

FEDERAL AGRICULTURAL MORTGAGE CORP
Form 10-Q
August 09, 2007

As filed with the Securities and Exchange Commission on
August 9, 2007

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2007

Commission File Number 0-17440

FEDERAL AGRICULTURAL MORTGAGE CORPORATION
(Exact name of registrant as specified in its charter)

Federally chartered instrumentality of the United States
(State or other jurisdiction of incorporation or organization)

52-1578738

(I.R.S. employer identification number)

1133 Twenty-First Street, N.W., Suite 600
Washington, D.C.
(Address of principal executive offices)

20036
(Zip code)

(202) 872-7700

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes T No £

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer £ Accelerated filer T Non Accelerated filer £

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes £ No T

As of August 1, 2007, the registrant had 1,030,780 shares of Class A Voting Common Stock, 500,301 shares of Class B Voting Common Stock and 8,928,912 shares of Class C Non-Voting Common Stock outstanding.

PART I - FINANCIAL INFORMATIONItem 1. Condensed Consolidated Financial Statements

The following interim unaudited condensed consolidated financial statements of the Federal Agricultural Mortgage Corporation (“Farmer Mac” or the “Corporation”) have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (the “SEC”). These interim unaudited condensed consolidated financial statements reflect all normal and recurring adjustments that are, in the opinion of management, necessary to present a fair statement of the financial condition and the results of operations and cash flows of Farmer Mac for the interim periods presented. Certain information and footnote disclosures normally included in annual consolidated financial statements have been condensed or omitted as permitted by SEC rules and regulations. The December 31, 2006 consolidated balance sheet presented in this report has been derived from the Corporation’s audited 2006 consolidated financial statements. Management believes that the disclosures are adequate to present fairly the condensed consolidated financial position, condensed consolidated results of operations and condensed consolidated cash flows as of the dates and for the periods presented. These interim unaudited condensed consolidated financial statements should be read in conjunction with the audited 2006 consolidated financial statements of Farmer Mac included in the Corporation’s Annual Report on Form 10-K for the year ended December 31, 2006. Results for interim periods are not necessarily indicative of those that may be expected for the fiscal year.

The following information concerning Farmer Mac’s interim unaudited condensed consolidated financial statements is included in this report beginning on the pages listed below:

Condensed Consolidated Balance Sheets as of June 30, 2007 and December 31, 2006	3
Condensed Consolidated Statements of Operations for the three and six months ended June 30, 2007 and 2006	4
Condensed Consolidated Statements of Cash Flows for the six months ended June 30, 2007 and 2006	5
Notes to Condensed Consolidated Financial Statements	6

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(*unaudited*)

Note 1.**Accounting Policies**(a) Cash and Cash Equivalents

Farmer Mac considers highly liquid investment securities with maturities of three months or less at the time of purchase to be cash equivalents. Changes in the balance of cash and cash equivalents are reported in the condensed consolidated statements of cash flows. The following table sets forth information regarding certain cash and non-cash transactions for the six months ended June 30, 2007 and 2006.

	Six Months Ended	
	June 30, 2007	June 30, 2006
	<i>(in thousands)</i>	
Cash paid for:		
Interest	\$ 49,164	\$ 40,360
Income taxes	7,000	4,500
Non-cash activity:		
Real estate owned acquired through foreclosure	-	-
Loans acquired and securitized as Farmer Mac Guaranteed Securities	1,324	3,033

(b) Allowance for Losses

As of June 30, 2007, Farmer Mac maintained an allowance for losses to cover estimated probable losses on loans held, real estate owned, and loans underlying long-term standby purchase commitments ("LTSPCs") and Farmer Mac I Guaranteed Securities issued after the Farm Credit System Reform Act of 1996 (the "1996 Act") in accordance with Statement of Financial Accounting Standards No. 5, *Accounting for Contingencies* ("SFAS 5") and Statement of Financial Accounting Standards No. 114, *Accounting by Creditors for Impairment of a Loan*, as amended ("SFAS 114").

The allowance for losses is increased through periodic provisions for loan losses that are charged against net interest income and provisions for losses that are charged to non-interest expense and is reduced by charge-offs for actual losses, net of recoveries. Negative provisions for loan losses or negative provisions for losses are recorded in the event that the estimate of probable losses as of the end of a period is lower than the estimate at the beginning of the period.

Farmer Mac's methodology for determining its allowance for losses incorporates the Corporation's proprietary automated loan classification system. That system scores loans based on criteria such as historical repayment performance, loan seasoning, loan size and loan-to-value ratio. For the purposes of the loss allowance methodology, the loans in Farmer Mac's portfolio of loans and loans underlying post-1996 Act Farmer Mac I Guaranteed Securities and LTSPCs have been scored and classified for each calendar quarter since first quarter 2000. The allowance methodology captures the migration of loan scores across concurrent and overlapping 3-year time horizons and calculates loss rates separately within each loan classification for (1) loans underlying LTSPCs and (2) loans held and loans underlying post-1996 Act Farmer Mac I Guaranteed Securities. The calculated loss rates are applied to the current classification distribution of Farmer Mac's portfolio to estimate inherent losses, on the assumption that the historical credit losses and trends used to calculate loss rates will continue in the future. Management evaluates this assumption by taking into consideration factors including:

- economic conditions;
- geographic and agricultural commodity/product concentrations in the portfolio;
- the credit profile of the portfolio;
- delinquency trends of the portfolio;
- historical charge-off and recovery activities of the portfolio; and
- other factors to capture current portfolio trends and characteristics that differ from historical experience.

Management believes that its use of this methodology produces a reliable estimate of probable losses, as of the balance sheet date, for all loans held, real estate owned and loans underlying post-1996 Act Farmer Mac I Guaranteed Securities and LTSPCs in accordance with SFAS 5 and SFAS 114.

Edgar Filing: FEDERAL AGRICULTURAL MORTGAGE CORP - Form 10-Q

The following table summarizes the changes in the components of Farmer Mac's allowance for losses for the three and six months ended June 30, 2007 and 2006:

	June 30, 2007			
	Allowance for Loan Losses	REO Valuation Allowance	Reserve for Losses	Total Allowance for Losses
	<i>(in thousands)</i>

Six Months Ended:				
Beginning balance	\$ 4,876	\$ -	\$ 3,777	\$ 8,653
Provision/(recovery) for losses	(1,606)	155	(259)	(1,710)
Charge-offs	(900)	(155)	-	(1,055)
Recoveries	364	-	-	364
Ending balance	\$ 2,734	\$ -	\$ 3,518	\$ 6,252

The table below summarizes the components of Farmer Mac's allowance for losses as of June 30, 2007 and December 31, 2006:

	June 30, 2007	December 31, 2006
	<i>(in thousands)</i>	
Allowance for loan losses	\$ 1,681	\$ 1,945
Real estate owned valuation allowance	-	-
Reserve for losses:		
On-balance sheet Farmer Mac I Guaranteed Securities	857	982
Off-balance sheet Farmer Mac I Guaranteed Securities	683	679
LTSPCs	657	949
Total	\$ 3,878	\$ 4,555

No allowance for losses has been made for loans underlying Farmer Mac I Guaranteed Securities issued prior to the 1996 Act, AgVantage securities or securities issued under the Farmer Mac II program ("Farmer Mac II Guaranteed Securities"). Farmer Mac I Guaranteed Securities issued prior to the 1996 Act are supported by unguaranteed first loss subordinated interests, which are expected to exceed the estimated credit losses on those loans. Each AgVantage security is a general obligation of an issuing institution approved by Farmer Mac and is collateralized by eligible mortgage loans. As of June 30, 2007, there were no probable losses inherent in Farmer Mac's AgVantage securities due to the high credit quality of the obligors, as well as the underlying collateral. The guaranteed portions collateralizing Farmer Mac II Guaranteed Securities are guaranteed by the United States Department of Agriculture ("USDA"). Each USDA guarantee is an obligation backed by the full faith and credit of the United States. As of June 30, 2007, Farmer Mac had not experienced any credit losses on any Farmer Mac I Guaranteed Securities issued prior to the 1996 Act, any AgVantage securities or any Farmer Mac II Guaranteed Securities and does not expect to incur any such losses in the future.

As of June 30, 2007, Farmer Mac individually analyzed \$14.7 million of its \$45.7 million of impaired assets for collateral shortfalls against updated appraised values, other updated collateral valuations or discounted values. Farmer Mac evaluated the remaining \$31.0 million of impaired assets for which updated valuations were not available in the aggregate in consideration of their similar risk characteristics and historical statistics. All of the \$14.7 million of assets analyzed individually were adequately collateralized. Accordingly, Farmer Mac did not record any specific allowances as of June 30, 2007. Similarly, as of December 31, 2006, Farmer Mac did not record any specific allowances related to its \$56.9 million of impaired assets as of that date.

Farmer Mac recognized interest income of approximately \$0.8 million and \$1.7 million on impaired loans during the three months and six months ended June 30, 2007, respectively, compared to \$1.2 million and \$1.9 million, respectively, during the same periods in 2006. During the three months and six months ended June 30, 2007, Farmer Mac's average investment in impaired loans was \$50.4 million and \$51.3 million, respectively, compared to \$68.4 million and \$71.2 million, respectively, for the same periods in 2006.

(c)

Financial Derivatives

Farmer Mac enters into financial derivative transactions principally to protect against risk from the effects of market price or interest rate movements on the value of certain assets, future cash flows or debt issuance, not for trading or speculative purposes. Farmer Mac enters into interest rate swap contracts principally to adjust the characteristics of its short-term debt to match more closely the cash flow and duration characteristics of its longer-term mortgage and other assets, and also to adjust the characteristics of its long-term debt to match more closely the cash flow and duration characteristics of its short-term assets, thereby reducing interest rate risk and also to derive an overall lower effective cost of borrowing than would otherwise be available to Farmer Mac in the conventional debt market. Farmer Mac is required also to recognize certain contracts and commitments as derivatives when the characteristics of those contracts and commitments meet the definition of a derivative as promulgated by Statement of Financial Accounting Standards No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended (“SFAS 133”).

Farmer Mac manages the interest rate risk related to loans it has committed to acquire, but has not yet purchased and permanently funded, through the use of forward sale contracts on mortgage-backed securities and the debt of other government-sponsored enterprises (“GSEs”) and futures contracts involving U.S. Treasury securities. Farmer Mac uses forward sale contracts on GSE securities to reduce its interest rate exposure to changes in both Treasury rates and spreads on Farmer Mac debt and Farmer Mac Guaranteed Securities. The notional amounts of these contracts are determined based on a duration-matched hedge ratio between the hedged item and the hedge instrument. Gains or losses generated by these hedge transactions should offset changes in funding costs or Farmer Mac Guaranteed Securities sale prices that occur during the hedge period.

All financial derivatives are recorded on the balance sheet at fair value as a freestanding asset or liability in accordance with SFAS 133. Farmer Mac does not designate its financial derivatives as fair value hedges or cash flow hedges; therefore, the changes in the fair values of financial derivatives are reported as gains or losses on financial derivatives and trading assets in the condensed consolidated statements of operations.

The following table summarizes information related to Farmer Mac's financial derivatives as of June 30, 2007 and December 31, 2006:

	June 30, 2007		December 31, 2006	
	Notional Amount	Fair Value	Notional Amount	Fair Value
	<i>(in thousands)</i>			
Interest rate swaps:				
Pay-fixed	\$ 1,183,798	\$ 9,341	\$ 803,436	\$ (9,982)
Receive-fixed	1,167,482	(10,470)	810,482	(7,111)
Basis	181,422	2,019	335,065	2,531
Treasury futures	900	(1)	-	-
Agency forwards	63,250	(428)	71,045	306
Total	\$ 2,596,852	\$ 461	\$ 2,020,028	\$ (14,256)

As of June 30, 2007, Farmer Mac had approximately \$0.6 million of net after-tax unrealized losses on financial derivatives included in accumulated other comprehensive income related to the SFAS 133 transition adjustment. These amounts will be reclassified into earnings in the same period or periods during which the hedged forecasted transactions (either the payment of interest or the issuance of discount notes) affect earnings or immediately when it becomes probable that the original hedged forecasted transaction will not occur within two months of the originally specified date. Over the next twelve months, Farmer Mac estimates that \$0.3 million of the amount currently reported in accumulated other comprehensive income/(loss) will be reclassified into earnings.

As of June 30, 2007, Farmer Mac had outstanding basis swaps with a related party with a notional amount of \$181.4 million and a fair value of \$2.0 million. Those swaps hedge the interest rate basis risk related to loans Farmer Mac purchases that pay a Constant Maturity Treasury-based rate and the Discount Notes Farmer Mac issues to fund the loan purchases. Under the terms of those basis swaps, which are not in designated hedge relationships, Farmer Mac pays Constant Maturity Treasury-based rates and receives LIBOR. See Note 3 "Related Party Transactions" in the Corporation's Annual Report on Form 10-K for the year ended December 31, 2006, as filed with the SEC on March 15, 2007, for additional information on these related party transactions. As of December 31, 2006, these swaps had an outstanding notional amount of \$193.0 million and a fair value of \$2.8 million. Accordingly, Farmer Mac recorded an unrealized loss of \$0.3 million and \$0.8 million for the three months and six months ended June 30, 2007.

(d) Earnings Per Common Share

Basic earnings per common share are based on the weighted-average number of shares of common stock outstanding. Diluted earnings per common share are based on the weighted-average number of shares of common stock outstanding adjusted to include all potentially dilutive common stock options. The following schedule reconciles basic and diluted earnings per common share ("EPS") for the three and six months ended June 30, 2007 and 2006:

	June 30, 2007			June 30, 2006		
	Basic EPS	Dilutive stock options	Diluted EPS	Basic EPS	Dilutive stock options	Diluted EPS
<i>(in thousands, except per share amounts)</i>						
Three Months Ended:						
Net income available to common stockholders	\$ 18,369		\$ 18,369	\$ 13,377		\$ 13,377
Weighted-average shares	10,287	255	10,542	11,083	256	11,339
Earnings per common share	\$ 1.79		\$ 1.74	\$ 1.21		\$ 1.18
Six Months Ended:						
Net income available to common stockholders	\$ 22,291		\$ 22,291	\$ 28,469		\$ 28,469
Weighted average shares	10,377	216	10,593	11,095	287	11,382
Earnings per common share	\$ 2.15		\$ 2.10	\$ 2.57		\$ 2.50

During fourth quarter 2005, Farmer Mac established a program to repurchase up to 10 percent, or 958,632 shares, of the Corporation's outstanding Class C Non-Voting Common stock. The aggregate number of shares repurchased by Farmer Mac under that program reached the maximum number of authorized shares during first quarter 2007, thereby terminating the program according to its terms. At that time, Farmer Mac announced the establishment of an additional program to repurchase up to one million additional shares of the Corporation's outstanding Class C Non-Voting Common Stock. The authority for this new stock repurchase program expires in November 2008. Repurchases under that program commenced in accordance with its terms upon termination of the previous program. During the three months and six months ended June 30, 2007, Farmer Mac repurchased 133,500 and 493,982 shares, respectively, of its Class C Non-Voting Common Stock at an average price of \$27.75 and \$26.65 per share, respectively, pursuant to both of the Corporation's previously announced stock repurchase programs. These repurchases reduced the Corporation's stockholders' equity by approximately \$3.7 million and \$13.2 million, respectively.

All of the shares repurchased under Farmer Mac's stock repurchase programs were purchased in open market transactions and were retired to become authorized but unissued shares available for future issuance.

(e) Stock-Based Compensation

In 1997, Farmer Mac adopted a stock option plan for directors, officers and other employees to acquire shares of Class C Non-Voting Common Stock. Upon stock option exercise, new shares are issued by the Corporation. Under the plan, stock options awarded vest annually in thirds, with the first third vesting one year after the date of grant. If not exercised, any options granted under the 1997 plan expire 10 years from the date of grant, except that options issued to directors since June 1, 1998, if not exercised, expire five years from the date of grant. Of the 3,750,000 shares authorized to be issued under the plan, 31,333 remain available for future issuance as of June 30, 2007. For all stock options granted, the exercise price is equal to the closing price of the Class C Non-Voting Common Stock on or

immediately preceding the date of grant.

-12-

Farmer Mac recognized \$0.4 million and \$0.8 million of compensation expense during the three-month and six-month periods ended June 30, 2007, respectively, and \$0.4 million and \$0.9 million of compensation expense during the three-month and six-month periods ended June 30, 2006, respectively, related to the non-vested portion of stock option awards that were outstanding as of December 31, 2005. Additionally, Farmer Mac recognized \$0.4 million and \$0.7 million of compensation expense related to stock options awarded subsequent to December 31, 2005, for the three-month and six-month periods ended June 30, 2007, respectively, compared to no compensation expense and \$0.1 million of similar compensation expense recognized for the three-month and six-month periods ended June 30, 2006, respectively.

As of June 30, 2007, Farmer Mac had \$1.1 million of total unrecognized compensation cost related to stock options outstanding and unvested as of December 31, 2005. Of that cost, \$0.6 million and \$0.5 million is expected to be recognized in the remainder of 2007 and 2008, respectively.

The following table summarizes stock option activity for the three and six months ended June 30, 2007 and 2006:

	June 30, 2007		June 30, 2006	
	Shares	Weighted-Average Exercise Price	Shares	Weighted-Average Exercise Price
Three Months Ended:				
Outstanding, beginning of period	2,133,965	\$ 23.85	2,091,208	\$ 22.68
Granted	456,427	29.33	358,928	26.35
Exercised	(253,459)	21.44	(75,111)	17.26
Canceled	(31,334)	27.11	(75,091)	28.82
Outstanding, end of period	2,305,599	\$ 25.15	2,299,934	\$ 23.23
Six Months Ended:				
Outstanding, beginning of period	2,145,705	\$ 23.83	2,153,008	\$ 22.41
Granted	457,427	29.32	358,928	26.35
Exercised	(262,864)	21.44	(136,911)	15.40
Canceled	(34,669)	26.76	(75,091)	28.82
Outstanding, end of period	2,305,599	\$ 25.15	2,299,934	\$ 23.23
Options exercisable at end of period	1,408,361	\$ 24.04	1,431,465	\$ 23.28

The cancellations of stock options during the six months ended June 30, 2007 and June 30, 2006 were due either to unvested options terminating in accordance with the provisions of the applicable stock option plans upon directors' or employees' departures from Farmer Mac or vested options terminating unexercised on their expiration date. For the three-month and the six-month periods ended June 30, 2007, the additional paid-in capital received from stock option exercises was \$5.1 million and \$5.3 million, respectively, compared to \$1.2 million and \$2.0 million for the comparable periods in the prior year. For the three-month and the six-month periods ended June 30, 2007, the reduction of income taxes to be paid as a result of the deduction for stock option exercises was \$0.7 million and \$0.8 million, respectively, compared to \$0.3 million and \$0.7 million for the comparable periods in the prior year.

The following table summarizes information regarding options outstanding as of June 30, 2007:

Range of Exercise Prices	Options Outstanding		Options Exercisable	
	Number of Shares	Weighted-Average Remaining Contractual Life	Number of Shares	Weighted-Average Remaining Contractual Life
\$10.00 - \$19.99	217,777	6.9 years	216,109	6.9 years
20.00 - 24.99	884,628	5.6 years	696,690	5.0 years
25.00 - 29.99	1,013,026	7.8 years	305,394	6.1 years
30.00 - 34.99	189,668	3.9 years	189,668	3.9 years
35.00 - 39.99	-	-	-	-
40.00 - 44.99	-	-	-	-
45.00 - 50.00	500	4.8 years	500	4.8 years
	2,305,599		1,408,361	

The weighted-average grant date fair values of options granted in 2007 and 2006 were \$11.25 and \$9.91 per share, respectively. The fair values were estimated using the Black-Scholes option pricing model based on the following assumptions:

	2007	2006
Risk-free interest rate	4.8%	5.0%
Expected years until exercise	6 years	6 years
Expected stock volatility	35.9%	36.9%
Dividend yield	1.4%	1.6%

(f) Reclassifications

Certain reclassifications of prior period information were made to conform to the current period presentation.

(g) New Accounting Standards

In February 2006, the Financial Accounting Standards Board (“FASB”) issued Statement of Financial Accounting Standards No. 155, *Accounting for Certain Hybrid Financial Instruments – an Amendment of FASB Statements No. 133 and 140* (“SFAS 155”), which resolves issues addressed in Statement 133 Implementation Issue No. D1, *Application of Statement 133 to Beneficial Interests in Securitized Financial Assets*. SFAS 155, among other things, permits the fair value re-measurement of any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation; clarifies which interest-only strips and principal-only strips are not subject to the requirements of SFAS 133; and establishes a requirement to evaluate interests in securitized financial assets to identify interests that are freestanding derivatives or that are hybrid financial instruments that contain an embedded derivative requiring bifurcation. SFAS 155 was effective for all financial instruments acquired or issued in a fiscal year beginning after

September 15, 2006. Farmer Mac's adoption of SFAS 155 on January 1, 2007 did not have a material effect on Farmer Mac's results of operations or financial position.

-14-

In March 2006, FASB issued Statement of Financial Accounting Standards No. 156, *Accounting for Servicing of Financial Assets* (“SFAS 156”), which requires that all separately recognized servicing assets and servicing liabilities be initially measured at fair value, if practicable, and permits the entities to elect either fair value measurement with changes in fair value reflected in earnings or the amortization and impairment requirements of Statement of Financial Accounting Standards No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, for subsequent measurement. SFAS 156 was effective on January 1, 2007. Farmer Mac’s adoption of SFAS 156 on January 1, 2007 did not have a material effect on Farmer Mac’s results of operations or financial position.

Farmer Mac adopted FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes – an interpretation of FASB Statement No. 109* (“FIN 48”) on January 1, 2007. As part of the implementation of FIN 48, Farmer Mac evaluated its tax positions for its open tax years, 2003 through 2006, to identify and recognize any liabilities related to uncertain tax positions in its federal income tax returns. As of January 1, 2007, Farmer Mac recorded a liability for uncertain tax positions of \$1.5 million with a corresponding \$1.5 million increase in deferred tax assets. There were no significant changes in the components of the liability in first quarter 2007. During second quarter 2007, both the recorded liability for uncertain tax positions and the corresponding deferred tax asset were reduced to \$1.0 million.

Farmer Mac’s policy for recording interest and penalties associated with uncertain tax positions is to record them as a component of income tax expense and the FIN 48 liability. Under the provisions of FIN 48, Farmer Mac will continue to evaluate its tax positions for potential liabilities related to unrecognized tax benefits at least quarterly, but does not expect any significant changes to its unrecognized tax benefits during the next 12 months. There are no income tax examinations of Farmer Mac in process.

In September 2006, FASB issued Statement of Financial Accounting Standards No. 157, *Fair Value Measurements* (“SFAS 157”). SFAS 157 defines fair value, establishes a framework for measuring fair value under other accounting pronouncements that permit or require fair value measurements, changes the methods used to measure fair value and expands disclosures about fair value measurements. In particular, disclosures are required to provide information on the extent to which fair value is used to measure assets and liabilities, the inputs used to develop measurements and the effects of certain of the measurements on earnings or changes in net assets. SFAS 157 requires that costs related to acquiring financial instruments carried at fair value should not be capitalized, but rather should be expensed as incurred. SFAS 157 also clarifies that an issuer’s credit standing should be considered when measuring liabilities at fair value. SFAS 157 is effective for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. Early adoption, as of the beginning of an entity’s fiscal year, is also permitted, provided interim financial statements have not yet been issued. Farmer Mac is currently evaluating the potential impact, if any, that the adoption of SFAS 157 will have on its financial statements.

In February 2007, FASB issued Statement of Financial Accounting Standards No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities – Including an Amendment of FASB Statement No. 115* (“SFAS 159”). SFAS 159 permits entities to choose to measure many financial instruments and certain other items at fair value. The objective is to improve financial reporting by providing entities with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. SFAS 159 is effective for fiscal years beginning after November 15, 2007. Early adoption is also permitted as of the beginning of an entity’s fiscal year that begins on or before November 15, 2007, provided the entity also elects to apply the provisions of SFAS 157. Farmer Mac is currently evaluating the potential impact that SFAS 159, if adopted, would have on its financial statements.

Note 2. Farmer Mac Guaranteed Securities

The following table sets forth information about on-balance sheet Farmer Mac Guaranteed Securities as of June 30, 2007 and December 31, 2006.

	June 30, 2007			December 31, 2006		
	Available-for-Sale	Held-to-Maturity	Total	Available-for-Sale	Held-to-Maturity	Total
	<i>(in thousands)</i>					
Farmer Mac I	\$ 367,418	\$ 27,296	\$ 394,714	\$ 404,938	\$ 28,489	\$ 433,427
Farmer Mac II	-	918,712	918,712	-	896,991	896,991
Total	\$ 367,418	\$ 946,008	\$ 1,313,426	\$ 404,938	\$ 925,480	\$ 1,330,418
Amortized cost	\$ 365,340	\$ 946,008	\$ 1,311,348	\$ 395,786	\$ 925,480	\$ 1,321,266
Unrealized gains	4,685	72	4,757	11,980	214	12,194
Unrealized losses	(2,607)	(14,375)	(16,982)	(2,828)	(6,715)	(9,543)
Fair value	\$ 367,418	\$ 931,705	\$ 1,299,123	\$ 404,938	\$ 918,979	\$ 1,323,917

The temporary unrealized losses presented above are principally due to changes in interest rates from the date of acquisition to June 30, 2007 and December 31, 2006, as applicable. The available-for-sale unrealized losses were on 18 and 12 individual securities as of June 30, 2007 and December 31, 2006, respectively.

As of June 30, 2007, 9 of the available-for-sale Farmer Mac Guaranteed Securities in loss positions had been in loss positions for more than 12 months and had a total unrealized loss of \$2.6 million. As of December 31, 2006, 6 of the available-for-sale Farmer Mac Guaranteed Securities in loss positions had been in loss positions for more than 12 months and had a total unrealized loss of \$2.8 million. The unrealized losses on those securities are due to overall increases in market interest rates. As of June 30, 2007, all of the available-for-sale securities with unrealized losses aged greater than 12 months have losses that are less than 3 percent of the amortized security cost. All aged unrealized losses are recoverable within a reasonable period of time by way of changes in market interest rates. Accordingly, Farmer Mac has concluded that none of the unrealized losses on its available-for-sale Farmer Mac Guaranteed Securities represent other-than-temporary impairment as of June 30, 2007. Farmer Mac has the intent and ability to hold its on-balance sheet Farmer Mac Guaranteed Securities until either the market value recovers or the securities mature.

The table below presents a sensitivity analysis for the Corporation's on-balance sheet Farmer Mac Guaranteed Securities as of June 30, 2007.

	June 30, 2007 <i>(dollars in thousands)</i>
Fair value of beneficial interests retained in Farmer Mac Guaranteed Securities	\$ 1,299,123
Weighted-average remaining life (in years)	4.9
Weighted-average prepayment speed (annual rate)	9.8%
Effect on fair value of a 10% adverse change	\$ (124)
Effect on fair value of a 20% adverse change	\$ (205)
Weighted-average discount rate	5.9%
Effect on fair value of a 10% adverse change	\$ (21,929)
Effect on fair value of a 20% adverse change	\$ (43,872)

These sensitivities are hypothetical. Changes in fair value based on 10 percent or 20 percent variations in assumptions generally cannot be extrapolated because the relationship of the change in assumptions to the change in fair value may not be linear. Also, the effect of a variation in a particular assumption on the fair value of the retained interest is calculated without changing any other assumption. In fact, changes in one factor may result in changes in another (for example, increases in market interest rates may result in lower prepayments), which might amplify or counteract the sensitivities.

The table below presents the outstanding principal balances as of the periods indicated for Farmer Mac Guaranteed Securities, loans, and LTSPCs.

	June 30, 2007	December 31, 2006
	<i>(in thousands)</i>	
On-balance sheet assets:		
Farmer Mac I:		
Loans	\$ 744,092	\$ 770,236
Guaranteed Securities	391,763	423,624
Farmer Mac II:		
Guaranteed Securities	915,151	892,667
Total on-balance sheet	\$ 2,051,006	\$ 2,086,527
Off-balance sheet assets:		
Farmer Mac I:		
LTSPCs	\$ 1,644,413	\$ 1,969,734
AgVantage	2,500,000	1,500,000
Guaranteed Securities	2,151,635	1,649,895
Farmer Mac II:		
Guaranteed Securities	27,292	33,132
Total off-balance sheet	\$ 6,323,340	\$ 5,152,761
Total	\$ 8,374,346	\$ 7,239,288

When particular criteria are met, such as the default of the borrower, Farmer Mac becomes entitled to purchase the defaulted loans underlying Farmer Mac Guaranteed Securities (commonly referred to as "removal-of-account" provisions). Farmer Mac records these loans at their fair values in the consolidated financial statements during the period in which Farmer Mac becomes entitled to purchase the loans and therefore regains effective control over the transferred loans. Fair values are determined by current collateral valuations or management's estimate of discounted collateral values, and represent the cash flows expected to be collected. Farmer Mac records, at acquisition, the difference between each loan's acquisition cost and its fair value, if any, as a charge-off to the reserve for losses. Subsequent to the purchase, such defaulted loans are treated as nonaccrual loans and, therefore, interest is accounted for on the cash basis. Any decreases in expected cash flows are recognized as impairment. No impairment was recognized during the three and six months ended June 30, 2007 and 2006. The following table presents information related to Farmer Mac's acquisition of defaulted loans for the three and six months ended June 30, 2007 and 2006 and the outstanding balances and carrying amounts of all such loans as of June 30, 2007 and December 31, 2006, respectively.

	Three Months Ended		Six Months Ended	
	June 30, 2007	June 30, 2006	June 30, 2007	June 30, 2006
	<i>(in thousands)</i>			
Fair value at acquisition date	\$ 650	\$ 511	\$ 1,483	\$ 4,565
Contractually required payments receivable	659	515	1,530	4,635

	As of	
	June 30, 2007	December 31, 2006
	<i>(in thousands)</i>	
Outstanding balance	\$ 40,029	\$ 45,330
Carrying amount	35,711	42,687

Net credit losses for the six months ended June 30, 2007 and 2006 and 90-day delinquencies as of June 30, 2007, December 31, 2006 and June 30, 2006 for Farmer Mac Guaranteed Securities, loans and LTSPCs are presented in the table below. Information is not presented for loans underlying Farmer Mac I Guaranteed Securities issued prior to the 1996 Act, AgVantage securities or Farmer Mac II Guaranteed Securities. Farmer Mac I Guaranteed Securities issued prior to the 1996 Act are supported by unguaranteed first loss subordinated interests, which are expected to exceed the estimated credit losses on those loans. Each AgVantage security is a general obligation of an issuing institution approved by Farmer Mac and is collateralized by eligible mortgage loans. As of June 30, 2007, there were no probable losses inherent in Farmer Mac's AgVantage securities due to the high credit quality of the obligors, as well as the underlying collateral. The guaranteed portions collateralizing Farmer Mac II Guaranteed Securities are guaranteed by the USDA. Each USDA guarantee is an obligation backed by the full faith and credit of the United States. As of June 30, 2007, Farmer Mac had not experienced any credit losses on any Farmer Mac I Guaranteed Securities issued prior to the 1996 Act, AgVantage securities or Farmer Mac II Guaranteed Securities and does not expect to incur any such losses in the future.

	90-Day Delinquencies (1)			Net Credit Losses	
	As of June 30, 2007	As of December 31, 2006	As of June 30, 2006	For the Six Months Ended June 30, 2007 2006	
	<i>(in thousands)</i>				
On-balance sheet assets:					
Farmer Mac I:					
Loans	\$ 13,561	\$ 18,457	\$ 18,599	\$ 49	\$ 536
Guaranteed Securities	-	-	-	-	-
Total on-balance sheet	\$ 13,561	\$ 18,457	\$ 18,599	\$ 49	\$ 536
Off-balance sheet assets:					
Farmer Mac I:					
LTSPCs	\$ 1,202	\$ 1,198	\$ 2,409	\$ -	\$ -
Guaranteed Securities	-	-	-	-	-
Total off-balance sheet	\$ 1,202	\$ 1,198	\$ 2,409	\$ -	\$ -
Total	\$ 14,763	\$ 19,655	\$ 21,008	\$ 49	\$ 536

(1) Includes loans and loans underlying post-1996 Act Farmer Mac I Guaranteed Securities and LTSPCs that are 90 days or more past due, in foreclosure, restructured after delinquency, or in bankruptcy, excluding loans performing under either their original loan terms or a court-approved bankruptcy plan.

Note 3. Off-Balance Sheet Guarantees and Long-Term Standby Purchase Commitments

Overview

Farmer Mac offers approved agricultural and rural residential mortgage lenders two credit enhancement alternatives to increase their liquidity or lending capacity while retaining the cash flow benefits of their loans: (1) Farmer Mac Guaranteed Securities, which are available through either the Farmer Mac I program or the Farmer Mac II program; and (2) LTSPCs, which are available only through the Farmer Mac I program. Both of these alternatives result in the creation of off-balance sheet obligations for Farmer Mac in the ordinary course of its business.

Off-Balance Sheet Farmer Mac Guaranteed Securities

Agricultural mortgage loans and other mortgage assets may be placed into trusts that are used as vehicles for the securitization of the transferred assets and the Farmer Mac-guaranteed beneficial interests in the trusts are sold to investors. The following table summarizes cash flows received from and paid to these trusts:

	Six Months Ended	
	June 30, 2007	June 30, 2006
	<i>(in thousands)</i>	
Proceeds from new securitizations	\$ 1,324	\$ 3,033
Guarantee fees received	4,923	2,079
Purchases of assets from the trusts	247	506
Servicing advances	104	10
Repayment of servicing advances	95	8

The following table presents the maximum principal amount of potential undiscounted future payments that Farmer Mac could be required to make under off-balance sheet Farmer Mac Guaranteed Securities as of June 30, 2007 and December 31, 2006, not including offsets provided by any recourse provisions, recoveries from third parties or collateral for the underlying loans.

**Outstanding Balance of Off-Balance Sheet
Farmer Mac Guaranteed Securities**

	June 30, 2007	December 31, 2006
	<i>(in thousands)</i>	
Post-1996 Act Farmer Mac I Guaranteed Securities	\$ 4,651,635	\$ 3,149,895
Farmer Mac II Guaranteed Securities	27,292	33,132
Total Farmer Mac I and II	\$ 4,678,927	\$ 3,183,027

For those securities issued or modified on or after January 1, 2003, Farmer Mac has recorded a liability for its obligation to stand ready under the guarantee in the guarantee and commitment obligation on the condensed consolidated balance sheet. This liability approximated \$30.8 million as of June 30, 2007 and \$13.6 million as of December 31, 2006. As of June 30, 2007, the weighted-average remaining maturity of all loans underlying off-balance sheet Farmer Mac Guaranteed Securities, excluding AgVantage securities, was 12.1 years.

Long-Term Standby Purchase Commitments (LTSPCs)

An LTSPC is a commitment by Farmer Mac to purchase eligible loans from a segregated pool of loans, either for cash or in exchange for Farmer Mac I Guaranteed Securities, on one or more undetermined future dates. As consideration for its assumption of the credit risk on loans underlying an LTSPC, Farmer Mac receives a commitment fee payable monthly in arrears in an amount approximating what would have been the guarantee fee if the transaction were structured as a swap for Farmer Mac Guaranteed Securities.

As of June 30, 2007 and December 31, 2006, the maximum principal amount of potential undiscounted future payments that Farmer Mac could be requested to make under LTSPCs, not including offsets provided by any recourse provisions, recoveries from third parties or collateral for the underlying loans, was \$1.6 billion and \$2.0 billion, respectively.

As of June 30, 2007, the weighted-average remaining maturity of all loans underlying LTSPCs was 15.3 years. For those LTSPCs issued or modified on or after January 1, 2003, Farmer Mac has recorded a liability for its obligation to stand ready under the commitment in the guarantee and commitment obligation on the condensed consolidated balance sheet. This liability approximated \$21.2 million as of June 30, 2007 and \$21.8 million as of December 31, 2006.

Note 4.**Comprehensive Income**

Comprehensive income represents all changes in stockholders' equity except those resulting from investments by or distributions to stockholders, and is comprised primarily of net income and unrealized gains and losses on securities available-for-sale, net of related taxes. The following table sets forth Farmer Mac's comprehensive income for the three and six months ended June 30, 2007 and 2006:

	Three Months Ended		Six Months Ended	
	June 30, 2007	June 30, 2006	June 30, 2007	June 30, 2006
	<i>(in thousands)</i>			
Net income	\$ 18,929	\$ 13,937	\$ 23,411	\$ 29,589
Unrealized losses on available for sale securities, net of tax	(11,653)	(6,679)	(6,965)	(15,721)
Amortization of SFAS 133 transition adjustment on financial derivatives, net of tax	118	167	209	298
Change in accumulated other comprehensive loss, net of tax	(11,535)	(6,512)	(6,756)	(15,423)
Comprehensive income	\$ 7,394	\$ 7,425	\$ 16,655	\$ 14,166

The following table presents Farmer Mac's accumulated other comprehensive income/(loss) as of June 30, 2007 and December 31, 2006 and changes in the components of accumulated other comprehensive income/(loss) for the six months ended June 30, 2007 and the year ended December 31, 2006.

	June 30, 2007	December 31, 2006
	<i>(in thousands)</i>	
Available-for-sale securities:		
Beginning balance	\$ 5,802	\$ 16,637
Net unrealized gains/(losses), net of tax	(6,965)	(10,835)
Ending balance	\$ (1,163)	\$ 5,802
Financial derivatives:		
Beginning balance	\$ (846)	\$ (1,390)
Amortization of SFAS 133 transition adjustment on financial derivatives, net of tax	209	544
Ending balance	\$ (637)	\$ (846)
Accumulated other comprehensive income/(loss), net of tax	\$ (1,800)	\$ 4,956

Note 5.**Investments**

The following table presents the amortized cost and estimated fair values of Farmer Mac's investments as of June 30, 2007 and December 31, 2006.

	Amortized Cost	As of June 30, 2007		Fair Value
		Unrealized Gains	Unrealized Losses	
<i>(in thousands)</i>				
Available-for-sale:

The temporary unrealized losses presented above are principally due to changes in interest rates from the date of acquisition to June 30, 2007 and December 31, 2006, as applicable. All investment securities in an unrealized loss position were at least "A" rated and had not experienced any significant decline in credit rating during 2007 or 2006. The unrealized losses were on 30 and 21 individual investment securities as of June 30, 2007 and December 31, 2006, respectively.

As of June 30, 2007, 12 of the securities in loss positions had been in loss positions for more than 12 months and had a total unrealized loss of \$4.2 million. As of December 31, 2006, six of the securities in loss positions had been in loss positions for more than 12 months and had a total unrealized loss of \$4.4 million. The unrealized losses on those securities are due to overall increases in market interest rates and not due to any underlying credit deterioration of the issuers. As of June 30, 2007, all of the securities with unrealized losses aged greater than 12 months have losses that are less than 7 percent of the amortized security cost. All aged unrealized losses are recoverable within a reasonable period of time by way of changes in market interest rates or maturity. Accordingly, Farmer Mac has concluded that none of the unrealized losses on its investment securities represent other-than-temporary impairment as of June 30, 2007. Farmer Mac has the intent and ability to hold its investment securities in loss positions until either the market value recovers or the securities mature.

As of June 30, 2007, Farmer Mac did not own any held-to-maturity investments or trading investments. The amortized cost, fair value and yield of investments by remaining contractual maturity for available-for-sale investment securities as of June 30, 2007 are set forth below. Asset- and mortgage-backed securities are included based on their final maturities, although the actual maturities may differ due to prepayments of the underlying assets or mortgages.

	Investment Securities Available-for-Sale as of June 30, 2007

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Financial information is consolidated to include the accounts of Farmer Mac and its wholly-owned subsidiary, Farmer Mac Mortgage Securities Corporation.

This discussion and analysis of financial condition and results of operations should be read together with: (1) the interim unaudited condensed consolidated financial statements and the related notes that appear elsewhere in this report; and (2) Farmer Mac's Annual Report on Form 10-K for the fiscal year ended December 31, 2006.

The discussion below is not necessarily indicative of future results.

Special Note Regarding Forward-Looking Statements

Some statements made in this report are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 pertaining to management's current expectations as to Farmer Mac's future financial results, business prospects and business developments. Forward-looking statements include, without limitation, any statement that may predict, forecast, indicate or imply future results, performance or achievements, and typically are accompanied by, and identified with, such terms as "anticipates," "believes," "expects," "intends," "should" and similar phrases. The following management's discussion and analysis includes forward-looking statements addressing Farmer Mac's:

- prospects for earnings;
- prospects for growth in loan purchase, guarantee, securitization and LTSPC volume;
- trends in net interest income;
- trends in provisions for losses;
- trends in expenses;
- changes in capital position; and
- other business and financial matters.

Management's expectations for Farmer Mac's future necessarily involve a number of assumptions and estimates and the evaluation of risks and uncertainties. Various factors or events could cause Farmer Mac's actual results to differ materially from the expectations as expressed or implied by the forward-looking statements, including the factors discussed under "Risk Factors" in Part I, Item 1A of Farmer Mac's Annual Report on Form 10-K for the year ended December 31, 2006, as filed with the SEC on March 15, 2007, and uncertainties regarding:

- lender interest in Farmer Mac credit products and the Farmer Mac secondary market;
- increases in general and administrative expenses attributable to growth of the business and regulatory environment, including the hiring of additional personnel with expertise in key functional areas;
 - the rate and direction of development of the secondary market for agricultural mortgage loans;
 - the general rate of growth in agricultural mortgage indebtedness;
 - borrower preferences for fixed-rate agricultural mortgage indebtedness;
 - legislative or regulatory developments that could affect Farmer Mac;
 - the willingness of investors to invest in Farmer Mac Guaranteed Securities; and
- possible reaction in the financial markets to events involving GSEs other than Farmer Mac.

In light of these potential risks and uncertainties, no undue reliance should be placed on any forward-looking statements expressed in this report. Furthermore, Farmer Mac undertakes no obligation to release publicly the results of revisions to any forward-looking statements that may be made to reflect new information or any future events or circumstances, except as otherwise mandated by the SEC.

Critical Accounting Policy and Estimates

The critical accounting policy that is both important to the portrayal of Farmer Mac's financial condition and results of operations and requires complex, subjective judgments is the accounting policy for the allowance for losses. For a discussion of Farmer Mac's critical accounting policy, as well as Farmer Mac's use of estimates and assumptions that affect the amounts reported in the condensed consolidated financial statements and related notes for the periods presented, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Critical Accounting Policy and Estimates" in the Corporation's Annual Report on Form 10-K for the year ended December 31, 2006, as filed with the SEC on March 15, 2007.

Results of Operations

Overview. Net income available to common stockholders for second quarter 2007 was \$18.4 million or \$1.74 per diluted common share, compared to \$13.4 million or \$1.18 per diluted common share for second quarter 2006. Net income available to common stockholders for the six months ended June 30, 2007 was \$22.3 million or \$2.10 per diluted common share, compared to \$28.5 million or \$2.50 per diluted common share for the six months ended June 30, 2006. These fluctuations, both the increase in the quarterly net income comparison and the decrease in the six month net income comparison, were due principally to volatility resulting from gains and losses on financial derivatives used to manage interest rate risk. During second quarter 2007, Farmer Mac recorded gains on financial derivatives of \$19.8 million, compared to gains on financial derivatives of \$9.9 million for second quarter 2006. Although Farmer Mac's financial derivatives provide highly effective economic hedges of interest rate risk, accounting under SFAS 133 caused the gains on the financial derivatives to be reflected in net income for second quarter 2007 while the offsetting economic losses on the hedged items were not. Similarly, under SFAS 133 the gains on financial derivatives for second quarter 2006 were reflected in net income, while the offsetting economic losses on the hedged items were not. As a result of Farmer Mac's classification of its financial derivatives as undesignated hedges under SFAS 133, factors unrelated to the performance of the Corporation's business, such as changes in interest rates, may cause the Corporation's earnings under accounting principles generally accepted in the United States of America ("GAAP") to be more volatile than – and even counter-directional to – the underlying economics of its business operations. Notwithstanding that increased volatility, the Corporation intends to continue to use financial derivatives to manage interest rate risk and optimize its cost of funds.

Beyond the impact of SFAS 133 on net income, Farmer Mac's financial results in second quarter 2007 were driven by growth in guarantee and commitment fees while non-interest expenses remained relatively flat. In contrast, Farmer Mac's financial results in second quarter 2006 benefited from items that are not predictable sources of ongoing revenue, specifically representation and warranty claims income; gains on the sale of REO; and significant recoveries from the allowance for losses. The Board and management of Farmer Mac focus on the long-term growth of its business and its overall economic return to stockholders, rather than the short-term volatility of GAAP net income.

During second quarter 2007, Farmer Mac:

- added \$152.4 million of Farmer Mac I loans under LTSPCs;
- purchased \$39.9 million of newly originated and current seasoned Farmer Mac I loans;
 - guaranteed \$1.0 billion of AgVantage securities; and
- purchased \$59.1 million of Farmer Mac II USDA-guaranteed portions of loans.

This new business brought Farmer Mac's outstanding program volume as of June 30, 2007 to \$8.4 billion. During second quarter 2007, pre-existing LTSPCs with a principal balance of \$360.8 million were converted to Farmer Mac I Guaranteed Securities in swap transactions, with no effect on new business volume.

As part of Farmer Mac's continuing evaluation of the overall credit quality of its portfolio, the state of the U.S. agricultural economy, the continued upward trends in agricultural land values, and the level of Farmer Mac's outstanding guarantees and commitments, Farmer Mac determined that the appropriate allowance for losses as of June 30, 2007 was \$3.9 million, which was 8 basis points relative to the outstanding post-1996 Act Farmer Mac I portfolio (excluding AgVantage securities). This represents little change from the level of the allowance for losses as of March 31, 2007, which was also \$3.9 million and 8 basis points. These amounts compare to \$4.6 million and 10 basis points as of December 31, 2006 and \$6.3 million and 13 basis points as of June 30, 2006.

As of June 30, 2007, Farmer Mac's 90-day delinquencies (Farmer Mac I loans purchased or placed under Farmer Mac I Guaranteed Securities or LTSPCs after enactment of the 1996 Act that were 90 days or more past due, in foreclosure, restructured after delinquency, or in bankruptcy, excluding loans performing under either their original loan terms or a court-approved bankruptcy plan) were \$14.8 million, representing 0.30 percent of the principal balance of the outstanding post-1996 Act Farmer Mac I portfolio (excluding AgVantage securities), compared to \$21.0 million (0.46 percent) as of June 30, 2006.

Set forth below is a more detailed discussion of Farmer Mac's results of operations.

Net Interest Income. Net interest income was \$8.5 million for second quarter 2007, compared to \$10.1 million for second quarter 2006. Net interest income was \$17.6 million for the six months ended June 30, 2007, compared to \$20.7 million for the six months ended June 30, 2006. The net interest yield was -70 basis points for the six months ended June 30, 2007, compared to 95 basis points for the six months ended June 30, 2006.

Net interest income includes guarantee fees for loans purchased after April 1, 2001 (the effective date of Statement of Financial Accounting Standards No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities* ("SFAS 140")), but not for loans purchased prior to that date. The effect of SFAS 140 was the classification of approximately \$1.7 million (7 basis points) of guarantee fee income as interest income for the six months ended June 30, 2007, compared to \$1.7 million (8 basis points) for the six months ended June 30, 2006.

As discussed in Note 1(c) to the condensed consolidated financial statements, Farmer Mac accounts for its financial derivatives as undesignated financial derivatives. Accordingly, the Corporation classifies the net interest income and expense realized on financial derivatives as gains and losses on financial derivatives and trading assets. For the six months ended June 30, 2007 and 2006, this classification resulted in no effect on the net interest yield and an increase of the net interest yield of 12 basis points, respectively.

The net interest yields for the six months ended June 30, 2007 and 2006 included the benefits of yield maintenance payments of \$2.2 million (9 basis points) and \$2.3 million (11 basis points), respectively. Yield maintenance payments represent the present value of expected future interest income streams and accelerate the recognition of interest income from the related loans. Because the timing and size of these payments vary greatly, variations do not necessarily indicate positive or negative trends to gauge future financial results. For the six months ended June 30, 2007 and 2006, the after-tax effects of yield maintenance payments on net income and diluted earnings per share were \$1.4 million or \$0.14 per diluted share and \$1.5 million or \$0.13 per diluted share, respectively.

The following table provides information regarding interest-earning assets and funding for the six months ended June 30, 2007 and 2006. The balance of non-accruing loans is included in the average balance of interest-earning loans presented, though the related income is accounted for on the cash basis. Therefore, as the balance of non-accruing loans and the income received increases or decreases, the net interest yield will fluctuate accordingly. Net interest income and the yield will also fluctuate due to the uncertainty of the timing and size of yield maintenance payments. The average rate earned on cash and cash equivalents reflects higher short-term market rates during the first half of 2007 compared to the first half of 2006. The increase in the average rate for investments reflects higher short-term rates during the first half of 2007 compared to the first half of 2006 and the short-term or floating rate nature of most investments acquired or reset during 2007. The higher average rate on loans and Farmer Mac Guaranteed Securities during the first half 2007 reflects the increase in market rates reflected in the rates on loans acquired or reset during that period compared to the rates on loans that have matured. The higher average rate on Farmer Mac's notes payable due within one year is consistent with general trends in average short-term rates during the periods presented. The upward trend in the average rate on notes payable due after one year reflects the retirement of older debt and the issuance of new debt at higher market rates during 2006 and 2007.

	June 30, 2007		Six Months Ended		June 30, 2006	
	Average Balance	Income/Expense	Average Rate	Average Balance	Income/Expense	Average Rate
<i>(dollars in thousands)</i>						
Interest-earning assets:						
Cash and cash equivalents	\$ 1,011,706	\$ 26,706	5.28%	\$ 614,978	\$ 14,414	4.69%
Investments	2,002,840	53,816	5.37%	1,681,448	42,582	5.06%
Loans and Farmer Mac						
Guaranteed Securities	2,013,241	60,703	6.03%	2,056,083	60,220	5.86%
Total interest-earning assets	5,027,787	141,225	5.62%	4,352,509	117,216	5.39%
Funding:						
Notes payable due within one year	2,388,599	60,997	5.11%	2,471,175	56,392	4.56%
Notes payable due after one year	2,459,365	62,667	5.10%	1,669,947	40,079	4.80%
Total interest-bearing liabilities	4,847,964	123,664	5.10%	4,141,122	96,471	4.66%
Net non-interest-bearing funding	179,823			211,387		
Total funding	\$ 5,027,787	123,664	4.92%	\$ 4,352,509	96,471	4.43%
Net interest income/yield		\$ 17,561	0.70%		\$ 20,745	0.95%

The following table sets forth information regarding the changes in the components of Farmer Mac's net interest income for the periods indicated. For each category, information is provided on changes attributable to changes in volume (change in volume multiplied by old rate) and changes in rate (change in rate multiplied by old volume). Combined rate/volume variances, the third element of the calculation, are allocated based on their relative size. The increases in income due to changes in rate reflect the reset of variable-rate investments and adjustable-rate mortgages to higher rates and the acquisition of new higher-yielding investments, loans and Farmer Mac Guaranteed Securities, as described above. The increases in expense reflect the increased cost of funding due to the increase in capital markets interest rates.

	Six Months Ended June 30, 2007 Compared to Six Months Ended June 30, 2006		
	Rate	Volume	Total
<i>(in thousands)</i>			
Income from interest-earning assets:			
Cash and cash equivalents	\$ 2,011	\$ 10,282	\$ 12,293
Investments	2,718	8,515	11,233
Loans and Farmer Mac Guaranteed Securities	3,223	(2,740)	483
Total	7,952	16,057	24,009
Expense from interest-bearing liabilities			
Change in net interest income	\$ (1,769)	\$ (1,415)	\$ (3,184)

Guarantee and Commitment Fees. Guarantee and commitment fees, which compensate Farmer Mac for assuming the credit risk on loans underlying Farmer Mac Guaranteed Securities and LTSPCs, were \$6.4 million for second quarter 2007 and \$12.2 million for the six months ended June 30, 2007, compared to \$5.3 million and \$10.3 million, respectively, for the same periods in 2006. The effect of SFAS 140 classified guarantee fees of \$0.8 million for

second quarter 2007 and \$1.7 million for the six months ended June 30, 2007, compared to \$0.9 million and \$1.7 million, respectively, for the same periods in 2006 as interest income, although management considers the amounts to have been earned in consideration for the assumption of credit risk. That portion of the difference or “spread” between the cost of Farmer Mac’s debt funding for loans and the yield on post-1996 Act Farmer Mac I Guaranteed Securities held on its books compensates for credit risk. When a post-1996 Act Farmer Mac I Guaranteed Security is sold to a third party, Farmer Mac continues to receive the guarantee fee component of that spread, which continues to compensate Farmer Mac for its assumption of credit risk. The portion of the spread that compensates for interest rate risk would not typically continue to be received by Farmer Mac if the asset were sold, except to the extent attributable to any retained interest-only strip.

-30-

Expenses. General and administrative expenses were \$2.2 million for second quarter 2007 and \$4.6 million for the six months ended June 30, 2007, compared to \$2.6 million and \$5.3 million, respectively, for the same periods in 2006. The reductions in general and administrative expenses are due to lower amounts spent on professional fees related to new products and regulatory compliance matters during 2007 compared to 2006. Compensation and employee benefits were \$3.7 million for second quarter 2007 and \$6.9 million for the six months ended June 30, 2007, compared to \$2.7 million and \$5.6 million, respectively, for the same periods in 2006. Farmer Mac recognized compensation expense related to stock options of \$0.8 million and \$1.5 million for second quarter 2007 and the six months ended June 30, 2007, respectively, compared to \$0.4 million and \$1.0 million, respectively, for the same periods in 2006. For more information on stock option expense, see Note 1(e) to the condensed consolidated financial statements.

Regulatory fee expense for second quarter 2007 and the six months ended June 30, 2007 were \$0.6 million and \$1.1 million, respectively, compared to \$0.6 million and \$1.2 million, respectively, for the same periods in 2006. The Farm Credit Administration (“FCA”) has advised the Corporation that its estimated fees for the federal fiscal year ended September 30, 2007 will be \$2.2 million, compared to \$2.4 million for the federal fiscal year ended September 30, 2006. After the end of a federal government fiscal year, FCA may revise its prior year estimated assessments to reflect actual costs incurred, and has issued both additional assessments and refunds in the past. Farmer Mac expects all of the above-mentioned expenses and regulatory fees to continue at approximately the same levels through the end of 2007.

During second quarter 2007, Farmer Mac provided \$0.1 million for its allowance for losses, compared to a recovery of \$2,000 in second quarter 2006. During the six months ended June 30, 2007, Farmer Mac released \$0.5 million from the allowance for losses, compared to a release of \$1.7 million for the six months ended June 30, 2006. See “—Quantitative and Qualitative Disclosures About Market Risk Management—Credit Risk” for additional information regarding Farmer Mac’s provision for losses, provision for loan losses and Farmer Mac’s methodology for determining its allowance for losses. As of June 30, 2007, Farmer Mac’s total allowance for losses was \$3.9 million, which was 8 basis points relative to the outstanding post-1996 Act Farmer Mac I portfolio (excluding AgVantage securities), compared to \$4.6 million and 10 basis points as of December 31, 2006.

Gains and Losses on Financial Derivatives and Trading Assets. SFAS 133 requires the change in the fair values of financial derivatives to be reflected in a company's net income or accumulated other comprehensive income. As discussed in Note 1(c) to the condensed consolidated financial statements, the Corporation accounts for its financial derivatives as undesignated financial derivatives. The pre-tax net effect of gains and losses on financial derivatives and trading assets recorded in Farmer Mac's consolidated statements of operations was a net gain of \$19.8 million for second quarter 2007 and a net gain of \$15.8 million for the six months ended June 30, 2007 due to market value changes caused by increases in interest rates, compared to net gains of \$9.9 million and \$21.6 million, respectively, for the same periods in 2006 also due to market value changes caused by increases in interest rates.

Farmer Mac records financial derivatives at fair value on its balance sheet with the related changes in fair value recognized in the condensed consolidated statement of operations. Although the Corporation's use of financial derivatives achieves its economic and risk management objectives, its classification of financial derivatives as undesignated hedges under SFAS 133 allows factors unrelated to the economic performance of the Corporation's business, such as changes in interest rates, to increase the volatility – or even change the direction – of the Corporation's earnings under GAAP.

Farmer Mac enters into financial derivative transactions principally to protect against risk from the effects of market price or interest rate movements on the value of certain assets, future cash flows or debt issuance, not for trading or speculative purposes. Farmer Mac enters into interest rate swap contracts principally to adjust the characteristics of its short-term debt to match more closely the cash flow and duration characteristics of its longer-term mortgage and other assets, and also to adjust the characteristics of its long-term debt to match more closely the cash flow and duration characteristics of its short-term assets, thereby reducing interest rate risk and also to derive an overall lower effective cost of borrowing than would otherwise be available to Farmer Mac in the conventional debt market. Specifically, interest rate swaps convert economically the variable cash flows related to the forecasted issuance of short-term debt to effectively fixed-rate medium-term and long-term notes that match the anticipated duration, repricing and interest rate characteristics of the corresponding assets. Since this strategy provides Farmer Mac with approximately the same cash flows as those that are inherent in the issuance of medium-term notes, Farmer Mac uses either the bond market or the swap market based upon their relative pricing efficiencies.

Farmer Mac uses callable interest rate swaps (in conjunction with the issuance of short-term debt) as an alternative to callable medium-term notes with equivalently structured maturities and call options. The call options on the swaps are designed to match the implicit prepayment options on those mortgage assets without prepayment protection. The blended durations of the swaps are also designed to match the duration of the related mortgages over their estimated lives. If the mortgages prepay, the swaps can be called and the short-term debt repaid; if the mortgages do not prepay, the swaps remain outstanding and the short-term debt is rolled over, effectively providing fixed-rate callable funding over the lives of the related mortgages. Thus, the economics of the assets are closely matched to the economics of the interest rate swap and funding combination.

Business Volume. New business volume for second quarter 2007 was \$1.3 billion, compared to \$471.5 million in first quarter 2007 and \$657.9 million in second quarter 2006. Much of Farmer Mac's recent business volume has been a product of the Corporation's ongoing efforts to diversify its marketing focus to include large program transactions that emphasize high asset quality, with greater protection against adverse credit performance and commensurately lower compensation for the assumption of credit risk and administrative costs, resulting in projected risk-adjusted marginal returns on equity approximately equal to those of other Farmer Mac program transactions. During second quarter 2007, those efforts resulted in \$152.4 million of LTSPCs and the guarantee of a \$1.0 billion ten-year AgVantage security.

While Farmer Mac achieved a significant increase in new business volume during 2006 and continuing into 2007, its future business with agricultural mortgage lenders may still be constrained by:

- high levels of available capital and liquidity of agricultural lenders;
- changes in the capital, liquidity or funding needs of major business partners;
- alternative sources of funding and credit enhancement for agricultural lenders; and
- increased competition in the secondary market for agricultural mortgage loans.

Looking ahead, Farmer Mac remains confident of opportunities for increased business volume and income growth as a result of the Corporation's product development and marketing efforts. Farmer Mac's marketing initiatives continue to generate business opportunities for 2007 and, it believes, beyond. Current initiatives include:

- expanded use of AgVantage transactions, targeting highly-rated financial institutions with large agricultural mortgage portfolios;
- agribusiness and rural development loans associated with agriculture, in fulfillment of Farmer Mac's Congressional mission;
 - new structures for LTSPC transactions, including risk sharing provisions; and
- an ongoing alliance with the American Bankers Association ("ABA"), under which Farmer Mac facilitates access and offers improved pricing to ABA member institutions and the ABA promotes member participation in the Farmer Mac I program.

Some of the agribusiness and rural development initiatives will require Farmer Mac to consider credit risks that expand upon or differ from those the Corporation has accepted previously. Farmer Mac will use underwriting standards appropriate to those credit risks, and likely will draw upon outside expertise to analyze and evaluate the credit and funding aspects of loans submitted pursuant to those initiatives. While Farmer Mac is seeking to expand its mix of loan types within the scope of its Congressional charter, it is too early to assess the probability of success of these efforts. Farmer Mac believes that prospects for large portfolio transactions, similar to those that have accounted for a significant portion of Farmer Mac's previous growth, continue to exist. No assurance can be given at this time as to the certainty or timing of similar transactions in the future.

On July 27, 2007, the House of Representatives passed its version of a 2007 Farm Bill (H.R. 2419) that would expand Farmer Mac's charter to authorize the Corporation to purchase and guarantee securities backed by rural utilities (electric and telephone) loans made by cooperative lenders, particularly the National Rural Utilities Cooperative Finance Corporation and institutions of the Farm Credit System. At this time, no assurance can be given that this legislation will be enacted into law nor, if enacted, that it will result in significant additional business for Farmer Mac.

For a more detailed discussion of the above factors and the related effects on Farmer Mac's business volume, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Outlook for 2007" in the Corporation's Annual Report on Form 10-K for the year ended December 31, 2006, as filed with the SEC on March 15, 2007.

The following tables set forth the amount of all Farmer Mac I and Farmer Mac II loan purchase and guarantee activities for newly originated and current seasoned loans during the periods indicated:

	Three Months Ended		Six Months Ended

Loan purchase and guarantee and commitment activity:				
Farmer Mac I:				
Loans	\$ 39,856	\$ 26,114	\$ 61,500	\$ 56,374
LTSPCs	152,402	570,595	548,724	643,750
AgVantage	1,000,000	-	1,000,000	500,000
Farmer Mac II Guaranteed Securities	59,149	61,204	112,697	106,331
Total purchases, guarantees and commitments	\$ 1,251,407	\$ 657,913	\$ 1,722,921	\$ 1,306,455
Farmer Mac I Guaranteed Securities issuances:				
Sold	\$ 1,124	\$ 1,548	\$ 1,324	\$ 3,033
Retained	-	-	-	-
Loans previously under LTSPCs exchanged for Farmer Mac Guaranteed Securities	360,777	550,114	664,543	550,114
Total	\$ 361,901	\$ 551,662	\$ 665,867	\$ 553,147

As part of fulfilling its guarantee obligations for Farmer Mac I Guaranteed Securities and commitments to purchase eligible loans underlying LTSPCs, Farmer Mac purchases defaulted loans, all of which are at least 90 days delinquent at the time of purchase, out of the loan pools underlying those securities and LTSPCs, and records the purchased loans as such on its balance sheet. The purchase price for defaulted loans purchased out of Farmer Mac I Guaranteed Securities is the current outstanding principal balance of the loan plus accrued and unpaid interest. The purchase price for defaulted loans purchased under an LTSPC is the then-current outstanding principal balance of the loan, with accrued and unpaid interest on the defaulted loans payable out of any future loan payments or liquidation proceeds as received. The purchase price of a defaulted loan is not an indicator of the expected loss on that loan; many other factors affect expected loss, if any, on loans so purchased. See "—Risk Management—Credit Risk - Loans" in the Corporation's Annual Report on Form 10-K for the year ended December 31, 2006, as filed with the SEC on March 15, 2007.

The following table presents Farmer Mac's loan purchases of newly originated and current seasoned loans and defaulted loans purchased underlying Farmer Mac I Guaranteed Securities and LTSPCs:

	Three Months Ended		Six Months Ended	
	June 30, 2007	June 30, 2006	June 30, 2007	June 30, 2006
	<i>(in thousands)</i>			
Farmer Mac I newly originated and current seasoned loan purchases	\$ 39,856	\$ 26,114	\$ 61,500	\$ 56,374
Defaulted loans purchased underlying off-balance sheet Farmer Mac I Guaranteed Securities	247	-	247	506
Defaulted loans underlying on-balance sheet Farmer Mac I Guaranteed Securities transferred to loans	131	214	964	813
Defaulted loans purchased underlying LTSPCs	272	297	272	3,246
Total loan purchases	\$ 40,506	\$ 26,625	\$ 62,983	\$ 60,939

The weighted-average age of the Farmer Mac I newly originated and current seasoned loans purchased during second quarter 2007 was less than one month and during second quarter 2006, the weighted-average age was two months. Of the Farmer Mac I newly originated and current seasoned loans purchased during second quarter 2007 and second quarter 2006, 61 percent and 76 percent, respectively, had principal amortization periods longer than the maturity date, resulting in balloon payments at maturity, with a weighted-average remaining term to maturity of 15.1 years and 16.9 years, respectively. The weighted-average age of delinquent loans purchased out of securitized pools and LTSPCs during second quarter 2007 and second quarter 2006 was 8.0 years and 9.8 years, respectively.

USDA's most recent publications (as available on USDA's website as of August 1, 2007) forecast:

- 2007 net cash farm income to be \$67.2 billion, an increase of \$0.5 billion dollars from 2006 and an increase of \$2.6 billion over the 10-year average.
- 2007 net farm income to be \$66.6 billion, which is 16 percent above its 10-year average and an increase of \$6.0 billion over 2006.
- Total direct U.S. government payments to be \$12.4 billion in 2007, down from \$16.3 billion for 2006, and 24.7 percent below the 5-year average. Direct payment rates are fixed in legislation and are not affected by the level of program crop prices.
 - Countercyclical payments are forecast to decrease to \$1.6 billion in 2007 from \$4.1 billion in 2006.

- Marketing loan benefits—which include loan deficiency payments, marketing loan gains, and certificate exchange gains—are projected to be down to \$0.8 billion in 2007 from \$2.0 billion in 2006.
- The value of U.S. farm real estate is forecast to increase 4.7 percent in 2007 to \$1.7 trillion from the current projection of \$1.6 trillion for 2006, and the general economy to continue improvement, supporting further growth in farmland values.
- The amount of farm real estate debt to increase by 3.7 percent in 2007 to \$124.5 billion, compared to the current projection of \$119.9 billion in 2006.

The USDA forecasts referenced above relate to U.S. agriculture generally, but should be favorable for Farmer Mac's financial condition relative to its exposure to outstanding guarantees and commitments, as they indicate above-average borrower cash flows and generally increased values in U.S. farm real estate.

Balance Sheet Review

As of June 30, 2007, Farmer Mac had \$572.3 million of cash and cash equivalents and \$2.5 billion of investment securities, compared to \$877.7 million of cash and cash equivalents and \$1.8 billion of investment securities as of December 31, 2006. The increase in investment securities during the first half of 2007 was due primarily to Farmer Mac's February 15, 2007 mission-related investment purchase of \$365.6 million of asset-backed securities representing beneficial ownership interests in electric distribution cooperative loans made by the National Rural Utilities Cooperative Finance Corporation ("CFC"). The transaction improves CFC's pricing to its rural electric cooperative members and advances Farmer Mac's role in financing rural America.

During the six months ended June 30, 2007, on-balance sheet program assets (Farmer Mac Guaranteed Securities and loans) decreased by \$40.9 million due to the net result of principal paydowns on program assets offset by new loan purchases.

Consistent with the net increase in total assets of \$323.4 million during the six months ended June 30, 2007, total liabilities increased \$315.3 million from December 31, 2006 to June 30, 2007. This increase in liabilities was primarily due to the \$278.5 million increase in notes payable, the proceeds of which were used to fund the purchase of assets. For further information regarding off-balance sheet program activities, see "—Off-Balance Sheet Program Activities" below.

During the six months ended June 30, 2007, accumulated other comprehensive income/(loss) decreased \$6.8 million, which was primarily the result of \$1.2 million after-tax unrealized losses on securities available-for-sale as of June 30, 2007, compared to \$5.8 million after-tax unrealized gains on securities available-for-sale as of December 31, 2006. Accumulated other comprehensive income/(loss) is not a component of Farmer Mac's core capital or regulatory capital.

Farmer Mac is required to hold capital at the higher of the statutory minimum capital requirement or the amount required by the risk-based capital stress test. As of June 30, 2007, Farmer Mac's core capital totaled \$258.4 million, compared to \$243.5 million as of December 31, 2006. As of June 30, 2007, core capital exceeded Farmer Mac's statutory minimum capital requirement of \$192.2 million by \$66.2 million.

Farmer Mac was in compliance with its risk-based capital standards as of June 30, 2007. As of June 30, 2007, the risk-based capital stress test generated a regulatory capital requirement of \$83.8 million, an increase from the \$42.9 million requirement as of December 31, 2006. As of June 30, 2007, Farmer Mac's regulatory capital of \$262.3 million exceeded the risk-based capital requirement by approximately \$178.5 million. The increase in the risk-based capital requirement from December 31, 2006 to June 30, 2007 was primarily attributable to changes in the risk-based capital stress test by which the regulatory capital requirement is calculated. The stress test changes were adopted in a final rule published by FCA in the Federal Register on December 26, 2006. That rule became effective as of March 31, 2007. Had the existing risk-based capital stress test been in effect on December 31, 2006, the regulatory capital requirement would have been \$89.6 million at that time.

At its meeting on August 9, 2007, the Board of FCA adopted proposed amendments to the risk-based capital regulation applicable to Farmer Mac that will be published in the Federal Register for public comment. Farmer Mac has not seen the proposed regulation and does not know what effect, if any, it would have in the future if adopted in its current form. Based upon preliminary information from FCA, Farmer Mac understands that, if the proposed rule had been in effect as a final rule on March 31, 2007, Farmer Mac's regulatory capital requirement as of that date would have been somewhat greater than the regulatory capital requirement under the existing rule, but less than the statutory minimum capital requirement. As noted above, Farmer Mac is required to hold capital at the higher of the statutory minimum capital requirement or the amount required by the risk-based capital stress test.

Off-Balance Sheet Program Activities

Farmer Mac offers approved agricultural and rural residential mortgage lenders two credit enhancement alternatives to increase their liquidity or lending capacity while retaining the cash flow benefits of their loans: (1) Farmer Mac Guaranteed Securities, which are available through either the Farmer Mac I program or the Farmer Mac II program, and (2) LTSPCs, which are available only through the Farmer Mac I program. Both of these alternatives result in the creation of off-balance sheet obligations for Farmer Mac in the ordinary course of its business. See Note 3 to the interim unaudited condensed consolidated financial statements for further information regarding Farmer Mac's off-balance sheet program activities.

Quantitative and Qualitative Disclosures About Market Risk Management

Interest Rate Risk. Farmer Mac is subject to interest rate risk on all assets held for investment because of possible timing differences in the cash flows of the assets and related liabilities. This risk is primarily related to loans held and on-balance sheet Farmer Mac Guaranteed Securities due to the ability of borrowers to prepay their mortgages before the scheduled maturities, thereby increasing the risk of asset and liability cash flow mismatches. Cash flow mismatches in a changing interest rate environment can reduce the earnings of the Corporation if assets repay sooner than expected and the resulting cash flows must be reinvested in lower-yielding investments when Farmer Mac's funding costs cannot be correspondingly reduced, or if assets repay more slowly than expected and the associated debt must be replaced by higher-cost debt.

Yield maintenance provisions and other prepayment penalties contained in many agricultural mortgage loans reduce, but do not eliminate, prepayment risk, particularly in the case of a defaulted loan where yield maintenance may not be collected. Those provisions require borrowers to make an additional payment when they prepay their loans so that, when reinvested with the prepaid principal, yield maintenance payments generate substantially the same cash flows that would have been generated had the loan not prepaid. Those provisions create a disincentive to prepayment and compensate the Corporation for some of its interest rate risks. As of June 30, 2007, 51 percent of the outstanding balance of all loans held and loans underlying on-balance sheet Farmer Mac I Guaranteed Securities (including 79 percent of all loans with fixed interest rates) were covered by yield maintenance provisions and other prepayment penalties. Of the Farmer Mac I fixed rate loans purchased in second quarter 2007, 15 percent had yield maintenance or another form of prepayment protection. As of June 30, 2007, none of the USDA-guaranteed portions underlying Farmer Mac II Guaranteed Securities had yield maintenance provisions; however, 26.4 percent contained prepayment penalties. Of the USDA-guaranteed portions purchased in second quarter 2007, 2.9 percent contained various forms of prepayment penalties.

Taking into consideration the prepayment provisions and the default probabilities associated with its mortgage assets, Farmer Mac uses prepayment models to project and value cash flows associated with these assets. Because borrowers' behavior in various interest rate environments may change over time, Farmer Mac periodically evaluates the effectiveness of these models compared to actual prepayment experience and adjusts and refines the models as necessary to improve the precision of subsequent prepayment forecasts.

Cash equivalents and investment securities pose only limited interest rate risk to Farmer Mac, due to their closely matched funding. Farmer Mac's cash equivalents mature within three months and are match-funded with discount notes having similar maturities. As of June 30, 2007, \$1.1 billion of the \$2.5 billion of investment securities (46 percent) were floating rate securities with rates that adjust within one year or fixed rate securities with original maturities between three months and one year.

The goal of interest rate risk management at Farmer Mac is to create and maintain a portfolio that generates stable earnings and value across a variety of interest rate environments. Farmer Mac's primary strategy for managing interest rate risk is to fund asset purchases with liabilities that have similar durations so that they will perform similarly as interest rates change. To achieve this match, Farmer Mac issues discount notes and both callable and non-callable medium-term notes across a spectrum of maturities. Farmer Mac issues callable debt to offset the prepayment risk associated with some mortgage assets. By using a blend of liabilities that includes callable debt, the interest rate sensitivities of the liabilities tend to increase or decrease as interest rates change in a manner similar to changes in the interest rate sensitivities of the assets. Farmer Mac also uses financial derivatives to alter the duration of its assets and liabilities to better match their durations, thereby reducing overall interest rate sensitivity.

An important “stress test” of Farmer Mac’s exposure to long-term interest rate risk is the measurement of the sensitivity of its market value of equity (“MVE”) to yield curve shocks. MVE represents the present value of all future cash flows from on- and off-balance sheet assets, liabilities and financial derivatives, discounted at current interest rates and spreads. The following schedule summarizes the results of Farmer Mac’s MVE sensitivity analysis as of June 30, 2007 and December 31, 2006 to an immediate and instantaneous parallel shift in the yield curve. During second quarter 2007, Farmer Mac maintained a low level of interest rate sensitivity through ongoing asset and liability management activities.

Interest Rate Scenario	Percentage Change in MVE from Base Case	
	June 30, 2007	December 31, 2006
+ 300 bp	-9.3%	-7.9%
+ 200 bp	-5.9%	-4.7%
+ 100 bp	-2.7%	-1.9%
- 100 bp	0.9%	0.0%
- 200 bp	0.3%	-1.1%
- 300 bp	-0.7%	-2.1%

As of June 30, 2007, a uniform or “parallel” increase of 100 basis points would have increased Farmer Mac’s net interest income (“NII”), a shorter-term measure of interest rate risk, by 2.7 percent, while a parallel decrease of 100 basis points would have decreased NII by 4.3 percent. Farmer Mac also measures the sensitivity of both MVE and NII to a variety of non-parallel interest rate shocks, including flattening and steepening yield curve scenarios. As of June 30, 2007, both MVE and NII showed similar or lesser sensitivity to non-parallel shocks than to the parallel shocks. As of June 30, 2007, Farmer Mac’s effective duration gap, another standard measure of interest rate risk that measures the difference between the sensitivities of assets compared to that of liabilities, was plus 1.2 months, compared to plus 0.7 months as of December 31, 2006. Duration matching helps to maintain the correlation of cash flows and stable portfolio earnings even when interest rates are not stable. Farmer Mac believes the relative insensitivity of its MVE and NII to both parallel and non-parallel interest rate shocks, and its duration gap, indicate that Farmer Mac’s approach to managing its interest rate risk exposures is effective.

As of June 30, 2007, Farmer Mac had \$2.5 billion combined notional amount of interest rate swaps with terms ranging from 1 to 15 years. Of those interest rate swaps, \$1.2 billion were floating-to-fixed rate interest rate swaps, \$1.1 billion were fixed-to-floating interest rate swaps and \$0.2 billion were basis swaps.

Farmer Mac enters into financial derivative transactions principally to protect against risk from the effects of market price or interest rate movements on the value of certain assets, future cash flows or debt issuance, not for trading or speculative purposes. As discussed in Note 1(c) to the condensed consolidated financial statements, Farmer Mac accounts for its financial derivatives as undesignated financial derivatives. All of Farmer Mac’s financial derivative transactions are conducted under standard collateralized agreements that limit Farmer Mac’s potential credit exposure to any counterparty. As of June 30, 2007, Farmer Mac had uncollateralized net exposure of \$11.0 million to two counterparties.

Credit Risk. Farmer Mac’s primary exposure to credit risk is the risk of loss resulting from the inability of borrowers to repay their mortgages in conjunction with a deficiency in the value of the collateral relative to the amount outstanding on the mortgage and the costs of liquidation. Farmer Mac has established underwriting, appraisal and documentation standards (including interest rate shock tests for adjustable rate mortgages with initial reset periods of five years or less) for agricultural mortgage loans to mitigate the risk of loss from borrower defaults and to provide guidance concerning the management, administration and conduct of underwriting and appraisals to all participating sellers and potential sellers in its programs.

Farmer Mac’s allowance for losses is presented in three components on its condensed consolidated balance sheet:

- an “Allowance for loan losses” on loans held for investment;
- a valuation allowance on real estate owned, which is included in the balance sheet under “Real estate owned”; and
- an allowance for losses on loans underlying post-1996 Act Farmer Mac I Guaranteed Securities and LTSPCs, which is included in the balance sheet under “Reserve for losses.”

Farmer Mac’s provision for losses is presented in two components on its consolidated statement of operations:

- a “Provision for loan losses,” which represents losses on Farmer Mac’s loans held for investment; and
- a “Provision for losses,” which represents losses on loans underlying post-1996 Act Farmer Mac I Guaranteed Securities and LTSPCs and real estate owned.

Farmer Mac’s methodology for determining its allowance for losses incorporates the Corporation’s proprietary automated loan classification system. That system scores loans based on criteria such as historical repayment performance, loan seasoning, loan size and loan-to-value ratio. For the purposes of the loss allowance methodology, the loans in Farmer Mac’s portfolio of loans and loans underlying post-1996 Act Farmer Mac I Guaranteed Securities and LTSPCs have been scored and classified for each calendar quarter since first quarter 2000. The allowance methodology captures the migration of loan scores across concurrent and overlapping 3-year time horizons and calculates loss rates separately within each loan classification for (1) loans underlying LTSPCs and (2) loans held and loans underlying post-1996 Act Farmer Mac I Guaranteed Securities. The calculated loss rates are applied to the current classification distribution of Farmer Mac’s portfolio to estimate inherent losses, on the assumption that the historical credit losses and trends used to calculate loss rates will continue in the future. Management evaluates this assumption by taking into consideration factors including:

- economic conditions;
- geographic and agricultural commodity/product concentrations in the portfolio;
- the credit profile of the portfolio;
- delinquency trends of the portfolio;
- historical charge-off and recovery activities of the portfolio; and
- other factors to capture current portfolio trends and characteristics that differ from historical experience.

Management believes that its use of this methodology produces a reliable estimate of probable losses, as of the balance sheet date, for all loans held, real estate owned and loans underlying post-1996 Act Farmer Mac I Guaranteed Securities and LTSPCs in accordance with SFAS 5 and SFAS 114.

No allowance for losses has been made for loans underlying Farmer Mac I Guaranteed Securities issued prior to the 1996 Act, AgVantage securities or Farmer Mac II Guaranteed Securities. Farmer Mac I Guaranteed Securities issued prior to the 1996 Act are supported by unguaranteed first loss subordinated interests, which are expected to exceed the estimated credit losses on those loans. Each AgVantage security is a general obligation of an issuing institution approved by Farmer Mac and is collateralized by eligible mortgage loans. As of June 30, 2007, there were no probable losses inherent in Farmer Mac's AgVantage securities due to the high credit quality of the obligors, as well as the underlying collateral. The guaranteed portions collateralizing Farmer Mac II Guaranteed Securities are guaranteed by the USDA. Each USDA guarantee is an obligation backed by the full faith and credit of the United States. As of June 30, 2007, Farmer Mac had not experienced any credit losses on any Farmer Mac I Guaranteed Securities issued prior to the 1996 Act, any AgVantage securities or any Farmer Mac II Guaranteed Securities and does not expect to incur any such losses in the future.

-41-

Edgar Filing: FEDERAL AGRICULTURAL MORTGAGE CORP - Form 10-Q

The following table summarizes the changes in the components of Farmer Mac's allowance for losses for the three months and six months ended June 30, 2007 and 2006:

	June 30, 2007			
	Allowance for Loan Losses	REO Valuation Allowance	Reserve for Losses	Total Allowance for Losses
	<i>(in thousands)</i>			
Three Months Ended:				
Beginning balance	\$ 1,730	\$ -	\$ 2,197	\$ 3,927
Provision/(recovery) for losses	-	100	-	100
Charge-offs	(49)	(100)	-	(149)
Recoveries	-	-	-	-
Ending balance	\$ 1,681	\$ -	\$ 2,197	\$ 3,878
Six Months Ended:				
Beginning balance	\$ 1,945	\$ -	\$ 2,610	\$ 4,555
Provision/(recovery) for losses	(215)	100	(413)	(528)
Charge-offs	(49)	(100)	-	(149)
Recoveries	-	-	-	-
Ending balance	\$ 1,681	\$ -	\$ 2,197	\$ 3,878
	June 30, 2006			
	Allowance for Loan Losses	REO Valuation Allowance	Reserve for Losses	Total Allowance for Losses
	<i>(in thousands)</i>			
Three Months Ended:				
Beginning balance	\$ 3,883	\$ -	\$ 2,931	\$ 6,814
Provision/(recovery) for losses	(594)	5	587	(2)
Charge-offs	(900)	(5)	-	(905)
Recoveries	345	-	-	345
Ending balance	\$ 2,734	\$ -	\$ 3,518	\$ 6,252
Six Months Ended:				
Beginning balance	\$ 4,876	\$ -	\$ 3,777	\$ 8,653
Provision/(recovery) for losses	(1,606)	155	(259)	(1,710)
Charge-offs	(900)	(155)	-	(1,055)
Recoveries	364	-	-	364
Ending balance	\$ 2,734	\$ -	\$ 3,518	\$ 6,252

During second quarter 2007, Farmer Mac provided \$0.1 million for its allowance for losses, compared to the release of \$2,000 in second quarter 2006. During second quarter 2007, Farmer Mac charged off \$0.1 million in losses against the allowance for losses. During second quarter 2006, Farmer Mac charged off \$0.9 million in losses against the allowance for losses and had \$0.3 million in recoveries for net recoveries of \$0.6 million. There was no previously accrued or advanced interest on loans or Farmer Mac I Guaranteed Securities that was charged off in second quarter 2007 or second quarter 2006. As of June 30, 2007, Farmer Mac's allowance for losses totaled \$3.9 million, or 8 basis points of the outstanding principal balance of loans held and loans underlying post-1996 Act Farmer Mac I Guaranteed Securities (excluding AgVantage securities) and LTSPCs, compared to \$4.6 million (10 basis points) as of December 31, 2006.

As of June 30, 2007, Farmer Mac's 90-day delinquencies totaled \$14.8 million and represented 0.30 percent of the principal balance of all loans held and loans underlying post-1996 Act Farmer Mac I Guaranteed Securities (excluding AgVantage securities) and LTSPCs, compared to \$21.0 million (0.46 percent) as of June 30, 2006. As of June 30, 2007, Farmer Mac's non-performing assets (which includes 90-day delinquencies, loans performing under either their original loan terms or a court-approved bankruptcy plan, and real estate owned) totaled \$37.2 million and represented 0.76 percent of the principal balance of all loans held and loans underlying post-1996 Act Farmer Mac I Guaranteed Securities (excluding AgVantage securities) and LTSPCs, compared to \$40.0 million (0.87 percent) as of June 30, 2006. Loans that have been restructured after delinquency were insignificant and are included within the reported 90-day delinquency and non-performing asset disclosures. From quarter to quarter, Farmer Mac anticipates that 90-day delinquencies and non-performing assets will fluctuate, both in dollars and as a percentage of the outstanding portfolio, with higher levels likely at the end of the first and third quarters of each year corresponding to the semi-annual (January 1st and July 1st) payment characteristics of most Farmer Mac I loans.

The following table presents historical information regarding Farmer Mac's non-performing assets and 90-day delinquencies:

	Outstanding Post-1996 Act Loans, Guarantees (1), LTSPCs, and REO	Non- performing Assets	Percentage <i>(dollars in thousands)</i>	Less: REO and Performing Bankruptcies	90-Day Delinquencies	Percentage
As of:						
June 30, 2007	\$ 4,904,592	\$ 37,225	0.76%	\$ 22,462	\$ 14,763	0.30%
March 31, 2007	4,905,244	50,026	1.02%	21,685	28,341	0.58%
December 31, 2006	4,784,983	39,232	0.82%	19,577	19,655	0.41%
September 30, 2006	4,621,083	44,862	0.97%	16,425	28,437	0.62%
June 30, 2006	4,633,841	40,083	0.87%	19,075	21,008	0.46%
March 31, 2006	4,224,669	49,475	1.17%	20,713	28,762	0.68%
December 31, 2005	4,399,189	48,764	1.11%	23,303	25,461	0.58%
September 30, 2005	4,273,268	64,186	1.50%	23,602	40,584	0.95%
June 30, 2005	4,360,670	60,696	1.39%	23,925	36,771	0.85%

(1) Excludes loans underlying AgVantage securities.

As of June 30, 2007, approximately \$1.4 billion (28.9 percent) of Farmer Mac's outstanding loans held and loans underlying post-1996 Act Farmer Mac I Guaranteed Securities (excluding AgVantage securities) and LTSPCs were in their peak delinquency and default years (approximately years three through five after origination), compared to \$1.3 billion (29.1 percent) as of June 30, 2006.

As of June 30, 2007, Farmer Mac individually analyzed \$14.7 million of its \$45.7 million of impaired assets for collateral shortfalls against updated appraised values, other updated collateral valuations or discounted values. All of the \$14.7 million of assets analyzed individually were adequately collateralized. Farmer Mac evaluated the remaining \$31.0 million of impaired assets for which updated valuations were not available in the aggregate in consideration of their similar risk characteristics and historical statistics. Farmer Mac did not record any specific allowances for any of its impaired assets as of June 30, 2007. Farmer Mac's non-specific or general allowances were \$3.9 million as of June 30, 2007.

As of June 30, 2007, the weighted-average original loan-to-value (“LTV”) ratio for all loans held and loans underlying post-1996 Act Farmer Mac I Guaranteed Securities (excluding AgVantage securities) and LTSPCs was 53.4 percent, and the weighted-average original LTV ratio for all post-1996 Act non-performing assets was 55.9 percent. The following table summarizes the post-1996 Act non-performing assets by original LTV ratio:

**Distribution of Post-1996 Act Non-performing
Assets by Original LTV Ratio**

as of June 30, 2007

(dollars in thousands)

Post-1996 Act
Non-performing

Original LTV Ratio	Assets	Percentage
0.00% to 40.00%	\$ 2,874	8%
40.01% to 50.00%	7,968	21%
50.01% to 60.00%	18,075	49%
60.01% to 70.00%	7,562	20%
70.01% to 80.00%	526	1%
80.01% +	220	1%
Total	\$ 37,225	100%

The following table presents outstanding loans held and loans underlying post-1996 Act Farmer Mac I Guaranteed Securities (excluding AgVantage securities) and LTSPCs, post-1996 Act non-performing assets as of June 30, 2007 by year of origination, geographic region and commodity/collateral type:

Farmer Mac I Post-1996 Act Non-performing Assets

Liquidity and Capital Resources

Farmer Mac has sufficient liquidity and capital resources to support its operations for the next twelve months and has a contingency funding plan to handle unanticipated disruptions in its access to the capital markets.

Debt Issuance. Section 8.6(e) of Farmer Mac's statutory charter (12 U.S.C. § 2279aa-6(e)) authorizes Farmer Mac to issue debt obligations to purchase eligible mortgage loans and Farmer Mac Guaranteed Securities and to maintain reasonable available cash and cash equivalents for business operations, including adequate liquidity. Farmer Mac funds its purchases of program (loans and Farmer Mac Guaranteed Securities), mission-related and non-program assets primarily by issuing debt obligations of various maturities in the public capital markets. Debt obligations issued by Farmer Mac include discount notes and fixed and floating rate medium-term notes, including callable notes. Farmer Mac also issues discount notes and medium-term notes to obtain funds to finance its investments, transaction costs, guarantee payments and LTSPC purchase obligations.

The interest and principal on Farmer Mac's debt are not guaranteed by and do not constitute debts or obligations of FCA or the United States or any agency or instrumentality of the United States other than Farmer Mac. Farmer Mac is an institution of the FCS, but is not liable for any debt or obligation of any other institution of the FCS. Likewise, neither the FCS nor any other individual institution of the FCS is liable for any debt or obligation of Farmer Mac. Income to the purchaser of a Farmer Mac discount note or medium-term note is not exempt under federal law from federal, state or local taxation. The Corporation's discount notes and medium-term notes are not currently rated by a nationally recognized statistical rating organization.

Farmer Mac's board of directors has authorized the issuance of up to \$7.0 billion of discount notes and medium-term notes (of which \$4.9 billion was outstanding as of June 30, 2007), subject to periodic review of the adequacy of that level relative to Farmer Mac's borrowing requirements. Farmer Mac invests the proceeds of such issuances in loans, Farmer Mac Guaranteed Securities, mission-related assets and non-program investment assets in accordance with policies established by its board of directors.

Liquidity. The funding and liquidity needs of Farmer Mac's business programs are driven by the purchase and retention of eligible loans, Farmer Mac Guaranteed Securities and mission-related assets; the maturities of Farmer Mac's discount notes and medium-term notes; and payment of principal and interest on Farmer Mac Guaranteed Securities. Farmer Mac's primary sources of funds to meet these needs are:

- principal and interest payments and ongoing guarantee and commitment fees received on loans, Farmer Mac Guaranteed Securities, LTSPCs and mission-related assets;
 - principal and interest payments received from investment securities; and
 - the issuance of new discount notes and medium-term notes.

As a result of Farmer Mac's regular issuance of discount notes and medium-term notes and its status as a federally chartered instrumentality of the United States, Farmer Mac has been able to access the capital markets at favorable rates. Farmer Mac has also used floating-to-fixed interest rate swaps, combined with discount note issuances, as a source of fixed-rate funding. While the swap market may provide favorable fixed rates, swap transactions expose Farmer Mac to the risk of future widening of its own issuance spreads versus corresponding LIBOR rates. If the spreads on the Farmer Mac discount notes were to increase relative to LIBOR, Farmer Mac would be exposed to a commensurate reduction on its net interest yield on the notional amount of its floating-to-fixed interest rate swaps and other LIBOR-based floating rate assets.

Farmer Mac maintains cash and liquidity investments in cash equivalents (including commercial paper and other short-term money market instruments) and liquid investment securities that can be drawn upon for liquidity needs. As of June 30, 2007, Farmer Mac's cash and cash equivalents and liquidity investment securities were \$572.3 million and \$1.6 billion, respectively. In addition, as of June 30, 2007, Farmer Mac held: (1) \$865.6 million of mission-related non-program investment securities issued by the National Rural Utilities Cooperative Finance Corporation, and (2) \$918.7 million of Farmer Mac II Guaranteed Securities backed by USDA-guaranteed portions that carry the full faith and credit of the U.S. government. Both types of assets could be drawn upon as an additional source of liquidity. As of June 30, 2007, the aggregate of the Farmer Mac II Guaranteed Securities, mission-related non-program investments, cash and liquidity investments represented 79 percent of Farmer Mac's total liabilities. Farmer Mac has a policy of maintaining a minimum of 60 days of liquidity and a target of 90 days of liquidity. For second quarter 2007, Farmer Mac maintained an average of greater than 90 days of liquidity.

Capital. During fourth quarter 2005, Farmer Mac established a program to repurchase up to 10 percent, or 958,632 shares, of the Corporation's outstanding Class C Non-Voting Common Stock. During first quarter 2007, the aggregate number of shares repurchased by Farmer Mac under that program reached the maximum number of authorized shares, thereby terminating the program according to its terms. At that time, Farmer Mac announced the establishment of an additional program to repurchase up to one million additional shares of the Corporation's outstanding Class C Non-Voting Common Stock. The authority for this new stock repurchase program expires in November 2008. Repurchases under that program commenced in accordance with its terms, upon termination of the previous program. During the three months and six months ended June 30, 2007, Farmer Mac repurchased 133,500 and 493,982 shares, respectively, of its Class C Non-Voting Common Stock at an average price of \$27.75 and \$26.65 per share, respectively, pursuant to both of the Corporation's previously announced stock repurchase programs. These repurchases reduced the Corporation's stockholders' equity by approximately \$3.7 million and \$13.2 million, respectively. During the three months and six months ended June 30, 2006, Farmer Mac repurchased 282,500 and 321,450 shares, respectively, of its Class C Non-Voting Common Stock at an average price of \$26.55 and \$26.70, respectively, which reduced the Corporation's stockholders' equity by approximately \$7.5 million and \$8.6 million, respectively. All of the repurchased shares were purchased in open market transactions and were retired to become authorized but unissued shares available for future issuance.

Other Matters

Since fourth quarter 2004, Farmer Mac has paid quarterly dividends of \$0.10 per share on each of the Corporation's three classes of common stock – Class A Voting Common Stock, Class B Voting Common Stock, and Class C Non-Voting Common Stock. Each dividend was paid on the last business day of each quarter to holders of record as of the 15th day of the month in which the dividend was paid. On August 2, 2007, Farmer Mac's board of directors declared a quarterly dividend of \$0.10 per share on the Corporation's three classes of common stock payable on September 28, 2007 to holders of record as of September 14, 2007. Farmer Mac expects to continue to pay comparable quarterly cash dividends for the foreseeable future, subject to the outlook and indicated capital needs of the Corporation and the determination of the board of directors. Farmer Mac's ability to declare and pay dividends could be restricted if it were to fail to comply with the applicable regulatory capital requirements. See "Business—Government Regulation of Farmer Mac—Regulation—Capital Standards—Enforcement levels" in Farmer Mac's Annual Report on Form 10-K for the fiscal year ended December 31, 2006, as filed with the SEC on March 15, 2007. Farmer Mac's ability to pay dividends on its common stock is also subject to the payment of dividends on its outstanding preferred stock.

-53-

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Farmer Mac is exposed to market risk attributable to changes in interest rates. Farmer Mac manages this market risk by entering into various financial transactions, including financial derivatives, and by monitoring its exposure to changes in interest rates. See “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Quantitative and Qualitative Disclosures About Market Risk Management—Interest Rate Risk” for more information about Farmer Mac’s exposure to interest rate risk and strategies to manage such risk. For information regarding Farmer Mac’s use of and accounting policies for financial derivatives, see Note 1(c) to the interim unaudited condensed consolidated financial statements contained in this report. See “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources” for further information regarding Farmer Mac’s debt issuance and liquidity risks.

Item 4. Controls and Procedures

(a) Management’s Evaluation of Disclosure Controls and Procedures. Farmer Mac maintains disclosure controls and procedures designed to ensure that information required to be disclosed in the Corporation’s periodic filings under the Securities Exchange Act of 1934 (the “Exchange Act”), including this report, is recorded, processed, summarized and reported on a timely basis. These disclosure controls and procedures include controls and procedures designed to ensure that information required to be disclosed under the Exchange Act is accumulated and communicated to the Corporation’s management on a timely basis to allow decisions regarding required disclosure. Management, including Farmer Mac’s Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the design and operation of the Corporation’s disclosure controls and procedures (as defined under Rules 13a-15(e) and 15d-15(e) of the Exchange Act) as of June 30, 2007. Based on management’s assessment, the Chief Executive Officer and the Chief Financial Officer have concluded that Farmer Mac’s disclosure controls and procedures were effective as of June 30, 2007.

(b) Changes in Internal Control Over Financial Reporting. There were no changes in Farmer Mac’s internal control over financial reporting during the quarter ended June 30, 2007 that has materially affected, or is reasonably likely to materially affect, Farmer Mac’s internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

Farmer Mac is not a party to any material pending legal proceedings.

Item 1A. Risk Factors

There were no material changes from the risk factors previously disclosed in Farmer Mac's Annual Report on Form 10-K for the year ended December 31, 2006, as filed with the SEC on March 15, 2007.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(a) Farmer Mac is a federally chartered instrumentality of the United States and its Common Stock is exempt from registration pursuant to Section 3(a)(2) of Securities Act of 1933.

On April 9, 2007, pursuant to Farmer Mac's policy that permits directors of Farmer Mac to elect to receive shares of Class C Non-Voting Common Stock in lieu of their annual cash retainers, Farmer Mac issued an aggregate of 542 shares of its Class C Non-Voting Common Stock, at an issue price of \$27.20 per share, to the seven directors who elected to receive such stock in lieu of their cash retainers.

On June 7, 2007, Farmer Mac granted options under its 1997 Incentive Plan to purchase an aggregate of 456,427 shares of Class C Non-Voting Common Stock, at an exercise price of \$29.33 per share, to the fifteen directors and seven officers of the Corporation.

(b) Not applicable.

(c) As shown in the table below, Farmer Mac repurchased 133,500 shares of its Class C Non-Voting Common Stock during second quarter 2007 at an average price of \$27.75 per share. All of the repurchased shares were purchased in open market transactions and were retired to become authorized but unissued shares available for future issuance.

Period	Issuer Purchases of Equity Securities		Total Number of Class C Shares Purchased as Part of Publicly Announced Program ¹	Maximum Number of Class C Shares that May Yet Be Purchased Under the Program
	Total Number of Class C Shares Purchased	Average Price Paid per Class C Share		
April 1, 2007 - April 30, 2007	61,700	\$ 27.67	61,700	696,050
May 1, 2007 - May 31, 2007	71,800	\$ 27.82	71,800	624,250
June 1, 2007 - June 30, 2007	-	\$ -	-	624,250
Total	133,500	\$ 27.75	133,500	

¹On February 5, 2007, Farmer Mac announced the establishment of a program to repurchase up to one million shares of the Corporation's outstanding Class C Non-Voting Common Stock. The authority for this stock repurchase program expires in November 2008.
