Explanation regarding proper use of business forecasts, and other significant matters

1. The consolidated financial forecast for the year ending March 31, 2009 has not been revised. Regarding the assumptions for the forecasts and other matters, refer to [Qualitative Information and Financial Statements] Section 3 Qualitative information on consolidated financial forecast on page 3.

The financial forecasts given above are based on information as available at the present time, and include potential risks and uncertainties. As a consequence of factors above and other, actual results may vary from the forecasts provided above.

2.

Makita's basic policy on the distribution of profits is to maintain a consolidated dividend payout ratio of 30% or greater, with a lower limit on annual cash dividends of 18 yen per share. However, in the event special circumstances arise, computation of the amount of dividends will be based on consolidated net income after certain adjustments.

The Board of Directors plans to meet in April 2009 for a report on earnings for the year ending March 31, 2009. At the time, in accordance with the basic policy regarding profit distribution mentioned above, the Board of Directors plans to propose a dividend equivalent to at least 30% of net income. The Board of Directors will submit this proposal to the General Meeting of Shareholders scheduled for June 2009.

The consolidated dividend payout ratio is calculated as annual dividends per share divided by consolidated net income per share (after adjustments for special circumstances) and multiplied by 100.

Table of Contents**[Qualitative Information and Financial Statements]****1. Qualitative information on consolidated operating results**

Net sales in this first quarter were 84,636 million yen, an increase of 5.0% compared to the same quarter of the previous year, as sales strength continued in emerging markets including Eastern Europe, Russia, Latin America, and the Middle East, which were partially offset by the sales decreases in the U.S. and Japan, where investments in the housing sector were weak.

With regard to earnings, operating income amounted to 17,091 million yen (ratio of operating income to net sales; 20.2%), up 14.0% from the same quarter of the previous year, income before income taxes amounted to 16,677 million yen (ratio of income before income taxes to net sales; 19.7%), up 8.2% and net income for the quarter amounted to 11,781 million yen (ratio of net income to net sales; 13.9%), up 4.8%.

Net sales by geographic area were as follows;

In Japan, as the long-stagnant new housing starts have not yet recovered in full, the sales decreased by 5.3% from the same quarter of the previous year to 11,447 million yen.

In Europe, while the growth rate of demand in Western Europe slowed down, the sales in Eastern Europe and Russia continued to be solid, resulting in 40,835 million yen, an increase of 8.5%.

In North America, in addition to the fact that the severe downturn in the U.S. housing market continues, in the foreign exchange market, U.S. dollar moved significantly weaker against Japanese yen in comparison with the rate of the same period of the previous year, which resulted in a decrease of 16.3% to 11,440 million yen.

In Asia, the business in Southeast Asia showed strong results, recording an increase of 29.8% to 7,036 million yen.

In other regions, as strong economies benefiting from soaring prices of natural resources still continue, the sales in Central and South America were up by 29.6% to 4,960 million yen, the sales in the Middle East and Africa rose by 19.5% to 4,826 million yen, and the sales in Oceania were higher by 4.0% to 4,092 million yen.

2. Qualitative information on consolidated financial position

(Analysis on assets, liabilities and shareholders' equity)

Total assets as of the end of this first quarter amounted to 390,946 million yen, which was an increase of 1.2% from the end of the previous year. Key factors for this included the increase in inventories carried out in anticipation of sales increases, and the increase in fixed assets associated with facilities and equipment at overseas plants.

Liabilities rose by 3.1% compared to the previous year-end to 69,535 million yen. The main reason for this increase was an increase in long-term deferred income taxes liabilities mainly as a result of the appreciation of the fair value of the securities investment portfolio of the Company.

Shareholders' equity was up by 0.7% compared to the previous year to 318,561 million yen.

3. Qualitative information on consolidated financial forecast

Despite generally solid emerging markets, as the market environments in Japan as well as in the U.S. are expected to remain severe, and the sense of deceleration in demand in Western European markets are expected to increase, the management environment surrounding Makita remains unpredictably challenging. In light of such uncertain circumstances, at the present time, the Company will not make any change to its forecast announced on April 30, 2008 for the results for six months ending September 30, 2008 and the results for the year ending March 31, 2009.

4. Other

(1) Changes in important subsidiaries during the period (Changes in specific subsidiaries accompanied by changes in scope of consolidation): None

(2) Adoption of simplified accounting methods and accounting methods that are specific to the preparation of quarterly consolidated financial statements:

With regard to the income tax expenses, the Company computes interim income tax expense (benefit) by multiplying reasonably estimated annual effective tax rate, which includes the effects of deferred taxes, by year-to-date income before income taxes for the fiscal first quarter ended June 30, 2008.

(3) Changes in principle, procedure and representation of the accounting policies concerning quarterly consolidated financial statements preparation:

Starting with this fiscal year, the Company has adopted the Fair Value Measurements pursuant to the Statement of Financial Accounting Standards No. 157. This Statement defines fair value as the price that would be received to sell

an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The adoption did not give rise to any material effect on the Company's consolidated financial position or results of operations.
