## Item 7.01 Regulation FD Disclosure

In connection with a proposed amendment to effect a repricing on the currently outstanding \$940.5 million balance of the Company's First Lien Term Loan with an original principal balance of \$950 million, Syniverse intends to provide potential lenders with a presentation containing summary financial information with respect to MACH, reflecting the impact of required divestitures expected to be completed by the fourth quarter of 2013, and pro forma financial information for Syniverse, which has not been previously publicly disclosed. Such information is disclosed below. In addition, the Company expects to repay \$50 million in principal toward the First Lien Term Loan and Incremental Term Loan, pro rata across the tranches.

	December 31, 2012	June 30, 2013	December 31, 2012	June 30, 2013
Syniverse	\$743.9	\$752.8	\$313.5	\$303.9
MACH	158.4	154.4	69.2	60.9
Pro Forma	\$902.3	\$907.2	\$382.6	\$364.9

Pro Forma Adjusted EBITDA				\$374.0

Adjusted EBITDA is a non-GAAP financial measure.

## Non-GAAP Financial Measures

We believe that Adjusted EBITDA is a measure commonly used by investors to evaluate our performance and that of our competitors. We believe issuers of "high-yield" debt securities also present Adjusted EBITDA because investors, analysts and rating agencies consider it useful in measuring the ability of those issuers to meet debt service obligations. We further believe that the disclosure of Adjusted EBITDA is useful to investors as this non-GAAP measure forms the basis of how our executive team and Board of Directors evaluate our performance. By disclosing Adjusted EBITDA, we believe that we create for investors a greater understanding of, and an enhanced level of transparency into, the means by which our management team operates our company. Adjusted EBITDA is not a measure presented in accordance with U.S. GAAP and our use of the term Adjusted EBITDA may vary from that of others in our industry. Adjusted EBITDA should not be considered as an alternative to net income (loss), operating income (loss), revenues or any other performance measures derived in accordance with U.S. GAAP as measures of operating performance or liquidity.

In addition, Adjusted EBITDA may not be comparable to other similarly titled measures of other companies. Because of these limitations, Adjusted EBITDA should not be considered as measures of discretionary cash available to us to invest in the growth of our business. We attempt to compensate for these limitations by relying primarily upon our U.S. GAAP results and using Adjusted EBITDA as supplemental information only.

Adjusted EBITDA has important limitations as an analytical tool and you should not consider it in isolation or as a substitute for analysis of our results as reported under U.S. GAAP. For example, Adjusted EBITDA:

- excludes certain tax payments that may represent a reduction in cash available to us;
- does not reflect any cash capital expenditure requirements for the assets being depreciated and amortized that may have to be replaced in the future;
- does not reflect changes in, or cash requirements for, our working capital needs; and
-

does not reflect the significant interest expense, or the cash requirements necessary to service interest or principal payments, on our debt.

We believe that Adjusted EBITDA is a useful financial metric to assess our operating performance from period to period by excluding certain items that we believe are not representative of our core business. We rely on Adjusted EBITDA as a primary measure to review and assess the operating performance of our management team in connection with our executive compensation and bonus plans. We also review Adjusted EBITDA to compare our current operating results with prior periods and with the operating results of other companies in our industry. In addition, we utilize Adjusted EBITDA as an assessment of our overall liquidity and our ability to meet our debt service obligations.
