Management Policy

Under the corporate philosophy of *kyosei* – living and working together for the common good – Canon’s basic management policy is to contribute to the prosperity and well-being of the world while endeavoring to become a truly excellent global corporate group targeting continued growth and development.

Management objectives

Aiming to increase corporate value, Canon Inc. launched Phase II of its Excellent Global Corporation Plan in 2001. This five-year management initiative, which will conclude in 2005, targets the fulfillment of the following four conditions with the aim of completing Canon’s transition to a truly excellent global corporation:

- 1) Securing the No. 1 position worldwide in all core business areas
- 2) Building up R&D strength capable of continually creating new businesses
- 3) Achieving a strong financial position
- 4) Fostering a corporate culture whereby all employees work ardently to achieve the company’s goals

Mid- to long-term management strategies

In order to achieve the objectives above, we have implemented the following mid- to long-term management strategies:

1) Becoming No. 1 in core businesses

Among our core businesses, we are already No. 1 worldwide in the areas of copying machines and laser beam printers. We intend, however, to create new business opportunities while also leading the way in expanding the color market through the active introduction of color copiers and color laser beam printers, developing the print-on-demand market with high-speed copiers, and promoting service businesses that offer document solutions.

With regard to digital cameras, we have leveraged our expertise in optical and image-processing technologies to continuously launch competitive products, which has allowed us to become a top market-share holder. Going forward, we aim to further expand our market share and profit.

In the field of inkjet printers, we will continue to promote high image quality and improved printing speeds while also enhancing the durability of color prints through the improvement of inks and papers. In the fast growing market for inkjet multifunctional devices, we will work to strengthen our lineup. Moreover, as we did in 2003, we will continue to actively introduce digital cameras and printers that support the PictBridge standard, which enables any compliant printer to print directly from any compliant digital camera. In addition, by enhancing such products as photo-print software and print media, we will work to expand the home photo-printing market.

Canon is uniquely positioned as one of the few companies to possess world-leading technology for both cameras and photo-quality color printers. Fully utilizing this technological advantage and Canon’s high brand recognition, we are focusing our efforts on becoming No. 1 in the home photo-printing market.

In the area of semiconductor production equipment, in 2003 we introduced new products based on a new platform and aim to pursue the No. 1 position in the industry by continuously launching new products ahead of our competitors. Furthermore, in the aligner market for large LCD panels, where we maintain the No. 1 spot, we will further strengthen our position by focusing on the development of next-generation equipment.

2) Strengthening R&D

To become No. 1 in our core businesses and create new areas of business, we will further concentrate our efforts on strengthening the company’s R&D capabilities. In addition to bolstering product engine and platform technologies, we will also thoroughly enhance our common base technologies.

In order to accelerate product development and curtail costs, we aim to realize prototype-less design through the effective utilization of 3D-CAD systems, eliminating, to the extent possible, physical prototypes from the design process. Moreover, in order to strengthen our R&D structure and production technology, we will work to build new facilities and improve our infrastructure.

Table of Contents

3) Achieving a strong financial position

We believe that the establishment of a healthy financial constitution is essential for the realization of continued corporate growth. While Canon Inc. has been actively strengthening its financial position, we will continue to promote cash-flow management to achieve financial strength befitting a truly excellent global company.

In addition to the management strategies outlined above, we will continue working to establish the Three Regional Headquarters System by enhancing the headquarters functions of Canon's regional marketing headquarters in Europe and the Americas. We have also been actively reorganizing the Canon Group in Japan to achieve an optimal organization structure and bolster the competitive strength of each company, and will continue these initiatives. Overseas, we have strengthened our direct sales network in order to support our solutions business and adopted a new streamlined sales organization in the EU that better accommodates market integration in the region. We are also keeping a close eye on the expanding Chinese market and plan to further strengthen our sales structure there as well.

Other measures being undertaken to improve profitability for the Group include: increasing the penetration and scale of worldwide production reform activities; developing innovative tools for factory automation; and strengthening supply-chain management in order to reduce inventories, shorten production lead times and accelerate the in-house production of key components. Through these activities we will target growth for the Canon Group and seek to heighten Canon's corporate value as represented by such financial indicators as ROA (Return on Assets) and ROE (Return on Equity).

Business challenges and countermeasures

One of the challenges that Canon faces is the establishment of stable business management that offers resilience against the influence of exchange rate fluctuations. With an overseas sales ratio of more than 70%, we are heavily exposed to this risk. For the short term, we will work to mitigate the impact of changes in exchange rates by increasing product development speed, which will facilitate the introduction of new products priced to reflect the latest foreign exchange levels, and further reducing costs through such reform activities as integrating development and production activities.

For the long term, we will establish product development operations in the United States and Europe, enabling each region—Japan, the Americas and Europe—to develop, produce and export its own products all over the world. Through the realization of international diversification across our production and marketing operations, we believe that the impact of exchange rate fluctuations can be minimized.

We also view environmental concerns as a management issue of extreme importance. From the product development stage through to production, sales, use, recovery and recycling, we focus our efforts on creating environmentally conscious products designed with energy savings, resource conservation, and the elimination of harmful substances in mind. In addition to the development of recycling systems and expansion of green procurement, we actively disclose environmental information and support local environmental activities.

Corporate governance policies and implementation of related measures

Canon, recognizing the extreme importance of bolstering management supervision functions aimed at increasing management transparency and achieving management objectives, has been implementing various measures to improve its corporate governance. In this manner, we are striving to continuously elevate Canon's corporate value.

1) Implementation of corporate governance measures

In addition to our board of directors and auditing system, Canon Inc. has also created an original internal auditing system for the further development of its corporate governance.

There are currently 24 directors on the company's board. In order to realize a more streamlined and efficient management decision-making process, Canon does not adopt the outside director system. Under the current system, as a general rule, all matters of importance are decided at board and management meetings attended by all directors. Moreover, various cross-company management advisory committees have been established to address important management themes. Each committee serves to accelerate and rationalize the decision-making process while supplementing the business-division system and performing a checking function.

Canon's board of corporate auditors consists of four members, two of whom are outside corporate auditors. In accordance with the board of corporate auditors' auditing policies and their assigned duties, the members attend board, management, and various committee meetings, listen to business reports from the

Table of Contents

directors and others, carefully examine documents related to important decisions, and conduct strict audits of the company's business and its assets.

Furthermore, the Corporate Audit Center, which serves as an internal auditing division, conducts inspections covering such areas as compliance, risk management and internal control systems, and then provides assessments and proposals. The various relevant administrative divisions also work very closely with the Corporate Audit Center to inspect such areas as quality, environment issues, information security and physical security.

The company has also established a code of conduct, which calls on all Canon Group employees to strictly observe all laws as well as company rules and regulations. This Canon Code of Conduct Handbook, which is available in nine different languages, has been distributed to all employees to further raise awareness of compliance throughout the entire Canon Group. A special administrative division has also been established to raise the effectiveness of these efforts.

Canon has made a practice of keeping shareholders and other investors abreast of management conditions through corporate policy briefings, quarterly announcements of operating results, and the company's Web site, and will continue to actively promote accurate and timely disclosure of information.

Through these measures, Canon will continue to strengthen corporate governance practices, based on management's strong sense of mission and ethics.

2) Overview of relationship between the company and outside corporate auditors in regard to personal, capital, business relationships and other stakeholders.

Currently, there are no special interests between the company and its two outside corporate auditors.

3) Measures implemented over the past year aimed at improving and enhancing corporate governance

To realize a management structure capable of responding rapidly to changes in the business climate, Canon reduced the term of office for company directors from two years to one.

In order to meet calls to reinforce the independence of the accounting firms, internal regulations related to prior approval policies and procedures for both auditing and non-auditing operations were established in May of 2003. Under the system introduced, the board of corporate auditors must approve the content and related amount of contracts between the accounting firms and the company before they are entered into.

Furthermore, we established in January 2004 a formal committee focused on business ethics with the president as chairman. The purpose of this committee is to examine, from various viewpoints, Canon's social responsibilities and to convey the findings to the company with the intention of raising compliance and ethical awareness.

Basic policy regarding profit distribution

With regard to profit distribution, Canon recognizes its dividend policy as one of the company's most important management issues. For fiscal 2003, Canon passed a resolution to raise its year-end dividend per share from 17.5 yen to 35 yen, to be approved during the upcoming shareholders meeting. If approved, the full-year dividend per share would be raised from 30 yen to 50 yen. This reflects the strong results we achieved for the year and appreciation for continued shareholder support. We intend to maintain stable dividend payments in the future, contingent upon the combination of consolidated financial performance, as well as capital requirements to fund future business expansion and improve profitability.

As for internal reserves, such funds will be used to support investment in current business's expansion and new business cultivation, and to repay debt in order to strengthen the company's financial structure.

Basic policy regarding share trading unit

Canon maintains a basic policy of periodically reviewing its share-trading unit from the standpoint of enhancing liquidity and stimulating broader investor participation.

Until now, Canon opted not to reduce the number of shares constituting a trading unit, as the company's stock enjoyed adequate levels of liquidity. Owing to an increase in the total investment amount required to realize one trading unit, however, the proportion of ownership by individual investors in recent years has decreased.

Edgar Filing: CANON INC - Form 6-K

As such, the company has decided to change the number of shares that constitute one trading unit from 1,000 to 100, effective May 6, 2004. This is an important measure aimed at offering a wider range of investors, including individuals, an opportunity to invest in the company.

Table of Contents

Operating Results and Financial Conditions

Looking back at the global economy in 2003, although economic conditions in the United States remained stagnant during the first half of the year, a recovery quickly took hold from the third quarter, led by healthy consumer spending resulting from tax cuts, and growth in capital investment in the private sector, which was supported by low-interest rate monetary policy. The economies of Europe remained flat through most of 2003, although an increase in exports accompanying the upturn in the U.S. economy pointed to signs of a recovery in the region in the latter half of the year. Asian economies grew substantially during 2003, particularly in China, as the adverse effects of the Severe Acute Respiratory Syndrome (SARS) epidemic were kept to a minimum. In Japan, while there were no signs of a turnaround in consumer spending or employment and income conditions, a gradual recovery was evident during the second half of the year as exports and capital investment showed steady improvement.

As for the markets in which the Canon Group operates, demand for digital cameras and digital video camcorders continued to expand in 2003. While shifting business demand toward multifunctionality and color stimulated strong sales of network digital multifunction devices (MFDs), computer peripherals, including printers, struggled amid severe price competition. In the field of optical equipment, the semiconductor-production equipment market began to show signs of a recovery while increased demand for liquid crystal display (LCD) televisions fueled growth in the market for projection aligners, used in the production of LCDs. The average value of the yen in 2003 was ¥115.61 to the U.S. dollar, and ¥131.02 to the euro, representing an appreciation of 8% against the dollar, and a depreciation of 10% against the euro.

Amid these conditions, Canon's consolidated net sales in 2003 totaled ¥3,198.1 billion (US\$29,889 million), marking the first time the company has surpassed the ¥3,000 billion level. The achievement represents a 8.8% increase from the previous year, owing to significant growth in sales of digital cameras and color network digital MFDs. Net income for the year also rose 44.6% to ¥275.7 billion (US\$2,577 million). The results mark new record highs for the company in both consolidated net sales and net income, and the fourth consecutive year of sales and profit growth. Canon's gross profit during the term increased by 14.9% compared to the previous year, boosted by an increase in sales volume as well as an improved gross profit ratio, made possible through R&D reforms supporting the timely launch of competitive new products, and cost savings realized through sustained production reforms. Selling, general and administrative expenses rose 9.6% year on year as R&D expenditures grew 10.9% to ¥259.1 billion (US\$2,421 million) and advertising and sales-promotion spending increased markedly, reflecting management's policy to strengthen the company's corporate and brand images. Consequently, operating profit in 2003 significantly increased by 31.2% to ¥454.4 billion (US\$4,247 million). Other income (deductions) improved by ¥10.1 billion (US\$94 million), owing to the increase in net interest income resulting from the company's strengthened financial condition, in addition to the decrease in currency exchange losses and improved equity affiliates earnings. As a result, income before income taxes in 2003 totaled ¥448.2 billion (US\$4,189 million), an increase of 35.8%. The effective tax rate during the term declined by 4.5% compared with the previous year due to an increased tax credit for R&D expenditures arising from an amendment to Japanese tax regulations. Consequently, net income in 2003 totaled ¥275.7 billion (US\$2,577 million), a year-on-year increase of 44.6%, which exceeds the growth rate of income before income taxes.

Basic earnings per share for 2003 was ¥313.81 (US\$2.93), a year-on-year increase of ¥96.25 (US\$0.90).

Results by Product Segment

In the business machine segment, demand for network digital MFDs, which are grouped in the office imaging products sub-segment, indicate a shift from monochrome machines to color models, as well as a trend toward higher-end features. Additionally, the iR C3200/iR C3200N, Canon's first color offerings in the powerful imageRUNNER (iR)-series lineup, was well received in Japan and overseas markets, contributing significantly to increased sales of office imaging products. Among monochrome network digital MFDs, the high-end iR5000 series and iR105 model continued to record strong sales during the term. Overall, year-on-year sales of office

Table of Contents

imaging products grew 3.7%. In the field of computer peripherals, sales of which were flat in the previous year due to inventory adjustment by Canon's OEM partner, a recovery in orders fueled robust growth in terms of unit sales during 2003, especially among personal models. Inkjet printers also performed well, with sales of the i560 and i860 remaining brisk, and a large rise in unit sales of such products as the MultiPASS MP700/MP730 high-speed multifunction inkjet systems. As a result, despite the adverse effect of severe price competition, sales of computer peripherals in 2003 increased by 3.2%. Conversely, sales of business information products, including computers, micrographics and calculators, decreased by 16.1% due to the intentional curtailing of sales of personal computer in the domestic market. Collectively, sales of business machines in 2003 totaled ¥2,273.9 billion (US\$21,251 million), a year-on-year increase of 2.1%. In addition to cost-cutting measures and the introduction of new price-competitive products, which contributed to an improvement in the gross profit ratio, a steady increase in sales volume boosted operating profit in 2003 by 18.5% to ¥487.1 billion (US\$4,552 million).

In the camera segment, amid the continued strong demand for digital cameras worldwide, Canon launched several new compact digital cameras in 2003, including six new PowerShot-series models and three new DIGITAL ELPH-series. These new products, led by the PowerShot S400 DIGITAL ELPH, contributed greatly to an increase in sales. Canon's digital SLR cameras also enjoyed robust sales growth, bolstered by the introduction of a new product lineup, including the EOS 10D, launched in the first half of 2003, and the EOS Digital Rebel, launched in September. Sales of conventional film cameras, however, continued to slip during the term amid the increasing popularity of digital models and price competition. In the field of digital video camcorders, the six new products Canon launched during the year, including the OPTURA300, achieved healthy sales for the term. The camera segment as a whole continued to achieve significant sales growth of 34.5%, totaling ¥653.5 billion (US\$6,108 million) in 2003. Operating profit for the camera segment appreciably advanced 79.7% to ¥126.3 billion (US\$1,181 million), attributable to the rapid growth in sales of digital cameras, along with a significant improvement in the gross profit ratio, made possible through effective cost-saving initiatives.

In the optical and other products segment, sales of aligners for the production of LCDs displayed notable growth as the PC monitor industry continued its shift from CRT to LCD computer displays, and the LCD television market continued to expand, while sales of steppers, used for the production of semiconductors, also increased as the semiconductor market began to show signs of a turnaround. Accordingly, sales of optical and other products totaled ¥270.6 billion (US\$2,529 million), a year-on-year increase of 18.6%. Despite increased sales for the segment, the gross profit ratio decreased in 2003 due to severe competition in the market and a one-time expense for the disposal of inventories, resulting in an operating loss of ¥11.4 billion (US\$107 million) for the term.

Cash Flows

Cash flow from operating activities in 2003 increased by ¥16.7 billion (US\$156 million) from the previous year to ¥465.6 billion (US\$4,352 million), mainly due to the substantial increase in net income and an increase in depreciation. Capital expenditures for the period totaled ¥210.0 billion (US\$1,963 million), which was mainly to expand production capabilities in Japan and overseas. Cash flows from investing activities totaled ¥199.9 billion (US\$1,869 million), including a ¥12.7 billion (US\$119 million) outlay for the acquisition of Sumitomo Metal System Solutions Co., Ltd., now Canon System Solutions Inc. As a result, free cash flow, or cash flow from operating activities minus cash flow from investing activities, totaled ¥265.7 billion (US\$2,483 million), marking the second consecutive year that the company has maintained a free cash flow over ¥200.0 billion (US\$1,869 million).

Cash flow from financing activities recorded an outlay of ¥102.0 billion (US\$954 million) in 2003, mainly resulting from active efforts to repay short-term and long-term loans towards the goal of improving the company's financial position, including the redemption of ¥10.0 billion (US\$93 million) in debentures. Consequently, cash and cash equivalents, which totaled ¥690.3 billion (US\$6,451 million), remained at a high level, representing a ¥169.0 billion (US\$1,579 million) increase from the end of the previous year.

Table of Contents

Non-consolidated Results and Dividend

Canon Inc.'s non-consolidated net sales in 2003 grew by 13.1% to ¥2,023.7 billion (US\$18,913 million) while ordinary profit increased by 33.0% to ¥320.6 billion (US\$2,996 million), both representing new record highs for the company. Non-consolidated net income, however, increased significantly by 58.6% to ¥228.7 billion (US\$2,137 million), owing to a temporary gain realized through exemption from the obligation to pay benefits for future employee services related to the substitutional portion of the Employees' Pension Fund.

In response to continued shareholder support, the Board of Directors intend to propose a ¥20.0 (US\$0.19) increase in the company's year-end dividend to ¥35.00 (US\$0.33) which, when combined with the interim dividend of ¥15.00 (US\$0.14), would bring the company's annual dividend rate to ¥50.00 (US\$0.47) per share.

Outlook

Regarding the outlook for the global economy, the U.S. economy is likely to continue its course toward recovery. The Japanese and European economies are also expected to show a moderate recovery owing to the growth in the U.S., while the economies of China and Southeast Asia will probably sustain substantial growth. While the global economy in general appears to be headed toward recovery, uncertainties are likely to continue due to concern over such issues as the postwar handling of Iraq and the appreciation of the yen against U.S. dollar.

In the businesses in which Canon is involved, the digital camera market is expected to continue enjoying rapid growth and stable demand is projected for color-model network digital MFDs and laser beam printers. Additionally, in the semiconductor-production equipment market, a pickup in capital spending by chipmakers is anticipated while orders for aligners by LCD manufacturers are expected to rise steadily.

In fiscal 2004 Canon anticipates consolidated net sales of ¥3,330.0 billion (US\$31,121 million), consolidated income before income taxes of ¥470.0 billion (US\$4,393 million), and consolidated net income of ¥286.0 billion (US\$2,673 million). The company also forecasts non-consolidated net sales of ¥2,170.0 billion (US\$20,280 million), non-consolidated ordinary profit of ¥338.0 billion (US\$3,159 million), and non-consolidated net income of ¥217.0 billion (US\$2,028 million). These forecasts assume currency exchange rates of ¥105.00 to the U.S. dollar and ¥130.00 to the euro. Although uncertainty surrounds several factors that could affect currency exchange rates, the yen is expected to be stronger against U.S. dollar by approximately 11%, and weaker against euro by approximately 2% compared with 2003.

This document contains forward-looking statements with respect to future results, performance and achievements that are subject to risk and uncertainties and reflect management's views and assumptions formed by available information. All statements other than statements of historical fact are statements that could be considered forward-looking statements. When used in this document, words such as anticipate, believe, estimate, expect, intend, may, plan, project or should and similar expressions, as they relate to Canon, are intended to identify forward-looking statements. Many factors could cause the actual results, performance or achievements of Canon to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements, including, among others, changes in general economic and business conditions, changes in currency exchange rates and interest rates, introduction of competing products by other companies, lack of acceptance of new products or services by Canon's targeted customers, inability to meet efficiency and cost reduction objectives, changes in business strategy and various other factors, both referenced and not referenced in this document. A detailed description of these and other risk factors is included in Canon's annual report on Form 20-F, which is on file with the United States Securities and Exchange Commission. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein. Canon does not intend or assume any obligation to update these forward-looking statements.

Notes:

Effective 1st quarter of fiscal 2003, Canon has revised the product categories contained within the Business machines segment. The new categories are: Office imaging products, Computer peripherals, and Business information products. Accordingly, previous year's sales for each category have been restated in accordance with the changes.

- The primary products included in each of the product segments are as follows:
Business machines:
Office imaging products : Office network digital multifunction devices (MFDs) / Color network digital MFDs /
Office copying machines / Personal-use copying machines / Full-color copying machines / etc.
Computer peripherals : Laser beam printers / Inkjet printers / Inkjet multifunction

Office

Edgar Filing: CANON INC - Form 6-K

peripherals / Image
scanners / etc.
Business
information products
: Computer
information systems /
Micrographic
equipment / Personal
information products
/ etc.

Cameras : SLR cameras / Compact
cameras / Digital cameras / Digital video
camcorders / etc. Optical and other
products : Semiconductor production
equipment / Mirror projection mask
aligners for LCD panels /

Broadcasting
equipment / Medical equipment /
Components / etc. 2. The countries and
regions included in each regional category
are as follows: Americas: United States
of America, Canada, Latin America /
Europe: England, Germany, France,
Netherlands / Other Areas: Asian
regions, China, Oceania

8. BASIS OF PRESENTATION AND SIGNIFICANT ACCOUNTING POLICIES

(1) CHANGES IN GROUP OF ENTITIES

Subsidiaries

Addition: Fukushima Canon Inc. and 13 other companies

Removal: Copyer Co., Ltd. and 10 other companies

- Notes:
1. Fukushima Canon Inc. was established as a wholly owned subsidiary in April 2003 through the spin-off of Fukushima Plant.
 2. Copyer Co., Ltd. have merged with Canon Aptex Inc. and became as Canon Finetech Inc. on January 1, 2003.

Affiliates (Carried at Equity Basis)

Addition: 2 companies

Removal: 2 companies

(2) SIGNIFICANT ACCOUNTING POLICIES

The accompanying consolidated financial information reflect the adjustments which management believes are necessary to conform them with accounting principles generally accepted in the United States of America, except for the segment information, as required by Statement of Financial Accounting Standards No.131, Disclosures about Segments of an Enterprise and Related Information.

1. Marketable Securities and Marketable Investments

Canon's consolidated financial information are based on Statement of Financial Accounting Standards No. 115 (SFAS 115), Accounting for Certain Investments in Debt and Equity Securities. Under SFAS 115, certain investments in debt and equity securities should be classified as trading, available-for-sale or held-to-maturity. Canon's marketable securities and marketable investments consist of available-for-sale securities.

Unrealized holding gains and losses, net of the related tax effect, on available-for-sale securities are excluded from earnings and are reported as a separate component of other comprehensive income (loss) until realized.

2. Inventories

Inventories are stated at the lower of cost or market. Cost is determined principally by the average method for domestic inventories and the first-in, first-out method for overseas inventories.

3. Depreciation

Depreciation is calculated principally by the declining-balance method over the estimated useful lives of assets.

4. Employee Retirement and Severance Benefits

Canon has adopted Statement of Financial Accounting Standards No. 87 (SFAS 87), Employer's Accounting for Pensions.

5. New Accounting Standards

In March 2003, the Emerging Issue Task Force (EITF) reached a final consensus on EITF 02-16, Accounting by a Customer (Including a Reseller) for Certain Consideration Received from a Vendor. Canon adopted EITF 02-16 on January 1, 2003. The adoption of EITF 02-16 did not have a material effect on Canon's consolidated financial position and results of operations.

In June 2002, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No.146 (SFAS 146), Accounting for Costs Associated with Exit or Disposal Activities. Canon adopted the provisions of SFAS 146 on January 1, 2003. The

Edgar Filing: CANON INC - Form 6-K

adoption of SFAS 146 did not have a material effect on Canon's consolidated financial position and results of operations.

This document contains forward-looking statements with respect to future results, performance and achievements that are subject to risk and uncertainties and reflect management's views and assumptions formed by available information. All statements other than statements of historical fact are statements that could be considered forward-looking statements. When used in this document, words such as anticipate, believe, estimate, expect, intend, may, plan, project or should and similar expressions, as they relate to Canon, are intended to identify forward-looking statements. Many factors could cause the actual results, performance or achievements of Canon to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements, including, among others, changes in general economic and business conditions, changes in currency exchange rates and interest rates, introduction of competing products by other companies, lack of acceptance of new products or services by Canon's targeted customers, inability to meet efficiency and cost reduction objectives, changes in business strategy and various other factors, both referenced and not referenced in this document. A detailed description of these and other risk factors is included in Canon's annual report on Form 20-F, which is on file with the United States Securities and Exchange Commission. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein. Canon does not intend or assume any obligation to update these forward-looking statements.

(Note)

From the 1st quarter of 2003, facsimiles which included personal digital MFDs etc. based on electrophotography technology were reclassified and are now included in Copying Machines, renamed Office Imaging Products. Those products based on inkjet technology were moved to Inkjet Printers in Computer Peripherals. In connection with this adjustment, Business Systems were renamed Business Information Products. Values for the previous year are restated to conform to the reclassification.

**Notice of change in the number of shares
that constitute one unit**

TOKYO, January 29, 2004 Canon Inc. (Canon) announced that, following a decision reached today by its Board of Directors, the company will change the number of shares that constitute one unit.

1. Reason for change

Until now, Canon opted not to reduce the unit of investment, as the company's stock enjoyed adequate levels of liquidity. Owing to an increase in the total investment amount required to realize one trading unit, however, the proportion of ownership by individual investors in recent years has decreased.

As such, the company has decided to change the number of shares that constitute one unit. By reducing the minimum investment amount, Canon hopes to offer a wider range of investors, including individuals, an opportunity to invest in the company. The company also views the measure as an important step to further broaden its base of investors who, as shareholders, provide support for Canon's management.

2. Contents of change

The number of shares constituting one unit will be reduced from 1,000 to 100.

3. Effective date (forecast)

Thursday, May 6, 2004

(Reference)

On May 6, 2004, the number of Canon shares constituting one trading unit will be reduced from 1,000 to 100 on the Tokyo Stock Exchange, Osaka Securities Exchange, Nagoya Stock Exchange, Fukuoka Stock Exchange and the Sapporo Stock Exchange.
