Management evaluates securities for other-than-temporary impairment (OTTI) on a quarterly basis, and more frequently when economic or market conditions warrant such an evaluation. The securities portfolio is evaluated for OTTI by segregating the portfolio into two general segments and applying the appropriate OTTI model. Investment securities are generally evaluated for OTTI under FASB ASC Topic 320, *Accounting for Certain Investments in Debt and Equity Securities*.

In determining OTTI under the ASC Topic 320 model, management considers many factors, including: (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near-term prospects of the issuer, (3) whether the market decline was affected by macroeconomic conditions, and (4) whether the entity has the intent to sell the debt security or more likely than not will be required to sell the debt security before its anticipated recovery. The assessment of whether an other-than-temporary decline exists involves a high degree of subjectivity and judgment and is based on the information available to management at a point in time.

The unrealized losses within the securities portfolio as of September 30, 2015 have not been recognized into income because the decline in fair value is not attributed to credit quality, management does not intend to sell and it is likely that management will not be required to sell the securities prior to their anticipated recovery. The decline in fair value of the residential mortgage-backed securities, obligations of state and political subdivisions and collateralized mortgage obligations is largely due to changes in interest rates. The fair value is expected to recover as the securities approach maturity. The mortgage-backed securities and collateralized mortgage obligations were primarily issued by Fannie Mae, Freddie Mac and Ginnie Mae, institutions which the government has affirmed its commitment to support. The Corporation does not own any private label mortgage-backed securities.
