NOTE 1 BASIS OF PRESENTATION

These unaudited interim financial statements of UCN, Inc. and its subsidiary (collectively, UCN or the Company) have been prepared in accordance with the rules and regulations of the United States Securities and Exchange Commission (the Commission). Such rules and regulations allow the omission of certain information and footnote disclosures normally included in the financial statements prepared in accordance with accounting principles generally accepted in the United States, so long as the statements are not misleading. In the opinion of Company management, these financial statements and accompanying notes contain all adjustments (consisting of normal recurring adjustments) necessary to present fairly the financial position and results of operations for the periods shown. These interim financial statements should be read in conjunction with the audited financial statements and notes thereto contained in our Annual Report on Form 10-K for the year ended December 31, 2004, as filed with the Commission on March 30, 2005.

The results of operations for the three month period ended March 31, 2005 are not necessarily indicative of the results to be expected for the full year.

NOTE 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Capitalized Software Costs: In accordance with Statement of Position 98-1, *Accounting for Costs of Computer Software Developed or Obtained for Internal Use*, the Company capitalizes certain costs incurred for the development of internal use software. These costs include the costs associated with coding, software configuration, upgrades, and enhancements. During the three months ended March 31, 2005 and 2004, the Company capitalized approximately \$174,000 and \$240,000, respectively.

Long-Lived Assets: In accordance with Statement of Financial Accounting Standards (SFAS) No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, we evaluate the carrying value of long-lived assets, including intangibles, when events or circumstances indicate the existence of a possible impairment, based on projected undiscounted cash flows, and recognize impairment when such cash flows will be less than the carrying values. Measurement of the amounts of impairments, if any, is based upon the difference between carrying value and fair value. Events or circumstances that could indicate the existence of a possible impairment include obsolescence of the technology, an absence of market demand for the product, and/or continuing technology rights protection. Management believes the net carrying amount of long-lived assets will be recovered by future cash flows generated by commercialization of the technology related to the long-lived asset and from cash flows generated from customer lists.

Stock-Based Compensation: Employee compensation expense is measured using the intrinsic method. No stock-based compensation cost is reflected in net income applicable to common stockholders, since all options had an exercise price equal to or greater than the market price of the underlying common stock at the date of grant (see also Recent Accounting Pronouncements below).

The following table illustrates the effects on net income (loss) applicable to common stockholders and earnings (loss) per share if compensation expense was measured using the fair value recognition provision of SFAS No. 123, *Accounting for Stock-Based Compensation* (in thousands except share data):

Edgar Filing: UCN INC - Form 10-Q

	Three Months Ended March 31,	
	2005	2004
	<u> </u>	<u> </u>
Net income (loss) applicable to common stockholders:

Diluted (presented only for dilutive periods)		
Pro forma:		
Basic	\$ (0.11)	\$ (0.01)
Diluted (presented only for dilutive periods)		

Table of Contents

We estimated the fair value of options granted under our employee stock-based compensation arrangements at the date of grant using the Black-Scholes model with the following weighted-average assumptions:

	Three Months Ended March 31,	
	2005	2004
Dividend yield	None	None
Expected volatility	55%	65%
Risk-free interest rate	3.73%	3.12%
Expected life (years)	5.0	5.0
Weighted average fair value of grants	\$ 1.37	\$ 1.74

Other Comprehensive Income: There were no components of other comprehensive income (loss) other than net income (loss).

Business Segments and Related Information: SFAS No. 131, *Disclosures about Segments of an Enterprise and Related Information*, establishes standards for the way public business enterprises are to report information about operating segments in annual financial statements and requires enterprises to report selected information about operating segments in interim financial reports issued to shareholders. It also establishes standards for related disclosure about products and services, geographic areas and major customers. The Company currently operates in only one business segment.

Net Income (Loss) Per Common Share: Basic net income (loss) per common share (Basic EPS) excludes dilution and is computed by dividing net income applicable to common shareholders by the weighted average number of common shares outstanding during the year. Diluted net income (loss) per common share (Diluted EPS) reflects the potential dilution that could occur if stock options or other common stock equivalents were exercised or converted into common stock. The computation of Diluted EPS does not assume exercise or conversion of securities that would have an antidilutive effect on net income (loss) per common share, and is therefore not presented.

Following is the reconciliation of Basic and Diluted EPS (in thousands except per share data):

	Three Months Ended March 31,	
	2005	2004
Net income (loss) applicable to common stockholders, as reported	\$ (2,017)	\$ 10
Basic EPS:		
Weighted average number of common shares outstanding	19,502	8,786
Basic net (loss) income per share	\$ (0.10)	\$ 0.00

Edgar Filing: UCN INC - Form 10-Q

Diluted EPS:		
Common and common equivalent shares outstanding:		
Weighted average number of common shares outstanding	19,502	8,786
Common stock equivalents from options and warrants computed on the Treasury Stock method, using the average fair market value of common stock outstanding during the period	974	1,804
	20,476	10,590
Shares used in the computation	20,476	10,590
Diluted net income per share		\$ 0.00

Recent Accounting Pronouncements:

As described above in Stock Based Compensation, we account for stock-based compensation awards issued to employees using the intrinsic value measurement provisions of Accounting Principles Board (APB) No. 25. Accordingly, no compensation expense has been recorded for stock options granted to employees with exercise prices greater than or equal to the fair value of the underlying common stock at the option grant date. On December 16, 2004, the Financial Accounting Standards Board issued SFAS 123 (revised 2004), *Share-Based Payment* (SFAS 123R) which eliminates the alternative of applying the intrinsic value measurement provisions of Opinion 25 to stock compensation awards issued to employees. The new standard requires enterprises to measure the cost of employee services received in exchange for an award of equity instruments based on the grant-date fair value of the award. That cost will be recognized over the period during which an employee is required to provide services in exchange for the award, known as the requisite service period (usually the vesting period).

We have not yet quantified the effects of the adoption of SFAS 123R, but it is expected that the new standard will result in significant stock-based compensation expense. The pro forma effects on net loss and loss per share if we had applied the fair

Table of Contents

value recognition provisions of original SFAS 123 on stock compensation awards (rather than applying the intrinsic value measurement provisions of Opinion 25) are disclosed above in Stock Based Compensation. Although such pro forma effects of applying original SFAS 123 may be indicative of the effects of adopting SFAS 123R, the provisions of these two statements differ in some important respects. The actual effects of adopting SFAS 123R will be dependent on numerous factors including, but not limited to, the valuation model chosen by the Company to value stock-based awards, the assumed award forfeiture rate, the accounting policies adopted concerning the method of recognizing the fair value of awards over the requisite service period, and the transition method (as described below) chosen for adopting SFAS 123R.

SFAS 123R will be effective for our fiscal quarter beginning January 1, 2006, and requires the use of either the Modified Prospective Application Method or the Modified Retrospective Method. Under the Modified Prospective Method, SFAS 123R is applied to new awards and to awards modified, repurchased, or cancelled after the effective date. Additionally, compensation cost for the portion of awards for which the requisite service has not been rendered (such as unvested options) that are outstanding as of the date of adoption shall be recognized as the remaining requisite services are rendered. The compensation cost relating to unvested awards at the date of adoption shall be based on the grant-date fair value of those awards as calculated for pro forma disclosures under the original SFAS 123. In addition, companies may use the Modified Retrospective Application Method. This method may be applied to all prior years for which the original SFAS 123 was effective or only to prior interim periods in the year of initial adoption. If the Modified Retrospective Application Method is applied, financial statements for prior periods shall be adjusted to give effect to the fair-value-based method of accounting for awards on a consistent basis with the pro forma disclosures required for those periods under the original SFAS 123.

Reclassifications

Certain reclassifications have been made to the prior year financial statements to conform to the current year presentation.

NOTE 3 MYACD ACQUISITION

In October 2003, UCN acquired the exclusive right to sell and manage the enhanced telecommunications technology of MyACD, Inc., with a one-year option to purchase MyACD. MyACD has developed a telephony software solution for call center traffic management and related functions that UCN can now offer to its customers over its VoIP Network. In September 2004 the Company entered into agreements that finalized payment terms, and set a date for closing the transaction. On January 5, 2005, UCN closed the acquisition and purchased all of the outstanding capital stock of MyACD.

The purchase price paid to MyACD stockholders was made by issuing promissory notes which aggregated \$4.3 million, after imputing interest over the life of the loans. In addition, cash of \$427,000 and 562,985 shares of UCN common stock were also paid. The fair market value of the common stock on the date the parties set the price was \$2.28 per share. UCN will subsequently make variable monthly payments on the promissory notes based on MyACD product revenue until January 2008, when all remaining principal owed on the notes will be due. The notes are secured by MyACD common stock.

In connection with the acquisition UCN also incurred transaction costs which as of March 31, 2005 were \$19,000, and assumed certain liabilities aggregating \$359,000. The entire capitalized cost of \$6.4 million was assigned to what management considers is MyACD's sole asset, its software technology, which is believed to have an estimated useful life of four years.

Edgar Filing: UCN INC - Form 10-Q

The following unaudited pro forma financial information presents results as if the acquisition had occurred at the beginning of the respective periods (in thousands except per share data):

	Three Months Ended March 31,	
	2005	2004
Net revenue	\$ 15,974	\$ 16,781
Net loss applicable to common stockholders	(2,017)	(317)
Basic and diluted net loss per share	\$ (0.10)	\$ (0.04)

These pro forma results have been prepared for comparative purposes only and include certain adjustments such as additional amortization expense as a result of intangible assets arising from the acquisition, elimination of intercompany transactions, and additional interest expense as a result of issuing the promissory notes. The pro forma results are not necessarily indicative either of the results of operations that actually would have resulted had the acquisition been in effect at the beginning of the respective periods, or of results to be achieved in the future.

Table of Contents

NOTE 4 INTANGIBLE ASSETS

Intangible assets consisted of the following (in thousands):

	March 31, 2005			December 31, 2004		
	Gross assets	Accumulated amortization	Intangible assets, net	Gross assets	Accumulated amortization	Intangible assets, net
Customer lists acquired	\$ 11,518	\$ 7,034	\$ 4,484	\$ 11,518	\$ 6,398	\$ 5,120
Technology and patents	7,679	1,020	6,659	1,411	550	861
	<u>\$ 19,197</u>	<u>\$ 8,054</u>	<u>\$ 11,143</u>	<u>\$ 12,929</u>	<u>\$ 6,948</u>	<u>\$ 5,981</u>

During the three months ended March 31, 2005, UCN recorded an additional \$6.4 million of acquired software technology in connection with closing the acquisition of MyACD (see Note 3). The technology is believed to have an estimated useful life of four years, and \$388,000 in amortization expense using the straight-line method was recorded during the three months ended March 31, 2005.

Total amortization expense for all intangible assets for the three months ended March 31, 2005 and 2004 was \$1.1 million and \$697,000, respectively. The Company estimates the useful lives of its acquired customer lists, based on estimated attrition rates, to be 36 to 48 months.

Amortization expense for all intangible assets during the nine months ending December 31, 2005, and during the four-year period ending December 31, 2009 is expected to be approximately \$3.1 million, \$3.9 million, \$2.3 million, \$1.6 million, and \$0, respectively.

NOTE 5 ACCRUED LIABILITIES

Accrued liabilities consisted of the following (in thousands):

	March 31, 2005	December 31, 2004
Accrued commissions	\$ 1,160	\$ 1,052
Accrued dividends		313
Other	1,157	880
	<u>\$ 2,317</u>	<u>\$ 2,245</u>

NOTE 6 LONG-TERM DEBT AND NOTES PAYABLE

On January 5, 2005, UCN closed the acquisition of MyACD, Inc. and purchased all of the outstanding capital stock of MyACD from its two stockholders. The purchase price paid to MyACD stockholders was made in part by issuing promissory notes which aggregated \$4.3 million, after imputing interest at 8.25% over the life of the loans. Monthly payments on the notes will total 17 percent of the previous month's MyACD product and service revenue, with certain minimum and maximum limitations varying over the three-year term of the notes, and a final payment is due January 2008. The notes are secured by MyACD common stock.

The Company has entered into a lease agreement with an equipment finance company for new computer equipment and related software in conjunction with its network expansion activities. In February 2005, equipment aggregating \$332,000 was acquired. In April 2005, UCN leased an additional \$487,000 of equipment.

Total maturities as of March 31, 2005, during the remaining period ending December 31, 2005 and the four years ending December 31, 2009, are \$849,000, \$1.4 million, \$1.9 million, \$1.2 million, and \$0, respectively.

NOTE 7 CAPITAL TRANSACTIONS

In December 2004 UCN gave notice to the remaining preferred stockholders that it was redeeming all outstanding shares of both series on January 29, 2005. At that time, there were 1.8 million shares of Preferred Series A Stock outstanding with a total redemption value of \$3.5 million, and 397,800 shares of Preferred Series B Stock outstanding with a total redemption value of \$4.0 million. By January 28, 2005 all remaining preferred stockholders had elected to convert their preferred shares

Table of Contents

to common. Accordingly, all remaining shares of Series A and B Preferred stock were converted to a total of 3.7 million shares of UCN common stock. Subsequent to the conversion of all outstanding preferred shares, a final dividend payment totaling 117,000 shares of common stock was issued.

In connection with the MyACD, Inc. acquisition, the Company issued 562,985 shares of UCN common stock valued at \$2.28 per share as of the day the parties agreed on payment terms.

During the three months ended March 31, 2005, investors and employees exercised options and warrants for a total of 69,267 shares of Common Stock. Total proceeds received by the Company was \$164,000.

NOTE 8 RELATED PARTY TRANSACTIONS

During the three months ended March 31, 2005 the Company paid Theodore Stern, the Chairman of the Board of Directors, \$5,000 per month for consulting, marketing, and capital raising activities. At March 31, 2005, there was \$5,000 owed to Mr. Stern.

During the three months ended March 31, 2005 and 2004 there were certain debt arrangements with directors more fully described in the Company's Form 10-K filed with the Securities and Exchange Commission on March 30, 2005. During 2004 most of these obligations were repaid. Interest expense on obligations owed to these directors during the three months ended March 31, 2005 and 2004 was \$18,000 and \$106,000, respectively.

Three of the Company's current and prior directors participated in the 1999 Series A and the 2000 Series B Preferred Stock issuances under the same terms as all other outside investors. Accordingly, along with the other former preferred stockholders the participating directors received 17,000 shares of common stock as a final dividend.

NOTE 9 MAJOR SUPPLIERS

Approximately 47 percent and 59 percent of the Company's cost of revenue for the three months ended March 31, 2005 and 2004, respectively, was generated from three of the largest U.S. telecommunication service providers. As of March 31, 2005 and 2004, respectively, the Company owed approximately \$5.4 million and \$4.7 million to these three providers.

NOTE 10 GAIN ON EARLY EXTINGUISHMENT OF DEBT

During 2003 the Company entered into a Purchase Agreement to acquire approximately 12,000 long distance customers from Glyphics Communications, Inc. Subsequently, the two parties agreed that UCN would accelerate payments under the agreement in exchange for a discount on the purchase price. The final payment under the agreement was made in February 2004, and the Company recorded a \$109,000 gain

on the early extinguishment of the debt.

NOTE 11 COMMITMENTS AND CONTINGENCIES

As part of the telecommunication service contracts with two of its wholesale providers, the Company agreed to purchase services which obligated UCN for a combined minimum of approximately \$1.4 million per month as of December 31, 2004. However, in April 2005 the Company renewed and modified one of the purchase agreements scheduled to end in July 2005. Under the new terms of the contact, UCN is obligated to purchase \$500,000 in telecommunications services per month, with the possibility for further reduction if certain competitive price guarantees are not met by the provider. Accordingly, the Company is now obligated for a total of approximately \$583,000 per month beginning April 2005 until June 2006, and for \$500,000 per month until March 2008.

NOTE 12 SUBSEQUENT EVENTS

Effective May 1, 2005 the Company entered into an Asset Purchase Agreement with Transtel Communications, Inc., a Utah corporation, each of its subsidiary companies, and its parent company, Telephone Electronics Corporation, a Mississippi corporation. Transtel Communications provides long distance and telecommunications products and services through its subsidiaries under the name Tel-America in Utah and Colorado, and the name ExpressTel in Arizona, California, and Nevada. The agreement calls for UCN to issue a \$2.15 million promissory note to the sellers and assume certain liabilities in exchange for operating assets, including a customer base of over 20,000 primarily commercial customers. The parties also entered into a Management Agreement for UCN to operate the related combined business operations of Transtel

Table of Contents

Communications and its subsidiaries until the necessary FCC and state regulatory approvals are obtained, after which the parties intend to close the transaction.

**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS**

Overview

UCN, Inc. is a domestic telecommunications company that offers and sells a wide range of long distance and related communication services to business and residential customers. Historically we functioned as an aggregator and reseller of telecommunications services provided by others. We intend to continue to pursue and develop this type of business.

UCN operates a Voice over Internet Protocol communications network (VoIP Network) which it acquired in December 2002. We use the VoIP Network to transmit a portion of our data and other communication traffic, and host and deliver enhanced telecommunications products and services.

In January 2005 UCN completed the MyACD, Inc. acquisition. With the MyACD technology and our national VoIP Network we offer, as a provider, on-demand proprietary telephony software for contact handling/management applications. We are changing the way mission critical applications are delivered and priced for the contact center marketplace, or for any business or department seeking to improve how it manages the productivity and quality of its customer contact opportunities.

We generate internal growth by pursuing multiple marketing avenues, including using independent agents, value-added resellers, and selling through our direct sales force.

Results of Operations

Revenue

Total revenues decreased five percent to \$16.0 million for the three months ended March 31, 2005 as compared to \$16.7 million for the same period in 2004. The decrease was due to attrition, primarily in our residential customer base. Revenue from these customers decreased by approximately \$2.6 million. The decrease was somewhat offset by \$337,000 in revenue increases derived from commercial customers acquired in late March 2004. In addition, revenue increased by approximately \$1.5 million from new commercial customers generated by ongoing promotional efforts involving agents, as well as our own internal sales force.

Edgar Filing: UCN INC - Form 10-Q

Our plan since the beginning of 2004 has been to focus our marketing effort on business users of telecommunication services, not residential long distance users, because we believe there is a much greater opportunity for a business of our size and resources to increase revenues through the sale of enhanced telecommunications services to business customers rather than through the sale of traditional long distance service to residential customers. With the technology we acquired in 2003, we have developed a menu of enhanced communication services that we are marketing to our existing business customers, and to new prospects, through our established independent agent sales channel and value-added resellers. As a result of these dynamic changes in our business we are experiencing a transition in our sales mix. We expect this transition period will continue through 2005. During the transition we believe we may experience little or no internal growth in revenues until sales of enhanced services overtakes diminished revenue caused by attrition primarily in our residential long distance customer base.

Costs of revenue

Costs of revenue for the quarter ended March 31, 2005 was \$10.4 million, a 13 percent increase compared to \$9.2 million for the comparable period during the prior year. Cost of revenue as a percentage of revenue for the three months ended March 31, 2005 was 65 percent as compared to 55 percent during 2004. The decrease in gross margin is the result of the combination of lower, more competitive pricing we adopted during 2004 in some of the newer long-distance rate plans, along with the change in our sales mix from residential customers to business customers. We also experienced rate increases from certain wholesale carriers during the fourth quarter of 2004, which also impacted the quarter ended March 31, 2005. Where possible we have passed these increases on to the customer. We expect that during the rest of 2005 the market for traditional long distance services will continue to be very competitive.

Table of Contents

General and administrative

General and administrative expenses for the three months ended March 31, 2005 decreased 11 percent to \$3.6 million compared to \$4.0 million in the same period for 2004. However, expenses for 2005 included \$388,000 of MyACD-related technology amortization which did not affect results for 2004. Had this expense not been included, general and administrative expenses for the quarter ended March 31, 2005 would have been 21% lower as compared to the same period for 2004. The change was primarily due to cost control efforts, along with network operating efficiencies achieved during the latter part of 2004.

Selling and promotion

Selling and promotion expenses increased 24 percent to \$3.8 million or 24 percent of revenue during the quarter ended March 31, 2005, from \$3.1 million or 19 percent of revenue during the quarter ended March 31, 2004. The increases are the result of the continuing transition in our sales mix during 2005 as higher-commissioned business customers increased, and lower-commissioned residential customers decreased through attrition. In addition, during the latter part of 2004 we added several sales-related personnel, and incurred sales related expenses in connection with developing our marketing program for the in.Network[®] family of products.

Other income (expense)

Interest expense during the first quarter of 2005 was \$183,000, compared to \$357,000 during the first quarter of 2004. The decrease was a result of continuing reductions in outstanding debt throughout the latter part of 2004.

During the third quarter of 2003, UCN entered into a purchase agreement to acquire approximately 12,000 long distance customers from Glyphics Communications, Inc. Subsequently, Glyphics agreed to discount the purchase price for accelerated payments. The final payment under the agreement was made in February 2004, and we recorded a \$109,000 gain during the first quarter of 2004 on the early extinguishment of the debt.

Liquidity and Capital Resources

During the three months ended March 31, 2005, investors and employees exercised options and warrants for a total of 69,267 shares of Common Stock. Total proceeds received by the Company was \$164,000

UCN's current ratio as of March 31, 2005 decreased to 0.97:1 from 1.11:1 at December 31, 2004. The components of current assets and current liabilities that changed most significantly since the end of 2004 were the current portion of long-term debt obligations and accounts payable.

Edgar Filing: UCN INC - Form 10-Q

UCN has a line of credit agreement with a financing company that expires in January 2006. The available borrowing limit is \$5 million. Interest accrues at prime plus three percent. The facility allows UCN to obtain financing on its eligible accounts receivable, including unbilled receivables and regular monthly billings. The facility is collateralized by the underlying receivables. On March 31, 2005, the amount outstanding, less applied draws, was \$2.6 million which was the maximum amount available based on eligible accounts receivable. The facility requires UCN to maintain a restricted cash account for the collection of the receivables. As of March 31, 2005, UCN had \$1.4 million of restricted cash specifically associated with the line of credit arrangement.

UCN is potentially liable under surety bonds aggregating \$120,000 in favor of two municipalities with whom UCN has contracts to provide long distance services. The municipalities routinely require all telecommunication service providers to maintain such surety bonds. One of the bonds is secured by restricted cash of \$20,000. Additional restricted cash of \$20,000 is on secured deposit with a financial institution that provides credit card processing.

On January 5, 2005, UCN closed the acquisition of MyACD, Inc. and purchased all of the outstanding capital stock of MyACD from its two stockholders. The purchase price paid to MyACD stockholders was made by issuing promissory notes which aggregated \$4.3 million, after imputing interest over the life of the loans. In addition, cash of \$427,000 and 562,985 shares of UCN common stock were also paid. Monthly payments on the notes will total 17 percent of the previous month's MyACD product and service revenue, with certain minimum and maximum limitations varying over the three-year term of the notes, and a final payment is due January 2008.

The Company has entered into a lease agreement with an equipment finance company for new computer equipment and related software in conjunction with its network expansion activities. In February 2005, equipment aggregating \$332,000 was acquired. In April 2005, UCN leased an additional \$487,000 of equipment.

Table of Contents

As of March 31, 2005, UCN had a working capital deficit of \$432,000, and the current portion of long-term debt and capital lease obligations was \$1.4 million. Included in this amount is \$120,000 that is secured under the terms of capital lease obligations. Of the remaining amount, \$461,000 is secured by shares of MyACD common stock and is owed to three former MyACD employees (two of which now have employment contracts with UCN), \$349,000 is unsecured and payable to the Company's Chairman of the Board of Directors, \$250,000 is unsecured and payable to a former director and current shareholder and convertible into common stock at \$2.00 per share, and \$206,000 is non-recourse, has no stated maturity date, and principal payments are variable dependent upon receivables collected from designated customers. Accordingly, except for the amounts owed under capital lease obligations, if necessary management believes that because of the relationships with the debt holders UCN can either extend the notes or renegotiate the terms in order to minimize any potential negative impact on cash flow associated with payment obligations on long-term debt.

Capital Commitments The following table discloses aggregate information about our contractual obligations including notes payable and lease obligations, and the periods in which payments are due as of March 31, 2005 (in thousands):

Contractual Obligations	Total	Less Than	1-3	4-5	After
		1 Year	Years	Years	5 Years
Notes payable (1)	\$ 4,990	\$ 1,266	\$ 3,724	\$	\$
Capital lease obligations	347	120	226	1	
Interest on above notes and leases	811	398	413		
Operating lease obligations	1,548	537	1,000	11	
Purchase commitments under service provider contracts	19,250	7,000	12,250		
Total contractual obligations	\$ 26,946	\$ 9,321	\$ 17,613	\$ 12	\$

(1) In the case of MyACD-related notes, this assumes that minimum monthly payments are made through the maturity date.

Critical accounting policies and estimates

Revenue Recognition The Company's revenue recognition policy with respect to reseller agreements is to record gross revenues and receivables from customers when the Company acts as principal in the transaction. The Company recognizes revenue when the customer takes title to the products or services, the customer obtains the risks and rewards of ownership, and when UCN assumes the risk of loss for collection, delivery, or returns. Revenues from sales of services are recognized upon providing the services to the customers. Unbilled revenue from services provided in between billing cycles is estimated. Revenue is derived primarily from business telephony services, including dedicated transport, switched, long distance, and data services. UCN's customers are principally small and medium-sized businesses and residential customers located nationwide. Revenue for the majority of switched access, dedicated, and long distance service is generally billed on a transactional basis determined by customer usage with some fixed rate elements billed in advance. The transactional elements of switched services are billed in arrears and estimates are used to recognize revenue in the period earned. The fixed rate elements billed in advance are recognized over the period the services are provided. Unbilled revenue from services provided in between billing cycles is estimated.

Accounts Receivable and Allowance for Doubtful Accounts Accounts receivable is comprised of amounts billed and billable to customers, net of an allowance for uncollectible amounts. The allowance for doubtful accounts is estimated by management and is based on specific information about customer accounts, past loss experience, and general economic conditions. An account is written off by management when deemed uncollectible, although collections efforts may continue.

Edgar Filing: UCN INC - Form 10-Q

Long-Lived Assets - Our long-lived assets consist of acquired customer lists, patents, and acquired technology. As of March 31, 2005, the carrying value of these assets was approximately \$11 million, or 39 percent of total assets. We evaluate the carrying value of long-lived assets, including intangibles, when events or circumstances indicate the existence of a possible impairment. In our evaluation, we estimate the net undiscounted cash flows expected to be generated by the assets, and recognize impairment when such cash flows will be less than carrying values. Events or circumstances that could indicate the existence of a possible impairment include obsolescence of the technology, an absence of market demand for the product, and/or the partial or complete lapse of continuing technology rights protection.

Debt Issuance Costs - As an inducement to various investors, shareholders, and board members to lend monies to UCN, shares of common stock and warrants to purchase shares of common stock were issued to them. The fair market value of the shares of common stock at the date of issuance was capitalized as debt issuance costs and was amortized over the life of the

Table of Contents

loans. The fair value of the warrants was estimated on the date of issuance using the Black-Scholes pricing model, and was also capitalized as debt issuance costs and amortized over the life of the loans.

Income Taxes - UCN recognizes a liability or asset for the deferred income tax consequences of all temporary differences between the tax bases of assets and liabilities and their reported amounts in the financial statements that will result in taxable or deductible amounts in future years when the reported amounts of the assets and liabilities are recovered or settled. These deferred income tax assets or liabilities are measured using the enacted tax rates that will be in effect when the differences are expected to reverse. Recognition of deferred tax assets is limited to amounts considered by management to be more likely than not of realization in future periods. To date, a valuation allowance has been recorded to reduce the deferred income tax assets.

Recent Accounting Pronouncements

Stock-Based Compensation - We have a stock option plan that provides for the issuance of common stock options to employees and service providers. Although SFAS No. 123, *Accounting for Stock Based Compensation*, encourages entities to adopt a fair-value-based method of accounting for stock options and similar equity instruments, it also allows an entity to continue measuring compensation cost for stock-based compensation for employees and directors using the intrinsic-value method of accounting prescribed by Accounting Principles Board (APB) Opinion No 25, *Accounting for Stock Issued to Employees*. We have elected to follow the accounting provisions of APB 25 and to furnish the pro forma disclosures required under SFAS No. 123 for employees and directors, but we also issue warrants to non-employees that are recognized as expense when issued in accordance with the provisions of SFAS No. 123. We calculate compensation expense under SFAS No. 123 using the Black-Scholes option pricing model. In so doing, we estimate certain key variables used in the model. We believe the estimates we use are appropriate and reasonable.

On December 16, 2004, the FASB issued Statement of Financial Accounting Standards No. 123 (revised 2004), *Share-Based Payment*, which eliminates the alternative of applying the intrinsic value measurement provisions of Opinion 25 to stock compensation awards issued to employees. The new standard requires enterprises to measure the cost of employee services received in exchange for an award of equity instruments based on the grant-date fair value of the award. Beginning January 1, 2006, that cost will be recognized over the period during which an employee is required to provide services in exchange for the award, known as the requisite service period (usually the vesting period).

Forward-Looking Statements

The Private Securities Litigation Reform Act of 1985 provides a safe harbor for forward-looking statements made by UCN, except where such statements are made in connection with an initial public offering. All statements, other than statements of historical fact, which address activities, actions, goals, prospects, or new developments that we expect or anticipate will or may occur in the future, including such things as expansion and growth of our operations and other such matters are forward-looking statements. Any one or a combination of factors could materially affect our operations and financial condition. These factors include competitive pressures, success or failure of marketing programs, changes in pricing and availability of services and products offered to customers, legal and regulatory initiatives affecting customer marketing and rebate programs or long distance service, and conditions in the capital markets. Forward-looking statements made by us are based on knowledge of our business and the environment in which we operate as of the date of this report. Because of the factors listed above, as well as other factors beyond its control, actual results may differ from those in the forward-looking statements.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our exposure to market risk is limited to interest rate sensitivity, which is affected by changes in the general level of U.S. interest rates. Our cash equivalents are invested with high quality issuers and limit the amount of credit exposure to any one issuer. Due to the short-term nature of the cash equivalents, we believe that we are not subject to any material interest rate risk as it relates to interest income. For interest expense, our line-of-credit arrangement has a variable interest rate based on the prime rate. Assuming the outstanding amount at March 31, 2005 was constant over the next twelve months, a one percent change in the prime interest rate would result in a change in interest expense of approximately \$26,000 over the next twelve-month period. All other debt instruments have fixed interest rates and are therefore not subject to interest rate risk.

We did not have any foreign currency hedges or other derivative financial instruments as of March 31, 2005. We do not enter into financial instruments for trading or speculative purposes and do not currently utilize derivative financial instruments. Our operations are conducted in the United States and as such are not subject to foreign currency exchange rate risk.

Table of Contents

ITEM 4. CONTROLS AND PROCEDURES

With the participation of management, UCN's chief executive officer and chief financial officer evaluated its disclosure controls and procedures on March 31, 2005. Based on this evaluation, the chief executive officer and the chief financial officer concluded that the disclosure controls and procedures are effective in connection with UCN's filing of its quarterly report on Form 10-Q for the three months ended March 31, 2005.

During the first quarter of 2005 there have been no significant changes in UCN's internal controls or in other factors that could significantly affect these controls, including any significant deficiencies or material weaknesses of internal controls that would require corrective action.
