Noncash Activities		
Loans transferred to Other Real Estate	\$ 3,518	\$ 79

The accompanying notes are an integral part of these financial statements.

FRANKLIN FINANCIAL SERVICES CORPORATION and SUBSIDIARIES
UNAUDITED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1 - Basis of Presentation

The consolidated financial statements include the accounts of Franklin Financial Services Corporation (the Corporation), and its wholly-owned subsidiaries, Farmers and Merchants Trust Company of Chambersburg (the Bank), Franklin Financial Properties Corp., and Franklin Future Fund Inc. Farmers and Merchants Trust Company of Chambersburg is a commercial bank that has one wholly-owned subsidiary, Franklin Realty Services Corporation. Franklin Realty Services Corporation is an inactive real-estate brokerage company. Franklin Financial Properties Corp. holds real estate assets that are leased by the Bank. Franklin Future Fund Inc. is a non-bank investment company. The activities of non-bank entities are not significant to the consolidated totals. All significant intercompany transactions and account balances have been eliminated.

In the opinion of management, all adjustments (which include only normal recurring adjustments) necessary to present fairly the consolidated financial position, results of operations, and cash flows as of September 30, 2011, and for all other periods presented have been made.

Certain information and footnote disclosures normally included in consolidated financial statements prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") have been condensed or omitted. It is suggested that these consolidated financial statements be read in conjunction with the audited consolidated financial statements and notes thereto included in the Corporation's 2010 Annual Report on Form 10-K. The consolidated results of operations for the period ended September 30, 2011 are not necessarily indicative of the operating results for the full year. Management has evaluated subsequent events for potential recognition and/or disclosure through the date these consolidated financial statements were issued.

The consolidated balance sheet at December 31, 2010 has been derived from the audited consolidated financial statements at that date, but does not include all of the information and footnotes required by GAAP for complete consolidated financial statements.

For purposes of reporting cash flows, cash and cash equivalents include Cash and due from banks, Interest-bearing deposits in other banks and Federal funds sold. Generally, Federal funds are purchased and sold for one-day periods.

Earnings per share is computed based on the weighted average number of shares outstanding during each period end. A reconciliation of the weighted average shares outstanding used to calculate basic earnings per share and diluted earnings per share follows:

(In thousands, except per share data)	For the Three Months Ended September 30		For the Nine Months Ended September 30	
	2011	2010	2011	2010
Weighted average shares outstanding (basic)	3,971	3,893	3,946	3,880
Impact of common stock equivalents	-	1	3	1
Weighted average shares outstanding (diluted)	3,971	3,894	3,949	3,881
Anti-dilutive options excluded from the calculation	97	72	70	75
Net income	\$ 1,059	\$ 1,803	\$ 4,667	\$ 5,937
Basic earnings per share	\$ 0.27	\$ 0.46	\$ 1.18	\$ 1.53
Diluted earnings per share	\$ 0.27	\$ 0.46	\$ 1.18	\$ 1.53

Note 2 – Recent Accounting Pronouncements

Testing Goodwill for Impairment. In September 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2011-08, Testing Goodwill for Impairment. The purpose of this ASU is to simplify how entities test goodwill for impairment by adding a new first step to the pre-existing goodwill impairment test under Accounting Standards Codification (ASC) Topic 350, Intangibles – Goodwill and other. This amendment gives the entity the option to first assess a variety of qualitative factors such as economic conditions, cash flows, and competition to determine whether it was more likely than not that the fair value of goodwill has fallen below its carrying value. If the entity determines that it is not likely that the fair value has fallen below its carrying value, then the entity will not have to complete the original two-step test under Topic 350. The amendments in this ASU are effective for impairment tests performed for fiscal years beginning after December 15, 2011. Early adoption is permitted. The Corporation is evaluating the affect of this ASU and does not expect it to have a material affect on the Corporation’s financial position or consolidated financial statements.

Presentation of Comprehensive Income. The provisions of this ASU amend FASB ASC Topic 220, Comprehensive Income, to facilitate the continued alignment of U.S. GAAP with International Accounting Standards. The ASU prohibits the presentation of the components of comprehensive income in the statement of shareholder’s equity. Reporting entities are allowed to present either: a statement of comprehensive income, which reports both net income and other comprehensive income; or separate, but consecutive, statements of net income and other comprehensive income. Under previous GAAP, all 3 presentations were acceptable. Regardless of the presentation selected, the Reporting Entity is required to represent all reclassifications between other comprehensive and net income on the face of the new statement or statements. The provisions of this ASU are effective for fiscal years and interim periods beginning after December 31, 2011 for public entities. As the two remaining options for presentation existed prior to the issuance of this ASU, early adoption is permitted. The Corporation early adopted this ASU effective with the quarter ended June 30, 2011.

Receivables – Troubled Debt Restructurings by Creditors. The FASB has issued this ASU to clarify the accounting principles applied to loan modifications, as defined by FASB ASC Subtopic 310-40, Receivables – Troubled Debt Restructurings by Creditors. The Update clarifies guidance on a creditor’s evaluation of whether or not a concession has been granted, with an emphasis on evaluating all aspects of the modification rather than a focus on specific criteria, such as the effective interest rate test, to determine a concession. The Update goes on to provide guidance on specific types of modifications such as changes in the interest rate of the borrowing, and insignificant delays in payments, as well as guidance on the creditor’s evaluation of whether or not a debtor is experiencing financial difficulties. For public entities, the amendments in the Update are effective for the first interim or annual periods beginning on or after June 15, 2011, and should be applied retrospectively to the beginning of the annual period of adoption. The entity should also disclose information required by ASU 2010-20, Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses, which had previously been deferred by ASU 2011-01, Deferral of the Effective Date of Disclosures about Troubled Debt Restructurings in Update No. 2010-20, for interim

and annual periods beginning on or after June 15, 2011. The Corporation adopted this update effective with the quarter ended September 30, 2011.

Note 3 – Accumulated Other Comprehensive Loss

The amortized cost and estimated fair value of investment securities available for sale as of September 30, 2011 and December 31, 2010 are:

(Dollars in thousands)

September 30, 2011	Amortized cost	Gross unrealized gains	Gross unrealized losses	Fair Value
Equity securities	\$ 2,768	\$ 13	\$ (976)	\$ 1,805
Obligations of U.S. Government agencies	14,402	74	(18)	14,458
Obligations of state and political subdivisions	42,004	2,248	(4)	44,248

Asset-backed securities	74	-	(21)	53
	\$ 118,642	\$ 2,193	\$ (3,219)	\$ 117,616

Note 4 – Guarantees

The Corporation does not issue any guarantees that would require liability recognition or disclosure, other than its standby letters of credit. Standby letters of credit are conditional commitments issued by the Bank to guarantee the performance of a customer to a third party. Generally, all letters of credit, when issued, have expiration dates within one year. The credit risk involved in issuing letters of credit is essentially the same as those that are involved in extending loan facilities to customers. The Bank generally holds collateral and/or personal guarantees supporting these commitments. The Bank had \$27.2 million and \$20.5 million of standby letters of credit as of September 30, 2011 and December 31, 2010, respectively. Management believes that the proceeds obtained through a liquidation of collateral and the enforcement of guarantees would be sufficient to cover the potential amount of future payments required under the corresponding guarantees. The amount of the liability as of September 30, 2011 and December 31, 2010 for guarantees under standby letters of credit issued was not material.

Note 5 - Investments

The amortized cost and estimated fair value of investment securities available for sale as of September 30, 2011 and December 31, 2010 are:

(Dollars in thousands)

September 30, 2011	Amortized cost	Gross unrealized gains	Gross unrealized losses	Fair Value

	\$118,642	\$2,193	\$(3,219)	\$117,616

The amortized cost of securities pledged as collateral to secure various funding sources was \$120.7 million at September 30, 2011 and \$108.7 million at December 31, 2010.

The amortized cost and fair value of debt securities as of September 30, 2011, by contractual maturity are shown below. Actual maturities may differ from contractual maturities because of prepayment or call options embedded in the securities.

(Dollars in thousands)	Amortized cost	Fair Value
Due in one year or less	\$5,862	\$5,862
Due after one year through five years	14,063	14,703
Due after five years through ten years	14,649	15,414
Due after ten years	30,326	29,949
	64,900	65,928
Mortgage-backed securities	63,357	63,855
	\$128,257	\$129,783

At September 30, 2011, the unrealized loss in the equity portfolio was \$976 thousand on a fair value of \$1.8 million. The equity portfolio is comprised of only bank and financial institution stocks. The fair value of equities with an unrealized loss declined by \$1.5 million since year-end 2010. The reduction in the fair value is due in large part to the sale of more than 38,000 shares of Tower Bancorp during the year with a fair value of approximately \$880 thousand. The unrealized loss on equity securities increased by \$438 thousand with nearly all of this increase occurring during the third quarter as overall market prices for bank stocks moved down.

The following table reflects temporary impairment in the investment portfolio (excluding restricted stock), aggregated by investment category, length of time that individual securities have been in a continuous unrealized loss position and the number of securities in each category as of September 30, 2011 and December 31, 2010:

(Dollars in thousands)	Less than 12 months			September 30, 2011 12 months or more			Fair Value	Total Unrealized

For more information concerning investments, refer to the Investment Securities discussion in the Financial Condition section of Management's Discussion and Analysis.

Note 6 – Loans

A summary of loans outstanding, by primary collateral, at the end of the reporting period is as follows:

(Dollars in thousands)	September 30,		December 31,		Change	
	2011	2010	Amount			%
Residential Real Estate 1-4 Family						
First liens	\$ 144,022	\$ 144,128	\$(106)		(0.1)	
Junior liens and lines of credit	52,137	56,694	(4,557)		(8.0)	
Total	196,159	200,822	(4,663)		(2.3)	
Residential real estate - construction	18,377	79,557	(61,180)		(76.9)	
Commercial, industrial and agricultural real estate	360,681	304,195	56,486		18.6	
Commercial, industrial and agricultural	177,162	146,672	30,490		20.8	
Consumer	14,227	17,396	(3,169)		(18.2)	
	766,606	748,642	17,964		2.4	
Less: Allowance for loan losses	(9,195)	(8,801)	(394)		4.5	
Net Loans	\$ 757,411	\$ 739,841	\$ 17,570		2.4	

Included in the loan balances are the following:

Net unamortized deferred loan costs	\$ 477	\$ 567
Unamortized discount on purchased loans	\$ (180)	\$ (220)

Loans pledged as collateral for borrowings and commitments from:

FHLB	\$ 665,637	\$ 648,272
Federal Reserve Bank	42,925	53,682
	\$ 708,562	\$ 701,954

The majority of the decrease in residential real estate - construction is offset by the increase in the commercial real estate portfolio as loans were reclassified due to construction loans moving to an amortizing status and to more accurately reflect the collateral or purpose of the loan.

Note 7 – Loan Quality

The following table presents, by loan segment, the Allowance for Loan Losses (ALL) for the periods ended:

(Dollars in thousands)	Residential Real Estate 1-4 Family			Commercial Industrial & Agricultural Real Estate		Commercial Industrial & Consumer	Total

Commercial, industrial and agricultural real estate	273,279	8,481	22,435	-	304,195
Commercial, industrial and agricultural	132,981	6,383	7,308	-	146,672
Total	\$515,973	\$23,424	\$45,325	\$-	\$584,722

For loans that are not assigned an individual credit rating (primarily consumer and residential mortgage loans), the Bank evaluates credit quality based on the aging status of the loan (previously presented) and the performing status. The following table presents the performance status on selected loans:

(Dollars in thousands)

	September 30, 2011				
	Consumer		Residential Real Estate		Total
	Lines of Credit	Installment	Home Equity Lines	Retail Mortgages	
Performing	\$3,327	\$10,878	\$18,465	\$ 113,146	
Non-performing	8	14	30	1,188	1,240
Total	\$3,335	\$10,892	\$18,495	\$ 114,334	\$147,056

	December 31, 2010				
	Consumer		Residential Real Estate		Total
	Lines of Credit	Installment	Home Equity Lines	Retail Mortgages	
Performing	\$3,231	\$14,040	\$17,939	\$ 127,236	
Non-performing	11	114	99	1,250	1,474
Total	\$3,242	\$14,154	\$18,038	\$ 128,486	\$163,920

The following table presents information on the Bank's Troubled Debt Restructuring (TDR) loans:

(Dollars in thousands)	Troubled Debt Restructurings		Troubled Debt Restructurings That Have Defaulted on Modified Terms YTD	
	Number of Contracts	Recorded Investment	Number of Contracts	Recorded Investment
September 30, 2011				
Residential real estate	2	\$ 93	-	\$ -
Residential real estate - construction	18	3,206	-	-
Commercial, industrial and agricultural real estate	9	7,789	2	462
Total	29	\$ 11,088	2	\$ 462

Commercial, industrial and agricultural real estate	2	\$ 656		
Total	2	\$ 656		

	New Troubled Debt Restructurings			
	Three Months Ended September 30, 2011		Nine Months Ended September 30, 2011	
	Number of Contracts	Recorded Investment	Number of Contracts	Recorded Investment
Residential real estate	1	\$30	2	\$93
Residential real estate – construction	18	3,206	18	3,206
Commercial, industrial and agricultural real estate	1	2,663	7	7,327
Total	20	\$5,899	27	\$10,626

The type of loan concession granted for loans newly classified as a troubled debt restructuring during the periods ended:

Modification or Concession	Three Months Ended September 30, 2011		Nine Months Ended September 30, 2011	
	Number of Contracts	Recorded Investment	Number of Contracts	Recorded Investment
Maturity	-	\$-	1	\$260
Rate	19	3,236	21	6,154
Payment	1	2,663	5	4,212
	20	\$5,899	27	\$10,626

The Bank recorded a charge-off of \$1.9 million from the ALL at the time of restructuring.

Note 8 – Pensions

The components of pension expense for the periods presented are as follows:

(Dollars in thousands)	Three months ended September 30		Nine months ended September 30	
	2011	2010	2011	2010
Components of net periodic (benefit) cost:				
Service cost	\$87	\$91	\$274	\$274
Interest cost	183	185	545	557
Expected return on plan assets	(189)	(209)	(565)	(628)
Recognized net actuarial loss	95	43	275	128
Net periodic cost	\$176	\$110	\$529	\$331

The Bank expects its pension expense to increase in 2011 compared to 2010. The Bank expects to contribute \$2.1 million to its pension plan in 2011. This contribution will meet the minimum funding requirements.

Note 9 – Mortgage Servicing Rights

Activity pertaining to mortgage servicing rights and the related valuation allowance follows:

(Dollars in thousands)	Nine Months Ended September 30	
	2011	2010
Cost of mortgage servicing rights:		
Beginning balance	\$ 933	\$ 1,190
Originations	-	10
Amortization	(145)	(134)
Ending balance	\$ 788	\$ 1,066
Valuation allowance:		
Beginning balance	\$ (330)	\$ (476)
Valuation charges	(81)	-
Valuation reversals	12	60
Ending balance	\$ (399)	\$ (416)
Mortgage servicing rights cost	\$ 788	\$ 1,066
Valuation allowance	(399)	(416)
Carrying value	\$ 389	\$ 650
Fair value	\$ 389	\$ 650

Note 10 – Fair Value Measurements

Management uses its best judgment in estimating the fair value of the Corporation's financial instruments; however, there are inherent weaknesses in any estimation technique. Therefore, for substantially all financial instruments, the fair value estimates herein are not necessarily indicative of the amounts the Corporation could have realized in a sales transaction on the dates indicated. The estimated fair value amounts have been measured as of their respective quarter-ends and have not been re-evaluated or updated for purposes of these financial statements subsequent to those respective dates. As such, the estimated fair values of these financial instruments subsequent to the respective reporting dates may be different than the amounts reported at each quarter-end.

FASB ASC Topic 825, Financial Instruments, requires disclosure of the fair value of financial assets and liabilities, including those financial assets and liabilities that are not measured and reported at fair value on a recurring and non-recurring basis.

The fair value of the Corporation's financial instruments are as follows:

(Dollars in thousands)	September 30, 2011		December 31, 2010	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Financial assets:				
Cash and cash equivalents	\$35,401	\$35,401	\$22,106	\$22,106
Investment securities available for sale	131,588	131,588	117,616	117,616
Restricted stock	5,285	5,285	6,159	6,159
Net loans	757,411	768,183	739,841	750,944
Accrued interest receivable	2,854	2,854	3,662	3,662
Mortgage servicing rights	389	389	603	603
Financial liabilities:				
Deposits	\$789,346	\$792,957	\$734,331	\$737,274
Securities sold under agreements to repurchase	63,216	63,216	51,164	51,164
Long-term debt	48,892	51,778	70,885	74,695
Accrued interest payable	831	831	757	757
Interest rate swaps	1,850	1,850	1,752	1,752

The preceding information should not be interpreted as an estimate of the fair value of the entire Corporation since a fair value calculation is only provided for a limited portion of the Corporation's assets and liabilities. Due to a wide range of valuation techniques and the degree of subjectivity used in making the estimates, comparisons between the Corporation's disclosures and those of other companies may not be meaningful. The following methods and assumptions were used to estimate the fair values of the Corporation's financial instruments reported above at September 30, 2011 and December 31, 2010:

Cash and cash equivalents: For these short-term instruments, the carrying amount is a reasonable estimate of fair value.

Investment securities available for sale: The fair value of investment securities is determined in accordance with the methods described under FASB ASC Topic 820, Fair Value Measurements and Disclosures, as discussed in the fair value hierarchy.

Restricted stock: The carrying value of restricted stock approximates its fair value based on redemption provisions for the restricted stock.

Net loans: The fair value of fixed-rate loans is estimated for each major type of loan (e.g. real estate, commercial, industrial and agricultural and consumer) by discounting the future cash flows associated with such loans using rates currently offered for loans with similar terms to borrowers of comparable credit quality. The model considers scheduled principal maturities, repricing characteristics, prepayment assumptions and interest cash flows. The discount rates used are estimated based upon consideration of a number of factors including the treasury yield curve, expense and service charge factors. For variable rate loans that reprice frequently and have no significant change in credit quality, carrying values approximate the fair value.

Accrued interest receivable: The carrying amount is a reasonable estimate of fair value.

Mortgage servicing rights: The fair value of mortgage servicing rights, upon initial recognition, is estimated using a valuation model that calculates the present value of estimated future net servicing income. The model incorporates assumptions, such as loan default rates, costs to service, and prepayment speeds. Mortgage servicing rights are carried at the lower of cost or fair value after initial recognition.

Deposits, Securities sold under agreements to repurchase and Long-term debt: The fair value of demand deposits, savings accounts, and money market deposits is the amount payable on demand at the reporting date. The fair value of fixed-rate certificates of deposit and long-term debt is estimated by discounting the future cash flows using rates approximating those currently offered for certificates of deposit and borrowings with similar remaining maturities. For securities sold under agreements to repurchase, the carrying value approximates a reasonable estimate of the fair value.

Accrued interest payable: The carrying amount is a reasonable estimate of fair value.

Interest rate swaps: The fair value of the interest rate swaps is determined in accordance with the methods described under FASB ASC Topic 820, as discussed below.

Fair Value Hierarchy

FASB ASC Topic 820, Fair Value Measurements and Disclosures established a fair value hierarchy that prioritizes the inputs to valuation methods used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under FASB ASC Topic 820 are as follows:

Level 1: Valuation is based on unadjusted, quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

Level 2: Valuation is based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market.

Level 3: Valuation is generated from model-based techniques that use significant assumptions not observable in the market. These unobservable assumptions reflect the Corporation's assumptions regarding what market participants would assume when pricing a financial instrument.

For financial assets and liabilities measured at fair value on a recurring basis, there were no transfers of financial assets or liabilities between Level 1 and Level 2 during the period ending September 30, 2011.

For financial assets and liabilities measured at fair value on a recurring basis, the fair value measurements by level within the fair value hierarchy are as follows:

(Dollars in Thousands)

Asset Description	Fair Value at September 30, 2011			
	Level 1	Level 2	Level 3	Total
Equity securities	\$1,805	\$-	\$-	\$1,805
Obligations of U.S. Government agencies	-	14,458	-	14,458
Obligations of state and political subdivisions	-	44,248	-	44,248
Corporate debt securities	-	2,500	-	2,500
Trust Preferred Securities	-	4,671	-	4,671
Mortgage-backed securities				
Agency	-	60,585	-	60,585
Private-label	-	3,270	-	3,270
Asset-backed securities	-	51	-	51
Total assets	\$1,805	\$129,783	\$-	\$131,588
Liability Description				
Interest rate swaps	\$-	\$1,850	\$-	\$1,850
Total liabilities	\$-	\$1,850	\$-	\$1,850

(Dollars in Thousands)

Asset Description	Fair Value at December 31, 2010			
	Level 1	Level 2	Level 3	Total
Equity securities	\$3,638	\$-	\$-	\$3,638
Obligations of U.S. Government agencies	-	14,785	-	14,785
Obligations of state and political subdivisions	-	39,952	-	39,952
Corporate debt securities	-	2,665	-	2,665
Trust Preferred Securities	-	4,197	-	4,197
Mortgage-backed securities				
Agency	-	48,297	-	48,297
Private-label	-	4,029	-	4,029
Asset-backed securities	-	53	-	53
Total assets	\$3,638	\$113,978	\$-	\$117,616
Liability Description				
Interest rate swaps	\$-	\$1,752	\$-	\$1,752
Total liabilities	\$-	\$1,752	\$-	\$1,752

An asset's or liability's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The Corporation used the following methods and significant assumptions to estimate the fair value for assets and liabilities measured on a recurring basis.

Investment securities: Level 1 securities represent equity securities that are valued using quoted market prices from nationally recognized markets. Level 2 securities represent debt securities that are valued using a mathematical model based upon the specific characteristics of a security in relationship to quoted prices for similar securities.

Interest rate swaps: The interest rate swaps are valued using a discounted cash flow model that uses verifiable market environment inputs to calculate the fair value. This method is not dependent on the input of any significant judgments or assumptions by Management.

For financial assets and liabilities measured at fair value on a nonrecurring basis, the fair value measurements by level within the fair value hierarchy are as follows:

(Dollars in Thousands)

Asset Description	Fair Value at September 30, 2011			
	Level 1	Level 2	Level 3	Total
Impaired loans with specific allowance	\$-	\$-	\$15,447	\$15,447
Other real estate owned	-	-	3,337	3,337
Mortgage servicing rights	-	-	389	389
Total assets	\$-	\$-	\$19,173	\$19,173

(Dollars in Thousands)

Asset Description	Fair Value at December 31, 2010			
	Level 1	Level 2	Level 3	Total
Impaired loans with specific allowance	\$-	\$-	\$16,973	\$16,973
Other real estate owned	-	-	618	618
Mortgage servicing rights	-	-	603	603
Total assets	\$-	\$-	\$18,194	\$18,194

The Corporation used the following methods and significant assumptions to estimate the fair value of assets and liabilities measured on a nonrecurring basis:

Impaired loans: Impaired loans are reported at the fair value of the underlying collateral if repayment is expected solely from the collateral. Collateral values are estimated using Level 3 inputs based on customized discounting criteria.

Other real estate owned: The fair value of other real estate owned, upon initial recognition, is estimated using Level 2 inputs within the fair value hierarchy based on observable market data and Level 3 inputs based on customized discounting criteria. In connection with the measurement and initial recognition of the foregoing assets, the Corporation recognizes charge-offs through the allowance for loan losses. Declines in fair value of other real estate subsequent to initial recognition are recorded in other expenses in the Corporation's statement of income.

Mortgage servicing rights: The fair value of mortgage servicing rights, upon initial recognition, is estimated using a valuation model that calculates the present value of estimated future net servicing income. The model incorporates Level 3 assumptions such as cost to service, discount rate, prepayment speeds, default rates and losses. Mortgage servicing rights are carried at the lower of cost or fair value after initial recognition.

Note 11 – Financial Derivatives

The Board of Directors has given Management authorization to enter into derivative activity including interest rate swaps, caps and floors, forward-rate agreements, options and futures contracts in order to hedge interest rate risk. The Bank is exposed to credit risk equal to the positive fair value of a derivative instrument, if any, as a positive fair value indicates that the counterparty to the agreement is financially liable to the Bank. To limit this risk, counterparties must have an investment grade long-term debt rating and individual counterparty credit exposure is limited by Board approved parameters. Management anticipates continuing to use derivatives, as permitted by its Board-approved policy, to manage interest rate risk. In 2008, the Bank entered into two interest rate swap transactions in order to hedge the Corporation's exposure to changes in cash flows attributable to the effect of interest rate changes on variable rate liabilities.

Information regarding the interest rate swaps as of September 30, 2011 follows:

Notional Amount	Maturity Date	Interest Rate		Variable	Amount Expected to be Expensed into Earnings within the next 12 Months
		Fixed	%		
\$ 10,000	5/30/2013	3.60	%	0.02	% \$ 358
\$ 10,000	5/30/2015	3.87	%	0.02	% \$ 385

The variable rate is indexed to the 91-day Treasury Bill auction (discount) rate and resets weekly.

Derivatives with a positive fair value are reflected as other assets in the consolidated balance sheet while those with a negative fair value are reflected as other liabilities. As short-term interest rates decrease, the net expense of the swap increases. As short-term rates increase, the net expense of the swap decreases.

Fair Value of Derivative Instruments in the Consolidated Balance Sheets as of September 30, 2011 and December 31, 2010 are as follows:

Fair Value of Derivative Instruments				
(Dollars in thousands)	Date	Type	Balance Sheet Location	Fair Value
	September 30, 2011	Interest rate contracts	Other liabilities	\$ 1,850
	December 31, 2010	Interest rate contracts	Other liabilities	\$ 1,752

The Effect of Derivative Instruments on the Statement of Income for the Three and Nine Months Ended September 30, 2011 and 2010 follows:

Derivatives in ASC Topic 815 Cash Flow Hedging Relationships

(Dollars in thousands)

Type / Date	Amount of Gain or (Loss) Recognized in OCI net of tax on Derivative (Effective Portion)	Location of Gain or (Loss) Reclassified from Accumulated OCI into Income (Effective Portion)	Amount of Gain or (Loss) Reclassified from Accumulated OCI into Income (Effective Portion)	Location of Gain or (Loss) Recognized in Income on Derivative (Ineffective Portion)	Amount of Gain or (Loss) Recognized in Income on Derivative (Ineffective Portion)

Note 12 – Reclassifications

Certain prior period amounts may have been reclassified to conform to the current year presentation. Such reclassifications did not affect reported net income.

Item 2

Management's Discussion and Analysis of Results of Operations and Financial Condition
For the Three and Nine Month Periods Ended September 30, 2011 and 2010

Forward Looking Statements

Certain statements appearing herein which are not historical in nature are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements refer to a future period or periods, reflecting management's current views as to likely future developments, and use words such as "may," "will," "expect," "believe," "estimate," "anticipate," or similar terms. Because forward-looking statements involve certain risks and uncertainties and other factors over which the Corporation has no direct control, actual results could differ materially from those contemplated in such statements. These factors include (but are not limited to) the following: general economic conditions, changes in interest rates, changes in the Corporation's cost of funds, changes in government monetary policy, changes in government regulation and taxation of financial institutions, changes in the rate of inflation, changes in technology, the intensification of competition within the Corporation's market area, and other similar factors.

Critical Accounting Policies

Management has identified critical accounting policies for the Corporation to include Allowance for Loan Losses, Mortgage Servicing Rights, Financial Derivatives, Temporary Investment Impairment and Stock-based Compensation. There were no changes to the critical accounting policies disclosed in the 2010 Annual Report on Form 10-K in regards to application or related judgements and estimates used. Please refer to Item 7 of the Corporation's 2010 Annual Report on Form 10-K for a more detailed disclosure of the critical accounting policies.

Results of Operations

Year-to-Date Summary

At September 30, 2011, total assets were \$996.9 million, an increase of \$45.1 million from December 31, 2010. Net loans grew to \$757.4 million and total deposits increased to \$789.3 million. The Corporation reported net income for the first nine months of 2011 of \$4.7 million. This is a 21.4% decrease versus net income of \$5.9 million for the same period in 2010. Total revenue (interest income and noninterest income) decreased \$949 thousand year-over-year. Interest income decreased \$1.6 million, but was more than offset by a decrease of \$2.6 million in interest expense, resulting in a 4.3% increase in net interest income. Noninterest income improved 9.2% due to less other than temporary investment charges. Higher salary and benefit expense, as well as prepayment penalties on term loans, contributed to the increase in noninterest expense. The provision for loan losses was \$5.4 million for the period, \$3.6 million more than in 2010. Diluted earnings per share decreased to \$1.18 in 2011 from \$1.53 in 2010.

Other key performance ratios as of, or for the nine months ended September 30, 2011 and 2010 (on an annualized basis) are listed below:

	2011		2010	
Return on average equity (ROE)	7.39	%	9.56	%
Return on average assets (ROA)	.63	%	.79	%
Return on average tangible average equity(1)	8.84	%	11.80	%
Return on average tangible average assets(1)	.66	%	.85	%
Net interest margin	3.67	%	3.47	%

Efficiency ratio	68.40	%	64.16	%
------------------	-------	---	-------	---

(1) The Corporation supplements its traditional GAAP measurements with Non-GAAP measurements. The Non-GAAP measurements include Return on Average Tangible Assets and Return on Average Tangible Equity. As a result of merger transactions, intangible assets (primarily goodwill and core deposit intangibles) were created. The Non-GAAP disclosures are intended to eliminate the effects of the intangible assets and allow for better comparisons to periods when such assets did not exist. The following table shows the adjustments made between the GAAP and NON-GAAP measurements:

GAAP Measurement	Calculation
Return on Average Assets	Net Income / Average Assets
Return on Average Equity	Net Income / Average Equity
Non- GAAP Measurement	Calculation
Return on Average Tangible Assets	Net Income plus Intangible Amortization / Average Assets less Average Intangible Assets
Return on Average Tangible Equity	Net Income plus Intangible Amortization / Average Equity less Average Intangible Assets
Efficiency Ratio	Noninterest Expense / Tax Equivalent Net Interest Income plus Noninterest Income (excluding Security Gains/Losses and Other Than Temporary Impairment)

A more detailed discussion of the operating results for the three months ended September 30, 2011 follows:

Comparison of the three months ended September 30, 2011 to the three months ended September 30, 2010:

Net Interest Income

The most important source of the Corporation's earnings is net interest income, which is defined as the difference between income on interest-earning assets and the expense of interest-bearing liabilities supporting those assets. Principal categories of interest-earning assets are loans and securities, while deposits, securities sold under agreements to repurchase (Repos), short-term borrowings and long-term debt are the principal categories of interest-bearing liabilities. Demand deposits enhance net interest income because they are noninterest-bearing deposits. For the purpose of this discussion, balance sheet items refer to the average balance for the period and net interest income is adjusted to a fully taxable-equivalent basis. This tax-equivalent adjustment facilitates performance comparisons between taxable and tax-free assets by increasing the tax-free income by an amount equivalent to the Federal income taxes that would have been paid if this income were taxable at the Corporation's 34% Federal statutory rate.

Tax equivalent interest income for the third quarter of 2011 decreased \$359 thousand quarter over quarter. Average interest-earning assets increased \$25.1 million from 2010 and the yield on these assets decreased by 29 basis points. The average balance of investment securities increased \$2.9 million while average loans increased \$10.4 million (1.4%) quarter over quarter. Average commercial loans increased \$36.1 million, but the increase was partially offset by a decrease in the average balance of mortgage and consumer loans. Average mortgage loans decreased \$6.9 million, as the majority of new mortgage originations are sold in the secondary market and the portfolio continues to runoff. Average consumer loans, including home equity loans, decreased \$20.4 million, as consumers continue to borrow less during the economic recession and the indirect lending portfolio continues to run-off as the Bank exited this business in early 2010 and no new loans have been booked.

Interest expense was \$2.3 million for the third quarter, a decrease of \$779 thousand from the 2010 total of \$3.1 million. Average interest-bearing liabilities decreased \$1.2 million to \$796.7 million for 2011 from an average balance of \$797.9 million in 2010. The average cost of these liabilities decreased from 1.52% in 2010 to 1.14% in 2011. Average interest-bearing deposits increased \$40.9 million, due to increases in interest checking and savings accounts (\$15.2 million), and money management deposits (\$30.2 million), but this increase was somewhat offset by decreases in certificates of deposit (\$4.5 million). The cost of interest-bearing deposits decreased from 1.26% to 1.00%. Securities sold under agreements to repurchase (Repos) decreased \$2.2 million on average over the prior year quarter while the average rate remained constant at .25%. The average balance of long-term debt decreased by \$44.2 million due to scheduled amortization and maturities, as well as a prepayment of \$15.6 million on three Federal Home Loan Bank of Pittsburgh (FHLB) advances that occurred earlier in the year.

The changes in the balance sheet and interest rates resulted in an increase in tax equivalent net interest income of \$420 thousand to \$8.5 million in 2011 compared to \$8.1 million in 2010. The Bank's net interest margin increased from 3.53% to 3.61% in 2011. The increase in the net interest margin is the result of a decrease in the rate on interest-bearing liabilities of 38 basis points, while the yield on interest-earnings assets only decreased 29 basis points.

The following table shows a comparative analysis of average balances, asset yields and funding costs for the three months ended September 30, 2011 and 2010. These components drive changes in net interest income.

(Dollars in thousands)	2011		For the Three Months Ended September 30 2010					
	Average balance	Tax Equivalent Interest	Average yield/rate		Average balance	Tax Equivalent Interest	Average yield/rate	
Interest-earning assets								
Federal funds sold and interest-bearing balances	\$27,159	\$17	0.25	%	\$15,402	\$12	0.31	%
Investment securities	137,207	1,141	3.56	%	134,327	1,315	3.92	%
Loans	770,995	9,647	4.96	%	760,576	9,837	5.10	%
Total interest-earning assets	\$935,361	10,805	4.58	%	\$910,305	11,164	4.87	%
Interest-bearing liabilities								
Interest-bearing deposits	\$683,971	1,725	1.00	%	\$643,094	2,048	1.26	%
Securities sold under agreements to repurchase	63,642	40	0.25	%	61,480	38	0.25	%
Long-term debt	49,052	522	4.22	%	93,278	980	4.17	%
Total interest-bearing liabilities	\$796,665	2,287	1.14	%	\$797,852	3,066	1.52	%
Interest spread			3.44	%			3.35	%
Tax equivalent Net interest income/Net interest margin		8,518	3.61	%		8,098	3.53	%
Tax equivalent adjustment		(402)				(180)		
Net interest income		\$8,116				\$7,918		

All amounts have been adjusted to a tax-equivalent basis using a tax rate of 34%. Investments include the average unrealized gains or losses. Loan balances include nonaccruing loans and are gross of the allowance for loan losses.

Provision for Loan Losses

For the third quarter of 2011, the provision expense was \$2.8 million versus \$625 thousand in 2010. For more information concerning loan quality and the allowance for loan losses, refer to the Loan discussion in the Financial Condition section.

Noninterest Income

For the third quarter of 2011, noninterest income increased \$505 thousand from the same period in 2010. Investment and trust service fees increased \$69 thousand due to higher recurring asset management fees. Loan service charges decreased \$91 thousand as mortgage origination fees decreased due to lower consumer demand. Mortgage banking fees were flat, while deposit service charges decreased \$104 thousand due to lower retail overdraft fees and less retail and commercial checking service charge fees. Other service charges and fees increased \$69 thousand primarily due to an increase in ATM and debit card fees. The increase in cash surrender value of life insurance remained flat for the quarter, while other income increased \$52 thousand primarily due to a state sales tax refund. Securities gains of \$138 thousand were recorded during the quarter primarily from the sale of equity securities. There were no other than temporary impairment charges recorded during the quarter.

The following table presents a comparison of noninterest income for the three months ended September 30, 2011 and 2010:

(Dollars in thousands)	For the Three Months Ended		Change	
	September 30 2011	September 30 2010	Amount	%

Noninterest Expense

Noninterest expense for the third quarter of 2011 totaled \$7.0 million compared to \$6.6 million in the same quarter of 2010. The increase in salaries and benefits was primarily due to annual salary adjustments (\$191 thousand), as well as increases in health insurance expense (\$154 thousand), pension expense (\$66 thousand) and for an incentive compensation program (\$63 thousand). Legal and professional fees decreased due to lower legal fees in 2011, while FDIC insurance decreased \$46 thousand, as the FDIC assessment rate decreased. Other expenses increased \$134 thousand due to expenses related to the upgrade to the Bank's core processing system during the third quarter of 2011.

The following table presents a comparison of noninterest expense for the three months ended September 30, 2011 and 2010:

(Dollars in thousands)	For the Three Months Ended		Change	
	2011	2010	Amount	%

Total noninterest expense	\$ 6,996	\$ 6,635	\$ 361	5.4

Income taxes

For the third quarter of 2011 the Corporation recorded a Federal income tax benefit of \$301 thousand compared to income tax expense of \$763 thousand for the same quarter in 2010, due to a lower level of pre-tax income, due primarily to a higher provision for loan loss expense, that was offset by a higher proportion of tax free income to pre-tax income that resulted in less tax expense.

Comparison of the nine months ended September 30, 2011 to the nine months ended September 30, 2010:

Net Interest Income

Tax equivalent interest income for the first nine months of 2011 decreased by \$1.1 million compared to 2010. Average interest-earning assets increased \$11.4 million from 2010, but the yield on these assets decreased by 22 basis points. The average balance of investment securities decreased \$8.2 million year over year due to pay downs, maturities and sales in the portfolio, net of investment purchases. Total average loans increased \$10.7 million (1.4%) year over year. Average commercial loans increased \$37.0 million, but the increase was partially offset by a decrease in the average balance of mortgage and consumer loans. Average mortgage loans decreased \$5.4 million, as the majority of new mortgage originations are sold in the secondary market and the portfolio continues to runoff. Average consumer loans, including home equity loans, decreased \$21.0 million, as consumers continue to borrow less during the economic recession and the indirect lending portfolio continues to run-off as the Bank exited this business in early 2010 and no new loans have been booked.

Interest expense was \$7.1 million for the first nine months of 2011, a decrease of \$2.6 million from the 2010 total of \$9.7 million. Average interest-bearing liabilities decreased \$12.3 million to \$787.2 million for 2011 from an average balance of \$799.5 million in 2010. The average cost of these liabilities decreased from 1.61% in 2010 to 1.21% in 2011. Average interest-bearing deposits increased \$24.8 million, due to increases in interest checking and savings accounts (\$34.5 million), and money management deposits (\$38.8 million), but these increases were offset by decreases in certificates of deposit (\$28.1 million). The cost of interest-bearing deposits decreased from 1.37% to 1.03%. Securities sold under agreements to repurchase have decreased \$1.5 million on average over the prior year, but the average rate remained constant at .25%. The average balance of long-term debt decreased by \$35.8 million due to scheduled amortization and maturities, as well as prepayments of \$15.6 million on three Federal Home Loan Bank of Pittsburgh (FHLB) advances.

The changes in the balance sheet and interest rates resulted in an increase in tax equivalent net interest income of \$1.4 million to \$25.2 million in 2011 compared to \$23.8 million in 2010. The Bank's net interest margin increased from 3.47% to 3.67% in 2011. The increase in the net interest margin is primarily the result of a decrease in the rate on interest-bearing liabilities of 40 basis points that more than offset the decrease in the yield on interest-earning assets of 22 basis points.

The following table shows a comparative analysis of average balances, asset yields and funding costs for the nine months ended September 30, 2011 and 2010. These components drive changes in net interest income.

(Dollars in thousands)	For the Nine Months Ended September 30						
	2011	Tax		2010		Tax	
	Average balance	Equivalent Interest	Average yield/rate	Average balance	Equivalent Interest	Average yield/rate	
Interest-earning assets							
Federal funds sold and interest-bearing balances	\$22,843	\$43	0.25 %	\$13,892	\$26	0.25 %	
Investment securities	132,078	3,402	3.75 %	140,285	4,235	4.02 %	
Loans	764,697	28,905	5.05 %	753,994	29,191	5.14 %	
Total interest-earning assets	\$919,618	32,350	4.70 %	\$908,171	33,452	4.92 %	
Interest-bearing liabilities							
Interest-bearing deposits	\$668,317	5,153	1.03 %	\$643,526	6,611	1.37 %	
Securities sold under agreements to repurchase	60,507	113	0.25 %	62,028	116	0.25 %	
Short-term borrowings	238	1	0.73 %	74	-	0.64 %	
Long-term debt	58,114	1,837	4.23 %	93,889	2,930	4.17 %	
Total interest-bearing liabilities	\$787,176	7,104	1.21 %	\$799,517	9,657	1.61 %	
Interest spread			3.50 %			3.31 %	
Tax equivalent Net interest income/Net interest margin		25,246	3.67 %		23,795	3.47 %	
Tax equivalent adjustment		(1,151)			(686)		
Net interest income		\$24,095			\$23,109		

All amounts have been adjusted to a tax-equivalent basis using a tax rate of 34%. Investments include the average unrealized gains or losses. Loan balances include nonaccruing loans and are gross of the allowance for loan losses.

Provision for Loan Losses

The provision expense, year-to-date, was \$5.4 million versus \$1.9 million in 2010. For more information concerning loan quality and the allowance for loan losses, refer to the Loan discussion in the Financial Condition section.

Noninterest Income

For the first nine months of 2011, noninterest income increased 9.2% to \$7.4 million compared to \$6.7 million in the same period in 2010. Investment and trust service fees increased \$35 thousand due to higher recurring asset management fees. Loan service charges increased \$152 thousand primarily from a large prepayment penalty on a commercial loan. This loan was match funded with an FHLB advance and the fee to prepay the FHLB advance is recorded in other expense. Mortgage banking fees decreased year over year as 2011 had net impairment charges of \$145 thousand compared to a reversal of previously recorded impairment charges of \$12 thousand in 2010. In addition, mortgage-servicing income declined and 2010 contained \$32 thousand in gains on the sale of mortgage loans while none were recorded during the year in 2011. Deposit service charges decreased \$141 thousand due to a decrease in retail overdraft fees and a decrease in fees from the Bank's overdraft protection program. Other service charges and fees increased primarily due to a \$62 thousand increase in debit card fees and a \$28 thousand increase in ATM fees. Other income increased \$86 thousand due primarily to a state tax refund. Other than temporary impairment charges of \$55 thousand on two bonds were taken in 2011 compared to \$573 on two bonds and two equity securities in the first nine months of 2010. The Corporation also had realized gains of \$150 thousand on the sale of equity securities in 2011, compared to \$212 thousand in 2010.

The following table presents a comparison of noninterest income for the nine months ended September 30, 2011 and 2010:

(Dollars in thousands)	For the Nine Months Ended		Change	
	September 30 2011	September 30 2010	Amount	%
Noninterest Income				
Investment and trust services fees	\$ 2,943	\$ 2,908	\$35	1.2
Loan service charges	909	757	152	20.1

Securities gains (losses), net	150	212	(62)	(29.2)
Total noninterest income	\$ 7,362	\$ 6,744	\$618	9.2

Noninterest Expense

Noninterest expense for the first nine months of 2011 totaled \$21.5 million compared to \$19.8 million in the same period in 2010. The increase in salaries and benefits was primarily due to annual salary adjustments (\$464 thousand), as well as for an increase in health insurance (\$272 thousand), pension expense (\$198 thousand), and for an incentive compensation program (\$187 thousand). Legal and professional fees decreased due primarily to lower legal fees in 2011, which are down \$247 thousand compared to 2010. FDIC insurance decreased \$60 thousand, as the FDIC assessment rate decreased. Other expenses increased \$678 thousand due to \$344 thousand in prepayment penalties on three FHLB advances of \$15.6 million. The prepaid advances included \$12 million to prepay term loans with a high interest rate and \$3.6 million that was match funded to a commercial loan. The rates on the term loans were more than what the Corporation was earning on invested overnight funds and it will recoup this expense through the

remainder of 2011 as a result of the prepayment.

The following table presents a comparison of noninterest expense for the nine months ended September 30, 2011 and 2010:

(Dollars in thousands)	For the Nine Months Ended		Change	
	2011	2010	Amount	%
Noninterest Expense				
Salaries and benefits	\$ 11,392	\$ 10,147	\$ 1,245	12.3

Other	3,228	2,550	678	26.6
Total noninterest expense	\$ 21,450	\$ 19,820	\$ 1,630	8.2

Income taxes

For the first nine months of 2011, the Corporation recorded a Federal income tax benefit of \$102 thousand compared to \$2.2 million of income tax expense in 2010. During the second quarter of 2011, an internal review discovered that tax-exempt commercial loans booked in the fourth quarter of 2008, during 2009, 2010 and the first quarter of 2011 were not properly coded as tax-exempt in the Bank's core processing system. This resulted in the income from these loans being recorded as taxable income and the benefit of the tax-exempt status was not reflected in the Corporation's income tax calculation. After a thorough review of the affected loans to determine the unrecorded tax benefit, and consultation with the Corporation's internal and external audit firms, the Corporation deemed the adjustment to be immaterial to the consolidated financial statements for the current and prior year and therefore, no prior period adjustment was required. The Corporation recorded the past income tax benefits during the second quarter of 2011. The adjustment to income tax expense for the second quarter was a credit of approximately \$660 thousand attributable to the years 2008, 2009 and 2010 and approximately \$95 thousand attributable to the first quarter of 2011. This adjustment is reflected in the nine month period ended September 30, 2011. In addition, a lower level of pre-tax income in 2011, due primarily to a higher provision for loan loss expense, offset by a higher proportion of tax-exempt income also helped reduce income tax expense for the period. Without the adjustments for past periods, the effective tax rate for 2011 would have been 12.2%. Likewise, had the 2010 adjustment been recognized in 2010, the effective tax rate would have been 22.3% compared to 26.1% as reported. All taxable income for the Corporation is taxed at a rate of 34%.

Financial Condition

Summary:

At September 30, 2011, assets totaled \$996.9 million, an increase of \$45.1 million from the 2010 year-end balance of \$951.9 million. Investment securities increased \$14.0 million, while net loans increased \$17.6 million. Deposits were up \$55.0 million in 2011 due primarily to increases in noninterest-bearing and money management deposits. Shareholders' equity increased \$3.8 million during the first nine months as retained earnings increased approximately \$1.5 million, other comprehensive loss improved \$982 thousand and the Corporation's Dividend Reinvestment Plan (DRIP) added an additional \$1.3 million in new capital.

Investment Securities:

At September 30, 2011 the investment portfolio totaled \$131.6 million, approximately \$14 million more than at year-end 2010. The composition of the portfolio has not changed significantly during the year with a significant portion of the portfolio (46%) being held in U.S. Agency mortgage-backed securities. During the year, \$34.2 million of new purchases were made. The majority of these purchases (\$24.0 million) were agency mortgage backed securities that were added as collateral for secured deposits and Repos. Approximately \$5.0 million of tax-exempt municipal securities were also purchased. The investment portfolio had a net unrealized gain of \$563 thousand at September 30, 2011 compared to a net unrealized loss of \$1.0 million at year-end 2010. The largest unrealized losses were in the equity and trust preferred sectors, but these losses were offset by unrealized gains in the municipal and agency mortgage-backed securities sectors.

The equity portfolio is comprised of bank stocks and the Bank and the Corporation each maintain separate equity investment portfolios. The municipal bond portfolio is well diversified geographically (issuers from within 25 states) and is comprised primarily of general obligation bonds (79%). Most municipal bonds have credit enhancements in the form of private bond insurance or other credit support. The largest municipal bond exposure is to nineteen issuers in the state of Texas with a fair value of \$7.2 million. The Bank holds corporate bonds with a fair value \$2.5 million (3 issuers) representing financial services companies. The trust preferred investments are comprised of seven single issuer trust preferred securities with an amortized cost of \$5.9 million and a fair value of \$4.7 million. The majority of the mortgage-backed security portfolio is comprised of U.S. Government Agency products. However, the Bank has seven private-label mortgage backed securities (PLMBS) with an amortized cost of \$3.6 million and a fair value of \$3.3 million.

The amortized cost and estimated fair value of investment securities available for sale as of September 30, 2011 and December 31, 2010 are:

		\$ 3,631		\$ 3,270	\$ (361)				\$ 390

The investment portfolio contained 71 securities with \$40.0 million of temporarily impaired fair value and \$3.0 million in unrealized losses. This position is improved from year-end 2010 when there were 85 securities with an unrealized loss of \$3.2 million, but slightly worse than at June 30 as the overall market trended downward during the third quarter. The trust preferred investment category showed the largest improvement during the year as its unrealized loss declined by \$463 thousand. However, the improvement was offset by unrealized losses in the equity portfolio that increased \$438 thousand.

For securities with an unrealized loss, Management applies a systematic methodology in order to perform an assessment of the potential for “other-than-temporary” impairment. In the case of debt securities, investments considered for “other-than-temporary” impairment: (1) had a specified maturity or repricing date; (2) were generally expected to be redeemed at par, and (3) were expected to achieve a recovery in market value within a reasonable period of time. In addition, the Bank considers whether it intends to sell these securities or whether it will be forced to sell these securities before maturity. Equity securities are assessed for other-than-temporary impairment based on the length of time of impairment, dollar amount of the impairment and general market and financial conditions relating to specific issues. Accordingly, the impairments identified on debt and equity securities and subjected to the assessment at September 30, 2011 were deemed to be temporary and required no further adjustment to the financial statements, unless otherwise noted.

The following table reflects temporary impairment in the investment portfolio (excluding restricted stock), aggregated by investment category, length of time that individual securities have been in a continuous unrealized loss position and the number of securities in each category as of September 30, 2011 and December 31, 2010:

Total temporarily impaired securities	\$ 25,197	\$ (469)	33	\$ 18,879	\$ (2,750)	52	\$ 44,076	\$ (3,219)	85

At September 30, 2011, the unrealized loss in the equity portfolio was \$976 thousand on a fair value of \$1.8 million. The fair value of equities with an unrealized loss declined by \$1.5 million since year-end 2010. The reduction in the fair value is due in large part to the sale of more than 38,000 shares of Tower Bancorp during the year with a fair value of approximately \$880 thousand. The unrealized loss on equity securities increased by \$438 thousand with nearly all of this increase occurring during the third quarter as overall market prices for bank stocks moved down.

The unrealized loss in the trust preferred portfolio at September 30, 2011 is \$1.2 million compared to \$896 thousand at June 30, 2011 and \$1.7 million at year-end 2010. These securities show a significant price improvement since year-end, but general market conditions resulted in lower prices and higher unrealized losses during the third quarter. Trust-preferred securities can reflect single entity issues or a group of entities (pooled trust preferred). Pooled trust preferred securities have been the subject of significant write-downs due in some cases from the default of one issuer in the pool that then impairs the entire pool. All of the Bank's trust preferred securities are single issue, variable rate notes with long maturities (2027 – 2028) from companies that received money (and in some cases paid back) from the Troubled Asset Relief Program (TARP), continue to pay dividends and have raised capital. At September 30, 2011, the Bank believes it will be able to collect all interest and principal due on these bonds and no other-than-temporary-impairment charges were recorded. See the Trust Preferred Securities table for additional information.

The largest unrealized loss in the MBS portfolio is in the private-label PLMBS sector with a net unrealized loss of \$363 thousand. Six PLMBS have an unrealized loss of \$363 thousand, while one bond has a small unrealized gain of \$2 thousand. These bonds were all rated AAA at time of purchase, but have since have experienced rating declines. Some have experienced increased delinquencies and defaults, while others have seen the credit support increase as the bonds paid-down. The Bank monitors the performance of the PLMBS investments on a regular basis and reviews delinquencies, default rates, credit support levels and various cash flow stress test scenarios. In determining the credit related loss, Management considers all principal past due 60 days or more as a loss. If additional principal moves beyond 60 days past due, it will also be considered a loss. As a result of the analysis on PLMBS it was determined that two bonds contained losses that were considered other-than-temporarily impaired and an impairment charge of \$55 thousand was recorded during the second quarter of 2011. This charge represents the amount that Management believes is attributable to credit issues related to the two bonds. The market for PLMBS continues to be weak and Management believes that this factor accounts for the remaining portion of the unrealized losses that is not attributable to credit issues. There were no other-than-temporary charges recorded on PLMBS during the third quarter. Management continues to monitor these securities and it is possible that additional write-downs may occur if current loss trends continue. See the PLMBS table above for additional information.

The following table represents the cumulative credit losses on securities recognized in earnings as of September 30, 2011.

(Dollars in thousands)	Nine Months Ended September 30, 2011
Balance of cumulative credit losses on securities, January 1, 2011	\$ 335
Additions for credit losses recorded which were not previously recognized as components of earnings	55
Balance of cumulative credit losses on securities, September 30, 2011	\$ 390

The Bank held \$5.3 million of restricted stock at September 30, 2011. Except for \$30 thousand, this investment represents stock in FHLB Pittsburgh. The Bank is required to hold this stock to be a member of FHLB and it is carried at cost of \$100 per share. In December 2008, FHLB announced it would suspend its regular cash dividend and the regular repurchase of excess capital stock from its members as part of capital restoration plan. However, FHLB has made unscheduled stock repurchases of \$874 thousand during the year. Despite these purchases, FHLB has not resumed its past practice of redeeming excess capital stock on a regular basis. FHLB stock is evaluated for impairment primarily based on an assessment of the ultimate recoverability of its cost. As a government sponsored entity, FHLB has the ability to raise funding through the U.S. Treasury that can be used to support its operations. There is not a public market for FHLB stock and the benefits of FHLB membership (e.g., liquidity and low cost funding) add value to the stock beyond purely financial measures. Management intends to remain a member of the FHLB and believes that it will be able to fully recover the cost basis of this investment.

Loans:

Net loans increased \$17.6 million from year-end. Residential real estate loans, comprised of mortgage and home equity loans, decreased \$4.7 million from year-end 2010. First lien loans remained flat as the Bank sells the majority of new mortgage originations in the secondary market. The Bank originated approximately \$10.8 million in mortgage loans for sale this year through a third party brokerage agreement. The Bank collects a fee for originating these loans, but it does not retain or service the loans. Junior liens and lines of credit decreased \$4.6 million, as there is less demand from consumers for home equity products. Many consumers have seen the equity in their homes decline and are less willing to borrow money in the uncertain economy. Due to these facts, the Bank expects its residential real

estate loan portfolio to decline in future periods.

40

Residential real estate construction loans decreased \$61.2 million from the end of 2010 to \$18.4 million at September 30, 2011. The majority of this decrease is offset by the increase in the commercial real estate portfolio as loans were reclassified due to construction loans moving to an amortizing status and to more accurately reflect the collateral or purpose of the loan. The Bank's exposure to residential construction loans is concentrated primarily in south central Pennsylvania. This portfolio is comprised of \$778 thousand to individuals to build their own homes and \$17.6 million to developers to construct residential homes for sale or improve land for the sale of residential building lots. These balances compare to \$6.0 million to individuals and \$73.6 million to developers at year-end. Real estate construction loans, especially land development loans, frequently provide an interest reserve in order to assist the developer during the development stage when minimal cash flow is generated. All real estate construction loans are underwritten in the same manner, regardless of the use of an interest reserve. At September 30, 2011, the Bank had \$21.8 million in real estate loans with a Bank funded interest reserve and has capitalized \$2.1 million of interest from these reserves on active projects. Real estate construction loans are monitored on a regular basis by either an independent third party inspector or the assigned loan officer depending on loan amount or complexity of the project. This monitoring process includes at a minimum, the submission of invoices and AIA documents of costs incurred by the borrower, on-site inspections, and a signature by the assigned loan officer for disbursement of funds. Year-to-date, the Bank has recognized \$316 thousand of interest income that was funded by interest reserve accounts.

Commercial real estate loans (CRE) increased \$56.5 million during the first nine months of 2011. The commercial real estate portfolio includes \$109.1 million of owner occupied properties, \$130.2 million of non-owner occupied properties, \$70.8 million of construction and land development and \$38.1 million secured by farmland. Commercial, industrial and agricultural loans (C&I) increased \$30.5 million, primarily the result of loans to local municipalities (approximately \$11.5 million) and loans to commercial customers to fund business operations (approximately \$17.2 million). Included in the C&I portfolio is \$57.5 million of loans to government municipalities. During the first nine months of 2011, the Bank purchased \$12.2 million of loan participations, \$2.7 million of C&I loans, \$3.4 million included in residential real estate construction and \$6.1 million of commercial real estate loans. The Bank expects the amount of commercial loan participations available for purchase in 2011 to be similar to the \$17.4 million purchased in 2010. At September 30, 2011, the Bank held \$152.3 million in purchased commercial loan participations.

Consumer loans have decreased by approximately \$3.2 million, with most of the decrease occurring in the indirect lending portfolio. With the Bank's decision to exit this line of business in the first quarter of 2010, as well as the unwillingness of consumers to increase their debt, the consumer portfolio will continue to run-down.

The following table presents a summary of loans outstanding, by primary collateral as of:

(Dollars in thousands)	September 30, 2011	December 31, 2010	Change	
			Amount	%
Residential Real Estate 1-4 Family				
First liens	\$ 144,022	\$ 144,128	\$(106)	(0.1)
Junior liens and lines of credit	52,137	56,694	(4,557)	(8.0)
Total	196,159	200,822	(4,663)	(2.3)
Residential real estate - construction	18,377	79,557	(61,180)	(76.9)
Commercial, industrial and agricultural real estate	360,681	304,195	56,486	18.6
Commercial, industrial and agricultural	177,162	146,672	30,490	20.8
Consumer	14,227	17,396	(3,169)	(18.2)
	766,606	748,642	17,964	2.4
Less: Allowance for loan losses	(9,195)	(8,801)	(394)	4.5
Net Loans	\$ 757,411	\$ 739,841	\$ 17,570	2.4

Included in the loan balances are the following:

Net unamortized deferred loan costs	\$ 477	\$ 567		
Unamortized discount on purchased loans	\$ (180)	\$ (220)		

Loans pledged as collateral for borrowings and commitments from:

FHLB	\$ 665,637	\$ 648,272		
Federal Reserve Bank	42,925	53,682		
	\$ 708,562	\$ 701,954		

Loan Quality:

Management utilizes a risk rating system (1 – 9) to evaluate loan asset quality. It monitors loan asset quality by continually reviewing four measurements: (1) watch list loans (loans risk rated 6 or higher), (2) loan delinquency, (3) foreclosed real estate (other real estate owned or OREO), and (4) net-charge-offs. Management compares trends in these measurements with its national and local peer group's average measurements.

Loans that are risk rated 6 (OAEM) or lower are placed on the watch list. At September 30, 2011, there was \$81.4 million on the watch list, down slightly from \$83.3 million at June 30, 2011, but up from \$69.9 million at December 31, 2010. The watch list is comprised of \$46.8 million of loans with a risk rating of 6 and \$34.6 million of loans with a risk rating of 7. The watch list is a comprehensive list of loans that the Bank has identified as needing increased monitoring, usually because of indications that the borrower is, or is likely to be, in a position of weakening cash flow that may require alternative sources of cash, or collateral liquidation to pay the loan. Included on the watch list are loans that may or may not be delinquent or on nonaccrual, loans that may or may not be considered impaired (including troubled debt restructurings), and potential problem loans. The Bank's Loan Management Committee reviews the watch list and risk ratings on a monthly basis in order to proactively identify and manage loan problems.

A loan is considered impaired when, based on current information and events, it is probable that the Bank will be unable to collect all interest and principal payments due according to the originally contracted terms of the loan agreement. Impaired loans totaled \$33.6 million on September 30, 2011 compared to \$37.0 million and \$33.2 million at June 30, 2011 and December 31, 2010, respectively. The majority of the impaired loan balance is in commercial and agriculture real estate, \$22.6 million. The Bank has \$13.5 million of impaired loans with no loss reserve and \$20.1

million with an established loss reserve of \$4.7 million. See the Loan Quality Note to the Consolidated Financial Statements for additional information on impaired loans.

A loan is considered a troubled debt restructuring (TDR) if the creditor (the Bank), for economic or legal reasons related to the debtor's financial difficulties, grants a concession to the debtor that it would not otherwise consider. The Bank has 29 loan contracts, between 8 borrowers classified as TDR loans for \$11.1 million up from 2 loan contracts totaling \$656 thousand at December 31, 2010. Performing TDR loans totaled \$6.4 million and \$4.7 million are nonperforming. When a loan is newly classified as a TDR, it is reviewed for nonaccrual status. If the loan is put on nonaccrual, it is on nonaccrual status for a period of at least 6 months in order to ensure it can perform in accordance with its restructured terms. During this period, if the loan performs, interest is recognized on a cash basis. Of the \$4.7 million of TDR on nonaccrual, \$2.7 million represents one new TDR loan. There is one TDR for \$462 thousand that is past due 90 days or more and is considered not to be performing in accordance with its restructured terms. One loan classified as a TDR (\$2.7 million) during the third quarter represents the Bank's restructured portion of a large shared national credit. This credit was comprised of several loans to related entities and principals of the shared national credit. All of the loans were restructured into one performing "A" note and a nonperforming "B" note. The "B" note was charged-off at restructuring in the third quarter and the Bank recorded a charge-off of \$1.9 million on its share of the "B" note. The Bank's "A" note is \$2.7 million and is currently carried as a nonaccrual loan. The Bank expects that the borrower will be able to perform under the restructured terms and that it will be able to be returned to accrual status after 6 months of performance. It is possible that the Bank will continue to report higher levels of TDR loans as more businesses experience economic hardship and seek loan concessions. See the Loan Quality Note to the Consolidated Financial Statements for additional information on TDR loans.

Potential problem loans are loans where the borrowers may or may not be able to comply with current loan terms (the Bank's watch list), but exclude loans that are 90 days or more past due and nonaccrual loans. Potential problem loans totaled \$55.2 million at September 30, 2011 compared to \$55.1 million at June 30, 2011 and \$42.4 million at year-end 2010.

Delinquent loans are a result of borrowers' cash flow and/or alternative sources of cash being insufficient to pay loans. The Bank's likelihood of collateral liquidation to repay the loans becomes more probable the further behind a borrower falls, particularly when loans reach 90 days or more past due. Management's primary delinquent loans measurements are loans 30-89 days past due, and nonperforming loans (90 days or more past due or nonaccrual loans). Nonaccrual loans generally represent Management's determination that collateral liquidation is not likely to fully repay both interest and principal.

It is the Bank's policy to evaluate the probable collectability of principal and interest due under the terms of loan contracts for all loans 90-days or more past due or restructured loans. Further, it is the Bank's policy to discontinue accruing interest on loans that are not adequately secured and in the process of collection. When a loan is placed on nonaccrual status, any current year accrued interest is subtracted from its current period income, and any prior year accrued interest is charged-off from the allowance for loan losses.

Loan quality, as measured by nonperforming loans, is virtually unchanged during 2011 and nonperforming loans totaled \$26.2 million at September 30, 2011 compared to \$32.7 million at June 30, 2011 and \$27.5 million at year-end 2010. While the balance of nonperforming loans declined, much of this decrease is due to loans being charged-off or transferred to other real estate owned (OREO). Loans past due 90 days or more and still accruing increased \$1.3 with both residential and commercial real estate showing increases during the year. Nonaccrual loans fell by \$2.6 million from year-end 2010, primarily the result of a payoff on a large nonaccrual loan (\$2.2 million) in January 2011. During the second quarter of 2011, \$3.7 million was added to nonaccrual status related to three loans to one borrower in the residential real estate construction sector. In the third quarter, this property was moved to OREO as the result of accepting a deed-in-lieu of foreclosure from the developer. The loan was moved to OREO at a fair value of \$2.4 million after a charge-off of \$1.3 million. The fair value was determined by a new appraisal value that was 60% less than the property appraised for 2 years earlier. Also during the third quarter, the TDR loan of \$2.7 million previously discussed, was added to nonaccrual. The ratio of nonperforming loans to total gross loans fell from 3.68% at December 31, 2010 to 3.41% at September 30, 2011. If the slow economy continues, it is possible that other loans

may become delinquent and nonperforming loans could remain at a high level. See the Notes to the Consolidated Financial Statements for additional information on past due loans and internal loan credit risk ratings.

The following table presents a summary of nonperforming assets:

(Dollars in thousands)	September 30, 2011			December 31, 2010		
	Balance	% of Loan Segment		Balance	% of Loan Segment	
Nonaccrual loans						
Residential Real Estate 1-4 Family						
First liens	\$1,449	1.01	%	\$691	0.48	%
Junior liens and lines of credit	515	0.99	%	122	0.22	%
Total	1,964	1.00	%	813	0.40	%
Residential real estate - construction	-	0.00	%	6,500	8.17	%
Commercial, industrial and agricultural real estate	13,204	3.69	%	13,003	4.27	%
Commercial, industrial and agricultural	4,186	2.33	%	1,668	1.14	%
Consumer	-	-		-	-	
Total nonaccrual loans	\$19,354			\$21,984		
Loans past due 90 days or more and not included above						
Residential Real Estate 1-4 Family						
First liens	\$2,805			\$1,093

Commercial, industrial and agricultural	357			244		
Consumer	22			125		
Total loans past due 90 days or more and still accruing	6,807			5,549		
Total nonperforming loans	26,161			27,533		
Other real estate owned	3,337			618		
Total nonperforming assets	\$29,498			\$28,151		
Restructured Loans (TDRs)						
Performing	\$6,414			\$656		
Non-performing (included above)	4,674			-		
Total TDRs	\$11,088			\$656		
Nonaccrual loans to total gross loans	2.52	%		2.94	%	
Nonperforming loans to total gross loans	3.41	%		3.68	%	
Nonperforming assets to total assets	2.96	%		2.96	%	
Allowance for loan losses to nonperforming loans	35.15	%		31.97	%	

The majority of the \$19.4 million nonaccrual loan balance is comprised of five loan relationships totaling \$14.5 million. The following table provides additional information on the most significant nonaccrual accounts:

Significant Nonaccrual Loans September 30, 2011					
(Dollars in thousands)	Origination Date	Balance	ALL Reserve	Nonaccrual Date	Collateral
Credit 1 Residential real estate construction and development , 1-4 family	2006	\$1,010	\$525	May-09	1st lien residential building lots
Credit 2 Agricultural 4 separate notes	2004 - 2006	1,549	-	Mar-09	1st and 2nd lien on agricultural real estate, farm equipment, livestock and a 70% FSA guarantee on a \$352 thousand note
Credit 3 Agricultural 7 separate notes	2005 - 2010	2,746	396	Dec-10	1st, 2nd and 3rd lien on 600+ acres of farm real estate, equipment and inventory
Credit 4 Commercial real estate	2008	6,500	1,787	Dec-10	1st lien on 92 acres undeveloped commercial real estate
Credit 5 Commercial real estate	2011	2,663	0	Sep-11	Liens on commerical real estate - performance theaters and business assets
		\$14,468	\$2,708		

(1) Appraisal value, as reported, does not reflect the pay-off of any senior liens or any adjustment to reflect the cost to liquidate the collateral.

Since December 31, 2010, the Bank received a partial pay down of approximately \$1 million and charged-off \$400 thousand on Credit 1. Credit 5 represents the Bank's portion of the shared national credit that was previously discussed. All other credits are essentially unchanged since year-end 2010.

The Bank holds \$3.3 million of other real estate owned (OREO), comprised of various types of real estate. The largest piece of OREO is several pieces of land (\$2.4 million) intended for residential real estate development. These properties were obtained as the result of accepting a deed-in-lieu of foreclosure from the developer. The loan was moved to OREO at a fair value of \$2.4 million after a charge-off of \$1.3 million. The fair value was determined by a new appraisal value that was 60% less than the property appraised for 2 years earlier.

The following table provides additional information on the foreclosed real estate:

Other Real Estate Owned September 30, 2011					
(Dollars in thousands)	Date Acquired	Balance	Collateral	Location	Last Appraisal
Property 1	2011	\$ 2,383	unimproved and improved real estate for residential development on four separate tracts totaling 150 acres	PA	Aug-11
Property 2	2011	536	townhouses and residential building lots	PA	Jun-11
Property 3	2011	31	residential real estate	PA	Sep-11
Property 4	2011	25	residential real estate	PA	Nov-10
Property 5	2009	138	farmland - 36 acres	PA	Feb-11
Property 6	2011	59	residential real estate	PA	Dec-10
Property 7	2011	165	commercial real estate	PA	Nov-10
		\$ 3,337			

A contract for the sale of property 7 was signed in October 2011. If the sale is completed, the Bank would recognize a loss of approximately \$5 thousand on the sale. Management continually monitors the status of nonperforming loans, the value of any collateral and potential of risk of loss.

Allowance for Loan Losses:

Management performs a monthly evaluation of the adequacy of the allowance for loan losses. Consideration is given to a variety of factors in establishing this estimate including, but not limited to, current economic conditions, diversification of the loan portfolio, delinquency statistics, historical charge-off experience, results of internal loan reviews, borrowers' actual or perceived financial and managerial strengths, the adequacy of the underlying collateral (if collateral dependent) and other relevant factors. It is Management's general practice to obtain a new appraisal or asset valuation for any loan that it has rated as substandard or higher, including nonaccrual. Management, at its discretion, may determine that additional adjustments to the appraisal or valuation are required. Valuation adjustments will be made as necessary based on other factors, including, but not limited to the economy, deferred maintenance, industry, type of property/equipment etc and the knowledge Management has about a particular situation. In addition, the cost to sell or liquidate the collateral is also estimated when determining the realizable value to the Bank.

Real estate appraisals and collateral valuation are an important part of the Bank's process for determining potential loss on collateral dependent loans and thereby have a direct affect on the determination of loan charge-offs and the calculation of the allowance for loan losses. As long as the loan remains a performing loan, no further updates to appraisals are required. If a loan/relationship migrates to watch list status, an evaluation for impairment is made based on the current information available at the time of downgrade. If a loan reaches an OAEM rating or higher, including nonaccrual, Management determines the need to obtain a new or updated appraisal based on several factors, including general economic conditions and factors specific to the loan. We believe this practice complies with the new regulatory guidance dated December 12, 2010 and could potentially increase the Bank's allowance for loan loss provision, depending on the results of the new appraisals.

Certain factors involved in the evaluation are inherently subjective, as they require material estimates that may be susceptible to significant change, including the amounts and timing of future cash flows expected to be received on impaired loans.

The analysis for determining the ALL is consistent with guidance set forth in generally accepted accounting principles (GAAP) and the Interagency Policy Statement on the Allowance for Loan and Lease Losses. The analysis has two components, specific and general allocations. The specific component addresses specific reserves established for impaired loans. A loan is considered to be impaired when, based on current information and events, it is probable that the Bank will be unable to collect all interest and principal payments due according to the originally contracted terms of the loan agreement. Expected cash flow or collateral values discounted for market conditions and selling costs are used to establish specific allocations.

The general component addresses the reserves established for pools of homogenous loans. The general component includes a quantitative and qualitative analysis. The quantitative analysis includes the Bank's historical loan loss experience (calculated over a two-year rolling average) and other factors derived from economic and market conditions that have been determined to have an affect on the probability and magnitude of a loss. The qualitative analysis utilizes a risk matrix that incorporates qualitative and environmental factors such as: loan volume, management, nonperforming loans, loan review process, credit concentrations, competition, and legal and regulatory issues. Input for these factors is determined on the basis of Management's observation, judgment and experience. As a result of this input, additional loss percentages are assigned to each pool of loans.

The following table shows the loans that were evaluated for the allowance for loan losses under a specific reserve (individually) and those that were evaluated under a general reserve (collectively), and the amount of the allowance established in each category as of September 30, 2011:

(Dollars in thousands)	Residential Real Estate 1-4 Family Junior Liens & Lines of Credit First Liens	Construction	Commercial Industrial & Agricultural Real Estate	Commercial Industrial & Agricultural Consumer	Consumer	Total	
September 30, 2011							
Loans evaluated for allowance:							
Individually	\$ 5,619	\$ 382	\$ -	\$ 22,571	\$ 5,055	\$ -	\$ 33,627
Collectively	138,403	51,755	18,377	338,110	172,107	14,227	732,979
Total	\$ 144,022	\$ 52,137	\$ 18,377	\$ 360,681	\$ 177,162	\$ 14,227	\$ 766,606
ALL established for loans evaluated:							
Individually	\$ 810	\$ 3	\$ -	\$ 2,566	\$ 1,310	\$ -	\$ 4,689
Collectively	345	329	490	2,150	836	356	4,506
ALL at September 30, 2011	\$ 1,155	\$ 332	\$ 490	\$ 4,716	\$ 2,146	\$ 356	\$ 9,195

During the third quarter, \$2.8 million was added to the allowance for loan losses (ALL) through the provision for loan loss expense. This compares to a provision expense of \$625 thousand for the third quarter of 2010. The third quarter provision expense includes approximately \$1.3 million needed to restore the ALL after charging off a loan prior to moving it to OREO. During the third quarter of 2011, the Bank received an updated appraisal, which indicated a value of 60% less than the previous appraisal. Year-to-date, the provision expense was \$5.4 million compared to \$1.9 million in 2010. The year-to-date provision expense added to the ALL slightly exceeded net charge-offs (\$5.0 million) and the ALL increased from \$8.8 million at year-end 2010 to \$9.2 million at September 30, 2011. The ALL as a percentage of loans improved to 1.20% from 1.18% at December 31, 2010.

Charged-off loans usually result from: (1) a borrower being legally relieved of loan repayment responsibility through bankruptcy, (2) insufficient collateral sale proceeds to repay a loan; or (3) the borrower and/or guarantor does not own other assets that, if sold, would generate sufficient sale proceeds to repay a loan.

The Bank recorded net loan charges-off of \$5.0 million for the year compared to \$419 thousand for the first nine months of 2010. Residential real estate construction loans recorded the largest gross charge-offs for the year of \$2.3 million. The annualized net loan charge-off ratio was .88% compared to .12% for the same period in 2010 and .45% at the end of 2010.

The following table presents an analysis of the allowance for loan losses for the periods ended:

(Dollars in thousands)	Residential Real Estate 1-4 Family			Commercial Industrial & Agricultural	Commercial Industrial & Consumer		Total
	First Liens	Junior Liens & Lines of Credit	Construction	Real Estate	Agricultural	Consumer	
ALL at June 30, 2011	\$529	\$ 313	\$ 2,392	\$4,644	\$ 1,861	\$411	\$10,150

				September 30, 2011	December 31, 2010	September 30, 2010	
Net loans charged-off as a percentage of average gross loans				0.88 %	0.45 %	0.12 %	
				92.76 %	104.20 %	34.88 %	

Net loans charged-off as a percentage of the provision for loan losses

Allowance as a percentage of loans	1.20	%	1.18	%	1.29	%
Net charge-offs	\$ 5,048		\$ 3,371		\$ 436	

Management monitors the adequacy of the allowance for loan losses on an ongoing basis and reports its adequacy quarterly to the Credit Risk Oversight Committee of the Board of Directors. Management believes that the ALL at September 30, 2011 is adequate.

Other Assets:

Other assets include intangible assets, comprised of a core deposit intangible and a customer list that are being amortized over the estimated useful life of the asset. The Bank holds \$3.3 million of OREO, comprised of various types of real estate. The largest piece of OREO is several pieces of land (\$2.4 million) intended for residential real estate development. For additional information, see the OREO table in the Loan Quality section of the MD&A.

Deposits:

Total deposits increased \$55.0 million during the first nine months of 2011 to \$789.3 million. Non-interest bearing deposits increased \$15.3 million, while savings and interest-bearing checking increased \$37.0 million while time deposits increased \$2.8 million. The increase in non-interest bearing checking accounts came from small business checking accounts (\$2.0 million) and retail checking accounts (\$2.9 million). The Bank's Money Management product increased \$3.0 million due primarily to an increase in retail accounts. Retail time deposits decreased since year-end, as customers moved funds to more liquid accounts. However, brokered CDs increased \$11.7 million, which includes new brokered CDs of \$9.2 million. As of September 30, 2011, the Bank had \$32.7 million in CDARS reciprocal deposits included in brokered time deposits.

The following table presents a summary of deposits outstanding at:

(Dollars in thousands)	September 30, 2011	December 31, 2010	Change	
			Amount	%
Demand, noninterest-bearing checking	\$ 105,596	\$ 90,317	\$ 15,279	16.9
Interest-bearing checking	109,510	103,918	5,592	5.4
Money market accounts	316,996	289,763	27,233	9.4
Savings accounts	52,289	48,138	4,151	8.6
Total interest-bearing checking and savings	478,795	441,819	36,976	8.4
Retail time deposits	152,422	161,399	(8,977)	(5.6)
Brokered time deposits	52,533	40,796	11,737	28.8
Total time deposits	204,955	202,195	2,760	1.4
Total deposits	\$ 789,346	\$ 734,331	\$ 55,015	7.5
Overdrawn deposit accounts reclassified as loan balances	\$ 110	\$ 74		

Borrowings:

The balance of securities sold under agreements to repurchase, which are accounted for as collateralized financings, increased \$12.1 million from year-end and the long-term debt from the FHLB decreased \$22.0 million due to the repayment of three term loans for \$15.6 million as well as scheduled amortization and maturities.

Shareholders' Equity:

Total shareholders' equity increased \$3.8 million to \$86.5 million at September 30, 2011, compared to \$82.6 million at the end of 2010. The increase in retained earnings from the Corporation's net income of \$4.7 million was partially offset by the cash dividend of \$3.2 million. The Corporation's dividend payout ratio is 68.4% compared to 50.6% in 2010. This payout ratio is higher than the Corporation normally pays out and is the result of lower income in 2011. As part of its quarterly dividend decision, the Corporation considers current and future income projections, dividend yield, payout ratio, and current and future capital ratios. In addition, the Corporation considers how dividend decisions may affect the Dividend Reinvestment Plan (DRIP), which has raised \$1.3 million in new capital this year. The Corporation continually explores other sources of capital as part of its capital management plan for the Corporation and the Bank. The Corporation did not repurchase any shares of the Corporation's common stock during the first nine months of 2011.

Effective September 30, 2010, the Corporation amended its Dividend Reinvestment Plan for shareholders electing to purchase additional shares of the Corporation's common stock by reinvesting cash dividends paid on their shares or through optional cash payments. Under the amended plan, the Corporation has modified the minimum and maximum amounts that may be invested pursuant to the voluntary cash payment option under the plan, provided for the investment of voluntary cash payments as frequently as weekly, permitted participants to make voluntary cash payments via direct draft (ACH transfer); and modified the formula for determining the purchase price with respect to shares purchased under the plan directly from the Corporation. The Corporation also authorized an additional one million (1,000,000) shares of common stock. Year-to-date, the DRIP added \$1.3 million to capital with 78 thousand new shares issued.

Capital adequacy is currently defined by regulatory agencies through the use of several minimum required ratios. At September 30, 2011, the Corporation was well capitalized as defined by the banking regulatory agencies. Regulatory capital ratios for the Corporation and the Bank are shown below:

	September 30, 2011		December 31, 2010		Regulatory Ratios Well Capitalized			
					Minimum		Minimum	
Total Risk Based Capital Ratio (1)								
Franklin Financial Services Corporation	11.76	%	11.73	%	8.00	%	n/a	
Farmers & Merchants Trust Company	11.14	%	11.22	%	8.00	%	10.00	%
Tier 1 Capital Ratio (2)								
Franklin Financial Services Corporation	10.56	%	10.54	%	4.00	%	n/a	
Farmers & Merchants Trust Company	9.93	%	10.02	%	4.00	%	6.00	%
Leverage Ratio (3)								
Franklin Financial Services Corporation	8.07	%	8.16	%	4.00	%	n/a	
Farmers & Merchants Trust Company	7.55	%	7.73	%	4.00	%	5.00	%

Economy

The Corporation's primary market area includes Franklin, Fulton, Cumberland and Huntingdon County, PA. This area is diverse in demographic and economic makeup. County populations range from a low of approximately 15,000 in Fulton County to over 230,000 in Cumberland County. At September 30, 2011, the unemployment rate for Pennsylvania was 8.1% and the national rate was 9.3%, while the unemployment rate in the Corporation's market area ranged from 6.8% in Cumberland County to 10.4% in Fulton County. The unemployment rates for the Bank's market area have remained high during the last three years along with state and national rates. As the recession lingers, housing prices have improved slightly over prior year, while mortgage delinquencies are consistent from the end of 2010.

The following table presents economic data for the Bank's primary market area:

Economic Data	September 30,		December 31,	
	2011		2010	
Unemployment Rate (seasonally adjusted)				
Market area range (1)	6.8 - 10.4	%	7.3% - 12.5	%
Pennsylvania	8.1	%	8.9	%
United States	9.3	%	9.6	%
Housing Price Index - year over year change				
PA, nonmetropolitan statistical area	-1.4	%	-1.5	%
United States	-4.5	%	-1.2	%
Franklin County Building Permits - year over year change				
Residential, estimated	-8.9	%	26.8	%
Multifamily, estimated	-59.5	%	-10.9	%

(1) Franklin, Cumberland, Fulton and Huntingdon Counties

Unlike many companies, the assets and liabilities of the Corporation are financial in nature. As such, interest rates and changes in interest rates may have a more significant effect on the Corporation's financial results than on other types of industries. Because of this, the Corporation watches the actions of the Federal Reserve Open Market Committee (FOMC) as it makes decisions about interest rate changes. The Fed continues to hold the fed funds target rate steady at .25% and has indicated that it could maintain this level until 2013. This decision, coupled with other Fed actions, seems to indicate that the yield curve will continue to create an environment that is not conducive to bank earnings.

Regulatory Issues

On July 21, 2010, the President signed the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank). This legislation is one of the most comprehensive reform bills ever introduced to the financial services industry. Financial service providers from small community banks to the largest Wall Street firms will be affected by this legislation. Many of aspects of this Act will take effect over several years and the Corporation is still reviewing the details of the Act. At this time, it is difficult to predict the extent to which each component of Dodd-Frank will affect the Corporation. However, it is likely that the Act will impose a greater regulatory burden on the Corporation and increase its cost of compliance. Some of the key provisions included in Dodd-Frank that are likely to affect the Corporation are:

Consumer Financial Protection Bureau (CFPB). The CFPB has been created to set rules and regulations regarding consumer lending activities. Banks with less than \$10 billion in assets are exempt from examination by the CFPB, but the CFPB can require community banks to submit any information it requests for review. The CFPB will also require new disclosure requirements for all banks.

FDIC Insurance. Changes include permanently increasing the insurance limit to \$250,000, changing the assessment base from a deposit-based calculation to an asset-based calculation, and extending unlimited FDIC insurance on certain non-interest bearing depository accounts through December 31, 2012. The new assessment calculation method is effective for the second quarter assessment.

Corporate Checking. The prohibition against paying interest on corporate checking accounts has been lifted effective July 21, 2011. The Bank is currently researching the best way to take advantage of this change. The Bank currently offers a sweep Repo product that it currently uses, for all intents and purposes, to pay interest on corporate checking accounts. The net effect on interest expense cannot currently be determined, but will be dependent on the type customers' response to this new product. Any reduction in the Repo product balance will improve the Bank's liquidity by freeing up securities used as collateral.

Debit Card Fees. The Durbin Amendment to Dodd-Frank requires that the amount of any interchange fee charged by a debit card issuer must be reasonable and proportional to the cost incurred by the issuer. On June 29, 2011 the Federal Reserve released its final rule on debit card interchange fees to be effective October 1, 2011. The new rule establishes a base fee cap of 21 cents plus 5 basis points of the transaction amount to cover fraud losses. This rate cap applies only to banks with assets greater than \$10 billion and at present, the Bank believes its card vendors will be able to successfully implement a two-tiered pricing system. However, if the tiered pricing model does not work, and market forces push the regulated prices down to all banks, the Bank could lose a substantial amount of fee income.

Mortgage Licensing. Residential mortgage loan originators must register with the Nationwide Mortgage Licensing System and Registry. This registry is a database created by the states to support the licensing of mortgage originators. Employees of agency-related institutions must register prior to originating residential mortgage loans. This requirement will increase compliance costs for the Bank. The Bank has registered all required personnel.

Appraisals. New appraisal guidance sets forth the minimum regulatory standard for appraisals. It requires institutions to utilize strong internal controls to ensure reliable appraisals and evaluations to monitor and periodically update valuations of collateral for existing real estate loans. This is expected to increase compliance costs for the Corporation.

Compensation. At least once every three years, companies must conduct a non-binding shareholder vote (say-on-pay) to approve the compensation of the CEO and the company's "named executive officers". At least once every 6 years, shareholders must also vote on whether to hold the non-binding vote on executive compensation every 1, 2, or 3 years. Additionally, banking regulators have established guidance that prohibits incentive-based compensation arrangements that encourage inappropriate risks that could lead to material financial loss to the institution. Bank compensation plans will be required to be submitted to the appropriate regulator for review and monitoring of compliance. This is expected to increase compliance costs for the Corporation.

Liquidity

The Corporation must meet the financial needs of the customers that it serves, while providing a satisfactory return on the shareholders' investment. In order to accomplish this, the Corporation must maintain sufficient liquidity in order to respond quickly to the changing level of funds required for both loan and deposit activity. The goal of liquidity management is to meet the ongoing cash flow requirements of depositors who want to withdraw funds and of borrowers who request loan disbursements. The Bank regularly reviews its liquidity position by measuring its projected net cash flows (in and out) at a 30 and 90-day interval. The Bank stresses this measurement by assuming a level of deposit out-flows within 30 days that have not historically been realized. In addition to this forecast, other funding sources are reviewed as a method to provide emergency funding if necessary. The objective of this measurement is to identify the amount of cash that could be raised quickly without the need to liquidate assets. The Bank also stresses its liquidity position utilizing different longer-term scenarios. The varying degrees of stress create pressure on deposit flows in its local market, reduce access to wholesale funding and limit access to funds available through brokered deposit channels. In addition to stressing cash flow, specific liquidity risk indicators are monitored to help identify risk areas. This analysis helps identify and quantify the potential cash surplus/deficit over a variety of time horizons to ensure the Bank has adequate funding resources. The Bank believes it can meet all anticipated liquidity demands.

Historically, the Corporation has satisfied its liquidity needs from earnings, repayment of loans and amortizing investment securities, maturing investment securities, loan sales, deposit growth and its ability to access existing lines of credit. All investments are classified as available for sale; therefore, securities that are not pledged as collateral for borrowings are an additional source of readily available liquidity, either by selling the security or, more preferably, to provide collateral for additional borrowing. However, at September 30, 2011, the Bank had approximately \$121 million (fair value) or 93% of its investment portfolio pledged as collateral. The primary source of liquidity for the Bank is a line of credit with the FHLB. At September 30, 2011, the Bank had approximately \$169 million available on this line of credit.

The Bank also has \$26 million in unsecured lines of credit at three correspondent banks and approximately \$24 million in funding available at the Federal Reserve Discount Window. The Bank also has the ability to access other funding sources including wholesale borrowings and brokered CDs. The Bank's ability to access brokered CDs could be negatively affected if its capital level was to fall below "well capitalized."

Off Balance Sheet Commitments and Contractual Obligations

The Corporation's financial statements do not reflect various commitments that are made in the normal course of business, which may involve some liquidity risk. These commitments consist mainly of unfunded loans and letters of credit made under the same standards as on-balance sheet instruments. Because these instruments have fixed maturity dates, and because many of them will expire without being drawn upon, they do not generally present any significant liquidity risk to the Corporation. Unused commitments and standby letters of credit totaled \$256.0 million and \$219.3 million, respectively, at September 30, 2011 and December 31, 2010.

The Corporation has entered into various contractual obligations to make future payments. These obligations include time deposits, long-term debt, operating leases, deferred compensation and pension payments. These amounts have not changed materially from those reported in the Corporation's 2010 Annual Report on Form 10-K.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

There were no material changes in the Corporation's exposure to market risk during the three months ended September 30, 2011. For more information on market risk refer to the Corporation's 2010 Annual Report on Form 10-K.

Item 4. Controls and Procedures

Evaluation of Controls and Procedures

The Corporation carried out an evaluation, under the supervision and with the participation of the Corporation's management, including the Corporation's Chief Executive Officer and Chief Financial Officer, of the effectiveness of its disclosure controls and procedures, as defined in Exchange Act Rules 13a-15(e) and 15d-15(e). Based upon the evaluation, the Corporation's Chief Executive Officer and Chief Financial Officer concluded that as of September 30, 2011, the Corporation's disclosure controls and procedures are effective. Disclosure controls and procedures are controls and procedures that are designed to ensure that information required to be disclosed in the Corporation's reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

The management of the Corporation is responsible for establishing and maintaining adequate internal control over financial reporting. The Corporation's internal control system is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Changes in Internal Controls

During the second quarter, an internal review discovered that tax-exempt commercial loans booked during the fourth quarter of 2008, 2009, 2010 and the first quarter of 2011 were not properly coded as tax-exempt. This resulted in the income from these loans being recorded as taxable income and the benefit of the tax-exempt status was not reflected in the Corporation's income tax calculation. This discovery led Management to the conclusion that there was failure of internal controls designed to prevent such errors. After discovery of the error, Management implemented a new process that requires a member of its Risk Management division to assign the appropriate code to the loan before it is booked, and for another member of its Risk Management division to review the code after the loan is booked. In addition, the Bank's Loan Servicing department has a dual control process to post and review loan data, and the authority to select or change existing coding has been more clearly defined. With the implementation of these new processes, Management believes that it has remediated the control weakness that was identified. During July 2011, the Bank upgraded its core processing system. We are currently reviewing all controls and procedures to ensure compliance with the new system.

Part II – OTHER INFORMATION

Item 1. Legal Proceedings

The nature of the Corporation's business generates a certain amount of litigation involving matters arising in the ordinary course of business. However, in management's opinion, there are no proceedings pending to which the Corporation is a party or to which our property is subject, which, if determined adversely to the Corporation, would be material in relation to our shareholders' equity or financial condition. In addition, no material proceedings are pending or are known to be threatened or contemplated against us by governmental authorities or other parties.

Item 1A. Risk Factors

There were no material changes in the Corporation's risk factors during the nine months ended September 30, 2011. For more information, refer to the Corporation's 2010 Annual Report on Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The Corporation announced a stock repurchase plan on July 8, 2010 to repurchase up to 100,000 shares of the Corporation's common stock over a 12 month time period. There were no shares purchased in 2011 and this plan expired on July 8, 2011. The Corporation did not issue any unregistered equity securities during the quarter ended September 30, 2011.

Item 3. Defaults by the Company on its Senior Securities

None

Item 4. Removed and Reserved

Item 5. Other Information

None

Item 6. Exhibits

Exhibits
