Form 10-Q

OVERSEAS SHIPHOLDING GROUP, INC. AND SUBSIDIARIES

Note 1 — Basis of Presentation:

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. They do not include all of the information and footnotes required by generally accepted accounting principles. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair statement of the results have been included. Operating results for the three months ended March 31, 2012 are not necessarily indicative of the results that may be expected for the year ending December 31, 2012.

The consolidated balance sheet as of December 31, 2011 has been derived from the audited financial statements at that date, but does not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements.

Dollar amounts, except per share amounts are in thousands. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2011.

Page 7

Form 10-Q

OVERSEAS SHIPHOLDING GROUP, INC. AND SUBSIDIARIES

Note 2 — Earnings per Common Share:

The computation of basic earnings per share is based on the weighted average number of common shares outstanding during the period. The computation of diluted earnings per share assumes the exercise of all dilutive stock options and restricted stock units using the treasury stock method. The components of the calculation of basic earnings per share and diluted earnings per share are as follows:

	Three Months Ended March 31,	
	2012	2011
Net loss	\$(34,813) \$(34,558)
Common shares outstanding, basic and diluted:		
Weighted average shares outstanding, basic and diluted	30,282,899	30,210,882

There were no dilutive equity awards outstanding as of March 31, 2012. Awards of 2,390,385 and 1,842,289 shares of common stock for the three months ended March 31, 2012 and 2011, respectively, were not included in the computation of diluted earnings per share because inclusion of these awards would be anti-dilutive.

Unvested share-based payment awards that contain non-forfeitable rights to dividends are considered to be participating securities and have been included in the computation of earnings per share pursuant to the two-class method.

Note 3 — Debt and Liquidity:

Debt consists of the following:

As of	March 31, 2012	December 31, 2011
Unsecured revolving credit facility	\$1,146,000	\$ 917,000
8.125% notes due 2018, net of unamortized discount of \$3,233 and \$3,368	296,767	296,632

Edgar Filing: OVERSEAS SHIPHOLDING GROUP INC - Form 10-Q

7.50% notes due 2024	146,000	146,000
8.75% debentures due 2013, net of unamortized discount of \$17 and \$20	63,586	63,583
Floating rate secured term loans, due through 2023	592,162	642,677
	2,244,515	2,065,892
Less current portion	283,097	14,990
Long-term portion	\$1,961,418	\$ 2,050,902

The weighted average effective interest rate for debt outstanding at March 31, 2012 and December 31, 2011 was 3.4% and 3.6%, respectively. Such rates take into consideration related interest rate swaps.

Page 8

Form 10-Q

OVERSEAS SHIPHOLDING GROUP, INC. AND SUBSIDIARIES

Financial Covenants

Agreements related to long-term debt provide for prepayment privileges (in certain instances with penalties). As noted below, certain of the Company's debt agreements contain loan-to-value clauses, which could require the Company, at its option, to post additional collateral or prepay a portion of the outstanding borrowings should the value of the vessels securing borrowings under each of such agreements decrease below their current valuations. In addition, the financing agreements impose operating restrictions and establish minimum financial covenants, including limitations on the amount of total borrowings and secured debt and provide for acceleration of principal payments under certain circumstances, including failure to satisfy certain financial covenants. Failure to comply with any of the covenants in the financing agreements could also result in a default under those agreements and under other agreements containing cross-default provisions. The Company was in compliance with all of its financial covenants under all of its debt agreements as of March 31, 2012. The Company's forecasts for the twelve months ending March 31, 2013, indicate significant reductions in the headroom that the Company has under the financial covenants in its debt agreements; however, the Company believes that it will maintain compliance with all of its covenants over the twelve months ending March 31, 2013, including those associated with the \$900,000 forward start facility, which do not become effective until December 31, 2012. Additional information with respect to unsecured and secured long-term debt agreements to which the Company is a party follows below:

Unsecured Revolving Credit Facilities

In 2006, the Company entered into a \$1,800,000 seven-year unsecured revolving credit agreement with a group of banks, which matures on February 8, 2013. In accordance with the terms of the credit agreement, the maximum amount the Company can borrow under its unsecured revolving credit facility decreased to \$1,500,000 in February 2012. Borrowings under this facility bear interest at a rate based on LIBOR.

At March 31, 2012, the Company had unused unsecured credit availability of approximately \$343,854, which reflects \$10,146 of letters of credit issued principally in connection with collateral requirements for derivative transactions and certain arbitration proceedings. The Company forecasts that it may need to further draw down upon this facility through its maturity date in February 2013, but anticipates generating sufficient cash flows to sustain its operations during this period without having to utilize the facility's full capacity.

The Company has taken steps to replace the borrowing capacity under the unsecured revolving credit facility, including entering into a \$900,000 unsecured forward start revolving credit agreement on May 26, 2011, with a bank lending group that matures on December 31, 2016. Under the terms of the agreement, OSG may begin borrowing under the forward start facility on February 8, 2013, the date on which OSG's existing unsecured revolving credit

facility expires. Financial covenants under the forward start facility, which are more restrictive than those contained in the \$1,800,000 unsecured credit facility (due principally to differences in definitions between the two agreements) first become applicable on December 31, 2012.

The excess of the amount outstanding plus letters of credit issued under the unsecured revolving credit agreement as of March 31, 2012 over the \$900,000 capacity of the replacement forward start facility, of \$256,147, has been included in the current portion of long-term debt in the accompanying consolidated balance sheet.

Form 10-Q

OVERSEAS SHIPHOLDING GROUP, INC. AND SUBSIDIARIES

The Company is evaluating how best to increase liquidity and how to bridge the potential gap between the amounts that it anticipates may be outstanding under the existing unsecured revolving credit facility as of February 8, 2013 and the amounts that will be available under the forward start credit facility. These options include increasing the borrowing capacity of the forward start credit facility; obtaining incremental bank financing; raising debt or equity capital using the Form S-3 shelf registration that was filed on February 13, 2012; selling or entering into sale and leaseback transactions for one or more vessels; or a combination of these or other options. The Company believes that it will be able to execute one or more of these liquidity raising options. If market conditions, however, continue to remain weak, OSG may be unable to enter into suitable vessel sale or leaseback transactions, raise additional equity capital or obtain debt financing on acceptable terms, which could have a material adverse impact on the Company's financial position.

Secured Loan Facilities

As of March 31, 2012, 15 vessels representing approximately 29% of the net book value of the Company's vessels, are pledged as collateral under certain term loans maturing between 2018 and 2023.

On January 18, 2012, the Company prepaid the outstanding principal balance of \$49,000 associated with term loans maturing in 2016 with borrowings from its unsecured revolving credit facility. The two vessels that were pledged as collateral under these term loans are no longer encumbered.

Interest paid, excluding capitalized interest, amounted to \$29,123 and \$27,795 during the three months ended March 31, 2012 and 2011, respectively.

Note 4 — Business and Segment Reporting:

The Company has three reportable segments: International Crude Tankers, International Product Carriers and U.S. vessels. Segment results are evaluated based on income/(loss) from vessel operations before general and administrative expenses, severance and relocation costs and gain/(loss) on disposal of vessels. The accounting policies followed by the reportable segments are the same as those followed in the preparation of the Company's consolidated financial statements. Information about the Company's reportable segments as of and for the three months ended March 31, 2012 and 2011 follows:

	Three Months Ended	
	March 31,	March 31,
	2012	2011
Time charter equivalent revenues	\$214,029	\$206,562
Add: Voyage expenses	78,349	57,106
Shipping revenues	\$292,378	\$263,668

Form 10-Q

OVERSEAS SHIPHOLDING GROUP, INC. AND SUBSIDIARIES

Consistent with general practice in the shipping industry, the Company uses time charter equivalent revenues, which represents shipping revenues less voyage expenses, as a measure to compare revenue generated from a voyage charter to revenue generated from a time charter. Time charter equivalent revenues, a non-GAAP measure, provides additional meaningful information in conjunction with shipping revenues, the most directly comparable GAAP measure, because it assists Company management in making decisions regarding the deployment and use of its vessels and in evaluating their financial performance.

Reconciliations of income/(loss) from vessel operations of the segments to loss before income taxes, as reported in the consolidated statements of operations follow:

	Three Months Ended	
	March 31,	
	2012	2011
Total (loss)/income from vessel operations of all segments	\$(1,707)	\$(505)
General and administrative expenses	(21,136)	(24,468)
Severance and relocation costs	(905)	0
Gain/(loss) on disposal of vessels	106	(868)
Consolidated loss from vessel operations	(23,642)	(25,841)
Equity in income of affiliated companies	7,080	5,642
Other income	3,412	1,824
Interest expense	(23,010)	(17,739)
Loss before income taxes	\$(36,160)	\$(36,114)

Reconciliations of total assets of the segments to amounts included in the consolidated balance sheets follow:

As of March 31,	2012	2011
Total assets of all segments	\$3,902,445	\$3,913,752
Corporate cash and securities	226,692	277,728
Other unallocated amounts	71,927	75,362

Note 5 — Vessels:

Purchase and Construction Commitments

As of March 31, 2012, the Company had remaining commitments for vessels to be wholly owned by the Company of \$53,179 on non-cancelable contracts for the construction of two Aframaxes. These vessels are scheduled for delivery in 2013.

Vessel Impairments

The Company performed an impairment test on all of its owned operating and newbuild International Crude and Products vessels as of December 31, 2011. Based on tests performed it was determined that the estimated undiscounted future cash flows expected to result from the use and eventual disposition of the International Crude and Products vessels exceed each of the vessels' carrying values as of December 31, 2011. The Company gave consideration as to whether events or changes in circumstances had occurred that could indicate that the carrying amounts of the vessels in the Company's International Flag fleet may not be recoverable as of March 31, 2012. The Company concluded that no such events had occurred to warrant a change in the assumptions from those utilized in the December 2011 impairment tests. Furthermore, the Company believes that given the relatively long remaining useful lives that its International Flag vessels have to generate sufficient cash flows to offset their carrying values, it is unlikely that any of the vessels in its International Flag fleet is impaired as of March 31, 2012.

Form 10-Q

OVERSEAS SHIPHOLDING GROUP, INC. AND SUBSIDIARIES

In September 2011, Sunoco announced that it will make its Marcus Hook and Philadelphia refineries available for sale. Subsequently, in December 2011, Sunoco announced that it expects to begin idling the Marcus Hook facility immediately while it continues to seek a buyer and also pursues options with third parties for alternate uses of the facility. Sunoco also announced that it intends to continue to operate the Philadelphia refinery as long as market conditions warrant. However, if a suitable transaction cannot be implemented, Sunoco intends to permanently idle the main processing units at the Philadelphia refinery no later than August 2012. Sunoco is the core customer of the Company's Delaware Bay lightering business. The closures, if they were to occur, could result in the Company's redeployment of the two new ATBs currently used in the Delaware Bay Lightering business to other locations with possible reductions in revenues earned. These two ATBs, the OSG 350 and the OSG 351, are recent newbuilds with relatively high cost bases and redeploying one or both of these vessels into the clean products trade would require modifications to be made to the vessels. Based on the tests performed in December 2011, it was determined that the estimated undiscounted future cash flows would exceed the carrying values of each of the vessels. No new information has come to the Company's attention during the quarter ended March 31, 2012 that would warrant a change in the assumptions from those utilized in the December 2011 impairment test.

Management will continue to monitor developments, which could result in a change in the above conclusions.

Vessel Sales

There were no vessels sold during the quarter ended March 31, 2012. During the quarter ended March 31, 2011, the Company delivered its two remaining single-hulled U.S. Flag Tankers to buyers. The Company recognized a gain of \$1,070 on the sale of these vessels.

Vessel Acquisitions and Deliveries

During the quarter ended March 31, 2012, the Company completed construction of a VLCC and an International Flag Handysize Product Carrier. There were no vessel acquisitions or newbuild deliveries during the quarter ended March 31, 2011.

Note 6 — Equity Method Investments:

Investments in affiliated companies include joint ventures accounted for using the equity method. As of March 31, 2012, the Company had an approximate 50% interest in two joint ventures. One joint venture operates four LNG Carriers. The other joint venture converted two ULCCs to Floating Storage and Offloading Service vessels. In addition, the Company has a 37.5% interest in Alaska Tanker Company, LLC that manages vessels carrying Alaskan crude for BP.

Floating Storage and Offloading Service Vessels (“FSO”) Joint Venture

Maersk Oil Qatar AS (“MOQ”) awarded two service contracts to a joint venture between OSG and Euronav NV to provide two vessels, the FSO Asia and the FSO Africa, to perform Floating Storage and Offloading (“FSO”) services in the Al Shaheen field off shore Qatar. The Company has a 50% interest in this joint venture. The joint venture financed the purchase of the vessels from each of Euronav NV and OSG and their conversion costs through partner loans and a long-term credit facility, which was secured by the service contracts. Approximately \$277,029 and \$294,937 was outstanding under this facility as of March 31, 2012 and December 31, 2011 respectively, with the outstanding amount of this facility being subject to acceleration, in whole or in part, on termination of one or both of such service contracts. In connection with the secured bank financing, the partners severally issued guarantees. As of March 31, 2012 and December 31, 2011, the carrying value of the Company’s guaranty, which is included in other liabilities in the accompanying balance sheet, was \$89 and \$122, respectively.

Form 10-Q

OVERSEAS SHIPHOLDING GROUP, INC. AND SUBSIDIARIES

The joint venture entered into floating-to-fixed interest rate swaps with major financial institutions. The interest rate swaps, covering notional amounts aggregating \$374,796 and \$396,993 as of March 31, 2012 and December 31, 2011, respectively, pay fixed rates of 3.9% and receive floating rates based on LIBOR. These agreements have maturity dates ranging from July to September 2017. As a result of the delays in the completion of conversion and commencement of the service contract for the FSO Africa, the joint venture concluded that it was no longer probable that the forecasted transaction applicable to the FSO Africa swaps would occur. Accordingly, as a result of the de-designation of the FSO Africa swaps, all changes in the market value of the swaps have been recognized in the joint venture's statement of operations. The Company's share of amounts recognized in equity in income from affiliated companies were losses of \$97 and \$65 for the quarter ended March 31, 2012 and 2011, respectively. As of March 31, 2012 and December 31, 2011, the joint venture had a liability of \$30,157 and \$33,040, respectively, for the fair value of the swaps associated with the FSO Africa and FSO Asia. The Company's share of the effective portion of such amounts, aggregating \$7,076 and \$7,790, at March 31, 2012 and December 31, 2011, respectively, is included in accumulated other comprehensive loss in the accompanying balance sheet and is associated with the FSO Asia swaps only, since the swaps associated with the FSO Africa have been de-designated and deemed to be ineffective.

LNG Joint Venture

In November 2004, the Company formed a joint venture with Qatar Gas Transport Company Limited (Nakilat) whereby companies in which OSG holds a 49.9% interest ordered four 216,200 cbm LNG Carriers. Upon delivery in late 2007 and early 2008, these vessels commenced 25-year time charters to Qatar Liquefied Gas Company Limited (II). The aggregate construction cost for such newbuildings was financed by the joint venture through long-term bank financing that is nonrecourse to the partners and partner contributions.

The joint venture entered into floating-to-fixed interest rate swaps with a group of major financial institutions pursuant to which it pays fixed rates of approximately 4.9% and receives a floating rate based on LIBOR. The interest rate swap agreements have maturity dates ranging from July to November 2022 and cover notional amounts aggregating \$783,274 and \$790,946 at March 31, 2012 and December 31, 2011, respectively. These swaps are being accounted for as cash flow hedges. As of March 31, 2012 and December 31, 2011, the joint venture recorded a liability of \$124,250 and \$148,699, respectively, for the fair value of these swaps. The Company's share of the effective portion of the fair value of these swaps, \$61,917 and \$74,133 at March 31, 2012 and December 31, 2011, respectively, is included in accumulated other comprehensive loss in the accompanying balance sheet.

Form 10-Q

OVERSEAS SHIPHOLDING GROUP, INC. AND SUBSIDIARIES

A condensed summary of the results of operations of the equity method investments follows:

	Three Months Ended	
	March 31,	
	2012	2011
Shipping revenues	\$87,072	\$81,800
Ship operating expenses	(59,416)	(55,331)
Income from vessel operations	27,656	26,469
Other expense	(313)	(340)
Interest expense	(15,105)	(15,650)
Net income	\$12,238	\$10,479

Note 7 – Variable Interest Entities (“VIEs”):

As of March 31, 2012, the Company participates in five commercial pools and three joint ventures. Two of the pools and the FSO joint venture, described in Note 6 above, were determined to be VIEs. The Company is not considered a primary beneficiary of either of the two pools or the joint venture.

The following table presents the carrying amounts of assets and liabilities in the balance sheet related to the VIEs as of March 31, 2012:

	Consolidated Balance Sheet
Investments in Affiliated Companies	\$ 224,851
Deferred Income Taxes and Other Liabilities ⁽¹⁾	89

⁽¹⁾Represents the Company’s valuation of its several guaranty of the FSO joint venture’s outstanding debt at March 31, 2012.

In accordance with accounting guidance, the Company evaluated its maximum exposure to loss related to these VIEs by assuming a complete loss of the Company’s investment in these VIEs and that it would incur an obligation to repay the full amount of the VIE’s outstanding secured debt. The table below compares the Company’s liability in the consolidated balance sheet to the maximum exposure to loss at March 31, 2012:

	Consolidated Balance Sheet	Maximum Exposure to Loss
Deferred Income Taxes and Other Liabilities	\$ 89	\$ 370,000

In addition, as of March 31, 2012, the Company had approximately \$30,093 of trade receivables from pools that were determined to be VIEs. These trade receivables, which are included in voyage receivables in the accompanying balance sheet, have been excluded from the above tables and the calculation of OSG's maximum exposure to loss. The Company does not record the maximum exposure to loss as a liability because it does not believe that such a loss is probable of occurring as of March 31, 2012. Further, the joint venture debt is secured by the joint venture's FSOs. Therefore, the Company's exposure to loss under its several guaranty would first be reduced by the fair value of such FSOs.

Form 10-Q

OVERSEAS SHIPHOLDING GROUP, INC. AND SUBSIDIARIES

Note 8 —Fair Value of Financial Instruments, Derivatives and Fair Value Disclosures:

The following methods and assumptions were used to estimate the fair value of each class of financial instrument:

Cash and cash equivalents—The carrying amounts reported in the consolidated balance sheet for interest-bearing deposits approximate their fair value.

Short-term investments—The carrying amounts reported in the consolidated balance sheet for short-term investments, which consisted of interest-bearing time deposits or marketable securities held for trading purposes, approximated their fair value.

Debt—For publicly-traded debt, estimates of fair value are based on market prices. For unsecured revolving credit facilities and secured term loans, fair value is estimated based on a model-driven approach using U.S. forward swap interest rate yield curves.

Forward freight agreements and bunker swaps—The fair values of forward freight agreements and bunker swaps are the estimated amounts that the Company would receive or pay to terminate the agreements at the reporting date, which include an adjustment for the counterparty or the Company's credit risk, as appropriate.

Interest rate swaps—The fair values of interest rate swaps are the estimated amounts that the Company would receive or pay to terminate the swaps at the reporting date, which include adjustments for the counterparty or the Company's credit risk, as appropriate.

Foreign Currency Contracts—The fair values of foreign currency contracts are the estimated amounts that the Company would receive or pay to terminate the contracts at the reporting date, which include adjustments for the counterparty or the Company's credit risk, as appropriate.

The estimated fair values of the Company's financial instruments other than derivatives and marketable securities that are not measured at fair value on a recurring basis, categorized based upon the fair value hierarchy, are as follows:

	Fair Value	Level 1: Quoted prices in active markets for identical assets or liabilities	Level 2: Significant other observable inputs
March 31, 2012:			
Cash and cash equivalents	\$213,353	\$ 213,353	\$ 0
Debt	\$(1,995,432)	\$ 0	\$ (1,995,432)
December 31, 2011:			
Cash and cash equivalents	\$54,877	\$ 54,877	\$ 0
Debt	\$(1,801,681)	\$ 0	\$ (1,801,681)

Since the Company's publicly-traded debt is not actively traded, their fair value is categorized within Level 2 of the fair value hierarchy.

Derivatives

The Company is exposed to certain risks relating to its ongoing business operations. The risks, managed by using derivative instruments, are volatility with respect to spot (voyage) charter rates, fuel prices, interest rates and foreign currency exchange rates.

Form 10-Q

OVERSEAS SHIPHOLDING GROUP, INC. AND SUBSIDIARIES

Spot Market Rate Volatility Risk

The Company enters into Forward Freight Agreements (“FFAs”) and bunker swaps with an objective to utilize them as (i) economic hedging instruments, some of which qualify as cash flow hedges for accounting purposes that reduce its exposure to changes in TCE revenue earned by some of its vessels operating in the spot market; and (ii) from time to time for trading purposes to take advantage of short term fluctuations in the market. The FFAs and bunker swaps involve contracts to provide a fixed number of theoretical voyages at fixed rates, which generally range from one month to one year and settle monthly based on a published index. As of March 31, 2012, the Company was party to FFA contracts entered into for trading purposes. These contracts, representing aggregate volumes of 130,000 metric tons (“mts”) of cargo, expire on various dates through May 2012 and do not qualify as cash flow hedges for accounting purposes.

Fuel Price Volatility Risk

The Company enters into standalone bunker swaps to protect the Company against future increases in fuel prices in the normal course of its International Crude Tankers lightering business, which includes a number of fixed rate Contracts of Affreightment. As of March 31, 2012, the Company is party to three bunker swap agreements, the details of which are as follows:

Fuel Type	Metric tons per Month	Price per Metric ton (MT)	Contract Period
3.5% Rotterdam Fuel Oil	400 MT	\$ 522	July 2011 to September 2012
3.5% Rotterdam Fuel Oil	500 MT	\$ 607	October 2011 to September 2013
3.5% Rotterdam Fuel Oil	500 MT	\$ 580	October 2011 to September 2013

These contracts settle on a net basis at the end of each calendar month, based on the average daily closing prices, as quoted by the Baltic Exchange, of the commodity during each month. These swaps do not qualify as cash flow hedges for accounting purposes.

Interest Rate Risk

The Company uses interest rate swaps for the management of interest rate risk exposure. The interest rate swaps effectively convert a portion of the Company's debt from a floating to a fixed rate and are designated and qualify as cash flow hedges. The Company is a party to seven floating-to-fixed interest rate swap agreements with various major financial institutions covering notional amounts aggregating approximately \$220,412 at March 31, 2012 pursuant to which it pays fixed rates ranging from 3.3% to 4.7% and receives floating rates based on three-month LIBOR (approximately 0.47% at March 31, 2012). These agreements contain no leverage features and have various final maturity dates ranging from December 2012 to August 2014.

Foreign Exchange Risk

The Company seeks to reduce its exposure to fluctuations in foreign exchange rates related to recurring monthly foreign currency denominated general and administrative expenses through the use of foreign currency forward contracts and through the purchase of bulk quantities of currencies at rates that management considers favorable. At March 31, 2012, the notional amounts of the foreign currency forward contracts aggregated approximately €4,000, settling monthly through May 2012. Such contracts were not designated as cash flow hedges for accounting purposes.

OVERSEAS SHIPHOLDING GROUP, INC. AND SUBSIDIARIES

Fair Value Hierarchy

The following tables present the fair values, which are pre tax, for assets and liabilities measured on a recurring basis (excluding investments in affiliated companies):

	Fair Value	Level 1: Quoted prices in active markets for identical assets or liabilities	Level 2: Significant other observable inputs ⁽¹⁾
March 31, 2012:			
Trading marketable securities	\$ 13,339	\$ 13,339	(2) \$ 0
Available-for-sale marketable securities	\$ 756	\$ 756	\$ 0
Derivative assets	\$ 2,018	\$ 1,866	(3) \$ 152 (4)
Derivative liabilities	\$(5,452)	\$ 0	\$ (5,452) (5)
December 31, 2011:			
Trading marketable securities	\$ 12,346	\$ 12,346	(2) \$ 0
Available-for-sale marketable securities	\$ 1,038	\$ 1,038	\$ 0
Derivative assets	\$ 165	\$ 165	(6) \$ 0
Derivative liabilities	\$(7,596)	\$ (321)	(6) \$ (7,275) (7)

Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. For foreign currency contracts and interest rate swaps, fair values are derived using valuation models (1) that utilize the income valuation approach. These valuation models take into account contract terms such as maturity, as well as other inputs such as exchange rates, interest rate yield curves and creditworthiness of the counterparty and the Company.

(2) Included in short-term investments at March 31, 2012 and other assets at December 31, 2011

(3) FFAs (asset of \$125) and bunker swaps (asset of \$1,741)

(4) Foreign currency contracts

(5) Standard interest rate swaps

(6) Bunker swaps

(7) Standard interest rate swaps (liability of \$7,218) and foreign currency contracts (liability of \$57)

Cash Collateral Disclosures

The Company does not offset fair value amounts recognized for derivatives by the right to reclaim cash collateral or the obligation to return cash collateral. The amounts of collateral to be posted are defined in the terms of respective master agreements executed with counterparties or exchanges and are required when agreed upon threshold limits are exceeded. At March 31, 2012, the Company did not hold collateral related to its derivative transactions. At March 31, 2012, the Company has a \$1,000 letter of credit issued in relation to its derivative activities.

Note 9 — Taxes:

On October 22, 2004, the President of the U.S. signed into law the American Jobs Creation Act of 2004. The Jobs Creation Act reinstated tax deferral for OSG's foreign shipping income for years beginning after December 31, 2004. Effective January 1, 2005, the earnings from shipping operations of the Company's foreign subsidiaries are not subject to U.S. income taxation as long as such earnings are not repatriated to the U.S. The Company intends to permanently reinvest these earnings, as well as its share of the undistributed earnings of its less than 50%-owned foreign shipping joint ventures, in foreign operations. Accordingly, no provision for U.S. income taxes on the shipping income of its foreign subsidiaries or its less than 50%-owned foreign shipping joint ventures was required to date in 2012 or at any time in 2011. As of March 31, 2012, undistributed earnings on which U.S. income taxes have not been provided aggregated approximately \$2,200,000, including \$119,000 earned prior to 1976; the unrecognized deferred U.S. income tax attributable to such undistributed earnings approximated \$770,000.

Form 10-Q

OVERSEAS SHIPHOLDING GROUP, INC. AND SUBSIDIARIES

The components of the income tax benefits/(provisions) follow:

	Three Months Ended	
	March 31,	
	2012	2011
Current	\$ (336)	\$ 501
Deferred	1,683	1,055
	\$ 1,347	\$ 1,556

At December 31, 2011 the Company had a reserve of approximately \$4,804 for benefits attributable to tax positions taken during the current and prior tax periods for which the probability of recognition is considered less than “more likely than not.” There was no material change in the reserve during the three months ended March 31, 2012.

Note 10 — Capital Stock and Stock Compensation:

On February 13, 2012, the Company filed a Form S-3 shelf registration with the SEC that will allow it to issue common stock, preferred stock, debt securities, warrants or units (as defined) up to an aggregate of \$500,000, from time to time as market conditions permit.

Restricted Common Stock, Performance Related Grants and Options

During the three months ended March 31, 2012 and 2011, the Company awarded a total of 401,409 and 82,544 shares, respectively, of restricted common stock at no cost to certain of its employees, including senior officers. Restrictions limit the sale or transfer of shares of restricted common stock until they vest, which occurs over a four or five-year period. During the restriction period, the shares will have voting rights and cash dividends will be paid if declared. The weighted average fair value of the restricted stock issued during the three months ended March 31, 2012 and 2011 was \$10.09 and \$34.90 per share, respectively (the market price at date of grant).

During the three months ended March 31, 2012, the Company granted certain of its senior officers performance awards valued at an aggregate of approximately \$1,307 on the grant date. Each performance award represents a contingent right to receive cash or, at the Company’s option, shares of common stock of the Company, based upon certain market related performance goals being met and the covered employees being continuously employed through

the end of the three-year period over which the performance goals are measured. The performance related grants were valued using a Monte Carlo pricing model that takes into account the market related performance goals described in the grants. It is the Company's intention (but not an obligation) to settle the awards in shares of the Company's common stock to the extent such shares are available for issuance under the 2004 Stock Incentive Plan (the "2004 Plan") on the settlement date. To the extent sufficient shares are not available for issuance under the 2004 Plan or the Compensation Committee of the Board of Directors determines not to settle the awards in shares, the awards shall be paid in cash. As a result of the current and expected availability of shares under the 2004 Plan and the Company's intent to settle these awards in shares of the Company's common stock if such shares are available, these cash based performance awards are being accounted for as equity awards. The Company will evaluate at each reporting date, the sufficiency of shares available under the 2004 Plan to settle the awards in shares. If at any reporting date in the future the shares available under the 2004 Plan are not sufficient, these awards would be bifurcated into the portion that can be settled in shares and the portion that would have to be settled in cash, with the latter portion being classified as a liability award.

Form 10-Q

OVERSEAS SHIPHOLDING GROUP, INC. AND SUBSIDIARIES

There were no performance related restricted stock units awarded during 2012. During the three months ended March 31, 2011, the Company granted a total of 54,329 performance related restricted stock units to certain of its employees, including senior officers. Each performance unit represents a contingent right to receive shares of common stock of the Company based upon certain market related performance goals being met and the covered employees being continuously employed through the end of the period over which the performance goals are measured. The performance units have no voting rights and may not be transferred or otherwise disposed of until they vest. Dividends will be paid when the performance period expires and are conditioned upon the attainment of the performance goals. The estimated weighted average grant-date fair value of the performance stock units awarded during the three months ended March 31, 2011 was \$40.19 per share. The performance related grants were valued using a Monte Carlo pricing model that takes into account the market related performance goals described in the grants.

Stock Options

During the three months ended March 31, 2012 and 2011, options covering 377,653 and 176,312 shares, respectively, were granted at or above the market price at the date of the grant. Such options were valued using the Black-Scholes option pricing model and expire ten years from the grant date. The exercise price of options granted during the three months ended March 31, 2012 and 2011 was \$12.50 and \$34.90 per share, respectively. The grant date fair value of options granted during the three months ended March 31, 2012 and 2011 was \$3.83 and \$10.04 per share, respectively.

Note 11 — Accumulated Other Comprehensive Loss:

The components of accumulated other comprehensive loss, net of related taxes, in the consolidated balance sheets follow:

	March 31, 2012	December 31, 2011
As of		
Unrealized gains/(losses) on available-for-sale securities	\$(248)	\$34
Unrealized losses on derivative instruments	(72,763)	(87,038)
Items not yet recognized as a component of net periodic benefit cost (pension and other postretirement plans)	(15,099)	(14,787)
	\$(88,110)	\$(101,791)

Included in accumulated other comprehensive loss at March 31, 2012 are the following amounts that have not yet been recognized in net periodic cost: unrecognized transition obligation of \$24 (\$15 net of tax), unrecognized prior service costs of \$1,568 (\$1,019 net of tax) and unrecognized actuarial losses of \$21,638 (\$14,065 net of tax).

Note 12 — Leases:

1. Charters-in:

As of March 31, 2012, the Company had commitments to charter in 46 vessels. All of the charters-in are accounted for as operating leases, of which 21 are bareboat charters and 25 are time charters. The future minimum commitments and related number of operating days under these operating leases are as follows:

Bareboat Charters-in at

March 31, 2012	Amount	Operating Days
2012	\$ 115,174	5,775
2013	152,832	7,665
2014	142,960	6,120
2015	87,108	3,850
2016	52,729	2,928
Thereafter	146,814	7,806
Net minimum lease payments	\$697,617	34,144

Time Charters-in at

March 31, 2012	Amount	Operating Days
2012	\$ 111,948	7,203
2013	110,098	7,620
2014	90,821	5,559
2015	72,446	4,236
2016	56,375	3,406
Thereafter	62,279	3,811
Net minimum lease payments	\$503,967	31,835

The future minimum commitments for time charters-in have been reduced to reflect estimated days that the vessels will not be available for employment due to drydock because the Company does not pay time charter hire when time chartered-in vessels are not available for its use.

2. Charters-out:

The future minimum revenues, before reduction for brokerage commissions, expected to be received on noncancelable time charters and certain COAs for which minimum annual revenues can be reasonably estimated and the related revenue days (revenue days represent calendar days, less days that vessels are not available for employment due to repairs, drydock or lay-up) are as follows:

At March 31,2012	Amount	Revenue Days
2012	\$ 195,290	4,857
2013	167,119	3,351
2014	89,014	1,509
2015	15,952	216
Net minimum lease payments	\$467,375	9,933

Form 10-Q

OVERSEAS SHIPHOLDING GROUP, INC. AND SUBSIDIARIES

Future minimum revenues do not include (1) the Company's share of time charters entered into by the pools in which it participates, (2) the Company's share of time charters entered into by the joint ventures, which the Company accounts for under the equity method and (3) COAs for which minimum annual revenues cannot be reasonably estimated. Revenues from those COAs that are included in the table above, \$4,244 (2012) and \$2,446 (2013), are based on minimum annual volumes of cargo to be loaded during the contract periods at a fixed price. The largest COA in the Delaware Bay lightering trade is excluded from the table above because the minimum annual revenues for that contract cannot be reasonably estimated. Revenues from a time charter are not generally received when a vessel is off-hire, including time required for normal periodic maintenance of the vessel. In arriving at the minimum future charter revenues, an estimated time off-hire to perform periodic maintenance on each vessel has been deducted, although there is no assurance that such estimate will be reflective of the actual off-hire in the future.

Note 13 — Pension and Other Postretirement Benefit Plans:

The net periodic benefit cost for the Company's domestic defined benefit pension (for which the benefits have been frozen) and postretirement health care and life insurance plans was not material during the three months ended March 31, 2012 and 2011.

The Company expects that its required contributions in 2012 with respect to its domestic defined benefit pension plan will be approximately \$1,832, of which \$755 was funded during the three months ended March 31, 2012.

Note 14 — Other Income:

Other income consists of:

	Three Months Ended March 31,	
	2012	2011
Investment income:		
Interest and dividends	\$ 97	\$ 313
Gain on sale of securities and investments	1,018	431
	1,115	744
Gain on derivative transactions	2,620	1,042

Miscellaneous — net	(323)	38
	\$ 3,412	\$ 1,824

Note 15 – Severance and Relocation Costs:

In the first quarter of 2012, the Company announced the relocation of the technical management of its conventional International Flag crude oil tanker fleet from its Newcastle, U.K. office to its Athens, Greece office. In connection therewith, approximately 50 employees will be terminated or relocated from Newcastle to Athens. In connection therewith, the Company expects to record approximately \$2,100 in costs related to severance and transfer of vessel management during 2012. As of March 31, 2012, the Company has recognized severance and relocation related costs totaling \$905.

Form 10-Q

OVERSEAS SHIPHOLDING GROUP, INC. AND SUBSIDIARIES

Note 16 — Contingencies:

The Internal Revenue Service (“IRS”) imposed penalties totaling approximately \$3,600 against certain U.S. Flag vessel owning subsidiaries of the Company due to alleged delinquent excise tax registration applications and delinquent filing of information returns. The Company has denied the applicability of the penalties in question and is vigorously contesting the matter with the IRS. As a result of certain administrative protocols, the Company had to pay the assessed penalties in order to formally file suit for a refund. As of March 31, 2012, the Company has paid \$3,500 in penalties and such amounts are included in other receivables in the accompanying consolidated balance sheet. The Company believes, based on the merits of the case, that the likelihood of an unfavorable judgment is more than remote but less than probable. Accordingly, no provisions have been made in the Company’s financial statements for a potential loss as of March 31, 2012, as the Company does not believe there is any one amount within the range of likely losses (from \$0 to \$3,600) that is a better estimate than another.

Page 26

Form 10-Q

OVERSEAS SHIPHOLDING GROUP, INC. AND SUBSIDIARIES

MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

General:

The Company is one of the largest independent bulk shipping companies in the world. The Company's operating fleet as of March 31, 2012, consisted of 113 vessels aggregating 10.8 million dwt and 864,800 cbm, including 46 vessels that have been chartered-in under operating leases. In addition to its operating fleet of 113 vessels, two newbuilds are scheduled for delivery in 2013, bringing the total operating and newbuild fleet to 115 vessels.

All dollar amounts are in thousands, except daily dollar amounts and per share amounts.

Operations:

The Company's revenues are highly sensitive to patterns of supply and demand for vessels of the size and design configurations owned and operated by the Company and the trades in which those vessels operate. Rates for the transportation of crude oil and refined petroleum products from which the Company earns a substantial majority of its revenues are determined by market forces such as the supply and demand for oil, the distance that cargoes must be transported, and the number of vessels expected to be available at the time such cargoes need to be transported. The demand for oil shipments is significantly affected by the state of the global economy and level of OPEC exports. The number of vessels is affected by newbuilding deliveries and by the removal of existing vessels from service, principally because of storage, scrappings or conversions. The Company's revenues are also affected by the mix of charters between spot (Voyage Charter) and long-term (Time or Bareboat Charter). Because shipping revenues and voyage expenses are significantly affected by the mix between voyage charters and time charters, the Company manages its vessels based on TCE revenues. Management makes economic decisions based on anticipated TCE rates and evaluates financial performance based on TCE rates achieved.

Overview

Average first quarter 2012 spot rates for all crude oil tanker segments, except Panamax, and for Product Carriers were significantly higher than the first quarter of 2011. First quarter 2012 spot rates for all vessel categories were substantially higher than those in the fourth quarter of 2011.

The quarter over quarter increase in rates primarily reflects a rise in worldwide oil inventories of approximately one million barrels per day (“b/d”) that occurred in the first quarter of 2012 compared with an inventory drawdown of about 700,000 b/d that occurred in the first quarter of 2011. The buildup in oil inventory levels thus far in 2012 has been a key factor in boosting additional seaborne movements as opposed to the inventory drawdowns that occurred in every quarter of 2011 that reduced the need to move crude oil and refined products. Longer haul crude oil movements, including incremental cargoes of Arabian crude to the U.S. Gulf Coast in conjunction with the start-up of the 325,000 b/d Motiva refinery expansion, benefitted tanker rates in the first quarter. Increased crude oil imports into China and increased shipments of direct burn crude oil and low sulfur fuel oil into Japan due to the shutdown of most of their nuclear facilities in the wake of the 2011 earthquake / tsunami also positively impacted rates.

Form 10-Q

OVERSEAS SHIPHOLDING GROUP, INC. AND SUBSIDIARIES

The European Union (“EU”), in support of more stringent financial and trading sanctions imposed on Iran by the U.S. in order to deter Iran’s nuclear ambitions, announced its own sanctions against Iran’s energy and banking sectors that would halt Iranian crude oil imports into EU countries beginning July 1, 2012. Imports into Europe of approximately 500,000 b/d of Iranian crudes would be impacted, resulting in refiners seeking alternative crude sources. U.S. sanctions adversely impacts Iran’s crude oil exports to Asia, including its largest customers (China, India, Japan and South Korea) who imported approximately 1.5 million b/d of Iranian crudes during 2011 and result in marginalizing the Iranian fleet and discourage tanker owners from moving or storing Iranian crudes. As of the end of the first quarter of 2012, Iranian crude oil exports to Japan, Turkey, South Africa, South Korea, China and India have been reduced with further plans in place to substitute other crudes, such as those from Iraq, Saudi Arabia, Libya, Oman, the Former Soviet Union (“FSU”) and Latin America that will further reduce or eliminate future imports from Iran.

The International Energy Agency (“IEA”) estimated world oil demand during the first quarter of 2012 to be 89.4 million b/d, an increase of 320,000 b/d compared with the first quarter of 2011. Demand in OECD North America declined by 630,000 b/d primarily due to warmer weather and lower prices for natural gas that significantly reduced heating oil demand. Oil demand in OECD Europe also declined by 500,000 b/d as a result of sharply higher prices for transportation fuels that lowered both diesel and gasoline demand. Oil demand in all other areas rose led by a 320,000 b/d increase in Japan where the closure of nuclear power plants resulted in an increase in the use of fuel oil and direct burn crude to generate power. Oil demand growth in China reached 270,000 b/d, followed by an increase of 200,000 b/d in the Middle East as transportation fuels (gasoline and diesel) remain subsidized at prices significantly below International levels. Oil demand increased elsewhere and grew by 190,000 b/d, 170,000 b/d and 130,000 b/d in Latin America, the FSU and in Other Asia (primarily India), respectively.

First quarter 2012 OPEC production averaged about 31.2 million b/d, or 1.3 million b/d more than the first quarter of 2011, led by an increase of approximately 1.1 million b/d in Saudi Arabia. Production in the first quarter reached 31.4 million b/d in March, the highest level since the middle of 2008 as production in Saudi Arabia reached just over 10 million b/d, its highest level in almost three decades. Production in Libya reached 1.3 million b/d, only 300,000 b/d below its pre-civil war level. First quarter 2012 production in the Middle East also reflected growth of about 300,000 b/d in Kuwait that was offset by lower production in Iran as its customers reduced their purchases in anticipation of stricter sanctions.

Product Carrier rates in the first quarter improved compared with the first quarter of 2011. Product exports from the US achieved record levels as gasoline movements increased to Latin America, primarily Mexico and Brazil, and middle distillate movements rose to both Europe and Latin America. The U.S. Gulf Coast refining center has emerged as a key product export hub given its cost advantage in being able to run its refineries using lower-priced natural gas instead of higher cost fuel oil. Additionally, reduced product demand in the U.S. has enabled refiners along the Gulf Coast to export incremental volumes of refined product while still satisfying domestic demand levels.

Crude oil tanker tonnage increased 7.1% during 2011 and by 1.2% in the first quarter of 2012. The largest increase in fleet size in the first quarter of 2012 was the 1.7% increase in tonnage in the VLCC fleet. This was followed by about a 1% increase in tonnage in both the Suezmax and Panamax fleet while there Aframax fleet was relatively unchanged. The increase in the Product Carrier fleet was below 1% during the first quarter of 2012.

The tables below show the daily TCE rates that prevailed in markets in which the Company's vessels operated for the periods indicated. It is important to note that the spot market is quoted in Worldscale rates, except for U.S. Flag, which is based on the American Tanker Rate Schedule and quoted in American Rates ("AR"). The conversion of Worldscale and American Rates to the following TCE rates required the Company to make certain assumptions as to brokerage commissions, port time, port costs, speed, fuel prices and fuel consumption, all of which will vary in actual usage. In each case, the rates may differ from the actual TCE rates achieved by the Company in the period indicated because of the timing and length of voyages, waiting time and the portion of revenue generated from long-term charters. For example, TCE rates for VLCCs are reflected in the earnings of the Company approximately one month after such rates are reflected in the tables below, calculated on the basis of fixture dates.

Form 10-Q

OVERSEAS SHIPHOLDING GROUP, INC. AND SUBSIDIARIES

International Flag VLCCs

	Spot Market TCE Rates VLCCs in the Arabian Gulf*	
	Three Months Ended March 31,	
	2012	2011
Average	\$ 20,200	\$ 14,200
High	\$ 51,800	\$ 51,500
Low	\$ (700)	\$ (6,300)

* Based on 60% Arabian Gulf to eastern destinations and 40% Arabian Gulf to western destinations

Rates for VLCCs trading out of the Arabian Gulf in the first quarter of 2012 averaged \$20,200 per day, 42% above those in the first quarter of 2011 and almost double those in the fourth quarter of 2011. First quarter 2012 rates were higher than those in the same timeframe of last year primarily due to an increase in Middle East OPEC production, especially in Saudi Arabia and Kuwait that resulted in additional long haul crude movements to both Western and Eastern destinations.

The planned start-up of the 325,000 b/d refinery expansion at Motiva's Port Arthur, Texas refinery, which is designed to process crude oil from Saudi Arabia, resulted in an increase in long-haul cargoes moving from the Middle East to the US Gulf Coast. This incremental refining capacity requires a VLCC movement once every six to seven days and therefore resulted in additional VLCC tanker requirements compared to 2011.

Seaborne crude oil imports into China during the first quarter of 2012 increased by approximately 14% compared with the first quarter of 2011. Crude oil imports from South America increased by about 25% led by an increase in imports sourced from Venezuela of approximately 100,000 b/d. Crude oil imports from the Middle East increased by about 15% with incremental volumes from Saudi Arabia and Kuwait more than offsetting a reduction in imports from Iran.

Japan imported crude oil from West Africa in the first quarter of 2012 compared with none during the same timeframe of 2011. Japan required additional volumes of low sulfur crudes for use in power generation and West Africa is a prime source for light sweet low sulfur crudes.

Saudi Arabia produced over 10 million b/d of crude oil and moved some of this volume to its storage facilities in Asia and Europe. The rise in crude oil shipment from the Middle East to both Eastern and Western destinations was a major factor that contributed to increased tonne-mile demand.

Many countries that ordinarily import Iranian crudes began to diversify their sources of supply that resulted in importing crude oil from more distant sources. This development, which required longer haul voyages, benefitted the larger crude oil carriers.

The number of VLCCs in service as of March 31, 2012 was 580 vessels (176.9 million dwt), including seven single hull tankers. Fourteen vessel deliveries were offset by five vessels that were scrapped, resulting in a 1.7% increase in tonnage during the first quarter of 2012. The VLCC orderbook totaled 116 vessels (36.7 million dwt) at March 31, 2012, equivalent to approximately 21% of the existing VLCC fleet, based on deadweight tons.

Form 10-Q

OVERSEAS SHIPHOLDING GROUP, INC. AND SUBSIDIARIES

International Flag Suezmaxes

	Spot Market TCE Rates Suezmaxes in the Atlantic* Three Months Ended March 31,	
	2012	2011
Average	\$ 21,900	\$ 15,100
High	\$ 41,500	\$ 31,100
Low	\$ 15,800	\$ 2,000

* Based on West Africa to the U.S. Gulf Coast

Rates for Suezmaxes during the first quarter of 2012 averaged \$21,900 per day, approximately 45% higher than the corresponding year ago quarter and 48% more than the fourth quarter of 2011. Stronger rates relative to a year ago mainly reflected an increase in tonne mile demand as countries began to source crude oil from more distant supply sources.

There was a significant increase in first quarter crude movements from the Caribbean to Asia. Higher volumes of crude oil from Mexico, Ecuador, Venezuela, Argentina and Colombia, which are similar in quality to Iranian crudes, were exported to India, China and Japan during the first quarter of 2012. Suezmaxes were also able to secure additional cargoes from the Caribbean that are traditionally carried on Aframax.

Suezmax rates also benefitted as more Atlantic Basin crude oil was shipped to Asia on VLCCs. This reduced competition with VLCCs, especially in the West Africa to U.S. trade where minimal co-freighting occurred, resulting in most West African crude shipments to the U.S. being carried on Suezmaxes. Crude oil production in Angola increased in the first quarter of 2012 by 100,000 b/d relative to a year ago primarily due to the startup of the Pazflor field. Production in Angola is forecast to increase in the second quarter of 2012 as production continues to increase in the deepwater Pazflor field and as production from the Greater Plutonio offshore complex recovers from technical problems experienced in the first quarter of 2012. Production in Nigeria is also forecast to increase from the startup of the 180,000 b/d Usan deepwater field.

The world Suezmax fleet at March 31, 2012 totaled 448 vessels (69.2 million dwt) which included seven single hull tankers. The Suezmax orderbook of 117 vessels (18.0 million dwt) at March 31, 2012 represented 26% of the existing Suezmax fleet, based on deadweight tons.

International Flag Aframax

Spot Market TCE Rates		
Aframax in the Caribbean*		
Three Months Ended March 31,		
	2012	2011
Average	\$ 17,200	\$ 9,800
High	\$ 26,800	\$ 37,500
Low	\$ 6,000	\$ 500

*Based on Caribbean to the U.S. Gulf and Atlantic Coasts

Form 10-Q

OVERSEAS SHIPHOLDING GROUP, INC. AND SUBSIDIARIES

Rates for Aframax operating in the Caribbean during the first quarter of 2012 averaged \$17,200 per day, up 75% from the first quarter of 2011 and more than double the fourth quarter of 2011.

Libyan crude oil production reached 1.3 million b/d in March 2012, enabling additional movements of Libyan crude oil to Europe, which had a beneficial impact on Aframax utilization. The start-up of the Baltic Pipeline System 2 provided additional volumes of Russian crude oil at the port of Ust-Luga that were moved on Aframax. Oil shipments from this port will increase over the coming months and should provide support to rates in the Baltic / North Sea area. Weather-related delays, including fog and low tides in the U.S. Gulf Coast in January and heavy fog in mid-February, resulted in additional waiting time that also benefitted rates.

The use of fuel oil and the direct burning of crude oil in Japan to generate power have significantly increased since the March 2011 earthquake / tsunami. Fuel oil and direct burn crude oil demand averaged over 600,000 b/d in the first quarter of 2012, an increase of approximately 400,000 b/d compared with the first quarter of 2011. To meet this demand, Japan imported increased volumes of crude oil from Australia, Indonesia and Vietnam and fuel oil from various sources within Asia, boosting Aframax demand in the Pacific Basin.

Crude oil production in Europe averaged about 3.8 million b/d during the first quarter of 2012, down about 300,000 b/d compared with the same period in 2011. Weather, pipeline outages and unplanned downtime plagued North Sea production and resulted in lower production levels.

Refinery utilization in the U.S. averaged about 84.4% during the first quarter of 2012, slightly higher than last year's first quarter level. This helped lift Caribbean to the U.S short-haul crude shipments somewhat during the first quarter. U.S. refinery maintenance activities are expected to decline from first quarter levels and refineries will require additional imported crudes as runs increase over the next two quarters.

The world Aframax fleet reached 912 vessels (97.1 million dwt) at March 31, 2012, including 22 single hull tankers. The Aframax orderbook totaled 81 vessels (8.9 million dwt) at March 31, 2012, representing 9% of the existing Aframax fleet, based on deadweight tons.

International Flag Panamaxes

Spot Market TCE Rates
Panamaxes - Crude and Residual Oil*

Edgar Filing: OVERSEAS SHIPHOLDING GROUP INC - Form 10-Q

	Three Months Ended March 31,	
	2012	2011
Average	\$ 10,800	\$ 14,800
High	\$ 15,300	\$ 30,000
Low	\$ 1,000	\$ -

*Based on 50% Caribbean to U.S. Gulf and Atlantic Coasts and 50% Ecuador to the U.S. West Coast

Rates for Panamaxs that move crude and residual fuel oil averaged \$10,800 per day during the first quarter of 2012, 27% lower than the first quarter of 2011 but 50% above the fourth quarter of 2011.

Panamax rates during the first quarter were adversely impacted by a fire at the Cardon refinery in Venezuela that reduced Ecuadorian cargoes lifted by Petroleos de Venezuela S.A. ("PDVSA"). Additionally, Valero decided to shut down its Aruba refinery in the first quarter of 2012 because of poor refining margins, which reduced shipments of vacuum gas oil (VGO) to both the U.S. Gulf and West Coast areas. This refinery had been reopened in February 2011 after having been closed for 17 months due to low margins earned. Rates in the Caribbean market, nevertheless, did manage to strengthen in March as a result of fog related delays along the U.S. Gulf Coast and a pipeline bombing in Colombia that delayed loading and discharge activities.

Form 10-Q

OVERSEAS SHIPHOLDING GROUP, INC. AND SUBSIDIARIES

The world Panamax fleet totaled 451 tankers (31.8 million dwt) at March 31, 2012, including 14 single hull tankers. The orderbook of 36 vessels (2.7 million dwt) at March 31, 2012 represented approximately 8% of the existing Panamax fleet, based on deadweight tons.

International Flag Handysize Product Carriers

Spot Market TCE Rates Handysize Product Carriers*		
Three Months Ended March 31,		
	2012	2011
Average	\$ 11,000	\$ 9,900
High	\$ 20,700	\$ 18,900
Low	\$ 3,500	\$ 700

*Based on 60% trans-Atlantic and 40% Caribbean to the U.S. Atlantic Coast

Rates for Product Carriers operating in the Caribbean and trans-Atlantic trades averaged \$11,000 per day during the first quarter of 2012, 11% and 34% above rates in the first and fourth quarters of 2011, respectively.

Product Carrier rates in the first quarter continued to be supported by gasoline and diesel exports from the U.S. Gulf Coast to both Latin America and Europe. Diesel exports from the U.S. Gulf Coast averaged over 800,000 b/d during the first quarter of 2012, an increase of over 100,000 b/d compared with the same period in 2011. Gasoline exports were at about the same level as the first quarter of 2011, averaging approximately 400,000 b/d, primarily to destinations in Latin America. The arbitrage window for gasoline movements from Europe to the U.S. East Coast opened in February, but closed in early March as vessel supply increased and demand in the U.S. declined.

Trade flows from the Caribbean to the US Atlantic Coast were sharply curtailed by the closing of the 350,000 b/d Hovensa refinery at St. Croix in the Virgin Islands. This refinery shipped approximately 155,000 b/d of gasoline and middle distillate to the U.S. East Coast during 2011 and provided backhaul opportunities for vessels that discharged cargoes in Latin America. Hovensa refinery also supplied products to the Caribbean and Latin American markets and its closure will necessitate incremental product imports into Latin America that could be sourced from the U.S. Gulf Coast, the Middle East and South Korea.

The recent startup of upgrade capacity at Repsol's Cartagena and Bilbao refineries has resulted in increased output of middle distillates including a surplus of 30,000 b/d of jet fuel that Spain will export to other European countries. The additional middle distillate capacity also increased the manufacture of diesel by approximately 50,000 b/d, reducing

Spain's diesel import requirements.

Clean product movements from Asia to Europe declined by approximately 130,000 b/d during the first quarter of 2012 compared with the same timeframe in 2011. Product flows from Asia to the U.S., however, increased by approximately 40,000 b/d while movements from Asia to Latin America remained at about a constant level.

The world Product Carrier fleet in the 29,000 to 53,000 dwt range increased to 1,562 vessels (68.0 million dwt) at March 31, 2012, including 98 single hull vessels. The orderbook stood at 188 vessels (8.9 million dwt) at March 31, 2012, equivalent to approximately 13% of the existing Handysize fleet, based on deadweight tons.

Page 32

Form 10-Q

OVERSEAS SHIPHOLDING GROUP, INC. AND SUBSIDIARIES

U.S. Flag Jones Act Product Carriers and Articulated Tug Barges ("ATBs")

	Average Spot Market TCE Rates Three Months Ended March 31,	
	2012	2011
45,000 dwt Product Carriers	\$ 51,700	\$ 35,500
30,000 dwt ATBs	\$ 31,800	\$ 22,600

Rates for Jones Act Product Carriers and ATBs averaged \$51,700 per day and \$31,800 per day, respectively, during the first quarter of 2012. Rates for Jones Act Product Carriers were 6% above rates in the fourth quarter of 2011, while rates for ATBs were flat. Relative to the first quarter of 2011, rates for Product Carriers and ATBs were both up over 40% as utilization rates were higher for both types of vessels compared with the same year-ago period.

Higher utilization rates reflected both an increase in demand and a reduction in tanker supply. There were 54 large ocean-going vessels engaged exclusively in the coastwise trades at the end of the first quarter of 2012 compared with 58 at the end of the first quarter of 2011. Demand for Jones Act vessels that move products to Florida and other U.S. East Coast destinations increased as the closure of the Hovensa refinery in the Caribbean and Sunoco and ConocoPhillips refineries in the Philadelphia area provided additional opportunities for Jones Act vessel movements. As a result, there were no Jones Act vessels in commercial layup during the first quarter of 2012.

U.S. Gulf Coast refinery utilization rates increased from 84.7% during the first quarter of 2011 to 85.5% in the first quarter of 2012, increasing the availability of oil product cargoes. There was an increase in gasoline shipments from Gulf Coast refineries to Brownsville, Texas, which were then shipped via pipeline into Mexico.

Delaware Bay lightering volumes averaged 226,000 b/d in the first quarter of 2012, a decline of 21,000 b/d, or 8%, compared with the first quarter of 2011. The decrease was a result of the closure of Sunoco's Marcus Hook refinery and ConocoPhillips Trainer refinery, both of which are currently up-for sale.

The total Jones Act fleet of Product Carriers and ATBs declined by one vessel during the first quarter of 2012, from 55 to 54 vessels. There were no deliveries and one single hull vessel was scrapped during the quarter. It is expected that three vessels, one ATB and two Product Carriers, will be delivered and that there will be no vessels scrapped over the last nine months of 2012. The Jones Act Product Carrier orderbook for deliveries scheduled from 2013 through 2016 consist of two Product Carriers and ATBs in the 160,000 to 420,000 barrel size range. During this same period, one vessel should be retired in accordance with OPA-90 phase-out regulations. This should result in a net increase in

the fleet of only one vessel during the period from 2013 through 2016.

Outlook

The International Energy Agency (“IEA”) currently forecasts that global economic growth in 2012 will be about 3.3%, down from 3.8% in 2011. High oil prices, slow growth in Europe and rising gasoline prices in the U.S. are expected to have an adverse impact on demand. World oil demand in 2012 is forecast to average 89.9 million b/d, an increase of about 1%, or 800,000 b/d from 2011. Oil demand levels are forecast to decline by approximately 500,000 b/d in OECD countries and increase by about 1.3 million b/d in non-OECD areas, led by strong growth in Asia and the Middle East.

Form 10-Q

OVERSEAS SHIPHOLDING GROUP, INC. AND SUBSIDIARIES

Demand in the second, third and fourth quarters of 2012 are forecast to average 88.6 million b/d, 90.6 million b/d and 91.0 million b/d, respectively, reflecting increases of 0.7%, 1.1% and 1.3%, respectively, relative to the same year ago quarters. Oil demand increases of approximately 3% per quarter in non-OECD areas should mitigate declining oil demand in OECD areas, specifically both OECD North America and Europe in the second quarter and Europe in the third quarter.

Refinery capacity in Asia is forecast to significantly increase during the remainder of this year. Refining capacity and runs in India will increase as a result of Essar's 80,000 b/d expansion and upgrade at its Vadinar refinery, the start-up of the 180,000 b/d Bathinda refinery and the 80,000 b/d expansion of the Mangalore refinery in Southern India. China's refining capacity is forecast to expand by approximately 600,000 b/d during the first half of 2012 with another 300,000 b/d of capacity to be added over the last six months of 2012. Refinery maintenance activity in both the U.S. and Europe has peaked and refinery runs should increase during the summer before the fall / winter maintenance occurs. Expansion of refining capacity in China and India and the anticipated increase in summer-time runs in the Atlantic Basin, including the startup of the Motiva refinery expansion project on the US Gulf Coast, should have a positive impact on tonne-mile demand.

Geopolitical events will also impact trade flows during the remainder of this year. The cutoff of over 200,000 b/d of crude oil exports from Sudan to Asia (primarily China) will require that these supplies be sourced from other areas such as West Africa, which would result in longer voyages and increased tonne-mile demand. Sanctions against Iran have significantly reduced its ability to export oil and have already altered trading patterns and complicated logistics in a way that has had a positive impact on tanker utilization and freight rates. Additionally, the Iranian fleet, which consists of 28 VLCCs, nine Suezmaxes and four Aframaxs, has been effectively removed from trading as a consequence of these sanctions, tightening the tanker supply / demand balance. The switch from Iranian crudes to alternative crudes such as Latin American, West African and Other Middle East crudes has and will continue to generate incremental tonne-mile demand that will be supportive of rates.

However, should Iran ultimately accept the international demand to cease its nuclear program, sanctions could be eased and pre-sanction oil trade flows between Iran and its customers could return to normal and reduce tonne-mile demand and tanker utilization rates to below first quarter 2012 levels.

World oil inventories are estimated to have increased approximately one million b/d during the first quarter of 2012. This increase was at least partially attributable to the anticipated supply disruptions that would occur once the sanctions against Iran became fully effective on July 1, 2012. Changes in inventory levels in the last half of the year, especially a drawdown of both commercial and strategic inventory levels, would have a significant impact on tanker activities.

The closure of Atlantic Basin refining capacity has tightened product balances. The reduction in product supplies due to refinery closures in the Caribbean and on the U.S. East Coast will likely require additional gasoline imports from Europe, India and Canada to meet product demand levels especially when the driving season in the U.S. begins. Increased refinery runs on the U.S. Gulf Coast, including the incremental output from the Motiva refinery startup, will increase the amount of products available for exports to Latin America and Europe. The larger Gulf Coast refinery output could also provide clean products that could be moved on U.S. Flag tankers to meet demand in Florida and other South Atlantic States that previously relied on imports from the Caribbean. Additional capacity from the startup of incremental refining capacity in India will exceed its domestic oil demand growth and allow it to export additional products to Europe, the US, Africa and other Asian countries.

In 2012, the world crude tanker fleet is forecast to grow by approximately 5% and the Product Carrier fleet is forecast to grow by approximately 3%. It is anticipated that most, if not all, of the remaining single hull vessels in the crude trading fleet will be scrapped in 2012 but that single hull Product Carriers will continue to be used for coastal trades in Africa and Asia. It is likely that, in a repeat of the pattern experienced in the last couple of years, a sizable number of newbuildings initially planned for 2012 delivery will be delayed or cancelled as shipowners and shipyards continue to experience problems obtaining financing.

Form 10-Q

OVERSEAS SHIPHOLDING GROUP, INC. AND SUBSIDIARIES

Freight rates remain highly sensitive to severe weather and geopolitical events. Hurricanes in the Gulf of Mexico could have a pronounced effect on freight rates for both crude oil and product movements depending on the extent to which upstream and downstream facilities are affected. Geopolitical events, such as violence in Nigeria's oil producing Niger delta, escalating tensions with Iran and other regional conflicts in the Middle East and North Africa, could also cause changes in supply patterns that could significantly impact rates. The rate of economic recovery and pace of restructuring activities in Japan and decisions concerning their nuclear plants could also influence trade flows.

Update on Critical Accounting Policies:

The Company's consolidated financial statements are prepared in accordance with accounting principles generally accepted in the U.S., which require the Company to make estimates in the application of its accounting policies based on the best assumptions, judgments and opinions of management. For a description of all of the Company's material accounting policies, see Note 1 to the Company's consolidated financial statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2011.

Results from Vessel Operations:

During the first quarter of 2012, results from vessel operations improved by \$2,199 to a loss of \$23,642 from a loss of \$25,841 in the first quarter of 2011. This increase reflects the impact of the quarter-over-quarter growth in TCE revenues coupled with a decrease in general and administrative expenses, partially offset by increases in vessel and depreciation expenses.

During the first quarter of 2012, TCE revenues increased by \$7,467, or 4%, to \$214,029 from \$206,562 in the first quarter of 2011 due to (i) the U.S. segment contributing increased TCE revenues in the first quarter of 2012 resulting from the 2011 deliveries of a newbuild Jones Act Shuttle Tanker and a newbuild Product Carrier, which are employed on time charters at attractive rates, as well as the strengthening of the overall Jones Act market, which allowed for the Company's final U.S. Flag vessel to be broken out of lay-up in the third quarter of 2011 and (ii) the expansion of the International Product Carrier segment's Handysize Product Carrier fleet coupled with slightly higher spot rates earned by the Handysize Product Carriers during the current quarter. These positive factors were partially offset by a decrease in TCE revenues in the International Crude Tankers segment which resulted from the redelivery of loss making chartered-in VLCCs and Aframax, along with a decline in average daily TCE rates for the smaller Crude vessel classes (Aframax and Panamax).

Increases in vessel and depreciation expenses in the first quarter of 2012 compared with the first quarter of 2011 were principally the result of changes in the U.S. Flag operating fleet, deliveries of four owned newbuild International Flag Product Carriers and two owned newbuild VLCCs since the first quarter of 2011. The changes in the U.S. Flag fleet included the delivery (after completion of the conversion) of one owned newbuild shuttle tanker, one bareboat chartered-in Jones Act Product Carrier and one owned ATB employed in the Delaware Bay lightering business since late-March 2011.

Form 10-Q

OVERSEAS SHIPHOLDING GROUP, INC. AND SUBSIDIARIES

See Note 4 to the condensed financial statements for additional information on the Company's segments, including equity in income of affiliated companies and reconciliations of (i) time charter equivalent revenues to shipping revenues and (ii) income/(loss) from vessel operations for the segments to loss before income taxes, as reported in the consolidated statements of operations. Information with respect to the Company's proportionate share of revenue days for vessels operating in companies accounted for using the equity method is shown below in the discussion of "Equity in Income of Affiliated Companies."

International Crude Tankers

	Three Months Ended March 31,	
	2012	2011
TCE revenues	\$75,500	88,810
Vessel expenses	(24,197)	(25,151)
Charter hire expenses	(39,551)	(43,266)
Depreciation and amortization	(20,371)	(17,688)
(Loss)/income from vessel operations ^(a)	\$(8,619)	\$2,705
Average daily TCE rate	\$18,228	\$20,615
Average number of owned vessels ^(b)	27.9	26.0
Average number of vessels chartered-in under operating leases	19.0	22.5
Number of revenue days ^(c)	4,142	4,308
Number of ship-operating days: ^(d)		
Owned vessels	2,540	2,340
Vessels bareboat chartered-in under operating leases	364	388
Vessels time chartered-in under operating leases	1,246	1,491
Vessels spot chartered-in under operating leases	116	145

^(a) Income/(loss) from vessel operations by segment is before general and administrative expenses, severance and relocation costs, and gain/(loss) on disposal of vessels.

^(b) The average is calculated to reflect the addition and disposal of vessels during the period.

^(c) Revenue days represent ship-operating days less days that vessels were not available for employment due to repairs, drydock or lay-up. Revenue days are weighted to reflect the Company's interest in chartered-in vessels.

^(d) Ship-operating days represent calendar days.

The following table provides a breakdown of TCE rates achieved for the three months ended March 31, 2012 and 2011, between spot and fixed earnings and the related revenue days. The information in these tables is based, in part, on information provided by the pools or commercial joint ventures in which the segment's vessels participate.

Three months ended March 31,	2012		2011	
	Spot Earnings	Fixed Earnings	Spot Earnings	Fixed Earnings
VLCCs:

Revenue days	441	364	450	360

Form 10-Q

OVERSEAS SHIPHOLDING GROUP, INC. AND SUBSIDIARIES

During the first quarter of 2012, TCE revenues for the International Crude Tankers segment decreased by \$13,310, or 15%, to \$75,500 from \$88,810 in the first quarter of 2011 reflecting lower average blended rates for the Aframax and Panamax crude sectors. The Company's ULCC experienced idle time during the first quarter of 2012, which contributed to the reduction in the segment's results quarter-over-quarter. In addition, the OSG Lightering business experienced a 23% reduction in the number of lighterings performed in the first quarter of 2012 compared with the first quarter of 2011. When combined with a weakening in rates achieved, the results from vessel operations for OSG Lightering were \$3,053 lower in the first quarter of 2012 than the first quarter of 2011. Revenue days decreased by 166 days during the current quarter. The decrease in revenue days reflects the sale in June 2011 of one double-sided Aframax, which had been chartered in by the OSG Lightering business and had generated poor returns since the second quarter of 2010. In addition, there were 353 fewer chartered-in days in the VLCC and Aframax fleets, partially offset by an increase in Suezmaxes that were chartered-in at current market levels on a short term basis and operate in the Suezmax International pool, as well as the delivery of two newbuild VLCCs, one in the third quarter of 2011, and a second in early January 2012. The return of the VLCC and Aframax charters-in had a positive impact on results from vessel operations since such charters-in were fixed at levels above those currently achievable in the market.

Vessel expenses decreased by \$954 to \$24,197 in the first quarter of 2012 from \$25,151 in the first quarter of 2011. This decrease reflects a decline in average daily vessel expenses of \$1,204 per day resulting from lower crew and repair costs in the current period as well as the timing of deliveries of stores and spares. Partially offsetting the impact of the decrease in daily expenses was a 176 day increase in owned and bareboat chartered-in days due to the fleet changes discussed above. Charter hire expenses decreased by \$3,715 to \$39,551 in the first quarter of 2012 from \$43,266 in the first quarter of 2011, principally as a result of 298 fewer chartered-in days in the current quarter. The decrease reflects reductions for VLCCs and Aframaxes, partially offset by an increase in chartered-in days for Suezmaxes. In addition to the redelivery of VLCCs and Aframaxes referred to above, the decrease in charter hire expense reflects a \$5,000 per day reduction in daily time charter-in rates for two VLCCs and two Aframaxes. Depreciation expense increased by \$2,683 to \$20,371 in the first quarter of 2012 from \$17,688 in the first quarter of 2011, as a result of the delivery of the two newbuild VLCCs referred to above.

OVERSEAS SHIPHOLDING GROUP, INC. AND SUBSIDIARIES

The following table provides a breakdown of TCE rates achieved for the three months ended March 31, 2012 and 2011 between spot and fixed earnings and the related revenue days. The information is based, in part, on information provided by the commercial joint ventures in which certain of the segment's vessels participate.

Three months ended March 31,	2012		2011	
	Spot Earnings	Fixed Earnings	Spot Earnings	Fixed Earnings
Panamax Product Carriers:				
Average rate	\$10,586	\$13,924	\$19,279	\$-
Revenue days	425	121	343	-
Handysize Product Carriers:				
Average rate	\$13,752	\$15,115	\$12,864	\$14,322
Revenue days	3,056	273	2,623	355

During the first quarter of 2012, TCE revenues for the International Product Carriers segment increased by \$6,627 to \$51,898 from \$45,271 in the first quarter of 2011. This increase in TCE revenues reflects an increase in revenue days of 526 during the current quarter, resulting from the expansion of the Handysize and Panamax Product Carrier sectors through the delivery of two owned and three time chartered-in Handysize Product Carriers since early-February 2011 and two owned Panamax Product Carriers since the first quarter of 2011. Also impacting the TCE revenues of the segment was a marginal period-over-period decrease in average blended rates for the fleet as a whole, with the lower rates earned in the Panamax Product Carrier sector offsetting the strengthening returns contributed by the Handysize Product Carriers, which operated primarily in the spot market in both periods.

Vessel expenses increased by \$1,152 to \$18,109 in the first quarter of 2012 from \$16,957 in the first quarter of 2011, principally due to a 357 day increase in owned and bareboat chartered-in days, which resulted from the vessel deliveries discussed above. Partially offsetting this increase was a decrease in average daily vessel expenses of \$635 per day. This decrease in average daily vessel expenses resulted principally from lower crewing and repair costs. Charter hire expenses increased by \$2,042 to \$30,929 in the first quarter of 2012 from \$28,887 in the first quarter of 2011, which reflects a 145 day increase in chartered-in days in the current period. This increase primarily relates to the delivery of the time chartered-in Handysize Product Carriers referred to above. Depreciation and amortization increased by \$3,111 to \$12,155 in the first quarter of 2012 from \$9,044 in the first quarter of 2011 principally due to the four newbuild vessel deliveries discussed above.

In 2005 the Company reflagged two Handysize Product Carriers (the Overseas Maremar and the Overseas Luxmar) under the U.S. Flag and entered them in the U.S. Maritime Security Program (the "Program"). Each of the vessel owning companies receives an annual subsidy, which was \$2,900 for 2011 and increased to \$3,100 in 2012, that is intended to offset the increased cost incurred by such vessels from operating under the U.S. Flag. Since these vessels

trade primarily in the international market, they continue to be reflected in the International Product Carrier segment.

As of March 31, 2012, the Company operated two other International Flag vessels, a Pure Car Carrier and a Chemical Tanker. The Pure Car Carrier, which is owned by the Company, is employed on a long-term charter expiring in August 2012. The Chemical Tanker has been time chartered-in by the Company for five years, commencing upon the vessel's delivery from the shipyard, which occurred at the end of September 2011. The Chemical tanker is currently employed on a one year time charter.

Form 10-Q

OVERSEAS SHIPHOLDING GROUP, INC. AND SUBSIDIARIES

The following table provides a breakdown of TCE rates achieved for the three months ended March 31, 2012 and 2011 between spot and fixed earnings and the related revenue days.

Three months ended March 31,	2012		2011	
	Spot Earnings	Fixed Earnings	Spot Earnings	Fixed Earnings
Handysize Product Carriers:				
Average rate	\$53,891	\$51,761	\$12,606	\$49,924
Revenue days	34	1,030	72	893
ATBs:				
Average rate	\$26,977	\$-	\$24,186	\$-
Revenue days	634	-	532	-
Lightering:				
Average rate	\$44,349	\$-	\$39,045	\$-
Revenue days	253	-	258	-

During the first quarter of 2012, TCE revenues for the U.S. segment increased by \$15,046, or 22%, to \$83,491 from \$68,445 in the first quarter of 2011. This increase reflects changes in the fleet as well as improved market fundamentals in the U.S. Flag sector as evidenced by the quarter-over-quarter improvement in rates earned by the ATBs, which operated exclusively in the spot (short-term) market. Time charters on the Handysize Product Carriers that expired since the first quarter of 2011 have been replaced at or above expiring rates. Between late-March 2011 and October 2011, the Company sold each of its two remaining single-hull Product Carriers and a 1981-built ATB (OSG Constitution/OSG 400) that was engaged in lightering. The Company broke out one ATB (OSG Enterprise/OSG 214) from lay-up in the third quarter of 2011 as supply/demand fundamentals in the U.S. market improved and took delivery of one bareboat chartered-in and one owned newbuild Product Carrier subsequent to February 2011 (including the Overseas Chinook, which completed conversion to a shuttle tanker in March 2011). Upon delivery from shipyard, the Overseas Chinook began operating under a multi-year time charter with fixed rates that were agreed to before the start of the economic recession. The bareboat chartered-in vessel, the Overseas Tampa, commenced a one year time charter shortly after its delivery in late-April 2011. In the first quarter of 2011, three vessels were laid-up for a total of 196 days. Two of these vessels were sold by the end of October 2011 and the third was broken out of lay-up in the third quarter of 2011, as discussed above.

In September 2011, Sunoco announced that it will make its Marcus Hook and Philadelphia refineries available for sale. Subsequently, in December 2011, Sunoco announced that it expects to begin idling the Marcus Hook facility immediately while it continues to seek a buyer and also pursues options with third parties for alternate uses of the facility. Sunoco also announced that it intends to continue to operate the Philadelphia refinery as long as market conditions warrant. However, if a suitable transaction cannot be implemented, Sunoco intends to permanently idle the main processing units at the Philadelphia refinery no later than August 2012. Sunoco is the core customer of the Company's Delaware Bay lightering business.

Vessel expenses increased by \$1,262 to \$27,892 in the first quarter of 2012 from \$26,630 in the first quarter of 2011, due to additions to the operating fleet discussed above. Charter hire expenses increased by \$2,467 to \$23,639 in the first quarter of 2012 from \$21,172 in the first quarter of 2011, reflecting the delivery of the bareboat chartered-in Jones Act Product Carrier referred to above. Depreciation and amortization increased by \$1,121 to \$15,247 from \$14,126, reflecting the deliveries subsequent to mid-March 2011 of the Overseas Chinook and OSG Horizon/OSG 351, partially offset by the vessel disposals discussed above.

Form 10-Q

OVERSEAS SHIPHOLDING GROUP, INC. AND SUBSIDIARIES

General and Administrative Expenses

During the first quarter of 2012, general and administrative expenses decreased by \$3,332 to \$21,136 from \$24,468 in the first quarter of 2011 principally due to the following:

a decrease in compensation and benefits paid to shore-based staff of approximately \$2,984, driven by headcount reductions and a decrease in incentive compensation accruals; and
favorable changes in foreign exchange rates and the impact of foreign currency contracts that reduced expenses by \$675; partially offset by:
increased legal and consulting expenses of \$823.

The first quarter of each year reflects payroll taxes and certain benefits attributable to the Company's payment of the respective prior year's cash incentive bonuses in the first quarter. Such payroll taxes and benefits, which are recognized in the period in which the cash incentive bonuses are paid rather than being spread over the year, amounted to approximately \$466 and \$934 in the first quarter of 2012 and 2011, respectively.

The Company maintains an unfunded, nonqualified savings plan covering highly compensated U.S. shore-based employees where the investment choices are directed by the employees. In addition, under OSG's Non-Employee Director Deferred Compensation Plan, participating directors can elect to invest deferred fees in phantom shares of the Company's stock. The Company has recognized increases in general and administrative expenses of \$1,068 for the first quarter of 2012 because of improvements in the overall stock market, including OSG stock. This compares with increases in general and administrative expenses of \$314 for the first quarter of 2011.

Equity in Income of Affiliated Companies:

During the first quarter of 2012, equity in income of affiliated companies increased by \$1,438 to \$7,080 from \$5,642 in the first quarter of 2011. The increases resulted primarily from reductions in vessel operating expenses quarter-over-quarter incurred by the FSO and LNG joint ventures.

Additionally, the Company has a 37.5% interest in ATC, a company that operates U.S. Flag tankers to transport Alaskan crude oil for BP. ATC earns additional income (in the form of incentive hire paid by BP) based on meeting certain predetermined performance standards. Such income is included in the U.S. segment.

The following table summarizes OSG's proportionate share of the revenue days for the respective vessels held in its vessel owning joint ventures accounted for using the equity method, excluding ATC. Revenue days are adjusted for OSG's percentage ownership in order to state the revenue days on a basis comparable to that of a wholly-owned vessel. The ownership percentages reflected below are the Company's actual ownership percentages as of March 31, 2012 and 2011.

Three months ended March 31,	2012		2011			
	Revenue Days	% of Ownership	Revenue Days	% of Ownership		
LNG Carriers operating on long-term charters	182	49.9	% 180	49.9	%	
FSOs operating on long-term charter	91	50.0	% 90	50.0	%	
Total	273			270		

Form 10-Q

OVERSEAS SHIPHOLDING GROUP, INC. AND SUBSIDIARIES

Interest Expense:

The components of interest expense are as follows:

	Three Months Ended March 31,	
	2012	2011
Interest before impact of swaps and capitalized interest	\$21,068	\$17,291
Impact of swaps	2,246	3,039
Capitalized interest	(304)	(2,591)
Interest expense	\$23,010	\$17,739

Interest expense increased by \$5,271 to \$23,010 in the first quarter of 2012 from \$17,739 in the first quarter of 2011 as a result of an increase in the average amount of variable debt outstanding of \$198,000, the impact of commitment fees incurred on the unsecured forward start revolving credit facility entered in May 2011 and a decline in capitalized interest as several newbuilds delivered subsequent to March 31, 2011. These increases were partially offset by the expiration in March 2011 of 3.2% fixed rate interest rate swaps covering notional amounts aggregating \$90,000.

Income Tax Benefit:

The income tax benefits for the three months ended March 31, 2012 and 2011 were based on the pre-tax results of the Company's U.S. subsidiaries, adjusted to include non-shipping income of the Company's foreign subsidiaries and reflect the reversal of previously established deferred tax liabilities.

Significant judgment is required in determining the provision for income taxes. In the ordinary course of business, there are many transactions and calculations where the ultimate tax determination is uncertain. OSG is regularly under audit by tax authorities. Although management believes that its tax estimates are reasonable, the final determination of tax audits could be materially different from the historical income tax provisions and accruals. The results of an audit could, therefore, have a material effect on the Company's financial statements in the period or periods for which that determination is made.

EBITDA:

EBITDA represents operating earnings before interest expense and income taxes and depreciation and amortization expense. EBITDA is presented to provide investors with meaningful additional information that management uses to monitor ongoing operating results and evaluate trends over comparative periods. EBITDA should not be considered a substitute for net income/(loss) attributable to the Company or cash flow from operating activities prepared in accordance with accounting principles generally accepted in the United States or as a measure of profitability or liquidity. While EBITDA is frequently used as a measure of operating results and performance, it is not necessarily comparable to other similarly titled captions of other companies due to differences in methods of calculation. The following table reconciles net loss, as reflected in the condensed consolidated statements of operations, to EBITDA:

Form 10-Q

OVERSEAS SHIPHOLDING GROUP, INC. AND SUBSIDIARIES

	Three Months Ended March 31,	
	2012	2011
Net loss	\$ (34,813)	\$ (34,558)
Income tax benefit	(1,347)	(1,556)
Interest expense	23,010	17,739
Depreciation and amortization	49,262	42,308
EBITDA	\$ 36,112	\$ 23,933

Liquidity and Sources of Capital:

Working capital at March 31, 2012 was approximately \$97,000 compared with \$202,000 at December 31, 2011. Current assets are highly liquid, consisting principally of cash, interest-bearing deposits, receivables and short-term investments. Approximately 24% of cash on hand at March 31, 2012 is held by the Company's foreign subsidiaries.

Net cash provided by operating activities in the three months ended March 31, 2012 approximated \$9,471 (which is not necessarily indicative of the cash to be provided by operating activities for the year ending December 31, 2012) compared with \$10,455 provided by operating activities in the three months ended March 31, 2011. Current financial resources coupled with the execution of one or more of the liquidity raising options discussed below are expected to be adequate to meet operating requirements in the 12 months ending March 31, 2013, although the continuation of depressed spot rates in the International Flag segments in the near term will have an adverse effect on the Company's operating cash flows and performance.

The Company's reliance on the spot market contributes to fluctuations in cash flows from operating activities historically as a result of the exposure to highly cyclical tanker rates and more recently as a result of the impact of the downturn in the shipping markets, as described in more detail under "Operations" above. Spot (voyage) charter rates have been at depressed levels since 2009 and opportunities to enter longer term time charters at satisfactory rates have been very limited. Therefore, expiring time charters and synthetic time charters (utilizing FFAs and bunker swaps) have been replaced at significantly lower TCE rates.

Because of continued weakness in the financial and credit markets and the depressed shipping markets there is greater focus on maintaining cash balances and liquidity. On February 9, 2012, the Board of Directors suspended the payment of regular quarterly dividends until further notice. The dividend suspension was not required in order to maintain compliance with any financial debt covenant applicable to the Company, but rather to preserve liquidity and maintain financial flexibility in a difficult economic environment.

Edgar Filing: OVERSEAS SHIPHOLDING GROUP INC - Form 10-Q

On January 18, 2012, the Company prepaid secured term loans due through 2016, covering two Aframaxes, with an outstanding balance of \$49,000. The loans were prepaid with borrowings from the unsecured revolving credit facility.

On February 13, 2012, the Company filed a Form S-3 shelf registration with the SEC that will allow it to issue common stock, preferred stock, debt securities, warrants or units (as defined) up to an aggregate of \$500,000, from time to time as market conditions permit.

Form 10-Q

OVERSEAS SHIPHOLDING GROUP, INC. AND SUBSIDIARIES

The Company has a seven-year unsecured revolving credit agreement maturing in February 2013 with a group of banks. Borrowings under this facility bear interest at a rate based on LIBOR. The availability under the unsecured revolving credit agreement decreased by \$150,000 on February 9, 2012. Accordingly, as of March 31, 2012, OSG had \$1,500,000 of unsecured credit availability, of which approximately \$1,146,000 had been borrowed and an additional \$10,146 had been used for letters of credit. In an effort to proactively manage refinancing risk in the tight credit markets and partially replace the borrowing capacity under the existing unsecured revolving credit facility, the Company entered into a \$900,000 unsecured forward start revolving credit agreement with a bank lending group on May 26, 2011. This forward start facility matures on December 31, 2016. Under the terms of the agreement, OSG may begin borrowing under the forward start facility on February 8, 2013, the date on which OSG's existing unsecured revolving credit facility expires.

Cash is expected to decrease by December 31, 2012 since the Company will, to the extent necessary, use cash on hand as of March 31, 2012 to reduce amounts outstanding under its unsecured revolving credit agreement. The Company is also evaluating how best to increase liquidity and how to bridge the potential gap between the amounts that it anticipates may be outstanding under the existing unsecured revolving credit facility as of February 8, 2013 and the amounts that will be available under the forward start credit facility. These options include increasing the borrowing capacity of the forward start credit facility; obtaining incremental bank financing; raising debt or equity capital using the Form S-3 shelf registration that was filed on February 13, 2012; selling or entering into sale and leaseback transactions for one or more vessels; or a combination of these or other options. The Company believes that it will be able to execute one or more liquidity raising options. If market conditions, however, continue to remain weak, OSG may be unable to enter into suitable vessel sale or leaseback transactions, raise additional equity capital or obtain debt financing on acceptable terms which could have a material adverse impact on the Company's financial position.

The earnings from shipping operations of the Company's foreign subsidiaries, which account for a significant amount of the Company's consolidated retained earnings, are not subject to U.S. income taxation as long as such earnings are not repatriated to the U.S. The Company currently intends to permanently reinvest these earnings, as well as its share of the undistributed earnings of its less than 50%-owned foreign shipping joint ventures, in foreign operations. Should OSG in the future, however, require more capital in the U.S. than is generated by its operations domestically or be required to secure a domestic borrowing by pledging International Flag vessels as collateral, the Company could be required to repatriate earnings from foreign jurisdictions either through actual cash distributions or deemed distributions. These alternatives could result in higher future effective tax rates and non compliance with financial covenants should the Company no longer be able to sustain its assertion that earnings from shipping operations of its foreign subsidiaries are permanently reinvested offshore.

Earnings from the Company's foreign subsidiaries were negative during the three months ended March 31, 2012. Management believes that the availability under the unsecured credit facility through its expiry in February 2013 is significant and remains a stable source of funds for the Company especially in the current weak financial and tight credit markets. Management believes that this unsecured credit availability plus cash on hand should be sufficient to meet both its operating and capital requirements for vessels under construction over the 12 months ending March 31,

2013 without having to utilize the facility's full capacity. Further, management does not expect that it would be required to make an actual or deemed repatriation of foreign earnings that would require OSG to reassess its intent and ability to permanently reinvest earnings from foreign shipping operations accumulated through March 31, 2012 in such operations.

Form 10-Q

OVERSEAS SHIPHOLDING GROUP, INC. AND SUBSIDIARIES

In January 2012, Standard & Poor's downgraded the ratings the Company's long-term corporate credit rating and the rating on the Company's senior unsecured debt from B to B- with a negative outlook. In December 2011, Moody's Investors Service downgraded the Company's long-term corporate credit rating and the rating on the Company's senior unsecured debt from B1 to B3 and from B2 to Caa1, respectively, and changed its ratings outlook from stable to negative. Both agencies attributed the downgrades to significant declines in the Company's revenue and earnings from vessel operations resulting from the prolonged weakness in the tanker markets and increases in the Company's leverage. Further increases in debt, whether from share repurchases, acquisitions or additional charter-in commitments could result in additional downgrades as could a continuation of the protracted downturn in freight rates. The downgrades do not impact any of the existing financial covenants contained in the Company's debt agreements, which do not contain ratings triggers, nor do they increase the Company's current cost of funds, but could increase the cost of future borrowings it seeks to negotiate.

The Company's financing agreements impose operating restrictions and establish minimum financial covenants. The financial covenants contained in the \$900,000 forward start facility, which are more restrictive than those contained in the current unsecured credit facility (due principally to differences in definitions between the two agreements), do not become effective prior to December 31, 2012. Failure to comply with any of the covenants in the financing agreements could result in a default under those agreements and under other agreements containing cross-default provisions. A default would permit lenders to accelerate the maturity of the debt under these agreements and to foreclose upon any collateral securing that debt. The Company was in compliance with all of the financial covenants under all of its debt agreements as of March 31, 2012. Average spot rates achieved in the Company's International Flag segments in the third and fourth quarters of 2011 were the lowest they have been during the industry's cyclical downturn, which commenced in the fourth quarter of 2008. Such rates have resulted in twelve consecutive quarters of losses through the first quarter of 2012 and negative cash flows from operating activities for the years ended December 31, 2011 and 2010. These results together with an assumption that the current weak markets are likely to continue in the near term significantly reduce the headroom that the Company has under the financial covenants in its debt agreements. The Company believes, however, that it will maintain compliance with all of its financial covenants over the twelve months ending March 31, 2013, including the \$900,000 forward start facility commencing as of December 31, 2012, although continued depression of spot rates of vessels in the International Flag segments in the near term may have an adverse effect on the operating performance of the Company. This, coupled with a continued depression of market values in the International Flag segments in the near term, could increase pressure on maintaining financial covenant compliance.

While the Company is primarily an unsecured borrower, two debt agreements with an aggregate outstanding balance of \$592,162 as of March 31, 2012 contain loan-to-value clauses that require the charter-free market value of the vessels pledged as collateral under each of the secured facilities to be no less than a specified percentage of the borrowings outstanding. For covenant compliance purposes, the market values of the vessels are determined on the basis of a "willing seller and willing buyer" by independent third party ship brokers approved by the Company and the lenders. Such valuations are not necessarily equivalent to the amounts that the Company would receive upon sale of any of these vessels, which may be more or less. In the event that the aggregate market value of the vessels that secure the Company's obligations under any of the secured facilities falls below the minimum required percentage and the lenders request or require compliance, the Company has the option to either repay a portion of the borrowings under

the facility or pledge additional collateral consisting of cash, cash equivalents or vessels of a similar size, class and age that are acceptable to the lenders. In addition to availability under the Company's unsecured revolving credit agreement there are also a number of vessels in the Company's fleet that it believes would be acceptable to the lenders as additional collateral. Accordingly, the Company expects that it will continue to be in compliance with the loan-to-value covenants in these secured debt agreements over the 12 months ending March 31, 2013. More details on compliance with the loan-to-value clauses in the two secured term loans are provided below.

Form 10-Q

OVERSEAS SHIPHOLDING GROUP, INC. AND SUBSIDIARIES

(i) *Term loans maturing in 2020* – This facility, with an outstanding balance of \$268,451 as of March 31, 2012, provides secured term loans covering seven MR Product Carriers, one Aframax and one VLCC. The facility provides that the market values of the vessels pledged as collateral be compared with the outstanding loan balance semi-annually. In December 2011, the facility was amended to among other things reduce the minimum required loan-to-value ratio from 110% to 100% through January 2013. As of December 31, 2011, the Company was in compliance with the loan-to-value covenant as well as all other financial covenants under this facility and the estimated charter-free market value of the vessels that secure this facility was 111%.

(ii) *Term loans maturing in 2023* – Borrowings under the facility, with an outstanding balance of \$323,711 as of March 31, 2012, financed the construction of three VLCCs and two Aframaxes in China, the last of which delivered in January 2012. The facility provides that the market values of the vessels pledged as collateral be compared with the outstanding loan balance annually. In December 2011, the Company entered into an amendment of the loan agreement that among other things reduced the minimum required loan-to-value ratio from 125% to 105% through January 2013. As of December 31, 2011, the Company was in compliance with the loan-to-value covenant as well as all other financial covenants under this facility and the estimated charter-free market value of the vessels that secure this facility was 110%, including the Overseas Kilimanjaro, which delivered in January 2012.

In conjunction with the amendments discussed above, the Company also prepaid \$37,665 in principal installments otherwise due in 2012 and 2013 in December 2011.

Off-Balance Sheet Arrangements

As of March 31, 2012, the affiliated companies in which OSG held an equity interest had total bank debt outstanding of \$1,084,582 of which \$807,553 was nonrecourse to the Company.

MOQ has awarded two service contracts to a joint venture between OSG and Euronav NV to provide two vessels, the FSO Asia and the FSO Africa, to perform FSO services in the Al Shaheen field off shore Qatar. The Company has a 50% interest in this joint venture. The joint venture financed the purchase of the vessels from each of Euronav NV and OSG and their conversion costs through partner loans and long-term bank financing, which was secured by the service contracts. Approximately \$277,029 was outstanding under this facility as of March 31, 2012, with the outstanding amount of this facility being subject to acceleration, in whole or in part, on termination of one or both of such service contracts. In connection with the secured bank financing, the partners severally issued 50% guaranties. The joint venture entered into floating-to-fixed interest rate swaps with major financial institutions covering notional amounts aggregating \$374,796 as of March 31, 2012, pursuant to which it pays fixed rates of 3.9% and receives floating rates based on LIBOR. These agreements have maturity dates ranging from July to September 2017.

In November 2004, the Company formed a joint venture with Qatar Gas Transport Company Limited (Nakilat) whereby companies in which OSG holds a 49.9% interest ordered four 216,000 cbm LNG Carriers. Upon delivery in 2007 and 2008, these vessels commenced 25-year time charters to Qatar Liquefied Gas Company Limited (II). The aggregate construction cost for such newbuildings was financed by the joint venture through long-term bank financing that is non recourse to the partners and partner contributions. The joint venture has entered into floating-to-fixed interest rate swaps with a group of major financial institutions covering notional amounts aggregating approximately \$783,274 as of March 31, 2012, pursuant to which it pays fixed rates of approximately 4.9% and receives a floating rate based on LIBOR. These agreements have maturity dates ranging from July to November 2022.

Form 10-Q

OVERSEAS SHIPHOLDING GROUP, INC. AND SUBSIDIARIES

Aggregate Contractual Obligations

A summary of the Company's long-term contractual obligations, excluding operating lease obligations for office space, as of March 31, 2012 follows:

	Balance of					Beyond	
	2012	2013	2014	2015	2016	2016	Total
Debt ⁽¹⁾	\$ 59,079	\$ 450,523	\$ 138,686	\$ 120,083	\$ 1,013,142	\$ 976,126	\$ 2,757,639
Operating lease obligations ⁽²⁾							
Bareboat Charter-ins	115,174	152,832	142,960	87,108	52,729	146,814	697,617
Time Charter-ins ⁽³⁾	111,948	110,098	90,821	72,446	56,375	62,279	503,967
Construction contracts ⁽⁴⁾	23,546	29,633	-	-	-	-	53,179
Total	\$ 309,747	\$ 743,086	\$ 372,467	\$ 279,637	\$ 1,122,246	\$ 1,185,219	\$ 4,012,402

Amounts shown include contractual interest obligations. The interest obligations for floating rate debt of \$1,716,950 as of March 31, 2012 have been estimated based on the fixed rates stated in related floating-to-fixed interest rate swaps, where applicable, or the LIBOR rate at March 31, 2012 of 0.47%. The Company is a party to floating-to-fixed interest rate swaps covering notional amounts aggregating \$220,412 at March 31, 2012 that effectively convert the Company's interest rate exposure from a floating rate based on LIBOR to an average fixed rate of 4.3%.

As of March 31, 2012, the Company had charter-in commitments for 46 vessels on leases that are accounted for as operating leases. Certain of these leases provide the Company with various renewal and purchase options. The future minimum commitments for time charters-in have been reduced to reflect estimated days that the vessels will not be available for employment due to drydock.

The Company estimates that its obligations under these time charter-in contracts expressed on a bareboat charter-in equivalent basis would be reduced to \$66,397 (2012), \$62,340 (2013), \$52,825 (2014), \$42,424 (2015), \$32,167 (2016) and \$34,986 (2017 and thereafter), an aggregate reduction of \$212,828. The Company estimated the bareboat equivalent charter-in obligations, by adjusting the applicable daily time charter-in rate by the daily average vessel operating expenses for the Company's different vessel classes in 2011.

Represents remaining commitments under shipyard construction contracts, excluding capitalized interest and other construction costs.

OSG has used interest rate swaps to convert a portion of its debt from a floating rate to a fixed rate based on management's interest rate outlook at various times. These agreements contain no leverage features and have various final maturity dates from December 2012 to August 2014.

OSG expects to finance vessel commitments from working capital, cash anticipated to be generated from operations, existing long-term credit facilities and additional long-term debt, as required. The amounts of working capital and cash generated from operations that may, in the future, be utilized to finance vessel commitments are dependent on the rates at which the Company can charter its vessels. Such charter rates are volatile.

Risk Management:

The Company is exposed to market risk from changes in interest rates, which could impact its results of operations and financial condition. The Company manages this exposure to market risk through its regular operating and financing activities and, when deemed appropriate, through the use of derivative financial instruments. The Company manages its ratio of fixed-to-floating rate debt with the objective of achieving a mix that reflects management's interest rate outlook at various times. To manage this mix in a cost-effective manner, the Company, from time-to-time, enters into interest rate swap agreements, in which it agrees to exchange various combinations of fixed and variable interest rates based on agreed upon notional amounts. The Company uses such derivative financial instruments as risk management tools and not for speculative or trading purposes. In addition, derivative financial instruments are entered into with a diversified group of major financial institutions in order to manage exposure to nonperformance on such instruments by the counterparties.

Form 10-Q

OVERSEAS SHIPHOLDING GROUP, INC. AND SUBSIDIARIES

The Company seeks to reduce its exposure to fluctuations in foreign exchange rates through the use of foreign currency forward contracts and through the purchase of bulk quantities of currencies at rates that management considers favorable. As of March 31, 2012, the Company had two foreign currency forward contracts outstanding with an aggregate notional value of €4,000 and has recorded an asset of \$152 related to their fair value. The contracts, which are not accounted for as a cash flow hedges, settle monthly between April and May 2012 and cover approximately €2,000 per month.

OSG's management regularly reviews the strategic decision with respect to the appropriate ratio of spot charter revenues to fixed rate charter revenues taking into account its expectations about spot and time charter forward rates. Decisions to modify fixed rate coverage are implemented in either the physical markets through changes in time charters or in the FFA markets, thus managing the desired strategic position while maintaining flexibility of ship availability to customers. OSG enters into Forward Freight Agreements and bunker swaps with an objective of economically hedging risk. The Company enters into FFAs and bunker swaps as economic hedges, some of which qualify as cash flow hedges for accounting purposes, seeking to reduce its exposure to changes in the spot market rates earned by some of its vessels in the normal course of its shipping business. By using FFAs and bunker swaps, OSG manages the financial risk associated with fluctuating market conditions. FFAs and bunker swaps generally cover periods ranging from one month to one year and involve contracts entered into at various rates with the intention of offsetting the variability of the TCE earnings from certain of the pools in which it participates. The Company may from time to time enter into FFAs and bunker swaps for trading purposes to take advantage of short term fluctuations in the market. FFAs and bunker swaps are executed predominantly through NOS ASA, a Norwegian clearing house, or LCH, London Clearing House. NOS ASA and LCH require the posting of collateral by all participants. The use of a clearing house reduces the Company's exposure to counterparty credit risk.

A significant percentage of the Company's International Crude Tankers are deployed and earn revenue through commercial pools that operate on multiple routes on voyages of varying durations, which differ from the standard routes associated with the related hedging instruments. Therefore, the FFA and bunker hedges that qualify as cash flow hedges for accounting purposes have basis risk. The TCE rates for the pools are computed from the results of actual voyages performed during the period whereas the rates used for settling FFA and bunker hedges are calculated as simple averages of the daily rates for standard routes reported with each daily rate weighted equally. High volatility tends to weaken the statistical relationship between pool performance and the FFA market results.

The Company also seeks to reduce its exposure to future increases in fuel prices in the normal course of its International Crude Tankers lightering business, which includes a number of fixed rate Contracts of Affreightment, by entering into stand alone bunker swaps. In January 2011, the Company entered into two agreements with a counterparty to purchase 400 metric tons per month of fuel for \$511 and \$522 per metric ton, respectively, through September 2012. Also, in September 2011, the Company entered into two additional agreements to purchase 500 metric tons per month of fuel for \$607 and \$580 per metric ton through September 2013. These contracts settle on a net basis at the end of each calendar month, based on the average daily closing prices, as quoted by the Baltic Exchange, of the commodity during each month. As of March 31, 2012, the Company has recorded an asset of \$1,741

related to the fair value of these contracts.

The shipping industry's functional currency is the U.S. dollar. All of the Company's revenues and most of its operating costs are in U.S. dollars.

Available Information

The Company makes available free of charge through its internet website, www.osg.com, its Annual Report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to these reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended, as soon as reasonably practicable after the Company electronically files such material with, or furnishes it to, the Securities and Exchange Commission.

The Company also makes available on its website, its corporate governance guidelines, its code of business conduct, Insider Trading Policy and charters of the Audit Committee, Compensation Committee and Corporate Governance and Nominating Committee of the Board of Directors.

Controls and Procedures

As of the end of the period covered by this Quarterly Report on Form 10-Q, an evaluation was performed under the supervision and with the participation of the Company's management, including the Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO"), of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act"). Based on that evaluation, the Company's management, including the CEO and CFO, concluded that the Company's current disclosure controls and procedures are effective to ensure that information required to be disclosed by the Company in the reports the Company files or submits under the Exchange Act is (i) recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms and (ii) accumulated and communicated to the Company's management, including the CEO and CFO, as appropriate to allow timely decisions regarding required disclosure. There have been no changes in the Company's internal control over financial reporting during the period covered by this Quarterly Report which have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II – OTHER INFORMATION

Item 1A. Risk Factors

There have been no material changes in the Company's risk factors from those disclosed in the Company's Annual Report on Form 10-K for the year ended December 31, 2011.

Item 4. Mine Safety Disclosures

Not applicable.

Item 6. Exhibits

See Exhibit Index on page 51.
