EXPLANATORY NOTE

This amendment to Maxim Integrated Products, Inc.'s Quarterly Report on Form 10-Q for the quarter ended December 24, 2005, which was filed with the Securities and Exchange Commission on February 2, 2006, is being filed to reflect revisions made as a result of comments received from the staff of the Securities and Exchange Commission regarding the Company's Quarterly Report on Form 10-Q for the quarter ended December 24, 2005.

The following sections in this report have been amended as a result of comments received from the staff of the Securities and Exchange Commission:

Part I Item 1 Financial Statements: Footnote 1 in the Condensed Consolidated Statements of Income (unaudited).

Part I Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations.

Except as indicated above, no other information included in the Quarterly Report on Form 10-Q is amended by this Form 10-Q/A Amendment No. 1. While we are amending only certain portions of our Form 10-Q, for convenience and ease of reference, we are filing the entire Form 10-Q.

See accompanying Notes to Condensed Consolidated Financial Statements.

Table of Contents**MAXIM INTEGRATED PRODUCTS, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)****NOTE 1: BASIS OF PRESENTATION**

The accompanying unaudited condensed interim consolidated financial statements included herein have been prepared by the Company pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted pursuant to such rules and regulations. In the opinion of management, all adjustments (consisting of normal recurring items) considered necessary for fair presentation have been included. The results of operations for the three and six months ended December 24, 2005 are not necessarily indicative of the results to be expected for the entire year. These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and the notes thereto included in the Annual Report on Form 10-K for the fiscal year ended June 25, 2005.

The Company has a 52-to-53-week fiscal year that ends on the last Saturday in June. Accordingly, every sixth or seventh fiscal year will be a 53-week fiscal year. Fiscal years 2006 and 2005 are 52-week fiscal years.

NOTE 2: STOCK-BASED COMPENSATION

Effective June 26, 2005, the Company adopted the provisions of Statement of Financial Accounting Standards (SFAS) No. 123(R), Share-Based Payment (SFAS 123(R)). SFAS 123(R) establishes accounting for stock-based awards exchanged for employee services. Accordingly, stock-based compensation cost is measured at grant date, based on the fair value of the award, and is recognized as an expense over the employee's requisite service period. The Company previously applied Accounting Principles Board (APB) Opinion No. 25, Accounting for Stock Issued to Employees, and related Interpretations and provided the required pro forma disclosures of SFAS No. 123, Accounting for Stock-Based Compensation (SFAS 123). The Company elected to adopt the modified prospective application method as provided by SFAS 123(R), and, accordingly, prior periods are not restated for the effect of SFAS 123R, the Company recorded compensation costs as the requisite service rendered for the unvested portion of previously issued awards that remain outstanding at the initial date of adoption and any awards issued, modified, repurchased, or cancelled after the effective date of SFAS 123(R).

The following table shows total stock-based compensation expense for the three and six months ended December 24, 2005, included in the Condensed Consolidated Statement of Income:

(Amounts in thousands)	Three Months Ended Dec. 24, 2005	Six Months Ended Dec. 24, 2005
Cost of goods sold	\$ 9,222	\$ 19,676
Research and development	24,324	50,802
Selling, general and administrative	7,248	11,775
Pre-tax stock-based compensation expense	40,794	82,253
Less: income tax effect	13,340	26,939
Net stock-based compensation expense	\$ 27,454	\$ 55,314

Prior to adopting SFAS 123(R), the Company presented all tax benefits resulting from the exercise of stock options as operating cash flows in the Statement of Cash Flows. SFAS 123(R) requires cash flows resulting from excess tax benefits to be classified as a part of cash flows from financing activities. Excess tax benefits are realized tax benefits from tax deductions for exercised options in excess of the deferred tax asset attributable to stock compensation costs for such options. As a result of adopting SFAS 123(R), \$21.3 million of excess tax benefits for the six months ended December 24, 2005 have been classified as an operating cash outflow and a financing cash inflow.

Table of Contents**MAXIM INTEGRATED PRODUCTS, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)**

Prior to the adoption of SFAS 123(R)

As required under SFAS 123(R), the reported net income and earnings per share for the three and six months ended December 25, 2004 have been presented to reflect the impact had the Company been required to include the amortization of the Black-Scholes option value as an expense. The pro forma amounts are as follows:

(Amounts in thousands, except per share data)	Three Months Ended Dec. 25, 2004	Six Months Ended Dec. 25, 2004
Net income - as reported	\$ 144,615	\$ 289,160
Deduction: total stock-based employee compensation expense determined under the fair value method, net of tax	(37,657)	(74,486)
Net income - pro forma	\$ 106,958	\$ 214,674
Basic earnings per share - as reported	\$ 0.44	\$ 0.89
Basic earnings per share - pro forma	\$ 0.33	\$ 0.66
Diluted earnings per share - as reported	\$ 0.42	\$ 0.84
Diluted earnings per share - pro forma	\$ 0.32	\$ 0.63

NOTE 3: INVENTORIES

The components of inventories consist of:

(Amounts in thousands)	December 24, 2005	June 25, 2005
Raw material	\$ 12,347	\$ 14,432
Work-in-process	134,518	103,696
Finished goods	50,907	49,651
	\$ 197,772	\$ 167,779

Stock based compensation cost capitalized as part of inventory was \$11.3 million at December 24, 2005.

NOTE 4: OTHER ASSETS

Included in other assets on the Condensed Consolidated Balance Sheet at December 24, 2005 was \$14.0 million of intellectual property. This was offset by \$7.0 million of accumulated amortization and adjustments. Amortization expenses and adjustments for the intellectual property were \$0.3 million and \$1.8 million for the three months ended December 24, 2005 and December 25, 2004, respectively. Amortization expenses and adjustments for the intellectual property were \$0.7 million and \$2.1 million for the six months ended December 24, 2005 and December 25, 2004, respectively. Amortization expense is included in research and development in the Condensed Consolidated Statements of Income.

Table of Contents**MAXIM INTEGRATED PRODUCTS, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)**

The intellectual property acquired by the Company is being used to design and develop new products as well as in some products currently in production. As required by Statement of Financial Accounting Standards No. 144 (SFAS 144), Accounting for the Impairment or Disposal of Long-Lived Assets, the Company assesses the recoverability of the intellectual property whenever an indicator of impairment exists. There were no indicators of impairment as of December 24, 2005. Based on the carrying amount of identified assets recorded at December 24, 2005 and assuming no subsequent impairment of the underlying assets, the future amortization expense are expected to be as follows:

	2006					
(Amounts in thousands)	remaining	2007	2008	2009	2010	2011
Intellectual property assets:	\$ 700	\$ 1,400	\$ 1,400	\$ 1,400	\$ 1,400	\$ 741
Should it be determined in a future period that the projected remaining discounted cash flows attributable to products designed and developed with the acquired intellectual property are less than the net book value represented by the intellectual property, the Company's results of operations could be materially adversely impacted in the period such determination is made.						

Also included in other assets in the Condensed Consolidated Balance Sheet at December 24, 2005 and June 25, 2005 are loans to employees of approximately \$9.4 million and \$9.9 million, respectively. These loans are collateralized. To the extent such collateral is not sufficient to cover the amounts owed, there is risk of loss to the Company. To date, the Company has not experienced any material losses related to these employee loans.

NOTE 5: EARNINGS PER SHARE

Basic earnings per share are computed using the weighted average number of common shares outstanding during the period. Diluted earnings per share incorporates the incremental shares issuable upon the assumed exercise of stock options. The number of incremental shares from the assumed issuance of stock options is calculated applying the treasury stock method. The following table sets forth the computation of basic and diluted earnings per share.

(Amounts in thousands, except per share data)	Three Months Ended		Six Months Ended	
	Dec. 24, 2005	Dec. 25, 2004	Dec. 24, 2005	Dec. 25, 2004
Numerator for basic earnings per share and diluted earnings per share				
Net income	\$ 112,558	\$ 144,615	\$ 217,926	\$ 289,160
Denominator for basic earning per share	323,935	325,660	325,832	325,164
Effect of dilutive securities:				
Stock options	13,494	17,566	14,883	18,887
Denominator for diluted earnings per share	337,429	343,226	340,715	344,051
Earnings per share:				
Basic	\$ 0.35	\$ 0.44	\$ 0.67	\$ 0.89
Diluted	\$ 0.33	\$ 0.42	\$ 0.64	\$ 0.84

Net income and earnings per share for the three and six months ended December 25, 2004, do not include stock based compensation expense as the Company did not adopt SFAS 123(R) until June 26, 2005.

Table of Contents**MAXIM INTEGRATED PRODUCTS, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)**

Approximately 49.6 million and 22.0 million of the Company's stock options were excluded from the calculation of diluted earnings per share for the three months ended December 24, 2005 and December 25, 2004, respectively. Approximately 46.0 million and 21.9 million of the Company's stock options were excluded from the calculation of diluted earnings per share for the six months ended December 24, 2005 and December 25, 2004, respectively. These options were excluded because they were determined to be antidilutive. However, such options could be dilutive in the future and, under those circumstances, would be included in the calculation of diluted earnings per share.

NOTE 6: SHORT-TERM INVESTMENTS

All short-term investments at December 24, 2005 are classified as available-for-sale and consist primarily of U.S. Treasury and Federal Agency debt securities with original maturities beyond three months. Unrealized gains and losses, net of tax, on securities in this category are included in accumulated other comprehensive loss which is a separate component of stockholders' equity. The cost of securities sold is based on the specific identification method. Interest earned on securities is included in Interest income, net in the Condensed Consolidated Statements of Income.

NOTE 7: SEGMENT INFORMATION

The Company operates and tracks its results as one reportable segment. The Company designs, develops, manufactures and markets a broad range of linear and mixed-signal integrated circuits. The Chief Executive Officer has been identified as the Chief Operating Decision Maker as defined by SFAS 131, Disclosures about Segments of an Enterprise and Related Information.

Enterprise-wide information is provided in accordance with SFAS 131. Geographical revenue information is based on the customer's ship-to location. Long-lived assets consist of property, plant and equipment. Property, plant and equipment information is based on the physical location of the assets at the end of each reporting period.

Net revenues from unaffiliated customers by geographic region were as follows:

	Three Months Ended		Six Months Ended	
	Dec. 24, 2005	Dec. 25, 2004	Dec. 24, 2005	Dec. 25, 2004
(Amounts in thousands)				
United States	\$ 100,220	\$ 115,855	\$ 200,053	\$ 230,005
China	121,549	97,507	240,721	192,585
Japan	42,553	48,354	80,904	93,660
Rest of Asia	91,913	82,578	174,317	170,797
Europe	76,769	80,799	149,073	160,760
Rest of World	12,877	10,968	25,177	23,321
	\$ 445,881	\$ 436,061	\$ 870,245	\$ 871,128

Net long-lived assets by geographic region were as follows:

	December 24, 2005	June 25, 2005
(Amounts in thousands)		
United States	\$ 774,300	\$ 755,557
Philippines	177,580	194,876
Rest of World	65,732	51,032

\$ 1,017,612 \$ 1,001,465

Table of Contents**MAXIM INTEGRATED PRODUCTS, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)**

The Company recorded \$19.6 million and \$18.2 million of depreciation expense for three months ended December 24, 2005 and December 25, 2004, respectively. The Company recorded \$39.3 million and \$36.0 million of depreciation expense for six months ended December 24, 2005 and December 25, 2004, respectively.

NOTE 8: COMPREHENSIVE INCOME

Comprehensive income consists of net income and net unrealized gains (losses) on available-for-sale investments and forward exchange contracts. The components of comprehensive income and related tax effects were as follows:

	Three Months Ended		Six Months Ended	
	Dec. 24, 2005	Dec. 25, 2004	Dec. 24, 2005	Dec. 25, 2004
(Amounts in thousands)				
Net income, as reported	\$ 112,558	\$ 144,615	\$ 217,926	\$ 289,160
Change in unrealized (losses) gains on investments, net of tax of \$(391), \$(1,305), \$(1,553) and \$564, respectively	(665)	(2,767)	(2,643)	1,027
Change in unrealized (losses) gains on forward exchange contracts, net of tax of \$(205), \$(61), \$(246) and \$75, respectively	(348)	(123)	(420)	152
Total comprehensive income	\$ 111,545	\$ 141,725	\$ 214,863	\$ 290,339

Accumulated other comprehensive loss presented in the Condensed Consolidated Balance Sheets at December 24, 2005 and June 25, 2005 consist of net unrealized losses on available-for-sale investments of \$(8.0) million and \$(5.4) million, respectively, net unrealized gains (losses) on forward exchange contracts of \$(0.1) million and \$0.4 million, respectively, and net foreign currency translation adjustments of \$(1.5) million and \$(1.5) million, respectively.

NOTE 9: INCOME TAXES

The Company is continuing to evaluate the impact of the one-time favorable foreign dividend provisions enacted on October 22, 2004, as part of the American Jobs Creation Act of 2004. The Company may decide to repatriate earnings in fiscal 2006 to take advantage of these provisions, however, any such repatriations are not expected to have a material impact on the Company's financial condition, results of operations and liquidity.

NOTE 10: CONTINGENCIES*Litigation*

In the second quarter of fiscal year 2006, the Company and Qualcomm Inc. (Qualcomm) entered into a settlement agreement resolving patent litigation that had been brought by Qualcomm against the Company. The settlement agreement resolved all legal claims between Qualcomm and the Company and their respective subsidiaries.

In addition to the above, the Company is subject to other legal proceedings and claims that arise in the normal course of its business. The Company does not believe that the ultimate outcome of these matters will have a material adverse effect on the financial position of the Company.

Table of Contents

MAXIM INTEGRATED PRODUCTS, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

Indemnifications

The Company indemnifies certain customers, distributors, suppliers, and subcontractors for attorney fees and damages and costs awarded against these parties in certain circumstances in which the Company's products are alleged to infringe third party intellectual property rights, including patents, registered trademarks, or copyrights. The terms of the Company's indemnification obligations are generally perpetual from the effective date of the agreement. In certain cases, there are limits on and exceptions to the Company's potential liability for indemnification relating to intellectual property infringement claims. The Company also indemnifies its directors and executive officers to the maximum extent permitted under the laws of the State of Delaware. The Company cannot estimate the amount of potential future payments, if any, that it might be required to make as a result of these agreements. To date, the Company has not paid any indemnification claims, and accordingly, the Company has not accrued any amounts for its indemnification obligations. However, there can be no assurances that the Company will not have any future financial exposure under those indemnification obligations.

NOTE 11: PRODUCT WARRANTY

The Company warrants its products to its customers generally for one year from the date of shipment, but in certain cases for longer periods. In certain other cases, the Company warrants products to include significant liability beyond the cost of replacing the product. If there is a material increase in the rate of customer claims or our estimates of probable losses relating to specifically identified warranty exposures are inaccurate, we may record a charge against future cost of sales. Warranty expense has historically been immaterial to our financial statements.

NOTE 12: SELF-INSURANCE ACCRUALS

The Company is self-insured with respect to defective product claims, employment practice claims and general liability. Accruals are primarily based on the actuarially estimated, undiscounted cost of claims, which includes incurred-but-not-reported claims. Amounts accrued for defective product claims, employment practice claims, workers' compensation claims and general liability are included in accrued expenses.

In addition to the above, the Company is primarily self-insured with respect to healthcare benefits for most of its domestic employees. Accruals are primarily based on estimated incurred-but-not-reported claims. Amounts accrued for employee healthcare claims are included in salary and salary related expenses.

NOTE 13: COMMON STOCK REPURCHASES

From fiscal year 2002 through 2005, the Board of Directors authorized the Company to repurchase up to 40 million shares of the Company's common stock from time to time at the discretion of the Company's management. As of June 25, 2005, approximately 10.0 million shares remained available under these repurchase authorizations which have no expiration date.

During the three months ended December 24, 2005, the Board of Directors authorized the Company to repurchase up to 13.5 million additional shares of the Company's common stock from time to time at the discretion of the Company's management. During the six months ended December 24, 2005, the Company repurchased 11.1 million of its common stock for \$415.9 million. As of December 24, 2005, approximately 12.4 million shares remained available for repurchase under the repurchase authorization. The number of shares to be repurchased and the timing of such repurchases will be based on several factors, including the price of the Company's common stock, general market and business conditions, and other factors. Common stock repurchased is retired and is not held as treasury stock.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

NOTE 14: DEFERRED COMPENSATION

The Company and the Chief Executive Officer (CEO) have entered into a deferred compensation plan, pursuant to which the CEO defers receipt of a portion of his cash compensation. Deferred compensation bears interest at a rate equal to the interest rate that employees of the Company are required to pay the Company under the Company's employee loan program. Compensation deferred on or prior to December 31, 2004, including interest, is payable (i) upon the CEO's termination as an employee or service provider to the Company, in approximately equal quarterly installments over a five-year period, (ii) upon his death, to his designated beneficiary, in a lump sum payment as soon as administratively possible, or (iii) in the event of an unforeseeable emergency. Compensation deferred after December 31, 2004, including interest, is payable under the same terms and conditions as compensation deferred on or prior to December 31, 2004, except to the extent that those terms and conditions would cause a violation of Section 409A of the Internal Revenue Code, as supplemented by any guidance issued by the Internal Revenue Service thereunder. As of December 24, 2005 and June 25, 2005, the CEO's deferred compensation balances, including interest thereon, totaled \$28.8 million and \$24.1 million, respectively, which is included in accrued salary and related expenses in the Condensed Consolidated Balance Sheets.

NOTE 15: SUBSEQUENT EVENT

During the third quarter of fiscal year 2006, the Board of Directors declared a cash dividend of \$0.125 per share on the Company's common stock payable on February 28, 2006 to stockholders of record on February 13, 2006.

During the third quarter of fiscal year 2006, the Company announced that it expects to implement a program that will allow its employees, excluding officers, holding vested stock options with an exercise price of at least \$35 to exchange them for Restricted Stock Units (RSUs) vesting quarterly over the next 12 months at a specified exchange rate derived using the Black-Scholes model. In some cases, employees may elect to exchange these vested options for RSUs at a specified exchange rate that is greater than that derived using the Black-Scholes model and these RSUs will vest quarterly over the next 18 months.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

FORWARD-LOOKING INFORMATION AND RISK FACTORS

This Quarterly Report on Form 10-Q contains forward-looking statements that fall within the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995. All statements included in this Report, other than statements that are purely historical, are forward-looking statements, including statements regarding or implicating the Company's expectations, intentions, plans, goals and hopes regarding the future. Words such as "anticipates," "expects," "intends," "plans," "believes," "seeks," and "estimates" and variations of such words and similar expressions are used to identify forward-looking statements. All forward-looking statements in this Report, including this Management's Discussion and Analysis section, are based on the Company's current outlook, expectations, estimates, projections, beliefs and plans or objectives about its business and its industry. These statements are not guarantees of future performance and are subject to risk and uncertainty. Actual results could differ materially from those predicted or implied in any such forward-looking statements.

Forward-looking statements include, without limitation, the Company's estimates of future amortization expense related to intellectual property assets; the Company's expectation that repatriating earnings to take advantage of the American Jobs Creation Act of 2004 will not have a material impact on its financial condition, results of operations and liquidity; the Company's belief that the ultimate outcome of pending legal proceedings will not have a material adverse effect on the financial position of the Company; the Company's belief that it is more likely than not that net deferred tax assets will be realized based on historical earnings and expected levels of future taxable income; the Company's belief that it possesses sufficient liquidity and capital resources to meet cash and working capital requirements and fund operations for at least the next twelve months; and the Company's continuous attempts to control and reduce, if possible, expenses.

Actual results could differ materially from those forecasted based upon, among other things, errors in the Company's assumptions underlying its amortization expense estimates; unexpected interpretations of the American Jobs Creation Act of 2004; unexpected outcomes in the Company's pending legal proceedings; unexpected changes in earnings and taxable income that adversely affect the realizability of net deferred tax assets; an unexpected decline in liquidity or cash flow; and the Company's effectiveness in controlling and, if possible, reducing expenses.

In addition, future business could be adversely affected by technical difficulties in bringing new products and processes to market in a timely manner; market developments that could adversely affect the growth of the mixed-signal analog market; the Company being unable to sustain its success in recruiting and retaining high-quality personnel; the Company's success in the markets its products are introduced in; whether, and the extent to which, demand for the Company's products increases and reflects real end-user demand; customer cancellations and delays of outstanding orders; whether the Company is able to manufacture in a correct mix to respond to orders on hand and new orders received in the future; whether the Company is able to achieve its new product development and introduction goals; whether the Company is able to effectively and successfully manage manufacturing operations; whether the Company is able to successfully commercialize its new technologies; the risks of doing business internationally and in less developed countries, including the risks of theft and damage to products during transit; overall worldwide economic conditions; demand for electronic products and semiconductors generally; demand for the end-user products for which the Company's semiconductors are suited; timely availability of raw materials, equipment, supplies and services; unanticipated manufacturing problems; technological and product development risks; competitors that may outperform the Company; and other risk factors described in the Company's filings with the Securities and Exchange Commission and in particular its Annual Report on Form 10-K for the fiscal year ended June 25, 2005.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (CONT'D)

The Company disclaims any duty to and undertakes no obligation to update any forward-looking statement, whether as a result of new information relating to existing conditions, future events or otherwise or to release publicly the results of any future revisions it may make to forward-looking statements to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events. Readers are cautioned not to place undue reliance on such statements, which speak only as of the date of this Quarterly Report on Form 10-Q. Readers should carefully review future reports and documents that the Company files from time to time with the Securities and Exchange Commission, such as its annual reports on Form 10-K (particularly Management's Discussion and Analysis of Financial Condition and Results of Operations), its quarterly reports on 10-Q (particularly Management's Discussion and Analysis of Financial Condition and Results of Operations), and any current reports on Form 8-K.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The methods, estimates and judgments the Company uses in applying its most critical accounting policies have a significant impact on the results the Company reports in its financial statements. The Securities and Exchange Commission has defined the most critical accounting policies as the ones that are most important to the portrayal of the Company's financial condition and results of operations, and require the Company to make its most difficult and subjective accounting judgments, often as a result of the need to make estimates of matters that are inherently uncertain. Based on this definition, the Company's most critical accounting policies include revenue recognition and accounts receivable allowances, which impact the recording of revenues; valuation of inventories, which impacts costs of goods sold and gross margins; the assessment of recoverability of long-lived assets, which impacts write-offs of fixed assets; accounting for income taxes, which impacts the income tax provision; and assessment of contingencies, which impacts charges recorded in cost of goods sold and selling, general and administrative expenses. These policies and the estimates and judgments involved are discussed further below. The Company has other key accounting policies that either do not generally require estimates and judgments that are as difficult or subjective, or it is less likely that such accounting policies would have a material impact on the Company's reported results of operations for a given period.

Revenue Recognition and Accounts Receivable Allowances

The Company recognizes revenue for sales to direct customers and sales to international distributors upon shipment, provided that persuasive evidence of a sales arrangement exists, the price is fixed or determinable, title has transferred, collectibility of the resulting receivable is reasonably assured, there are no customer acceptance requirements and the Company does not have any significant post-shipment obligations. The Company estimates returns for sales to direct customers and international distributors based on historical returns rates applied against current period gross revenues. Specific customer returns and allowances are considered within this estimate.

Sales to U.S. distributors are made pursuant to agreements allowing the possibility of certain sales price rebates and for non-warranty product return privileges. The non-warranty product return privileges include allowing U.S. distributors to rotate a small portion of the Company's products in their inventory based on their previous 90 days of purchases and allowing U.S. distributors to return within a specified time parts which the Company obsoletes or converts to non-standard. Given the uncertainties associated with the levels of non-warranty product returns and sales price rebates that could be issued to U.S. distributors, the Company defers recognition of such revenue and related cost of goods sold until the product is sold by the U.S. distributors to their end customers. Accounts receivable from direct customers, domestic distributors and international distributors are recognized and inventory is relieved upon shipment as title to inventories generally transfers upon shipment at which point the Company has a legally enforceable right to collection under normal terms. In addition, the Company estimates returns for sales to domestic distributors based on historical return rates applied against current period gross revenues.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (CONT'D)

The Company makes estimates of potential future returns and sales allowances related to current period product revenue. Management analyzes historical returns, changes in customer demand, and acceptance of products when evaluating the adequacy of returns and sales allowances. Estimates made by the Company may differ from actual returns and sales allowances. These differences may materially impact reported revenue and amounts ultimately collected on accounts receivable. In addition, the Company monitors collectibility of accounts receivable primarily through review of the accounts receivable aging. When facts and circumstances indicate the collection of specific amounts or from specific customers is at risk, the Company assesses the impact on amounts recorded for bad debts and, if necessary, will record a charge in the period such determination is made. To date, the Company has not experienced material write-offs of accounts receivable due to uncollectibility.

Inventories

Inventories are stated at the lower of standard cost, which approximates actual cost on a first-in-first-out basis, or market value. The Company's standard cost revision policy is to continuously monitor manufacturing variances and revise standard costs when necessary. Because of the cyclical nature of the market, inventory levels, obsolescence of technology, and product life cycles, the Company generally writes down inventories to net realizable value based on 12 months forecasted product demand. Actual demand and market conditions may be lower than those projected by the Company. This difference could have a material adverse effect on the Company's gross margin should inventory write downs beyond those initially recorded become necessary. Alternatively, should actual demand and market conditions be more favorable than those estimated by the Company, gross margin could be favorably impacted by the sale of previously written down inventory.

Long-Lived Assets

The Company evaluates the recoverability of property, plant and equipment in accordance with Statement of Financial Accounting Standards No. 144 (SFAS 144), Accounting for the Impairment or Disposal of Long-Lived Assets. The Company performs periodic reviews to determine whether facts and circumstances exist that would indicate that the carrying amounts of property, plant and equipment might not be fully recoverable. If facts and circumstances indicate that the carrying amount of property, plant and equipment might not be fully recoverable, the Company compares projected undiscounted net cash flows associated with the related asset or group of assets over their estimated remaining useful life against their respective carrying amounts. In the event that the projected undiscounted cash flows are not sufficient to recover the carrying value of the assets, the assets are written down to their estimated fair values based on the expected discounted future cash flows attributable to the assets. Evaluation of impairment of property, plant and equipment requires estimates in the forecast of future operating results that are used in the preparation of the expected future undiscounted cash flows. Actual future operating results and the remaining economic lives of the Company's property, plant and equipment could differ from the Company's estimates used in assessing the recoverability of these assets. These differences could result in impairment charges, which could have a material adverse impact on the Company's results of operations.

Stock Based Compensation

Effective June 26, 2005, the Company adopted the provisions of Statement of Financial Accounting Standards (SFAS) No. 123(R), Share-Based Payment (SFAS 123(R)). SFAS 123(R) establishes standards for the accounting for transactions in which an entity exchanges its equity instruments for goods or services. It also addresses transactions in which an entity incurs liabilities in exchange for goods or services that are based on the fair value of the entity's equity instruments or that may be settled by the issuance of those equity instruments. Accordingly, stock-based compensation cost is measured at grant date, based on the fair value of the award, and is recognized as expense over the employee's requisite service period. The measurement of stock based compensation cost is based on several criteria including, but not limited to, the valuation model used and associated input factors such as expected term of the award, stock price volatility, dividend rate, risk free interest rate, and award cancellation rate. The input factors to use in the valuation model are based on subjective future expectations combined with management judgment. If there is a difference between the forfeiture assumptions used in determining stock based compensation costs and the actual forfeitures which become known over time, the Company may change the input factors used in determining stock based compensation costs. These changes may materially impact the Company's results of operations in the period such changes are made.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (CONT'D)

Accounting for Income Taxes

The Company must make certain estimates and judgments in the calculation of income tax expense and in the determination of whether deferred tax assets are more likely than not to be realized.

The calculation of the Company's income tax expense and income tax liabilities involves dealing with uncertainties in the application of complex tax laws and regulations. The Company recognizes potential liabilities for anticipated income tax audit issues in the U.S. and other tax jurisdictions based on an estimate of whether, and the extent to which, additional income tax payments are probable. Although the Company believes that the estimates are reasonable, no assurance can be given that the final outcome of these matters will not be different than what was reflected in our historical income tax provisions and accruals. Such differences could have a material impact on the Company's net income and operating results in the period in which such determinations are made.

On a periodic basis the Company evaluates its deferred tax asset balance for realizability and records a valuation allowance to reduce the net deferred tax assets to the amount that is more likely than not to be realized. In the event it is determined that the deferred tax assets to be realized in the future would be in excess of the net recorded amount, an adjustment to the deferred tax asset valuation allowance would be recorded. This adjustment would increase income in the period such determination was made. Likewise, should it be determined that all or part of the net deferred tax asset would not be realized in the future, an adjustment to increase the deferred tax asset valuation allowance would be charged to income in the period such determination is made. In assessing the need for a valuation allowance, historical levels of income, expectations and risks associated with estimates of future taxable income and ongoing prudent and practicable tax planning strategies are considered. Realization of the Company's deferred tax assets is dependent primarily upon future U.S. taxable income. The Company's judgments regarding future profitability may change due to future market conditions, changes in U.S. or international tax laws and other factors. These changes, if any, may require material adjustments to deferred tax assets and an accompanying reduction or increase in net income in the period in which such determinations are made.

Contingencies

From time to time, the Company receives notices that its products or manufacturing processes may be infringing the patent or intellectual property rights of others. The Company periodically assesses each matter in order to determine if a contingent liability in accordance with Statement of Financial Accounting Standards No. 5 (SFAS 5), Accounting for Contingencies, should be recorded. In making this determination, management may, depending on the nature of the matter, consult with internal and external legal counsel and technical experts. Based on the information obtained combined with management's judgment regarding all the facts and circumstances of each matter, the Company determines whether a contingent loss is probable and whether the amount of such loss can be estimated. Should a loss be probable and estimable, the Company records a contingent loss in accordance with SFAS 5. In determining the amount of a contingent loss, the Company takes into consideration advice received from experts in the specific matter, current status of legal proceedings, settlement negotiations which may be ongoing, prior case history and other factors. Should the judgments and estimates made by management be incorrect, the Company may need to record additional contingent losses that could materially adversely impact the Company's results of operations. Alternatively, if the judgments and estimates made by management are incorrect and a particular contingent loss does not occur, the contingent loss recorded would be reversed thus favorably impacting the Company's results of operations.

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (CONT'D)****RESULTS OF OPERATIONS****Net Revenues**

Net revenues were \$445.9 million and \$436.1 million for the three months ended December 24, 2005 and December 25, 2004, respectively, an increase of 2.3%. Net revenues for the six months ended December 24, 2005 and December 25, 2004, were \$870.2 million and \$871.1 million, respectively. The increase in net revenues for the second quarter of fiscal year 2006 as compared to the second quarter of fiscal year 2005 is primarily due to higher unit shipments. This was offset by product mix related to sales of products with lower average selling prices on the Company's already existing proprietary and second-source products. Net revenues remained flat for the six months ended December 24, 2005 as compared to the six months ended December 25, 2004 due to higher unit shipments offset by product mix related to sales of products with lower average selling prices.

During the three months ended December 24, 2005 and December 25, 2004, approximately 78% and 73%, respectively, of net revenues were derived from customers outside of the United States. During the six months ended December 24, 2005 and December 25, 2004, approximately 77% and 74%, respectively, of net revenues were derived from customers outside of the United States. While the majority of these sales are denominated in U.S. dollars, the Company enters into foreign currency forward contracts to mitigate its risks on firm commitments and net monetary assets denominated in foreign currencies. The impact of changes in foreign exchange rates on revenue and the Company's results of operations for the three months ended December 24, 2005 and December 25, 2004 was immaterial.

Gross Margin

The gross margin percentage was 68.2% and 72.6% for the three months ended December 24, 2005 and December 25, 2004, respectively. The gross margin percentage for the three months ended December 24, 2005 as compared to the three months ended December 25, 2004 decreased primarily due to \$9.2 million of stock based compensation recorded due to the adoption of SFAS 123(R) combined with product mix changes resulting in sales of products with lower average selling prices. See Note 2 "Stock Based Compensation" of the Notes to Condensed Consolidated Financial Statements for information regarding the adoption of SFAS 123(R). Gross margins for the three months ended December 24, 2005 were also impacted by \$1.6 million of discretionary employee bonuses recorded. Gross margins for the three months ended December 25, 2004 were negatively impacted due to \$4.5 million of inventory write downs. On a non-GAAP basis, excluding stock based compensation, gross margin percentage for the three months ended December 24, 2005 and December 25, 2004 was 70.2% and 72.6%, respectively. The decrease in the non-GAAP gross margin percentage for the three months ended December 24, 2005 as compared to the three months ended December 25, 2004 was due to the factors discussed above.

The gross margin percentage was 68.5% and 72.5% for the six months ended December 24, 2005 and December 25, 2004, respectively. The GAAP gross margin percentage for the six months ended December 24, 2005 as compared to the six months ended December 25, 2004 decreased primarily due to \$19.7 million of stock based compensation recorded due to the adoption of SFAS 123(R) combined with product mix changes resulting in sales of products with lower average selling prices. See Note 2 "Stock Based Compensation" of the Notes to Condensed Consolidated Financial Statements for information regarding the adoption of SFAS 123(R). Gross margins for the six months ended December 24, 2005 were also impacted by \$3.3 million of discretionary employee bonuses recorded. Gross margins for the six months ended December 25, 2004 were negatively impacted due to \$8.7 million of inventory write downs. On a non-GAAP basis, excluding stock based compensation, gross margin percentage for the six months ended December 24, 2005 and December 25, 2004 was 70.7% and 72.5%, respectively. The decrease in the non-GAAP gross margin percentage for the six months ended December 24, 2005 as compared to the six months ended December 25, 2004 was due to the factors discussed above.

The following table reconciles the Company's gross margin determined in accordance with generally accepted accounting principles in the United States (GAAP) to non-GAAP gross margin, which excludes the effect of all stock based compensation costs, for the three and six months ended December 24, 2005 and December 25, 2004.

	Three Months Ended		Six Months Ended	
	Dec. 24, 2005	Dec. 25, 2004	Dec. 24, 2005	Dec. 25, 2004
(Amounts in thousands, except percentages)				

Edgar Filing: MAXIM INTEGRATED PRODUCTS INC - Form 10-Q/A

Gross margin, as reported	\$ 303,944	\$ 316,624	\$ 595,693	\$ 631,439
Stock-based compensation	9,222		19,676	
Non-GAAP gross margin	\$ 313,166	\$ 316,624	\$ 615,369	\$ 631,439
Non-GAAP gross margin percentage	70.2%	72.6%	70.7%	72.5%

Table of Contents

SFAS 123(R) requires the Company to estimate the cost of all forms of stock-based compensation, including employee stock options and awards under our Employee Stock Participation (ESP Plan), and to record a commensurate expense (which is subjective in nature) in the income statement. Gross margin, as reported is calculated as the difference between net revenues and cost of goods sold as disclosed in the Condensed Consolidated Statements of Income for each period disclosed. Included in cost of goods sold is stock-based compensation as determined under SFAS 123(R). The non-GAAP gross margin is calculated by taking the gross margin, as reported and adding to that amount stock-based compensation that is included as a component of costs of goods sold. The Company is showing non-GAAP gross margin, which excludes all stock-based compensation expense, to permit additional analysis of the Company's performance. Management believes this non-GAAP measure is useful to investors because it enhances the understanding of the Company's historical financial performance and comparability between periods in light of a recent change in accounting standards requiring the Company to record stock-based compensation as an expense in its financial statements. This non-GAAP presentation is also given for comparability with other companies that have not adopted SFAS 123(R), which the Company believes is useful to investors. Many of the Company's investors have requested that the Company disclose this non-GAAP information because they believe it is useful in understanding the Company's performance as it excludes a non-cash charge that many investors feel may obscure the Company's true operating costs and provides comparability between alternative investment opportunities. Management uses this non-GAAP measure to manage and assess the profitability of its business. Specifically, the Company develops, manages and monitors budgets and spending on a cash basis and excludes the effect of stock-based compensation. The Company's measure of non-GAAP gross margin might not be the same as similarly titled measures used by other companies, and it should not be construed as a substitute for gross margin. There are limitations associated with using non-GAAP measures, including that they exclude financial information that some may consider important in evaluating the Company's performance.

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (CONT'D)****Research and Development**

Research and development expenses were \$116.9 million and \$81.0 million for the three months ended December 24, 2005 and December 25, 2004, respectively, which represented 26.2% and 18.6% of net revenues, respectively. The increase in research and development expenses in absolute dollars was primarily due to \$24.3 million of stock based compensation recorded due to the adoption of SFAS 123(R). See Note 2

Stock Based Compensation of the Notes to Condensed Consolidated Financial Statements for information regarding the adoption of SFAS 123(R). In addition, research and development expenses for the three months ended December 24, 2005 as compared to the three months ended December 25, 2004 increased \$7.4 million from hiring additional engineers to support the Company's research and development and process development efforts, and \$2.7 million due to discretionary employee bonuses recorded. On a non-GAAP basis, excluding stock based compensation, research and development expenses were \$92.6 million and \$81.0 million for the three months ended December 24, 2005 and December 25, 2004, respectively, which represented 20.8% and 18.6% of net revenue, respectively. The increase in non-GAAP research and development expenses for the three months ended December 24, 2005 as compared to the three months ended December 25, 2004 is due to the factors discussed above.

Research and development expenses were \$233.9 million and \$160.1 million for the six months ended December 24, 2005 and December 25, 2004 respectively, which represented 26.9% and 18.4% of net revenues, respectively. The increase in research and development expenses in absolute dollars was primarily due to \$50.8 million of stock based compensation recorded due to the adoption of SFAS 123(R). See Note 2

Stock Based Compensation of the Notes to Condensed Consolidated Financial Statements for information regarding the adoption of SFAS 123(R). In addition, research and development expenses for the six months ended December 24, 2005 as compared to the six months ended December 25, 2004 increased \$13.8 million from hiring additional engineers to support the Company's research and development and process development efforts, and \$5.4 million due to discretionary employee bonuses recorded. On a non-GAAP basis, excluding stock based compensation, research and development expenses were \$183.1 million and \$160.1 million for the six months ended December 24, 2005 and December 25, 2004, respectively, which represented 21.0% and 18.4% of net revenue, respectively. The increase in non-GAAP research and development expenses for the six months ended December 24, 2005 as compared to the six months ended December 25, 2004 is due to the factors discussed above.

The level of research and development expenditures as a percentage of net revenues will vary from period to period, depending, in part, on the level of net revenues and, in part, on the Company's success in recruiting the technical personnel needed for its new product introductions and process development. The Company continuously attempts to control and, if possible, reduce expense levels in all areas including research and development. However, the Company views research and development expenditures as critical to maintaining a high level of new product introductions, which in turn are critical to the Company's plan for future growth.

The following table reconciles the Company's research and development expenses determined in accordance with GAAP to non-GAAP research and development expenses, which exclude the effect of all stock based compensation costs, for the three and six months ended December 24, 2005 and December 25, 2004.

	Three Months Ended		Six Months Ended	
	Dec. 24, 2005	Dec. 25, 2004	Dec. 24, 2005	Dec. 25, 2004
(Amounts in thousands, except percentages)				
Research and development expenses, as reported	\$ 116,878	\$ 81,035	\$ 233,931	\$ 160,132
Stock-based compensation	(24,324)		(50,802)	
Non-GAAP research and development expenses	\$ 92,554	\$ 81,035	\$ 183,129	\$ 160,132

Non-GAAP research and development expenses as a percentage of revenue 20.8% 18.6% 21.0% 18.4%

SFAS 123(R) requires the Company to estimate the cost of all forms of stock-based compensation, including employee stock options and awards under our Employee Stock Participation (ESP Plan), and to record a commensurate expense (which is subjective in nature) in the income statement. The Company is showing non-GAAP research and development expenses, which exclude all stock-based compensation expense, to permit additional analysis of the Company's performance. Management believes this non-GAAP measure is useful to investors because it enhances the understanding of the Company's historical financial performance and comparability between

Table of Contents

periods in light of a recent change in accounting standards requiring the Company to record stock-based compensation as an expense in its financial statements. This non-GAAP presentation is also given for comparability with other companies that have not adopted SFAS 123(R), which the Company believes is useful to investors. Many of the Company's investors have requested that the Company disclose this non-GAAP information because they believe it is useful in understanding the Company's performance as it excludes a non-cash charge that many investors feel may obscure the Company's true operating costs. Management uses this non-GAAP measure to manage and assess the profitability of its business. Specifically, the Company develops, manages and monitors budgets and spending on a cash basis and excludes the effect of stock-based compensation. The Company's measure of non-GAAP research and development expenses might not be the same as similarly titled measures used by other companies, and it should not be construed as a substitute for research and development expenses. There are limitations associated with using non-GAAP measures, including that they exclude financial information that some may consider important in evaluating the Company's performance.

Selling, General and Administrative

Selling, general and administrative expenses were \$31.1 million and \$25.3 million for the three months ended December 24, 2005, and December 25, 2004, respectively, which represented 7.0% and 5.8% of net revenues, respectively. The increase in selling, general, and administrative expenses in absolute dollars for the three months ended December 24, 2005 as compared to the three months ended December 25, 2004 is primarily due to \$7.2 million of stock based compensation recorded due to the adoption of SFAS 123(R). See Note 2 Stock Based Compensation of the Notes to Condensed Consolidated Financial Statements for information regarding the adoption of SFAS 123(R). In addition, selling, general and administrative expenses for the three months ended December 24, 2005 as compared to the three months ended December 25, 2004 increased due to \$0.7 million of discretionary employee bonuses recorded. This was offset by a \$1.7 million decrease in advertising and marketing costs. On a non-GAAP basis, excluding stock based compensation, selling, general, and administrative expenses were \$23.8 million and \$25.3 million for the three months ended December 24, 2005 and December 25, 2004, respectively, which represented 5.3% and 5.8% of net revenue, respectively. The increase in non-GAAP selling, general, and administrative expenses for the three months ended December 24, 2005 as compared to the three months ended December 25, 2004 is due to the factors discussed above.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (CONT'D)

Selling, general and administrative expenses were \$59.9 million and \$50.4 million for the six months ended December 24, 2005, and December 25, 2004, respectively, which represented 6.9% and 5.8% of net revenues, respectively. The increase in selling, general, and administrative expenses in absolute dollars for the six months ended December 24, 2005 as compared to the six months ended December 25, 2004 is primarily due to \$11.8 million of stock based compensation recorded due to the adoption of SFAS 123(R). See Note 2 Stock Based Compensation of the Notes to Condensed Consolidated Financial Statements for information regarding the adoption of SFAS 123(R). In addition, selling, general and administrative expenses for the six months ended December 24, 2005 as compared to the six months ended December 25, 2004 increased due to \$1.3 million of discretionary employee bonuses recorded. This was offset by a \$3.2 million decrease in advertising and marketing costs. On a non-GAAP basis, excluding stock based compensation, selling, general, and administrative expenses were \$48.1 million and \$50.4 million for the six months ended December 24, 2005 and December 25, 2004, respectively, which represented 5.5% and 5.8% of net revenue, respectively. The increase in non-GAAP selling, general, and administrative expenses for the six months ended December 24, 2005 as compared to the six months ended December 25, 2004 is due to the factors discussed above.

The following table reconciles the Company's selling, general, and administrative expenses determined in accordance with GAAP to non-GAAP selling, general, and administrative expenses, which exclude the effect of all stock based compensation costs, for the three and six months ended December 24, 2005 and December 25, 2004.

	Three Months Ended		Six Months Ended	
	Dec. 24, 2005	Dec. 25, 2004	Dec. 24, 2005	Dec. 25, 2004
(Amounts in thousands, except percentages)				
Selling, general, and administrative expenses, as reported	\$ 31,053	\$ 25,324	\$ 59,918	\$ 50,386
Stock-based compensation	(7,248)		(11,775)	
non-GAAP selling, general, and administrative expenses	\$ 23,805	\$ 25,324	\$ 48,143	\$ 50,386

non-GAAP selling, general, and administrative expenses as a percentage of revenue 5.3% 5.8% 5.5% 5.8%

SFAS 123(R) requires the Company to estimate the cost of all forms of stock-based compensation, including employee stock options and awards under our Employee Stock Participation (ESP Plan), and to record a commensurate expense (which is subjective in nature) in the income statement. The Company is showing non-GAAP selling, general, and administrative expenses, which exclude all stock-based compensation expense, to permit additional analysis of the Company's performance. Management believes this non-GAAP measure is useful to investors because it enhances the understanding of the Company's historical financial performance and comparability between periods in light of a recent change in accounting standards requiring the Company to record stock-based compensation as an expense in its financial statements. This non-GAAP presentation is also given for comparability with other companies that have not adopted SFAS 123(R), which the Company believes is useful to investors. Many of the Company's investors have requested that the Company disclose this non-GAAP information because they believe it is useful in understanding the Company's performance as it excludes a non-cash charge that many investors feel may obscure the Company's true operating costs. Management uses this non-GAAP measure to manage and assess the profitability of its business. Specifically, the Company develops, manages and monitors budgets and spending on a cash basis and excludes the effect of stock-based compensation. The Company's measure of non-GAAP selling, general, and administrative expenses might not be the same as similarly titled measures used by other companies, and it should not be construed as a substitute for selling, general, and administrative expenses. There are limitations associated with using non-GAAP measures, including that they exclude financial information that some may consider important in evaluating the Company's performance.

Interest Income and Other, Net

Interest income and other, net was \$11.2 million and \$22.2 million for the three and six months ended December 24, 2005, compared to \$6.2 million and \$12.0 million for the three and six months ended December 25, 2004, respectively. This increase was mainly due to higher average interest rates.

Table of Contents

Income Taxes

The effective income tax rate for the three months ended December 24, 2005 and December 25, 2004 was 32.7% and 33.2%, respectively. The effective income tax rate for the six months ended December 24, 2005 and December 25, 2004 was 32.8% and 33.2%, respectively. The decrease in the effective tax rate was primarily due to the new domestic production activities deduction that was enacted as part of the American Jobs Creation Act of 2004 and benefited the Company for the first time in fiscal 2006. This benefit was partially offset by the phase out of the extraterritorial income exclusion that was also enacted as part of the American Jobs Creation Act of 2004. The effective rates were lower than the U.S. federal and state combined statutory rate primarily due to tax benefits on export sales.

The Company's net deferred tax asset at December 24, 2005 was \$17.4 million. Realization of this net deferred tax asset is dependent primarily upon achieving future U.S. taxable income of \$48 million. The Company believes it is more likely than not that the net deferred tax assets will be realized based on historical earnings and expected levels of future taxable income. Levels of future taxable income are subject to the various risks and uncertainties as described in this Report and in the Company's Annual Report on Form 10-K for the fiscal year ended June 25, 2005. An increase in the valuation allowance against net deferred tax assets may be necessary if it becomes more likely than not that all or a portion of the net deferred tax assets will not be realized. The Company periodically assesses the need for increases to the deferred tax asset valuation allowance.

Stock Based Compensation

Effective June 26, 2005, the Company adopted the provisions of Statement of Financial Accounting Standards (SFAS) No. 123(R), Share-Based Payment (SFAS 123(R)). SFAS 123(R) establishes standards for the accounting for transactions in which an entity exchanges its equity instruments for goods or services. It also addresses transactions in which an entity incurs liabilities in exchange for goods or services that are based on the fair value of the entity's equity instruments or that may be settled by the issuance of those equity instruments. Accordingly, stock-based compensation cost is measured at grant date, based on the fair value of the award, and is recognized as expense over the employee's requisite service period.

Table of Contents**Free Cash Flow**

Free cash flow is a non-GAAP measure that represents cash that the Company generates after making capital expenditures. Free cash flow is used by management to make fundamental decisions with regard to the operation of the Company's business, including working capital requirements, share repurchases and dividend payments. In addition, free cash flow is used by management to evaluate and assess the Company's operating results and for budget and planning purposes. The Company believes that free cash flow is relevant and useful information that is often widely used by analysts, investors, and other interested parties in the semiconductor industry to measure financial performance. Accordingly, the Company is disclosing this information to permit a comprehensive and objective analysis of the Company's operating performance, to provide an additional measure of performance and liquidity, and to provide additional information with respect to the Company's ability to make future share repurchases and dividend payments and to meet future working capital requirements.

The following table reconciles free cash flow to net income, and depicts the Company's free cash flow for the three and six months ended December 24, 2005 and December 25, 2004, respectively.

RECONCILIATION OF FREE CASH FLOW TO NET INCOME

	Three months ended		Six months ended	
	Dec. 24, 2005	Dec. 25, 2004	Dec. 24, 2005	Dec. 25, 2004
(Amounts in millions)				
Net income, as reported	\$ 112.6	\$ 144.6	\$ 218.0	\$ 289.2
Add adjustments to reconcile net income to net cash provided by operating activities:				
Stock based compensation	40.8		82.3	
Depreciation, amortization, and other	20.5	19.1	41.4	37.8
Tax benefit related to stock plans	2.7	34.1	8.3	57.9
Accounts receivable	(8.1)	21.0	(28.7)	17.5
Inventories	(11.0)	(10.8)	(18.7)	(28.8)
Accounts payable	12.3	(28.3)	20.8	(32.1)
Income taxes payable	0.1	(21.5)	19.6	4.0
Other assets and liabilities	(33.2)	(5.1)	(29.8)	15.9
Total of adjustments	24.1	8.5	94.9	72.2
Cash generated by operating activities, as reported	136.7	153.1	312.9	361.4
Adjustments:				
Capital expenditures	(37.4)	(31.4)	(55.4)	(97.8)
Additional tax benefit related to stock plans	5.0		21.3	
Free cash flow	\$ 104.3	\$ 121.7	\$ 278.8	\$ 263.6

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (CONT'D)

Free cash flow should not be construed as a substitute for net income or as a better measure of liquidity than cash flow from operating activities, both of which are determined in accordance with GAAP. Free cash flow excludes components that are significant in understanding and assessing the Company's results of operations and cash flows. In addition, some of the limitations associated with the use of free cash flow are that it is not a term defined by GAAP, and the Company's measure of free cash flow might not be comparable to similarly titled measures used by other companies. In addition, the Company's measure of free cash flow omits certain actual cash expenditures, such as dividends paid, cash used for share repurchases and cash generated from employee stock option exercises. Management compensates for these limitations by considering net income derived in accordance with GAAP.

BOOKINGS AND BACKLOG

Second quarter bookings were approximately \$506 million, a 10% increase from the first quarter's level of \$459 million. Turns orders received in the quarter were \$230 million, a 10% increase from the \$208 million received in the first quarter of fiscal year 2006 (turns orders are customer orders that are for delivery within the same quarter and may result in revenue within the same quarter if the Company has available inventory that matches those orders). Bookings increased in all geographic locations.

Second quarter ending backlog shippable within the next 12 months was approximately \$370 million, including approximately \$329 million requested for shipment in the third quarter of fiscal year 2006. The Company's first quarter ending backlog shippable within the next 12 months was approximately \$330 million, including approximately \$296 million that was requested for shipment in the second quarter of fiscal year 2006.

FINANCIAL CONDITION, LIQUIDITY AND CAPITAL RESOURCES

The Company's primary sources of funds for the six months ended December 24, 2005 were net cash generated from operating activities of \$312.9 million and proceeds from the exercises of stock options and purchases of common stock under the Employee Stock Participation Plan of 4.2 million shares in the amount of \$82.8 million.

Another source of cash from the Company's stock option programs is the tax deductions that arise from exercise of options. These tax benefits amounted to \$29.6 million in the six months ended December 24, 2005.

The principal uses of funds were the repurchase of 11.1 million shares of the Company's common stock for \$415.9 million, the payment of \$72.8 million for dividends and the purchase of \$55.4 million in property, plant and equipment. As of December 24, 2005, the Company's available funds consisted of \$1,341.4 million in cash, cash equivalents, and short-term investments. The Company anticipates that the available funds and cash generated from operations will be sufficient to meet cash and working capital requirements, including its anticipated level of capital expenditures, common stock repurchases, and dividend payments for the next twelve months.

The Company is subject to pending legal proceedings. See Note 10 "Contingencies" of the Notes to Condensed Consolidated Financial Statements.

Off-Balance-Sheet Arrangements

As of December 24, 2005, the Company did not have any material off-balance-sheet arrangements, as defined in Item 303 (a)(4)(ii) of SEC Regulation S-K.

Table of Contents

ITEM 3: QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company's market risk has not changed materially from the interest rate and foreign currency risks disclosed in Item 7A of the Company's Annual Report on Form 10-K for the fiscal year ended June 25, 2005.

ITEM 4: CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

As of the end of the period covered by this Quarterly Report on Form 10-Q, the Company carried out an evaluation, under the supervision and with the participation of our Chief Executive Officer (CEO) and Chief Financial Officer (CFO), of the effectiveness of our disclosure controls and procedures. The Company's disclosure controls and procedures are designed to provide reasonable assurance that information required to be disclosed in the Company's reports filed or submitted under the Securities Exchange Act of 1934 is properly and timely recorded, processed, summarized and reported. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures were effective as of December 24, 2005 to ensure that information that the Company is required to disclose in reports that the Company files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms, and is accumulated and communicated to the Company's management, including the CEO and CFO of the Company, as appropriate to allow timely decisions regarding required disclosure.

It should be noted that any control system, no matter how well designed and operated, can provide only reasonable assurance to the tested objectives. The design of any control systems is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions, regardless of how remote.

There was no change in our internal control over financial reporting (as defined in Rule 13a-15(f) of the Exchange Act) that occurred during the quarter ended December 24, 2005 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents**PART II. OTHER INFORMATION****ITEMS 3 AND 5 OF PART II HAVE BEEN OMITTED AS THEY ARE NOT APPLICABLE****ITEM 1: LEGAL PROCEEDINGS**

In the second quarter of fiscal year 2006, the Company and Qualcomm Inc. (Qualcomm) entered into a settlement agreement resolving patent litigation that had been brought by Qualcomm against the Company. The settlement agreement resolved all legal claims between Qualcomm and the Company and their respective subsidiaries.

In addition to the above, the Company is subject to other legal proceedings and claims that arise in the normal course of its business. The Company does not believe that the ultimate outcome of these matters will have a material adverse effect on the financial position of the Company.

ITEM 2: UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The following table summarizes the activity related to stock repurchases for the second quarter of fiscal year 2006.

		Issuer Repurchases of Equity Securities			
		Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
Sept. 25, 2005	Oct. 22, 2005	995,354	\$ 40.07	995,354	7,062,311
Oct. 23, 2005	Nov. 19, 2005	8,042,995	\$ 36.08	8,042,995	12,519,316
Nov. 20, 2005	Dec. 24, 2005	120,148	\$ 37.41	120,148	12,399,168
Total for the Quarter		9,158,497	\$ 36.53	9,158,497	12,399,168

From fiscal year 2002 through 2005, the Board of Directors authorized the Company to repurchase up to 40 million shares of the Company's common stock from time to time at the discretion of the Company's management. As of June 25, 2005, approximately 10.0 million shares remained available under these repurchase authorizations which have no expiration date. In November 2005, the Board of Directors authorized the Company to repurchase up to 13.5 million additional shares of the Company's common stock from time to time at the discretion of the Company's management. All shares repurchased during the second quarter of fiscal year 2006 were pursuant to the Company's share repurchase programs described above, which have no expiration date. During the second quarter of fiscal year 2006, the Company purchased 9.2 million shares for \$334.6 million. As of December 24, 2005, approximately 12.4 million shares remained available under the repurchase authorization. The number of shares to be repurchased and the timing of such repurchases will be based on several factors, including the price of the Company's common stock, general market and business conditions, and other factors.

ITEM 4: SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

The Company held its Annual Meeting of Stockholders on November 10, 2005. The following proposals were voted on by the Company's Stockholders and results obtained thereon:

Proposal 1: Election of Directors

The following directors were elected as directors by the votes indicated:

Nominee	Votes in Favor	Votes Withheld
James R. Bergman	195,572,378	103,490,190

Edgar Filing: MAXIM INTEGRATED PRODUCTS INC - Form 10-Q/A

Michael J. Byrd	275,490,477	23,572,091
Peter De Roeth	288,967,161	10,095,407
John F. Gifford	235,900,574	63,161,994
B. Kipling Hagopian	287,131,412	11,931,155
A.R. Frank Wazzan	284,274,711	14,787,856

Table of Contents

Proposal 2: Ratification and approval of an amendment and restatement of the Company's 1996 Stock Incentive Plan, as amended, to (i) increase the number of shares available for issuance from 117.6 million to 127.1 million, (ii) permit the award of restricted stock units and restricted stock and (iii) extend the term of the Plan through 2015

The proposal was ratified and approved with 133,065,825 votes in favor, 129,200,751 against, and 3,165,215 abstentions.

Proposal 3: Ratification and approval of an amendment to the Company's 1987 Employee Stock Participation Plan, as amended, increasing the number of shares available for issuance by 1,500,000 shares from 16,551,567 shares to 18,051,567 shares

The proposal was ratified and approved with 227,312,518 votes in favor, 35,179,705 against, and 2,943,548 abstentions.

Proposal 4: Ratification of Selection of Deloitte and Touche LLP as the Company's Independent Registered Public Accounting Firm for the fiscal year ending June 24, 2006

The selection of Deloitte and Touche LLP as the Company's independent auditors for fiscal year 2006 was ratified with 297,197,760 votes in favor, 181,237 votes against, and 1,683,570 abstentions
