ANGLO SWISS RESOURCES COMPLETES GROUND GEOPHYSICS ON THE FRY INLET DIAMOND PROPERTY - 1500 METER DRILL PROGRAM

VANCOUVER, BRITISH COLUMBIA, August 14, 2007 -- Anglo Swiss Resources Inc. (TSX VENTURE: ASW) (OTCBB: ASWRF) (BERLIN: AMO) is pleased to announce the completion of a survey involving approximately 18.0 line kilometres of total field magnetics and approximately six line kilometres of horizontal loop electromagnetics on the Fry Inlet Diamond property. Standard gridding was completed earlier this month on 100-metre lines for the horizontal loop EM surveys. The total field magnetic survey was completed using non-differential GPS navigation and control by Aurora Geosciences Ltd. of Yellowknife, NWT.

MPH Consulting Ltd. of Toronto, Ontario has interpreted the 2007 data to assist the Company in selecting drill targets and orientation on the upcoming 1500 meter drill program. Anglo Swiss Resources' technical staff with assistance from MPH has selected a cluster of seven targets for NQ drilling, including re-drilling the significantly diamondiferous LI-201 kimberlite.

The LI 201 kimberlite produced 14 macrodiamonds and 46 microdiamonds from a previous drill program in the 1990s and is contained within the cluster target area. Anglo Swiss Resources' technical staff believes that even though the previous drill program in the 1990s produced diamonds, the drill location did not catch the main body of the kimberlite as the hole was collared on the northeastern fringe of the kimberlite.

Anglo Swiss Resources believes that the previous drill program was ended prematurely as only two holes encountered kimberlite with less than 300 kilograms of kimberlite tested, recovering 60 diamonds larger than a 0.15-millimetre cut-off. Three gems sat on a 0.5-millimetre sieve and one clung to a one-millimetre mesh, providing encouragement the kimberlite contains commercial diamonds.

One vertical hole drilled at the time encountered 80 metres of kimberlite and an angled test produced a 40-metre intersection. Anglo Swiss Resources believes further drilling will yield a significant expansion of the known dimensions of the body, especially in length.

The Fry Inlet diamond property is located approximately 25 kilometres north of BHP Billiton's Ekati diamond mine property and Aber/Rio Tinto's Diavik diamond mine property, Canada's first two diamond mines. In light of the close proximity to producing diamond mines, the presence of numerous diamondiferous kimberlites and kimberlite indicator minerals, Anglo Swiss Resources believes this summer's drill program is highly prospective for the further discovery of diamonds.

For further information, investors are asked to visit the Anglo Swiss Resources Investor Relations Hub at www.agoracom.com/IR/AngloSwiss or email to ASW@agoracom.com.

About Anglo Swiss Resources, Inc.

Anglo Swiss Resources is a Canadian mining company engaged in the acquisition and exploration of mineral properties. Its exploration properties include: four distinct claim groups located in the Lac de Gras region of the NWT (diamonds), and in south-eastern British Columbia the historic Kenville Gold Mine (copper, gold, silver and

molybdenum), the Blu Starr Gemstone Property (sapphire, iolite, garnet and graphite) and the McAllister Pipe Property (lamproitic diatreme - diamonds).

Anglo Swiss Resources Closes Private Placement for \$1,300,000

VANCOUVER, BRITISH COLUMBIA, August 23, 2007 -- Anglo Swiss Resources Inc. (TSX VENTURE: ASW) (OTCBB: ASWRF) (BERLIN: AMO) announces it has closed a private placement previously announced on July 13, 2007. The placement was oversubscribed for proceeds of \$1,300,000. The placement consisted of \$1,070,500 in flow through (FT) funds and \$229,500 in non flow (NFT) through funds.

Each FT unit will consist of one common share (the FT Shares) and a one-half flow through warrant; each whole warrant is exercisable to purchase an additional FT Share at a price of 20 cents for one year from the closing date.

Each NFT unit consisted of one common share (the NFT Shares) and a one-half warrant, each whole warrant is exercisable to purchase an additional NFT share at a price of 15 cents for six months from closing or at a price of 30 cents for 18 months from the closing date.

The shares and warrants are subject to trading restrictions for 4 months and one day from the closing date of August 10, 2007.

The proceeds of the private placement will be used for continued exploration on the Company's Canadian exploration properties that qualify for Canadian Exploration Expenses (CEE) and for general working capital. For further information, investors are asked to visit the Anglo Swiss Resources Investor Relations Hub at www.agoracom.com/IR/AngloSwiss or email to ASW@agoracom.com.
