ITEM 2.01. COMPLETION OF ACQUISITION OR DISPOSITION OF ASSETS

On February 2, 2004, we consummated the purchase of 100% of the outstanding common stock of Zone 4 Play, Inc., a Delaware corporation (the "Acquisition"), pursuant to a Stock Purchase Agreement entered into between the

Edgar Filing: ZONE 4 PLAY INC - Form 8-K/A

parties thereto on December 1, 2003 (the "Stock Purchase Agreement"), whereby we issued 10,426,190 shares of our common stock to the shareholders of Zone 4 Play, Inc. in exchange for 100% of the issued and outstanding shares of the common stock of Zone 4 Play, Inc. As a result of the Acquisition, Zone 4 Play, Inc. became our wholly-owned subsidiary. The transactions contemplated under the Stock Purchase Agreement were approved by the written consent of a majority of our shareholders on December 22, 2003.

On December 22, 2003, a majority of our shareholders approved a change in our name to Zone 4 Play, Inc. On February 5, 2004, we filed a Certificate of Amendment with the Nevada Secretary of State changing our name to Zone 4 Play, Inc.

BUSINESS OF ZONE 4 PLAY, INC.

OVERVIEW

Subsequent to the Acquisition, we began to carry on the business of developing an interactive games technology that provides an end-to-end solution for multiple platforms and allows service providers to deliver games to their subscribers. As of February 1, 2004, our customers included cable and satellite television service providers and hospitality service providers. Our customers include Lodgenet (US), RCN (US) and NDS (UK).

Our technology allows service providers to generate additional revenue from their existing infrastructure and subscriber base, and allows a subscriber to switch from one platform to another using a single account with the same virtual account balance and user information. To our knowledge, our technology is unique in its ability to utilize a single account to play a game on different platforms, such as interactive TV (iTV), wireless or Internet. With this capability, our technology increases the variety of services that our customers can offer, which can help reduce subscriber turnover.

Our customers typically enter into revenue-share agreements with us under which they use our technology to offer games to their subscribers and pay us a percentage of the revenues or income generated from those games.

We were incorporated under the laws of the State of Nevada on April 23, 2002 as Old Goat Enterprises, Inc. On February 1, 2004, we acquired Zone4Play, Inc., a Delaware corporation, and subsequently changed our name to Zone 4 Play, Inc, a Nevada corporation. The acquisition was accounted for as a reverse acquisition, whereby Old Goat was treated as the acquiree and Zone4Play, Inc (Delaware) as the acquirer. The historical financial statements of Zone4Play, Inc (Delaware) became our historical financial statements. We conduct our operations through our wholly owned subsidiaries, Zone4Play (Israel) Limited, an Israeli corporation incorporated in July 2001, and Zone4Play (UK) Limited, a United Kingdom corporation incorporated in November 2002.

OUR PRODUCTS AND TECHNOLOGY

Our interactive games technology provides an end-to-end solution for multiple platforms and features a single user account that enables switching across iTV, wireless and Internet platforms. Our solution includes game engine server applications, client applications and our e-management back-office solution for play-for-real gaming. We have developed a modular application architecture that allows us to quickly and easily develop applications for each platform. We also offer Zone4Play-branded games and games we license from third-party developers.

We have integrated our products to work with most common middleware platforms. Our iTV products are capable of integrating with the following middleware platforms:

Edgar Filing: ZONE 4 PLAY INC - Form 8-K/A

- o Liberate, NDS Core, Sony, Microsoft and CCTV (HTML, JavaScript and Flash);
- o Open TV and Power TV (C/C++); and
- o NDS Core and Liberate (Java Virtual Machine).

1

Our modular application architecture allows:

1. Easy modification of applications for specific uses;
2. Simple and fast creation of new applications; and
3. Addition of new functionalities.

A typical application is split into code and data sections.

The code section includes:

1. The application's business logics;
2. Dial-up module;
3. HTTP module;
4. Audio / video module; and
5. Gadgets and controls.

The data section includes:

1. Screen scenarios;
2. Texts;
3. Images for on-screen display;
4. MPEG still images; and
5. Sounds.

Any element of a data or code section can be loaded with the main code module or requested for dynamic loading on the fly. Depending on our customers' requirements, our application can either complete a full download all at once or in download increments with a quick initial module so that a subscriber can interact with the application immediately while the rest of the resources continue to be downloaded. We have two groups of on-screen controls: "PC style" and "TV style." PC style controls resemble standard PC user interface elements, such as edit boxes, drop-down menus, checkboxes, and scrollers. The TV style controls are more intuitive and do not require that subscribers be familiar with computers, which makes our applications more widely accessible to subscribers.

THE INTERACTIVE ENTERTAINMENT MARKET

The interactive entertainment market has emerged as a result of the rapid growth and significant technological advancement in the communications industry. Service providers are launching new data services, including downloadable games,

Edgar Filing: ZONE 4 PLAY INC - Form 8-K/A

ring tones and images, to drive revenues and retain subscribers. They invest heavily in technology to take advantage of advanced networks and next-generation devices, including 3G mobile phones and new set-top cable and satellite boxes.

Our primary markets include:

- o iTV - (interactive cable and satellite television service providers) Our iTV packages have been deployed by cable and satellite TV service providers all around the world, including RCN in the US, and NTL in the UK.
- o Wireless service providers - We provide online games and support SMS, WAP, J2ME, PDA and 3G technologies. We offer a single user account feature which allows a user to utilize the wireless platform to play the same games as on other platforms, including iTV and Internet, under a single account with the same virtual account balance and user information.
- o Internet service providers - our products are being deployed by ISP's and are available for IPTV (Internet Protocol TV based on technologies such as xDSL and FTTx) to offer our interactive games platform solutions.
- o Hospitality service providers (Games on demand). Our products are currently deployed by LodgeNet (US), a hotel in-room service providers' platform.

Within the interactive entertainment market, we serve two market segments:

2

- o Play for Fun - Includes service providers offering interactive games that do not involve the direct transaction of money between the service provider and the subscriber. This is a rapidly growing market which holds great potential and opportunities for innovative gaming applications providers. Our solutions for the play for fun market include Zone4Play branded skill games, multi player games, trivia games, casino games and sports games. We can also develop tailor-made games as required by our customers. Additionally, we provide content we license from third-party developers such as Slingo and Game Universe.
- o Play for Real - Includes service providers that operate interactive gaming and gambling applications which involve monetary transactions between the service provider and the subscriber. Industry trends indicate that this market will continue to grow and offer subscribers a broad range of access possibilities to place real-money bets. This market is heavily regulated. Our current operations in this market are conducted exclusively in the United Kingdom.

OUR COMPETITIVE STRENGTHS

We believe that our competitive strengths include:

Proprietary, Award Winning, Technology, and Commitment to Research and Development. We invest in research and development to create applications and technologies that incorporate the advanced capabilities of next-generation networks. We have developed proprietary technologies that enable us to

Edgar Filing: ZONE 4 PLAY INC - Form 8-K/A

distribute our solutions across different platforms. In 2002, our innovative technology won 1st place at the "Neddies," an International competition for iTV applications developers organized by NDS Ltd. We offer our cross-platform technologies through revenue-sharing arrangements with our customers. The cross-platform nature of our technologies allows us to remain neutral to the network choices made by our customers, and enables our customers to reach the broadest number of subscribers possible.

Customer Relationships across Multiple Platforms. Service providers are our primary customers and the distributors of our applications. Over the past two years, we have established agreements to distribute our applications through major wireless operators, Internet service providers, and cable and satellite service providers. We believe we have been able to build our distribution channels as a result of our focus on customer service, the quality of our applications and our ability to deploy those applications on a broad range of devices and networks. We believe that the time and difficulty involved in building a global distribution channel represents a significant barrier to entry for our potential competitors.

Diverse Portfolio of Original and Licensed Properties. We publish a diverse portfolio of interactive entertainment applications. Our applications span over multiple categories and are based on intellectual properties that we create and own, and well-established brands that we license from third parties. We believe our approach to develop branded content for our platform has broad customer appeal and reduces our reliance on any particular application. In addition to introducing new applications, we continuously update our existing applications to take advantage of enhanced functionality of new media platforms.

Recurring Revenue-Generating Business Model. Our business strategy emphasizes the collaborative nature of our approach to customers. We prefer to enter into revenue-share agreements with our customers, rather than license our technology. We believe this approach will continue to generate revenue long after the technology's initial release. The market data we collect from sales and usage of our applications also provides us with valuable insight into carrier and subscriber preferences and guides the development of future application.

OUR CUSTOMERS

CABLE AND SATELLITE SERVICE PROVIDERS

On November 6, 2003, we executed an agreement with RCN Telecom Services of Illinois, LLC, under which we will supply certain software applications for use in the Chicago area. Such applications include play for fun casino games and others. The term of this agreement is for three years from the date the service is first delivered by RCN to subscribers on a commercial basis. In consideration of supplying the software application, we are entitled to certain fees and a percentage of the revenue generated by RCN from the software application.

On October 1, 2003, we entered into an agreement with NDS Limited, a company registered in England and Wales, for distribution of our play for fun interactive products to Cablevision subscribers in the United States. The term of the agreement is for a period of three years beginning July 16, 2003. Upon expiration of the initial term, the agreement will automatically renew for an additional one year term unless NDS elects to terminate the agreement upon thirty days prior written notice. In consideration of supplying the games, we receive a percentage of the revenue generated by NDS from the applications.

Edgar Filing: ZONE 4 PLAY INC - Form 8-K/A

On June 5, 2003, we entered into an agreement with Digital Impact (UK), a company incorporated under the laws of England and Wales, and with DTPC, a public company incorporated under the laws of England and Wales. We agreed to provide five interactive play for real games based on a fixed odds betting service, and two play for fun based games to be deployed on the AVAGO channel, which is operational under the Sky platform. The agreement will run non-exclusively for an initial period of 12 months from the date for the "reals" game on the AVAGO channel. The agreement will run non-exclusively for an initial period of three years with the option for the parties to extend the contract term thereafter on a rolling yearly basis. Under this agreement we receive a percentage of the revenues generated by The AVAGO Channel from the software applications.

On March 10, 2003, we entered into an agreement with Two Way TV, Ltd., a company incorporated and organized under the laws of England and Wales, to supply software applications for play for fun interactive games on the digital cable television platforms operated by NTL & TELEWEST in the United Kingdom. Unless terminated by either party, the term of the agreement is for a period of 12 months from the commercial launch and is terminable upon 90 days notice. We are entitled to receive a percentage of the revenues generated by Two Way TV from the cable operators in connection with the applications.

HOSPITALITY SERVICE PROVIDERS

On January 8, 2004, we entered into an agreement with LodgeNet Entertainment Corporation, a Delaware corporation, under which we granted LodgeNet a license to use, and operate our solutions for Internet and Flash-based games, as necessary for LodgeNet to deploy the technology in hotels in the United States that receive LodgeNet programming through the LodgeNet entertainment on demand system. The term of the agreement is for a period of five years from January 8, 2004 unless sooner terminated. The agreement automatically renews and continues for one year periods unless terminated by either party providing at least 120 days' advance written notice of their desire not to renew prior to any expiration date. We are entitled to receive a percentage of the revenue generated by LodgeNet from our programming.

OUR STRATEGY

Our goal is to become a leading global provider of interactive games technology to the iTV, wireless and Internet markets. We believe that developing a diversified portfolio of high quality, innovative applications is critical to our business. We intend to:

- o Develop Innovative Applications. We will continue to devote significant resources to the development of high-quality, innovative applications and work with the best content developers. As the interactive entertainment landscape continuously evolves, we expect to extend our cross-platform solutions to accommodate advancements in network and device technology.
- o Emphasize Zone4Play-Branded Technology. We plan to emphasize the unique features of Zone4Play-branded applications, which typically generate higher margins for us. We intend to broaden our applications to highlight the community aspects of our content, thereby offering our customers the opportunity to increase subscriber satisfaction, leading to reduction in subscriber turnover.
- o License Third Party Brands. We will continue to license well-known, third party brands and collaborate with major media companies and other brand holders to introduce third

Edgar Filing: ZONE 4 PLAY INC - Form 8-K/A

party branded applications. We believe that familiar titles facilitate the adoption of our applications by our customers and their subscribers, and create strong marketing opportunities.

COMPETITION

ITV MARKET

The interactive entertainment applications market is highly competitive and characterized by frequent product introductions, new technologies, and evolving platforms in iTV, wireless and Internet. As demand for applications continues to increase, we expect new competitors to enter the market and existing competitors to allocate more resources to develop and market their applications. As a result, we expect competition in the interactive entertainment market to intensify.

The current and potential competition in the interactive entertainment applications market includes major media companies, traditional video game publishing companies, service providers in the iTV, wireless and Internet markets, iTV, wireless and Internet software applications providers, and other pure-play interactive entertainment companies. Currently, we consider our primary competitors in the iTV market to be Orbis UK/Visionik, , and Betting Corp/Connect TV.

ORBIS UK/VISIONIK - NDS owned companies, specializing together in iTV betting applications. Orbis develops a management server gaming engines and Visionik develops front-end gaming graphics and presentation layers to the end-user. Some of Orbis's iTV customers are Blue Square, Ladbrokes and Littlewoods, all in the United Kingdom market).

BETTING CORP/CONNECT TV - An OpenTV owned company, this is an integrated entity that jointly specializes in iTV betting applications. Betting Corp develops the server and gaming engines and Connect TV develops the front-end gaming applications to the end-user.

WIRELESS MARKET

The wireless entertainment applications market is highly competitive and characterized by frequent product introductions, evolving wireless platforms and new technologies. As demand for applications continues to increase, we expect new competitors to enter the market and existing competitors to allocate more resources to develop and market applications. As a result, we expect competition in the wireless entertainment market to intensify.

The current and potential competition in the wireless entertainment applications market includes major media companies, traditional video game publishing companies, wireless carriers, wireless software providers and other pure-play wireless entertainment companies. Larger, more established companies are increasingly focused on developing and distributing wireless applications that directly compete with us.

We also compete with wireless content aggregators, who combine applications from multiple developers (and sometimes publishers) and offer them to carriers or through other sales channels. We generally differentiate ourselves from aggregators in several key respects. Unlike us, aggregators do not typically fund development, provide design input or provide quality assurance for their applications. Also, since aggregators usually do not own an

Edgar Filing: ZONE 4 PLAY INC - Form 8-K/A

application's copyright, they often retain less than a majority of the revenues generated from application sales. We consider our primary competitor in the wireless market to be Chartwell Technologies.

To our knowledge, none of our competitors offer a cross-platform solution that can be used for iTV, wireless and internet communications. Each of our competitors focuses exclusively on its target network environment. Based on the versatility of our technology, we believe that we have a competitive edge over our competitors.

CHARTWELL TECHNOLOGIES - (CWH - Toronto Stock Exchange) A known brand for Web development of internet gambling sites. Chartwell is also approaching the mobile market with its customized applications to mobile devices.

5

INTELLECTUAL PROPERTY

We rely exclusively on confidentiality agreements and common law intellectual property rights for the protection of our proprietary technology. As of February 1, 2004, we have not submitted any applications with any governmental office to protect our intellectual property, including patent and trademark applications.

GOVERNMENT REGULATION

We currently market and sell our interactive games technology for use in gaming activities in the United Kingdom. Gaming activities are strictly regulated in the United States. Gaming regulations are based on policies that are concerned with, among other things: (i) the prevention of unsavory or unsuitable persons from having a direct or indirect involvement with gaming; (ii) the establishment and maintenance of responsible accounting practices and procedures; (iii) the maintenance of effective controls over the financial practices of licensees, including the establishment of minimum procedures for internal fiscal affairs and the safeguarding of assets and revenues, providing reliable record keeping and requiring the filing of periodic reports with the governing jurisdictions; (iv) the prevention of cheating and fraudulent practices; and (v) the provision of a source of government revenue through taxation and licensing fees.

The United Kingdom recently released a report that will greatly enhance its gambling business, including Internet gaming. Sports betting is currently regulated by the government, and to be more attractive to operators, the government is eliminating a nine percent tax on wagers, payable by bettors, with a 15 percent tax on gross profits, to be paid for by the bookmakers, both Internet and telephonic. The reforms will require primary legislation, and we expect the United Kingdom government to bring a Bill before Parliament in the near future.

EMPLOYEES

As of February 1, 2004 we employed 18 employees, all of whom work full-time for us. None of our employees are covered by a collective bargaining agreement. We consider our relations with our employees to be good.

DESCRIPTION OF PROPERTY

At February 1, 2004, the location of our principal operations was 3B Hashlosa St., Tel Aviv, 67060 Israel. This location consists of approximately 3,600 square feet of office space and the rent is approximately \$1,600 per

Edgar Filing: ZONE 4 PLAY INC - Form 8-K/A

month. The location was sublet from Winner.com Israel (1999) Ltd., which is a related party.

LEGAL PROCEEDINGS

As of February 1, 2004, we were not a party to, nor was any of our property the subject of, any legal proceeding. Further, as of February 1, 2004, none of our directors, officers or affiliates was involved in a proceeding adverse to our business or had a material interest adverse to our business.

OVERVIEW

You should read the following discussion of our financial condition and results of operations together with the audited financial statements and the notes to audited financial statements included elsewhere in this report prepared in accordance with accounting principles generally accepted in the United States. OUR BUSINESS

We develop interactive games technology that provides an end-to-end solution for multiple platforms that allows service providers to deliver games to their subscribers. Our customers include cable and satellite television service providers and hospitality service providers. Our customers include Lodgenet (US), RCN (US) and NDS (UK).

Our technology allows service providers to generate additional revenue from their existing infrastructure and subscriber base by launching additional services quickly. Our technology allows a subscriber to switch from one platform

Edgar Filing: ZONE 4 PLAY INC - Form 8-K/A

to another using a single account with the same virtual account balance and user information. To our knowledge, our technology is unique in its ability to utilize a single account to play a game on different platforms, such as interactive TV, wireless or Internet. With this capability, our technology increases the variety of services that our customers can offer, which can help reduce subscriber turnover.

Our customers typically enter into revenue-share agreements with us under which they use our technology to offer games to their subscribers and pay us a percentage of the revenues or income generated from those games.

We devote substantially all of our efforts toward conducting research, development and marketing of our software. In the course of these activities, we have sustained operating losses and expect such losses to continue in the foreseeable future. To date, we have not generated sufficient revenues to achieve profitable operations or positive cash flow from operations. On December 31, 2003, we had a working capital deficiency of \$924,675 and an accumulated deficit of \$936,766. There is no assurance that profitable operations, if ever achieved, will be sustained on a continuing basis. During the twelve months ended December 31, 2003, we derived 92% of our revenues from two major customers. 69% of this revenue was from one time sale of clearing system to a related party.

RESULTS OF OPERATIONS - FISCAL YEAR ENDED DECEMBER 31, 2003 COMPARED TO THE FISCAL YEAR ENDED DECEMBER 31, 2002

REVENUES AND COST OF REVENUES

Total revenues for the year ended December 31, 2003 increased by 193% to \$553,707 from \$189,008 for the year ended December 31, 2002. Revenues from sales of software applications to unrelated third parties for the year ended December 31, 2003 increased by 186% to \$173,707 from \$60,668 for the year ended December 31, 2002. Revenues from sales of software applications to related parties for the year ended December 31, 2003 increased by 196% to \$380,000 compared to \$128,340 for the year ended December 31, 2002. The increase in revenues from sales of software applications was due to new contracts, mainly in the United Kingdom. The revenues from sale of software applications to related parties in 2003 are from a one-time sale of credit card clearing software to a related party. Going forward, we expect that revenues from sale of software applications to related parties will be nominal.

7

Cost of revenues for the year ended December 31, 2003 increased by 100% to \$194,904 from \$97,192 for the year ended December 31, 2002. Gross profit increased by 291% for the year ended December 31, 2003 to \$358,803 from \$91,816 for the same period in 2002. The increase in cost of revenues is mostly attributable to the one time sale of software to a related party, which included customization of the software and required allocation of employees in our R&D department. As a result, some R&D expenses were allocated to cost of sales.

RESEARCH AND DEVELOPMENT

Research and development expenses for the year ended December 31, 2003 increased by 1% to \$504,153 from \$497,523 for the year ended December 31, 2002. The increase in research and development expenses was minor and was a result of the one time sale of software to a related party, which included customization of software and required allocation of employees in our R&D department.

SALES AND MARKETING

Edgar Filing: ZONE 4 PLAY INC - Form 8-K/A

Selling and marketing expenses for the year ended December 31, 2003 increased by 142% to \$144,919 from \$59,811 for the year ended December 31, 2002. The increase in sales and marketing expenses is mostly attributable to increases in labor costs and travel expenses to the United Kingdom and the United States.

GENERAL AND ADMINISTRATIVE

General and administrative expenses for the year ended December 31, 2003 increased by 399% to \$108,471 from \$21,735 for the year ended December 31, 2002. The increase in general and administrative expenses is primarily attributable to the recruitment of employees and additional legal and audit expenses.

NET LOSS AND NET LOSS PER SHARE

For the years ended December 31, 2003 and 2002, we incurred net losses of \$442,412 (\$0.042 per share) and \$487,716 (\$0.047 per share), respectively. The increased net loss is primarily attributable to increased operating expenses.

LIQUIDITY AND CAPITAL RESOURCES

As of December 31, 2003, total current assets were \$106,232 and total current liabilities were \$1,030,907. On December 31, 2003, we had a working capital deficiency of \$924,675 and an accumulated deficit of \$936,766. We finance our operations with a combination of stock issuances and revenues from product sales.

Our management believes that we have sufficient funds to operate for the next 12 months, with additional funds anticipated from the performance of agreements that we have entered with our current customers, and from future contracts that we expect to execute in the near future. Nonetheless, we intend to raise additional funds in order to broaden our financial strength and liquidity.

SUBSEQUENT EVENTS

In April 2004, we completed a \$1.2 million private placement, consisting of units offered at a price of \$0.80 per unit, with each unit comprised of one share of common stock and two common stock purchase warrants. One warrant is exercisable for 24 months at a price of \$1.85 per share and one warrant is exercisable for 36 months at a price of \$2.50 per share. The private placement agreement was signed with a group of institutional and accredited investors.

On August 17, 2004, we completed a \$1 million private placement of common stock and warrants. The private placement consisted of units offered at a price of \$1.00 per unit, with each unit comprised of one share of common stock and two common stock purchase warrants. One warrant is exercisable for 24 months at a price of \$2.00 per share and one warrant is exercisable for 36 months at a price of \$2.50 per share.

OUTLOOK

We believe that our future success will depend upon our ability to enhance our existing products and solutions and introduce new commercially viable products and solutions addressing the demands of the evolving markets. As part of the product development process, we work closely with current and potential customers, distribution channels and leaders in our industry segments to identify market needs and define appropriate product specifications. Our current

Edgar Filing: ZONE 4 PLAY INC - Form 8-K/A

anticipated levels of revenue and cash flow are subject to many uncertainties and cannot be assured. In order to have sufficient cash to meet our anticipated requirements for the next twelve months, we may be dependent upon our ability to obtain additional financing. The inability to generate sufficient cash from operations or to obtain the required additional funds could require us to curtail operations.

OFF BALANCE SHEET ARRANGEMENTS

We do not have any off balance sheet arrangements that are reasonably likely to have a current or future effect on our financial condition, revenues, results of operations, liquidity or capital expenditures.

NOTE 1:- GENERAL

- a. Zone4Play Inc. ("the Company") was incorporated under the laws of the State of Nevada on April 23, 2002 as Old Goat Enterprises, Inc. On February 1, 2004, the company acquired Zone4Play, Inc. ("Zone4Play (Delaware)"), which was incorporated under the laws of the State of Delaware on April 2, 2001, and subsequently changed the Company name to Zone4Play, Inc., a Nevada corporation. The Company

Edgar Filing: ZONE 4 PLAY INC - Form 8-K/A

develops and markets interactive games applications for Internet, portable devices and interactive TV platforms.

The Company conducts its operations and business with and through its wholly-owned subsidiaries, Zone4Play Limited, an Israeli corporation incorporated in July 2001, which is engaged in research and development and marketing of the applications, Zone4Play (UK) Limited, a United Kingdom corporation, incorporated in November 2002, which is engaged in marketing of the applications.

The Company's shares are currently traded on the OTC Bulletin Board under the trading symbol "ZFPI.OB."

- b. The Company and its subsidiaries are devoting substantially all of its efforts toward conducting research, development and marketing of its software. The Company's and its subsidiaries' activities also include raising capital and recruiting personnel. In the course of such activities, the Company and its subsidiaries have sustained operating losses and expect such losses to continue in the foreseeable future. The Company and its subsidiaries have not generated sufficient revenues and have not achieved profitable operations or positive cash flow from operations. The Company's accumulated deficit aggregated to \$ 936,766 as of December 31, 2003. There is no assurance that profitable operations, if ever achieved, could be sustained on a continuing basis.

The Company plans to continue to finance its operations with a combination of stock issuance and private placements and revenues from product sales.

- c. Acquisition of Zone4Play (Delaware):

According to the agreement between the Company and Zone4Play (Delaware), the Company issued 10,426,190 Common stock to the former holders of equity interest in Zone4Play (Delaware).

The acquisition has been accounted for as a reverse acquisition, whereby the Company was treated as the acquiree and Zone4Play (Delaware) as the acquirer, primarily because Zone4Play (Delaware) shareholders owned a majority, approximately 58% of the Company's Common stock, upon completion of the acquisition. Immediately prior the consummation of the transaction Zone4play Inc. had no material assets and liabilities, hence the reverse acquisition is treated as a capital stock transaction in which Zone4Play (Delaware) is deemed to have issued the Common stock held by the Company shareholders for the net assets of the Company. The historical financial statements of the Company became the historical financial statements of Zone4Play (Delaware).

NOTE 2:- SIGNIFICANT ACCOUNTING POLICIES

The consolidated financial statements are prepared in accordance with generally accepted accounting principles in the United States ("U.S. GAAP").

- a. Use of estimates:

NOTE 2:- SIGNIFICANT ACCOUNTING POLICIES (CONT.)

e. Property and equipment, net:

Property and equipment are stated at cost, net of accumulated depreciation. Depreciation is computed using the straight-line method, over the estimated useful lives of the assets, at the following annual rates:

	%

Computers and peripheral equipment	20 - 33
Electronic devices	15

The Company's long-lived assets are reviewed for impairment in accordance with Statement of Financial Accounting Standard No. 144 "Accounting for the Impairment or Disposal of Long-Lived Assets" ("SFAS No. 144") whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to the future undiscounted cash flows expected to be generated by the assets. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets. As of December 31, 2003, no impairment losses have been identified.

f. Severance pay:

The Company's liability for severance pay in respect to its Israeli employees is calculated pursuant to Israeli severance pay law based on the most recent salary of the employees multiplied by the number of years of employment as of the balance sheet date. Israeli employees are entitled to one month's salary for each year of employment, or a portion thereof. The subsidiary's liability for its employees is fully provided by monthly deposits with severance pay funds, insurance policies and by an accrual. The value of these policies is recorded as an asset in the Company's balance sheet.

The deposited funds may be withdrawn only upon the fulfillment of the obligation pursuant to Israeli severance pay law or labor agreements. The value of the deposited funds is based on the cash surrendered value of these policies, and includes immaterial profits.

g. Revenue recognition:

The Company generates revenues mainly from the sale of software applications, from customization services and from revenue sharing agreements.

The Company generates revenues through its direct sales force.

The Company accounts for revenues from software applications agreements in accordance with Statement of Position 97-2, "Software Revenue Recognition", as amended ("SOP 97-2"). The revenue from license fees is recognized when persuasive evidence of an agreement exists, delivery of the product has occurred, no significant obligations with regard to implementation remain, the fee is fixed or determinable and collectibility is probable.

Revenues from software licenses that require significant customization, integration and installation are recognized in accordance with Statement of Position 81-1, "Accounting for Performance of Construction - Type and Certain Production Type Contracts" ("SOP 81-1"), using contract accounting on a completed contract method. After delivery, if uncertainty exists about customer acceptance of the software, license revenue is not recognized until acceptance. Provisions for estimated losses on uncompleted contracts are made in the period in which such losses are first determined, in the amount of the estimated loss on the entire contract. As of December 31, 2003, no such estimated losses were identified.

Estimated gross profit or loss from long-term contracts may change due to changes in estimates resulting from differences between actual performance and original forecasts. Such changes in estimated gross profit are recorded in results of operations when they are reasonably determinable by management, on a cumulative catch-up basis.

The Company is entitled to royalties from revenue sharing arrangement upon sublicensing of the Company's products to end-users. Royalties out of revenue sharing arrangements are recognized when such royalties are reported to the Company.

h. Research and development costs:

Research and development costs are charged to the Statement of Operations as incurred. Statement of Financial Accounting Standard No. 86 "Accounting for the Costs of Computer Software to be Sold, Leased or Otherwise Marketed" ("SFAS No. 86"), requires capitalization of certain software development costs subsequent to the establishment of technological feasibility.

Based on the Company's product development process, technological feasibility is established upon completion of a working model. Costs incurred by the Company between completion of the working models and the point at which the products are ready for general release have been insignificant. Therefore, all research and development costs have been expensed.

i Income taxes:

The Company and its subsidiaries account for income taxes in accordance with Statement of Financial Accounting Standards, "Accounting for Income Taxes" ("SFAS No. 109"). This statement prescribes the use of the liability method whereby deferred tax assets and liability account balances are determined based on differences between financial reporting and tax bases of assets and liabilities and are measured using the enacted tax rates and laws that will be in effect when the differences are expected to reverse. The Company and its subsidiaries provide a valuation allowance, if necessary, to reduce deferred tax assets to their estimated realizable value.

j. Concentrations of credit risk:

Financial instruments that potentially subject the Company and its subsidiaries to concentrations of credit risk consist principally of cash and cash equivalents and trade receivables. The majority of the Company's cash and cash equivalents are invested in dollar instruments with major banks in Israel, the United Kingdom and the United States. Management believes that the financial institutions that hold the Company's investments are financially sound and accordingly, minimal credit risk exists with respect to these investments. Such cash and cash equivalents in the United States may be in excess of insured limits and are not insured in other jurisdictions. However, management believes that such financial institutions are financially sound.

The Company's trade receivables are derived mainly from sales to two organizations located in Cyprus and in the United Kingdom, one of which (Cyprus) is related party. The Company performs ongoing credit evaluations of its customers and to date has not experienced any material losses.

The Company and its subsidiaries have no off-balance-sheet concentration credit risk such as foreign exchange contracts, option contracts or other foreign hedging arrangements.

k. Fair value of financial instruments:

The following methods and assumptions were used by the Company and its subsidiaries in estimating their fair value disclosures for financial instruments:

The carrying amounts of cash and cash equivalents, trade receivables, other accounts receivable, short-term bank credit, short-term loans, trade payables and other accounts payable approximate their fair value due to the short-term maturity of such instruments.

Long-terms loans are estimated by discounting the future cash flows using current interest rates for loans or similar terms and

Edgar Filing: ZONE 4 PLAY INC - Form 8-K/A

maturities. The carrying amount of the long-term liabilities approximates their fair value.

NOTE 11:- INCOME TAXES

- a. Measurement of taxable income under the Income Tax Law (Inflationary Adjustments), 1985:

Results for tax purposes of the Israeli subsidiary are measured in terms of earnings in NIS, after certain adjustments for increases in the Israeli Consumer Price Index ("CPI"). As explained in Note 2b, the financial statements are measured in U.S. dollars. The difference between the annual change in the Israeli CPI and in the NIS/dollar exchange rate causes a further difference between taxable income and the income before taxes shown in the financial statements. In accordance with paragraph 9(f) of SFAS No. 109, the Israeli subsidiary has not provided deferred income taxes on the difference between the functional currency and the tax bases of assets and liabilities.

Israeli tax reform:

Edgar Filing: ZONE 4 PLAY INC - Form 8-K/A

On January 1, 2003, a comprehensive tax reform took effect in Israel. Pursuant to the reform, resident companies are subject to Israeli tax on income accrued or derived in Israel or abroad. In addition, the concept of "controlled foreign corporation" was introduced, according to which an Israeli company may become subject to Israeli taxes on certain income of a non-Israeli subsidiary if the subsidiary's primary source of income is passive income (such as interest, dividends, royalties, rental income or capital gains). The tax reform also substantially changed the system of taxation of capital gains.

b. Deferred income taxes:

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Significant components of the Company and its subsidiaries' deferred tax assets are as follows:

	DECEMBER 31,	
	2003	2002
Operating loss carryforward	\$ 327,293	\$ 173,273
Reserves and allowances	38,350	25,860
Net deferred tax asset before valuation allowance	365,643	199,133
Valuation allowance	(365,643)	(199,133)
Net deferred tax asset	\$ --	\$ --
	=====	=====

As of December 31, 2003, the Company and its subsidiaries have provided valuation allowances of \$ 365,643, in respect of deferred tax assets resulting from tax loss carryforwards and other temporary differences. Management currently believes that since the Company and its subsidiaries have a history of losses it is more likely than not that the deferred tax regarding the loss carryforwards and other temporary differences will not be realized in the foreseeable future. The change in valuation allowance was \$ 166,510.

Edgar Filing: ZONE 4 PLAY INC - Form 8-K/A

2021-2023.

Utilization of U.S. net operating losses may be subject to substantial annual limitation due to the "change in ownership" provisions of the Internal Revenue Code of 1986 and similar state provisions. The annual limitation may result in the expiration of net operating losses before utilization.

The Israeli subsidiary, a subsidiary of Zone4Play Inc. in Israel, has accumulated losses for tax purposes as of December 31, 2003, in the amount of approximately \$ 141,915, which may be carried forward and offset against taxable income in the future, for an indefinite period.

The United Kingdom subsidiary, a subsidiary of Zone4Play Inc. in United Kingdom, has accumulated losses for tax purposes as of December 31, 2003, in the amount of approximately \$ 28,656, which may be carried forward and offset against taxable income in the future, for an indefinite period.

- d. The main reconciling items between the statutory tax rate of the Company and the effective tax rate are the non-recognition of the benefits from accumulated net operating losses carry forward among the various subsidiaries worldwide due to the uncertainty of the realization of such tax benefits.
