**Item 1.01. Entry into a Material Definitive Agreement.**

On November 9, 2005, the Compensation Committee of the Board of Directors of Bio-Imaging Technologies, Inc. (the Company) recommended, and the Company's Board of Directors approved, the acceleration of vesting of all out-of-the-money unvested options to purchase shares of common stock of the Company with an exercise price greater than \$7.00 held by current employees and executive officers of the Company (but excluding any options granted to members of the Company's Board of Directors). These options were previously awarded to employees of the Company on February 4, 2004, pursuant to the 2002 Stock Incentive Plan, and would still have been unvested at January 1, 2006. Options to purchase 107,691 shares of common stock are subject to this acceleration. The exercise price per share for these options was \$7.03, while the closing price per share on November 9, 2005 was \$2.25.

The following table summarizes the options subject to acceleration:

	<b>Aggregate Number of Shares Issuable Under Accelerated Options</b>	<b>Exercise Price Per Share</b>	<b>Date of Grant</b>
Employees as a group (other than executive officers)	69,722	\$ 7.03	February 4, 2004
Executive officers as a group	37,969	\$ 7.03	February 4, 2004

The acceleration of vesting of these out-of-the money options is being undertaken primarily to eliminate any future compensation expense the Company would otherwise recognize in its income statement with respect to these options with the implementation of the Financial Accounting Standard Board (FASB) statement Share-Based Payment (FAS 123R) effective for the Company on January 1, 2006. We estimate this compensation expense, before tax, would be approximately \$402,763 in aggregate future expenses based on value calculations using the Black-Scholes methodology.
