Approximate date of commencement of proposed sale to the public: As soon as practicable after this registration statement becomes effective.

If this Form is filed to register additional securities for an offering pursuant to Rule 462(b) under the Securities Act, please check the following box and list the Securities Act registration statement number of the earlier effective

registration statement for the same offering. o

If this Form is a post-effective amendment filed pursuant to Rule 462(c) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering. o

If this Form is a post-effective amendment filed pursuant to Rule 462(d) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering. o

If delivery of the Prospectus is expected to be made pursuant to Rule 434, please check the following box. o

CALCULATION OF REGISTRATION FEE

Title Of Each Class Of Securities To Be Registered	Amount To Be Registered	Proposed Maximum Offering Price Per Share (1)	Proposed Maximum Aggregate Offering Price (1)	Amount Of Registration Fee
Common stock, par value \$0.001 per share	124,082,025 Shares	\$0.194	\$24,071,913	\$2,833.24

(1) Estimated solely for the purpose of calculating the registration fee pursuant to Rule 457(c) under the Securities Act of 1933. For the purposes of this table, we have used the closing price of our common stock on January 17, 2006.

The Registrant hereby amends this Registration Statement on such date or dates as may be necessary to delay its effective date until the Registrant shall file a further amendment which specifically states that this Registration Statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act of 1933 or until this Registration Statement shall become effective on such date as the Commission, acting pursuant to said Section 8(a), may determine.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities, or determined if this Prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

Subject to completion, dated January __, 2006

MOBILEPRO CORP.

124,082,025 Shares of Common Stock

All of the 124,082,025 shares of our common stock and common stock issuable upon exercise of certain warrants and conversion of certain convertible debentures held by the selling stockholders are being sold by the selling stockholders named on page 12 of this Prospectus and summarized below. The selling stockholders may sell the common stock directly to purchasers or through underwriters, broker-dealers or agents, who may receive compensation in the form of discounts, concessions or commissions. The selling stockholders may sell the common stock at any time at market prices prevailing at the time of sale or at privately negotiated prices. We will not receive any proceeds from the sale of shares offered by the selling stockholders. Our common stock is quoted on the OTC Bulletin Board under the symbol "MOBL." On January 17, 2006, the last reported sale price of our common stock on the OTC Bulletin Board was \$0.194 per share.

These securities are speculative and involve a high degree of risk.

Please refer to "Risk Factors" beginning on page 4

The date of this Prospectus is January __, 2006.

Our consolidated financial statements for the fiscal year ended March 31, 2005 were contained in our Annual Report on Form 10-KSB and our condensed consolidated financial statements for the fiscal quarter ended September 30, 2005 were contained in our Quarterly Report on Form 10-QSB that were filed with the Securities and Exchange Commission on June 28, 2005 and November 14, 2005, respectively.

SUMMARY OF THE COMPANY

We are a broadband wireless, telecommunications, and integrated data communication services company. We deliver a comprehensive suite of voice and data communications services, including local exchange, long distance, enhanced data, Internet, wireless and broadband services to our end-user customers. We are focused on growing our current customer bases, deploying wireless networks, acquiring and growing profitable telecommunications and broadband companies, and forging strategic alliances with well positioned companies with complementary product lines and in complementary industries.

We market and sell our integrated communications services through 11 branch offices in eight states and we service over 222,000 equivalent subscriber lines including approximately 142,000 local and long-distance telephone lines, 50,000 dial-up lines, 5,000 broadband lines, and over 25,000 wireless customers. We own and operate approximately 36,000 payphones predominantly located in 42 states and the District of Columbia.

The adoption of initiatives by cities to create areas within city limits where residents, visitors, students and businesses can obtain wireless access to the Internet has created an emerging and growing market. We are concentrating efforts on the deployment, management and ownership of such municipally sponsored wireless access zones. In the current fiscal year, we have been selected by six municipalities for such projects. The deployment of our first network is scheduled for completion in February 2006. To date, no material revenues have been provided from this business.

Our revenues are generated through three of our four business reporting segments that are described as follows:

- | | |
|--------------------------|---|
| Wireless Networks | Our broadband wireless network deployment efforts are being conducted by our wholly-owned subsidiary, NeoReach, Inc., and its subsidiary, NeoReach Wireless, Inc. ("NeoReach Wireless"). This segment also includes the operations of our 51%-owned subsidiary, Kite Broadband LLC, a wireless broadband Internet service provider located in Ridgeland, Mississippi. We also have executed a letter of intent to acquire the remaining 49% of Kite Broadband, LLC that we do not already own and 100% of Kite Networks, Inc., an affiliate of Kite Broadband, LLC that provides certain consulting and implementation services to Kite Broadband, LLC. |
| Voice Services | Our voice services segment is led by CloseCall America, Inc. ("CloseCall"), a Competitive Local Exchange Carrier ("CLEC", which is a term applied under the Telecommunications Act of 1996 to new local telephone companies intended to compete with the incumbent local telephone companies, such as the Baby Bells) based in Stevensville, Maryland; American Fiber Network, Inc. ("AFN"), a CLEC based in Kansas City, Kansas; and Davel Communications, Inc. ("Davel"), an independent payphone provider based in Cleveland, Ohio. CloseCall offers our customers a full array of telecommunications products and services including local, long-distance, 1.800CloseCall anytime/anywhere calling, digital wireless, high-speed telephone (voice over IP), and dial-up and DSL Internet services. AFN is licensed to provide local telephone, long distance and/or Internet services throughout the United States. Davel is one of the largest independent payphone operators in the United States, providing approximately 59% of |

the revenues of the voice services segment in the six months ended September 30, 2005.

Internet Services Our internet services segment is led by DFW Internet Services, Inc. (“DFW”, doing business as Nationwide Internet), an Internet services provider based in Irving, Texas, and its acquired Internet service provider subsidiaries. Our Internet services segment provides broadband and dial-up internet access, web-hosting services and related Internet services to business and residential customers in over 40 states. Over 80% of our customers in this business segment are dial-up customers.

Corporate Our corporate reporting segment serves as the holding company of the operating subsidiaries that are divided among the other three business reporting segments, provides senior executive and financial management, and performs corporate-level accounting, financial reporting and legal functions. Occasionally, its employees may provide services to customers resulting in the recognition of consulting service revenues.

Revenues for the reportable business segments for the fiscal year ended March 31, 2005 and the six months ended September 30, 2005 were as follows:

Business Segment	Fiscal Year Ended March 31, 2005		Six Months Ended September 30, 2005	
	\$s	% of Revenues	\$s	% of Revenues
Voice	\$ 32,009,084	68.8%	\$ 37,796,032	77.1%
Internet Services	13,884,060	29.9	7,861,019	16.0
Wireless Networks	-	-	3,395,444	6.9
Corporate	615,000	1.3	-	-
Total Revenues	\$ 46,508,144	100.0%	\$ 49,052,495	100.0%

Prior to January 2004, we were a development stage company. Although we were incorporated only five years ago, we have undergone a number of changes in our business strategy and organization. In June 2001, we focused our business on the integration and marketing of complete mobile information solutions to meet the needs of mobile professionals. In April 2002, we acquired NeoReach, Inc. and shifted our focus toward solutions supporting the third generation wireless market that provides broadband to allow faster wireless transmission of data, such as the viewing of streaming video in real time. We shifted our business strategy again in December 2003 with a new management team, expanding significantly the scope of our business activity to include Internet access services, local and long distance telephone services and the ownership and operation of payphones. In 2005, we began to invest in the business of deploying broadband wireless networks and providing wireless network access services in wireless access zones to be primarily located in municipality-sponsored areas. We entered these businesses primarily through acquisitions. We have completed twenty (20) acquisitions within the last 24 months. Accordingly, our experience in operating our current businesses is limited. Although we have reported net income for three consecutive quarters, our Company has lost money historically. At September 30, 2005, we had an accumulated deficit of \$20,253,458. In the years ended March 31, 2005 and 2004, we incurred net losses of \$5,359,722 and \$2,157,844, respectively.

Mobilepro Corp (“Mobilepro”) was incorporated under the laws of Delaware in July 2000. Our principal executive offices are located at 6701 Democracy Boulevard, Suite 202, Bethesda, MD 20817 and our telephone number at that

address is (301) 315-9040. We maintain a corporate web site at www.mobileprocorp.com. We make available free of charge through our web site our annual report on Form 10-KSB, quarterly reports on Form 10-QSB, current reports on Form 8-K, and all amendments to those reports, as soon as reasonably practicable after we electronically file or furnish such material with or to the SEC. The contents of our web site are not a part of this report. The SEC also maintains a web site at www.sec.gov that contains reports, proxy statements and other information regarding Mobilepro.

THE OFFERING

This offering relates to the sale of common stock by certain persons who are our stockholders. The selling stockholders consist of:

- The holder of 10,000,000 shares of common stock that were issued to the former owner in connection with our acquisition of AFN.
- The holder of 2,200,000 shares of our common stock that were issued to the former owner in connection with our acquisition of Clover Computer Corporation.
- Certain holders of 1,846,733 shares of our common stock that were issued to the former stockholders upon the conversion of convertible promissory notes obtained in connection with the acquisition of The River Internet Access Co.
- Cornell Capital Partners, L.P. that owns 4,995,000 shares of our common stock acquired in connection with the negotiation of the \$100 million Standby Equity Distribution Agreement, and that holds a debenture that is convertible into 51,666,667 shares of our common stock and a warrant to purchase up to 6,000,000 shares of our common stock.
- Certain holders of warrants to purchase collectively up to 5,600,000 shares of our common stock that were issued in connection with the bridge financing of our acquisition of Davel.
- Certain holders of warrants to purchase collectively up to 5,000,000 shares of our common stock that were issued to the former owners in connection with our acquisition of Davel.
- Certain holders of warrants to purchase collectively up to 3,223,625 shares of our common stock that were issued to the former owners in connection with our acquisition of CloseCall.
- The holder of a warrant to purchase up to 600,000 shares of our common stock that were issued to a former owner in connection with our acquisition of Evergreen Open Broadband Corporation.
- Certain holders of warrants and options to purchase an aggregate of 32,950,000 shares of our common stock that were issued to current and former employees, consultants, advisors and directors.

A more detailed description of each selling security holder is provided on page 12 of this Prospectus. We are contractually obligated to register the shares held by certain of the selling security holders pursuant to registration rights granted in connection with certain financings and acquisitions.

After this registration statement is declared effective by the Securities and Exchange Commission, the selling stockholders may sell in the public market up to all of the shares of common stock being registered in this offering, subject to the provisions of “lock-up” agreements executed by Messrs. Wright and Gordon which prohibit the sale or disposition of more than one million (1,000,000) shares of the Company’s common stock during any calendar quarter during their respective employment periods and, with respect to Mr. Wright, an agreement by him not to sell any shares prior to April 2006.

Brokers or dealers effecting transactions in the shares being registered in this offering should confirm that the shares are registered under applicable state law or that an exemption from registration is available.

Common Stock Offered	124,082,025 shares of our common stock by selling stockholders (the number of shares being registered in this offering will represent approximately 23.10% of the total number of
-----------------------------	---

shares of common stock outstanding upon their issuance).

Offering Price Market price.

**Common Stock
Outstanding Before
the Offering** 432,161,236 shares.

Use of Proceeds We will not receive any proceeds of the shares offered by the selling stockholders.

Risk Factors The securities offered hereby involve a high degree of risk and immediate substantial dilution. See “Risk Factors”.

**Over-the-Counter
Bulletin Board
Symbol** MOBL

SUMMARY FINANCIAL INFORMATION

The following information as of March 31, 2004 and 2005 and for the fiscal years then ended was taken from the audited financial statements appearing elsewhere in this filing. The following information as of September 30, 2005 and for the six-month periods ended September 30, 2004 and 2005 was taken from the unaudited financial statements appearing elsewhere in this filing. This information should be read in conjunction with such financial statements and the notes thereto.

3

RISK FACTORS

Investing in our securities involves a high degree of risk. Before investing in our securities, you should carefully consider the risks and uncertainties described below and the other information in this filing before deciding to purchase our common stock. If any of these risks or uncertainties actually occurs, our business, financial condition or future operating results could be materially harmed. In that case, the trading price of our common stock could decline and you could lose part or all of your investment.

RISKS RELATED TO OUR BUSINESS

We Have Lost Money Historically Which Means That We May Not Be Able to Maintain Profitability

We have historically lost money. In the years ended March 31, 2005 and 2004, we sustained net losses of \$5,359,722 and \$2,157,844, respectively. Future losses may occur. Accordingly, we may experience liquidity and cash flow problems if we are not able to improve our operating performance or raise additional capital as needed and on acceptable terms. Despite our reporting net income in the most recent three consecutive quarters, no assurances can be given that we will be successful in maintaining profitable operations.

Our Operations Are Recently Acquired Which Means That We Have a Limited Operating History upon Which You Can Base Your Investment Decision

Prior to January 2004, we were a development stage company. Although we were incorporated only five years ago, we have undergone a number of changes in our business strategy and organization.

We have had several major shifts in our business strategy. In June 2001, we focused our business on the integration and marketing of complete mobile information solutions that satisfy the needs of mobile professionals. In April 2002, we acquired NeoReach, Inc. and shifted our focus toward solutions supporting the third generation wireless market. We shifted our business strategy again in December 2003 by beginning to expand significantly the scope of our business activity to include Internet access services, local and long distance telephone services and the ownership and operation of payphones. In 2005, we began to invest in the business of deploying wireless broadband networks and providing wireless network access services in wireless access zones to be primarily located in municipality-sponsored areas. We entered these businesses primarily through the acquisition of established companies. These operations have all been acquired subsequent to January 1, 2004.

Accordingly, the Company has a limited operating history upon which an evaluation of its prospects can be made.

Our strategy is unproven and the revenue and income potential from our strategy is unproven. We may encounter risks and difficulties frequently encountered by companies that have grown rapidly through acquisition, including the risks described elsewhere in this section. Our business strategy may not be successful and we may not be able to successfully address these risks.

If we are unsuccessful in the execution of our current strategic plan, we could be forced to reduce or cease our operations.

We Have Limited Experience Running Our Businesses Which May Hamper Our Ability to Make Effective Management Decisions

Virtually all of our operations have been acquired or started in the last 24 months. Therefore, our experience in operating the current business is limited. Further, we intend to pursue additional acquisitions to further the development of our Internet services business, competitive local exchange and wireless broadband businesses.

Mr. Jay O. Wright became our President and Chief Executive Officer in December 2003. In February 2004, Mr. Kurt Gordon became our Chief Financial Officer. Prior to Mr. Gordon joining the Company, Messrs. Wright and Gordon had no experience working together. Since Mr. Wright joined our Company we have completed numerous acquisitions and integrated various different management teams into our operations. Prior to closing those acquisitions, Messrs. Gordon and Wright had not previously worked with management at any of our subsidiaries and divisions. The other senior executives, including the general managers of each of the three operating business segments, have joined the Company in connection with acquisitions or been recently hired. None of these executives has significant experience working with the others. Consequently, internal communication and business-decision making processes are evolving. We may react too slowly or incorrectly to trends that may emerge and affect our business. Our future success depends on the ability of the senior executives to establish an effective organizational structure and to make effective management decisions despite their limited experience.

The Success of Our Business Is Based on Unproven Revenue Generation Models Which Means That We May Not Achieve Anticipated Revenues

Our revenue models, especially for our municipal wireless network business, are new and evolving. Our ability to generate revenue depends, among other things, on our ability to provide quality wireless technology, telecommunications, broadband and integrated data communication services to our customers utilizing new technologies, new products and innovative bundled service packages. Because our businesses are either newly acquired, based on emerging opportunities and technologies, or based on new bundled services with new price packages, we have limited experience with our revenue models.

Our ability to achieve organic revenue growth is dependent upon the success of long-term projects, such as our wireless initiatives, that require us to incur significant up-front costs. We expect to confront multiple challenges in reaching the point where significant revenues are provided by this business. For example, the securing of a city contract is a multi-step process that can take over six months to complete, including a pilot demonstration, the RFP preparation, response and evaluation, contract negotiation, development of the deployment plan, and equipment installation and testing which costs have totaled approximately \$879,000 to date for all our municipal wireless network business. Although we attempt to minimize development risks by carefully analyzing demographics, topography, climate and other factors, each project includes the utilization of newly developed transmission equipment. For example, we expect that the cost of the equipment required for the completion of the Tempe network will approximate \$1.8 million. Further, in order to generate revenues from these projects, we will be required to successfully complete marketing efforts to obtain individual subscribers willing to pay us for wireless Internet service and negotiate contracts with large Internet service providers allowing them use of the network.

In addition, during the current fiscal year, the activities of the Internet services operation have focused on the integration of the acquired companies. The efforts are focused on combining service offerings, consolidating network operations and customer support locations, and reducing operating expenses. The success of our overall growth strategy depends, in part, on our ability to transition customers to new Internet access services, especially broadband wireless, and/or to sell additional voice services to the existing customer base. However, at present, dial-up subscribers represent a significant number of our Internet service customers. The erosion of this customer base is likely to continue until our new efforts to transition these customers to enhanced services become more effective.

There can be no assurance that the projects will be successfully completed or that the completed projects will provide the anticipated revenues. Accordingly, there can be no assurance that our business revenue models will be successful or that we can sustain revenue growth or maintain profitability.

If We Are Not Able to Compete Effectively in Our Markets That Are Highly Competitive, We May Be Forced to Reduce or Cease Operations

We believe that our ability to compete successfully in our markets depends on a number of factors, including market presence; the adequacy of our member and technical support services; the capacity, reliability and security of our network infrastructures; the ease of access to and navigation of the Internet provided by our services; our pricing policies and those of our competitors and suppliers; the timing of introductions of new services by us and our competitors; our ability to support existing and emerging industry standards; and general industry and economic trends. Other specific factors that could impact our ability to compete successfully include the following items, among others:

- our success in withstanding the continued shift from dial-up ISP service to broadband ISP service;
- the performance of our products, services and technology in a manner that meets customer expectations;
- the success of our efforts to develop effective channels of distribution for our products;
- our ability to price our products that are of a quality and at a price point that is competitive with similar or comparable products offered by our competitors;
- the success of our efforts to develop, improve and satisfactorily address any issues relating to our technology;
- our ability to effectively compete with companies that have substantially greater market presence and financial, technical, marketing and other resources than us including (i) local ISPs, (ii) national and regional ISPs, (iii) established online services; (iv) nonprofit or educational ISPs; (v) national telecommunications companies; (vi) Regional Bell Operating Companies (“RBOCs”); (vii) competitive local exchange carriers; and (viii) cable operators;
- our ability to adapt to the consolidation of existing ISPs with or into larger entities, or entry of new entities into the Internet services market, would likely result in greater competition for the Company;
- our ability to collect dial around compensation owed to our pay telephone business from third party payors; and
- the continued erosion of coin revenues in our pay telephone business resulting from the penetration of wireless technologies and prepaid calling cards.

There can be no assurance that the Company will have the financial resources, technical expertise or marketing and support capabilities to compete successfully. Failure to do so could harm our business and operating results in a material way and could cause us to reduce or cease operations.

Recent Industry Trends Could Adversely Affect Our Ability to Compete in the Wireless Communications Industry and Significantly Reduce the Likelihood of Our Success

The wireless communications industry has experienced consolidation of participants, and this trend may continue. If wireless carriers consolidate with companies that utilize technologies that are similar to or compete with our wireless technology, our proportionate share of the emerging market for wireless technologies may be reduced or eliminated. This reduction or elimination of our market share could reduce our ability to obtain profitable operations and could even cause us to reduce or cease operations.

In addition, the increasing number of municipally sponsored wireless network opportunities is attracting the interest of very large competitors. For example, competitors for the Philadelphia network included Verizon, Comcast and Earthlink. According to a published report, the city of San Francisco received plans from 26 companies in response to a request for proposals, including Cingular Wireless, Earthlink and Google.

The activity of these competitors, with resources far greater than ours, could adversely affect our ability to obtain additional awards for the deployment and management of wireless networks and significantly reduce the likelihood of success for our emerging wireless network and other businesses.

Our Payphone Division is Subject to Intense Competition That May Result in Future Revenue Declines

Through our Davel subsidiary, we compete with other independent pay telephone providers and large local exchange carriers for the locations where we install and operate pay telephones. Many of these competitors have substantially greater financial, marketing and other resources than us.

Additionally, Davel indirectly competes with other telecommunications providers, including providers of wireless services and prepaid calling card companies, for end users to utilize our pay telephones to make local and long distance calls. The proliferation of wireless communication devices has continued to reduce the use of pay telephones. For example, the cellular telephone business of CloseCall represents indirect competition for Davel. Furthermore, certain providers of wireless communication devices have continued to introduce rate plans, including pre-paid rate plans, that are competitively priced with certain of the products offered by us and have negatively impacted the usage of pay telephones throughout the nation. The effect on our business is that revenues of Davel are steadily declining. Davel's revenues were \$22,187,052 for the six months ended September 30, 2005 compared with \$28,723,834 for the corresponding period of the prior year. Such revenues were \$48,566,389 and \$57,519,615 for the twelve months ended September 30, 2005 and 2004, respectively.

If we are unsuccessful in increasing revenues from other sources, the declining payphone business may contribute to declines in consolidated revenues and the incurring of operating losses.

Davel's Reliance on Third Party Providers Could Delay the Timely Receipt of Accounts Receivable

Davel relies on third party providers to provide local access, long distance and operator services to its pay telephones. The uncertainty with the greatest potential negative financial impact relates to revenue from and collectibility of access code calls and toll-free dialed calls, or dial around compensation (i.e., intercarrier compensation paid to us by the providers of 800 numbers at the rate of 49.4 cents per call). In current quarters, Davel initially recognizes revenue related to non-coin dial-around calls that are initiated from a Company payphone in order to gain access to a long distance company or to make a standard toll free call based on estimates. The inter-exchange carriers have historically paid for fewer dial-around calls than are actually made and the collection period for dial-around revenue is generally four to six months, but can be in excess of a year. The estimates of revenue are based on the historical analysis of calls placed and amounts collected. These analyses are updated on a quarterly basis. Recorded amounts of revenue relating to prior periods may be adjusted based on the amounts of actual receipts and/or an unexpected change in the historical trends of calls and/or collections.

Dial around compensation represents a material percentage of our consolidated revenues. Dial around revenue was approximately \$5,555,000 in the current year, representing approximately 11.3% of consolidated revenues. The amount of dial-around revenue estimated to be collectible and included in the balance of accounts receivable at September 30, 2005 was \$6,049,000. We depend on the third-party service providers to quickly and accurately report and pay amounts owed to us as dial around compensation. Our inability to obtain such reports and/or our inability to collect amounts owed to us could result in material reductions in accounts receivable with material adverse effects to future consolidated revenues and net income.

If We Are Unable to Raise Additional Capital, We May Be Unable to Make Acquisitions or to Fund Our Future Operations

We have relied almost entirely on external financing to fund our operations and acquisitions to date. We have been particularly reliant on funds provided by Cornell Capital Partners, LP ("Cornell Capital"). Such financing has historically come from a combination of borrowings and sale of common stock. To date, we have drawn a total of \$24,900,000 in funds under the SEDA. Draws in the amount of \$21,950,000 have been converted to common stock. To date, the conversion of draws and related interest has resulted in the issuance of approximately 108,076,000 shares of our common stock to Cornell Capital. We registered 250,000,000 shares of our common stock for resale by Cornell

Capital in May 2004. Based on the closing price of our common stock on November 4, 2005 (\$0.214 per share), approximately 34,621,000 shares of our common stock would be issued in connection with the conversion of outstanding draws and accrued interest at September 30, 2005, and approximately 107,303,000 shares would be available for the conversion of future draws. Based on its response to our recent inquiry, we believe that Cornell Capital currently owns approximately 5.0% of our outstanding common stock. Future funding from Cornell Capital under the SEDA may be unavailable if Cornell Capital holds more than 9.9% of our outstanding common stock at the time financing is needed. Assuming that Cornell Capital does not dispose of its currently owned common stock, the conversion of the currently outstanding draws and accrued interest would result in ownership greater than 9.9%, making future draws unavailable. In addition, the term of the current SEDA expires in May 2006.

Over the next two years we anticipate that, in addition to the funds available to us under the SEDA with Cornell Capital, we may need to raise additional or alternative capital to fund major acquisitions and to grow our emerging businesses. We anticipate that these additional funds will be in the range of \$10 million to \$50 million, depending on the pace of growth and/or the size of future acquisitions.

If our ability to draw funds under the SEDA in the future is limited, our efforts to negotiate an extension to the SEDA on acceptable terms are unsuccessful, or we are unable to obtain capital from alternative sources when needed on favorable terms, we may be unable to adequately fund our future operations and continuing expansion; to successfully promote our brand name, products and services; to develop or enhance our service offerings; to take advantage of business opportunities; or to respond to competitive market pressures. Any resulting reduction in our operations may result in a lower stock price. In addition, the issuance of any additional shares will reduce the percentage ownership of a stockholder with a fixed number of shares of our common stock.

We May Not Successfully Execute or Integrate Our Acquisitions Which Could Harm Our Business

Our business model is dependent upon growth through acquisition of other telecommunication service providers. We have completed 17 acquisitions during the 18 month period ended September 30, 2005. We expect to continue making acquisitions that will enable us to build our Internet services, competitive local exchange carrier and wireless broadband businesses. Acquisitions involve numerous risks, including the following:

- Difficulties in integrating the operations, technologies, products and personnel of the acquired companies;
- Diversion of management's attention from normal daily operations of the business;
- Difficulties in entering markets in which we have no or limited direct prior experience and where competitors in such markets have stronger market positions;
- Initial dependence on unfamiliar partners;
- Insufficient revenues to offset increased expenses associated with acquisitions; and
- The potential loss of key employees of the acquired companies.

Acquisitions may also cause us to:

- Issue common stock that would dilute our current stockholders' percentage ownership (22,521,272 of the shares of our common stock that are being registered herein were acquired by selling stockholders in connection with acquisitions by us);
- Assume liabilities;
- Record goodwill and non-amortizable intangible assets that will be subject to impairment testing on a regular basis and potential periodic impairment charges;
- Incur amortization expenses related to certain intangible assets;
- Incur large and immediate write-offs, and restructuring and other related expenses; or
- Become subject to litigation.

Mergers and acquisitions are inherently risky, and no assurance can be given that our previous or future acquisitions will be successful and will not materially adversely affect our business, operating results or financial condition. In order to achieve the critical mass of business activity necessary to successfully execute our business plan, we plan to continue making strategic acquisitions and significantly increase the number of strategic partners and customers that use our technology and services. This growth has placed, and will continue to place, significant strain on our personnel, systems and resources. We expect that we will continue to hire employees, including technical, management-level employees, and sales staff, in the foreseeable future. This growth will require us to improve management, technical, information and accounting systems, controls and procedures. We may not be able to maintain the quality of our operations, control our costs, continue complying with all applicable regulations and expand our internal management, technical information and accounting systems in order to support our desired growth. We cannot be sure that we will manage our growth effectively, and our failure to do so could cause us to reduce or cease operations.

Many of the companies that we have acquired have been very small and/or privately held. Consequently, we have made acquisition decisions based on historical information that has not been audited. Generally, we structure our merger agreements to give us the right to make subsequent adjustments to the purchase consideration based on the subsequent discovery of inaccuracies. However, the process requires that senior management spend significant amounts of time resolving disputes with former owners of the acquired companies. In addition, we have been confronted with the challenges of managing many remotely located operations and combining different systems. Although we have been successful in retaining key managers and other employees of our major acquired companies, the lack of employee retention at certain smaller acquired companies has adversely affected the integration of operations and the retention of customers.

Failure to manage and successfully integrate acquisitions we make could harm our business and operating results in a material way.

We May Not Be Successful in Obtaining and Retaining Key Employees Which Could Adversely Affect Our Ability to Operate, Grow and Manage Our Businesses

Over the last twelve month period, we have been successful in making important additions to our management, including not only members of the management teams of certain acquired companies but new hires as well. For example, our executive management team has been expanded to include senior executive officers for each of our three operating business segments, an executive vice president focused on the integration of our acquired operations, and a general counsel. In addition, employment contract extensions were negotiated with our chief executive, chief financial and other officers. Our future success depends in a large part upon the continued service of key members of our senior management team. In particular, our chief executive officer, Mr. Jay O. Wright, is critical to the overall management of our Company as well as the development and implementation of our business strategy. Although we have designed employment agreements with Mr. Wright and other key executives that we believe provide incentives to perform at high levels and to fulfill the terms of their agreements with us, each executive, or any other employee, may terminate their employment with us at any time. Our future success also depends on our ability to identify, attract, hire, retain and motivate other well-qualified managerial, technical, sales and marketing personnel. There can be no assurance that these professionals will be available in the market or retained, or that we will be able to meet or to continue to meet their compensation requirements. Failure to establish and maintain an effective management team and work force could adversely affect our ability to operate, to grow and to manage our businesses.

Impairment of Goodwill Could Result in Significant Future Charges That Could Jeopardize Our Ability to Raise Capital

At September 30, 2005, our balance sheet included intangible assets with a total carrying value of approximately \$49,060,000, representing 56.3% of total assets and including approximately \$37,492,000 in goodwill. Substantially, this goodwill has been recorded in connection with the series of acquisitions completed by us since April 1, 2004. GAAP requires that we assess the fair values of acquired entities at least annually in order to identify any impairment in the values. We perform our annual impairment tests for goodwill at fiscal year-end. However, on a quarterly basis, we look are alert for events or circumstances that would more likely than not reduce the fair value of a reporting segment below its carrying amount. If we determine that the fair value of an acquired entity is less than the net assets of the entity, including goodwill, an impairment loss would be identified and recorded at that time. As of September 30, 2005, we do not believe that we have suffered impairment of goodwill.

Future assessments of the acquisition fair values could identify material impairment losses resulting in substantial write-offs of goodwill. Such adjustments would likely have material adverse effects on our results of operations and our financial position, and could jeopardize our continuing ability to raise capital and make acquisitions. For example, management announced in a December 28, 2005 press release that in connection with a planned corporate restructuring that it expected to take a \$3-5 million non-cash charge against goodwill during the quarter ended December 31, 2005.

We May Not Be Able to Effectively Protect Our Intellectual Property Rights Which Could Harm Our Business by Making it Easier for Our Competitors to Duplicate Our Services

We regard certain aspects of our products, processes, services and technology as proprietary. We have taken steps to protect them with patents, copyrights, trademarks, restrictions on disclosure and other methods. Despite these precautions, we cannot be certain that third parties will not infringe or misappropriate our proprietary rights or that third parties will not independently develop similar products, services and technology. Any infringement, misappropriation or independent development could seriously harm our business.

We have filed patent applications with respect to our wireless technology and for certain aspects of our chips, but these may not be issued to us, and if issued, may not protect our intellectual property from competition which could seek to design around or invalidate these patents. Our failure to adequately protect our proprietary rights in our products, services and technology could harm our business by making it easier for our competitors to duplicate our services.

We own several Internet domain names including, among others, www.mobileprocorp.com, www.nationwide.net, www.closeall.com, www.wazmetro.com, www.tommywireless.com, www.neoreach.com and www.neoreachwireless.com. The regulation of domain names in the United States and in foreign countries may change. Regulatory bodies could establish additional top-level domains or modify the requirements for holding domain names, any or all of which may dilute the strength of our names. We may not acquire or maintain our domain names or additional common names in all of the countries in which our marketplace may be accessed, or for any or all of the top-level domains that may be introduced. The relationship between regulations governing domain names and laws protecting proprietary rights is unclear. Therefore, we may not be able to prevent third parties from acquiring domain names that infringe or otherwise decrease the value of our trademarks and other proprietary rights.

We may have to resort to litigation to enforce our intellectual property rights, protect our trade secrets, determine the validity and scope of the proprietary rights of others, or defend ourselves from claims of infringement, invalidity or unenforceability. Litigation may be expensive and divert resources even if we win. This could adversely affect our business, financial condition and operating results such that it could cause us to reduce or cease operations.

If We Are Unable to Successfully Acquire the Necessary Equipment, the Deployment and Management of Our Wireless Networks Could Be Delayed

The successful deployment and management of a broadband wireless network, like the Tempe network, depends on our ability to obtain the necessary technical equipment and to acquire such equipment when needed at prices and on terms acceptable to us. Required equipment includes antennas, transmitters and network routers. For the Tempe network, we have been able to successfully obtain such equipment. We currently expect that capital expenditures for the Tempe network will approximate \$1,800,000; as of September 30, 2005, we had incurred such costs of approximately \$430,000. However, there can be no assurance that our purchasing efforts will continue to be successful. If we are unable to acquire the remainder of the equipment necessary for the successful completion of the Tempe wireless network when needed, or are unable to purchase equipment for future networks, all at prices and on terms acceptable to us, the deployment, ownership and management of broadband wireless networks could be delayed.

We May Not Be Able to Keep Up with Rapid Technological Changes Which Could Render Our Services Obsolete

Our industry is characterized by rapid technological change, changes in customer requirements and preferences, frequent introduction of products and services embodying new technologies and the emergence of new industry standards and practices that could render our existing services obsolete. Our future success will depend on our ability to enhance and improve the responsiveness, functionality, accessibility and features of our services including providing broadband for existing dial-up ISP customers. We expect that our marketplace will require extensive technological upgrades and enhancements to accommodate many of the new products and services that we anticipate will be added to our marketplace. We cannot assure you that we will be able to expand and upgrade our services, or successfully introduce new services or features that we develop in the future. Failure to keep pace with technology gains or to satisfy the desire of customers to utilize such new technology, could render our services obsolete resulting in future reductions in revenues.

Disruptions to the Growth and Maintenance of the Internet Infrastructure Could Harm Our Internet Services Business

Our future success will depend on the continued growth and maintenance of the Internet infrastructure. This includes maintenance of a reliable network backbone with the necessary speed, data capacity and security for providing reliable Internet services. Internet infrastructure may be unable to support the demands placed on it if the number of Internet users continues to increase or if existing or future Internet users access the Internet more often or increase their bandwidth requirements. In addition, viruses, worms and similar programs may harm the performance of the Internet. The Internet has experienced a variety of outages and other delays as a result of damage to portions of its infrastructure, and it could face outages and delays in the future. To date, we have not experienced significant disruptions to our business as the result of such problems. However, these outages and delays, if they were to occur, could reduce the level of Internet usage as well as our ability to provide our solutions. If the growth, maintenance or growth of the Internet infrastructure is disrupted in any of these ways, our revenues, especially the revenues of our Internet services segment, could be adversely affected resulting in harm to our business.

The Unavailability of Telecommunication Lines Could Threaten Our Business

Our ability to deliver good quality services at competitive prices depends on our ability to obtain access to T-1 and dial-up lines pursuant to pricing and other terms that are acceptable to us. Access to these lines necessary for providing services to a significant portion of our subscribers is obtained from incumbent local exchange carriers like Verizon, SBC and Bell South. In 2005, we have been successful in reaching certain important agreements with each of these carriers providing us with opportunities to expand services and the geographic coverage of such services and predictable prices, avoiding any interruption in service to our customers. In the event that any of the carriers would be unable or unwilling to provide service to us, even if legally required to do so, our ability to service existing customers or add new customers could be adversely impaired in a material manner.

The Federal and State Regulations Under Which Our Payphone Business Operates Could Change, Resulting in Harm to This Business

The enactment of the Telecommunications Act of 1996 significantly altered the regulatory landscape in which payphone companies operate. Although the Telecommunications Act of 1996, as implemented by the FCC, addressed certain historical inequities in the payphone marketplace, uncertainties relating to the impact and timing of the implementation of this framework still exist.

The uncertainty with the greatest potential financial impact relates to revenue from and collectibility of access code calls and toll-free dialed calls, or dial around compensation. Dial around compensation accounts for a material percentage of our revenues.

Historically, many parties legally obligated by the FCC to pay dial around compensation have nevertheless failed to do so. We believe that such failures exist today. While we believe that we would have the right to sue in order to collect amounts owed, such efforts may consume management time and attention and our cash, and there can be no assurance that such efforts would result in the collection of any additional amounts. Consequently, such illegal nonpayment activities may adversely affect our cash flows, receivable collectibility, and future business profitability.

In addition, the December 2004 decision by the Federal Communications Commission to abolish "UNE-P" rules and rates will likely increase local line rates for us. The March 2004 United States Court of Appeals, D.C. Circuit decision to vacate the Federal Communications Commission Unbundled Network Element rules will have an unknown effect on local access pricing for pay telephone providers; however, it is likely that the impact will cause price increases to pay telephone providers.

Our Payphone Division's Revenue Is Subject to Seasonal Variations

Davel's revenue from pay telephone operations is affected by seasonal variations. Since many of its pay telephones are installed outdoors, weather patterns have differing effects on our revenue depending upon the region of the country where the pay telephones are located. For example, the pay telephones installed and operated throughout the Midwestern and eastern United States produce their highest call volumes during the second and third calendar quarters, when the climate tends to be more favorable. Currently, approximately 22% of our 36,000 payphones are located in these regions of the country. Unusually severe weather in these regions could exacerbate the seasonal variations in revenues resulting in adverse effects on our business. In addition, changes in the geographic distribution of Davel's pay telephones in the future may result in differing seasonal variations in our operating results.

Our Common Stock Is Deemed to Be "Penny Stock," Which May Make It More Difficult for Investors to Resell Their Shares Due to Suitability Requirements

Our common stock is deemed to be "penny stock" as that term is defined in Rule 3a51-1 promulgated under the Securities Exchange Act of 1934. A penny stock has the following characteristics:

- It is traded at a price of less than \$5.00 per share;
- It is not traded on a "recognized" national exchange;
- Its price is not quoted on the Nasdaq automated quotation system (Nasdaq-listed stock must still have a price of not less than \$5.00 per share); or
- Its issuer has net tangible assets less than \$2.0 million (if the issuer has been in continuous operation for at least three years) or \$5.0 million (if in continuous operation for less than three years), or has average annual revenues of less than \$6.0 million for the last three years.

Trading of our stock may be restricted by the SEC's penny stock regulations that may limit a stockholder's ability to buy and sell our stock.

The penny stock rules impose additional sales practice requirements on broker-dealers who sell to persons other than established customers and "accredited investors". The term "accredited investor" refers generally to institutions with assets in excess of \$5,000,000 or individuals with a net worth in excess of \$1,000,000 or annual income exceeding \$200,000 or \$300,000 jointly with their spouse. The penny stock rules require a broker-dealer, prior to a transaction in a penny stock not otherwise exempt from the rules, to deliver a standardized risk disclosure document in a form prepared by the SEC that provides information about penny stocks and the nature and level of risks in the penny stock market. The broker-dealer also must provide the customer with current bid and offer quotations for the penny stock, the compensation of the broker-dealer and its salesperson in the transaction and monthly account statements showing the market value of each penny stock held in the customer's account. The bid and offer quotations, and the broker-dealer and salesperson compensation information, must be given to the customer orally or in writing prior to effecting the transaction and must be given to the customer in writing before or with the customer's confirmation. Moreover, broker/dealers are required to determine whether an investment in a penny stock is a suitable investment for a prospective investor. The penny stock rules require that prior to a transaction in a penny stock not otherwise exempt from these rules, the broker-dealer must make a special written determination that the penny stock is a suitable investment for the purchaser and receive the purchaser's written agreement to the transaction.

These disclosure requirements may have the effects of reducing the number of potential investors and the level of trading activity in the secondary market for the stock that is subject to these penny stock rules. Consequently, these penny stock rules may affect the ability of broker-dealers to trade our securities. This may make it more difficult for

investors in our common stock to sell shares to third parties or to otherwise dispose of them. This could cause our stock price to decline. We believe that the penny stock rules discourage investor interest in and limit the marketability of, our common stock.

In addition, the National Association of Securities Dealers, or NASD, has adopted sales practice requirements that may also limit a stockholder's ability to buy and sell our stock. Before recommending an investment to a customer, a broker-dealer must have reasonable grounds for believing that the investment is suitable for that customer. Prior to recommending speculative low priced securities to their non-institutional customers, broker-dealers must make reasonable efforts to obtain information about the customer's financial status, tax status, investment objectives and other information. Under interpretations of these rules, the NASD believes that there is a high probability that speculative low priced securities will not be suitable for at least some customers. The NASD requirements make it more difficult for broker-dealers to recommend that their customers buy our common stock, which may limit investors' ability to buy and sell our stock and have an adverse effect on the market for our shares.

RISKS RELATED TO THIS OFFERING

If the Selling Stockholders Sell Part or All of Their Shares of Common Stock in the Market, Such Sales May Cause Our Stock Price to Decline

After this registration statement is declared effective by the Securities and Exchange Commission, the selling stockholders may sell in the public market up to all of the shares of common stock being registered in this offering, subject to the provisions of “lock-up” agreements executed by Messrs. Wright and Gordon which prohibit the sale or disposition of more than one million (1,000,000) shares of the Company’s common stock during any calendar quarter during their respective employment periods and, with respect to Mr. Wright, an agreement by him not to sell any shares prior to April 2006.

That means that up to 124,082,025 shares of common stock, the number of shares being registered in this offering, may be sold. The number of shares being registered in this offering represents approximately 23.10% of the total number of shares of common stock outstanding upon their issuance. Such sales may cause our stock price to decline.

If the Selling Stockholders Sell a Material Amount of Common Stock, the Significant Downward Pressure on the Price of Our Stock Caused by Those Sales Could Encourage Short Sales by Third Parties, Which Could Contribute to The Further Decline of Our Stock Price

The significant downward pressure on our stock price caused by the sale of stock registered in this offering could encourage short sales by third parties. Such short sales could place further downward pressure on our stock price.

A Large Percentage of the Shares Held by Our Senior Management and Directors Are Fully Vested. These Employees And Directors May Not Have Sufficient Financial Incentive to Stay with Us

This offering registers a large percentage of the shares held by our executive officers and directors. While we are not aware of any plans of any officer or director to leave Mobilepro, it is not uncommon for similarly situated officers and directors to leave a company after they are able to sell a sufficient number of shares to meet their individual financial goals, which time frame may be accelerated if the shares appreciate in value. Our officers and directors may be similarly disposed.

SELLING STOCKHOLDERS

The following table presents information with respect to the selling stockholders and the shares of our common stock that they may offer with this Prospectus. To our knowledge, except as described below, the selling stockholders have not, or within the past three years have not had, any position, office or other material relationship with us or any of our affiliates. The share information provided in the table below is based on information provided to us by the selling stockholders on or about December 31, 2005.

We calculated beneficial ownership according to Rule 13d-3 of the Exchange Act as of this date. Beneficial ownership generally includes voting or investment power with respect to securities. Shares of common stock that may be obtained within 60 days of December 31, 2005 are deemed to be beneficially owned by the person holding such securities that are convertible or exchangeable into shares of common stock for the purpose of computing the percentage of ownership of such person, but are not treated as outstanding for the purpose of computing the percentage ownership of any other person.

The selling stockholders may from time to time offer and sell any or all of their shares as listed below. Because the selling stockholders are not obligated to sell their shares, and because they may also acquire publicly traded shares of our common stock, we cannot estimate how many shares the selling stockholders may beneficially own after this offering. However, for presentation of the data in the table below, we have estimated the number of shares of our common stock beneficially owned after the completion of the offering based on the assumptions that the selling stockholders exercise the outstanding stock options and warrants described below, convert the outstanding debentures described below and sell all of the shares being offered. We may update, amend or supplement this Prospectus from time to time to update the disclosure in this section. The following table presents information regarding the selling stockholders.

Selling Stockholder	Total Shares Beneficially Owned Before Offering	Percentage of Outstanding Shares Beneficially Owned Before Offering (1)	Contingent Shares Not Considered Beneficially Owned	Shares to be Sold in the Offering	Percentage of Outstanding Shares Beneficially Owned After Offering (1)

- (1) The percentage of outstanding shares is based on 432,161,236 shares of common stock outstanding on December 31, 2005, together with shares deemed beneficially owned by each such stockholder. Beneficial ownership is determined in accordance with the rules of the Securities and Exchange Commission and generally includes voting or investment power with respect to securities. Shares of common stock that may be obtained within 60 days of December 31, 2005 are deemed to be beneficially owned by the person holding such securities that are convertible or exchangeable into shares of common stock for the purpose of computing the percentage of ownership of such person, but are not treated as outstanding for the purpose of computing the percentage ownership of any other person.

(2)

The Bethell Family Trust received a total of 10,000,000 shares of our common stock, 6,000,000 shares on July 13, 2005 and 4,000,000 shares on August 24, 2005, in connection with our acquisition of American Fiber Network, Inc. Doug Bethell, the former CEO of AFN continues as President of AFN subsequent to our acquisition. Mr. Bethell maintains investment and voting control of the Bethell Family Trust.

- (3) Paul Sadler, the former owner of Clover Computer Corporation, holds 2,200,000 shares of our common stock that were acquired upon his conversion of a convertible note, in the principal amount of \$271,131.85, plus accrued interest, in the amount of \$10,221.30, and the settlement of a second note, in the principal amount of \$253,834.11, on June 23, 2005. Both notes were issued in connection with our acquisition of Clover. The convertible note had a maturity date of July 6, 2006, carried interest at an annual rate of 4.00%, and was convertible into shares of our common stock at any time during the term at a price of \$0.20 per share. The second note was due on July 6, 2006, carried interest at the annual rate of 7.00%, and was converted into shares of our common stock at a conversion price of \$0.32 per share.
- (4) These former owners of The River Internet Access Co., acquired by us in September 2004, hold 1,846,733 shares of our common stock that were issued on October 6, 2005 upon the conversion of debentures received by them in connection with the acquisition. The debentures had a maturity date of September 16, 2006, carried interest at the annual rate of 3.00%, and were convertible into shares of our common stock at any time during their terms at \$0.20 per share. The debenture principal amounts were subject to downward adjustments pending the results of an acquisition audit or the occurrence of any damages as defined in the merger agreement.
- (5) Cornell Capital holds a \$15.5 million debenture convertible into 51,666,667 shares of our common stock (see Note 3 to the Condensed Consolidated Financial Statements as of September 30, 2005 included elsewhere in this Prospectus) and a warrant to purchase 6,000,000 shares of our common stock, both dated May 13, 2005, and provides equity financing to us through the \$100 million Standby Equity Distribution Agreement. In connection with the negotiation of the SEDA, Cornell Capital received 7,990,000 shares of our common stock on June 7, 2005, 4,995,000 of which are being registered herein. Mark Angelo maintains investment and voting control of these shares. For presentation purposes above, the shares of our common stock issuable upon the conversion of the debenture that would result in ownership greater than 4.99% are not considered beneficially owned by Cornell Capital at December 31, 2005. Pursuant to the terms of the debenture, conversion of the debenture for a number of shares in excess of that number of shares which, upon giving effect to such conversion, would cause the aggregate number of shares beneficially owned by Cornell Capital to exceed 4.99% of our outstanding shares following such conversion requires at least 65 days prior notice. No such notice has been received by us. Upon the receipt of such notice, conversion could occur pursuant to the terms of the debenture with Cornell Capital becoming the beneficial owner of the shares.
- (6) Includes warrants to purchase shares of our common stock that were issued on November 15, 2004 to Airlie Master Opportunity Fund, Ltd., the source of the Davel bridge financing, and the brokers involved with the arrangement of this loan. Dort Cameron and Seth Cameron maintains investment and voting control of the Airlie Fund.
- (7) Steven Feinberg maintains investment and voting control of Ableco Finance, LLC.
- (8) Lynn Tilton maintains investment and voting control of ARK-CLO 2000-1, Limited.
- (9) Matthew Kimble maintains investment and voting control of Avenue Special Situations Fund, II, LP.
- (10) Everett Schenk maintains investment and voting control of BNP Paribus.
- (11) Steven Feinberg maintains investment and voting control of Cerberus Partners, L.P.

- (12) Dennis Archer maintains investment and voting control of Foothill Partners III.
- (13) Sheila Finnerty maintains investment and voting control of Morgan Stanley Prime Income Trust.
- (14) Frank Devine maintains investment and voting control of PNC Bank N.A.
- (15) James P. Cecil maintains investment and voting control of U.S. Bank, N.A.

- (16) Scott Diehl maintains investment and voting control of Wells Fargo Foothill, Inc.
- (17) Includes warrants to purchase shares of our common stock that were issued on November 15, 2004 to certain lenders in connection with our acquisition of 100% of the senior secured debt of Davel and an assignment by those lenders of their shares of Davel's common stock representing approximately 95% of Davel's issued and outstanding common stock.
- (18) Thomas Mazerski, a founder and the President and CEO of CloseCall prior to our acquisition, currently serves as Chief Executive Officer of Close Call.
- (19) Includes warrants to purchase 3,500,000 shares of our common stock that were issued on October 15, 2004 to the former owners of CloseCall America in connection with its acquisition by us.
- (20) Martin Levetin, a former owner of Evergreen Open Broadband Corporation, received a warrant to purchase 600,000 shares of our common stock on April 21, 2005 in connection with our acquisition of Evergreen. Currently, Mr. Levetin serves as a Vice President in our NeoReach Wireless organization in the area of business development.
- (21) Includes warrants to purchase 2,000,000 shares of our common stock and warrants to purchase 1,500,000 shares of our common stock that were awarded to Geoffrey Amend, who currently serves as our General Counsel and corporate Secretary, on November 1, 2004 and April 20, 2005, respectively.
- (22) Includes warrants to purchase common stock issued to each member of our board of advisors as follows - Messrs. Silverman and Tarter were each issued a warrant to purchase 1,000,000 shares of our common stock on January 1, 2004 and July 20, 2004, respectively; Messrs. Bouts and Gunther were each issued a warrant to purchase 800,000 shares of our common stock on January 1, 2004 and June 28, 2004, respectively; Dr. Bowman and Mr. Otto were each issued a warrant to purchase 250,000 shares of our common stock on February 17, 2005; and Mr. Kleeman was issued a warrant to purchase 250,000 shares of our common stock on May 17, 2005.
- (23) Includes a warrant to purchase 750,000 shares of our common stock awarded to Hank Deily, who currently serves as our Corporate Controller, on June 20, 2005.
- (24) Includes a warrant to purchase 2,000,000 shares of our common stock awarded to John Dumbleton, who until his employment with us ended January 15, 2006, served as our Executive Vice President, Sales and Business Development, on January 17, 2005.
- (25) Includes a warrant to purchase 1,500,000 shares of our common stock awarded to Kurt Gordon, who currently serves as our Chief Financial Officer, on April 1, 2005.
- (26) Includes a warrant to purchase 200,000 shares of our common stock issued on February 1, 2003 to Hawk Associates, Inc., a firm that currently provides investor and public relations services to us.
- (27) Includes a warrant to purchase 800,000 shares of our common stock awarded on January 1, 2004 to John von Harz, a former member of our board of advisors, who currently serves as a Vice President of our NeoReach Wireless organization in the area of business development.
- (28) Includes warrants to purchase 3,500,000 shares of our common stock awarded on June 10, 2004 to Kevin Kuykendall who served as President of our voice business segment from June 2004 through December 2004.

- (29) Includes warrants to purchase common stock issued to each outside member of our Board of Directors as follows - Mr. O'Neil was issued warrants to purchase 800,000 shares of our common stock on January 1, 2004 and warrants to purchase 250,000 shares of our common stock on June 16, 2005; Mr. MacFarland was issued warrants to purchase 800,000 shares of our common stock on March 1, 2004 and warrants to purchase 250,000 shares of our common stock on June 16, 2005; and Mr. Sledge was issued warrants to purchase 500,000 shares of our common stock on January 19, 2005 and warrants to purchase 250,000 shares of our common stock on June 15, 2005.
- (30) Includes a warrant to purchase 1,500,000 shares of our common stock awarded on April 20, 2005 to Tammy Martin, formerly the General Counsel of Davel, who currently serves as its Chief Executive Officer.
- (31) Includes shares issuable upon the exercise of a warrant to purchase our common stock that was granted in July 2004 connection with the provision of investor relations services.
- (32) Includes a warrant to purchase 3,000,000 shares of our common stock awarded on January 1, 2005 to Bruce Sanguinetti, the former President and Chief Executive of NeoReach.
- (33) Includes a warrant to purchase 5,000,000 shares of our common stock awarded on April 1, 2005 to Jay O. Wright who currently serves as our President and Chief Executive Officer; Mr. Wright also serves as Chairman of our Board of Directors.
- (34) Mark Norris currently serves as Chief Financial Officer of our voice business segment on a temporary basis.
- (35) Includes options to purchase 500,000 shares of our common stock and warrants to purchase 1,500,000 shares of our common stock that were awarded to Mr. Mazursky on October 18, 2004 and April 20, 2005, respectively.
- (36) Includes shares of our common stock that will become exercisable pursuant to the terms of outstanding stock warrant and stock option agreements beyond 60 days from December 31, 2005. Consequently, these shares are not considered beneficially owned by the holder of the stock warrant or option on December 31, 2005.
- (37) William Dioguardi, President of Spencer Trask Ventures, Inc., maintains investment and voting control of these shares.
- (38) Gabriel Montessus maintains investment and voting control of these shares.

FORWARD-LOOKING STATEMENTS

Information included or incorporated by reference in this Prospectus may contain forward-looking statements. This information may involve known and unknown risks, uncertainties and other factors which may cause our actual results, performance or achievements to be materially different from the future results, performance or achievements expressed or implied by any forward-looking statements. Forward-looking statements, which involve assumptions and describe our future plans, strategies and expectations, are generally identifiable by use of the words “may,” “should,” “expect,” “anticipate,” “estimate,” “believe,” “intend” or “project” or the negative of these words or other variations on words or comparable terminology. This Prospectus contains forward-looking statements, including statements regarding, among other things, (a) our projected sales and profitability, (b) our growth strategies, (c) anticipated trends in our industry, (d) our future financing plans and (e) our anticipated needs for working capital. These statements may be found under “Description of Business” and “Management’s Discussion and Analysis or Plan of Operations” as well as in other places in this Prospectus. Actual events or results may differ materially from those discussed in forward-looking statements as a result of various factors, including, without limitation, the risks outlined under “Risk Factors” and matters described in this Prospectus generally. In light of these risks and uncertainties, there can be no assurance that the forward-looking statements contained in this Prospectus will in fact occur.

DESCRIPTION OF BUSINESS

The Company

We are a broadband wireless, telecommunications, and integrated data communication services company. We deliver a comprehensive suite of voice and data communications services, including local exchange, long distance, enhanced data, Internet, wireless and broadband services to our end-user customers. We are focused on growing our current customer bases, deploying wireless networks, acquiring and growing profitable telecommunications and broadband companies, and forging strategic alliances with well positioned companies with complementary product lines and in complementary industries.

We market and sell our integrated communications services through 11 branch offices in eight states and we service over 222,000 equivalent subscriber lines including approximately 142,000 local and long-distance telephone lines, 50,000 dial-up lines, 5,000 broadband lines, and over 25,000 wireless customers. We own and operate approximately 36,000 payphones predominantly located in 42 states and the District of Columbia.

Our revenues are generated through three of our four business reporting segments that are described as follows:

Wireless Networks Our broadband wireless network deployment efforts are being conducted by our wholly-owned subsidiary, NeoReach, Inc. (“NeoReach”), and its subsidiary, NeoReach Wireless, Inc. (“NeoReach Wireless”). This operation is concentrating its efforts on the deployment of municipally sponsored wireless access zones. This segment also includes the operations of our 51%-owned subsidiary, Kite Broadband LLC (“Kite”), a wireless broadband Internet service provider located in Ridgeland, Mississippi.

Voice Services Our voice services segment is led by CloseCall America, Inc. (“CloseCall”), a Competitive Local Exchange Carrier (“CLEC”) based in Stevensville, Maryland; American Fiber Network, Inc. (“AFN”), a CLEC based in Kansas City, Kansas; and Davel Communications, Inc. (“Davel”), an independent payphone provider based in Cleveland, Ohio. CloseCall offers our customers a full array of telecommunications products and services including local,

long-distance, 1.800CloseCall anytime/anywhere calling, digital wireless, high-speed telephone (voice over IP), and dial-up and DSL Internet services. AFN is licensed to provide local telephone, long distance and/or Internet services throughout the United States. Davel is one of the largest independent payphone operators in the United States.

Internet Services Our internet services segment is led by DFW Internet Services, Inc. (“DFW”, doing business as Nationwide Internet), an Internet services provider based in Irving, Texas, and its acquired Internet service provider subsidiaries. Our Internet services segment provides broadband and dial-up Internet access, web-hosting services and related Internet services to business and residential customers in over 40 states.

Corporate Our corporate reporting segment serves as the holding company of the operating subsidiaries that are divided among the other three business reporting segments, provides senior executive and financial management, and performs corporate-level accounting, financial reporting and legal functions. Occasionally, its employees may provide services to customers resulting in the recognition of consulting service revenues.

Revenues for the reportable business segments for the fiscal year ended March 31, 2005 and the six months ended September 30, 2005 were as follows:

Business Segment	Fiscal Year Ended March 31, 2005		Six Months Ended September 30, 2005	
	\$s	% of Revenues	\$s	% of Revenues
Voice	\$ 32,009,084	68.8%	\$ 37,796,032	77.1%
Internet Services	13,884,060	29.9	7,861,019	16.0
Wireless Networks	-	-	3,395,444	6.9
Corporate	615,000	1.3	-	-
Total Revenues	\$ 46,508,144	100.0%	\$ 49,052,495	100.0%

15

Mobilepro Corp. ("Mobilepro Corp.") was incorporated under the laws of Delaware on July 14, 2000 and, at that time, was focused on the integration and marketing of complete mobile information solutions that satisfied the needs of mobile professionals. In June 2001, Mobilepro merged with and into CraftClick.com, Inc. ("CraftClick"), with CraftClick remaining as the surviving corporation. The name of the surviving corporation was subsequently changed to Mobilepro Corp. on July 9, 2001. CraftClick had begun to cease its business operations in October 2000, and ultimately disposed of substantially all of its assets in February 2001.

On March 21, 2002, Mobilepro entered into an Agreement and Plan of Merger with NeoReach, a private Delaware company, pursuant to which a newly formed, wholly owned subsidiary of Mobilepro merged into NeoReach in a tax-free transaction. The merger was consummated on April 23, 2002. As a result of the merger, NeoReach is now a wholly owned subsidiary of Mobilepro.

DFW is the principal operating subsidiary within our Internet services division. On January 20, 2004, we acquired DFW. We have subsequently acquired an additional nine Internet service businesses which operate under DFW.

On October 15, 2004, we closed our acquisition of CloseCall, which further established our commitment to the provision of voice services. One month later, we closed our acquisition of Davel. CloseCall and Davel are the two largest revenue-generating subsidiaries in our voice services division.

Our principal executive offices are located at 6701 Democracy Boulevard, Suite 202, Bethesda, Maryland 20817 and our telephone number at that address is (301) 315-9040. We maintain a corporate web site at www.mobileprocorp.com. We make available free of charge through our web site our annual report on Form 10-KSB, quarterly reports on Form 10-QSB, current reports on Form 8-K, and all amendments to those reports, as soon as reasonably practicable after we electronically file or furnish such material with or to the SEC. The contents of our web site are not a part of this report. The SEC also maintains a web site at www.sec.gov that contains reports, proxy statements and other information relating to Mobilepro.

Geographic Markets

Through our various businesses, we provide service to customers located throughout the United States. However, certain portions of our consolidated business are concentrated in certain geographic markets.

For example, the business of CloseCall, that represented approximately 37% of the revenues of the voice services segment in the six months ended September 30, 2005, is concentrated in the mid-Atlantic region of the country.

Although Davel, that represented approximately 59% of the revenues of the voice services segment in the six months ended September 30, 2005, has payphones located across the United States, 41% of the payphones are located in the southeast states of Florida, Georgia, South Carolina, North Carolina and Virginia; 22% of the payphones are located in Midwest and eastern sections of the country, with usage thereby affected by climate; and 12% of the payphones are located in the southwest states of Texas, Arizona and New Mexico.

The Internet services business, that represented approximately 16% of our consolidated revenues for the six months ended September 30, 2005, provides service to customers that are primarily located in the states of Texas, Arizona, Louisiana, Kansas, Missouri, Wisconsin and Ohio.

Recent Developments

Significant accomplishments since the beginning of the current fiscal year included, among other achievements, expanding our voice services and wireless networks businesses through the consummation of four acquisitions, beginning the deployment of the broadband wireless network in Tempe, Arizona, obtaining a controlling interest in a company that will supply broadband wireless services to customers of Sprint Communications Company ("Sprint"),

being selected by the city of Sacramento, California, for the deployment, ownership and management of its planned broadband wireless network, and the refinancing of a \$13 million acquisition bridge loan.

Wireless Networks

In April 2005, we were selected by the city of Tempe, Arizona, to deploy, own and manage a city-wide broadband wireless access network covering 40 square miles and serving a population of approximately 160,000 people. The network is expected to reach approximately 65,000 households, 1,100 businesses, 50,000 students and the annual visitors to Tempe. The network will also provide municipal services to the city's police, fire, emergency, and administrative personnel, and the staff, faculty and students of Arizona State University.

In May 2005, the foundation of our operation in Tempe was obtained when NeoReach Wireless acquired Transcordia, LLC, d/b/a/ WazAlliance, a network of metro-wide commercial and residential wireless Internet access zones for a purchase price, subject to post closing adjustments, of \$257,500, payable in the form of \$188,500 in common stock and \$69,000 cash. We have expanded this operation as it focuses its efforts on the design and deployment of the Tempe wireless network.

In June 2005, we acquired Evergreen Open Broadband, a wholesale wireless Internet service provider based in Boston, for 1,505,360 shares of our common stock valued in the amount of approximately \$231,000 and the assumption of approximately \$30,000 in certain liabilities, in order to cultivate and manage relationships with regional and national ISPs targeting retail wireless customers. Evergreen provides to us a developed scoring model that we now utilize to evaluate municipal wireless network opportunities. The model considers a variety of factors in the areas of demographics, climate and topography in rating a city as a desirable opportunity for our business development activities. Evergreen will operate as part of NeoReach Wireless. Evergreen has actively participated in our bidding for Tempe and approximately 20 other city-wide wireless network opportunities that are either pending or under consideration.

In June 2005, we received a 51% ownership interest in Kite with the investment of \$3,825,000 cash. On June 30, 2005, Kite executed a Master Agreement for Services with Sprint under which Kite shall provide services to Sprint's broadband customers in fourteen (14) metropolitan markets for a period of three years utilizing the Sprint mark. The customers remain Sprint customers during the three-year term of the agreement. Upon expiration of the agreement, Kite will have the option to acquire the then existing customers pursuant to the terms of the agreement. All network and spectrum assets will remain the property of Sprint. Since June 30, 2005, Kite has generated revenues of approximately \$3,385,000; our 51% share of Kite's net income for the quarter ended September 30, 2005 was \$185,633.

We completed the quarter with the announcement of our second major municipal wireless network award. On September 20, 2005, we reported that a selection committee for the city of Sacramento, California (a city with a population of approximately 465,000 people), chose NeoReach Wireless to design, deploy, own and operate a metro-wide broadband wireless network. We have signed a memorandum of understanding covering a pilot deployment and we have begun the negotiation of a definitive contract covering the entire project. The proposed network will initially cover Sacramento's downtown, Old Town and state capital areas, about 10 square miles, and we anticipate that it will grow to cover other areas of the city in future phases.

Finally, we executed a letter of intent to acquire the remaining 49% of Kite Broadband, LLC that we do not already own and 100% of Kite Networks, Inc. In connection with completing these transactions, Jerry Sullivan, CEO of Kite Networks, will become CEO of NeoReach Wireless.

Voice Services

During the current year, activities at CloseCall have focused on the expansion of its telecommunications service offerings and the securing of long-term agreements with local exchange carriers.

In the six-month period ended September 30, 2005, we completed five-year commercial agreements with Verizon and SBC covering six and thirteen states, respectively. In addition, we executed a similar agreement with BellSouth covering nine states that runs through December 31, 2007. Completion of these agreements 1) allows the expansion of CloseCall's overall geographic market, and the expansion and bundling of service offerings in these states, including Florida, and 2) provides predictability of the pricing of wholesale services provided to us by these carriers during the terms of the agreements.

In June 2005, CloseCall launched a new cellular service called TommyWireless. This service targets teen, pre-teen and other prepaid cell-phone users combining many features in a basic service package, including parent/user controls, and offering enhanced packages including free nights and weekends and anytime minutes, and provides parents with the ability to manage the cell phone usage of their children. Recently, CloseCall announced that it has begun to sell its cellular service in nine new markets bringing the total to twenty states plus the District of Columbia, providing subscribers with nationwide coverage. We have the ability to provide nationwide service as we resell to our customers cellular phone service that is provided to us by an incumbant wireless service provider. Included in this announcement was an offer of a bundled service package called CloseKnit Wireless that would provide free cellular service for two years for a bundled monthly rate to customers who switch their local and long distance services to CloseCall America or other Mobilepro affiliate. This program has been enhanced to include, as an alternative, the offer of free DSL installation and service for one year to customers who choose the CloseKnit bundled service package.

During the six-month period ended September 30, 2005, we completed two acquisitions intended to add revenue profitably and licensed coverage areas. On June 30, 2005, we acquired AFN, a company licensed to provide local, long distance and/or Internet service throughout the United States that adds 15,000 customer lines to our customer base. AFN is focused on four major customer segments - hotels and resorts, corporate housing, resort-area property management and other business services. The purchase consideration was \$3,000,000, including 10,000,000 shares of our common stock and a cash payment of \$1,500,000. Since its acquisition on June 30, 2005, AFN has provided revenue of approximately \$1,632,000 and contributed net income of \$590,914. This income was favorably affected by the timing of costs and expenses incurred by AFN's affiliated service company during 2005. The service agreement terminated on October 31, 2005. In September 2005, AFN acquired the assets of AllCom USA and their long distance and T-1 customers for \$300,000 cash, providing an additional customer base for bundled services. This acquisition is expected to increase our annual revenues by approximately \$1,200,000.

On September 30, 2005, Davel sold the majority of the payphones and certain related assets and liabilities of its Bronx, New York, field service office, representing 2,204 payphones, for a net selling price of \$962,246. We recognized a \$91,373 gain on the sale of the net assets, but we incurred \$144,073 of exit and disposal activity costs associated with the closing of the field service office resulting in a net loss of \$52,700. Davel also entered into agreements with the purchaser of its payphones to acquire certain of their payphones in Florida and to maintain, service and collect Davel's remaining payphones in the New York City area. On September 30, 2005, Davel acquired 2,240 payphones located in Florida from the purchaser for a net purchase price of \$784,000. We expect that the purchase of the payphones in Florida will allow us to maintain the level of revenues at a reduced level of operating expenses.

Internet Services

During the current year, the activities of this operation have focused on the integration of the operations of the acquired companies comprising this business segment. These integration efforts are now being led by James L. Magruder, an experienced telecommunications executive who joined us in September 2005. The efforts are focused on combining service offerings, consolidating network operations and customer support locations, and reducing operating costs. An indication of progress in this area is that the Internet services segment reported a net income of \$277,183 for

the current quarter, a 21% increase over the previous quarter, despite a net 5% downward churn in revenues. The success of our overall growth strategy depends, in part, on our ability to transition customers to new Internet access services, especially broadband wireless. However, at present, dial-up subscribers represent the largest group of customers of the Internet services group. The erosion of this customer base is likely to continue until our new efforts to transition these customers to enhanced services become more effective.

During the six months ended September 30, 2005, through cash payments and the conversion of note amounts into shares of our common stock, we retired notes payable related to ISP acquisitions in the amount of approximately \$1,608,000, including negotiated note reductions of approximately \$220,000 relating to post closing purchase price adjustments.

On November 1, 2005, we announced the acquisition of InReach Internet, an Internet services provider located in Stockton California. Besides adding annual revenue expected to approximate \$5,700,000. InReach provides a base of operations for the Sacramento municipal wireless network. The purchase price for InReach, before any post closing adjustments, included \$2,116,873 in cash and 4,357,798 shares of common stock valued at \$950,000.

Corporate Activities

Since the beginning of the current fiscal year, we have continued to strengthen our balance sheet in order to provide capital for acquisitions, for our NeoReach Wireless operating needs, including the capital expenditures related to the build-out of municipal broadband wireless networks, and to improve our liquidity. We have increased stockholders' equity to over \$37,000,000 with a cash balance of \$7,860,528 at September 30, 2005. Total debt has been reduced from a balance of approximately \$26,534,000 at March 31, 2005 to a balance of \$23,036,000 at September 30, 2005. We are looking for opportunities to further improve those positions.

We extended debt maturities and reduced our interest cost in May 2005 when we issued a convertible debenture in the aggregate amount of \$15,500,000 million to Cornell Capital Partners, LP ("Cornell Capital"). We used a significant portion of the proceeds to pay in full the remaining \$13,000,000 balance of a note payable that bore interest at the rate of 23% and was due on November 15, 2005. The retired note was the source of bridge financing for our acquisition of Davel. The debenture is payable in installments over a three-year period, with only \$3,000,000 classified as a current liability at September 30, 2005, and bears interest at an annual rate of 7.75%.

In September 2005, the stockholders approved 1) an amendment to our certificate of incorporation that increased the authorized number of shares of common stock from 600 million to 1.5 billion shares and the authorized number of preferred shares from 5,035,425 to 20,035,425, and 2) an increase in the number of shares of our common stock available for award under our employee stock option plan from 1 million to 30 million.

Wireless Networks

Municipally Sponsored Broadband Wireless Networks

In August 2005, we executed a definitive, five-year agreement, also including two five-year extensions, with the city of Tempe Arizona, for the deployment, ownership and management of a wireless network. We have begun to acquire paying customers in Tempe and the deployment is scheduled to be completed by February 2006. In order to complete the Tempe network, we estimate that capital expenditures will approximate \$1,800,000 including the development of the deployment plan, networking equipment (i.e., antennas, transmitters and network routers) and equipment installation. As of December 31, 2005, we had approximately forty (40) customers paying monthly subscription fees.

We believe that the Tempe broadband wireless network project, covering 40 square miles and serving a population of approximately 160,000 people, is one of the first of its kind by providing a cost-effective alternative to residential dial-up service and local area hot-spot wireless access and serving as an alternative and/or complement to DSL and cable. Wireless Internet access will be available in these areas on a fixed and mobile basis, to the city, and to residents, businesses, students and visitors. The completed network will enable a range of free and fee-based services and provide secure high-speed access to data, voice and video throughout the coverage area. Subscription services will be offered on a monthly, daily and hourly basis and will allow access to multiple Internet service providers. The user start-up splash page for the network will be sponsored by the Arizona Republic pursuant to an agreement with us that was announced on October 11, 2005. In summary, we have agreed to share any revenues related to the placement of advertising on the splash page on a 50/50 basis. Although no material revenues have yet been generated, we are hopeful that this agreement and other similar agreements that we may negotiate in the future will provide a significant new source of revenues.

We intend that the Tempe network represents an open platform, offering freedom of service choices to subscribers over a mixture of public, restricted and licensed bands. Our target customers are retail Internet service providers that would provide e-mail messaging, VoIP, web-hosting and emergency services to subscribers. Although we do not yet have any such agreements at this time, we expect to receive a majority of subscriptions pursuant to service agreements with major retail service providers that will, most likely, provide payments to us based on the actual amount of network usage. We plan to operate the network, and host the splash page, free service and hospitality. As a result, we expect low customer acquisition costs, rapid increases in the number of subscribers and reduced churn.

Because of the increased pace in the emergence of municipal wireless networking opportunities, we have accelerated our business development efforts in this market that did not exist three years ago. Our internal year-end municipal wireless network opportunity report included approximately eighty (80) opportunities at various stages of pre-award activity. However, we do not respond to all opportunities. We have developed a metro scoring methodology that we use to evaluate opportunities. Factors considered include demographics, topography, climate and other business factors. The securing of a city contract is a multi-step process that can take over six months to complete, including a pilot demonstration, the RFP preparation, response and evaluation, contract negotiation, development of the deployment plan, and equipment installation and testing.

The city of Sacramento, California (population of approximately 465,000 people) and the cities of Chandler, Arizona; Farmers' Branch, Texas; Akron, Ohio; and Cuyohoga Falls, Ohio, have also selected us for the proposed deployment, ownership and management of their planned wireless networks. Currently, we are negotiating definitive contracts and/or developing pilot deployments with these municipalities. We are aware of five other publicly-announced municipal wireless network projects that we have lost including Philadelphia, Pennsylvania, that was awarded to Earthlink, and Minneapolis, Minnesota, and Portland, Oregon, where we were not included as a finalist for the pending awards.

Kite Broadband LLC

In June, 2005, we participated in the formation of Kite, a wireless broadband Internet service provider, resulting in the 51% ownership of this venture. Kite intends to establish a nationwide presence through the pursuit of acquisitions and other growth opportunities in the wireless broadband industry. We executed a letter of intent to acquire the remaining 49% of Kite that we do not already own and 100% of Kite Networks, Inc.

As stated above, on June 30, 2005, Kite executed a Master Agreement for Services with Sprint under which Kite shall provide services to Sprint's broadband customers in fourteen (14) metropolitan markets for a period of three years utilizing the Sprint mark. The agreement covers, among other things, the provisioning of certain customer-facing services, such as customer operations and call center management, sales, marketing, billing, collection, installation and repair. Kite is entitled to have Sprint remit collected customer revenues in exchange for these services and remit a monthly fee back to Sprint for network support and transport services. Since June 30, 2005, Kite has generated revenues of approximately \$3,385,000; our 51% share of Kite's net income for the quarter ended September 30, 2005 was \$185,633.

The agreement with Sprint established us as a leading wireless broadband company in North America by providing approximately 20,000 subscribers to our RF broadband wireless service. Based on the results of a recently published survey in the September / October 2005 issue of Broadband Wireless Business of the leading U.S. wireless service providers, the next nearest competitor was estimated to service approximately 15,000 subscribers.

Research and Development

Development efforts related to certain wireless networking technologies are being conducted by NeoReach, in particular, our ongoing ZigBee chip development work. The objective of the Zigbee development effort is to make the technologies ready for sale or licensing on an OEM basis. Currently, we are not working towards incorporating the technologies into commercial products. In the six months ended September 30, 2005, we incurred research and development costs of approximately \$89,000 in connection with this effort. The development of these technologies is unrelated to the deployment, ownership and management of the broadband wireless networks in Tempe or Sacramento. There can be no assurance that we will succeed in selling or licencing any of these technologies.

NeoReach is currently developing a semiconductor chip for use in home networking and selected industrial monitoring applications based on the ZigBee standard. ZigBee is an IEEE standard (802.15.4) developed for certain low power, short-range devices.

Prior to December 2003, NeoReach was focused on developing wireless modem solutions to support third generation wireless communications systems based on the worldwide wideband - code division multiple access, "W-CDMA," standard. Third generation technology features integrated voice and data, access to high-speed Internet and intranet applications, interactive e-mail, data exchange, global roaming and full motion video transmission-all delivered to a mobile device such as a cellular phone, personal data assistant, "PDA," or laptop. Because of the substantial financial and other resources required to develop these modem solutions and bring them to market, NeoReach suspended its development efforts on the modem device in order to focus on development of the ZigBee chip.

To directly capitalize on our wireless technology assets, we are pursuing a two-pronged plan. First, we are seeking alliance partners to leverage our five patents that cover existing wireless antenna intellectual property. Our most recent patent application with commercial applicability to the cellular phone, PDA and mobile device industry was filed in September 2004. That application covered 28 claims with broad applicability to cell phones, PDAs and other devices that rely on radio-frequency transmissions for data and voice interchange. Our efforts related to our latest technological developments are focused on reducing the "noise" associated with the translation of an RF signal into usable sound or other signal by taking previously ignored aspects of an RF signal and utilizing them to achieve greater clarity. We continue to focus our research and development efforts on these wireless technologies and the worldwide cell phone and PDA market. Second, we are moving forward with our planned Zigbee chip development. In October 2004, we completed the design of our first ZigBee wireless semiconductor chip. Our chip design for the so-called "RF

layer,” or “physical layer,” was converted into a prototype chip at a facility in Taiwan. We filed a patent application covering certain aspects of our chip’s design in April 2004. The ZigBee Standard itself is public domain and therefore not patentable. Work is also proceeding on the design of a separate 900 MHz ZigBee Chip.

Zigbee represents the next generation of standards-based, reliable, ultra low power, scaleable and secure communications specifically designed to support a wide range of new applications in the areas of home automation, monitoring and remote control systems, data telemetry, toys and selected wireless security applications. In June 2004, we reached an agreement with RF Microelectronics Laboratory of the Information and Communications University of the Republic of Korea to jointly develop our Zigbee RF transceiver chip.

As of September 15, 2005, NeoReach had filed a total of eight patent applications with the U.S. Patent and Trademark Office (PTO) in the areas of “Smart Antenna” technology and RF Transceiver Chip Design for “Low Noise Amplifier for wireless communications.” As of September 15, 2005, we have been granted approval of five patents in the area of “Smart Antenna” technology and three patent applications are still pending approval. The five approved patents are as follows:

1. “Smart Antenna with Adaptive Convergence Parameter” with PTO Patent Number 6,369,757, issued April 9, 2002.
2. “A Smart Antenna with No Phase Calibration for CDMA Reverse Link” with PTO Patent Number 6,434,375, issued August 13, 2002.

3. "PN Code Acquisition with Adaptive Antenna Array and Adaptive Threshold for DS-CDMA Wireless Communication" with PTO Patent Number 6,404,803, issued June 11, 2002.
4. "New Cellular Architecture for Code Division Multiple Access SMOA Antenna Array Systems" with PTO Patent Number 6,459,895, issued October 1, 2002.
5. "Direction of Arrival Angel Tracking Algorithm for Smart Antennas" with PTO Patent Number 6,483,459, issue date November 19, 2002.

The three patents pending approval are as follows:

1. "Improvement of PN Code Chip Time Tracking with Smart Antenna," a patent application filed on February 6, 2002 is pending - awaiting first Office Action from United States Patent and Trademark Office.
2. "Low Noise Amplifier for Wireless Communications," a patent application filed on April 7, 2004 is pending - awaiting first Office Action from the United States Patent and Trademark Office.
3. "Voltage Controlled Oscillator using Complementary Transistors," a patent application filed on September 15, 2004 is pending - awaiting first Office Action from the United States Patent and Trademark Office.

Voice Services

Competitive Local Exchange Carrier Business

Overview

Our efforts in the competitive local exchange carrier business are led by CloseCall, a company that we acquired in October 2004 and AFN, a company we acquired in June 2005. CloseCall and AFN offer our customers a full array of telecommunications products and services including local, long-distance, 1.800CloseCall anytime/anywhere calling, digital wireless, high-speed telephone (voice over IP), and dial-up and DSL Internet services.

Our entrance into this business began with two acquisitions consummated in the summer of 2004. In June 2004, we acquired US1Telecommunications, Inc. ("US1"), a long distance provider located in Kansas. In July 2004, we completed our acquisition of C.Y.L.K., Inc., d/b/a Affinity Telecom ("Affinity"), a Michigan-based CLEC and long distance carrier. The operations of US1 and Affinity have been integrated into the operations of AFN and CloseCall, respectively. For the time being, we intend for AFN to operate on a standalone basis. However, the operating results of both AFN and ClosCall are included in our voice business segment.

On June 24, 2005, CloseCall filed its first provisional patent application with the U.S. PTO: "System and Method for Secure Web-Based Mobile Phone Parental Controls".

Business Strategy

Our primary objective in the voice division is to be a leading provider of high-quality integrated communications services in each of our major service areas, acting as a reseller of local, long distance, wireless, Internet access and data services to residential customers and small to medium-sized business enterprises. We deliver high-value bundled and individual services tailored to the needs of our customers presented on a single invoice.

During the current year, CloseCall has focused on the expansion of its telecommunications service offerings and the securing of long-term agreements with local exchange carriers. As stated above, in the six-month period ended September 30, 2005, we completed five-year commercial agreements with Verizon and SBC covering six and thirteen

states, respectively. In addition, we executed a similar agreement with BellSouth covering nine states that runs through December 31, 2007. Completion of these agreements 1) allows the expansion of CloseCall's overall geographic market, and the expansion and bundling of service offerings in these states including Florida, and 2) provides predictability of the pricing of wholesale services provided to us by these carriers during the terms of the agreements.

CloseCall has also expanded its advertising programs in the current year. It uses print, signage, radio and television advertising to market services to customers, including fans of certain local professional sports teams, such as the Baltimore Ravens, Ripken Baseball, Aberdeen Ironbirds, Frederick Keys, Bowie Baysox, and the Delmarva Shorebirds.

Our future business strategy will focus on the establishment of effective cross-selling programs in order to leverage the combined customer base of the voice and Internet service provider business segments, the effective delivery of such services and the provision of excellent customer service. CloseCall's combined local and long distance churn measured by terminations of customer subscriber lines is approximately 2% per month compared to an industry average of approximately 5% per month. As part of this effort, we are seeking to increase our penetration of existing markets in which we have, or believe we may achieve, significant operating efficiencies.

Services

This portion of our voice business segment provides service to over approximately 149,000 equivalent subscriber lines, including approximately 98,000 long distance lines and approximately 44,000 local lines. This business also has approximately 6,000 cell phone subscribers and approximately 1,800 Internet access customers. In addition, we have recently begun to offer VoIP telephone service to customers. The majority of our customers in this business segment are residential.

Bundled Services Approach. We offer our integrated communications services in a high-quality bundle to residential customers, and small to medium-sized businesses at attractive prices. When economically advantageous for us to do so, we seek to bundle our integrated communications services. Our targeted customers often will have multiple vendors for voice and data communications services, each of which may be billed separately. Unlike many of these vendors, we are able to provide a comprehensive package of local telephone, long distance, Internet access and other integrated communications services.

Local Services . We offer a wide range of local services, including local voice services, voicemail, universal messaging, directory assistance, call forwarding, return call, hunting, call pick-up, repeat dialing and speed dialing services. We provide our local services primarily over local connections utilizing Incumbent Local Exchange Carrier (ILEC) facilities.

Long Distance Services . We offer both domestic and international switched and dedicated long distance services, including “1+” outbound dialing, inbound toll-free and calling card services. Many of our customers prefer to purchase our long distance services as part of a bundle that includes some of our other integrated communications services offerings. We also offer for convenience an away from home or business service using our own network platform with 1.800.CloseCall.

High Speed Internet Access via Digital Subscriber Line . We offer xDSL combined with our local service in selected markets. DSL technology provides continuous high-speed local connections to the Internet and to private and local area networks.

Internet Access . We offer dial-up Internet access utilizing multiple wholesale vendors and have recently added our five times (“5X”) traditional dial-up speeds in select locations.

Digital Wireless . We offer digital wireless services in many of our target markets. We believe that CloseCall America is one of the few companies that have the capability to add wireless service to an existing customer invoice.

Digital Broadband Phones via Voice over IP (“VoIP”). We offer digital phones for customers that have access to high-speed internet connections utilizing VoIP technologies.

Payphone Services

Overview

Our subsidiary, Davel, is one of the largest independent payphone service providers in the United States. Davel operates in a single business segment within the telecommunications industry, and primarily utilizes subcontractors to operate, service, and maintain its system of payphones throughout the United States. On November 15, 2004, we completed our acquisition of 100 percent of the senior secured debt of Davel and received an assignment of the secured lenders’ shares of Davel common stock representing approximately 95.2 percent of Davel issued and outstanding common stock. We subsequently acquired the remaining 4.8 percent of the issued and outstanding Davel common stock in May 2005.

As of September 30, 2005, Davel owned and operated a network of approximately 36,000 payphones predominantly located in 42 states and the District of Columbia, providing it with one of the broadest geographic ranges of coverage of any payphone service provider, or PSP, in the country. Davel’s installed payphone base generates revenue through coin calls (local and long-distance), non-coin calls (calling card, credit card, collect, and third-party billed calls using the Company’s pre-selected operator services providers) and dial-around calls (utilizing a 1-800, 1010XXX or similar “toll free” dialing method to select a carrier other than the Company’s pre-selected carrier). Approximately 25% of Davel’s revenues, or approximately 11% of consolidated revenues, are comprised of dial-around revenues. A significant portion of Davel’s payphones are located in high-traffic areas such as convenience stores, shopping centers, truck stops, service stations, and grocery stores.

As part of the Telecommunications Act of 1996, or 1996 Telecom Act, Congress directed the Federal Communications Commission, or FCC, to ensure widespread access to payphones for use by the general public. The most recent estimates of payphone deployment released by the FCC suggest that there are approximately 1.5 million payphones currently operating in the United States, of which approximately 0.8 million are operated by the Regional Bell Operating Companies, or RBOCs, and approximately 0.1 million are operated by the smaller independent local

exchange carriers, or LECs. The remaining approximately 0.6 million payphones are owned or managed by the major long distance carriers such as Sprint and AT&T and more than 1,000 independent payphone providers, or IPPs, currently operating in the United States.

Payphone Services Business - Background

Today's telecommunications marketplace was principally shaped by the 1984 court-approved divestiture by AT&T of its local telephone operations, or the AT&T Divestiture, and the many regulatory changes adopted by the FCC and state regulatory authorities in response to and subsequent to the AT&T Divestiture, including the authorization of the connection of competitive or independently owned payphones to the public switched network. The "public switched network" is the traditional domestic landline public telecommunications network used to carry, switch and connect telephone calls. The connection of independently owned payphones to the public switched network has resulted in the creation of additional business segments in the telecommunications industry. Prior to these developments, only the consolidated Bell system or independent LECs were permitted to own and operate payphones. Following the AT&T Divestiture and subsequent FCC and state regulatory rulings, the independent payphone sector developed as a competitive alternative to the consolidated Bell system and other LECs by providing arguably more responsive customer service, lower cost of operations and higher commissions to the owners or operators of the premises at which a payphone is located ("Location Owners").

Prior to the AT&T Divestiture, the LECs could refuse to provide payphone service to a business operator or, if service was installed, would typically pay no or relatively small commissions for the right to place a payphone on the business premises. Following the AT&T Divestiture and the FCC's authorization of payphone competition, IPPs began to offer Location Owners higher commissions on coin calls made from the payphones in order to obtain the contractual right to install the equipment on the Location Owners' premises. Initially, coin revenue was the only source of revenue for the payphone operators because they were unable to participate in revenues from non-coin calls. However, the operator service provider, or OSP, industry emerged and enabled the competitive payphone operators to compete more effectively with the regulated telephone companies by paying commissions to payphone owners for non-coin calls. For the first time, IPPs were able to receive non-coin call revenue from their payphones. With this incremental source of revenue from non-coin calls, IPPs were able to compete more vigorously on a financial basis with RBOCs and other LECs for site location agreements, as a complement to the improved customer service and more efficient operations provided by the IPPs. As part of the AT&T Divestiture, the United States was divided into Local Access Transport Areas, or LATAs. RBOCs were authorized to provide telephone service that both originates and terminates within the same LATA, or intraLATA, pursuant to tariffs filed with and approved by state regulatory authorities. RBOCs typically provide payphone service primarily in their own respective territories, and are now authorized to share in the payphone revenues generated from telecommunications services between LATAs, or interLATA. Long-distance companies, such as Sprint, AT&T and MCI, provide interLATA services, and in some circumstances, also provide local or long-distance service within LATAs. An interLATA long-distance telephone call generally begins with an originating LEC transmitting the call from the originating payphone to a point of connection with a long-distance carrier. The long-distance carrier, through its owned or leased switching and transmission facilities, transmits the call across its long-distance network to the LEC servicing the local area in which the recipient of the call is located. The terminating LEC then delivers the call to the recipient.

Business Strategy

Rationalization of Low-Revenue Phones. In recent years, Davel has experienced revenue declines as a result of increased competition from cellular and other telecommunications products. As a result of declining revenues, Davel's strategy has been to remove low revenue payphones that do not meet its minimum criteria of profitability and to promote improved density of its payphone routes. During the most recent two calendar years ending December 31, 2004 and 2003, Davel removed approximately 8,900 and 24,800 payphones respectively. Although a portion of these removals resulted from competitive conditions or decisions not to renew contracts with Location Owners under unfavorable terms, a large portion of these removals was to eliminate unprofitable payphones. Davel has an ongoing program to identify additional payphones to be removed in 2005 based upon low revenue performance and route density considerations. Additionally, prior to the expiration or renewal of the term of its agreements with Location Owners, Davel regularly evaluates the economics of such agreements to determine whether more favorable terms can be negotiated in order to minimize the number of payphones that do not meet its minimum criteria of profitability and which may be subject to removal.

Selective Acquisitions. As a means of maintaining and expanding Davel's customer and payphone base, Davel continues to identify and evaluate other payphone companies that can be acquired and integrated into Davel's operations. By strategically acquiring additional payphones in certain targeted areas, Davel can improve the density of its payphone routes and expand its revenues to improve the overall profitability of its operations.

Outsourcing Service, Maintenance and Collection Activities. Notwithstanding improvements in payphone route densities and other efficiencies achieved during the previous two years, Davel continues to examine its cost structure to identify additional ways to improve the profitability of the business. During 2003, Davel outsourced the assembly and repair of its payphone equipment and closed its warehouse and repair facility in Tampa, Florida to reduce the cost to repair, maintain and store its replacement payphone equipment. In the fourth quarter of 2003, Davel also outsourced the collection, service and maintenance of its payphones in the western region of the United States to reduce the cost of servicing its geographically disbursed payphones in this area and closed eleven district offices. During the calendar year 2004 Davel outsourced the remainder of its district offices, with the exception of its office located in Bronx, New

York. Although there were costs associated with the outsourcing of these activities, Davel believes future savings will more than offset these costs and have a favorable impact on its future operating results. Davel plans to continue to evaluate additional outsourcing opportunities and to implement those strategies that can further reduce its operating costs.

Utilize Advanced Payphone Technology. The payphones installed and operated by Davel utilize “smart” technology which provides voice synthesized calling instructions, detects and counts coins deposited during each call, informs the caller at certain intervals of the time remaining on each call, identifies the need for and the amount of an additional deposit in order to continue the call, and provides other functions associated with the completion of calls. Through the use of a non-volatile, electronically erasable, programmable memory chip, the payphones can also be programmed and reprogrammed from Davel’s central computer facilities to update rate information or to direct different types of calls to particular carriers. Davel’s payphones can also distinguish coins by size and weight, report to its central host computer the total amount of coin in the coin box, perform self-diagnosis and automatically report problems to a pre-programmed service number.

Apply Sophisticated Monitoring and Management Information Systems. Davel utilizes a blend of enterprise-class proprietary and non-proprietary software that continuously tracks coin and non-coin revenues from each payphone, as well as expenses relating to each payphone, including commissions payable to the Location Owners. Davel’s technology also allows it to efficiently track and facilitate the activities of field technicians via interactions from the pay telephone with its computer systems and technical support personnel at its headquarters.

Provide Outstanding Customer Service. The technology used by Davel enables it to (i) respond quickly to equipment malfunctions and (ii) maintain accurate records of payphone activity that can be verified by customers. Davel strives to minimize “downtime” on its payphones by identifying service problems as quickly as possible. Davel employs both advanced telecommunications technology and utilizes trained field technicians as part of its commitment to provide superior customer service. The records generated through Davel’s technology also allow for the more timely and accurate payment of commissions to Location Owners.

Consolidation of Carrier Services. As part of its strategy to reduce costs and improve service quality, Davel has consolidated its coin and non-coin services with a limited number of major carriers. This enables Davel to maximize the value of its traffic volumes and has translated into more favorable economic and service terms and conditions in these key aspects of its business. Davel has entered into service agreements with certain Competitive Local Exchange Carriers (“CLECs”) which has allowed it to significantly reduce its costs of obtaining local line service while improving the efficiency and quality of entering its billing information through electronically generated billing.

Pursue Regulatory Improvements. Davel continues to actively pursue regulatory changes that will enhance its near and long-term performance and viability. Notably, Davel is pressing, through regulatory channels, the reduction in line and related charges and improvements to the dial around compensation collection system that are critical to the economic viability of the payphone industry generally and Davel’s operations specifically.

Enhance Product Offerings. As part of its strategy to maintain and grow its customer base, Davel continues to pursue additional product offerings made available to it through its affiliated companies in order to enhance the benefits provided to its customers.

Internet Services

Overview

We provide broadband, dial-up, web-hosting services, VoIP and other related internet services to business and residential customers in over 40 states through the efforts of DFW and its eight ISP subsidiaries.

During the first fiscal quarter of 2004, we acquired three Internet Service Providers (“ISPs”). On April 21, 2004, we acquired August.net Services, LLC, a Texas based ISP. On June 3, 2004, we acquired ShreveNet, Inc., a Louisiana-based ISP. On June 21, 2004, we acquired the assets of Crescent Communications, a Texas-based ISP.

During the second fiscal quarter of 2005 we completed the acquisition of an additional three ISPs. On July 6, 2004, we completed our acquisition of Clover Computer Corporation, an Ohio-based ISP. On July 14, 2004, we completed our acquisition of Ticon.net, Inc., a Wisconsin-based ISP. Finally, on August 13, 2004, we completed our acquisition of certain assets of Web One, Inc., a Kansas City, Kansas-based ISP and web-hosting provider with operations in Missouri and Kansas.

During the third fiscal quarter of 2005 we acquired two additional ISPs. On September 15, 2004, we completed our acquisition of World Trade Network, Inc., an ISP based in Houston, Texas. On September 16, 2004, we completed our acquisition of The River Internet Access Co., an ISP based in Tucson, Arizona.

On November 1, 2005, we announced the acquisition of InReach Internet, an Internet services provider located in Stockton, California. InReach provides a base of operations for the Sacramento municipal wireless network.

Business Strategy

Most of our efforts in the Internet services division are led by DFW, d/b/a Nationwide Internet, a Texas-based ISP that we acquired in January 2004. Nationwide provides a wide array of Internet services tailored to meet the needs of individual and business subscribers. As of October 31, 2005, we served approximately 50,000 line active subscribers, including approximately 45,000 residential customers and approximately 5,000 business customers. Our strategy has been to expand our current customer base by acquiring ISPs in new markets. We intend to gain new customers and improve retention of existing customers through improved marketing, increased broadband service availability and the introduction of new value-added services.

During the current year, the activities of this operation have focused on the integration of the operations of the acquired companies comprising this business segment. Since 2004, we have been confronted with the challenges of managing many remotely located operations and combining different systems. Although many of the acquired companies have been operationally integrated into DFW, the business continues to maintain multiple offices in Texas and Arizona, locations that are necessary at this point to support existing customers. In addition, most of the acquired entities remain in corporate form requiring that we maintain separate set of accounting and income tax records for each company. The lack of employee retention at certain smaller acquired companies has, at times, adversely affected the integration of operations and the retention of customers. However, efforts are continuing to focus on combining service offerings, consolidating network operations and customer support locations, eliminating leases, merging companies and otherwise reduce operating costs.

At present, dial-up subscribers represent the largest group of customers of the Internet services group (approximately 82%). Our strategy to quickly create a viable telecommunications company positioned to capitalize on emerging opportunities, including municipally sponsored broadband wireless networks, was launched through the acquisition of a series of readily available, reasonably priced ISPs, operating in second and third tier markets and largely providing dial-up Internet access service. We believe that this tactic was successful. We expect that we will be more selective in consummating future acquisitions in this business. For example, we believe that the recent acquisition of InReach represents a unique opportunity to obtain an operation located in a position to support our broadband wireless network deployment in Sacramento, California. In addition, we believe that we have obtained an excellent organization operating with positive cash flows in a new geographic market on the west coast.

Services

We offer Internet services tailored to meet the needs of both individual and business subscribers. Our primary service offerings are broadband and dial-up Internet access, as well as related value-added services. For our business subscribers, we offer dedicated high speed Internet access, Web hosting, co-location, VoIP and other business related services. Our services are offered in several different packages to provide subscribers a broad range of choices to satisfy their Internet needs. The majority of our consumer subscribers have month-to-month subscriptions and the majority of our business customers are under service contracts for a term. We bill consumer subscribers through automatic charges to their credit cards or bank accounts, and by invoice and we bill most of our business customers by monthly invoices.

High Speed Connectivity; DSL Services. We offer broadband connectivity for business and consumers, including 64k/128k Integrated Service Digital Network (ISDN) access, 1.5M Asymmetrical Digital Subscriber Lines (ADSL), fractional to full T-1, DS-3 level connectivity and wireless connectivity. Our DSL products provide high-speed Internet access over existing telephone lines, and may allow subscribers to simultaneously use a single telephone line for voice service and for access to the Internet. DSL provides an “always on” connection thereby removing wait times associated with dialing into a network. The DSL products offer our residential and business subscribers a cost-effective way to substantially increase the speed at which they access the Internet.

Dial-Up Internet Access. Our most popular dial-up Internet access package includes basic Internet access and related Internet applications such as World Wide Web browsing, e-mail, file transfer protocol (FTP), and news access. Available value-added services include multiple e-mail mailboxes, national roaming services, personalized e-mail addresses and personal Web sites.

Web Services. We offer Web hosting for businesses and other organizations that wish to create their own World Wide Web sites without maintaining their own Web servers and high-speed Internet connections. Web hosting subscribers are responsible for building their own Web sites and then uploading the pages to a Nationwide server. This Web hosting service features state-of-the-art servers for high speed and reliability, a high quality connection to the Internet, specialized customer support and advanced services features, such as secure transactions and site usage reports.

T1/VoIP. We deliver VoIP services over a single all-IP network using T-1 connections. This gives us the ability to provide a wide range of voice and data services. Unlike traditional voice-centric circuit switched communications networks, which require separate networks in order to provide voice and data services, we employ a single integrated network, which uses technologies that digitize voice communications into IP packets and converges them with other data services for transport on an IP network. Our network design exploits the convergence of voice and data services and requires significantly lower capital expenditures and operating costs compared to traditional service providers using legacy technologies. The integration of our network with our automated front and back office systems allows us to monitor network performance, quickly provision customers and in the future, offer our customers the ability to add or change services online, thus reducing our customer care expenses. We believe that our all-IP network and automated support systems enable us to continue to offer new services to our customers in an efficient manner.

Customer Service

Our goal of 100% customer satisfaction begins with providing quality systems and network performance. We focus on scalability, reliability and speed in the technical design and maintenance of our systems. In addition to the provision of quality systems and network performance, we emphasize high quality customer care and technical support. We strive to retain our subscribers by prompt response to customer problems via telephone, email and newsgroups.

Customer service is available to subscribers 24-hours-a-day, 7-days-a-week. The customer care department is organized in tiers designed to respond to varying types of support needs. In addition to diagnosing and resolving subscribers' technical problems, our customer care department answers questions about account status and billing information, provisions new product requests and provides configuration information.

Infrastructure

Our network provides subscribers with local dial-up across the United States and broadband (DSL) in select markets. Our systems and network infrastructure are designed to provide reliability and speed. Reliability is achieved through redundancy in mission critical systems that minimize the number of single points of failure. Speed is achieved through clustered systems, diverse network architecture, multi-peered Internet backbone connections and aggressive load balancing.

Physical and Virtual POPs. Subscribers dial a local phone number and connect to one of our points of presence (POPs), consisting of inbound telephone lines, modems and related computer equipment. The POPs are either facilities owned by Nationwide or “Virtual POPs” owned by other telecommunication companies. Virtual POP architecture allows us to provide local access services without deploying additional physical infrastructure. The Virtual POP architecture enables subscribers to dial a local phone number and connect to a modem owned and housed by a telecommunications provider. The subscriber’s data call is then routed across leased lines to our internal network. Unlike simply leasing network capacity from a third-party provider, the Virtual POP architecture allows us to maintain substantial control over quality of service and capacity. The benefits of this architecture include substantially reduced capital expenditures and reduced exposure to technological obsolescence. In addition, when entering new markets, the Virtual POP architecture allows us to more precisely match capacity needs to actual sales in that market.

Internal Network Infrastructure. Subscribers enter our network from either the physical POP or Virtual POP. Our primary internal network is designed to maximize sustained high-speed traffic and provide both resiliency to failure and redundancy. Our facilities are powered by a computer controlled uninterruptible power supply that provides battery backup, surge protection and power conditioning. Automatic onsite diesel generators provide power for prolonged power outages.

We also maintain a Network Operations Center (“NOC”) in Tucson, AZ, which is staffed 24 hours a day. The NOC is responsible for monitoring the status of all networking facilities, components, applications and equipment deployed throughout our infrastructure. The NOC is responsible for operational communications among internal departments and is also responsible for communication with external service providers.

We maintain our applications on a variety of systems from a number of vendors. The major applications, such as e-mail and newsgroup access services, utilize a network of servers which are connected directly to our network backbone through high-availability network routers. We deploy PC style hardware in clusters for distributing the load of other applications and providing fault-tolerance against application failure. These distributed applications are housed on low cost, easily obtainable components with minimal interdependency.

Competition

Wireless Networks

Delivery of broadband wireless Internet access is a highly competitive industry that is a fast growing segment of the technology sector. NeoReach Wireless primarily operates in the city-sponsored sector of this industry. Competition for such city-sponsored metro area wireless deployments comes from primarily three levels of competition. First are cities themselves as many are attempting to own and operate Wi-Fi networks. Second, competition comes from wireless Internet service providers or WISPs located in or near a city, that are operating traditional wireless networks. Third, the incumbent large-scale telecommunication or cable operators can decide to compete against itself by setting up a wireless network, rather than allow another service provider to get a foothold in its market.

Voice Services

The communications industry is highly competitive. We compete primarily on the basis of the quality of our offerings, quality of our customer service, bundling (offering multiple services), price, availability, reliability, and variety. Our ability to compete effectively depends on our ability to maintain high-quality services at prices generally equal to or below those charged by our competitors. In particular, price competition in our sector has been intense and is not expected to decrease. Our competitors include, among others, various “competitive carriers” like us, as well as larger providers such as Verizon, SBC, AT&T Corp., Sprint, and MCI. These larger providers have substantially greater infrastructure, financial, personnel, technical, marketing and other resources, larger numbers of established customers and more prominent name recognition than CloseCall. We increasingly face competition in the local and long distance market from local carriers, resellers, cable companies, wireless carriers and satellite carriers, and may compete with electric utilities. We also may increasingly face competition from businesses offering long distance data and voice services over the Internet. These businesses could enjoy a significant cost advantage because currently they generally do not pay carrier access charges or universal service fees.

We face significant competition from “competitive carriers” that are similar to us, principally in terms of size, structure and market share. Some of these carriers already have established local operations in some of our current and target markets. Many competitive carriers are struggling financially. We cannot predict which of these carriers will be able to continue to compete effectively against us over time.

We also compete in the provision of local services against the incumbent local telephone company in each market, which is Verizon in a large majority of our market areas. Incumbent carriers enjoy substantial competitive advantages arising from their historical monopoly position in the local telephone market, including pre-existing customer relationships with all or virtually all end-users. Further, we are highly dependent on incumbent carriers for local network facilities and wholesale services required in order for us to assemble our own local services. In addition, incumbent carriers are expected to compete in each other’s markets in some cases, which will increase the competition we face. Wireless communications providers are competing with wireline local telephone service providers, which further increases competition.

Local and long distance marketing is converging, as other carriers offer integrated communications services. For example, many competitive carriers also offer long distance services to their customers and large long distance carriers, such as AT&T Corp., Sprint and MCI, have begun to offer local services in some markets. We also compete with numerous direct marketers, telemarketers and equipment vendors and installers with respect to portions of our business.

Regional Bell operating companies, such as Verizon, are currently allowed to provide, both inside and outside their home regions, “interLATA” long distance and mobile services, which are long distance services that originate and terminate in different local access and transport areas. These companies already have extensive fiber optic cable, switching and other network facilities in their regions that they can use to provide long distance services throughout the country. By offering in-region long distance services in our markets, Verizon is able to offer substantially the same integrated local and long distance services as CloseCall, and will have a significant competitive advantage over us in marketing those services to its existing local customers.

A continuing trend toward consolidation, mergers, acquisitions and strategic alliances in the communications industry also could increase the level of competition we face. On January 31, 2005, SBC Communications, Inc., and AT&T Corp. announced their intention to enter into a business combination. In February 2005, Verizon Communications, Inc., and MCI announced an agreement to enter into a business combination, and Qwest Communications International Inc. announced a bid to compete with Verizon’s purchase offer. Such transactions, if consummated, would result in substantial consolidation of U.S. wireline telecommunications resources and revenue. In addition, as reflected in the acquisitions of Cable and Wireless USA, Inc., by Savvis Communications, Inc., Focal Communications, Inc., by Broadwing Corporation, and KMC Telecom Corp. by CenturyTel, Inc., substantial

consolidation also has taken place among competitive carriers. Assuming that each of the announced transactions involving AT&T Corp. and MCI occur as planned, market power for U.S. telecommunications services will be further consolidated among the incumbent carriers, and both business and residential customer choice will be significantly reduced. Although it is not certain what the effects of this industry consolidation will be, we believe that one possible result could be that prices for telecommunications services would stabilize due to reduced competition. The incumbent carriers are significantly larger than we are in terms of annual revenues, total assets, and financial resources, and have increased their marketing efforts toward our target market of small- and medium-size businesses.

A recent trend toward deregulation, particularly in connection with incumbent carriers and service providers that use Voice Over Internet Protocol applications, could increase the level of competition we face in our markets and, in turn, adversely affect our operating results. Incumbent carriers and, in particular, the regional Bell operating companies, continue to seek deregulation for many of their services at both the federal and state levels. If their efforts are successful, these companies will gain additional pricing flexibility, which could affect our ability to compete with them. The recent emergence of service providers that use Voice Over Internet Protocol applications also could present a competitive threat. Because the regulatory status of Voice Over Internet Protocol applications is largely unsettled, providers of such applications may be able to avoid costly regulatory requirements, including the payment of inter-carrier compensation. This could impede our ability to compete with these providers on the basis of price. More generally, the emergence of new service providers will increase competition, which could adversely affect our ability to succeed in the marketplace for communications and other services.

Our payphone business competes for payphone locations directly with LECs and other IPPs. We also compete, indirectly, with long-distance companies, which can offer Location Owners commissions on long-distance calls made from LEC-owned payphones. Most LECs and long-distance companies against which we compete, as well as some IPPs, may have substantially greater financial, marketing and other resources than us. Many LECs and IPPs faced with competition for payphone locations have increased their compensation arrangements with Location Owners to offer increased commission payments.

We believe that the competitive factors among payphone providers are (1) the quality of service and the availability of specialized services provided to a Location Owner and payphone users, (2) the ability to serve accounts with locations in several LATAs or states, (3) the commission payments to a Location Owner, and (4) responsiveness to customer service needs. We believe we are currently competitive in each of these areas.

We also compete with inter-exchange carriers ("IXCs") that provide access to alternative operator services, which can be accessed through our payphones. Payphone calls placed using this method are referred to as "dial around calls". Certain national long-distance operator service providers and prepaid calling card providers have implemented extensive advertising promotions and distribution schemes which have increased dial-around activity on payphones owned by LECs and IPPs, including us, thereby reducing traffic to our primary providers of operator assisted and long-distance services.

Notwithstanding the foregoing, we believe that our principal competition in our payphone business is from providers of wireless communications services for both local and long distance traffic. Certain providers of wireless communication services have introduced rate plans that are competitively priced with certain of the products offered by us and have negatively impacted the overall usage of payphones throughout the nation.

Although certain RBOCs such as Qwest and Bell South have exited the payphone business due to declining call volumes and lower revenues, there remain a large number of LEC's, IXCs and IPPs that compete for payphone locations. Davel continues to renew its existing location contracts and compete for new business at sites that can generate sufficient call volumes to support the installation of payphones.

Internet Services

We compete for subscription revenues with multiple companies providing Internet services, such as AOL, the Microsoft Network, EarthLink and AT&T Worldnet, NetZero and smaller regional ISPs. We also compete with companies that provide Internet access via narrowband and broadband technologies, such as Internet access providers, cable companies and telephone companies. Like us, other companies offer some of the same Internet connectivity services to their customers. We also compete more broadly for subscription revenues and members' time with cable, information, entertainment and media companies. We compete for advertising and commerce revenues with a wide range of companies, including those that focus on the Internet, such as online services, internet access companies, web-based portals and individual web sites providing content, commerce, community and similar features, as well as media companies, such as those with newspaper or magazine publications, radio stations and broadcast stations or networks.

We face competition in developing technologies, and risks from potential new developments in distribution technologies and equipment in Internet access. In particular, we face competition from developments in the following types of internet access distribution technologies or equipment: broadband distribution technologies used in cable Internet access services; advanced personal computer-based access services offered through DSL technologies offered by local telecommunications companies; other advanced digital services offered by wireless companies; television-based interactive services; personal digital assistants or handheld computers; and enhanced mobile phones. We must keep pace with these developments and also ensure that we either have comparable and compatible technology or access to distribution technologies developed or owned by third parties.

Governmental Regulation

Voice Services

Competitive Local Exchange Carrier

Overview . Our services are subject to federal, state and local regulation. Through our wholly-owned subsidiaries, we hold numerous federal and state regulatory authorizations. The Federal Communications Commission, or FCC, exercises jurisdiction over telecommunications common carriers to the extent they provide, originate or terminate interstate or international communications. The FCC also establishes rules and has other authority over some issues related to local telephone competition. State regulatory commissions retain jurisdiction over telecommunications carriers to the extent they provide, originate or terminate intrastate communications. Local governments may require us to obtain licenses, permits or franchises to use the public rights-of-way necessary to install and operate our networks.

Federal Regulation . We are classified as a non-dominant carrier by the FCC and, as a result, are subject to relatively limited regulation of our interstate and international services. Some general policies and rules of the FCC apply to us, and we are subject to some FCC reporting requirements, but the FCC does not review our billing rates. We possess the operating authority required by the FCC to conduct our long distance business as it is currently conducted. As a non-dominant carrier, we may install and operate additional facilities for the transmission of domestic interstate communications without prior FCC authorization, except to the extent that radio licenses are required. The following discussion summarizes some specific areas of federal regulation that directly or indirectly affects our business.

Local Competition. The FCC's role with respect to local telephone competition arises principally from the Telecommunications Act of 1996. The Telecommunications Act preempts state and local laws to the extent that they prevent competition in the provision of any telecommunications service. Subject to this limitation, state and local governments retain telecommunications regulatory authority over intrastate telecommunications. The Telecommunications Act imposes a variety of duties on local carriers, including competitive carriers such as CloseCall, to promote competition in the provision of local telephone services. These duties include requirements for local carriers to: interconnect with other telecommunications carriers; complete calls originated by customers of competing carriers on a reciprocal basis; permit the resale of their services; permit users to retain their telephone numbers when changing carriers; and provide competing carriers access to poles, ducts, conduits and rights-of-way at regulated prices.

Incumbent carriers also are subject to additional duties. These duties include obligations of incumbent carriers to: offer interconnection on a non-discriminatory basis; offer co-location of competitors' equipment at their premises on a non-discriminatory basis; make available certain of their network facilities, features and capabilities on non-discriminatory, cost-based terms; and offer wholesale versions of their retail services for resale at discounted rates.

Collectively, these requirements recognize that local telephone service competition is dependent upon cost-based and non-discriminatory interconnection with, and use of, some elements of incumbent carrier networks and facilities under specified circumstances. Failure to achieve and maintain such arrangements could have a material adverse impact on our ability to provide competitive local telephone services. Under the Telecommunications Act, incumbent carriers are required to negotiate in good faith with carriers requesting any or all of the foregoing arrangements.

In August 2003, the FCC adopted changes to the rules defining the circumstances under which incumbent carriers must make network elements available to competitive carriers at cost-based rates. These rule changes were appealed by both incumbent carriers and competitive carriers to a federal court of appeals, which in March 2004 vacated and remanded to the FCC several aspects of those changes. In February 2005, the FCC issued a decision in response to the court's March 2004 ruling. That decision, which is known as the Triennial Review Remand Order, or TRRO, became

effective on March 11, 2005, and revised the rules for when incumbent carriers must unbundle and make available to competitive carriers various types of UNEs, including high-capacity loops and interoffice transport. The following sets forth information about the application of the new rules.

UNE Loops

DS0 Loops. A DS0 loop is a single, voice-grade channel. Typically, individual business lines are DS0 loops. Incumbent carriers must make DS0 loops available at UNE rates on an unlimited basis.

DS1 Loops. A DS1 loop is a digital loop with a total speed of 1.544 megabits per second, which is the equivalent of 24 DS0s. Multiple voice lines and Internet access can be provided to a customer over a single DS1 loop. We understand the FCC's new rules to require that incumbent carriers make available to competitive carriers DS1 loops at UNE rates in the majority of incumbent carrier central offices.

DS3 Loops. A DS3 loop is a digital loop with a total speed of 44.736 megabits per second. We understand the FCC's new rules to require that incumbent carriers make available to competitive carriers DS3 loops at UNE rates in the majority of incumbent carrier central offices.

OCn Loops and Dark Fiber. Under the FCC's new rules, incumbent carriers are not required to provide optical capacity loops or dark fiber loops as UNEs. Optical capacity loops, referred to as OCn loops, are very high-capacity digital loops ranging in capacity from OC3 loops, which are the equivalent of three DS3s, to OC192.

Incumbent carriers are not required to provide some mass market broadband loop facilities and functionality to competitive carriers as UNEs. Specifically, incumbent carriers are not required to make newly-deployed fiber-to-the-home, or FTTH, loops available as UNEs and are only required to provide the equivalent of DS0 capacity on any FTTH loop built over an existing copper loop. It is possible that incumbent carriers will seek additional regulatory relief from any remaining obligation to make FTTH loops available to competitive carriers. The FCC already has held that incumbent carriers are not required to unbundle and make available to competitive carriers fiber-to-the-curb, or FTTC, loops.

UNE Transport

DS1 Transport. Whether transport is available as a UNE is determined on a route-by-route basis. Incumbent carriers must make transport at UNE rates available at DS1 capacity levels between any two incumbent carrier central offices unless both central offices either serve more than 38,000 business lines or have four or more fiber-based colocators.

DS3 Transport. Access to DS3 capacity-level transport is more limited than access to DS1 transport. Incumbent carriers must make transport at UNE rates available at DS3 capacity levels between any two incumbent carrier central offices unless both central offices either serve more than 24,000 business lines or have three or more fiber-based colocators.

Dark Fiber Transport. Dark fiber transport is available under the same conditions as DS3 transport.

Incumbent carriers are not required to provide access to transport at greater-than DS3 capacity levels. Incumbent carriers also are not required to provide transport at any capacity level to connect an incumbent carrier central office with a competitive carrier's facilities.

In addition to addressing high-capacity loops and transport, the TRRO confirmed the eventual elimination of mass market local switching as a UNE, thereby phasing out the availability of UNE-P at cost-based rates to competitive carriers such as us. Although CloseCall has an embedded base of UNE-P customers, we have begun to migrate our existing UNE-P customers to other provisioning arrangements where we have facilities and it is advantageous for us to do so. We also have a five year "commercial agreement" in place with Verizon that locks in rates through 2010.

The FCC also confirmed in the TRRO that the availability of special access services for competitive carriers does not excuse incumbent carriers from the requirement to make available prescribed UNEs at rates based on the FCC's "Total

Element Long Run Incremental Cost,” or TELRIC, pricing methodology.

To the extent incumbent carriers no longer need to provide to competitive carriers the above-described switching, loop and transport elements as UNEs, the FCC established a transitional period during which incumbent carriers must continue to make these elements available at prescribed rates for a defined period of time. We anticipate that some incumbent and competitive carriers will use this transition period to enter into commercial agreements for these elements, but these agreements are likely to contain rates, terms and conditions that are less favorable to competitive carriers than they have been in the past.

The TRRO continued the recent trend of reducing the number and types of UNEs that incumbent carriers must make available to competitive carriers. Although the TRRO has been appealed, we cannot predict the outcome of this appeal or whether the result of any such appeal will be favorable or unfavorable to our business.

TELRIC Pricing. The FCC has initiated a re-examination of its TELRIC pricing methodology for network elements. The FCC has proposed a number of changes to these pricing rules that would be unfavorable to us. Legislation has been proposed in Congress in the past and may be proposed in the future that would further restrict the access of competitive carriers to incumbent carriers' network elements. Future restrictions on, or reductions in, the network elements available to us, or any increase in the cost to us of such network elements, could have a material adverse effect on our business.

Broadband. In the future, an important element of providing competitive local service may be the ability to offer customers high-speed broadband local connections. The FCC recently reduced the number and types of unbundled network elements, such as FTTC and FTTH that incumbent carriers must make available to competitive carriers to enable them to provide broadband services to customers using incumbent carrier networks. These restrictions were largely upheld by a federal court of appeals. Although the court's decision regarding so-called "naked DSL" may be appealed, we cannot predict the outcome of any such appeal. The FCC also recently held that incumbent carriers such as Verizon cannot be required by state commissions to make digital subscriber line services available to end users when a competitive carrier provides the end user with voice service. This is known in the industry as "naked DSL." Although this decision also may be appealed, we cannot predict the outcome of any such appeal.

In other proceedings affecting broadband policy, the FCC is considering what regulatory treatment, if any, should be accorded to digital subscriber line services provided by communications companies and has already considered what regulatory treatment should be accorded to cable modem services, which are used by cable companies to deploy high-speed Internet access services. The FCC found in 2002 that cable modem service is an "information service" that is exempt from regulation. A federal court of appeals overturned that decision as being inconsistent with an earlier ruling by the court that cable modem service has both "information service" and "telecommunication service" components, which would make that service subject to regulation, but the court's decision has been appealed to the United States Supreme Court, where the matter is pending.

The FCC has sought comment on a number of other regulatory proposals that could affect the speed and manner in which high-speed broadband local services are deployed by our competitors. We cannot predict the outcome of these proposals at the FCC or in the courts or the effect they will have on our business and the industry.

Congress also has considered in the past, and may consider in the future, legislation that would deregulate some aspects of the incumbent local carriers' broadband services and would reduce the extent to which those carriers must provide access to their networks to competitive local carriers for the provision of broadband services. Several cable companies already are offering broadband Internet access over their network facilities, and incumbent carriers and competitive carriers also offer these services through digital subscriber line technology. If we are unable to meet the future demands of our customers for broadband local access on a timely basis at competitive rates, we may be at a significant competitive disadvantage.

Internet Protocol-Enabled Services. The FCC is considering clarifications and changes to the prospective regulatory status of services and applications using Internet Protocol, including Voice Over Internet Protocol offerings. Voice Over Internet Protocol is an application that manages the delivery of voice information across data networks, including the Internet, using Internet protocol. Rather than send voice information across traditional circuits, Voice Over Internet Protocol sends voice information in digital form using discrete packets that are routed in the same manner as data packets. Voice Over Internet Protocol is widely viewed as a more cost-effective alternative to traditional circuit-switched telephone service. Because Voice Over Internet Protocol can be deployed by carriers in various capacities, and because it is widely considered a next-generation communications service, its regulatory classification has not yet been determined.

The FCC thus far has issued three declaratory rulings in connection with the regulatory treatment of Voice Over Internet Protocol, but those rulings have been narrowly tailored. In one case, the FCC held that a computer-to-computer Voice Over Internet Protocol application provided by Pulver.com is an unregulated information service, in part because it does not include a transmission component, offers computing capabilities, and is free to its users. In another case, the FCC reached a different conclusion, holding that AT&T's use of Voice Over Internet Protocol to transmit the long-haul portion of certain calls constitutes a telecommunications service, thus subjecting it to regulation, because the calls use ordinary customer premises equipment with no enhanced functionality, originate and terminate on the public switched telephone network, and undergo no net protocol conversion and provide no enhanced functionality to end users. In a third case, which involved the Voice Over Internet Protocol application of Vonage, the FCC preempted the authority of the State of Minnesota (and presumably all other states) and ruled that Vonage's Voice Over Internet Protocol application, and others like it, is an interstate service subject only to federal regulation, thus preempting the authority of the Minnesota commission to require Vonage to obtain state certification. The FCC, however, refused to rule in the Vonage case whether Vonage's Voice Over Internet Protocol application is a telecommunications service or an information service, thus leaving open the question of the extent to which the service will be regulated. A number of other petitions addressing the application of existing regulations to Voice Over Internet Protocol and other Internet Protocol services have been filed at the FCC and are pending. We cannot at this time predict the outcome of those petitions on our business or the industry.

The FCC has initiated a more generic proceeding to address the many regulatory issues raised by the development and growth of Voice Over Internet Protocol services, including the extent to which Voice Over Internet Protocol will be regulated at the federal level, and has expressly reserved the right to reconsider its declaratory rulings in the generic proceeding. The FCC also is examining what requirements, if any, should be applied to Voice Over Internet Protocol service to enable law enforcement agencies, when necessary and appropriate, to access information transmitted through Voice Over Internet Protocol applications; the extent to which Voice Over Internet Protocol providers should contribute to the Universal Service Fund; and whether and to what extent E-911 requirements should apply to Voice Over Internet Protocol providers. Federal and state rulings in connection with Voice Over Internet Protocol will likely have a significant impact on us, our competitors and the communications industry.

Congress also has considered in the past, and may consider in the future, legislation addressing Voice Over Internet Protocol. We cannot at this time predict if or when such legislation will be enacted, or its effect on our business and the industry. Additionally, the U.S. Supreme Court in June 2005 in the *Brand x* opinion ruled that cable operators are not required to make their cable infrastructures available to Internet service providers on a wholesale basis. Subsequently, the FCC deregulated the pricing of naked DSL, allowing ILECs to charge much higher wholesale prices to independent Internet service providers. These two changes increase the risk of operating an independent Internet service provider absent a wireless broadband strategy.

Inter-carrier Compensation. The FCC regulates the interstate access rates charged by local carriers for the origination and termination of interstate long distance traffic. These access rates make up a significant portion of the cost of providing long distance service. The FCC has adopted policy changes that over time are reducing incumbent carriers' access rates, which have the impact of lowering the cost of providing long distance service, especially to business customers. In addition, the FCC has adopted rules that require competitive carriers to reduce gradually the levels of their tariffed access charges until those charges are no greater than those of the incumbent carriers with which they compete. In March 2005, the FCC initiated a proceeding designed to examine and reform comprehensively intercarrier compensation, including access charges, in the telecommunications market. Intercarrier compensation typically is the largest single expense incurred by companies that provide telecommunications services, including us. Further FCC action in this area may reduce most access charges in the future or shift all forms of intercarrier compensation to flat-rate pricing. We cannot predict at this time the result of this proceeding, the full impact of the FCC's decisions in this area, or the effect these decisions will have on our business and the industry.

The FCC has granted incumbent carriers some flexibility in pricing their interstate special and switched access services. Under this pricing scheme, local carriers may establish pricing zones based on access traffic density and charge different prices for access provided in each zone. The FCC recently has been granting incumbent carriers additional pricing flexibility on a market-by-market basis as local competition develops in their markets. This pricing flexibility could place us at a competitive disadvantage, either as a purchaser of access for our long distance operations or as a vendor of access to other carriers or end-user customers.

In April 2001, the FCC issued a ruling changing the compensation mechanism for traffic exchanged between telecommunications carriers that is destined for Internet service providers. In doing so, the FCC prescribed a new rate structure for this traffic and prescribed gradually reduced caps for its compensation. In the course of our business, we may exchange the traffic of Internet service providers with other carriers. The FCC's ruling in connection with such traffic affected a large number of carriers, including us, and further developments in this area could have a significant impact on the industry and on us. Although a federal court remanded that FCC decision for further consideration, the court did not reverse the decision, so it remains in effect. In March 2005, in the context of its generic proceeding on intercarrier compensation, the FCC sought comment on broad policy changes that could harmonize the rate structure and levels of all forms of intercarrier compensation, and ultimately could eliminate most forms of carrier-to-carrier payments for interconnected traffic, including traffic destined for Internet service providers.

Universal Service. Access charges historically have been used to subsidize universal telephone service. Together with access and other intercarrier compensation reform, the FCC in recent years has changed the methodology used to

subsidize universal telephone service and achieve other related public policy goals. Any reform in connection with intercarrier compensation will, by necessity, require revisions to the FCC's policies governing universal service. Because the effects of these revisions are uncertain, the fees we pay to subsidize universal service may increase or decrease substantially in the future.

The FCC continues to consider related questions regarding the applicability of access charges and universal service fees to providers of Internet access service and other services and applications using Internet protocol, including Voice Over Internet Protocol. Currently, Internet access providers are not subject to these expenses, and a federal court of appeals has upheld the FCC's decision not to impose such fees. However, there are open questions about how the existing rules apply to providers of data, voice or other services using the Internet or Internet protocol-based technology. The FCC is in the process of re-examining these issues in the context of its generic proceeding on IP-enabled services. We are not in a position to determine how these issues regarding access charges and universal service fees will be resolved, or whether the resolution of these issues will be harmful to our competitive position or our results of operations.

Detariffing. The FCC required non-dominant long distance companies, including us, to detariff interstate long distance domestic and international services in 2001. In 2001, the FCC also permitted competitive local exchange carriers, including us, to choose either to detariff the interstate access services that competitive carriers sell to long distance companies that originate or terminate traffic from or to their local customers, or to maintain tariffs but comply with rate caps. Tariffs set forth the rates, terms and conditions for service and must be updated or amended when rates are adjusted or products are added or removed. Before detariffing, we filed tariffs with the FCC to govern our relationship with most of our long distance customers and with long distance companies that originated or terminated traffic from or to our local customers. The detariffing process has required us, among other things, to post these rates, terms and conditions on our web site instead of filing them as tariffs with the FCC. Because detariffing precludes us from filing our tariffs with the FCC, some may argue that we are no longer subject to the "filed rate doctrine," under which the filed tariff controls all contractual disputes between a carrier and its customers. The detariffing process has effectively required us to enter into individual contracts with each of our customers and to notify our customers when rates are adjusted or products are added or removed. This process increases our costs of doing business. Detariffing may expose us to legal liabilities and costs if we can no longer rely on the filed rate doctrine to settle contract disputes with our customers.

Other Federal Regulations. The FCC imposes prior approval requirements on transfers of control and assignments of radio licenses and operating authorizations. The FCC has the authority generally to condition, modify, cancel, terminate, revoke or decline to renew licenses and operating authority for failure to comply with federal laws and the rules, regulations and policies of the FCC. Fines or other penalties also may be imposed for such violations. The FCC or third parties may raise issues with regard to our compliance with applicable laws and regulations.

State Regulation . We are subject to various state laws and regulations. Most state public utility commissions require providers such as CloseCall to obtain authority from the commission before initiating service in the state. We are subject to various reporting and record-keeping requirements. In addition, some states are ordering the de-tariffing of services, which may impede our reliance on the filed rate doctrine and increase our costs of doing business.

Many issues remain open regarding how new local telephone carriers will be regulated at the state level. For example, although the Telecommunications Act preempts the ability of states to forbid local service competition, the Telecommunications Act preserves the ability of states to impose reasonable terms and conditions of service and other regulatory requirements. The scope of state regulation will be refined through rules and policy decisions made by public utility commissions as they address local service competition issues.

State public utility commissions have responsibility under the Telecommunications Act to oversee relationships between incumbent carriers and their new competitors with respect to such competitors' use of the incumbent carriers' network elements and wholesale local services. Public utility commissions arbitrate interconnection agreements between the incumbent carriers and competitive carriers such as CloseCall when necessary. Pursuant to the Communications Act, the decisions of state public utility commissions with regard to interconnection disputes may be appealed to federal courts.

There also remain unresolved important issues regarding the scope of the authority of public utility commissions and the extent to which the commissions will adopt policies that promote local telephone service competition. For example, although the FCC recently preempted the ability of states to regulate some aspects of Voice Over Internet Protocol services, the FCC's decision has been appealed, and it is difficult to predict how this and other matters will affect our ability to pursue our business plan.

States also regulate the intrastate carrier access services of the incumbent carriers. We are required to pay access charges to the incumbent carriers when they originate or terminate our intrastate long distance traffic. Our business could be harmed by high access charges, particularly to the extent that the incumbent carriers do not incur the same level of costs with respect to their own intrastate long distance services or to the extent that the incumbent carriers are able to offer their long distance affiliates better access pricing. Some states also regulate the intrastate access charges of competitive carriers. States also will be developing intrastate universal service charges parallel to the interstate charges created by the FCC. Another issue is the use by some incumbent carriers, with the approval of the applicable public utility commissions, of extended local area calling that converts otherwise competitive intrastate toll service to local service. States also are or may be addressing various intraLATA dialing parity issues that may affect competition. Our business could be harmed by these developments.

We also will be affected by how states regulate the retail prices of the incumbent carriers with which we compete. We believe that, as the degree of intrastate competition increases, the states will offer the incumbent carriers increasing pricing flexibility and deregulation of particular services deemed to be competitive. This flexibility and deregulation may present the incumbent carriers with an opportunity to subsidize services that compete with our services with revenues generated from their non-competitive services, thereby allowing incumbent carriers to offer competitive services at prices lower than most or all of their competitors.

Many states also require prior approval for transfers of control of certified carriers, corporate reorganizations, acquisitions of telecommunications operations, assignment of carrier assets, carrier stock offerings and incurrence by carriers of significant debt obligations. Certificates of authority generally can be conditioned, modified, canceled, terminated or revoked by state regulatory authorities for failure to comply with state law or the rules, regulations and policies of state regulatory authorities. Fines or other penalties also may be imposed for such violations. Public utility commissions or third parties may raise issues with regard to our compliance with applicable laws or regulations.

The 1996 Telecommunications Act, or the Telecom Act, substantially restructured the telecommunications industry, included specific provisions related to the payphone industry and required the FCC to develop rules necessary to implement and administer the provisions of the Telecom Act on both an interstate and intrastate basis. Among other provisions, the Telecom Act granted the FCC the power to preempt state payphone regulations to the extent that any state requirements are inconsistent with the FCC's implementation of Section 276 of the Telecom Act.

Federal Regulation of Local Coin and Dial-Around Calls. The Telephone Operator Consumer Services Improvement Act of 1990, or TOCSIA, established various requirements for companies that provide operator services and for call aggregators, including payphone service providers, or PSPs, who send calls to those operator service providers, or OSPs. The requirements of TOCSIA as implemented by the FCC included call branding, information posting, rate quotations, the filing of informational tariffs and the right of payphone users to access any OSP in order to make non-coin calls. TOCSIA also required the FCC to take action to limit the exposure of payphone companies to undue risk of fraud upon providing this "open access" to carriers.

TOCSIA further directed the FCC to consider the need to provide compensation to IPPs for dial-around calls made from its payphones. Accordingly, the FCC ruled in May 1992 that IPPs were entitled to dial-around compensation. Because of the complexity of establishing an accounting system for determining per call compensation for these calls, and for other reasons, the FCC temporarily set this compensation at \$6.00 per payphone per month based on an assumed average of 15 interstate carrier access code dial-around calls per month and a rate of \$0.40 per call. The failure by the FCC to provide compensation for 800 "toll free" dial-around calls was challenged by the IPPs, and a federal court subsequently ruled that the FCC should have provided compensation for these toll free calls.

Pay Phone Services. In 1996, recognizing that IPPs had been at a severe competitive disadvantage under the existing system of regulation and had experienced substantial increases in dial-around calls without a corresponding adjustment in compensation, Congress enacted Section 276 to promote both competition among payphone service providers and the widespread deployment of payphones throughout the nation. Section 276 directed the FCC to

implement rules by November 1996 that would:

- create a standard regulatory scheme for all public payphone service providers;
- establish a per call compensation plan to ensure that all payphone service providers are fairly compensated for each and every completed intrastate and interstate call, except for 911 emergency and telecommunications relay service calls;
- terminate subsidies for LEC payphones from LEC regulated rate-base operations;

- prescribe, at a minimum, nonstructural safeguards to eliminate discrimination between LECs and IPPs and remove the LEC payphones from the LEC's regulated asset base;
- provide for the RBOCs to have the same rights that IPPs have to negotiate with Location Owners over the selection of interLATA carrier services, subject to the FCC's determination that the selection right is in the public interest and subject to existing contracts between the Location Owners and interLATA carriers;
- provide for the right of all PSPs to choose the local, intraLATA and interLATA carriers subject to the requirements of, and contractual rights negotiated with, Location Owners and other valid state regulatory requirements;
- evaluate the requirement for payphones which would not normally be installed under competitive conditions but which might be desirable as a matter of public policy, and establish how to provide for and maintain such payphones if it is determined they are required; and
- preempt any state requirements which are inconsistent with the FCC's regulations implementing Section 276.

In September and November 1996, the FCC issued its rulings implementing Section 276, or the 1996 Payphone Order. In the 1996 Payphone Order, the FCC determined that the best way to ensure fair compensation to independent and LEC PSPs for each and every call was to deregulate, to the maximum extent possible, the price of all calls originating from payphones. For local coin calls, the FCC mandated that deregulation of the local coin rate would not occur until October 1997 in order to provide a period of orderly transition from the previous system of state regulation.

To achieve fair compensation for dial-around calls through deregulation and competition, the FCC in the 1996 Payphone Order directed a two-phase transition from a regulated market. In the first phase, November 1996 to October 1997, the FCC prescribed flat-rate compensation payable to the PSPs by the interexchange carriers ("IXCs") in the amount of \$45.85 per month per payphone. This rate was arrived at by determining that the deregulated local coin rate was a valid market-based surrogate for dial-around calls. The FCC applied a market-based, deregulated coin rate of \$0.35 per call to a finding from the record that there was a monthly average of 131 compensable dial-around calls per payphone. This total included both carrier access code calls dialed for the purpose of reaching a long distance company other than the one designated by the PSP as well as 800 "toll free" calls. The monthly, per phone flat-rate compensation of \$45.85 was to be assessed only against IXCs with annual toll-call revenues in excess of \$100 million and allocated among such IXCs in proportion to their gross long-distance revenues. During the second phase of the transition to deregulation and market-based compensation (initially from October 1997 to October 1998, but subsequently extended in a later order by one year to October 1999), the FCC directed the IXCs to pay the PSPs on a per-call basis for dial-around calls at the assumed deregulated coin rate of \$0.35 per call. At the conclusion of the second phase, the FCC set the market-based local coin rate, determined on a payphone-by-payphone basis, as the default per-call compensation rate in the absence of a negotiated agreement between the PSP and the IXC. To facilitate per-call compensation, the FCC required the PSPs to transmit payphone-specific coding digits which would identify each call as originating from a payphone and required the LECs to make such coding available to the PSPs as a tariffed item included in the local access line service.

In July 1997, a federal court, or the Court responded to an appeal of the 1996 Payphone Order, finding that the FCC erred in (1) setting the default per-call rate at \$0.35 without considering the differences in underlying costs between dial-around calls and local coin calls, (2) assessing the flat-rate compensation against only the carriers with annual toll-call revenues in excess of \$100 million, and (3) allocating the assessment of the flat-rate compensation based on gross revenues rather than on a factor more directly related to the number of dial-around calls processed by the carrier. The Court also assigned error to other aspects of the 1996 Payphone Order concerning inmate payphones and the accounting treatment of payphones transferred by an RBOC to a separate affiliate.

In response to the Court's remand, the FCC issued its modified ruling implementing Section 276, or the 1997 Payphone Order, in October of 1997. The FCC determined that distinct and severable costs of \$0.066 were

attributable to coin calls that did not apply to the costs incurred by the PSPs in providing access for dial-around calls. Accordingly, the FCC adjusted the per call rate during the second phase of interim compensation to \$0.284 (which is \$0.35 less \$0.066). While the FCC tentatively concluded that the \$0.284 default rate should be utilized in determining compensation during the first phase and reiterated that PSPs were entitled to compensation for each and every call during the first phase, it deferred a decision on the precise method of allocating the initial interim period (November 1996 through October 1997) flat-rate payment obligation among the IXC's and the number of calls to be used in determining the total amount of the payment obligation.

On March 9, 1998, the FCC issued a Memorandum Opinion and Order, FCC 98-481, which extended and waived certain requirements concerning the provision by the LECs of payphone-specific coding digits which identify a call as originating from a payphone. Without the transmission of payphone-specific coding digits, some of the IXC's have claimed they are unable to identify a call as a payphone call eligible for dial-around compensation. With the stated purpose of ensuring the continued payment of dial-around compensation, the FCC's Memorandum and Order issued on April 3, 1998 left in place the requirement for payment of per-call compensation for payphones on lines that do not transmit the requisite payphone-specific coding digits but gave the IXC's a choice for computing the amount of compensation for payphones on LEC lines not transmitting the payphone-specific coding digits of either accurately computing per-call compensation from their databases or paying per-phone, flat-rate compensation computed by multiplying the \$0.284 per call rate by the nationwide average number of 800 subscriber and access code calls placed from RBOC payphones for corresponding payment periods. Accurate payments made at the flat rate are not subject to subsequent adjustment for actual call counts from the applicable payphone.

On May 15, 1998, the Court again remanded the per-call compensation rate to the FCC for further explanation without vacating the \$0.284 per call rate. The Court opined that the FCC had failed to explain adequately its derivation of the \$0.284 default rate. The Court stated that any resulting overpayment may be subject to refund and directed the FCC to conclude its proceedings within a six-month period from the effective date of the Court's decision.

In response to the Court's second remand, the FCC conducted further proceedings and sought additional comment from interested parties to address the relevant issues posed by the Court. On February 4, 1999, the FCC released the Third Report and Order and Order on Reconsideration of the Second Report and Order, or 1999 Payphone Order, in which the FCC abandoned its efforts to derive a "market-based" default dial-around compensation rate and instead adopted a "cost-based" rate of \$0.24 per dial-around call, which was to be adjusted to \$0.238 on April 21, 2002. Both PSPs and IXC's petitioned the Court for review of the 1999 Payphone Order's determination of the dial-around compensation rate. On June 16, 2000, the Court affirmed the 1999 Payphone Order setting a \$0.24 dial-around compensation rate. On all the issues, including those raised by the IXC's and the IPPs, the Court applied the "arbitrary and capricious" standard of review and found that the FCC's rulings were lawful and sustainable under that standard. The new \$0.24 rate became effective April 21, 1999 and was applied retroactively to the period beginning on October 7, 1997 and ending on April 20, 1999 (the "intermediate period"), less a \$0.002 amount to account for FLEX ANI payphone tracking costs, for a net compensation rate of \$0.238 per call.

In a decision released January 31, 2002, or the 2002 Payphone Order, the FCC partially addressed the remaining issues concerning the "true-up" required for the earlier dial-around compensation periods. The FCC adjusted the per-call rate to \$0.229, for the interim period only, to reflect a different method of calculating the delay in IXC payments to PSPs for the interim period, and determined that the total interim period compensation rate should be \$33.89 per payphone per month (\$0.229 multiplied by an average of 148 calls per payphone per month). The 2002 Payphone Order deferred to a later order its determination of the allocation of this total compensation rate among the various carriers required to pay compensation for the interim period. In addition to addressing the rate level for dial-around compensation, the FCC has also addressed the issue of carrier responsibility with respect to dial-around compensation payments.

On October 23, 2002 the FCC released its Fifth Order on Reconsideration and Order on Remand, or the Interim Order, which resolved all of the remaining issues surrounding the interim/intermediate period true-up and specifically addressed how the liability for flat rate monthly per-phone compensation owed to PSPs would be allocated among the relevant dial-around carriers. The Interim Order also resolved how certain offsets to such payments would be handled and a host of other issues raised by parties in their remaining FCC challenges to the 1999 Payphone Order and the 2002 Payphone Order. In the Interim Order, the FCC ordered a true-up for the interim period and increased the adjusted monthly rate to \$35.22 per payphone per month, to compensate for the three-month payment delay inherent in the dial-around payment system. The new rate of \$35.22 per payphone per month is a composite rate, allocated among approximately five hundred carriers based on their estimated dial-around traffic during the interim period. The FCC also ordered a true-up requiring the PSPs, including Davel, to refund an amount equal to \$0.046 (the difference between the old \$.284 rate and the current \$.238 rate) to each carrier that compensated the PSP on a per-call basis during the intermediate period. Interest on additional payments and refunds is to be computed from the original payment due date at the IRS prescribed rate applicable to late tax payments. The FCC further ruled that a carrier claiming a refund from a PSP for the Intermediate Period must first offset the amount claimed against any additional payment due to the PSP from that carrier. Finally, the Interim Order provided that any net claimed refund amount owing to carriers cannot be offset against future dial-around payments without (1) prior notification and an opportunity to contest the claimed amount in good faith (only uncontested amounts may be withheld); and (2) providing PSPs an opportunity to "schedule" payments over a reasonable period of time.

Davel and its billing and collection clearinghouse have previously reviewed the order and prepared the data necessary to bill or determine the amount due to the relevant dial-around carriers pursuant to the Interim Order. As of November 15, 2004, the date we acquired Davel, Davel had accrued a liability relating to dial-around compensation due to certain carriers pursuant to the Interim Order of \$1,172,789. In addition, Davel had recorded \$2,683,774 relating to the

sale of a portion of Davel's accounts receivable bankruptcy claim for dial-around compensation due from WorldCom (now MCI), a part of which related to the amount due from WorldCom under the Interim Order. Subsequent to the acquisition date, Davel received \$2,683,774 million in cash and MCI common stock in full settlement of the remaining portion of its claim, including the accounts receivable bankruptcy claim previously sold and Davel's retained interest in the bankruptcy claim. In January 2005, certain carriers deducted \$453,431 from their current dial-around compensation payments, thus reducing the liability accrued by Davel applicable to the Interim Order. The remaining amounts outstanding were deducted from the quarterly payments of dial-around compensation received by Davel in April 2005.

For the fiscal year ended March 31, 2005, Davel received \$420,366 of receipts from carriers under the Interim Order that has been reported as revenues in the consolidated statements of operations. In accordance with Davel's accounting policy on regulated rate actions, revenue from dial-around compensation pursuant to the Interim Order was recognized as revenue in March 2005, the period such revenue was received. Although Davel is entitled to receive a substantial amount of additional dial-around compensation pursuant to the Interim Order, such amounts, subject to certain limitations, have been assigned to Davel's former secured lenders in exchange for a reduction in Davel's secured debt prior to the acquisition of such debt by MobilePro.

On August 2, 2002 and September 2, 2002 respectively, the American Public Communications Council, the APCC, and the Regional Bell Operating Companies, the RBOCs, filed petitions with the FCC to revisit and increase the dial-around compensation rate level. Using the FCC's existing formula and adjusted only to reflect current costs and call volumes, the APCC and RBOCs' petitions supported an approximate doubling of the current \$0.24 rate. On August 12, 2004, the FCC released an order to increase the dial-around compensation rate from \$0.24 to \$0.494 per call, or the 2004 Order. The new rate became effective September 27, 2004, 30 days after publication of the 2004 Order in the Federal Register, and may be subject to appeal by IXC's or other parties. Dial-around revenues at the new rate of \$0.494 per call, which aggregated \$4,695,085 for the year ended March 31, 2005, are included in revenues reported in the MobilePro's consolidated financial statements.

Regulatory actions and market factors, often outside Davel's control, could significantly affect Davel's dial-around compensation revenues. These factors include (i) the possibility of administrative proceedings or litigation seeking to modify the dial-around compensation rate, and (ii) ongoing technical or other difficulties in the responsible carriers' ability and willingness to properly track or pay for dial-around calls actually delivered to them.

Effect of Federal Regulation of Local Coin and Dial-Around Calls. To ensure "fair compensation" for local coin calls, the FCC previously determined that local coin rates from payphones should be generally deregulated by October 7, 1997, but provided for possible modifications or exemptions from deregulation upon a detailed showing by an individual state that there are market failures within the state that would not allow market-based rates to develop. On July 1, 1997, a federal court issued an order that upheld the FCC's authority to deregulate local coin call rates. In accordance with the FCC's ruling and the court order, certain LECs and IPPs, including Davel, have increased rates for local coin calls. Initially, when Davel increased the local coin rate to \$0.35, Davel experienced a large drop in call volume. When Davel subsequently raised its local coin rates to \$0.50, it did not experience call volume declines at the same levels. Davel has experienced, and continues to experience, lower coin call volumes on its payphones resulting not only from increased local coin calling rates, but from the growth in wireless communication services, changes in call traffic and the geographic mix of Davel's payphones, as well.

Other Provisions of The 1996 Telecom Act and FCC Rules. As a whole, the Telecom Act and FCC Rules significantly altered the competitive framework of the payphone industry. Davel believes that implementation of the Telecom Act has addressed certain historical inequities in the payphone marketplace and has, in part, led to a more equitable and competitive environment for all payphone providers. However, there remain several key areas of implementation of the 1996 Telecom Act yet to be fully and properly implemented such that the 1996 congressional mandate for widespread deployment of payphones is not being realized. This circumstance creates an uncertain environment in which Davel and the industry must operate. Davel has identified the following such uncertainties:

Various matters pending in several federal courts and raised before the Congress which, while not directly challenging Section 276, relate to the validity and constitutionality of the Telecom Act, as well as other uncertainties related to the impact, timing and implementation of the Telecom Act.

The 1996 Payphone Order required that LEC payphone operations be removed from the regulated rate base on April 15, 1997. The LECs were also required to make the access lines that are provided for their own payphones equally available to IPPs and to ensure that the cost to payphone providers for obtaining local lines and services met the FCC's new services test guidelines, which require that LECs price payphone access lines at the direct cost to the LEC plus a

reasonable allocation of overhead. Proceedings are still pending in various stages and formats before the FCC and numerous state regulatory bodies across the nation to implement these provisions.

In the past, RBOCs were allegedly impaired in their ability to compete with the IPPs because they were not permitted to select the interLATA carrier to serve their payphones. Recent changes to the FCC Rules remove this restriction. Under the existing rules, the RBOCs are now permitted to participate with the Location Owner in selecting the carrier of interLATA services to their payphones, effective upon FCC approval of each RBOC's Comparably Efficient Interconnection plans. Existing contracts between Location Owners and payphone or long-distance providers that were in effect as of February 8, 1996 were grandfathered and will remain in effect pursuant to their terms.

The 1996 Payphone Order preempts state regulations that may require IPPs to route intraLATA calls to the LEC by containing provisions that allow all payphone providers to select the intraLATA carrier of their choice. Outstanding questions still exist with respect to 0+ local and 0 - call routing, whose classification will await the outcome of various state regulatory proceedings or initiatives and potential FCC action.

The 1996 Payphone Order determined that the administration of programs for maintaining public interest payphones should be left to the states within certain guidelines. Various state proceedings have been undertaken in reviewing this issue, but no widespread or effective actions have been taken to stem the tide of payphone removal around the nation. The FCC has pending various "universal service" proposals under consideration which may impact Davel, both positively and negatively.

Billed Party Preference and Rate Disclosure. On January 29, 1998, the FCC released its Second Report and Order on Reconsideration entitled In the Matter of Billed Party Preference for InterLATA 0+ Calls, Docket No. 92-77. Effective July 1, 1998, all carriers providing operator services were required to give consumers using payphones the option of receiving a rate quote before a call is connected when making a 0+ interstate call. The system appears to be functioning adequately to meet its designated goals.

State and Local Regulation. State regulatory authorities have been primarily responsible for regulating the rates, terms and conditions for intrastate payphone services. Regulatory approval to operate payphones in a state typically involves submission of a certification application and an agreement by Davel to comply with applicable rules, regulations and reporting requirements. The states and the District of Columbia have adopted a variety of state-specific regulations that govern rates charged for coin and non-coin calls, as well as a broad range of technical and operational requirements. The 1996 Telecom Act contains provisions that require all states to allow payphone competition on fair terms for both LECs and IPPs. State authorities also in most cases regulate LEC tariffs for interconnection of independent payphones, as well as the LECs' own payphone operations and practices.

Davel is also affected by state regulation of operator services. Most states have capped the rates that consumers can be charged for coin toll calls and non-coin local and intrastate toll calls made from payphones. In addition, Davel must comply with regulations designed to afford consumers notice at the payphone location of the long-distance company or companies servicing the payphone and the ability to access alternate carriers. Davel believes that it is currently in material compliance with all such regulatory requirements.

In accordance with requirements under the Telecom Act, state regulatory authorities are currently reviewing the rates that LECs charge IPPs for local line access and associated services. Local line access charges have been reduced in certain states, and Davel believes that selected states' continuing review of local line access charges, coupled with competition for local line access service resulting from implementation of the Telecom Act, may lead to more options available to Davel for local line access at competitive rates. Davel cannot provide assurance, however, that such options or local line access rates will become available in all states.

Davel believes that an increasing number of municipalities and other units of local government have begun to impose taxes, license fees and operating rules on the operations and revenues of payphones. Davel believes that some of these fees and restrictions may be in violation of provisions of the Telecom Act prohibiting barriers to entry into the business of operating payphones and the policy of the Act to encourage wide deployment of payphones. However, in at least one instance, involving a challenge to a payphone ordinance adopted by the Village of Huntington Park, California, the FCC declined to overturn a total ban on payphones in a downtown area. The proliferation of local government licensing, restriction, taxation and regulation of payphone services could have an adverse affect on Davel and other PSPs unless the industry is successful in resisting or moderating this trend.

Employees

As of September 15, 2005, we employed 304 full-time employees and 14 consultants. We anticipate that we will need additional people to fill administrative, sales and technical positions if we continue to be successful in raising capital to implement our strategic business plan. We have no collective bargaining agreements with our employees. The breakout of employees and consultants by reporting segment is as follows:

35

Corporate	6 full-time employees and 1 consultant
Technology	56 full-time employees and 8 consultants
Voice Services	135 full-time employees and 4 consultant
Internet Services	107 full-time employees and 1 consultant

DESCRIPTION OF PROPERTY

Our principal executive offices are located in approximately 2,000 square feet of leased office space at 6701 Democracy Boulevard, Suite 202, Bethesda, Maryland 20817. The lease includes a free rent period that expires on February 28, 2006. The remaining term of the lease expires on February 28, 2009.

In addition, our subsidiary operations currently occupy leased office space in locations around the country. A description of the occupancy terms for each of our significant locations follows.

CloseCall occupies approximately 14,000 square feet of leased office space in Stevensville, Maryland, that includes management, finance, sales and a customer support call center. The initial term of the lease expires on February 28, 2007, but the lease contains a provision providing CloseCall with the option of extending the lease for two additional years at the end of the initial term and at the end of each option term.

AFN occupies approximately 3,200 square feet of leased office space in Overland Park, Kansas, that includes management, finance, sales and operations. The initial term of the lease expires on July 31, 2006.

The Davel organization occupies approximately 16,700 square feet of leased office space in Cleveland, Ohio; the lease term expires on September 29, 2008. Approximately 4,000 square feet of storage space is also rented in Cleveland on a month-to-month basis.

NeoReach Wireless occupies an office in Tempe, Arizona, consisting of approximately 1,800 square feet, under a lease that terminates on May 31, 2006.

Kite Broadband operates 1) a call center in Tucson, Arizona, under a lease of 8,150 square feet that expires on July 31, 2008, and that includes two three-year options, and 2) a data center in Ridgeland, Mississippi, under a lease of 1,500 square feet that expires on August 31, 2008. Its corporate office is also located in Ridgeland, Mississippi, occupying approximately 5,000 square feet of space under a month-to-month arrangement. The organization is looking for suitable space to serve as the corporate office on a long-term basis.

The operations of our Internet services business segment, including DFW, occupy small leased office space facilities in numerous locations around the United States. The lease expiration dates for the most important properties are January 2, 2006 (Houston), April 30, 2006 (Seattle), November 15, 2006 (Janesville, Wisconsin), May 31, 2007 (Shreveport, Louisiana), November 30, 2007 (Irving, Texas) and February 29, 2008 (Tucson, Arizona) .

MANAGEMENT'S DISCUSSION AND ANALYSIS OF RESULTS OF OPERATIONS AND FINANCIAL CONDITION

The following information should be read in conjunction with the audited and unaudited condensed consolidated financial statements of Mobilepro Corp. and the notes thereto appearing elsewhere in this filing. Statements in this "Management's Discussion and Analysis of Results of Operation and Financial Condition" and elsewhere in this Prospectus that are not statements of historical or current fact constitute "forward-looking statements."

The following is a discussion and analysis of 1) our results of operations for the three and six months ended September 30, 2005 and 2004, and the fiscal years ended March 31, 2005 and 2004, 2) our financial position at September 30, 2005, and 3) the factors that could affect our future financial condition and results of operations. Historical results may not be indicative of future performance.

Overview

Prior to January 2004, we were a development stage company. Although we were incorporated only five years ago, we have undergone a number of changes in our business strategy and organization. In June 2001, we focused our business on the integration and marketing of complete mobile information solutions to meet the needs of mobile professionals. In April 2002, we acquired NeoReach, and shifted our focus toward solutions supporting the third generation wireless market. We shifted our business strategy again in December 2003 with a new management team, expanding significantly the scope of our business activity to include Internet access services, local and long distance telephone services and the ownership and operation of payphones. In 2005, we began to invest in the business of deploying broadband wireless networks and providing wireless network access services in wireless access zones to be primarily located in municipality sponsored areas. We entered these businesses primarily through the acquisition of established companies. These operations have been acquired within the last twenty-four months. Accordingly, our experience in operating our current businesses is limited. Although we have reported net income for three consecutive quarters, our Company has lost money historically. In the years ended March 31, 2005 and 2004, we incurred net losses of \$5,359,722 and \$2,157,844, respectively.

Our acquisitions have resulted in the creation of a broadband wireless, telecommunications, and integrated data communication services company with consolidated revenues of approximately \$49 million for the six months ended September 30, 2005 with customers representing approximately 222,000 equivalent subscriber lines. We have reported net income for three consecutive quarters. We intend to pursue additional acquisitions to further the development of our Internet services business, competitive local exchange and wireless broadband businesses. We expect that future revenue growth will occur largely through the consummation of additional acquisitions, growth of our core CLEC business, and the deployment, ownership and management of broadband wireless networks that we expect to provide subscription and advertising revenues. We have a publicly announced goal of reaching \$200 million in annualized revenues and 10% EBITDA margin by the end of the current year. Based on our revenues for the three months ended September 30, 2005 and the addition of revenues provided by InReach, we have attained an annualized revenue run rate of approximately \$106 million. Revenues for the three months ended September 30, 2004 were approximately \$4,968,000. Our EBITDA for the three months ended September 30, 2005, expressed as a percentage of revenues, was approximately 8.6%. EBITDA for the three months ended September 30, 2004 was a loss representing approximately 25.5% of revenues. In order for our annualized revenue goal to be achieved, we would need to consummate the acquisition of one or more companies with annualized revenues exceeding \$94 million prior to March 31, 2006. Although we continue actively to evaluate acquisition opportunities, there can be no assurance that we will complete any additional acquisitions this year or that any additional acquisitions will provide sufficient revenues to achieve the goal.

Our strategy is unproven and the revenue and income potential from our strategy is unproven. We may encounter risks and difficulties frequently encountered by companies that have grown rapidly through acquisition, including the risks described elsewhere in this Prospectus. Our business strategy may not be successful and we may not be able to

successfully address these risks.

We realize that effective analysis of our operations with an approach of comparing results for a current period with the results of a corresponding prior period may be difficult due to the significant number of acquisitions and stock issues that we have completed. In order to analyze ourselves, we focus not only on achieving increasing amounts of net income and EBITDA, but emphasize the increase of net income per share.

Revenues for the reportable business segments for the three and six months ended September 30, 2004 and 2005 were as follows:

Business Segment	Three Months Ended September 30,		Six Months Ended September 30,	
	2004	2005	2004	2005
Voice	\$ 955,571	\$ 19,333,581	\$ 955,571	\$ 37,796,032
Internet Services	3,547,498	3,823,619	4,567,662	7,861,019
Wireless Networks	-	3,389,450	-	3,395,444
Corporate	465,000	-	615,000	-
Total Revenues	\$ 4,968,069	\$ 26,546,650	\$ 6,138,233	\$ 49,052,495

The revenues of the voice services business segment are provided primarily by the operations of Davel and CloseCall. Davel's revenues represented approximately 42% and 45% of voice services revenues and consolidated revenues, respectively, for the six months ended September 30, 2005. CloseCall's revenues represented approximately 25% and 28% of voice services revenues and consolidated revenues, respectively, for the six months ended September 30, 2005. We do not expect that the changing UNE-P regulations will impact CloseCall's revenues materially as we have multi-year agreements in place with our major carriers such as Verizon.

We deliver a comprehensive suite of voice and data communications services, including local exchange, long distance, enhanced data, Internet, wireless and broadband services to our end-user customers. We are focused on growing our current customer bases, developing and deploying wireless technologies, acquiring and growing profitable telecommunications and broadband companies and forging strategic alliances with well positioned companies with complementary product lines and in complementary industries. We are also an innovator and developer of wireless broadband networks and services. Our wireless broadband networks and services will be provided in our Wireless Access Zones (WAZ) to be primarily located in municipality sponsored areas. These network systems are scalable and flexible and will be readily modified to offer a variety of broadband services.

Cost of network services is comprised primarily of telecommunications charges, including data transmission and database access, leased digital capacity charges, circuit installation charges and activation charges. The costs of database access, circuits, installation charges and activation charges are based on fixed fee and/or measured services contracts with local exchange carriers, inter-exchange carriers and data services providers. The cost of providing services to our customers also includes salaries, equipment maintenance and other costs related to the ongoing operation of our network facilities. Depreciation expense on our network equipment is excluded from our cost of network services and is included in depreciation and amortization of property and equipment and amortization of intangible assets in our consolidated statements of operations. Our other operating expenses include costs related to sales, marketing, administrative and management personnel; outside legal, accounting and consulting services; advertising and occupancy expenses; and other costs of being a publicly traded company, including legal and audit fees, insurance premiums and board of director fees.

Management Challenges

The following section provides discussion of the material opportunities, challenges and risks on which the management team is most focused. See the "Risk Factors" section of this Prospectus for an extensive identification and discussion of risks related to our business. Management is concentrating its efforts on the business development and network deployment activities of NeoReach Wireless, the consolidation and integration of the Internet services and voice services businesses, and the identification and securing of additional sources of growth capital.

We see opportunity for growth in the emerging market presented by municipally sponsored broadband wireless networks. Our acquisition strategy of the last two years has been executed, in part, with the objective of establishing a viable telecommunications company with sufficient credibility to be considered for selection by cities for the deployment, ownership and management of broadband wireless networks. The initial indication of the effectiveness of our business plan execution was the selection by Tempe, Arizona, of NeoReach Wireless for its network. Subsequently, we were selected by five other cities for the deployment, ownership and management of such networks. However, the ramp-up time from selection to the completion of deployment can exceed six months. As a result, we will incur significant costs related to this business before the Tempe deployment is completed in February 2006, and therefore before any significant revenues are expected. The capital equipment costs for the Tempe network are expected to approximate \$1,800,000. Operating costs for NeoReach Wireless, currently running at a monthly rate of approximately \$200,000, were approximately \$878,000 for the six months ended September 30, 2005.

Many of the companies that we have acquired are experiencing declining revenues as we expected. Over 80% of the customers of our Internet services business are subscribers to dial-up service. The revenues of this business segment have declined from approximately \$4,580,000 for the three months ended March 31, 2005 to \$3,824,000 for the three months ended September 30, 2005. Likewise, the pay telephone business is declining due primarily to the public's increasing usage of competitive technologies. Revenues for Davel for the six months ended September 30, 2005 were approximately \$22,187,000 compared with revenues of approximately \$28,724,000 for the corresponding period of the prior year. The declining revenues of these businesses and the operating costs of NeoReach Wireless discussed above are adversely affecting our operating profitability.

As a result, we are currently focused on the implementation of a company-wide plan of consolidation and integration of our operations. Primarily, the completion of this plan will result in the combination of the Internet service provider and CloseCall CLEC businesses. The customer-facing activities of this combined business will be conducted by a retail operation organization that will conduct all marketing, provisioning, billing and customer support activities. Likewise, the network operation will be managed by a single organization. Simultaneously, we will consolidate our financial operations into a single organization. As a result, we expect to achieve improvements in the quality and consistency of our delivered services and customer support, while reducing our operating expenses. The execution of this plan will include the elimination of employment positions in a series of reductions and the closing of certain facilities. We will begin to record the costs associated with these restructuring activities in the third quarter. More importantly, the consolidation of these businesses will significantly enhance our ability to cross-sell and bundle services in efforts to retain the subscriber base of the Internet service business and grow the revenues of our CLEC businesses at CloseCall and AFN.

As discussed in detail below, we have relied on funds provided by Cornell Capital in order to finance the cost of our acquisitions and enable us to grow the Company. In the current fiscal year, we have also used these funds to invest in the business of Kite and to fund the operation of our municipal broadband wireless network business and the deployment of the network in Tempe. In order to reduce the cost of capital, to strengthen the balance sheet, to improve liquidity and to provide the financial flexibility to react quickly to future acquisition opportunities, we are focused on the establishment of alternative sources of growth capital. In this regard, we recently announced a new association with an investment banking firm, Ryan Beck & Co., to assist us in this search.

Critical Accounting Policies

We believe there have been no significant changes in our critical accounting policies during the current year as compared to what was previously disclosed in Management's Discussion and Analysis of Financial Condition and Results of Operations included in our Annual Report on Form 10-KSB for the year ended March 31, 2005. During the current year, because the \$100 million Standby Equity Distribution Agreement with Cornell Capital (the "SEDA") is providing equity financing to us, we began to amortize deferred financing costs related to the SEDA to additional paid-in-capital and we began to charge this account for the additional fees paid to Cornell Capital and other financial advisors in connection with making draws under the SEDA.

We consider the accounting policies related to revenue and related cost recognition, the valuation of goodwill and other intangible assets and the accounting for transactions related to our debt and equity financing activity to be critical to the understanding of our results of operations. Critical accounting policies include the areas where we have made what we consider to be particularly subjective or complex judgments in making estimates and where these estimates can significantly impact our financial results under different assumptions and conditions. We prepare our financial statements in conformity with U.S. generally accepted accounting principles. As such, we are required to make certain estimates, judgments and assumptions that we believe are reasonable based upon the information available. These estimates, judgments and assumptions affect the reported amounts of assets and liabilities at the date of the financial statement and the reported amounts of revenue and expenses during the periods presented. Actual results could be different from these estimates.

The Notes to the Consolidated Financial Statements included elsewhere in this Prospectus include two additional disclosures that were not included in the set of Notes to Consolidated Financial Statements that were a part of our Form-10KSB for the year ended March 31, 2005. In the discussion of our revenue recognition policies in Note 2, we have added a statement that the revenues for the year ended March 31, 2005 included an adjustment to previously recorded revenues of \$167,319. In the Note 17 discussion of our income taxes, we have added the additional disclosures required by SFAS No. 109 that reconcile the statutory federal income tax rate of 35% to our effective rate of 0% for the fiscal years ended March 31, 2005 and 2004, present the components of our net deferred tax asset at March 31, 2005 and 2004, and disclose the amount of our net operating loss carryforward amount at March 31, 2005 of approximately \$15.9 million.

New Accounting Pronouncements

In December 2004, the Financial Accounting Standards Board revised SFAS No. 123. The revision, referred to as SFAS 123R, was entitled "Share-Based Payment". This revised pronouncement replaces SFAS 123 and supersedes APB No. 25, and its scope encompasses a wide range of share-based compensation arrangements including share options, restricted share plans, performance-based awards, share appreciation rights and employee share purchase plans.

SFAS 123R requires that the compensation cost relating to share-based payment transactions be recorded in financial statements. For each transaction, compensation cost is to be measured based on the fair value of the equity or liability instrument issued. The pro forma disclosures previously permitted under SFAS No. 123 no longer will be an alternative to financial statement recognition of compensation expense. In accordance with a Securities and Exchange Commission announcement released in April 2005, small business issuers will be allowed to implement SFAS No. 123R as of the beginning of the first annual period that begins after December 15, 2005 -- for us that means adoption in the first fiscal quarter ending June 30, 2006.

Under SFAS No. 123R, we must determine the appropriate fair value model to be used for valuing share-based payments, the amortization method for compensation cost and the transition method to be used at date of adoption. The permitted transition methods include either retrospective or prospective adoption. Under the retrospective method, prior periods may be restated either as of the beginning of the year of adoption or for all periods presented. The prospective method requires that compensation expense be recorded for all unvested stock options at the beginning of the first quarter of adoption of SFAS No. 123R, while the retrospective methods would record compensation expense for all unvested stock options beginning with the first period presented. We are evaluating the requirements of SFAS No. 123R and expect that its adoption will have a material adverse impact on our consolidated financial position and consolidated results of operations including an increase in compensation expense for equity instruments issued to employees. We have not yet determined the method of adoption or the effect of adopting SFAS No. 123R, and we have not determined whether the adoption will result in amounts that are similar to the current pro forma disclosures that have been provided in accordance with SFAS No. 123.

Results of Operations and Financial Condition

The Three Months Ended September 30, 2005 and 2004

Total Revenues

We generated consolidated revenues of \$26,546,650 in the three-month period ended September 30, 2005 compared with revenues of \$4,968,069 in the corresponding period of the prior fiscal year. Since April 1, 2004, we have completed the acquisition of sixteen companies that have provided significant revenues to us, particularly to our voice and Internet services operating segments. The most significant portions of our revenues are provided by our CloseCall and Davel subsidiaries that were acquired in October 2004 and November 2004, respectively.

Revenues by Segment

Voice Services. We deliver voice communications services to end users on a retail basis principally through this business segment. Revenues from our voice services for the current quarter ended September 30, 2005 were \$19,333,581, representing 72.8% of consolidated revenues. The revenues of this segment were only \$955,571 in the second quarter last year. The current year revenues were attributable primarily to CloseCall, Davel and AFN, all of which were acquired subsequent to last year's second quarter. The revenues for these three companies in the three months ended September 30, 2005 were \$6,685,422, \$11,015,672 and \$1,632,488, respectively. This group derives most of its operating revenues from recurring monthly charges, coin revenue and "dial-around" revenues (intercarrier compensation paid to us by the providers of 800 numbers at the rate of 49.4 cents per call) that are generated by our communications services.

Internet Services. We deliver data communications services to end users on a retail basis principally through this business segment. Revenues from Internet services for the current quarter ended September 30, 2005 were \$3,823,919, representing approximately 14.4% of consolidated revenues. We reported Internet service revenues of \$3,547,498 for the prior year quarter ended September 30, 2004. The current year results included a full quarter of operating results for each of the eight data services companies acquired during the fiscal year ended March 31, 2005. As a result of the additions to revenues of the voice group as discussed above, we derived a decreasing percentage of our consolidated revenues from Internet services.

Wireless Networks. The revenues of this operating segment principally relate to Kite. As indicated above, Kite's revenues for the current quarter were \$3,385,314, representing 12.8% of consolidated revenues. To date, the revenues earned by NeoReach Wireless are insignificant. This segment did not generate any revenues for the fiscal quarter ended September 30, 2004. In the second quarter, our profitability was adversely affected by an acceleration of spending by NeoReach Wireless. Increased interest in municipal wireless projects, as measured by the number of municipalities issuing requests for proposals, has convinced us to increase the pace of our investment in this business. In order to respond to the growing number of opportunities, we have increased staff in this group to a total of eight employees and expanded our business development activities resulting in increased compensation costs, tradeshow attendance costs and other travel expenses. These costs represent the major portion of the \$734,503 in operating expenses incurred by NeoReach in the second quarter. By the end of the fiscal year, we expect to be chosen by one or more other municipalities to deploy and manage wireless networks.

Corporate. From time to time, the corporate segment generates miscellaneous revenues. No such revenues were generated by this segment in the current year quarter. During the quarter ended September 30, 2004, we reported \$465,000 in miscellaneous revenues.

Operating Costs and Expenses

Total operating costs and expenses for the three months ended September 30, 2005, including depreciation and amortization, were \$25,181,706, representing 94.9% of consolidated revenues, compared with \$6,618,579 in the corresponding period of the prior year, representing 133.2% of consolidated revenues. Operating costs and expenses have increased, but decreased as a percentage of consolidated revenues, as we acquire companies and increase the size of our businesses. The cost of services (excluding depreciation and amortization) was \$11,654,395 in the three months ended September 30, 2005, or 43.9% of revenues, compared with \$2,167,373, or 43.6% of revenues, in the prior year quarter. Compensation expenses, professional fees paid to attorneys, accountants and other advisors, and other general and administrative expenses comprises a major portion of operating costs and expenses. Such expenses represented 44.5% of total operating costs and expenses in the three-month period ended September 30, 2005.

Interest Expense

Interest expense, net, was \$698,335 for the three-month period ended September 30, 2005 compared with only \$97,251 in the comparable period of the prior year. The amount of our debt has increased substantially between years as we have used debt financing to consummate certain major acquisitions. Most significantly, the purchase consideration for the acquisition of Davel in November 2004 included \$14 million cash. These funds were provided by the proceeds of the acquisition bridge loan that was refinanced in May 2005 with funds provided by the issuance of the \$15.5 million convertible debenture to Cornell Capital. In addition, we used funds borrowed from Cornell Capital to provide the \$8 million cash portion of the CloseCall purchase consideration and the combined total of \$5,325,000 in cash required to consummate the acquisition of AFN and to make our investment in Kite. The major components of interest expense for the current year quarter included approximately \$310,000 related to notes payable to Cornell Capital, and approximately \$404,000 related to the convertible debenture including approximately \$101,000 in debt discount accretion. In the comparable quarter of the prior year, the interest expense of \$97,251 primarily related to notes payable to Cornell Capital. We do not expect our overall level of debt to increase significantly during the remainder of the current fiscal year.

Net Income (Loss)

We reported net income of \$523,900 for the three-month period ended September 30, 2005, or \$0.0012 per share on a diluted basis, compared with a net loss of \$1,747,761, or \$(0.0067) per share, for the corresponding quarter of the prior year. Both the voice and Internet service business segments contributed operating profits in the current year quarter totaling approximately \$2,375,000, more than offsetting an operating loss incurred by the wireless networks

segment of approximately \$563,058 and corporate expenses of \$1,288,524. In the comparable quarter of the prior year, the Internet services and voice segments provided net income of approximately \$416,000 that was not sufficient to offset the combined operating loss of the wireless networks and corporate segments of approximately \$2,164,000. The prior year net loss for the quarter included amortization expense of approximately \$220,000 related to SEDA deferred financing fees. Consistent with our practice of converting funds drawn under the SEDA to common stock, we have charged current year amortization to additional paid-in capital.

Consecutive Quarter Results

On a consecutive quarter basis, consolidated revenues increased by 17.95% from \$22,505,845 reported for the three-month period ended June 30, 2005. Net income increased to \$523,900 for the current quarter from \$419,192 reported for the previous quarter, representing an increase of 24.98%. Significantly benefiting current quarter results were the revenues and profits provided by AFN and Kite; these operations contributed combined revenues of approximately \$5,017,000 and net income of approximately \$777,000. Operating costs and expenses increased by approximately \$4,027,000 from the prior quarter due primarily to the addition of these operations and the increased pace of spending at NeoReach Wireless as explained above. Slightly offsetting the effect of these increases was the decline in operating expenses incurred by the Internet services segment, also described above. EBITDA, as displayed below, increased by 4.4% on a consecutive quarter basis from \$2,173,744 for the prior quarter to \$2,269,554 for the current quarter.

Our local and long distance service revenues are being negatively affected in the current year by a continued decline in rates and competitive pressures to bundle long distance minutes of use within local service product offerings. Our existing base of business of long distance minutes is also subject to increasing competition from both VoIP and competing wireless service offerings.

As a result, the revenues related to the CLEC business of CloseCall declined in the second quarter from revenues of \$7,291,070 in the first quarter, a decrease of approximately 8.3%.

EBITDA Presentation

EBITDA represents net income (loss) before interest, taxes, depreciation and amortization. EBITDA is not a measurement of financial performance under GAAP. However, we have included data with respect to EBITDA because we evaluate and project the performance of our business using several measures, including EBITDA. The computations of EBITDA for the three-months periods ended September 30, 2004, June 30, 2005 and September 30, 2005 are as follows.

	For the Three Months Ended June 30, 2005		For the Three Months Ended September 30, 2004		2005
Net Income (Loss)	\$	419,192	\$	(1,747,761)	\$ 523,900
Add non-EBITDA items included in net results:					
Depreciation and amortization		822,377		384,218	1,047,319
Interest expense, net		932,175		97,251	698,335
EBITDA	\$	2,173,744	\$	(1,266,292)	\$ 2,269,554

Our negative EBITDA in the second quarter of the prior fiscal year was primarily attributable to acquisition costs and the smaller scale of operations.

We consider EBITDA to be an important supplemental indicator of our operating performance, particularly as compared to the operating performance of our competitors, because this measure eliminates many differences among companies in financial, capitalization and tax structures, capital investment cycles and ages of related assets, as well as certain recurring non-cash and non-operating items. We do believe that consideration of EBITDA should be supplemental, because EBITDA has limitations as an analytical financial measure. These limitations include the following: EBITDA does not reflect our cash expenditures, or future requirements for capital expenditures or contractual commitments; EBITDA does not reflect the interest expense, or the cash requirements necessary to service interest or principal payments, on our indebtedness; although depreciation and amortization are non-cash charges, the assets being depreciated and amortized will often have to be replaced in the future, and EBITDA does not reflect any cash requirements for such replacements; EBITDA does not reflect the effect of earnings or charges resulting from matters we consider not to be indicative of our ongoing operations; and not all of the companies in our industry may calculate EBITDA in the same manner in which we calculate EBITDA, which limits its usefulness as a comparative measure.

Management compensates for these limitations by relying primarily on its GAAP results to evaluate its operating performance and by considering independently the economic effects of the foregoing items that are not reflected in EBITDA. As a result of these limitations, EBITDA should not be considered as an alternative to net income (loss), as calculated in accordance with generally accepted accounting principles, as a measure of operating performance, nor should it be considered as an alternative to cash flows as a measure of liquidity.

The Six Months Ended September 30, 2005 and 2004**Revenues**

Consolidated revenues were \$49,052,495 in the six-month period ended September 30, 2005 compared with revenues of \$6,138,233 in the corresponding period of the prior fiscal year. The most significant portion of the increase in revenues is the combined revenues of CloseCall and Davel, subsidiaries that were acquired in October and November 2004, respectively. As a result, the voice business segment reported revenues of \$37,796,032 for the current year

compared with revenues of \$955,571 in the prior year. The revenues for CloseCall and Davel in the six month ended September 30, 2005 were \$13,976,492 and \$22,187,052, respectively. As indicated above, the recent acquisitions of AFN and Kite added combined revenues of approximately \$5,017,000 to current year results. Full period revenues for all of the acquired ISPs resulted in the increase in Internet services revenues to \$7,861,019 for the current year from revenues of \$4,567,662 reported for the prior year.

Operating Costs and Expenses

Our costs and operating expenses for the six months ended September 30, 2005, including depreciation and amortization, were \$46,336,184, representing 94.5% of consolidated revenues, compared with \$8,317,049 in the corresponding period of the prior year, representing 135.5% of consolidated revenues. Operating costs and expenses have increased significantly, but decreased as a percentage of consolidated revenues, as we acquire companies, increasing the size of our businesses and leveraging the corporate-level functions, and begin to combine operations. The cost of services (excluding depreciation and amortization) was \$22,676,257 in the six months ended September 30, 2005, or 46.2% of revenues, compared with \$2,525,312 or 41.1% of revenues, in the corresponding prior year period. We anticipate that cost of services as a percentage of consolidated revenues may increase in the future as the revenues of our voice segment become a greater portion of consolidated revenues. Compensation expenses, professional fees paid to attorneys, accountants and other advisors, and other general and administrative expenses, a major element of consolidated operating costs and expenses, represented 42.3% of total operating costs and expenses in the six-month period ended September 30, 2005.

Interest Expense

Interest expense, net, was \$1,630,510 for the six-month period ended September 30, 2005 compared with \$326,384 in the comparable period of the prior year. As discussed above, the amount of our debt has increased substantially between years as we have used debt financing to consummate certain major acquisitions. The major components of interest expense for the current year included approximately \$381,000 related to the retired bridge loan, approximately \$639,000 related to notes payable to Cornell Capital, and approximately \$612,000 related to the convertible debenture including approximately \$151,000 in debt discount accretion. In the comparable quarter of the prior year, interest expense primarily related to notes payable to Cornell Capital.

Net Income (Loss)

We reported net income of \$943,092 for the six-month period ended September 30, 2005, or \$0.0023 per share on a diluted basis, compared with a net loss of \$2,505,200, or \$(0.0102) per share, for the corresponding period of the prior year. Both the voice and Internet service business segments contributed net income in the current year quarter totaling approximately \$4,334,000, more than offsetting an operating loss incurred by the wireless networks segment of \$797,133 and corporate expenses of \$2,593,980. In the comparable period of the prior year, the Internet services and voice segments provided net income of approximately \$606,000 that was not sufficient to offset the combined operating loss of the wireless networks and corporate segments of approximately \$3,111,000. The prior year net loss included amortization expense of approximately \$293,000 related to SEDA deferred financing fees.

The Fiscal Years Ended March 31, 2005 and 2004

Total Revenues

Voice Services . We deliver voice communications services to end users on a retail basis principally through our CloseCall operations. Operating revenues from our voice services for fiscal year ended March 31, 2005 were \$32,009,084 compared to \$-0- for fiscal year ended March 31, 2004. The revenue increase was primarily attributable to the effects of our acquisition of CloseCall, Affinity Telecom, Inc and Davel. Revenues from these services represented approximately 68.83% and -0-% of our total operating revenues for the fiscal years ended March 31, 2005 and 2004, respectively. We derive most of our operating revenues from recurring monthly charges, coin revenue and “dial-around” revenue that are generated by our communications services.

Our local and long distance services revenue were negatively affected in fiscal year ended March 31, 2005 by a continued decline in rates and competitive pressures to bundle long distance minutes of use within local service product offerings. Our existing base of business long distance minutes is also subject to increasing competition from both Voice over Internet Protocol and wireless competitive offerings.

Internet Services. We deliver data communications services to end users on a retail basis principally through our Internet Services division. Operating revenues from our data services for the fiscal year ended March 31, 2005 increased \$13,572,705, or 4,358%, to \$13,884,060 from \$311,355 for fiscal year ended March 31, 2004. The increase was primarily attributable to the acquisition of eight additional data services companies during fiscal year ended March 31, 2005. Revenues from these services represented approximately 29.85% and 100% of our total operating revenues for the fiscal years ended March 31, 2005 and 2004, respectively.

As a result of our voice acquisitions last year, we have derived a decreasing percentage of our operating revenues from data services. We expect that gross margin as a percentage of operating revenues associated with our data services will be slightly lower than the gross margin as a percentage of operating revenues associated with our long distance retail or payphone services.

Wireless Networks. Our wireless technology development efforts are conducted by NeoReach and its subsidiary NeoReach Wireless. NeoReach is focused on our ongoing ZigBee chip development work while NeoReach Wireless is focused on our strategic initiatives within the Wi-Fi / Wi-Max space. This segment did not have any revenues for the fiscal years ended March 31, 2005 or 2004.

Corporate. The Corporate segment from time to time receives miscellaneous revenues. During the years ended March 31, 2005 and 2004, the Company generated \$615,000 and \$-0- in miscellaneous revenues, respectively. Revenues from these services represented approximately 1.32% and -0-% of our total operating revenues for fiscal years ended March 31, 2005 and 2004, respectively. The miscellaneous revenues for the year ended March 31, 2005 included \$450,000 that was received in the form of common stock in two companies and is recorded on the consolidated balance sheet as investments at the fair value of the common stock received (see Note 2 to the Consolidated Financial Statements as of March 31, 2005 included elsewhere in this Prospectus). The two common stock transactions included a software company based in Maryland and a specialized electronic assembly prototyping engineering firm in Texas.

Regulatory Impact on Revenue

See the “Regulations” portions of the Description of Business section of the Prospectus for a full discussion of the regulations to which our businesses are subject. These regulations could have a material impact on our revenues and costs of operation.

Operating Costs and Expenses

Operating costs and expenses were \$27,478,063 for fiscal 2005 compared with \$1,977,158 for fiscal 2004. The increase was principally due to our corporate strategy of acquiring telecommunication companies.

Cost of services (exclusive of depreciation and amortization) increased to \$22,551,240, or 48.5% of revenues, in fiscal 2005 compared to \$117,349, or 37.7% of revenues, in fiscal 2004 as the current year included a full year amount of operating results for the Internet services segment. Accordingly, depreciation and amortization increased to \$2,067,213 in 2005 from \$21,000 in the prior year. In addition, the amount of depreciation and amortization for 2005 includes \$733,333 in amortization expense related to deferred financing fees. The largest other components of operating expenses for fiscal 2005 and 2004 related to 1) professional fees and compensation expenses and 2) general and administrative expenses. Professional fees and compensation expenses were \$12,555,710 for fiscal 2005 compared with \$1,577,782 for fiscal 2004. General and administrative expenses were \$10,018,298 for fiscal 2005 compared with \$186,599 for fiscal 2004. These increases were principally due to 1) our corporate strategy of acquiring telecommunication companies and 2) certain one time acquisition costs relating to the twelve acquisitions made during fiscal 2005.

Other operating expenses of significant importance for fiscal 2005 and 2004 related to advertising and marketing expenses and office rent and expenses. Advertising and marketing expenses were \$1,610,285 for fiscal 2005 compared with \$36,995 for fiscal 2004. Office rent and expenses were \$952,475 for fiscal 2005 compared with \$105,142 for fiscal 2004. These increases were principally due to our corporate strategy of acquiring telecommunication companies.

Other Income and Expenses

Other income and expenses were \$1,838,563 for fiscal 2005 compared with \$374,692 for fiscal 2004. The largest components of other income and expenses for fiscal 2005 and 2004 related to 1) interest expense and 2) amortization of discount and interest on conversion of debt. Interest expense was \$1,591,712 for fiscal 2005 compared with \$21,350 for fiscal 2004. The substantial increase in interest expense was principally due to 1) interest on debt relating to the twelve acquisitions made during fiscal 2005 and 2) debt relating to working capital received during negative cash flow periods in fiscal 2005. Amortization of discount and interest on conversion of debt were \$375,150 for fiscal 2005 compared with \$353,342 for fiscal 2004. The amortization of discount and interest on conversion of debt increased slightly in fiscal 2005; however the new Standby Equity Distribution Agreement with Cornell Capital in May 2005 provided for more favorable terms compared to the prior Equity Line with Cornell Capital. The net effect was that we able to convert \$11,200,000 of debt to equity in fiscal 2005 compared to only \$2,915,000 converted for fiscal 2004 and the amortization of discount and interest on conversion of debt only increased by \$21,808 from fiscal 2005 to fiscal 2004. We have been able to convert debt into equity through use of a series of promissory notes and advance requests prepared by Cornell Capital. Each promissory note is for a fixed sum of money with a stated date in the future and that for purposes of being converted into our shares of common stock fluctuates with the per share price that week. The advances by which we "put" our shares of common stock to Cornell Capital are based upon discussions with Cornell Capital so that larger sums of money can be received by us to meet our working capital needs. This system of predetermined notes and advance requests is for the administrative convenience of both parties since it allows us to meet our working capital requirements without the burden of preparing numerous advance requests and also facilitates Cornell Capital's processing of our advance requests.

Net Loss

We incurred acquisition costs of \$3,141,472 in connection with the twelve acquisitions made during fiscal year ended March 31, 2005. These were one time charges including legal, accounting, consulting fees, travel and other related costs, and will not be present in future financial reporting results.

Net loss for fiscal 2005 was \$5,359,722 compared to \$2,157,844 for fiscal 2004 due to the factors described above. Net loss for 2005 before acquisition costs was \$2,218,250, or 2.8% higher than the same period in 2004.

EBITDA Presentation

The computations of EBITDA for the fiscal years ended March 31, 2004 and 2005 are as follows.

	For the Fiscal Years Ended	
	March 31,	
	2005	2004
Net Loss	\$ (5,359,722)	\$ (2,157,844)
Add back non-EBIDTA items included in net loss:		
Depreciation and amortization	2,442,363	374,342
Interest, net	1,574,502	21,350
EBITDA	\$ (1,342,857)	\$ (1,762,152)

Our negative EBITDA in 2005 was attributable to acquisition costs of \$3,141,472 in connection with the twelve acquisitions made during fiscal year ended March 31, 2005. Upon adding back the costs related to the acquisitions that we closed during the fiscal year ended March 31, 2005, we would have generated a positive EBITDA of \$1,798,615.

Liquidity and Capital Resources

During the six-month period ended September 30, 2005, our balance of unrestricted cash and cash equivalents increased by \$3,190,741 to \$7,860,528.

Net cash provided by operations was \$663,318 for the first half of the current fiscal year. Our financing activities during the current year provided net cash proceeds of \$12,971,737, including \$1,205,000 from the refinancing of the bridge loan and \$8,300,000 from borrowings under additional notes payable to Cornell Capital. Net cash paid in connection with the consummation of acquisitions and investments during the current quarter was \$8,802,775, and we made capital expenditures during the current year totaling \$1,641,539.

In the corresponding period of the prior year, the balance of cash and cash equivalents increased by \$6,903,488 despite net cash used in operations of \$1,469,772. From Cornell Capital, we borrowed \$9,000,000 in the prior-year under the equity lines of credit and a total of \$12,200,000 under separate notes payable. Proceeds of these fundings were used to fund operations and to consummate the acquisition of ISPs; \$8,000,000 cash was used in October 2004 to close the acquisition of CloseCall.

Our primary liquidity and capital resource needs are to finance the costs of our acquisitions, to fund the operating costs and equipment requirements of our emerging wireless networks business, to support our other operating activities, to make capital expenditures and to service our debt. Over the last eighteen months, despite our improving profitability, we have depended primarily on funds provided by Cornell Capital to meet our needs. Under a series of transactions with Cornell Capital, we have obtained approximately \$33,550,000 in financing since January 1, 2004, including \$26,500,000 converted to common stock pursuant to the provisions of the Cornell Capital SEDA and the terminated equity line of credit. In addition, proceeds of \$15,500,000 were provided to us in the current year through the issuance of the convertible debenture to Cornell Capital. As discussed above, we used a substantial portion of these proceeds to retire the remaining \$13 million balance of the acquisition bridge loan. We have also used our common stock as consideration in connection with a number of acquisitions. In the last eighteen months, we have issued common stock valued at approximately \$14,142,000 in connection with our acquisitions.

As of September 30, 2005, the actual amount of funds available for future needs under the SEDA is determined as follows:

SEDA Activity and Availability	Amounts
Amounts drawn under the SEDA	\$ 24,900,000
Less -- SEDA draws converted to common stock	(21,950,000)
Notes payable under the SEDA	2,950,000
Other notes payable to Cornell Capital	4,100,000
Outstanding amounts available for conversion	7,050,000
Accrued interest	210,757
Total amounts available for conversion	\$ 7,260,757
Total number of shares of common stock registered for the SEDA	250,000,000
Less -- Number of shares of common stock issued upon the conversion of draws (\$21,950,000) and interest (\$531,666)	(108,075,663)
Less -- Number of shares of common stock issuable upon the conversion of outstanding amounts (\$7,050,000) and accrued interest (\$210,757) based on the closing stock price of \$0.214 per share on November 4, 2005	(34,621,194)

Total number of shares of common stock available for the conversion of future draws and borrowings	107,303,143
--	-------------

Funds available under the SEDA based on the number of shares of common stock available (107,303,143 shares) and a price per share of \$0.214	\$ 22,503,615
--	---------------

Although we have drawn \$24,900,000 from Cornell Capital under the \$100 million SEDA, based on the remaining number of shares registered for the benefit of Cornell Capital and assuming the conversion of the \$4,100,000 in notes payable to Cornell capital at September 30, 2005 and the accrued interest of \$210,757, there are \$22,503,615 in additional funds available under the SEDA for future needs.

However, we expect that our future cash flows from operations, together with the funds that we are able to obtain under our existing SEDA facility, will be adequate to meet our anticipated cash needs for the foreseeable future. To the extent we decide to pursue one or more significant strategic acquisitions, we will likely need to incur additional debt or issue additional equity to finance those acquisitions. We do expect also to continue to engage in capital spending in the ordinary course of business, including the completion of our contractual commitment to complete the build-out of broadband wireless networks in Tempe and other cities. For example, we currently expect that capital expenditures for the Tempe network will approximate \$1,800,000; as of September 30, 2005, we had incurred costs of approximately \$430,000 for the Tempe network.

We have engaged Ryan Beck & Co., an investment banking firm, to advise us in connection with mergers and acquisitions, the possibility of listing of our securities on a stock exchange and potentially raising capital.

During the fiscal year ended March 31, 2005, we concluded that uncertainty pertaining to our ability to operate the Company as a going concern should be eliminated. The events and factors considered by us in reaching this conclusion included our ability to obtain short-term and bridge loans, the commitment received from Cornell Capital to provide us with up to \$100 million in equity financing through the SEDA, and our ability to consummate a series of fourteen acquisitions in the fifteen-month period ended March 31, 2005. The acquired Internet and voice service providers are expected to generate revenues and to provide cash flow from operations. In addition, as discussed above, in May 2005, we refinanced the short-term bridge loan in the amount of \$13 million, bearing interest at an annual rate of 23%, with the proceeds of the \$15.5 million debenture that is scheduled to be paid over a three-year term and that bears an annual interest rate of 7.75%.

Inflation

Our monetary assets, consisting primarily of cash and receivables, and our non-monetary assets, consisting primarily of intangible assets and goodwill, are not affected significantly by inflation. We believe that replacement costs of equipment, furniture and leasehold improvements will not materially affect our operations. However, the rate of inflation affects our expenses, such as those for employee compensation and costs of network services, which may not be readily recoverable in the price of services offered by us.

MANAGEMENT

Our directors and executive officers and their ages as of September 15, 2005 are as follows:

Name	Age	Position
Jay O. Wright	35	President, Chief Executive Officer and Chairman of the Board
Kurt Gordon	39	Chief Financial Officer
Geoffrey B. Amend	37	General Counsel and Secretary
Jack W. Beech	34	Vice President, Technology, and Director
Tom Mazerski	52	Chief Executive Officer, CloseCall America, Inc.
Tammy L. Martin	41	Chief Executive Officer, President and General Counsel of Davel Communications, Inc.
James L. Magruder, Jr.	60	Executive Vice President
Doug Bethell	56	President, American Fiber Network, Inc.
Chris MacFarland	33	Director
Michael G. O'Neil	62	Director
Don Sledge	65	Director

The following is a brief description of the background of our directors and executive officers.

Background Information

Jay O. Wright. Jay O. Wright has served as our President and Chief Executive Officer since December 2003 and as a Director since August 2004. From October 2001 to December 2003, Mr. Wright served as President of Bayberry Capital, Inc., a Maryland based financial consulting firm. During that time, he also served from August 2002 and May 2003 as Chief Financial Officer for Technical and Management Services Corporation where he negotiated the sale of that company to Engineered Support Systems, Inc. Between December 1999 and September 2001 Mr. Wright served as Chief Financial Officer of Speedcom Wireless Corporation, a wireless software technology company, where he helped take that company public via a “reverse merger” and subsequently obtain a NASDAQ SmallCap listing. From January 1999 to November 1999, Mr. Wright served as Senior Vice President of FinanceMatrix.com, a Hamilton, Bermuda-based company focused on developing a proprietary financial software architecture to provide tax-efficient financing to sub-investment grade companies. Between May 1997 and January 1999 Mr. Wright served as an investment banker with Merrill Lynch. Prior to that he was a mergers and acquisitions attorney with Skadden, Arps, Slate, Meagher and Flom, LLP in New York and Foley & Lardner in Chicago. Mr. Wright received his Bachelor’s degree in Business from Georgetown University (summa cum laude) and a JD degree from the University of Chicago Law School.

Kurt Gordon. Kurt Gordon has served as our Chief Financial Officer since March 2004. Between November 2003 and February 2004, he served as a consultant to us. He has over 14 years of experience in finance and operations with special focus on growing entrepreneurial environments. Between April 2000 and September 2003, Mr. Gordon was Chief Financial officer of TARGUS Information Corporation, which pioneered the development of real time intelligence providing businesses access to information about businesses and consumers who contact them by telephone, Internet and wireless devices. Gordon was a key contributor during the largest revenue and employee growth phase of that company’s history. Between March 1997 and April 2000, Mr. Gordon served in several capacities including Director of Finance for KSI Services Incorporated, a real estate acquisition and development corporation. Mr. Gordon also serves on the board of directors of Greenworks Corporation, an OTC Bulletin-Board listed company. Earlier in his career, Mr. Gordon served as a public accountant and consultant in the Entrepreneurial Services group of

Ernst & Young. Mr. Gordon holds a bachelor's degree in Accounting and Information Systems from Virginia Polytechnic Institute and State University.

Geoffrey B. Amend. Geoff B. Amend has served as our General Counsel since November 2004. Prior to joining us, Mr. Amend was in private practice specializing in telecommunications, Internet, and systems integration since 1999. He has served as general counsel to NexGen Telecommunication, Inc., DiscoveryTel, Inc., and Direct Partner Telecom, Inc. All of these companies are engaged in providing facilities-based voice over Internet protocol (VoIP) telecommunications services to the international and/or domestic marketplace. Previously, Mr. Amend practiced corporate and securities law with Klenda, Mitchell, Austerman & Zuercher, L.L.C. in Wichita, Kansas. He received his bachelor's degree in political science and sociology from Regis University and a J.D. degree (with honors) from Washburn University.

Jack W. Beech. Jack Beech has served as the President of DFW Internet Services, Inc. since its acquisition by us in January 2004 and as a Director of the Company since August 2004. Mr. Beech founded DFW in 1993 and served as its President and Chief Executive Officer until its sale to us in January 2004. While serving as President and Chief Executive Officer of DFW, Mr. Beech has taught seminars, given presentations at conventions and appeared as a guest lecturer in colleges and events within the state of Texas to discuss his experiences and knowledge of the Internet services industry.

Tom Mazerski. Tom Mazerski has served as the Chief Executive Officer of CloseCall America, Inc. since its acquisition by us in October 2004. Tom Mazerski co-founded CloseCall as President and CEO in March 1999. Previously, Mr. Mazerski was employed by Verizon from 1979 through 1999. While employed he served in several key jobs at Verizon including Consumer Marketing, Merger Integration, Carrier interconnection, and as an expert witness in the areas of costs and economics.

Tammy L. Martin. Tammy Martin was promoted to serve as the President and Chief Executive Officer of Davel Communications, Inc. in May 2005. Prior to that appointment, Ms. Martin served as the Chief Administrative Officer of the Company since February 2005 and General Counsel of the Company since September 2002. Ms. Martin also served as Secretary of Davel Communications from June 2003 until our acquisition of Davel in November 2004. Prior to joining Davel, Ms. Martin served as General Counsel of AmericanGreetings.com, Inc. since December 2000. From March 2000 to June 2000 she was Chief Financial Officer and General Counsel for Portalvision, Inc. For seven years prior thereto, Ms. Martin held several senior management positions with PhoneTel Technologies, Inc., including Chief Administrative Officer, General Counsel and Secretary. Ms. Martin received her Bachelor's degree in Business Administration with a concentration in accounting and finance from Baldwin Wallace College and a JD degree from Cleveland Marshall College of Law.

Chris MacFarland. Mr. MacFarland has served as a Director of the Company since December 2004. Mr. MacFarland also serves as the chairman of our Board's Nominating and Governance Committee. Mr. MacFarland is Vice President of Operations for BroadSoft, Inc., a Gaithersburg, Maryland company that is a leading software provider of hosted voice and multimedia applications for service providers, a position he has held since July 2004. Prior to joining BroadSoft, Mr. MacFarland was employed by Allegiance Telecom, a leading CLEC based in Dallas, Texas, where he served in a variety of positions between August 1998 and June 2004, most recently as Senior Vice President and Chief Technology Officer. He previously served as director of networks and consulting at Verio.

Michael G. O'Neil. Mr. O'Neil has served as a Director of the Company since December 2004. Mr. O'Neil also serves as the chairman of the Board's Audit Committee. Until retiring in May 2001, Mr. O'Neil was a director in the Investment Banking Division of the Corporate and Institutional Client Group at Merrill Lynch, Pierce, Fenner & Smith Incorporated, an investment banking firm, with whom he had been since 1972. Mr. O'Neil currently serves as a board member and sits on the Audit, Compensation and Nominating and Governance Committees for Massively Parallel Technologies, Inc., a privately held, software technology company specializing in high-speed computing. Mr. O'Neil also serves on the board of directors of Capstead Mortgage Corporation, an NYSE-listed company, where he sits on the Audit Committee and chairs that firm's Governance Committee. He received his bachelor's degree in economics from the University of California at Berkeley and his M.B.A. from the Wharton Graduate School of Business at the University of Pennsylvania. Mr. O'Neil also served in the United States Marine Corps.

Don Sledge. Mr. Sledge has served as a Director of the Company since January 2005. Mr. Sledge also serves as the chairman of our Board's Compensation Committee. Over the past 10 years, Mr. Sledge has focused on finance and investments. He is currently serving on the Board of Directors and as Chairman of the Compensation Committee of Merriman, Curhan, & Ford ("MCF"), an Amex-listed broker/dealer. Mr. Sledge has served as a member of the Board of Directors of MCF since September 1999. He also served as Chief Executive Officer of MCF between September 1999 and October 2000, and as Chairman of the Board from September 1999 until May 2001. Mr. Sledge also served as a General Partner of Fremont Communications from October 2000 until September 2003. In addition to serving on the Boards of Mobilepro and MCF, Mr. Sledge sits on the Board of Directors of three privately held companies. Mr. Sledge received both a bachelor's degree and an M.B.A. from Texas Tech University. He also served in the United States Air Force.

James L. Magruder, Jr. Mr. Magruder has served as Executive Vice President of the Company since August 1, 2005. From February 2002 until May 2004 Mr. Magruder was founder and CEO of Direct Partner Telecom, a company providing international VOIP service. Prior to that he served as President and COO of Nextgen Telecommunications, Inc., focusing on providing international VOIP service. During his career, Mr. Magruder has held management positions with Sprint, United, MCI, AT&T and General Electric. Mr. Magruder received his undergraduate degree in Business Administration from the University of Maryland and his MBA in Business and Finance from Rockhurst University in Kansas City, Missouri.

Doug Bethell. Mr. Bethell has served as President of AFN since we acquired AFN in June 2005. Mr. Bethell has been President of AFN since he incorporated it in 2001. AFN was a provider of long distance telecommunications services. Prior to founding AFN, Mr. Bethell worked with Telephone Management Corporation, engaging in tariff research for many Fortune 100 companies. Mr. Bethell received his Bachelor of Arts degree from Kansas State University.

Committees of the Board

The Board has three standing committees: the Audit Committee, the Compensation Committee, and the Nominating and Governance Committee. The functions of each of these committees and their members are specified below. The Board has determined that each director who serves on these committees is "independent" as defined in Nasdaq Rule 4200(a)(15).

The members of the committees are identified in the following table.

Director	Audit Committee	Compensation Committee	Nominating and Governance Committee
Chris MacFarland	X	X	Chair
Michael O'Neil	Chair	X	X
Don Sledge	X	Chair	X

The Audit Committee is currently comprised of Messrs. O'Neil, MacFarland and Sledge, each of whom meets each of the independence and other requirements for audit committee members under the rules of The Nasdaq Stock Market. The Board of Directors has determined that Mr. O'Neil is an "audit committee financial expert" as defined by SEC regulations. The Board has also determined that one or more other members of the Audit Committee may also meet the definition of "audit committee financial expert" as defined by SEC regulations. The Audit Committee assists the Board in its oversight of our financial accounting, reporting and controls by meeting with members of management and our independent auditors. The committee has the responsibility to review our annual audited financial statements, and meets with management and the independent auditors at the end of each quarter to review the quarterly financial

results. In addition, the committee considers and approves the employment of, and approves the fee arrangements with, independent auditors for audit and other functions. The Audit Committee reviews our accounting policies and internal controls. The Audit Committee has a written charter that was adopted on June 15, 2005.

The Compensation Committee is currently comprised of Messrs. MacFarland, O'Neil and Sledge. The Compensation Committee recommends cash-based and stock compensation for our executive officers, administers our employee stock option plan and other stock grants and makes recommendations to the Board regarding such matters. The Compensation Committee has a written charter that was adopted on June 15, 2005.

The Nominating and Governance Committee is currently comprised of Messrs. MacFarland, O'Neil and Sledge. The Nominating and Governance Committee is entrusted with responsibility for consideration and review of corporate governance matters in addition to its responsibilities for nominating candidates for membership to the Board. The Nominating and Governance Committee has a written charter that was adopted on April 26, 2005.

Compensation of Directors

We are providing our independent directors \$2,500 per month as compensation for services provided as a Director. As inside directors, neither Mr. Wright nor Mr. Beech receives any separate compensation for their service on our Board of Directors.

In April 2004, in connection with his agreement to serve on our Board of Directors, we granted Mr. Lozinsky a warrant to purchase 6,000,000 shares of our common stock, at an exercise price of \$0.018 per share. 4,000,000 of the 6,000,000 warrant shares related to prior services rendered and the remaining 2,000,000 warrant shares related to future services which warrants were to vest over a two year period. In May 2005, we announced that Mr. Lozinsky resigned from our Board, forfeiting warrants to purchase 1,000,000 shares of our common stock.

Prior to his election to our Board of Directors, Mr. O'Neil had been serving on our advisory board. In connection with his service on the advisory board, in January 2004, we granted Mr. O'Neil a warrant to purchase 800,000 shares of our common stock, at an exercise price of \$0.02 per share.

Prior to his election to our Board of Directors, Mr. MacFarland had been serving on our advisory board. In connection with his service on the advisory board, in March 2004, we granted Mr. MacFarland an option to purchase 800,000 shares of our common stock, at an exercise price of \$0.10 per share.

In January 2005, in connection with his agreement to serve on our Board of Directors, we granted Mr. Sledge a warrant to purchase 500,000 shares of our common stock, at an exercise price of \$0.185 per share.

In April 2005 we granted each of our independent directors, Mr. MacFarland, Mr. O'Neil and Mr. Sledge warrants to purchase 250,000 shares of our common stock, at an exercise price of \$0.15 per share.

Advisory Board

We have an advisory board that serves as external advisors to the management team and our board of directors to help identify, launch and develop new business ventures and projects. The members of the advisory board meet two times per year in person and have received stock options that in general vest over a two year period. The members of the advisory board are as follows:

Paul B. Silverman, Chairman: Mr. Silverman serves as CEO of Lounsberry Holdings I, Inc., a publicly traded company listed on the OTCBB. Mr. Silverman is also founder and chairman of Global Defense Corporation. For 2004 through 2002 Mr. Silverman served as Managing Partner of EC Partners, LLC, a global management consulting and business development firm located in the Washington, DC area. During 2001 and 2002 Mr. Silverman founded and served as CEO of a nationwide HIPAA-compliant, medical records and transaction processing network company and as founder and President of AttoTek medical imaging systems that developed imaging and computer-aided diagnostic technology. From November 1998 through December 2000 Mr. Silverman served as a "turnaround" CEO and Chairman of the Board of the IXATA Group, Inc., a publicly traded B2B company in the travel and hospitality sector. Mr. Silverman changed the IXATA Group from an unprofitable wireless prepaid card company to a leading e-commerce company in hospitality sectors that established relationships with key strategic partners and secured institutional funding. Mr. Silverman has held senior management positions with RFP Express from 1998 to 2000 where he raised several rounds of funding for the company and senior management consultant positions with Coopers & Lybrand and Booz Allen & Hamilton and served as served as James Martin Strategy, Inc., N.A. from 1991 through 1996. Mr. Silverman serves as an adjunct professor at American University's KOGOD School of Business and George Mason University's School of Management where he teaches Entrepreneurship.

Larry D. Bouts: Mr. Bouts is currently a senior advisor to IndiGo Ventures, LLC, a venture capital and advisory firm investing in emerging technology companies. Mr. Bouts previously served as President of Toys "R" Us International, Chairman and CEO of Six Flags Theme Parks and served in several senior finance positions with PepsiCo.

Don Gunther: Mr. Gunther apparently sits on the board of directors and advisory boards of several for-profit and non-profit companies. Mr. Gunther was formerly the Vice Chairman of Bechtel Group, Inc. Mr. Gunther served as President of Bechtel's Europe, Africa, Middle East and Southeast Asia regions.

Fred B. Tarter: Mr. Tarter is Chairman of the Radio Free Europe Foundation and the Lakeside Group, LLC.

Bruce Bowman: Mr. Bowman is currently Director of Corporate Systems Engineering and Integration initiatives at SAIC. Mr. Bowman previously was a Senior Consultant at IBM, Senior Scientist at both ANSWER and Johns Hopkins University's Applied Physics Laboratory and a principal consultant at PricewaterhouseCoopers.

Executive Compensation

Summary Compensation Table . The following table sets forth the annual and long-term compensation for services in all capacities for the fiscal years ended March 31, 2005, 2004 and 2003, paid to our most highly compensated executive officers.

**Summary Compensation
Table**

Name and Principal Position	Year	Annual Compensation				Long Term Compensation	
		Salary	Paid Bonus	Deferred Bonus	Total Bonus	Securities Underlying Options	All Other Compensation

Summary of Employment and Consulting Arrangements

Jay O. Wright: Mr. Jay O. Wright joined us in December 2003 as Chief Executive Officer. Mr. Wright was paid a base salary of \$180,000 in calendar year 2004 and was eligible to receive a bonus equal to 1% of the revenues for the most recent 12 month period of each acquisition made by the Company during his employment period. The 1% bonus was due and payable on the next payroll processing date following the closing of each acquisition. There were a total of 12 acquisitions in fiscal year ending March 31, 2005, which resulted in the executive earning 1% bonuses totaling \$966,212. The Company paid \$317,150 of the earned bonuses during the fiscal year and deferred \$649,062 as a result of assisting the Company with its cash flow requirements. Mr. Wright also received warrants to purchase 15,182,500 shares of our Common Stock at an exercise price of \$0.018 per share upon the execution of his initial employment agreement. The warrants became exercisable as to 3,682,500 shares on April 15, 2004 and as to an additional 4,300,000 shares upon the Company achieving a market a \$25 million market cap for ten (10) consecutive trading days and a price per share of not less than \$0.07, which has occurred. The remaining 7,200,000 shares began vesting ratably on May 15, 2004 in an amount of 300,000 shares on that date and each month thereafter until April 15, 2006. Subsequent to year-end March 31, 2005, Mr. Wright's employment agreement was amended to, among other things, extend his employment period to December 31, 2007. Mr. Wright's base salary has been increased to \$210,000 for calendar year 2005, \$240,000 for calendar year 2006 and \$270,000 for calendar year 2007. The terms of the new employment agreement eliminate the payment of bonuses as a result of the closing of an acquisition. Mr. Wright is now eligible to receive up to \$240,000 in bonuses tied to certain deliverables and profitability, including \$90,000 for the refinance of the \$15,200,000 promissory note issued to Airlie Opportunity Master Fund, Ltd., and up to \$150,000 according to following percentages: 35% for achieving the profit projected in Company's 2006 budget, 20% for obtaining a NASDAQ listing (SmallCap or National Market) or AMEX listing (at Board's discretion), 15% for achieving the Company's 2006 projected revenue as set forth in its 2006 budget, and 30% at the discretion of the Board of Directors. In connection with the execution of the new employment agreement, Mr. Wright also received additional warrants to purchase 5,000,000 shares of our Common Stock at an exercise price of \$0.22 per share, which warrants vest ratably from April 1, 2005 to December 31, 2007.

Kurt Gordon: Mr. Kurt Gordon joined us in February 2004 as Chief Financial Officer. Mr. Gordon was paid a base salary of \$156,000 in calendar year 2004 and was eligible to receive a bonus equal to 1% of the revenues for the most recent 12 month period of each acquisition made by the Company during his employment period. The 1% bonus was due and payable on the next payroll processing date following the closing of each acquisition. There were a total of 12 acquisitions in fiscal year ending March 31, 2005, which resulted in the executive earning 1% bonuses totaling \$946,212. The Company paid \$297,150 of the earned bonuses during the fiscal year and deferred \$649,062 as a result of assisting the Company with its cash flow requirements. Mr. Gordon also received a warrant to purchase up to 6,500,000 shares of Common Stock at an exercise price of \$0.018 per share upon the execution of his employment agreement. The warrant became exercisable as to 500,000 shares on March 1, 2004 and as to an additional 2,250,000 shares upon the Company achieving a market a \$25 million market cap for ten (10) consecutive trading days and a price per share of not less than \$0.07, which has occurred. The remaining 3,750,000 shares began vesting ratably on March 1, 2004 as to 156,250 shares and each month thereafter until February 1, 2006. Effective April 1, 2005, Mr. Gordon's employment agreement was amended to, among other things, extend his employment period to March 31, 2006. The terms of the new employment agreement eliminate the payment of bonuses as a result of the closing of an acquisition. Mr. Gordon's base salary was increased to \$210,000 per year. Mr. Gordon is eligible to receive \$140,000 in bonuses tied to certain deliverables and profitability. In connection with the execution of the new employment agreement, Mr. Gordon also received additional warrants to purchase 1,500,000 shares of our Common Stock at an exercise price of \$0.22 per share, which warrants vest ratably from April 1, 2005 to March 31, 2006. These warrants were ratified by the Board of Directors on June 16, 2005.

Jack Beech: Mr. Jack Beech joined us in January 2004 as President of our subsidiary DFW Internet Services, Inc. Mr. Beech's services to our Company are provided under the terms of a Consulting Agreement by and among the Company, DFW Internet Services, Inc., Beech Holdings, Inc. ("BHI") and Mr. Beech. Through BHI, Mr. Beech is paid an annual consulting fee of \$145,360.65 and is eligible to additional fees of up to \$125,000 annually for the first three

years of BHI's engagement by the Company. Mr. Beech is also eligible to receive annual bonuses as the Board may determine from time to time. BHI was paid a \$125,000 bonus in January 2004 and \$25,708 in January 2005. BHI agreed to a deferral of \$99,292 in bonus compensation payable in January 2005 under the terms of the above referenced Consulting Agreement.

Geoffrey B. Amend: Mr. Geoffrey B. Amend joined us in November 2004 as General Counsel. Mr. Amend is paid a base salary of \$150,000 per year and is eligible to receive a bonus equal to 1.0% of the Company's EBITDA for each fiscal year, but no greater than \$90,000 for any 12-month period. Mr. Amend also received a warrant to purchase up to 2,000,000 shares of our Common Stock, which warrants are exercisable at price of \$0.20 per share. The warrants began vesting ratably over twenty-four months on December 1, 2004. Subsequent to year end March 31, 2005, Mr. Amend's employment agreement was amended to, among other things, extend his employment period to March 31, 2007 and increase his base salary to \$180,000 per year. In connection with the execution of the new employment agreement, Mr. Amend also received additional warrants to purchase 1,500,000 shares of our Common Stock at an exercise price of \$0.15 per share. The warrants vest ratably from April 20, 2005 to March 31, 2007. These warrants were ratified by the Board of Directors on June 16, 2005.

Tom Mazerski: Mr. Tom Mazerski joined us in October 2004 as Chief Executive Officer of our subsidiary CloseCall America, Inc. Mr. Mazerski is paid a base salary of \$180,000 per year and is eligible to receive a bonus equal to 2.5% of Adjusted EBITDA from all Telco Operations. Mr. Mazerski also received an option to purchase up to 500,000 shares of Common Stock at an exercise price of \$0.225 per share. Those options were subsequently reclassified as warrants to purchase Common Stock. Two Hundred Fifty Thousand (250,000) warrants to purchase our Common Stock vest ratably over the twenty-four months following the execution of the employment agreement and the remaining warrants vest upon Mobilepro's Telco Operations reaching \$5,000,000 in Adjusted EBITDA. In April 2005, we granted Mr. Mazerski additional warrants to purchase 1,500,000 shares of our Common Stock at an exercise price of \$0.15 per share that vest ratably from April 20, 2005 to October 15, 2006.

Tammy Martin: Ms. Tammy Martin joined us in November 2004 as General Counsel of our subsidiary Davel Communications, Inc. Ms. Martin is paid a base salary of \$186,295 per year and an annual car allowance of \$8,400. In May 2005, Ms. Martin was promoted to Chief Executive Officer of Davel Communications, Inc. Ms. Martin also received warrants to purchase 1,500,000 shares of our Common Stock at an exercise price of \$0.15 per share that vest ratably from April 20, 2005 to March 31, 2006.

Bruce Sanguinetti: Mr. Bruce Sanguinetti joined us in January 2005 and served as President and Chief Executive Officer of our subsidiary NeoReach, Inc. until his employment agreement expired December 31, 2005. Mr. Sanguinetti was paid a base salary of \$180,000 per year and was eligible to receive a bonus on terms and conditions to be mutually agreed upon by Mr. Sanguinetti and the Company. Such annual bonus was targeted to achieve between 25% and 150% of Mr. Sanguinetti's base salary. Mr. Sanguinetti also received a warrant to purchase up to 3,000,000 shares of Common Stock at an exercise price of \$0.16 per share. The warrants vested ratably over the initial twelve months of his employment or through December 31, 2005.

John Dumbleton: Mr. John Dumbleton joined us in January 2005 as our Vice President of Sales and Business Development. Mr. Dumbleton was no longer employed by the Company effective January 15, 2006. Mr. Dumbleton was paid a base salary of \$180,000 per year and was eligible to receive a bonus on terms and conditions to be mutually agreed upon by Mr. Dumbleton and the Company. Mr. Dumbleton also received a warrant to purchase up to 2,000,000 shares of Common Stock at an exercise price of \$0.17 per share. The warrants vested ratably over the initial twelve months of his employment.

**Option/SAR Grants in Last Fiscal Year
(Individual Grants)**

Name	Number of Securities Underlying Options/SARs Granted (1)	Percent of Total Options/SARs Granted to Employees In Fiscal Year	Exercise of Base Price (\$/Sh)	Expiration Date
Jay O. Wright	15,182,500	53.6%	\$0.018	4/15/14
Kurt Gordon	--	N/A	N/A	N/A
Jack W. Beech	--	N/A	N/A	N/A
Geoffrey Amend	2,000,000	7.1%	\$0.200	11/01/14
Tom Mazerski	500,000	1.8%	\$0.225	10/18/14
Tammy Martin	--	N/A	N/A	N/A
Bruce Sanguinetti	3,000,000	10.6%	\$0.160	1/01/15
John Dumbleton	2,000,000	7.1%	\$0.170	1/17/15

(1) The vesting provisions for each of the options or warrants are provided above.

**Aggregated Option Exercises In Last Fiscal Year And Fiscal
Year-End Option Values**

The following table sets forth certain information concerning the number and value of securities underlying exercisable and unexercisable stock options and warrants as of the fiscal year ended March 31, 2005 by our executive officers listed in the Summary Compensation Table above.

Name	Number of Shares Acquired on Exercise	Value Realized	Number of Securities Underlying Unexercised Options at March 31, 2005 Exercisable/Unexercisable	Value of Unexercised In-the-Money Options at March 31, 2005 ⁽¹⁾ Exercisable/Unexercisable
Jay O. Wright	--	\$0	11,282,500 / 3,900,000	\$1,714,940 / \$592,800
Kurt Gordon	--	\$0	4,781,250 / 1,718,750	\$726,750 / \$261,250
Jack W. Beech	--	\$0	--	\$ 0 / \$0
Geoffrey B. Amend	--	\$0	333,333 / 1,666,667	\$ 0 / \$0
Tom Mazerski	--	\$0	52,083 / 447,917	\$ 0 / \$0
Tammy Martin	--	\$0	--	\$ 0 / \$0
Bruce Sanguinetti	--	\$0	750,000 / 2,250,000	\$7,500 / \$22,500
John Dumbleton	--	\$0	666,666 / 1,333,334	\$ 0 / \$0

(1) The value of unexercised in-the-money options at fiscal year end is calculated using the last sale price of \$0.17 per share as of March 31, 2005, the last trading day of fiscal year 2005 as reported on the OTC Bulletin Board, less the applicable exercise price.

Equity Compensation Plan Information

The following table sets forth certain information, as of March 31, 2005, concerning securities authorized for issuance under the Mobilepro 2001 Equity Performance Plan and other options and warrants to purchase shares of our common stock:

	Number of securities to be issued upon exercise of outstanding options, warrants and rights (a)	Weighted-average exercise price of outstanding options, warrants and rights (b)	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a)) (c)
Equity compensation plans approved by security holders (1)	150,000	\$0.250	53,963
Equity compensation plans not	62,807,500	\$0.119	N/A

approved by
security holders

(2)

Totals	62,957,500	\$0.119	N/A
--------	------------	---------	-----

- (1) A total of 1,000,000 shares were reserved for issuance under Mobilepro's 2001 Equity Performance Plan at March 31, 2005. Available shares may be issued as stock options, restricted stock or stock bonuses. In September 2005, the stockholders approved an increase in the number of shares available for issuance under the Plan to 30,000,000.
- (2) Includes options to purchase 1,575,000 shares and warrants to purchase 61,232,500 shares that were issued by Mobilepro under non-plan options and warrants.

51

LEGAL PROCEEDINGS

At the time that we acquired Davel, there was existing litigation brought against Davel and other defendants regarding a claim associated with certain alleged patent infringement. Davel has been named as a defendant in a civil action captioned Gammino v. Cellco Partnership d/b/a Verizon Wireless, et al., C.A. No. 04-4303 filed in the United States District Court for the Eastern District of Pennsylvania. The plaintiff claims that Davel and other defendants allegedly infringed its patent involving the prevention of fraudulent long-distance telephone calls. Davel continues to review and investigate the allegations set forth in the complaint, continues to assess the validity of the Gammino Patents and is in the process of determining whether the technology purchased by Davel from third parties infringes upon the Gammino Patents. The plaintiff is seeking monetary relief of at least \$7,500,000. The case is in the discovery phase of the litigation.

According to the terms of the Davel acquisition, the former secured lenders of Davel, subject to certain limitations addressed below, have agreed to reimburse the Company for the litigation cost and any losses resulting from the Gammino lawsuit. The former secured lenders have agreed to fund such costs from future Regulatory Receipts that were assigned to them by Davel. The Regulatory Receipts are being deposited into a third-party escrow account and used to reimburse the Company for costs incurred in connection with the litigation. The secured lenders are not required to fund the escrow account or otherwise reimburse the Company for amounts, if any, in excess of actual Regulatory Receipts collected. Any amount remaining in the escrow account at the conclusion of the litigation is to be distributed to the former secured lenders. Subsequent to March 31, 2005, the Company has received significant Regulatory Receipts, which are being held in escrow. These funds can be used to reimburse the Company for costs incurred in defending or settling the litigation matter. We believe that there are sufficient funds in the escrow account to pay our costs associated with this litigation. There is a potential exposure of the Company to the \$7,500,000 claim in the event that the Regulatory Receipts that are being held in escrow are insufficient to cover any potential judgment against the Company should it be found liable for the full monetary amount the plaintiff is seeking.

On or about October 15, 2002, Davel was served with a complaint, in an action captioned Sylvia Sanchez et al. v. Leasing Associates Service, Inc., Armored Transport Texas, Inc., and Telaleasing Enterprises, Inc. On or about January 8, 2002, the Plaintiffs filed their first amended complaint adding a new defendant, LAI Trust, and on or about January 21, 2002 filed their second amended complaint adding new defendants including Davel Communications, Inc. and certain subsidiaries of Davel. Plaintiffs claimed that the Company was grossly negligent or acted with malice and such actions proximately caused the death of Thomas Sanchez, Jr., a former Davel employee. Pending court approval of the agreements and formal dismissal of the case, Davel has settled with the plaintiffs; Davel's insurance company has agreed to pay the settlement amount that is not material.

We terminated Kevin Kuykendall, former President of our voice division, for cause under the terms of his Executive Employment Agreement, effective Wednesday, December 29, 2004. In May 2005, the Company and Mr. Kuykendall dropped all complaints and legal proceedings against each other and signed a confidential settlement agreement and mutual general release.

On September 10, 2004, CloseCall was served a complaint in an action captioned Verizon Maryland Inc., Verizon New Jersey Inc., and Verizon Delaware Inc. in the Circuit Court for Montgomery County, Maryland. Verizon has sued for "in excess of \$1,000,000" based on alleged unpaid invoices for services provided to CloseCall. Verizon asserts that CloseCall has underpaid the Federal Subscriber Line Charges billed by Verizon, by applying an uncollectible factor to the amounts charged by Verizon. In addition, Verizon contends that CloseCall has underpaid the amounts owed to Verizon by misapplying the terms of the "merger discount" offered to CLECs, including CloseCall, as a result of the merger between Bell Atlantic and GTE. CloseCall filed an Answer and Counterclaims against Verizon on November 1, 2004. In response to the Complaint filed by Verizon, CloseCall has asserted two primary defenses. First, CloseCall contends that its resale agreements with Verizon allow CloseCall to either (a) pay Verizon the Subscriber Line Charges billed or (b) collect the Subscriber Line Charges from CloseCall's customers and remit those collections to Verizon. CloseCall has opted to collect the Subscriber Line Charges from its customers and remit those sums to

Verizon. As with payments made to taxing authorities, CloseCall applies its uncollectible factor to the amounts billed by Verizon for the Subscriber Line Charges to account for the portion of CloseCall's subscriber base that does not pay for the services billed. Second, with regard to the merger discount, CloseCall has calculated the amounts owed to Verizon for resold telecommunications services by applying the terms of the promotional discount set forth on Verizon's website at the time CloseCall opted into the discount in January 2001. At that time, CloseCall's account manager at Verizon represented that the website included the applicable merger discount provisions. Subsequently, and without notice to CloseCall, Verizon added new and different conditions that attempted to limit the application of the merger discount to CloseCall.

CloseCall has also filed counterclaims against Verizon. The first claim stems from Verizon's refusal to resell certain bundled telecommunications services to CloseCall, despite repeated requests by CloseCall and the requirements of the Communications Act of 1934, as amended. In addition, CloseCall has asserted damages as a result of Verizon's entry into secret resale agreements with two CLECs, offering those companies deep discounts on telecommunications services not offered to other CLECs, including CloseCall. The basis for this counterclaim is SEC regulations that prohibit an incumbent carrier from offering different rates or different levels of discounts to similarly situated CLECS. The damages associated with this claim will be determined by data and information that has not yet been produced by Verizon. CloseCall has asserted damages as a result of Verizon's failure to provide dialing parity to CloseCall's customers. The damages claimed will depend on data that has not yet been produced by Verizon. CloseCall has asserted a claim for tortious interference with business relations as a result of Verizon's policy of blocking local service change orders for any customer that also receives DSL service from or through Verizon. CloseCall has also made a declaratory judgment claim for inaccurate and improper billings by Verizon, including carrier access billing service charges. Currently, the parties are in discovery. While CloseCall believes that its counterclaims against Verizon are valid and that it has meritorious defenses to the allegations contained in the complaint and intends to vigorously prosecute the claims as well as defend itself, CloseCall cannot at this time predict its likelihood of success on the merits.

PRINCIPAL STOCKHOLDERS**Beneficial Owners**

As of December 31, 2005, other than the directors and executive officers (including Daniel Lozinsky, one of our former directors) identified in the table below, to our knowledge no person owned beneficially more than five percent (5%) of our outstanding common stock.

Directors and Executive Officers

The following table shows the amount of our capital stock beneficially owned by the directors and executive officers named in the Summary Compensation Table above and by all directors and executive officers as a group as of December 31, 2005. Unless otherwise indicated, beneficial ownership is direct and the person indicated has sole voting and investment power. As of December 31, 2005, we had 432,161,236 shares of common stock outstanding. The address for each of the individuals listed in the table below is c/o Mobilepro Corp., 6701 Democracy Boulevard, Suite 202, Bethesda, Maryland 20817.

Name and Address	Title of Class	Shares Beneficially Owned (1)	Percent of Class (1)
Cornell Capital Partners, L.P. (2)	Common	22,445,000	4.99%
Daniel Lozinsky (3)	Common	23,143,122	5.29%
Jay O. Wright (4)	Common	16,268,651	3.63%
Kurt Gordon (5)	Common	7,718,750	1.75%
Geoffrey B. Amend (5)	Common	1,318,839	*
Jack W. Beech	Common	9,380,863	2.17%
Tom Mazerski (6)	Common	3,048,459	*
Tammy Martin (5)	Common	1,363,636	*
Bruce Sanguinetti (5)	Common	4,000,000	*
John Dumbleton (5)	Common	2,000,000	*
Chris MacFarland (5)	Common	745,833	*
Michael G. O' Neil (7)	Common	1,047,333	*
Don Sledge (5)	Common	645,833	*
Officers and Directors as a Group (13 Persons) (8)	Common	58,538,197	12.48%

* Less than 1%.

(1) Applicable percentage of ownership is based on 432,161,236 shares of common stock outstanding as of December 31, 2005, together with applicable options and warrants for each shareholder. Beneficial ownership is determined in accordance with the rules of the Securities and Exchange Commission and generally includes voting or investment power with respect to securities. Shares of common stock subject to options and warrants that are currently exercisable or exercisable within 60 days of December 31, 2005 are deemed to be beneficially owned by the person holding such options for the purpose of computing the percentage of ownership of such person, but are not treated as outstanding for the purpose of computing the percentage ownership of any other person.

(2) Includes 4,995,000 shares of common stock, 6,000,000 shares of common stock issuable upon the exercise of a warrant to purchase our common stock; and a limited number of shares (11,450,000 shares) of our common stock issuable upon the conversion of the \$15.5 million debenture. Under the terms of the

debenture, Cornell Capital is required to provide 65 days written notice in order to execute a conversion resulting in beneficial ownership greater than 4.99%.

- (3) Includes 18,143,122 shares of our common stock and 5,000,000 shares of common stock issuable upon the exercise of a warrant to purchase our common stock.
- (4) Includes 171,000 shares of our common stock and 16,097,651 shares of common stock issuable upon the exercise of warrants to purchase our common stock.

- (5) Includes shares of common stock issuable upon the exercise of warrants to purchase our common stock.
- (6) Includes 1,883,391 shares of our common stock, 998,402 shares of common stock issuable upon the exercise of warrants to purchase our common stock, and 166,666 shares of common stock issuable upon the exercise of options to purchase our common stock.
- (7) Includes 101,500 shares of our common stock and 945,833 shares of our common stock issuable upon the exercise of warrants to purchase shares of our common stock.
- (8) Includes 21,536,754 shares of our common stock, 36,834,777 shares of common stock issuable upon the exercise of warrants to purchase our common stock, and 166,666 shares of common stock issuable upon the exercise of options to purchase our common stock.

CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

We have granted warrants to purchase our common stock to certain of our directors in connection with their service as members of our advisory board prior to their appointment to our Board of Directors. We subsequently provided additional common stock grants to our directors in connection with their service as members of our Board of Directors. The terms of those grants are described in this Prospectus in our discussion of the compensation provided to our directors.

We believe that each of the above referenced transactions was made on terms no less favorable to us than could have been obtained from an unaffiliated third party. Furthermore, any future transactions between us and our officers, directors, principal stockholders or affiliates, will be on terms no less favorable to us than could be obtained from an unaffiliated third party, and will be approved by a majority of our directors.

MARKET PRICE OF AND DIVIDENDS ON THE REGISTRANT'S COMMON EQUITY AND OTHER STOCKHOLDER MATTERS

Our common stock is quoted on the Over-the-Counter Bulletin Board under the symbol "MOBL."

The following table sets forth the high and low closing prices for the common stock for each calendar quarter since April 1, 2003, as reported by the National Quotation Bureau.

	Bid Price Per Share	
	High	Low
2003		
April 1, 2003 - June 30, 2003	\$0.04	\$0.01
July 1, 2003 - September 30, 2003	\$0.07	\$0.01
October 1, 2003 - December 31, 2003	\$0.04	\$0.02
2004		
January 1, 2004 - March 31, 2004	\$0.13	\$0.02
April 1, 2004 - June 30, 2004	\$0.28	\$0.10
July 1, 2004 - September 30, 2004	\$0.27	\$0.14
October 1, 2004 - December 31, 2004	\$0.24	\$0.15
2005		
January 1, 2005 - March 31, 2005	\$0.24	\$0.17
April 1, 2005 - June 30, 2005	\$0.38	\$0.15
July 1, 2005 - September 30, 2005	\$0.36	\$0.24
October 1, 2005 - December 31, 2005	\$0.26	\$0.17
2006		
January 1, 2006 - January 17, 2006	\$0.22	\$0.18

Stockholders

As of December 31, 2005, there were approximately 716 registered holders of record of our common stock. We believe that a substantially greater number of holders of our common stock are "street name" or beneficial holders, whose shares are held of record by banks, brokers and other financial institutions. Including such holders, we believe that there are more than 10,000 holders of our common stock as of December 31, 2005.

Dividends

We have never declared or paid cash dividends on our common stock. We currently intend to retain all available funds and any future earnings to fund the development and growth of our business and do not anticipate declaring or paying any cash dividends on our common stock in the foreseeable future.

We have previously announced a record date of September 15 , 2004 for the dividend of certain shares we own in Solution Technology International, Inc (“STI”). Due to the delays in STI becoming a publicly traded company, we have not yet established a payment date for the dividend. At this time, no date has been established for such listing.

DESCRIPTION OF SECURITIES

Common Stock

Mobilepro Corp. ("Mobilepro") is authorized to issue up to 1,500,000,000 shares of common stock, \$0.001 par value per share, of which 432,161,236 shares were issued and outstanding as of December 31, 2005.

Holders of shares of common stock are entitled to one vote for each share on all matters to be voted on by the stockholders. Holders of common stock have no cumulative voting rights.

Mobilepro does not currently anticipate paying any cash dividends on its common stock. In the event of a liquidation, dissolution or winding up of Mobilepro, the holders of shares of common stock are entitled to share pro-rata all assets remaining after payment in full of all liabilities, subject however, to any rights of the stockholders of preferred shares issued and outstanding at the time of such liquidation, dissolution or winding up of Mobilepro (see preferred stock below). Holders of common stock have no preemptive rights to purchase Mobilepro's common stock. There are no conversion rights or redemption or sinking fund provisions with respect to the common stock.

Preferred Stock

Mobilepro is authorized to issue up to 20,035,425 shares of preferred stock, \$0.001 par value per share, of which 35,425 shares have been designated as Series A Preferred Stock. As of December 31, 2005, there are 35,378 shares of Series A preferred stock issued and outstanding.

Each share of Series A preferred stock is convertible, without additional consideration, into one two-hundredth of a share of common stock. The holders of the Series A preferred stock and the holders of our common stock vote together as a single class on all matters presented for the vote of our stockholders. Each holder of Series A preferred stock may cast a number of votes equal to the number of shares of common stock issuable upon conversion of his Series A preferred stock. In the event of a liquidation of the corporation, the holders of the Series A preferred stock are entitled to receive prior to and in preference to any distributions to the holders of our common stock an amount equal to the Stated Value (as it is described in our Certificate of Incorporation) as may be adjusted from time to time as provided in this Article Fourth, paragraph B6(f). After such distribution in respect of the Series A preferred stock, the remaining assets of the corporation, if any, will be available for distribution to the holders of our common stock.

We may issue the remaining authorized preferred stock in one or more series having the rights, privileges, and limitations, including voting rights, conversion rights, liquidation preferences, dividend rights and redemption rights, as may, from time to time, be determined by the Board of Directors. Preferred stock may be issued in the future in connection with acquisitions, financings, or other matters, as the Board of Directors deems appropriate. In the event that we determine to issue any shares of preferred stock, a certificate of designation containing the rights, privileges, and limitations of this series of preferred stock will be filed with the Secretary of State of the State of Delaware. The effect of this preferred stock designation power is that our Board of Directors alone, subject to Federal securities laws, applicable blue sky laws, and Delaware law, may be able to authorize the issuance of preferred stock which could have the effect of delaying, deferring, or preventing a change in control of Mobilepro without further action by our stockholders, and may adversely affect the voting and other rights of the holders of our common stock.

Options and Warrants

As of December 31, 2005, there were options to purchase 11,421,000 shares of our common stock outstanding and warrants to purchase 79,832,500 shares of our common stock outstanding.

Transfer Agent and Registrar

Interwest Transfer Company is the transfer agent and registrar for our common stock. Its address is 1981 East Murray-Holladay Road, P. O. Box 17136, Salt Lake City, Utah 84121.

EXPERTS

The financial statements for each of the fiscal years ended March 31, 2005 and 2004 included in this Prospectus have been included in reliance on the report of Bagell, Josephs & Company, L.L.C., independent accountants, given on the authority of said firm as experts in auditing and accounting.

LEGAL MATTERS

Schiff Hardin LLP, Washington, D.C., will pass upon the validity of the shares of our common stock.

AVAILABLE INFORMATION

For further information with respect to us and the securities offered hereby, reference is made to the Registration Statement, including the exhibits thereto. Statements herein concerning the contents of any contract or other document are not necessarily complete, and in each instance reference is made to such contract or other statement filed with the Securities and Exchange Commission or included as an exhibit, or otherwise, each such statement, being qualified by and subject to such reference in all respects.

Reports, registration statements, proxy and information statements, and other information filed by us with the Securities and Exchange Commission can be inspected and copied at the Public Reference Room maintained by the Securities and Exchange Commission at 100 F Street, NE, Washington, D.C. 20549. Copies of these materials may be obtained at prescribed rates from the Public Reference Room. The Securities and Exchange Commission maintains a site on the World Wide Web (<http://www.sec.gov>) that contains reports, registration statements, proxy and information statements and other information. You may obtain information on the Public Reference Room by calling the Securities and Exchange Commission at 1-800-SEC-0330.

MOBILEPRO CORP. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2005
(unaudited)

NOTE 1- ORGANIZATION

Overview

Mobilepro Corp., incorporated under the laws of the State of Delaware in July 2000, is a broadband wireless, telecommunications, and integrated data communication services company that delivers a comprehensive suite of voice and data communications services to its customers, including local exchange, long distance, enhanced data, Internet, cellular, and wireless broadband, through its operations in three industry segments - voice services, Internet services and technology. Together with its consolidated subsidiaries, Mobilepro Corp. is hereinafter referred to as "Mobilepro" or the "Company".

The Company's voice services segment includes the operations of CloseCall America, Inc. ("CloseCall"), a Stevensville, Maryland-based competitive local exchange carrier (a "CLEC"), Davel Communications, Inc. ("Davel"), a Cleveland, Ohio-based independent payphone provider, and American Fiber Network, Inc. ("AFN"), a CLEC based in Kansas City, Kansas. The Company's Internet services segment includes DFW Internet Services, Inc. ("DFW", doing business as Nationwide Internet), an Irving, Texas-based Internet services provider and its acquired Internet service provider subsidiaries. The Company's wireless networks operations are conducted primarily in Phoenix, Arizona, by a wholly owned subsidiary, NeoReach, Inc. ("NeoReach"), and its subsidiary, NeoReach Wireless, Inc.

Summary of Acquisition Activities

In April 2004, DFW acquired August.net Services LLC, an Internet service provider located in Texas, for \$1,730,000 in cash and promissory notes.

In June 2004, DFW acquired ShreveNet, Inc. ("ShreveNet"), an Internet service provider located in Louisiana, for \$1,250,000 in cash and common stock. The issued shares were valued at a fair value of \$190,000 based on the average 20-day closing price (\$0.2162 per share) prior to June 3, 2004. Mobilepro issued the common stock in August 2004.

In June 2004, DFW acquired certain assets of Crescent Communications, Inc., an Internet service provider located in Houston, for \$1,194,767 in cash and a promissory note.

In June 2004, the Company acquired US1 Telecommunications, Inc. ("US1"), a long distance provider located in Kansas, for \$135,282 in cash and conditional promissory notes.

In July 2004, DFW acquired Clover Computer Corporation ("Clover"), a Coshocton, Ohio-based Internet services provider with operations in several Ohio cities, for \$1,216,993 in cash and promissory notes.

In July 2004, DFW acquired Ticon.net ("Ticon"), a Janesville, Wisconsin-based Internet service provider with operations in Janesville and Milwaukee, for \$1,000,000 in cash and promissory notes.

In August 2004, the Company acquired Affinity Telecom ("Affinity"), a Michigan-based CLEC and long distance carrier. The Company paid \$2,513,000 in cash, notes, and a convertible note.

In August 2004, DFW acquired the customer base, corporate name and certain other assets of Web One, Inc. ("Web One"), a Kansas City, Missouri-based Internet service and web-hosting provider, for \$1,960,000 in cash and common stock.

In September 2004, DFW acquired World Trade Network, Inc. an Internet services provider based in Houston, for \$1,200,000 in cash and promissory notes.

In September 2004, DFW acquired The River Internet Access Co. ("The River"), an Internet services provider based in Tucson, Arizona, for \$2,467,204 in cash and promissory notes.

In October 2004, Mobilepro acquired CloseCall, a CLEC offering local telephone service, long distance service, 1.800CloseCall prepaid calling cards, and wireless, dial-up and DSL Internet services. The purchase price included 1) a cash payment of \$8,000,000, 2) 39,999,999 shares of Mobilepro's common stock valued at \$10,000,000, and 3) warrants to purchase 3,500,000 additional shares of Mobilepro's common stock exercisable at \$0.30 per share for 2,500,000 shares and \$0.35 per share for 1,000,000 shares.

F-7

In November 2004, Mobilepro acquired Davel, the owner and operator of approximately 36,000 payphones predominantly located in 42 states and the District of Columbia. In connection with this transaction, the Company acquired all of Davel's senior secured debt in the approximate principal amount of \$103.1 million, a \$1.3 million note receivable from Davel held by one of its secured lenders, and approximately 95.2% of the common stock of Davel. The purchase price included cash of \$14,000,000 plus warrants to purchase up to 5,000,000 shares of common stock at the price of \$0.30 per share. In May 2005, the Company purchased the remaining 4.8% of Davel's outstanding common stock for \$450,000 cash.

In May 2005, NeoReach acquired WazAlliance, a network of metro-wide commercial and residential wireless Internet access zones for a total purchase price of \$257,500, subject to post closing adjustments. Consideration included the issuance of 760,000 shares of Mobilepro's common stock valued at \$110,200, a liability to issue an addition 540,000 shares of common stock valued at \$78,300, and the payment of certain liabilities in the amount of \$69,000 on behalf of WazAlliance.

In June 2005, the Company acquired Evergreen Open Broadband ("Evergreen"), a wholesale wireless Internet service provider based in Boston, for a purchase price of approximately \$231,073 representing 1,505,360 shares of Mobilepro common stock valued at \$0.1535 per share based on the date that the parties reached agreement on the terms of the acquisition.

In June 2005, Mobilepro acquired 100% of the outstanding common stock of AFN, a CLEC that is licensed to provide local telephone, long distance and/or Internet services throughout the United States, for a cost of \$3,434,331, including 10,000,000 shares of Mobilepro common stock, valued at \$1,500,000 based on the value of the Company's common stock at the time that the substantive terms of the acquisition were accepted, a cash payment of \$1,500,000 and the excess of liabilities assumed over the net book value of assets acquired. The assumed liabilities included \$1,337,103 payable to a related party company that supplies administrative and support services to AFN.

In September 2005, AFN acquired the assets of AllCom USA and their long distance and T-1 customers for \$300,000 cash, providing the Company with an additional base of customers for bundled services.

NOTE 2- SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Financial Statement Presentation

The condensed consolidated financial statements include the accounts of the Company and its subsidiaries. All significant inter-company accounts and transactions have been eliminated in consolidation. In accordance with the requirements of Statement of Financial Accounting Standard ("SFAS") No. 131, "Disclosures about Segments of an Enterprise and Related Information", the Company has provided certain financial information relating to the operating results and assets of its industry segments (see Note 12) based on the manner in which management disaggregates the Company in making internal operating decisions.

The preparation of financial statements in conformity with generally accepted accounting principles in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting periods. Actual results could differ from those estimates.

These financial statements are unaudited and have been prepared by the Company pursuant to the rules and regulations of the Securities and Exchange Commission regarding interim financial reporting. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements, and it is suggested that these financial statements be read in conjunction with the financial statements, and notes thereto, included in the Company's Annual Report on Form 10-KSB for the fiscal year ended March 31, 2005. In the opinion of management, the comparative financial statements for the periods presented herein

include all adjustments that are normal and recurring, and that are necessary for a fair presentation of results for the interim periods. The results of operations for the three and six months ended September 30, 2005 are not necessarily indicative of the results that will be achieved for the fiscal year ending March 31, 2006.

F-8

Reclassifications

Certain prior-period financial statement balances have been reclassified to conform to the September 30, 2005 presentation. The reclassifications resulted in no changes to the accumulated deficits reported in prior periods.

Revenue Recognition

The Company recognizes revenue related to local telephone, long distance, wireless calling and Internet access services when such services are rendered and collection is reasonably assured; it defers revenue for services that the Company bills in advance.

Revenue from product sales that contain embedded software is recognized in accordance with the provisions of the American Institute of Certified Public Accountants Statement of Position 97-2, "Software Revenue Recognition." Accordingly, revenue related to shipments to credit-worthy customers without the collection of any portion of the corresponding fees being dependent on a future event is recorded at the time of shipment. The Company may grant extended payment terms to customers without established credit. Revenue related to shipments to such customers is recorded only upon the receipt of cash until a significant portion of the sales price is received. The Company considers the recognition of revenue related to shipments to value-added-resellers to be dependent upon the occurrence of a future event. Accordingly, revenue is deferred until a significant portion of the sales price is received in cash. On certain transactions, payment by the customer is contingent upon installation or acceptance. Until it is accepted, the customer may have a right to return the product. The Company does not recognize revenue on these transactions until these related rights have lapsed. Certain of the Company's product are sold with accompanying maintenance/service contracts. The Company allocates revenue to such maintenance/service contracts based on vendor-specific objective evidence of fair value as determined by the Company's contract renewal rates. Revenue related to maintenance/service contracts is deferred and recognized ratably over the periods covered by the contracts.

Davel derives its payphone revenue from two principal sources: coin calls and non-coin calls. Revenue related to all calls, including dial-around compensation and operator service revenue, is recognized in the periods that the customers place the calls. Any variations between recorded amounts of revenue and actual cash receipts are accounted for at the time of receipt.

Non-coin operator service calls are handled by independent operator service providers. These carriers assume billing and collection responsibilities for operator-assisted calls originating on Davel's payphone network and pay commissions to Davel based upon gross revenue. Davel recognizes revenue related to operator service calls in amounts equal to the commissions that it is entitled to receive in the periods that the services are rendered.

Davel also recognizes revenue related to non-coin dial-around calls that are initiated from a Company payphone in order to gain access to a long distance company or to make a standard toll free call. Revenue related to such dial-around calls is recognized initially based on estimates. The inter-exchange carriers have historically paid for fewer dial-around calls than are actually made and the collection period for dial-around revenue is generally four to six months, but can be in excess of a year. Davel's estimates of revenue are based on the historical analysis of calls placed versus amounts collected. These analyses are updated on a periodic basis. Recorded amounts of revenue may be adjusted based on actual receipts and/or the subsequent revision of prior estimates. Reported revenues for the three month period ended March 31, 2005 included a reduction to previously recorded revenues of \$167,319. No such adjustments were recorded in the three month periods ended June 30, 2005 or September 30, 2005.

Financing Fees

The financing fees paid in May 2004 to Cornell Capital Partners, L.P. ("Cornell Capital") and others related to the negotiation of the Standby Equity Distribution Agreement (the "SEDA") were deferred and, in the current year, are being amortized against additional paid-in-capital on a straight-line basis over the twenty-four (24) month term of the

SEDA. These fees were paid with the issuance of 8,000,000 shares of Mobilepro common stock valued in the amount of \$1,760,000. The Company recorded amortization of approximately \$220,000 in each of the three-month periods ended September 30, 2004 and 2005, respectively, and amortization of approximately \$293,000 and \$440,000 in the six-month periods ended September 30, 2004 and 2005, respectively. The 5% fee paid to Cornell Capital and others at the time that funds are drawn under the SEDA, amounting to \$60,500 in the three-month period ended September 30, 2005, and amounting to \$375,500 in the six-month period ended September 30, 2005, were charged to additional paid-in-capital. The 2% discount provided to Cornell Capital upon the conversion of SEDA notes payable to shares of common stock, \$67,895 and \$112,109 in the three-month periods ended September 30, 2004 and 2005, respectively, and \$285,129 and \$207,067 in the six-month periods ended September 30, 2004 and 2005, respectively, were included in interest expense.

F-9

The Company also incurred financing costs of \$1,295,000 in May 2005 in connection with issuance of the \$15.5 million convertible debenture to Cornell Partners and the early retirement of the bridge loan (see Note 5). These costs, including fees paid in cash to Cornell Partners, were charged to additional paid-in-capital.

Accounting for Stock Options and Warrants

The Company accounts for its stock-based compensation under the recognition and measurement principles of Accounting Principles Board ("APB") Opinion No. 25, "Accounting for Stock Issued to Employees," and related interpretations. APB Opinion No. 25 provides that compensation expense relative to a Company's employee stock options is measured based on the intrinsic value of the stock options at the measurement date.

If compensation expense had been determined based on the fair value of the options at the grant dates consistent with the method of accounting proscribed by SFAS No. 123, "Accounting for Certain Transactions Involving Stock Compensation," as amended by SFAS No. 148, "Accounting for Stock-Based Compensation-Transition and Disclosure," the Company's net income (loss) per share would have been stated at the following pro forma amounts for the six-month periods ended September 30, 2004 and 2005:

	For the Six Months Ended September 30,	
	2004	2005
Net income (loss), as reported	\$ (2,505,200)	\$ 943,092
Add: Stock-based employee compensation expense included in reported net income (loss)	-	-
Deduct: Total stock-based employee compensation expense determined under fair value based method for all awards	(6,004,019)	(1,900,247)
Pro forma net loss	\$ (8,509,219)	\$ (957,155)
Net income (loss) per share:		
Diluted, as reported	\$ (0.0102)	\$ 0.0023
Diluted, pro forma	\$ (0.0345)	\$ (0.0026)

The fair value of each option is estimated on the date of grant using the Black-Scholes option-pricing model with the following assumptions used for grants during the periods ended September 30, 2004 and 2005:

	2004	2005
Dividend yield	None	None
Expected volatility	60%	60%
Risk-free interest rate	4.50%	3.00%
Expected term (in years)	10.00	10.00

For stock options granted during the six-month periods ended September 30, 2004 and 2005, the weighted-average grant-date fair value was \$0.19 per share and \$0.20 per share, respectively.

Property, Plant and Equipment

Furniture and equipment are included in fixed assets in the accompanying balance sheets and are stated at cost. Depreciation expense is computed using the straight-line method during the estimated useful life of each asset. When an asset is retired or otherwise disposed of, the cost and related accumulated depreciation are removed from the

accounts, and any resulting gain or loss is recognized in income for the period. The costs of maintenance and repairs are charged to expense as incurred; significant renewals and betterments are capitalized.

F-10

At March 31, 2005 and September 30, 2005, property, plant and equipment was as follows:

	Estimated Useful Lives (in years)	March 31, 2005 (audited)	September 30, 2005 (unaudited)
Furniture and fixtures	7	\$ 387,861	\$ 422,177
Machinery and equipment	5	13,584,088	15,745,595
Leasehold improvements	7	263,452	343,077
Vehicles	5	287,733	208,417
Subtotals		14,523,134	16,719,266
Less accumulated depreciation		(1,330,078)	(3,029,088)
Fixed assets, net		\$ 13,193,056	\$ 13,690,178

The Company recorded depreciation expense of \$126,235 and \$691,596 for the three-month periods ended September 30, 2004 and 2005, respectively, and depreciation expense of \$166,179 and \$1,329,000 for the six-month periods ended September 30, 2004 and 2005, respectively.

Advertising Contracts

CloseCall uses print, signage, radio and television advertising to market services to customers of certain local professional sports teams. Advertising programs include the use of long-term contracts. Upon the negotiation of such a contract, the Company records the cost of the advertising program as an asset, and amortizes the balance to operating expenses over the life of the contract. At September 30, 2005, prepaid expenses and other assets included balances of \$258,693 and \$693,124, respectively, related to such contracts. The corresponding contract liability is paid typically in installments. At September 30, 2005, accounts payable and long-term liabilities included balances of \$341,384 and \$547,941, respectively, that are payable under such contracts.

Customer Contracts and Relationships

In connection with the acquisition of certain customer rights under an agreement with Sprint Communications Company L.P. ("Sprint"), the Company made an up-front payment of \$6,578,550, after adjustment for the difference in the closing number of customers subscribing to the service as compared to a target subscriber number (see Note 3). Accordingly, the amount of this payment, which is also net of the portion allocated to the value of the tangible assets and adjusted to include payments for legal and direct professional advisory fees, was capitalized as an intangible asset ascribed to the subscriber customer contracts and relationships and will be amortized on a straight-line basis over the estimated life of the subscriber base. The Company has estimated this life to be ten years based upon an analysis of the operating history of the base and the average monthly disconnects. In addition, the Company intends to evaluate the value of this intangible asset for potential impairment at least annually and to adjust both the asset value and the prospective life in the future if determined necessary. For the three months ended September 30, 2005, amortization expense was \$165,351.

This account also includes location contracts with net balances of \$2,965,456 and \$2,492,501 at March 31, 2005 and September 30, 2005, respectively, representing Davel acquisition costs allocated to location owner payphone contracts and other costs associated with obtaining written and signed location contracts. These other assets are amortized on a straight-line basis over their estimated useful lives based on contract terms (generally 5 years). Accumulated amortization related to these contracts at March 31, 2005 and September 30, 2005 was \$267,586 and \$554,203, respectively. Amortization related to location contracts was \$160,317 and \$320,609 for the three-month and six-month periods ended September 30, 2005.

Goodwill and Other Intangible Assets

The Company accounts for goodwill and other intangible assets in accordance with SFAS No. 142, "Goodwill and Other Intangible Assets". Through September 30, 2005, the Company has recorded goodwill in the aggregate amount of \$37,492,479 in connection with its acquisitions, including \$4,913,380 recorded in the six-month period ended September 30, 2005. The Company has also recorded certain other intangible assets in connection with the acquisitions of CloseCall, Davel and certain Internet service provider companies. The Company performs its annual impairment tests for goodwill at fiscal year-end. However, on a quarterly basis, management is alert for events or circumstances that would indicate, more likely than not, that the fair value of a reporting segment has fallen below its carrying amount. If the Company concludes that the fair value of an acquired entity is less than the net assets of the entity, including goodwill, an impairment loss would be determined and recorded at that time. As of September 30, 2005, management does not believe that the Company has suffered impairment of goodwill.

F-11

Investments

During the year ended March 31, 2005, the Company provided certain management services to two emerging technology firms. As consideration, the Company received a 5% ownership in each firm. These investments were recorded in the amounts of \$300,000 and \$150,000, respectively, approximating the value of the services provided. The total investment amount of \$450,000 was included in prepaid and other current assets at March 31, 2005 and September 30, 2005.

Accounts Payable and Accrued Liabilities

At March 31, 2005 and September 30, 2005, accounts payable and accrued liabilities consisted of the following:

	March 31, 2005	September 30, 2005
	(audited)	(unaudited)
Accounts payable	\$ 16,911,370	\$ 12,449,588
Accrued compensation	1,675,124	1,416,110
Accrued interest expense	937,378	671,641
Other accrued liabilities	339,216	3,525,845
Totals	\$ 19,863,088	\$ 18,063,184

Income Taxes

Effective July 14, 2000, the Company adopted the provisions of Statement of Financial Accounting Standards (SFAS) No. 109, "Accounting for Income Taxes". The statement requires an asset and liability approach for financial accounting and reporting for income taxes, and the recognition of deferred tax assets and liabilities for the temporary differences between the financial reporting bases and tax bases of the Company's assets and liabilities at enacted tax rates expected to be in effect when such amounts are realized or settled. Because of its history of losses, the Company has not had any material federal or state income tax obligations. Due to the anticipated use of net operating loss carryforwards to offset current year income, no provision for income taxes was recorded for the three or six months ended September 30, 2005.

Recent Accounting Pronouncements

In December 2004, the Financial Accounting Standards Board revised SFAS No. 123. The revision was entitled "Share-Based Payment" ("SFAS No. 123R"), replacing SFAS 123 and superseding APB No. 25, and its scope encompasses a wide range of share-based compensation arrangements including share options, restricted share plans, performance-based awards, share appreciation rights and employee share purchase plans.

SFAS 123R requires that the compensation cost relating to share-based payment transactions be recorded in financial statements. For each transaction, compensation cost is to be measured based on the fair value of the equity or liability instrument issued. The pro forma disclosures previously permitted under SFAS No. 123 no longer will be an alternative to financial statement recognition of compensation expense. In accordance with a recently-issued Securities and Exchange Commission rule, small business registrants will be allowed to implement SFAS No. 123R as of the beginning of the first fiscal year that begins after December 15, 2005. The Company currently expects that it will adopt SFAS No. 123R for the fiscal quarter ending June 30, 2006.

Under SFAS No. 123R, the Company must determine the appropriate fair value model to be used for valuing share-based payments, the amortization method for compensation cost and the transition method to be used at date of adoption. The permitted transition methods include either retrospective or prospective adoption. Under the retrospective method, prior periods may be restated either as of the beginning of the year of adoption or for all periods

presented. The prospective method requires that compensation expense be recorded for all unvested stock options at the beginning of the first quarter of adoption of SFAS No. 123R, while the retrospective methods would record compensation expense for all unvested stock options beginning with the first period presented. The Company is evaluating the requirements of SFAS No. 123R and expects that its adoption will have a material impact on the company's consolidated financial position and consolidated results of operations including an increase in compensation expense for equity instruments issued to employees. The Company has not yet determined the method of adoption or the effect of adopting SFAS No. 123R, and it has not determined whether the adoption will result in amounts that are similar to the current pro forma disclosures under SFAS No. 123.

F-12

NOTE 3- THE FORMATION OF KITE BROADBAND LLC

In June 2005, Kite Broadband, LLC (“Kite”) was funded with the Company making an investment of \$3,825,000 cash and receiving 51% ownership. Minority interests invested \$3,675,000 in cash. On June 30, 2005, Kite closed a Master Agreement for Services (the “Sprint Agreement”) with Sprint under which the Company shall provide services to Sprint’s broadband customers in fourteen (14) metropolitan markets for a period of three years utilizing the Sprint mark. The Agreement covers, among other things, the provisioning of certain customer-facing services, such as customer operations and call center management, sales, marketing, billing, collection, installation and repair. The Company is entitled to have Sprint remit collected customer revenues in exchange for these services and is required to remit a monthly fee back to Sprint for network support and transport services. The customers remain Sprint customers during the three-year term of the Agreement. Upon expiration of the Agreement, the Company will have the option to acquire the then existing customers pursuant to the terms of the Agreement. All network and spectrum assets will remain Sprint property. At September 30, 2005, the 49% minority ownership of Kite was included in the condensed consolidated balance sheet in minority interests in the amount of \$3,853,354.

NOTE 4- THE ACQUISITION OF AFN

The acquisition of AFN, which occurred on June 30, 2005, has been accounted for under the purchase method of accounting. Accordingly, AFN will be treated as a wholly owned subsidiary of the Company. The operating results of AFN are included in the operating results of the Company from and including July 1, 2005. The following unaudited pro forma information for the three and six months ended September 30, 2004 and 2005 has been presented as if the acquisition occurred on April 1, 2004, and reflects the elimination of revenues recorded on the books of both US1 and AFN and the issuance of 10,000,000 shares of the Company’s common stock. The unaudited pro forma information does not necessarily represent the actual results that would have been achieved had the companies been combined at April 1, 2004, nor may they be indicative of future operations.

	Three Months Ended September 30,		Six Months Ended September 30,	
	2004	2005	2004	2005
Revenues	\$ 6,678,415	\$ 26,546,650	\$ 9,601,372	\$ 50,615,263
Net income (loss)	(1,606,759)	523,900	(2,320,027)	1,053,263
Net income (loss) per share:				
Basic	(0.0059)	0.0014	(0.0090)	0.0028
Diluted	(0.0059)	0.0012	(0.0090)	0.0025

NOTE 5- NOTES PAYABLE**Secured Convertible Debenture**

On May 13, 2005, the Company issued a secured convertible debenture (the “Debenture”) in the aggregate amount of \$15.5 million to Cornell Capital. The Company used a significant portion of the proceeds to pay in full the remaining \$13,000,000 balance of a note payable that bore interest at the rate of 23% and was due on November 15, 2005; the retired note was the source of bridge financing for the Company’s acquisition of Davel. Interest expense related to the retired note was \$381,225 in the six-month period ended September 30, 2005.

The Debenture bears interest at an annual rate of 7.75% and is due and payable in the following installments over a three-year period: \$500,000 is due on November 15, 2005; \$1,500,000 is due on May 15, 2006; \$1,000,000 is due on each of August 15, 2006, November 15, 2006 and February 15, 2007; \$2,000,000 is due on each of May 15, 2007,

August 15, 2007, November 15, 2007 and February 15, 2008; and the remaining \$2,500,000 is due on May 15, 2008. The interest payable under the Debenture is due at the time of conversion or maturity; the holder of the Debenture may elect to receive the interest in cash or in the form of common stock of Mobilepro. For the three-month and six-month periods ended September 30, 2005, the amount of interest expense related to the Debenture, based on the stated interest rate, was \$302,780 and \$460,753, respectively; the cumulative amount of the interest was included in accrued liabilities at September 30, 2005. Until the Debenture is repaid in full, Cornell Capital may elect to convert any portion of the outstanding principal amount of the Debenture, plus accrued interest, into shares of common stock of Mobilepro at a conversion price of \$0.30 per share. The conversion price of the Debenture will adjust if the Company issues additional equity or instruments convertible into equity in connection with a transaction such as a stock dividend or a stock split pursuant to a formula included in the Debenture. As the market value of the Company's common stock on the date of the Debenture, \$0.327 per share, exceeded the conversion price, an amount equal to the difference in the prices times the number of shares subject to conversion was reclassified from additional paid-in capital and is included as additional paid-in capital, beneficial conversion feature, in the accompanying balance sheet at September 30, 2005.

F-13

The Debenture is secured by the assets of the Company. The terms of the Debenture obligate the Company to comply with certain covenants including an agreement that, on March 1, 2006, if the Company's aggregate indebtedness to Cornell Partners exceeds \$4,000,000, the parties will enter a new SEDA in an amount not less than the amount of the indebtedness.

In connection with the issuance of the Debenture, the Company also issued to Cornell Capital a five-year warrant to purchase 6,000,000 shares of its common stock at an exercise price of \$0.50 per share (the "Warrant"). If the Company issues additional equity or instruments convertible into equity as described in the Warrant, or is deemed to have done so, at a lower per share price than the then-effective Warrant exercise price, the exercise price may be adjusted downward to such lower per share price.

The face amount of the Debenture is reflected in the balance sheet at September 30, 2005, net of unamortized debt discount of \$701,775. The net amount of the Debenture reflects the fair market value on the date of issuance after allocating \$853,200 of the proceeds to the Warrant. The discount on the Debenture is being amortized as a charge to interest expense over the three-year period until the Debenture becomes due in May 2008. Interest expense for the three-month and six-month periods ended September 30, 2005 included debt discount amortization in the amounts of \$100,950 and \$151,425, respectively.

Standby Equity Distribution Agreement (the "SEDA")

On May 13, 2004, the Company entered into the SEDA with Cornell Capital that provides, generally, that Cornell Capital will purchase up to \$100 million of the common stock of Mobilepro over a two-year period, with the time and amount of such purchases, if any, at the Company's discretion. Cornell Capital will purchase the shares at a 2% discount to the prevailing market price of the common stock. There are certain conditions applicable to the Company's ability to draw down on the SEDA including the continuing effectiveness of a registration statement covering the resale of all shares of common stock that may be issued to Cornell Capital under the SEDA, the Company's payment of a fee to Cornell Capital and other advisors at the time of each draw (5% of the amount of each draw), and the Company's adherence with certain other covenants.

In the event that Cornell Capital would hold more than 9.9% of the then outstanding common stock of the Company, the Company would be unable to draw down on the SEDA. At September 30, 2005, Cornell did not hold more than 9.9% of the then outstanding common stock of the Company.

In the six-month periods ended September 30, 2004 and 2005, the Company transferred borrowings under existing notes payable to Cornell Capital to the SEDA in the amounts of \$7,000,000 and \$7,200,000, respectively, and advanced 35,000,000 shares of its common stock to the escrow agent in each period in accordance with the terms of the SEDA. In the six-month periods ended September 30, 2004 and 2005, the Company converted \$1,400,000 and \$12,750,000 in borrowings under the SEDA, respectively, into 6,060,712 and 54,010,042 shares of common stock, respectively, that were issued to Cornell Capital by the escrow agent. At March 31, 2005 and September 30, 2005, borrowings under the SEDA of \$6,500,000 and \$2,950,000 were outstanding, respectively, and were classified in the accompanying balance sheets as current liabilities.

The SEDA replaced a similar equity line of credit arrangement with Cornell Capital that was negotiated in May 2002 and that was intended to provide \$10 million in equity financing to the Company. In the six months ended September 30, 2004, the Company drew \$2,000,000 from Cornell Capital in accordance with this arrangement and advanced 10,000,000 shares of its common stock to the escrow agent. During the six months ended September 30, 2004, 18,298,438 shares of common stock were issued to Cornell Capital under this arrangement. At March 31, 2005 and September 30, 2005, the equity line of credit arrangement was no longer in place and there were no outstanding borrowed amounts under this arrangement.

Notes Payable to Cornell Capital

In August 2004, the Company borrowed \$8,500,000 from Cornell Capital. The amount was due in one-year with interest applied at an annual rate of 12%. Prior to March 31, 2005, the Company converted \$7,200,000 of the note balance into debt under the SEDA; the remaining principal balance of the note payable, classified as a current liability in the balance sheet, was \$1,300,000 at March 31, 2005. In May 2005, the remaining \$1,300,000 outstanding principal amount was transferred into debt under the SEDA.

F-14

In September 2004, the Company borrowed \$3,700,000 from Cornell Capital. The amount was due in one year with interest applied at an annual rate of 12%. At March 31, 2005, the Company classified the outstanding principal balance of this note payable of \$3,700,000 as a current liability in the balance sheet. In June 2005 the remaining \$3,700,000 outstanding principal amount was transferred into debt under the SEDA.

On June 24, 2005, the Company borrowed \$6,300,000 from Cornell Capital, and simultaneously transferred \$2,200,000 of the note balance into debt under the SEDA. The remaining amount of the note, \$4,100,000, is due in one year with interest applied at an annual rate of 8% and was classified as a current liability in the balance sheet. Proceeds from this borrowing were used to fund the \$1,500,000 cash consideration portion of the AFN purchase price and the \$3,825,000 cash investment in Kite.

On September 7, 2005, the Company borrowed \$2,000,000 from Cornell Capital, and simultaneously transferred the entire note balance into debt under the SEDA.

During the three-month and six-month periods ended September 30, 2005, the interest expense, including conversion discount amounts, on the notes payable to Cornell Capital, including amounts transferred to the SEDA, was \$310,158 and \$639,429, respectively. Accrued and unpaid interest at September 30, 2005 related to these notes was \$460,753.

Notes Payable Related to Acquisitions

As a portion of the consideration paid to owners of acquired companies, the Company may issue promissory notes. These notes typically are payable over terms ranging from 4 months to two years and bear interest at annual rates ranging from 3% to 7%. At March 31, 2005 and September 30, 2005, the aggregate balances due under the acquisition notes payable were \$1,723,201 and \$156,410, respectively. At March 31, 2005 and September 30, 2005, accrued interest amounts related to these notes were \$43,066 and \$2,973, respectively. During the three-month periods ended September 30, 2004 and 2005, interest expense amounts related to these notes payable were \$29,356 and \$8,434, respectively. During the six-month periods ended September 30, 2004 and 2005, interest expense amounts related to these notes payable were \$41,255 and \$14,591, respectively.

In June 2005, the Company retired notes payable to the former owners of Clover with remaining principal balances that totaled \$570,372, by converting \$535,188 into 2,200,000 shares of common stock of Mobilepro. The difference of \$35,184 between the common stock payment and notes payable balances was credited to goodwill.

In September 2005, the Company settled a dispute with the former owners of Ticon with the cash payment of \$195,000. The \$55,000 difference between the payment and the \$250,000 note payable balance was credited to goodwill.

In September 2005, the Company retired notes payable to the former owners of Internet Express, Inc., an Internet service provider acquired in March 2004, with remaining principal balances that totaled \$209,533, by making a cash payment in the amount of \$80,000. The difference of \$129,533 between the payment and notes payable balances was credited to goodwill.

In September 2005, a majority of the former owners of The River, holding notes convertible into common stock of Mobilepro at a price of \$0.20 per share with a total principal balance of \$369,346, notified the Company of their intent to convert the notes. Accordingly, this total balance was reclassified to liability for common stock to be issued at September 30, 2005. In October 2005, the Company completed the conversion with the issuance of 1,846,733 shares of common stock of Mobilepro to the note holders.

Other Notes Payable and Long-Term Liabilities

The Company has other notes and long-term liabilities payable to banks and various other creditors and with aggregate balances due at March 31, 2005 and September 30, 2005 of \$209,357 and \$1,031,440, respectively.

F-15

Debt Maturities

A summary of the balances of notes payable and other debts at September 30, 2005 was as follows (unaudited):

Convertible debenture payable to Cornell Capital	\$ 15,500,000
Notes payable to Cornell Capital under the SEDA	2,950,000
Notes payable to Cornell Capital	4,100,000
Notes payable related to acquisitions	156,410
Other notes payable and long-term obligations	1,031,440
	23,737,850
Less: Unamortized debt discount on convertible debenture	(701,775)
Less: Amounts due within one year	(10,416,125)
Long-term portion of debt	\$ 12,619,950

At September 30, 2005, a summary of the future scheduled payments of the long-term portion of debt was as follows (unaudited):

The twelve-month period ending --	
September 30, 2007	\$ 6,489,462
September 30, 2008	6,810,274
September 30, 2009	21,989
September 30, 2010	-
	13,321,725
Less - Unamortized debt discount on convertible debenture	(701,775)
Long-term portion of debt	\$ 12,619,950

NOTE 6- STOCKHOLDERS' EQUITY**Common Stock Transactions in the Fiscal Year Ended March 31, 2005**

In June 2004, the Company issued 8,000,000 shares of common stock in payment of the financing fees associated with the SEDA that were valued at \$1,760,000. This cost was reflected as a deferred financing fee in the consolidated balance sheet.

In August 2004, the Company issued 878,816 shares of common stock to the former owners of ShreveNet as partial consideration for the acquisition of their company. The issued shares were valued at \$190,000 based on the average 20-day closing price (\$0.2162 per share) prior to June 3, 2004.

In September 2004, the Company issued 5,000,000 shares of common stock to the former owners of Affinity as partial consideration for the acquisition of their company. The issued shares were valued at \$1,000,000 based upon the date of agreement and the terms of the acquisition. The distribution of such value amount included an allocation of \$995,000 to the terminated put agreement.

In November 2004, the Company issued 39,999,999 shares of common stock in connection with the acquisition of CloseCall that was completed in October 2004. The 39,999,999 shares were recorded at a fair value of \$10,000,000.

In March 2005, the Company issued 1,500,000 shares of common stock in connection with the acquisition of Web One that was completed in August 2004. The 1,500,000 shares were recorded at a fair value of \$300,000.

During the year ended March 31, 2005, the Company issued 10,000,000 shares of common stock to the escrow agent for use in the conversion of borrowings made under the \$10 million equity line of credit, and converted \$3,800,000 of

borrowings into 25,276,134 shares of common stock.

During the year ended March 31, 2005, the Company issued 65,000,000 shares of common stock to the escrow agent for use in the conversion of borrowings made under the SEDA, and converted \$9,200,000 of debt into 52,172,192 shares of common stock. The Company also converted \$13,907 of interest into 81,355 shares of common stock.

During the fiscal year ended March 31, 2005, the Company issued 1) 2,946,037 shares of its common stock in connection with the exercise of stock options and warrants for aggregate cash proceeds of approximately \$100,000, 2) 2,000,000 shares of its common stock under a settlement agreement with a former executive valued at \$90,000, and 3) 100,000 shares of common stock to an agency as compensation for personnel recruiting services.

F-16

Common Stock Transactions in the Six-Month Period Ended September 30, 2005

The Company issued 933,334 shares of common stock in connection with the acquisition of WazAlliance that was completed in May 2005; the shares were recorded at a fair value of \$135,333. The Company also issued 100,000 shares of common stock to an agency as compensation for broker fees relating to this acquisition that were valued at \$15,000.

In June 2005, the Company issued 2,200,000 shares of common stock in full satisfaction of the promissory notes, and related accrued interest, totaling \$535,188 that were issued in connection with the July 2004 acquisition of Clover.

In July and August 2005, the Company issued a total of 10,000,000 shares of its common stock owed to the former owner of AFN, completing the acquisition. These shares were valued at \$0.15 per share, based on the market value of the Company's common stock at the time the basic terms of the acquisition were negotiated.

In September 2005, the Company issued 1,505,360 shares of its common stock owed to the former owners of Evergreen, completing the acquisition. These shares were valued at \$0.1535 per share, based on the market value of the Company's common stock at the time the basic terms of the acquisition were negotiated.

During the six months ended September 30, 2005, the Company issued 35,000,000 shares of common stock to the escrow agent for use in the conversion of borrowings made under the SEDA, and converted \$12,750,000 of SEDA debt into 54,010,042 shares of common stock.

Stock Options and Warrants

The stockholders of the Company have approved the issuance of 30,000,000 shares of common stock in connection with stock options granted pursuant to the 2001 Equity Performance Plan (the "2001 Plan"). In addition, the Company has issued options and warrants to purchase common stock to key personnel pursuant to specific authorization of the board of directors outside the scope of the 2001 Plan. The following tables summarize the stock option activity and the warrant activity for the six months ended June 30, 2005 (unaudited):

Stock Options --	Number of Options	Weighted-Average Exercise Price
Outstanding - March 31, 2005	1,725,000	\$ 0.192
Granted	2,000,000	\$ 0.270
Exercised	-	\$ -
Cancelled	-	\$ -
Outstanding - September 30, 2005	3,725,000	\$ 0.234
Exercisable - September 30, 2005	985,416	\$ 0.174
Stock Warrants --	Number of Warrants	Weighted-Average Exercise Price
Outstanding - March 31, 2005	61,232,500	\$ 0.117
Granted	19,600,000	\$ 0.290
Exercised	-	\$ -
Cancelled	-	\$ -
Outstanding - September 30, 2005	80,832,500	\$ 0.159
Exercisable - September 30, 2005	63,281,313	\$ 0.160

F-17

NOTE 7- LIABILITY FOR COMMON STOCK TO BE ISSUED

As the purchase prices of certain acquisitions are subject to post-closing adjustments, some of the common stock of Mobilepro due to the former owners of such acquired companies may not yet been issued. The \$422,513 liability for common stock to be issued at September 30, 2005, reflecting an obligation to issue 2,213,399 shares in the aggregate, includes \$53,167 relating to the acquisition of WazAlliance and \$369,346 relating to the conversion of notes payable to the former owners of The River.

NOTE 8- BASIC AND DILUTED INCOME (LOSS) PER SHARE

Basic income (loss) per share includes no dilution and is computed by dividing net income (loss) available to common stockholders by the weighted-average number of common shares outstanding for the period. Diluted income (loss) per share includes the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock. Options and warrants to purchase 84,557,500 shares were outstanding at September 30, 2005. The dilutive effect of these agreements resulted in the addition of 41,914,293 and 40,930,727 shares in the computations of diluted income per share for the three and six months ended September 30, 2005, respectively. The dilutive effect of convertible notes payable resulted in the addition of 8,216,171 shares in the computation of diluted income per share for the three months ended September 30, 2005. The effect of such notes for the six months ended September 30, 2005 was antidilutive. The effects of the assumed conversion of the Debenture and other convertible notes payable for the three and six months ended September 30, 2005 were also antidilutive. The computations of diluted income per share for the three-month and six-month periods ended September 30, 2005 was as follows (unaudited):

	Three Months Ended September 30, 2005	Six Months Ended September 30, 2005
Net income	\$ 523,900	\$ 943,092
Weighted average number of shares outstanding during the period	388,001,055	374,464,022
Add: the treasury stock effect of stock options and warrants	41,914,293	40,930,727
Add: the effect of the assumed conversion of SEDA notes payable to common stock	8,216,171	-
Diluted number of shares outstanding	438,131,519	415,394,749
Net income per share:		
Basic	\$ 0.0014	\$ 0.0025
Diluted	\$ 0.0012	\$ 0.0023

As the Company incurred net losses for the three and six months ended September 30, 2004, the effects of options, warrants and convertible debt were antidilutive for those periods.

NOTE 9- EXCHANGE OF PAYPHONES

In September 2005, Davel sold the majority of the payphones and certain related assets and liabilities of its Bronx, New York field service office (2,204 payphones) for a net selling price of \$962,246. Davel recognized a \$91,373 gain on the sale of the net assets and incurred \$144,073 of exit and disposal activity costs associated with the closing of its Bronx field service office. The net loss before income taxes of \$52,700 is included in other general and administrative expenses in the accompanying condensed consolidated statement of operations for the quarter ended September 30,

2005. Davel also entered into agreements with the purchaser of its payphones to acquire certain of their payphones in Florida and to maintain, to service and to collect Davel's remaining payphones in the New York City area. On September 30, 2005, Davel acquired 2,240 payphones located in Florida from the purchaser for a net purchase price of \$784,000.

NOTE 10- COMMITMENTS

In June 2005, Mr. Jay O. Wright, the Company's President and Chief Executive Officer, extended his employment agreement with the Company through 2007, with the extension stipulating annual salary amounts during the term, restructuring the basis for bonus awards, and providing severance payment terms. The Company also has an employment contract with each senior executive, including the chief financial officer, the general counsel, and the general managers of the technology segment, the Internet service segment, CloseCall and Davel.

In August 2004, the Company announced its intention to issue a property dividend of 3,073,113 shares of common stock of Solution Technology International, Inc. ("STI"). The Company has a 5% ownership interest in STI. The Company stockholders are expected to receive one share of registered (i.e. "free-trading") STI stock for approximately every 93 shares of the Company stock that they own, based on the existing shares outstanding and certain warrants. The Company's board of directors set September 15, 2004 as the record date for the stock dividend. In March 2005, STI withdrew its registration statement from the United States Securities and Exchange Commission. STI is contemplating other options to become a publicly traded company. The Company intends to pursue issuance of the property dividend upon STI obtaining its public listing. At this time, no date has been established for such listing.

NOTE 11- CONTINGENCIES

During the fiscal year ended March 31, 2005, management concluded that uncertainty pertaining to the Company's ability to operate as a going concern should be eliminated. The events and factors considered by management in reaching its decision included the ability of the Company to obtain short-term and bridge loans, the commitment received from Cornell Capital to provide the Company with up to \$100 million in equity financing through the SEDA, and the ability of the Company to consummate a series of fourteen acquisitions in the fifteen-month period ended March 31, 2005. The acquired Internet and voice service providers are expected to generate revenues and to provide cash flow from operations. In the six-month period ended September 30, 2005, the Company refinanced a high interest, short-term bridge loan in the amount of \$13 million with the proceeds of the Debenture that is scheduled to be paid over a three-year term (see Note 3) bearing an annual interest rate 7.75%, established or extended the employment arrangements with the Company's key executives, and achieved net income of \$943,092.

Litigation and Other Legal Proceedings

As of September 30, 2005, the Company was party to the following material legal proceeding.

At the time that the Company acquired 95.2 % of the stock of Davel, Davel was a defendant in a civil patent infringement lawsuit captioned Gammino v. Cellco Partnership d/b/a Verizon Wireless, et al., filed in the United States District Court for the Eastern District of Pennsylvania. The plaintiff claims that Davel and other defendants allegedly infringed its patent involving the prevention of fraudulent long-distance telephone calls and is seeking damages in connection with the alleged infringement. Davel continues to review and investigate the allegations set forth in the complaint, continues to assess the validity of the Gammino Patents and is in the process of determining whether the technology purchased by Davel from third parties infringes upon the Gammino Patents. According to the terms of the Davel acquisition agreement, the former secured lenders, subject to certain limitations, have agreed to reimburse the Company for the litigation costs and any losses resulting from the Gammino lawsuit from future regulatory receipts that were assigned previously to them by Davel. Any such regulatory receipts are deposited into a third-party escrow account and are used to reimburse the Company for costs incurred. The secured lenders are not required to fund the escrow account or otherwise reimburse the Company for amounts, if any, in excess of actual regulatory receipts collected. Any amount remaining in the escrow account at the conclusion of the litigation is to be returned to the former secured lenders. The Company has received significant regulatory receipts that are being held in escrow. The case is in the discovery phase of the litigation, and it is unable to predict the likely outcome or assess the sufficiency of the escrowed receipts to cover legal costs and losses, if any, related to this matter.

In September 2005, pending court approval of the agreements and formal dismissal of the case, Davel settled with the plaintiffs in the following matter.

On or about October 15, 2002, Davel was served with a complaint, in an action captioned Sylvia Sanchez et al. v. Leasing Associates Service, Inc., Armored Transport Texas, Inc., and Telaleasing Enterprises, Inc. On or about January 8, 2002, the Plaintiffs filed their first amended complaint adding a new defendant, LAI Trust, and on or about January 21, 2002 filed their second amended complaint adding new defendants including Davel and certain of its subsidiaries. Davel's insurance company has agreed to pay the settlement amount that is not material to the Company's financial statements.

NOTE 12- SEGMENT INFORMATION

The Company's reportable operating segments include voice services, Internet services and wireless networks. The accounting policies of the segments are the same as those described in the summary of significant accounting policies. The Company evaluates the performance of each segment based on the amount of net income or loss, as presented below. Corporate expenses are not allocated to the segments. Results of operations and certain asset data relating to the Company's business segments for the three-month periods ended September 30, 2004 and 2005 were as follows (unaudited):

The Three Month Period Ended September 30, 2004	Voice Services	Internet Services	Wireless Networks	Corporate	Total

NOTE 13- SUBSEQUENT EVENTS

Subsequent to September 30, 2005, The Company converted \$500,000 of the \$2,950,000 balance of outstanding SEDA debt at September 30, 2005 into 2,476,061 shares of its common stock. The remaining balance of \$2,450,000 in SEDA borrowings is scheduled to convert into shares of common stock in installments by December 30, 2005.

On October 24, 2005, the Company announced that its subsidiary CloseCall reached a commercial agreement with the incumbent local exchange carrier (ILEC) subsidiaries of SBC Communications, Inc. The agreement runs through September 29, 2010 and covers all 13 states that the SBC ILECs serve.

On October 26, 2005, the Company borrowed \$2,500,000 from Cornell Capital in order to close on the acquisition of InReach Internet, LLC ("InReach"), an Internet service provider located in Stockton, California. The note payable is due in 5 months and bears interest at an annual rate of 8%.

On November 1, 2005 the Company completed the acquisition of InReach for a total purchase price of \$3,066,873, including \$2,116,873 cash and 4,357,798 shares of the Company's common stock with a value of \$950,000.

On October 6, 2005, the Company completed the conversion of a majority of notes payable to former owners of The River with the issuance of 1,846,733 shares of common stock of Mobilepro.

On October 28, 2005, the Company issued 10,000,000 shares of its common stock to the escrow agent for the SEDA.

The Company satisfied its obligation under the Debenture to make the \$500,000 installment payment due on November 15, 2005, plus accrued interest of approximately \$600,000, with the draw of approximately \$1,100,000 under the SEDA. This amount will be converted to common stock by December 30, 2005.

Board of Directors
Mobilepro Corp. and Subsidiaries
Bethesda, Maryland

We have audited the accompanying consolidated balance sheets of Mobilepro Corp. and Subsidiaries as of March 31, 2005 and 2004 and the related consolidated statements of operations, changes in stockholders' equity (deficit), and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We have conducted our audits in accordance with standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Mobilepro Corp. and Subsidiaries as of March 31, 2005 and 2004 and the results of its operations, changes in stockholders' equity (deficit) and their cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

MOBILEPRO CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2005 AND 2004

NOTE 1- ORGANIZATION AND BASIS OF PRESENTATION

Mobilepro Corp., a Delaware corporation, as of June 1, 2001 merged into Craftclick.com, Inc. with Craftclick being the surviving corporation and the Certificate of Incorporation and By-Laws of Craftclick being the constituent documents of the surviving corporation. In July 2001, the Company changed its name to Mobilepro Corp. ("Mobilepro" or "Company").

On March 21, 2002, Mobilepro entered into an Agreement and Plan of Merger with NeoReach, Inc. ("Neoreach"), a private Delaware company, pursuant to which a newly formed wholly owned subsidiary of Mobilepro merged into NeoReach in a tax-free transaction. NeoReach was a development stage company designing, developing and deploying various wireless technologies and solutions. The merger was consummated on April 23, 2002. As a result of the merger, NeoReach became a wholly owned subsidiary of Mobilepro. On April 23, 2002, the Company issued 12,352,129 shares of its common stock and no cash pursuant to the Agreement. The Board of Directors determined the consideration to be a fair compensation to the NeoReach shareholders. The issued shares were valued at a fair value of \$6,546,628, based on the last trading price of \$0.53 per share and assuming there was actual active trading of the stock at that time.

On March 12, 2003, the Company amended its Certificate of Incorporation and pursuant to a board resolution, increased the authorized level of common stock from 50,000,000 to 600,000,000. The Board of Directors of the Company subsequently authorized an increase in the number of shares authorized under its 2001 Equity Performance Plan from 1,000,000 to 6,000,000.

On January 19, 2004, the Company consummated a Stock Purchase Agreement with DFW Internet Services, Inc. A newly formed, wholly-owned subsidiary of Mobilepro merged into DFW Internet Services, Inc. in a tax-free exchange transaction. As a result of the merger, DFW Internet Services, Inc. is now a wholly owned subsidiary of Mobilepro. In March 2004, the Company issued 18,761,726 shares of common stock to the holders of DFW Internet Services, Inc. in a share exchange for 100% of DFW Internet Services, Inc. common stock. The issued shares were valued at a fair value of \$500,000 based on the average 20-day closing price (\$0.02665 per share) prior to January 19, 2004.

In March 2004, DFW Internet Services, Inc. acquired Internet Express, Inc., an Internet service provider in southeast Texas for \$650,000 in cash and promissory notes.

In April 2004, DFW Internet Services, Inc. acquired August.net Services LLC, an Internet service provider in Texas for \$1,730,000 in cash and promissory notes.

In June 2004, DFW Internet Services, Inc. acquired ShreveNet, Inc., an Internet service provider in Louisiana for \$1,250,000 in cash and common stock. The issued shares were valued at a fair value of \$190,000 based on the average 20-day closing price (\$0.2162 per share) prior to June 3, 2004. The Company issued the common stock in August 2004.

In June 2004, DFW Internet Services, Inc. acquired certain assets of Crescent Communications, Inc., an Internet service provider in Houston for \$1,194,767 in cash and a promissory note.

In June 2004, the Company acquired US1 Telecommunications, Inc., a long distance provider in Kansas, for \$200,000 in cash and conditional promissory notes.

In July 2004, DFW Internet Services, Inc. acquired Clover Computer Corporation, a Coshocton, Ohio-based Internet services provider with operations in several Ohio cities, for \$1,250,000 in cash and promissory notes.

In July 2004, DFW Internet Services, Inc. acquired Ticon.net, a Janesville, Wisconsin-based Internet service provider with operations in Janesville and Milwaukee, for \$1,000,000 in cash and promissory notes.

In August 2004, the Company acquired Affinity Telecom, a Michigan-based Competitive Local Exchange Carrier (“CLEC”) and long distance carrier. The Company paid \$3,440,000 in cash, notes, and a convertible note. The Agreement and Plan of Merger by and between the Company and Affinity Telecom was amended as of December 2004 due to certain disputes regarding the financial condition of Affinity Telecom. The Amendment resulted in a reduction in the aggregate consideration the Company paid by approximately \$927,000.

In August 2004, DFW Internet Services, Inc. acquired the customer base, corporate name and certain other assets of Web One, Inc., a Kansas City, Missouri-based Internet service and web-hosting provider for \$2,000,000 in cash and common stock. In March 2005, a subsequent post closing adjustment resulted in the Company recognizing a reduction in the aggregate consideration the Company paid by \$40,000.

MOBILEPRO CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
MARCH 31, 2005 AND 2004

NOTE 1- ORGANIZATION AND BASIS OF PRESENTATION (CONTINUED)

In September 2004, DFW Internet Services, Inc. acquired World Trade Network, Inc. an Internet services provider based in Houston, Texas, for \$1,700,000 in cash and promissory notes. In March 2005, a subsequent post closing adjustment resulted in the Company recognizing a reduction in the aggregate consideration the Company paid by \$500,000.

In September 2004, DFW Internet Services, Inc. acquired The River Internet Access Co. an Internet services provider based in Tucson, Arizona, for \$2,467,204 in cash and promissory notes.

In October 2004, the Company acquired CloseCall America, Inc. a Maryland-based CLEC, offering local, long distance, 1.800CloseCall prepaid calling cards, wireless, dial-up and DSL Internet telecommunications services. The purchase price included cash of \$8,000,000 and 39,999,999 shares of common stock valued at \$10,000,000 plus warrants to purchase 3,500,000 additional shares of common stock. The 39,999,999 shares are restricted under SEC Rule 144 and the 2,500,000 and 1,000,000 warrants issued have strike prices of \$0.30 and \$0.35 per share, respectively.

In November 2004, in connection with our acquisition of 100% of Davel Communication, Inc.'s ("Davel") senior secured debt in the approximate principal amount of \$103.1 million, a \$1.3 million note payable by Davel to one of its secured lenders, and the assignment to Mobilepro of approximately 95.2% of the common stock of Davel, we agreed to purchase the remaining issued and outstanding shares of Davel. Davel is an owner and operator of approximately 38,000 payphones in approximately 25,000 locations in 45 states and the District of Columbia. The Company acquired 100% of Davel's approximately \$104.4 million in total secured debt and 95.2% of Davel's common stock for a price of \$14.33 million. The purchase price included cash of \$14,000,000 plus warrants to purchase up to 5,000,000 shares of common stock at the price of \$0.30 per share. Additionally, the Company agreed to purchase the remaining 4.8% of Davel's common stock at a minimum price of \$0.015 per share. In May 2005, Davel fulfilled this obligation by executing a reverse stock split and paying a cash purchase price of \$450,000 for fractional shares held by the minority stockholders.

The schedule included as Exhibit 1 to the consolidated financial statements presents the aggregate purchase price for each of the Company's significant acquisitions in the year ended March 31, 2005 and the allocation of the purchase price amounts to the assets of the acquired businesses. The proforma information presented on Exhibits 2 and 3 reflects the acquisitions as if they had occurred on April 1, 2003. These results are not necessarily indicative of future operating results or those that would have occurred had the acquisitions been consummated on that date.

NOTE 2- SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its subsidiaries. All significant inter-company accounts and transactions have been eliminated in consolidation.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash and Cash Equivalents

The Company considers all highly liquid debt instruments and other short-term investments with an initial maturity of three months or less to be cash or cash equivalents.

The Company maintains cash and cash equivalents with a financial institution that exceeds the limit of insurability under the Federal Deposit Insurance Corporation. However, due to management's belief in the financial strength of Bank of America, management does not believe the risk of keeping deposits in excess of federal deposit limits at Bank of America to be a material risk.

Restricted Cash

The Company is required to maintain letters of credit collateralized by cash as additional security for the performance of obligations under certain service agreements. In addition, cash is held as collateral for a note payable to the bank for an expansion loan as disclosed in Note 8. The cash collateral is restricted and is not available for the Company's general working capital needs. The letters of credit expire in calendar 2005. At March 31, 2005 and 2004, restricted cash was \$429,954 and \$0, respectively.

Revenue Recognition

The Company in January 2004 emerged from the development stage with the acquisition of DFW Internet Services, Inc. The Company, as it relates to Internet services, recognizes income when the services are rendered and collection is reasonably assured and recognizes deferred revenue as a liability on services the Company pre-bills.

MOBILEPRO CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
MARCH 31, 2005 AND 2004

NOTE 2- SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Revenue Recognition (continued)

Revenue derived from local, long-distance and wireless calling, and Internet access is recognized in the period in which subscribers use the related service. Deferred revenue represents the unearned portion of local, wireless and internet services that is billed in advance.

Revenue from product sales that contain embedded software is recognized in accordance with the provisions of the American Institute of Certified Public Accountants Statement of Position 97-2, "Software Revenue Recognition."

Revenue from product sales is recognized based on the type of sale transaction as follows:

Shipments to Credit-Worthy Customers with No Portion of the Collection Dependent on Any Future Event: Revenue is recorded at the time of shipment.

Shipments to a Customer without Established Credit: These transactions are primarily shipments to customers who are in the process of obtaining financing and to whom the Company has granted extended payment terms. Revenues are deferred (not recognized) and no receivable will be recorded until a significant portion of the sales price is received in cash.

Shipments where a portion of the Revenue is Dependent upon Some Future Event: These consist primarily of transactions involving value-added resellers to an end user. Under these agreements, revenues are deferred and no receivable will be recorded until a significant portion of the sales price is received in cash. On certain transactions, a portion of the payment is contingent upon installation or customer acceptance.

Upon non-acceptance, the customer may have a right to return the product. The Company does not recognize revenue on these transactions until these contingencies have lapsed.

Certain of the Company's product sales are sold with maintenance/service contracts. The Company allocates revenues to such maintenance/service contracts based on vendor-specific objective evidence of fair value as determined by the Company's renewal rates. Revenue from maintenance/service contracts are deferred and recognized ratably over the period covered by the contract.

The Company, in addition to its Internet and voice services, from time to time receives miscellaneous revenues. During the years ended March 31, 2005 and 2004, the Company generated \$615,000 and \$0 in miscellaneous revenues, respectively. The miscellaneous revenue for the year ended March 31, 2005 included \$450,000 that was received for services rendered in the form of common stock and is recorded on the consolidated balance sheet as investments at the fair value of the common stock received. The two common stock transactions involved a software company based in Maryland and a specialized electronic assembly prototyping engineering firm in Texas. (See Notes 2, 3, 10 and 14)

Davel derives its payphone revenues from two principal sources: coin calls and non-coin calls. Coin calls represent calls paid for by callers with coins deposited into a payphone. Coin call revenues are recorded in the amount of coins deposited in the payphones and in the period deposited. Revenue from non-coin calls, that includes dial-around compensation, and operator service revenue, is recognized in the period in which the customer places the call. Coin call and non-coin call revenues recorded and recognized are ultimately reconciled to actual cash receipts. Any

variation between recorded revenue and receipt is accounted for at the time of receipt.

Operator Service Revenue: Non-coin operator service calls are serviced by independent operator service providers. These carriers assume billing and collection responsibilities for operator-assisted calls originating on Davel's payphone network and pay "commissions" to Davel based upon gross revenues. Davel recognizes operator service revenues in amounts equal to the commission that it is entitled to receive during the period the service is rendered.

Dial-around Revenue: Davel also recognizes non-coin dial-around revenues from calls that are dialed from its payphones to gain access to a long distance company or to make a traditional "toll free" call (dial-around calls). Revenues from dial-around calls are recognized based on estimates using the Company's historical collection experience because a) the interexchange carriers ("IXCs") have historically paid for fewer dial-around calls than are actually made (See Note 18) and b) the collection period for dial-around revenue is generally four to six months but can be in excess of a year. Davel's estimate of revenue is based on historical analyses of calls placed versus amounts collected. These analyses are updated on a periodic basis. Recorded amounts of revenue may be adjusted based on actual receipts and/or the subsequent revision of prior estimates. Revenues for the fiscal year ended March 31, 2005 included a reduction to previously recorded revenues of \$167,319.

MOBILEPRO CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
MARCH 31, 2005 AND 2004

NOTE 2- SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Income Taxes

Effective July 14, 2000, the Company adopted the provisions of Statement of Financial Accounting Standards (SFAS) No. 109, "Accounting for Income Taxes". The statement requires an asset and liability approach for financial accounting and reporting for income taxes, and the recognition of deferred tax assets and liabilities for the temporary differences between the financial reporting bases and tax bases of the Company's assets and liabilities at enacted tax rates expected to be in effect when such amounts are realized or settled. There no federal or material state income taxes paid or due for the years ended March 31, 2005 and 2004, respectively. (See Note 17)

Fair Value of Financial Instruments

The carrying amounts reported in the consolidated balance sheets for cash and cash equivalents, and accounts payable approximate fair value because of the immediate or short-term maturity of these financial instruments.

Advertising Costs

The Company expenses the costs associated with advertising as incurred. Advertising and promotional expenses were approximately \$1,610,285 and \$36,995 for the years ended March 31, 2005 and 2004, respectively.

Fixed Assets

Furniture and equipment are stated at cost. Depreciation is computed using the straight-line method over the estimated useful lives of the assets. The costs associated with normal maintenance, repair, and refurbishment of telephone equipment are charged to expense as incurred. The capitalized cost of equipment and vehicles under capital leases is amortized over the lesser of the lease term or the asset's estimated useful life, and is included in depreciation and amortization expense in the consolidated statements of operations.

Uninstalled payphone equipment consists of replacement payphones and related equipment and is carried at the lower of cost or fair value.

When assets are retired or otherwise disposed of, the costs and related accumulated depreciation are removed from the accounts, and any resulting gain or loss is recognized as income for the period. The cost of maintenance and repairs is charged to income as incurred; significant renewals and betterments are capitalized. Deductions are made for retirements resulting from renewals or betterments.

Location Contracts

Location contracts of \$3,066,129 include acquisition costs allocated to location owner payphone contracts and other costs associated with obtaining written and signed location contracts. These assets are amortized on a straight-line basis over their estimated useful lives based on contract terms (generally 5 years). Amortization expense related to location contracts was \$253,805 and \$-0- for the years ended March 31, 2005 and 2004, respectively. Accumulated amortization as of March 31, 2005 and 2004 was \$253,805 and \$-0-, respectively.

Reclassifications

Certain amounts in the March 31, 2004 financial statements were reclassified to conform to the March 31, 2005 presentation. The reclassifications in the March 31, 2004 financial statements resulted in no changes to the accumulated deficits.

Accounts Receivable

The Company conducts business and extends credit based on an evaluation of the customers' financial condition, generally without requiring collateral. Exposure to losses on receivables is expected to vary by customer due to the financial condition of each customer. The Company monitors exposure to credit losses and maintains allowances for anticipated losses considered necessary under the circumstances. The Company has an allowance for doubtful accounts of \$529,945 at March 31, 2005 relating to accounts receivable other than dial-around compensation.

Accounts receivable, other than dial-around compensation, are generally due within 30 days and collateral is not required. Unbilled accounts receivable represents amounts due from customers for which billing statements have not been generated and sent to the customers.

F-32

MOBILEPRO CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
MARCH 31, 2005 AND 2004

NOTE 2- SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Concentrations of Credit Risk

Trade accounts receivable are concentrated with companies in the telecommunications industry. Accordingly, the credit risk associated with the trade accounts receivable will fluctuate with the overall condition of the telecommunications industry. The primary component of accounts receivable relates to the Company's estimates of dial-around revenues as described below. As a result, such estimates are based on the Company's historical collection experience and accounts receivable does reflect a general or specific provision for an allowance for doubtful accounts. During all periods presented, credit losses, to the extent identifiable, were within management's overall expectations.

Segment Information

The Company follows the provisions of Statement of Financial Accounting Standard No. 131, "Disclosures about Segments of an Enterprise and Related Information". This standard requires that companies disclose operating segments based on the manner in which management disaggregates the Company in making internal operating decisions.

Deferred Financing Fees

The Company, in May 2004, issued 8,000,000 shares of common stock with a value of \$1,760,000 in connection with its Standby Equity Distribution Agreement (the "SEDA"). These shares were issued as payment for financing fees to Cornell Capital for issuing the SEDA. The agreement runs for a period of 24 months and the Company will amortize this fee over that period of time. The Company incurred \$733,333 in amortization expense for the year ended March 31, 2005. (See Note 9)

Earnings (Loss) per Share of Common Stock

Historical net income (loss) per common share ("EPS") is computed using the weighted average number of common shares outstanding. Diluted earnings per share include additional dilution from common stock equivalents, such as common stock issuable pursuant to the exercise of stock options and warrants. Common stock equivalents were not included in the computations of diluted earnings per share for the years ended March 31, 2005 and 2004 because to do so would have been anti-dilutive on a per share basis for the periods presented.

The following is a reconciliation of the weighted average shares outstanding for basic and diluted EPS for the years ended:

	March 31, 2005	March 31, 2004
Net loss	\$ (5,359,722)	\$ (2,157,844)
Weighted-average common shares outstanding (Basic)	289,933,904	111,591,658
Weighted-average common stock equivalents --		
Stock options	-	-

Warrants	-	-
Weighted-average common shares outstanding (Diluted)	289,933,904	111,591,658
Net loss per share, basic and diluted	\$ (0.02)	\$ (0.02)

MOBILEPRO CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
MARCH 31, 2005 AND 2004

NOTE 2- SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Goodwill and Other Intangible Assets

In June 2001, the Financial Accounting Standards Board (the "FASB") issued Statement No. 142, "Goodwill and Other Intangible Assets". This statement addresses financial accounting and reporting for acquired goodwill and other intangible assets and supersedes Accounting Principles Board ("APB") Opinion No. 17, "Intangible Assets". It addresses how intangible assets that are acquired individually or with a group of other assets (but not those acquired in a business combination) should be accounted for in financial statements upon their acquisition. This statement also addresses how goodwill and other intangible assets should be accounted for after they have been initially recorded in the financial statements. The Company has recorded \$32,785,618 of goodwill in connection with its acquisitions. The Company has also acquired other intangible assets of certain Internet service providers, CloseCall and Davel. The Company performs its annual impairment test for goodwill at fiscal year-end. As of March 31, 2005, the Company has determined that there is no impairment of its goodwill.

The Company capitalizes computer software development costs and amortizes these costs over an estimated useful life of 5 years.

Investments

On June 29, 2004, the Company entered into a Business Development Agreement with Solution Technology International, Inc. ("STI"), a company based in Maryland, whereby the Company provided services to STI in exchange for a 5% ownership in the company. The value of the investment is \$150,000 and is included in the consolidated balance sheet at March 31, 2005. (See Notes 2, 3, 10 and 14)

The Company on August 26, 2004 entered into a Business Development Agreement with Texas Prototypes, a company based in Texas, whereby the Company provided services to Texas Prototypes in exchange for a 5% ownership in the company. The value of the investment is \$300,000 and is included in the consolidated balance sheet at March 31, 2005. (See Notes 2, 3, 10 and 14)

Accounts Payable and Accrued Liabilities

	2005	2004
Accounts payable	\$ 17,250,586	\$ 499,819
Accrued compensation	1,675,124	90,000
Accrued interest expense	937,378	-
Total	\$ 19,863,088	\$ 589,819

Stock-Based Compensation

Employee stock awards under the Company's compensation plans are accounted for in accordance with APB Opinion No. 25, "Accounting for Stock Issued to Employees" ("APB 25"), and related interpretations. The Company provides the

disclosure required by Statement of Financial Accounting Standard No. 123, "Accounting for Stock-Based Compensation" ("SFAS 123"), and related interpretations. Stock-based awards to non-employees are accounted for under the provisions of SFAS 123 and have adopted the enhanced disclosure provisions of Statement of Financial Accounting Standard No. 148, "Accounting for Stock-Based Compensation-Transition and Disclosure, an Amendment of SFAS No. 123" ("SFAS No.148").

The Company measures compensation expense for its employee stock-based compensation using the intrinsic-value method. Under the intrinsic-value method of accounting for stock-based compensation, when the exercise price of options granted to employees is less than the estimated fair value of the underlying stock on the date of grant, deferred compensation is recognized and is amortized to compensation expense over the applicable vesting period. In each of the periods presented, the vesting period was the period in which the options were granted.

The Company measures compensation expense for its non-employee stock-based compensation under the FASB Emerging Issues Task Force Issue No. 96-18, "Accounting for Equity Instruments that are Issued to Other Than Employees for Acquiring, or in Conjunction with Selling Goods or Services". The fair value of the option issued is used to measure the transaction, as this is more reliable than the fair value of the services received. The fair value is measured at the value of the Company's common stock on the date that the commitment for performance by the counterparty has been reached or the counterparty's performance is complete. The fair value of the equity instrument is charged directly to compensation expense and additional paid-in capital.

MOBILEPRO CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
MARCH 31, 2005 AND 2004

NOTE 2- SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Recent Accounting Pronouncements

On October 3, 2001, the FASB issued Statement of Financial Accounting Standard No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets" ("SFAS 144"), that is applicable to financial statements for fiscal years beginning after December 15, 2001. The FASB's new rules on asset impairment supersede Statement of Financial Accounting Standards 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of," and portions of APB Opinion No. 30, "Reporting the Results of Operations." This standard provides a single accounting model for long-lived assets to be disposed of and significantly changes the criteria that would have to be met to classify an asset as held-for-sale. Classification as held-for-sale is an important distinction since such assets are not depreciated and are stated at the lower of fair value or carrying amount. This standard also requires expected future operating losses from discontinued operations to be displayed in the period(s) in which the losses are incurred, rather than as of the measurement date as presently required.

In April 2002, the FASB issued Statement of Financial Accounting Standard No. 145, "Rescission of FASB Statements No. 4, 44 and 64, Amendment of FASB Statement No. 13, and Technical Corrections" ("SFAS No. 145"). This statement rescinds (1) Statement of Financial Accounting Standard No. 4, "Reporting Gains and Losses from Extinguishment of Debt" (SFAS No. 4"), (2) an amendment of that statement, Statement of Financial Accounting Standard No. 44, "Accounting for Intangible Assets of Motor Carriers", and (3) Statement of Financial Accounting Standard No. 64, "Extinguishments of Debt Made to Satisfy Sinking-Fund Requirements". This statement amends Statement of Financial Accounting Standard No. 13, "Accounting for Leases" ("SFAS No. 13") to eliminate inconsistencies between the required accounting for sales-leaseback transactions and the required accounting for certain lease modifications that have economic effects that are similar to sales-leaseback transactions. Also, this statement amends other existing authoritative pronouncements to make various technical corrections, clarify meanings, or describe their applicability under changed conditions. Provisions of SFAS No. 145 relating to the rescission of SFAS No. 4 were effective for the Company on November 1, 2002, and provisions affecting SFAS No. 13 were effective for transactions occurring after May 15, 2002. The adoption of SFAS No. 145 did not have a significant impact on the Company's results of operations or financial position.

In July 2002, the FASB issued Statement of Financial Accounting Standard No. 146, "Accounting for Costs Associated with Exit or Disposal Activities" ("SFAS No. 146"). This statement covers restructuring type activities beginning with plans initiated after December 31, 2002. Activities covered by this standard that are entered into after that date will be recorded in accordance with provisions of SFAS No. 146. The adoption of SFAS No. 146 did not have a significant impact on the Company's results of operations or financial position.

In December 2002, the FASB issued SFAS No. 148 that amended SFAS No. 123, to provide alternative methods of transition for entities that voluntarily change to the fair value based method of accounting for stock-based employee compensation. It also amends the disclosure provisions of that statement to require prominent disclosure about the effects on reported net income of accounting policy decisions with respect to stock-based employee compensation. Finally, this statement amends Accounting Principles Board Opinion No. 28, "Interim Financial Reporting", to require disclosure about those effects in interim financial information. SFAS 148 is effective for financial statements covering fiscal years ending after December 15, 2002. The Company will continue to account for stock-based employee compensation using the intrinsic value method of APB No. 25, but has adopted the enhanced disclosure requirements of SFAS 148.

In April 2003, the FASB issued Statement of Financial Accounting Standard No. 149, "Amendment of Statement 133 on Derivative Instruments and Hedging Activities", which amends and clarifies financial accounting and reporting for derivative instruments, including certain derivative instruments embedded in other contracts (collectively referred to as derivatives) and for hedging activities under Statement of Financial Accounting Standard No. 133, "Accounting for Derivative Instruments and Hedging Activities". This statement is effective for contracts entered into or modified after June 30, 2003, except for certain hedging relationships designated after June 30, 2003. Most provisions of this new statement should be applied prospectively. The adoption of this statement did not have a significant impact on the Company's results of operations or financial position.

In May 2003, the FASB issued Statement of Financial Accounting Standard No. 150, "Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity". This statement establishes standards for how an issuer classifies and measures certain financial instruments with characteristics of both liabilities and equity. It requires that an issuer classify a financial instrument that is within its scope as a liability (or an asset in some circumstances). This statement is effective for financial instruments entered into or modified after May 31, 2003, and otherwise is effective at the beginning of the first interim period beginning after June 15, 2003, except for mandatory redeemable financial instruments of nonpublic entities, if applicable. It is to be implemented by reporting the cumulative effect of a change in an accounting principle for

MOBILEPRO CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
MARCH 31, 2005 AND 2004

NOTE 2- SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Recent Accounting Pronouncements (continued)

financial instruments created before the issuance date of the statement and still existing at the beginning of the interim period of adoption. The adoption of this statement did have a significant impact on the Company's results of operations or financial position. (See Note 10)

In November 2002, the FASB issued Interpretation No. 45, "Guarantor's Accounting and Disclosure Requirements for Guarantees, including Indirect Guarantees of Indebtedness of Others ("FIN 45"), that requires a company, at the time it issues a guarantee, to recognize an initial liability for the fair value of obligation assumed under the guarantee and elaborates on existing disclosure requirements related to guarantees and warranties. The recognition requirements are effective for guarantees issued or modified after December 31, 2002 for initial recognition and initial measurement provisions. The adoption of FIN 45 did not have a significant impact on the Company's results of operations or financial position.

In January 2003, the FASB issued Interpretation No. 46, "Consolidation of Variable Interest Entities, an Interpretation of ARB No. 51" ("FIN 46") that requires certain variable interest entities to be consolidated by the primary beneficiary of the entity if the equity investors in the entity do not have the characteristics of a controlling financial interest or do not have sufficient equity at risk for the entity to finance its activities without additional subordinated financial support from other parties. FIN 46 is effective for all new variable interest entities created or acquired after January 31, 2003. For variable interest entities created or acquired prior to February 1, 2003, the provisions of FIN 46 must be applied for the first interim or annual period beginning after June 15, 2003. The adoption of FIN 46 did not have a significant impact on the Company's results of operations or financial position.

In December 2004, the FASB issued Statement of Financial Accounting Standard No. 123 (Revised 2004), "Share-Based Payment" ("SFAS No. 123R") that requires that the compensation cost relating to share-based payment transactions be recognized in financial statements. That cost will be measured based on the fair value of the equity or liability instruments issued. The scope of SFAS No. 123R includes a wide range of share-based compensation arrangements including share options, restricted share plans, performance-based awards, share appreciation rights and employee share purchase plans. SFAS No. 123R replaces SFAS No. 123 and supersedes APB No. 25. SFAS No. 123, as originally issued in 1995, established as preferable a fair-value-based method of accounting for share-based payment transactions with employees. However, that statement permitted entities the option of continuing to apply the guidance in APB No. 25 as long as the footnotes to the financial statements disclosed what net income would have been had the preferable fair-value-based method been used. The Company has not yet determined the affect that the adoption of this new statement will have on the Company's historical financial position or results of operations, however it is expected to include the increase in compesation expense for equity and liability instruments issued to employees in the future.

In December 2004, the FASB issued Statement of Financial Accounting Standard No. 151, "Inventory Costs" ("SFAS No. 151"), that requires abnormal amounts of inventory costs related to idle facility, freight handling and wasted material expenses to be recognized as current period charges. Additionally, SFAS No. 151 requires that the allocation of fixed production overhead to the costs of conversion be based on the normal capacity of the production facilities. The standard is effective for fiscal years beginning after June 15, 2005. The Company does not have manufacturing operations or goods held for resale and does not expect the adoption of SFAS No. 151 to have any impact on the Company's financial position or results of operations.

In December 2004, the FASB issued Statement of Financial Accounting Standard No. 153, "Exchanges of Nonmonetary Assets - an Amendment of APB Opinion No. 29" ("SFAS No. 153"), that amends APB Opinion No. 29, "Accounting for Nonmonetary Transactions" ("APB No. 29"). The amendments made by SFAS No. 153 are based on the principle that exchanges of nonmonetary assets should be measured based on the fair value of the assets exchanged. Further, the amendments eliminate the narrow exception for nonmonetary exchanges of similar productive assets and replace it with a broader exception for exchanges of nonmonetary assets that do not have "commercial substance." Previously, APB No. 29 required that the accounting for an exchange of a productive asset for a similar productive asset or an equivalent interest in the same or similar productive asset should be based on the recorded amount of the asset relinquished. The provisions in SFAS No. 153 are effective for nonmonetary asset exchanges occurring in fiscal periods beginning after June 15, 2005. The Company does not expect the adoption of SFAS No. 153 to have a material impact on the Company's financial position or results of operations.

MARCH 31, 2005 AND 2004

NOTE 3- BRIDGE DEBENTURES RECEIVABLE

On August 23, 2004, the Company provided a \$700,000 bridge debenture to Texas Prototypes, which was convertible into common stock of Texas Prototypes. The debenture was secured by the assets of Texas Prototypes. In March 2005, the Company assigned its Texas Prototypes bridge debenture receivable to Cornell Capital Partners, L.P. ("Cornell") in exchange for the elimination of its \$700,000 note payable to Cornell. As of March 31, 2005, the principal balance of the bridge debenture receivable was \$0. (See Notes 2, 10 and 14)

On August 25, 2004, the Company provided a \$300,000 bridge debenture to Solution Technology International, Inc. ("STI") which was convertible into Common Stock of STI. The debenture is secured by the assets of STI. In March 2005, the Company assigned its STI bridge debenture receivable to Cornell in exchange for the elimination of its \$300,000 note payable to Cornell. As of March 31, 2005, the principal balance of the bridge debenture receivable was \$0. (See Notes 2, 10 and 14)

NOTE 4- INTANGIBLE ASSETS - VOICE ACQUISITIONS

The Company recorded an intangible asset for the cost of a customer list at \$134,484, which was acquired in June 2004. Amortization expense for the customer list was \$20,173 for the year ended March 31, 2005.

NOTE 5- FIXED ASSETS

Furniture and equipment are stated at cost. Depreciation is computed using the straight-line method over the estimated useful lives of the assets.

When assets are retired or otherwise disposed of, the costs and related accumulated depreciation are removed from the accounts, and any resulting gain or loss is recognized in income for the period. The cost of maintenance and repairs is charged to income as incurred; significant renewals and betterments are capitalized. Deduction is made for retirements resulting from renewals or betterments.

Property and equipment as of March 31, 2005 and 2004 were as follows:

	Estimated Useful Lives (Years)	2005	2004
Furniture and fixtures	7	\$ 387,861	\$ 9,379
Machinery and equipment	5	13,584,088	371,437
Leasehold improvements	7	263,452	2,141
Vehicles	5	287,733	77,296
Total		14,523,134	460,253
Less accumulated depreciation		1,330,078	323,755
Property and equipment, net		\$ 13,193,056	\$ 136,498

There was \$1,006,324 and \$18,926 charged to operations for depreciation expense for the years ended March 31, 2005 and 2004, respectively. The Company acquired \$11,953,544 and \$117,956 in fixed assets from its acquisitions during the years ended March 31, 2005 and 2004, respectively.

F-37

MOBILEPRO CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
MARCH 31, 2005 AND 2004

NOTE 6- LIABILITY FOR COMMON STOCK TO BE ISSUED

In August 2004, DFW Internet Services, Inc. acquired the customer base, corporate name and certain other assets of Web One, Inc., an Internet service provider in Kansas City, Missouri, for cash and common stock. The Company was obligated, subject to post closing adjustments, to issue 2,500,000 shares of common stock to the shareholders of Web One, Inc. as part of the acquisition price. The shares had a fair value of \$500,000 based on the then current stock price (\$0.20 per share) upon the final acceptance to the terms of the agreement. Certain provisions of the asset purchase agreement required subsequent adjustments to the purchase price. The adjustments were concluded in March 2005 and resulted in the Company paying the shareholders of Web One, Inc. \$160,000 in cash and 1,500,000 shares of common stock at a fair value of \$300,000. As a result, the Company recorded a \$40,000 reduction in the purchase price in connection with the satisfaction of this liability.

NOTE 7- NOTE PAYABLE - MARYLAND DEPARTMENT OF BUSINESS & ECONOMIC DEVELOPMENT

The Company entered into an agreement with the Maryland Department of Business and Economic Development ("DBED") in the amount of \$100,000, which represented DBED's investment in the Challenge Investment Program ("CIP Agreement"), dated March 29, 2001. The term of the CIP Agreement was to extend through June 30, 2011.

In March 2004, the Company reached an agreement with DBED to accept the Company's payment of \$7,000 in cash for a full release of terms relating to the CIP. The Company made this payment in April 2004.

NOTE 8- NOTES PAYABLE

The Company entered into a bank loan for \$5,000 to purchase equipment in October 2003. The note accrued interest at an annual rate of 9% per annum and was scheduled to mature on October 1, 2004. The balance was paid off in September 2004.

Other bank debt consisted of the following:

Note payable to bank at \$3,032 per month, including interest at prime plus 1% (6.75%) and maturing March 2006; secured by assets of World Trade Network, Inc.	\$ 36,964
Note payable to a bank for a vehicle in the amount of \$1,000 per month, including interest at 5.875%, secured by the CloseCall America, Inc. acquired vehicle.	37,745

NOTE 9- STANDBY EQUITY DISTRIBUTION AGREEMENT AND EQUITY LINE OF CREDIT

Equity Line of Credit

On May 31, 2002, the Company entered into an Equity Line of Credit arrangement with Cornell that provided, generally, that Cornell would purchase up to \$10 million of common stock over a two-year period, with the time and amount of such purchases, if any, at the Company's discretion. Cornell purchased the shares at a 9% discount to the prevailing market price of the common stock.

There were certain conditions applicable to the Company's ability to draw down on the \$10 million Equity Line of Credit including the filing and effectiveness of a registration statement covering the resale of all shares of common stock that may have been issued to Cornell under the \$10 million Equity Line of Credit and the Company's adherence with certain covenants. The registration statement became effective May 9, 2003.

In the event Cornell was to hold more than 9.9% of the then-outstanding common stock of the Company, the Company would have been unable to draw down on the \$10 million Equity Line of Credit.

In the year ended March 31, 2004, the Company drew \$4,785,000 from Cornell in accordance with the \$10 million Equity Line of Credit and advanced 134,517,453 shares of its common stock to the escrow agent in accordance with the terms of these loans. As of March 31, 2004, borrowings of \$1,800,000 were outstanding, and 118,351,914 shares of common stock were issued to Cornell in the year ended March 31, 2004.

In the year ended March 31, 2005, the Company drew \$2,000,000 from Cornell in accordance with the \$10 million Equity Line of Credit and advanced 10,000,000 shares of its common stock to the escrow agent in accordance with the terms of these loans. During the year ended March 31, 2005, 25,276,134 shares of common stock were issued to Cornell under the Equity Line of Credit.

Standby Equity Distribution Agreement

On May 13, 2004, the Company entered into a \$100 million SEDA arrangement with Cornell. The SEDA provides, generally, that Cornell will purchase up to \$100 million of common stock over a two-year period, with the time and amount of such purchases, if any, at the Company's discretion. Cornell will purchase the shares at a 2% discount to the prevailing market price of the common stock.

There are certain conditions applicable to the Company's ability to draw down on the SEDA including the filing and effectiveness of a registration statement covering the resale of all shares of common stock that may be issued to Cornell under the SEDA and the Company's adherence with certain covenants. The registration statement became effective May 27, 2004.

In the event that Cornell holds more than 9.9% of the then outstanding common stock of the Company, the Company will be unable to draw down on the \$100 million SEDA. As of March 31, 2005, Cornell did not hold more than 9.9% of the then outstanding common stock of the Company.

In the year ended March 31, 2005, the Company drew \$15,700,000 from Cornell in accordance with the \$100 million SEDA and advanced 65,000,000 shares of its common stock to the escrow agent in accordance with the terms of these loans. As of March 31, 2005, borrowings of \$6,500,000 were outstanding, and 52,172,192 shares of common stock were issued to Cornell during the year ended March 31, 2005 under the SEDA.

MOBILEPRO CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
MARCH 31, 2005 AND 2004

NOTE 10- LONG-TERM DEBT

Corporate

On August 23, 2004, the Company borrowed \$700,000 from Cornell. The amount was due in 180 days and carried an interest rate of 14%. The note was secured by the assets of the Company. The proceeds were advanced to Texas Prototypes by the Company in anticipation of Texas Prototypes' initial public offering. In March 2005, the Company assigned its Texas Prototypes bridge debenture receivable to Cornell in exchange for the elimination of this note. (See Notes 2, 3 and 14)

On August 25, 2004, the Company borrowed \$300,000 from Cornell. The amount was due in 180 days and carried an interest rate of 14%. The note was secured by the assets of the Company. The proceeds were advanced to Solution Technology International, Inc. ("STI") by the Company in anticipation of STI's initial public offering. In March 2005, the Company assigned its STI bridge debenture receivable to Cornell in exchange for eliminating this note. (See Notes 2, 3 and 14)

On August 27, 2004, the Company borrowed \$8,500,000 from Cornell. The amount was due in one year and carries an interest rate of 12%. The note is secured by the assets of the Company and was utilized for the cash portion of the acquisition price of CloseCall. In December 2004, the Company converted \$2,200,000 of the note balance into debt under the \$100 million SEDA. In February 2005, the Company transferred \$5,000,000 of the note balance into debt under the \$100 million SEDA. As of March 31, 2005, the remaining principal balance of the note payable was \$1,300,000 and the accrued interest on this note for the year ended March 31, 2005, was \$198,838. The Company has classified the note and the accrued interest as short-term liabilities. Subsequent to year ended March 31, 2005, the \$1,300,000 remaining amount due was transferred into debt under the \$100 million SEDA. (See Note 20)

On September 22, 2004, the Company borrowed \$3,700,000 from Cornell. The amount was due in one year and carries an interest rate of 12%. The note is secured by the assets of the Company and was utilized for the acquisition of The River Internet Access Co. and World Trade Network, Inc. As of March 31, 2005, the remaining principal balance of the note payable was \$3,700,000 and the accrued interest on this note for the year ended March 31, 2005, was \$85,151. The Company has classified the note and the accrued interest as short-term liabilities.

On November 15, 2004, the Company acquired \$15,200,000 in bridge financing from Airlie Opportunity Master Fund ("Airlie"), a Greenwich, Connecticut-based institutional investor. The Company repaid \$2,200,000 on November 30, 2004, and the remaining \$13,000,000 note is payable on November 15, 2005 and carries an interest rate of 23%. The funds were utilized to complete the acquisition of 95.2% of the stock of Davel. as described in Note 1. The note is secured by all of the stock of Davel that was acquired by the Company on November 15, 2004, plus 100% of the Davel debt instruments that were acquired in the transaction. In addition, the note is secured by the assets of the Company, as subordinated by the pre-existing first lien of Cornell. As of March 31, 2005, the remaining principal balance of the note payable was \$13,000,000 and the accrued interest payable on this note was \$641,225. The Company has classified the note and the accrued interest as short-term liabilities. On May 13, 2005, the Company repaid this loan with proceeds from a financing completed on May 13, 2005. (See Note 20)

Internet Services Acquisitions

On June 21, 2004, DFW Internet Services, Inc. entered into an asset purchase agreement with Crescent Communications, Inc. The agreement included a promissory note payable to Crescent Communications, Inc. in the

amount of \$250,000, with simple interest accruing at 6% per annum, and monthly payments in the amount of \$21,516 beginning on July 21, 2004. The note matures on June 21, 2005, and the monthly payments will apply first to interest with the remaining portion of the payment reducing the principal balance. The payments commenced on July 21, 2004, and the note outstanding balance on March 31, 2005, was \$126,791. The interest on these notes for the year ended March 31, 2005, was \$5,887, and accrued interest on the notes at March 31, 2005 was \$1,918.

DFW Internet Services, Inc. entered into four (4) promissory notes with the prior owners of Ticon.net, Inc. for an aggregate principal amount of \$250,000 plus interest computed at 6% per annum. The notes were made as of July 14, 2004, and matured on November 10, 2004. The note payments scheduled for November 10, 2004 were not made due to certain provisions of the stock purchase agreement requiring subsequent adjustments to the purchase price and outstanding notes.

Negotiations between the parties on the amount of the note adjustments were not concluded as of March 31, 2005. The adjustments mentioned above notwithstanding, as of March 31, 2005, the principal balance on the notes was \$250,000, and accrued interest on the notes for the year ended March 31, 2005, was \$10,685. The total outstanding note balance plus interest are classified as short-term liabilities.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
MARCH 31, 2005 AND 2004

NOTE 10- LONG-TERM DEBT (CONTINUED)

Internet Services Acquisitions (continued)

DFW Internet Services, Inc. entered into four (4) promissory notes with the prior owners of Internet Express, Inc. for an aggregate principal amount of \$300,000. The notes were made as of March 1, 2004 and mature March 1, 2006. DFW Internet Services, Inc. has agreed to pay a monthly amount of \$5,000 inclusive of interest towards the principal balance of \$300,000 with the remaining \$180,000 plus accrued interest to be paid by the maturity date. Interest on these notes will accrue at an annual rate of 6% per annum. The monthly payments will first be applied to interest and the remaining portion will be a reduction of the principal balance. The payments commenced on April 1, 2004. The balance at March 31, 2005 and 2004 on these promissory notes is \$221,788 and \$300,000, respectively. The interest expense on these notes for the year ended March 31, 2005 was \$16,890, of which \$1,800 was accrued at March 31, 2005. The total outstanding note balance plus interest are classified as short-term liabilities.

DFW Internet Services, Inc. entered into two (2) promissory notes with the prior owner of Clover Computer Corporation for an aggregate note principal amount of \$542,264. The first note matures on July 6, 2005, and the second is a convertible note that matures on July 6, 2006. DFW Internet Services, Inc. agreed to a quarterly debt service inclusive of interest at a simple rate of 7% per annum on the first note, with the first quarterly payment of \$70,774 to be made on October 6, 2004, and the last payment of the same amount will be due on July 6, 2005. The three payments scheduled for October 6, 2004, January 6, 2005, and April 6, 2005 were not made due to certain provisions of the stock purchase agreement requiring subsequent adjustments to the purchase price and outstanding notes. Negotiations between the parties on the amount of the note adjustments have not concluded as of March 31, 2005. The adjustments mentioned above notwithstanding, the balance on March 31, 2005, on the first promissory note was \$271,132, and accrued interest on this note for the year ended March 31, 2005, was \$13,935. The total outstanding note balance plus interest are classified as short-term liabilities. The second note is a convertible note in the amount of \$271,132 that matures on July 6, 2006, with simple interest computed at an annual rate of 4%, and a balloon payment of principal and interest at maturity. The principal balance on the note for the year ended March 31, 2005, was \$271,132 with accrued interest of \$7,963. The total outstanding balance and accrued interest were classified as long-term liabilities. At any time prior to maturity, the note holder has the right, at the holder's option, to convert such outstanding balance of this note, in whole or in part, into common stock at a conversion price of \$0.20 per share.

DFW Internet Services, Inc. entered into two (2) promissory notes with the prior owner of World Trade Network, Inc. for an aggregate principal amount of \$500,000. Due to certain provisions of the stock purchase agreement requiring subsequent adjustments to the purchase price, both of these notes cancelled in their entirety on February 15, 2005 along with any accrued interest pursuant to the mutual agreement of the parties.

DFW Internet Services, Inc. entered into thirty (30) promissory notes with the prior owners of The River Internet Access Co. for an aggregate principal amount of \$776,472. The thirty (30) notes were made as of September 16, 2004, and the first set of fifteen (15) notes matures on September 15, 2005, and the second set of fifteen (15) notes are convertible notes that mature on March 15, 2006. DFW Internet Services, Inc. has agreed to make quarterly debt service payments inclusive of interest at a simple rate of 6% per annum on the first fifteen notes. The aggregate principal balances on March 31, 2005, on the first set of fifteen promissory notes was \$194,122, and accrued interest on these notes as of March 31, 2005, was \$511. The total outstanding principal balance and accrued interest are classified as short-term liabilities. The second set of fifteen notes are convertible notes in the aggregate amount of \$388,236 that mature on March 16, 2006, with simple interest computed at an annual rate of 3%, and a balloon payment of principal and interest at maturity. The aggregate principal balance on the notes as of March 31, 2005 was \$388,236 with accrued interest of \$6,254. The aggregate outstanding note principal balance and the accrued interest at

March 31, 2005 were classified as long-term liabilities. At any time prior to maturity, the convertible note holders have the right, at the holders' option, to convert such outstanding balances of their notes, in whole or in part, into common stock at a conversion price of \$0.20 per share.

The Company and DFW Internet Services, Inc. and the former owners of DFW Internet Services, Inc. entered into Put Agreements as of January 19, 2004. The Put Agreements gave the former owners of DFW Internet Services, Inc. the right to have the Company repurchase all, but not less than all, of the common stock issued to the former owners. The aggregate purchase price under the Put Agreement was \$250,000. The Company classified this liability as a long-term liability on its consolidated financial statements in accordance with SFAS 150. In March 2005, the Put Agreement was terminated in its entirety, and the \$250,000 liability was eliminated

NOTE 10- LONG-TERM DEBT (CONTINUED)

Voice Services Acquisitions

The Company acquired US1 Telecommunications, Inc. and escrowed \$75,000 cash, which was due and payable to the former owner within 5 months of the closing date (June 29, 2004), provided the subsidiary performed as indicated in the agreement. The note bore interest at a rate of 5% and was due on December 1, 2004 in the amount of \$75,940. The final payment due was subject to certain provisions of the agreement requiring subsequent adjustments to the purchase price and outstanding note. The payment net of the adjustments mentioned above was made in February 2005.

The Company and the former owners of Affinity Telecom entered into Put Agreements as of September 19, 2004. The Put Agreements gave the former owners of Affinity Telecom the right to have the Company repurchase all, but not less than all, of the common stock issued to the former owners. The aggregate purchase price under the Put Agreement was \$995,000. The Company previously classified this as a short-term liability on its September 30, 2004 condensed consolidated financial statements in accordance with SFAS 150. The Agreement and Plan of Merger by and between the Company and Affinity Telecom was amended as of December 2004 to settle certain disputes regarding the financial condition of Affinity Telecom. According to the terms of the Amendment, the Put Agreement was terminated in its entirety, and the \$995,000 liability was eliminated.

The Company maintained an escrow payable in the amount of \$140,000 related to the Agreement and Plan of Merger that was amended as of December 2004 to settle certain disputes regarding the financial condition of Affinity Telecom. According to the terms of the Amendment, the escrow payable was terminated in its entirety.

The Company also recorded a payable in the amount of \$50,000 representing additional consideration applicable to accounts receivable of Affinity Telecom that were outstanding at July 30, 2004. Pursuant to the terms of the Amendment discussed above, the \$50,000 payable was terminated.

The Company issued two (2) notes to the prior owners of Affinity Telecom, a \$300,000 non-interest bearing promissory note and a \$750,000 convertible promissory note. Pursuant to the terms of the Amendment discussed above, the two (2) notes with the prior owners were terminated in their entirety.

Vehicles

DFW Internet Services, Inc. entered into a note for the purchase of a company vehicle in August 2004. The note is a three-year note that matures in April 2007 with a balloon payment of approximately \$45,000. The note carries an annual interest rate of 7.25% and the payments including interest are \$979.49 per month. The maturities over the next two years and in the aggregate are expected to be as follows:

<u>Years Ended March</u>		
<u>31,</u>		
2006	\$	11,754
2007		53,465
Total	\$	65,219

Leases

In 2003, the Company leased certain equipment under capital lease arrangements. Property and equipment includes the following amount for leases that have been capitalized at March 31, 2005:

Computer and mailing equipment	\$ 43,812
Less - accumulated amortization	(10,728)
	\$ 33,084

Amortization of leased assets is included in depreciation and amortization expense.

The Company also leases a building and various equipment under non-cancelable operating leases. The building lease expires in 2007 and contains options to renew for additional terms of two years at the prevailing market rate.

NOTE 11- STOCKHOLDERS' EQUITY (DEFICIT)

Common Stock

As of March 31, 2005, the Company had 600,000,000 shares of common stock authorized and 355,918,011 issued and outstanding.

The Company had 1,000,000 shares of common stock authorized under its 2001 Equity Performance Plan. The Board of Directors subsequently authorized an increase in the shares available under the 2001 Equity Performance Plan from 1,000,000 to 6,000,000.

The following describes the common stock transactions for the year ended March 31, 2004.

On June 19, 2003, the Company issued 350,000 shares of common stock as compensation at a fair value of \$8,750.

On July 7, 2003, pursuant to a memorandum of understanding between the Company and GBH Telecom, LLC, the Company issued 3,500,000 shares of common stock valued at \$68,250. As of September 30, 2003, the agreement with GBH Telecom, LLC was terminated.

Between May 2003 and August 2003, the Company issued 16,130,887 shares of common stock in conversion of \$165,000 of convertible debentures and accrued interest.

In October 2003, the Company issued 391,304 shares of common stock in conversion of \$9,000 in advances that were funded to the Company.

In January 2004, the Company issued 16,666,667 shares of common stock which converted \$180,000 in officer advances.

In March 2004, the Company issued 18,761,726 shares of common stock in connection with the acquisition of the common stock of DFW Internet Services, Inc. pursuant to a Stock Purchase Agreement dated January 19, 2004. The issued shares were valued at a fair value of \$500,000, based on the average 20-day closing price (\$0.02665 per share) prior to January 19, 2004. The distribution of such value amount included an allocation of \$250,000 to the terminated put agreement.

During the year ended March 31, 2004, the Company issued 134,517,453 shares of common stock to the escrow agent for use in converting amounts borrowed under the \$10 million Equity Line of Credit. The Company also converted \$3,145,000 of debt into 118,351,914 shares of common stock and recognized \$311,757 of amortization of discount and interest on debt conversions relating to the \$10 million Equity Line of Credit.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
MARCH 31, 2005 AND 2004

NOTE 11- STOCKHOLDERS' EQUITY (DEFICIT) (CONTINUED)

Common Stock (continued)

The following describes the common stock transactions for the year ended March 31, 2005.

In May 2004, the Company issued 2,000,000 shares of common stock under a settlement agreement with a former executive valued at \$90,000, and issued 421,037 shares of common stock to another former executive for \$23,999 cash pursuant to the exercise of options under the Company's 2001 Equity Performance Plan.

In June 2004, the Company issued 8,000,000 shares of common stock in payment of the fees associated with the \$100 million Standby Equity Distribution Agreement that was valued at \$1,760,000. This cost was reflected as a deferred financing fee on the consolidated balance sheet.

In August 2004, the Company issued 100,000 shares of common stock to an agency as compensation for personnel recruiting services.

In August 2004, the Company issued 2,000,000 shares in conjunction with conversion of warrants by a former executive. The exercise price was \$0.029 per share and was paid in cash.

In August 2004, the Company issued 878,816 shares of common stock to the former owners of ShreveNet, Inc. as partial consideration for the acquisition of ShreveNet, Inc. The issued shares were valued at a fair value of \$190,000 based on the average 20-day closing price (\$0.2162 per share) prior to June 3, 2004.

In August 2004, the Company issued 25,000 shares of common stock in conjunction with exercise of stock options by a former employee under the Company's 2001 Equity Performance Plan. The exercise price was \$0.10 per share and was paid in cash.

In September 2004, the Company issued 5,000,000 shares of common stock to the former owners of Affinity Telecom as partial consideration for the acquisition of Affinity Telecom by the Company. The issued shares were valued at a fair value of \$1,000,000 based upon the date of agreement and the terms of the deal. The distribution of such value amount included an allocation of \$995,000 to the terminated put agreement.

In November 2004, the Company issued 39,999,999 shares of common stock in connection with the acquisition of CloseCall America, Inc. that was completed in October 2004. The 39,999,999 shares were recorded at a fair value of \$10,000,000.

In February 2005, the Company issued 500,000 shares of common stock in conjunction with conversion of warrants for previous consulting services. The exercise price was \$0.032 per share.

In March 2005, the Company issued 1,500,000 shares of common stock in connection with the acquisition of Web One, Inc. that was completed in August 2004. The 1,500,000 shares were recorded at a fair value of \$300,000.

During the year ended March 31, 2005, the Company issued 10,000,000 shares of common stock to the escrow agent for use in the conversion of borrowings made under the \$10 million Equity Line of Credit. The Company converted \$3,800,000 of debt into 25,276,134 shares of common stock and recorded \$256,691 of amortization of discount on debt conversions relating to the \$10 million Standby Equity Distribution Agreement.

During the year ended March 31, 2005, the Company issued 65,000,000 shares of common stock to the escrow agent for use in the conversion of borrowings made under the \$100 million Standby Equity Distribution Agreement. The Company also converted \$9,200,000 of debt into 52,172,192 shares of common stock. The Company also converted \$13,907 of interest into 81,355 shares of common stock. The Company recognized \$118,258 and \$201 of amortization of discount on debt and interest conversions, respectively, relating to the \$100 million Standby Equity Distribution Agreement.

Preferred Stock

The Company has 5,035,425 shares of preferred stock authorized of which 35,378 shares were issued and outstanding as of March 31, 2005 and 2004. There were no issuances of preferred stock during the years ended March 31, 2005 and 2004. The issued and outstanding preferred shares are convertible into 35,378 shares of common stock.

MOBILEPRO CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
MARCH 31, 2005 AND 2004

NOTE 11- STOCKHOLDERS' EQUITY (DEFICIT) (CONTINUED)

Stock Options and Warrants

The Company has authorized 1,000,000 shares of common stock for the grant of stock options to employees under the 2001 Equity Performance Plan. The Board of Directors subsequently authorized an increase in the number of shares available under the 2001 Equity Performance Plan from 1,000,000 to 6,000,000. In addition, the Company, from time to time, has issued warrants to key personnel pursuant to specific authorization of the board of directors.

SFAS No. 123 encourages adoption of a fair-value-based method for valuing the cost of stock-based compensation. It allows companies to continue to use the intrinsic-value method for options granted to employees and disclose pro forma net loss. Alternatively, it allows the use of the Black Scholes option pricing model, under which the total value (not intrinsic value) of the stock options granted is charged to operations.

The following table summarizes the activity of the Company's stock option plan for the year ended March 31, 2005:

	Number of Options	Weighted-Average Exercise Price
Outstanding - beginning of period	4,171,037	\$.0482
Granted	5,225,000	.1748
Exercised	(446,037)	.0594
Cancelled	(7,225,000)	.1047
Outstanding - end of period	1,725,000	.1920
Exercisable - end of period	722,917	\$.1635

The following table summarizes the activity of the Company's stock option plan for the year ended March 31, 2004:

	Number of Options	Weighted-Average Exercise Price
Outstanding - beginning of period	521,037	\$.123
Granted	4,000,000	.036
Exercised	(350,000)	.02
Cancelled	-	-
Outstanding - end of period	4,171,037	.0482
Exercisable - end of period	2,454,787	\$.0458

For disclosure purposes, the fair value of each stock option granted is estimated on the date of grant using the Black-Scholes option-pricing model, which approximates fair value, with the following weighted-average

assumptions used for stock options granted in 2005 and 2004; no annual dividends, volatility of 60%, risk-free interest rate of 3.00%, and expected life of 9.58 years.

MOBILEPRO CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
MARCH 31, 2005 AND 2004

NOTE 12- PATENTS

As of March 31, 2005, the Company had filed a total of eight patent applications with the U.S. Patent and Trademark Office (PTO) in the areas of "Smart Antenna" technology and RF Transceiver Chip Design for "Low Noise Amplifier for wireless communications". As of March 31, 2005, the Company had been granted approval of five patents and three patent applications are still pending approval.

NOTE 13- CONTINGENCIES

Certain mitigating events have occurred during the year ended March 31, 2005 and 2004, leading management to conclude that the Company should remove the going concern uncertainty.

These mitigating events included management receiving a commitment from Cornell to provide the Company with up to \$100 million in SEDA financing under certain conditions and receiving funding in the past fiscal year from Cornell under the prior \$10 million Equity Line of Credit and the existing \$100 million SEDA. In addition, the Company completed two acquisitions in its fourth fiscal quarter ending March 31, 2004 and completed twelve acquisitions in its year ending March 31, 2005 of Internet and voice services companies. The acquired Internet and voice service providers are expected to generate revenues and to provide cash flow from operations.

The acquisitions continue to expand the Company's service area and provide additional products and services to the existing and future customer base. The Company continues to explore other transactions that will fit its business model and assist the Company in executing its business plan.

NOTE 14- COMMITMENTS

On April 15, 2004, Mr. Jay O. Wright extended his employment as the Company's President and Chief Executive Officer. Mr. Wright's employment is for two years under the terms of his Executive Employment Agreement with the Company.

The Company has entered into employment agreements with other key members of management. Compensation earned by these employees has been properly reflected in the consolidated statements of operations for the years ended March 31, 2005 and 2004, respectively.

In May 2004, the Company announced that it had formed a strategic alliance with Massively Parallel Technologies, Inc. (MPT), a privately owned corporation located in Louisville, Colorado. Under the alliance, MPT will utilize the bandwidth provisioning capability of the Company in connection with MPT's high performance computer cluster platforms and the Company will become a reseller of the MPT platform.

In June 2004, the Company signed a Development Agreement with Information and Communications University (ICU), a Korean institution with leading edge development experience in ZigBee RF design, to jointly develop the Company's ZigBee RF transceiver chip. Under the Agreement, the Company retains 100% ownership of all intellectual property rights.

In June 2004, the Company signed a letter of intent to acquire CommSouth Companies, Inc. a competitive local exchange carrier (CLEC) and long distance and Internet service provider based in Dallas, Texas. As of March 31, 2005, the Company is not actively pursuing the completion of this acquisition.

In June 2004, the Company entered into a Business Development Agreement with Solution Technology International, Inc., a Frederick, Maryland-based software company (“STI”), whereby the Company provided services to STI in exchange for a 5% ownership in the company. The value of the investment is \$150,000 and is reflected in the consolidated balance sheet at March 31, 2005.

In July 2004 the Company signed a letter of intent to acquire American Fiber Network, Inc., (“AFN”) a licensed Competitive Local Exchange Carrier (CLEC) and long distance provider based in Kansas City, Missouri. AFN is licensed to provide local, long distance and Internet service in 48 contiguous U.S. states. The Company is actively pursuing this acquisition.

In August 2004, the Company signed a letter of intent to acquire WorldNet Communications, Inc., a Leesville, Louisiana-based Internet service provider. As of March 31, 2005, the Company is not actively pursuing the completion of this acquisition.

MOBILEPRO CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
MARCH 31, 2005 AND 2004

NOTE 14- COMMITMENTS (CONTINUED)

In August 2004, the Company announced its intention to issue a property dividend of 3,073,113 shares of common stock of STI. The Company's stockholders are expected to receive one share of registered (i.e. "free-trading") STI stock for approximately every 93 shares of the Company stock that they own, based on the existing shares outstanding and certain warrants. The Company's Board of Directors set September 15, 2004 as the record date for the stock dividend. In March 2005, STI withdrew its pending registration statement from the United States Securities and Exchange Commission. STI is contemplating other options to become a publicly traded company. The Company intends to pursue issuance of the property dividend upon STI obtaining its public listing. At this time, no date has been established for such listing.

In August 2004, the Company announced that it signed a memorandum of understanding with an Israeli technology company, ActivePoint Ltd., to jointly pursue a working relationship covering a number of potential technology and communications projects. The companies have agreed that a future working relationship could include select opportunities involving ActivePoint's search engine and the Company's Internet services, voice services, wireless services, and other telecommunications and IT initiatives within North America.

In August 2004, the Company signed a business development agreement with Texas Prototypes, Inc., an electronic prototype manufacturing company, to jointly pursue a working relationship covering a number of potential technology projects and business development initiatives. The Company received a 5% ownership in the company as consideration for services under the agreement. The value of the investment is \$300,000 and is reflected in the consolidated balance sheet at March 31, 2005.

In September 2004, the Company announced a letter of intent to acquire two Bridgeport, Texas phone companies, Affordaphone, Inc. and Basicphone, Inc. As of March 31, 2005, the Company is not actively pursuing the completion of these acquisitions.

In September 2004, the Company announced it had signed a letter of intent to acquire North Country Internet Access, Inc., an internet services provider based in Berlin, New Hampshire, which offers both analog and digital dial-up, service, Web hosting and design services to residential and small business customers in northern New Hampshire. As of March 31, 2005, the Company is not actively pursuing the completion of this acquisition.

In September 2004, the Company formed a strategic alliance with Global Triad Incorporated, a Ft. Lauderdale, Florida-based software and wireless broadband company. Pursuant to the arrangement, the companies will look to jointly pursue select wireless projects and work together utilizing Global Triad's compression software.

In October 2004, the Company completed the design of its first ZigBee wireless semiconductor chip. The 2.4 GHz chip design for the so-called "RF layer," or "physical layer," is now being converted into a prototype chip at a facility in Taiwan. In addition the Company announced it had begun design on a 900 MHz ZigBee chip.

In March 2005, the Company announced that it has been awarded a five-year contract with the General Services Administration (GSA) to sell certain electronic commerce and telecommunications services to the federal government, effective through February 24, 2010.

In connection with the November 2004 acquisition of the senior secured debt of Davel, the Company agreed to purchase the remaining issued and outstanding shares (approximately 4.8%) held by the minority stockholders (the

“Minority Stockholders”) within 180 days of the closing date of the Davel acquisition. The purchase price to be offered to the Minority Stockholders was to be an amount of not less than \$0.015 per share, which, at the discretion of the Company, could be paid in cash or common stock of Mobilepro. Subsequent to year-end, Davel paid the cash purchase price of \$450,000 to the Minority Stockholders and the transaction was completed in May 2005.

NOTE 15- IMPAIRMENT OF GOODWILL

In connection with the acquisition of certain Internet and voice services companies, the Company recorded goodwill in the amounts of \$32,785,618 and \$812,003 during the years ended March 31, 2005 and 2004, respectively. The Company performs its annual impairment test for goodwill at the end of each fiscal year and determined that at both March 31, 2005 and 2004 that there was no impairment of the goodwill.

MOBILEPRO CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
MARCH 31, 2005 AND 2004

NOTE 16- LITIGATION/ LEGAL PROCEEDINGS

As of March 31, 2005, the Company was party to the following material legal proceedings.

At the time that the Company acquired 95.2 % of the stock of Davel, Davel was a defendant in a civil lawsuit captioned Gammino v. Cellco Partnership d/b/a Verizon Wireless, et al. , C.A. No. 04-4303 filed in the United States District Court for the Eastern District of Pennsylvania. The plaintiff claims that Davel and other defendants allegedly infringed its patent involving the prevention of fraudulent long-distance telephone calls and is seeking damages in connection with the alleged infringement. Davel continues to review and investigate the allegations set forth in the complaint, continues to assess the validity of the Gammino Patents and is in the process of determining whether the technology purchased by Davel from third parties infringes upon the Gammino Patents. According to the terms of the Davel acquisition agreement, the former secured lenders, subject to certain limitations, have agreed to reimburse the Company for the litigation cost and any losses resulting from the Gammino lawsuit. The former secured lenders have agreed to fund such costs from future regulatory receipts that were assigned to them by Davel. Any such regulatory receipts will be deposited into a third-party escrow account and will be used to reimburse the Company for costs incurred. The secured lenders are not required to fund the escrow account or otherwise reimburse the Company for amounts, if any, in excess of actual regulatory receipts collected. Any amount remaining in the escrow account at the conclusion of the litigation is to be returned to the former secured lenders. Subsequent to March 31, 2005, the Company received significant regulatory receipts that are being held in escrow. These funds can be used to reimburse the Company for costs incurred in defending or settling the litigation matter. The case is in the discovery phase of the litigation.

On or about October 15, 2002, Davel was served with a complaint, in an action captioned Sylvia Sanchez et al. v. Leasing Associates Service, Inc., Armored Transport Texas, Inc., and Telaleasing Enterprises, Inc. . Plaintiffs claim that Davel was grossly negligent or acted with malice and such actions proximately caused the death of Thomas Sanchez, Jr., a former Davel employee. On or about January 8, 2002, the Plaintiffs filed their first amended complaint adding a new defendant LAI Trust and on or about January 21, 2002 filed their second amended complaint adding new defendants Davel Communications, Inc., DavelTel, Inc. and Peoples Telephone Company, all subsidiaries of Davel. The original complaint, as well as the first and second amended complaints, was forwarded to Davel's insurance carrier for action; however, Davel's insurance carrier denied coverage based upon the workers compensation coverage exclusion contained in the insurance policy. The Company answered the complaint on or about January 30, 2003. The parties are currently engaged in the discovery process. The trial originally scheduled for June 2004 was continued to November 2004; however, the trial has been delayed further by motion of the plaintiff and approval of the court. It is anticipated that the trial will be scheduled for November 2005. While Davel believes that it has meritorious defenses to the allegations contained in the second amended complaint and intends to vigorously defend itself, Davel cannot at this time predict its likelihood of success on the merits.

The Company terminated Kevin Kuykendall, former President of the Company's voice division, for cause under the terms of his Executive Employment Agreement, effective Wednesday, December 29, 2004. On January 26, 2005, Mobilepro was served with notice that a complaint had been filed with the U.S. Department of Labor by Mr. Kuykendall alleging discriminatory employment practices. Mr. Kuykendall has alleged that he was terminated on December 29, 2004 in reprisal for challenging the accuracy of a qualified financial goal of Davel Communications, Inc. Mr. Kuykendall sought back pay, plus interest, and reinstatement or the future pay for the term of his contract, reimbursement of insurance premiums borne by Mr. Kuykendall during the period of his termination, payment of outstanding bonuses to which he believes he is entitled, compensatory damages for emotional distress, pain and suffering, punitive damages, costs, and reasonable attorneys' fees. In March 2005, the Company received from the U.S. Department of Labor a favorable ruling in the Kuykendall matter. The U.S. Department of Labor found no reasonable

cause to support the former employee's complaint for improper termination and the U.S. Department of Labor concluded that Mr. Kuykendall failed to demonstrate that his alleged assertions were a contributing factor in his discharge for cause. Mr. Kuykendall did not appeal the U.S. Department of Labor ruling and the case was subsequently closed. In May 2005, the Company and Mr. Kuykendall dropped all complaints and legal proceedings against each other and signed a confidential settlement agreement and mutual general release.

NOTE 17- INCOME TAXES

The provision for income taxes results in an effective tax rate that differs from the Federal statutory tax rate as follows for the years ended March 31, 2005 and 2004:

	Years Ended March 31,	
	2005	2004
Statutory federal income tax rate	(35.0)%	(35.0)%
State income taxes, net of federal benefit	(3.0)	(3.0)
Permanent differences	0.2	0.1
Tax credits	-	-
Change in valuation allowance	37.8	37.9
Effective tax rate	-%	-%

The components of the Company's net deferred tax asset are as follows:

	March 31,	
	2005	2004
Net operating loss carryforwards	\$ 6,033,340	\$ 3,995,340
Depreciation	(50,051)	(39,192)
Valuation allowance	(5,983,288)	(3,956,147)
Total net deferred tax asset	\$ -	\$ -

At March 31, 2005, the Company had a valuation allowance of \$5,983,288 which fully offsets the net deferred tax asset. The Company calculated the valuation allowance in accordance with the provisions of SFAS No. 109, "Accounting for Income Taxes", which requires an assessment of both positive and negative evidence when measuring the need for a valuation allowance. Recent evidence, such as operating results during recent years, is given more weight when assessing whether the level of future profitability needed to recognize the deferred assets will be achieved. The Company's cumulative loss in since inception represents sufficient negative evidence to require a full valuation allowance under the provisions of SFAS No. 109. The Company intends to maintain a full valuation allowance until sufficient positive evidence exists to support the reversal of any portion of the allowance.

The Company currently has net operating loss carryforwards to offset future taxable income of approximately \$15.9 million at March 31, 2005. These net operating loss carryforwards expire through 2025. When there has been a change in an entity's ownership, utilization of net operating loss carryforwards may be limited. Because of the changes in the ownership of prior acquisitions by the Company, the use of the acquired net operating losses will be limited and may not be available to offset future taxable income.

MOBILEPRO CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
MARCH 31, 2005 AND 2004

NOTE 18- DIAL AROUND COMPENSATION

A dial-around call occurs when a non-coin call is placed from a public pay telephone of the Company, which utilizes any interexchange carrier ("IXC") other than the presubscribed carrier (the Company's dedicated provider of long distance and operator assisted calls). The Company receives revenues from such carriers recording them as dial-around compensation based upon the per-call rate in effect pursuant to orders issued by the Federal Communications Commission (the "FCC") under section 276 of the Telecommunications Act of 1996 ("Section 276") and the estimated number of dial-around calls placed from each pay telephone during each month. Prior to 2001, the Company recorded revenue from dial-around compensation based upon the rate of \$0.24 per call (\$0.238 per call prior to April 21, 1999) and 131 monthly calls per phone, which represented the monthly averages for calls from a pay telephone used by the FCC in initially determining the amount of dial-around compensation to which payphone service providers ("PSP") were entitled. The averages were utilized until such time as the actual number of dial-around calls could be tracked on a per pay telephone basis. On August 12, 2004, the FCC released an order to increase the dial-around compensation rate from \$0.24 to \$0.494 per call (the "2004 Order"). The new rate became effective September 27, 2004, 30 days after publication of the 2004 Order in the Federal Register, and may be subject to appeal by IXCs or other parties. Although the 2004 Order was effective for the fourth quarter of 2004, the Company did not receive payments under the 2004 Order until April 2005.

As a result of the orders issued by the FCC regarding dial-around compensation and the resulting litigation, the amount of revenues that payphone service providers ("PSPs") were entitled to receive and the amounts that PSPs actually received have differed. In general, there have been underpayments of dial-around compensation from IXCs and other carriers from November 6, 1996 through October 6, 1997 (the "Interim Period") and overpayments to PSPs, including the Company, from October 7, 1997 through April 20, 1999 (the "Intermediate Period"). On January 31, 2002, the FCC released its Fourth Order on Reconsideration and Order on Remand (the "2002 Payphone Order") that provided a partial decision on how retroactive dial-around compensation adjustments for the Interim Period and Intermediate Period may apply.

On October 23, 2002, the FCC released its Fifth Order on Reconsideration and Order on Remand (the "Interim Order"), which resolved all the remaining issues surrounding the Interim Period and the Intermediate Period true-up and specifically addressed how flat rate monthly per-phone compensation owed to PSPs would be allocated among the IXCs. The Interim Order also resolved how certain offsets to such payments would be handled and a host of other issues raised by parties in their remaining FCC challenges to the 2002 Payphone Order and prior orders issued by the FCC regarding dial-around compensation. In the Interim Order, the FCC ordered a true up for the Interim Period and increased the adjusted monthly rate to \$35.22 per payphone per month, to compensate for the three-month payment delay inherent in the dial-around payment system. The new rate of \$35.22 per payphone per month is a composite rate, allocated among approximately five hundred carriers based on their estimated dial-around traffic during the Interim Period. The FCC also ordered a true-up requiring the PSPs, including the Company, to refund an amount equal to \$.046 (the difference between the old \$0.284 rate and the subsequently revised \$0.238 rate) to each carrier that compensated the PSP on a per-call basis during the Intermediate Period. Interest on additional payments and refunds is to be computed from the original payment date at the IRS prescribed rate applicable to late tax payments. The FCC further ruled that a carrier claiming a refund from a PSP for the Intermediate Period must first offset the amount claimed against any additional payment due to the PSP from that carrier. Finally, the Interim Order provided that any net claimed refund amount owing to carriers cannot be offset against future dial-around payments without (1) prior notification and an opportunity to contest the claimed amount in good faith (only uncontested amounts may be withheld); and (2) providing PSPs an opportunity to "schedule" payments over a reasonable period of time.

In January 2005, certain carriers offset approximately \$0.5 million from their current dial-around compensation payments. In April 2005, approximately \$0.7 million was offset from current dial-around compensation payments further reducing this liability. The remaining amount outstanding will be paid or deducted from future quarterly payments of dial-around compensation to be received from the applicable dial-around carriers.

For the fiscal year ended March 31, 2005, Davel received \$0.4 million in payments from carriers under the Interim Order and recorded the dial-around compensation adjustments in the accompanying consolidated statements of operations. Although Davel is entitled to receive a substantial amount of additional dial-around compensation pursuant to the Interim Order, such amounts, subject to certain limitations, were assigned to Davel's former secured lenders in exchange for a reduction in Davel's senior secured debt prior to the acquisition of such debt by the Company. Regulatory actions and market factors, often outside Davel's control, could significantly affect Davel's future dial-around compensation revenues. These factors include (i) the possibility of administrative proceedings or litigation seeking to modify the dial-around compensation rate, and (ii) ongoing technical or other difficulties in the responsible carriers' ability and willingness to properly track or pay for dial-around calls actually delivered to them.

MARCH 31, 2005 AND 2004

NOTE 19- SEGMENT INFORMATION

The Company's reportable operating segments include Technology, Voice Services, Internet Services and Corporate. The Company allocates cost of revenues and direct operating expenses to these segments. The accounting policies of the segments are the same as those described in the summary of significant accounting policies. The Company evaluates the performance of each segment based on the amount of net income or loss, as presented below. Corporate expenses are not allocated to the segments.

Operating segment data for the years ended March 31, 2005 and 2004 are as follows:

For the year ended March 31, 2005:

	Corporate	Wireless Networks	Voice Services	Internet Services	Total
Revenues	\$ 615,000	\$ -	\$ 32,009,084	\$ 13,884,060	\$ 46,508,144

NOTE 20- SUBSEQUENT EVENTS

On January 26, 2005, Mobilepro was served with notice that a complaint had been filed with the U.S. Department of Labor by Mr. Kuykendall alleging discriminatory employment practices. In March 2005, the Company received from

the U.S. Department of Labor a favorable ruling. The U.S. Department of Labor found no reasonable cause to support former employee Mr. Kuykendall's complaint for improper termination and the U.S. Department of Labor concluded that Mr. Kuykendall failed to demonstrate that his alleged assertions were a contributing factor in his discharge for cause. Mr. Kuykendall did not appeal the U.S. Department of Labor ruling and the case was subsequently closed. As the Company indicated previously, management vigorously defended itself from any action and the ruling by the U.S. Department of Labor demonstrated that the Company had significant defenses against the claim and that the termination was handled properly. In May 2005, the Company and Mr. Kuykendall dropped all complaints and legal proceedings against each other and signed a confidential settlement agreement and mutual general release. (See Note 16)

MOBILEPRO CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
MARCH 31, 2005 AND 2004

NOTE 20- SUBSEQUENT EVENTS (CONTINUED)

In connection with the November 2004 acquisition of the senior secured debt of Davel, the Company agreed to purchase the remaining issued and outstanding shares (approximately 4.8%) held by the minority stockholders (the "Minority Stockholders") within 180 days of the closing date of the Davel acquisition. The purchase price to be offered to the Minority Stockholders was to be an amount of not less than \$0.015 per share, which, at the discretion of the Company, could be paid in cash or common stock of Mobilepro. The Company elected to make the purchase in the form of a reverse split and cash purchase. Prior to undertaking the cash purchase, Davel retained a financial advisor to render an opinion that the terms of the purchase were fair, from a financial point of view, to the Minority Stockholders. Mobilepro retained the financial advisor in January 2005. In February 2005, the financial advisor rendered its opinion that the terms of the purchase were fair, from a financial point of view, to the Minority Stockholders. Subsequent to year-end, Davel paid the cash purchase price of \$450,000 to the Minority Stockholders and the transaction was completed in May 2005.

In April 2005, the Company announced that, through its Neoreach wireless division, it has launched a pilot project to set up a wireless access zone in Chandler, Arizona, a suburb of Phoenix.

In April 2005, the Company announced that Philip F. Otto has been appointed to its advisory board.

In April 2005, the Company announced that its subsidiary, CloseCall America, plans to launch a new prepaid wireless product. The new service offers a "no surprise" wireless bill for consumers and will offer new features including parental controls that will have the ability to restrict outgoing and incoming calls to only certain numbers. CloseCall also announced that it is now providing digital subscriber line (DSL) high-speed connectivity in Ohio, Michigan and Indiana in addition to Maryland, New Jersey and Delaware where CloseCall currently offers DSL service.

In April 2005, the Company announced that it has been awarded a five-year contract (with two five-year options) to deploy and manage a city-wide wireless network covering a 40-square-mile area of Tempe, Arizona. The network, known as WazTempe, will be able to reach Tempe's more than 65,000 households, 1,100 businesses, 50,000 students and hundreds of thousands of annual visitors. Additionally, it will provide municipal services to Tempe police, fire, emergency and city/Arizona State University personnel.

In May 2005, the Company announced that it has signed a term sheet for a new \$15.5 million financing with Cornell that significantly lowers the Company's cost of capital. The financing carries an interest rate of 7.75%, has a term of three years, is convertible into common stock at \$0.30 per share and includes six million warrants with an exercise price of \$0.50 per share. The new financing replaces a bridge financing from Airlie Opportunity Master Fund, a Connecticut based hedge fund, which had an interest rate of 23%. The Company closed this financing transaction on May 13, 2005.

In May 2005, the Company issued an additional 5,000,000 shares of common stock to the escrow agent for use in converting debt into common stock under the \$100 million Standby Equity Distribution Agreement.

In May 2005, our subsidiary, NeoReach, Inc., through its subsidiary NeoReach Wireless, Inc., acquired Transcordia, LLC a/k/a WazAlliance, a growing network of metro-wide commercial and residential Wi-Fi and Wi-Max access zones, for common stock plus the assumption of certain liabilities. NeoReach Wireless partnered with WazAlliance to deploy full-scale metro-wide service in both Tempe and Chandler, Ariz. known as WazTempe and WazChandler. WazAlliance also includes WazHamptonRoads and WazMaui and has opportunities in other cities, primarily in the Southwest. WazTempe will provide city-wide multi-band Wi-Fi network for municipal vehicles and personnel,

including public safety employees as well as services for residences, retail businesses, schools, public events, hotels and resorts, and public transportation.

In May 2005, the Company's CloseCall America subsidiary signed a long-term commercial agreement with Verizon. The new commercial agreement secures pricing to 2010, and will allow the Company to increase the number of customers to which it can provide its CloseCall local, long-distance, cellular and Internet services.

In May 2005, the Company appointed Michael J. Kleeman to the Company's advisory board. Mr. Kleeman brings nearly 30 years of experience in wireless, telecommunications and computers to the Company. Mr. Kleeman is a director of Cyberinfrastructure Policy Research at the University of California San Diego. Mr. Kleeman previously worked for Sprint, Arthur D. Little consulting, Boston Consulting Group and Aerie Networks. Most recently, Mr. Kleeman was co-founder and CTO of Cometa Networks, a company backed by IBM, Intel and AT&T, where Mr. Kleeman used his expertise in OSS for 802.11 networks.

MOBILEPRO CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
MARCH 31, 2005 AND 2004

NOTE 20- SUBSEQUENT EVENTS (CONTINUED)

In May 2005, the Company signed a Memorandum of Understanding with Viyya Technologies, Inc. under which the Company will become a reseller of Viyya's VIYYA™ software. The Company will work with Viyya management to market and distribute VIYYA™ via a reseller agreement to be negotiated between the companies. Anticipated to be available later this summer to the Company's Nationwide Internet subscribers, the VIYYA™ software platform will assist in the management, personalization and customization of content maintained on the Nationwide Internet access service.

Subsequent to the year ended March 31, 2005, the Company continued to pursue a working relationship covering a number of potential technology and communications projects with ActivePoint, an Israeli technology company. The companies previously signed a Memorandum of Understanding and Business Development Agreement whereby the companies are working on select opportunities involving ActivePoint's search engine and the Company's internet services, voice services, wireless services, and other telecommunications and IT initiatives within North America. In May 2005, ActivePoint filed a registration statement with the United States Securities and Exchange Commission. ActivePoint is attempting to become a publicly traded company. The Company owns approximately 5.5% of the common stock of ActivePoint that it received in exchange for its services.

In May 2005, the Company signed a memorandum of understanding with UC Hub Group, Inc. (OTCBB: UCHB), under which the companies can cross-sell each other's products and services, including broadband wireless, e-money applications and other value-added telecommunications services to its customer bases, including cities throughout the United States.

In May 2005, the Company announced the appointment of Tammy L. Martin as President and Chief Executive Officer of the Company's pay telephone subsidiary, Davel Communications, Inc.

In May 2005, the Company announced that Daniel Lozinsky retired from Mobilepro's board of directors to pursue other business and personal interests.

In August 2004, the Company announced its intention to issue a property dividend of 3,073,113 shares of common stock of STI. The Company shareholders are expected to receive one share of registered (i.e. "free-trading") STI stock for approximately every 93 shares of the Company stock that they own, based on the existing shares outstanding and certain warrants. The Company's board of directors set September 15, 2004 as the record date for the stock dividend. In March 2005, STI withdrew its registration statement from the United States Securities and Exchange Commission. STI is contemplating other options to become a publicly traded company. The Company intends to pursue issuance of the property dividend upon STI obtaining its public listing. At this time, no date has been established for such listing.

As part of the August 27, 2004 \$8,500,000 funding by Cornell, the Company transferred \$5,000,000 of the note balance into debt under the \$100 million SEDA in February 2005. \$3,900,000 of the \$5,000,000 due under the \$100 million SEDA as of March 31, 2005 was converted into 15,923,684 shares of common stock subsequent to March 31, 2005. The remaining principal balance on the \$8,500,000 note payable was \$1,300,000 as of March 31, 2005, and it was transferred into debt under the \$100 million SEDA and was fully converted into 4,909,091 shares of common stock subsequent to March 31, 2005.

As part of the February 22, 2005 \$1,500,000 funding by Cornell, \$1,500,000 remains outstanding under the \$100 million SEDA as of March 31, 2005. No part of the debt was converted into shares of common stock subsequent to March 31, 2005.

Item 24. Indemnification Of Directors And Officers**Indemnification**

Our Certificate of Incorporation provides that we will indemnify our current and former officers or directors, or any person who may have served at our request as a director or officer of another corporation in which we own shares of capital stock or of which we were a creditor, against expenses actually and necessarily incurred by them in connection with the defense of any action, suit or proceeding, civil or criminal, in which they, or any of them, are made parties, or a party, by reason of being or having been directors or officers or a director or officer of the Company, or of such other corporation, except in relation to matters as to which any such director or officer or former director or officer or person shall be adjudged in such action, suit or proceeding, civil or criminal, to be liable for any breach of the director's duty of loyalty to the Company or its stockholders, for acts or omissions not in good faith or which involve intentional misconduct or a knowing violation of law, under Section 174 of the General Corporation Law of Delaware or for any transaction from which such officer or director derived an improper benefit. The indemnification provided by our Certificate of Incorporation shall not be exclusive of any other rights to which those individuals indemnified may be entitled, under any by-law, agreement, vote of stockholders or otherwise.

Insofar as indemnification for liabilities arising under the Securities Act of 1933 (the "Act ") may be permitted to our directors, officers and controlling persons pursuant to the foregoing provisions, or otherwise, we have been advised that in the opinion of the Securities and Exchange Commission such indemnification is against public policy as expressed in the Act and is, therefore, unenforceable.

Item 25. Other Expenses Of Issuance And Distribution

The following table sets forth estimated expenses expected to be incurred in connection with the issuance and distribution of the securities being registered.

Securities and Exchange Commission Registration Fee	\$ 4,000
Printing and Engraving Expenses	5,000
Accounting Fees and Expenses	2,500
Legal Fees and Expenses	30,000
Miscellaneous	5,000
TOTAL	\$ 46,500

Item 26. Recent Sales Of Unregistered Securities

In February 2003, we issued a warrant to purchase 200,000 shares of our common stock to Hawk Associates that is exercisable at \$0.15 per share in connection with their providing investor and public relations services to us.

On November 26, 2003, we entered into a settlement agreement with Arne Dunhem, our former CEO. The agreement, as amended, grants Mr. Dunhem a warrant to purchase 2,000,000 shares of our common stock.

On December 15, 2003, we entered into an Executive Employment Agreement with Jay O. Wright, our CEO, pursuant to which we granted Mr. Wright 3,000,000 shares of our common stock. Our Board of Directors subsequently determined on April 15, 2004, that it was in our best interest and in the best interest of Mr. Wright, that we grant Mr. Wright a warrant to purchase 3,682,500 shares of our common stock instead. On April 15, 2004, we entered into an Executive Employment Agreement with Mr. Wright, pursuant to which we granted Mr. Wright a warrant to purchase

up to 11,500,000 shares of our common stock. In connection with the execution of a new employment agreement in June 2005, we granted Mr. Wright a warrant to purchase up to 5,000,000 shares of our common stock.

In January 2004, in connection with his service on our advisory board, we granted Mr. Michael G. O'Neil a warrant to purchase up to 800,000 shares of our common stock. We subsequently granted Mr. O'Neil an additional warrant to purchase up to 250,000 shares of our common stock in June 2005 in connection with his service on our Board.

II-1

On January 20, 2004, we completed our acquisition of DFW Internet Services, Inc. ("DFW"). We paid approximately \$500,000 of consideration, consisting of 18,761,726 shares of our common stock for all of the outstanding shares of DFW.

In January 2004, in connection with their service on our advisory board, we also granted warrants to purchase 1,000,000, 800,000 and 800,000 shares of our common stock to Paul Silverman, Larry Bouts and John von Harz, respectively, that are exercisable at \$0.02 per share.

On February 20, 2004, we entered into an Executive Employment Agreement with Kurt Gordon, our Chief Financial Officer, pursuant to which we granted Mr. Gordon a warrant to purchase 6,500,000 shares of our common stock. In connection with the execution of the new employment agreement, Mr. Gordon also received additional warrants to purchase up to 1,500,000 shares of our common stock.

In March 2004, in connection with his service on our advisory board, we granted Mr. Chris MacFarland an option to purchase up to 800,000 shares of our common stock. We subsequently granted Mr. MacFarland an additional warrant to purchase up to 250,000 shares of our common stock in June 2005 in connection with his service on our Board.

On April 15, 2004, we granted Daniel Lozinsky, our director, a warrant to purchase 6,000,000 shares of our common stock, 5,000,000 of which have vested.

On June 3, 2004, we issued 1,156,336 shares of our common stock to the former stockholders of ShreveNet, Inc., as part of the consideration we paid for the acquisition of ShreveNet, Inc. by our subsidiary, DFW.

On June 10, 2004 we granted warrants to purchase our common stock to Kevin Kuykendall in connection with his joining us as President of the voice business segment. In connection with the termination of his employment in December 2004, the total number of shares issuable upon the exercise of his warrants was reduced to 3,500,000. The warrants are exercisable at \$0.20 per share.

On June 28, 2004, we granted Don Gunther, one of the members of our advisory board, a warrant to purchase 800,000 shares of our common stock. The warrant is exercisable at \$0.20 per share.

On July 1, 2004, we granted Ocean Advisors a warrant to purchase 2,000,000 shares of our common stock that is exercisable at \$0.18 per share in connection with their providing investor relations services to us.

On July 6, 2004, we issued \$271,132 in convertible promissory notes to the former stockholders of Clover Computer Corporation, as part of the consideration we paid for the acquisition of Clover Computer Corporation by our subsidiary DFW. The convertible promissory notes were convertible into shares of our common stock.

On July 20, 2004 we granted Fred Tarter, one of the members of our advisory board, a warrant to purchase 1,000,000 shares of our common stock. The warrant is exercisable at \$0.20 per share.

On July 30, 2004, we issued \$750,000 in convertible promissory notes and 5,000,000 shares of our common stock to the former stockholders of C.L.Y.K., Inc., as part of the consideration we paid for the acquisition of C.L.Y.K., Inc. The convertible promissory notes were convertible into shares of our common stock.

On August 13, 2004, we issued 2,500,000 shares of our common stock to Web One, Inc. as part of the consideration we paid for the acquisition of certain assets of Web One, Inc. by our subsidiary DFW.

On September 15, 2004, we issued \$250,000 in convertible promissory notes to the former stockholders of World Trade Network, Inc., as part of the consideration we paid for the acquisition of World Trade Network, Inc. by our subsidiary DFW. The convertible promissory notes were convertible into shares of our common stock.

On September 16, 2004, we issued \$776,472 in convertible promissory notes to the former stockholders of The River Internet Access Co., as part of the consideration we paid for the acquisition of The River Internet Access Co., by our subsidiary DFW. The convertible promissory notes are convertible into shares of our common stock.

On October 15, 2004, we issued 40,000,000 shares of our common stock and warrants to purchase up to 3,500,000 shares of our common stock to the former stockholders of CloseCall America, Inc., as part of the consideration we paid for the acquisition of CloseCall America, Inc.

On November 1, 2004, we entered into an Executive Employment Agreement with Geoffrey B. Amend, pursuant to which we granted Mr. Amend a warrant to purchase up to 2,000,000 shares of our common stock. In April 2005, we granted Mr. Amend an additional warrant to purchase 1,500,000 shares of our common stock.

II-2

On November 15, 2004, we issued warrants to purchase up to 5,000,000 shares of our common stock to certain lenders in connection with our acquisition of 100% of the senior secured debt of Davel Communications, Inc. ("Davel") and an assignment by those lenders of the their shares of Davel's common stock representing approximately 95% of Davel's issued and outstanding common stock.

In connection with the financing of our acquisition of the senior secured debt of Davel, we issued to Airlie and the loan broker warrants to purchase up to 5,600,000 shares of our common stock.

On December 15, 2004, we entered into an Executive Employment Agreement with John Dumbleton, pursuant to which we granted Mr. Dumbleton a warrant to purchase up to 2,000,000 shares of our common stock.

On January 1, 2005, we entered into an Executive Employment Agreement with Bruce Sanguinetti, pursuant to which we granted Mr. Sanguinetti a warrant to purchase up to 3,000,000 shares of our common stock.

On January 19, 2005, we granted Mr. Donald Sledge, a warrant to purchase up to 500,000 shares of our common stock in connection with his appointment to our Board. We subsequently granted Mr. Sledge an additional warrant to purchase up to 250,000 shares of our common stock in June 2005 in connection with his service on our Board.

In February 2005, we granted a warrant to purchase 250,000 shares of our common stock to both Phil Otto and Dr. Bruce Bowman in connection with their appointment to our advisory board. The warrants are exercisable at \$0.155 per share and \$0.193 per share, respectively.

On April 20, 2005, we granted to Mr. Mazerski, a warrant to purchase 1,500,000 shares of our common stock, in connection with his employment. We also granted Ms. Martin a warrant to purchase 1,500,000 shares of our common stock in connection with her employment.

On April 21, 2005, we issued warrants to purchase up to 600,000 shares of our common stock to a former owner of Evergreen Open Broadband Corporation.

On May 16, 2005, we issued a \$15.5 million debenture to Cornell Capital Partners, L.P., convertible into our common stock at a price of \$0.30 per share. Cornell Capital was also issued a warrant to purchase 6,000,000 shares of our common stock at a price of \$0.50 per share. The securities were issued pursuant to an exemption from registration provided by Section 4(2) of the Securities Act and/or Regulation D promulgated by the Securities Act.

On May 17, 2005, we granted a warrant to purchase 250,000 shares of our common stock to Michael Kleeman in connection with his appointment to our advisory board, exercisable at \$0.33 per share.

On May 17, 2005, we issued 100,000 shares of our common stock to Northern Hills, Inc. as compensation for their role in identifying Transcordia LLC a/k/a WazAlliance as a target company and our acquisition of it in May 2005. The issuance was made pursuant to an exemption from registration provided by Section 4(2) of the Securities Act.

On June 7, 2005 we issued 760,000 shares of our common stock to the prior owners of Transcordia, LLC. On September 12, 2005, we issued an additional 173,334 shares of our common stock to the prior owners of Transcordia, LLC. The issuances were made pursuant to an exemption from registration provided by Section 4(2) of the Securities Act.

On June 20, 2005, we granted a warrant to purchase up to 750,000 shares of our common stock to Mr. Hank Deily, our Corporate Controller. The warrant is exercisable at \$0.31 per share.

On June 23, 2005 we issued 2,200,000 shares of our common stock to Paul Sadler upon his conversion of a convertible note and the settlement of a second note payable to him that were issued in connection with our purchase

of Clover Computer Corporation. The issuance was made pursuant to an exemption from registration provided by Section 4(2) of the Securities Act.

On July 13, 2005 and August 24, 2005, in separate transactions, we issued 6,000,000 shares and 4,000,000 shares, respectively, to the prior owner of American Fiber Network, Inc. The issuances were made pursuant to an exemption from registration provided by Section 4(2) of the Securities Act.

On September 1, 2005, we entered into an Executive Employment Agreement with James L. Magruder, Jr. pursuant to which we granted Mr. Magruder an option to purchase 2,000,000 shares of our common stock under our 2001 Equity Performance Plan.

Except as otherwise noted, the securities described in this Item were issued pursuant to the exemption from registration provided by Section 4(2) of the Securities Act of 1933 and/or Regulation D promulgated under the Securities Act. Each such issuance was made pursuant to individual contracts that are discrete from one another and are made only with persons who were sophisticated in such transactions and who had knowledge of and access to sufficient information about Mobilepro to make an informed investment decision. Among this information was the fact that the securities were restricted securities.

* Confidential treatment has been requested for certain portions of this document pursuant to an application for confidential treatment sent to the Securities and Exchange Commission. Such portions are omitted from this filing and filed separately with the Securities and Exchange Commission.

II-8

Item 28. Undertakings

The undersigned registrant hereby undertakes:

(1) To file, during any period in which it offers or sells securities, a post-effective amendment to this registration statement to:

(i) Include any prospectus required by Sections 10(a)(3) of the Securities Act of 1933, as amended (the “Securities Act”);

(ii) Reflect in the prospectus any facts or events which, individually or together, represent a fundamental change in the information in the registration statement. Notwithstanding the foregoing, any increase or decrease in volume of securities offered (if the total dollar value of securities offered would not exceed that which was registered) and any deviation from the low or high end of the estimated maximum offering range may be reflected in the form of prospectus filed with the Commission pursuant to Rule 424(b) if, in the aggregate, the changes in volume and price represent no more than a 20 percent change in the maximum aggregate offering price set forth in the “Calculation of Registration Fee” table in the effective registration statement; and

(iii) Include any additional or changed material information on the plan of distribution.

(2) That, for the purpose of determining any liability under the Securities Act, each such post-effective amendment shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be a *bona fide* offering thereof.

(3) To file a post-effective amendment to remove from registration any of the securities that remain unsold at the end of the offering.

(4) Insofar as indemnification for liabilities arising under the Securities Act may be permitted to directors, officers and controlling persons of the small business issuer pursuant to the foregoing provisions, or otherwise, the small business issuer has been advised that in the opinion of the Securities and Exchange Commission such indemnification is against public policy as expressed in the Securities Act and is, therefore, unenforceable.

SIGNATURES

In accordance with the requirements of the Securities Act of 1933, the registrant certifies that it has reasonable grounds to believe that it meets all of the requirements for filing on Form SB-2 and authorized this registration statement to be signed on our behalf by the undersigned, in Bethesda, Maryland.

MOBILEPRO CORP.

By: /s/ Jay O. Wright

Name: Jay O. Wright

Title: President and Chief Executive Officer

Date: January 23, 2006

KNOW ALL MEN BY THESE PRESENTS, that each person whose signature appears below constitutes and appoints Jay O. Wright his true and lawful attorney-in-fact and agent, with full power of substitution and revocation, for him and in his name, place and stead, in any and all capacities (until revoked in writing), to sign any and all amendments (including post-effective amendments) to this Registration Statement and to file the same with all exhibits thereto, and other documents in connection therewith, with the Securities and Exchange Commission, granting unto said attorney-in-fact and agent full power and authority to do and perform each and every act and thing requisite and necessary to be done as fully for all intents and purposes as he might or could do in person, hereby ratifying and confirming all that said attorney-in-fact and agent, or is substitute or substitutes, may lawfully do or cause to be done by virtue hereof.

Pursuant to the requirements of the Securities Act of 1933, this Registration Statement has been signed by the following persons in the capacities and on the dates stated.
