Allocation of the Funds

The funds granted to the ISSUER through the trading of the Debentures, after the payment of the due expenses for the issue of Debentures, shall be allocated to investments for the expansion and modernization of the plant in the year of 2003.

Guarantee

The Debentures are of the unsecured type. **BRASIL TELECOM PARTICIPAÇÕES S.A.**, with head office at SIA Sul ASP LOTE D Bloco B, Brasília, Federal District, registered under CNPJ Corporate Taxpayer ID under no. 02.570.688/0001-70 binds itself to the Debenture holders as guarantor and principal payer of the ISSUER, herein clearly waiving the benefits of order, rights and faculties of exoneration set forth in articles 1.006, 1.485, 1.491, 1.498, 1.499, 1.500, 1.502, 1.503 e 1.504 of the Civil Code, in articles 261 and 262 of the Brazilian Commercial Code and in articles 77 and 595 of the Civil Process Code, for the payment, on the maturity date, of the Face Value Unit, plus the Remuneration and, if applicable, the contracted fine for late payment.

Covenants

The ISSUER binds itself to complying with the following limits and financial indexes, to be verified quarterly:

- On the date of the last quarterly balance sheet, the ratio between the sum of the consolidated EBITDA for the last 4 quarters of the ISSUER and the sum of the Consolidated Financial Expenses during the same period shall not be less than 2.25;
- On the date of the last quarterly balance sheet, the ratio between the Consolidated Debt and the sum of the consolidated EBITDA for the last 4 quarters of the ISSUER cannot exceed 3.25;
- On the date of the last quarterly balance sheet, the ratio between the Consolidated Debt and the sum between the Consolidated Debt and the Shareholders' Equity cannot exceed 0.60.

"EBITDA" means the sum without duplication (i) of the income prior to the deduction of taxes, tributes, contributions and shares, (ii) of the consolidated depreciation and amortizations which occurred in the same period and (iii) of the Financial Expenses deducted from the financial revenue, discounting (iv) the non-operating income and (v) other revenue and operating expenses.

Edgar Filing: BRASIL TELECOM SA - Form 6-K

"Consolidated Debt" means the sum of the consolidated unprofitable debt of the ISSUER in relation to individuals and/or companies, including loans and funding with third parties, issue of de fixed income bonds, convertible or not, on the local and/or capitals market besides cosignatures, sureties, pledges or guarantees provided by the Issuer, as well as amounts tendered to shareholders as a result of the redemption of shares executed by the ISSUER and the sale or the assignment of present or future receivables, with or without the coobligation of the ISSUER.

"Consolidated Financial Expenses" means the sum of the debt issue costs, interest paid to individuals or companies, including financial institutions, suppliers, securities, financial expenses that do not impact the cash flow, commissions, discounts and other charges for banking loans and letters of credit, hedging expenses, expenses with commercial leases, expenses for cosignatures, sureties, pledges or guarantees provided for other obligations.

Call Feature

The ISSUER is entitled the right to, at any time, as of the 6th (sixth) month counting from the Date of Issue ("Redemption Start Date"), to promote the call feature of all or part of the total outstanding Debentures, through the payment of the Face Value Unit, plus the Remuneration, applicable up to the date of redemption, calculated pro rata temporis from the Date of Issue or the date of the last payment of the respective Remuneration, up to the effective payment of the redemption, plus the redemption premium. For the purpose of the provisions in the item herein, the redemption premium applicable in the case of Debenture call feature will be equal to 0,5% (half a percent) on the redemption amount, proportional to the period of consecutive days remaining between the effective redemption date and the Maturity date, according to the following formula:

$$P = d/D * 0.5\%$$

Where: P = Premium to be paid in a percentage value on the amount of the redemption d = amount of consecutive days between the effective redemption date and the Maturity date of the Debentures D = amount of consecutive days between the June 1st, 2003 (corresponding to the period of 6 months after the Date of Issue) and the Maturity Date of the Debentures.

The ISSUER will notify the Debenture holders about the call feature of the Debentures, in the manner set forth in the document herein, at least 20 (twenty) consecutive days prior to the effective redemption of the Debentures.

In the event of a call feature in part of the total of outstanding Debentures, the redemption will occur with a drawing, in the presence of the Debenture Holder Trustee, in accordance with the terms of the first paragraph of art. 55 in Law 6.404/76 and other applicable norms. Should a partial redemption occur, a minimum of 20% (twenty percent) of the amount of Debentures placed during the public distribution period will remain outstanding, on the contrary, the redemption will be total.

Repricing

There will be no repricing.

Operating Performance

(extracted from 3rd Quarterly Information to CVM/03 R\$ thousand)

Operating Context

BRASIL TELECOM S.A. is a Switched Fixed Telephone Service concessionaire (STFC) and it executes its activities in Region II of the

Edgar Filing: BRASIL TELECOM SA - Form 6-K

General Grant Plan, which comprises the Brazilian states of Acre, Rondônia, Mato Grosso, Mato Grosso do Sul, Tocantins, Goiás, Paraná, Santa Catarina and Rio Grande do Sul, besides the Federal District. This area, which extends 2,859,375 square kilometers, contemplated by the local and long distance telephone concessions, corresponds to 34% of the country.

It is a company controlled by Brasil Telecom Participações S.A. (BTP), a company organized on May 22, 1998 as a result of the privatization process of the Telebrás System.

The business of the Company, as well as the services that it offers and the rates it charges are regulated by the National Telecommunications Agency Anatel (Agencia Nacional de Telecomunicações).

The information referent to the targets for quality and universalization of the Switched Fixed Telephone Service are available to all through the ANATEL website www.anatel.gov.br.

The Company is registered at the CVM (Brazilian Securities and Exchange Commission) and at the Securities and Exchange Commission SEC of the US and has its shares traded in the main stock exchanges of the country and its ADR`s in the New York Stock Exchange (NYSE). The Company also integrate Level 1 of Corporate Governance of the São Paulo Stock Exchange BOVESPA.

Market Value of the Financial Assets and Liabilities (Financial Instruments) and Risk Analysis.

The Company and its controlled companies carried out an evaluation of its financial assets and liabilities in relation to market values or effective realization (fair value), using information available and evaluation methodologies appropriate for each situation. The interpretation of the market data in relation to the choice of methodology requires a considerable amount of judgment and the establishment of estimates to reach a value considered to be adequate for each situation. Consequently, the estimates shown may not necessarily indicate the amounts that can be obtained on the current market. The use of different cases for the appraisal of market value or the fair value may have a material effect on the values obtained. The choice of assets and liabilities shown in the document herein occurred due to their materiality. The instruments whose values are close to the fair value and whose risk evaluation is irrelevant were not mentioned.

According to their nature, financial instruments may involve known or unknown risks and the potential of these risks is important, in the best judgment. Thus, there may be risks with or without guarantees, depending on the circumstantial or legal aspects. Among the market risk factors that may affect the business of the Company, emphasis has been placed on the following ones:

Credit Risk

The majority of the services offered by the Company are linked to the License Agreement and a large part of these services are subordinated to the establishment of rates on behalf of the regulating entity. In turn, the credit policy, in the case of public telecommunication services, is subordinated to the legal norms established by the licensing power. The risk exists due to the possibility of the Company incurring losses which result from the difficulty to receive amounts billed to its clients. Up to the quarter, the delinquency of the Company was 2.50% of gross revenue (2.60% in the same period the previous year). Through internal controls, the Company permanently monitors the level of accounts receivable, which limits the risk of delinquent accounts and proceeds cutting access to the service (outgoing traffic) if the bill is overdue for more than thirty days. Exceptions are made in the case of telephone services that have to be maintained for reasons of security or national defense. On June 30, 2003, the portfolio of clients of the Company did not present subscriber registers whose receivables were, individually, over 1% of the total accounts receivable for the services.

Exchange Rate Risk

The Company has loans and funding in foreign currency. The risk linked to these liabilities arises from the possibility of the existence of variations in exchange rates that may increase their balance. The loans subject to this risk registered around 5.23% of the total liabilities of this kind (6.8% on 03/31/03). In order to minimize this risk, the Company hedges exchange swaps with financial institutions. Of the part of the debt in foreign currency, 44% is covered by hedging (37% on 03/31/03). The unrealized positive or negative effects of these transactions are registered in the income as gain or loss. By the end of the quarter, net losses totaled R\$ 74,546 (R\$ 24,415 of net gains in 2002).

Net exposure, using the accounting and market value, to the exchange rate risk on the closing date of the quarter is the following:

PARENT COMPANY	09/30/03		06/30/03	
	Book Value	Market Value	Book Value	Market Value
<hr/>				
LIABILITIES				
Loans and Funding	241,805	233,828	254,149	244,979
Hedge Contracts	(821)	(8,412)	(3,428)	(7,131)
TOTAL	240,984	225,416	250,721	237,848

Edgar Filing: BRASIL TELECOM SA - Form 6-K

SHORT TERM	45,143	34,256	41,825	34,875
LONG TERM	195,841	191,160	208,896	202,973

The method used for the market value calculation (fair value) on the loans and funding in foreign currency and hedging instruments was that of the discounted cash flow, at market rates in effect on the closing date of the quarter.

Interest Rate Risk

Assets

The Company has loans granted to the company which produces the yellow pages and resulting from the sale of goods from property, plant and equipment to other telephone companies.

These assets are represented hereunder as on the closing date of the quarter:

	Parent Company		Consolidated	
	Book and Market Value		Book and Market Value	
	09/30/03	06/30/03	09/30/03	06/30/03
<hr/>				
ASSETS				
Loans linked to IGP-DI	6,738	6,737	6,738	6,737
Loans linked to CDI	765	-	-	-
Loans linked to IPA-OG Column 27 (FGV)	1,972	1,672	1,972	1,672
Loans linked to IGP-M	-	-	1,233	-
TOTAL	9,475	8,409	9,943	8,409
SHORT TERM	2,732	1,949	1,967	1,949
LONG TERM	6,743	6,460	7,976	6,460

The accounting values are equal to the market values due to the fact that the current employment conditions for these types of financial instruments are similar to those in which the latter derive from.

Liabilities

The Company has loans and funding in local currency subordinated to the interest rates linked to the main indexers: TJLP (long-term Interest Rate), UMBNDES, CDI (Domestic Interbank Rate) and IGPM (General Price Index). The inherent risk of these liabilities arises from the possibility of the existence of variations in these rates. The Company has made hedge derivative contracts for 78% of the liabilities subject to the UMBNDES rate, in the exchange swap mode, considering the influence of the dollar on the payment charges (currency basket) for these liabilities. However, continuous monitoring of the remaining market rates occurs with the intention of evaluating the consequent use of derivatives for protection from the volatility risk of these rates.

Besides the loans and funding the Company issued debentures - private and public, non-convertible or tradable into shares. This liability was executed using the interest rate linked to CDI and the risk linked to this liability arises from the possible increase of this rate.

The situation of the liabilities mentioned on the closing date for the quarter are the following:

Book Value

PARENT COMPANY	Book Value	
	09/30/03	06/30/03
<hr/>		
LIABILITIES		
Debentures CDI	2,393,826	2,358,240
Loans linked to TJLP	1,849,238	1,924,684
Loans linked to UMBNDES	225,037	229,435

Edgar Filing: BRASIL TELECOM SA - Form 6-K

Hedge Contracts in UMBNDES	46,335	50,184
Loans linked to IGPM	22,254	23,530
Other loans	20,440	20,439
TOTAL	4,557,130	4,606,512
SHORT TERM	1,628,249	1,197,278
LONG TERM	2,928,881	3,409,234

The accounting values are equal to the market values due to the fact that the current employment conditions for these types of financial instruments are similar to those in which the latter derive from. In the occurrence of a hypothetical 1% variation in the rates mentioned, unfavorable to the Company, the annual negative impact would be approximately R\$ 9,954.

Risk of Not Linking Monetary Correction Indexes and Accounts Receivable

The loans and funding indexes used by the Company are not linked to the values for accounts receivable. The telephone rate readjustments do not necessarily accompany the increases in the local interest rates which affect the debts of the Company. Therefore, a risk arises from the absence of this link.

Contingency

Risks The contingency risks are evaluated in accordance with cases of enforceability between probable, possible or remote. The contingencies considered as probable risk are registered in the liability. The details of these risks are shown in note no. 7.

Risks related to Investments

The Company has investments evaluated using the equity methods accounting and acquisition cost. BrT Serviços de Internet S.A. (internet service company) and Brasil Telecom Celular S.A. (mobile phone company) are wholly-owned subsidiaries whose investments are appraised by the equity method, of which only the first is in operation. There is no market value to evaluate the investments made on the wholly-owned subsidiaries since they are close corporations. The future cash flows expected from the investments, directly and indirectly, do not lead to the expectation of losses which may require the use of provisions of such nature for these corporations. Likewise are the investments related to the iBest and BrT Cabos Submarinos (submarine cable company) groups.

The investments evaluated by the cost are irrelevant in relation to the total assets. The risks related to them do not produce enough impact to the Company should significant losses occur with these investments.

Risks with Financial Investments

Financial Investments of immediate liquidity are remained in exclusive financial investment funds (FIF s), whose assets are comprised of post-fixed public government securities, futures contracts linked to the exchange rate of the Commodities and Futures Exchange (BM&F) and in a foreign currency investment fund, and there are no credit risks in these operations. On 06/30/03, the Company has financial investments worth R\$ 915,503 (R\$ 1,205,411 on 03/31/03). The yields granted up to the closing of the quarter are financially recognized as financial revenue and amount to R\$ 70,240 (R\$ 21,957 in 2002). The amounts related to the consolidated statements are R\$ 941,126 (R\$ 1,253,118 on 03/31/03) for the investments and R\$ 74,318 (R\$ 21,958 in 2002) for yield.

Capital Stock

The Company is authorized to increase its capital through a decision of the Board of Directors up to the total limit of 560,000,000,000 (five hundred and sixty billion) common or preferred shares, in compliance with the legal limit of 2/3 (two thirds) in the case of issue of new preferred shares with no voting rights.

By decision of the General Shareholders Meeting or the Board of Directors Meeting, the capital stock of the Company may be increased by the capitalization of accrued profits or previous reserves allocated for this by the General Assembly. Under these conditions, the capitalization may occur without changing the number of shares.

The capital stock is represented by common and preferred shares, no par value, and, in the capital increases, it is not required to maintain their proportion.

By decision of the General Meeting or the Board of Directors, the right of preference for the issue of shares may be excluded the preemptive right for the issue of shares, subscription bonuses or debentures convertible into shares, in the cases predicted in article 172 of the Corporate Stock Law.

The preferred shares have no voting rights, except in the cases mentioned in paragraphs 1 to 3 of art. 12 in the bylaws, with assurance of priority in the receipt of a minimum and non-cumulative dividend of 6% a year, calculated on the amount resulting from the capital stock breakdown by the total number of shares of the Company, or 3% a year, calculated on the amount resulting from the shareholders equity breakdown by the total

Edgar Filing: BRASIL TELECOM SA - Form 6-K

number of shares of the Company, whichever is greater.

The subscribed and paid in capital stock is R\$ 3,373,097 (R\$ 3,373,097 on 03/31/03), comprised of the following no par value shares:

In thousand of shares

Hedge in Dollars	(821)	(3,428)
IGP-M Rate	22,254	23,530

Guarantees

The contracted loans and funding are guaranteed by credit guarantees deriving from telephone services and the cosignature of the Parent Company.

The Company has hedged 44% of its loans and funding in North American dollars executed with third parties and on 78% of the debt in UMBNDDES (Currency basket) executed with BNDES, with the purpose of protecting itself from the significant variations in the quotations of these factors on the correction of the debt. The gains and losses with these contracts are acknowledged by the accrual basis.

Authorizations for the Exploration of Services

The wholly-owned subsidiary, Brasil Telecom Celular S.A., signed in the month of December of 2002, three Personal Mobile Authorization Terms, executed with Anatel. These terms, which assure the exploration of SMP for the next fifteen years in the same area of activity in which the Company has a license for fixed telephony, totaled R\$ 191,495, of which 10% was paid at the act of signature of the contract. The balance of R\$ 172,345, related to the remaining 90%, was fully acknowledged in the liability of the Controlled Company and should be paid in six annual equal and consecutive installments with maturity dates in 2005 to 2010. The IGP-DI variation is applied on the debt, plus 1% a month on the debt. On the quarterly closing date, the value of the updated liability was R\$ 197,244 (R\$ 191,125 on 03/31/03).

Commitments Assumed

Acquisition of Equity Interest of MTH do Brasil Ltda., controller of MetroRED Brasil

On February 17, 2003, the Company executed two agreements with MetroRED Telecommunications Group Ltd., of which (i) One Agreement for the Purchase and Sale of Quotas, aimed at the acquisition of 19.9% of the capital stock of MTH do Brasil Ltda. (MTH), which owns 99.99% of the capital stock of MetroRED Telecomunicações Ltda. (MetroRED Brasil); and (ii) an Option Agreement, aimed at the acquisition of 80.1% of the capital stock of MTH. The option may only be exercised following certification by the National Telecommunications Agency Anatel for the full accomplishment of the universalization and expansion targets set forth in the License Agreement of December 31, 2003.

These agreements, equivalent to US\$ 16,999,900.00 (sixteen million, nine hundred and ninety-nine thousand and nine hundred North American dollars) and US\$ 100.00 (one hundred North American dollars), respectively, were paid on February 18 of 2003, both corresponding to local currency for a total of R\$ 61,463.

In the future, at the second and final stage, when the option to purchase 80.1% of the quotas which represent the capital stock of MTH will occur, the Company should pay an amount equal to US\$ 51,000,000.00 (fifty-one million North American dollars), concluding the process for the acquisition of the total capital stock of the said company.

MetroRED Brasil is a service provider for the private telecommunication network using optical fiber digital networks and it services 331 kilometers of the local network in São Paulo, Rio de Janeiro and Belo Horizonte and 1,486 kilometers of the long distance network which connects these large commercial urban centers. It also has an Internet Solutions Center of 3,500 m² in São Paulo, which offers co-location, hosting and value-added services.

The acquisition of 19.9% of MTH does not include control of MetroRED and also does not mean the direct or indirect provision, on behalf of the Company, of other telecommunication services, besides those currently being offered in Region II of the General Grant Plan.

Subsequent Events

At a Board of Directors Meeting of the Company held on August 5, 2003, the following issues were approved: (i) Proposal for the use of funding and/or issue of securities, in accordance with the market conditions on the occasion of each transaction and within the explained parameters as pointed out in the conditions contained in the document entitled Proposal for the Capture of Funds for Financing of Operations from 2003 to 2008 ; (ii) Proposal for the provision, by the Company, of collateral agreements, personal guarantee agreements or any other guarantee that comes to be needed for financing that are contracted by the company for the execution of the Business Plan, through the opening of fixed credit, in favor of companies in which Brasil Telecom S.A. participates, in accordance with the detailed document entitled Proposal for the Provision of Guarantees between Brasil Telecom Participações S.A. and Brasil Telecom S.A. and from the latter to its Participating Companies 2003 to 2008 ; and (iii) Proposal for the repurchase of its own shares, for permanence in Treasury or cancellation, or later alienation. The acquisition will be performed according to the terms of Law 6404/76, CVM Instruction 10/80 and subsequent riders and Bylaw of the Company, with the following terms and conditions: (a) the Other Capital reserves account will represent the funds available for the acquisition of shares; (b) its own preferred shares for permanence in treasury, up to the limit of 10% of the preferred outstanding shares, may be acquired; (c) the acquisition period will run for 365 days, counting from August 06, 2003; (d) the acquisition and/or alienation transactions related to these shares will be set at the market price and mediated by the brokerage houses, Unibanco CVM S.A., Itaú CV S.A. and Credit Suisse First Boston S.A. CTVM, and (e) the acquisition of shares will be conducted by the Board of the Company and will be subject to the guidelines set at the Repurchase Committee Meeting held on July 18, 2003.

In relation to the proposal for the employment of funding and/or issue of securities mentioned above, Brasil Telecom Participações S.A., controller of the Company, approved at its Board of Directors Meeting, held on August 05, 2003, the proposal for the opening of fixed credit in the market conditions up to the amount required to guarantee funding of up to R\$ 1.776 billion to be contracted by the Company and/or companies which are directly or indirectly participating companies of BTP for the execution of the Business Plan.

The content of this subsequent event was disclosed in material facts of Brasil Telecom S.A. and Brasil Telecom Participações S.A., both published on August 06, 2003.
