MAGELLAN MIDSTREAM PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Organization, Description of Business and Basis of Presentation

Organization

Unless indicated otherwise, the terms “our,” “we,” “us” and similar language refer to Magellan Midstream Partners, L.P. together with its subsidiaries. We are a Delaware limited partnership and our limited partner units are traded on the New York Stock Exchange under the ticker symbol “MMP.” Magellan GP, LLC, a wholly-owned Delaware limited liability company, serves as our general partner.

Description of Business

We are principally engaged in the transportation, storage and distribution of refined petroleum products and crude oil. As of June 30, 2015, our asset portfolio, including the assets of our joint ventures, consisted of:

• our refined products segment, comprised of our 9,500-mile refined products pipeline system with 52 terminals as well as 28 independent terminals not connected to our pipeline system and our 1,100-mile ammonia pipeline system;

• our crude oil segment, comprised of approximately 1,600 miles of crude oil pipelines and storage facilities with an aggregate storage capacity of approximately 21 million barrels, of which 13 million barrels are used for leased storage; and

• our marine storage segment, consisting of five marine terminals located along coastal waterways with an aggregate storage capacity of approximately 26 million barrels.

Products transported, stored or distributed through our pipelines and terminals include:

• refined products are the output from refineries and are primarily used as fuels by consumers. Refined products include gasoline, diesel fuel, aviation fuel, kerosene and heating oil. Collectively, diesel fuel and heating oil are referred to as distillates;

• liquefied petroleum gases, or LPGs are produced as by-products of the crude oil refining process and in connection with natural gas production. LPGs include butane and propane;

• blendstocks are blended with refined products to change or enhance their characteristics such as increasing a gasoline's octane or oxygen content. Blendstocks include alkylates, oxygenates and natural gasoline;

• heavy oils and feedstocks are used as burner fuels or feedstocks for further processing by refineries and petrochemical facilities. Heavy oils and feedstocks include No. 6 fuel oil and vacuum gas oil;

• crude oil and condensate are used as feedstocks by refineries and petrochemical facilities;

• biofuels, such as ethanol and biodiesel, are increasingly required by government mandates; and

• ammonia is primarily used as a nitrogen fertilizer.

Except for ammonia, we use the term petroleum products to describe any, or a combination, of the above-noted products.

6

MAGELLAN MIDSTREAM PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Basis of Presentation

In the opinion of management, our accompanying consolidated financial statements which are unaudited, except for the consolidated balance sheet as of December 31, 2014 which is derived from our audited financial statements, include all normal and recurring adjustments necessary to present fairly our financial position as of June 30, 2015, the results of operations for the three and six months ended June 30, 2014 and 2015 and cash flows for the six months ended June 30, 2014 and 2015. The results of operations for the six months ended June 30, 2015 are not necessarily indicative of the results to be expected for the full year ending December 31, 2015 as profits from our blending activities are realized largely during the first and fourth quarters of each year. Additionally, gasoline demand, which drives transportation volumes and revenues on our pipeline systems, generally trends higher during the summer driving months. Further, the volatility of commodity prices impact the profits from our commodity activities and, to a lesser extent, the volume of petroleum products we ship on our pipelines.

Pursuant to the rules and regulations of the Securities and Exchange Commission, the financial statements in this report do not include all of the information and notes normally included with financial statements prepared in accordance with accounting principles generally accepted in the United States. These financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2014.

Use of Estimates

The preparation of our consolidated financial statements in conformity with generally accepted accounting principles in the U.S. ("GAAP") requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities that exist at the date of our consolidated financial statements, as well as their impact on the reported amounts of revenue and expense during the reporting periods. Actual results could differ from those estimates.

2. Product Sales Revenue

The amounts reported as product sales revenue on our consolidated statements of income include revenue from the physical sale of petroleum products and from mark-to-market adjustments from New York Mercantile Exchange ("NYMEX") contracts. See Note 8 – Derivative Financial Instruments for a discussion of our commodity hedging strategies and how our NYMEX contracts impact product sales revenues. All of the petroleum products inventory we physically sell associated with our butane blending and fractionation activities as well as the barrels from product gains we obtain from our independent terminals are reported as product sales on our consolidated statements of income. The physical sale of the petroleum products inventory from product gains obtained from our pipeline operations and crude terminal activities are reported as adjustments to operating expense.

Table of ContentsMAGELLAN MIDSTREAM PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

For the three and six months ended June 30, 2014 and 2015, product sales revenue included the following (in thousands):

	Three Months Ended		Six Months Ended	
	June 30, 2014	2015	June 30, 2014	2015
Physical sale of petroleum products	\$154,310	\$133,319	\$447,550	\$302,566
NYMEX contract adjustments:				
Change in value of NYMEX contracts that were not designated as hedging instruments associated with our butane blending and fractionation activities	(16,666)	(23,350)	(13,843)	(19,470)
Other	13	—	13	—
Total NYMEX contract adjustments	(16,653)	(23,350)	(13,830)	(19,470)
Total product sales revenue	\$137,657	\$109,969	\$433,720	\$283,096

3. Segment Disclosures

Our reportable segments are strategic business units that offer different products and services. Our segments are managed separately because each segment requires different marketing strategies and business knowledge. Management evaluates performance based on segment operating margin, which includes revenue from affiliates and external customers, operating expenses, cost of product sales and earnings of non-controlled entities.

We believe that investors benefit from having access to the same financial measures used by management. Operating margin, which is presented in the following tables, is an important measure used by management to evaluate the economic performance of our core operations. Operating margin is not a GAAP measure, but the components of operating margin are computed using amounts that are determined in accordance with GAAP. A reconciliation of operating margin to operating profit, which is its nearest comparable GAAP financial measure, is included in the tables below. Operating profit includes depreciation and amortization expense and general and administrative ("G&A") expenses that management does not consider when evaluating the core profitability of our separate operating segments.

On May 1, 2015, we acquired a refined products terminal in Atlanta, Georgia for net cash consideration of \$54.7 million. As this acquired business is not significant to our consolidated operating results and financial position, pro forma financial information and the purchase price allocation of acquired assets and liabilities have not been presented. The results of the acquired operations subsequent to the acquisition date have been included in the accompanying consolidated financial statements and in the tables below in our refined products operating segment.

4. Investments in Non-Controlled Entities

Recently-Formed Company

Seabrook Logistics, LLC ("Seabrook") was formed in second quarter 2015 to construct, own and operate crude oil storage and pipeline infrastructure in the Houston Gulf Coast area. We hold a 50% equity ownership interest in

Seabrook, with LBC Tank Terminals, LLC holding the other 50% equity ownership interest. The assets to be constructed and owned by Seabrook include over 700,000 barrels of crude oil storage located adjacent to LBC's existing terminal in Seabrook, Texas. In addition, Seabrook will construct and own an 18-inch diameter pipeline, which will connect Seabrook's storage facilities to an existing third-party pipeline that will transport crude oil to a Houston-area refinery. Subject to the receipt of permits and regulatory approvals, the new storage facility and pipeline infrastructure are expected to be operational in the first quarter of 2017.

Table of ContentsMAGELLAN MIDSTREAM PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Our investments in non-controlled entities at June 30, 2015 were comprised of:

Entity	Ownership Interest
BridgeTex Pipeline Company, LLC ("BridgeTex")	50%
Double Eagle Pipeline LLC ("Double Eagle")	50%
Osage Pipe Line Company, LLC ("Osage")	50%
Powder Springs Logistics, LLC ("Powder Springs")	50%
Saddlehorn Pipeline Company, LLC ("Saddlehorn")	40%
Seabrook Logistics, LLC	50%
Texas Frontera, LLC ("Texas Frontera")	50%

The management fees we have recognized or will recognize from BridgeTex, Osage, Powder Springs, Saddlehorn, Seabrook and Texas Frontera are or will be reported as affiliate management fee revenue on our consolidated statements of income.

At December 31, 2014 and June 30, 2015, we recognized liabilities of \$2.2 million and \$1.1 million, respectively, to BridgeTex primarily for pre-paid construction management fees. For the three and six months ended June 30, 2015, we recognized pipeline capacity lease revenue from BridgeTex of \$8.5 million and \$16.9 million, respectively, which we included in transportation and terminals revenue on our consolidated statements of income. We recognized a \$2.6 million receivable from BridgeTex at December 31, 2014 (no receivable was recognized at June 30, 2015).

We recognized throughput revenue from Double Eagle for the three months ended June 30, 2014 and 2015 of \$0.8 million and \$0.9 million, respectively, and for the six months ended June 30, 2014 and 2015 of \$1.3 million and \$1.8 million, respectively, which we included in transportation and terminals revenue. At December 31, 2014 and June 30, 2015, respectively, we recognized a \$0.3 million trade accounts receivable from Double Eagle.

The financial results from Texas Frontera are included in our marine storage segment, the financial results from BridgeTex, Double Eagle, Osage, Saddlehorn and Seabrook are or will be included in our crude oil segment and the financial results from Powder Springs are included in our refined products segment as earnings/losses of non-controlled entities.

Crude oil	10,015	32,501
Additives	6,183	6,102
Total inventory	\$157,762	\$159,920

6. Employee Benefit Plans

We sponsor two pension plans for certain union employees and a pension plan primarily for non-union employees, a postretirement benefit plan for selected employees and a defined contribution plan. The following tables present our consolidated net periodic benefit costs related to the pension and postretirement benefit plans for the three and six months ended June 30, 2014 and 2015 (in thousands):

	Three Months Ended June 30, 2014		Three Months Ended June 30, 2015		
	Pension Benefits	Other Postretirement Benefits	Pension Benefits	Other Postretirement Benefits	
Components of net periodic benefit costs:					
Service cost	\$3,352	\$47	\$4,975	\$56	
Interest cost	2,030	139	2,008	109	
Expected return on plan assets	(1,490) —	(2,123) —	
Amortization of prior service credit	—	(928) —	(928)
Amortization of actuarial loss	930	262	1,806	217	
Settlement cost	1,569	—	—	—	
Net periodic benefit cost (credit)	\$6,391	\$(480) \$6,666	\$(546)

Table of ContentsMAGELLAN MIDSTREAM PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

	Six Months Ended June 30, 2014		Six Months Ended June 30, 2015		
	Pension Benefits	Other Postretirement Benefits	Pension Benefits	Other Postretirement Benefits	
Components of net periodic benefit costs:					
Service cost	\$6,704	\$114	\$9,445	\$122	
Interest cost	3,689	253	3,877	219	
Expected return on plan assets	(3,187) —	(4,019) —	
Amortization of prior service cost (credit)	33	(1,856) —	(1,856)
Amortization of actuarial loss	1,559	457	3,153	442	
Settlement cost	1,569	—	—	—	
Net periodic benefit cost (credit)	\$10,367	\$(1,032) \$12,456	\$(1,073)

Contributions estimated to be paid into the plans in 2015 are \$21.1 million and \$1.1 million for the pension and other postretirement benefit plans, respectively.

We match our employees' qualifying contributions to our defined contribution plan, resulting in expense to us. Expenses related to the defined contribution plan were \$2.0 million and \$2.2 million, respectively, for the three months ended June 30, 2014 and 2015, and \$4.6 million and \$5.0 million, respectively, for the six months ended June 30, 2014 and 2015.

Amounts Included in AOCL

The changes in AOCL related to employee benefit plan assets and benefit obligations for the three and six months ended June 30, 2014 and 2015 were as follows (in thousands):

7. Debt

Consolidated debt at December 31, 2014 and June 30, 2015 was as follows (in thousands, except as otherwise noted):

	December 31, 2014	June 30, 2015	Weighted-Average Interest Rate for the Six Months Ended June 30, 2015 ⁽¹⁾
Commercial paper ⁽²⁾	\$296,942	\$144,982	0.5%
\$250.0 million of 5.65% Notes due 2016	250,758	250,546	5.7%
\$250.0 million of 6.40% Notes due 2018	257,280	256,248	5.4%
\$550.0 million of 6.55% Notes due 2019	567,868	566,006	5.7%
\$550.0 million of 4.25% Notes due 2021	556,304	555,837	4.0%
\$250.0 million of 3.20% Notes due 2025 ⁽²⁾	—	249,687	3.2%
\$250.0 million of 6.40% Notes due 2037	249,017	249,026	6.4%
\$250.0 million of 4.20% Notes due 2042	248,406	248,421	4.2%
\$550.0 million of 5.15% Notes due 2043	556,320	556,270	5.1%
\$250.0 million of 4.20% Notes due 2045 ⁽²⁾	—	249,913	4.6%
Total debt	\$2,982,895	\$3,326,936	4.8%

(1) Weighted-average interest rate includes the amortization/accretion of discounts, premiums and gains/losses realized on historical cash flow and fair value hedges recognized as interest expense.

These borrowings were outstanding for only a portion of the six month period ending June 30, 2015. The (2) weighted-average interest rate for these borrowings was calculated based on the number of days the borrowings were outstanding during the noted period.

All of the instruments detailed in the table above are senior indebtedness.

The face value of our debt at December 31, 2014 and June 30, 2015 was \$2.9 billion and \$3.3 billion, respectively. The difference between the face value and carrying value of our debt outstanding is the unamortized portion of terminated fair value hedges and the unamortized discounts and premiums on debt issuances. Realized gains and losses on fair value hedges and note discounts and premiums are being amortized or accreted to the applicable notes over the respective lives of those notes.

2015 Debt Offerings

In March 2015, we issued \$250.0 million of our 3.20% notes due 2025 in an underwritten public offering. The notes were issued at 99.871% of par. Net proceeds from this offering were \$247.6 million, after underwriting discounts and offering expenses of \$2.1 million.

Also in March 2015, we issued \$250.0 million of our 4.20% notes due 2045 in an underwritten public offering. The notes were issued at 99.965% of par. Net proceeds from this offering were \$247.3 million, after underwriting discounts and offering expenses of \$2.6 million.

The net proceeds from these offerings were used to repay borrowings outstanding under our commercial paper program and for general partnership purposes, including expansion capital.

Other Debt

Revolving Credit Facility. The total borrowing capacity under our revolving credit facility, which matures in November 2018, is \$1.0 billion. Borrowings outstanding under the facility are classified as long-term debt on our consolidated balance sheets. Borrowings under the facility are unsecured and bear interest at LIBOR plus a spread

Table of Contents

MAGELLAN MIDSTREAM PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

ranging from 1.0% to 1.75% based on our credit ratings. Additionally, an unused commitment fee is assessed at a rate from 0.10% to 0.28%, depending on our credit ratings. The unused commitment fee was 0.125% at June 30, 2015. Borrowings under this facility may be used for general partnership purposes, including capital expenditures. As of June 30, 2015, there were no borrowings outstanding under this facility; however, \$5.6 million was obligated for letters of credit. Amounts obligated for letters of credit are not reflected as debt on our consolidated balance sheets but decrease our borrowing capacity under the facility.

Commercial Paper Program. The maturities of our commercial paper notes vary, but may not exceed 397 days from the date of issuance. The commercial paper notes are sold under customary terms in the commercial paper market and are issued at a discount from par, or alternatively, are sold at par and bear varying interest rates on a fixed or floating basis. The commercial paper we can issue is limited by the amounts available under our revolving credit facility up to an aggregate principal amount of \$1.0 billion and, therefore, is classified as long-term debt.

8. Derivative Financial Instruments

Interest Rate Derivatives

We periodically enter into interest rate derivatives to economically hedge debt, interest or expected debt issuances, and we have historically designated these derivatives as cash flow or fair value hedges for accounting purposes. Adjustments resulting from discontinued hedges continue to be recognized in accordance with their historic hedging relationships.

In first quarter 2015, we entered into a \$50.0 million forward-starting interest rate swap agreement to hedge against the risk of variability of future interest payments on a portion of debt we anticipate issuing in 2016. The fair value of this contract at June 30, 2015 was recorded on our balance sheet as an other noncurrent asset of \$2.9 million with an offset to other comprehensive income. We account for this agreement as a cash flow hedge.

In third and fourth quarter of 2014, we entered into \$250.0 million of forward-starting interest rate swap agreements to hedge against the risk of variability of future interest payments on a portion of debt we anticipated issuing in 2015. We accounted for these agreements as cash flow hedges. When we issued the \$250.0 million of 4.20% notes due 2045 in first quarter 2015, we settled the associated interest rate swap agreements for a loss of \$42.9 million. The loss was recorded to other comprehensive income (\$26.5 million and \$16.4 million recorded in 2014 and 2015, respectively) and will be recognized into earnings as an adjustment to our periodic interest expense accruals over the life of the associated notes. This loss was also reported as a net payment on financial derivatives in the financing activities of our consolidated statements of cash flows in 2015.

Commodity Derivatives

Hedging Strategies

Our butane blending activities produce gasoline products, and we can reasonably estimate the timing and quantities of sales of these products. We use a combination of NYMEX and forward purchase and sale contracts to help manage commodity price changes, which is intended to mitigate the risk of decline in the product margin realized from our butane blending activities that we choose to hedge. Further, certain of our other commercial operations generate petroleum products. We use NYMEX contracts to hedge against future price changes for some of these commodities.

We account for the forward physical purchase and sale contracts we use in our butane blending and fractionation activities as normal purchases and sales. Forward contracts that qualify for and are elected as normal

Table of ContentsMAGELLAN MIDSTREAM PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

purchases and sales are accounted for using traditional accrual accounting. As of June 30, 2015, we had commitments under these forward purchase and sale contracts as follows (in millions):

	Notional Value	Barrels
Forward purchase contracts	\$118.3	3.5
Forward sale contracts	\$11.4	0.1

The NYMEX contracts that we enter into fall into one of three hedge categories:

Hedge Category	Hedge Purpose	Accounting Treatment
Qualifies For Hedge Accounting Treatment		
Cash Flow Hedge	To hedge the variability in cash flows related to a forecasted transaction.	The effective portion of changes in the value of the hedge is recorded to accumulated other comprehensive income/loss and reclassified to earnings when the forecasted transaction occurs. Any ineffectiveness is recognized currently in earnings.
Fair Value Hedge	To hedge against changes in the fair value of a recognized asset or liability.	The effective portion of changes in the value of the hedge is recorded as adjustments to the asset or liability being hedged. Any ineffectiveness and amounts excluded from the assessment of hedge effectiveness is recognized currently in earnings.
Does Not Qualify For Hedge Accounting Treatment		
Economic Hedge	To effectively serve as either a fair value or a cash flow hedge; however, the derivative agreement does not qualify for hedge accounting treatment under Accounting Standards Codification ("ASC") 815, Derivatives and Hedging.	Changes in the fair value of these agreements are recognized currently in earnings.

During the three and six months ended June 30, 2014 and 2015, none of the commodity hedging contracts we entered into qualified for or were designated as cash flow hedges.

Period changes in the fair value of NYMEX agreements that are accounted for as economic hedges (other than those economic hedges of our butane purchases and our pipeline product overages as discussed below), the effective portion of changes in the fair value of cash flow hedges that are reclassified from accumulated other comprehensive income/loss and any ineffectiveness associated with hedges related to our commodity activities are recognized currently in earnings as adjustments to product sales.

We also use NYMEX contracts, which are not designated as hedges for accounting purposes, to hedge against changes in the price of butane we expect to purchase in the future. Period changes in the fair value of these agreements are

recognized currently in earnings as adjustments to cost of product sales.

We currently hold petroleum product inventories that we obtained from overages on our pipeline systems. We use NYMEX contracts that are not designated as hedges for accounting purposes to help manage price changes related to these overage inventory barrels. Period changes in the fair value of these agreements are recognized currently in earnings as adjustments to operating expense.

Additionally, we hold crude oil barrels that we use for operational purposes which we classify as long-term assets on our balance sheet and which are reported as tank bottom and linefill assets. We use NYMEX contracts to hedge against changes in the price of these crude oil barrels. We record the effective portion of the gains or losses for those contracts that qualify as fair value hedges as adjustments to the assets being hedged and the ineffective portions as well as amounts excluded from the assessment of hedge effectiveness as adjustments to other income or expense.

Table of ContentsMAGELLAN MIDSTREAM PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

As outlined in the table below, our open NYMEX contracts at June 30, 2015 were as follows:

Type of Contract/Accounting Methodology	Product Represented by the Contract and Associated Barrels	Maturity Dates
NYMEX - Fair Value Hedges	0.7 million barrels of crude oil	Between December 2015 and November 2016
NYMEX - Economic Hedges	5.6 million barrels of refined products and crude oil ⁽¹⁾	Between July 2015 and December 2016
NYMEX - Economic Hedges	1.3 million barrels of future purchases of butane	Between September 2015 and December 2016

(1) Of the 5.6 million barrels of products we have economically hedged at June 30, 2015, we had open agreements which swap the pricing on 1.6 million of those barrels from New York Harbor to Platts Group 3 or Platts Gulf Coast, which are the geographic locations where these barrels will be sold.

Energy Commodity Derivatives Contracts and Deposits Offsets

At June 30, 2015, we had made margin deposits of \$5.7 million for our NYMEX contracts with one of our counterparties, which were recorded as a current asset under energy commodity derivatives deposits on our consolidated balance sheet. We have the right to offset the combined fair values of our open NYMEX contracts against our margin deposits under a master netting arrangement for each counterparty; however, we have elected to present the combined fair values of our open NYMEX contracts separately from the related margin deposits on our consolidated balance sheets. Additionally, we have the right to offset the fair values of our NYMEX agreements together for each counterparty, which we have elected to do, and we report the combined net balances on our consolidated balance sheets. A schedule of the derivative amounts we have offset and the deposit amounts we could offset under a master netting arrangement are provided below as of December 31, 2014 and June 30, 2015 (in thousands):

Description	December 31, 2014				
	Gross Amounts of Recognized Assets	Gross Amounts of Liabilities Offset in the Consolidated Balance Sheet	Net Amounts of Assets Presented in the Consolidated Balance Sheet ⁽¹⁾	Margin Deposit Amounts Not Offset in the Consolidated Balance Sheet	Net Asset Amount ⁽³⁾
Energy commodity derivatives	\$106,764	\$(10,622)	\$96,142	\$(78,279)	\$17,863

Description	June 30, 2015				
	Gross Amounts of Recognized	Gross Amounts of Liabilities	Net Amounts of Assets	Margin Deposit Amounts Not	Net Asset Amount ⁽³⁾

Edgar Filing: MAGELLAN MIDSTREAM PARTNERS LP - Form 10-Q

	Assets	Offset in the Consolidated Balance Sheet	Presented in the Consolidated Balance Sheet ⁽²⁾	Offset in the Consolidated Balance Sheet	
Energy commodity derivatives	\$26,262	\$(12,636) \$13,626	\$5,696	\$19,322

(1) Net amount includes energy commodity derivative contracts classified as current assets, net, of \$87,151, current liabilities of \$5,413 and noncurrent assets of \$14,404.

(2) Net amount includes energy commodity derivative contracts classified as current liabilities, net, of \$2,860 and noncurrent assets of \$16,486.

(3) This represents the maximum amount of loss we would incur if all of our counterparties failed to perform on their derivative contracts.

Derivative Instrument	AOCL on Derivative	from AOCL into Income	Effective Portion	Ineffective Portion
Interest rate contracts	\$(13,529)	Interest expense	\$(588)	\$—

As of June 30, 2015, the net loss estimated to be classified to interest expense over the next twelve months from AOCL is approximately \$1.5 million.

Table of ContentsMAGELLAN MIDSTREAM PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Income Statement

The following table provides a summary of the effect on our consolidated statements of income for the three and six months ended June 30, 2014 and 2015 of derivatives accounted for under ASC 815, Derivatives and Hedging, that were not designated as hedging instruments (in thousands):

Derivative Instrument	Location of Gain (Loss) Recognized on Derivative	Amount of Gain (Loss) Recognized on Derivative			
		Three Months Ended		Six Months Ended	
		June 30,	June 30,	June 30,	June 30,
		2014	2015	2014	2015
NYMEX commodity contracts	Product sales revenue	\$(16,653)	\$(23,350)	\$(13,830)	\$(19,470)
NYMEX commodity contracts	Operating expenses	(4,268)	(8,883)	(3,903)	(7,580)
NYMEX commodity contracts	Cost of product sales	632	(856)	776	(2,080)
	Total	\$(20,289)	\$(33,089)	\$(16,957)	\$(29,130)

The impact of the derivatives in the above table was reflected as cash from operations on our consolidated statements of cash flows.

During 2014 and 2015, we had open NYMEX contracts on 0.7 million barrels of crude oil that were designated as fair value hedges. Because there was no ineffectiveness recognized on these hedges, the cumulative gains at December 31, 2014 and June 30, 2015 of \$13.3 million and \$8.7 million, respectively, from the agreements were offset by a cumulative decrease to tank bottoms and linefill. The differential between the current spot price and forward price is excluded from the assessment of hedge effectiveness for these fair value hedges. For the three and six months ended June 30, 2015, we recognized a gain of \$6.5 million and \$6.3 million, respectively, for the amounts we excluded from the assessment of effectiveness of these fair value hedges, which we reported as other income on our consolidated statements of income.

Balance Sheet

The following tables provide a summary of the fair value of derivatives accounted for under ASC 815, Derivatives and Hedging, which are presented on a net basis in our consolidated balance sheets, that were designated as hedging instruments as of December 31, 2014 and June 30, 2015 (in thousands):

9. Commitments and Contingencies

Environmental Liabilities

Liabilities recognized for estimated environmental costs were \$36.3 million and \$36.5 million at December 31, 2014 and June 30, 2015, respectively. We have classified environmental liabilities as current or noncurrent based on management's estimates regarding the timing of actual payments. Management estimates that expenditures associated with these environmental liabilities will be paid over the next 10 years. Environmental expenditures recognized as a result of changes in our environmental liabilities are generally included in operating expenses on our consolidated statements of income. Environmental expenses for the three and six months ended June 30, 2014 were \$0.1 million and \$0.4 million, respectively. Environmental expenses for the three and six months ended June 30, 2015 were \$2.9 million and \$4.3 million, respectively.

Table of ContentsMAGELLAN MIDSTREAM PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Environmental Receivables

Receivables from insurance carriers and other third parties related to environmental matters at December 31, 2014 were \$5.1 million, of which \$1.3 million and \$3.8 million were recorded to other accounts receivable and long-term receivables, respectively, on our consolidated balance sheet. Receivables from insurance carriers and other third parties related to environmental matters at June 30, 2015 were \$4.9 million, of which \$1.0 million and \$3.9 million were recorded to other accounts receivable and long-term receivables, respectively, on our consolidated balance sheet.

Other

We are a party to various other claims, legal actions and complaints arising in the ordinary course of business, including without limitation those disclosed in Item 1, Legal Proceedings of Part II of this report on Form 10-Q. While the results cannot be predicted with certainty, management believes the ultimate resolution of these claims, legal actions and complaints after consideration of amounts accrued, insurance coverage or other indemnification arrangements will not have a material adverse effect on our results of operations, financial position or cash flows.

10. Long-Term Incentive Plan

We have a long-term incentive plan (“LTIP”) for certain of our employees and for directors of our general partner. The LTIP primarily consists of phantom units and permits the grant of awards covering an aggregate payout of 9.4 million of our limited partner units. The estimated units available under the LTIP at June 30, 2015 total 1.0 million. The compensation committee of our general partner’s board of directors administers our LTIP.

Our equity-based incentive compensation expense was as follows (in thousands):

	Three Months Ended June 30, 2014			Six Months Ended June 30, 2014		
	Equity Method	Liability Method	Total	Equity Method	Liability Method	Total
Performance/market-based awards:						
2012 awards	\$1,022	\$1,617	\$2,639	\$2,044	\$2,541	\$4,585
2013 awards	2,195	1,305	3,500	3,376	1,853	5,229
2014 awards	1,228	—	1,228	2,132	—	2,132
Retention awards	298	—	298	807	—	807
Total	\$4,743	\$2,922	\$7,665	\$8,359	\$4,394	\$12,753

Allocation of LTIP expense on our consolidated statements of income:

G&A expense	\$7,486	\$12,460
Operating expense	179	293
Total	\$7,665	\$12,753

Table of ContentsMAGELLAN MIDSTREAM PARTNERS, L.P.

Performance/market-based awards:						
2013 awards	\$3,054	\$876	\$3,930	\$4,573	\$1,091	\$5,664
2014 awards	860	—	860	2,483	—	2,483
2015 awards	941	—	941	1,960	—	1,960
Retention awards	57	—	57	432	—	432
Total	\$4,912	\$876	\$5,788	\$9,448	\$1,091	\$10,539

Allocation of LTIP expense on our consolidated statements of income:

G&A expense		\$5,684	\$10,373
Operating expense		104	166
Total		\$5,788	\$10,539

In February 2015, 166,189 phantom unit awards were issued pursuant to our LTIP. These grants included both performance-based and retention awards and have a three-year vesting period.

In January 2015, we issued 354,529 limited partner units to settle unit award grants to certain employees that vested on December 31, 2014. Further, 4,461 limited partner units were issued during 2015 to settle the equity-based retainer paid to certain members of our general partner's board of directors.

11. Distributions

Distributions we paid during 2014 and 2015 were as follows (in thousands, except per unit amounts):

Payment Date	Per Unit Cash Distribution Amount	Total Cash Distribution to Limited Partners
02/14/2014	\$0.5850	\$132,835
05/15/2014	0.6125	139,079
Through 06/30/2014	1.1975	271,914
08/14/2014	0.6400	145,324
11/14/2014	0.6675	151,568
Total	\$2.5050	\$568,806
2/13/2015	\$0.6950	\$158,061
5/15/2015	0.7175	163,178
Through 06/30/2015	1.4125	321,239

Edgar Filing: MAGELLAN MIDSTREAM PARTNERS LP - Form 10-Q

08/14/2015 ⁽¹⁾	0.7400	168,296
Total	\$2.1525	\$489,535

(1) Our general partner's board of directors declared this cash distribution on July 23, 2015 to be paid on August 14, 2015 to unitholders of record at the close of business on August 7, 2015.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

12. Fair Value

Recurring

Fair Value Methods and Assumptions - Financial Assets and Liabilities.

We used the following methods and assumptions in estimating fair value for our financial assets and liabilities:

Energy commodity derivatives contracts. These include NYMEX futures agreements related to petroleum products. These contracts are carried at fair value on our consolidated balance sheets and are valued based on quoted prices in active markets. See Note 8 – Derivative Financial Instruments for further disclosures regarding these contracts.

Interest rate contracts. These include forward-starting interest rate swap agreements to hedge against the risk of variability of interest payments on future debt. These contracts are carried at fair value on our consolidated balance sheets and are valued based on an assumed exchange, at the end of each period, in an orderly transaction with a market participant in the market in which the financial instrument is traded. The exchange value was calculated using present value techniques on estimated future cash flows based on forward interest rate curves. See Note 8 – Derivative Financial Instruments for further disclosures regarding these contracts.

Long-term receivables. These include lease payments receivable under a direct-financing leasing arrangement and insurance receivables. Fair value was determined by estimating the present value of future cash flows using current market rates.

Debt. The fair value of our publicly traded notes was based on the prices of those notes at December 31, 2014 and June 30, 2015; however, where recent observable market trades were not available, prices were determined using adjustments to the last traded value for that debt issuance or by adjustments to the prices of similar debt instruments of peer entities that are actively traded. The carrying amount of borrowings, if any, under our revolving credit facility and our commercial paper program approximates fair value due to the frequent repricing of these obligations.

Fair Value Measurements - Financial Assets and Liabilities

The following tables summarize the carrying amounts, fair values and recurring fair value measurements recorded or disclosed as of December 31, 2014 and June 30, 2015, based on the three levels established by ASC 820, Fair Value Measurements and Disclosures (in thousands):

13. Related Party Transactions

Barry R. Pearl is an independent member of our general partner's board of directors and is also a director of the general partner of Targa Resources Partners, L.P. ("Targa"). In the normal course of business, we purchase butane from subsidiaries of Targa. For the three months ended June 30, 2014 and 2015, we made purchases of butane from subsidiaries of Targa of \$1.6 million and \$4.0 million, respectively. For the six months ended June 30, 2014 and 2015, we made purchases of butane from subsidiaries of Targa of \$13.8 million and \$12.8 million, respectively. These purchases were based on the then-current index prices. We had recognized payables to Targa of \$0.9 million and \$0.2 million at December 31, 2014 and June 30, 2015, respectively.

Stacy P. Methvin was elected as an independent member of our general partner's board of directors on April 23, 2015 and is also a director of one of our customers. We received tariff revenue of \$2.6 million from April 23, 2015 through

June 30, 2015, and have recorded a \$1.3 million receivable from this customer at June 30, 2015. The tariff revenue we recognized from this customer was in the normal course of business, with rates determined in accordance with published tariffs.

See Note 4 – Investments in Non-Controlled Entities for a discussion of affiliate joint venture transactions we account for under the equity method.

14. Subsequent Events

Recognizable events

No recognizable events occurred subsequent to June 30, 2015.

Non-recognizable events

In July 2015, our general partner's board of directors declared a quarterly distribution of \$0.74 per unit to be paid on August 14, 2015 to unitholders of record at the close of business on August 7, 2015. The total cash distributions expected to be paid under this declaration are approximately \$168.3 million.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Introduction

We are a publicly traded limited partnership principally engaged in the transportation, storage and distribution of refined petroleum products and crude oil. As of June 30, 2015, our asset portfolio, including the assets of our joint ventures, consisted of:

- our refined products segment, comprised of our 9,500-mile refined products pipeline system with 52 terminals as well as 28 independent terminals not connected to our pipeline system and our 1,100-mile ammonia pipeline system;

- our crude oil segment, comprised of approximately 1,600 miles of crude oil pipelines and storage facilities with an aggregate storage capacity of approximately 21 million barrels, of which 13 million barrels are used for leased storage; and

- our marine storage segment, consisting of five marine terminals located along coastal waterways with an aggregate storage capacity of approximately 26 million barrels.

The following discussion provides an analysis of the results for each of our operating segments, an overview of our liquidity and capital resources and other items related to our partnership. The following discussion and analysis should be read in conjunction with (i) our accompanying interim consolidated financial statements and related notes and (ii) our consolidated financial statements, related notes and management's discussion and analysis of financial condition and results of operations included in our Annual Report on Form 10-K for the year ended December 31, 2014.

Recent Developments

Seabrook Logistics, LLC ("Seabrook"). Seabrook was formed in second quarter 2015 to construct, own and operate crude oil storage and pipeline infrastructure in the Houston Gulf Coast area. We hold a 50% equity ownership interest in Seabrook, with LBC Tank Terminals, LLC holding the other 50% equity ownership interest. The assets to be constructed and owned by Seabrook include over 700,000 barrels of crude oil storage located adjacent to LBC's existing terminal in Seabrook, Texas. In addition, Seabrook will construct and own an 18-inch pipeline, which will connect Seabrook's storage facilities to an existing third-party pipeline that will transport crude oil to a Houston-area refinery. The project is currently estimated to cost approximately \$95 million, of which our 50% share will be \$47.5 million, and is supported by a long-term storage and transportation commitment with a major refiner. Subject to the receipt of permits and regulatory approvals, the new storage facility and pipeline infrastructure are expected to be operational in the first quarter of 2017.

Executive Officer Changes. Aaron L. Milford, who previously served as our vice president of crude oil business development, was promoted to Senior Vice President and Chief Financial Officer on May 18, 2015, following the resignation of Michael P. Osborne from these positions.

Cash Distribution. In July 2015, the board of directors of our general partner declared a quarterly cash distribution of \$0.74 per unit for the period of April 1, 2015 through June 30, 2015. This quarterly cash distribution will be paid on August 14, 2015 to unitholders of record on August 7, 2015. Total distributions expected to be paid under this declaration are approximately \$168.3 million.

Table of Contents

Results of Operations

We believe that investors benefit from having access to the same financial measures utilized by management. Operating margin, which is presented in the following tables, is an important measure used by management to evaluate the economic performance of our core operations. Operating margin is not a generally accepted accounting principles (“GAAP”) measure, but the components of operating margin are computed using amounts that are determined in accordance with GAAP. A reconciliation of operating margin to operating profit, which is its nearest comparable GAAP financial measure, is included in the following tables. Operating profit includes expense items, such as depreciation and amortization expense and general and administrative (“G&A”) expenses, which management does not focus on when evaluating the core profitability of our separate operating segments. Additionally, product margin, which management primarily uses to evaluate the profitability of our commodity-related activities, is provided in these tables. Product margin is a non-GAAP measure; however, its components of product sales revenue and cost of product sales are determined in accordance with GAAP. Our butane blending, fractionation and other commodity-related activities generate significant product revenue. We believe the product margin from these activities, which takes into account the related cost of product sales, better represents its importance to our results of operations.

(2) These volumes reflect the total shipments for the BridgeTex pipeline, which is owned 50% by us.

Table of Contents

Transportation and terminals revenue increased \$20.4 million resulting from:

an increase in refined products revenue of \$1.2 million primarily attributable to higher revenue from our independent terminals and higher leased storage revenue, partially offset by lower transportation revenues. Our independent terminal revenue increased because of a recently acquired terminal as well as increased demand at our other locations and our lease storage revenues increased because of new lease contracts, including leases on recently-constructed tanks. Transportation revenue was slightly lower primarily due to more shorter-haul shipments (which have a lower rate). Overall volumes were relatively flat as higher gasoline demand across our system was more than offset by lower shipments of distillates due to reduced demand from drilling activities and wet agricultural conditions in areas served by our assets in the current period;

an increase in crude oil revenue of \$16.2 million primarily due to revenue received in second quarter 2015 from BridgeTex Pipeline Company, LLC ("BridgeTex") for capacity on our Houston area crude oil distribution system, higher terminalling revenue resulting from the one-time benefit from a customer buying out of its remaining storage agreement in 2015 and new leased storage contracts. Transportation revenue was slightly lower in the current period due to reduced average tariffs resulting from a lower volume of spot shipments on the Longhorn pipeline system, which ship at a higher rate, and more short-haul movements on our Houston-area crude oil distribution system in 2015; and

an increase in marine storage revenue of \$3.0 million primarily due to improved storage utilization and higher rates at our marine facilities.

Affiliate management fee revenue decreased \$1.7 million due to lower construction management fees related to BridgeTex now that the pipeline is operational.

Operating expenses increased by \$6.6 million primarily resulting from:

an increase in refined products expenses of \$3.2 million primarily due to higher asset integrity spending, additional environmental accruals due to a product release in the current period and additional property taxes, partially offset by more favorable product overages (which reduce operating expense);

an increase in crude oil expenses of \$4.2 million primarily due to less favorable product overages (which reduce operating expense) and higher pipeline capacity rental fees and power costs associated with moving additional volume in the current period; and

a decrease in marine storage expenses of \$0.6 million primarily due to lower asset integrity spending.

Product sales revenue primarily resulted from our butane blending activities, transmix fractionation and product gains from our independent terminals. We utilize New York Mercantile Exchange ("NYMEX") contracts to hedge against changes in the price of petroleum products we expect to sell in the future, and we use butane futures agreements to hedge against changes in the price of butane we expect to purchase in future periods. See Note 8 –Derivative Financial Instruments in Item 1 – Consolidated Financial Statements for a discussion of our hedging strategies and how our use of NYMEX contracts and butane futures agreements impacts our product margin. Product margin decreased \$13.0 million primarily due to higher unrealized losses on our NYMEX contracts, which were partially offset by higher realized margins from our butane blending and fractionation activities. See Other Items—Commodity Derivative Agreements—Impact of Commodity Derivatives on Results of Operations below for more information about our NYMEX contracts.

Earnings of non-controlled entities increased \$22.6 million primarily due to our share of earnings from BridgeTex, which began operations in late 2014.

Depreciation and amortization decreased \$6.5 million primarily due to the \$9.4 million acceleration of depreciation for pipeline, terminal and related assets during second quarter 2014 that we later sold, partially offset by increased depreciation expense in the current year for expansion capital projects.

Table of Contents

G&A expense decreased \$1.4 million primarily due to lower costs associated with deferred board of director fees resulting from a decrease in the price of our limited partner units in the second quarter of 2015 partially offset by higher personnel costs from an increase in employee headcount. A separation fee paid to a former executive in the current quarter was largely offset by the forfeiture of his unvested equity-based awards.

Interest expense, net of interest income and interest capitalized, increased \$6.6 million in second quarter 2015, primarily because our debt balance was higher in the current period compared to the same period in 2014 and lower capitalized interest since we are no longer capitalizing interest expense for the BridgeTex pipeline construction project that is now operational. Our average outstanding debt increased from \$2.9 billion in second quarter 2014 to \$3.3 billion in second quarter 2015 primarily due to borrowings for expansion capital expenditures, including \$250.0 million of 3.2% senior notes and \$250.0 million of 4.2% senior notes issued in March 2015. Our weighted-average interest rate decreased from 5.0% in second quarter 2014 to 4.8% in second quarter 2015 due to the impact of our commercial paper borrowings and March 2015 debt issuances, which are both at lower rates than the debt we retired in mid-2014.

Other income included a \$6.6 million favorable non-cash adjustment for the change in the differential between the current spot price and forward price on fair value hedges associated with our crude oil tank bottoms and linefill assets. Provision for income taxes was \$1.6 million favorable due to a reduction in the franchise tax rate for the state of Texas.

Volume shipped (million barrels):				
Gasoline	123.5	129.4		
Distillates	78.0	73.2		
Aviation fuel	11.1	10.5		
Liquefied petroleum gases	5.2	5.8		
Total volume shipped	217.8	218.9		
Crude oil:				
Magellan 100%-owned assets:				
Transportation revenue per barrel shipped	\$1.182	\$1.081		
Volume shipped (million barrels)	88.7	103.8		
Crude oil terminal average utilization (million barrels per month)	12.2	12.7		

Select joint venture pipelines:

BridgeTex - volume shipped (million barrels) ⁽²⁾	—	38.7
---	---	------

Marine storage:

Marine terminal average utilization (million barrels per month)	22.7	23.9
---	------	------

(1) Product margin does not include depreciation or amortization expense.

(2) These volumes reflect the total shipments for the BridgeTex pipeline, which is owned 50% by us.

Table of Contents

Transportation and terminals revenue increased \$48.4 million resulting from:

an increase in refined products revenue of \$7.8 million primarily attributable to higher revenue from our independent terminals, higher leased storage revenue and higher transportation revenue. Our independent terminal revenue increased because of a recently acquired terminal as well as increased demand at our other locations, and our leased storage revenue increased because of new lease storage contracts, including leases on recently constructed tanks.

Transportation revenue was favorable due to slightly higher volumes as increased demand for gasoline in the markets we serve was partially offset by lower shipments of distillates due to reduced demand from drilling activities and wet agricultural conditions in the areas served by our assets in the current period;

an increase in crude oil revenue of \$34.8 million primarily due to revenue received in 2015 from BridgeTex for capacity on our Houston area crude oil distribution system and higher crude oil deliveries on our Longhorn pipeline.

Shipments on our Longhorn pipeline averaged approximately 250,000 barrels per day in 2015, an increase of approximately 25,000 barrels per day over the same period in 2014. Additionally, terminalling revenue was higher resulting from new leased storage contracts and the one-time benefit from a customer buying out of its remaining storage agreement in 2015; and

an increase in marine storage revenue of \$5.8 million primarily due to improved storage utilization and higher storage rates at our marine facilities.

Affiliate management fee revenue decreased \$3.2 million due to lower construction management fees related to BridgeTex now that the pipeline is operational.

Operating expenses increased by \$31.5 million primarily resulting from:

an increase in refined products expenses of \$22.3 million primarily due to higher asset integrity spending, additional environmental accruals due to product releases in the current period, additional property taxes and less favorable product overages (which reduce operating expense) as a result of the lower commodity prices in 2015; and

an increase in crude oil expenses of \$9.0 million primarily due to less favorable product overages (which reduce operating expense) and higher pipeline capacity rental fees and power costs associated with moving additional volume in 2015; and

a slight increase in marine storage expenses of \$0.6 million.

Product margin decreased \$74.2 million primarily due to higher unrealized losses on our NYMEX contracts, which were partially offset by higher realized margins from our butane blending and fractionation activities.

Earnings of non-controlled entities increased \$31.7 million primarily due to our share of earnings from BridgeTex, which began operations in late 2014.

Depreciation and amortization decreased \$2.3 million primarily due to the \$9.4 million acceleration of depreciation for pipeline, terminal and related assets during 2014 that we later sold, largely offset by increased depreciation expense in the current year for expansion capital projects and a \$1.8 million charge recognized in 2015 to impair an office/warehouse building.

G&A expense decreased \$0.8 million primarily due to lower costs associated with deferred board of director fees resulting from a decrease in the price of our limited partner units in 2015 partially offset by higher personnel costs from an increase in employee headcount. A separation fee paid to a former executive in the current quarter was largely offset by the forfeiture of his unvested equity-based awards.

Interest expense, net of interest income and interest capitalized, increased \$10.0 million in 2015 primarily due to lower capitalized interest since we are no longer capitalizing interest expense for the BridgeTex pipeline construction project that is now operational. Our average outstanding debt increased from \$2.9 billion in 2014 to \$3.2 billion in 2015 primarily due to borrowings for expansion capital expenditures, including \$250.0 million of 3.20% senior notes and \$250.0 million of 4.20% senior notes issued in March 2015. Our weighted-average interest

Table of Contents

rate decreased from 5.1% in 2014 to 4.8% in 2015 due to the impact of our commercial paper borrowings and March 2015 debt issuances, which are both at lower rates than the debt we retired in mid-2014.

Other income included \$6.3 million of favorable non-cash adjustments for the change in the differential between the current spot price and forward price on fair value hedges associated with our crude oil tank bottoms and linefill assets. Provision for income taxes was \$1.6 million favorable due to a reduction in the franchise tax rate for the state of Texas.

Distributable Cash Flow

We calculate the non-GAAP measures of distributable cash flow ("DCF") and adjusted EBITDA in the table below. Management uses DCF as a basis for recommending to our general partner's board of directors the amount of cash distributions to be paid to our limited partners each period. Management also uses DCF as a basis for determining the payouts for the performance-based awards issued under our equity-based compensation plan. Adjusted EBITDA is an important measure that we and the investment community use to assess the financial results of an entity. We believe that investors benefit from having access to the same financial measures utilized by management for these evaluations. A reconciliation of DCF and adjusted EBITDA for the six months ended June 30, 2014 and 2015 to net income, which is its nearest comparable GAAP financial measure, follows (in millions):

	Six Months Ended June 30,		Increase
	2014	2015	(Decrease)
Net income	\$388.8	\$361.0	\$(27.8)
Interest expense, net, and provision for income taxes	63.3	71.6	8.3
Depreciation and amortization expense ⁽¹⁾	85.6	83.4	(2.2)
Equity-based incentive compensation expense ⁽²⁾	(2.1)	(7.2)	(5.1)
Asset retirements	3.3	2.1	(1.2)
Commodity-related adjustments:			
Derivative losses recognized in the period associated with future product transactions ⁽³⁾	14.4	5.6	(8.8)
Derivative gains (losses) recognized in previous periods associated with product sales completed in the period ⁽⁴⁾	(8.1)	91.6	99.7
Lower-of-cost-or-market adjustments ⁽⁵⁾	—	(39.2)	(39.2)
Total commodity-related adjustments	6.3	58.0	51.7
Cash distributions of non-controlled entities in excess of /(less than) earnings	1.9	(2.3)	(4.2)
Adjusted EBITDA	547.1	566.6	19.5
Interest expense, net, and provision for income taxes	(63.3)	(71.6)	(8.3)
Maintenance capital ⁽⁶⁾	(34.8)	(39.0)	(4.2)
DCF	\$449.0	\$456.0	\$7.0

(1) Depreciation and amortization expense includes debt placement fee amortization.

Because we intend to satisfy vesting of units under our equity-based incentive compensation program with the issuance of limited partner units, expenses related to this program generally are deemed non-cash and added back for DCF purposes. Total equity-based incentive compensation expense for the six months ended June 30, 2014 and 2015 was \$12.7 million and \$10.6 million, respectively. However, the figures above include an adjustment for minimum statutory tax withholdings we paid in 2014 and 2015 of \$14.8 million and \$17.8 million, respectively, for equity-based incentive compensation units that vested on the previous year end, which reduce DCF.

Table of Contents

Certain derivatives we use as economic hedges have not been designated as hedges for accounting purposes and the mark-to-market changes of these derivatives are recognized currently in earnings. In addition, we have designated certain derivatives we use to hedge our crude oil tank bottoms and linefill assets as fair value hedges (3) and the change in the differential between the current spot price and forward price on these hedges is recognized currently in earnings. We exclude the net impact of both of these adjustments from our determination of DCF until the hedged products are physically sold. In the period in which these hedged products are physically sold, the net impact of the associated hedges is included in our determination of DCF.

When we physically sell products that we have economically hedged (but were not designated as hedges for (4) accounting purposes), we include in our DCF calculations the full amount of the gain or loss realized on the economic hedges in the period that the underlying product sales occur.

We add the amount of lower-of-cost-or-market ("LCM") adjustments on inventory and firm purchase commitments (5) we recognize in each applicable period to determine DCF as these are non-cash charges against income. In subsequent periods when we physically sell or purchase the related products, we deduct the LCM adjustments previously recognized to determine DCF.

Maintenance capital expenditure projects maintain our existing assets and do not generate incremental DCF (i.e. (6) incremental returns to our unitholders). For this reason, we deduct maintenance capital expenditures to determine DCF.

Liquidity and Capital Resources

Cash Flows and Capital Expenditures

Operating Activities. Operating cash flows consist of net income adjusted for certain non-cash items and changes in certain assets and liabilities.

Net cash provided by operating activities was \$477.4 million and \$414.8 million for the six months ended June 30, 2014 and 2015, respectively. The \$62.6 million decrease from 2014 to 2015 was due to lower net income related to activities previously described and changes in our working capital and adjustments to non-cash items. Changes in our working capital were primarily due to timing of payments from our customers.

Investing Activities. Investing cash flows consist primarily of capital expenditures, investments in non-controlled entities and acquisitions.

Net cash used by investing activities for the six months ended June 30, 2014 and 2015 was \$437.3 million and \$363.8 million, respectively. During 2015, we spent \$268.8 million for capital expenditures, which included \$39.0 million for maintenance capital and \$229.8 million for expansion capital. Also during the 2015 period, we acquired a refined products terminal in the Atlanta, Georgia market for \$54.7 million and contributed capital of \$36.4 million in conjunction with our joint venture capital projects which we account for as investments in non-controlled entities. During 2014, we spent \$149.1 million for capital expenditures, which included \$34.8 million for maintenance capital and \$114.3 million for expansion capital. Also during the 2014 period, we contributed capital of \$285.9 million in conjunction with our joint venture capital projects (primarily BridgeTex) which we account for as investments in non-controlled entities.

Financing Activities. Financing cash flows consist primarily of distributions to our unitholders and borrowings and repayments under long-term notes and our commercial paper program.

Net cash used by financing activities for the six months ended June 30, 2014 and 2015 was \$64.5 million and \$39.0 million, respectively. During 2015, we paid cash distributions of \$321.2 million to our unitholders. Additionally, we received net proceeds of \$499.6 million from borrowings under long-term notes, which were used in part to repay borrowings outstanding under our commercial paper program and for general partnership purposes, including expansion capital. In connection with the borrowings under long-term notes, we paid \$42.9 million in settlement of associated interest rate swap agreements. Also, in January 2015, the cumulative amounts of the January 2012

equity-based incentive compensation award grants were settled by issuing 354,529 limited partner units and distributing those units to the long-term incentive plan ("LTIP") participants, resulting in payments of associated tax withholdings of \$17.8 million. During 2014, we paid cash distributions of \$271.9 million to our unitholders. Additionally, we received net proceeds of \$257.7 million from borrowings under notes, which were used to repay borrowings outstanding under our revolving credit facility and for general partnership purposes, including expansion capital. Also, in January 2014, the cumulative amounts of the January 2011 equity-based incentive compensation

Table of Contents

award grants were settled by issuing 387,216 limited partner units and distributing those units to the LTIP participants, resulting in payments of associated tax withholdings of \$14.8 million.

The quarterly distribution amount related to our second-quarter 2015 financial results (to be paid in third quarter 2015) is \$0.74 per unit. If we meet management's targeted distribution growth of 15% for 2015 and the number of outstanding limited partner units remains unchanged at 227.4 million, total cash distributions of approximately \$683.4 million will be paid to our unitholders related to 2015 financial results. Management believes we will have sufficient distributable cash flow to fund these distributions.

Capital Requirements

Our businesses require continual investments to maintain, upgrade or enhance existing operations and to ensure compliance with safety and environmental regulations. Capital spending consists primarily of:

Maintenance capital expenditures. These expenditures include costs required to maintain equipment reliability and safety and to address environmental or other regulatory requirements rather than to generate incremental distributable cash flow; and

Expansion capital expenditures. These expenditures are undertaken primarily to generate incremental distributable cash flow and include costs to acquire additional assets to grow our business and to expand or upgrade our existing facilities, which we refer to as organic growth projects. Organic growth projects include capital expenditures that increase storage or throughput volumes or develop pipeline connections to new supply sources.

For the six months ended June 30, 2015, our maintenance capital spending was \$39.0 million. For 2015, we expect to spend approximately \$85.0 million on maintenance capital.

During the first six months of 2015, we spent \$229.8 million for organic growth capital and \$36.4 million for capital projects in conjunction with our joint ventures. Additionally, we spent \$54.7 million on a refined products terminal acquired in the Atlanta, Georgia market. Based on the progress of expansion projects already underway, we expect to spend approximately \$850 million for expansion capital and joint venture capital contributions during 2015, with an additional \$550 million in 2016 to complete our current projects. These spending estimates include our contributions for our 40% interest in Saddlehorn Pipeline Company, LLC ("Saddlehorn").

Table of Contents

Liquidity

Consolidated debt at December 31, 2014 and June 30, 2015 was as follows (in thousands, except as otherwise noted):

	December 31, 2014	June 30, 2015	Weighted-Average Interest Rate for the Six Months Ended June 30, 2015 ⁽¹⁾
Commercial paper ⁽²⁾	\$296,942	\$144,982	0.5%
\$250.0 million of 5.65% Notes due 2016	250,758	250,546	5.7%
\$250.0 million of 6.40% Notes due 2018	257,280	256,248	5.4%
\$550.0 million of 6.55% Notes due 2019	567,868	566,006	5.7%
\$550.0 million of 4.25% Notes due 2021	556,304	555,837	4.0%
\$250.0 million of 3.20% Notes due 2025 ⁽²⁾	—	249,687	3.2%
\$250.0 million of 6.40% Notes due 2037	249,017	249,026	6.4%
\$250.0 million of 4.20% Notes due 2042	248,406	248,421	4.2%
\$550.0 million of 5.15% Notes due 2043	556,320	556,270	5.1%
\$250.0 million of 4.20% Notes due 2045 ⁽²⁾	—	249,913	4.6%
Total debt	\$2,982,895	\$3,326,936	4.8%

(1) Weighted-average interest rate includes the amortization/accretion of discounts, premiums and gains/losses realized on historical cash flow and fair value hedges recognized as interest expense.

These borrowings were outstanding for only a portion of the six month period ending June 30, 2015. The (2) weighted-average interest rate for these borrowings was calculated based on the number of days the borrowings were outstanding during the noted period.

All of the instruments detailed in the table above are senior indebtedness.

The face value of our debt at December 31, 2014 and June 30, 2015 was \$2.9 billion and \$3.3 billion, respectively. The difference between the face value and carrying value of our debt outstanding is the unamortized portion of terminated fair value hedges and the unamortized discounts and premiums on debt issuances. Realized gains and losses on fair value hedges and note discounts and premiums are being amortized or accreted to the applicable notes over the respective lives of those notes.

2015 Debt Offerings

In March 2015, we issued \$250.0 million of our 3.20% notes due 2025 in an underwritten public offering. The notes were issued at 99.871% of par. Net proceeds from this offering were \$247.6 million, after underwriting discounts and offering expenses of \$2.1 million.

Also in March 2015, we issued \$250.0 million of our 4.20% notes due 2045 in an underwritten public offering. The notes were issued at 99.965% of par. Net proceeds from this offering were \$247.3 million, after underwriting discounts and offering expenses of \$2.6 million.

The net proceeds from these offerings were used to repay borrowings outstanding under our commercial paper program and for general partnership purposes, including expansion capital.

Other Debt

Revolving Credit Facility. The total borrowing capacity under our revolving credit facility, which matures in November 2018, is \$1.0 billion. Borrowings outstanding under the facility are classified as long-term debt on our consolidated balance sheets. Borrowings under the facility are unsecured and bear interest at LIBOR plus a spread ranging from 1.0% to 1.75% based on our credit ratings. Additionally, an unused commitment fee is assessed at a

37

Table of Contents

rate from 0.10% to 0.28%, depending on our credit ratings. The unused commitment fee was 0.125% at June 30, 2015. Borrowings under this facility may be used for general partnership purposes, including capital expenditures. As of June 30, 2015, there were no borrowings outstanding under this facility; however, \$5.6 million was obligated for letters of credit. Amounts obligated for letters of credit are not reflected as debt on our consolidated balance sheets but decrease our borrowing capacity under the facility.

Commercial Paper Program. The maturities of our commercial paper notes vary, but may not exceed 397 days from the date of issuance. The commercial paper notes are sold under customary terms in the commercial paper market and are issued at a discount from par, or alternatively, are sold at par and bear varying interest rates on a fixed or floating basis. The commercial paper we can issue is limited by the amounts available under our revolving credit facility up to an aggregate principal amount of \$1.0 billion and, therefore, is classified as long-term debt.

Off-Balance Sheet Arrangements

None.

Environmental

Our operations are subject to federal, state and local environmental laws and regulations. We have accrued liabilities for estimated costs at our facilities and properties. We record liabilities when environmental costs are probable and can be reasonably estimated. The determination of amounts recorded for environmental liabilities involves significant judgments and assumptions by management. Due to the inherent uncertainties involved in determining environmental liabilities, it is reasonably possible that the actual amounts required to extinguish these liabilities could be materially different from those we have recognized.

Other Items

Pipeline Tariff Increase. The Federal Energy Regulatory Commission ("FERC") regulates the rates charged on interstate common carrier pipeline operations primarily through an indexing methodology, which establishes the maximum amount by which tariffs can be adjusted each year. Approximately 40% of our refined products tariffs are subject to this indexing methodology while the remaining 60% of our refined products tariffs can be adjusted at our discretion based on competitive factors. The current FERC-approved indexing method is the annual change in the producer price index for finished goods ("PPI-FG") plus 2.65%. Based on this indexing methodology, we increased virtually all of our tariffs by 4.6% on July 1, 2015. In 2016, a new index will be established by the FERC. Any change in the current indexing methodology will impact our rates in the future.

Collective Bargaining Agreement with the United Steel Workers ("USW"). During second quarter 2015, we reached agreement with the USW, which represents approximately 230 employees assigned to our refined products segment. The current collective bargaining agreement with the USW will be effective through January 31, 2019.

Commodity Derivative Agreements. Certain of the business activities in which we engage result in our owning various commodities, which exposes us to commodity price risk. We use forward physical commodity contracts and NYMEX contracts to help manage this commodity price risk. We use forward physical contracts to purchase butane and sell refined products. We account for these forward physical contracts as normal purchase and sale contracts, using traditional accrual accounting. We use NYMEX contracts to hedge against changes in the price of refined

products and crude oil that we expect to sell in future periods. We use and account for those NYMEX contracts that qualify for hedge accounting treatment as either cash flow or fair value hedges, and we use and account for those NYMEX contracts that do not qualify for hedge accounting treatment as economic hedges. We use NYMEX contracts to economically hedge against changes in the price of butane we expect to purchase in the future as part of our butane blending activities. As of and for the six months ended June 30, 2015, our open derivative contracts and the impact of the derivatives we settled during the period were as follows:

38

Table of Contents

Open Derivative Contracts Designated as Hedges

NYMEX contracts covering 0.7 million barrels of crude oil to hedge against future price changes of crude oil tank bottoms and linefill. These contracts, which we are accounting for as fair value hedges, mature between December 2015 and November 2016. Through June 30, 2015, the cumulative amount of gains from these agreements was \$8.7 million. The cumulative gains from these fair value hedges were recorded as adjustments to the asset being hedged, and there has been no ineffectiveness recognized for these hedges. We exclude the differential between the current spot price and forward price from our assessment of hedge effectiveness for these fair value hedges. The net change in the amounts excluded from our assessment of hedge effectiveness during the six months ended June 30, 2015 was a gain of \$6.3 million, which we recognized as other income on our consolidated statement of income.

Open Derivative Contracts Not Designated as Hedges

NYMEX contracts covering 4.7 million barrels of refined products related to our butane blending and fractionation activities. These contracts mature between July 2015 and December 2016 and are being accounted for as economic hedges. Through June 30, 2015, the cumulative amount of net unrealized losses associated with these agreements was \$5.8 million. We recorded these losses as an adjustment to product sales revenue, of which \$4.5 million of net gains was recognized in 2014 and \$10.3 million of net losses was recognized in 2015.

NYMEX contracts covering 0.9 million barrels of refined products and crude oil related to inventory we carry that resulted from pipeline product overages. These contracts, which mature between July and December 2015, are being accounted for as economic hedges. Through June 30, 2015, the cumulative amount of net unrealized gains associated with these agreements was \$4.9 million. We recorded these gains as an adjustment to operating expense, of which \$5.3 million of net gains was recognized in 2014 and \$0.4 million of net losses was recognized in 2015.

NYMEX contracts covering 1.3 million barrels of butane purchases that mature between September 2015 and December 2016, which are being accounted for as economic hedges. Through June 30, 2015, the cumulative amount of net unrealized losses associated with these agreements was \$1.8 million. We recorded these losses as an adjustment to cost of product sales, all of which was recognized in 2015.

Settled Derivative Contracts

We settled NYMEX contracts covering 5.7 million barrels of refined products related to economic hedges of products from our butane blending and fractionation activities that we sold during 2015. We recognized a loss of \$9.2 million in 2015 related to these contracts, which we recorded as an adjustment to product sales revenue.

We settled NYMEX contracts covering 3.0 million barrels of refined products and crude oil related to economic hedges of product inventories from product overages on our pipeline system that we sold during 2015. We recognized a loss of \$7.2 million in 2015 on the settlement of these contracts, which we recorded as an adjustment to operating expense.

We settled NYMEX contracts covering 0.5 million barrels related to economic hedges of butane purchases we made during 2015 associated with our butane blending activities. We recognized a loss of \$0.2 million in 2015 on the settlement of these contracts, which we recorded as an adjustment to cost of product sales.

Table of Contents

Impact of Commodity Derivatives on Results of Operations

The following tables provide a summary of the positive and (negative) impacts of the mark-to-market gains and losses associated with NYMEX contracts on our results of operations for the respective periods presented (in millions):

	Six Months Ended June 30, 2014					
	Product Sales Revenue	Cost of Product Sales	Operating Expense	Other Expense	Net Impact on Net Income	
NYMEX gains (losses) recognized during the period that were associated with economic hedges of physical product sales or purchases during the period	\$ (1.6) \$ 0.2	\$ (4.3) \$ —	\$ (5.7)
NYMEX gains (losses) recorded during the period that were associated with products that will be or were sold or purchased in future periods	(12.2) 0.6	0.4	—	(11.2)
Net impact of NYMEX contracts	\$ (13.8) \$ 0.8	\$ (3.9) \$ —	\$ (16.9)
	Six Months Ended June 30, 2015					
	Product Sales Revenue	Cost of Product Sales	Operating Expense	Other Income	Net Impact on Net Income	
NYMEX losses recognized during the period that were associated with economic hedges of physical product sales or purchases during the period	\$ (9.2) \$ (0.2) \$ (7.2) \$ —	\$ (16.6)
NYMEX gains (losses) recorded during the period that were associated with products that will be sold or purchased in future periods	(10.3) (1.8) (0.4) 6.3	(6.2)
Net impact of NYMEX contracts	\$ (19.5) \$ (2.0) \$ (7.6) \$ 6.3	\$ (22.8)

Related Party Transactions. Barry R. Pearl is an independent member of our general partner's board of directors and is also a director of the general partner of Targa Resources Partners, L.P. ("Targa"). In the normal course of business, we purchase butane from subsidiaries of Targa. For the three months ended June 30, 2014 and 2015, we made purchases of butane from subsidiaries of Targa of \$1.6 million and \$4.0 million, respectively. For the six months ended June 30, 2014 and 2015, we made purchases of butane from subsidiaries of Targa of \$13.8 million and \$12.8 million, respectively. These purchases were based on the then-current index prices. We had recognized payables to Targa of \$0.9 million and \$0.2 million at December 31, 2014 and June 30, 2015, respectively.

Stacy P. Methvin was elected as an independent member of our general partner's board of directors on April 23, 2015 and is also a director of one of our customers. We received tariff revenue of \$2.6 million from this customer from April 23, 2015 through June 30, 2015, and have recorded a \$1.3 million receivable from this customer at June 30, 2015. We receive tariff revenue from this customer in the normal course of business, with rates determined in accordance with published tariffs.

The management fees we have recognized or will recognize from BridgeTex, Osage Pipe Line Company LLC ("Osage"), Powder Springs Logistics, LLC ("Powder Springs"), Saddlehorn and Texas Frontera, LLC ("Texas Frontera") are reported as affiliate management fee revenue on our consolidated statements of income.

At December 31, 2014 and June 30, 2015, we recognized liabilities of \$2.2 million and \$1.1 million, respectively, to BridgeTex primarily for pre-paid construction management fees. For the three and six months ended

Table of Contents

June 30, 2015, we recognized pipeline capacity lease revenue from BridgeTex of \$8.5 million and \$16.9 million, respectively, which we included in transportation and terminals revenue on our consolidated statements of income. We recognized a \$2.6 million receivable from BridgeTex at December 31, 2014 (no receivable was recognized at June 30, 2015).

We recognized throughput revenue from Double Eagle Pipeline LLC ("Double Eagle") for the three months ended June 30, 2014 and 2015 of \$0.8 million and \$0.9 million, respectively, and for the six months ended June 30, 2014 and 2015 of \$1.3 million and \$1.8 million, respectively, which we included in transportation and terminals revenue. At December 31, 2014 and June 30, 2015, respectively, we recognized a \$0.3 million trade accounts receivable from Double Eagle.

The financial results from Texas Frontera are included in our marine storage segment, the financial results from BridgeTex, Double Eagle, Osage, Saddlehorn and Seabrook are or will be included in our crude oil segment and the financial results from Powder Springs are included in our refined products segment as earnings/losses of non-controlled entities.

New Accounting Pronouncements

In July 2015, the Financial Accounting Standards Board ("FASB") extended the effective date of Accounting Standards Update ("ASU") 2014-09, Revenue from Contracts with Customers, from January 1, 2017 to January 1, 2018.

In April 2015, the FASB issued ASU No. 2015-03, Interest: Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs. Under this update, the costs for issuing debt will be included on the balance sheet as a direct deduction from the debt's value. The amendments will not affect the recognition and measurement of the costs for issuing debt. The amendments will have to be applied for reporting periods that start after December 15, 2015, with early adoption permitted. We plan to adopt this ASU in fourth quarter 2015. Our adoption will not have a material impact on our results of operations, financial position or cash flows.

In April 2015, the FASB issued ASU 2015-04, Practical Expedient for the Measurement Date of an Employer's Defined Benefit Obligation and Plan Assets. For an entity that has a significant event in an interim period that calls for a re-measurement of defined benefit plan assets and obligations (i.e., a partial settlement), the amendments in this ASU provide a practical expedient that permits the entity to re-measure defined benefit plan assets and obligations using the month-end that is closest to the date of the significant event. This ASU is effective for reporting periods beginning after December 15, 2015. Our adoption of this standard is not expected to have a material impact on our results of operations, financial position or cash flows.

In April 2015, the FASB issued ASU 2015-05, Intangibles-Goodwill and Other-Internal-Use Software: Customer's Accounting for Fees Paid in a Cloud Computing Arrangement. Where an entity has entered into a cloud computing arrangement, this update requires the entity to capitalize the software license element of arrangements that include a software license. Where the cloud computing arrangement does not include a software license, the arrangement is to be accounted for as a service contract. This ASU is effective for reporting periods beginning after December 15, 2015. Our adoption of this standard will not have a material impact on our results of operations, financial position or cash flows.

In January 2015, the FASB issued ASU 2015-01, Income Statement – Extraordinary and Unusual Items (Subtopic 225-20): Simplifying Income Statement Presentation by Eliminating the Concept of Extraordinary Items. This ASU

eliminates all references to and guidance concerning the classification and presentation of extraordinary items and emphasizes that the nature and effects of an event or transaction deemed unusual in nature or that is expected to occur infrequently should be disclosed on the face of the income statement as a separate component of income from continuing operations, or, alternatively, in notes to the financial statements. The changes are effective for fiscal years, including quarterly reports, beginning after December 15, 2015, with early application permitted (provided it is applied from the beginning of the fiscal year of initial adoption). The new guidance may be applied

Table of Contents

either prospectively or retrospectively. Our adoption of this ASU will not have a material impact on our results of operations, financial position or cash flows.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We may be exposed to market risk through changes in commodity prices and interest rates. We have established policies to monitor and control these market risks. We use derivative agreements to help manage our exposure to commodity price and interest rate risks.

Commodity Price Risk

Our commodity price risk primarily arises from our butane blending and fractionation activities, and from managing product imbalances associated with our refined products and crude oil pipelines. We use derivatives such as forward physical contracts, NYMEX petroleum products contracts and butane futures contracts to help us manage commodity price risk.

Forward physical contracts that qualify for and are elected as normal purchases and sales are accounted for using traditional accrual accounting. As of June 30, 2015, we had commitments under forward purchase and sale contracts used in our butane blending and fractionation activities as follows (in millions):

	Notional Value	Barrels
Forward purchase contracts	\$118.3	3.5
Forward sale contracts	\$11.4	0.1

We use NYMEX contracts to hedge against changes in the price of petroleum products we expect to sell from activities in which we acquire or produce petroleum products. Some of these NYMEX contracts qualify for hedge accounting treatment, and we designate and account for these as either cash flow or fair value hedges. We account for those NYMEX contracts that do not qualify for hedge accounting treatment as economic hedges. We also use NYMEX contracts to hedge against changes in the price of butane that we expect to purchase in future periods. At June 30, 2015, we had open NYMEX contracts representing 6.3 million barrels of petroleum products we expect to sell in the future. Additionally, we had open NYMEX contracts for 1.3 million barrels of butane we expect to purchase in the future. At June 30, 2015, the fair value of our open NYMEX contracts was an asset of \$13.6 million.

At June 30, 2015, open NYMEX contracts representing 5.6 million barrels of petroleum products did not qualify for hedge accounting treatment. A \$10.00 per barrel increase in the price of these NYMEX contracts for reformulated gasoline blendstock for oxygen blending (“RBOB”) gasoline or heating oil would result in a \$56.0 million decrease in our operating profit and a \$10.00 per barrel decrease in the price of these NYMEX contracts for RBOB or heating oil would result in a \$56.0 million increase in our operating profit.

At June 30, 2015, we had open NYMEX contracts representing 1.3 million barrels of butane we expect to purchase in the future. Relative to these agreements, a \$10.00 per barrel increase in the price of butane would result in a \$13.0 million increase in our operating profit and a \$10.00 per barrel decrease in the price of butane would result in a \$13.0 million decrease in our operating profit.

The increases or decreases in operating profit we recognize from our open NYMEX forward sales and price swap contracts would be substantially offset by higher or lower product sales revenue or cost of product sales when the physical sale or purchase of those products occur. These contracts may be for the purchase or sale of product in markets different from those in which we are attempting to hedge our exposure and the resulting hedges may not

eliminate all price risks.

42

Table of Contents

Interest Rate Risk

Our use of variable rate debt and any forecasted issuances of fixed rate debt expose us to interest rate risk.

In first quarter 2015, we entered into a \$50.0 million forward-starting interest rate swap agreement to hedge against the risk of variability of future interest payments on a portion of debt we anticipate issuing in 2016. The fair value of this contract at June 30, 2015 was an asset of \$2.9 million. We account for this agreement as a cash flow hedge. A 0.125% decrease in the interest rates would result in a decrease in the fair value of this asset of approximately \$0.5 million. A 0.125% increase in the interest rates would result in an increase in the fair value of this asset of approximately \$0.5 million.

At June 30, 2015, we had \$145.0 million of commercial paper notes outstanding which represents variable rate debt. We can issue up to \$1.0 billion of commercial paper, limited by the amounts available under our revolving credit facility. Considering the amount of commercial paper borrowings outstanding at June 30, 2015, our annual interest expense would change by \$0.2 million if rates charged by our commercial paper lenders changed by 0.125%.

ITEM 4. CONTROLS AND PROCEDURES

We performed an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in rule 13a-14(c) of the Securities Exchange Act) as of the end of the period covered by the date of this report. We performed this evaluation under the supervision and with the participation of our management, including our general partner's Chief Executive Officer and Chief Financial Officer. Based upon that evaluation, our general partner's Chief Executive Officer and Chief Financial Officer concluded that these disclosure controls and practices are effective in providing reasonable assurance that all required disclosures are included in the current report.

Additionally, these disclosure controls and practices are effective in ensuring that information required to be disclosed is accumulated and communicated to our Chief Executive Officer and Chief Financial Officer to allow timely decisions regarding required disclosures. There has been no change in our internal control over financial reporting (as defined in Rule 13a-15(f) of the Securities Exchange Act) during the quarter ended June 30, 2015 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Forward-Looking Statements

Certain matters discussed in this Quarterly Report on Form 10-Q include forward-looking statements within the meaning of Section 27A of the Securities Act and Section 21E of the Exchange Act that discuss our expected future results based on current and pending business operations. We make these forward-looking statements in reliance on the safe harbor protections provided under the Private Securities Litigation Reform Act of 1995. Forward-looking statements can be identified by words such as "anticipates," "believes," "continue," "could," "estimates," "expects," "forecasts," "goal," "guidance," "intends," "may," "might," "plans," "potential," "projected," "scheduled," "should," "will" and other similar expressions. Although we believe our forward-looking statements are based on reasonable assumptions, statements made regarding future results are not guarantees of future performance and subject to numerous assumptions, uncertainties and risks that are difficult to predict. Therefore, actual outcomes and results may be materially different from the results stated or implied in such forward-looking statements included in this report.

The following are among the important factors that could cause future results to differ materially from any projected, forecasted, estimated or budgeted amounts we have discussed in this report:

- overall demand for refined products, crude oil, liquefied petroleum gases and ammonia in the U.S.;
- price fluctuations for refined products, crude oil, liquefied petroleum gases and ammonia and expectations about future prices for these products;
- decreases in the production of crude oil in the basins served by our pipelines;
- changes in general economic conditions, interest rates and price levels;
- changes in the financial condition of our customers, vendors, derivatives counterparties, joint venture co-owners or lenders;
- our ability to secure financing in the credit and capital markets in amounts and on terms that will allow us to execute our growth strategy, refinance our existing obligations when due and maintain adequate liquidity;
- development of alternative energy sources, including but not limited to natural gas, solar power, wind power and geothermal energy, increased use of biofuels such as ethanol and biodiesel, increased conservation or fuel efficiency, as well as regulatory developments or other trends that could affect demand for our services;
- changes in the throughput or interruption in service on refined products or crude oil pipelines owned and operated by third parties and connected to our assets;
- changes in demand for storage in our refined products, crude oil or marine terminals;
- changes in supply patterns for our facilities due to geopolitical events, the activities of the Organization of the Petroleum Exporting Countries, changes in U.S. trade policies, technological developments or other factors;
- our ability to manage interest rate and commodity price exposures;
- changes in our tariff rates implemented by the Federal Energy Regulatory Commission, the U.S. Surface Transportation Board or state regulatory agencies;
- shut-downs or cutbacks at refineries, oil wells, petrochemical plants, ammonia production facilities or other customers or businesses that use or supply our services;
- the effect of weather patterns and other natural phenomena, including climate change, on our operations and demand for our services;
- an increase in the competition our operations encounter;
- the occurrence of natural disasters, terrorism, operational hazards, equipment failures, system failures or unforeseen interruptions;
- not being adequately insured or having losses that exceed our insurance coverage;
- our ability to obtain insurance and to manage the increased cost of available insurance;
- the treatment of us as a corporation for federal or state income tax purposes or if we become subject to significant forms of other taxation or more aggressive enforcement or increased assessments under existing forms of taxation;

Table of Contents

our ability to identify expansion projects or to complete identified expansion projects on time and at projected costs;

our ability to make and integrate accretive acquisitions and joint ventures and successfully execute our business strategy;

uncertainty of estimates, including accruals and costs of environmental remediation;

our ability to cooperate with and rely on our joint venture co-owners;

actions by rating agencies concerning our credit ratings;

our ability to timely obtain and maintain all necessary approvals, consents and permits required to operate our existing assets and any new or modified assets;

our ability to promptly obtain all necessary services, materials, labor, supplies and rights-of-way required for construction of our growth projects, and to complete construction without significant delays, disputes or cost overruns;

risks inherent in the use and security of information systems in our business and implementation of new software and hardware;

changes in laws and regulations that govern product quality specifications or renewable fuel obligations that could impact our ability to produce gasoline volumes through our blending activities or that could require significant capital outlays for compliance;

changes in laws and regulations to which we or our customers are or become subject, including tax withholding requirements, safety, security, employment, hydraulic fracturing, derivatives transactions and environmental laws and regulations, including laws and regulations designed to address climate change;

the cost and effects of legal and administrative claims and proceedings against us or our subsidiaries;

the amount of our indebtedness, which could make us vulnerable to general adverse economic and industry conditions, limit our ability to borrow additional funds, place us at competitive disadvantages compared to our competitors that have less debt or have other adverse consequences;

the effect of changes in accounting policies;

the potential that our internal controls may not be adequate, weaknesses may be discovered or remediation of any identified weaknesses may not be successful;

the ability of third parties to perform on their contractual obligations to us;

petroleum product supply disruptions;

global and domestic repercussions from terrorist activities, including cyber attacks, and the government's response thereto; and

other factors and uncertainties inherent in the transportation, storage and distribution of petroleum products and ammonia.

This list of important factors is not exclusive. We undertake no obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future events, changes in assumptions or otherwise.

PART II
OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

2011 EPA Clean Water Act Information Request for Pipeline Release in Texas. In July 2011, we received an information request from the Environmental Protection Agency ("EPA") pursuant to Section 308 of the Clean Water Act regarding a pipeline release in February 2011 in Texas. We have accrued \$0.3 million for potential monetary sanctions related to this matter. While the results cannot be predicted with certainty, we believe that the ultimate resolution of this matter will not have a material impact on our results of operations, financial position or cash flows.

2012 EPA Clean Water Act Information Request for Pipeline Release in Nebraska. In April 2012, we received an information request from the EPA pursuant to Section 308 of the Clean Water Act regarding a pipeline release in December 2011 in Nebraska. We have accrued \$1.4 million for potential monetary sanctions related to this matter. While the results cannot be predicted with certainty, we believe that the ultimate resolution of this matter will not have a material impact on our results of operations, financial position or cash flows.

U.S. Oil Recovery, EPA ID No.: TXN000607093 Superfund Site. We have liability at the U.S. Oil Recovery Superfund Site in Pasadena, Texas as a potential responsible party ("PRP") under Section 107(a) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended ("CERCLA"). As a result of the EPA's Administrative Settlement Agreement and Order on Consent for Removal Action, filed August 25, 2011, EPA Region 6, CERCLA Docket No. 06-10-11, we voluntarily entered into the PRP group responsible for the site investigation, stabilization and subsequent site cleanup. We have paid \$15,000 associated with the assessment phase. Until this assessment phase has been completed, we cannot reasonably estimate our proportionate share of the remediation costs associated with this site.

We are a party to various other claims, legal actions and complaints arising in the ordinary course of business. While the results cannot be predicted with certainty, management believes the ultimate resolution of these claims, legal actions and complaints after consideration of amounts accrued, insurance coverage or other indemnification arrangements will not have a material adverse effect on our future results of operations, financial position or cash flows.

ITEM 1A. RISK FACTORS

In addition to the information set forth in this report, you should carefully consider the factors discussed in Part I, Item 1A. "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2014, which could materially affect our business, financial condition or future results. The risks described in our Annual Report on Form 10-K are not our only risks. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also could materially adversely affect our business, financial condition and/or operating results.

We have updated our risk factors as follows since issuing our Annual Report on Form 10-K:

We are exposed to counterparty risk. Nonpayment, commitment termination or nonperformance by our customers, vendors, lenders or derivative counterparties could materially reduce our revenue, impair our liquidity, increase our expenses or otherwise negatively impact our results of operations, financial position or cash flows and our ability to pay cash distributions.

We are subject to risks of loss resulting from nonpayment or nonperformance by our customers to whom we extend credit. In addition, we frequently undertake capital expenditures based on commitments from customers upon which we expect to realize the expected return on those expenditures, including take-or-pay commitments from our

Table of Contents

customers, and nonperformance by our customers of those commitments or termination of those commitments resulting from our inability to timely meet our obligations could result in substantial losses to us.

We utilize third-party vendors to provide various functions, including, for example, certain construction activities, engineering services, facility inspections and operation of certain software systems. Using third parties to provide these functions has the effect of reducing our direct control over the services rendered. The failure of one or more of our third-party providers to deliver the expected services on a timely basis, at the prices we expect and as required by contract could result in significant disruptions, costs to our operation, or instances of a contractor's non-compliance with applicable laws and regulations, which could materially adversely affect our business, financial condition, operating results and cash flows.

We also rely to a significant degree on the banks that lend to us under our commercial paper program and revolving credit facility for financial liquidity, and any failure of those banks to perform on their obligations to us could significantly impair our liquidity. Furthermore, nonpayment by the counterparties to our interest rate and commodity derivatives could expose us to additional interest rate or commodity price risk.

Any take-or-pay commitment terminations or substantial increase in the nonpayment or nonperformance by our customers, vendors, lenders or derivative counterparties could have a material adverse effect on our results of operations, financial position and cash flows and our ability to pay cash distributions.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

None.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

ITEM 5. OTHER INFORMATION

None.
