#### Table of Contents

PNM RESOURCES, INC. AND SUBSIDIARIES PUBLIC SERVICE COMPANY OF NEW MEXICO AND SUBSIDIARIES TEXAS-NEW MEXICO POWER COMPANY AND SUBSIDIARIES NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

#### (1) Significant Accounting Policies and Responsibility for Financial Statements

#### **Financial Statement Preparation**

In the opinion of management, the accompanying unaudited interim Condensed Consolidated Financial Statements reflect all normal and recurring accruals and adjustments that are necessary to present fairly the consolidated financial position at March 31, 2012 and December 31, 2011, and the consolidated results of operations, comprehensive income, and cash flows for the three months ended March 31, 2012 and 2011. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could ultimately differ from those estimated. The Notes to Condensed Consolidated Financial Statements include disclosures for PNMR, PNM, and TNMP. For discussion purposes, this report uses the term "Company" when discussing matters of common applicability to PNMR, PNM, and TNMP. Discussions regarding only PNMR, PNM, or TNMP are so indicated. Certain amounts in the 2011 Condensed Consolidated Financial Statements and Notes thereto have been reclassified to conform to the 2012 financial statement presentation.

These Condensed Consolidated Financial Statements are unaudited, and certain information and note disclosures normally included in the annual Consolidated Financial Statements have been condensed or omitted, as permitted under the applicable rules and regulations. Readers of these financial statements should refer to PNMR's, PNM's, and TNMP's audited Consolidated Financial Statements and Notes thereto that are included in their respective 2011 Annual Reports on Form 10-K. Weather causes the Company's results of operations to be seasonal in nature and the results of operations presented in the accompanying Condensed Consolidated Financial Statements are not necessarily representative of operations for an entire year.

GAAP defines subsequent events as events or transactions that occur after the balance sheet date but before financial statements are issued or are available to be issued. Based on their nature, magnitude, and timing, certain subsequent events may be required to be reflected at the balance sheet date and/or required to be disclosed in the financial statements. The Company has evaluated subsequent events as required by GAAP.

#### Principles of Consolidation

The Condensed Consolidated Financial Statements of each of PNMR, PNM, and TNMP include their accounts and those of subsidiaries in which that entity owns a majority voting interest. PNM also consolidates the PVNGS Capital Trust and Valencia. PNM owns undivided interests in several jointly-owned power plants and records its pro-rata share of the assets, liabilities, and expenses for those plants.

PNMR shared services' administrative and general expenses, which represent costs that are primarily driven by corporate level activities, are charged to the business segments. These services are billed at cost, except those that were billed to Optim Energy, which included a profit element. Other significant intercompany transactions between PNMR, PNM, and TNMP include transmission and distribution services; lease, interest, and income tax sharing payments; and dividends paid on common stock. All intercompany transactions and balances have been eliminated. See Note 12.

# Dividends on Common Stock

PNM and TNMP declared no common stock dividends to PNMR in the three months ended March 31, 2012. PNM declared cash dividends on its common stock to PNMR of \$39.1 million in December 2010, which was paid in January 2011, and \$4.6 million in March 2011, which was paid in April 2011. TNMP declared and paid cash dividends to PNMR of \$2.9 million in the three months ended March 31, 2011. The TNMP dividend was recorded as a reduction of its paid-in-capital.

# (2) Variable Interest Entities

GAAP determines how an enterprise evaluates and accounts for its involvement with variable interest entities, including determining the primary beneficiary of a variable interest entity, by focusing primarily on whether the enterprise has the power to direct the activities that most significantly impact the economic performance of a variable interest entity. GAAP also requires

#### Table of Contents

## PNM RESOURCES, INC. AND SUBSIDIARIES PUBLIC SERVICE COMPANY OF NEW MEXICO AND SUBSIDIARIES TEXAS-NEW MEXICO POWER COMPANY AND SUBSIDIARIES NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

continual reassessment of the primary beneficiary of a variable interest entity. Additional information concerning PNM's variable interest entities is contained in Note 9 of the Notes to Consolidated Financial Statements in the 2011 Annual Reports on Form 10-K.

PNM has a PPA to purchase all of the electric capacity and energy from Valencia, a 145 MW natural gas-fired power plant near Belen, New Mexico through May 2028. A third-party built, owns, and operates the facility while PNM is the sole purchaser of the electricity generated. PNM is obligated to pay fixed O&M and capacity charges in addition to variable O&M charges under this PPA. For each of the three month periods ended March 31, 2012 and 2011, PNM paid \$4.6 million for fixed charges and \$0.1 million for variable charges. PNM does not have any other financial obligations related to Valencia. The assets of Valencia can only be used to satisfy obligations of Valencia and creditors of Valencia do not have any recourse against PNM's assets. PNM has concluded that the third party entity that owns Valencia is a variable interest entity and that PNM is the primary beneficiary of the entity under GAAP. As the primary beneficiary, PNM consolidates the entity in its financial statements. The assets and liabilities of Valencia set forth below are immaterial to PNM and, therefore, not shown separately on the Condensed Consolidated Balance Sheets. The owner's equity and net income of Valencia are considered attributable to non-controlling interest.

Summarized financial information for Valencia is as follows:

PNM leases interests in Units 1 and 2 of PVNGS under arrangements, which were entered into in 1985 and 1986, that are accounted for as operating leases. PNM is not the legal or tax owner of the leased assets. PNM has an option to purchase the leased assets at appraised value at the end of the leases, but does not have a fixed price purchase option and does not provide residual value guarantees. PNM has options to renew the leases at fixed rates set forth in the leases for two years beyond the termination of the original lease terms. The option periods on certain leases may be further extended for up to an additional six years if the appraised remaining useful lives and fair value of the leased

assets are greater than parameters set forth in the leases. PNM is only obligated to make payments to the trusts for the scheduled semi-annual lease payments, which, net of amounts that will be returned to PNM through its ownership in related lessor notes, aggregate \$93.7 million as of March 31, 2012 over the remaining terms of the leases. Under certain circumstances (for example, final shutdown of the plant, the NRC issuing specified violation orders with respect to PVNGS, or the occurrence of specified nuclear events), PNM would be required to make specified payments to the beneficial owners and take title to the leased interests. If such an event had occurred as of March 31, 2012, PNM could have been required to pay the beneficial owners up to approximately \$174.2 million, which would result in PNM taking ownership of the leased assets and termination of the leases. PNM has no other financial obligations or commitments to the trusts or the beneficial owners. Creditors of the trusts have no recourse to PNM's assets other than with respect to the contractual lease

#### Table of Contents

# PNM RESOURCES, INC. AND SUBSIDIARIES PUBLIC SERVICE COMPANY OF NEW MEXICO AND SUBSIDIARIES TEXAS-NEW MEXICO POWER COMPANY AND SUBSIDIARIES NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

payments. PNM has no additional rights to the assets of the trusts other than the use of the leased assets. PNM has evaluated the PVNGS lease arrangements and concluded that it does not have the power to direct the activities that most significantly impact the economic performance of the trusts and, therefore, is not the primary beneficiary of the trusts under GAAP. PNM has recorded no assets or liabilities related to the trusts other than the accrual of lease payments between the scheduled payment dates, which were \$11.8 million at March 31, 2012 and \$26.0 million at December 31, 2011 and are included in other current liabilities on the Condensed Consolidated Balance Sheets. For additional information regarding these leases, see Risk Factors, MD&A – Off Balance Sheet Arrangements and Note 7 of the Notes to Consolidated Financial Statements in the 2011 Annual Reports on Form 10-K.

PNM has a PPA covering the entire output of Delta, which is a variable interest under GAAP. This arrangement was entered into prior to December 31, 2003 and PNM has been unsuccessful in obtaining the information necessary to determine if it is the primary beneficiary of the entity that owns Delta, or to consolidate that entity if it were determined that PNM is the primary beneficiary. Accordingly, PNM is unable to make those determinations and, as provided in GAAP, continues to account for this PPA as an operating lease. PNM makes fixed and variable payments to Delta under the PPA. For the three months ended March 31, 2012 and 2011, PNM incurred fixed payments of \$1.5 million and \$1.5 million and variable payments of \$0.1 million and \$0.2 million under the PPA. PNM's only quantifiable obligation under the PPA is to make the fixed payments, which as of March 31, 2012, aggregated \$49.6 million through the end of the PPA in 2020. PNM will also pay variable costs, which cannot be quantified since the amounts are based on how much the generating plant is in operation. PNM has no other obligations or commitments with respect to Delta.

# (3) Segment Information

The following segment presentation is based on the methodology that management uses for making operating decisions and assessing performance of its various business activities. A reconciliation of the segment presentation to the GAAP financial statements is provided.

#### **PNM Electric**

PNM Electric includes the retail electric utility operations of PNM that are subject to traditional rate regulation by the NMPRC. PNM Electric provides integrated electricity services that include the generation, transmission, and distribution of electricity for retail electric customers in New Mexico. PNM Electric also includes the generation and sale of electricity into the wholesale market as well as providing transmission services to third parties. The sale of electricity includes the asset optimization of PNM's jurisdictional assets as well as the capacity excluded from retail rates. FERC has jurisdiction over wholesale and transmission rates.

#### **TNMP** Electric

TNMP Electric is an electric utility providing regulated transmission and distribution services in Texas under the TECA. TNMP's operations are subject to traditional rate regulation by the PUCT.

#### First Choice

First Choice, which was sold by PNMR on November 1, 2011 (Note 14), operated as a certified retail electric provider. First Choice provided electricity to residential, small commercial, and governmental customers. Although

First Choice was regulated in certain respects by the PUCT, it was not subject to traditional rate regulation.

Corporate and Other

The Corporate and Other segment includes PNMR holding company activities, primarily related to corporate level debt and PNMR Services Company.

The following tables present summarized financial information for PNMR by segment. PNM and TNMP each operate in only one segment. Therefore, tabular segment information is not presented for PNM and TNMP.

(4) Fair Value of Derivative and Other Financial Instruments

Energy Related Derivative Contracts

#### Overview

The primary objective for the use of derivative instruments, including energy contracts, options, and futures, is to manage price risk associated with forecasted purchases of energy or fuel used to generate electricity, or to manage anticipated generation capacity in excess of forecasted demand from existing customers. The Company's energy related derivative contracts are designed to manage commodity risk. Additional information concerning the Company's energy related derivative contracts, including how commodity risk is managed, is contained in Note 8 of the Notes to Consolidated Financial Statements in the 2011 Annual Reports on Form 10-K.

On November 1, 2011, PNMR completed the sale of First Choice. See Note 14. Accordingly, First Choice information after October 31, 2011 is not included. The difference between PNMR and PNM amounts represents First Choice.

#### Accounting for Derivatives

Energy contracts that meet the definition of a derivative under GAAP and do not qualify, or are not designated, for the normal sales and purchases exception are recorded on the balance sheet at fair value at each period end. The changes in fair value are recognized in earnings unless specific hedge accounting criteria are met and elected. Normal sales and purchases are not marked to market and are reflected in results of operations when the underlying transactions settle. The Company had no designated cash flow or fair value hedges related to commodity derivatives in the year ended December 31, 2011 and the three months ended March 31, 2012.

The contracts recorded at fair value that do not qualify or are not designated for cash flow hedge accounting are classified as economic hedges. Economic hedges are defined as derivative instruments, including long-term power agreements, used to economically hedge generation assets, purchased power and fuel costs, and customer load requirements. Changes in the fair value of economic hedges are reflected in results of operations and are classified between operating revenues and cost of energy according to the intent of the hedge. The Company has no trading transactions.

The Company does not offset fair value, cash collateral, and accrued payable or receivable amounts recognized for derivative instruments under master netting arrangements. At March 31, 2012 and December 31, 2011, amounts posted as cash collateral under margin arrangements were \$3.5 million and \$1.8 million for both PNMR and PNM. Cash collateral amounts are included in other current assets on the Condensed Consolidated Balance Sheets. At March 31, 2012 and December 31, 2011, PNMR and PNM had no legal right to reclaim cash collateral or obligations to return cash collateral.

## **Commodity Derivatives**

Commodity derivative instruments are summarized as follows:

	Economic Hedges				
	March 31,	December 31	,		
	2012	2011			
PNMR and PNM	(In thousands)	ousands)			
Current assets	\$7,003	\$3,713

#### Table of Contents

PNM RESOURCES, INC. AND SUBSIDIARIES PUBLIC SERVICE COMPANY OF NEW MEXICO AND SUBSIDIARIES TEXAS-NEW MEXICO POWER COMPANY AND SUBSIDIARIES NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

In April 2010, PNM received NMPRC approval of a hedging plan to manage fuel and purchased power costs related to customers covered by its FPPAC. The table above includes \$0.8 million of current assets and current liabilities at March 31, 2012, and \$0.5 million of current assets and current liabilities at December 31, 2011 related to this plan. The offsets to these amounts are recorded as regulatory assets and liabilities on the Condensed Consolidated Balance Sheets.

The following table presents the effect of commodity derivative instruments on earnings, excluding income tax effects.

	Economic Hedges			
	Three Months Ended March			
	31,			
	2012	2011		
PNMR	(In thousands)			
Electric operating revenues	\$5,218	\$1,144		
Cost of energy	(604)	4,680		
Total gain	\$4,614	\$5,824		
PNM				
Electric operating revenues	\$5,218	\$1,144		
Cost of energy	(604)	443		
Total gain	\$4,614	\$1,587		

Commodity contract volume positions are presented in Decatherms for gas related contracts and in MWh for power related contracts. The table below presents PNMR's and PNM's net buy (sell) volume positions:

	Economic Hedges		
	Decatherms	MWh	
March 31, 2012			
PNMR and PNM	1,275,000	(1,390,722	)
December 31, 2011			
PNMR and PNM	1,499,000	(366,448	)

In connection with managing its commodity risks, the Company enters into master agreements with certain counterparties. If the Company is in a net liability position under an agreement, some agreements provide that the counterparties can request collateral from the Company if the Company's credit rating is downgraded; other agreements provide that the counterparty may request collateral to provide it with "adequate assurance" that the Company will perform; and others have no provision for collateral.

The table below presents information about the Company's contingent requirements to provide collateral under commodity contracts having an objectively determinable collateral provision that are in net liability positions and are not fully collateralized with cash. Contractual liability represents commodity derivative contracts recorded at fair value on the balance sheet, determined on an individual contract basis without offsetting amounts for individual contracts that are in an asset position and could be offset under master netting agreements with the same counterparty.

The table only reflects cash collateral that has been posted under the existing contracts and does not reflect letters of credit under the Company's revolving credit facilities that have been issued as collateral. Net exposure is the net contractual liability for all contracts, including those designated as normal purchases and sales, offset by existing cash collateral and by any offsets available under master netting agreements, including both asset and liability positions.

## PNM RESOURCES, INC. AND SUBSIDIARIES PUBLIC SERVICE COMPANY OF NEW MEXICO AND SUBSIDIARIES TEXAS-NEW MEXICO POWER COMPANY AND SUBSIDIARIES NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

Contingent Feature – Credit Rating Downgrade	Contractual Liability (In thousands)	Existing Cash Collateral	Net Exposure

PNMR and PNM	\$4,036	\$—	\$4,036

Sale of Power from PVNGS Unit 3

Since January 1, 2011, PNM has been selling power from its interest in PVNGS Unit 3 daily at market prices. PNM has established fixed rates for the majority of these sales through the end of 2012 through hedging arrangements that are accounted for as economic hedges, and is partially hedged into 2013.

Non-Derivative Financial Instruments

The carrying amounts reflected on the Condensed Consolidated Balance Sheets approximate fair value for cash, receivables, and payables due to the short period of maturity. Available-for-sale securities are carried at fair value. Available-for-sale securities for PNMR and PNM consist of PNM assets held in the NDT for its share of decommissioning costs of PVNGS. PNMR and PNM do not have any unrealized losses on available-for-sale securities are presented in the following table.

	March 31, 2012		December 31	, 2011
	Unrealized Gains	Fair Value	Unrealized Gains	Fair Value
		(In thousands	5)	
Equity securities:

Table of Contents

## PNM RESOURCES, INC. AND SUBSIDIARIES PUBLIC SERVICE COMPANY OF NEW MEXICO AND SUBSIDIARIES TEXAS-NEW MEXICO POWER COMPANY AND SUBSIDIARIES NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

Held-to-maturity securities are those investments in debt securities that the Company has the ability and intent to hold until maturity. Held-to-maturity securities consist of the investment in PVNGS lessor notes and certain items within other investments, including the EIP lessor note.

The Company has no available-for-sale or held-to-maturity securities for which carrying value exceeds fair value. There are no impairments considered to be "other than temporary" that are included in AOCI and not recognized in earnings.

At March 31, 2012, the available-for-sale and held-to-maturity debt securities had the following final maturities:

	Fair Value				
	Available-for- <b>\$Hdt</b> d-to-Maturity

Over 10 years	41,222				
	\$76,745	\$104,817	\$95,682		

## Fair Value Disclosures

The Company determines the fair values of its derivative and other instruments based on the hierarchy established in GAAP, which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. GAAP describes three levels of inputs that may be used to measure fair value. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the reporting entity can access at the measurement date. Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. Level 3 inputs are unobservable inputs for the asset or liability. Level 3 inputs used in determining fair values for the Company consist of internal valuation models.

For NDT investments, Level 2 fair values are provided by the trustee utilizing a pricing service. The pricing provider predominantly uses the market approach using bid side market value based upon a hierarchy of information for specific securities or securities with similar characteristics. For commodity derivatives, Level 2 fair values are determined based on market observable inputs, which are validated using multiple broker quotes, including forward price, volatility, and interest rate curves to establish expectations of future prices. Credit valuation adjustments are made for estimated credit losses based on the overall exposure to each counterparty. For long-term debt, Level 2 fair values are provided by an external pricing service. The pricing service primarily utilizes quoted prices for similar debt in active markets when determining fair value. For investments categorized as Level 3, primarily the PVNGS lessor notes and other investments, fair values were determined by discounted cash flow models that take into consideration discount rates that are observable for similar type assets and liabilities.

The Company records any transfers between fair value hierarchy levels as of the end of each calendar quarter. There were no transfers between levels during the three months ended March 31, 2012 and 2011.

## PNM RESOURCES, INC. AND SUBSIDIARIES PUBLIC SERVICE COMPANY OF NEW MEXICO AND SUBSIDIARIES TEXAS-NEW MEXICO POWER COMPANY AND SUBSIDIARIES NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

## (5) Earnings Per Share

In accordance with GAAP, dual presentation of basic and diluted earnings per share is presented in the Condensed Consolidated Statements of Earnings of PNMR. Information regarding the computation of earnings per share is as follows:

	Three Months Ended	
	March 31,	
	2012	2011
	(In thousands	, except per
	share amount	s)
Net Earnings Attributable to PNMR	\$17,080	\$16,637
Average Number of Common Shares:		
Outstanding during period	79,654	86,673
Equivalents from convertible preferred stock (Note 7)		4,778
Vested awards of restricted stock	200	182
Average Shares - Basic	79,854	91,633
Dilutive Effect of Common Stock Equivalents <sup>(1)</sup> :		
Stock options and restricted stock	621	475
Average Shares - Diluted	80,475	92,108
Net Earnings Per Share of Common Stock:		
Basic	\$0.21	\$0.18
Diluted	\$0.21	\$0.18

<sup>(1)</sup> Excludes the effect of out-of-the-money options for 1,360,568 shares of common stock at March 31, 2012.

## (6) Stock-Based Compensation

Information concerning stock-based compensation under PNMR's Performance Equity Plan ("PEP") is contained in Note 13 of the Notes to Consolidated Financial Statements in the 2011 Annual Reports on Form 10-K. In 2011, the Company changed its approach to awarding stock-based compensation. As a result, no stock options have been granted in 2011 or 2012 and awards of restricted stock have increased.

## Stock Options

The following table summarizes activity in stock options for the three months ended March 31, 2012:

	Shares	Weighted- Average Exercise Price	Aggregate Intrinsic Value	Weighted- Average Remaining Contract Life
Outstanding at beginning of period	3,202,229	\$18.95		
Granted	_	\$—		
Exercised	(368,895	) \$13.57		

Forfeited	(2,667	) \$12.22					
Expired	(234,091	) \$25.65					
Outstanding at end of period	2,596,576	\$19.07	\$8,858,517 (1	<sup>)</sup> 4.78 years			
Exercisable at end of period	2,439,635	\$20.29	\$7,933,890	4.59 years			
<sup>(1)</sup> At March 31, 2012, the exercise price of 1,	360,568 outst	anding stock op	tions is greater that	in the closing price of			
PNMR common stock on that date; therefore, those options have no intrinsic value.							

## PNM RESOURCES, INC. AND SUBSIDIARIES PUBLIC SERVICE COMPANY OF NEW MEXICO AND SUBSIDIARIES TEXAS-NEW MEXICO POWER COMPANY AND SUBSIDIARIES NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

The following table provides additional information concerning stock options:

	Three Months Ended	
	March 31,	
	2012	2011
Weighted-average grant date fair value of options granted	\$—	\$—
Total fair value of options that vested (in thousands)	\$1,058	\$1,179
Total intrinsic value of options exercised (in thousands)	\$1,722	\$396

Restricted Stock and Performance Shares

PNMR has agreements with employees for awards of restricted stock subject to time vesting requirements as well as performance awards subject to achieving performance targets and, in some cases, time vesting. Compensation expense for restricted stock and performance stock awards is determined based on the market price of PNMR stock on the date of the agreements reduced by the present value of future dividends, which will not be received prior to vesting, applied to the total number of shares that are anticipated to vest, although the number of performance shares ultimately awarded cannot be determined until after the performance periods end.

The following table summarizes restricted stock activity, including performance shares, for the three months ended March 31, 2012:

	Shares	Weighted- Average Grant-Date Fair Value
Nonvested at beginning of period	418,730	\$12.36
Granted	293,039	\$14.33
Vested	(264,422	) \$12.22
Forfeited	(2,089	) \$11.44
Nonvested at end of period	445,258	\$13.57

The following table provides additional information concerning restricted stock, including performance shares:

	Three Month	ns Ended	
	March 31,		
	2012	2011	
Weighted-average grant date fair value of shares granted	\$14.33	\$12.90	
Total fair value of shares that vested (in thousands)	\$3,232	\$758	
Expected quarterly dividends per share	\$0.145	\$0.125	
Risk-free interest rate	0.43 %	6 1.20	%

Included as granted and vested in the above tables are 42,768 performance shares that were based upon achieving specific performance targets for the period 2009 through 2011. The Board approved these performance shares at maximum levels and the shares fully vested in March 2012. Also included as granted and vested in the tables above are 117,174 performance shares that were based upon achieving specific performance targets for 2011. The Board approved these performance shares at near maximum levels and the shares fully vested in March 2012.

PNMR also has performance share agreements that provide for performance targets through 2014. Excluded from the above tables are maximums of 167,382, 188,401, and 209,776 shares for performance periods ending in 2012, 2013, and 2014 that would be awarded if all performance criteria are achieved and all executives remain eligible. These awards would be fully vested upon award.

#### Table of Contents

## PNM RESOURCES, INC. AND SUBSIDIARIES PUBLIC SERVICE COMPANY OF NEW MEXICO AND SUBSIDIARIES TEXAS-NEW MEXICO POWER COMPANY AND SUBSIDIARIES NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

In March 2012, the Company entered into a retention award agreement with its Chairman, President, and Chief Executive Officer under which she would receive 135,000 shares of PNMR's common stock if the Company meets specific targets at the end of 2016 and she remains an employee of the Company. If the Company achieves specific targets at the end of 2014 and she remains an employee of the Company, she would receive 35,000 of the total shares at that time. The retention award was made under the PEP and was approved by the Board on February 28, 2012. The above tables do not include any shares under the retention award agreement.

#### (7) Capitalization

Information concerning financing activities is contained in Note 6 of the Notes to Consolidated Financial Statements in the 2011 Annual Reports on Form 10-K.

#### Short-term Debt

PNMR has a revolving credit financing capacity of \$300.0 million under the PNMR Revolving Credit Facility. PNM has a revolving credit financing capacity of \$400.0 million under the PNM Revolving Credit Facility. These facilities expire on October 31, 2016, and include two one-year extension options, subject to approval by the lenders and, with respect to the PNM Revolving Credit Facility, the NMPRC. PNMR also has a bi-lateral line of credit amounting to \$5.0 million that expires in August 2012. TNMP has a revolving credit facility with financing capacity of \$75.0 million under the TNMP Revolving Credit Facility that expires in December 2015. At March 31, 2012, the weighted average interest rate was 2.00% for the PNMR Revolving Credit Facility and 1.75% for the PNM Revolving Credit Facility. Short-term debt outstanding consisted of:

	March 31,	December 31,
Short-term Debt	2012	2011
	(In thousands)	
PNM – Revolving credit facility	\$44,100	\$66,000
TNMP – Revolving credit facility		
PNMR		
Revolving credit facility	105,700	16,700
Bi-lateral line of credit		
	\$149,800	\$82,700

At April 27, 2012, PNMR, PNM, and TNMP had \$181.7 million, \$331.4 million, and \$74.7 million of availability under their respective revolving credit facilities and bi-lateral line of credit, including reductions of availability due to outstanding letters of credit. Total availability at April 27, 2012, on a consolidated basis, was \$587.8 million for PNMR. As of April 27, 2012, TNMP had \$6.7 million in borrowings from PNMR under their intercompany loan agreement.

## **Financing Activities**

On April 4, 2012, PNM filed an application with the NMPRC requesting approval to refinance \$20.0 million of its currently outstanding PCRBs with new PCRBs anticipated to have a lower overall financing cost. PNM currently has

no commitments or arrangements regarding this proposed financing. Timing of the proposed financing will depend on market and other conditions. PNM also requested NMPRC authority to exercise the two one-year extension options under the PNM Revolving Credit Facility. The NMPRC is expected to reach a decision on PNM's requests on May 8, 2012.

Convertible Preferred Stock

PNMR had 477,800 shares of Series A convertible preferred stock outstanding through September 23, 2011 when it entered into an agreement to purchase all of the outstanding shares. The Series A convertible preferred stock was convertible into PNMR common stock in a ratio of 10 shares of common stock for each share of preferred stock and received dividends equivalent to dividends paid on PNMR common stock as if the preferred stock had been converted into common stock. The Series A convertible

#### Table of Contents

## PNM RESOURCES, INC. AND SUBSIDIARIES PUBLIC SERVICE COMPANY OF NEW MEXICO AND SUBSIDIARIES TEXAS-NEW MEXICO POWER COMPANY AND SUBSIDIARIES NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

preferred stock was entitled to vote on all matters voted upon by common stockholders, except for the election of the Board, and would have received distributions substantially equivalent to common stock in the event of liquidation of PNMR. The terms of the Series A convertible preferred stock resulted in it being substantially equivalent to common stock. Therefore, for earnings per share purposes, the number of common shares into which the Series A convertible preferred stock was convertible was included in the weighted average number of common shares outstanding for periods the Series A convertible preferred stock was outstanding. Similarly, dividends on the Series A convertible preferred stock were considered to be common dividends in the accompanying Condensed Consolidated Financial Statements.

#### (8) Pension and Other Postretirement Benefit Plans

PNMR and its subsidiaries maintain qualified defined benefit pension plans, postretirement benefit plans providing medical and dental benefits, and executive retirement programs ("PNM Plans" and "TNMP Plans"). PNMR maintains the legal obligation for the benefits owed to participants under these plans.

Information concerning pension and OPEB plans is contained in Note 12 of the Notes to Consolidated Financial Statements in the 2011 Annual Reports on Form 10-K. Annual net periodic benefit cost (income) for the plans is actuarially determined using the methods and assumptions set forth in that note and is recognized ratably throughout the year.

#### **PNM** Plans

The following table presents the components of the PNM Plans' net periodic benefit cost:

Pension Plan		OPEB Plan		Executive R Program	Retirement	
2012	2011	2012	2011	2012	2011	
(In thousands)						
\$—	\$—	\$54	\$65	\$—	\$—	
8,058	8,202	1,324	1,345	219	233

2,629	2,302	972	801	21	23	
79	79	(336	) (662 )			
\$441	\$1,314	\$789	\$202	\$240	\$256	
	2012 (In thousand \$	2012 2011 (In thousands) \$ \$ 8,058 8,202 (10,325 ) (9,269 ) 2,629 2,302 79 79	2012       2011       2012         (In thousands)       \$       \$54         \$,058       8,202       1,324         (10,325       ) (9,269       ) (1,225         2,629       2,302       972         79       79       (336	$\begin{array}{cccccccccccccccccccccccccccccccccccc$	$\begin{array}{c ccccccccccccccccccccccccccccccccccc$	

Three Months Ended March 31,

PNM made contributions to its pension plan trust of \$77.7 million and \$6.0 million in the three months ended March 31, 2012 and 2011. PNM does not anticipate making additional contributions in 2012. Based on current law and estimates of portfolio performance, PNM estimates making contributions to its pension plan trust that total \$85.3 million for 2013-2016. These anticipated contributions were developed using current funding assumptions with a discount rate of 5.3%. Actual amounts to be funded in the future will be dependent on the actuarial assumptions at that

time, including the appropriate discount rate. PNM made contributions to the OPEB trust of \$0.8 million in the three months ended March 31, 2012 and none in the three months ended March 31, 2011. PNM expects contributions during 2012 to the OPEB trust to total \$3.2 million. Disbursements under the executive retirement program, which are funded by the Company and considered to be contributions to the plan, were \$0.4 million and \$0.4 million in the three months ended March 31, 2012 and 2011 and are expected to total \$1.5 million during 2012.

### PNM RESOURCES, INC. AND SUBSIDIARIES PUBLIC SERVICE COMPANY OF NEW MEXICO AND SUBSIDIARIES TEXAS-NEW MEXICO POWER COMPANY AND SUBSIDIARIES NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

#### **TNMP** Plans

The following table presents the components of the TNMP Plans' net periodic benefit cost (income): Three Months Ended March 31,

	Pension Plan		OPEB Plan		Executive Program	e Retirement		
	2012		2011		2012	2011	2012	2011
					(In thou	isands)		
Components of Net Periodic								
Benefit Cost (Income)								
Service cost	\$—		<b>\$</b> —		\$61	\$77	\$—	\$—
Interest cost	909		951		156	163	11	12
Long-term return on plan assets	(1,331	)	(1,368	)	(129	) (133	) —	
Amortization of net (gain) loss	115		86		(52	) (48	) —	
Amortization of prior service cost	_				14	15		
Net Periodic Benefit Cost (Income)	\$(307	)	\$(331	)	\$50	\$74	\$11	\$12

TNMP made contributions to its pension plan trust of \$5.3 million and \$0.1 million in the three months ended March 31, 2012 and 2011. TNMP does not anticipate making additional contributions in 2012. Based on current law and estimates of portfolio performance, TNMP estimates making contributions to its pension plan trust that total \$1.8 million for 2013-2016. These anticipated contributions were developed using current funding assumptions with a discount rate of 5.3%. Actual amounts to be funded in the future will be dependent on the actuarial assumptions at that time, including the appropriate discount rate. TNMP made contributions to the OPEB trust of \$0.3 million in the three months ended March 31, 2012 and none in the three months ended March 31, 2011. TNMP does not expect to make additional contributions during 2012 to the OPEB trust. Disbursements under the executive retirement program, which are funded by the Company and considered to be contributions to the plan, were less than \$0.1 million in the three months ended March 31, 2012 and 2011 and are expected to total \$0.1 million during 2012.

#### (9) Commitments and Contingencies

#### Overview

There are various claims and lawsuits pending against the Company. The Company is also subject to federal, state, and local environmental laws and regulations and is currently participating in the investigation and remediation of several sites. In addition, the Company occasionally enters into financial commitments in connection with its business operations. The Company is also involved in various legal proceedings in the normal course of its business. It is not possible at this time for the Company to determine fully the effect of all litigation and other legal proceedings on its financial position, results of operations, or cash flows.

With respect to some of the items listed below, the Company has determined that a loss is not probable or that, to the extent probable, cannot be reasonably estimated. In some cases, the Company is not able to predict with any degree of certainty the range of possible loss that could be incurred. Notwithstanding these facts, the Company has assessed these matters based on current information and made judgments concerning their potential outcome, giving due

consideration to the nature of the claim, the amount and nature of damages sought, and the probability of success. Such judgments are made with the understanding that the outcome of any litigation, investigation, and other legal proceeding is inherently uncertain. In accordance with GAAP, the Company records liabilities for matters where it is probable a loss has been incurred and the amount of loss is reasonably estimable. The actual outcomes of the items listed below could ultimately differ from the judgments made and the differences could be material. The Company cannot make any assurances that the amount of reserves or potential insurance coverage will be sufficient to cover the cash obligations that might be incurred as a result of litigation or regulatory proceedings. The Company does not expect that any known lawsuits, environmental costs, and commitments will have a material effect on its financial condition, results of operations, or cash flows.

#### Table of Contents

## PNM RESOURCES, INC. AND SUBSIDIARIES PUBLIC SERVICE COMPANY OF NEW MEXICO AND SUBSIDIARIES TEXAS-NEW MEXICO POWER COMPANY AND SUBSIDIARIES NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

Additional information concerning commitments and contingencies is contained in Note 16 of the Notes to Consolidated Financial Statements in the 2011 Annual Reports on Form 10-K.

Commitments and Contingencies Related to the Environment

Nuclear Spent Fuel and Waste Disposal

Nuclear power plant operators are required to enter into spent fuel disposal contracts with the DOE that require the DOE to accept and dispose of all spent nuclear fuel and other high-level radioactive wastes generated by domestic power reactors. Although the Nuclear Waste Policy Act required the DOE to develop a permanent repository for the storage and disposal of spent nuclear fuel by 1998, the DOE announced that it would not be able to open the repository by 1998 and sought to excuse its performance under the contract. In November 1997, the U.S. Court of Appeals for the District of Columbia Circuit issued a decision preventing the DOE from excusing its own delay, but refused to order the DOE to begin accepting spent nuclear fuel. PNM estimates that it will incur approximately \$42.8 million (in 2010 dollars) for its share of the costs related to the on-site interim storage of spent nuclear fuel at PVNGS during the term of the operating licenses. PNM accrues these costs as a component of fuel expense as the fuel is consumed. At March 31, 2012 and December 31, 2011, PNM had a liability for interim storage costs of \$13.9 million and \$14.5 million included in other deferred credits.

The Clean Air Act

#### **Regional Haze**

In 1999, EPA developed a regional haze program and regional haze rules under the CAA. The rule directs each of the 50 states to address regional haze. States are required to establish goals for improving visibility in national parks and wilderness areas (also known as Class I areas) and to develop long-term strategies for reducing emissions of air pollutants that cause visibility impairment in their own states and for preventing degradation in other states. States must establish a series of interim goals to ensure continued progress. The first planning period specifies setting reasonable progress goals for improving visibility in Class I areas by the year 2018. In July 2005, the EPA promulgated its final regional haze rule. A major provision of the rule included guidelines for states to conduct BART determinations for certain covered facilities. The BART requirements of the regional haze rule apply to facilities, including utility boilers, built between 1962 and 1977 that have the potential to emit more than 250 tons per year of visibility impairing pollution. If it is demonstrated that the emissions from these sources cause or contribute to visibility impairment in any Class I area, then BART must be installed. The regional haze rules require that BART controls must be installed on an eligible facility by 2018.

#### SJGS

Several provisions of the CAA aim to improve visibility in certain national parks and wilderness areas to natural conditions by the year 2064. SJGS is a source that is subject to these statutory obligations to reduce visibility impacts.

Pursuant to the CAA, states have the primary role to regulate visibility requirements by promulgating SIPs, and the State of New Mexico submitted its SIP on the two elements of the visibility rules - regional haze and interstate

transport - for review by EPA in June 2011. The SIP found that BART to reduce NOx emissions from SJGS is selective non-catalytic reduction ("SNCR") and requires SJGS to install SNCR on each of its four units. Nevertheless, on August 22, 2011, EPA published its FIP, stating that it was required to do so by virtue of a consent decree it had entered into with an environmental group in litigation concerning the interstate transport requirements of the CAA. The FIP included a regional haze BART determination for SJGS that requires installation of selective catalytic reduction ("SCR") on all four units within five years of the rule's effective date of September 21, 2011. The FIP also requires stringent NOx emission limits. EPA stated that it would review and act on the SIP at some future date.

PNM filed a Petition for Review in the U.S. Court of Appeals for the Tenth Circuit on September 16, 2011, challenging EPA's regional haze FIP decision as arbitrary, capricious, or otherwise not in accordance with law. PNM has also asked EPA to reconsider the FIP. Additionally, on October 21, 2011, the Governor of New Mexico and NMED petitioned the Tenth Circuit to review EPA's decision on the same grounds as PNM's challenge and requested EPA to reconsider its decision. These three parties

Table of Contents

PNM RESOURCES, INC. AND SUBSIDIARIES PUBLIC SERVICE COMPANY OF NEW MEXICO AND SUBSIDIARIES TEXAS-NEW MEXICO POWER COMPANY AND SUBSIDIARIES NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

filed motions with the Tenth Circuit to stay the effective date of the rule, which were denied on March 1, 2012. These three parties have also asked EPA to stay the effective date of the rule, but EPA has not responded. WildEarth Guardians also filed an action to challenge EPA's rule in the Tenth Circuit, seeking to shorten its compliance period from five years to three years. WildEarth Guardians, Dine Citizens Against Ruining our Environment, National Parks Conservation Association, New Energy Economy, San Juan Citizens Alliance, and Sierra Club intervened in support of EPA in both PNM's challenge and in the case brought by the New Mexico Governor and NMED. PNM has intervened in support of the challenge brought by the New Mexico Governor and NMED. PNM has also intervened in the WildEarth Guardian's action advocating that the five-year compliance period in the FIP be maintained should the FIP stand. The Tenth Circuit entered an order in March 2012 scheduling briefing on the merits in the challenges to the FIP. Briefing is scheduled to be complete by mid-September 2012, with oral argument currently scheduled for late October 2012.

On March 30, 2012, the U.S. District Court for the District of Columbia entered a consent decree to settle litigation with several environmental groups, which requires EPA to review and take action through a proposed rulemaking on New Mexico's regional haze SIP on or before April 16, 2012 and a final rulemaking on or before August 15, 2012. On April 13, 2012, a stipulation among the parties to the consent decree was filed in the District Court giving EPA a 30-day extension, until May 16, 2012, to review and take proposed action on the New Mexico SIP. The August 15, 2012 deadline for final rulemaking was not affected by the stipulation.

The compliance deadline of the FIP requires PNM to take immediate steps to commence installation of SCR. In January 2012, PNM issued an RFP to prospective bidders for the project with bids due in April 2012. PNM received bids for this project from several bidders on April 20, 2012 and is in the process of evaluating these comprehensive and highly technical proposals. PNM estimates that the installation of SCR at SJGS will cost approximately \$750 million to \$1 billion and installation of SNCR at SJGS will cost about \$77 million. PNM's share under either technology is 46.3% based upon its SJGS ownership interest. Operating costs would also increase with the installation of either SCR or SNCR. Unless the decision to install SCR technology within five years is stayed by EPA, PNM estimates that between \$18 million and \$27 million of its share of the total project costs will need to be incurred in 2012 and between \$85 million and \$115 million in 2013, even though the legal challenges to EPA's decision have not been decided. PNM anticipates filing a request with the NMPRC in the last half of 2012 for authority to install the SCR technology and to recover SCR costs in rates charged to customers.

On April 25, 2012, PNM received a copy of a letter from two of the five Commissioners of the NMPRC addressed to the Governor of New Mexico and the New Mexico congressional delegation. In the letter, the Commissioners ask that the parties to the litigation join to ask EPA to stay both the FIP and the litigation and to consider a "third alternative" to the FIP and the SIP. They suggest that the third alternative be retiring one or more of the existing coal-fired units at SJGS and replacing that capacity with gas-fired generation. On April 26, 2012, PNM received a copy of a letter from the Governor of New Mexico addressed to the EPA Administrator. In that communication, the Governor requested that EPA stay the FIP and respond to the SIP by approving it or explaining why it is not approvable. Furthermore, the Governor requested PNM to develop viable alternatives to the FIP, assuming that EPA stays the FIP and responds to the SIP. PNM will comply with the Governor's request.

PNM will seek recovery from its ratepayers for all costs that may be incurred as a result of the CAA requirements. PNM is unable to predict the ultimate outcome of these matters or what, if any, additional pollution control equipment will be required at SJGS. If additional equipment is necessary and/or final requirements result in additional operating costs being incurred, PNM believes that its access to the capital markets is sufficient to be able to finance the

installation. It is possible that requirements to comply with the final BART determinations, combined with the financial impact of possible future climate change regulation or legislation, if any, other environmental regulations, the result of litigation, and other business considerations, could jeopardize the economic viability of SJGS or the ability of individual participants to continue participation in the plant.

## Four Corners

On October 6, 2010, EPA issued its proposed regional haze determination of BART for Four Corners. The rule, as proposed, would require the installation of SCR as post-combustion controls on each of Units 1-5 at Four Corners to reduce NOx emissions. PNM estimates its share of costs incurred by APS could be up to \$69.0 million for post-combustion controls at Four Corners Units 4 and 5. Such amount does not include PNM's AFUDC and loads. PNM has no ownership interest in Four Corners Units 1, 2, and 3. PNM would seek recovery from its ratepayers of all costs that are ultimately incurred.

Table of Contents

PNM RESOURCES, INC. AND SUBSIDIARIES PUBLIC SERVICE COMPANY OF NEW MEXICO AND SUBSIDIARIES TEXAS-NEW MEXICO POWER COMPANY AND SUBSIDIARIES NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

Following EPA's issuance of its proposed BART, APS submitted a letter to EPA proposing to shut down Four Corners Units 1, 2, and 3 by 2014 and to install post-combustion pollution controls for NOx on Units 4 and 5 by the end of 2018, provided that EPA agrees to a resolution of Four Corners' obligations or liability, if any, under the regional haze and reasonably attributable visibility impairment programs, the NSR program, and NSPS programs of the CAA. The proposed shut down of Four Corners Units 1, 2, and 3 is also conditioned upon the completion of APS's acquisition of SCE's ownership interest in Four Corners Units 4 and 5.

In response to APS's proposal, EPA issued a Supplemental Notice Requesting Comment in February 2011 and proposed to find that an alternative emission control strategy, largely based upon APS's proposal, would achieve more progress than EPA's October 2010 BART proposal.

APS continues to work with EPA to resolve these issues. The Four Corners participants' obligations to comply with EPA's final BART determinations, coupled with the financial impact of possible future climate change regulation or legislation, other environmental regulations, the result of the lawsuit mentioned above, and other business considerations, could jeopardize the economic viability of Four Corners or the ability of individual participants to continue their participation in Four Corners.

PNM is continuing to evaluate the impacts of EPA's proposed BART determination for Four Corners. As proposed, the participant owners of Four Corners will have five years after EPA issues its final determination to achieve compliance with the BART requirements. PNM is unable to predict the ultimate outcome of this matter. SJGS Operating Permit Challenge

On February 16, 2012, EPA issued its response to a WildEarth Guardians petition objecting to SJGS's operating permit granted by the NMED in January 2011. In its order, EPA requires NMED to provide clarification on several of the matters raised by WildEarth Guardians. NMED has 90 days to respond to EPA's request. EPA's order in this matter does not constitute a finding that the plant has violated any provision of the CAA or that it has violated any emission limits. PNM believes the issues raised can be resolved because they are based either on incorrect information or on a perceived inadequacy in the permitting record. EPA's action does not impact PNM's ability to operate the plant.

#### National Ambient Air Quality Standards ("NAAQS")

The CAA requires EPA to set NAAQS for pollutants considered harmful to public health and the environment. EPA has set NAAQS for certain pollutants, including NOx, SO<sub>2</sub>, ozone, and particulate matter. In 2010, EPA updated the primary NOx and SO<sub>2</sub> NAAQS to include a 1-hour maximum standard while retaining the annual standards for NOx and SO<sub>2</sub> and the 24-hour SO<sub>2</sub> standard. New Mexico is in attainment for the 1-hour NOx NAAQS. EPA has issued draft guidance on how to determine whether areas in a state comply with the new 1-hour SO<sub>2</sub> NAAQS. EPA plans to initiate a stakeholder process to discuss how to assess compliance with this standard. EPA announced that it will publish further guidance or initiate rulemaking on these matters after completion of that stakeholder process. Although the process of determining compliance with the 1-hour SO<sub>2</sub> NAAQS has not been finalized, PNM believes that compliance with the 1-hour SO<sub>2</sub> standard may require operational changes and/or equipment modifications at SJGS. On April 6, 2012, PNM filed an application for an amendment to its air permit for SJGS, which would be required for the installation of either the SCR or SNCR technology described above. In addition, this application included a proposal by PNM to install equipment modifications for the purpose of reducing fugitive emissions, including NOx, SO<sub>2</sub>, and particulate matter. These modifications would help SJGS meet the NAAQS. PNM estimates the cost of this equipment would be approximately \$140 million for SJGS, of which PNM's share would be 46.3%.

In January 2010, EPA announced it would strengthen the 8-hour ozone standard by setting a new standard in a range of 0.060-0.070 parts per million ("ppm"). EPA had intended to establish the new standard by July 31, 2011. However, in September 2011, President Obama requested that the EPA administrator withdraw the agency's proposed rule that would have replaced the existing ozone national ambient air quality standard ("NAAQS"). In his release, the President stated that work is already underway to reconsider the ozone standard, with proposed revisions expected in the fall of 2013 and a final standard published by 2014. Depending upon where the standard for ozone is set, San Juan County, where SJGS is situated, could be designated as not attaining the standard for ozone. If that were to occur, NMED would have responsibility for bringing the county into compliance and would look at all sources of NOx and volatile organic compounds since these are the pollutants that form ground-level ozone. As a result, SJGS could be required to install further NOx controls to meet a new ozone NAAQS. In addition, other counties in New Mexico,

#### Table of Contents

PNM RESOURCES, INC. AND SUBSIDIARIES PUBLIC SERVICE COMPANY OF NEW MEXICO AND SUBSIDIARIES TEXAS-NEW MEXICO POWER COMPANY AND SUBSIDIARIES NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

including Bernalillo County, may be designated as non-attainment. PNM cannot predict the outcome of this matter, the impact of other potential environmental mitigations, or if additional NOx controls would be required as a result of ozone non-attainment designation.

Citizen Suit Under the Clean Air Act

The operations of the SJGS are covered by a Consent Decree with the Grand Canyon Trust and Sierra Club and with the NMED that includes stipulated penalties for non-compliance with specified emissions limits. Stipulated penalty amounts are placed in escrow on a quarterly basis pending review of SJGS's emissions performance. Over the past several years, PNM has also submitted reports addressing mercury and NOx emission controls for SJGS as required by the Consent Decree. Plaintiffs and NMED rejected PNM's reports. PNM disputes the validity of the rejection of the reports. In May 2010, PNM filed a petition with the federal district court seeking a judicial determination on the dispute relating to PNM's mercury controls. NMED and plaintiffs seek to require PNM to implement additional mercury controls. PNM estimates the implementation would increase annual mercury control costs for the entire station, which are currently \$0.6 million, to a total of \$6.0 million. The court has appointed a special master to evaluate the technical arguments in the case. PNM cannot predict the outcome of this matter.

Navajo Nation Environmental Issues

Four Corners is located on the Navajo Reservation and is held under an easement granted by the federal government as well as a lease from the Navajo Nation. The Navajo Acts purport to give the Navajo Nation Environmental Protection Agency authority to promulgate regulations covering air quality, drinking water, and pesticide activities, including those activities that occur at Four Corners. In October 1995, the Four Corners participants filed a lawsuit in the District Court of the Navajo Nation challenging the applicability of the Navajo Acts to Four Corners. The District Court stayed these proceedings pursuant to a request by the parties and the parties are seeking to negotiate a settlement.

In May 2005, APS and the Navajo Nation signed an agreement resolving the dispute regarding the Navajo Nation's authority to adopt operating permit regulations under the Navajo Nation Air Pollution Prevention and Control Act. As a result of this agreement, APS sought, and the courts granted, dismissal of the pending litigation in the Navajo Nation Supreme Court and the Navajo Nation District Court, to the extent the claims relate to the CAA. The agreement does not address or resolve any dispute relating to other aspects of the Navajo Acts.

The Company cannot currently predict the outcome of these matters or the range of their potential impacts. Section 114 Request

In April 2009, APS received a request from EPA under Section 114 of the CAA seeking detailed information regarding projects at and operations of Four Corners. EPA has taken the position that many utilities have made physical or operational changes at their plants that should have triggered additional regulatory requirements under the NSR provisions of the CAA. Other electric utilities have received and responded to similar Section 114 requests, and several of them have been subject to notices of violation and lawsuits by EPA. APS has responded to EPA's request. PNM is currently unable to predict the timing or content of EPA's response, if any, or any resulting actions.

#### Four Corners New Source Review

Following two NOIs to sue, EarthJustice filed a lawsuit in October 2011 in the U.S. District Court for New Mexico against APS and the other Four Corners participants, except PNM, alleging violations of the PSD provisions of the CAA. EarthJustice filed suit against PNMR, which is not a Four Corners participant. Among other things, the plaintiffs seek to have the court enjoin operations at Four Corners until any required PSD permits are issued and order the payment of civil penalties, including a beneficial mitigation project.

In January 2012, following a third NOI to sue, EarthJustice filed its First Amended Complaint, naming PNM as a party instead of PNMR. In addition to the allegations of its original complaint, EarthJustice alleged NSPS violations. PNM was served with the amended complaint on January 17, 2012. On April 2, 2012, the Four Corners participants, including PNM, filed motions to dismiss the complaint. The Company cannot currently predict the outcome of this matter or the range of its potential impact.

#### Table of Contents

## PNM RESOURCES, INC. AND SUBSIDIARIES PUBLIC SERVICE COMPANY OF NEW MEXICO AND SUBSIDIARIES TEXAS-NEW MEXICO POWER COMPANY AND SUBSIDIARIES NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

#### Endangered Species Act

In January 2011, the Center for Biological Diversity, Diné Citizens Against Ruining Our Environment, and San Juan Citizens Alliance filed a lawsuit against the OSM and the DOI, alleging that OSM failed to engage in mandatory Endangered Species Act ("ESA") consultation with the Fish and Wildlife Service prior to authorizing the renewal of an operating permit for the mine that serves Four Corners. The lawsuit alleges that activities at the mine, including mining and the disposal of coal combustion residue, will adversely affect several endangered species and their critical habitats. The lawsuit requested the court to vacate and remand the mining permit and enjoin all activities carried out under the permit until OSM has complied with the ESA. Neither PNM nor APS was a party to the lawsuit. On March 14, 2012, the court entered an order dismissing the plaintiffs' lawsuit.

On March 19, 2012, Diné Citizens Against Ruining Our Environment, Black Mesa Water Coalition, Toh Nizhoni Ani, San Juan Citizens Alliance, and Center for Biological Diversity sent EPA a NOI threatening to file a lawsuit in federal district court on or after May 18, 2012 if EPA fails to take certain actions allegedly required under the ESA. These environmental groups allege that EPA has failed to meet is duties under the ESA to ensure that operations at Four Corners do not jeopardize the continued existence of endangered or threatened species or their critical habitat as required under the ESA. The environmental groups also allege that the EPA has violated the ESA by failing to carry out its programs for the conservation of listed species. APS is currently evaluating the NOI to determine its potential impact on Four Corners and will continue to monitor any developments. PNM cannot predict the outcome of this matter.

#### Cooling Water Intake Structures

EPA issued its proposed cooling water intake structures rule in April 2011, which would provide national standards for certain cooling water intake structures at existing power plants and other facilities under the Clean Water Act. The proposed standards are intended to protect fish and other aquatic organisms by minimizing impingement mortality (the capture of aquatic wildlife on intake structures or against screens) and entrainment mortality (the capture of fish or shellfish in water flow entering and passing through intake structures). The proposed rule would require facilities such as Four Corners and SJGS to either demonstrate that impingement mortality at its cooling water intakes does not exceed a specified rate or reduce the flow at those structures to less than a specified velocity and to take certain protective measures with respect to impinged fish. To minimize entrainment mortality, the proposed rule would also require these facilities to either meet the definition of a closed cycle recirculating cooling system or conduct a "structured site-specific analysis" to determine what site-specific controls, if any, should be required. EPA is expected to issue a final rule by July 2012. The proposed rule requires existing facilities to comply with the impingement mortality requirements as soon as possible, but no later than eight years after the effective date of the

rule, and to comply with the entrainment requirements as soon as possible, but no rater than eight years after the effective date of the by the permitting authority. PNM and APS continue to follow the rulemaking and are performing analyses to determine the potential costs of compliance with the proposed rule. PNM is unable to predict the outcome of this matter or a range of the potential costs of compliance.

## Santa Fe Generating Station

PNM and the NMED are parties to agreements under which PNM installed a remediation system to treat water from a City of Santa Fe municipal supply well, an extraction well, and monitoring wells to address gasoline contamination in the groundwater at the site of the former Santa Fe Generating Station and service center. PNM believes the observed groundwater contamination originated from off-site sources, but agreed to operate the remediation facilities until the groundwater meets applicable federal and state standards or until the NMED determines that additional remediation is not required, whichever is earlier. The municipal well continues to operate and meets federal drinking water standards.

PNM is not able to assess the duration of this project.

The Superfund Oversight Section of the NMED has conducted multiple investigations into the chlorinated solvent plume in the vicinity of the site of the former Santa Fe Generating Station. In February 2008, a NMED site inspection report was submitted to EPA, which states that neither the source nor extent of contamination has been determined and also states that the source may not be the former Santa Fe Generating Station. The NMED investigation is ongoing. The Company is unable to predict the outcome of this matter.

PNM RESOURCES, INC. AND SUBSIDIARIES PUBLIC SERVICE COMPANY OF NEW MEXICO AND SUBSIDIARIES TEXAS-NEW MEXICO POWER COMPANY AND SUBSIDIARIES NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

## Coal Combustion Byproducts Waste Disposal

#### Regulation

CCBs consisting of fly ash, bottom ash, and gypsum from SJGS are currently disposed of in the surface mine pits adjacent to the plant. SJGS does not operate any CCB impoundments. The Mining and Minerals Division of the New Mexico Energy, Minerals and Natural Resources Department currently regulates mine placement of ash with federal oversight by the OSM. APS disposes of CCBs in ash ponds and dry storage areas at Four Corners and also sells a portion of its fly ash for beneficial uses, such as a constituent in concrete production. Ash management at Four Corners is regulated by EPA and the New Mexico State Engineer's Office.

In June 2010, EPA published a proposed rule that includes two options for waste designation of coal ash in the Federal Register. One option is to regulate CCBs as a hazardous waste, which would allow EPA to create a comprehensive federal program for waste management and disposal of CCBs. The other option is to regulate CCBs as a non-hazardous waste, which would provide EPA with the authority to develop performance standards for waste management facilities handling the CCBs and would be enforced primarily by state authorities or through citizen suits. Both options allow for continued use of CCBs in beneficial applications. EPA's proposal does not address the placement of CCBs in surface mine pits for reclamation. A final rule regarding waste designation for coal ash is not expected from EPA before mid to late 2012. An OSM CCB rulemaking team has been formed to develop a proposed rule.

On April 5, 2012, several environmental groups, including Sierra Club, filed a citizen suit in the D.C. Circuit Court claiming that EPA has failed to review and revise RCRA's regulations with respect to CCBs. The groups allege that EPA has already determined that revisions to the CCBs regulations are necessary. They also claim that EPA now has a non-discretionary duty to revise the regulations. The environmental groups asked the court to direct EPA to complete its review of the regulation of CCBs and a hazardous waste analytical procedure and to issue necessary revisions of such regulations as soon as possible. PNM and industry groups are evaluating the potential implications of the suit on EPA's rulemaking agenda for CCBs.

PNM advocates for the non-hazardous regulation of CCBs. PNM cannot predict the outcome of EPA's or OSM's proposed rulemaking regarding CCB regulation, including mine placement of CCBs, or whether these actions will have a material impact on its operations, financial position, or cash flows.

#### Sierra Club Allegations

In December 2009, PNM and PNMR received a NOI to sue under RCRA from the Sierra Club ("RCRA Notice"). The RCRA Notice was also sent to all SJGS owners, to SJCC, which operates the San Juan Mine that supplies coal to SJGS, and to BHP. Additionally, PNM was informed that SJCC and BHP received a separate NOI to sue under the Surface Mine Control and Reclamation Act ("SMCRA") from the Sierra Club. In April 2010, the Sierra Club filed suit in the U.S. District Court for the District of New Mexico against PNM and PNMR. Also named in the lawsuit were SJCC and BHP. In the complaint, as amended, Sierra Club alleged that activities at SJGS and the San Juan Mine were causing imminent and substantial harm to the environment, including ground and surface water in the region, and that placement of CCBs at the San Juan Mine constituted "open dumping" in violation of RCRA. The suit also includes claims against SJCC and BHP under SMCRA. The complaint requested judgment for injunctive relief, payment of civil penalties, and an award of plaintiffs' attorney's fees and costs.

On March 28, 2012, the parties filed an executed consent decree with the court, which was approved by the court on April 12, 2012, settling the litigation. Under the terms of the consent decree, the SJGS owners and SJCC will

construct and operate a slurry wall and recovery trench, fund other environmental projects, and pay Sierra Club's attorneys' and experts' fees. The total estimated cost of the settlement is \$10.2 million, of which about \$4.5 million is PNM's share. Substantially all of the income statement impact related to this settlement was recorded in 2011. The consent decree also includes a release of claims and covenant not to sue by Sierra Club. Hazardous Air Pollutants ("HAPs") Rulemaking

In December 2011, the EPA issued its final Mercury and Air Toxics Standards ("MATS"). MATS is designed to reduce emissions of heavy metals, including mercury, arsenic, chromium and nickel, as well as acid gases, including hydrochloric and

#### Table of Contents

## PNM RESOURCES, INC. AND SUBSIDIARIES PUBLIC SERVICE COMPANY OF NEW MEXICO AND SUBSIDIARIES TEXAS-NEW MEXICO POWER COMPANY AND SUBSIDIARIES NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

hydrofluoric gases, from coal and oil-fired electric generating units with a capacity of at least 25 MW. Existing facilities will generally have up to four years to demonstrate compliance with the new rule. PNM's assessment of MATS indicates that the control equipment currently used at SJGS allows the plant to meet the emission standards set forth in the rule although the plant may be required to install additional monitoring equipment. With regard to mercury, stack testing performed for EPA during the MATS rulemaking process showed that SJGS achieved a mercury removal rate of 99% or greater. APS will conduct testing to determine what additional controls, if any, will be required at Four Corners. If additional controls are required, the costs are not expected to be material.

#### Other Commitments and Contingencies

#### Coal Supply

The coal requirements for SJGS are being supplied by SJCC, a wholly owned subsidiary of BHP. In addition to coal delivered to meet the current needs of SJGS, PNM prepays SJCC for certain coal mined but not yet delivered to the plant site. At March 31, 2012 and December 31, 2011, prepayments for coal, which are included in other current assets, amounted to \$13.3 million and \$14.6 million. These amounts reflect delivery of a portion of the prepaid coal and its utilization due to the mine fire incident described below. SJCC holds certain federal, state, and private coal leases and has an underground coal sales agreement to supply processed coal for operation of SJGS through 2017. Under the coal sales agreement, SJCC is reimbursed for all costs for mining and delivering the coal, including an allocated portion of administrative costs, and receives a return on its investment. BHP Minerals International, Inc. has guaranteed the obligations of SJCC under the coal agreement. The coal agreement contemplates the delivery of coal that would supply substantially all the requirements of the SJGS through December 31, 2017.

APS purchases all of Four Corners' coal requirements from a supplier with a long-term lease of coal reserves with the Navajo Nation. The Four Corners coal contract runs through July 6, 2016 with pricing determined using an escalating base-price. APS is currently in discussions with the coal supplier regarding post-2016 coal supply for Four Corners. In 2010, PNM updated its study of the final reclamation costs for both the surface mines that previously provided coal to SJGS and the current underground mine providing coal and revised its estimates of the final reclamation costs. The estimate for decommissioning the Four Corners mine was also revised in 2010. Based on the most recent estimates, payments for mine reclamation, in future dollars, are estimated to be \$53.3 million for the surface mines at both SJGS and Four Corners and \$21.5 million for the underground mine at SJGS as of March 31, 2012. PNM made payments against the surface mine liability of \$0.9 million and \$1.3 million during the three months ended March 31, 2012 and 2011. At March 31, 2012 and December 31, 2011, liabilities, in current dollars, of \$26.1 million and \$26.5 million for surface mine reclamation and \$4.2 million for underground mining activities were recorded in other deferred credits.

PNM collects a provision for mine reclamation costs in its rates. The NMPRC has capped the amount that can be collected for final reclamation of the surface mines at \$100.0 million. Previously, PNM recorded a regulatory asset for the amount of surface mine reclamation costs to be collected from ratepayers, limited by the amount of the cap. If future estimates increase the liability for surface mine reclamation, the excess would be expensed at that time. San Juan Underground Mine Fire Incident

On September 9, 2011, a fire was discovered at the underground mine owned and operated by SJCC that provides coal for SJGS. The federal Mine Safety and Health Administration ("MSHA") was notified of the incident and has since been on-site. On September 12, 2011, SJCC informed PNM that the fire was extinguished. However, MSHA required sealing the incident area and confirmation of a noncombustible environment before allowing re-entry of the sealed area. SJCC regained entry into the sealed area of the mine in early March 2012. At that time, MSHA conducted a root

cause analysis inspection of the incident area, but has not yet issued its report. SJCC has completed inspection of the mine equipment and reported no significant damage. SJCC has removed the equipment from the impacted mine panel and reassembed it at a new panel face. On May 4, 2012, SJCC received approval from MSHA and resumed longwall mining operations. However, if further difficulties occur in the longwall mining operation, PNM and the other owners of SJGS would need to consider alternatives for operating SJGS, including running at less than full capacity or shutting down one or more units, the impacts of which cannot be determined at the current time.

Table of Contents

PNM RESOURCES, INC. AND SUBSIDIARIES PUBLIC SERVICE COMPANY OF NEW MEXICO AND SUBSIDIARIES TEXAS-NEW MEXICO POWER COMPANY AND SUBSIDIARIES NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

As of September 9, 2011, there were inventories of previously mined coal available to supply the fuel requirements of SJGS for approximately eight and one-half months at forecasted consumption before the disruption. Production from continuous miner sections of the mine was re-started on November 19, 2011.

The costs of the mine recovery flow through the cost-reimbursable component of the coal supply agreement. PNM anticipates that it will recover through its FPPAC the portion of such costs attributable to its customers subject to New Mexico regulation. The staff of the NMPRC has requested that PNM provide information segregating the impacts of this incident on the FPPAC. On April 27, 2012, PNM made a filing with the NMPRC, which reflects a preliminary estimate that this incident increased the deferral under the FPPAC through March 31, 2012 by \$16.4 million. Based on information PNM has received from SJCC to date, PNM does not expect the mine fire to have a material effect on its financial condition, results of operations, or cash flows.

**PVNGS** Liability and Insurance Matters

The PVNGS participants have insurance for public liability exposure for a nuclear incident totaling \$12.6 billion per occurrence. Commercial insurance carriers provide \$375 million and \$12.2 billion is provided through a mandatory industry wide retrospective assessment program. If losses at any nuclear power plant covered by the program exceed the accumulated funds, PNM could be assessed retrospective premium adjustments. Based on PNM's 10.2% interest in each of the three PVNGS units, PNM's maximum potential assessment per incident for all three units is \$36.0 million, with an annual payment limitation of \$5.4 million.

The PVNGS participants maintain "all risk" (including nuclear hazards) insurance for damage to, and decontamination of, property at PVNGS in the aggregate amount of \$2.75 billion, a substantial portion of which must first be applied to stabilization and decontamination. These coverages are provided by Nuclear Electric Insurance Limited ("NEIL"). If NEIL's losses in any policy year exceed accumulated funds, PNM is subject to retrospective assessments of \$4.1 million for each retrospective assessment declared by NEIL's Board of Directors. The insurance coverage discussed in this and the previous paragraph is subject to policy conditions and exclusions.

Water Supply

Because of New Mexico's arid climate and periodic drought conditions, there is concern in New Mexico about the use of water, including that used for power generation. PNM has secured groundwater rights in connection with the existing plants at Reeves Station, Delta, Valencia, Afton, Luna, and Lordsburg. Water availability does not appear to be an issue for these plants at this time.

PNM, APS, and BHP have undertaken activities to secure additional water supplies for SJGS, Four Corners, and related mines to accommodate the possibility of inadequate precipitation in coming years. Since 2004, PNM has entered into agreements for voluntary sharing of the impacts of water shortages with tribes and other water users in the San Juan basin. The current agreements run through December 31, 2012 and renewals are currently being negotiated. In addition, in the case of water shortage, PNM, APS, and BHP have reached agreement with the Jicarilla Apache Nation on a long-term supplemental contract relating to water for SJGS and Four Corners that runs through 2016. Although the Company does not believe that its operations will be materially affected by drought conditions at this time, it cannot forecast the weather or its ramifications, or how policy, regulations, and legislation may impact the Company should water shortages occur in the future.

In April 2010, APS signed an agreement on behalf of the PVNGS participants with five cities to provide cooling water essential to power production at PVNGS for the next forty years.

**PVNGS** Water Supply Litigation

In 1986 an action commenced regarding the rights of APS and the other PVNGS participants to the use of groundwater and effluent at PVNGS. APS filed claims that dispute the court's jurisdiction over PVNGS' groundwater rights and their contractual rights to effluent relating to PVNGS and, alternatively, seek confirmation of those rights. In 1999, the Arizona Supreme Court issued a decision finding that certain groundwater rights may be available to the federal government and Indian tribes. In addition, the Arizona Supreme Court issued a decision in 2000 affirming the lower court's criteria for resolving groundwater claims. Litigation on these issues has continued in the trial court. No trial dates have been set in these matters. PNM does not expect that this litigation will have a material impact on its results of operation, financial position, or cash flows.

Table of Contents

PNM RESOURCES, INC. AND SUBSIDIARIES PUBLIC SERVICE COMPANY OF NEW MEXICO AND SUBSIDIARIES TEXAS-NEW MEXICO POWER COMPANY AND SUBSIDIARIES NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

#### San Juan River Adjudication

In 1975, the State of New Mexico filed an action in New Mexico District Court to adjudicate all water rights in the San Juan River Stream System. PNM was made a defendant in the litigation in 1976. The action is expected to adjudicate water rights used at Four Corners and SJGS. In 2005, the Navajo Nation and various parties announced a settlement of the Navajo Nation's surface water rights. In March 2009, President Obama signed legislation confirming the settlement with the Navajo Nation. Under the terms of the settlement agreement, the Navajo water rights would be settled and finally determined by entry by the court of two proposed adjudication decrees. The court has ordered that settlement of the Navajo Nation's claims under the settlement agreement and entry of the proposed decrees be heard in an expedited proceeding.

PNM's water rights in the San Juan Basin may be affected by the rights recognized in the settlement agreement as being owned by the Navajo Nation (which comprise a significant portion of water available from sources on the San Juan River and in the San Juan Basin). Therefore, PNM has elected to participate in this proceeding. The Company is unable to predict the ultimate outcome of this matter or estimate the amount or range of potential loss and cannot determine the effect, if any, of any water rights adjudication on the present arrangements for water at SJGS and Four Corners. Final resolution of the case cannot be expected for several years. An agreement reached with the Navajo Nation in 1985, however, provides that if Four Corners loses a portion of its rights in the adjudication, the Navajo Nation will provide, for an agreed upon cost, sufficient water from its allocation to offset the loss. Complaint Against Southwestern Public Service Company

In September 2005, PNM filed a complaint under the Federal Power Act against SPS. PNM argued that SPS had been overcharging PNM for deliveries of energy through its fuel cost adjustment clause practices. PNM also intervened in a proceeding brought by other customers raising similar arguments relating to SPS' fuel cost adjustment clause practices (the "Golden Spread proceeding"). In April 2008, FERC issued its order in the Golden Spread proceeding. FERC affirmed the decision of an ALJ that SPS violated its fuel cost adjustment clause tariffs. However, FERC shortened the refund period applicable to the violation of the fuel cost adjustment clause issues. PNM and SPS have filed petitions for rehearing and clarification of the scope of the remedies that were ordered and reversal of various rulings in the order. FERC has not yet acted upon the requests for rehearing or clarification and they remain pending further decision. PNM cannot predict the final outcome of the case at FERC or the range of possible outcomes. Begay v. PNM et al

A putative class action was filed against PNM and other utilities in February 2009 in the U.S. District Court in Albuquerque. Plaintiffs claim to be allottees, members of the Navajo Nation, who pursuant to the Dawes Act of 1887, were allotted ownership in land carved out of the Navajo Nation. Plaintiffs, including an allottee association, make broad, general assertions that defendants, including PNM, are rights-of-way grantees with rights-of-way across the allotted lands and are either in trespass or have paid insufficient fees for the grant of rights-of-way or both. The plaintiffs, who have sued the defendants for breach of fiduciary duty, seek a constructive trust. They have also included a breach of trust claim against the United States and its Secretary of the Interior. PNM and the other defendants filed motions to dismiss this action. In March 2010, the court ordered that the entirety of the plaintiffs' case be dismissed. The court did not grant plaintiffs leave to amend their complaint, finding that they instead must pursue and exhaust their administrative remedies before seeking redress in federal court.

In May 2010, Plaintiffs filed a Notice of Appeal with the Bureau of Indian Affairs ("BIA"), which was denied by the BIA Regional Director. In May 2011, plaintiffs appealed the Regional Director's decision to the DOI Board of Appeals. On February 21, 2012 the DOI Board of Appeals ordered additional briefing on the merits of the appeal. PNM is participating in order to preserve its interests regarding any PNM-acquired rights-of-way implicated in the

appeal. PNM cannot predict the outcome of the proceeding or the range of potential outcomes at this time.

## Transmission Issues

#### Cargill Complaint

In April 2010, Cargill Power Markets, LLC ("Cargill") filed a complaint with FERC, asserting that PNM improperly processed its transmission service queue and unfairly invalidated a transmission service request by Cargill. In July 2010, FERC issued an order establishing a schedule for hearing and settlement procedures. In its order, FERC determined that PNM had improperly invalidated a single Cargill transmission service request submitted in February 2008 and set the issue for hearing to determine an appropriate remedy. In September 2010, FERC granted rehearing for further consideration. In January 2011, PNM and Cargill filed a settlement agreement with FERC in which PNM agreed to pay Cargill \$0.2 million and put Cargill's transmission service request back into the queue. The settlement also left Cargill's and PNM's rehearing requests in place before FERC. One intervenor in the proceeding contested the settlement. In December 2011, the Commission issued an order approving the settlement as filed but requiring a compliance filing to modify the standard of review for third parties and FERC. Pursuant to the December 2011 order, the settlement agreement has been modified to reflect the change to the standard of review and was filed with FERC in March 2012. PNM is unable to predict the final outcome of this matter at FERC.

# TGP Complaint

On March 2, 2012, TGP Granada, LLC and its affiliate (collectively, "TGP") filed a complaint at FERC against PNM and Tortoise Capital Resources Corp. ("Tortoise"). PNM owns 60% of EIP and leases the other 40% from Tortoise. TGP's filing requests FERC to direct PNM and Tortoise to identify the party that will immediately assume the obligation of making transmission capacity on the EIP available to customers for use after the April 1, 2015 expiration of the EIP lease agreement. TGP also requests a waiver regarding certain provisions of PNM's Open Access Transmission Tariff to allow its affiliate to change the point-of-receipt associated with a transmission service agreement related to the EIP without losing its transmission service priority. TGP requests that FERC issue an order granting the requested relief by July 2, 2012.

PNM's lease of the portion of the EIP owned by Tortoise expires on April 1, 2015. The lease provides PNM the options, with 24 months advance notice, of purchasing the leased assets at the end of the the lease for fair market value, or purchasing the leased assets prior to the lease expiration at the greater of fair market value and stipulated values contained in the lease. The lease also allows PNM to renew the lease for a series of terms with lease payments at the fair market value rate and provides PNM the option, if certain conditions are met, to renew the lease at 50% of the current lease payments for a maximum term to be calculated at the end of the initial lease term.

On April 2, 2012, PNM filed its response to TGP's complaint. PNM argued that the claims in the complaint are without legal merit, but took no position on the waiver request. PNM cannot predict the outcome of this proceeding.

# (10) Regulatory and Rate Matters

Information concerning regulatory and rate matters is contained in Note 17 of the Notes to Consolidated Financial Statements in the 2011 Annual Reports on Form 10-K.

**PNM** 

**Emergency FPPAC** 

In 2008, the NMPRC authorized PNM to implement an Emergency FPPAC from June 2, 2008 through June 30, 2009. The NMPRC order approving the Emergency FPPAC also provided that if PNM's base load generating units did not operate at or above a specified capacity factor and PNM was required to obtain replacement power to serve

jurisdictional customers, PNM would be required to make a filing with the NMPRC seeking approval of the replacement power costs. In its required filing, PNM stated that the costs of the replacement power amounting to \$8.0 million were prudently incurred and made a motion that they be approved. The NMPRC staff opposed PNM's motion and recommended that PNM be required to refund the amount collected. Auditors selected by the NMPRC found that PNM was prudent in operating its base load units and in securing replacement power but had not obtained prior NMPRC approval in the manner required by the NMPRC order. PNM continues to assert that its recovery of replacement power costs was proper and did not violate the NMPRC's order. The NMPRC has not ruled on this matter. Under the terms of the approved stipulation in the 2010 Electric Rate Case, the parties to the stipulation, including the NMPRC

#### Table of Contents

PNM RESOURCES, INC. AND SUBSIDIARIES PUBLIC SERVICE COMPANY OF NEW MEXICO AND SUBSIDIARIES TEXAS-NEW MEXICO POWER COMPANY AND SUBSIDIARIES NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

staff, jointly requested that the NMPRC take no further action in this matter and close the docket. No party has opposed that request. PNM is unable to predict the outcome of this matter.

#### Renewable Portfolio Standard

The REA establishes a mandatory RPS requiring a utility to acquire a renewable energy portfolio equal to 5% of retail electric sales by January 1, 2006, increasing to 10% by 2011, 15% by 2015, and 20% by 2020. The NMPRC requires renewable energy portfolios to be "fully diversified" beginning in 2011, with at least 20% from wind energy, 20% from solar energy, 10% from other renewable technologies, and 1.5% from distributed generation. The REA provides for streamlined proceedings for approval of utilities' renewable energy procurement plans, assures utilities recovery of costs incurred consistent with approved procurement plans, and requires the NMPRC to establish a RCT for the procurement of renewable resources to prevent excessive costs being added to rates. The NMPRC has established a RCT for 2011 of 2% of all customers' aggregated overall annual electric charges that increases by 0.25% annually until reaching 3% in 2015. The NMPRC has docketed a new rulemaking to determine the appropriate calculation methodology of the RCT. The rulemaking also proposes changes to the RPS diversity requirements. PNM is unable to predict the outcome of this matter.

In July 2010, PNM filed its renewable energy procurement plan for 2011. The NMPRC ultimately rejected PNM's proposal to satisfy its 2011 RPS requirement through the purchase of wind RECs and ordered PNM to procure actual wind energy in 2011. While the rejection of RECs is under appeal at the New Mexico Supreme Court, PNM procured the wind energy as ordered in 2011. PNM requested a variance from the diversity requirements for solar and certain "other resources" for 2011 based on the RCT and availability constraints, which the NMPRC granted conditioned upon PNM including in its 2012 procurement plan a proposal that would meet the diversity requirements by April 5, 2013. In July 2011, PNM filed its renewable energy procurement plan for 2012. The plan requested a variance from the RPS due to RCT limitations. The plan was diversity compliant based on the reduced RPS, except for non-wind/non-solar resources, which were not currently available. In December 2011, the NMPRC approved PNM's 2012 plan with modifications. Under the modified plan, PNM must spend \$0.9 million more on renewable procurements in 2012 than it originally proposed. If PNM's proposed additional procurements are approved by the NMPRC, the resulting portfolio of renewable resources will constitute approximately 7.3% of PNM's energy sales in 2012, which is less than the statutory RPS of 10%, due to the RCT. The NMPRC also required PNM to file a supplemental plan by April 30, 2012, within which PNM is authorized to include an early filing of its 2013 renewable energy procurement plan proposing procurements to meet the 10% RPS by 2014 or sooner. PNM made the required filing on April 30, 2012, proposing new procurements for 2013 and 2014 of PNM-owned solar facilities, wind and solar REC purchases in 2013, and a purchased power agreement for the output of a new geothermal facility. If the proposed projects develop as planned, PNM will comply with the statutory RPS amount in 2013, but will require a variance from the NMPRC's diversity requirements in 2013 while the proposed solar and geothermal facilities are being constructed. This plan is expected to achieve full RPS quantity and diversity compliance by 2014 without exceeding the RCT. PNM has requested recovery of certain renewable procurement costs from customers through a rate rider. See Renewable Energy Rider below. PNM is unable to predict the outcome or impact of these matters. Energy Efficiency and Load Management

**Program Costs** 

Public utilities are required to obtain NMPRC approval to implement energy efficiency and load management programs. Costs to implement approved programs are recovered through a rate rider. Additional information concerning the program costs is contained in Note 17 of the Notes to Consolidated Financial Statements in the 2011 Annual Reports on Form 10-K.

Disincentives/Incentives Adder

The Efficient Use of Energy Act requires the NMPRC to remove utility disincentives to implementing energy efficiency and load management programs and to provide incentives for such programs. A rule approved by the NMPRC authorized electric utilities to collect rate adders of \$0.01 per KWh for lifetime energy savings and \$10 per KW for demand savings related to energy efficiency and demand response programs beginning in 2010. The NMAG and NMIEC appealed the NMPRC order adopting this

#### Table of Contents

PNM RESOURCES, INC. AND SUBSIDIARIES PUBLIC SERVICE COMPANY OF NEW MEXICO AND SUBSIDIARIES TEXAS-NEW MEXICO POWER COMPANY AND SUBSIDIARIES NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

rule to the New Mexico Supreme Court. PNM began implementing a rate rider under the rule to collect adders related to its 2010 program savings in December 2010 while the appeal of the rule was pending. In July 2011, the Supreme Court annulled and vacated the order adopting the rule and remanded the matter to the NMPRC. As a result of the Supreme Court decision, PNM filed revised tariffs and ceased collecting this adder for 2010 program savings on August 21, 2011. Of the \$4.2 million authorized for recovery, \$2.6 million had been collected through August 20, 2011.

In June 2011 prior to the Supreme Court decision, the NMPRC approved PNM-specific adders of \$0.002 per kWh and \$4 per kW. PNM is presently collecting \$1.3 million in adder revenues consistent with this order. After the Supreme Court decision vacating the rule, the NMPRC initiated a proceeding to determine whether PNM should be required to cease collecting the adders and to refund all adder revenues collected since December 2010. In November 2011, the NMPRC issued orders that PNM is not required to refund any adder revenues and is authorized to continue collecting the adders. However, in an order on rehearing, which it subsequently rescinded, the NMPRC further reduced the amount of the authorized adders. Prior to the rescission, PNM appealed the rehearing order to the Supreme Court. In March, 2012, the Supreme Court granted PNM's motion to vacate the rehearing order and dismiss PNM's appeal. In a separate appeal and writ proceeding in the Supreme Court, NMIEC and the NMAG seek to overturn the NMPRC order allowing PNM to continue to collect adders in light of the 2011 Supreme Court decision. PNM cannot predict the outcome of these matters.

#### 2010 Electric Rate Case

PNM filed its 2010 Electric Rate Case application with the NMPRC in June 2010 to increase rates for its New Mexico retail customers. On August 21, 2011, PNM implemented a \$72.1 million annual increase in rates as authorized by an order of the NMPRC, which modified a stipulation agreed to by PNM and several other parties. The amended stipulation allows PNM to file a new general rate case for rates to be effective as soon as July 1, 2013. In addition, the stipulation limits the amount that can be recovered on an annual basis for fuel costs, renewable energy costs, and energy efficiency costs during certain years as described in the stipulation. Recovery of costs in excess of the limits are to be deferred for recovery, without carrying costs, in future periods. Additional information concerning the 2010 Electric Rate Case is contained in Note 17 of the Notes to Consolidated Financial Statements in the 2011 Annual Reports on Form 10-K.

#### Renewable Energy Rider

In January 2012, PNM filed an application for a rate rider that would go into effect in August 2012 to collect costs for renewable energy procurements incurred after December 31, 2010 that are not otherwise being collected in rates. These costs include the procurement of solar RECs from customers, wind resource procurements during November and December 2011 as ordered by the NMPRC, and the revenue requirements for PNM-owned solar PV facilities and a solar battery storage demonstration project that went into service during 2011. The rider's rate for 2012 would be set at 2.081% of the retail customer's monthly bill. The rate would be reset to 2.695% as of January 1, 2013 to reflect unrecovered costs from 2012 and projected costs to be incurred in 2013. The rider would terminate upon a final order in PNM's next general rate case unless that order authorized a continuation of the rider. Amounts that can be collected under the proposed rider are capped at \$18.0 million in 2012 and \$24.6 million in 2013 under the stipulation in PNM's 2010 Electric Rate Case. Any amounts above the caps are deferred for future recovery without carrying costs. In that stipulation, signatories agreed not to oppose approval of the rider for collection of costs incurred consistent with PNM's approved annual renewable energy plans. As a separate component of the rider, PNM proposes that if its

earned return on jurisdictional equity in 2013 exceeds 10.5%, it would refund to customers during May through December 2014 the amount over 10.5%. A procedural schedule has been adopted and a public hearing is scheduled to begin May 14, 2012. PNM is unable to predict the outcome of this matter.

2011 Integrated Resource Plan

NMPRC rules require that investor owned utilities file an IRP every three years. The IRP is required to cover a 20-year planning period and contain an action plan covering the first four years of that period. In its most recent IRP, which was filed in July 2011, PNM indicated that it planned to meet its anticipated load growth through a combination of new natural gas-fired generating plants, renewable energy resources, load management, and energy efficiency programs. However, PNM has not entered into any commitments regarding these plans beyond what is otherwise described herein. As required by NMPRC rules, PNM utilized a public advisory group process during the development of the 2011 IRP. Two protests were filed to the IRP requesting rejection of the plan. The NMPRC assigned the case to a Hearing Examiner and designated a mediator to facilitate negotiations.

#### Table of Contents

# PNM RESOURCES, INC. AND SUBSIDIARIES PUBLIC SERVICE COMPANY OF NEW MEXICO AND SUBSIDIARIES TEXAS-NEW MEXICO POWER COMPANY AND SUBSIDIARIES NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

The NMPRC staff filed a motion in December 2011 to dismiss the protests and terminate the proceeding on the ground that PNM's IRP fully complies with NMPRC rules. PNM is unable to predict the outcome of this matter. Transmission Rate Case

In October 2010, PNM filed a notice with FERC to increase its wholesale electric transmission revenues by \$11.1 million annually, based on a return on equity of 12.25%. The filing also seeks to revise certain Open Access Transmission Tariff provisions and bi-lateral contractual terms. If approved, the rate increase would apply to all of PNM's wholesale electric transmission service customers, which include other utilities, electric cooperatives, and entities that use PNM's transmission system to transmit power at the wholesale level. The proposed rate increase would not impact PNM's retail customers. In December 2010, FERC issued an order accepting PNM's filing and suspending the proposed tariff revisions for five months. The proposed rates were implemented on June 1, 2011, subject to refund. PNM and other parties to the case had engaged in settlement discussions. However, due to an impasse in those settlement negotiations, the settlement judge issued an order in August 2011 designating an ALJ, establishing procedural time standards, and terminating settlement judge procedures. The ALJ scheduled a hearing for this proceeding to commence on April 4, 2012. Subsequent to the ALJ's order setting the hearing, the staff of FERC made a filing recommending an annual revenue increase of \$4.6 million, based on a return on equity of 10.4%. After the FERC staff made its filing, settlement discussions have resumed and are ongoing. The procedural schedule has been suspended. If a settlement is reached, it is anticipated it would be filed by June 1, 2012. PNM is unable to predict the outcome of this proceeding.

#### Firm-Requirements Wholesale Customer Rate Case

In September 2011, PNM filed an unexecuted amended sales agreement between PNM and NEC with FERC. The agreement proposes a cost of service based rate for the electric service and ancillary services PNM provides to NEC, which would result in an annual increase of \$8.7 million or a 39.8% increase over existing rates. PNM also requested a FPPAC and full recovery of certain third-party transmission charges PNM incurs to serve NEC. NEC filed a protest to PNM's filing with FERC. In November 2011, FERC issued an order accepting the agreement as filed, suspending the effective date for a five-month period, to be effective April 14, 2012, subject to refund, and set the proceeding for settlement. The parties are currently in settlement negotiations. PNM is unable to predict the outcome of this proceeding.

#### TNMP

# Interest Rate Compliance Tariff

Following a revision of the interest rate on TNMP's CTC, TNMP filed a compliance tariff to implement the new lower 8.31% rate. Intervenors asserted objections and, after regulatory proceedings, the PUCT issued an order making the new rate retroactive to July 20, 2006. TNMP successfully appealed to the District Court in Austin, Texas for the new rate not to be effective prior to December 27, 2007. However, the Texas 3rd Court of Appeals reversed the District Court and reaffirmed the PUCT's decision. TNMP petitioned the Texas Supreme Court for review in July 2011. After opposing parties filed responses, the Texas Supreme Court ordered full briefing of this matter, which was completed in April 2012. TNMP is unable to predict if the Texas Supreme Court will review the decision or the ultimate outcome of this matter.

#### Advanced Meter System Deployment and Surcharge Request

In July 2011, the PUCT approved a settlement and authorized an advanced meter deployment plan that permits TNMP to collect \$113.3 million in deployment costs through a surcharge over a 12-year period. TNMP began collecting the surcharge on August 11, 2011. Deployment of advanced meters began in September 2011 and is scheduled to be completed over a 5-year period. In February 2012, the PUCT opened a proceeding to consider the feasibility of an

"opt-out" program for retail consumers that wish to decline receipt of an advanced meter. The opt-out program would apply to all transmission and distribution utilities in ERCOT. TNMP cannot predict the outcome or effect of this proceeding.

Remand of ERCOT Transmission Rates for 1999 and 2000

Following a variety of appeals, the ERCOT transmission rates approved in 1999 and 2000 were recently remanded back to the PUCT. These dockets concern the recalculation of rates for the fourth quarter of 1999 and all of 2000 to correct over-payments made by certain market participants and the recovery of additional, undetermined transmission costs by the City Public

## Table of Contents

# PNM RESOURCES, INC. AND SUBSIDIARIES PUBLIC SERVICE COMPANY OF NEW MEXICO AND SUBSIDIARIES TEXAS-NEW MEXICO POWER COMPANY AND SUBSIDIARIES NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

Service Board of San Antonio ("CPS"). In October 2011, TNMP joined in a non-unanimous settlement of the issues relating to resettlement of the last four months of 1999. In October 2011, an ALJ dismissed CPS' claims regarding its resettlement of 2000 and 4<sup>th</sup> Quarter of 1999. In January 2012, the PUCT declined to hear CPS' appeal, approved the non-unanimous settlement of the last four months of 1999, and severed any remaining claims belonging to CPS into a separate proceeding. TNMP is scheduled to receive \$1.6 million under the settlement, of which \$1.1 million was received as of March 31, 2012. Whether such amounts have to be passed on to customers will be determined in TNMP's next transmission cost recovery factor filing. TNMP cannot predict the ultimate outcome of this matter.

# (11) Optim Energy

Information concerning Optim Energy is discussed in Note 21 of the Notes to Consolidated Financial Statements in the 2011 Annual Reports on Form 10-K. PNMR and ECJV each had a 50 percent ownership interest in Optim Energy, a limited liability company, until September 23, 2011, when Optim Energy was restructured and PNM's interest was reduced to 1%. On January 4, 2012, ECJV exercised its option to acquire PNMR's remaining 1% ownership interest in Optim Energy using the equity method of accounting until September 23, 2011 and then used the cost method through January 4, 2012. PNMR Services Company provided certain corporate services to Optim Energy through December 31, 2011 and is continuing to provide services with respect to certain open tax matters.

PNMR fully impaired its investment in Optim Energy at December 31, 2010 and, in accordance with GAAP, did not recognize losses of Optim Energy from January 1, 2011 through September 23, 2011, when PNMR ceased to account for its investment using the equity method of accounting. Accordingly, Optim Energy had no impact on PNMR's December 31, 2011 balance sheet or the statements of earnings and statements of cash flows for 2012 and 2011. Therefore, summarized financial information for Optim Energy is not presented.

#### (12) Related Party Transactions

PNMR, PNM, and TNMP are considered related parties as defined under GAAP. TNMP provides transmission and distribution services to First Choice. On November 1, 2011, PNMR sold First Choice. TNMP revenues from First Choice through October 31, 2011 were related party revenues and included in the table below. PNMR Services Company provides corporate services to PNMR and its subsidiaries in accordance with shared services agreements. Optim Energy was a related party prior to September 23, 2011. PNMR Services Company provided corporate services to Optim Energy under a services agreement. There was also a services agreement for Optim Energy to provide services to PNMR. See Note 11 for information concerning Optim Energy.

#### (13) New Accounting Pronouncements

Information concerning recently issued accounting pronouncements that have not been adopted by the Company and could have a material impact is presented below.

Accounting Standards Update 2011-11 - Balance Sheet: Disclosures about Offsetting Assets and Liabilities

The FASB released amended guidance that will require entities to disclose both gross and net information about instruments and transactions eligible for offset in the statement of financial position as well as instruments and transactions subject to an agreement similar to a master netting arrangement. In addition, the update requires disclosure of collateral received and posted in connection with master netting agreements or similar agreements. The update is effective for annual reporting periods beginning on or after January 1, 2013, and interim periods therein. The disclosures required by this amendment will be applied retrospectively for all comparative periods presented. The Company is currently evaluating the impacts of this new standard.

# (14)Sale of First Choice

On September 23, 2011, PNMR entered into an agreement for the sale of First Choice to Direct LP, Inc. for \$270.0 million, subject to adjustment to reflect the amounts of certain components of working capital at closing. Closing occurred on November 1, 2011, with PNMR receiving \$329.3 million, which includes an estimate of the components

of working capital. For accounting purposes, the sale was effective as of the close of business on October 31, 2011. PNMR recognized a pre-tax gain of \$174.9 million on the sale. The purchaser has indicated to PNMR that it believes the amount paid at closing for working capital at October 31, 2011 was overstated by \$2.4 million. PNMR has responded to the purchaser disputing the purchaser's calculation and indicating that the amount paid at closing for working capital at October 31, 2011 was overstated by \$2.4 million. PNMR has responded to the purchaser disputing the purchaser's calculation and indicating that the amount paid at closing for working capital at October 31, 2011 was understated by \$5.8 million. PNMR believes its calculation is consistent with the terms of the agreement. PNMR cannot predict the outcome of this matter, but does not believe the ultimate resolution of this matter will have a material impact on its financial condition, results of operation, or cash flows. PNMR Services Company is providing certain services at cost to First Choice for a transitional period of up to nine months following closing. Because PNMR continues to have direct cash flows resulting from transmission and distribution services provided by TNMP to First Choice, First Choice is not reflected as discontinued operations. After October 31, 2011, TNMP's revenues from First Choice are not intercompany and are not eliminated in consolidation by PNMR.

## Table of Contents

# ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following Management's Discussion and Analysis of Financial Condition and Results of Operations for PNMR is presented on a combined basis, including certain information applicable to PNM and TNMP. The MD&A for PNM and TNMP is presented as permitted by Form 10-Q General Instruction H (2). For discussion purposes, this report uses the term "Company" when discussing matters of common applicability to PNMR, PNM, and TNMP. A reference to a "Note" in this Item 2 refers to the accompanying Notes to Condensed Consolidated Financial Statements (Unaudited) included in Item 1, unless otherwise specified. Certain of the tables below may not appear visually accurate due to rounding.

MD&A FOR PNMR

## EXECUTIVE SUMMARY

Company Overview and Strategy

PNMR is a holding company with two regulated utilities serving approximately 739,000 residential, commercial, and industrial customers and end-users of electricity in New Mexico and Texas. In the latter part of 2011, PNMR exited both of its competitive businesses, First Choice and Optim Energy, and repositioned itself as a holding company solely operating its electric utilities, PNM and TNMP. Optim Energy had no impact on 2011 results of operations because it was written off in 2010 and PNMR had no further financial commitment to Optim Energy. Strategic Goals

PNMR is focused on achieving the following strategic goals:

Earning authorized returns on its regulated businesses Continuing to improve credit ratings Providing a top-quartile total return to investors

PNMR's success in accomplishing these strategic goals is highly dependent on continued favorable regulatory treatment for its utilities. Both PNM and TNMP seek cost recovery for their investments through general rate cases and various rate riders. The PUCT has approved mechanisms that allow for recovery of capital invested in transmission and distribution projects without having to file a general rate case. This allows for more timely recovery of amounts invested in TNMP's systems.

PNM and TNMP have recently completed rate proceedings before their state regulators. PNM has two rate cases pending before FERC. PNM has filed for approval of a renewable energy rider to recover NMPRC approved renewable energy costs. A hearing on the rider is scheduled to begin on May 14, 2012. Additional information about rate filings is provided in Note 17 of the Notes to Consolidated Financial Statements in the 2011 Annual Reports on Form 10-K and in Note 10. PNM has announced that it intends to file a request for an increase in the rates charged to New Mexico retail customers in late 2012.

Fair and timely rate treatment from regulators is crucial to achieving PNMR's strategic goals because it leads to PNM and TNMP earning their allowed returns. PNMR believes that if the utilities earn their allowed returns, it would be viewed positively by rating agencies and would further improve credit ratings, which could lower costs to customers. Also, earning allowed returns should result in increased earnings for PNMR, which should lead to increased total returns to investors.

PNM's interest in PVNGS Unit 3 is permanently excluded from NMPRC jurisdictional rates. While PVNGS Unit 3's financial contribution is not calculated in the authorized returns on its regulated business, it impacts PNM's earnings and has demonstrated to be a valuable asset. Power generated from PNM's 134 MW interest in PVNGS Unit 3 is

currently sold into the wholesale market and any earnings or losses are attributable to shareholders.

# Exit from Competitive Businesses

As a result of the exit from its competitive businesses, First Choice and Optim Energy, PNMR's business model is centered on its electric utilities. The elimination of the competitive businesses should reduce PNMR's risk and earnings volatility. Additional discussion about the exit from the competitive businesses is found in Note 2 and Note 21 of the Notes to Consolidated Financial Statements in the 2011 Annual Reports on Form 10-K.

# Table of Contents

# **Business Principles**

In addition to its strategic goals, three principles drive PNMR's business strategy and decision-making:

Contribute to the economic vitality of the communities we serve Demonstrate environmental stewardship Exhibit social responsibility

In support of these principles, PNMR works closely with customers, stakeholders, legislators, and regulators to ensure that our resource plans and infrastructure investments benefit from robust public dialogue and balance the diverse needs of our communities.

Economic Vitality

PNMR and its utilities are keenly aware of the roles they play in enhancing economic vitality in their New Mexico and Texas service territories. We believe there is a direct connection between electric infrastructure and economic growth. When considering expanding or relocating to other communities, businesses consider energy affordability and energy reliability to be important factors. PNM and TNMP strive to balance service affordability with infrastructure investment to maintain a high level of electric reliability. The utilities also work to ensure that rates reflect actual costs of providing service.

Investing in PNM's and TNMP's infrastructure is critical to ensure reliability and meet future energy needs. Both utilities have long-established records of providing customers with top-tier electric reliability. In September 2011, TNMP began its deployment of smart meters in homes and businesses across its Texas service area. As part of the state of Texas' long-term initiative to create a smart electric grid, the smart meter rollout will ultimately give consumers more energy consumption data and help them make more informed decisions. TNMP's deployment is expected to be completed in 2016.

Environmental Stewardship

For years, PNMR has demonstrated its commitment to environmental stewardship. PNMR's environmental objectives focus on four areas:

Deploying renewable energy

Reducing emissions from existing fossil-fueled power plants

Increasing energy efficiency participation

Reducing waste

In 2011, PNM completed its \$95 million investment in a utility-owned renewable energy project when five utility-scale solar facilities went online. The five solar sites located in Alamogordo, Deming, Los Lunas, Las Vegas, and Albuquerque provide a combined 22 MW of power. A sixth facility, the 500-KW PNM Prosperity Energy Storage Project, uses advanced batteries to store solar power and dispatch the energy either during high-use periods or when solar production is limited. The project features one of the largest combinations of battery storage and PV energy in the nation and involves extensive research and development of smart grid concepts with the Electric Power Research Institute, East Penn Manufacturing Co., Northern New Mexico College, Sandia National Laboratories, and the University of New Mexico. When the facility went online in September 2011, it was the nation's first solar storage facility fully integrated into a utility's power grid.

In addition, PNM's resource portfolio includes the purchase of 200 MW of wind power. PNM also purchases power from a customer-owned distributed solar generation program having an installed capacity of 14 MW at the end of 2011, which capacity is expected to double in 2012. Distributed generation, wind, and solar power are key means for PNM to meet the RPS established by the REA and related regulations issued by the NMPRC. These rules require a utility to achieve prescribed levels of energy sales from renewable sources within its generation mix, if that can be accomplished without exceeding the RCT cost limit set by the NMPRC, which aims to moderate the cost to consumers when utilities use more renewable resources.

PNM sought and received a waiver from the NMPRC excusing it from meeting the RPS in 2012 because the cost to achieve the full RPS would exceed the RCT. However, PNM will continue to procure renewable resources while balancing the bill impact to customers in order to meet New Mexico's escalating RPS requirements.

## Table of Contents

On April 30, 2012, PNM filed its 2013 Renewable Energy Plan, which calls for:

20 MW of PNM-owned solar facilities to be in service by the end of 2013

A 20-year PPA for the output of a 10-MW geothermal facility to be in service by January 1, 2014 Limited wind and solar REC purchases in 2013

The proposed plan would achieve RPS quantity compliance in 2013, but likely will be slightly below the 20% solar renewable energy diversity requirement. However, in 2014, the plan would achieve full quantity and diversity compliance and will be beneath the RCT for both years.

PNM's SJGS near Farmington, New Mexico, is one of the top performers in the nation with respect to mercury removal. The plant outperforms the mercury limit recently imposed by EPA. Major environmental upgrades on each of the four units at SJGS, which were completed in early 2009, have significantly reduced emissions of NOx, SO<sub>2</sub>, particulate matter, and mercury. PNM's share of the costs of these upgrades was \$161 million. Since 2006, SJGS has reduced NOx emissions by 44%, SO<sub>2</sub> by 71%, particulate matter by 72%, and mercury by 87%.

In order to keep costs to customers as low as possible while also reducing emissions from fossil-fuel generation, PNM has proposed the installation of SNCR technology at SJGS, which technology is also proposed by the State of New Mexico. However, the EPA has issued its FIP requiring SCR technology to be installed, which PNM estimates would significantly exceed the cost of installing SNCRs. PNM is challenging EPA's proposal in the courts and administratively within EPA.

Energy efficiency also plays a significant role in helping to keep customers' electricity costs low and meeting their energy needs. PNM's and TNMP's energy efficiency and load management portfolios continue to be robust. In 2011, annual energy saved as a result of PNM's portfolio of energy efficiency programs was approximately 58,900 MWh. This is equivalent to the consumption of approximately 7,700 homes in PNM's service territory. PNM's load management and energy efficiency programs also help lower peak demand requirements. TNMP's energy efficiency programs in 2011 resulted in energy savings totaling an estimated 13,435 MWh.

In 2008, PNMR established a three-year waste-reduction goal in which all facilities were to maintain recycling programs and identify significant waste streams. The target called for at least 75% of facilities to implement plans to reduce a minimum of one waste stream by 15% below 2009 levels. By the end of 2011, more than 87% of PNMR facilities had achieved the waste-reduction goal.

# Social Responsibility

Through outreach, collaboration, and various community-oriented programs, PNMR continues to make significant progress in two of its key focus areas of low-income assistance and energy efficiency support in New Mexico and Texas.

Building off work that began in 2008, continuing outreach efforts include numerous community events that connected low-income customers with non-profit community service providers offering support and help with such needs as utility bills, food, clothing, medical programs, services for seniors, and weatherization. Additionally, four of the largest grants awarded in 2011 by PNMR supported nonprofits in various areas such as:

#### Adult literacy

Assistance for families trying to emerge from poverty

Food rescue from restaurants and grocers to help feed those in need

Assistance for low-income individuals to build a home, start a small business, or pursue higher education

In 2011, the PNM Good Neighbor Fund provided \$1.2 million of assistance with utility bills to 9,907 families. Further, as part of the settlement in its 2010 Electric Rate Case, PNM agreed to voluntarily contribute an additional \$1.3 million to the Good Neighbor Fund. This fund, along with additional collaboration with various other agencies, has helped to reduce the electricity affordability gap for many vulnerable customer groups such as seniors, young

families, and medically challenged households.

The PNM Resources Foundation helps nonprofits become more energy efficient through Reduce Your Use grants. In 2011, the foundation awarded more than \$0.3 million to support 87 projects in New Mexico and Texas that helped purchase energy efficiency appliances and install high-performance windows and solar panels. Since the program's inception in 2008, Reduce Your Use grants have provided nonprofit agencies with \$1.0 million of support in New Mexico and Texas.

## Table of Contents

#### **Economic Factors**

In the three months ended March 31, 2012, PNM and TNMP experienced a decrease in weather-normalized, retail load of 0.3% and 0.5% from 2011. In recent years, New Mexico and Texas have fared better than the national average in economic indicators such as unemployment and employment growth.

## Rate Base Potential Growth

Based on the 5-year capital plan announced in December 2011, PNM expects rate base to grow at a 2% compound annual rate between 2011 and 2013. That growth figure could be 6% from 2011 through 2016 through additional potential capital investments. The largest of these involves possibly being required to install SCR technology to reduce emissions at SJGS and Four Corners. The addition of other facilities, such as renewable resources and peaking capacity, could also expand rate base. TNMP's compound annual rate base growth rate from 2011 through 2013 is estimated at 8%, predicated on the utility's 5-year capital plan announced in December 2011. A significant portion of TNMP's capital additions should be recovered through expedited transmission and distribution cost recovery mechanisms authorized by the PUCT. PNMR will continue to carefully balance the potential rate base growth for PNM and TNMP with customer rate impacts.

Results of Operations

A summary of net earnings attributable to PNMR is as follows:

	Three Months Ended March 31,			
	2012	2011	Change	
	(In millions, except per share amounts)			
Net earnings	\$17.1	\$16.6	\$0.5	
Average diluted common and common equivalent shares	80.5	92.1	(11.6	)
Net earnings per diluted share	\$0.21	\$0.18	\$0.03	

The components of the change in earnings attributable to PNMR (in millions) are:

PNM Electric	\$14.1			
TNMP Electric	(1.2	)		
First Choice	(13.5	)		
Corporate and Other	1.1			
Net change	\$0.5			
PNMR's operational results were affected by the following:				

Exit from unregulated businesses - As discussed above, PNMR sold First Choice in 2011; therefore 2012 results of operations do not include First Choice

Rate increases for PNM and TNMP - Additional information about these rate increases is provided in Note 17 of the Notes to Consolidated Financial Statements in the 2011 Annual Reports on Form 10-K

Other factors - Other factors impacting results of operation for each segment are discussed under Results of Operations below. The decrease in the number of common and common equivalent shares is primarily due to PNMR's purchase of its equity described in Note 6 of the Notes to Consolidated Financial Statements in the 2011 Annual Reports on Form 10-K

# Liquidity and Capital Resources

During 2011, PNMR and PNM replaced their revolving credit facilities with new facilities. The new facilities provide capacities for short-term borrowing and letters of credit of \$300.0 million for PNMR and \$400.0 million for PNM. In addition, TNMP has a \$75.0 million revolving credit facility. Total availability for PNMR on a consolidated basis was \$587.8 million at April 27, 2012. The Company utilizes these credit facilities and cash flows from operations to

provide funds for both construction and operational expenditures. PNMR also has intercompany loan agreements with each of its subsidiaries.

## Table of Contents

The Company projects that its total capital requirements, consisting of construction expenditures and dividends, will total \$1,526.3 million for 2012-2016, including amounts expended through March 31, 2012. This estimate does not include any amounts related to environmental upgrades at SJGS or Four Corners that may be required by EPA to address regional haze or other environmental compliance requirements, additional renewable resources that may be required to meet the RPS, or additional peaking resources that may be needed to meet needs outlined in PNM's current IRP. In addition to internal cash generation, the Company anticipates that it will be necessary to obtain additional long-term financing in the form of debt refinancing, new debt issuances, and/or new equity in order to fund its capital requirements during the 2012-2016 period. The Company currently believes that its internal cash generation, existing credit arrangements, and access to public and private capital markets will provide sufficient resources to meet the Company's capital requirements.

## **RESULTS OF OPERATIONS**

#### Segment Information

The following discussion is based on the segment methodology that PNMR's management uses for making operating decisions and assessing performance of its various business activities. See Note 3 for more information on PNMR's operating segments.

The following discussion and analysis should be read in conjunction with the Condensed Consolidated Financial Statements and Notes thereto. Trends and contingencies of a material nature are discussed to the extent known. Refer also to Disclosure Regarding Forward Looking Statements and to Part II, Item 1A. Risk Factors.

#### **PNM Electric**

The table below summarizes operating results for PNM Electric:

	Three Months Ended March 31,			
	2012	2011	Change	
	(In millions)			
Total revenues	\$250.4	\$234.2	\$16.2	
Cost of energy	80.6	89.2	(8.6	)
Gross margin	169.9	145.0	24.8	
Operating expenses	104.1	103.1	1.0	
Depreciation and amortization	23.6	23.7	(0.1	)
Operating income	42.1	18.2	23.9	
Other income (deductions)	8.3	9.3	(1.0	)
Net interest charges	(18.5	) (18.1	) (0.4	)
Earnings before income taxes	31.9	9.4	22.5	
Income (taxes)	(10.9	) (2.4	) (8.5	)
Valencia non-controlling interest	(3.3	) (3.2	) (0.1	)
Preferred stock dividend requirements	(0.1	) (0.1	) —	
Segment earnings	\$17.7	\$3.6	\$14.1	

#### Table of Contents

The table below summarizes the significant changes to total revenues, cost of energy, and gross margin:

	2011/2012 Change			
	Total	Cost of	Gross	
	Revenues	Energy	Margin	
	(In millions)			
Retail rate increases	\$16.7	<b>\$</b> —	\$16.7	
Retail load, fuel, and transmission	(5.2	) (9.6	) 4.4	
Energy efficiency rider	5.0		5.0	
Unregulated margins	(2.8	) 0.1	(2.9	)
Net unrealized economic hedges	2.5	0.9	1.6	
Total increase	\$16.2	\$(8.6	) \$24.8	

The following table shows PNM Electric operating revenues by customer class, including intersegment revenues and average number of customers:

) ) )

Three Months Ended March 31,			
2012	2011	Change	
(In millions, except customers)			
\$99.7	\$88.2	\$11.5	
87.4	76.9	10.5	
23.5	20.7	2.8	
5.3	4.8	0.5	
4.6	2.1	2.5	
8.9	10.1	(1.2

The following table shows PNM Electric GWh sales by customer class:

	Three Months Ended March 31,				
	2012	2011	Change		
	(Gigawat	(Gigawatt hours)			
Residential	837.2	851.9	(14.7	)	
Commercial	899.5	891.9	7.6		
Industrial	413.8	361.4	52.4		
Public authority	56.1	57.4	(1.3	)	
Firm requirements wholesale	172.8	183.3	(10.5	)	
Other sales for resale	281.1	610.6	(329.5	)	
	2,660.5	2,956.5	(296.0	)	

On August 21, 2011, PNM implemented a \$72.1 million annual non-fuel rate increase for its retail customers, including those customers formerly served by TNMP. This rate increase improved revenues and margins by \$16.7 million in the three months ended March 31, 2012 compared to 2011. A small growth in the average number of retail customers was offset by milder weather compared to the prior quarter and a decrease in average usage per customer. The increase in fuel costs and the reduction in off-system sales volumes resulting from the fire incident at the mine providing coal to SJGS are recovered through PNM's FPPAC and did not negatively impact 2012 results. See Note 10 for more discussion on the San Juan mine fire incident.

#### Table of Contents

PNM offers several energy efficiency programs and initiatives to its retail customers regulated by the NMPRC. In addition, PNM is allowed to earn adders on these programs, based on energy savings of the programs. PNM recovers these energy efficiency program costs via a rate rider. In 2012, revenue and margins improved by \$5.0 million, of which \$0.2 million is adder revenues and the remaining \$4.8 million is offset with an increase in operating expense for the energy efficiency program costs.

Lower revenues and margin of \$2.9 million associated with sales from PNM's share of PVNGS Unit 3, which is excluded from retail regulation, was a result of lower market power prices.

Changes in unrealized mark-to-market gains and losses are based on economic hedges in place for sales and fuel costs not covered under the FPPAC, primarily associated with PVNGS Unit 3. Unrealized gains of \$3.5 million for the three months ended March 31, 2012 compared to \$1.9 million for the three months ended March 31, 2011, increased gross margin by \$1.6 million.

Operating expenses include increased costs associated with energy efficiency programs of \$4.8 million, which are recovered through the rate rider discussed above, and higher property taxes of \$0.4 million. These increases were offset by lower costs due to the timing of planned outage and maintenance costs at Reeves Station of \$0.7 million and SJGS of \$1.5 million. Lower retiree medical and pension expenses of \$0.3 million as well as lower distribution labor and vegetation management expenses of \$0.9 million partially offset other increases in operating expenses.

Depreciation and amortization remained relatively flat in 2012 compared to 2011. Incremental depreciation expense related to PNM's investment of \$95 million in 22 MW of solar PV facilities and a solar-storage demonstration facility are deferred as a regulatory asset pending approval of the Renewable Energy Rider. See Note 10.

Realized gains on NDT assets were \$1.7 million lower in 2012 compared to 2011. Interest income on the PVNGS lessor notes was \$0.8 million lower due to a lower outstanding balance, which was partially offset by a \$1.1 million increase in the equity portion of AFUDC.

Interest expense increased \$2.2 million due to the issuance of \$160 million of long-term debt in October 2011, which was partially offset by a \$0.9 million increase in the debt portion of AFUDC and \$1.1 million of interest charges on PNM's investment in renewable resources that are deferred for recovery through a renewable energy rider. See Note 10.

)

#### **TNMP** Electric

The table below summarizes the operating results for TNMP Electric:

	Three Months Ended March 31,			
	2012	2011	Change	
	(In millions)			
Total revenues	\$55.0	\$53.8	\$1.2	
Cost of energy	11.3	10.2	1.1	
Gross margin	43.7	43.7	0.1	
Operating expenses	20.6	19.7	0.9	
Depreciation and amortization	11.3	10.3	1.0	
Operating income	11.8	13.7	(1.9	
Other income (deductions)	0.1	0.3	(0.2	
Net interest charges	(7.1	) (7.3	) 0.2	
Earnings before income taxes
