Contents

insurance underwriting and agency; merchant banking activities; and activities that the Federal Reserve Board has determined to be closely related to banking. Prior to enactment of the Dodd-Frank Act, regulatory approval was not required for a financial holding company to acquire a company, other than a bank or savings association, engaged in activities that were financial in nature or incidental to activities that were financial in nature, as determined by the Federal Reserve Board.

Under the Gramm-Leach-Bliley Act, a bank holding company may become a financial holding company by filing a declaration with the Federal Reserve Board if each of its subsidiary banks is well capitalized under the Federal Deposit Insurance Corporation Improvement Act prompt corrective action provisions, is well managed, and has at least a satisfactory rating under the Community Reinvestment Act of 1977 (the CRA). The Dodd-Frank Act underscores the criteria for becoming a financial holding company by amending the Bank Holding Company Act to require that bank holding companies be well capitalized and well managed in order to become financial holding companies. Hilltop became a financial holding company on December 1, 2012.

Safe and Sound Banking Practices. Bank holding companies are not permitted to engage in unsafe and unsound banking practices. The Federal Reserve Board's Regulation Y, for example, generally requires a holding company to give the Federal Reserve Board prior notice of any redemption or repurchase of its equity securities, if the consideration to be paid, together with the consideration paid for any repurchases or redemptions in the preceding year, is equal to 10% or more of the company's consolidated net worth. In addition, bank holding companies are required to consult with the Federal Reserve Board prior to making any redemption or repurchase, even within the foregoing parameters. The Federal Reserve Board may oppose the transaction if it believes that the transaction would constitute an unsafe or unsound practice or would violate any law or regulation. Depending upon the circumstances, the Federal Reserve Board could take the position that paying a dividend would constitute an unsafe or unsound banking practice.

The Federal Reserve Board has broad authority to prohibit activities of bank holding companies and their nonbanking subsidiaries that represent unsafe and unsound banking practices or that constitute violations of laws or regulations, and can assess civil money penalties for certain activities conducted on a knowing and reckless basis, if those activities caused a substantial loss to a depository institution. The penalties can be as high as \$1.425 million for each day the activity continues. In addition, the Dodd-Frank Act authorizes the Federal Reserve Board to require reports from and examine bank holding companies and their subsidiaries, and to regulate functionally regulated subsidiaries of bank holding companies.

Anti-tying Restrictions. Subject to various exceptions, bank holding companies and their affiliates are generally prohibited from tying the provision of certain services, such as extensions of credit, to certain other services offered by a bank holding company or its affiliates.

Capital Adequacy Requirements. The Federal Reserve Board has adopted a system using risk-based capital guidelines to evaluate the capital adequacy of bank holding companies. Under the guidelines, a risk weight factor of 0% to 100% is assigned to each category of assets based generally on the perceived credit risk of the asset class. The risk weights are then multiplied by the corresponding asset balances to determine a risk-weighted asset base. At least half of the risk-based capital must consist of core (Tier 1) capital, which is comprised of:

- common stockholders' equity (includes common stock and any related surplus, undivided profits, disclosed capital reserves that represent a segregation of undivided profits and foreign currency translation adjustments, excluding changes in other comprehensive income (loss));

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

- certain noncumulative perpetual preferred stock and related surplus; and
- minority interests in the equity capital accounts of consolidated subsidiaries (excludes goodwill and various intangible assets).

The remainder, supplementary (Tier 2) capital, may consist of:

- allowance for loan losses, up to a maximum of 1.25% of risk-weighted assets;
- certain perpetual preferred stock and related surplus;
- hybrid capital instruments;
- perpetual debt;
- mandatory convertible debt securities;
- term subordinated debt;

Table of Contents

- intermediate term preferred stock; and
- certain unrealized holding gains on equity securities.

Total capital is the sum of Tier 1 and Tier 2 capital. The guidelines require a minimum ratio of total capital to total risk-weighted assets of 8.0% (of which at least 4.0% is required to consist of Tier 1 capital elements). At December 31, 2013, our ratio of Tier 1 capital to total risk-weighted assets was 18.53% and our ratio of total capital to total risk-weighted assets was 19.13%.

In addition to the risk-based capital guidelines, the Federal Reserve Board uses a leverage ratio as an additional tool to evaluate the capital adequacy of bank holding companies. The leverage ratio is a company's Tier 1 capital divided by its average total consolidated assets. We are required to maintain a leverage ratio of 4.0%, and, at December 31, 2013, our leverage ratio was 12.81%.

The federal banking agencies' risk-based and leverage ratios are minimum supervisory ratios generally applicable to banking organizations that meet certain specified criteria, assuming that they have the highest regulatory rating. Banking organizations not meeting these criteria are expected to operate with capital positions well above the minimum ratios. The federal bank regulatory agencies may set capital requirements for a particular banking organization that are higher than the minimum ratios when circumstances warrant. Federal Reserve Board guidelines also provide that banking organizations experiencing internal growth or making acquisitions will be expected to maintain strong capital positions substantially above the minimum supervisory levels, without significant reliance on intangible assets.

The Dodd-Frank Act directs federal banking agencies to establish minimum leverage capital requirements and minimum risk-based capital requirements for insured depository institutions, depository institution holding companies, and nonbank financial companies supervised by the Federal Reserve Board. These minimum capital requirements may not be less than the generally applicable leverage and risk-based capital requirements applicable to insured depository institutions, in effect applying the same leverage and risk-based capital requirements that apply to insured depository institutions to most bank holding companies. The Dodd-Frank Act, for the first time, embeds in the law a leverage capital requirement as opposed to leaving it to the regulators to use a risk-based capital requirement. However, it is left to the discretion of the agencies to set the leverage ratio requirement through the rulemaking process.

Imposition of Liability for Undercapitalized Subsidiaries. Bank regulators are required to take prompt corrective action to resolve problems associated with insured depository institutions whose capital declines below certain levels. In the event an institution becomes undercapitalized, it must submit a capital restoration plan. The capital restoration plan will not be accepted by the regulators unless each company having control of the undercapitalized institution guarantees the subsidiary's compliance with the capital restoration plan up to a certain specified amount. Any such guarantee from a depository institution's holding company is entitled to a priority of payment in bankruptcy.

The aggregate liability of the holding company of an undercapitalized bank is limited to the lesser of 5% of the institution's assets at the time it became undercapitalized or the amount necessary to cause the institution to be adequately capitalized. The bank regulators have greater power in situations where an institution becomes significantly or critically undercapitalized or fails to submit a capital restoration plan. For example, a bank holding company controlling such an institution can be required to obtain prior Federal Reserve Board approval of proposed dividends, or might be required to consent to a consolidation or to divest the troubled institution or other affiliates.

Acquisitions by Bank Holding Companies. The Bank Holding Company Act requires every bank holding company to obtain the prior approval of the Federal Reserve Board before it may acquire all or substantially all of the assets of any bank, or ownership or control of any voting shares of any bank, if after such acquisition it would own or control, directly or indirectly, more than 5% of the voting shares of such bank. In approving bank acquisitions by bank holding companies, the Federal Reserve Board is required to consider, among other things, the financial and managerial resources and future prospects of the bank holding company and the banks concerned, the convenience and needs of the communities to be served, and various competitive factors. In addition, the Dodd-Frank Act requires the Federal Reserve Board to consider the risk to the stability of the U.S. banking or financial system when evaluating acquisitions of banks and nonbanks under the Bank Holding Company Act. With respect to interstate acquisitions, the Dodd-Frank Act amends the Bank Holding Company Act by raising the standard by which interstate bank acquisitions are permitted from a standard that the acquiring bank holding company be adequately capitalized and adequately managed, to the higher standard of being well capitalized and well managed.

Table of Contents

Control Acquisitions. The Change in Bank Control Act prohibits a person or group of persons from acquiring control of a bank holding company unless the Federal Reserve Board has been notified and has not objected to the transaction. Under a rebuttable presumption established by the Federal Reserve Board, the acquisition of 10% or more of a class of voting stock of a bank holding company with a class of securities registered under Section 12 of the Exchange Act, would, under the circumstances set forth in the presumption, constitute acquisition of control of such company.

In addition, an entity is required to obtain the approval of the Federal Reserve Board under the Bank Holding Company Act before acquiring 25% (5% in the case of an acquirer that is a bank holding company) or more of any class of our outstanding common stock, or otherwise obtaining control or a controlling influence over us.

Emergency Economic Stabilization Act of 2008 and the Small Business Jobs Act of 2010. The U.S. Congress, the U.S. Department of the Treasury (U.S. Treasury) and the federal banking regulators took broad action beginning in early September 2008 to address volatility in the U.S. banking system. The Emergency Economic Stabilization Act of 2008 authorized the U.S. Treasury to purchase from financial institutions and their holding companies certain mortgage loans, mortgage-backed securities and certain other financial instruments, including debt and equity securities issued by financial institutions and their holding companies in the Troubled Asset Relief Program (TARP) Capital Purchase Program.

On December 19, 2008, PlainsCapital sold 87,631 shares of its Fixed Rate Cumulative Perpetual Stock, Series A and a warrant to purchase, upon net exercise, 4,382 shares of its Fixed Rate Cumulative Perpetual Stock, Series B to the U.S. Treasury for \$87.6 million pursuant to the TARP Capital Purchase Program. The U.S. Treasury immediately exercised its warrant on December 19, 2008, and PlainsCapital issued the underlying shares of its Series B Preferred Stock to the U.S. Treasury. On September 27, 2011, PlainsCapital entered into a Securities Purchase Agreement with the Secretary of the Treasury (the Purchase Agreement) pursuant to which PlainsCapital issued 114,068 shares of its newly designated Non-Cumulative Perpetual Preferred Stock, Series C for a total purchase price of \$114,068,000. The proceeds from the sale of PlainsCapital's Series C Preferred Stock were used to redeem and repurchase PlainsCapital's Series A and Series B Preferred Stock. PlainsCapital's Series C Preferred Stock was issued pursuant to the Small Business Lending Fund program, a \$30 billion fund established under the Small Business Jobs Act of 2010 that was created to encourage lending to small businesses by providing capital to qualified community banks with assets of less than \$10 billion. In connection with the PlainsCapital Merger, Hilltop assumed PlainsCapital's obligations under the Purchase Agreement and redeemed PlainsCapital's outstanding Series C Preferred Stock in exchange for the Non-Cumulative Perpetual Preferred Stock, Series B of Hilltop (the Hilltop Series B Preferred Stock).

On November 29, 2012, Hilltop filed with the State Department of Assessments and Taxation of the State of Maryland articles supplementary for the Hilltop Series B Preferred Stock, setting forth its terms. Holders of the Hilltop Series B Preferred Stock are entitled to noncumulative cash dividends at a fluctuating dividend rate based on the Bank's level of qualified small business lending (QSBL). The Hilltop Series B Preferred Stock is non-voting, except in limited circumstances, and ranks senior to Hilltop's common stock with respect to the payment of dividends and distribution of assets upon any liquidation, dissolution or winding up of Hilltop.

The terms of the Hilltop Series B Preferred Stock restrict Hilltop's ability to pay dividends on, make distributions with respect to, or redeem, purchase or acquire, or make a liquidation payment on its common stock and other Hilltop capital stock ranking junior to the Hilltop Series B Preferred Stock, and on other preferred stock and other stock ranking on a parity with the Hilltop Series B Preferred Stock, in the event that Hilltop does not declare dividends on the Hilltop Series B Preferred Stock during any dividend period.

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

The Hilltop Series B Preferred Stock qualifies as Tier 1 capital and is entitled to receive non-cumulative dividends, payable quarterly, on each January 1, April 1, July 1 and October 1. Until December 31, 2013, the dividend rate, as a percentage of the liquidation amount, fluctuated based upon changes in the level of QSBL by the Bank. From January 1, 2014 until March 26, 2016, the dividend rate is fixed at 5.0% based upon the Bank's level of QSBL at September 30, 2013. Beginning March 27, 2016, the dividend rate on any outstanding shares of Hilltop Series B Preferred Stock will be fixed at nine percent (9%) per annum.

Table of Contents

Except as noted in the next sentence, the Hilltop Series B Preferred Stock may be redeemed at any time at the Company's option, at a redemption price of 100 percent of the liquidation amount plus accrued but unpaid dividends to the date of redemption for the current period, subject to approval of the Federal Reserve Board. In the agreement and plan of merger with PlainsCapital Corporation, the Company agreed not to redeem or otherwise acquire the Hilltop Series B Preferred Stock prior to the second anniversary of the closing date of the PlainsCapital Merger, or November 30, 2014. For more information, see Risk Factors. The Treasury's investment in us imposes restrictions and obligations upon us that could adversely affect the rights of our common stockholders.

Governmental Monetary Policies. Our earnings are affected by domestic economic conditions and the monetary and fiscal policies of the U.S. government and its agencies. The monetary policies of the Federal Reserve Board have had, and are likely to continue to have, an important impact on the operating results of commercial banks through its power to implement national monetary policy in order, among other things, to curb inflation or combat a recession. The monetary policies of the Federal Reserve Board affect the levels of bank loans, investments and deposits through its influence over the issuance of U.S. government securities, its regulation of the discount rate applicable to member banks and its influence over reserve requirements to which member banks are subject. We cannot predict the nature or impact of future changes in monetary and fiscal policies.

PlainsCapital Bank

The Bank is subject to various requirements and restrictions under the laws of the United States, and to regulation, supervision and regular examination by the Texas Department of Banking. The Bank, as a state member bank, is also subject to regulation and examination by the Federal Reserve Board. As a bank with less than \$10 billion in assets, the Bank became subject to the regulations issued by the CFPB on July 21, 2011, although the Federal Reserve Board continued to examine the Bank for compliance with federal consumer protection laws. As of December 31, 2013, the Bank's total assets were \$8.0 billion. If the Bank's total assets were to increase, either organically or through an acquisition, merger or combination, to over \$10.0 billion (as measured on four consecutive quarterly call reports of the Bank and any institutions it acquires), the Bank would become subject to the CFPB's supervisory and enforcement authority with respect to federal consumer financial laws beginning in the following quarter. The Bank is also an insured depository institution and, therefore, subject to regulation by the FDIC, although the Federal Reserve Board is the Bank's primary federal regulator. The Federal Reserve Board, the Texas Department of Banking, the CFPB and the FDIC have the power to enforce compliance with applicable banking statutes and regulations. Such requirements and restrictions include requirements to maintain reserves against deposits, restrictions on the nature and amount of loans that may be made and the interest that may be charged thereon and restrictions relating to investments and other activities of the Bank. In July 2010, the FDIC voted to revise its Memorandum of Understanding with the primary federal regulators to enhance the FDIC's existing backup authorities over insured depository institutions that the FDIC does not directly supervise. As a result, the Bank may be subject to increased supervision by the FDIC.

Restrictions on Transactions with Affiliates. Transactions between the Bank and its nonbanking affiliates, including Hilltop and PlainsCapital, are subject to Section 23A of the Federal Reserve Act. In general, Section 23A imposes limits on the amount of such transactions, and also requires certain levels of collateral for loans to affiliated parties. It also limits the amount of advances to third parties that are collateralized by the securities or obligations of Hilltop or its subsidiaries. Among other changes, the Dodd-Frank Act expands the definition of "covered transactions" and clarifies the amount of time that the collateral requirements must be satisfied for covered transactions, and amends the definition of "affiliate" in Section 23A to include "any investment fund with respect to which a member bank or an affiliate thereof is an investment advisor."

Affiliate transactions are also subject to Section 23B of the Federal Reserve Act, which generally requires that certain transactions between the Bank and its affiliates be on terms substantially the same, or at least as favorable to the Bank, as those prevailing at the time for comparable transactions with or involving other nonaffiliated persons. The Federal Reserve has also issued Regulation W, which codifies prior regulations under Sections 23A and 23B of the Federal Reserve Act and interpretive guidance with respect to affiliate transactions.

Loans to Insiders. The restrictions on loans to directors, executive officers, principal stockholders and their related interests (collectively referred to herein as "insiders") contained in the Federal Reserve Act and Regulation O apply to all insured institutions and their subsidiaries and holding companies. These restrictions include limits on loans to one borrower and conditions that must be met before such a loan can be made. There is also an aggregate limitation on all loans to insiders and their related interests. These loans cannot exceed the institution's total unimpaired capital and surplus, and the Federal Reserve Board may determine that a lesser amount is appropriate. Insiders are subject to enforcement actions for knowingly accepting loans in violation of applicable restrictions. The Dodd-Frank Act amends the statutes placing limitations on loans to insiders by including credit exposures to the person arising from a derivatives transaction, repurchase agreement, reverse

Table of Contents

repurchase agreement, securities lending transaction, or securities borrowing transaction between the member bank and the person within the definition of an extension of credit.

Restrictions on Distribution of Subsidiary Bank Dividends and Assets. Dividends paid by the Bank have provided a substantial part of PlainsCapital's operating funds and for the foreseeable future it is anticipated that dividends paid by the Bank to PlainsCapital will continue to be PlainsCapital's and Hilltop's principal source of operating funds. Capital adequacy requirements serve to limit the amount of dividends that may be paid by the Bank. Pursuant to the Texas Finance Code, a Texas banking association may not pay a dividend that would reduce its outstanding capital and surplus unless it obtains the prior approval of the Texas Banking Commissioner. Additionally, the FDIC and the Federal Reserve Board have the authority to prohibit Texas state banks from paying a dividend when they determine the dividend would be an unsafe or unsound banking practice. As a member of the Federal Reserve System, the Bank must also comply with the dividend restrictions with which a national bank would be required to comply. Those provisions are generally similar to those imposed by the state of Texas. Among other things, the federal restrictions require that if losses have at any time been sustained by a bank equal to or exceeding its undivided profits then on hand, no dividend may be paid.

In the event of a liquidation or other resolution of an insured depository institution, the claims of depositors and other general or subordinated creditors are entitled to a priority of payment over the claims of holders of any obligation of the institution to its stockholders, including any depository institution holding company (such as PlainsCapital and Hilltop) or any stockholder or creditor thereof.

Branching. The establishment of a branch must be approved by the Texas Department of Banking and the Federal Reserve Board, which consider a number of factors, including financial history, capital adequacy, earnings prospects, character of management, needs of the community and consistency with corporate powers. The regulators will also consider the applicant's CRA record.

Interstate Branching. Effective June 1, 1997, the Riegle-Neal Interstate Banking and Branching Efficiency Act of 1994 (the "Riegle-Neal Act") amended the Federal Deposit Insurance Act and certain other statutes to permit state and national banks with different home states to merge across state lines, with approval of the appropriate federal banking agency, unless the home state of a participating bank had passed legislation prior to May 31, 1997 expressly prohibiting interstate mergers. Under the Riegle-Neal Act amendments, once a state or national bank has established branches in a state, that bank may establish and acquire additional branches at any location in the state at which any bank involved in the interstate merger transaction could have established or acquired branches under applicable federal or state law. If a state opted out of interstate branching within the specified time period, no bank in any other state may establish a branch in the state which has opted out, whether through an acquisition or de novo. Under the Dodd-Frank Act, de novo interstate branching by national banks is permitted if, under the laws of the state where the branch is to be located, a state bank chartered in that state would have been permitted to establish a branch.

Prompt Corrective Action. The Federal Deposit Insurance Corporation Improvement Act of 1991 establishes a system of prompt corrective action to resolve the problems of undercapitalized financial institutions. Under this system, the federal banking regulators have established five capital categories (well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized and critically undercapitalized) in which all institutions are placed. Federal banking regulators are required to take various mandatory supervisory actions and are authorized to take other discretionary actions with respect to institutions in the three undercapitalized categories. The severity of the action depends upon the capital category in which the institution is placed. Generally, subject to a narrow exception, the banking regulator must appoint a receiver or conservator for an institution that is critically undercapitalized. The federal banking agencies have specified by regulation the relevant capital level for each category.

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

An institution that is categorized as undercapitalized , significantly undercapitalized or critically undercapitalized is required to submit an acceptable capital restoration plan to its appropriate federal banking agency. A bank holding company must guarantee that a subsidiary depository institution meets its capital restoration plan, subject to various limitations. The controlling holding company's obligation to fund a capital restoration plan is limited to the lesser of 5% of an undercapitalized subsidiary's assets at the time it became undercapitalized or the amount required to meet regulatory capital requirements. An undercapitalized institution is also generally prohibited from increasing its average total assets, making acquisitions, establishing any branches or engaging in any new line of business, except under an accepted capital restoration plan or with FDIC approval. The regulations also establish procedures for downgrading an institution to a lower capital category based on supervisory factors other than capital.

FDIC Insurance Assessments. The FDIC has adopted a risk-based assessment system for insured depository institutions that takes into account the risks attributable to different categories and concentrations of assets and liabilities. The system assigns

Table of Contents

an institution to one of three capital categories: (1) well capitalized; (2) adequately capitalized; or (3) undercapitalized. These three categories are substantially similar to the prompt corrective action categories described above, with the undercapitalized category including institutions that are undercapitalized, significantly undercapitalized and critically undercapitalized for prompt corrective action purposes. The FDIC also assigns an institution to one of three supervisory subgroups based on a supervisory evaluation that the institution's primary federal regulator provides to the FDIC and information that the FDIC determines to be relevant to the institution's financial condition and the risk posed to the deposit insurance funds. The FDIC may terminate its insurance of deposits if it finds that the institution has engaged in unsafe and unsound practices, is in an unsafe or unsound condition to continue operations, or has violated any applicable law, regulation, rule, order or condition imposed by the FDIC.

In 2009, the FDIC adopted a final rule requiring a special assessment on insured institutions as part of its effort to rebuild the FDIC deposit insurance fund (DIF). The FDIC administers the DIF, and all insured depository institutions are required to pay assessments to the FDIC that fund the DIF. The Dodd-Frank Act broadens the base for FDIC insurance assessments. Assessments will now be based on the average consolidated total assets less tangible equity capital of a financial institution during the assessment period. On February 7, 2011, the FDIC issued a final rule implementing revisions to the assessment system mandated by the Dodd-Frank Act. The new regulation was effective April 1, 2011 and was reflected in the June 30, 2011 FDIC DIF balance and the invoices for assessments due September 30, 2011. Accruals for DIF assessments were \$1.0 million for the year ended December 31, 2013.

The FDIC is required to maintain a designated reserve ratio of the DIF to insured deposits in the United States. The Dodd-Frank Act requires the FDIC to assess insured depository institutions to achieve a DIF ratio of at least 1.35 percent by September 30, 2020. Pursuant to its authority in the Dodd-Frank Act, the FDIC on December 20, 2010, published a final rule establishing a higher long-term target DIF ratio of greater than 2%. Deposit insurance assessment rates are subject to change by the FDIC and will be impacted by the overall economy and the stability of the banking industry as a whole. The FDIC will notify the Bank concerning an assessment rate that we will be charged for the assessment period. As a result of the new regulations, we expect to incur higher annual deposit insurance assessments, which could have a significant adverse impact on our financial condition and results of operations.

The Dodd-Frank Act permanently increased the standard maximum deposit insurance amount from \$100,000 to \$250,000. The FDIC insurance coverage limit applies per depositor, per insured depository institution for each account ownership category.

The Dodd-Frank Act instituted, for all insured depository institutions, unlimited deposit insurance on noninterest-bearing transaction accounts for the period from December 31, 2010 through December 31, 2012 for all depositors, including consumers, businesses and government entities. This unlimited insurance coverage, which expired on December 31, 2012, was separate from, and in addition to, the insurance coverage provided to a depositor's other deposit accounts held at an FDIC-insured institution up to the permissible limit of \$250,000.

Community Reinvestment Act. The CRA requires, in connection with examinations of financial institutions, that federal banking regulators (in the Bank's case, the Federal Reserve Board) evaluate the record of each financial institution in meeting the credit needs of its local community, including low and moderate-income neighborhoods. These facts are also considered in evaluating mergers, acquisitions and applications to open a branch or facility. Failure to adequately meet these criteria could impose additional requirements and limitations on the Bank. Additionally, the Bank must publicly disclose the terms of various CRA-related agreements.

During the second quarter of 2013, the Bank received a satisfactory CRA rating in connection with its most recent CRA performance evaluation. A CRA rating of less than satisfactory adversely affects a bank's ability to establish new branches and impairs a bank's ability to commence new activities that are financial in nature or acquire companies engaged in these activities. See Risk factors We are subject to extensive supervision

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

and regulation that could restrict our activities and impose financial requirements or limitations on the conduct of our business and limit our ability to generate income.

Privacy. Under the Gramm-Leach-Bliley Act, financial institutions are required to disclose their policies for collecting and protecting confidential information. Customers generally may prevent financial institutions from sharing nonpublic personal financial information with nonaffiliated third parties except under narrow circumstances, such as the processing of transactions requested by the consumer or when the financial institution is jointly sponsoring a product or service with a nonaffiliated third party. Additionally, financial institutions generally may not disclose consumer account numbers to any nonaffiliated third party for use in telemarketing, direct mail marketing or other marketing to consumers. The Bank and all of its subsidiaries have established policies and procedures to comply with the privacy provisions of the Gramm-Leach-Bliley Act.

Table of Contents

Federal Laws Applicable to Credit Transactions. The loan operations of the Bank are also subject to federal laws applicable to credit transactions, such as the:

- Truth-In-Lending Act, governing disclosures of credit terms to consumer borrowers;
- Home Mortgage Disclosure Act of 1975, requiring financial institutions to provide information to enable the public and public officials to determine whether a financial institution is fulfilling its obligation to help meet the housing needs of the community it serves;
- Equal Credit Opportunity Act, prohibiting discrimination on the basis of race, creed or other prohibited factors in extending credit;
- Fair Credit Reporting Act of 1978, governing the use and provision of information to credit reporting agencies and preventing identity theft;
- Fair Debt Collection Practices Act, governing the manner in which consumer debts may be collected by collection agencies;
- Service Members Civil Relief Act, which amended the Soldiers and Sailors Civil Relief Act of 1940, governing the repayment terms of, and property rights underlying, secured obligations of persons in military service;
- The Dodd-Frank Act, which establishes the CFPB, an independent entity within the Federal Reserve, dedicated to promulgating and enforcing consumer protection laws applicable to all entities offering consumer financial services or products; and
- The rules and regulations of the various federal agencies charged with the responsibility of implementing these federal laws.

Interest and other charges collected or contracted for by the Bank are subject to state usury laws and federal laws concerning interest rates.

Federal Laws Applicable to Deposit Operations. The deposit operations of the Bank are subject to:

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

- Right to Financial Privacy Act, which imposes a duty to maintain confidentiality of consumer financial records and prescribes procedures for complying with administrative subpoenas of financial records;
- Truth in Savings Act, which requires the Bank to disclose the terms and conditions on which interest is paid and fees are assessed in connection with deposit accounts; and
- Electronic Funds Transfer Act and Regulation E issued by the Federal Reserve Board and the CFPB to implement that act, which govern automatic deposits to and withdrawals from deposit accounts and customers' rights and liabilities arising from the use of ATMs and other electronic banking services. The Dodd-Frank Act amends the Electronic Funds Transfer Act to, among other things, give the Federal Reserve Board the authority to establish rules regarding interchange fees charged for electronic debit transactions by payment card issuers having assets over \$10 billion and to enforce a new statutory requirement that such fees be reasonable and proportional to the actual cost of a transaction to the issuer.

Capital Requirements. The Federal Reserve Board and the Texas Department of Banking monitor the capital adequacy of the Bank by using a combination of risk-based guidelines and leverage ratios. The agencies consider the Bank's capital levels when taking action on various types of applications and when conducting supervisory activities related to the safety and soundness of individual banks and the banking system.

Under the regulatory capital guidelines (without giving effect to Basel III discussed below), the Bank must maintain a total risk-based capital to risk-weighted assets ratio of at least 8.0%, a Tier 1 capital to risk-weighted assets ratio of at least 4.0%, and a Tier 1 capital to average total assets ratio of at least 4.0% (3.0% for banks receiving the highest examination rating) to be considered adequately capitalized. See the discussion herein under "The FDIC Improvement Act." At December 31, 2013, the Bank's ratio of total risk-based capital to risk-weighted assets was 14.00%, the Bank's ratio of Tier 1 capital to risk-weighted assets was 13.38% and the Bank's ratio of Tier 1 capital to average total assets was 9.29%.

BASEL III. In December 2010, the Basel Committee on Banking Supervision (the "Basel Committee") released revised final frameworks for the regulation of capital and liquidity of internationally active banking organizations. These new frameworks are generally referred to as "Basel III." On July 2, 2013, the Federal Reserve, the FDIC, and the Office of the

Table of Contents

Comptroller of the Currency released three final rules that substantially amend the regulatory risk-based capital rules applicable to the Company and the Bank. These final rules implement the Basel III regulatory capital reforms and changes required by the Dodd-Frank Act. Hilltop, PlainsCapital and the Bank will begin transitioning to the new final rules on January 1, 2015 when new minimum capital requirements, as set forth in the table below, are effective. However, the new capital conservation buffer and certain deductions from common equity Tier 1 capital phase in over a time period from 2015 through 2019.

The following table summarizes the Basel III transition schedule for new ratios and capital definitions beginning January 1, 2015.

Year (as of January 1)	2015	2016	2017	2018	2019
Minimum common equity Tier 1 capital ratio	4.5%	4.5%	4.5%	4.5%	4.5%
Common equity Tier 1 capital conservation buffer	N/A	0.625%	1.25%	1.875%	2.5%
Minimum common equity Tier 1 capital ratio plus capital conservation buffer	4.5%	5.125%	5.75%	6.375%	7.0%
Phase-in of most deductions from common equity Tier 1 (including 10 percent & 15 percent common equity Tier 1 threshold deduction items that are over the limits)(1)	40.0%	60.0%	80.0%	100.0%	100.0%
Minimum Tier 1 capital ratio	6.0%	6.0%	6.0%	6.0%	6.0%
Minimum Tier 1 capital ratio plus capital conservation buffer	N/A	6.625%	7.25%	7.875%	8.5%
Minimum total capital ratio	8.0%	8.0%	8.0%	8.0%	8.0%
Minimum total capital ratio plus conservation buffer	N/A	8.625%	9.25%	9.875%	10.5%

* N/A means not applicable.

(1) Deductions from common equity Tier 1 capital include goodwill and other intangibles, deferred tax assets that arise from net operating loss and tax credit carryforwards (above certain levels), gains-on-sale in connection with a securitization, any defined benefit pension fund net asset (for banking organizations that are not insured depository institutions), investments in a banking organization's own capital instruments, mortgage servicing assets (above certain levels) and investments in the capital of unconsolidated financial institutions (above certain levels).

The new final Basel III rules take important steps toward improving the quality and increasing the quantity of capital for all banking organizations as well as setting higher standards for large, internationally active banking organizations. The regulatory agencies believe that the new rules will result in capital requirements that better reflect banking organizations' risk profiles, thereby improving the overall resilience of the banking system. The regulatory agencies carefully considered the potential impacts on all banking organizations, including community banking organizations such as Hilltop and the Bank, and sought to minimize the potential burden of these changes where consistent with applicable law and the agencies' goals of establishing a robust and comprehensive capital framework.

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

The new final Basel III rules treatment of one- to four-family residential mortgage exposures remains the same as under current general risk-based capital rules. This includes a 50 percent risk weight for prudently underwritten first lien mortgage loans that are not past due, reported as nonaccrual, or restructured, and a 100 percent risk weight for all other residential mortgages. Also in the new rules, non-advanced approaches banking organizations, such as Hilltop and the Bank, are given a one-time option to filter certain Accumulated Other Comprehensive Income (AOCI) components, comparable to the treatment under the current general risk-based capital rule. The AOCI opt-out election must be made on the institution's first regulatory filing after January 1, 2015.

The new final Basel III rules also make certain major changes from the current general risk-based capital rules, including, but not limited to the following:

- Implementing higher minimum capital requirements, including a new common equity Tier 1 capital requirement, and establishes criteria that instruments must meet in order to be considered common equity Tier 1 capital, additional Tier 1 capital or Tier 2 capital. The new minimum capital to risk-weighted assets requirements are a common equity Tier 1 capital ratio of 4.5 percent and a Tier 1 capital ratio of 6.0 percent (an increase from 4.0

Table of Contents

percent), and a total capital ratio that remains at 8.0 percent. The minimum leverage ratio (Tier 1 capital to total assets) is 4.0 percent. The new rules maintain the general structure of the current prompt corrective action framework (described below) while incorporating these increased minimum requirements starting January 1, 2015.

- Changing the definition of capital by incorporating stricter eligibility criteria for regulatory capital instruments that would disallow the including of instruments such as trust preferred securities in Tier 1 capital going forward, and new constraints on the inclusion of minority interests, mortgage-servicing rights, deferred tax assets, and other certain investments in the capital of unconsolidated financial institutions. In addition, the new rules require that most regulatory capital deductions be made from common equity Tier 1 capital.
- The Dodd-Frank Act prohibits references to, and reliance on, external credit ratings in the banking regulations and directs the agencies to use alternative standards of creditworthiness. The new rules replace the ratings-based approach with a simplified supervisory formula approach in order to determine the appropriate risk-weights of securitization exposures. Alternatively, banking organizations may use the existing gross-up approach to assign securitization exposures to a risk weight category or choose to assign such exposures a 1,250 percent risk weight.
- Mortgage servicing assets and deferred tax assets are subject to stricter individual and aggregate limitations as a percentage of common equity Tier 1 capital than those applicable under the current general risk-based capital rules.
- Increasing the risk-weights for past-due loans, certain commercial real estate loans, and some equity exposures, and makes selected other changes in risk-weights and credit conversion factors.
- In order to avoid limitations on capital distributions, including dividend payments and certain discretionary bonus payments to executive officers, a banking organization must hold a capital conservation buffer composed of common equity Tier 1 capital above its minimum risk-based capital requirements. This buffer will help to ensure that banking organizations conserve capital when it is most needed, allowing them to better weather periods of economic stress. The buffer is measured relative to risk-weighted assets. Phase-in of the capital conservation buffer requirements will begin on January 1, 2016.

The following table summarizes how much a banking organization can pay out in the form of distributions or discretionary bonus payments in a quarter based on its capital conservation buffer. A banking organization with a buffer greater than 2.5 percent would not be subject to limits on capital distributions or discretionary bonus payments; however, a banking organization with a buffer of less than 2.5 percent would be subject to increasingly stringent limitations as the buffer approaches zero.

Capital Conservation Buffer (as a percentage of risk-weighted assets)	Maximum Payout (as a percentage of eligible retained income)
Greater than 2.5 percent	No payout limitation applies
Less than or equal to 2.5 percent and greater than 1.875 percent	60 percent
	40 percent

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

Less than or equal to 1.875 percent and greater than 1.25 percent	
Less than or equal to 1.25 percent and greater than 0.625 percent	20 percent
Less than or equal to 0.625 percent	0 percent

The new rules also prohibit a banking organization from making distributions or discretionary bonus payments during any quarter if its eligible retained income is negative in that quarter and its capital conservation buffer ratio was less than 2.5 percent at the beginning of the quarter. The eligible retained income of a banking organization is defined as its net income for the four calendar quarters preceding the current calendar quarter, based on the organization's quarterly regulatory reports, net of any distributions and associated tax effects not already reflected in net income. When the new rules are fully phased-in in 2019, the minimum capital requirements plus the capital conservation buffer will exceed the prompt corrective action well-capitalized thresholds.

On January 6, 2013, the Group of Governors and Heads of Supervision, the oversight body of the Basel Committee, met and unanimously endorsed a four year delay in the Basel Committee's rules establishing a liquidity coverage ratio (LCR).

Table of Contents

Under the revised liquidity requirements, large, internationally active banks would be required to meet 60 percent of the LCR obligations by 2015, and the full rule would be phased in annually through 2019. The proposal would also apply a less stringent, modified LCR to bank holding companies and savings and loan holding companies that are not internally active but have more than \$50 billion in total assets. The proposal would not apply to bank holding companies with less than \$50 billion in total assets. We continue to monitor developments related to Basel III.

FIRREA. The Financial Institutions Reform, Recovery and Enforcement Act of 1989, or FIRREA, includes various provisions that affect or may affect the Bank. Among other matters, FIRREA generally permits bank holding companies to acquire healthy thrifts as well as failed or failing thrifts. FIRREA removed certain cross marketing prohibitions previously applicable to thrift and bank subsidiaries of a common holding company. Furthermore, a multi-bank holding company may now be required to indemnify the DIF against losses it incurs with respect to such company's affiliated banks, which in effect makes a bank holding company's equity investments in healthy bank subsidiaries available to the FDIC to assist such company's failing or failed bank subsidiaries.

In addition, pursuant to FIRREA, any depository institution that has been chartered less than two years, is not in compliance with the minimum capital requirements of its primary federal banking regulator, or is otherwise in a troubled condition must notify its primary federal banking regulator of the proposed addition of any person to its board of directors or the employment of any person as a senior executive officer of the institution at least 30 days before such addition or employment becomes effective. During such 30 day period, the applicable federal banking regulatory agency may disapprove of the addition of or employment of such director or officer. The Bank is not subject to any such requirements. FIRREA also expanded and increased civil and criminal penalties available for use by the appropriate regulatory agency against certain institution affiliated parties primarily including: (i) management, employees and agents of a financial institution; (ii) independent contractors such as attorneys and accountants and others who participate in the conduct of the financial institution's affairs and who caused or are likely to cause more than minimum financial loss to or a significant adverse effect on the institution, who knowingly or recklessly violate a law or regulation, breach a fiduciary duty or engage in unsafe or unsound practices. Such practices can include the failure of an institution to timely file required reports or the submission of inaccurate reports. Furthermore, FIRREA authorizes the appropriate banking agency to issue cease and desist orders that may, among other things, require affirmative action to correct any harm resulting from a violation or practice, including restitution, reimbursement, indemnifications or guarantees against loss. A financial institution may also be ordered to restrict its growth, dispose of certain assets or take other action as determined by the ordering agency to be appropriate.

The FDIC Improvement Act. The Federal Deposit Insurance Corporation Improvement Act of 1991, or FDICIA, made a number of reforms addressing the safety and soundness of the deposit insurance system, supervision of domestic and foreign depository institutions, and improvement of accounting standards. This statute also limited deposit insurance coverage, implemented changes in consumer protection laws and provided for least-cost resolution and prompt regulatory action with regard to troubled institutions.

FDICIA requires every bank with total assets in excess of \$500 million to have an annual independent audit made of the bank's financial statements by a certified public accountant to verify that the financial statements of the bank are presented in accordance with GAAP and comply with such other disclosure requirements as prescribed by the FDIC.

FDICIA also places certain restrictions on activities of banks depending on their level of capital. FDICIA divides banks into five different categories, depending on their level of capital. Under regulations adopted by the FDIC:

- a bank is deemed to be well capitalized if it has a total Risk-Based Capital Ratio of 10.0% or more, a Tier 1 Capital Ratio of 6.0% or more, a Leverage Ratio of 5.0% or more, and the bank is not subject to an order or capital directive to meet and maintain a certain capital level;

- a bank is deemed to be adequately capitalized if it has a total Risk-Based Capital Ratio of 8.0% or more, a Tier 1 Capital Ratio of 4.0% or more and a Leverage Ratio of 4.0% or more (unless it receives the highest composite rating at its most recent examination and is not experiencing or anticipating significant growth, in which instance it must maintain a Leverage Ratio of 3.0% or more);
- a bank is deemed to be undercapitalized if it has a total Risk-Based Capital Ratio of less than 8.0%, a Tier 1 Capital Ratio of less than 4.0% or a Leverage Ratio of less than 4.0%;
- a bank is deemed to be significantly undercapitalized if it has a Risk-Based Capital Ratio of less than 6.0%, a Tier 1 Capital Ratio of less than 3.0% and a Leverage Ratio of less than 3.0%; and
- a bank is deemed to be critically undercapitalized if it has a Leverage Ratio of less than or equal to 2.0%.

Table of Contents

In addition, the FDIC has the ability to downgrade a bank's classification (but not to critically undercapitalized) based on other considerations even if the bank meets the capital guidelines. According to these guidelines, the Bank was classified as well capitalized at December 31, 2013.

In addition, if a bank is classified as undercapitalized, the bank is required to submit a capital restoration plan to the federal banking regulators. Pursuant to FDICIA, an undercapitalized bank is prohibited from increasing its assets, engaging in a new line of business, acquiring any interest in any company or insured depository institution, or opening or acquiring a new branch office, except under certain circumstances, including the acceptance by the federal banking regulators of a capital restoration plan for the bank.

Furthermore, if a bank is classified as undercapitalized, the federal banking regulators may take certain actions to correct the capital position of the bank; if a bank is classified as significantly undercapitalized or critically undercapitalized, the federal banking regulators would be required to take one or more prompt corrective actions. These actions would include, among other things, requiring: sales of new securities to bolster capital, improvements in management, limits on interest rates paid, prohibitions on transactions with affiliates, termination of certain risky activities and restrictions on compensation paid to executive officers. If a bank is classified as critically undercapitalized, FDICIA requires the bank to be placed into conservatorship or receivership within 90 days, unless the federal banking regulators determines that other action would better achieve the purposes of FDICIA regarding prompt corrective action with respect to undercapitalized banks.

The capital classification of a bank affects the frequency of examinations of the bank and impacts the ability of the bank to engage in certain activities and affects the deposit insurance premiums paid by such bank. Under FDICIA, the federal banking regulators are required to conduct a full-scope, on-site examination of every bank at least once every 12 months. An exception to this rule is made, however, that provides that banks (i) with assets of less than \$100 million, (ii) that are categorized as well capitalized, (iii) that were found to be well managed and composite rating was outstanding and (iv) have not been subject to a change in control during the last 12 months, need only be examined once every 18 months.

Brokered Deposits. Under FDICIA, banks may be restricted in their ability to accept brokered deposits, depending on their capital classification.

Well capitalized banks are permitted to accept brokered deposits, but banks that are not well capitalized are not permitted to accept such deposits. The FDIC may, on a case-by-case basis, permit banks that are adequately capitalized to accept brokered deposits if the FDIC determines that acceptance of such deposits would not constitute an unsafe or unsound banking practice with respect to the bank. At December 31, 2013, the Bank was well capitalized and therefore not subject to any limitations with respect to its brokered deposits. Brokered deposits are the subject of a study under the Dodd-Frank Act.

Federal limitations on activities and investments. The equity investments and activities, as a principle of FDIC-insured state-chartered banks, are generally limited to those that are permissible for national banks. Under regulations dealing with equity investments, an insured state bank generally may not directly or indirectly acquire or retain any equity investment of a type, or in an amount, that is not permissible for a national bank.

Check Clearing for the 21st Century Act. The Check Clearing for the 21st Century Act gives substitute checks, such as a digital image of a check and copies made from that image, the same legal standing as the original paper check.

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

Federal Home Loan Bank System. The Federal Home Loan Bank, or FHLB, system, of which the Bank is a member, consists of 12 regional FHLBs governed and regulated by the Federal Housing Finance Board. The FHLBs serve as reserve or credit facilities for member institutions within their assigned regions. The reserves are funded primarily from proceeds derived from the sale of consolidated obligations of the FHLB system. The FHLBs make loans (i.e., advances) to members in accordance with policies and procedures established by the FHLB and the boards of directors of each regional FHLB.

As a system member, according to currently existing policies and procedures, the Bank is entitled to borrow from the FHLB of its respective region and is required to own a certain amount of capital stock in the FHLB. The Bank is in compliance with the stock ownership rules with respect to such advances, commitments and letters of credit and home mortgage loans and similar obligations. All loans, advances and other extensions of credit made by the FHLB to the Bank are secured by a portion of the respective mortgage loan portfolio, certain other investments and the capital stock of the FHLB held by the Bank.

Anti-terrorism and Money Laundering Legislation. The Bank is subject to the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism of 2001 (the USA PATRIOT Act), the Bank Secrecy Act and rules and regulations of the Office of Foreign Assets Control. These statutes and related rules and regulations impose requirements and limitations on specific financial transactions and account relationships intended to

Table of Contents

guard against money laundering and terrorism financing. The Bank has established a customer identification program pursuant to Section 326 of the USA PATRIOT Act and the Bank Secrecy Act, and otherwise has implemented policies and procedures intended to comply with the foregoing rules.

PrimeLending

PrimeLending and the Bank are subject to the rules and regulations of the CFPB, FHA, VA, the Federal National Mortgage Association, the Federal Home Loan Mortgage Corporation and Government National Mortgage Association with respect to originating, processing, selling and servicing mortgage loans and the issuance and sale of mortgage-backed securities. Those rules and regulations, among other things, prohibit discrimination and establish underwriting guidelines which include provisions for inspections and appraisals, require credit reports on prospective borrowers and fix maximum loan amounts, and, with respect to VA loans, fix maximum interest rates. Mortgage origination activities are subject to, among others, the Equal Credit Opportunity Act, Federal Truth-in-Lending Act, Secure and Fair Enforcement of Mortgage Licensing Act, Home Mortgage Disclosure Act, Fair Credit Reporting Act and the Real Estate Settlement Procedures Act and the regulations promulgated thereunder which, among other things, prohibit discrimination and require the disclosure of certain basic information to borrowers concerning credit terms and settlement costs. PrimeLending and the Bank are also subject to regulation by the Texas Department of Banking with respect to, among other things, the establishment of maximum origination fees on certain types of mortgage loan products. PrimeLending and the Bank are also subject to the provisions of the Dodd-Frank Act. Among other things, the Dodd-Frank Act established the CFPB and provides mortgage reform provisions regarding a customer's ability to repay, restrictions on variable-rate lending, loan officers compensation, risk retention, and new disclosure requirements. The Dodd-Frank Act also clarifies that applicable state laws, rules and regulations related to the origination, processing, selling and servicing of mortgage loans continue to apply to PrimeLending. The additional regulatory requirements affecting our mortgage origination operations will result in increased compliance costs and may impact revenue.

On August 16, 2010, the Federal Reserve Board published a final rule on loan broker compensation, pursuant to the Dodd-Frank Act, which prohibits certain compensation payments to loan brokers and the practice of steering consumers to loans not in their interest when it will result in greater compensation for a loan broker. This final rule became effective on April 1, 2011, however, the Federal Reserve Board noted in the final rule that the CFPB may clarify the rule in the future pursuant to the CFPB's authority granted under the Dodd-Frank Act. The CFPB's final rule addressing mortgage loan originator compensation is discussed in more detail below.

In addition, the Dodd-Frank Act directed the Federal Reserve Board to promulgate regulations requiring lenders and securitizers to retain an economic interest in the credit risk relating to loans the lender sells and other asset-backed securities that the securitizer issues if the loans have not complied with the ability to repay standards spelled out in the Dodd-Frank Act and its implementing regulations. The risk retention requirement has not become effective to date but is expected to be 5%, subject to increase or decrease by regulation. Final regulations have not yet been issued.

On March 2, 2011, the Federal Reserve Board published a final rule implementing a provision in the Dodd-Frank Act that provides a separate, higher rate threshold for determining when the escrow requirements apply to higher-priced mortgage loans that exceed the maximum principal obligation eligible for purchase by Freddie Mac.

In January 2013, the CFPB published final rules that will impact mortgage origination and servicing. Had these final rules not been published, many of the statutory requirements in Title XIV of the Dodd-Frank Act would have become effective on January 21, 2013 without any implementing regulations. Unless noted below, these final rules became effective in January 2014.

The final rules concerning mortgage origination and servicing address the following topics:

Ability to Repay. This final rule implements the Dodd-Frank Act provisions requiring that for residential mortgages, creditors must make a reasonable and good faith determination based on verified and documented information that the consumer has a reasonable ability to repay the loan according to its terms. The final rule also establishes a presumption of compliance with the ability to repay determination for a certain category of mortgages called qualified mortgages meeting a series of detailed requirements. The final rule also provides a rebuttable presumption for higher-priced mortgage loans.

High-Cost Mortgage. This final rule strengthens consumer protections for high-cost mortgages (generally bans balloon payments and prepayment penalties, subject to exceptions and bans or limits certain fees and practices) and requires consumers to receive information about homeownership counseling prior to taking out a high-cost mortgage.

Table of Contents

Appraisals for High-Risk Mortgages. The final rule permits a creditor to extend a higher-priced (subprime) mortgage loan (HPML) only if the following conditions are met (subject to exceptions): (i) the creditor obtains a written appraisal; (ii) the appraisal is performed by a certified or licensed appraiser; and (iii) the appraiser conducts a physical property visit of the interior of the property. The rule also requires that during the application process, the applicant receives a notice regarding the appraisal process and their right to receive a free copy of the appraisal.

Copies of Appraisals. This final rule amends Regulation B that implements the Equal Credit Opportunity Act. It requires a creditor to provide a free copy of appraisal or valuation reports prepared in connection with any closed-end loan secured by a first lien on a dwelling. The final rule requires notice to applicants of the right to receive copies of any appraisal or valuation reports and creditors must send copies of the reports whether or not the loan transaction is consummated. Creditors must provide the copies of the appraisal or evaluation reports for free, however, the creditors may charge reasonable fees for the cost of the appraisal or valuation unless applicable law provides otherwise.

Escrow Requirements. This final rule implements Dodd-Frank Act changes that generally extend the required duration of an escrow account on certain higher-priced mortgage loans from a minimum of one year to a minimum of five years, subject to certain exemptions for loans made by certain creditors that operate predominantly in rural or underserved areas, as long as certain other criteria are met. This final rule became effective on June 1, 2013.

Servicing. Two final rules were published to implement laws to protect consumers from detrimental actions by mortgage servicers and to provide consumers with better tools and information when dealing with mortgage servicers. One final rule amends Regulation Z, which implements the Truth in Lending Act, and a second final rule amends Regulation X, which implements the Real Estate Settlement Procedures Act. The rules cover nine major topics implementing the Dodd-Frank Act provisions related to mortgage servicing. The final rules include a number of exemptions and other adjustments for small servicers, defined as servicers that service 5,000 or fewer mortgage loans and service only mortgage loans that they or an affiliate originated or own.

Mortgage Loan Originator Compensation. This final rule implements Dodd-Frank Act requirements, as well as revises and clarifies existing regulations and commentary on loan originator compensation. The rule also prohibits, among other things: (i) certain arbitration agreements; (ii) financing certain credit insurance in connection with a mortgage loan; (iii) compensation based on a term of a transaction or a proxy for a term of a transaction; and (iv) dual compensation from a consumer and another person in connection with the transaction. The final rule also imposes a duty on individual loan officers, mortgage brokers and creditors to be qualified and, when applicable, registered or licensed to the extent required under applicable State and Federal law.

Additional rules and regulations are expected including risk retention rules which would require lenders and securitizers to retain an economic interest in the credit risk relating to loans the lender sells and other asset-backed securities that the securitizer issues if the loans have not complied with the ability to repay standards spelled out in the Dodd-Frank Act and its implementing regulations. The risk retention requirement has not become effective to date but is expected to be 5%, subject to increase or decrease by regulation. Any additional regulatory requirements affecting PrimeLending mortgage origination operations will result in increased compliance costs and may impact revenue.

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

NLC's insurance subsidiaries, NLIC and ASIC, are subject to regulation and supervision in each state where they are licensed to do business. This regulation and supervision is vested in state agencies having broad administrative power over the various aspects of the business of NLIC and ASIC.

State insurance holding company regulation. NLC controls two operating insurance companies, NLIC and ASIC, and is subject to the insurance holding company laws of Texas, the state in which those insurance companies are domiciled. These laws generally require NLC to register with the Texas Department of Insurance and periodically to furnish financial and other information about the operations of companies within its holding company structure. Generally under these laws, all transactions between an insurer and an affiliated company in its holding company structure, including sales, loans, reinsurance agreements and service agreements, must be fair and reasonable and, if satisfying a specified threshold amount or of a specified category, require prior notice and approval or non-objection by the Texas Department of Insurance.

National Association of Insurance Commissioners. The National Association of Insurance Commissioners, or NAIC, is a group consisting of state insurance commissioners that discuss issues and formulate policy with respect to regulation, reporting and accounting for insurance companies. Although the NAIC has no legislative authority and insurance companies are at all times subject to the laws of their respective domiciliary states and, to a lesser extent, other states in which they

Table of Contents

conduct business, the NAIC is influential in determining the form in which such laws are enacted. Certain Model Insurance Laws, Regulations and Guidelines, or Model Laws, have been promulgated by the NAIC as a minimum standard by which state regulatory systems and regulations are measured. Adoption of state laws that provide for substantially similar regulations to those described in the Model Laws is a requirement for accreditation by the NAIC.

The NAIC provides authoritative guidance to insurance regulators on current statutory accounting issues by promulgating and updating a codified set of statutory accounting practices in its Accounting Practices and Procedures Manual. The Texas Department of Insurance has generally adopted these codified statutory accounting practices.

Texas also has adopted laws substantially similar to the NAIC's risk based capital, or RBC laws, which require insurers to maintain minimum levels of capital based on their investments and operations. Domestic property and casualty insurers are required to report their RBC based on a formula that attempts to measure statutory capital and surplus needs based on the risks in the insurer's mix of products and investment portfolio. The formula is designed to allow the Texas Department of Insurance to identify potential inadequately capitalized companies. Under the formula, a company determines its RBC by taking into account certain risks related to its assets (including risks related to its investment portfolio and ceded reinsurance) and its liabilities (including underwriting risks related to the nature and experience of its insurance business). Among other requirements, an insurance company must maintain capital and surplus of at least 200% of the RBC computed by the NAIC's RBC model (known as the Authorized Control Level of RBC). At December 31, 2013, NLIC and ASIC capital and surplus levels exceeded the minimum RBC requirements that would trigger regulatory attention. In their 2013 statutory financial statements, both NLIC and ASIC complied with the NAIC's RBC reporting requirements.

The NAIC's Insurance Regulatory Information System, or IRIS, was developed to assist state insurance departments in executing their statutory mandates to oversee the financial condition of insurance companies. IRIS identifies twelve industry ratios and specifies a range of usual values for each ratio. Departure from the usual values on four or more of these ratios can lead to inquiries from state insurance commissioners as to certain aspects of an insurer's business. For 2013, all ratios for both NLIC and ASIC were within the usual values with two exceptions. Both companies fell below the indicated minimum investment yield range of 3%, with NLIC at 2.0% and ASIC at 1.4%, due to the concentration in cash at each company. We expect improvement in the yields at both companies as appropriate investment opportunities are identified. Additionally, NLIC's two-year operating ratio was calculated at 100%, which equals the threshold of 100%, primarily due to the significant weather events experienced over the past two year period.

The NAIC adopted an amendment to its Model Audit Rule in response to the passage of the Sarbanes-Oxley Act of 2002, or SOX. The amendment is effective for financial statements for accounting periods after January 1, 2010. This amendment addresses auditor independence, corporate governance and, most notably, the application of certain provisions of Section 404 of SOX regarding internal control reporting. The rules relating to internal controls apply to insurers with gross direct and assumed written premiums of \$500 million or more, measured at the legal entity level (rather than at the insurance holding company level), and to insurers that the domiciliary commissioner selects from among those identified as in hazardous condition, but exempts SOX compliant entities. Neither NLIC nor ASIC currently has direct and assumed written premiums of at least \$500 million, but it is conceivable that this may change in the future; however, NLC must be SOX compliant because it is wholly owned by Hilltop, a public company subject to SOX compliance.

Legislative changes. From time to time, various regulatory and legislative changes have been, or are, proposed that would adversely affect the insurance industry. Among the proposals that have been, or are being, considered are the possible introduction of Federal regulation in addition to, or in lieu of, the current system of state regulation of insurers and proposals in various state legislatures (some of which proposals have been enacted) to conform portions of their insurance laws and regulations to various Model Laws adopted by the NAIC. NLC is unable to predict whether any of these laws and regulations will be adopted, the form in which any such laws and regulations would be adopted, or the effect, if any, these developments would have on its financial condition or results of operations.

In November 2002, in response to the tightening supply in certain insurance and reinsurance markets resulting from, among other things, the September 11, 2001 terrorist attacks, the Terrorism Risk Insurance Act, or TRIA, was enacted. TRIA was modified and extended by the Terrorism Risk Insurance Extension Act of 2005 and extended again by the Terrorism Risk Insurance Program Reauthorization Act of 2007. These Acts created a Federal Program designed to ensure the availability of commercial insurance coverage for terrorist acts in the United States. This Program helped the commercial property and casualty insurance industry cover claims related to terrorism-related losses and requires such companies to offer coverage for certain acts of terrorism. As a result, NLC is prohibited from adding certain terrorism exclusions to the policies written by its insurance company subsidiaries. The 2005 Act extended the Program through 2007, but eliminated commercial auto, farm-owners and certain other commercial coverages from its scope. The Reauthorization Act further extended the Program through December 31, 2014 and fixed the reimbursement percentage at 85% and the deductible at 20%. Although NLC is

Table of Contents

protected by federally funded terrorism reinsurance as provided for in the TRIA, there is a substantial deductible that must be met, the payment of which could have an adverse effect on its financial condition and results of operations. NLC's deductible under the Program was \$1.7 million for 2013 and is estimated to be \$1.2 million in 2014. Potential future changes to the TRIA could also adversely affect NLC by causing its reinsurers to increase prices or withdraw from certain markets where terrorism coverage is required. NLC had no terrorism-related losses in 2013.

State insurance regulations. State insurance authorities have broad powers to regulate U.S. insurance companies. The primary purposes of these powers are to promote insurer solvency and to protect individual policyholders. The extent of regulation varies, but generally has its source in statutes that delegate regulatory, supervisory and administrative power to state insurance departments. These powers relate to, among other things, licensing to transact business, accreditation of reinsurers, admittance of assets to statutory surplus, regulating unfair trade and claims practices, establishing actuarial requirements and solvency standards, regulating investments and dividends, and regulating policy forms, related materials and premium rates. State insurance laws and regulations require insurance companies to file financial statements prepared in accordance with accounting principles prescribed by insurance departments in states in which they conduct insurance business, and their operations are subject to examination by those departments.

As part of the broad authority that state insurance commissioners hold, they may impose periodic rules or regulations related to local issues or events. An example is the State of Oklahoma's prohibition on the cancellation of policies for nonpayment of premium in the wake of severe tornadic activity. Due to the extent of damage and displacement of people, inability of mail to reach policyholders and inaccessibility of entire neighborhoods, the State of Oklahoma prohibited insurance companies from canceling or non-renewing policies for a period of time following the specific event.

Periodic financial and market conduct examinations. The insurance departments in every state in which NLC's insurance companies do business may conduct on-site visits and examinations of its insurance companies at any time to review the insurance companies' financial condition, market conduct and relationships and transactions with affiliates. In addition, the Texas Department of Insurance will conduct comprehensive examinations of insurance companies domiciled in Texas every three to five years. Examinations are generally carried out in cooperation with the insurance departments of other licensing states under guidelines promulgated by the NAIC.

The Texas Department of Insurance completed their last examinations of NLIC and ASIC through December 31, 2010 in an examination report dated May 12, 2012. This examination report contained no information of any significant compliance issues and there is no indication of any significant changes to our financial statements as a result of the examination by the domiciliary state.

State dividend limitations. The Texas Department of Insurance must approve any dividend declared or paid by an insurance company domiciled in the state if the dividend, together with all dividends declared or distributed by that insurance company during the preceding twelve months, exceeds the greater of (1) 10% of its policyholders' surplus as of December 31 of the preceding year or (2) 100% of its net income for the preceding calendar year. The greater number is known as the insurer's extraordinary dividend limit. At December 31, 2013, the extraordinary dividend limit for NLIC and ASIC was \$9.9 million and \$2.6 million, respectively. In addition, NLC's insurance companies may only pay dividends out of their earned surplus.

Statutory accounting principles. Statutory accounting principles, or SAP, are a comprehensive basis of accounting developed to assist insurance regulators in monitoring and regulating the solvency of insurance companies. SAP rules are different from GAAP, and are intended to reflect a more conservative view of the insurer. SAP is primarily concerned with measuring an insurer's surplus to policyholders. Accordingly, SAP

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

focuses on valuing assets and liabilities of insurers at financial reporting dates in accordance with insurance laws and regulatory provisions applicable in each insurer's domiciliary state.

While GAAP is concerned with a company's solvency, it also stresses other financial measurements, such as income and cash flows. Accordingly, GAAP gives more consideration to appropriate matching of revenues and expenses and accounting for management's stewardship of assets than does SAP. As a direct result, different amounts of assets and liabilities will be reflected in financial statements prepared in accordance with GAAP as opposed to SAP. SAP, as established by the NAIC and adopted by Texas regulators, determines the statutory surplus and statutory net income of the NLC insurance companies and, thus, determines the amount they have available to pay dividends.

Guaranty associations. In Texas, and in all of the jurisdictions in which NLIC and ASIC are, or in the future may be, licensed to transact business, there is a requirement that property and casualty insurers doing business within the jurisdiction must participate in guaranty associations, which are organized to pay limited covered benefits owed pursuant to insurance policies issued by impaired, insolvent or failed insurers. These associations levy assessments, up to prescribed limits, on all

Table of Contents

member insurers in a particular state on the basis of the proportionate share of the premiums written by member insurers in the lines of business in which the impaired, insolvent or failed insurer was engaged. States generally permit member insurers to recover assessments paid through full or partial premium tax offsets.

NLC did not incur any levies in 2013, 2012 or 2011. Property and casualty insurance company insolvencies or failures may, however, result in additional guaranty fund assessments at some future date. At this time NLC is unable to determine the impact, if any, that these assessments may have on its financial condition or results of operations. NLC has established liabilities for guaranty fund assessments with respect to insurers that are currently subject to insolvency proceedings.

National Flood Insurance Program. NLC's insurance subsidiaries voluntarily participate as Write Your Own carriers in the National Flood Insurance Program, or NFIP. The NFIP is administered and regulated by the Federal Emergency Management Agency (FEMA). NLIC and ASIC operates as a fiscal agent of the Federal government in the selling and administering of the Standard Flood Insurance Policy. This involves writing the policy, the collection of premiums and the paying of covered claims. All pricing is set by FEMA and all collections are made by NLIC and ASIC.

NLIC and ASIC cede 100% of the policies written by NLIC and ASIC on the Standard Flood Insurance Policy to FEMA; however, if FEMA were unable to perform, NLIC and ASIC would have a legal obligation to the policyholders. The terms of the reinsurance agreement are standard terms, which require NLIC and ASIC to maintain its rating criteria, determine policyholder eligibility, issue policies on NLIC and ASIC's paper, endorse and cancel policies, collect from insureds and process claims. NLIC and ASIC receive ceding commissions from NFIP for underwriting administration, claims management, commission and adjuster fees.

Participation in involuntary risk plans. NLC's insurance companies are required to participate in residual market or involuntary risk plans in various states where they are licensed that provide insurance to individuals or entities that otherwise would be unable to purchase coverage from private insurers. If these plans experience losses in excess of their capitalization, they may assess participating insurers for proportionate shares of their financial deficit. These plans include the Georgia Underwriting Association, Texas FAIR Plan Association, Texas Windstorm Insurance Agency, or TWIA, the Louisiana Citizens Property Insurance Corporation, the Mississippi Residential Property Insurance Underwriting Association and the Mississippi Windstorm Underwriting Association. For example in 2005, following Hurricanes Katrina and Rita, the above plans levied collective assessments totaling \$10.4 million on NLC's insurance subsidiaries. Additional assessments, including emergency assessments, may follow. In some of these instances, NLC's insurance companies should be able to recover these assessments through policyholder surcharges, higher rates or reinsurance. The ultimate impact hurricanes have on the Texas and Louisiana facilities is currently uncertain and future assessments can occur whenever the involuntary facilities experience financial deficits.

Other. Insurance activities are subject to state insurance laws and regulations as determined by the particular insurance commissioner for each state in accordance with the McCarran-Ferguson Act, as well as subject to the Gramm-Leach-Bliley Act and the privacy regulations promulgated by the Federal Trade Commission.

Changes in any of the laws governing our conduct could have an adverse impact on our ability to conduct our business or could materially affect our financial position, operating income, expense or cash flow.

First Southwest

FSC is a broker-dealer registered with the SEC, FINRA, all 50 U.S. states, the District of Columbia and Puerto Rico. Much of the regulation of broker-dealers, however, has been delegated to self-regulatory organizations, principally FINRA, the Municipal Securities Rulemaking Board and national securities exchanges. These self-regulatory organizations adopt rules (which are subject to approval by the SEC) for governing its members and the industry. Broker-dealers are also subject to the laws and rules of the states in which a broker-dealer conducts business. FSC is a member of, and is primarily subject to regulation, supervision and regular examination by, FINRA.

The regulations to which broker-dealers are subject cover all aspects of the securities business, including, but not limited to, sales and trade practices, capital structure, record keeping and reporting procedures, relationships and conflicts with customers, the handling of cash and margin accounts, and the conduct of registered persons, directors, officers and employees. Broker-dealers are also subject to the privacy and anti-money laundering laws and regulations discussed previously. Additional legislation, changes in rules promulgated by the SEC and by self-regulatory organizations or changes in the interpretation or enforcement of existing laws and rules often directly affects the method of operation and profitability of broker-dealers. The SEC, the self-regulatory organizations and states may conduct administrative and enforcement proceedings that can result in censure, fine, suspension or expulsion of a broker-dealer, its registered persons, officers or

Table of Contents

employees. The principal purpose of regulation and discipline of broker-dealers is the protection of customers and the securities markets rather than protection of creditors and stockholders of broker-dealers.

Limitation on Businesses. The businesses that FSC may conduct are limited by its agreements with, and its oversight by, FINRA and by federal and state law. Participation in new business lines, including trading of new products or participation on new exchanges or in new countries often requires governmental and/or exchange approvals, which may take significant time and resources. In addition, FSC is an operating subsidiary of the Bank, which means its activities are further limited by those that are permissible for the Bank. As a result, FSC may be prevented from entering new businesses that may be profitable in a timely manner, if at all.

Net Capital Requirements. The SEC, FINRA and various other regulatory authorities have stringent rules and regulations with respect to the maintenance of specific levels of net capital by regulated entities. Rule 15c3-1 of the Exchange Act (the "Net Capital Rule") requires that a broker-dealer maintain minimum net capital. Generally, a broker-dealer's net capital is net worth plus qualified subordinated debt less deductions for non-allowable (or non-liquid) assets and other adjustments and operational charges. At December 31, 2013, FSC was in compliance with applicable net capital requirements.

The SEC and FINRA impose rules that require notification when net capital falls below certain predefined criteria. These rules also dictate the ratio of debt-to-equity in the regulatory capital composition of a broker-dealer, and constrain the ability of a broker-dealer to expand its business under certain circumstances. If a broker-dealer fails to maintain the required net capital, it may be subject to suspension or revocation of registration by the SEC or applicable regulatory authorities, and suspension or expulsion by these regulators could ultimately lead to the broker-dealer's liquidation. Additionally, the Net Capital Rule and certain FINRA rules impose requirements that may have the effect of prohibiting a broker-dealer from distributing or withdrawing capital and requiring prior notice to, and approval from, the SEC and FINRA for certain capital withdrawals.

Securities Investor Protection Corporation. FSC is required by federal law to belong to SIPC, whose primary function is to provide financial protection for the customers of failing brokerage firms. SIPC provides protection for customers up to \$500,000, of which a maximum of \$250,000 may be in cash.

Changing Regulatory Environment. The regulatory environment in which FSC operates is subject to frequent change. Its business, financial condition and operating results may be adversely affected as a result of new or revised legislation or regulations imposed by the U.S. Congress, the SEC or other U.S. and state governmental regulatory authorities, or FINRA. FSC's business, financial condition and operating results also may be adversely affected by changes in the interpretation and enforcement of existing laws and rules by these governmental and regulatory authorities. In the current era of heightened regulation of financial institutions, FSC can expect to incur increasing compliance costs, along with the industry as a whole.

Item 1A. Risk Factors.

Risks Related to our Business

We may fail to realize all of the anticipated benefits of the PlainsCapital Merger or the FNB Transaction.

Achieving the anticipated cost savings and financial benefits of the PlainsCapital Merger, the FNB Transaction and any other acquisitions we may complete will depend, in part, on our ability to successfully integrate the operations of the respective companies with our own in an efficient and effective manner. It is possible that the integration process could result in the loss of key employees, the disruption of ongoing business or inconsistencies in standards, controls, procedures and policies that adversely affect our ability to maintain relationships with clients, customers, depositors and employees. In addition, the integration of certain operations will require the dedication of significant management resources, which may temporarily distract management's attention from our day-to-day business. Any inability to realize the full extent, or any, of the anticipated cost savings and financial benefits of the PlainsCapital Merger, the FNB Transaction, as well as any delays encountered in the integration process, could have an adverse effect on our business and results of operations, which could adversely affect our financial condition and cause a decrease in our earnings per share or decrease or delay the expected accretive effect of the FNB Transaction and contribute to a decrease in the price of our common stock.

Table of Contents

If our allowance for loan losses is insufficient to cover actual loan losses, our banking segment earnings will be adversely affected.

As a lender, we are exposed to the risk that we could sustain losses because our borrowers may not repay their loans in accordance with the terms of their loans. We have historically accounted for this risk by maintaining an allowance for loan losses in an amount intended to cover Bank management's estimate of losses inherent in the loan portfolio. As a result of the PlainsCapital Merger and the FNB Transaction, we were required under GAAP to estimate the fair value of the loan portfolio after the consummation of the PlainsCapital Merger in 2012 and the FNB Transaction in 2013 and write-down the recorded value of the portfolio to that estimate. For most loans, this process was accomplished by computing the net present value of estimated cash flows to be received from borrowers of these loans. PlainsCapital's and FNB's respective allowance for loan losses that had been maintained prior to the PlainsCapital Merger and the FNB Transaction were eliminated in this accounting process. A new allowance for loan losses has been established for loans made by the Bank subsequent to consummation of the PlainsCapital Merger and for any decrease from that originally estimated as of the acquisition date in the estimate of cash flows to be received from the loans acquired in the PlainsCapital Merger and the FNB Transaction.

The estimates of fair value as of the consummation of the PlainsCapital Merger and the FNB Transaction were based on economic conditions at such time and on Bank management's projections concerning both future economic conditions and the ability of the borrowers to continue to repay their loans. If management's assumptions and projections prove to be incorrect, however, the estimate of fair value may be higher than the actual fair value and we may suffer losses in excess of those estimated. Further, the allowance for loan losses established for new loans or for revised estimates may prove to be inadequate to cover actual losses, especially if economic conditions worsen.

While management will endeavor to estimate the allowance to cover anticipated losses, no underwriting and credit monitoring policies and procedures that we could adopt to address credit risk could provide complete assurance that we will not incur unexpected losses. These losses could have a material adverse effect on our business, financial condition, results of operations and cash flows. In addition, federal regulators periodically evaluate the adequacy of the allowance for loan losses and may require us to increase our provision for loan losses or recognize further loan charge-offs based on judgments different from those of our Bank management.

An adverse change in real estate market values may result in losses in our banking segment and otherwise adversely affect our profitability.

At December 31, 2013, approximately 42.7% of the loan portfolio of our banking segment was comprised of loans with real estate as the primary component of collateral. The real estate collateral in each case provides an alternate source of repayment in the event of default by the borrower and may deteriorate in value during the time the credit is extended. A decline in real estate values generally and in Texas specifically could impair the value of our collateral and our ability to sell the collateral upon any foreclosure. In the event of a default with respect to any of these loans, the amounts we receive upon sale of the collateral may be insufficient to recover the outstanding principal and interest on the loan. As a result, our profitability and financial condition may be adversely affected by a decrease in real estate market values.

Loans acquired in the FNB Transaction may not be covered by the loss-share agreements if the FDIC determines that we have not adequately managed these loans.

Under the terms of the loss-share agreements we entered into with the FDIC in connection with the FNB Transaction, the FDIC is obligated to reimburse us for the following losses on covered loans: (i) 80% of losses on the first \$240.4 million of losses incurred; (ii) 0% of losses in excess

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

of \$240.4 million up to and including \$365.7 million of losses incurred; and (iii) 80% of losses in excess of \$365.7 million of losses incurred. The loss-share agreements for commercial and single family residential loans are in effect for 5 years and 10 years, respectively, and the loss recovery provisions to the FDIC are in effect for 8 years and 10 years, respectively, from September 13, 2013 (the Bank Closing Date). Although the FDIC has agreed to reimburse us for the substantial portion of losses on covered loans, the FDIC has the right to refuse or delay payment for loan losses if we do not manage covered loans in accordance with the loss-share agreements. In addition, reimbursable losses are based on the book value of the relevant loans as determined by the FDIC as of the effective dates of the transactions. The amount that we realize on these loans could differ materially from the carrying value that will be reflected in our consolidated financial statements, based upon the timing and amount of collections on the covered loans in future periods. Any losses we experience in the assets acquired in the FNB Transaction that are not covered under the loss-share agreements could have an adverse effect on our results of operations and financial condition.

In addition, in accordance with the loss-share agreements, the Bank may be required to make a true-up payment to the FDIC, approximately ten years following the Bank Closing Date, if the FDIC's initial estimate of losses on covered assets is

Table of Contents

greater than the actual realized losses. The true-up payment is calculated using a defined formula set forth in the purchase and assumption agreement we entered into with the FDIC in connection with the FNB Transaction.

Our business and results of operations may be adversely affected by unpredictable economic, market and business conditions.

Our business and results of operations are affected by general economic, market and business conditions. The credit quality of our loan portfolio necessarily reflects, among other things, the general economic conditions in the areas in which we conduct our business. Our continued financial success depends to a degree on factors beyond our control, including:

- national and local economic conditions, such as the level and volatility of short-term and long-term interest rates, inflation, home prices, unemployment and under-employment levels, bankruptcies, household income and consumer spending;
- general economic consequences of international conditions, such as weakness in European sovereign debt and emerging markets and the impact of that weakness on the U.S. and global economies;
- the availability and cost of capital and credit;
- incidence of customer fraud; and
- federal, state and local laws affecting these matters.

The deterioration of any of these conditions, as we have experienced with the past economic downturn and continuation of a weakened economy and employment growth, could adversely affect our consumer and commercial businesses and securities portfolios, our level of charge-offs and provision for credit losses, the carrying value of our deferred tax assets, the investment portfolio of our insurance segment, our capital levels and liquidity, and our results of operations.

Continued elevated unemployment, under-employment and household debt, along with continued stress in the consumer real estate market and certain commercial real estate markets, pose challenges for economic performance and the financial services industry. The sustained high unemployment rate and the lengthy duration of unemployment have directly impaired consumer finances and pose risks to the financial services industry. Continued uncertainty in the housing markets and elevated levels of distressed and delinquent mortgages pose further risks to the housing market. The current environment of heightened scrutiny of financial institutions has resulted in increased public awareness of and sensitivity to banking fees and practices. Each of these factors may adversely affect our fees and costs.

Our geographic concentration may magnify the adverse effects and consequences of any regional or local economic downturn.

We conduct our banking operations primarily in Texas. Substantially all of the real estate loans in our loan portfolio are secured by properties located in Texas, with more than 78% and 82% secured by properties located in the Dallas/Fort Worth and Austin/San Antonio markets at December 31, 2013 and 2012, respectively. Adverse economic conditions in Texas may result in a reduction in the value of the collateral securing these loans. Likewise, substantially all of the real estate loans in our loan portfolio are made to borrowers who live and conduct business in Texas. In addition, mortgage origination fee income is dependent to a significant degree on economic conditions in Texas and California. During 2013, approximately 23% and 18% by dollar volume of our mortgage loans originated were collateralized by properties located in Texas and California, respectively. Texas insureds accounted for approximately 69% and 70% of our insurance segment's gross premiums written in 2013 and 2012, respectively. Any regional or local economic downturn that affects Texas or, to a lesser extent, California, may affect us and our profitability more significantly and more adversely than our competitors that are less geographically concentrated.

Our geographic concentration may also exacerbate the adverse effects on our insurance segment of inherently unpredictable catastrophic events.

Our insurance segment expects to have large aggregate exposures to inherently unpredictable natural and man-made disasters of great severity, such as hurricanes, hail, tornados, windstorms, wildfires and acts of terrorism. Hurricanes Ike, Katrina and Rita highlighted the challenges inherent in predicting the impact of catastrophic events. The catastrophe models utilized by our insurance segment to assess its probable maximum insurance losses generally failed to adequately project the financial impact of these hurricanes. Although our insurance segment may attempt to exclude certain losses, such as terrorism and other similar risks, from some coverage that our insurance segment writes, it may be prohibited from, or may not be successful in, doing so. The occurrence of losses from catastrophic events may have a material adverse effect on our

Table of Contents

insurance segment's ability to write new business and on its financial condition and results of operations. Increases in the values and geographic concentrations of policyholder property and the effects of inflation have resulted in increased severity of industry losses in recent years, and our insurance segment expects that these factors will increase the severity of losses in the future. Factors that may influence our insurance segment's exposure to losses from these types of events, in addition to the routine adjustment of losses, include, among others:

- exhaustion of reinsurance coverage;
- increases in reinsurance rates;
- unanticipated litigation expenses;
- unrecoverability of ceded losses;
- impact on independent agent operations and future premium income in areas affected by catastrophic events;
- unanticipated expansion of policy coverage or reduction of premium due to regulatory, legislative and/or judicial action following a catastrophic event; and
- unanticipated demand surge related to other recent catastrophic events.

Our insurance segment writes insurance primarily in the states of Texas, Oklahoma, Arizona, Tennessee, Georgia and Louisiana. In 2013, Texas accounted for 69.1%, Oklahoma accounted for 9.1%, Arizona accounted for 8.7%, Tennessee accounted for 5.8% and Georgia accounted for 3.5% of our premiums. As a result, a single catastrophe, destructive weather pattern, wildfire, terrorist attack, regulatory development or other condition or general economic trend affecting these regions or significant portions of these regions could adversely affect our insurance segment's financial condition and results of operations more significantly than other insurance companies that conduct business across a broader geographic area. Although our insurance segment purchases catastrophe reinsurance to limit its exposure to these types of catastrophes, in the event of one or more major catastrophes resulting in losses to it in excess of \$140.0 million, our insurance segment's losses would exceed the limits of its reinsurance coverage.

Our business is subject to interest rate risk, and fluctuations in interest rates may adversely affect our earnings, capital levels and overall results.

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

The majority of our assets are monetary in nature and, as a result, we are subject to significant risk from changes in interest rates. Changes in interest rates may impact our net interest income in our banking segment as well as the valuation of our assets and liabilities in each of our segments. Earnings in our banking segment are significantly dependent on our net interest income, which is the difference between interest income on interest-earning assets, such as loans and securities, and interest expense on interest-bearing liabilities, such as deposits and borrowings. We expect to periodically experience gaps in the interest rate sensitivities of our banking segment's assets and liabilities, meaning that either our interest-bearing liabilities will be more sensitive to changes in market interest rates than our interest-earning assets, or vice versa. In either event, if market interest rates should move contrary to our position, this gap may work against us, and our earnings may be adversely affected.

An increase in the general level of interest rates may also, among other things, adversely affect the demand for loans and our ability to originate loans. In particular, if mortgage interest rates increase, the demand for residential mortgage loans and the refinancing of residential mortgage loans will likely decrease, which will have an adverse effect on our income generated from mortgage origination activities. Conversely, a decrease in the general level of interest rates, among other things, may lead to prepayments on our loan and mortgage-backed securities portfolios and increased competition for deposits. Accordingly, changes in the general level of market interest rates may adversely affect our net yield on interest-earning assets, loan origination volume and our overall results.

Our insurance segment invested over 86% of its invested assets in fixed maturity assets such as bonds and mortgage-backed securities at December 31, 2013. Because bond trading prices decrease as interest rates rise, a significant increase in interest rates could have a material adverse effect on our insurance segment's financial condition and results of operations. On the other hand, decreases in interest rates could have an adverse effect on our insurance segment's investment income and results of operations. For example, if interest rates decline, investment of new premiums received and funds reinvested will earn less. Additionally, mortgage-backed securities typically are prepaid more quickly when interest rates fall and the holder must reinvest the proceeds at lower interest rates. In periods of increasing interest rates, mortgage-backed securities typically are prepaid more slowly, which may require our insurance segment to receive interest payments that are below the then prevailing interest rates for longer time periods than expected. The volatility of our insurance segment's claims may force it to liquidate securities, which may cause it to incur capital losses. If our insurance segment's investment portfolio is not

Table of Contents

appropriately matched with its insurance liabilities, it may be forced to liquidate investments prior to maturity at a significant loss to cover these liabilities. In addition, if we experience market disruption and volatility, such as that experienced in 2009 and 2010, we may experience additional losses on our investments and reductions in our earnings. Investment losses could significantly decrease the asset base and statutory surplus of our insurance segment, thereby adversely affecting its ability to conduct business and potentially its A.M. Best financial strength rating.

Our financial advisory segment holds securities, principally fixed-income municipal bonds, to support sales, underwriting and other customer activities. If interest rates increase, the value of debt securities held in the financial advisory segment's inventory would decrease. Rapid or significant changes in interest rates could adversely affect the segment's bond sales, underwriting activities and financial advisory businesses.

In addition, we hold securities that may be sold in response to changes in market interest rates, changes in securities' prepayment risk, increases in loan demand, general liquidity needs and other similar factors are classified as available for sale and are carried at estimated fair value, which may fluctuate with changes in market interest rates. The effects of an increase in market interest rates may result in a decrease in the value of our available for sale investment portfolio.

Market interest rates are affected by many factors outside of our control, including inflation, recession, unemployment, money supply, international disorder and instability in domestic and foreign financial markets. We may not be able to accurately predict the likelihood, nature and magnitude of such changes or how and to what extent such changes may affect our business. We also may not be able to adequately prepare for, or compensate for, the consequences of such changes. Any failure to predict and prepare for changes in interest rates, or adjust for the consequences of these changes, may adversely affect our earnings and capital levels and overall results of operations.

Our banking segment is subject to funding risks associated with its high deposit concentration and its potential reliance on brokered deposits.

At December 31, 2013, the Bank's fifteen largest depositors, excluding Hilltop and First Southwest, accounted for 15.49% of the Bank's total deposits, and the Bank's five largest depositors, excluding First Southwest, accounted for 10.03% of the Bank's total deposits. Brokered deposits at December 31, 2013 accounted for 7.0% of the Bank's total deposits, and we may increase our reliance on brokered deposits in the future. The loss of one or more of our largest Bank customers, a significant decline in our deposit balances due to ordinary course fluctuations related to these customers' businesses, or if we increase our reliance on brokered deposits, the loss of a significant amount of our brokered deposits could adversely affect our liquidity. Additionally, such circumstances could require us to raise deposit rates in an attempt to attract new deposits, or purchase federal funds or borrow funds on a short-term basis at higher rates, which would adversely affect our results of operations. Under applicable regulations, if the Bank were no longer well capitalized, the Bank would not be able to accept brokered deposits without the approval of the FDIC.

We are heavily dependent on dividends from our subsidiaries.

We are a financial holding company engaged in the business of managing, controlling and operating our subsidiaries, including NLC and its two insurance company subsidiaries, NLIC and ASIC, as well as the Bank and the Bank's subsidiaries, PrimeLending and First Southwest. We conduct no material business or other activity other than activities incidental to holding stock in NLC and the Bank. As a result, we rely

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

substantially on the profitability of, and dividends from, these subsidiaries to pay our operating expenses, to satisfy our obligations and to pay dividends on our preferred stock. As with most financial institutions, the profitability of the Bank is subject to the fluctuating cost and availability of money, changes in interest rates and in economic conditions in general. PrimeLending and First Southwest contribute to the Bank's profitability and, in turn, on its ability to pay dividends to us. If the Bank, however, is unable to make cash distributions to us, then we may also be unable to obtain funds from PrimeLending and First Southwest, and we may be unable to satisfy our obligations or make distributions on our preferred stock.

Likewise, our insurance segment also operates as a holding company. Dividends and other permitted payments from its operating subsidiaries are expected to be its primary source of funds to meet ongoing cash requirements, including any future debt service payments and other expenses, and to pay dividends, if any, to us. NLIC and ASIC are subject to significant regulatory restrictions and limitations under debt agreements limiting their ability to declare and pay dividends, including the indenture governing NLC's London Interbank Offered Rate (LIBOR) plus 3.40% notes due 2035 and the surplus indentures governing NLIC's two LIBOR plus 4.10% and 4.05% notes due 2033 and ASIC's LIBOR plus 4.05% notes due 2034. Together these restrictions could, in turn, limit NLC's ability to pay dividends.

Table of Contents

We are subject to extensive supervision and regulation that could restrict our activities and impose financial requirements or limitations on the conduct of our business and limit our ability to generate income.

We are subject to extensive federal and state regulation and supervision, including that of the Federal Reserve Board, the Texas Department of Banking, the Texas Department of Insurance, the FDIC, the CFPB, the SEC and FINRA. Banking regulations are primarily intended to protect depositors' funds, federal deposit insurance funds and the banking system as a whole, not stockholders. Insurance regulations promulgated by state insurance departments are primarily intended to protect policyholders rather than stockholders. Likewise, regulations promulgated by FINRA are primarily intended to protect customers of broker-dealer businesses rather than stockholders.

These regulations affect our lending practices, capital structure, capital requirements, investment practices, dividend policy and growth, among other things. Failure to comply with laws, regulations or policies could result in damages, civil money penalties or reputational damage, as well as sanctions and supervisory actions by regulatory agencies that could subject us to significant restrictions on our business and our ability to expand through acquisitions or branching. While we have implemented policies and procedures designed to prevent any such violations of laws and regulations, such violations may occur from time to time, which could have a material adverse effect on our financial condition and results of operations.

The U.S. Congress and federal regulatory agencies frequently revise banking and securities laws, regulations and policies. On July 21, 2010, President Obama signed into law the Dodd-Frank Act, which significantly alters the regulation of financial institutions and the financial services industry. The Dodd-Frank Act establishes the CFPB and requires the CFPB and other federal agencies to implement many provisions of the Dodd-Frank Act. We expect that several aspects of the Dodd-Frank Act may affect our business, including, without limitation, increased capital requirements, increased mortgage regulation, restrictions on proprietary trading in securities, restrictions on investments in hedge funds and private equity funds, executive compensation restrictions and disclosure and reporting requirements. At this time, it is difficult to predict the extent to which the Dodd-Frank Act or the resulting rules and regulations will affect our business. Compliance with these new laws and regulations likely will result in additional costs, which could be significant and may adversely impact our results of operations, financial condition, and liquidity.

During the second quarter of 2013, the Bank received a satisfactory CRA rating in connection with its most recent CRA performance evaluation. A CRA rating of less than satisfactory adversely affects a bank's ability to establish new branches and impairs a bank's ability to commence new activities that are financial in nature or acquire companies engaged in these activities. Other regulatory exam ratings or findings also may otherwise impact our ability to branch, commence new activities or make acquisitions.

We cannot predict whether or in what form any other proposed regulations or statutes will be adopted or the extent to which our business may be affected by any new regulation or statute. Such changes could subject our business to additional costs, limit the types of financial services and products we may offer and increase the ability of non-banks to offer competing financial services and products, among other things.

The impact of the changing regulatory capital requirements and new capital rules are uncertain.

In July 2013, the Federal Reserve Board approved a final rule that will substantially amend the risk-based capital rules applicable to Hilltop and the Bank. The final rule implements the Basel III regulatory capital reforms and changes required by the Dodd-Frank Act. The final rule includes

new minimum risk-based capital and leverage ratios, which will be effective for Hilltop and the Bank on January 1, 2015, and refines the definition of what constitutes capital for purposes of calculating these ratios. The new minimum capital requirements will be: (i) a new common equity Tier 1 capital ratio of 4.5%; (ii) a Tier 1 to risk-based assets capital ratio of 6% (increased from 4%); (iii) a total capital ratio of 8% (unchanged from current rules); and (iv) a Tier 1 leverage ratio of 4%. The final rule also establishes a capital conservation buffer of 2.5% above the new regulatory minimum capital ratios and will result in the following minimum ratios: (i) a common equity Tier 1 capital ratio of 7.0%; (ii) a Tier 1 to risk-based assets capital ratio of 8.5%; and (iii) a total capital ratio of 10.5%. The new capital conservation buffer requirement would be phased in beginning in January 2016 at 0.625% of risk-weighted assets and would increase each year until fully implemented in January 2019. An institution will be subject to limitations on paying dividends, engaging in share repurchases, and paying discretionary bonuses if its capital level falls below the buffer amount. These limitations will establish a maximum percentage of eligible retained income that can be utilized for such actions. The application of more stringent capital requirements for Hilltop and the Bank could, among other things, adversely affect our results of operations and growth, require the raising of additional capital, restrict our ability to pay dividends or repurchase shares and result in regulatory actions if we were to be unable to comply with such requirements.

Table of Contents

In addition, the Federal Reserve Board published an interim final rule in September 2013 that clarifies how companies should incorporate the Basel III regulatory capital reforms into their capital and business projections during the next cycle of capital plan submissions and stress tests. For companies and their subsidiary banks with between \$10.0 billion and \$50.0 billion in total consolidated assets, the initial capital planning and stress testing cycle began on October 1, 2013 and continues through the fourth quarter of 2015, which overlaps with the implementation of the Basel III capital reforms beginning on January 1, 2015. At December 31, 2013, Hilltop and the Bank had approximately \$8.9 billion and \$8.0 billion, respectively, in total consolidated assets and their average of total consolidated assets for the four most recent consecutive quarters was \$8.2 billion and \$7.2 billion, respectively. Accordingly, Hilltop and the Bank are not subject to the 2014 capital planning and stress testing cycle. If we grow to have more than \$10.0 billion in assets on average over the four most recent consecutive quarters through additional acquisitions or organic growth, we may become subject to future capital planning and stress testing cycles, which would likely increase our cost of regulatory compliance. Management continues to study the implementation of Basel III regulatory capital reforms and stress testing requirements.

The CFPB recently issued ability-to-repay and qualified mortgage rules that may have a negative impact on our loan origination process and foreclosure proceedings, which could adversely affect our business, operating results, and financial condition.

On January 10, 2013, the CFPB issued a final rule to implement the qualified mortgage provisions of the Dodd-Frank Act requiring mortgage lenders to consider consumers' ability to repay home loans before extending them credit. The CFPB's qualified mortgage rule took effect on January 10, 2014. The final rule describes certain minimum requirements for lenders making ability-to-repay determinations, but does not dictate that they follow particular underwriting models. Lenders will be presumed to have complied with the ability-to-repay rule if they issue qualified mortgages, which are generally defined as mortgage loans prohibiting or limiting certain risky features. Loans that do not meet the ability-to-repay standard can be challenged in court by borrowers who default and the absence of ability-to-repay status can be used against a lender in foreclosure proceedings. Any loans that we make outside of the qualified mortgage criteria could expose us to an increased risk of liability and reduce or delay our ability to foreclose on the underlying property. It is difficult to predict how the CFPB's qualified mortgage rule will impact us when it takes effect, but any decreases in loan origination volume or increases in compliance and foreclosure costs caused by the rule could negatively affect our business, operating results and financial condition.

Our mortgage origination segment is subject to investment risk on loans that it originates.

We intend to sell, and not hold for investment, substantially all residential mortgage loans that we originate through PrimeLending. At times, however, we may originate a loan or execute an interest rate lock commitment (IRLC) with a customer pursuant to which we agree to originate a mortgage loan on a future date at an agreed-upon interest rate without having identified a purchaser for such loan or the loan underlying such IRLC. An identified purchaser may also decline to purchase a loan for a variety of reasons. In these instances, we will bear interest rate risk on an IRLC until, and unless, we are able to find a buyer for the loan underlying such IRLC and the risk of investment on a loan until, and unless, we are able to find a buyer for such loan. In addition, if a customer defaults on a mortgage payment shortly after the loan is originated, the purchaser of the loan may have a put right, whereby the purchaser can require us to repurchase the loan at the full amount that it paid. During periods of market downturn, we have at times chosen to hold mortgage loans when the identified purchasers have declined to purchase such loans because we could not obtain an acceptable substitute bid price for such loan. The failure of mortgage loans that we hold on our books to perform adequately could have a material adverse effect on our financial condition, liquidity and results of operations.

Changes in interest rates may change the value of our mortgage servicing rights portfolio which may increase the volatility of our earnings.

We have recently expanded, and may continue to expand, our residential mortgage servicing operations within our mortgage origination segment. As a result of our mortgage servicing business, we have a portfolio of mortgage servicing rights (MSR). A MSR is the right to service a

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

mortgage loan-collect principal, interest and escrow amounts-for a fee. We measure and carry all of our residential MSRs using the fair value measurement method. Fair value is determined as the present value of estimated future net servicing income, calculated based on a number of variables, including assumptions about the likelihood of prepayment by borrowers.

One of the principal risks associated with MSRs is that in a declining interest rate environment, they will likely lose a substantial portion of their value as a result of higher than anticipated prepayments. Moreover, if prepayments are greater than expected, the cash we receive over the life of the mortgage loans would be reduced. In the future, we may use various derivative financial instruments to provide a level of protection against such interest rate risk. However, no hedging strategy

Table of Contents

can protect us completely, and hedging strategies may fail because they are improperly designed, improperly executed and documented or based on inaccurate assumptions and, as a result, could actually increase our risks and losses. The increasing size of our MSR portfolio may increase our interest rate risk and correspondingly, the volatility of our earnings, especially if we cannot adequately hedge the interest rate risk relating to our MSRs.

At December 31, 2013, our MSRs had a fair value of \$20.1 million. Changes in fair value of our MSRs are recorded to earnings in each period. Depending on the interest rate environment, it is possible that the fair value of our MSRs may be reduced in the future. If such changes in fair value significantly reduce the carrying value of our MSRs, our financial condition and results of operations would be negatively affected.

Our financial advisory business is subject to various risks associated with the securities industry, particularly those impacting the public finance industry.

Our financial advisory business is subject to uncertainties that are common in the securities industry. These uncertainties include:

- intense competition in the public finance and other sectors of the securities industry;
- the volatility of domestic and international financial, bond and stock markets;
- extensive governmental regulation;
- litigation; and
- substantial fluctuations in the volume and price level of securities.

As a result, the revenues and operating results of our financial advisory segment may vary significantly from quarter to quarter and from year to year. Unfavorable financial or economic conditions could reduce the number and size of transactions in which we provide financial advisory, underwriting and other services. Disruptions in fixed income and equity markets could lead to a decline in the volume of transactions executed for customers and, therefore, to declines in revenues from commissions and clearing services. First Southwest is much smaller and has much less capital than many competitors in the securities industry. In addition, First Southwest is an operating subsidiary of the Bank, which means that its activities are limited to those that are permissible for the Bank.

Income that we recognized as a bargain purchase gain in connection with the FNB Transaction is based upon a preliminary valuation and is subject to change.

In September 2013, we assumed substantially all of the liabilities, including all of the deposits, and acquired substantially all of the assets, of FNB from the FDIC in the FNB Transaction. We acquired approximately \$2.2 billion in assets and assumed \$2.2 billion in liabilities in the FNB Transaction. The FNB Transaction was accounted for under the purchase method of accounting. Based upon a preliminary valuation, we recorded a pre-tax bargain purchase gain totaling \$12.6 million as a result of the FNB Transaction, which was included as a component of noninterest income in our consolidated statement of operations for the year ended December 31, 2013. The amount of the gain was equal to the amount by which the estimated fair value of assets purchased exceeded the estimated fair value of liabilities assumed. The bargain purchase gain resulting from the FNB Transaction was a non-recurring gain that is not expected to be repeated in future periods. As we complete our purchase accounting, we may revise our estimates, which could result in the recognition of additional bargain purchase gain, which would be recorded as noninterest income, or the recognition of less or no bargain purchase gain, in which case we would reduce noninterest income and may be required to record goodwill that would be subject to an ongoing impairment analysis.

Income that we recognize in connection with the purchase discount of the credit-impaired loans acquired in the PlainsCapital Merger and the FNB Transaction and accounted for under Accounting Standards Codification 310-30 could be volatile in nature and have significant effects on reported net income.

In connection with the PlainsCapital Merger and the FNB Transaction, we acquired loans at a discount of \$146.6 million and \$343.1 million, respectively. The PlainsCapital Merger and the FNB Transaction were each accounted for under the purchase method of accounting. Accordingly, these discounts are amortized and accreted to interest income on a monthly basis. The effective yield and related discount accretion on credit-impaired loans is initially determined at the acquisition date based upon estimates of the timing and amount of future cash flows as well as the amount of credit losses that will be incurred. These estimates are updated quarterly. In future periods, if actual historical results combined with future

Table of Contents

projections of these factors (amount, timing, or credit losses) differ from the initial projections, the effective yield and the amount of discount recognized will change. Volatility may increase as the variance of actual results from initial projections increases. As the acquired loans are removed from our books, the related discount will no longer be available for accretion into income. Accretion of \$61.8 million on loans purchased at a discount in the PlainsCapital Merger was recorded as interest income during the year ended December 31, 2013, and accretion of \$7.5 million on loans purchased at a discount in the FNB Transaction was recorded as interest income during the period from September 14, 2013 to December 31, 2013. As of December 31, 2013, the balance of our discount on loans in the aggregate was \$396.0 million.

We ultimately may write-off goodwill and other intangible assets resulting from business combinations.

As a result of purchase accounting in connection with our acquisition of NLC, the PlainsCapital Merger and the FNB Transaction, our consolidated balance sheet at December 31, 2013, contained goodwill of \$251.8 million and other intangible assets of \$70.9 million. On an ongoing basis, we evaluate whether facts and circumstances indicate any impairment of value of intangible assets. As circumstances change, the value of these intangible assets may not be realized by us. If we determine that a material impairment has occurred, we will be required to write-off the impaired portion of intangible assets, which could have a material adverse effect on our results of operations in the period in which the write-off occurs.

The accuracy of our financial statements and related disclosures could be affected if we are exposed to actual conditions different from the judgments, assumptions or estimates used in our critical accounting policies.

The preparation of financial statements and related disclosure in conformity with GAAP requires us to make judgments, assumptions and estimates that affect the amounts reported in our consolidated financial statements and accompanying notes. Our critical accounting policies, which are included in this Annual Report, describe those significant accounting policies and methods used in the preparation of our consolidated financial statements that are considered critical by us because they require judgments, assumptions and estimates that materially impact our consolidated financial statements and related disclosures. As a result, if future events differ significantly from the judgments, assumptions and estimates in our critical accounting policies, such events or assumptions could have a material impact on our audited consolidated financial statements and related disclosures.

We are dependent on our management team, and the loss of our senior executive officers or other key employees could impair our relationship with customers and adversely affect our business and financial results.

Our success is dependent, to a large degree, upon the continued service and skills of our existing management team and other key employees with long-term customer relationships. Our business and growth strategies are built primarily upon our ability to retain employees with experience and business relationships within their respective segments. The loss of one or more of these key personnel could have an adverse impact on our business because of their skills, knowledge of the market, years of industry experience and the difficulty of finding qualified replacement personnel. In addition, we currently do not have non-competition agreements with certain members of management and other key employees. If any of these personnel were to leave and compete with us, our business, financial condition, results of operations and growth could suffer.

A decline in the market for advisory services could adversely affect our business and results of operations.

Our financial advisory segment has historically earned a significant portion of its revenues from advisory fees paid to it by its clients, in large part upon the successful completion of the client's transaction. Financial advisory revenues from the public finance group of First Southwest represented the largest component of our financial advisory segment's net revenues for the year ended December 31, 2013. Unlike other investment banks, First Southwest earns most of its revenues from its advisory fees and, to a lesser extent, from other business activities such as commissions and underwriting. New issuances in the municipal market by cities, counties, school districts, state and other governmental agencies, airports, healthcare institutions, institutions of higher education and other clients that First Southwest's public finance group serves can be subject to significant fluctuations based on by factors such as changes in interest rates, property tax bases, budget pressures on certain issuers caused by uncertain economic times and other factors. We expect that the reliance of our financial advisory segment on advisory fees will continue for the foreseeable future, and a decline in public finance advisory engagements or the market for advisory services generally would have an adverse effect on our business and results of operations.

Table of Contents

Negative publicity regarding us, or financial institutions in general, could damage our reputation and adversely impact our business and results of operations.

Our ability to attract and retain customers and conduct our business could be adversely affected to the extent our reputation is damaged. Reputational risk, or the risk to our business, earnings and capital from negative public opinion regarding our company, or financial institutions in general, is inherent in our business. Adverse perceptions concerning our reputation could lead to difficulties in generating and maintaining accounts as well as in financing them. In particular, negative perceptions concerning our reputation could lead to decreases in the level of deposits that consumer and commercial customers and potential customers choose to maintain with us. Negative public opinion could result from actual or alleged conduct in any number of activities or circumstances, including lending or foreclosure practices; sales practices; corporate governance and potential conflicts of interest; ethical failures or fraud, including alleged deceptive or unfair lending or pricing practices; regulatory compliance; protection of customer information; cyber-attacks, whether actual, threatened, or perceived; negative news about us or the financial institutions industry generally; general company performance; or from actions taken by government regulators and community organizations in response to such activities or circumstances. Furthermore, our failure to address, or the perception that we have failed to address, these issues appropriately could impact our ability to keep and attract customers and/or employees and could expose us to litigation and/or regulatory action, which could have an adverse effect on our business and results of operations.

Our operational systems and networks have been, and will continue to be, subject to an increasing risk of continually evolving cybersecurity or other technological risks, which could result in a loss of customer business, financial liability, regulatory penalties, damage to our reputation or the disclosure of confidential information.

We rely heavily on communications and information systems to conduct our business and maintain the security of confidential information and complex transactions, which subjects us to an increasing risk of cyber incidents from these activities due to a combination of new technologies and the increasing use of the Internet to conduct financial transactions, as well as a potential failure of interruption or breach in the security of these systems, including those that could result from attacks or planned changes, upgrades and maintenance of these systems. Such cyber incidents could result in failures or disruptions in our customer relationship management, securities trading, general ledger, deposits, computer systems, electronic underwriting servicing or loan origination systems. Third parties with which we do business may also be sources of cybersecurity or other technological risks.

Although we devote significant resources to maintain and regularly upgrade our systems and networks with measures such as intrusion and detection prevention systems and monitoring firewalls to safeguard critical business applications, there is no guarantee that these measures or any other measures can provide absolute security. Our computer systems, software and networks may be adversely affected by cyber incidents such as unauthorized access; loss or destruction of data (including confidential client information); account takeovers; unavailability of service; computer viruses or other malicious code; cyber attacks; and other events. These threats may derive from human error, fraud or malice on the part of employees or third parties, or may result from accidental technological failure. Additional challenges are posed by external extremist parties, including foreign state actors, in some circumstances, as a means to promote political ends. If one or more of these events occurs, it could result in the disclosure of confidential client information, damage to our reputation with our clients and the market, customer dissatisfaction, additional costs such as repairing systems or adding new personnel or protection technologies, regulatory penalties, exposure to litigation and other financial losses to both us and our clients and customers. Such events could also cause interruptions or malfunctions in our operations.

We have been the subject of denial of services attacks from external sources that have limited or interrupted the availability of our online banking services. Although to date we are not aware of any material losses relating to cyber attacks or other information security breaches, we may suffer such losses in the future. We have taken steps to improve and upgrade the security of our systems in response to such threats, such incidents could occur again, but they could occur more frequently or on a more significant scale.

We face strong competition from other financial institutions and financial service and insurance companies, which may adversely affect our operations and financial condition.

Our banking and mortgage origination businesses face vigorous competition from banks and other financial institutions, including savings and loan associations, savings banks, finance companies and credit unions. A number of these banks and other financial institutions have substantially greater resources and lending limits, larger branch systems and a wider array of banking services than we do. We also compete with other providers of financial services, such as money market mutual funds, brokerage firms, consumer finance companies, insurance companies and governmental organizations, each of which may offer more favorable financing than we are able to provide. In addition, some of our non-bank competitors are not

Table of Contents

subject to the same extensive regulations that govern us. The banking business in Texas has become increasingly competitive over the past several years, and we expect the level of competition we face to further increase. Our profitability depends on our ability to compete effectively in these markets. This competition may reduce or limit our margins on banking services, reduce our market share and adversely affect our results of operations and financial condition.

The insurance industry also is highly competitive and has, historically, been characterized by periods of significant price competition, alternating with periods of greater pricing discipline during which competitors focus on other factors. In the current market environment, competition in our insurance business industry is based primarily on products offered, service, experience, the strength of agent and policyholder relationships, reputation, speed and accuracy of claims payment, perceived financial strength, ratings, scope of business, commissions paid and policy and contract terms and conditions. Our insurance business competes with many other insurers, including large national companies who have greater financial, marketing and management resources than our insurance segment. Many of these competitors also have better ratings and market recognition than our insurance business. Our insurance segment seeks to distinguish itself from its competitors by providing a broad product line and targeting those market segments that provide the best opportunity to earn an underwriting profit.

In addition, a number of new, proposed or potential industry developments also could increase competition in our insurance business industry. These developments include changes in practices and other effects caused by the Internet (including direct marketing campaigns by our insurance segment's competitors in established and new geographic markets), which have led to greater competition in the insurance business and increased expectations for customer service. These developments could prevent our insurance business from expanding its book of business. Our insurance business also faces competition from new entrants into the insurance market. New entrants do not have historic claims or losses to address and, therefore, may be able to price policies on a basis that is not favorable to our insurance business. New competition could reduce the demand for our insurance segment's insurance products, which could have a material adverse effect on its financial condition and results of operations.

The financial advisory and investment banking industries also are intensely competitive industries and will likely remain competitive. Our financial advisory business competes directly with numerous other financial advisory and investment banking firms, broker-dealers and banks, including large national and major regional firms and smaller niche companies, some of whom are not broker-dealers and, therefore, not subject to the broker-dealer regulatory framework. In addition to competition from firms currently in the industry, there has been increasing competition from others offering financial services, including automated trading and other services based on technological innovations. Our financial advisory business competes on the basis of a number of factors, including the quality of advice and service, innovation, reputation and price. Many of our financial advisory segment's competitors in the investment banking industry have a greater range of products and services, greater financial and marketing resources, larger customer bases, greater name recognition, more managing directors to serve their clients' needs, greater global reach and more established relationships with their customers than our financial advisory business. Additionally, certain competitors of our financial advisory business have reorganized or plan to reorganize from investment banks into bank holding companies which may provide them with a competitive advantage. These larger and better capitalized competitors may be more capable of responding to changes in the investment banking market, to compete for skilled professionals, to finance acquisitions, to fund internal growth and to compete for market share generally. Increased pressure created by any current or future competitors, or by competitors of our financial advisory business collectively, could materially and adversely affect our business and results of operations. Increased competition may result in reduced revenue and loss of market share. Further, as a strategic response to changes in the competitive environment, our financial advisory business may from time to time make certain pricing, service or marketing decisions that also could materially and adversely affect our business and results of operations.

Our mortgage origination and insurance businesses are subject to seasonal fluctuations and, as a result, our results of operations for any given quarter may not be indicative of the results that may be achieved for the full fiscal year.

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

Our mortgage origination business is subject to several variables that can impact loan origination volume, including seasonal and interest rate fluctuations. We typically experience increased loan origination volume from purchases of homes during the second and third calendar quarters, when more people tend to move and buy or sell homes. In addition, an increase in the general level of interest rates may, among other things, adversely affect the demand for mortgage loans and our ability to originate mortgage loans. In particular, if mortgage interest rates increase, the demand for residential mortgage loans and the refinancing of residential mortgage loans will likely decrease, which will have an adverse effect on our mortgage origination activities. Conversely, a decrease in the general level of interest rates, among other things, may lead to increased competition for mortgage loan origination business. As a result of these variables, our results of operations for any single quarter are not necessarily indicative of the results that may be achieved for a full fiscal year.

Table of Contents

Generally, our insurance segment's insured risks exhibit higher losses in the second and third calendar quarters due to a seasonal concentration of weather-related events in its primary geographic markets. Although weather-related losses (including hail, high winds, tornadoes and hurricanes) can occur in any calendar quarter, the second calendar quarter, historically, has experienced the highest frequency of losses associated with these events. Hurricanes, however, are more likely to occur in the third calendar quarter of the year.

If the actual losses and loss adjustment expenses of our insurance segment exceed its loss and expense estimates, its financial condition and results of operations could be materially adversely affected.

The financial condition and results of operations of our insurance segment depend upon its ability to assess accurately the potential losses associated with the risks that it insures. Our insurance segment establishes reserve liabilities to cover the payment of all losses and loss adjustment expenses incurred under the policies that it writes. These liability estimates include case estimates, which are established for specific claims that have been reported to our insurance segment, and liabilities for claims that have been incurred but not reported (IBNR). Loss adjustment expenses represent expenses incurred to investigate and settle claims. To the extent that losses and loss adjustment expenses exceed estimates, NLIC and ASIC will be required to increase their reserve liabilities and reduce their income in the period in which the deficiency is identified. In addition, increasing reserves causes a reduction in policyholders' surplus and could cause a downgrade in the ratings of NLIC and ASIC. This, in turn, could diminish our ability to sell insurance policies.

The liability estimation process for our insurance segment's casualty insurance coverage possesses characteristics that make case and IBNR reserving inherently less susceptible to accurate actuarial estimation than is the case with property coverages. Unlike property losses, casualty losses are claims made by third-parties of which the policyholder may not be aware and, therefore, may be reported a significant time after the occurrence, including sometimes years later. As casualty claims most often involve claims of bodily injury, assessment of the proper case estimates is a far more subjective process than claims involving property damage. In addition, in determining the case estimate for a casualty claim, information develops slowly over the life of the claim and can subject the case estimation to substantial modification well after the claim was first reported. Numerous factors impact the casualty case reserving process, such as venue, the amount of monetary damage, legislative activity, the permanence of the injury and the age of the claimant.

The effects of inflation could cause the severity of claims from catastrophes or other events to rise in the future. Increases in the values and geographic concentrations of policyholder property and the effects of inflation have resulted in increased severity of industry losses in recent years, and our insurance segment expects that these factors will increase the severity of losses in the future. As NLC observed in 2008, the severity of some catastrophic weather events, including the scope and extent of damage and the inability to gain access to damaged properties, and the ensuing shortages of labor and materials and resulting demand surge, provide additional challenges to estimating ultimate losses. Our insurance segment's liabilities for losses and loss adjustment expenses include assumptions about future payments for settlement of claims and claims handling expenses, such as medical treatments and litigation costs. To the extent inflation causes these costs to increase above liabilities established for these costs, our insurance segment expects to be required to increase its liabilities, together with a corresponding reduction in its net income in the period in which the deficiency is identified.

Estimating an appropriate level of liabilities for losses and loss adjustment expense is an inherently uncertain process. Accordingly, actual loss and loss adjustment expenses paid will likely deviate, perhaps substantially, from the liability estimates reflected in our insurance segment's consolidated financial statements. Claims could exceed our insurance segment's estimate for liabilities for losses and loss adjustment expenses, which could have a material adverse effect on its financial condition and results of operations.

If our insurance segment cannot obtain adequate reinsurance protection for the risks it underwrites or its reinsurers do not pay losses in a timely fashion, or at all, our insurance segment will suffer greater losses from these risks or may reduce the amount of business it underwrites, which may materially adversely affect its financial condition and results of operations.

Our insurance segment purchases reinsurance to protect itself from certain risks and to share certain risks it underwrites. During 2013 and 2012, our insurance segment's personal lines ceded 10.2% and 12.1%, respectively, of its direct insurance premiums written (primarily through excess of loss, quota share and catastrophe reinsurance treaties) and its commercial lines ceded 4.6% and 4.9%, respectively, of its direct insurance premiums written (primarily through excess of loss and catastrophe reinsurance treaties). The total cost of reinsurance, inclusive of per risk excess and catastrophe, decreased 9.3% in the year ended December 31, 2013, which is partially attributable to reduced limits, lower rates and lower reinstatement premiums in 2013 of \$0.2 million. Reinsurance cost generally fluctuates as a result of storm costs or any changes in capacity within the reinsurance market.

Table of Contents

From time to time, market conditions have limited, and in some cases have prevented, insurers from obtaining the types and amounts of reinsurance that they have considered adequate for their business needs. Accordingly, our insurance segment may not be able to obtain desired amounts of reinsurance. Even if our insurance segment is able to obtain adequate reinsurance, it may not be able to obtain it from entities with satisfactory creditworthiness or negotiate terms that it deems appropriate or acceptable. Although the cost of reinsurance is, in some cases, reflected in our insurance segment's premium rates, our insurance segment may have guaranteed certain premium rates to its policyholders. Under these circumstances, if the cost of reinsurance were to increase with respect to policies for which our insurance segment guaranteed the rates, our insurance segment would be adversely affected. In addition, if our insurance segment cannot obtain adequate reinsurance protection for the risks it underwrites, it may be exposed to greater losses from these risks or it may be forced to reduce the amount of business that it underwrites for such risks, which will reduce our insurance segment's revenue and may have a material adverse effect on its results of operations and financial condition.

At December 31, 2013, our insurance segment had \$5.2 million in reinsurance recoverables, including ceded paid loss recoverables, ceded losses and loss adjustment expense recoverables and ceded unearned insurance premiums. Our insurance segment expects to continue to purchase substantial reinsurance coverage in the foreseeable future. Because our insurance segment remains primarily liable to its policyholders for the payment of their claims, regardless of the reinsurance it has purchased relating to those claims, in the event that one of its reinsurers becomes insolvent or otherwise refuses to reimburse our insurance segment for losses paid, or delays in reimbursing our insurance segment for losses paid, its liability for these claims could materially and adversely affect its financial condition and results of operations.

We are subject to legal claims and litigation that could have a material adverse effect on our business.

We face significant legal risks in each of the business segments in which we operate, and the volume of legal claims and amount of damages and penalties claimed in litigation and regulatory proceedings against financial service companies remains high. These risks often are difficult to assess or quantify, and their existence and magnitude often remain unknown for substantial periods of time. Substantial legal liability or significant regulatory action against us or any of our subsidiaries could have a material adverse effect on our results of operations or cause significant reputational harm to us, which could seriously harm our business and prospects. Further, regulatory inquiries and subpoenas, other requests for information, or testimony in connection with litigation may require incurrence of significant expenses, including fees for legal representation and fees associated with document production. These costs may be incurred even if we are not a target of the inquiry or a party to the litigation. Any financial liability or reputational damage could have a material adverse effect on our business, which, in turn, could have a material adverse effect on our financial condition and results of operations.

We may be subject to environmental liabilities in connection with the foreclosure on real estate assets securing the loan portfolio of our banking segment.

Hazardous or toxic substances or other environmental hazards may be located on the real estate that secures our loans. If we acquire such properties as a result of foreclosure, or otherwise, we could become subject to various environmental liabilities. For example, we could be held liable for the cost of cleaning up or otherwise addressing contamination at or from these properties. We could also be held liable to a governmental entity or third party for property damage, personal injury or other claims relating to any environmental contamination at or from these properties. In addition, we could be held liable for costs relating to environmental contamination at or from our current or former properties. We may not detect all environmental hazards associated with these properties. If we ever became subject to significant environmental liabilities, our business, financial condition, liquidity and results of operations could be harmed.

If we fail to maintain an effective system of internal controls over financial reporting, the accuracy and timing of our financial reporting may be adversely affected.

Effective internal controls are necessary for us to provide timely and reliable financial reports and effectively prevent fraud. Any inability to provide reliable financial reports or prevent fraud could harm our business. If we fail to maintain the adequacy of our internal controls, our financial statements may not accurately reflect our financial condition. Inadequate internal controls over financial reporting could impact the reliability and timeliness of our financial reports and could cause investors to lose confidence in our reported financial information, which could have a negative effect on our business and the value of our securities.

Table of Contents

The debt agreements of our insurance segment and its controlled affiliates contain financial covenants and impose restrictions on its business.

The indenture governing NLC's LIBOR plus 3.40% notes due 2035 contains restrictions on its ability to, among other things, declare and pay dividends and merge or consolidate. In addition, this indenture contains a change of control provision, which provides that (i) if a person or group becomes the beneficial owner, directly or indirectly, of 50% or more of NLC's equity securities and (ii) if NLC's ratings are downgraded by a nationally recognized statistical rating organization (as defined in the Exchange Act), then each holder of the notes governed by such indenture has the right to require that NLC purchase such holder's notes, in whole or in part, at a price equal to 100% of the then outstanding principal amount. Likewise, the surplus indentures governing NLIC's two LIBOR plus 4.10% and 4.05% notes due 2033 and ASIC's LIBOR plus 4.05% notes due 2034 contain restrictions on dividends and mergers and consolidations. In addition, NLC has other credit arrangements with its affiliates and other third-parties.

NLC's ability to comply with these covenants may be affected by events beyond its control, including prevailing economic, financial and industry conditions. The breach of any of these restrictions could result in a default under the loan agreements or indentures governing the notes or under its other debt agreements. An event of default under its debt agreements would permit some of its lenders to declare all amounts borrowed from them to be due and payable, together with accrued and unpaid interest. If NLC were unable to repay debt to its secured lenders, these lenders could proceed against the collateral securing that debt. In addition, acceleration of its other indebtedness may cause NLC to be unable to make interest payments on the notes. Other agreements that NLC or its insurance company subsidiaries may enter into in the future may contain covenants imposing significant restrictions on their respective businesses that are similar to, or in addition to, the covenants under their respective existing agreements. These restrictions may affect NLC's ability to operate its business and may limit its ability to take advantage of potential business opportunities as they arise.

Risks Related to our Substantial Cash Position and Related Strategies for its Use

There are risks associated with our proposed acquisition of SWS.

On January 9, 2014, we delivered to the President and Chief Executive Officer of SWS a letter in which we proposed to acquire all of the outstanding shares of SWS common stock that we do not already own for \$7.00 per share in 50% cash and 50% Company common stock. The cash portion of our offer would be funded through available cash. There is no assurance that we will enter into a merger agreement with SWS or that any transaction will be consummated.

In addition to the risks we face in connection with acquisitions and indebtedness generally as described under Item 1A of this Annual Report, we face risks associated with a potential acquisition of SWS, each of which may have an adverse impact on our business, financial condition, operating results and prospects. Such risks include the following: any issuance of shares of our common stock in such an acquisition will result in dilution to our existing stockholders; our credit ratings may be adversely affected, which may impact the cost of future borrowings; the need for required approvals, including regulatory approvals and approval by SWS's stockholders, may delay, prevent or otherwise adversely impact an acquisition of SWS or impose conditions that could require divestitures and otherwise have an impact on our business; the market price of our common stock or other securities may decline as a result of a proposed or actual acquisition of SWS; a proposed or actual acquisition of SWS may result in our being subject to unknown liabilities and litigation; such an acquisition could involve unexpected costs and distractions; our ability to successfully integrate our business and operations with SWS is uncertain; and our business may suffer as a result of uncertainty surrounding the timing and likelihood of any proposed acquisition.

Because we intend to use a substantial portion of our remaining available cash to make acquisitions or effect a business combination, we may become subject to risks inherent in pursuing and completing any such acquisitions or business combination.

We are endeavoring to make acquisitions or effect business combinations with a substantial portion of our remaining available cash. We may not, however, be able to identify suitable targets, consummate acquisitions or effect a combination on commercially acceptable terms or, if consummated, successfully integrate personnel and operations.

The success of any acquisition or business combination will depend upon, among other things, the ability of management and our employees to integrate personnel, operations, products and technologies effectively, to retain and motivate key personnel and to retain customers and clients of targets. In addition, any acquisition or business combination we undertake may consume available cash resources, result in potentially dilutive issuances of equity securities and divert management's attention from other business concerns. Even if we conduct extensive due diligence on a target business that we acquire or

Table of Contents

with which we merge, our diligence may not surface all material issues that may adversely affect a particular target business, and we may be forced to later write-down or write-off assets, restructure our operations or incur impairment or other charges that could result in our reporting losses. Consequently, we also may need to make further investments to support the acquired or combined company and may have difficulty identifying and acquiring the appropriate resources.

We may enter, through acquisitions or a business combination, into new lines of business or initiate new service offerings subject to the restrictions imposed upon us as a regulated financial holding company. Accordingly, there is no basis for you to evaluate the possible merits or risks of the particular target business with which we may combine or that we may ultimately acquire.

Existing circumstances may result in several of our directors having interests that may conflict with our interests.

A director who has a conflict of interest with respect to an issue presented to our board will have no inherent legal obligation to abstain from voting upon that issue. We do not have provisions in our bylaws or charter that require an interested director to abstain from voting upon an issue, and we do not expect to add provisions in our charter and bylaws to this effect. Although each director has a duty to act in good faith and in a manner he or she reasonably believes to be in our best interests, there is a risk that, should interested directors vote upon an issue in which they or one of their affiliates has an interest, their vote may reflect a bias that could be contrary to our best interests. In addition, even if an interested director abstains from voting, the director's participation in the meeting and discussion of an issue in which they have, or companies with which they are associated have, an interest could influence the votes of other directors regarding the issue.

Difficult market conditions have adversely affected the yield on our available cash.

Our primary objective is to preserve and maintain the liquidity of our available cash, while at the same time maximizing yields without significantly increasing risk. The capital and credit markets have been experiencing volatility and disruption for a prolonged period. This volatility and disruption reached unprecedented levels, resulting in dramatic declines in interest rates and other yields relative to risk. This downward pressure has negatively affected the yields we receive on our available cash. If current levels of market disruption and volatility continue or worsen, there can be no assurance that we will receive any significant yield on our available cash. Further, given current market conditions, no assurance can be given that we will be able to preserve our available cash.

If regulators determine that we control SWS, we will be required to file appropriate reports with the Federal Reserve Board and potentially provide financial support.

As a general matter, an investor is deemed to control a depository institution or other company if the investor owns or controls 25% or more of any class of voting stock. Subject to rebuttal, an investor may be presumed to control a depository institution or other company if the investor owns or controls ten percent or more of any class of voting stock. At December 31, 2013, we beneficially owned 24.4% of the outstanding common stock of SWS. In connection with the transactions entered into with SWS, we filed a Rebuttal of Control, which the Office of Thrift Supervision, now a part of the Office of the Comptroller of the Currency, accepted based upon the facts represented by us. The transaction documents also provide for mechanisms to prevent us from being deemed to control SWS through our ownership of voting securities. Notwithstanding this finding by the Office of Thrift Supervision, in the event that we were determined to control SWS, we would be required to file appropriate reports as a financial holding company regulated by the Federal Reserve Board reflecting our controlling interest in SWS. In

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

connection with PlainsCapital Merger, we provided certain passivity commitments to the Federal Reserve Board related to SWS. These passivity commitments provide that we cannot take certain actions, namely exercising any controlling influence over management or policies, without the prior approval of the Federal Reserve Bank.

In addition, it is a policy of the Federal Reserve Board that a bank holding company should serve as a source of financial and managerial strength to the depository institutions that it controls. The Dodd-Frank Act requires by statute that all holding companies serve as a source of financial strength for any subsidiary of the holding company. The Federal Reserve Board and the other banking agencies have not published a proposed rule implementing these source of strength requirements. Given that the Federal Reserve Board became the primary federal regulator of savings and loan holding companies (SLHCs), such as SWS, the policy for SLHCs on this subject likely will be altered to align more closely with those for bank holding companies. The regulators may require certain financial and other action by a regulated holding company in support of controlled depository institutions even if such action is not in the best interests of the regulated holding company or its stockholders.

Table of Contents

Risks Related to Our Common Stock

We may issue shares of preferred stock or additional shares of common stock to complete an acquisition or effect a combination or under an employee incentive plan after consummation of an acquisition or combination, which would dilute the interests of our stockholders and likely present other risks.

The issuance of shares of preferred stock or additional shares of common stock:

- may significantly dilute the equity interest of our stockholders;
- may subordinate the rights of holders of common stock if preferred stock is issued with rights senior to those afforded our common stock;
- could cause a change in control if a substantial number of shares of common stock are issued, which may affect, among other things, our ability to use our net operating loss carry forwards; and
- may adversely affect prevailing market prices for our common stock.

Our authorized capital stock includes ten million shares of preferred stock, and we currently have 114,068 shares of Series B Preferred Stock issued and outstanding, liquidation preference \$1,000 per share, to the Secretary of the Treasury pursuant to the SBLF. Our board of directors, in its sole discretion, may designate and issue one or more additional series of preferred stock from the authorized and unissued shares of preferred stock. Subject to limitations imposed by law or our articles of incorporation, our board of directors is empowered to determine the designation and number of shares constituting each series of preferred stock, as well as any designations, qualifications, privileges, limitations, restrictions or special or relative rights of additional series. The rights of preferred stockholders may supersede the rights of common stockholders. Preferred stock could be issued with voting and conversion rights that could adversely affect the voting power of the shares of our common stock. The issuance of preferred stock could also result in a series of securities outstanding that would have preferences over the common stock with respect to dividends and in liquidation.

Our common stock price may experience substantial volatility, which may affect your ability to sell our common stock at an advantageous price.

Price volatility of our common stock may affect your ability to sell our common stock at an advantageous price. Market price fluctuations in our common stock may arise due to acquisitions, dispositions or other material public announcements, including those regarding dividends or changes in management, along with a variety of additional factors, including, without limitation, other risks identified in Forward-looking

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

Statements and these Risk Factors. In addition, the stock markets in general, including the NYSE, have experienced extreme price and trading fluctuations. These fluctuations have resulted in volatility in the market prices of securities that often have been unrelated or disproportionate to changes in operating performance. These broad market fluctuations may adversely affect the market price of our common stock.

Our rights and the rights of our stockholders to take action against our directors and officers are limited.

We are organized under Maryland law, which provides that a director or officer has no liability in that capacity if he or she performs his or her duties in good faith, in a manner he or she reasonably believes to be in our best interests and with the care that an ordinarily prudent person in a like position would use under similar circumstances. In addition, our charter eliminates our directors' and officers' liability to us and our stockholders for money damages, except for liability resulting from actual receipt of an improper benefit or profit in money, property or services or active and deliberate dishonesty established by a final judgment and that is material to the cause of action. Our bylaws require us to indemnify our directors and officers for liability resulting from actions taken by them in those capacities to the maximum extent permitted by Maryland law. As a result, our stockholders and we may have more limited rights against our directors and officers than might otherwise exist under common law. In addition, we may be obligated to fund the defense costs incurred by our directors and officers.

The Treasury's investment in us imposes restrictions and obligations upon us that could adversely affect the rights of our common stockholders.

We have sold 114,068 shares of our Series B Preferred Stock, liquidation preference \$1,000 per share, for \$114.1 million, to the Secretary of the Treasury pursuant to the SBLF. The shares of Series B Preferred Stock are senior to shares of our common stock with respect to dividends and liquidation preference. The terms of the Series B Preferred Stock provided for the payment of non-cumulative dividends on a quarterly basis. As long as shares of Series B Preferred Stock remain

Table of Contents

outstanding, we may not pay dividends to our common stockholders (nor may we repurchase or redeem any shares of our common stock) during any quarter in which we fail to declare and pay dividends on the Series B Preferred Stock and for the next three quarters following such failure. In addition, under the terms of the Series B Preferred Stock, we may only declare and pay dividends on our common stock (or repurchase shares of our common stock), if, after payment of such dividend, the dollar amount of our Tier 1 capital would be at least ninety percent (90%) of Tier 1 capital as of September 27, 2011, excluding any charge-offs and redemptions of the Series B Preferred Stock.

Our charter and laws contain provisions that could discourage acquisition bids or merger proposals, which may adversely affect the market price of our common stock.

Authority to Issue Additional Shares. Under our charter, our board of directors may issue up to an aggregate of ten million shares of preferred stock without stockholder action. The preferred stock may be issued, in one or more series, with the preferences and other terms designated by our board of directors that may delay or prevent a change in control of us, even if the change is in the best interests of stockholders. At December 31, 2013, 114,068 shares of preferred stock were designated or outstanding.

Banking Laws. Any change in control of our company is subject to prior regulatory approval under the Bank Holding Company Act or the Change in Bank Control Act, which may delay, discourage or prevent an attempted acquisition or change in control of us.

Insurance Laws. NLIC and ASIC are domiciled in the State of Texas. Before a person can acquire control of an insurance company domiciled in Texas, prior written approval must be obtained from the Texas Department of Insurance. Acquisition of control would be presumed on the acquisition, directly or indirectly, of ten percent or more of our outstanding voting stock, unless the regulators determine otherwise. Prior to granting approval of an application to acquire control of a domestic insurer, the Texas Department of Insurance will consider several factors, such as:

- the financial strength of the acquirer;
- the integrity and management experience of the acquirer's board of directors and executive officers;
- the acquirer's plans for the management of the insurer;
- the acquirer's plans to declare dividends, sell assets or incur debt;
- the acquirer's plans for the future operations of the domestic insurer;

- the impact of the acquisition on continued licensure of the domestic insurer;
- the impact on the interests of Texas policyholders; and
- any anti-competitive results that may arise from the consummation of the acquisition of control.

These laws may discourage potential acquisition proposals for us and may delay, deter or prevent a change of control of us, including transactions that some or all of our stockholders might consider desirable.

Restrictions on Calling Special Meeting, Cumulative Voting and Director Removal. Our bylaws includes a provision prohibiting the holders of less than a majority of the voting power represented by all of our shares issued, outstanding and entitled to be voted at a proposed meeting, from calling a special meeting of stockholders. Our charter does not provide for the cumulative voting in the election of directors. In addition, our charter provides that our directors may only be removed for cause and then only by an affirmative vote of at least two-thirds of the votes entitled to be cast in the election of directors. Any amendment to our charter relating to the removal of directors requires the affirmative vote of two-thirds of all of the votes entitled to be cast on the matter. These provisions of our bylaws and charter may delay, discourage or prevent an attempted acquisition or change in control of us.

An investment in our common stock is not an insured deposit.

An investment in our common stock is not a bank deposit and is not insured or guaranteed by the FDIC, SIPC, the Texas Department of Insurance or any other government agency. Accordingly, you should be capable of affording the loss of any investment in our common stock.

Table of Contents

Item 1B. Unresolved Staff Comments.

None.

Item 2. Properties.

We lease office space for our principal executive offices in Dallas, Texas. In addition to our principal office, our various business segments conduct business at various locations.

Banking. At December 31, 2013, our banking segment conducted business at 92 locations throughout Texas, including seven support facilities. Our banking segment's principal executive offices are located in Dallas, Texas, in space leased by PlainsCapital. We lease 35 banking locations including our principal offices and we own the remaining 57 banking locations. We have options to renew leases at most locations.

Mortgage Origination. Our mortgage origination segment is headquartered in Dallas, Texas and at December 31, 2013 conducted business from over 300 locations in 42 states. Each of these locations is leased by PrimeLending.

Insurance. At December 31, 2013, our insurance segment leases office space in Waco, Texas for all corporate, claims, customer service and data center operations.

Financial Advisory. Our financial advisory segment is headquartered in Dallas, Texas and at December 31, 2013 conducted business at 25 locations in 14 states. Each of these offices is leased by First Southwest.

Item 3. Legal Proceedings.

For a description of material pending legal proceedings, see the discussion set forth under the heading "Legal Matters" in Note 18 to our Consolidated Financial Statements, which is incorporated by reference herein.

Item 4. Mine Safety Disclosures.

Not applicable.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

Securities, Stockholder and Dividend Information

Our common stock is listed on the New York Stock Exchange under the symbol **HTH**. Our common stock has no public trading history prior to February 12, 2004. Our common stock closed at \$24.51 on February 28, 2014. At February 28, 2014, there were 90,177,991 shares of our common stock outstanding with 558 stockholders of record.

In connection with the PlainsCapital Merger, on November 29, 2012, we filed with the State Department of Assessments and Taxation of the State of Maryland articles supplementary for the Series B Preferred Stock, setting forth its terms. Holders of the Series B Preferred Stock are entitled to noncumulative cash dividends at a fluctuating dividend rate based on the Bank's level of qualified small business lending. The Series B Preferred Stock is non-voting, except in limited circumstances, and ranks senior to our common stock with respect to the payment of dividends and distribution of assets upon any liquidation, dissolution or winding up of Hilltop.

Subject to the restrictions discussed below, our stockholders are entitled to receive dividends when, as, and if declared by our board of directors out of funds legally available for that purpose. Our board of directors exercises discretion with respect to whether we will pay dividends and the amount of such dividend, if any. Factors that affect our ability to pay dividends on our common stock in the future include, without limitation, our earnings and financial condition, liquidity and capital resources, the general economic and regulatory climate, our ability to service any equity or debt obligations senior to our common stock and other factors deemed relevant by our board of directors. We have not declared or paid any dividends over the past two completed fiscal years.

Table of Contents

As a holding company, we are ultimately dependent upon our subsidiaries to provide funding for our operating expenses, debt service and dividends. Various laws limit the payment of dividends and other distributions by our subsidiaries to us, and may therefore limit our ability to pay dividends on our common stock. In addition, as long as shares of Series B Preferred Stock remain outstanding, we may not pay dividends to our common stockholders (nor may we repurchase or redeem any shares of our common stock) during any quarter in which we fail to declare and pay dividends on the Series B Preferred Stock and for the next three quarters following such failure. In addition, under the terms of the Series B Preferred Stock, we may only declare and pay dividends on our common stock (or repurchase shares of our common stock), if, after payment of such dividend, the dollar amount of our Tier 1 capital would be at least ninety percent (90%) of Tier 1 capital as of September 27, 2011, excluding any charge-offs and redemptions of the Series B Preferred Stock.

If required payments on our outstanding junior subordinated debentures held by our unconsolidated subsidiary trusts are not made or suspended, we may be prohibited from paying dividends on our common stock. Regulatory authorities could impose administratively stricter limitations on the ability of our subsidiaries to pay dividends to us if such limits were deemed appropriate to preserve certain capital adequacy requirements. See Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Restrictions on Dividends and Distributions.

The following table discloses the high and low sales prices per quarter for our common stock during 2013 and 2012. Quotations reflect inter-dealer prices, without retail mark-up, mark-down or commission and may not represent actual transactions.

	Price Range	
	High	Low
Year Ended December 31, 2013		
First Quarter	\$ 14.21	\$ 12.34
Second Quarter	\$ 16.94	\$ 12.59
Third Quarter	\$ 18.71	\$ 15.46
Fourth Quarter	\$ 24.05	\$ 17.09
Year Ended December 31, 2012		
First Quarter	\$ 9.10	\$ 7.87
Second Quarter	\$ 10.89	\$ 7.75
Third Quarter	\$ 12.80	\$ 10.21
Fourth Quarter	\$ 14.49	\$ 12.57

Securities Authorized for Issuance under Equity Compensation Plans

The following table sets forth information at December 31, 2013 with respect to compensation plans under which shares of our common stock may be issued. Additional information concerning our stock-based compensation plans is presented in Note 20, Stock-Based Compensation, in the notes to our consolidated financial statements.

Equity Compensation Plan Information

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights	Weighted-average exercise price of outstanding options, warrants and rights	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in first column)
Equity compensation plans approved by security holders*	600,000	\$ 7.70	3,519,657
Total	600,000	\$ 7.70	3,519,657

*Excludes shares of restricted stock granted under the 2003 equity incentive plan (the 2003 Plan), as all such shares are vested. No exercise price is required to be paid upon the vesting of the restricted shares of common stock granted. In September 2012, our stockholders approved the Hilltop Holdings Inc. 2012 Equity Incentive Plan (the 2012 Plan), which allows for the granting of nonqualified stock options, stock appreciation rights, restricted stock, restricted stock units, performance awards, dividend equivalent rights and other awards to employees of Hilltop, its subsidiaries and outside directors of

Table of Contents

Hilltop. Upon the effectiveness of the 2012 Plan, no additional awards are permissible under the 2003 Plan. In the aggregate, 4,000,000 shares of common stock may be delivered pursuant to awards granted under the 2012 Plan. At December 31, 2013, 480,343 awards had been granted pursuant to the 2012 Plan. All shares outstanding under the 2003 Plan and the 2012 Plan, whether vested or unvested, are entitled to receive dividends and to vote, unless forfeited. No participant in our 2012 Plan may be granted awards in any fiscal year covering more than 1,250,000 shares of our common stock.

Issuer Repurchases of Equity Securities

There were no repurchases of shares of common stock during the three months ended December 31, 2013.

Recent Sales of Unregistered Securities

All sales of unregistered securities have previously been reported.

Item 6. Selected Financial Data.

Our historical consolidated balance sheet data at December 31, 2013 and 2012 and our consolidated statements of operations data for the years ended December 31, 2013, 2012 and 2011 have been derived from our audited historical consolidated financial statements included elsewhere in this Annual Report. The following table shows our selected historical financial data for the periods indicated. You should read our selected historical financial data, together with the notes thereto, in conjunction with the more detailed information contained in our consolidated financial statements and related notes and Management's Discussion and Analysis of Financial Condition and Results of Operations included in this Annual Report. Our operating results for 2012 include the results from the operations acquired in the PlainsCapital Merger for the month of December 2012 and the operations acquired in the FNB Transaction are included in our operating results beginning September 14, 2013 (dollars in thousands, except per share data and weighted average shares outstanding).

GAAP combined ratio	102.6%	108.8%	106.2%	96.5%	96.8%
Statutory surplus (9)	\$ 125,054	\$ 120,319	\$ 118,708	\$ 119,297	\$ 117,063
Statutory premiums to surplus ratio	130.7%	125.0%	119.4%	102.0%	98.0%

(1) Series A preferred stock was redeemed in September 2010.

(2) Noted measures are typically used for measuring the performance of banking and financial institutions. Our operations prior to the PlainsCapital Merger are limited to our insurance operations. Therefore, noted measures for periods prior to 2012 are not a useful measure and have been excluded.

(3) Taxable equivalent net interest income divided by average interest-earning assets. Our operations prior to the PlainsCapital Merger are limited to our insurance operations. Therefore, noted measure for 2012 reflects the ratio for the month ended December 31, 2012.

(4) Noninterest expenses divided by the sum of total noninterest income and net interest income for the year.

(5) Noted measures are typically used for measuring the performance of banking and financial institutions. Our operations prior to the PlainsCapital Merger are limited to our insurance operations. Additionally, noted measure is not meaningful (NM) in 2012.

(6) Only considers operations of banking segment.

(7) Ratio for 2012 was calculated using the average assets for the month of December.

(8) Only considers operations of insurance segment.

(9) Statutory surplus includes combined surplus of NLIC and ASIC.

GAAP Reconciliation and Management's Explanation of Non-GAAP Financial Measures

We present two measures in our selected financial data that are not measures of financial performance recognized by GAAP.

Tangible book value per common share is defined as our total stockholders' equity, excluding preferred stock, reduced by goodwill and other intangible assets, divided by total common shares outstanding. Tangible common stockholders' equity to tangible assets is defined as our total stockholders' equity, excluding preferred stock, reduced by goodwill and other intangible assets divided by total assets reduced by goodwill and other intangible assets.

These measures are important to investors interested in changes from period to period in tangible common equity per share exclusive of changes in intangible assets. For companies such as ours that have engaged in business combinations, purchase accounting can result in the recording of significant amounts of goodwill and other intangible assets related to those transactions.

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

Table of Contents

You should not view this disclosure as a substitute for results determined in accordance with GAAP, and our disclosure is not necessarily comparable to that of other companies that use non-GAAP measures. The following table reconciles these non-GAAP financial measures to the most comparable GAAP financial measures, book value per common share and Hilltop stockholders' equity to total assets (dollars in thousands, except per share data).

	2013	2012	December 31, 2011	2010	2009

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion is intended to help the reader understand our results of operations and financial condition and is provided as a supplement to, and should be read in conjunction with, our audited consolidated financial statements and the accompanying notes thereto commencing on page F-1. In addition to historical financial information, the following discussion and analysis contains forward-looking statements that involve risks, uncertainties and assumptions. Our results and the timing of selected events may differ materially from those anticipated in these forward-looking statements as a result of many factors, including those discussed under Item 1A. Risk Factors and elsewhere in this Annual Report. See Forward-Looking Statements. All dollar amounts in the following discussion are in thousands, except per share amounts.

Unless the context otherwise indicates, all references in this Management's Discussion and Analysis of Financial Condition and Results of Operations, or MD&A, to the Company, we, us, our or ours or similar words are to Hilltop Holdings Inc. and its direct and indirect wholly owned subsidiaries, references to Hilltop refer solely to Hilltop Holdings Inc., references to PlainsCapital refer to PlainsCapital Corporation (a wholly owned subsidiary of Hilltop), references to the Bank refer to PlainsCapital Bank (a wholly owned subsidiary of PlainsCapital), references to FNB refer to First National Bank, references to First Southwest refer to First Southwest Holdings, LLC (a wholly owned subsidiary of the Bank) and its subsidiaries as a whole, references to FSC refer to First Southwest Company (a wholly owned subsidiary of First Southwest), references to PrimeLending refer to PrimeLending, a PlainsCapital Company (a wholly owned subsidiary of the Bank) and its subsidiaries as a whole and references to NLC refer to National Lloyds Corporation, formerly known as NLASCO, Inc., (a wholly owned subsidiary of Hilltop) and its subsidiaries as a whole.

OVERVIEW

Beginning in 1995, we operated as several companies under the name Affordable Residential Communities or ARC, now known as Hilltop Holdings Inc., a Maryland corporation. We engaged in the business of acquiring, renovating, repositioning and operating manufactured home communities, as well as certain related businesses.

In January 2007, we acquired NLC. NLC owns National Lloyds Insurance Company, or NLIC, and American Summit Insurance Company, or ASIC, both of which are licensed property and casualty insurers operating in multiple states. In addition, NLC also owns NALICO GA, a general agency that operates in Texas. NLIC commenced business in 1949 and currently operates in 14 states, with its largest market being the state of Texas. NLIC carries a financial strength rating of A (Excellent) by A.M. Best. ASIC was formed in 1955 and currently operates in 13 states, its largest market being the state of Arizona. ASIC carries a financial strength rating of A (Excellent) by A.M. Best. Both of these companies are regulated by the Texas Department of Insurance.

Table of Contents

On July 31, 2007, we sold substantially all of the operating assets used in our manufactured home communities business and our retail sales and financing business to American Residential Communities LLC. We received gross proceeds of approximately \$890 million in cash, which represents the aggregate purchase price of \$1.8 billion, less the indebtedness assumed by the buyer. After giving effect to expenses, taxes and our preferred stock and senior notes that remained outstanding following the sale, our net cash balance was approximately \$550 million. As a result of the sale, our primary operations through November 2012 were limited to providing fire and homeowners insurance to low value dwellings and manufactured homes primarily in Texas and other areas of the southern United States through NLC.

On November 30, 2012, we acquired PlainsCapital Corporation in a stock and cash transaction, whereby PlainsCapital Corporation merged with and into our wholly owned subsidiary, which continued as the surviving entity under the name PlainsCapital Corporation (the PlainsCapital Merger). Based on Hilltop's closing stock price on November 30, 2012, the total purchase price was \$813.5 million, consisting of 27.1 million shares of common stock, \$311.8 million in cash and the issuance of 114,068 shares of Hilltop Non-Cumulative Perpetual Preferred Stock, Series B (Hilltop Series B Preferred Stock). The fair value of assets acquired, excluding goodwill, totaled \$6.5 billion, including \$3.2 billion of loans, \$730.8 million of investment securities and \$70.7 million of identifiable intangibles. The fair value of the liabilities assumed was \$5.9 billion, including \$4.5 billion of deposits.

Concurrent with the consummation of the PlainsCapital Merger, we became a financial holding company registered under the Bank Holding Company Act of 1956, as amended by the Gramm-Leach-Bliley Act of 1999.

On September 13, 2013 (the Bank Closing Date), the Bank assumed substantially all of the liabilities, including all of the deposits, and acquired substantially all of the assets of Edinburg, Texas-based FNB from the Federal Deposit Insurance Corporation (the FDIC), as receiver, and reopened former branches of FNB acquired from the FDIC under the PlainsCapital Bank name (the FNB Transaction). Pursuant to the Purchase and Assumption Agreement by and among the FDIC as receiver for FNB, the FDIC and the Bank (the P&A Agreement), the Bank and the FDIC entered into loss-share agreements whereby the FDIC agreed to share in the losses of certain covered loans and covered other real estate owned (OREO) that the Bank acquired in the FNB Transaction. Based on preliminary purchase date valuations, the fair value of the assets acquired was \$2.2 billion, including \$1.1 billion in covered loans, \$286.2 million in securities, \$135.2 million in covered OREO and \$42.9 million in non-covered loans. The Bank also assumed \$2.2 billion in liabilities, consisting primarily of deposits.

Following the PlainsCapital Merger, our primary line of business has been to provide business and consumer banking services from offices located throughout central, north and west Texas through the Bank. Further, the acquisition of FNB's expansive branch network allows the Bank to further develop its Texas footprint through expansion into the Rio Grande Valley, Houston, Corpus Christi, Laredo and El Paso markets, among others. In addition to the Bank, our other subsidiaries have specialized areas of expertise that allow us to provide an array of financial products and services such as mortgage origination, insurance and financial advisory services.

At December 31, 2013, on a consolidated basis, we had total assets of \$8.9 billion, total deposits of \$6.7 billion, total loans, including loans held for sale, of \$5.6 billion and stockholders' equity of \$1.3 billion. Our operating results beginning December 1, 2012 include the banking, mortgage origination and financial advisory operations acquired in the PlainsCapital Merger. Accordingly, our operating results and financial condition for the year ended December 31, 2013 are not comparable to prior years. Additionally, the presentation of our historical consolidated financial statements for 2011 has been modified and certain items have been reclassified to conform to the 2012 and 2013 presentation, which is more consistent with that of a financial institution that provides an array of financial products and services. Our banking operations include the operations acquired in the FNB Transaction since September 14, 2013.

Segment Information

As a result of the PlainsCapital Merger, we have two primary operating business units, PlainsCapital (financial services and products) and NLC (insurance). Within the PlainsCapital unit are three primary wholly owned operating subsidiaries: the Bank, PrimeLending and First Southwest. Under accounting principles generally accepted in the United States (GAAP), following the PlainsCapital Merger our business units were comprised of four reportable business segments organized primarily by the core products offered to the segments' respective customers: banking, mortgage origination, insurance and financial advisory. These segments reflect the manner in which operations are managed and the criteria used by our chief operating decision maker function to evaluate segment performance, develop strategy and allocate resources. Our chief operating decision maker function consists of the President and Chief Executive Officer of Hilltop and the Chief Executive Officer of PlainsCapital. During the fourth quarter of 2013, we began presenting certain amounts previously allocated to the four reportable business segments within Corporate to better reflect our internal organizational structure. This change had no

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

Table of Contents

impact on our consolidated results of operations. Our historical segment disclosures and MD&A have been revised to conform to the current presentation. Consistent with the segment operating results during 2013, we anticipate that future revenues will be driven primarily from the banking and mortgage origination segments, with the remainder being generated by our insurance and financial advisory segments. Based on historical results of PlainsCapital Corporation, the relative share of total revenue provided by our banking and mortgage origination segments fluctuates depending on market conditions, and operating results for the mortgage origination segment tend to be more volatile than operating results for the banking segment.

The banking segment includes the operations of the Bank and, since September 14, 2013, the operations acquired in the FNB Transaction. The banking segment primarily provides business and consumer banking products and services from offices located throughout Texas and generates revenue from its portfolio of earning assets. The Bank's results of operations are primarily dependent on net interest income, while also deriving revenue from other sources, including service charges on customer deposit accounts and trust fees.

The mortgage origination segment includes the operations of PrimeLending, which offers a variety of loan products from offices in 42 states and generates revenue predominantly from fees charged on the origination of loans and from selling these loans in the secondary market.

The insurance segment includes the operations of NLC, which operates through its wholly owned subsidiaries, NLIC and ASIC. Insurance segment income is primarily generated from revenue earned on net insurance premiums less loss and loss adjustment expenses (LAE) and policy acquisition and other underwriting expenses in Texas and other areas of the southern United States.

The financial advisory segment generates a majority of its revenues from fees and commissions earned from investment advisory and securities brokerage services at First Southwest. The principal subsidiaries of First Southwest are FSC, a broker-dealer registered with the Securities and Exchange Commission (the SEC) and Financial Industry Regulatory Authority, and First Southwest Asset Management, Inc., a registered investment advisor under the Investment Advisors Act of 1940. FSC holds trading securities to support sales, underwriting and other customer activities. These securities are marked to market through other noninterest income. FSC uses derivatives to support mortgage origination programs of certain non-profit housing organization clients. FSC hedges its related exposure to interest rate risk from these programs with U.S. Agency to-be-announced, or TBA, mortgage-backed securities. These derivatives are marked to market through other noninterest income.

Corporate includes certain activities not allocated to specific business segments. These activities include holding company financing and investing activities, and management and administrative services to support the overall operations of the Company including, but not limited to, certain executive management, corporate relations, legal, finance, and acquisition costs not allocated to business segments. Balance sheet amounts for remaining subsidiaries not discussed previously and the elimination of intercompany transactions are included in All Other and Eliminations.

Additional information concerning our reportable segments is presented in Note 30, Segment and Related Information, in the notes to our consolidated financial statements. The following tables present certain information about the operating results of our reportable segments (in thousands).

	Banking	Mortgage Origination	Insurance	Financial Advisory	Corporate	All Other and Eliminations	Hilltop Consolidated

Table of Contents

How We Generate Revenue

We generate revenue from net interest income and from noninterest income. Net interest income represents the difference between the income earned on our assets, including our loans and investment securities, and our cost of funds, including the interest paid on the deposits and borrowings that are used to support our assets. Net interest income is a significant contributor to our operating results. Fluctuations in interest rates, as well as the amounts and types of interest-earning assets and interest-bearing liabilities we hold, affect net interest income. We generated \$296.2 million in net interest income during the year ended December 31, 2013, compared with net interest income of \$28.8 million in 2012 and net interest income of \$2.1 million in 2011. The significant year-over-year increases in net interest income were primarily due to \$267.5 million and \$21.1 million in net interest income during the year ended December 31, 2013 and the month ended December 31, 2012, respectively, generated by those operations acquired as part of the PlainsCapital Merger.

The other component of our revenue is noninterest income, which is primarily comprised of the following:

(i) *Income from mortgage operations.* Through our wholly owned subsidiary, PrimeLending, we generate noninterest income by originating and selling mortgage loans. During the year ended December 31, 2013, we generated \$537.3 million in net gains from the sale of loans, other mortgage production income (including income associated with retained mortgage servicing rights), and mortgage loan origination fees, compared with \$57.6 million during the month ended December 31, 2012.

(ii) *Net insurance premiums earned.* Through our wholly owned insurance subsidiary, NLC, we provide fire and limited homeowners insurance for low value dwellings and manufactured homes. We generated \$157.5 million, \$146.7 million and \$134.0 million in net insurance premiums earned during 2013, 2012 and 2011, respectively.

(iii) *Investment advisory fees and commissions and securities brokerage fees and commissions.* Through our wholly owned subsidiary, First Southwest, we provide public finance advisory and various investment banking and brokerage services. We generated \$93.1 million in investment advisory fees and commissions and securities brokerage fees and commissions during the year ended December 31, 2013, compared with \$11.2 million during the month ended December 31, 2012.

In the aggregate, we generated \$850.1 million, \$224.2 million and \$141.7 million in noninterest income during 2013, 2012 and 2011, respectively. The significant year-over-year increases in noninterest income during 2013 and 2012 were primarily due to the inclusion of the mortgage origination and financial advisory operations that we acquired as a part of the PlainsCapital Merger.

We also incur noninterest expenses in the operation of our businesses. Our businesses engage in labor intensive activities and, consequently, employees' compensation and benefits represent the majority of our noninterest expenses.

Consolidated Operating Results

The income applicable to common stockholders for the year ended December 31, 2013 was \$121.0 million, or \$1.40 per diluted share, compared to losses applicable to common stockholders of \$5.9 million, or \$0.10 per diluted share for the year ended December 31, 2012, and \$6.5 million, or \$0.12 per diluted share, for the year ended December 31, 2011.

As a result of the PlainsCapital Merger on November 30, 2012, the net income of PlainsCapital is included in our operating results for the year ended December 31, 2013 and the month ended December 31, 2012. The operations acquired in the FNB Transaction are included in our operating results beginning September 14, 2013, and are therefore not fully reflected in our consolidated statement of operations for the year ended December 31, 2013. FNB's results of operations prior to September 14, 2013 are not included in our consolidated operating results. We expect the operations acquired in the FNB Transaction to have a significant effect on the Bank's operating results in future periods.

The FNB Transaction was accounted for using the purchase method of accounting, and accordingly, purchased assets, including identifiable intangible assets and assumed liabilities, were recorded at their respective Bank Closing Date fair values using significant estimates and assumptions to value certain identifiable assets acquired and liabilities assumed. During the quarter ended December 31, 2013, the estimated fair values of certain identifiable assets acquired and liabilities assumed as of the Bank Closing Date were adjusted as a result of additional information obtained primarily related to the fair values of loans, covered OREO, amounts receivable under the loss-share agreements with the FDIC (FDIC Indemnification Asset), premises and equipment and other intangible assets. These adjustments resulted in a preliminary bargain purchase gain associated with the FNB Transaction during 2013 of \$12.6 million, before taxes of

Table of Contents

\$4.5 million, which is included within noninterest income. Due to the short time period between the Bank Closing Date and December 31, 2013, the real estate appraisal validation exercise remains outstanding and the Bank Closing Date valuations related to covered OREO and FDIC Indemnification Asset are considered preliminary and could differ significantly when finalized.

Certain items included in net income for 2012 and 2013 resulted from purchase accounting associated with the PlainsCapital Merger and FNB Transaction. Income before taxes for 2013 includes net accretion of \$58.5 million and \$10.2 million on earning assets and liabilities acquired in the PlainsCapital Merger and FNB Transaction, respectively, offset by amortization of identifiable intangibles of \$9.8 million and \$0.3 million, respectively. Loss before taxes for 2012 includes net accretion of \$5.9 million on earning assets and liabilities acquired in the PlainsCapital Merger and amortization of identifiable intangibles of \$0.8 million.

We consider the ratios shown in the table below to be key indicators of our performance.

	Year ended December 31, 2013
Performance Ratios (1):	
Return on average stockholders' equity	11.00%
Return on average assets	1.67%
Net interest margin (taxable equivalent) (2)	4.47%

(1) Noted measures are typically used for measuring the performance of banking and financial institutions. Our operations prior to the acquisition of PlainsCapital are limited to our insurance operations. Therefore, noted measures for periods prior to 2013 are not useful measures and have been excluded.

(2) Taxable equivalent net interest income divided by average interest-earning assets.

During the year ended December 31, 2013, the consolidated taxable equivalent net interest margin of 4.47% was impacted by PlainsCapital Merger related accretion of discount on loans of \$61.8 million, amortization of premium on acquired securities of \$5.7 million and amortization of premium on acquired time deposits of \$2.4 million. Additionally, FNB Transaction related accretion of discount on loans of \$7.5 million and amortization of premium on acquired time deposits of \$2.7 million also impacted the consolidated taxable equivalent net interest margin during the year ended December 31, 2013. These items increased the consolidated taxable equivalent net interest margin by 103 basis points for the year ended December 31, 2013. The consolidated taxable equivalent net interest margin was 4.64% for the month ended December 31, 2012. The taxable equivalent net interest margin was impacted by PlainsCapital Merger related accretion of discount on loans of \$6.3 million, amortization of premium on acquired securities of \$0.7 million and amortization of premium on acquired time deposits of \$0.4 million. These items increased the consolidated taxable equivalent interest margin by 110 basis points for the month ended December 31, 2012.

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

Table of Contents

The table below provides additional details regarding our consolidated net interest income (dollars in thousands). Our operations prior to the PlainsCapital Merger were limited to our insurance operations. Therefore, the consolidated net interest income for 2012 reflects details for the month ended December 31, 2012.

	Year Ended December 31, 2013			Month Ended December 31, 2012

Net interest spread (2)			4.40%			4.52%
Net interest margin (2)			4.47%			4.64%

(1) Average balance includes non-accrual loans.

(2) Taxable equivalent adjustments are based on a 35% tax rate. The adjustment to interest income was \$2.4 million and \$0.2 million for the year ended December 31, 2013 and the month ended December 31, 2012, respectively.

On a consolidated basis, net interest income increased \$267.4 million during 2013, compared with 2012, while net interest income increased \$26.8 million during 2012, compared with 2011. These increases were primarily due to the inclusion of the results of operations of the banking

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

segment, which was acquired in the PlainsCapital Merger on November 30, 2012. Net interest income prior to December 2012 was limited to interest income on securities and interest expense on notes payable of the insurance segment.

The provision for loan losses is determined by management as the amount to be added to the allowance for loan losses after net charge-offs have been deducted to bring the allowance to a level which, in management's best estimate, is necessary to absorb probable losses within the existing loan portfolio. The consolidated provision for loan losses, primarily in the banking segment, was \$37.2 million during 2013. During 2013, the provision for loan losses was comprised of charges relating to newly originated loans and acquired loans without credit impairment at acquisition of \$33.1 million and purchased credit impaired (PCI) loans of \$4.1 million.

Consolidated noninterest income increased \$625.9 million during 2013, compared with 2012, while consolidated noninterest income increased \$82.6 million during 2012, compared with 2011. These increases were primarily due to the inclusion of \$640.2 million and \$68.5 million during the year ended December 31, 2013 and the month ended December 31, 2012,

Table of Contents

respectively, of noninterest income generated from the operations of the mortgage origination and financial advisory segments acquired in the PlainsCapital Merger. Consolidated noninterest income during 2013 also included an increase in net insurance premiums earned of \$10.8 million, compared with 2012, and an increase of \$12.7 million during 2012, compared with 2011. In addition, as previously discussed, the FNB Transaction resulted in the recognition of a preliminary pre-tax bargain purchase gain of \$12.6 million during 2013.

Our consolidated noninterest expense during 2013 increased \$656.2 million, compared with 2012, while consolidated noninterest expense during 2012 increased \$100.3 million, compared with 2011. The increases primarily resulted from the inclusion of \$739.7 million and \$77.5 million during the year ended December 31, 2013 and month ended December 31, 2012, respectively, in employees' compensation and benefits, occupancy and equipment and other expenses specifically attributable to those segments acquired as a part of the PlainsCapital Merger. Included in employee's compensation and benefits expense during 2012 includes an \$8.9 million expense related to the separate retention agreements between Hilltop and two executive officers of PlainsCapital entered into in connection with the PlainsCapital Merger. Other noninterest expenses during 2012 include PlainsCapital Merger related expenses of \$6.6 million. The balance of increases in our consolidated noninterest expenses during 2013 and 2012 were primarily related to loss and LAE and policy acquisition and other underwriting expenses specific to our insurance segment.

Consolidated income tax expense during 2013 was \$70.7 million, reflecting an effective rate of 35.8%. During 2012 and 2011, we recorded income tax benefits, due to losses from operations, of \$1.1 million and \$5.0 million, respectively, reflecting effective rates of 18.3% and 43.4%, respectively. The increase in income tax expense during 2013 was due to the operating income generated by our business segments. The effective income tax rates for 2012 and 2011 are not indicative of future effective income tax rates as a result of the PlainsCapital Merger.

Segment Results

Banking Segment

Income before income taxes in our banking segment for the year ended December 31, 2013 and the month ended December 31, 2012 was \$172.1 million and \$9.7 million, respectively, and was primarily driven by net interest income of \$293.3 million and \$24.9 million, respectively, partially offset by noninterest expenses of \$155.1 million and \$16.1 million, respectively.

At December 31, 2013, the Bank exceeded all regulatory capital requirements with a total capital to risk weighted assets ratio of 14.00%, Tier 1 capital to risk weighted assets ratio of 13.38% and a Tier 1 capital to average assets, or leverage, ratio of 9.29%. At December 31, 2013, the Bank was also considered to be well-capitalized under regulatory requirements without giving effect to the final Basel III capital rules adopted by the Federal Reserve Board on July 2, 2013. For additional discussion of the final Basel III capital rules, see Item 1, Business Government Supervision and Regulation PlainsCapital Bank Basel III.

We consider the ratios shown in the table below to be key indicators of the performance of our banking segment.

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

Year ended
December 31, 2013

Performance Ratios (1):

Efficiency ratio (2)	42.58%
Return on average assets	1.79%
Net interest margin (taxable equivalent) (3)	5.17%

(1) The banking segment was acquired on November 30, 2012. Therefore, noted measures for periods prior to 2013 are not useful measures and have been excluded.

(2) Noninterest expenses divided by the sum of total noninterest income and net interest income for the period.

(3) Taxable equivalent net interest income divided by average interest-earning assets.

Table of Contents

During the year ended December 31, 2013, the banking segment's taxable equivalent net interest margin of 5.17% was impacted by PlainsCapital Merger related accretion of discount on loans of \$61.8 million, amortization of premium on acquired securities of \$5.7 million and amortization of premium on acquired time deposits of \$2.4 million. Additionally, FNB Transaction related accretion of discount on loans of \$7.5 million and amortization of premium on acquired time deposits of \$2.7 million also impacted the banking segment's taxable equivalent net interest margin during the year ended December 31, 2013. These items increased the banking segment's taxable equivalent net interest margin by 120 basis points for the year ended December 31, 2013. The banking segment's taxable equivalent net interest margin for the month ended December 31, 2012 of 5.83% was impacted by PlainsCapital Merger related accretion of discount on loans of \$6.3 million, amortization of premium on acquired securities of \$0.7 million and amortization of premium on acquired time deposits of \$0.4 million. These items increased the banking segment's taxable equivalent interest margin by 140 basis points for the month ended December 31, 2012.

The table below provides additional details regarding our banking segment's net interest income (dollars in thousands).

	Year Ended December 31, 2013			Month Ended December 31, 2012		
	Average Outstanding Balance	Interest Earned or Paid	Annualized Yield or Rate	Average Outstanding Balance	Interest Earned or Paid	Annualized Yield or Rate

Net interest margin (2)			5.17%			5.83%

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

(1) Average balance includes non-accrual loans.

(2) Taxable equivalent adjustments are based on a 35% tax rate. The adjustment to interest income was \$2.0 million and \$0.2 million for the year ended December 31, 2013 and the month ended December 31, 2012, respectively.

(3) Excludes the allocation of interest expense on PlainsCapital debt of \$1.0 million and \$0.1 million for the year ended December 31, 2013 and the month ended December 31, 2012, respectively.

The banking segment's net interest margin shown above exceeds our consolidated net interest margin. Our consolidated net interest margin includes the yields and costs associated with certain items within interest-earning assets and interest-bearing liabilities in the financial advisory segment, as well as the borrowing costs of Hilltop and PlainsCapital, both of which reduce our consolidated net interest margin. In addition, the banking segment's interest earning assets include lines of credit extended

Table of Contents

to subsidiaries, the yields on which increase the banking segment's net interest margin. Such yields and costs are eliminated from the consolidated financial statements.

Because the operations of the banking segment acquired in the PlainsCapital Merger are not included in our results of operations for the full fiscal year ended December 31, 2012, the table summarizing the changes in our net interest income due to variances in the volume of our interest-earning assets and interest-bearing liabilities would not be meaningful and has therefore been omitted.

The banking segment's noninterest income was \$71.0 million and \$4.6 million during the year ended December 31, 2013 and the month ended December 31, 2012 and primarily related to intercompany financing charges associated with the lending commitment on the PrimeLending warehouse line of credit. Noninterest income during the year ended December 31, 2013 also included the recognition of a preliminary pre-tax bargain purchase gain of \$12.6 million in connection with the FNB Transaction.

The banking segment's noninterest expenses were \$155.1 million and \$16.1 million during the year ended December 31, 2013 and the month ended December 31, 2012, respectively, and were primarily comprised of employees' compensation and benefits, and occupancy expenses.

Mortgage Origination Segment

Income before income taxes in our mortgage origination segment for the year ended December 31, 2013 and the month ended December 31, 2012 was \$27.4 million and \$2.3 million, respectively. Income before income taxes was primarily driven by noninterest income of \$537.5 million and \$57.6 million during the year ended December 31, 2013 and the month ended December 31, 2012, respectively, partially offset by noninterest expense of \$472.3 million and \$50.3 million during the year ended December 31, 2013 and the month ended December 31, 2012, respectively. Additionally, net interest expense of \$37.8 million and \$5.0 million during the year ended December 31, 2013 and the month ended December 31, 2012, respectively, resulted from interest incurred on a warehouse line of credit held at the Bank as well as related intercompany financing costs, partially offset by interest income earned on loans held for sale.

PrimeLending originates all of its mortgage loans through a retail channel. The following table provides certain details regarding our mortgage loan originations for the year ended December 31, 2013 (dollars in thousands).

	Volume	% of Total
Mortgage Loan Originations - units	55,781	
Mortgage Loan Originations - volume	\$ 11,792,562

Table of Contents

The mortgage lending business is subject to variables that can impact loan origination volume, including seasonal and interest rate fluctuations. Historically, we have typically experienced increased loan origination volume from purchases of homes during the spring and summer, when more people tend to move and buy or sell homes. An increase in mortgage interest rates tends to result in decreased loan origination volume from refinancings, while a decrease in mortgage interest rates tends to result in increased refinancings. Changes in interest rates have historically had a lesser impact on home purchases volume than on refinancing volume.

Beginning in May 2013 and continuing through the fourth quarter of 2013, mortgage interest rates increased at a pace that, along with other factors, resulted in a 21.2% decrease in the mortgage origination segment's total loan origination volume during the third and fourth quarters of 2013 when compared to the first and second quarters of 2013. Home purchases volume during the six months ended June 30, 2013 and December 31, 2013 was \$4.0 billion and \$4.2 billion, respectively, reflecting a 5.1% increase, while refinancing volume decreased from \$2.6 billion (39.5% of total loan origination volume) to \$1.0 billion (19.3% of total loan origination volume) between the same periods. Due to recent volatility in mortgage interest rates and uncertain consumer confidence, 2014 mortgage loan origination volume may vary from origination trends historically experienced by the mortgage origination segment.

While PrimeLending's total loan origination volume decreased 21.2% during the third and fourth quarters of 2013 compared to the first and second quarters of 2013, income before income taxes decreased 107.4% between the same periods (\$29.6 million income compared to a \$2.2 million loss). Income before income taxes decreased at a greater rate primarily because segment operating costs included in noninterest expenses, such as employee related (salaries and benefits), occupancy and administrative expenses, decreased at a lesser rate, approximately 4%, than loan origination volume decreased between the two periods. To address negative trends in loan origination volume resulting from changes in interest rates that began in May 2013, the mortgage origination segment reduced its non-origination employee headcount approximately 22% during the third and fourth quarters of 2013. Third quarter segment operating costs were not significantly impacted by the headcount reductions, because the decreases in employees' salaries and benefits resulting from the reductions were mostly offset by related severance expenses incurred during the quarter. Salaries and benefits expenses decreased approximately 9% between the third and fourth quarters, as the benefits of the headcount reductions in the third quarter of 2013 began to be realized. We are also engaged in other initiatives to reduce segment operating costs that were primarily responsible for the decrease of approximately 4% in non-employee related expenses between the third and fourth quarters noted above. We anticipate that we will begin to realize the full benefits of the employee reductions and the other cost savings initiatives during the first quarter of 2014. Also impacting the trend in income before taxes, to a lesser extent, was a decrease in loan revenue margins resulting from increased competition.

PrimeLending sells substantially all mortgage loans it originates to various investors in the secondary market, the majority servicing released. During the first and second quarters of 2013, PrimeLending retained servicing on approximately 8% of loans sold. This rate was increased to approximately 22% during the third and fourth quarters of 2013. The related mortgage servicing rights asset was valued at \$20.1 million on \$2.0 billion of serviced loan volume as of December 31, 2013, compared to a value of \$2.1 million at December 31, 2012. All income related to retained servicing, including changes in the value of the mortgage servicing rights asset, is included in noninterest income.

Noninterest income of \$537.5 million and \$57.6 million for the year ended December 31, 2013 and the month ended December 31, 2012, respectively, was comprised of net gains on the sale of loans and other mortgage production income, and mortgage origination fees. As a result of increased competition, noninterest income decreased at a greater rate, 27.6%, during the third and fourth quarters of 2013 when compared to the first and second quarters of 2013 than the decrease in loan origination volume experienced during the same periods, which was 21.2%. Noninterest income during the year ended December 31, 2013 included \$11.1 million of net losses resulting from changes in the fair value of the mortgage origination segment's interest rate lock commitments (IRLCs) and loans held for sale, and the related activity associated with forward commitments used by PrimeLending to mitigate interest rate risk associated with its IRLCs and mortgage loans held for sale. The loss was primarily the result of a decrease in the volume of IRLCs and mortgage loans held for sale between December 31, 2012 and December 31, 2013.

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

Noninterest expenses were \$472.3 million and \$50.3 million for the year ended December 31, 2013 and the month ended December 31, 2012, respectively. Employees' compensation and benefits accounted for the majority of the noninterest expenses incurred. Compensation that varies with the volume of mortgage loan originations and overall segment profitability comprised approximately 59% of the total employees' compensation and benefits expenses during the year ended December 31, 2013. PrimeLending records unreimbursed closing costs when it pays a customer's closing costs in return for the customer choosing to accept a higher interest rate on the customer's mortgage loan. Unreimbursed closing costs during the year ended December 31, 2013 and the month ended December 31, 2012 were \$30.1 million and \$5.9 million, respectively.

Table of Contents

Between January 1, 2005, and December 31, 2013, the mortgage origination segment sold mortgage loans totaling \$55.5 billion. These loans were sold under sales contracts that generally include provisions which hold the mortgage origination segment responsible for errors or omissions relating to its representations and warranties that loans sold meet certain requirements, including representations as to underwriting standards and the validity of certain borrower representations in connection with the loan. In addition, the sales contracts typically require the refund of purchased servicing rights plus certain investor servicing costs if a loan experiences an early payment default. While the mortgage origination segment sold loans prior to 2005, it has not experienced, nor does it anticipate experiencing, significant losses on loans originated prior to 2005 as a result of investor claims under these provisions of its sales contracts.

When an investor claim for indemnification of a loan sold is made, we evaluate the claim and determine if the claim can be satisfied through additional documentation or other deliverables. If the claim cannot be satisfied in that manner, we negotiate with the investor to reach a settlement of the claim. Settlements typically result in either the repurchase of a loan or reimbursement to the investor for losses incurred on the loan. The following table summarizes the mortgage origination segment's claims resolution activity relating to loans sold between January 1, 2005, and December 31, 2013 (dollars in thousands).

	Original Loan Balance		Loss Recognized	
	Amount	% of Loans Sold	Amount	% of Loans Sold
Claims resolved with no payment	\$ 130,917	0.24%	\$ 0.00%	
Claims resolved as a result of a loan repurchase or payment to an investor for losses incurred (1)	172,006	0.31%	21,929	0.04%
	\$ 302,923	0.55%	\$ 21,929	0.04%

(1) Losses incurred include refunded purchased servicing rights.

At December 31, 2013 and 2012, the mortgage origination segment's indemnification liability reserve totaled \$21.1 million and \$19.0 million, respectively. The related provision for indemnification losses was \$3.5 million and \$0.4 million for the year ended December 31, 2013 and the month ended December 31, 2012, respectively.

Insurance Segment

Income before income taxes in our insurance segment was \$7.6 million during 2013, compared with a loss before income taxes of \$4.7 million during 2012 and income before income taxes of \$0.2 million during 2011. Included within noninterest income of the insurance segment during 2013 is the recognition of a non-recurring gain of \$3.7 million. This non-recurring gain, which is eliminated upon consolidation, is due to our redemption during the fourth quarter of 2013 of \$6.9 million in aggregate principal amount of 7.50% Senior Exchangeable Notes due 2025 (the

Notes) of HTH Operating Partnership LP (OP), a wholly owned subsidiary of Hilltop, which were held by our insurance subsidiaries. The insurance segment is subject to claims arising out of severe weather, the incidence and severity of which are inherently unpredictable. Generally, the insurance segment's insured risks exhibit higher losses in the second and third calendar quarters due to a seasonal concentration of weather-related events in its primary geographic markets. Although weather-related losses (including hail, high winds, tornadoes and hurricanes) can occur in any calendar quarter, the second calendar quarter, historically, has experienced the highest frequency of losses associated with these events. Hurricanes, however, are more likely to occur in the third calendar quarter of the year.

The insurance segment had positive results during 2013, despite experiencing three tornado, wind and hail storms during the second quarter of 2013. Based on estimates of the ultimate cost, two of these storms are now considered catastrophic losses as they exceeded our \$8.0 million reinsurance retention during the third quarter of 2013. The estimate of ultimate losses from these storms totaled \$26.5 million at December 31, 2013 with a net loss, after reinsurance, of \$22.1 million during 2013. These net costs compare favorably to the prior year given our improved containment of expected losses from the weather events in May 2013 at June 30, 2013 compared to prior year activity. This year-over-year improvement contributed to a combined ratio of 102.6% during 2013, compared with 108.8% and 106.2% during 2012 and 2011, respectively. The 6.2% decrease in the combined ratio in 2013 compared to 2012 was primarily driven by the increase in earned premiums and improved containment of expected losses as previously noted. The 2.6% increase in the combined ratio in 2012 compared to 2011 was primarily driven by higher incurred losses associated with wind and hail losses and storms that occurred in Texas during 2012

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

Table of Contents

compared to the prior year, offset slightly by the increase in earned premiums. The combined ratio is a measure of overall insurance underwriting profitability, and represents the sum of the loss and LAE ratio and the underwriting expense ratio, which are discussed in more detail below.

Noninterest income of \$166.2 million, \$154.1 million and \$141.7 million during 2013, 2012 and 2011, respectively, included net insurance premiums earned of \$157.5 million, \$146.7 million and \$134.0 million, respectively. The increases in earned premiums are primarily attributable to volume and, to a lesser extent, rate increases in homeowners and mobile home products.

Direct insurance premiums written by major product line are presented in the table below (in thousands).

	Year Ended December 31,			Variance	
	2013	2012	2011	2013 vs 2012	2012 vs 2011
Direct Insurance Premiums					
Written:					
Homeowners	\$ 79,711	\$ 73,943	\$ 70,177	\$ 5,768	\$ 3,766
Fire	54,566	51,345	49,812	3,221	1,533
Mobile Home	34,940	30,123	26,353	4,817	3,770
Commercial	4,489	8,043	8,380	(3,554)	(337)
Other	276	326	332	(50)	(6)
	\$ 173,982	\$ 163,780	\$ 155,054	\$ 10,202	\$ 8,726

Total direct insurance premiums written for our three largest insurance product lines increased by \$13.8 million during 2013, compared to 2012, and by \$9.1 million during 2012, compared to 2011. These increases were due to growth in our core insurance products, partially offset by decreases of \$3.5 million and \$0.3 million in 2013 and 2012, respectively, related to a commercial product line that was non-renewed.

Net insurance premiums earned by major product line are presented in the table below (in thousands).

	Year Ended December 31,			Variance	
	2013	2012	2011	2013 vs 2012	2012 vs 2011
Net Insurance Premiums					
Earned:					
Homeowners	\$ 72,175	\$ 66,233	\$ 60,671	\$ 5,942	\$ 5,562
Fire	49,407	45,990	43,063	3,417	2,927
Mobile Home	31,636	26,982	22,783	4,654	4,199
Commercial	4,065	7,204	7,244	(3,139)	(40)
Other	250	292	287	(42)	5
	\$ 157,533	\$ 146,701	\$ 134,048	\$ 10,832	\$ 12,653

Net insurance premiums earned during 2013 and 2012 increased compared to 2012 and 2011, respectively, primarily due to the increases in net insurance premiums written of \$13.0 million and \$8.7 million in 2013 and 2012, respectively. These increases were offset by increases in unearned insurance premiums of \$2.1 million and \$3.9 million during 2013 and 2012, respectively, in each case as compared to the prior year.

Noninterest expenses of \$166.0 million, \$163.6 million and \$146.4 million during 2013, 2012 and 2011, respectively, include both loss and LAE expenses and policy acquisition and other underwriting expenses, as well as other noninterest expenses. Loss and LAE are recognized based on formula and case basis estimates for losses reported with respect to direct business, estimates of unreported losses based on past experience and deduction of amounts for reinsurance placed with reinsurers. Loss and LAE during 2013 was \$110.8 million, as compared to \$109.2 million and \$96.7 million during 2012 and 2011, respectively. As a result, the loss and LAE ratio during 2013, 2012 and 2011 was 70.3%, 74.4% and 72.2%, respectively. The ratio improvement during 2013, compared to 2012, was primarily a result of growth of earned premium and the improved containment of expected losses from the prior year weather events as previously discussed. The increase in the loss and LAE ratio during 2012, compared to 2011, was primarily due to increased severity of wind and hail storms from April, May and June 2012 weather events, partially offset by earned premium growth.

We seek to generate underwriting profitability through our insurance segment. Management evaluates NLC's loss and LAE ratio by bifurcating the losses to derive catastrophic and non-catastrophic loss ratios. The non-catastrophic loss ratio excludes Property Claims Services events that exceed \$1.0 million of losses to NLC. Catastrophic events, including those

Table of Contents

that do not exceed our reinsurance retention, affect insurance segment loss ratios. During 2013, catastrophic events that did not exceed our reinsurance retention accounted for \$22.3 million of the total loss and loss adjustment expense, as compared to \$23.3 million and \$20.3 million during 2012 and 2011, respectively. Excluding catastrophic events, our combined ratios during 2013, 2012 and 2011 would have improved by 14.3%, 15.8% and 15.2%, respectively.

Policy acquisition and other underwriting expenses encompass all expenses incurred relative to NLC operations, and include elements of multiple categories of expense otherwise reported as noninterest expense in the consolidated statements of operations. Included in other underwriting expenses during 2012 is a \$1.7 million write down of a policy administration system NLC was unable to successfully implement. Excluding this 2012 write down, the expense ratio during 2012 would have decreased by 1.1%.

The following table details the calculation of the underwriting expense ratio for the periods presented (dollars in thousands).

	Year Ended December 31,			Variance	
	2013	2012	2011	2013 vs 2012	2012 vs 2011
Amortization of deferred policy acquisition costs	\$ 40,592	\$ 38,757	\$ 34,755	\$ 1,835	\$ 4,002
Other underwriting expenses	12,859	13,829	12,670	(970)	1,159
Total	53,451	52,586	47,425	865	5,161
Agency expenses	(2,571)	(2,073)	(1,789)	(498)	(284)
Total less agency expenses	\$ 50,880	\$ 50,513	\$ 45,636	\$ 367	\$ 4,877
Net insurance premiums earned	\$ 157,533	\$ 146,701	\$ 134,048	\$ 10,832	\$ 12,653
Expense ratio	32.3%	34.4%	34.0%	-2.1%	0.4%

During 2013, the insurance segment initiated a review of the pricing of its primary products in each state of operation utilizing a consulting actuarial firm to supplement normal review processes. Rate filings have been made for certain products in several states for increases effective in 2014, and the process will continue through the remainder of its products and states in which it operates. Concurrently, business concentrations were reviewed and actions initiated, including cancellation of agents, non-renewal of policies and cessation of new business writing on certain products in problematic geographic

areas. We expect that these actions will reduce the rate of premium growth for 2014 when compared with the patterns exhibited in prior years. However, we expect the reduced exposure to volatile weather to improve our loss experience during 2014.

Financial Advisory Segment

Income before income taxes in our financial advisory segment for the year ended December 31, 2013 and the month ended December 31, 2012 were \$2.4 million and \$0.9 million, respectively. Rising interest rates along with increased volatility in fixed income markets have resulted in reduced sales of fixed income securities to institutional customers, some trading losses on securities held to support those sales and reduction in financial advisory fee income.

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

The financial advisory segment had net interest income of \$12.1 million and \$1.2 million during the year ended December 31, 2013 and the month ended December 31, 2012, respectively, consisting of securities lending activity, customer margin loan balances and investment securities used to support sales, underwriting and other customer activities.

The majority of noninterest income for the year ended December 31, 2013 and the month ended December 31, 2012 of \$102.7 million and \$10.9 million, respectively, was generated from fees and commissions earned from investment advisory and securities brokerage activities of \$93.1 million and \$11.2 million, respectively. The financial advisory segment participates in programs in which it issues forward purchase commitments of mortgage-backed securities to certain clients and sells TBAs. Changes in the fair values of these derivative instruments during the year ended December 31, 2013 and the month ended December 31, 2012 produced net gains of \$11.4 million and \$0.2 million, respectively. Changes in the fair value of the financial advisory segment's trading portfolio, which is used to support sales, underwriting and other customer activities, produced losses of \$1.8 million and \$0.6 million during the year ended December 31, 2013 and the month ended December 31, 2012, respectively.

Noninterest expenses were \$112.4 million and \$11.1 million for the year ended December 31, 2013 and the month ended December 31, 2012, respectively. Employees' compensation and benefits and occupancy and equipment accounted for the majority of the costs incurred.

Table of Contents

Corporate

Corporate includes certain activities not allocated to specific business segments. These activities include holding company financing and investing activities, and management and administrative services to support the overall operations of the Company including, but not limited to, certain executive management, corporate relations, legal, finance, and acquisition costs not allocated to business segments.

As a holding company, Hilltop's primary investment objectives are to preserve capital and have available cash resources to utilize in making acquisitions. Investment and interest income earned, primarily from available cash and available-for-sale securities, including our note receivable from SWS Group Inc. ("SWS"), were \$6.6 million, \$7.0 million and \$4.3 million during 2013, 2012 and 2011, respectively.

Interest expense of \$8.2 million, \$7.0 million and \$7.1 million during 2013, 2012 and 2011 was entirely due to interest costs associated with the Notes. During 2013, interest expense included the recognition of a non-recurring charge of \$2.1 million due to the write-off of remaining unamortized loan origination fees associated with the Notes being called for redemption during the fourth quarter of 2013.

Noninterest expenses of \$10.4 million, \$14.5 million and \$8.9 million during 2013, 2012 and 2011, respectively, primarily include compensation and benefits, professional fees and transaction costs associated with acquisition efforts. During 2013, noninterest expenses included the recognition of a non-recurring loss of \$3.7 million associated with the Notes held by our insurance segment being called for redemption during the fourth quarter of 2013. This loss was eliminated in consolidation. In addition, noninterest expenses included \$0.1 million, \$6.4 million and \$2.6 million of transaction costs associated with acquisition efforts during 2013, 2012 and 2011, respectively.

Financial Condition

The following discussion contains a more detailed analysis of our financial condition at December 31, 2013 as compared to 2012 and 2011.

Securities Portfolio

At December 31, 2013, investment securities consisted of securities of the U.S. Treasury, U.S. government and its agencies, obligations of municipalities and other political subdivisions, primarily in the State of Texas, mortgage-backed, corporate debt, and equity securities, a note receivable and a warrant. We have the ability to categorize investments as trading, available for sale, and held to maturity.

Our securities portfolio consists of two major components: trading securities and securities available for sale. Trading securities are bought and held principally for the purpose of selling them in the near term and are carried at fair value, marked to market through operations and held at the Bank and First Southwest. Securities that may be sold in response to changes in market interest rates, changes in securities' prepayment risk, increases in loan demand, general liquidity needs and other similar factors are classified as available for sale and are carried at estimated fair

value, with unrealized gains and losses recorded in accumulated other comprehensive income (loss).

Table of Contents

The table below summarizes our securities portfolio (in thousands).

	2013	December 31, 2012	2011
Trading securities, at fair value	\$ 58,846	\$ 90,113	\$
Securities available for sale, at fair value			
U.S. Treasury securities	43,528	7,185	
U.S. government agencies:			
Bonds	662,732	526,237	29,165
Residential mortgage-backed securities	60,087	18,893	12,652
Collateralized mortgage obligations	120,461	97,924	
Corporate debt securities	76,608	87,177	100,681
States and political subdivisions	156,835	175,759	
Commercial mortgage-backed securities	760	1,073	2,303
Equity securities	22,079	20,428	19,022
Note receivable	47,909	44,160	38,588
Warrant	12,144	12,117	21,789
Total securities portfolio	\$ 1,261,989	\$ 1,081,066	\$ 224,200

We had a net unrealized loss of \$53.7 million and net unrealized gains of \$12.5 million and \$21.5 million related to the available for sale investment portfolio at December 31, 2013, 2012 and 2011, respectively. The significant increase in the net unrealized loss position of our available for sale investment portfolio during 2013 was due to effects of an increase in market interest rates since May 2013 that resulted in a decrease in the fair value of our debt securities.

Banking Segment

The banking segment's securities portfolio plays a role in the management of our interest rate sensitivity and generates additional interest income. In addition, the securities portfolio is used to meet collateral requirements for public and trust deposits, securities sold under agreements to repurchase and other purposes. The available for sale securities portfolio serves as a source of liquidity. Historically, the Bank's policy has been to invest primarily in securities of the U.S. government and its agencies, obligations of municipalities in the State of Texas and other high grade fixed income securities to minimize credit risk. At December 31, 2013, the banking segment's securities portfolio of \$1.0 billion was comprised of trading securities of \$21.0 million and available for sale securities of \$1.0 billion. The banking segment's portfolio at December 31, 2013 included available for sale securities acquired in connection with the FNB Transaction with a book value of \$60.4 million, down from a book value of \$286.3 million at the Bank Closing Date. Subsequent to the Bank Closing Date, securities acquired in the FNB Transaction with a book value of \$223.5 million were either sold, matured or called. These additions to the Bank's balance sheet represent additional support for its liquidity needs.

Insurance Segment

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

Our insurance segment's primary investment objective is to preserve capital and manage for a total rate of return. NLC's strategy is to purchase securities in sectors that represent the most attractive relative value. Our insurance segment invests the premiums it receives from policyholders until they are needed to pay policyholder claims or other expenses. At December 31, 2013, the insurance segment's securities portfolio was comprised of \$131.6 million in available for sale securities and \$5.3 million of other investments included in other assets within the consolidated balance sheet.

Financial Advisory Segment

Our financial advisory segment holds securities to support sales, underwriting and other customer activities. Because FSC is a broker-dealer, it is required to carry its securities at fair value and record changes in the fair value of the portfolio in operations. Accordingly, FSC classifies its securities portfolio of \$37.9 million at December 31, 2013 as trading.

Corporate

Available for sale securities of Hilltop at December 31, 2013 include the note receivable from, and warrant to purchase shares of SWS of \$60.1 million, and equity securities of \$9.0 million representing those shares of SWS common stock held by Hilltop.

Table of Contents

The following table sets forth the estimated maturities of securities, excluding trading and available for sale equity securities. Contractual maturities may be different (dollars in thousands, yields are tax-equivalent).

	December 31, 2013					
	One Year Or Less	One Year to Five Years	Five Years to Ten Years	Greater Than Ten Years		Total

Table of Contents**Non-Covered Loan Portfolio**

Consolidated non-covered loans held for investment are detailed in the table below, classified by portfolio segment and segregated between those considered to be purchased credit impaired (PCI) loans and all other originated or acquired loans at December 31, 2013 (in thousands). PCI loans showed evidence of credit deterioration that makes it probable that all contractually required principal and interest payments will not be collected.

December 31, 2013	Loans, excluding PCI Loans	PCI Loans	Total Loans
Commercial and industrial	\$ 1,600,450	\$ 36,816	\$ 1,637,266
Real estate	1,418,003	39,250	1,457,253
Construction and land development	344,734	19,817	364,551
Consumer	51,067	4,509	55,576
Non-covered loans, gross	3,414,254	100,392	3,514,646
Allowance for loan losses	(30,104)	(3,137)	(33,241)
Non-covered loans, net of allowance	\$ 3,384,150	\$ 97,255	\$ 3,481,405

December 31, 2012	Loans, excluding PCI Loans	PCI Loans	Total Loans
Commercial and industrial	\$ 1,588,907	\$ 71,386	\$ 1,660,293
Real estate	1,122,667	62,247	1,184,914
Construction and land development	247,413	33,070	280,483
Consumer	26,629	77	26,706
Non-covered loans, gross	2,985,616	166,780	3,152,396
Allowance for loan losses	(3,409)		(3,409)
Non-covered loans, net of allowance	\$ 2,982,207	\$ 166,780	\$ 3,148,987

Banking Segment

The loan portfolio constitutes the major earning asset of the banking segment and typically offers the best alternative for obtaining the maximum interest spread above the banking segment's cost of funds. The overall economic strength of the banking segment generally parallels the quality and yield of its loan portfolio. The banking segment's loan portfolio is presented below in two sections, Non-Covered Loan Portfolio and Covered Loan Portfolio. The Covered Loan Portfolio consists of loans acquired in the FNB Transaction that are subject to loss-share agreements with the FDIC and is discussed below. The Non-Covered Loan Portfolio includes all other loans held by the Bank, which we refer to as non-covered loans, and is discussed herein.

The banking segment's total non-covered loans, net of the allowance for non-covered loan losses, were \$4.3 billion and \$4.1 billion at December 31, 2013 and 2012, respectively. The banking segment's non-covered loan portfolio includes a \$1.3 billion warehouse line of credit extended to PrimeLending, of which \$1.0 billion was drawn at December 31, 2013, as well as term loans to First Southwest that had an outstanding balance of \$23.0 million at December 31, 2013. Amounts advanced against the warehouse line of credit and the First Southwest term loans are eliminated from net loans on our consolidated balance sheets. Prior to September 2013, the warehouse line of credit extended to PrimeLending had \$1.6 billion of availability, of which \$1.3 billion was drawn at December 31, 2012, while the outstanding balance on a term loan to First Southwest was \$4.0 million at December 31, 2012.

The banking segment does not generally participate in syndicated loan transactions and has no foreign loans in its portfolio. At December 31, 2013, the banking segment's only non-covered loan concentration (loans to borrowers engaged in similar activities) that exceeded 10% of its total non-covered loans was non-construction residential real estate loans within our non-covered real estate portfolio. At December 31, 2013, non-construction residential real estate loans were 41.27% of the banking segment's total non-covered loans. The banking segment's non-covered loan concentrations were within regulatory requirements at December 31, 2013.

Table of Contents*Mortgage Origination Segment*

The loan portfolio of the mortgage origination segment consists of loans held for sale, primarily single-family residential mortgages funded through PrimeLending, and pipeline loans, which are loans in various stages of the application process, but not yet closed and funded. Pipeline loans may not close if potential borrowers elect in their sole discretion not to proceed with the loan application. Total loans held for sale were \$1.1 billion and \$1.4 billion at December 31, 2013 and 2012, respectively.

The components of the mortgage origination segment's loans held for sale and pipeline loans are as follows (in thousands).

	December 31,	
	2013	2012
Loans held for sale:		
Unpaid principal balance	\$ 1,066,850	\$ 1,359,829
Fair value adjustment	21,555	40,908
	\$ 1,088,405	\$ 1,400,737
Pipeline loans:		
Unpaid principal balance	\$ 602,467	\$ 968,083
Fair value adjustment	12,151	15,150
	\$ 614,618	\$ 983,233

Financial Advisory Segment

The loan portfolio of the financial advisory segment consists primarily of margin loans to customers and correspondents. These loans are collateralized by the securities purchased or by other securities owned by the clients and, because of collateral coverage ratios, are believed to present minimal collectability exposure. Additionally, these loans are subject to a number of regulatory requirements as well as FSC's internal policies. The financial advisory segment's total non-covered loans, net of the allowance for non-covered loan losses, were \$281.6 million and \$277.0 million at December 31, 2013 and 2012, respectively. This increase was primarily attributable to increased borrowings in margin accounts held by FSC customers and correspondents.

Covered Loan Portfolio*Banking Segment*

Loans acquired in the FNB Transaction that are subject to loss-share agreements with the FDIC are referred to as covered loans and reported separately in our consolidated balance sheets. Under the terms of the loss-share agreements, the FDIC has agreed to reimburse the Bank for: (i) 80% of losses on the first \$240.4 million of losses incurred; (ii) 0% of losses in excess of \$240.4 million up to and including \$365.7 million of losses incurred; and (iii) 80% of losses in excess of \$365.7 million of losses incurred. The loss-share agreements for commercial and single

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

family residential loans are in effect for 5 years and 10 years, respectively, and the loss recovery provisions to the FDIC are in effect for 8 years and 10 years, respectively, from the Bank Closing Date. In accordance with the loss-share agreements, the Bank may be required to make a true-up payment to the FDIC approximately ten years following the Bank Closing Date if the FDIC's initial estimate of losses on covered assets is greater than the actual realized losses. The true-up payment is calculated using a defined formula set forth in the P&A Agreement.

In connection with the FNB Transaction, the Bank acquired loans both with and without evidence of credit quality deterioration since origination. Based on purchase date valuations, the banking segment's portfolio of acquired covered loans had a fair value of \$1.1 billion as of the Bank Closing Date, with no carryover of any allowance for loan losses.

Table of Contents

Covered loans held for investment at December 31, 2013 are detailed in the table below and classified by portfolio segment (in thousands).

	Loans, excluding PCI Loans	PCI Loans	Total Loans
Commercial and industrial	\$ 28,533	\$ 38,410	\$ 66,943
Real estate	223,304	564,678	787,982
Construction and land development	25,376	126,068	151,444
Consumer			
Covered loans, gross	277,213	729,156	1,006,369
Allowance for loan losses	(179)	(882)	(1,061)
Covered loans, net of allowance	\$ 277,034	\$ 728,274	\$ 1,005,308

At December 31, 2013, the banking segment had covered loan concentrations (loans to borrowers engaged in similar activities) that exceeded 10% of total covered loans in its real estate portfolio. The areas of concentration within our covered real estate portfolio were construction and land development loans, non-construction residential real estate loans, and non-construction commercial real estate loans. At December 31, 2013, construction and land development loans, non-construction residential real estate loans, and non-construction commercial real estate loans were 21.98%, 28.63% and 36.67%, respectively, of the banking segment's total covered loans. The banking segment's covered loan concentrations were within regulatory requirements at December 31, 2013.

Loan Portfolio Maturities

Banking Segment

The following table provides information regarding the maturities of the banking segment's non-covered and covered commercial and real estate loans held for investment, net of unearned income (in thousands).

	December 31, 2013			Total
	Due Within One Year	Due From One To Five Years	Due After Five Years	
Commercial and industrial	\$ 1,928,236	\$ 413,160	\$ 98,996	\$ 2,440,392
Real estate (including construction and land development)	437,650	903,358	1,421,425	2,762,433
Total	\$ 2,365,886	\$ 1,316,518	\$ 1,520,421	\$ 5,202,825
Fixed rate loans	\$ 2,169,850	\$ 1,243,462	\$ 1,332,608	\$ 4,745,920
Floating rate loans	196,036	73,056	187,813	456,905
Total	\$ 2,365,886	\$ 1,316,518	\$ 1,520,421	\$ 5,202,825

In the table above, floating rate loans that have reached their applicable rate floor or ceiling are classified as fixed rate loans rather than floating rate loans. The majority of floating rate loans carry an interest rate tied to The Wall Street Journal Prime Rate, as published in The Wall Street Journal.

Allowance for Loan Losses

The allowance for loan losses is a reserve established through a provision for loan losses charged to expense, which represents management's best estimate of probable losses inherent in our existing non-covered and covered loan portfolios. Our management has responsibility for determining the level of the allowance for loan losses, subject to review by the Audit Committee of our board of directors and the Loan Review Committee of the Bank's board of directors.

It is our management's responsibility at the end of each quarter, or more frequently as deemed necessary, to analyze the level of the allowance for loan losses to ensure that it is appropriate for the estimated credit losses in the portfolio consistent with the Interagency Policy Statement on the Allowance for Loan and Lease Losses and the Receivables and Contingencies Topics of the Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC). Estimated

Table of Contents

credit losses are the probable current amount of loans that we will be unable to collect given facts and circumstances as of the evaluation date. When management determines that a loan, or portion thereof, is uncollectible, the loan, or portion thereof, is charged-off against the allowance for loan losses, or for acquired loans accounted for in pools, charged against the pool discount. Recoveries on charge-offs that occurred prior to the PlainsCapital Merger represent contractual cash flows not expected to be collected and are recorded as accretion income. Recoveries on loans charged-off subsequent to the PlainsCapital Merger are credited to the allowance for loan loss, except for recoveries on loans accounted for in pools, which are credited to the pool discount.

We have developed a methodology that seeks to determine an allowance within the scope of the Receivables and Contingencies Topics of the ASC. Each of the loans that has been determined to be impaired is within the scope of the Receivables Topic. Impaired loans that are equal to or greater than \$0.5 million are individually evaluated for impairment using one of three impairment measurement methods as of the evaluation date: (1) the present value of expected future discounted cash flows on the loan, (2) the loan's observable market price, or (3) the fair value of the collateral if the loan is collateral dependent. Specific reserves are provided in our estimate of the allowance based on the measurement of impairment under these three methods, except for collateral dependent loans, which require the fair value method. All non-impaired loans are within the scope of the Contingencies Topic. Estimates of loss for the Contingencies Topic are calculated based on historical loss experience by collateral type adjusted for changes in trends, conditions, and other relevant factors that affect repayment of loans as of the evaluation date. While historical loss experience provides a reasonable starting point for the analysis, historical losses, or recent trends in losses, are not the sole basis upon which to determine the appropriate level for the allowance for loan losses. Management considers recent qualitative or environmental factors that are likely to cause estimated credit losses associated with the existing portfolio to differ from historical loss experience, including but not limited to: changes in lending policies and procedures; changes in underwriting standards; changes in economic and business conditions and developments that affect the collectability of the portfolio; the condition of various market segments; changes in the nature and volume of the portfolio and in the terms of loans; changes in lending management and staff; changes in the volume and severity of past due loans, the volume of non-accrual loans, and the volume and severity of adversely classified or graded loans; changes in the loan review system; changes in the value of underlying collateral for collateral-dependent loans; and any concentrations of credit and changes in the level of such concentrations.

We design our loan review program to identify and monitor problem loans by maintaining a credit grading process, requiring that timely and appropriate changes are made to reviewed loans and coordinating the delivery of the information necessary to assess the appropriateness of the allowance for loan losses. Loans are evaluated for impaired status when: (i) payments on the loan are delayed, typically by 90 days or more (unless the loan is both well secured and in the process of collection), (ii) the loan becomes classified, (iii) the loan is being reviewed in the normal course of the loan review scope, or (iv) the loan is identified by the servicing officer as a problem. We review on an individual basis all loan relationships over \$0.5 million that exhibit probable or observed credit weaknesses, the top 25 loan relationships by dollar amount in each market we serve, and additional relationships necessary to achieve adequate coverage of our various lending markets.

Homogeneous loans, such as consumer installment loans, residential mortgage loans and home equity loans, are not individually reviewed and are generally risk graded at the same levels. The risk grade and reserves are established for each homogeneous pool of loans based on the expected net charge-offs from current trends in delinquencies, losses or historical experience and general economic conditions. At December 31, 2013, we had no material delinquencies in these types of loans.

The allowance is subject to regulatory examination and determination as to adequacy, which may take into account such factors as the methodology used to calculate the allowance and the size of the allowance. While we believe we have an appropriate allowance for our existing non-covered and covered portfolios at December 31, 2013, additional provisions for losses on existing loans may be necessary in the future. Within our non-covered portfolio, we recorded net charge-offs in the amount of \$6.3 million and \$0.4 million for the year ended December 31, 2013 and the month ended December 31, 2012, respectively. Our allowance for non-covered loan losses totaled \$33.2 million and \$3.4 million at December 31, 2013 and 2012, respectively. The ratio of the allowance for non-covered loan losses to total non-covered loans held for investment at December 31, 2013 and 2012 was 0.95% and 0.11%, respectively.

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

In connection with the PlainsCapital Merger and the FNB Transaction, we acquired loans both with and without evidence of credit quality deterioration since origination. PCI loans acquired in the PlainsCapital Merger are accounted for on an individual loan basis, while PCI loans acquired in the FNB Transaction are accounted for in pools as well as on an individual loan basis. We have established under our PCI accounting policy a framework to aggregate certain acquired loans into various loan pools based on a minimum of two layers of common risk characteristics for the purpose of determining their respective fair values as of their acquisition dates, and for applying the subsequent recognition and measurement provisions for income accretion and impairment testing. The common risk characteristics used for the pooling of the FNB

Table of Contents

PCI loans are risk grade and loan collateral type. The acquired loans were initially recorded at fair value with no carryover of any allowance for loan losses. Our allowance for covered loan losses totaled \$1.1 million at December 31, 2013.

Provisions for loan losses are charged to operations to record the total allowance for loan losses at a level deemed appropriate by the banking segment's management based on such factors as the volume and type of lending it conducted, the amount of non-performing loans and related collateral security, the present level of the allowance for loan losses, the results of recent regulatory examinations, generally accepted accounting principles, general economic conditions and other factors related to the ability to collect loans in its portfolio. The provision for loan losses, primarily in the banking segment, was \$37.2 million and \$3.8 million for the year ended December 31, 2013 and the month ended December 31, 2012, respectively.

The following tables present the activity in our allowance for loan losses within our non-covered and covered loan portfolios for the periods presented (in thousands). Substantially all of the activity shown below occurred within the banking segment, which was acquired as a part of the PlainsCapital Merger.

Potential Problem Loans

Potential problem loans consist of loans that are performing in accordance with contractual terms but for which management has concerns about the ability of an obligor to continue to comply with repayment terms because of the obligor's potential operating or financial difficulties. Management monitors these loans and reviews their performance on a regular basis. Potential problem loans contain potential weaknesses that could improve, persist or further deteriorate. If such potential weaknesses persist without improving, the loan is subject to downgrade, typically to substandard, in three to six months. Within our non-covered loan portfolio at December 31, 2013, we had ten credit relationships totaling \$24.7 million of potential problem loans, which are assigned a grade of special mention within our risk grading matrix. At December 31, 2012, we had four credit relationships totaling \$2.7 million of non-covered potential problem loans.

Non-Performing Assets

The following table presents components of our non-covered non-performing assets (dollars in thousands).

2013	December 31,		2012

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

Non-covered loans accounted for on a non-accrual basis:			
Commercial and industrial	\$	16,730	\$
Real estate		6,511	1,756
Construction and land development		112	
Consumer			
	\$	23,353	\$ 1,756
Non-covered non-performing loans as a percentage of total non-covered loans			
		0.51%	0.04%
Non-covered other real estate owned	\$	4,805	\$ 11,098
Other repossessed assets	\$	13	\$ 557
Non-covered non-performing assets	\$	28,171	\$ 13,411
Non-covered non-performing assets as a percentage of total assets			
		0.32%	0.18%
Non-covered loans past due 90 days or more and still accruing	\$	534	\$ 2,000
Troubled debt restructurings included in accruing non-covered loans	\$	1,055	\$

Table of Contents

At December 31, 2013, total non-covered non-performing assets increased \$14.8 million to \$28.2 million, compared with \$13.4 million at December 31, 2012, primarily due to an increase in non-covered non-accrual PCI loans of \$15.8 million. Non-covered non-performing loans totaled \$23.4 million at December 31, 2013 and \$1.8 million at December 31, 2012. At December 31, 2013, non-covered non-accrual loans included five commercial and industrial relationships with loans totaling \$14.0 million secured by accounts receivable, inventory, aircraft and life insurance, and a total of \$1.0 million in lease financing receivables. Non-covered non-accrual loans at December 31, 2013 also included \$6.5 million characterized as real estate loans, including three commercial real estate loan relationships totaling \$2.5 million and loans secured by residential real estate totaling \$3.5 million, substantially all of which were classified as loans held for sale, as well as construction and land development loans of \$0.1 million. At December 31, 2012, non-covered non-accrual loans of \$1.8 million included real estate loans secured by residential real estate and classified as loans held for sale.

Non-covered OREO decreased \$6.3 million to \$4.8 million at December 31, 2013, compared with \$11.1 million at December 31, 2012. The decrease was primarily due to the disposal of two properties totaling \$5.7 million. At December 31, 2013, non-covered OREO included commercial properties of \$4.2 million, commercial real estate property consisting of parcels of unimproved land of \$0.5 million and residential lots under development of \$0.1 million. At December 31, 2012, non-covered OREO included commercial properties of \$6.8 million, commercial real estate property consisting of parcels of unimproved land of \$3.1 million and residential lots under development of \$1.2 million.

At December 31, 2013, troubled debt restructurings (TDRs) granted on non-covered loans totaled \$11.4 million, all of which relate to modifications of non-covered PCI loans. These TDRs were comprised of \$1.1 million of non-covered PCI loans that are considered to be performing due to the application of the accretion method and non-covered non-performing PCI loans of \$10.3 million for which discount accretion has been suspended because the extent and timing of cash flows from these non-covered PCI loans can no longer be reasonably estimated. There were no troubled debt restructurings granted on non-covered loans at December 31, 2012.

Non-covered loans past due 90 days or more and still accruing totaled \$0.5 million and \$2.0 million at December 31, 2013 and 2012, respectively, and included secured commercial and industrial loans, and a real estate loan.

The following table presents components of our covered non-performing assets (dollars in thousands).

Covered Portfolio

Covered loans accounted for on a non-accrual basis:	
Commercial and industrial	\$ 973
Real estate	249
Construction and land development	575
Consumer	
	\$ 1,797
Covered non-performing loans as a percentage of total covered loans	0.18%
Covered other real estate owned	\$ 142,833
Other repossessed assets	\$
Covered non-performing assets	\$ 144,630
Covered non-performing assets as a percentage of total assets	1.62%
Covered loans past due 90 days or more and still accruing	\$
Troubled debt restructurings included in accruing covered loans	\$

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

At December 31, 2013, covered non-performing assets totaled \$144.6 million. Covered non-performing loans of \$1.8 million at December 31, 2013 included one commercial and industrial relationship with loans totaling \$1.0 million secured by accounts receivable, inventory and equipment. Covered non-accrual loans at December 31, 2013 also included one commercial real estate loan relationship totaling \$0.2 million, as well as construction and land development loans of \$0.6 million.

OREO acquired in the FNB Transaction that is subject to the FDIC loss-share agreements is referred to as covered OREO and reported separately in our consolidated balance sheets. At December 31, 2013, covered OREO was \$142.8 million and included commercial properties of \$90.5 million, commercial real estate property consisting of parcels of unimproved land of \$21.4 million and residential lots under development of \$30.9 million.

Table of Contents**Insurance Losses and Loss Adjustment Expenses**

At December 31, 2013 and 2012, our reserves for unpaid losses and LAE were \$27.5 million and \$34.0 million, respectively. The liability for insurance losses and LAE represents estimates of the ultimate unpaid cost of all losses incurred, including losses for claims that have not yet been reported. Separately for each of NLIC and ASIC and each line of business, our actuaries estimate the liability for unpaid losses and LAE by first estimating ultimate losses and LAE amounts for each year, prior to recognizing the impact of reinsurance.

Insured losses for a given accident year change in value over time as additional information on claims is received, as claim conditions change and as new claims are reported. This process is commonly referred to as loss development. To project ultimate losses and LAE, our actuaries examine the paid and reported losses and LAE for each accident year and multiply these values by a loss development factor. The selected loss development factors are based upon a review of the loss development patterns indicated in the companies' historical loss triangles and applicable insurance industry loss development factors.

The reserve analysis performed by our actuaries provides preliminary central estimates of the unpaid losses and LAE. At each quarter-end, the results of the reserve analysis are summarized and discussed with our senior management. The senior management group considers many factors in determining the amount of reserves to record for financial statement purposes. These factors include the extent and timing of any recent catastrophic events, historical pattern and volatility of the actuarial indications, the sensitivity of the actuarial indications to changes in paid and reported loss patterns, the consistency of claims handling processes, the consistency of case reserving practices, changes in our pricing and underwriting, and overall pricing and underwriting trends in the insurance market.

Deposits

The banking segment's major source of funds and liquidity is its deposit base. Deposits provide funding for its investment in loans and securities. Interest paid for deposits must be managed carefully to control the level of interest expense and overall net interest margin. The composition of the deposit base (time deposits versus interest-bearing demand deposits and savings) is constantly changing due to the banking segment's needs and market conditions. Overall, average deposits totaled \$5.3 billion for the year ended December 31, 2013, an increase from average deposits of \$4.6 billion for the month ended December 31, 2012. The table below presents the average balance of deposits and the average rate paid on those deposits (dollars in thousands).

	Year Ended December 31, 2013		Month Ended December 31, 2012	
	Average Balance	Average Rate Paid	Average Balance	Average Rate Paid
Noninterest-bearing demand deposits	\$ 203,996	0.00%	\$ 214,586	0.00%
Interest-bearing demand deposits	3,095,691	0.15%	2,806,690	0.15%
Savings deposits	247,789	0.32%	177,803	0.32%
Certificates of deposit	1,745,483	0.54%	1,355,435	0.53%
	\$ 5,292,959	0.28%	\$ 4,554,514	0.26%

The maturity of interest-bearing time deposits of \$100,000 or more at December 31, 2013 is set forth in the table below (in thousands).

Months to maturity:		
3 months or less	\$	453,642
3 months to 6 months		272,461
6 months to 12 months		492,140
Over 12 months		456,146
	\$	1,674,389

The banking segment experienced growth of \$693.1 million in interest-bearing time deposits of \$100,000 or more at December 31, 2013 compared with December 31, 2012, primarily due to those deposits assumed as a part of the FNB Transaction. At December 31, 2013, there were \$1.7 billion in interest-bearing time deposits scheduled to mature within one year.

Table of Contents**Borrowings**

Our borrowings are shown in the table below (dollars in thousands).

	December 31,			
	2013		2012	
	Balance	Average Rate Paid	Balance	Average Rate Paid
Short-term borrowings	\$ 342,087	0.36%	\$ 728,250	0.33%
Notes payable	56,327	6.33%	141,539	5.89%
Junior subordinated debentures	67,012	3.59%	67,012	3.53%
	\$ 465,426	2.10%	\$ 936,801	1.40%

Short-term borrowings consist of federal funds purchased, securities sold under agreements to repurchase, borrowings at the Federal Home Loan Bank (FHLB) and short-term bank loans. The \$386.2 million decrease in short-term borrowings at December 31, 2013 compared with December 31, 2012 included decreases of \$250.0 million in borrowings at the FHLB and \$132.4 million in federal funds purchased. These decreases were primarily the result of lower funding requirements due to a reduction in our mortgage origination segment's balance on its warehouse line of credit with the Bank. Notes payable at December 31, 2013 of \$56.3 million is comprised of insurance segment term notes and nonrecourse notes owed by First Southwest. The \$85.2 million decrease in notes payable at December 31, 2013 compared to December 31, 2012 was primarily due to the Notes at OP, a wholly owned subsidiary of Hilltop, being called for redemption on October 15, 2013.

Liquidity and Capital Resources

Hilltop is a financial holding company whose assets primarily consist of the stock of its subsidiaries and invested assets. Hilltop's primary investment objectives, as a holding company, are to preserve capital and have available cash resources to utilize in making acquisitions. At December 31, 2013, Hilltop had approximately \$164 million in freely available cash and cash equivalents. This decrease from the \$205 million balance at December 31, 2012 primarily resulted from Hilltop's \$35.0 million capital investment to provide additional capital in connection with the FNB Transaction on September 13, 2013 and Hilltop's \$11.1 million cash payment to our insurance company subsidiaries in connection with our redemption of Notes that they held. If necessary or appropriate, we may also finance acquisitions with the proceeds from equity or debt issuances. The current short-term liquidity needs of Hilltop include operating expenses and dividends on preferred stock.

Recent Events

On January 9, 2014, we delivered to the President and Chief Executive Officer of SWS a letter in which we proposed to acquire all of the outstanding shares of SWS common stock that we do not already own for \$7.00 per share in 50% cash and 50% Company common stock. We intend to finance the cash portion of our offer through available cash.

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

On October 15, 2013, OP called for redemption all of its outstanding Notes on November 14, 2013 (the "Redemption Date"). At October 15, 2013, OP had \$90.9 million in aggregate principal amount of Notes outstanding, including \$6.9 million aggregate principal amount held by our insurance company subsidiaries. The Notes were redeemed at a redemption price equal to the principal amount of the Notes, plus accrued and unpaid interest up to, but excluding, the Redemption Date. At any time prior to the Redemption Date, holders of the Notes could exchange the Notes for shares of Hilltop common stock at the rate of 73.94998 shares per \$1,000 principal amount of the Notes (or approximately \$13.52 per share). In lieu of delivery of Hilltop common stock upon the exercise of a holder of its exchange right, OP could elect to pay such holder of the Notes an amount in cash (or a combination of Hilltop common stock and cash) in respect of all or a portion of such holder's Notes equal to the closing price of Hilltop's common stock for the five consecutive trading days commencing on and including the third business day following the exercise of such exchange right. As of the closing of the redemption, the Notes held by third party investors were exchanged for 6,208,005 shares of Hilltop common stock and an aggregate cash payment of \$11.1 million was made in exchange for the Notes held by our insurance company subsidiaries.

During September 2013, Hilltop and PlainsCapital contributed capital of \$35.0 million and \$25.0 million, respectively, to the Bank to provide additional capital in connection with the FNB Transaction.

Table of Contents

Series B Preferred Stock

As a result of the PlainsCapital Merger, the outstanding shares of PlainsCapital Corporation's Non-Cumulative Perpetual Preferred Stock, Series C, all of which were held by the U.S. Treasury, were converted on a one-for-one basis into shares of Hilltop Series B Preferred Stock. The terms of our Series B Preferred Stock provide for the payment of non-cumulative dividends on a quarterly basis. The dividend rate, as a percentage of the liquidation amount, fluctuated until December 31, 2013 based upon changes in the level of qualified small business lending (QSBL) by the Bank. The shares of Hilltop Series B Preferred Stock are senior to shares of our common stock with respect to dividends and liquidation preference, and qualify as Tier 1 Capital for regulatory purposes. At both December 31, 2013 and 2012, \$114.1 million of our Series B Preferred Stock was outstanding. During the three months ended December 31, 2013, we accrued dividends of \$1.3 million on the Hilltop Series B Preferred Stock.

The dividend rate on the Hilltop Series B Preferred Stock was 4.706% for the three months ended December 31, 2013. From January 1, 2014 until March 26, 2016, the dividend rate is fixed at 5.0% based upon our level of QSBL at September 30, 2013. Beginning March 27, 2016, the dividend rate on any outstanding shares of Hilltop Series B Preferred Stock will be fixed at nine percent (9%) per annum.

Loss-Share Agreements

In connection with the FNB Transaction, the Bank entered into two loss-share agreements with the FDIC that collectively cover \$1.2 billion of loans and OREO acquired in the FNB Transaction. Pursuant to the loss-share agreements, the FDIC has agreed to reimburse the Bank the following amounts with respect to the covered assets: (i) 80% of losses on the first \$240.4 million of losses incurred; (ii) 0% of losses in excess of \$240.4 million up to and including \$365.7 million of losses incurred; and (iii) 80% of losses in excess of \$365.7 million of losses incurred. The Bank has also agreed to reimburse the FDIC for any subsequent recoveries. The loss-share agreements for commercial and single family residential loans are in effect for 5 years and 10 years, respectively, from the Bank Closing Date and the loss recovery provisions to the FDIC are in effect for 8 years and 10 years, respectively, from the Bank Closing Date. In accordance with the loss-share agreements, the Bank may be required to make a true-up payment to the FDIC, approximately ten years following the Bank Closing Date, if the FDIC's initial estimate of losses on covered assets is greater than the actual realized losses. The true-up payment is calculated using a defined formula set forth in the P&A Agreement.

Regulatory Capital

We are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements may prompt certain actions by regulators that, if undertaken, could have a direct material adverse effect on our financial condition and results of operations. Under capital adequacy and regulatory requirements, we must meet specific capital guidelines that involve quantitative measures of our assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. Our capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

At December 31, 2013, Hilltop exceeded all regulatory capital requirements with a total capital to risk weighted assets ratio of 19.13%, Tier 1 capital to risk weighted assets ratio of 18.53% and a Tier 1 capital to average assets, or leverage, ratio of 12.81%. At December 31, 2013, the Bank was also considered to be well-capitalized under regulatory requirements. We discuss regulatory capital requirements in more detail in

Note 21 to our consolidated financial statements.

Cash Flow Activities

Cash and cash equivalents (consisting of cash and due from banks and federal funds sold), totaled \$746.0 million at December 31, 2013, an increase of \$19.6 million from \$726.5 million at December 31, 2012. Deposit flows, calls of investment securities and borrowed funds, and prepayments of loans and mortgage-backed securities are strongly influenced by interest rates, general and local economic conditions and competition in the marketplace. These factors reduce the predictability of the timing of these sources of funds.

Cash provided by operations during 2013 was \$396.7 million, an increase in cash flow of \$281.5 million compared with 2012. Cash provided by operations increased primarily due to the PlainsCapital Merger on November 30, 2012 and inclusion of operating activities of the banking, mortgage origination and financial advisory segments for the year ended December 31, 2013 compared with the month ended December 31, 2012.

Table of Contents

Cash provided by our investment activities during 2013 was \$223.9 million, including \$362.7 million in net cash from the FNB Transaction and net proceeds from securities in our investment portfolio of \$8.9 million, partially offset by \$140.4 million for the origination of loans held for investment and net purchases of premises and equipment and other assets of \$11.9 million. During 2012, cash provided by our investment activities was \$12.9 million and primarily included \$165.7 million in net cash from the PlainsCapital Merger, offset by \$147.4 million in net purchases of securities for investment.

Cash used in financing activities during 2013 was \$601.1 million, an increase in cash used of \$620.9 million compared with 2012. The increase in cash used was due primarily to the PlainsCapital Merger on November 30, 2012 and the inclusion of financing activities of the banking segment for the year ended December 31, 2013 compared with the month ended December 31, 2012.

Banking Segment

Within our banking segment, liquidity refers to the measure of our ability to meet our customers' short-term and long-term deposit withdrawals and anticipated and unanticipated increases in loan demand without penalizing earnings. Interest rate sensitivity involves the relationships between rate-sensitive assets and liabilities and is an indication of the probable effects of interest rate fluctuations on our net interest income.

Our asset and liability group is responsible for continuously monitoring our liquidity position to ensure that assets and liabilities are managed in a manner that will meet our short-term and long-term cash requirements. Funds invested in short-term marketable instruments, the continuous maturing of other interest-earning assets, cash flows from self-liquidating investments such as mortgage-backed securities and collateralized mortgage obligations, the possible sale of available for sale securities, and the ability to securitize certain types of loans provide sources of liquidity from an asset perspective. The liability base provides sources of liquidity through deposits and the maturity structure of short-term borrowed funds. For short-term liquidity needs, we utilize federal fund lines of credit with correspondent banks, securities sold under agreements to repurchase, borrowings from the Federal Reserve and borrowings under lines of credit with other financial institutions. For intermediate liquidity needs, we utilize advances from the FHLB. To supply liquidity over the longer term, we have access to brokered certificates of deposit, term loans at the FHLB and borrowings under lines of credit with other financial institutions.

We had deposits of \$6.7 billion at December 31, 2013, an increase of \$2.0 billion from \$4.7 billion at December 31, 2012, primarily due to the inclusion of \$2.2 billion of deposits assumed as a part of the FNB Transaction. Deposit flows are affected by the level of market interest rates, the interest rates and products offered by competitors, the volatility of equity markets and other factors. At December 31, 2013, money market deposits, including brokered deposits, were \$3.4 billion; time deposits, including brokered deposits, were \$2.3 billion, and noninterest bearing demand deposits were \$409.3 million. Money market deposits, including brokered deposits, increased by \$779.2 million from \$2.6 billion and time deposits, including brokered deposits, increased \$910.7 million from \$1.4 billion at December 31, 2012.

The Bank's 15 largest depositors, excluding Hilltop and First Southwest, accounted for 15.49% of the Bank's total deposits, and the Bank's five largest depositors, excluding First Southwest, accounted for 10.03% of the Bank's total deposits at December 31, 2013. The loss of one or more of our largest Bank customers, or a significant decline in our deposit balances due to ordinary course fluctuations related to these customers' businesses, could adversely affect our liquidity and might require us to raise deposit rates to attract new deposits, purchase federal funds or borrow funds on a short-term basis to replace such deposits. We have not experienced any liquidity issues to date with respect to brokered deposits or our other large balance deposits, and we believe alternative sources of funding are available to more than compensate for the loss of one or more of these customers.

Mortgage Origination Segment

PrimeLending funds the mortgage loans it originates through a warehouse line of credit of up to \$1.3 billion maintained with the Bank. At December 31, 2013, PrimeLending had outstanding borrowings of \$1.0 billion against the warehouse line of credit. PrimeLending sells substantially all mortgage loans it originates to various investors in the secondary market, the majority with servicing released. As these mortgage loans are sold in the secondary market, PrimeLending pays down its warehouse line of credit with the Bank. In addition, PrimeLending has an available line of credit with JPMorgan Chase Bank, NA (JPMorgan Chase) of up to \$1.0 million. At December 31, 2013, PrimeLending had no borrowings under the JPMorgan Chase line of credit.

Table of Contents*Insurance Segment*

Our insurance operating subsidiary's primary investment objectives is to preserve capital and manage for a total rate of return. NLC's strategy is to purchase securities in sectors that represent the most attractive relative value. Bonds, cash and short-term investments of \$196.6 million, or 91.5%, equity investments of \$13.1 million and other investments of \$5.3 million comprised NLC's \$215.0 million in total cash and investments at December 31, 2013. NLC does not currently have any significant concentration in both direct and indirect guarantor exposure or any investments in subprime mortgages. NLC has custodial agreements with Wells Fargo and an investment management agreement with DTF Holdings, LLC.

Financial Advisory Segment

FSC relies on its equity capital, short-term bank borrowings, interest-bearing and non-interest-bearing client credit balances, correspondent deposits, securities lending arrangements, repurchase agreement financings and other payables to finance its assets and operations. FSC has credit arrangements with three unaffiliated banks of up to \$255.0 million, which are used to finance securities owned, securities held for correspondent accounts, receivables in customer margin accounts and underwriting activities. These credit arrangements are provided on an as offered basis and are not committed lines of credit. At December 31, 2013, FSC had borrowed \$97.4 million under these credit arrangements.

Contractual Obligations

The following table presents information regarding our contractual obligations at December 31, 2013 (in thousands). Our reserve for losses and loss adjustment expenses does not have a contractual maturity date. However, based on historical payment patterns, the amounts presented are management's estimate of the expected timing of these payments. The timing of payments is subject to significant uncertainty. NLC maintains a portfolio of investments with varying maturities to provide adequate cash flows for such payments. Payments related to leases are based on actual payments specified in the underlying contracts. Payments related to short-term borrowings and long-term debt obligations include the estimated contractual interest payments under the respective agreements.

	Payments Due by Period					Total
	1 year or Less	More than 1 Year but Less than 3 Years	3 Years or More but Less than 5 Years	5 Years or More

Impact of Inflation and Changing Prices

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

Our consolidated financial statements included herein have been prepared in accordance with GAAP, which presently require us to measure financial position and operating results primarily in terms of historic dollars. Changes in the relative value of money due to inflation or recession are generally not considered. The primary effect of inflation on our operations is reflected in increased operating costs. In management's opinion, changes in interest rates affect the financial condition of a financial institution to a far greater degree than changes in the inflation rate. While interest rates are greatly influenced by changes in the inflation rate, they do not necessarily change at the same rate or in the same magnitude as the inflation rate. Interest rates are highly sensitive to many factors that are beyond our control, including changes in the expected rate of inflation, the influence of general and local economic conditions and the monetary and fiscal policies of the U.S. government, its agencies and various other governmental regulatory authorities.

Off-Balance Sheet Arrangements; Commitments; Guarantees

In the normal course of business, we enter into various transactions, which, in accordance with GAAP, are not included in our consolidated balance sheets. We enter into these transactions to meet the financing needs of our customers. These transactions include commitments to extend credit and standby letters of credit, which involve, to varying degrees, elements of credit risk and interest rate risk in excess of the amounts recognized in our consolidated balance sheets.

We enter into contractual loan commitments to extend credit, normally with fixed expiration dates or termination clauses, at specified rates and for specific purposes. Substantially all of our commitments to extend credit are contingent upon customers maintaining specific credit standards until the time of loan funding. We minimize our exposure to loss under these

Table of Contents

commitments by subjecting them to credit approval and monitoring procedures. We assess the credit risk associated with certain commitments to extend credit and have recorded a liability related to such credit risk in our consolidated financial statements.

Standby letters of credit are written conditional commitments issued by us to guarantee the performance of a customer to a third party. In the event the customer does not perform in accordance with the terms of the agreement with the third party, we would be required to fund the commitment. The maximum potential amount of future payments we could be required to make is represented by the contractual amount of the commitment. If the commitment is funded, we would be entitled to seek recovery from the customer. Our policies generally require that standby letter of credit arrangements contain security and debt covenants similar to those contained in loan agreements.

In the aggregate, the Bank had outstanding unused commitments to extend credit of \$1.1 billion at December 31, 2013 and outstanding standby letters of credit of \$42.2 million at December 31, 2013.

In the normal course of business, FSC executes, settles and finances various securities transactions that may expose FSC to off-balance sheet risk in the event that a customer or counterparty does not fulfill its contractual obligations. Examples of such transactions include the sale of securities not yet purchased by customers or for the account of FSC, clearing agreements between FSC and various clearinghouses and broker-dealers, secured financing arrangements that involve pledged securities, and when-issued underwriting and purchase commitments.

Critical Accounting Policies and Estimates

Our accounting policies are fundamental to understanding our management's discussion and analysis of our results of operations and financial condition. Our significant accounting policies are presented in Note 1 to our consolidated financial statements, which are included in this Annual Report. We have identified certain significant accounting policies which involve a higher degree of judgment and complexity in making certain estimates and assumptions that affect amounts reported in our consolidated financial statements. The significant accounting policies which we believe to be the most critical in preparing our consolidated financial statements relate to Allowance for Loan Losses, FDIC Indemnification Asset, Reserve for Losses and Loss Adjustment Expenses, Goodwill and Identifiable Intangible Assets, Loan Indemnification Liability, Mortgage Servicing Rights and Acquisition Accounting.

Allowance for Loan Losses

The allowance for loan losses is a valuation allowance for probable losses inherent in the loan portfolio. Loans are charged to the allowance when the loss is confirmed or when a determination is made that a probable loss has occurred on a specific loan. Recoveries are credited to the allowance at the time of recovery. Throughout the year, management estimates the probable level of losses to determine whether the allowance for credit losses is appropriate to absorb losses in the existing portfolio. Based on these estimates, an amount is charged to the provision for loan losses and credited to the allowance for loan losses in order to adjust the allowance to a level determined to be appropriate to absorb losses. Management's judgment regarding the appropriateness of the allowance for loan losses involves the consideration of current economic conditions and their estimated effects on specific borrowers; an evaluation of the existing relationships among loans, potential loan losses and the present level of the allowance; results of examinations of the loan portfolio by regulatory agencies; and management's internal review of the loan portfolio. In determining the ability to collect certain loans, management also considers the fair value of any underlying collateral. The amount ultimately realized may differ from the carrying value of these assets because of economic, operating or other conditions beyond our control. For

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

additional discussion of allowance for loan losses and provisions for loan losses, see the section entitled Allowance for Loan Losses earlier in this Item 7.

FDIC Indemnification Asset

We have elected to account for the FDIC Indemnification Asset in accordance with FASB ASC 805. The FDIC Indemnification Asset is initially recorded at fair value, based on the discounted value of expected future cash flows under the loss-share agreements. The difference between the present value and the undiscounted cash flows we expect to collect from the FDIC will be accreted into noninterest income within the consolidated statements of operations over the life of the FDIC Indemnification Asset. The FDIC Indemnification Asset is reviewed quarterly and adjusted for any changes in expected cash flows based on recent performance and expectations for future performance of the covered portfolio. These adjustments are measured on the same basis as the related covered loans and covered OREO. Any increases in cash flow of the covered assets over those expected will reduce the FDIC Indemnification Asset and any decreases in cash flow of the covered assets under those expected will increase the FDIC Indemnification Asset. Any amortization of changes in value is

Table of Contents

limited to the contractual terms of the loss-share agreements. Increases and decreases to the FDIC Indemnification Asset are recorded as adjustments to noninterest income within the consolidated statements of operations over the life of the loss-share agreements.

Reserve for Losses and Loss Adjustment Expenses

The reserve for losses and loss adjustment expenses represents our best estimate of our ultimate liability for losses and loss adjustment expenses relating to events that occurred prior to the end of any given accounting period but have not been paid. Months and potentially years may elapse between the occurrence of a loss covered by one of our insurance policies, the reporting of the loss and the payment of the claim. We record a liability for estimates of losses that will be paid for claims that have been reported, which is referred to as case reserves. As claims are not always reported when they occur, we estimate liabilities for claims that have occurred but have not been reported, or IBNR.

Each of our insurance company subsidiaries establishes a reserve for all of its unpaid losses, including case reserves and IBNR reserves, and estimates for the cost to settle the claims. We estimate our IBNR reserves by estimating our ultimate liability for loss and loss adjustment expense reserves first, and then reducing that amount by the amount of cumulative paid claims and by the amount of our case reserves. The reserve analysis performed by our actuaries provides preliminary central estimates of the unpaid losses and LAE. At each quarter-end, the results of the reserve analysis are summarized and discussed with our senior management. The senior management group considers many factors in determining the amount of reserves to record for financial statement purposes. These factors include the extent and timing of any recent catastrophic events, historical pattern and volatility of the actuarial indications, the sensitivity of the actuarial indications to changes in paid and reported loss patterns, the consistency of claims handling processes, the consistency of case reserving practices, changes in our pricing and underwriting, and overall pricing and underwriting trends in the insurance market. As experience develops or new information becomes known, we increase or decrease the level of our reserves in the period in which changes to the estimates are determined. Accordingly, the actual losses and loss adjustment expenses may differ materially from the estimates we have recorded. See Insurance Losses and Loss Adjustment Expenses earlier in this Item 7 for additional discussion.

Goodwill and Identifiable Intangible Assets

Goodwill and other identifiable intangible assets were initially recorded at their estimated fair values at the date of acquisition. Goodwill and other intangible assets having an indefinite useful life are not amortized for financial statement purposes. In the event that facts and circumstances indicate that the goodwill and other identifiable intangible assets may be impaired, an interim impairment test would be required. Intangible assets with finite lives have been fully amortized over their useful lives. We perform required annual impairment tests of our goodwill and other intangible assets as of October 1st for our reporting units.

The goodwill impairment test is a two-step process that requires us to make judgments in determining what assumptions to use in the calculation. The first step of the process consists of estimating the fair value of each reporting unit based on valuation techniques, including a discounted cash flow model using revenue and profit forecasts and recent industry transaction and trading multiples of our peers, and comparing those estimated fair values with the carrying values of the assets and liabilities of the reporting unit, which includes the allocated goodwill. If the estimated fair value is less than the carrying value, a second step is performed to compute the amount of the impairment, if any, by determining an implied fair value of goodwill. The determination of the implied fair value of goodwill of a reporting unit requires us to allocate the estimated fair value of the reporting unit to the assets and liabilities of the reporting unit. Any unallocated fair value represents the implied fair value of goodwill, which is compared to its corresponding carrying value.

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

Our evaluation includes multiple assumptions, including estimated discounted cash flows and other estimates that may change over time. If future discounted cash flows become less than those projected by us, future impairment charges may become necessary that could have a materially adverse impact on our results of operations and financial condition in the period in which the write-off occurs.

Table of Contents

Loan Indemnification Liability

The mortgage origination segment may be responsible for errors or omissions relating to its representations and warranties that the loans sold meet certain requirements, including representations as to underwriting standards and the validity of certain borrower representations in connection with the loan. If determined to be at fault, the mortgage origination segment either repurchases the loans from the investors or reimburses the investors' losses (a make-whole payment). The mortgage origination segment has established an indemnification liability for such probable losses based upon, among other things, the level of current unresolved repurchase requests, the volume of estimated probable future repurchase requests, our ability to cure the defects identified in the repurchase requests, and the severity of the estimated loss upon repurchase. Although we consider this reserve to be appropriate, there can be no assurance that the reserve will prove to be appropriate overtime to cover ultimate losses, due to unanticipated adverse changes in the economy and historical loss patterns, discrete events adversely affecting specific borrowers or industries, and/or actions taken by institutions or investors. The impact of such matters will be considered in the reserving process when known.

Mortgage Servicing Rights

The Company measures its residential mortgage servicing assets using the fair value method. Under the fair value method, the mortgage servicing rights (MSRs) are carried in the balance sheet at fair value and the changes in fair value are reported in earnings within other noninterest income in the period in which the change occurs. Retained MSRs are measured at fair value as of the date of sale of the related mortgage loan. Subsequent fair value measurements are determined using a discounted cash flow model. In order to determine the fair value of the MSRs, the present value of expected future cash flows is estimated. Assumptions used include market discount rates, anticipated prepayment speeds, delinquency and foreclosure rates, and ancillary fee income.

The model assumptions and the MSRs fair value estimates are compared to observable trades of similar portfolios as well as to MSR broker valuations and industry surveys, as available. The expected life of the loan can vary from management's estimates due to prepayments by borrowers, especially when rates fall. Prepayments in excess of management's estimates would negatively impact the recorded value of the MSRs. The value of the MSRs is also dependent upon the discount rate used in the model, which is based on current market rates. Management reviews this rate on an ongoing basis based on current market rates. A significant increase in the discount rate would reduce the value of the MSRs.

Acquisition Accounting

We account for business combinations using the acquisition method, which requires an allocation of the purchase price of an acquired entity to the assets acquired, including identifiable intangibles, and liabilities assumed based on their estimated fair values at the date of acquisition. Management applies various valuation methodologies to these acquired assets and assumed liabilities which often involve a significant degree of judgment, particularly when liquid markets do not exist for the particular item being valued. Examples of such items include loans, deposits, identifiable intangible assets and certain other assets and liabilities acquired or assumed in business combinations. Management uses significant estimates and assumptions to value such items, including, among others, projected cash flows, prepayment and default assumptions, discount rates, and realizable collateral values. The purchase date valuations, which are considered preliminary and are subject to change for up to one year after the acquisition date, determine the amount of goodwill or bargain purchase gain recognized in connection with the business combination. While we are in the process of finalizing our purchase price allocation, significant changes are not anticipated. Certain assumptions and estimates must be updated regularly in connection with the ongoing accounting for purchased loans. Valuation assumptions and estimates may also have to be revisited in connection with periodic assessments of possible value impairment, including impairment of goodwill,

intangible assets and certain other long-lived assets. The use of different assumptions could produce significantly different valuation results, which could have material positive or negative effects on the Company's results of operations.

Table of Contents

Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

The primary objective of the following information is to provide forward-looking quantitative and qualitative information about our potential exposure to market risks. Market risk represents the risk of loss that may result from changes in value of a financial instrument as a result of changes in interest rates, market prices and the credit perception of an issuer. The disclosure is not meant to be a precise indicator of expected future losses, but rather an indicator of reasonably possible losses, and therefore our actual results may differ from any of the following projections. This forward-looking information provides an indicator of how we view and manage our ongoing market risk exposures.

At December 31, 2013, total notes payable outstanding on our consolidated balance sheet was \$56.3 million, and was comprised entirely of indebtedness subject to variable interest rates. If LIBOR and the prime rate were to increase by one eighth of one percent (0.125%), the increase in interest expense on the variable rate debt would not have a significant impact on our future consolidated earnings or cash flows.

Banking Segment

The banking segment is engaged primarily in the business of investing funds obtained from deposits and borrowings in interest-earning loans and investments, and our primary component of market risk is sensitivity to changes in interest rates. Consequently, our earnings depend to a significant extent on our net interest income, which is the difference between interest income on loans and investments and our interest expense on deposits and borrowings. To the extent that our interest-bearing liabilities do not reprice or mature at the same time as our interest-bearing assets, we are subject to interest rate risk and corresponding fluctuations in net interest income.

There are several common sources of interest rate risk that must be effectively managed if there is to be minimal impact on our earnings and capital. Repricing risk arises largely from timing differences in the pricing of assets and liabilities. Reinvestment risk refers to the reinvestment of cash flows from interest payments and maturing assets at lower or higher rates. Basis risk exists when different yield curves or pricing indices do not change at precisely the same time or in the same magnitude such that assets and liabilities with the same maturity are not all affected equally. Yield curve risk refers to unequal movements in interest rates across a full range of maturities.

We have employed asset/liability management policies that attempt to manage our interest-earning assets and interest-bearing liabilities, thereby attempting to control the volatility of net interest income, without having to incur unacceptable levels of risk. We employ procedures which include interest rate shock analysis, repricing gap analysis and balance sheet decomposition techniques to help mitigate interest rate risk in the ordinary course of business. In addition, the asset/liability management policies permit the use of various derivative instruments to manage interest rate risk or hedge specified assets and liabilities.

An interest rate sensitive asset or liability is one that, within a defined time period, either matures or experiences an interest rate change in line with general market interest rates. The management of interest rate risk is performed by analyzing the maturity and repricing relationships between interest-earning assets and interest-bearing liabilities at specific points in time (*GAP*) and by analyzing the effects of interest rate changes on net interest income over specific periods of time by projecting the performance of the mix of assets and liabilities in varied interest rate environments. Interest rate sensitivity reflects the potential effect on net interest income resulting from a movement in interest rates. A company is considered to be asset sensitive, or have a positive *GAP*, when the amount of its interest-earning assets maturing or repricing within a given period exceeds the amount of its interest-bearing liabilities also maturing or repricing within that time period. Conversely, a company is

considered to be liability sensitive, or have a negative GAP, when the amount of its interest-bearing liabilities maturing or repricing within a given period exceeds the amount of its interest-earning assets also maturing or repricing within that time period. During a period of rising interest rates, a negative GAP would tend to affect net interest income adversely, while a positive GAP would tend to result in an increase in net interest income. During a period of falling interest rates, a negative GAP would tend to result in an increase in net interest income, while a positive GAP would tend to affect net interest income adversely. However, it is our intent to remain relatively balanced so that changes in rates do not have a significant impact on earnings.

Table of Contents

As illustrated in the table below, the banking segment is asset sensitive overall. Loans that adjust daily or monthly to the Wall Street Journal Prime rate comprise a large percentage of interest sensitive assets and are the primary cause of the banking segment's asset sensitivity. To help neutralize interest rate sensitivity, the banking segment has kept the terms of most of its borrowings under one year as shown in the following table (dollars in thousands).

	December 31, 2013						
	3 Months or Less	> 3 Months to 1 Year	> 1 Year to 3 Years	> 3 Years to 5 Years	> 5 Years	Total	
<u>Interest sensitive assets:</u>							
Loans	\$ 3,153,086	\$ 570,332	\$ 705,647	\$ 272,031	\$ 557,305	\$ 5,258,401	
Securities	72,320	317,041	237,398	130,848	244,962	1,002,569	
Federal funds sold and securities purchased under agreements to resell	32,924					32,924	
Other interest sensitive assets	387,443					387,443	
Total interest sensitive assets	3,645,773	887,373	943,045	402,879	802,267	6,681,337	
<u>Interest sensitive liabilities:</u>							
Interest bearing checking	\$ 2,291,218	\$	\$	\$	\$	\$ 2,291,218	
Savings	357,325					357,325	
Time deposits	767,295	1,040,401	350,703	111,239	35,636	2,305,274	
Notes payable & other borrowings	244,849	499	1,421	762	5,413	252,944	
Total interest sensitive liabilities	3,660,687	1,040,900	352,124	112,001	41,049	5,206,761	
Interest sensitivity gap	\$ (14,914)	\$ (153,527)	\$ 590,921	\$ 290,878	\$ 761,218	\$ 1,474,576	
Cumulative interest sensitivity gap	\$ (14,914)	\$ (168,441)	\$ 422,480	\$ 713,358	\$ 1,474,576		
Percentage of cumulative gap to total interest sensitive assets	-0.22%	-2.52%	6.32%	10.68%	22.07%		

The positive GAP in the interest rate analysis indicates that banking segment net interest income would generally rise if rates increase. Because of inherent limitations in interest rate GAP analysis, the banking segment uses multiple interest rate risk measurement techniques. Simulation analysis is used to subject the current repricing conditions to rising and falling interest rates in increments and decrements of 1%, 2% and 3% to determine the effect on net interest income changes for the next twelve months. The banking segment also measures the effects of changes in interest rates on market value of equity by discounting projected cash flows of deposits and loans. Market value changes in the investment portfolio are estimated by discounting future cash flows and using duration analysis. Investment security prepayments are estimated using current market information. We believe the simulation analysis presents a more accurate picture than the GAP analysis. Simulation analysis recognizes that deposit products may not react to changes in interest rates as quickly or with the same magnitude as earning assets contractually tied to a market rate index. The sensitivity to changes in market rates varies across deposit products. Also, unlike GAP analysis, simulation analysis takes into account the effect of embedded options in the securities and loan portfolios as well as any off-balance-sheet derivatives.

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

The table below shows the estimated impact of increases of 1%, 2% and 3% and a decrease of 0.5% in interest rates on net interest income and on economic value of equity for the banking segment at December 31, 2013 (dollars in thousands).

Change in Interest Rates (basis points)	Changes in Net Interest Income		Changes in Economic Value of Equity	
	Amount	Percent	Amount	Percent
+300	\$ 3,732	1.41%	\$ (15,182)	-1.18%
+200	\$ (8,538)	-3.23%	\$ (17,483)	-1.36%
+100	\$ (10,155)	-3.84%	\$ (8,585)	-0.67%
-50	\$ 3,979	1.51%	\$ (6,394)	-0.50%

The projected changes in net interest income and market value of equity to changes in interest rates at December 31, 2013 were in compliance with established internal policy guidelines. These projected changes are based on numerous assumptions of growth and changes in the mix of assets or liabilities.

The historically low level of interest rates, combined with the existence of rate floors that are in effect for a significant portion of the loan portfolio, are projected to cause yields on our earning assets to rise more slowly than increases in market interest rates. As a result, in a rising interest rate environment, our interest rate margins are projected to compress until the rise in market interest rates is sufficient to allow our loan portfolio to reprice above applicable rate floors.

Table of Contents

Mortgage Origination Segment

Within our mortgage origination segment, our principal market exposure is to interest rate risk due to the impact on our mortgage-related assets and commitments, including mortgage loans held for sale, IRLCs and MSR. Changes in interest rates could also materially and adversely affect our volume of mortgage loan originations.

IRLCs represent an agreement to extend credit to a mortgage loan applicant, whereby the interest rate on the loan is set prior to funding. Our mortgage loans held for sale, which we hold in inventory while awaiting sale into the secondary market, and our IRLCs are subject to the effects of changes in mortgage interest rates from the date of the commitment through the sale of the loan into the secondary market. As a result, we are exposed to interest rate risk and related price risk during the period from the date of the lock commitment until (i) the lock commitment cancellation or expiration date or (ii) the date of sale into the secondary mortgage market. Loan commitments generally range from 20 to 60 days, and our average holding period of the mortgage loan from funding to sale is approximately 30 days. An integral component of our interest rate risk management strategy is our execution of forward commitments to sell mortgage-backed securities to minimize the impact on earnings resulting from significant fluctuations in the fair value of mortgage loans held for sale and IRLCs caused by changes in interest rates.

We have recently expanded, and may continue to expand, our residential mortgage servicing operations within our mortgage origination segment. As a result of our mortgage servicing business, we have a portfolio of MSRs. One of the principal risks associated with MSRs is that in a declining interest rate environment, they will likely lose a substantial portion of their value as a result of higher than anticipated prepayments. Moreover, if prepayments are greater than expected, the cash we receive over the life of the mortgage loans would be reduced. In the future, we may use various derivative financial instruments to provide a level of protection against such interest rate risk. However, no hedging strategy can protect us completely, and hedging strategies may fail because they are improperly designed, improperly executed and documented or based on inaccurate assumptions and, as a result, could actually increase our risks and losses. The increasing size of our MSR portfolio may increase our interest rate risk and correspondingly, the volatility of our earnings, especially if we cannot adequately hedge the interest rate risk relating to our MSRs.

The goal of our interest rate risk management strategy within our mortgage origination segment is not to eliminate interest rate risk, but to manage it within appropriate limits. To mitigate the risk of loss, we have established policies and procedures, which include guidelines on the amount of exposure to interest rate changes we are willing to accept.

Insurance Segment

Within our insurance segment, our exposures to market risk relate primarily to our investment portfolio, which is exposed primarily to interest rate risk and credit risk. The fair value of our investment portfolio is directly impacted by changes in market interest rates; generally, the fair value of fixed-income investments moves inversely with movements in market interest rates. Our fixed maturity portfolio is comprised of substantially all fixed rate investments with primarily short-term and intermediate-term maturities. This portfolio composition allows flexibility in reacting to fluctuations of interest rates. The portfolios of our insurance company subsidiaries are managed to achieve an adequate risk-adjusted return while maintaining sufficient liquidity to meet policyholder obligations. Additionally, the fair values of interest rate sensitive instruments may be affected by the creditworthiness of the issuer, prepayment options, relative values of alternative investments, the liquidity of the instrument and other general market conditions.

Financial Advisory Segment

Our financial advisory segment is exposed to market risk primarily due to its role as a financial intermediary in customer transactions, which may include purchases and sales of securities, use of derivatives and securities lending activities.

Our financial advisory segment is exposed to interest rate risk as a result of maintaining inventories of interest rate sensitive financial instruments and other interest earning assets including customer and correspondent margin loans and securities borrowing activities. Our exposure to interest rate risk is also from our funding sources including customer and correspondent cash balances, bank borrowings, repurchase agreements and securities lending activities. Interest rates on customer and correspondent balances and securities produce a positive spread with rates generally fluctuating in parallel.

With respect to securities held, our interest rate risk is managed by setting and monitoring limits on the size and duration of positions and on the length of time securities can be held. Much of the interest rates on customer and correspondent margin loans are indexed and can vary daily. Our funding sources are generally short term with interest rates that can vary daily.

Table of Contents

Derivatives are used to support certain customer programs and hedge our related exposure to interest rate risks.

Our financial advisory segment is engaged in various brokerage and trading activities that expose us to credit risk arising from potential non-performance from counterparties, customers or issuers of securities. This risk is managed by setting and monitoring position limits for each counterparty, conducting periodic credit reviews of counterparties, reviewing concentrations of securities and conducting business through central clearing organizations.

Collateral underlying margin loans to customers and correspondents and with respect to securities lending activities is marked to market daily and additional collateral is required as necessary.

Item 8. Financial Statements and Supplementary Data.

Our financial statements required by this item are submitted as a separate section of this Annual Report. See Financial Statements, commencing on page F-1 hereof.

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure.

None.

Item 9A. Controls and Procedures.

Conclusion Regarding the Effectiveness of Disclosure Controls and Procedures

Our management, with the supervision and participation of our Principal Executive Officer and Principal Financial Officer, has evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this Annual Report.

Based upon that evaluation, our Principal Executive Officer and Principal Financial Officer concluded that, as of the end of such period, our disclosure controls and procedures were effective in recording, processing, summarizing and reporting, on a timely basis, information required to be disclosed by us in the reports that we file or submit under the Exchange Act and are effective in ensuring that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is accumulated and communicated to the Company's management, including our Principal Executive Officer and Principal Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting

There were no changes during the fiscal quarter ended December 31, 2013 in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Management's Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act, as a process designed by, or under the supervision of, our Principal Executive Officer and Principal Financial Officer and effected by our board of directors, management and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that:

- pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of our assets;

- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that our receipts and expenditures are being made only in accordance with authorization of our management and directors; and

- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on the financial statements.

Table of Contents

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Projections of any evaluation of effectiveness to future periods are subject to the risks that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of our internal control over financial reporting at December 31, 2013. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control-Integrated Framework (1992). We have excluded from our evaluation the internal control over financial reporting of the assets acquired and liabilities assumed of FNB on September 13, 2013. The total assets and total income before income taxes of the excluded business represent \$1.7 billion and \$28.7 million, respectively, of the related consolidated financial statement amounts as of and for the year ended December 31, 2013. Based on our assessment, management concluded that, at December 31, 2013, our internal control over financial reporting is effective.

Item 9B. Other Information.

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance.

The information called for by this Item is contained in our definitive Proxy Statement for our 2014 Annual Meeting of Stockholders, and is incorporated herein by reference.

Item 11. Executive Compensation.

The information called for by this Item is contained in our definitive Proxy Statement for our 2014 Annual Meeting of Stockholders, and is incorporated herein by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

The information called for by this Item is contained in our definitive Proxy Statement for our 2014 Annual Meeting of Stockholders, or in Item 5 of this Annual Report for the year ended December 31, 2013, and is incorporated herein by reference.

Item 13. Certain Relationships and Related Transactions, and Director Independence.

The information called for by this Item is contained in our definitive Proxy Statement for our 2014 Annual Meeting of Stockholders, and is incorporated herein by reference.

Item 14. Principal Accounting Fees and Services.

The information called for by this Item is contained in our definitive Proxy Statement for our 2014 Annual Meeting of Stockholders, and is incorporated herein by reference.

Report of Independent Registered Public Accounting Firm

To The Board of Directors and Stockholders of Hilltop Holdings Inc.

In our opinion, based on our audits and the reports of other auditors, the consolidated financial statements listed in the accompanying index appearing under Item 15(a)(1) present fairly, in all material respects, the financial position of Hilltop Holdings Inc. and its subsidiaries (the Company) at December 31, 2013 and 2012, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2013 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2013, based on criteria established in *Internal Control - Integrated Framework* (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on these financial statements and on the Company's internal control over financial reporting based on our integrated audits. We did not audit the financial statements of PrimeLending and First Southwest Company for the year ended December 31, 2012, both wholly owned subsidiaries of the Company, which statements reflect total assets of approximately \$1.5 billion and \$0.5 billion, respectively, of the related consolidated total as of December 31, 2012 and total net income before tax of approximately \$5.7 million and \$1.6 million, respectively, of the related consolidated total for the year ended December 31, 2012. The 2012 financial statements of PrimeLending and First Southwest Company were audited by other auditors whose reports thereon have been furnished to us, and our opinion on the financial statements expressed herein, insofar as it relates to the amounts included for PrimeLending and First Southwest Company, is based solely on the reports of the other auditors. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits and the reports of other auditors provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

As described in Management's Report on Internal Control over Financial Reporting appearing under Item 9A, management has excluded the operations of First National Bank from its assessment of internal control over financial reporting as of December 31, 2013 because the Company acquired certain assets and assumed certain liabilities of First National Bank in a transaction consummated on September 13, 2013. We have also excluded the operations acquired in the First National Bank transaction from our audit of internal control over financial reporting. The First National Bank operations consist of total assets and total net income before income taxes of approximately \$1.7 billion and \$28.7 million, respectively, of the related consolidated financial statement amounts as of and for the year ended December 31, 2013.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholder

PrimeLending, a PlainsCapital Company

We have audited the consolidated financial statements of PrimeLending, a PlainsCapital Company (the Company), which comprise the consolidated balance sheet as of December 31, 2012, and the related consolidated statement of income, stockholder's equity, and cash flows for the period from December 1, 2012 through December 31, 2012, and the related consolidated notes to the financial statements (not presented separately herein).

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in conformity with U.S. generally accepted accounting principles; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free of material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States and in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of PrimeLending, a PlainsCapital Company at December 31, 2012, and the results of its operations and its cash flows for the period from December 1, 2012 through December 31, 2012 in conformity with U.S. generally accepted accounting principles.

Report of Independent Registered Public Accounting Firm

Board of Directors

First Southwest Company

We have audited the financial statements of First Southwest Company (the Company), which comprise the statement of financial condition as of December 31, 2012, and the related statements of income, changes in stockholder's equity, and cash flows for the period from December 1, 2012 through December 31, 2012 that are filed pursuant to Rule 17a-5 under the Securities Exchange Act of 1934, and the related notes to the financial statements (not presented separately herein).

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in conformity with U.S. generally accepted accounting principles; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States and in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Company's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of First Southwest Company as of December 31, 2012, and the results of its operations and its cash flows for the period from December 1, 2012 through December 31, 2012, in conformity with U.S. generally accepted accounting principles.

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements

1. Summary of Significant Accounting and Reporting Policies

Nature of Operations

Hilltop Holdings Inc. (Hilltop and, collectively with its subsidiaries, the Company) was organized in July 1998 as a Maryland corporation. Hilltop is a financial holding company registered under the Bank Holding Company Act of 1956, as amended by the Gramm-Leach-Bliley Act of 1999. On November 30, 2012, Hilltop acquired PlainsCapital Corporation pursuant through a plan of merger whereby PlainsCapital Corporation merged with and into a wholly owned subsidiary (the PlainsCapital Merger), which continued as the surviving entity under the name PlainsCapital Corporation (PlainsCapital).

PlainsCapital is a financial holding company, headquartered in Dallas, Texas, that provides, through its subsidiaries, an array of financial products and services. In addition to traditional banking services, PlainsCapital provides residential mortgage lending, investment banking, public finance advisory, wealth and investment management, treasury management, capital equipment leasing, fixed income sales, asset management, and correspondent clearing services. The operating results of Hilltop for the year ended December 31, 2012 include the results from the operations acquired in the PlainsCapital Merger for the month ended December 31, 2012. Certain disclosures within the notes to consolidated financial statements are specific to financial products and services of PlainsCapital and its subsidiaries and therefore include information at December 31, 2013 and 2012 and relating to the post-acquisition year ended December 31, 2013 and one month period ended December 31, 2012.

Prior to the consummation of the PlainsCapital Merger, the Company s primary operations were limited to providing fire and homeowners insurance to low value dwellings and manufactured homes primarily in Texas and other areas of the southern United States through the Company s wholly owned property and casualty insurance holding company, National Lloyds Corporation (NLC), formerly known as NLASCO, Inc.

On September 13, 2013 (the Bank Closing Date), PlainsCapital Bank (the Bank) assumed substantially all of the liabilities, including all of the deposits, and acquired substantially all of the assets of Edinburg, Texas-based First National Bank (FNB) from the Federal Deposit Insurance Corporation (the FDIC), as receiver, and reopened former FNB branches acquired from the FDIC under the PlainsCapital Bank name (the FNB Transaction). Pursuant to the Purchase and Assumption Agreement (the P&A Agreement), the Bank and the FDIC entered into loss-share agreements whereby the FDIC agreed to share in the losses of certain covered loans and covered other real estate owned (OREO) that the Bank acquired, as further described in Note 2 to the consolidated financial statements. Based on preliminary purchase date valuations, the fair value of the assets acquired was \$2.2 billion, including \$1.1 billion in covered loans, \$286.2 million in securities, \$135.2 million in covered OREO and \$42.9 million in non-covered loans. The Bank also assumed \$2.2 billion in liabilities, consisting primarily of deposits. FNB s expansive branch network allows the Bank to further develop its Texas footprint through expansion into the Rio Grande Valley, Houston, Corpus Christi, Laredo and El Paso markets, among others.

Basis of Presentation

The preparation of financial statements in conformity with accounting principles generally accepted in the United States (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Estimates regarding the allowance for loan losses, the fair values of financial instruments, the amounts receivable under the loss-share agreements with the FDIC (FDIC Indemnification Asset), reserves for losses and loss adjustment expenses, the mortgage loan indemnification liability, and the potential impairment of assets are particularly subject to change. The Company has applied its critical accounting policies and estimation methods consistently in all periods presented in these consolidated financial statements. As discussed in Note 2 to the consolidated financial statements, the purchase date valuations for certain identifiable assets acquired and liabilities assumed in the FNB Transaction are considered preliminary because management made significant estimates and exercised significant judgment in estimating fair values and accounting associated with the real estate appraisal validation exercise due to the short time period between the Bank Closing Date and December 31, 2013.

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

The presentation of the Company's historical consolidated financial statements has been modified and certain items in the prior period financial statements have been reclassified to conform to the current period presentation, which is more consistent with that of a financial institution that provides an array of financial products and services.

Hilltop owns 100% of the outstanding stock of PlainsCapital. PlainsCapital owns 100% of the outstanding stock of the Bank and 100% of the membership interest in PlainsCapital Equity, LLC. The Bank owns 100% of the outstanding stock of PrimeLending, a PlainsCapital Company (PrimeLending) and PCB-ARC, Inc. The Bank has a 100% membership interest in First Southwest Holdings, LLC (First Southwest) and PlainsCapital Securities, LLC, as well as a 51% voting interest in PlainsCapital Insurance Services, LLC.

Hilltop also owns 100% of NLC, which operates through its wholly owned subsidiaries, National Lloyds Insurance Company (NLIC) and American Summit Insurance Company (ASIC).

PrimeLending owns a 100% membership interest in PrimeLending Ventures Management, LLC, the controlling and sole managing member of PrimeLending Ventures, LLC (Ventures).

The principal subsidiaries of First Southwest are First Southwest Company (FSC), a broker-dealer registered with the Securities and Exchange Commission (the SEC) and the Financial Industry Regulatory Authority, and First Southwest Asset Management, Inc., a registered investment advisor under the Investment Advisors Act of 1940.

The consolidated financial statements include the accounts of the above-named entities. All significant intercompany transactions and balances have been eliminated. Noncontrolling interests have been recorded for minority ownership in entities that are not wholly owned and are presented in compliance with the provisions of Noncontrolling Interest in Subsidiary Subsections of the Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC).

PlainsCapital also owns 100% of the outstanding common stock of PCC Statutory Trusts I, II, III and IV (the Trusts), which are not included in the consolidated financial statements under the requirements of the Variable Interest Entities Subsections of the ASC, because the primary beneficiaries of the Trusts are not within the consolidated group.

Accounting Change

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

Effective October 1, 2013, the Company changed its method of applying ASC Topic 350 such that the annual goodwill impairment testing date was changed from December 31st to October 1st for its insurance reporting unit. This new testing date is preferable under the circumstances in order to combine evaluation efforts to provide for a more consistent, efficient and effective entity-wide impairment testing process and it allows the Company more time to accurately complete its impairment testing process in order to incorporate the results in the annual consolidated financial statements. The Company has prospectively applied the change in the annual goodwill impairment testing date from October 1, 2013.

Acquisition Accounting

Acquisitions are accounted for under the purchase method of accounting. Purchased assets, including identifiable intangible assets, and assumed liabilities are recorded at their respective acquisition date fair values. If the fair value of net assets purchased exceeds the consideration given, a bargain purchase gain is recognized. If the consideration given exceeds the fair value of the net assets received, goodwill is recognized.

Securities Purchased Under Agreements to Resell

Securities purchased under agreements to resell (reverse repurchase agreements or reverse repos) are treated as collateralized financings and are carried at the amounts at which the securities will subsequently be resold as specified in the agreements. PlainsCapital is in possession of collateral with a fair value equal to or in excess of the contract amounts.

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

Securities

Management classifies securities at the time of purchase and reassesses such designation at each balance sheet date. Transfers between categories from these reassessments are rare. Securities held for resale to facilitate principal transactions with customers, as well as certain securities acquired in the PlainsCapital Merger, are classified as trading, and are carried at fair value, with changes in fair value reflected in the consolidated statements of operations. Hilltop reports interest income on trading securities as interest income on securities and other changes in fair value as other noninterest income.

Securities held but not intended to be held to maturity or on a long-term basis are classified as available for sale. Securities included in this category are those that management intends to use as part of its asset/liability management strategy and that may be sold in response to changes in interest rates, resultant prepayment risk, and other factors related to interest rate and resultant prepayment risk changes. Securities available for sale are carried at fair value. Unrealized holding gains and losses on securities available for sale, net of taxes, are reported in other comprehensive income (loss) until realized. Premiums and discounts are recognized in interest income using the effective interest method and consider any optionality that may be embedded in the security.

Purchases and sales (and related gain or loss) of securities are recorded on the trade date, based on specific identification. Declines in the fair value of available-for-sale securities below their cost that are deemed to be other than temporary are reflected in earnings as realized losses to the extent the other-than-temporary impairment (OTTI) is related to credit losses. The amount of the OTTI related to other factors is recognized in other comprehensive income (loss). In estimating OTTI, management considers in developing its best estimate of cash flows, among other things, (i) the length of time and the extent to which the fair value has been less than cost, (ii) the financial condition and near-term prospects of the issuer, (iii) the historic and implied volatility of the security, (iv) failure of the issuer to make scheduled interest payments and (v) changes to the rating of the security by a rating agency.

Loans Held for Sale

Loans held for sale consist primarily of single-family residential mortgages funded through PrimeLending. These loans are generally on the consolidated balance sheet for no more than 30 days. Substantially all mortgage loans originated by PrimeLending are sold in the secondary market, the majority with servicing released. Mortgage loans held for sale are carried at fair value under the provisions of the Fair Value Option Subsections of the ASC (Fair Value Option). Changes in the fair value of the loans held for sale are recognized in earnings and fees and costs associated with origination are recognized as incurred. The specific identification method is used to determine realized gains and losses on sales of loans, which are reported as net gains (losses) in noninterest income. Loans sold are subject to certain indemnification provisions with investors, including the repurchase of loans sold and repayment of certain sales proceeds to investors under certain conditions.

Loans

Originated Loans

Loans that management has the intent and ability to hold for the foreseeable future or until maturity or payoff are stated at the amount of unpaid principal reduced by unearned income, net unamortized deferred fees and an allowance for loan losses. Unearned income on installment loans and interest on other loans is recognized using the effective interest method. Net fees received for providing loan commitments and letters of credit that result in loans are deferred and amortized to interest income over the life of the related loan, beginning with the initial borrowing. Net fees on commitments and letters of credit that are not expected to be funded are amortized to noninterest income over the commitment period. Income on direct financing leases is recognized on a basis that achieves a constant periodic rate of return on the outstanding investment.

Impaired loans include non-accrual loans, troubled debt restructurings and partially charged-off loans. The accrual of interest on impaired loans is discontinued when, in management's opinion, there is a clear indication that the borrower's cash flow may not be sufficient to meet principal and interest payments as they become due according to the terms of the loan agreement, which is generally when a loan is 90 days past due unless the loan is both well secured and in the process of

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

collection. When a loan is placed on non-accrual status, all previously accrued and unpaid interest is charged against income. If the ultimate collectability of principal, wholly or partially, is in doubt, any payment received on a loan on which the accrual of interest has been suspended is applied to reduce principal to the extent necessary to eliminate such doubt. Once the collection of the remaining recorded loan balance is fully expected, interest income is recognized on a cash basis.

The Bank originates loans to customers primarily in Texas. Although the Bank has diversified loan and leasing portfolios and, generally, holds collateral against amounts advanced to customers, its debtors' ability to honor their contracts is substantially dependent upon the general economic conditions of the region and of the industries in which its debtors operate, which consist primarily of energy, agribusiness, wholesale/retail trade, construction and real estate. PrimeLending originates loans to customers in its offices, which are located throughout the United States. Substantially all mortgage loans originated by PrimeLending are sold in the secondary market with servicing released, although PrimeLending does retain servicing in certain circumstances. FSC makes loans to customers through margin transactions. FSC controls risk by requiring customers to maintain margin collateral in compliance with various regulatory and internal guidelines, which may vary based upon market conditions. Securities owned by customers and held as collateral for margin loans are not included in the consolidated financial statements.

Acquired Loans

Management has defined the loans acquired in a business combination as acquired loans. Acquired loans are recorded at estimated fair value on their purchase date with no carryover of the related allowance for loan losses. Acquired loans were segregated between those considered to be credit impaired and those without credit impairment at acquisition. To make this determination, management considered such factors as past due status, nonaccrual status and credit risk ratings. The fair value of acquired performing loans was determined by discounting expected cash flows, both principal and interest, at prevailing market interest rates. The difference between the fair value and principal balances due at acquisition date, the fair value discount, is accreted into income over the estimated life of each loan.

Purchased credit impaired (PCI) loans acquired in the PlainsCapital Merger are accounted for on an individual loan basis, while PCI loans acquired in the FNB Transaction are accounted for both in pools and on an individual loan basis. The Company has established under its PCI accounting policy a framework to aggregate certain acquired loans into various loan pools based on a minimum of two layers of common risk characteristics for the purpose of determining their respective fair values as of their acquisition dates, and for applying the subsequent recognition and measurement provisions for income accretion and impairment testing. The common risk characteristics used for the pooling of the FNB PCI loans are risk grade and loan collateral type.

PCI loans showed evidence of credit deterioration that makes it probable that all contractually required principal and interest payments will not be collected. Their fair value was initially based on an estimate of cash flows, both principal and interest, expected to be collected, discounted at prevailing market rates of interest. Management estimated cash flows using key assumptions such as default rates, loss severity rates assuming default, prepayment speeds and estimated collateral values. The excess of cash flows expected to be collected from a loan or pool over its estimated fair value at acquisition is referred to as the accretable yield and is recognized in interest income using an effective yield method over the remaining life of the loan or pool. Subsequent to acquisition, management must update these estimates of cash flows expected to be collected at each reporting date. These updates require the continued use of key assumptions and estimates, similar to those used in the initial estimate of

fair value.

The Bank accretes the discount for PCI loans for which it can predict the timing and amount of cash flows. PCI loans for which a discount is accreted are considered performing.

Allowance for Loan Losses

Originated Loans

The allowance for loan losses is a reserve established through a provision for loan losses charged to expense, which represents management's best estimate of probable losses inherent in the existing portfolio of loans. The allowance, in the judgment of management, is necessary to reserve for estimated loan losses inherent in the loan portfolio at the balance sheet date. The allowance for loan losses includes allowance allocations calculated in accordance with the Receivables and Contingencies Topics of the ASC. The level of the allowance reflects management's continuing evaluation of industry concentrations, specific credit risks, loan loss experience, current loan portfolio quality, present economic, political and regulatory conditions, and unidentified losses inherent in the current loan portfolio. Portions of the allowance may be

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

allocated for specific credits; however, the entire allowance is available for any credit that, in management's judgment, should be charged off. While management utilizes its best judgment and information available, the ultimate adequacy of the allowance is dependent upon a variety of factors beyond the Bank's control, including the performance of the Bank's loan portfolio, the economy and changes in interest rates.

The Bank's allowance for loan losses consists of three elements: (i) specific valuation allowances established for probable losses on impaired loans; (ii) general historical valuation allowances calculated based on historical loan loss experience for homogenous loans with similar characteristics and trends; and (iii) valuation allowances to adjust general reserves based on recent economic conditions and other qualitative risk factors both internal and external to the Bank.

Acquired Loans

Purchased loans acquired in a business combination are recorded at their estimated fair value on their purchase date with no carryover of the related allowance for loan losses. Loans without evidence of credit impairment at acquisition are subsequently evaluated for any required allowance at each reporting date. An allowance for loan losses is calculated using a methodology similar to that described above for originated loans. The allowance as determined for each loan collateral type is compared to the remaining fair value discount for that loan collateral type. If greater, the excess is recognized as an addition to the allowance through a provision for loan losses. If less than the discount, no additional allowance is recorded. Charge-offs and losses first reduce any remaining fair value discount for the loan and once the discount is depleted, losses are applied against the allowance established for that loan.

For PCI loans, cash flows expected to be collected are recast at each reporting date for each loan or pool. These evaluations require the continued use and updating of key assumptions and estimates such as default rates, loss severity given default and prepayment speed assumptions, similar to those used for the initial fair value estimate. Management judgment must be applied in developing these assumptions. If expected cash flows for a loan or pool decreases, an increase in the allowance for loan losses is made through a charge to the provision for loan losses. If expected cash flows for a loan increase, any previously established allowance for loan losses is reversed and any remaining difference increases the accretable yield which will be taken into income over the remaining life of the loan or pool.

Assets Segregated for Regulatory Purposes

Under certain conditions, FSC may be required to segregate cash and securities in a special reserve account for the benefit of customers under Rule 15c3-3 promulgated under the Securities Exchange Act of 1934, as amended (the Exchange Act). Assets segregated under the provisions of the Exchange Act are not available for general corporate purposes. At December 31, 2013, FSC was not required to segregate cash and securities. FSC was required to segregate an aggregate of \$19.0 million in cash and securities at December 31, 2012, which is included in other assets within the consolidated balance sheets.

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

FSC was not required to segregate cash or securities in a special reserve account for the benefit of proprietary accounts of introducing broker-dealers at December 31, 2013 and 2012.

Broker-Dealer and Clearing Organization Transactions

Amounts recorded in broker-dealer and clearing organization receivables and payables include securities lending activities, as well as amounts related to securities transactions for either FSC customers or for the account of FSC. Securities-borrowed and securities-loaned transactions are generally reported as collateralized financings except where letters of credit or other securities are used as collateral. Securities-borrowed transactions require FSC to deposit cash, letters of credit, or other collateral with the lender. With respect to securities loaned, FSC receives collateral in the form of cash or other assets in an amount generally in excess of the market value of securities loaned. FSC monitors the market value of securities borrowed and loaned on a daily basis, with additional collateral obtained or refunded as necessary. Interest income and interest expense associated with collateralized financings is included in the accompanying consolidated statements of operations.

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

Insurance Premiums Receivable

Insurance premiums receivable include premiums written and not yet collected. NLC routinely evaluates the receivable balance to determine if an allowance for uncollectible amounts is necessary. At December 31, 2013 and 2012, NLC determined that no valuation allowance was necessary.

Deferred Policy Acquisition Costs

Costs of acquiring insurance vary with and are primarily related to the successful acquisition of new and renewal business, primarily consisting of commissions, premium taxes and underwriting expenses, and are deferred and amortized over the terms of the policies or reinsurance treaties to which they relate. Proceeds from reinsurance transactions that represent recovery of acquisition costs reduce applicable unamortized acquisition costs in such a manner that net acquisition costs are capitalized and charged to expense in proportion to net revenue recognized. Future investment income is considered in determining the recoverability of deferred policy acquisition costs. NLC regularly reviews the categories of acquisition costs that are deferred and assesses the recoverability of this asset. A premium deficiency and a corresponding charge to income is recognized if the sum of the expected loss and loss adjustment expenses, unamortized policy acquisition costs, and maintenance costs exceed related unearned insurance premiums and anticipated investment income. At December 31, 2013 and 2012, there was no premium deficiency.

Reinsurance

In the normal course of business, NLC seeks to reduce the loss that may arise from catastrophes or other events that could cause unfavorable underwriting results by reinsuring certain levels of risk in various areas of exposure with other insurance enterprises or reinsurers. Amounts recoverable from reinsurers are estimated in a manner consistent with the reinsured policy. NLC routinely evaluates the receivable balance to determine if any uncollectible balances exist.

Net insurance premiums earned, losses and loss adjustment expenses (LAE) and policy acquisition and other underwriting expenses are reported net of the amounts related to reinsurance ceded to other companies. Amounts recoverable from reinsurers related to the portions of the liability for losses and LAE and unearned insurance premiums ceded to them are included in other assets within the consolidated balance sheets. Reinsurance assumed from other companies, including assumed premiums written and earned and losses and LAE, is accounted for in the same manner as direct insurance written.

Premises and Equipment

Premises and equipment are stated at cost less accumulated depreciation and amortization computed principally on the straight-line method over the estimated useful lives of the assets, which range between 3 and 40 years. Gains or losses on disposals of premises and equipment are included in results of operations.

FDIC Indemnification Asset

The Company has elected to account for the FDIC Indemnification Asset in accordance with FASB ASC 805. The FDIC Indemnification Asset is initially recorded at fair value, based on the discounted value of expected future cash flows under the loss-share agreements. The difference between the present value and the undiscounted cash flows the Company expects to collect from the FDIC will be accreted into noninterest income within the consolidated statements of operations over the life of the FDIC Indemnification Asset. The FDIC Indemnification Asset is reviewed quarterly and adjusted for any changes in expected cash flows based on recent performance and expectations for future performance of the covered portfolio. These adjustments are measured on the same basis as the related covered loans and covered OREO. Any increases in cash flow of the covered assets over those expected will reduce the FDIC Indemnification Asset and any decreases in cash flow of the covered assets under those expected will increase the FDIC Indemnification Asset. Any amortization of changes in value is limited to the contractual term of the loss-share agreements. Increases and decreases to the FDIC Indemnification Asset are recorded as adjustments to noninterest income within the consolidated statements of operations over the life of the loss-share agreements.

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

Covered Other Real Estate Owned

Acquired OREO subject to FDIC loss-share agreements is referred to as covered OREO and reported separately in the consolidated balance sheets. Covered OREO is reported exclusive of expected reimbursement cash flows from the FDIC. Foreclosed covered loan collateral is transferred into covered OREO at the collateral's fair value, less selling costs. Covered OREO was initially recorded at its estimated fair value based on similar market comparable valuations, less estimated selling costs. Subsequently, loan collateral transferred to OREO is recorded at its net realizable value. Any subsequent valuation adjustments due to declines in fair value of the covered OREO will be charged to noninterest expense, and will be partially offset by noninterest income representing the corresponding increase to the FDIC Indemnification Asset for loss reimbursements. Any recoveries of previous valuation decreases will be credited to noninterest expense with a corresponding charge to noninterest income for the portion of the recovery that is due to the FDIC.

Other Real Estate Owned

Real estate acquired through foreclosure is included in other assets within the consolidated balance sheets and is carried at management's estimate of fair value less costs to sell. Any excess of recorded investment over fair value less cost to sell is charged against the allowance for loan losses when property is initially transferred to OREO. Subsequent to the initial transfer to OREO, valuation adjustments are charged against earnings. Valuation adjustments, revenue and expenses from operations of the properties and resulting gains or losses on sale are included in other noninterest expense within the consolidated statements of operations.

Debt Issuance Costs

The Company capitalizes debt issuance costs associated with financing of debt. These costs are amortized on a straight-line basis, which approximates the effective interest method, over the repayment term of the loans. Debt issuance costs of \$2.3 million, \$0.2 million and \$0.4 million in 2013, 2012 and 2011 were amortized and included in interest expense within the consolidated statements of operations. In November 2013, the total remaining unamortized balance of \$2.1 million was expensed as a result of the redemption of all outstanding 7.5% Senior Exchangeable Notes due 2025 (the Notes), as further described in Note 13 to the consolidated financial statements. In 2011, an additional \$0.2 million of the unamortized balance was written down as a result of NLC purchasing \$6.9 million of the Notes in the open market.

Goodwill

Goodwill, which represents the excess of cost over the fair value of the net assets acquired, is allocated to reporting units and tested for impairment annually, or whenever events or changes in circumstances indicate that the carrying amount should be assessed. The Company

performs required annual impairment tests of its goodwill and other intangible assets as of October 1st for each of its reporting units. Prior to testing goodwill for impairment, the Company has the option to assess on a qualitative basis whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If determined, based on its assessment of qualitative factors that it is more likely than not that fair value of a reporting unit is less than its carrying amount, the Company will proceed to test goodwill for impairment as a part of a two-step process. First, the Company determines the fair value of a reporting unit and compares it to its carrying amount. Second, if the carrying amount of a reporting unit exceeds its fair value, an impairment loss is recognized for any excess of the carrying amount of the reporting unit's goodwill over the implied fair value of that goodwill. The implied fair value of goodwill is determined by allocating the fair value of the reporting unit in a manner similar to a purchase price allocation. The residual fair value after this allocation is the implied fair value of the reporting unit goodwill.

Intangibles and Other Long-Lived Assets

Intangible assets are acquired assets that lack physical substance but can be distinguished from goodwill because of contractual or other legal rights or because the asset is capable of being sold or exchanged either on its own or in combination with a related contract, asset or liability. The Company's intangible assets primarily relate to core deposits, trade names, customer and agent relationships and noncompete agreements. Intangible assets with definite useful lives are generally amortized on the straight-line method over their estimated lives, although certain intangibles, including core deposits and customer and agent relationships, are amortized on an accelerated basis. Amortization of intangible assets is recorded in other

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

noninterest expense within the consolidated statements of operations. Intangible assets with indefinite useful lives are tested for impairment annually, or more often if events or circumstances indicate there may be impairment, and not amortized until their lives are determined to be definite. Intangible assets with definite useful lives, premises and equipment, and other long-lived assets are tested for impairment whenever events or changes in circumstances indicate the carrying amount of the assets may not be recoverable from future undiscounted cash flows. If impaired, the assets are recorded at fair value.

Mortgage Servicing Rights

The Company determines its classes of residential mortgage servicing assets based on the asset type being serviced along with the methods used to manage the risk inherent in the servicing assets, which includes the market inputs used to value the servicing assets. The Company measures its servicing assets at fair value and reports changes in fair value through earnings. Fair value adjustments that encompass market-driven valuation changes and the runoff in value that occurs from the passage of time are each separately reported.

Retained mortgage servicing rights (MSR) are measured at fair value as of the date of sale of the related mortgage loan. Subsequent fair value measurements are determined using a discounted cash flow model. In order to determine the fair value of the MSR, the present value of expected future cash flows is estimated. Assumptions used include market discount rates, anticipated prepayment speeds, delinquency and foreclosure rates, and ancillary fee income.

The model assumptions and the MSR fair value estimates are compared to observable trades of similar portfolios as well as to MSR broker valuations and industry surveys, as available. The expected life of the loan can vary from management's estimates due to prepayments by borrowers, especially when rates fall. Prepayments in excess of management's estimates would negatively impact the recorded value of the MSR. The value of the MSR is also dependent upon the discount rate used in the model, which is based on current market rates. Management reviews this rate on an ongoing basis based on current market rates. A significant increase in the discount rate would reduce the value of the MSR.

Derivative Financial Instruments

The Company's hedging policies permit the use of various derivative financial instruments, including interest rate lock commitments (IRLCs), forward commitments and interest rate swaps, to manage interest rate risk or to hedge specified assets and liabilities. The IRLCs and forward commitments meet the definition of a derivative under the provisions of the Derivatives and Hedging Topic of the ASC.

Derivatives are recorded at fair value in the consolidated balance sheets. To qualify for hedge accounting, derivatives must be highly effective at reducing the risk associated with the exposure being hedged and must be designated as a hedge at the inception of the derivative contract. If derivative instruments are designated as hedges of fair values, the change in the fair value of both the derivative instrument and the hedged item

are included in current earnings. Changes in the fair value of derivatives designated as hedges of cash flows are recorded in other comprehensive income (loss). Actual cash receipts and/or payments and related accruals on derivatives related to hedges are recorded as adjustments to the line item where the hedged item's effect on earnings is recorded.

Reserve for Losses and Loss Adjustment Expenses

The liability for losses and LAE includes an amount determined from loss reports and individual cases and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on estimates and, while management believes that the amount is adequate, the ultimate liability may be in excess of or less than the amounts provided. The methods for making such estimates and for establishing the resulting liability are continually reviewed, and any adjustments are reflected in earnings currently. The liability for losses and loss adjustment expenses has not been reduced for reinsurance recoverable.

F-17

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

Loss Contingencies

Loss contingencies, including claims and legal actions arising in the ordinary course of business, are recorded as liabilities when the likelihood of loss is probable and an amount or range of loss can be reasonably estimated.

Stock-Based Compensation

Stock-based compensation expense for all share-based awards granted is based on the grant date fair value estimated in accordance with the provisions of the Stock Compensation Topic of the ASC. The Company recognizes these compensation costs for only those awards expected to vest over the service period of the award.

Advertising

Advertising costs are expensed as incurred. Advertising expense totaled \$5.3 million, \$0.4 million and \$34 thousand during 2013, 2012 and 2011, respectively.

Income Taxes

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recorded for the estimated future tax effects of the temporary difference between the tax basis and book basis of assets and liabilities reported in the accompanying consolidated balance sheets. The provision for income tax expense or benefit differs from the amounts of income taxes currently payable because certain items of income and expense included in the consolidated financial statements are recognized in different time periods by taxing authorities. Interest and penalties incurred related to tax matters are charged to other interest expense or other noninterest expense, respectively.

Benefits from uncertain tax positions are recognized in the consolidated financial statements only when it is more likely than not that the tax position will be sustained upon examination by the appropriate taxing authority having full knowledge of all relevant information. A tax position that meets the more-likely-than-not recognition threshold is measured at the largest amount of cumulative benefit that is greater than fifty percent likely of being realized upon ultimate settlement. Tax positions that previously failed to meet the more-likely-than-not recognition threshold are recognized in the reporting period in which that threshold is met. Previously recognized tax positions that no longer meet the more-likely-than-not recognition threshold are derecognized in the reporting period in which that threshold is no longer met. The Company has

not recorded any significant liabilities for uncertain tax positions.

Deferred tax assets, including net operating loss and tax credit carry forwards, are reduced by a valuation allowance when, in the opinion of management, it is more-likely-than-not that any portion of these tax attributes will not be realized.

Cash Flow Reporting

For the purpose of presentation in the consolidated statements of cash flows, cash and cash equivalents are defined as the amount included in the consolidated balance sheets caption Cash and due from banks and the portion of the amount in the caption Federal funds sold and securities purchased under agreements to resell that represents federal funds sold. Cash equivalents have original maturities of three months or less.

Basic and Diluted Net Income (Loss) Per Share

Nonvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents are participating securities and are included in the computation of earnings per share pursuant to the two-class method prescribed by the Earnings Per Share Topic of the ASC. The two-class method is an earnings allocation formula that determines earnings per share for each class of common stock and participating security according to dividends declared (or accumulated) and participation rights in undistributed earnings. In May 2013, as discussed in Note 20 to the consolidated financial statements, Hilltop issued restricted stock awards which qualify as participating securities.

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

Net earnings, less any preferred dividends accumulated for the period (whether or not declared), is allocated between the common stock and participating securities pursuant to the two-class method. Basic earnings per common share is computed by dividing net earnings available to common shareholders by the weighted average number of common shares outstanding during the period, excluding participating nonvested restricted shares.

Diluted earnings per common share is computed in a similar manner, except that first the denominator is increased to include the number of additional common shares that would have been outstanding if potentially dilutive common shares, excluding the participating securities, were issued using the treasury stock method. For all periods presented, stock options and redemption of the Notes are the only potentially dilutive non-participating instruments issued by Hilltop. Next, we determine and include in the diluted earnings per common share calculation the more dilutive effect of the participating securities using the treasury stock method or the two-class method. Undistributed losses are not allocated to the nonvested share-based payment awards (the participating securities) under the two-class method as the holders are not contractually obligated to share in the losses of the Company.

2. Acquisitions

FNB Transaction

On the Bank Closing Date, the Bank assumed substantially all of the liabilities, including all of the deposits, and acquired substantially all of the assets of FNB from the FDIC in an FDIC-assisted transaction. As part of the P&A Agreement, the Bank and the FDIC entered into loss-share agreements covering future losses incurred on certain acquired loans and OREO. The Company refers to acquired commercial and single family residential loan portfolios and OREO that are subject to the loss-share agreements as *covered loans* and *covered OREO*, respectively, and these assets are presented as separate line items in the Company's consolidated balance sheet. Collectively, covered loans and covered OREO are referred to as *covered assets*. Pursuant to the loss-share agreements, the FDIC has agreed to reimburse the Bank the following amounts with respect to the covered assets pursuant to the loss-share agreements: (i) 80% of losses on the first \$240.4 million of losses incurred; (ii) 0% of losses in excess of \$240.4 million up to and including \$365.7 million of losses incurred; and (iii) 80% of losses in excess of \$365.7 million of losses incurred. The loss-share agreements for commercial and single family residential loans are in effect for 5 years and 10 years, respectively, from the Bank Closing Date and the loss recovery provisions to the FDIC are in effect for 8 years and 10 years, respectively, from the Bank Closing Date.

In accordance with the loss-share agreements, the Bank may be required to make a *true-up* payment to the FDIC approximately ten years following the Bank Closing Date if the FDIC's initial estimate of losses on covered assets is greater than the actual realized losses. The *true-up* payment is calculated using a defined formula set forth in the P&A Agreement.

The operations of FNB are included in the Company's operating results beginning September 14, 2013. For the period from September 14, 2014 through December 31, 2013, FNB's operations include net interest income of \$32.0 million, other revenues of \$20.4 million and net income of

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

\$18.5 million. Such operating results include a preliminary bargain purchase gain of \$12.6 million, before taxes of \$4.5 million, and are not necessarily indicative of future operating results. FNB's results of operations prior to the Bank Closing Date are not included in the Company's consolidated operating results.

Transaction-related expenses of \$0.1 million associated with the FNB Transaction are included in noninterest expense within the consolidated statement of operations for the year ended December 31, 2013. Such expenses were for professional services and other incremental costs associated with the integration of FNB's operations.

The FNB Transaction was accounted for using the purchase method of accounting and, accordingly, purchased assets, including identifiable intangible assets and assumed liabilities, were recorded at their respective Bank Closing Date fair values using significant estimates and assumptions to value certain identifiable assets acquired and liabilities assumed. During the quarter ended December 31, 2013, the estimated fair values of certain identifiable assets acquired and liabilities assumed as of the Bank Closing Date were adjusted as a result of additional information obtained primarily related to the fair values of loans, covered OREO, FDIC Indemnification Asset, premises and equipment and other intangible assets. Due to the short time period between the Bank Closing Date and December 31, 2013, the real estate appraisal validation exercise remains outstanding and the Bank Closing Date valuations related to covered OREO and FDIC Indemnification Asset are considered preliminary and could differ significantly when finalized. The amounts are also subject to adjustments based upon final settlement with the FDIC. The terms of the P&A Agreement provide for the FDIC to indemnify the Bank against claims

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

with respect to liabilities and assets of FNB or any of its affiliates not assumed or otherwise purchased by the Bank and with respect to certain other claims by third parties.

A summary of the net assets received from the FDIC in the FNB Transaction and the estimated fair value adjustments resulting in the bargain purchase gain are presented below (in thousands).

Cost basis net assets on September 13, 2013	\$	215,000
Cash payment received from the FDIC		45,000
Fair value adjustments:		
Securities		(3,341)
Loans		(343,068)
Premises and equipment		3,565
Other real estate owned		(79,273)
FDIC indemnification asset		185,680
Other intangible assets		4,270
Deposits		(8,282)
Other		(6,966)
Bargain purchase gain	\$	12,585

In FDIC-assisted transactions, only certain assets and liabilities are transferred to the acquirer and, depending on the nature and amount of the acquirer's bid, the FDIC may be required to make a cash payment to the acquirer or the acquirer may be required to make a payment to the FDIC. In the FNB Transaction, cost basis net assets of \$215.0 million and an initial cash payment received from the FDIC of \$45.0 million were transferred to the Bank. This initial cash payment from the FDIC is subject to adjustment and settlement. The bargain purchase gain represents the excess of the estimated fair value of the assets acquired over the estimated fair value of the liabilities assumed.

The FDIC bid form provided a list of properties (branches and support facilities) owned by FNB for sale at fixed prices. The Bank purchased 44 properties owned by FNB in connection with its bid for an aggregate purchase price of \$59.5 million. For those properties owned by FNB that the Bank declined to purchase in its bid, the Bank had exclusive options to purchase those properties following the Bank Closing Date. In connection with those options, the Bank purchased an additional seven properties owned by FNB, for an aggregate purchase price of \$4.9 million. The Bank also had an option to assume the leases of properties leased by FNB. The Bank was required to purchase all data management equipment and, other certain special assets, furniture, fixtures and equipment, in each case at an appraised value at any properties purchased or leased by the Bank. The Bank paid \$10.3 million to the FDIC for furniture, fixtures and data management equipment. The Bank is required to pay rent to the FDIC on properties owned or leased by FNB and furniture and equipment at such properties until it surrenders such properties to the FDIC.

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

The resulting fair values of the identifiable assets acquired, and liabilities assumed, of FNB at September 13, 2013 are summarized in the following table (in thousands).

Cash and due from banks	\$	362,695
Securities		286,214
Non-covered loans		42,884
Covered loans		1,116,583
Premises and equipment		78,399
FDIC indemnification asset		185,680
Covered other real estate owned		135,187
Other assets		26,300
Other intangible assets		4,270
Total identifiable assets acquired		2,238,212
Deposits		(2,211,740)
Other liabilities		(13,887)
Total liabilities assumed		(2,225,627)
Net identifiable assets acquired/bargain purchase gain	\$	12,585

The Bank acquired loans both with and without evidence of credit quality deterioration since origination. Based on purchase date valuations, the Bank's portfolio of acquired loans had a fair value of \$1.2 billion as of the Bank Closing Date, with no carryover of any allowance for loan losses. Acquired loans were segregated between those considered to be PCI loans and those without credit impairment at acquisition. The following table presents details on acquired loans at the Bank Closing Date (in thousands).

	Loans, excluding PCI Loans	PCI Loans	Total Loans
Commercial and industrial	\$ 47,874	\$ 47,751	\$ 95,625
Real estate	242,998	611,219	854,217
Construction and land development	26,669	158,247	184,916
Consumer	19,095	5,614	24,709
Total	\$ 336,636	\$ 822,831	\$ 1,159,467

The following table presents information about the acquired PCI loans at the Bank Closing Date (in thousands).

Contractually required principal and interest payments	\$	1,533,667
Nonaccretable difference		542,241
Cash flows expected to be collected		991,426
Accretable difference		168,595
Fair value of covered loans acquired with a deterioration of credit quality	\$	822,831

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

The following table presents information about the acquired loans without credit impairment at the Bank Closing Date (in thousands).

Contractually required principal and interest payments	\$	466,754
Contractual cash flows not expected to be collected		43,783
Fair value at acquisition		336,636

Notes to Consolidated Financial Statements (continued)

PlainsCapital Merger

After the close of business on November 30, 2012, Hilltop acquired PlainsCapital Corporation in a stock and cash transaction. PlainsCapital Corporation merged with and into a wholly owned subsidiary, which continued as the surviving entity under the name PlainsCapital Corporation. Based on Hilltop's closing stock price on November 30, 2012, the total purchase price was \$813.5 million, consisting of 27.1 million shares of common stock, \$311.8 million in cash and the issuance of 114,068 shares of Hilltop Non-Cumulative Perpetual Preferred Stock, Series B (the Hilltop Series B Preferred Stock) in exchange on a one-for-one basis for the outstanding shares of PlainsCapital Non-Cumulative Perpetual Preferred Stock, Series C, all of which were held by the United States Department of the Treasury (the U.S. Treasury). The fair value of assets acquired, excluding goodwill, totaled \$6.5 billion, including \$3.2 billion of loans, \$730.8 million of investment securities and \$70.7 million of identifiable intangibles. The fair value of the liabilities assumed was \$5.9 billion, including \$4.5 billion of deposits.

The PlainsCapital Merger was accounted for using the purchase method of accounting, and accordingly, purchased assets, including identifiable intangible assets, and assumed liabilities were recorded at their respective acquisition date fair values. The components of the consideration paid are shown in the following table (in thousands).

Fair value of consideration paid:		
Common stock issued	\$	387,584
Preferred stock issued		114,068
Cash		311,805
Total consideration paid	\$	813,457

The resulting fair values of the identifiable assets acquired, and liabilities assumed, of PlainsCapital at December 1, 2012 are summarized in the following table (in thousands).

Cash and due from banks	\$	393,132
Federal funds sold and securities purchased agreements to resell		84,352
Securities		730,779
Loans held for sale		1,520,833
Loans, net		3,195,309
Broker-dealer and clearing organization receivables		149,457
Premises and equipment		96,886
Other intangible assets		70,650
Other assets		241,876
Total identifiable assets acquired		6,483,274
Deposits		4,463,069
Broker-dealer and clearing organization payables		263,894
Short-term borrowings		914,062

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

Notes payable	10,855
Junior subordinated debentures	67,012
Other liabilities	180,998
Total liabilities assumed	5,899,890
Net identifiable assets acquired	583,384
Goodwill resulting from the acquisition	230,073
Net assets acquired	\$ 813,457

For further information regarding goodwill recorded in connection with the PlainsCapital Merger, refer to Note 9, Goodwill and Other Intangible Assets.

Contractual cash flows not expected to be collected	92,526
Fair value at acquisition	3,022,445

Pro Forma Results of Operations

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

The purchase of assets and assumption of certain liabilities of FNB from the FDIC, as receiver, was significant at a level to require disclosure of historical financial statements and related pro forma financial disclosure. An essential part of the transaction is the federal financial assistance governed by the P&A Agreement with the FDIC, which is not reflective of the previous operations of FNB. The nature and magnitude of the FNB Transaction, coupled with the federal assistance, substantially reduces the relevance of historical financial information of FNB when considering the assessment of the historical financial information relative to future operations. Because the Company believes that the continuity of FNB's historical operations is substantially lacking after the FNB Transaction and pro forma information is not reasonably available, the Company has omitted certain historical financial information and the related pro forma financial information of FNB pursuant to the guidance provided in Staff Accounting Bulletin Topic 1.K, Financial Statements of Acquired Troubled Financial Institutions (SAB 1:K), and a request for relief granted by the SEC. SAB 1:K provides relief from the requirements of Rule 3-05 of Regulation S-X in certain instances, such as the FNB Transaction, where a registrant engages in an acquisition of a significant amount of assets of a troubled financial institution that involves pervasive federal assistance and audited financial statements of the troubled financial institution are not reasonably available. Therefore, no additional historical pro forma information regarding FNB is provided below.

The results of operations acquired in the PlainsCapital Merger have been included in the Company's consolidated financial results since December 1, 2012. The following table discloses the impact of PlainsCapital (excluding the impact of acquisition-related merger and restructuring charges discussed below) since the acquisition date through December 31, 2012.

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

The table also presents pro forma results had the PlainsCapital Merger taken place on January 1, 2011 (in thousands), and includes the estimated impact of purchase accounting adjustments. The purchase accounting adjustments reflect the impact of recording the acquired loans at fair value, including the estimated accretion of the purchase discount on the loan portfolio. Accretion estimates were based on the acquisition date purchase discount on the loan portfolio, as it was not practicable to determine the amount of discount that would have been recorded based on economic conditions that existed on January 1, 2011. The pro forma results do not include any potential operating cost savings as a result of the PlainsCapital Merger. Further, certain costs associated with any restructuring or integration activities are also not reflected in the pro forma results. Pro forma results include any acquisition-related merger and restructuring charges incurred during the period. The pro forma results are not indicative of what would have occurred had the PlainsCapital Merger taken place on the indicated date.

	PlainsCapital Acquisition Date through December 31, 2012		Pro Forma Combined Twelve Months Ended December 31, 2012		2011
Net interest income	\$	24,029	\$	221,635	\$ 225,436
Other revenues		70,085		901,347	616,582
Net income		8,361		75,138	63,067

3. Fair Value Measurements

Fair Value Measurements and Disclosures

The Company determines fair values in compliance with The Fair Value Measurements and Disclosures Topic of the ASC (the Fair Value Topic). The Fair Value Topic defines fair value, establishes a framework for measuring fair value in GAAP and expands disclosures about fair value measurements. The Fair Value Topic defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. The Fair Value Topic assumes that transactions upon which fair value measurements are based occur in the principal market for the asset or liability being measured. Further, fair value measurements made under the Fair Value Topic exclude transaction costs and are not the result of forced transactions.

The Fair Value Topic creates a fair value hierarchy that classifies fair value measurements based upon the inputs used in valuing the assets or liabilities that are the subject of fair value measurements. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs, as indicated below.

- **Level 1 Inputs:** Unadjusted quoted prices in active markets for identical assets or liabilities that the Company can access at the measurement date.

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

- *Level 2 Inputs:* Observable inputs other than Level 1 prices. Level 2 inputs include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (e.g., interest rates, yield curves, prepayment speeds, default rates, credit risks, loss severities, etc.), and inputs that are derived from or corroborated by market data, among others.
- *Level 3 Inputs:* Unobservable inputs that reflect an entity's own assumptions about the assumptions that market participants would use in pricing the assets or liabilities. Level 3 inputs include pricing models and discounted cash flow techniques, among others.

Fair Value Option

The Company has elected to measure substantially all of PrimeLending's mortgage loans held for sale at fair value and MSR and certain time deposits at the Bank under the provisions of the Fair Value Option. The Company elected to apply the provisions of the Fair Value Option to these items so that it would have the opportunity to mitigate volatility in reported

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. The Company determines the fair value of the financial instruments accounted for under the provisions of the Fair Value Option in compliance with the provisions of the Fair Value Topic of the ASC discussed above.

At December 31, 2013, the aggregate fair value of PrimeLending's mortgage loans held for sale accounted for under the Fair Value Option was \$1.09 billion, and the unpaid principal balance of those loans was \$1.07 billion. At December 31, 2012, the aggregate fair value of PrimeLending's mortgage loans held for sale accounted for under the Fair Value Option was \$1.40 billion, and the unpaid principal balance of those loans was \$1.36 billion. The interest component of fair value is reported as interest income on loans in the accompanying consolidated statements of operations.

The Company holds a number of financial instruments that are measured at fair value on a recurring basis, either by the application of the Fair Value Option or other authoritative pronouncements. The fair values of those instruments are determined primarily using Level 2 inputs, as further described below. Those inputs include quotes from mortgage loan investors and derivatives dealers, data from independent pricing services and rates paid in the brokered certificate of deposit market.

Cash and Cash Equivalents For cash and due from banks and federal funds sold, the carrying amount is a reasonable estimate of fair value.

Available For Sale Securities Most securities available for sale are reported at fair value using Level 2 inputs. The Company obtains fair value measurements from independent pricing services. As the Company is responsible for the determination of fair value, control processes are designed to ensure that the fair values received from independent pricing services are reasonable and the valuation techniques and assumptions used appear reasonable and consistent with prevailing market conditions. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the financial instruments' terms and conditions, among other things. For public common and preferred equity stocks, the determination of fair value uses Level 1 inputs based on observable market transactions. Regarding the note receivable and warrants, the determination of fair value uses Level 3 inputs such as internal or external fund manager valuations based on unobservable inputs including recent filings, operating results, balance sheet stability, growth and other business and market sector fundamentals.

Trading Securities Trading securities are reported at fair value using either Level 1 or Level 2 inputs in the same manner as discussed previously for securities available for sale.

Loans Held for Sale Mortgage loans held for sale are reported at fair value, as discussed above, using Level 2 inputs that consist of commitments on hand from investors or prevailing market prices. These instruments are held for relatively short periods, typically no more than 30 days. As a result, changes in instrument-specific credit risk are not a significant component of the change in fair value. Mortgage loans that are non-performing, including monitored loans, are reported at fair value using Level 3 inputs. These loans were previously valued using Level 2 inputs. However, refinements made during 2013 to the fair value inputs for these loans resulted in the use of significant unobservable inputs.

Deposits As discussed previously, certain time deposits are reported at fair value by virtue of an election under the provisions of Fair Value Option. Fair values are determined using Level 2 inputs that consist of observable rates paid on instruments of the same tenor in the brokered certificate of deposit market.

Derivatives Derivatives are reported at fair value using either Level 2 or Level 3 inputs. PlainsCapital uses dealer quotes to determine the fair value of interest rate swaps used to hedge time deposits. PrimeLending and FSC use dealer quotes to value forward purchase commitments and forward sale commitments, respectively, executed for both hedging and non-hedging purposes. PrimeLending also issues IRLCs to its customers and FSC issues forward purchase commitments to its clients that are valued based on the change in the fair value of the underlying mortgage loan from inception of the IRLC or purchase commitment to the balance sheet date, adjusted for projected loan closing rates. PrimeLending determines the value of the underlying mortgage loan as discussed in *Loans Held for Sale*, above. FSC determines the value of the underlying mortgage loan from prices of comparable securities used to value forward sale commitments. Additionally, First Southwest entered into a derivative option agreement (*Fee Award Option*).

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

Mortgage servicing asset The mortgage servicing asset is reported at fair value using Level 3 inputs. Fair value is determined by projecting net servicing cash flows, which are then discounted to estimate the fair value. The fair value of the mortgage servicing asset is impacted by a variety of factors, including prepayment assumptions, discount rates, delinquency rates, contractually specified servicing fees, servicing costs and underlying portfolio characteristics.

The following tables present information regarding financial assets and liabilities measured at fair value on a recurring basis (in thousands).

December 31, 2013	Level 1 Inputs	Level 2 Inputs	Level 3 Inputs	Total Fair Value
Cash and cash equivalents	\$ 746,023	\$	\$	\$ 746,023

All net unrealized gains (losses) in the table above are reflected in the accompanying consolidated financial statements. The unrealized gains (losses) relate to financial instruments still held at December 31, 2013. The available for sale securities

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

noted in the table above reflect Hilltop's note receivable and warrant to purchase common stock of SWS Group, Inc. (SWS) as discussed in Note 4 to the consolidated financial statements.

Hilltop's note receivable is valued using a cash flow model that estimates yield based on comparable securities in the market. The interest rate used to discount cash flows is the most significant unobservable input. An increase or decrease in the discount rate would result in a corresponding decrease or increase, respectively, in the fair value measurement of the note receivable.

The warrant is valued utilizing a binomial model. The underlying SWS common stock price and its related volatility, an unobservable input, are the most significant inputs into the model, and, therefore, decreases or increases to the SWS common stock price would result in a significant change in the fair value measurement of the warrant.

Loans held for sale, including monitored mortgage loans, are valued using commitments on hand from investors or prevailing market prices.

The mortgage servicing asset is valued by projecting net servicing cash flows, which are then discounted to estimate the fair value. The fair value of the mortgage servicing asset is impacted by a variety of factors, including prepayment assumptions, discount rates, delinquency rates, contractually specified servicing fees, servicing costs and underlying portfolio characteristics.

Derivative liabilities in the tables above include a Fee Award Option valued using discounted cash flows and probability of exercise.

The Company had no transfers between Levels 1 and 2 during the periods presented.

The following table presents the changes in fair value for instruments that are reported at fair value under the Fair Value Option (in thousands).

	Changes in Fair Value for Assets and Liabilities Reported at Fair Value under Fair Value Option			Year Ended December 31, 2012		
	Net Gains (Losses) from Sale of Loans	Other Noninterest Income	Total Changes in Fair Value	Net Gains (Losses) from Sale of Loans	Other Noninterest Income	Total Changes in Fair Value
Loans held for sale	\$ (19,353)	\$	\$ (19,353)	\$ (3,297)	\$	\$ (3,297)
Mortgage servicing asset	18,069		18,069	190		190
Time deposits		12	12		7	7

The Company also determines the fair value of certain assets and liabilities on a non-recurring basis. In particular, the fair value of all of the assets and liabilities purchased in the PlainsCapital Merger was determined at the acquisition date, while fair value of all assets acquired and liabilities assumed in the FNB Transaction was determined at the Bank Closing Date. In addition, facts and circumstances may dictate a fair value measurement when there is evidence of impairment. Assets and liabilities measured on a non-recurring basis include the items discussed below.

Impaired Loans The Company reports impaired loans based on the underlying fair value of the collateral through specific allowances within the allowance for loan losses. The Company acquired PCI loans with a fair value of \$172.9 million and \$822.8 million upon completion of the PlainsCapital Merger and the FNB Transaction, respectively. Substantially all PCI loans acquired in the FNB Transaction are covered by FDIC loss-share agreements. The fair value of PCI loans was determined using Level 3 inputs, including estimates of expected cash flows that incorporated assumptions regarding default rates, loss severity rates assuming default, prepayment speeds and estimated collateral values. At December 31, 2013, non-covered PCI loans with a carrying amount of \$100.4 million had been reduced by specific allowances within the allowance for non-covered loan losses of \$3.1 million, resulting in a reported value of \$97.3 million that approximates fair value. At December 31, 2013, covered PCI loans with a carrying amount of \$729.2 million had been reduced by specific allowances within the allowance for covered loan losses of \$0.9 million, resulting in a reported value of \$728.3 million.

Other Real Estate Owned The Company reports OREO at fair value less estimated cost to sell. Any excess of recorded investment over fair value, less cost to sell, is charged against the allowance for loan losses when property is initially transferred to OREO. Subsequent to the initial transfer to OREO, downward valuation adjustments are charged against earnings. The Company determines fair value primarily using independent appraisals of OREO properties. The resulting fair value measurements are classified as Level 2 or Level 3 inputs, depending upon the extent to which unobservable inputs determine the fair value measurement. The Company considers a number of factors in determining the extent to which

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

specific fair value measurements utilize unobservable inputs, including, but not limited to, the inherent subjectivity in appraisals, the length of time elapsed since the receipt of independent market price or appraised value, and current market conditions. In the FNB Transaction, the Bank acquired OREO of \$135.2 million, all of which is covered by an FDIC loss-share agreement. At December 31, 2013, the estimated fair value of covered OREO was \$142.8 million, and the underlying fair value measurements utilize Level 3 inputs. The fair value of non-covered OREO at December 31, 2013 and 2012 was \$4.8 million and \$11.1 million, respectively, and is included in other assets within the consolidated balance sheets. During the reported periods, all fair value measurements for non-covered OREO utilized Level 2 inputs.

The Fair Value of Financial Instruments Subsection of the ASC requires disclosure of the fair value of financial assets and liabilities, including the financial assets and liabilities previously discussed. The methods for determining estimated fair value for financial assets and liabilities measured at fair value on a recurring or non-recurring basis are discussed above. For other financial assets and liabilities, the Company utilizes quoted market prices, if available, to estimate the fair value of financial instruments. Because no quoted market prices exist for a significant portion of the Company's financial instruments, the fair value of such instruments has been derived based on management's assumptions with respect to future economic conditions, the amount and timing of future cash flows, and estimated discount rates. Different assumptions could significantly affect these estimates. Accordingly, the estimates provided herein do not necessarily indicate amounts which could be realized in a current transaction. Further, as it is management's intent to hold a significant portion of its financial instruments to maturity, it is not probable that the fair values shown below will be realized in a current transaction.

Because of the wide range of permissible valuation techniques and the numerous estimates which must be made, it may be difficult to make reasonable comparisons of the Company's fair value information to that of other financial institutions. The aggregate estimated fair value amount should in no way be construed as representative of the underlying value of Hilltop and its subsidiaries. The following methods and assumptions are typically used in estimating the fair value disclosures for financial instruments:

Loans The fair value of non-covered and covered loans is estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities.

Broker-Dealer and Clearing Organization Receivables The carrying amount approximates their fair value.

FDIC Indemnification Asset The fair value of the FDIC Indemnification Asset is based on Level 3 inputs, including the discounted value of expected future cash flows under the loss-share agreements. The discount rate contemplates the credit worthiness of the FDIC as counterparty to this asset, and considers an incremental discount rate risk premium reflective of the inherent uncertainty associated with the timing of the cash flows.

Deposit Liabilities The estimated fair value of demand deposits, savings accounts and NOW accounts is the amount payable on demand at the reporting date. The fair value of fixed-maturity certificates of deposit is estimated using the rates currently offered for deposits of similar remaining maturities. The carrying amount for variable-rate certificates of deposit approximates their fair values.

Broker-Dealer and Clearing Organization Payables The carrying amount approximates their fair value.

Short-Term Borrowings The carrying amounts of federal funds purchased, borrowings under repurchase agreements and other short-term borrowings approximate their fair values.

Debt The fair values are estimated using discounted cash flow analysis based on current incremental borrowing rates for similar types of borrowing arrangements.

Available for sale equity securities includes 1,475,387 shares of SWS common stock, a \$50.0 million aggregate principal amount note issued by SWS and a warrant to purchase 8,695,652 shares of SWS common stock. SWS issued the note in July 2011 under a credit agreement pursuant to a senior unsecured loan from Hilltop. The note bears interest at a rate of 8.0% per annum, is prepayable by SWS subject to certain conditions after three years, and has a maturity of five years. The warrant provides for the purchase of 8,695,652 shares of SWS common stock at an exercise price of \$5.75 per share, subject to anti-dilution adjustments. If the warrant was fully exercised, Hilltop would beneficially own 24.4% of SWS.

Information regarding available for sale securities that were in an unrealized loss position is shown in the following table (dollars in thousands).

	December 31, 2013			December 31, 2012

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

During 2013, 2012 and 2011, the Company did not record any other-than-temporary impairments. While all of the investments are monitored for potential other-than-temporary impairment, the Company's analysis and experience indicate that these available for sale investments generally do not present a great risk of other-than-temporary-impairment, as fair value should recover over time. Factors considered in the Company's analysis include the reasons for the unrealized loss position, the severity and duration of the unrealized loss position, credit worthiness, and forecasted performance of the investee. While some of the securities held in the investment portfolio have decreased in value since the date of acquisition, the severity of loss and the duration of the loss position are not believed to be significant enough to warrant other-than-temporary impairment of the securities. The Company does not intend, nor is it likely that the Company will be required, to sell these securities before the recovery of the cost basis. Therefore, management does not believe any other-than-temporary impairments exist at December 31, 2013.

Expected maturities may differ from contractual maturities because certain borrowers may have the right to call or prepay obligations with or without penalties. The amortized cost and fair value of securities, excluding trading and available for sale equity securities and the available for sale warrant, at December 31, 2013 are shown by contractual maturity below (in thousands).

	Amortized Cost	Fair Value
Due in one year or less	\$ 125,804	\$ 125,881
Due after one year through five years	115,950	125,245
Due after five years through ten years	70,173	70,280
Due after ten years	727,671	666,206
	1,039,598	987,612
Residential mortgage-backed securities	59,936	60,087
Collateralized mortgage obligations	124,502	120,461
Commercial mortgage-backed securities	691	760
	\$ 1,224,727	\$ 1,168,920

The Company realized net losses from its trading securities portfolio of \$2.8 million and \$0.7 million during the year ended December 31, 2013 and the month of December 31, 2012, respectively, which are recorded as a component of other noninterest income within the consolidated statements of operations.

Securities with a carrying amount of \$1.0 billion and \$635.2 million (with a fair value of \$938.1 million and \$633.4 million) at December 31, 2013 and 2012, respectively, were pledged to secure public and trust deposits, federal funds purchased and securities sold under agreements to repurchase, and for other purposes as required or permitted by law.

Mortgage-backed securities and collateralized mortgage obligations consist principally of Government National Mortgage Association (GNMA), Federal National Mortgage Association (FNMA) and Federal Home Loan Mortgage Corporation (FHLMC) pass-through and participation certificates. GNMA securities are guaranteed by the full faith and credit of the United States, while FNMA and FHLMC securities are fully guaranteed by those respective United States government-sponsored agencies, and conditionally guaranteed by the full faith and credit of the United States.

At December 31, 2013 and 2012, NLC had investments on deposit in custody for various state insurance departments with carrying values of \$9.4 million and \$9.3 million, respectively.

5. Non-Covered Loans and Allowance for Non-Covered Loan Losses

Non-covered loans refer to loans not covered by the FDIC loss-share agreements. The non-covered loan portfolio at December 31, 2013 includes loans acquired as a part of the FNB Transaction totaling \$53.4 million, of which \$7.2 million are categorized as non-covered PCI loans. Covered loans are discussed in Note 6 to the consolidated financial statements. Non-covered loans summarized by portfolio segment are as follows (in thousands).

	December 31,	
	2013	2012
Commercial and industrial	\$ 1,637,266	\$ 1,660,293
Real estate	1,457,253	1,184,914
Construction and land development	364,551	280,483
Consumer	55,576	26,706
	3,514,646	3,152,396
Allowance for non-covered loan losses	(33,241)	(3,409)
Total non-covered loans, net of allowance	\$ 3,481,405	\$ 3,148,987

The Bank has lending policies in place with the goal of establishing an asset portfolio that will provide a return on stockholders' equity sufficient to maintain capital to assets ratios that meet or exceed established regulations. Loans are underwritten with careful consideration of the borrower's financial condition, the specific purpose of the loan, the primary sources of repayment and any collateral pledged to secure the loan.

Underwriting procedures address financial components based on the size or complexity of the credit. The financial components include, but are not limited to, current and projected cash flows, shock analysis and/or stress testing, and trends in appropriate balance sheet and statement of operations ratios. Collateral analysis includes a complete description of the collateral, as well as determining values, monitoring requirements, loan to value ratios, concentration risk, appraisal requirements and other information relevant to the collateral being pledged. Guarantor analysis includes liquidity and cash flow analysis based on the significance the guarantors are expected to serve as secondary repayment sources. The Bank's underwriting standards are governed by adherence to its loan policy. The loan policy provides for specific guidelines by portfolio segment, including commercial and industrial, real estate, construction and land development, and consumer loans. Within each individual portfolio segment, permissible and impermissible loan types are explicitly outlined. Within the loan types, minimum requirements for the underwriting factors listed above are provided.

The Bank maintains a loan review department that reviews credit risk in response to both external and internal factors that potentially impact the performance of either individual loans or the overall loan portfolio. The loan review process reviews the creditworthiness of borrowers and determines compliance with the loan policy. The loan review process complements and reinforces the risk identification and assessment decisions made by lenders and credit personnel. Results of these reviews are presented to management and the Bank's Board of Directors.

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

In connection with the PlainsCapital Merger and the FNB Transaction, the Company acquired non-covered loans both with and without evidence of credit quality deterioration since origination. The following table presents the carrying values and the outstanding balances of the non-covered PCI loans (in thousands).

		December 31,		
		2013		2012
Carrying amount	\$	100,392	\$	166,780
Outstanding balance		141,983		222,674

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

Changes in the accretable yield for the non-covered PCI loans were as follows (in thousands).

	Year Ended December 31, 2013	Month Ended December 31, 2012
Balance, beginning of period	\$ 17,553	\$ 18,427
Additions	622	
Increases in expected cash flows	18,793	
Disposals of loans	(3,692)	(22)
Accretion	(15,675)	(852)
Balance, end of period	\$ 17,601	\$ 17,553

Impaired loans exhibit a clear indication that the borrower's cash flow may not be sufficient to meet principal and interest payments, which is generally when a loan is 90 days past due unless the asset is both well secured and in the process of collection. Non-covered impaired loans include non-accrual loans, troubled debt restructurings (TDRs), PCI loans and partially charged-off loans.

Non-covered PCI loans are summarized by class in the following tables (in thousands). In addition to the non-covered PCI loans, there were \$4.1 million of additional non-covered impaired loans at December 31, 2013. There were no impaired loans at December 31, 2012 other than PCI loans.

	\$	133,588

Non-covered non-accrual loans at December 31, 2013, excluding those classified as held for sale, are summarized by class in the following table (in thousands).

Commercial and industrial:		
Secured	\$	15,430
Unsecured		1,300
Real estate:		
Secured by commercial properties		2,638
Secured by residential properties		398
Construction and land development:		
Residential construction loans		
Commercial construction loans and land development		112
Consumer		
	\$	19,878

At December 31, 2013, non-covered non-accrual loans included non-covered PCI loans of \$15.8 million for which discount accretion has been suspended because the extent and timing of cash flows from these non-covered PCI loans can no longer be reasonably estimated. All non-covered PCI loans at December 31, 2012 were considered to be performing due to the application of the accretion method. In addition to the non-covered non-accrual loans in the table above, \$3.5 million and \$1.8 million of real estate loans secured by residential properties and classified as held for sale were in non-accrual status at December 31, 2013 and 2012, respectively.

Interest income recorded on accruing impaired loans was \$17.7 million and \$0.9 million for the year ended December 31, 2013 and the month ended December 31, 2012, respectively. Interest income recorded on non-accrual loans in 2013 and 2012 was nominal.

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

The Bank classifies loan modifications as TDRs when it concludes that it has both granted a concession to a debtor and that the debtor is experiencing financial difficulties. Loan modifications are typically structured to create affordable payments for the debtor and can be achieved in a variety of ways. The Bank modifies loans by reducing interest rates and/or lengthening loan amortization schedules. The Bank also reconfigures a single loan into two or more loans (A/B Note). The typical A/B Note restructure results in a bad loan which is charged off and a good loan or loans the terms of which comply with the Bank's customary underwriting policies. The debt charged off on the bad loan is not forgiven to the debtor.

Management tracks credit quality trends on a quarterly basis related to: (i) past due levels, (ii) non-performing asset levels, (iii) classified loan levels, (iv) net charge-offs, and (v) general economic conditions in the state and local markets.

The Bank utilizes a risk grading matrix to assign a risk grade to each of the loans in its portfolio. A risk rating is assigned based on an assessment of the borrower's management, collateral position, financial capacity, and economic factors. The general characteristics of the various risk grades are described below.

Pass Pass loans present a range of acceptable risks to the Bank. Loans that would be considered virtually risk-free are rated Pass low risk. Loans that exhibit sound standards based on the grading factors above and present a reasonable risk to the Bank are rated Pass normal risk. Loans that exhibit a minor weakness in one or more of the grading criteria but still present an acceptable risk to the Bank are rated Pass high risk.

Notes to Consolidated Financial Statements (continued)

Special Mention Special Mention loans have potential weaknesses that deserve management's close attention. If left uncorrected, these potential weaknesses may result in a deterioration of the repayment prospects for the loans and weaken the Bank's credit position at some future date. Special Mention loans are not adversely classified and do not expose the Bank to sufficient risk to require adverse classification.

Substandard Substandard loans are inadequately protected by the current sound worth and paying capacity of the obligor or the collateral pledged, if any. Loans so classified must have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the Bank will sustain some loss if the deficiencies are not corrected. Many substandard loans are considered impaired.

PCI PCI loans exhibited evidence of credit deterioration at acquisition that made it probable that all contractually required principal payments would not be collected.

The following tables present the internal risk grades of non-covered loans, as previously described, in the portfolio by class (in thousands).

The allowance for loan losses is a reserve established through a provision for loan losses charged to expense, which represents management's best estimate of probable losses inherent in the existing portfolio of loans. Management has responsibility for determining the level of the allowance for loan losses, subject to review by the Audit Committee of the Company's board of directors and the Loan Review Committee of the Bank's board of directors.

It is management's responsibility at the end of each quarter, or more frequently as deemed necessary, to analyze the level of the allowance for loan losses to ensure that it is appropriate for the estimated credit losses in the portfolio consistent with the Interagency Policy Statement on the Allowance for Loan and Lease Losses and the Receivables and Contingencies Topics of the ASC. Estimated credit losses are the probable current amount of loans that the Company will be unable to collect given facts and circumstances as of the evaluation date. When management determines that a loan or portion thereof is uncollectible, the loan, or portion thereof, is charged off against the allowance for loan losses. Any subsequent recovery of charged-off loans is added back to the allowance for loan losses. Commencing with the PlainsCapital Merger on November 30, 2012, the Bank's loan portfolio is designated into two populations: acquired loans and originated loans. The allowance for loan losses is calculated separately for the acquired and originated loans.

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

Originated Loans

The Company has developed a methodology that seeks to determine an allowance within the scope of the Receivables and Contingencies Topics of the ASC. Each of the loans that has been determined to be impaired is within the scope of the Receivables Topic. Impaired loans that are equal to or greater than \$0.5 million are individually evaluated for impairment using one of three impairment measurement methods as of the evaluation date: (1) the present value of expected future discounted cash flows on the loan, (2) the loan's observable market price, or (3) the fair value of the collateral if the loan is collateral dependent. Specific reserves are provided in the estimate of the allowance based on the measurement of impairment under these three methods, except for collateral dependent loans, which require the fair value method. All non-impaired loans are within the scope of the Contingencies Topic. Estimates of loss for the Contingencies Topic are calculated based on historical loss experience by loan portfolio segment adjusted for changes in trends, conditions, and other relevant factors that affect repayment of loans as of the evaluation date. While historical loss experience provides a reasonable starting point for the analysis, historical losses, or recent trends in losses, are not the sole basis upon which to determine the appropriate level for the allowance for loan losses. Management considers recent qualitative or environmental factors that are likely to cause estimated credit losses associated with the existing portfolio to differ from historical loss experience, including but not limited to: changes in lending policies and procedures; changes in underwriting standards; changes in economic and business conditions and developments that affect the collectability of the portfolio; the condition of various market segments; changes in the nature and volume of the portfolio and in the terms of loans; changes in lending management and staff; changes in the volume and severity of past due loans, the volume of non-accrual loans, and the volume and severity of adversely classified or graded loans; changes in the loan review system; changes in the value of underlying collateral for collateral-dependent loans; and any concentrations of credit and changes in the level of such concentrations.

The loan review program is designed to identify and monitor problem loans by maintaining a credit grading process, requiring that timely and appropriate changes be made to reviewed loans and coordinating the delivery of the information necessary to assess the appropriateness of the allowance for loan losses. Loans are evaluated for impaired status when: (i) payments on the loan are delayed, typically by 90 days or more (unless the loan is both well secured and in the process of collection), (ii) the loan becomes classified, (iii) the loan is being reviewed in the normal course of the loan review scope, or (iv) the loan is identified by the servicing officer as a problem.

Homogeneous loans, such as consumer installment loans, residential mortgage loans and home equity loans, are not individually reviewed and are generally risk graded at the same levels. The risk grade and reserves are established for each homogeneous pool of loans based on the expected net charge-offs from current trends in delinquencies, losses or historical experience and general economic conditions. At December 31, 2013 and 2012, there were no material delinquencies in these types of loans.

Acquired Loans

Loans acquired in a business combination are recorded at their estimated fair value on their purchase date and with no carryover of the related allowance for loan losses. Loans without evidence of credit impairment at acquisition are subsequently evaluated for any required allowance at each reporting date. An allowance for loan losses is calculated using a methodology similar to that described above for originated loans. The allowance as determined for each loan collateral type is compared to the remaining fair value discount for that loan collateral type. If greater, the

excess is recognized as an addition to the allowance through a provision for loan losses. If less than the discount, no additional allowance is recorded. Charge-offs and losses first reduce any remaining fair value discount for the loan and once the discount is depleted, losses are applied against the allowance established for that loan.

PCI loans acquired in the PlainsCapital Merger are accounted for on an individual loan basis, while PCI loans acquired in the FNB Transaction are accounted for both in pools and at the individual loan level. Cash flows expected to be collected are recast quarterly for each loan or pool. These evaluations require the continued use and updating of key assumptions and estimates such as default rates, loss severity given default and prepayment speed assumptions, similar to those used for the initial fair value estimate. Management judgment must be applied in developing these assumptions. If expected cash flows for a loan or pool decreases, an increase in the allowance for loan losses is made through a charge to the provision for loan losses. If expected cash flows for a loan or pool increase, any previously established allowance for loan losses is reversed and any remaining difference increases the accretable yield which will be taken into income over the remaining life of the loan.

Notes to Consolidated Financial Statements (continued)

6. Covered Assets and Indemnification Asset

As discussed in Note 2 to the consolidated financial statements, the Bank assumed substantially all of the liabilities, including all of the deposits, and acquired substantially all of the assets of FNB in an FDIC-assisted transaction on September 13, 2013. As part of the loss-share agreements entered into by the Bank with the FDIC in connection therewith, the Bank and the FDIC agreed to share the losses on loans and OREO covered under the agreements. The asset arising from the loss-share agreements, which we refer to as the FDIC Indemnification Asset, is measured separately from the covered loan portfolio because the agreements are not contractually embedded in the covered loans and are not transferable should the Bank choose to dispose of the covered loans.

In accordance with the loss-share agreements, the Bank may be required to make a true-up payment to the FDIC, approximately ten years following the Bank Closing Date, if the FDIC's initial estimate of losses on covered assets is greater than the actual realized losses. The true-up payment is calculated using a defined formula set forth in the P&A Agreement.

Covered Loans and Allowance for Covered Loan Losses

Loans acquired in a FDIC-assisted acquisition that are subject to a loss-share agreement are referred to as covered loans and reported separately in the consolidated balance sheets. Covered loans are reported exclusive of the cash flow reimbursements that may be received from the FDIC.

Based on purchase date valuations, the Bank's portfolio of acquired covered loans had a fair value of \$1.1 billion as of the Bank Closing Date, with no carryover of any allowance for loan losses. Acquired covered loans were preliminarily segregated between those considered to be PCI loans and those without credit impairment at acquisition.

In connection with the FNB Transaction, the Bank acquired loans both with and without evidence of credit quality deterioration since origination. The Company's accounting policies for acquired covered loans, including covered PCI loans, are consistent with that of acquired non-covered loans, as described in Note 5 to the consolidated financial statements. The Company has established under its PCI accounting policy a framework to aggregate certain acquired covered loans into various loan pools based on a minimum of two layers of common risk characteristics for the purpose of determining their respective fair values as of their acquisition dates, and for applying the subsequent recognition and measurement provisions for income accretion and impairment testing.

The following table presents the carrying value of the covered loans summarized by portfolio segment at December 31, 2013 (in thousands).

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

covered loan pools subsequent to amounts estimated at the previous quarterly recast date, this deterioration will be measured, and a provision for credit losses will be charged to earnings. Additionally, provision for credit losses will be recorded on advances on covered loans subsequent to the acquisition date in a manner consistent with the allowance for non-covered loan losses. These provisions will be partially offset by an increase to the FDIC Indemnification Asset in an amount equal to the FDIC's loss sharing percentage under the loss-share agreements, which is recognized in noninterest income within the consolidated statement of operations.

Changes in the allowance for covered loan losses for the period from September 14, 2013 through December 31, 2013, distributed by portfolio segment, are shown below (in thousands).

	\$ 198,468	\$ 111,381

The amounts shown above include assets recorded under capital leases of \$7.1 million and \$7.7 million, net of accumulated amortization of \$0.6 million and \$0.1 million at December 31, 2013 and 2012, respectively.

Occupancy expense was reduced by rental income of \$1.8 million and \$0.1 million in 2013 and 2012, respectively. Depreciation and amortization expense on premises and equipment, which includes amortization of capital leases, amounted to \$24.8 million, \$1.9 million and \$1.7 million in 2013, 2012 and 2011, respectively.

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

9. Goodwill and Other Intangible Assets

The carrying amount of goodwill was \$251.8 million and \$253.8 million at December 31, 2013 and 2012, respectively. As discussed in Note 2 to the consolidated financial statements, the Company initially recorded \$230.1 million of goodwill in connection with the PlainsCapital Merger, and used significant estimates and assumptions to value the identifiable assets acquired and liabilities assumed. The amount of goodwill recorded in connection with the PlainsCapital Merger is not deductible for tax purposes. During the three months ended March 31, 2013, the Company reduced goodwill related to the PlainsCapital Merger by \$2.0 million for a purchase accounting adjustment related to the valuation of a capital lease obligation. The Company made no further adjustments to its purchase price allocation.

Other intangible assets of \$70.9 million and \$77.7 million at December 31, 2013 and 2012, respectively, include an indefinite lived intangible asset with an estimated fair value of \$3.0 million related to state licenses acquired as a part of the NLC acquisition in January 2007.

The Company tests goodwill and other intangible assets having an indefinite useful life for impairment on an annual basis, or more often if events or circumstances indicate there may be impairment. Goodwill impairment testing is performed at the reporting unit level, which is one level below an operating segment. Goodwill is assigned to reporting units at the date the goodwill is initially recorded. Once goodwill has been assigned to reporting units, it no longer retains its association with a particular acquisition, and all of the activities within a reporting unit, whether acquired or internally generated, are available to support the value of the goodwill. The Company performs required annual impairment tests of its goodwill and other intangible assets as of October 1st for each of its reporting units.

The goodwill impairment analysis is a two-step test. The first step, used to identify potential impairment, involves comparing each reporting unit's estimated fair value to its carrying value, including goodwill. If the estimated fair value of a reporting unit exceeds its carrying value, goodwill is considered not to be impaired. If the carrying value exceeds estimated fair value, there is an indication of potential impairment and the second step is performed to measure the amount of impairment. The Company has estimated fair values of reporting units based on both a market and income approach using historic, normalized actual and forecast results.

The second step involves calculating an implied fair value of goodwill for each reporting unit for which the first step indicated impairment. The implied fair value of goodwill is determined in a manner similar to the amount of goodwill calculated in a business combination, by measuring the excess of the estimated fair value of the reporting unit, as determined in the first step, over the aggregate estimated fair values of the individual assets, liabilities and identifiable intangibles as if the reporting unit was being acquired in a business combination. If the implied fair value of goodwill exceeds the carrying value of goodwill assigned to the reporting unit, there is no impairment. If the carrying value of goodwill assigned to a reporting unit exceeds the implied fair value of the goodwill, an impairment charge is recorded for the excess. An impairment loss cannot exceed the carrying value of goodwill assigned to a reporting unit, and the loss establishes a new basis in the goodwill. Subsequent reversal of goodwill impairment losses is not permitted.

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

At October 1, 2013, the Company determined that the estimated fair value of each of its reporting units exceeded its carrying value and therefore the second step as described above was not performed. Based on this evaluation, the Company concluded that the goodwill and other identifiable intangible assets were fully realizable at December 31, 2013.

The Company's evaluation includes multiple assumptions, including estimated discounted cash flows and other estimates that may change over time. If future discounted cash flows become less than those projected by the Company, future impairment charges may become necessary that could have a materially adverse impact on the Company's results of operations and financial condition. As quoted market prices in active stock markets are relevant evidence of fair value, a significant decline in the Company's common stock trading price may indicate an impairment of goodwill.

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

The carrying value of intangible assets subject to amortization was as follows (in thousands).

	Estimated Useful Life (Years)	Gross Intangible Assets	Accumulated Amortization	Net Intangible Assets
December 31, 2013				
Core deposits	7-12	\$ 38,770	\$ (6,159)	\$ 32,611
Trademarks and trade names	10-20	20,000	(2,589)	17,411
Noncompete agreements	4-6	11,650	(2,492)	9,158
Customer contracts and relationships	8-12	14,100	(6,210)	7,890
Agent relationships	13	3,600	(2,749)	851
		\$ 88,120	\$ (20,199)	\$ 67,921

	Estimated Useful Life (Years)	Gross Intangible Assets	Accumulated Amortization	Net Intangible Assets
December 31, 2012				
Core deposits	10-12	\$ 34,500	\$ (452)	\$ 34,048
Trademarks and trade names	10-20	20,000	(1,487)	18,513
Noncompete agreements	4-6	11,650	(192)	11,458
Customer contracts and relationships	8-12	14,100	(4,515)	9,585
Agent relationships	13	3,600	(2,466)	1,134
Technology	5	1,500	(1,500)	
		\$ 85,350	\$ (10,612)	\$ 74,738

Amortization expense related to intangible assets during 2013, 2012 and 2011 was \$11.1 million, \$2.0 million and \$1.5 million, respectively.

The estimated aggregate future amortization expense for intangible assets at December 31, 2013 is as follows (in thousands).

2014	\$ 11,138
2015	10,300
2016	9,372
2017	7,546
2018	6,607
Thereafter	22,958
	\$ 67,921

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

10. Mortgage Servicing Rights

The following table presents the change in fair value of the Company's MSR (dollars in thousands).

	Year Ended December 31, 2013	Month Ended December 31, 2012
Balance, beginning of period	\$ 2,080	\$
Additions	13,886	2,204
Sales		
Changes in fair value:		
Due to changes in model inputs or assumptions (1)	4,782	(51)
Due to customer payments	(599)	(73)
Balance, end of period	\$ 20,149	\$ 2,080
Mortgage loans serviced for others	\$ 1,965,883	\$ 352,753
MSR as a percentage of serviced mortgage loans	1.02%	0.59%

(1) Principally represents changes in discount rates and prepayment speed assumptions, which are primarily affected by changes in interest rates.

The key assumptions used in measuring the fair value of the Company's MSR were as follows.

	Year Ended December 31, 2013	Month Ended December 31, 2012
Weighted average constant prepayment rate	9.72%	15.71%
Weighted average discount rate	12.37%	20.67%
Weighted average life (in years)	7.6	5.7

A sensitivity analysis of the fair value of the Company's MSR to certain key assumptions is presented in the following table (in thousands).

	2013	December 31, 2012
Constant prepayment rate:		
Impact of 10% adverse change	\$ (601)	\$ (80)
Impact of 20% adverse change	(1,170)	(155)
Discount rate:		

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

Impact of 100 basis point adverse change	(631)	(34)
Impact of 200 basis point adverse change	(1,236)	(66)

The sensitivity analysis presents the hypothetical effect on fair value of the MSR. The effect of such hypothetical change in assumptions generally cannot be extrapolated because the relationship of the change in one key assumption to the change in the fair value of the MSR is not linear. In addition, in the analysis, the impact of an adverse change in one key assumption is calculated independent of any impact on other assumptions. In reality, changes in one assumption may change another assumption.

During the year ended December 31, 2013 and the month ended December 31, 2012, contractually specified servicing fees, late fees and ancillary fees earned of \$3.2 million and \$0.4 million, respectively, were included in other noninterest income within the consolidated statements of operations.

11. Deposits

Deposits are summarized as follows (in thousands).

	December 31,	
	2013	2012
Noninterest-bearing demand	\$ 409,334	\$ 323,367
Interest-bearing:		
NOW accounts	202,910	106,562
Money market	3,122,780	2,357,109
Brokered - money market	276,760	263,193
Demand	47,636	75,308
Savings	357,325	180,367
Time	2,110,947	1,175,432
Brokered - time	194,327	219,123
	\$ 6,722,019	\$ 4,700,461

The significant increase in deposits at December 31, 2013 as compared to December 31, 2012 is primarily due to the inclusion of \$2.2 billion of deposits assumed as a part of the FNB Transaction.

At December 31, 2013, the scheduled maturities of interest-bearing time deposits are as follows (in thousands).

2014	\$ 1,690,804
2015	333,193
2016	122,654
2017	122,988
2018 and thereafter	35,635
	\$ 2,305,274

12. Short-term Borrowings

Short-term borrowings are summarized as follows (in thousands).

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

	December 31,	
	2013	2012
Federal funds purchased	\$ 137,225	\$ 269,625
Securities sold under agreements to repurchase	107,462	85,725
Federal Home Loan Bank notes		250,000
Short-term bank loans	97,400	122,900
	\$ 342,087	\$ 728,250

Federal funds purchased and securities sold under agreements to repurchase generally mature daily, on demand, or on some other short-term basis. The Bank and FSC execute transactions to sell securities under agreements to repurchase with both customers and broker-dealers. Securities involved in these transactions are held by the Bank, FSC or the dealer.

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

Information concerning federal funds purchased and securities sold under agreements to repurchase is shown in the following table (dollars in thousands).

	Year Ended December 31, 2013	Month Ended December 31, 2012
Average balance during the period	\$ 281,067	\$ 277,470
Average interest rate during the period	0.19%	0.25%
Maximum month-end balance during the period	\$ 415,730	\$ 355,350

	December 31, 2013	December 31, 2012
Average interest rate at end of period	0.16%	0.22%
Securities underlying the agreements at end of period		
Carrying value	\$ 144,991	\$ 122,153
Estimated fair value	\$ 138,719	\$ 122,435

Federal Home Loan Bank (FHLB) notes mature over terms not exceeding 365 days and are collateralized by FHLB Dallas stock, nonspecified real estate loans and certain specific commercial real estate loans. At December 31, 2013, the Bank had available collateral of \$1.7 billion, substantially all of which was blanket collateral. Other information regarding FHLB notes is shown in the following tables (dollars in thousands).

	Year Ended December 31, 2013	Month Ended December 31, 2012
Average balance during the period	\$ 106,415	\$ 301,613
Average interest rate during the period	0.13%	0.14%
Maximum month-end balance during the period	\$ 525,000	\$ 250,000

	December 31, 2013	December 31, 2012
Average interest rate at end of period		0.07%

FSC uses short-term bank loans periodically to finance securities owned, customers' margin accounts and underwriting activities. Interest on the borrowings varies with the federal funds rate. The weighted average interest rate on the borrowings at December 31, 2013 and 2012 was 1.15% and 1.16%, respectively.

13. Notes Payable

Notes payable consisted of the following (in thousands).

	December 31,	
	2013	2012
Senior exchangeable notes due 2025, 7.50% per annum	\$	\$ 83,950
NLIC note payable due May 2033, three-month LIBOR plus 4.10% (4.35% at December 31, 2013) with interest payable quarterly	10,000	10,000
NLIC note payable due September 2033, three-month LIBOR plus 4.05% (4.30% at December 31, 2013) with interest payable quarterly	10,000	10,000
ASIC note payable due April 2034, three-month LIBOR plus 4.05% (4.30% at December 31, 2013) with interest payable quarterly	7,500	7,500
First Southwest nonrecourse notes, due January 2035 with interest payable quarterly	6,827	10,089
Insurance company note payable due March 2035, three-month LIBOR plus 3.40% (3.65% at December 31, 2013) with interest payable quarterly	20,000	20,000
Insurance company line of credit due September 2014, 3.25% plus a calculated index rate (4.00% at December 31, 2013) with interest payable quarterly	2,000	
	\$ 56,327	\$ 141,539

Senior Exchangeable Notes Due 2025

In August 2005, HTH Operating Partnership LP, a wholly owned subsidiary of Hilltop (OP), entered into an Indenture under which OP issued \$96.6 million aggregate principal amount of 7.5% Senior Exchangeable Notes due 2025, or the Notes, to qualified institutional buyers in a private transaction. On October 15, 2013, OP called for redemption all outstanding Notes on November 14, 2013 (the Redemption Date). The outstanding Notes at October 15, 2013 of \$90.9 million, including \$6.9 million aggregate principal amount held by the Company's insurance company subsidiaries, were redeemed at a redemption price equal to the principal amount of the Notes, plus accrued and unpaid interest up to, but excluding, the Redemption Date. At any time prior to the Redemption Date, holders of the Notes could exchange the Notes for shares of Hilltop common stock at the rate of 73.94998 shares per \$1,000 principal amount of the Notes (or approximately \$13.52 per share). In lieu of delivery of Hilltop common stock upon the exercise by a holder of its exchange right, OP could elect to pay such holder of the Notes an amount in cash (or a combination of Hilltop common stock and cash) in respect of all or a portion of such holder's Notes equal to the closing price of Hilltop's common stock for the five consecutive trading days commencing on and including the third business day following the exercise of such exchange right. As of the closing of the redemption, the Notes held by third party investors were exchanged for 6,208,005 shares of Hilltop common stock and an aggregate cash payment of \$11.1 million was made in exchange for the Notes held by the Company's insurance company subsidiaries.

The Notes were senior unsecured obligations of OP and were exchangeable, at the option of the holders, into shares of Hilltop common stock at an initial exchange rate of 69.8812 shares per \$1,000 principal amount of the Notes (equal to an initial exchange price of approximately \$14.31

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

per share), subject to adjustment and, in the event of specified corporate transactions involving Hilltop or OP, an additional make-whole premium. Upon exchange, OP had the option to deliver, in lieu of shares of common stock, cash or a combination of cash and shares of common stock. The Notes were treated as a combined instrument at the date of issuance and not bifurcated to separately account for any embedded derivative instruments principally because, in accordance with ASC 815, *Derivatives and Hedging*, (i) the conversion feature is indexed to Hilltop's common stock and would be classified in stockholders' equity if it were a freestanding derivative and (ii) the put and call option features were clearly and closely related to the Notes at fixed conversion amounts.

According to the terms of the Notes, their initial exchange rate was adjustable for certain events, including the issuance to all holders of Hilltop common stock of rights entitling them to purchase Hilltop common stock at less than their current market price. Accordingly, as a result of a rights offering in January 2007, in which all holders of Hilltop common stock were offered the right to purchase shares at \$8.00 per share, the initial exchange rate of the Notes was adjusted to 73.94998 shares per \$1,000 principal amount of the Notes (equal to an exchange rate of \$13.52 per share).

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

In November 2011, Hilltop's insurance company subsidiaries purchased \$6.9 million, par value, of the Notes in open market transactions at an average cost of 107.26% of par.

On October 15, 2013, Hilltop entered into a First Supplemental Indenture pursuant to which Hilltop guaranteed the obligations of OP under the Indenture.

Notes Payable

The NLIC and ASIC notes payable to unaffiliated companies are each subordinated in right of payment to all policy claims and other indebtedness of NLIC and ASIC, respectively. Further, all payments of principal and interest require the prior approval of the Insurance Commissioner of the State of Texas and are only payable to the extent that the statutory surplus of NLIC exceeds \$30 million and ASIC exceeds \$15 million.

The NLIC, ASIC and Insurance Company loan agreements relating to the notes payable contain various covenants pertaining to limitations on additional debt, dividends, officer and director compensation, and minimum capital requirements. The Company was in compliance with the covenants at December 31, 2013.

NLC has entered into an indenture relating to the NLIC, ASIC and Insurance Company notes payable which provides that (i) if a person or group becomes the beneficial owner directly or indirectly of 50% or more of its equity securities and (ii) if NLC's ratings are downgraded by a nationally recognized statistical rating organization (as defined in the Exchange Act), then each holder of the notes governed by such indenture has the right to require that NLC purchase such holder's notes in whole or in part at a price equal to 100% of the outstanding principal amount.

First Southwest Nonrecourse Notes

In 2005, First Southwest participated in a monetization of future cash flows totaling \$95.3 million from several tobacco companies owed to a law firm under a settlement agreement (Fee Award). In connection with the transaction, a special purpose entity that is consolidated with First Southwest issued \$30.3 million of nonrecourse notes to finance the purchase of the Fee Award, to establish a reserve account and to fund issuance costs. Cash flows from the settlement are the sole source of payment for the notes. The notes carry an interest rate of 8.58% that can increase to 10.08% under certain credit conditions.

Insurance Company Line of Credit

The Company's insurance subsidiary has a line of credit with a financial institution which allows for borrowings by NLC of up to \$5.0 million and is collateralized by substantially all of NLC's assets. The line of credit bears interest equal to 3.25% plus a calculated index rate (4.00% at December 31, 2013), which is due quarterly. This line is scheduled to mature in September 2014.

Principal Maturities

At December 31, 2013, notes payable outstanding of \$56.3 million includes scheduled maturities of \$2.0 million during 2014 and \$54.3 million during 2033 and thereafter.

14. Junior Subordinated Debentures and Trust Preferred Securities

PlainsCapital has four statutory Trusts, three of which were formed under the laws of the state of Connecticut and one of which, PCC Statutory Trust IV, was formed under the laws of the state of Delaware. The Trusts were created for the sole purpose of issuing and selling preferred securities and common securities, using the resulting proceeds to acquire junior subordinated debentures issued by PlainsCapital (the

Debentures). Accordingly, the Debentures are the sole assets of the Trusts, and payments under the Debentures are the sole revenue of the Trusts. All of the common securities are owned by PlainsCapital; however, PlainsCapital is not the primary beneficiary of the Trusts. Accordingly, the Trusts are not included in PlainsCapital's consolidated financial statements.

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

The Trusts have issued \$65,000,000 of floating rate preferred securities and \$2,012,000 of common securities and have invested the proceeds from the securities in floating rate Debentures of PlainsCapital. Information regarding the PlainsCapital Debentures is shown in the following table (in thousands).

Investor	Issue Date	Amount
PCC Statutory Trust I	July 31, 2001	\$ 18,042
PCC Statutory Trust II	March 26, 2003	\$ 18,042
PCC Statutory Trust III	September 17, 2003	\$ 15,464
PCC Statutory Trust IV	February 22, 2008	\$ 15,464

The stated term of the Debentures is 30 years with interest payable quarterly. The rate on the Debentures, which resets quarterly, is 3-month LIBOR plus an average spread of 3.22%. The total average interest rate at December 31, 2013 was 3.47%. The term, rate and other features of the preferred securities are the same as the Debentures. PlainsCapital's obligations under the Debentures and related documents, taken together, constitute a full and unconditional guarantee of the Trust's obligations under the preferred securities.

15. Income Taxes

The significant components of the income tax provision (benefit) are as follows (in thousands).

	2013	Year Ended December 31, 2012	2011
Current:			
Federal	\$ 51,441	\$ 4,346	\$ (966)
State	3,414	935	
	54,855	5,281	(966)
Deferred:

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

The components of the tax effects of temporary differences that give rise to the net deferred tax asset included in other assets within the consolidated balance sheet are as follows (in thousands).

	December 31,	
	2013	2012
Deferred tax assets:		
Net operating loss carryforward	\$ 15,919	\$ 16,377
Covered loans	47,770	
Purchase accounting adjustment - loans	27,997	50,752
Allowance for loan losses	12,383	1,235
Compensation and benefits	16,946	15,246
Indemnification agreements	8,308	8,242
Foreclosed property	13,589	3,701
Net unrealized change in securities	19,428	
Other	16,216	12,916
	178,556	108,469
Deferred tax liabilities:		
Premises and equipment	13,269	10,109
FDIC Indemnification Asset	67,841	
Intangible assets	22,708	30,068
Derivatives	9,428	12,213
Net unrealized change in securities		4,337
Loan servicing	7,480	774
Other	17,972	17,935
	138,698	75,436
Net deferred tax asset	\$ 39,858	\$ 33,033

At December 31, 2013 and 2012, the Company had net operating loss carryforwards for Federal income tax purposes of \$45.5 million and \$46.8 million, respectively. The net operating loss carryforwards are subject to separate return limitations on their usage. These net operating loss carry-forwards expire in 2023 and later years. The net operating loss carry-forwards for alternative minimum Federal income taxes generally are limited to offsetting 90% of the alternative minimum taxable earnings for a taxable year. The Company expects to realize its current deferred tax assets, including these net operating loss carryforwards, through the implementation of certain tax planning strategies surrounding the PlainsCapital Merger, core earnings, and reversal of timing differences. Therefore, the Company has no valuation allowance on its deferred tax assets at December 31, 2013 or 2012.

GAAP requires the measurement of uncertain tax positions. Uncertain tax positions are the difference between a tax position taken, or expected to be taken in a tax return, and the benefit recognized for accounting purposes. There were no uncertain tax positions at December 31, 2013 and 2012. The Company does not anticipate any significant liabilities for uncertain tax positions to arise in the next twelve months.

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

The Company files income tax returns in U.S. federal and several U.S. state jurisdictions. The Company is subject to tax audits in numerous jurisdictions in the U.S. until the applicable statute of limitations expires. Excluding those entities acquired as a part of the PlainsCapital Merger, the Company has been examined by U.S. tax authorities for U.S. federal income tax years prior to 2010, and is under no federal or state tax audits at December 31, 2013. PlainsCapital has been examined by U.S. tax authorities for U.S. federal income tax years prior to 2010, and is under no federal or state tax audits at December 31, 2013.

For the majority of tax jurisdictions, the Company is no longer subject to federal, state or local income tax examinations by tax authorities for years prior to 2010.

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

16. Employee Benefits

Hilltop and its subsidiaries have benefit plans that provide for elective deferrals by employees under Section 401(k) of the Internal Revenue Code. Employee contributions are determined by the level of employee participation and related salary levels per Internal Revenue Service regulations. Hilltop and its subsidiaries match a portion of employee contributions to the plan based on entity-specific factors including the level of normal operating earnings and the amount of eligible employees' contributions and salaries. The amount charged to operating expense for this matching contribution totaled \$6.2 million, \$0.7 million and \$0.2 million during 2013, 2012 and 2011, respectively.

In connection with the PlainsCapital Merger, PlainsCapital is in the process of terminating its employee stock ownership plan (ESOP) and distributing the assets held by the ESOP (consisting of cash and shares of Hilltop common stock) to ESOP participants.

Effective upon the completion of the PlainsCapital Merger, the Company recorded a liability of \$8.9 million associated with separate retention agreements entered into between Hilltop and two executive officers of PlainsCapital.

The Bank purchased \$15.0 million of flexible premium universal life insurance in 2001 to help finance the annual expense incurred in providing various employee benefits. At December 31, 2013 and 2012, the carrying value of the policies included in other assets was \$24.5 million and \$24.1 million, respectively. For the year ended December 31, 2013 and the month ended December 31, 2012, the Bank recorded income of \$0.4 million and \$0.1 million, respectively, related to the policies that was reported in other noninterest income within the consolidated statement of operations.

17. Related Party Transactions

Pursuant to a Management Services Agreement, as amended, Diamond A Administration Company LLC, or Diamond A, an affiliate of Gerald J. Ford, the current Chairman of the Board of Hilltop and the beneficial owner of 17.2% of Hilltop common stock at December 31, 2013, provided certain management services to the Company, including, among others, financial and acquisition evaluation, and office space to Hilltop. The services and office space were provided at a cost of \$91,500 per month, plus reasonable out-of-pocket expenses. The services provided under this agreement include those of Hilltop directors, including Gerald J. Ford, Kenneth Russell and Carl B. Webb. Prior to Jeremy Ford assuming the role of Chief Executive Officer of Hilltop, he provided services to Hilltop under the Management Services Agreement. Hilltop also agreed to indemnify and hold harmless Diamond A for its performance or provision of these services, except for gross negligence and willful misconduct. Further, Diamond A's maximum aggregate liability for damages under this agreement is limited to the amounts paid to Diamond A under this agreement during twelve months prior to that cause of action. In connection with the PlainsCapital Merger on November 30, 2012, the Management Services Agreement was terminated. However, pursuant to a Sublease Agreement, Diamond A currently provides office space to Hilltop at a cost of \$21,478 per month. This Sublease Agreement continues in effect until July 31, 2018 or such earlier date that the base lease expires.

Jeremy B. Ford, a director and the Chief Executive Officer of Hilltop, is the beneficiary of a trust that owns a 49% limited partnership interest in Diamond A Financial, L.P. Diamond A Financial, L.P. owned 17.2% of the outstanding Hilltop common stock at December 31, 2013. He also is a director and the Secretary of Diamond A Administration Company, LLC, which has provided management services and office space to Hilltop as described the preceding paragraph. Diamond A Administration Company, LLC is owned by Hunter's Glen/Ford, Ltd., a limited partnership in which a trust for the benefit of Jeremy B. Ford is a 46% limited partner.

Jeremy B. Ford is the son of Gerald J. Ford. Corey G. Prestidge, Hilltop's General Counsel and Secretary, is the son-in-law of Gerald J. Ford. Accordingly, Messrs. Jeremy Ford and Corey Prestidge are brothers-in-law.

In the ordinary course of business, the Bank has granted loans to certain directors, executive officers and their affiliates (collectively referred to as related parties) totaling \$8.0 million and \$23.2 million at December 31, 2013 and 2012, respectively. These loans were made on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with other unaffiliated persons and do not involve more than normal risk of collectability. For such loans during 2013, total principal additions were \$6.8 million and total principal payments were \$8.7 million and reductions due to changes in status as a related party were \$13.3 million.

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

At December 31, 2013 and 2012, the Bank held deposits of related parties of \$154.0 million and \$173.5 million, respectively.

A related party is the lessor in an operating lease with the Bank. The Bank's minimum payment under the lease is \$0.5 million annually through 2028, for an aggregate remaining obligation of \$7.5 million.

The Bank purchases loans from a company for which a related party serves as a director, president and chief executive officer. At both December 31, 2013 and 2012, the outstanding balance of the purchased loans was \$6.0 million. The loans were purchased with recourse to the company in the ordinary course of business and the related party had no direct financial interest in the transactions.

PlainsCapital Equity, LLC is a limited partner in certain limited partnerships that have received loans from the Bank. The Bank made those loans in the normal course of business, using underwriting standards and offering terms that are substantially the same as those used or offered to non-affiliated borrowers. At December 31, 2013 and 2012, the Bank had outstanding loans of \$3.0 million and \$4.2 million, respectively, in which PlainsCapital Equity, LLC had a limited partnership interest. The investment of PlainsCapital Equity, LLC in these limited partnerships was \$3.7 million at both December 31, 2013 and 2012.

18. Commitments and Contingencies

The Bank acts as agent on behalf of certain correspondent banks in the purchase and sale of federal funds that aggregated \$7.5 million and \$16.0 million at December 31, 2013 and 2012, respectively.

Legal Matters

The Company is subject to loss contingencies related to litigation, claims, investigations and legal and administrative cases and proceedings arising in the ordinary course of business. The Company evaluates these contingencies based on information currently available, including advice of counsel. The Company establishes accruals for those matters when a loss contingency is considered probable and the related amount is reasonably estimable. Any accruals are periodically reviewed and may be adjusted as circumstances change. Some of the Company's exposure with respect to loss contingencies may be offset by applicable insurance coverage. In determining the amounts of any accruals or estimates of possible loss contingencies however, the Company does not take into account the availability of insurance coverage. When it is practicable, the Company estimates loss contingencies for possible litigation and claims, whether or not there is an accrued probable loss. When the Company is able to estimate such possible losses, and when it estimates that it is reasonably possible it could incur losses, in excess of amounts accrued, the Company is required to make a disclosure of the aggregate estimation. However, as available information changes, the matters for which the Company is able to estimate, as well as the estimates themselves will be adjusted, accordingly.

Assessments of litigation and claims exposures are difficult due to many factors that involve inherent unpredictability. Those factors include the following: the varying stages of the proceedings, particularly in the early stages; unspecified, unsupported, or uncertain damages; damages other than compensatory, such as punitive damages; a matter presenting meaningful legal uncertainties, including novel issues of law; multiple defendants and jurisdictions; whether discovery has begun or not or discovery is not complete; meaningful settlement discussions have not commenced; and whether the claim involves a class action and if so, how the class is defined. As a result of some of these factors, the Company may be unable to estimate reasonably possible losses with respect to some or all of the pending and threatened litigation and claims asserted against the Company. The aggregated estimated amount provided above therefore may not include an estimate for every such matter.

The Company is involved in information-gathering requests and investigations (both formal and informal), as well as reviews, examinations and proceedings (collectively, Inquiries) by various governmental regulatory agencies, law enforcement authorities and self-regulatory bodies regarding its business, business practices and policies, as well as the conduct of persons with whom it does business. Additional Inquiries will arise from time to time. In connection with those Inquiries, the Company receives document requests, subpoenas and other requests for information. The Inquiries, including those described below, could develop into administrative, civil or criminal proceedings or enforcement actions that could result in consequences that have a material effect on the Company's consolidated financial position, results of operations or

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

cash flows as a whole. Such consequences could include adverse judgments, findings, settlements, penalties, fines, orders, injunctions, restitution, or alterations in the Company's business practices, and could result in additional expenses and collateral costs, including reputational damage.

As a part of an industry-wide inquiry, PrimeLending has received a subpoena from the Office of Inspector General of the U. S. Department of Housing and Urban Development regarding mortgage-related practices, including those relating to origination practices for loans insured by the Federal Housing Administration. PrimeLending is cooperating with this Inquiry.

While the final outcome of litigation and claims exposures or of any Inquiries is inherently unpredictable, management is currently of the opinion that the outcome of pending and threatened litigation and Inquiries will not have a material effect on the Company's business, consolidated financial position, results of operations or cash flows as a whole. However, in the event of unexpected future developments, it is reasonably possible that an adverse outcome in any of the matters discussed above could be material to the Company's business, consolidated financial position, results of operations or cash flows for any particular reporting period of occurrence.

Other Contingencies

The mortgage origination segment may be responsible for errors or omissions relating to its representations and warranties that each loan sold meets certain requirements, including representations as to underwriting standards and the validity of certain borrower representations in connection with the loan. If determined to be at fault, the mortgage origination segment either repurchases the affected loan from the investor or reimburses the investor's losses. The mortgage origination segment has established an indemnification liability reserve for such probable losses.

Generally, the mortgage origination segment first becomes aware that an investor believes a loss has been incurred on a sold loan when it receives a written request from the investor to repurchase the loan or reimburse the investor's losses. Upon completing its review of the investor's request, the mortgage origination segment establishes a specific claims reserve for the loan if it concludes its obligation to the investor is both probable and reasonably estimable.

An additional reserve has been established for probable investor losses that may have been incurred, but not yet reported to the mortgage origination segment based upon a reasonable estimate of such losses. Factors considered in the calculation of this reserve include, but are not limited to, the total volume of loans sold exclusive of specific investor requests, actual investor claim settlements and the severity of estimated losses resulting from future claims, and the mortgage origination segment's history of successfully curing defects identified in investor claim requests. While the mortgage origination segment's sales contracts typically include borrower early payment default repurchase provisions, these provisions have not been a primary driver of investor claims to date, and therefore, are not a primary factor considered in the calculation of this reserve.

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

At December 31, 2013 and 2012, the mortgage origination segment's indemnification liability reserve totaled \$21.1 million and \$19.0 million, respectively. The provision for indemnification losses was \$3.5 million and \$0.4 million during the year ended December 31, 2013 and the month ended December 31, 2012, respectively.

The following tables provide for a roll-forward of claims activity for loans put-back to the mortgage origination segment based upon an alleged breach of a representation or warranty with respect to a loan sold and related indemnification liability reserve activity (in thousands).

	Representation and Warranty Specific Claims	
	Activity - Origination Loan Balance	
	Year Ended	Month Ended
	December 31, 2013	December 31, 2012
Balance, beginning of period	\$ 39,693	\$ 35,217
Claims made	40,001	6,463
Claims resolved with no payment	(17,746)	(1,565)
Repurchases	(6,255)	(422)
Indemnification payments	(3,781)	
Balance, end of period	\$ 51,912	\$ 39,693

F-55

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

	Indemnification Liability Reserve Activity	
	Year Ended December 31, 2013	Month Ended December 31, 2012
Balance, beginning of period	\$ 18,964	\$ 18,544
Additions for new sales	3,539	420
Repurchases	(251)	(31)
Early payment defaults	(528)	(51)
Indemnification payments	(1,003)	
Change in estimate	400	82
Balance, end of period	\$ 21,121	\$ 18,964
Reserve for Indemnification Liability:		
Specific claims	\$ 12,179	
Incurred but not reported claims	8,942	
Total	\$ 21,121	

Although management considers the total indemnification liability reserve to be appropriate, there may be changes in the reserve over time to address incurred losses, due to unanticipated adverse changes in the economy and historical loss patterns, discrete events adversely affecting specific borrowers or industries, and/or actions taken by institutions or investors. The impact of such matters is considered in the reserving process when probable and estimable.

In connection with the FNB Transaction, the Bank entered into two loss-share agreements with the FDIC that collectively cover \$1.2 billion of loans and OREO acquired in the FNB Transaction. Pursuant to the loss-share agreements, the FDIC has agreed to reimburse the Bank the following amounts with respect to the covered assets: (i) 80% of losses on the first \$240.4 million of losses incurred; (ii) 0% of losses in excess of \$240.4 million up to and including \$365.7 million of losses incurred; and (iii) 80% of losses in excess of \$365.7 million of losses incurred. The Bank has also agreed to reimburse the FDIC for any subsequent recoveries. The loss-share agreements for commercial and single family residential loans are in effect for 5 years and 10 years, respectively, from the Bank Closing Date and the loss recovery provisions to the FDIC are in effect for 8 years and 10 years, respectively, from the Bank Closing Date. In accordance with the loss-share agreements, the Bank may be required to make a true-up payment to the FDIC, approximately ten years following the Bank Closing Date, if the FDIC's initial estimate of losses on covered assets is greater than the actual realized losses. The true-up payment is calculated using a defined formula set forth in the P&A Agreement.

As discussed in Note 16 to the consolidated financial statements, effective upon completion of the PlainsCapital Merger, Hilltop entered into separate retention agreements with two executive officers of PlainsCapital, one having an initial term of three years (with automatic one-year renewals at the end of two years and each anniversary thereof) and the other having an initial term of two years (with automatic one-year renewals at the end of the first year and each anniversary thereof). Each of these retention agreements provides for severance pay benefits if the executive officer's employment is terminated without cause.

In addition to these retention agreements, PlainsCapital and its subsidiaries maintain employment contracts with certain executive officers and severance agreements with certain other senior officers that provide severance pay benefits in the event of a change in control as defined in these agreements. Each of these agreements will expire on the second anniversary following the effective date of the PlainsCapital Merger. Given that the PlainsCapital Merger constitutes a change in control of PlainsCapital, severance pay benefits will be payable if an officer subject to one of

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

these employment or severance agreements is terminated without cause prior to the second anniversary of the effective date of the PlainsCapital Merger. Prior to expiration of these agreements, similar severance pay benefits will be payable in the event of termination of such officer without cause following a change in control of Hilltop.

Notes to Consolidated Financial Statements (continued)

Hilltop and its subsidiaries lease space, primarily for branch facilities and automated teller machines, under noncancelable operating leases with remaining terms, including renewal options, of 1 to 15 years and under capital leases with remaining terms of 11 to 15 years. Rental expense under the operating leases was \$29.2 million, \$2.9 million and \$0.5 million in 2013, 2012 and 2011, respectively. Future minimum lease payments under these agreements follow (in thousands).

	Operating Leases	Capital Leases
2014	\$ 25,541	\$ 1,080
2015	22,815	1,090
2016	16,496	1,103
2017	12,019	1,129
2018	11,222	1,167
Thereafter	30,041	9,514
Total minimum lease payments	\$ 118,134	15,083
Amount representing interest		(6,824)
Present value of minimum lease payments		\$ 8,259

19. Financial Instruments with Off-Balance Sheet Risk

The Bank is party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit that involve varying degrees of credit and interest rate risk in excess of the amount recognized in the consolidated financial statements. Such financial instruments are recorded in the consolidated financial statements when they are funded or related fees are incurred or received. The contract amounts of those instruments reflect the extent of involvement (and therefore the exposure to credit loss) the Bank has in particular classes of financial instruments.

Commitments to extend credit are agreements to lend to a customer provided that the terms established in the contract are met. Commitments generally have fixed expiration dates and may require payment of fees. Because some commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. Standby letters of credit are conditional commitments issued to guarantee the performance of a customer to a third party. These letters of credit are primarily issued to support public and private borrowing arrangements. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan commitments to customers.

In the aggregate, the Bank had outstanding unused commitments to extend credit of \$1.1 billion at December 31, 2013 and outstanding standby letters of credit of \$41.7 million at December 31, 2013.

The Bank uses the same credit policies in making commitments and standby letters of credit as it does for on-balance sheet instruments. The amount of collateral obtained, if deemed necessary, in these transactions is based on management's credit evaluation of the borrower. Collateral

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

held varies but may include real estate, accounts receivable, marketable securities, interest-bearing deposit accounts, inventory, and property, plant and equipment.

In the normal course of business, FSC executes, settles, and finances various securities transactions that may expose FSC to off-balance sheet risk in the event that a customer or counterparty does not fulfill its contractual obligations. Examples of such transactions include the sale of securities not yet purchased by customers or for the account of FSC, clearing agreements between FSC and various clearinghouses and broker-dealers, secured financing arrangements that involve pledged securities, and when-issued underwriting and purchase commitments.

20. Stock-Based Compensation

Pursuant to the Hilltop Holdings 2012 Equity Incentive Plan (the "2012 Plan"), the Company may grant nonqualified stock options, stock appreciation rights, restricted stock, restricted stock units, performance awards, dividend equivalent rights and other awards to employees of the Company, its subsidiaries and outside directors of the Company. Upon the approval by stockholders and effectiveness of the 2012 Plan in September 2012, no additional awards were permissible under the 2003 Equity Incentive Plan (the "2003 Plan"). In the aggregate, 4,000,000 shares of common stock may be delivered pursuant to awards granted under the 2012 Plan. At December 31, 2013, 3,519,657 shares of common stock remain available for issuance pursuant to the 2012 Plan.

During 2013, the Compensation Committee of the Board of Directors of the Company awarded certain executives and key employees a total of 471,000 restricted shares of common stock ("Restricted Stock Awards") pursuant to the 2012 Plan. These Restricted Stock Awards are subject to service conditions set forth in the grant agreements with associated costs recognized on a straight-line basis over the respective vesting periods. The weighted average grant date fair value related to these Restricted Stock Awards was \$13.32 per share. At December 31, 2013, unrecognized compensation expense related to these Restricted Stock Awards was \$4.9 million, which will be amortized through September 2016. These Restricted Stock Awards provide for accelerated vesting under certain conditions.

During 2013, 2012 and 2011, Hilltop granted 9,343, 5,183 and 5,418 common shares, respectively, to independent members of the Company's Board of Directors for service rendered to the Company during the respective periods.

Stock options granted on November 2, 2011 to two senior executives pursuant to the 2003 Plan to purchase an aggregate of 600,000 shares of the Company's common stock (the "Stock Option Awards") at an exercise price of \$7.70 per share were outstanding at December 31, 2013. These Stock Option Awards vest in five equal installments beginning on the grant date, with the remainder vesting on each grant date anniversary through 2015. Compensation expense related to these Stock Option Awards was \$0.9 million. At December 31, 2013, unrecognized compensation expense related to these Stock Option Awards was \$0.2 million, which will be amortized on a straight-line basis through October 2015. Additionally, these Stock Option Awards expire on November 2, 2016. The fair value for these Stock Option Awards granted was estimated using the Black-Scholes option pricing model with an expected volatility of 25%, a risk-free interest rate of 0.96%, a dividend yield rate of zero, a five-year expected life of the options and a forfeiture rate of 15%.

Compensation expense related to the plans was \$1.7 million, \$0.5 million and \$0.1 million for the years ended December 31, 2013, 2012 and 2011, respectively.

21. Regulatory Matters

Bank

The Bank and Hilltop are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct, material effect on the consolidated financial statements. The regulations require us to meet specific capital adequacy guidelines that involve quantitative measures of assets, liabilities and certain off-balance sheet items as calculated under regulatory accounting practices. The capital classifications are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the companies to maintain minimum amounts and ratios (set forth in the following table) of Tier 1 capital (as defined in the regulations) to total average assets (as defined), and minimum ratios of Tier 1 and total capital (as defined) to risk-weighted assets (as defined). The Tier 1 Capital (to average assets) ratio at December 31, 2012 was calculated using the average assets for the month of December 2012.

During September 2013, Hilltop and PlainsCapital contributed capital of \$35.0 million and \$25.0 million, respectively, to the Bank to provide additional capital in connection with the FNB Transaction.

[Table of Contents](#)

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

The following table shows the Bank's and Hilltop's consolidated actual capital amounts and ratios compared to the regulatory minimum capital requirements and the Bank's regulatory minimum capital requirements needed to qualify as a well-capitalized institution (dollars in thousands), without giving effect to the final Basel III capital rules adopted by the Federal Reserve Board on July 2, 2013.

December 31, 2013						
Tier 1 capital (to average assets):						
Bank	\$ 762,364	9.29%	\$ 328,275	4%	\$ 410,344	5%
Hilltop	1,112,424	12.81%	347,480	4%	N/A	N/A
Tier 1 capital (to risk-weighted assets):						
Bank	762,364	13.38%	227,984	4%	341,976	6%
Hilltop	1,112,424	18.53%	240,159	4%	N/A	N/A
Total capital (to risk-weighted assets):						
Bank	797,771	14.00%	455,968	8%	569,960	10%
Hilltop	1,148,736	19.13%	480,318	8%	N/A	N/A
December 31, 2012						
Tier 1 capital (to average assets):						
Bank	\$ 542,307	8.84%	\$ 245,495	4%	\$ 306,869	5%
Hilltop	871,379	13.08%	266,514	4%	N/A	N/A
Tier 1 capital (to risk-weighted assets):						
Bank	542,307	11.83%	183,308	4%	274,961	6%
Hilltop	871,379	17.72%	196,670	4%	N/A	N/A
Total capital (to risk-weighted assets):						
Bank	546,598	11.93%	366,615	8%	458,269	10%
Hilltop	875,670	17.81%	393,340	8%	N/A	N/A

To be considered adequately capitalized (as defined) under regulatory requirements, the Bank must maintain minimum Tier 1 capital to total average assets and Tier 1 capital to risk-weighted assets ratios of 4%, and a total capital to risk-weighted assets ratio of 8%. Based on the actual capital amounts and ratios shown in the previous table, the Bank's ratios place it in the well-capitalized (as defined) capital category under regulatory requirements.

A reconciliation of equity capital to Tier 1 and total capital (as defined) is as follows (in thousands).

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

	December 31, 2013		December 31, 2012	
	Bank	Hilltop	Bank	Hilltop
Total equity capital	\$ 985,519	\$ 1,311,141	\$ 831,677	\$ 1,144,496
Add:				
Minority interests	781	781	2,054	2,054
Trust preferred securities		65,000		65,000
Net unrealized holding losses on securities available for sale and held in trust	42,901	34,863	1,125	(8,094)
Deduct:

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

Management continues to evaluate the final Basel III capital rules and their impact, which would apply to reporting periods beginning after January 1, 2015.

Financial Advisory

Pursuant to the net capital requirements of the Exchange Act, FSC has elected to determine its net capital requirements using the alternative method. Accordingly, FSC is required to maintain minimum net capital, as defined in Rule 15c3-1 promulgated under the Exchange Act, equal to the greater of \$250,000 or 2% of aggregate debit balances, as defined in Rule 15c3-3 promulgated under the Exchange Act. At December 31, 2013, FSC had net capital of \$74.3 million (the minimum net capital requirement was \$3.4 million), net capital maintained by FSC was 43% of aggregate debits, and net capital in excess of the minimum requirement was \$70.8 million.

Mortgage Origination

As a mortgage originator, PrimeLending is subject to minimum net worth requirements established by the United States Department of Housing and Urban Development (HUD) and the Government National Mortgage Association (GNMA). On an annual basis, PrimeLending submits audited financial statements to HUD and GNMA documenting PrimeLending 's compliance with its minimum net worth requirements. In addition, PrimeLending monitors compliance on an ongoing basis and, as of December 31, 2013, PrimeLending 's net worth exceeded the amounts required by both HUD and GNMA.

Insurance

The statutory financial statements of the Company 's insurance subsidiaries, which are domiciled in the State of Texas, are presented on the basis of accounting practices prescribed or permitted by the Texas Department of Insurance. Texas has adopted the National Association of Insurance Commissioners (NAIC) statutory accounting practices as the basis of its statutory accounting practices with certain differences that are not significant to the insurance company subsidiaries ' statutory equity.

A summary of statutory capital and surplus and statutory net income (loss) of each insurance subsidiary is as follows (in thousands).

	December 31,	
2013	2012	

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

Capital and surplus:			
National Lloyds Insurance Company	\$	98,602	\$ 94,558
American Summit Insurance Company		26,452	25,761

		Year Ended December 31,		
		2013	2012	2011
Statutory net income (loss):				
National Lloyds Insurance Company	\$	3,583	\$ (3,858)	\$ (133)
American Summit Insurance Company		521	972	(541)

Regulations of the Texas Department of Insurance require insurance companies to maintain minimum levels of statutory surplus to ensure their ability to meet their obligations to policyholders. At December 31, 2013, the Company's insurance subsidiaries had statutory surplus in excess of the minimum required.

The NAIC has adopted a risk based capital (RBC) formula for insurance companies that establishes minimum capital requirements indicating various levels of available regulatory action on an annual basis relating to insurance risk, asset credit risk, interest rate risk and business risk. The RBC formula is used by the NAIC and certain state insurance regulators as an early warning tool to identify companies that require additional scrutiny or regulatory action. At December 31, 2013, the Company's insurance subsidiaries' RBC ratio exceeded the level at which regulatory action would be required.

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

22. Stockholders' Equity

The Bank is subject to certain restrictions on the amount of dividends it may declare without prior regulatory approval. At December 31, 2013, \$148.7 million of its earnings was available for dividend declaration without prior regulatory approval.

At December 31, 2013, the maximum aggregate dividend that may be paid to NLC from its insurance company subsidiaries in 2014 without regulatory approval is approximately \$12.5 million.

Hilltop Series B Preferred Stock

On November 29, 2012, Hilltop filed with the State Department of Assessments and Taxation of the State of Maryland articles supplementary for the Hilltop Series B Preferred Stock, setting forth its terms. Holders of the Hilltop Series B Preferred Stock are entitled to noncumulative cash dividends at a fluctuating dividend rate based on Hilltop's level of qualified small business lending. The Hilltop Series B Preferred Stock is non-voting, except in limited circumstances, and ranks senior to Hilltop's common stock with respect to the payment of dividends and distribution of assets upon any liquidation, dissolution or winding up of Hilltop.

As discussed in Note 2, and as a result of the PlainsCapital Merger, each outstanding share of PlainsCapital Non-Cumulative Perpetual Preferred Stock, Series C, all of which were held by the U.S. Treasury, was converted into one share of Hilltop Series B Preferred Stock.

The terms of the Hilltop Series B Preferred Stock restrict Hilltop's ability to pay dividends on, make distributions with respect to, or redeem, purchase or acquire, or make a liquidation payment on its common stock and other Hilltop capital stock ranking junior to the Hilltop Series B Preferred Stock, and on other preferred stock and other stock ranking on a parity with the Hilltop Series B Preferred Stock, in the event that Hilltop does not declare dividends on the Hilltop Series B Preferred Stock during any dividend period.

The terms of the Hilltop Series B Preferred Stock provide for the payment of non-cumulative dividends on a quarterly basis. The dividend rate, as a percentage of the liquidation amount, fluctuated until December 31, 2013 based upon changes in the level of qualified small business lending (QSBL) by the Bank.

The shares of Hilltop Series B Preferred Stock are senior to shares of the Company's common stock with respect to dividends and liquidation preference, and qualify as Tier 1 Capital for regulatory purposes. At December 31, 2013 and 2012, \$114.1 million of Hilltop Series B Preferred

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

Stock was outstanding.

The dividend rate on the Hilltop Series B Preferred Stock was 4.706% at December 31, 2013. From January 1, 2014 until March 26, 2016, the dividend rate is fixed at 5.0% based upon our level of QSBL at September 30, 2013. Beginning March 27, 2016, the dividend rate on any outstanding shares of Hilltop Series B Preferred Stock will be fixed at nine percent (9%) per annum.

As long as shares of Hilltop Series B Preferred Stock remain outstanding, Hilltop may not pay dividends to its common stockholders (nor may Hilltop repurchase or redeem any shares of its common stock) during any quarter in which the Company fails to declare and pay dividends on the Hilltop Series B Preferred Stock and for the next three quarters following such failure. In addition, under the terms of the Hilltop Series B Preferred Stock, Hilltop may only declare and pay dividends on its common stock (or repurchase shares of Hilltop common stock), if, after payment of such dividend, the dollar amount of Hilltop's Tier 1 capital would be at least ninety percent (90%) of Tier 1 capital as of September 27, 2011, excluding any charge-offs and redemptions of the Hilltop Series B Preferred Stock.

The Company may redeem the Hilltop Series B Preferred Stock at any time at its option, at a redemption price of 100% of the liquidation amount plus accrued but unpaid dividends, subject to the approval of the Company's federal banking regulator.

23. Other Noninterest Income and Expense

The following tables show the components of other noninterest income and expense (in thousands).

	Year Ended December 31,		
	2013	2012	2011
Other noninterest income:			
Revenue from check and stored value cards	\$ 4,250	\$ 275	\$
Net loss from trading securities portfolio	(2,773)	(646)	
Change in fair value of FSC derivatives	11,427	238	
Trust fees	5,050	411	
Service charges on depositor accounts	11,376	724	
Commission and insurance agency income	2,765	2,159	2,645
Direct bill fees and insurance service fee income	4,613	4,109	4,140
Other	7,962	1,303	
	\$ 44,670	\$ 8,573	\$ 6,785
Other noninterest expense:			
Marketing	\$ 17,257	\$ 2,245	\$
Data processing	17,922	4,033	434
Printing, stationery and supplies	4,583	4,033	
Funding fees	4,403	735	
Unreimbursed loan closing costs	30,095	5,944	
Amortization of intangible assets	11,087	1,986	1,525
Acquisition costs	117	6,570	2,603
Management fees		1,025	1,098
Accounting fees	5,455	2,269	852
Other professional services	37,806	5,004	412
Other	59,222	524	2,869
	\$ 187,947	\$ 34,368	\$ 9,793

24. Derivative Financial Instruments

The Company uses various derivative financial instruments to mitigate interest rate risk. The Bank's interest rate risk management strategy involves effectively modifying the re-pricing characteristics of certain assets and liabilities so that changes in interest rates do not adversely affect the net interest margin. PrimeLending has interest rate risk relative to IRLCs and its inventory of mortgage loans held for sale. PrimeLending is exposed to such rate risk from the time an IRLC is made to an applicant to the time the related mortgage loan is sold. To mitigate interest rate risk, PrimeLending executes forward commitments to sell mortgage-backed securities (MBSs). FSC uses forward commitments to both purchase and sell MBSs to facilitate customer transactions and as a means to hedge related exposure to interest rate risk in

certain inventory positions.

Non-Hedging Derivative Instruments and the Fair Value Option

As discussed in Note 3 to the consolidated financial statements, the Company has elected to measure substantially all mortgage loans held for sale at fair value under the provisions of the Fair Value Option. The election provides the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without applying complex hedge accounting provisions. The fair values of PrimeLending's IRLCs and forward commitments are recorded in other assets or other liabilities, as appropriate, and changes in the fair values of these derivative instruments produced a net gain of \$8.2 million for the year ended December 31, 2013 and a net loss of \$5.9 million the month ended December 31, 2012, which were recorded as a component of net gains from sale of loans and other mortgage production income. Changes in fair value are attributable to changes in the volume of IRLCs, mortgage loans held for sale, commitments to purchase and sell MBSs and changes in market interest rates. Changes in market interest rates also conversely affect the value of PrimeLending's mortgage loans held for sale, which are measured at fair value under the Fair Value Option. The effect of the change in market interest rates on PrimeLending's loans held for sale is discussed in Note 3 to the consolidated financial statements. The fair values of FSC's derivative instruments are recorded in other assets or other liabilities, as appropriate, and

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

changes in the fair values of FSC's derivatives produced net gains of \$11.4 million and \$0.2 million for the year ended December 31, 2013 and the month ended December 31, 2012, respectively, which were recorded as a component of other noninterest income.

Derivative positions are presented in the following table (in thousands).

Derivative instruments:					
IRLCs	\$	602,467	\$	12,151	\$ 968,083 \$ 15,150
Commitments to purchase MBSs		236,305		(109)	165,128 466

Securities failed to receive	5,523	31,474
Clearing organizations	4,390	
	\$ 129,678	\$ 187,990

27. Deferred Policy Acquisition Cost

Policy acquisition expenses, primarily commissions, premium taxes and underwriting expenses related to the successful issuance of a new or renewal policy incurred by NLC are deferred and charged against income ratably over the terms of the related policies. A summary of the activity in deferred policy acquisition costs is as follows (in thousands).

	Year Ended December 31,	
	2013	2012
Balance, beginning of year	\$ 19,812	\$ 19,182
Acquisition expenses capitalized	41,771	39,387
Amortization charged to income	(40,592)	(38,757)
Balance, end of year	\$ 20,991	\$ 19,812

Amortization is included in policy acquisition and other underwriting expenses in the accompanying consolidated statements of operations.

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

28. Reserves for Unpaid Losses and Loss Adjustment Expenses

Information regarding the reserve for unpaid losses and LAE are as follows (in thousands).

	2013	Year Ended December 31, 2012	2011
Balance, beginning of year	\$ 34,012	\$ 44,835	\$ 58,882
Less reinsurance recoverables	(10,385)	(25,083)	(43,773)
Net balance, beginning of year	23,627	19,752	15,109
Incurring related to:			
Current year	110,096	109,328	97,742
Prior years	659	(169)	(1,008)
Total incurred	110,755	109,159	96,734
Payments related to:			
Current year	(96,284)	(90,743)	(83,266)
Prior years	(15,138)	(14,541)	(8,825)
Total payments	(111,422)	(105,284)	(92,091)
Net balance, end of year	22,960	23,627	19,752
Plus reinsurance recoverables	4,508	10,385	25,083
Balance, end of year	\$ 27,468	\$ 34,012	\$ 44,835

The decrease in reserves at December 31, 2013 as compared to December 31, 2012 of \$6.5 million is primarily due recovery of reinsurance recoverables outstanding at December 31, 2012 and increased loss payments. The decrease in reserves at December 31, 2012 as compared to December 31, 2011 of \$10.8 million is primarily due to the significant subsequent payment and recovery of those reinsurance recoverables outstanding at December 31, 2011.

29. Reinsurance Activity

NLC limits the maximum net loss that can arise from large risks or risks in concentrated areas of exposure by reinsuring (ceding) certain levels of risk. Substantial amounts of business are ceded, and these reinsurance contracts do not relieve NLC from its obligations to policyholders. Such reinsurance includes quota share, excess of loss, catastrophe, and other forms of reinsurance on essentially all property and casualty lines of insurance. Net insurance premiums earned, losses and LAE and policy acquisition and other underwriting expenses are reported net of the amounts related to reinsurance ceded to other companies. Amounts recoverable from reinsurers related to the portions of the liability for losses and LAE and unearned insurance premiums ceded to them are reported as assets. Failure of reinsurers to honor their obligations could result in losses to NLC; consequently, allowances are established for amounts deemed uncollectible as NLC evaluates the financial condition of its

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

reinsurers and monitors concentrations of credit risk arising from similar geographic regions, activities, or economic characteristics of the reinsurers to minimize its exposure to significant losses from reinsurer insolvencies. At December 31, 2013, reinsurance receivables have a carrying value of \$5.2 million, which is included in other assets within the consolidated balance sheet. There was no allowance for uncollectible accounts at December 31, 2013, based on NLC's quality requirements.

	Year Ended December 31,		
	2013	2012	2011
Loss and LAE incurred	\$ 117,089	\$ 115,347	\$ 92,655
Reinsurance recoverables	(6,334)	(6,188)	4,079
Net loss and LAE incurred	\$ 110,755	\$ 109,159	\$ 96,734

Multi-line excess of loss coverage

In addition to the catastrophe reinsurance noted below, both NLIC and ASIC participate in an excess of loss program with General Reinsurance Corporation. The General Reinsurance Corporation program is limited to each risk with respect to property and liability in the amount of \$700,000 for each of NLIC and ASIC. Each of NLIC and ASIC retain \$300,000 in this program. Effective January 1, 2014, the program limited

each risk for property and liability in the amount of \$500,000 for each of NLIC and ASIC, with the retention increasing to \$500,000.

Catastrophic coverage

NLC's liabilities for losses and loss adjustment expenses include liabilities for reported losses, liabilities for incurred but not reported, or IBNR, losses and liabilities for loss adjustment expenses, or LAE, less a reduction for reinsurance recoverables related to those liabilities. The amount of liabilities for reported claims is based primarily on a claim-by-claim evaluation of coverage, liability, injury severity or scope of property damage, and any other information considered relevant to estimating exposure presented by the claim. The amounts of liabilities for IBNR losses and LAE are estimated on the basis of historical trends, adjusted for changes in loss costs, underwriting standards, policy provisions, product mix and other factors. Estimating the liability for unpaid losses and LAE is inherently judgmental and is influenced by factors that are subject to significant variation. Liabilities for LAE are intended to cover the ultimate cost of settling claims, including investigation and defense of lawsuits resulting from such claims. Based upon the contractual terms of the reinsurance agreements, reinsurance recoverables offset, in part, NLC's gross liabilities.

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

At December 31, 2013, NLC has catastrophic excess of loss reinsurance coverage of losses per event in excess of \$8 million retention by NLIC and \$1.5 million retention by ASIC. ASIC maintains an underlying layer of coverage, providing \$6.5 million in excess of its \$1.5 million retention to bridge to the primary program. The reinsurance in excess of \$8 million is comprised of four layers of protection: \$17 million in excess of \$8 million retention; \$25 million in excess of \$25 million loss; \$50 million in excess of \$50 million loss and \$40 million (\$70 million through June 30, 2013) in excess of \$100 million loss. NLIC and ASIC retain no participation in any of the layers, beyond the first \$8 million and \$1.5 million, respectively. At December 31, 2013, total retention for any one catastrophe that affects both NLIC and ASIC was limited to \$8 million in the aggregate.

Effective July 1, 2013, NLC renewed its catastrophic reinsurance contract for its third and fourth layers of reinsurance for a two year period. In the contract renewal, the coverage provided by the fourth layer changed to reflect the reduction of exposure in Texas primarily as a result of NLIC exiting the Texas coast and reducing its exposure in Harris County, Texas. The coverage provides \$40 million in excess of \$100 million loss, resulting in catastrophic excess of loss reinsurance coverage up to \$140 million.

Effective January 1, 2014, NLC renewed its reinsurance contract for its first and second layers of reinsurance for an eighteen month period. The projected premiums on these treaties for NLIC and ASIC are \$2.7 million and \$1.6 million, respectively, in 2014. Additionally, NLC purchased an underlying excess of loss contract that provides \$10 million aggregate coverage for sub-catastrophic events. The contract has a 66% subscription level, with a projected premium of \$2.4 million in 2014.

During 2013, NLC experienced two significant catastrophes that resulted in losses in excess of retention at NLIC, as compared to one significant catastrophe during 2012 and none during 2011. NLC did not experience any significant catastrophe that resulted in losses in excess of retention at ASIC during 2013, 2012 or 2011. The two tornado, hail and wind storms that exceeded retention in 2013 had incurred losses of \$18.3 million. The Texas hail storm that exceeded retention in 2012 had incurred losses of \$8.3 million. Gross losses from other prior year catastrophic events, including Hurricanes Ike and Dolly, was \$0.8 million, as compared to favorable development of \$7.0 million in 2011. These losses have no effect on net loss and LAE incurred because the catastrophic events exceeded retention levels and are fully recoverable. The primary financial effect beyond the reinsurance retention is additional reinstatement premium payable to the affected reinsurers. Reinstatement premiums during 2013, 2012 and 2011 of \$0.3 million, \$0.5 million and \$0.1 million, respectively, are recorded as ceded premiums.

30. Segment and Related Information

The Company currently has four reportable business segments that are organized primarily by the core products offered to the segments respective customers. These segments reflect the manner in which operations are managed and the criteria used by the Company's chief operating decision maker function to evaluate segment performance, develop strategy and allocate resources. The chief operating decision maker function consists of the President and Chief Executive Officer of the Company and the Chief Executive Officer of PlainsCapital. During the fourth quarter of 2013, we began presenting certain amounts previously allocated to the four reportable business segments within Corporate to better reflect our internal organizational structure. This change had no impact on the Company's consolidated results of operations. The Company's historical segment disclosures have been revised to conform to the current presentation.

The banking segment includes the operations of the Bank, which, since September 14, 2013, includes the operations acquired in the FNB Transaction. The mortgage origination segment is comprised of PrimeLending. The insurance segment is composed of NLC. The financial advisory segment is composed of First Southwest.

Corporate includes certain activities not allocated to specific business segments. These activities include holding company financing and investing activities, and management and administrative services to support the overall operations of the Company including, but not limited to, certain executive management, corporate relations, legal, finance, and acquisition costs not allocated to business segments.

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

For each of the years ended December 31, 2012 and 2011, the computation of diluted loss per common share did not include 6,208,000 equivalent shares of the Notes as the equivalent exchange rate per share was in excess of the average stock prices for the noted periods. Additionally, options to purchase 688,000 and 199,000 weighted average outstanding shares, respectively, of Hilltop's common stock were not included in the computation of diluted loss per common share for the years ended December 31, 2012 and 2011, as their inclusion would have been anti-dilutive.

32. Condensed Financial Statements of Parent

Condensed financial statements of Hilltop (parent only) follow (in thousands). Investments in subsidiaries are determined using the equity method of accounting.

Condensed Statements of Operations

	Year Ended December 31,		
	2013	2012	2011
Investment income	\$ 6,635	\$ 7,035	\$ 4,284

Net change in cash and cash equivalents	(40,898)	(328,620)	(68,030)
Cash and cash equivalents, beginning of year	204,754	533,374	601,404
Cash and cash equivalents, end of year	\$ 163,856	\$ 204,754	\$ 533,374

During September 2013, Hilltop contributed capital of \$35.0 million to the Bank to provide additional capital in connection with the FNB Transaction.

33. Recently Issued Accounting Standards

In July 2013, the FASB issued ASU No. 2013-11 to require an entity to present an unrecognized tax benefit, or portion thereof, in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward. However, to the extent a net operating loss carryforward, a similar tax loss, or a tax credit carryforward is not available at the reporting date under the tax law

Edgar Filing: Hilltop Holdings Inc. - Form 10-K

of the applicable jurisdiction to settle any additional income taxes that would result from the disallowance of a tax position, or the tax law of the applicable jurisdiction does not require the entity to use, and the entity does not intend to use, the deferred tax asset for such purpose, the unrecognized tax benefit should be presented in the financial statements as a liability and should not be combined with deferred tax assets. The amendment is effective for the Company on January 1, 2014 and is to be applied prospectively to all unrecognized tax benefits that exist at the balance sheet date, although retrospective adoption is permitted. Adoption of the amendment is not expected to have a significant effect on the Company's consolidated financial statements.

In February 2013, the FASB issued an amendment to the Comprehensive Income Topic to improve the reporting of reclassifications out of comprehensive income (loss). The amendments require entities to present, either parenthetically on the face of the financial statements or in a single footnote, the effect of significant reclassifications out of each component of accumulated other comprehensive income (loss) by the respective line items of net income (loss) affected by the reclassification. The amendment became effective for the Company on January 1, 2013, and its adoption did not have any effect on the Company's consolidated financial statements as the Company had no such reclassifications during the periods presented.

Notes to Consolidated Financial Statements (continued)

In October 2012, the FASB issued ASU No. 2012-06 to clarify that when an entity recognizes an indemnification asset as a result of a government-assisted acquisition of a financial institution and subsequently, a change in the cash flows expected to be collected on the indemnification asset occurs, as a result of a change in cash flows expected to be collected on the assets subject to indemnification, the reporting entity should subsequently account for the change in the measurement of the indemnification asset on the same basis as the change in the assets subject to indemnification. Any amortization of changes in value should be limited to the contractual term of the indemnification agreement. The amendment became effective for the Company on January 1, 2013, which was prior to the FNB Transaction, and its adoption did not have a material impact on the Company's consolidated financial statements.

In December 2011, the FASB amended the Balance Sheet Topic of the ASC to require enhanced disclosures about the nature and effect or potential effect of an entity's rights of setoff associated with its financial and derivative instruments. In January 2013, the FASB issued an update to the amendments, which narrowed the scope of the financial instruments for which the enhanced disclosures are applicable. The amendments became effective for the Company on January 1, 2013, and its adoption did not have a significant effect on the Company's financial position, results of operations or cash flows. See Note 25 to the consolidated financial statements for the disclosures required by this Topic.

34. Selected Quarterly Financial Information (Unaudited)

Selected quarterly financial information is summarized as follows (in thousands, except per share data).

	Year Ended December 31, 2013				
	Fourth Quarter	Third Quarter (revised)	Second Quarter	First Quarter	Full Year
Interest income	\$ 98,601	\$ 79,702	\$ 76,168	\$ 74,604	\$ 329,075

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

Management made significant estimates and exercised significant judgment in estimating fair values and accounting associated with the FNB Transaction during the third quarter of 2013 due to the short time period between the Bank Closing Date and September 30, 2013. The Bank Closing Date valuations related to loans, FDIC Indemnification Asset, covered OREO, other intangible assets, assumed liabilities and taxes were considered preliminary at September 30, 2013. The operations of FNB were included in the Company's operating results beginning September 14, 2013 and such operations included a preliminary pre-tax bargain purchase gain of \$3.3 million as disclosed in the Company's Quarterly Report on Form 10-Q filed with the SEC on November 8, 2013. During the quarter ended December 31, 2013, the estimated fair values of certain identifiable assets acquired and liabilities assumed as of the Bank Closing Date were adjusted as a result of additional information obtained primarily related to the fair values of loans, covered OREO, FDIC Indemnification Asset, premises and equipment and other intangible assets. These adjustments resulted in an increase in the preliminary bargain purchase gain associated with the FNB Transaction to \$12.6 million, before taxes of \$4.5 million. This change is reflected in the above table within noninterest income during the third quarter of the year ended December 31, 2013. In the aggregate, the adjustments to the preliminary bargain purchase gain and revisions to the accretion of discount on loans and other items increased net income for the quarter ended September 30, 2013 by \$6.3 million as compared to amounts previously reported in the Company's Quarterly Report on Form 10-Q for the quarter ended September 30, 2013. As discussed in Note 2 to the consolidated financial statements, due to the short time period between the Bank Closing Date and December 31, 2013, the real estate appraisal validation exercise remains outstanding and the Bank Closing Date valuations related to covered OREO and FDIC Indemnification Asset are considered preliminary and could differ significantly when finalized.

As discussed in Note 2 to the consolidated financial statements, the operating results of Hilltop for the fourth quarter ended December 31, 2012 include the results from the operations acquired in the PlainsCapital Merger for the month ended December 31, 2012. PlainsCapital contributed \$8.4 million of net earnings during the fourth quarter of 2012.

35. Subsequent Event

On January 9, 2014, the Company delivered to the President and Chief Executive Officer of SWS a letter in which the Company proposed to acquire all of the outstanding shares of SWS common stock that it does not already own for \$7.00 per share in 50% cash and 50% Company common stock. The cash portion of the offer would be funded through available cash. There is no assurance that the Company will enter into a merger agreement with SWS or that any transaction will be consummated.
