QUAKER CHEMICAL CORPORATION

(Exact name of Registrant as specified in its charter)

Pennsylvania
(State or other jurisdiction of
incorporation or organization)

One Quaker Park, 901 Hector Street,

23-0993790
(I.R.S. Employer
Identification No.)

19428 0809

Edgar Filing: QUAKER CHEMICAL CORP - Form 10-Q

Conshohocken, Pennsylvania
(Address of principal executive offices) (Zip Code)
Registrant's telephone number, including area code: 610-832-4000

Not Applicable

Former name, former address and former fiscal year, if changed since last report.

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act (Check one).

Large accelerated filer Accelerated filer Non-accelerated filer
Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Number of Shares of Common Stock	9,867,884
Outstanding on July 31, 2006

Quaker Chemical Corporation

Notes to Condensed Consolidated Financial Statements

(Dollars in thousands, except per share amounts)

(Unaudited)

Note 1 Condensed Financial Information

The condensed consolidated financial statements included herein are unaudited and have been prepared in accordance with generally accepted accounting principles in the United States for interim financial reporting and the United States Securities and Exchange Commission regulations. Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles in the United States have been condensed or omitted pursuant to such rules and regulations. In the opinion of management, the financial statements reflect all adjustments (consisting only of normal recurring adjustments) which are necessary for a fair statement of the financial position, results of operations and cash flows for the interim periods. Certain reclassifications of prior year's data have been made to improve comparability. The results for the three and six months ended June 30, 2006 are not necessarily indicative of the results to be expected for the full year. These financial statements should be read in conjunction with the Company's Annual Report filed on Form 10-K for the year ended December 31, 2005.

In February 2005, the Company announced that its real estate joint venture had sold its real estate assets, which resulted in \$4,187 of proceeds to the Company after payment of the partnership obligations. The proceeds include \$2,989 related to the sale by the Company's real estate joint venture of its real estate holdings, as well as \$1,198 of preferred return distributions. These proceeds are included in other income for 2005.

As part of the Company's chemical management services, certain third-party product sales to customers are managed by the Company. Where the Company acts as a principal, revenues are recognized on a gross reporting basis at the selling price negotiated with customers. Where the Company acts as an agent, such revenue is recorded using net reporting as service revenues at the amount of the administrative fee earned by the Company for ordering the goods. Third-party products transferred under arrangements resulting in net reporting totaled \$27,314 and \$17,335 for the six months ended June 30, 2006 and 2005, respectively.

Note 2 Recently Issued Accounting Standards

In June 2006, the Financial Accounting Standards Board (FASB) issued FASB Interpretation No. 48 (FIN 48), Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109. The interpretation clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with FASB Statement No. 109, Accounting for Income Taxes. In addition, the interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. The interpretation also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. The interpretation is effective for fiscal years beginning after December 15, 2006. The Company is currently evaluating the impact of this interpretation.

Table of Contents**Quaker Chemical Corporation****Notes to Condensed Consolidated Financial Statements (Continued)****(Dollars in thousands, except per share amounts)****(Unaudited)****Note 3 Stock-Based Compensation**

Effective January 1, 2006, the Company adopted Statement of Financial Accounting Standards (SFAS) No. 123 (revised 2004), *Share-Based Payment*, (SFAS 123R). SFAS 123R requires the recognition of the fair value of stock compensation in net income. The Company elected the modified prospective method in adopting SFAS 123R. Under this method, the provisions of SFAS 123R apply to all awards granted or modified after the date of adoption. In addition, the unrecognized expense of awards not yet vested at the date of adoption is recognized in net income in the periods after the date of adoption using the same valuation method (e.g. Black-Scholes) and assumptions determined under the original provisions of SFAS 123, *Accounting for Stock-Based Compensation*, as disclosed in the Company's previous filings.

Prior to January 1, 2006, the Company accounted for employee stock option grants using the intrinsic method in accordance with Accounting Principles Board (APB) Opinion No. 25 *Accounting for Stock Issued to Employees*. As such, no compensation cost was recognized for employee stock options that had exercise prices equal to the fair market value of our common stock at the date of granting the option. The Company also complied with the pro forma disclosure requirements of SFAS No. 123 *Accounting for Stock Based Compensation*, and SFAS No. 148 *Accounting for Stock Based Compensation Transition and Disclosure*.

SFAS 123R requires the Company to present proforma information for the comparative period prior to the adoption as if the Company had accounted for all employee stock options under the fair value method of the original SFAS 123. The following table illustrates the effect on net income and net income per common share if the Company had applied the fair value recognition provisions of SFAS 123 to stock-based employee compensation in the prior-year period (dollars in thousands, except per share data):

	Three Months Ended June 30, 2005	Six Months Ended June 30, 2005
Net Income - as reported	1,795	4,921
Add: Stock-based employee compensation expense included in net income, net of related tax effects	40	118
Deduct: Total stock-based employee compensation expense determined under the fair value based method for all awards, net of tax	(404)	(708)
Pro forma net income	1,431	4,331
Earnings per share:		
Basic - as reported	\$ 0.19	\$ 0.51
Basic - pro forma	\$ 0.15	\$ 0.45
Diluted - as reported	\$ 0.18	\$ 0.50
Diluted - pro forma	\$ 0.15	\$ 0.44

The Company recognized approximately \$385 of share based compensation expense and the related tax benefits of \$135 in our unaudited condensed consolidated statement of operations for the six months ended June 30, 2006. The compensation expense was comprised of \$90 related to stock options, \$217 related to nonvested stock awards, \$16 related to the Company's Employee Stock Purchase Plan and \$62 related to the Company's Director's Stock Ownership Plan.

Table of Contents**Quaker Chemical Corporation****Notes to Condensed Consolidated Financial Statements (Continued)****(Dollars in thousands, except per share amounts)****(Unaudited)**

Approximately \$57 of the amount of compensation cost recognized in 2006 for stock option awards reflects amortization relating to the remaining unvested portion of stock option awards granted prior to January 1, 2006. The estimated fair value of the options granted during prior years was calculated using a Black-Scholes model. The Black-Scholes model incorporates assumptions to value stock-based awards. The Company will continue to use the Black Scholes option pricing model to value share-based awards. The estimated fair value of the Company's share-based awards is amortized on a straight line basis over the awards' vesting period. The risk-free rate of interest for periods within the contractual life of the option is based on U.S. Government Securities Treasury Constant Maturities over the contractual term of the equity instrument. Expected volatility is based on the historical volatility of the Company's stock. The Company uses historical data on exercise timing to determine the expected life assumption. The assumptions used for stock option grants made in the first quarter of 2005 include the following: dividend yield of 3.4%, expected volatility of 22.6%, risk-free interest rate of 3.9%, an expected life of 5 years, and a forfeiture rate of 8% over the remaining life of these options.

Based on our historical experience, we have assumed a forfeiture rate of 13% on the nonvested stock. Under the true-up provisions of SFAS 123R, we will record additional expense if the actual forfeiture rate is lower than we estimated, and will record a recovery of prior expense if the actual forfeiture is higher than we estimated.

The adoption of SFAS 123R had an impact of \$49 and \$90 due to the accrual of compensation expense on the unvested stock options for the three and six months ended June 30, 2006.

No compensation expense related to stock option grants had been recorded in the unaudited condensed consolidated statement of operations for the three and six months ended June 30, 2005, as all of the options granted had an exercise price equal to the market value of the underlying stock on the date of grant. Accordingly, results for prior periods have not been restated.

The Company has a long-term incentive program (LTIP) for key employees which provides for the granting of options to purchase stock at prices not less than market value on the date of the grant. Most options are exercisable between one and three years after the date of the grant for a period of time determined by the Company not to exceed seven years from the date of grant for options issued in 1999 or later and ten years for options issued in prior years. Beginning in 1999, the LTIP program provided for common stock awards, the value of which was generally determined based on Company performance over a two to five-year period. Common stock awards issued in 2006 under the LTIP program are subject only to time vesting over a two to five-year period. In addition, as part of the Company's Global Annual Incentive Plan (GAIP), nonvested shares may be issued to key employees.

Stock option activity under all plans during the six months ended June 30, 2006 is as follows:

		Weighted Average Exercise Price per Share	Weighted Average Remaining Contractual Term (years)
	Number of Shares		
Balance at December 31, 2005	1,183,485	19.88	
Options granted	120,600	19.98	
Options exercised	(124,500)	14.07	
Options forfeited	(2,375)	23.08	
Options expired	(30,540)	22.16	
Balance at June 30, 2006	1,146,670	20.46	4
Exercisable at June 30, 2006	996,629	20.36	3

The total intrinsic value of options exercised during 2006 was approximately \$868. Intrinsic value is calculated as the difference between the current market price of the underlying security and the strike price of a related option. As of June 30, 2006, the total intrinsic value of options

outstanding was approximately \$547, and the total intrinsic value of exercisable options was approximately \$547.

Table of Contents**Quaker Chemical Corporation****Notes to Condensed Consolidated Financial Statements (Continued)****(Dollars in thousands, except per share amounts)****(Unaudited)**

A summary of the Company's outstanding stock options at June 30, 2006 is as follows:

	Number	Weighted	Weighted	Number	Weighted
	outstanding at	Average	average exercise	Exercisable at	Average
Range of Exercise Prices	6/30/2006	contractual life	price	6/30/2006	Exercise Price
\$ 13.30 - \$15.96	90,250	1	\$ 14.83	90,250	\$ 14.83
15.97 - 18.62	175,950	2	17.58	175,950	17.58
18.63 - 21.28	521,825	4	20.10	401,225	20.14
21.29 - 23.94	191,320	5	21.91	191,320	21.91
23.95 - 26.60	167,325	4	25.99	137,884	26.04
	1,146,670	4	20.46	996,629	20.36

As of June 30, 2006, unrecognized compensation expense related to nonvested stock options awarded prior to the adoption of SFAS 123R was \$34 to be recognized over the remainder of 2006. As of June 30, 2006, unrecognized compensation expense related to options granted during 2006 was \$531.

During the second quarter of 2006, the Company granted 120,600 stock options under the Company's LTIP plan, that are subject only to time vesting over a 3 year period. The options were valued using the Black-Scholes model with the following assumptions: dividend yield of 4.1%, expected volatility of 27.1%, risk free interest rate of 5.0%, an expected term of 6 years, and a forfeiture rate of 3% over the remaining life of the options. Approximately \$33 of expense was recorded on these options during the second quarter of 2006. The fair value of these awards is amortized on a straight-line basis over the awards vesting period.

Under the Company's LTIP plan, 29,650 shares of nonvested stock were granted during the first quarter of 2006 at a weighted average grant date fair value of \$19.99 per share. In the second quarter of 2006, an additional 19,900 shares of nonvested stock were granted at a weighted average grant date fair value of \$17.01 per share. None of these awards were vested or were forfeited and were all outstanding as of June 30, 2006. The fair value of the nonvested stock is based on the trading price of the Company's common stock on the date of grant. The Company adjusts the grant date fair value for expected forfeitures based on historical experience for similar awards. As of June 30, 2006, unrecognized compensation expense related to these awards was \$795, to be recognized over a weighted average remaining period of 2.4 years.

Under the Company's GAIP plan, 42,500 shares of nonvested stock were granted during the second quarter of 2005 at a weighted average grant date fair value of \$20.12 per share. There were no new grants under this plan during the first six months of 2006. None of these awards vested or were forfeited and were all outstanding as of June 30, 2006. As of June 30, 2006, unrecognized compensation expense related to these awards was \$489, to be recognized over a weighted average remaining period of 1.8 years.

Employee Stock Purchase Plan

In 2000, the Board adopted an Employee Stock Purchase Plan (ESPP) whereby employees may purchase Company stock through a payroll deduction plan. Purchases are made from the plan and credited to each participant's account at the end of each month, the Investment Date. The purchase price of the stock is 85% of the fair market value on the Investment Date. The plan is compensatory and the 15% discount is expensed on the Investment Date. All employees, including officers, are eligible to participate in this plan. A participant may withdraw all uninvested payment balances credited to a participant's account at any time by giving written notice to the Committee. An employee whose stock ownership of the Company exceeds five percent of the outstanding common stock is not eligible to participate in this plan.

Table of Contents**Quaker Chemical Corporation****Notes to Condensed Consolidated Financial Statements (Continued)****(Dollars in thousands, except per share amounts)****(Unaudited)****2003 Director Stock Ownership Plan**

In March 2003, our board of directors approved a stock ownership plan for each member of our board of directors to encourage the directors to increase their investment in the Company. The Plan was effective on the date it was approved and remains in effect for a term of ten years or until it is earlier terminated by the Board. The maximum number of shares of Common Stock which may be issued under the Plan is 75,000, subject to certain conditions that the committee may elect to adjust the number of shares. As of June 30, 2006, the committee has not made any elections to adjust the shares under this plan. Each Director is eligible to receive an annual retainer for services rendered as a member of the board of directors. As of May 1, 2006, each Director who owned less than 7,500 shares of Company Common Stock was required to receive 75% of the annual retainer in Common Stock and 25% of the annual retainer in cash. Each Director who owned 7,500 or more shares of Company Common Stock receives 35% of the annual retainer in Common Stock and 65% of the annual retainer in cash with the option to receive common stock in lieu of the annual retainer. As of May 1, 2006, the annual retainer was \$24. The number of shares issued in payment of the fees is calculated based on an amount equal to the average of the closing prices per share of Common Stock as reported by the composite tape of the New York Stock Exchange for the two trading days immediately preceding the retainer payment date. The retainer payment date is June 1. For the three and six months ending June 30, 2006, the Company recorded approximately \$33 and \$62, respectively. For the three and six months ending June 30, 2005, the Company recorded approximately \$25 and \$58, respectively.

Note 4-Earnings Per Share

The following table summarizes earnings per share (EPS) calculations:

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2006	2005	2006	2005
Numerator for basic EPS and diluted EPS net income	\$ 2,992	\$ 1,795	\$ 5,534	\$ 4,921
Denominator for basic EPS weighted average shares	9,769,682	9,676,463	9,746,685	9,660,163
Effect of dilutive securities, primarily employee stock options	63,435	119,335	78,283	166,003
Denominator for diluted EPS weighted average shares and assumed conversions	9,833,117	9,795,798	9,824,968	9,826,166
Basic EPS	\$ 0.31	\$ 0.19	\$ 0.57	\$ 0.51
Diluted EPS	\$ 0.30	\$ 0.18	\$ 0.56	\$ 0.50

The following number of stock options are not included in the earnings per share since in each case the exercise price is greater than the market price: 787,520 and 843,810 for the three months ended June 30, 2006 and 2005, and 787,520 and 430,585 for the six months ended June 30, 2006 and 2005, respectively.

Note 5 Business Segments

The Company's reportable segments are as follows:

- (1) Metalworking process chemicals industrial process fluids for various heavy industrial and manufacturing applications.
- (2) Coatings temporary and permanent coatings for metal and concrete products and chemical milling maskants.

(3) Other chemical products other various chemical products.

Segment data includes direct segment costs as well as general operating costs.

The table below presents information about the reported segments:

	Three Months Ended		Six Months Ended	
	June 30, 2006	June 30, 2005	June 30, 2006	June 30, 2005
Metalworking Process Chemicals				
Net sales	\$ 108,950	\$ 98,426	\$ 210,866	\$ 195,644
Operating income	15,720	12,439	29,558	23,842
Coatings				
Net sales	8,795	6,880	16,272	12,843
Operating income	2,260	1,759	4,192	3,167
Other Chemical Products				
Net sales	938	1,736	1,361	2,716
Operating income	196	316	153	508
Total				
Net sales	118,683	107,042	228,499	211,203
Operating income	18,176	14,514	33,903	27,517
Non-operating expenses	(11,543)	(10,585)	(21,796)	(21,804)
Amortization	(357)	(340)	(708)	(646)
Interest expense	(1,378)	(928)	(2,608)	(1,686)
Interest income	126	188	391	512
Other income, net	387	648	515	5,516
Consolidated income before taxes	\$ 5,411	\$ 3,497	\$ 9,697	\$ 9,409

Operating income comprises revenue less related costs and expenses. Non-operating items primarily consist of general corporate expenses identified as not being a cost of operation, interest expense, interest income, and license fees from non-consolidated associates.

Note 6 Comprehensive Income (Loss)

The following table summarizes comprehensive income (loss):

	Three Months Ended		Six Months Ended	
	June 30, 2006	June 30, 2005	June 30, 2006	June 30, 2005
Net income	2,992	1,795	5,534	4,921
Change in fair value of derivatives	244		603	
Unrealized gain on available-for-sale securities	(52)		79

Table of Contents**Quaker Chemical Corporation****Notes to Condensed Consolidated Financial Statements (Continued)****(Dollars in thousands, except per share amounts)****(Unaudited)****Note 7 Restructuring and Related Activities**

In 2001, Quaker's management approved restructuring plans to realign the organization primarily in Europe and reduce operating costs (2001 program). Included in the restructuring charges were provisions for severance of 53 employees. The charge comprised \$2,807 related to employee separations, \$2,450 related to facility rationalization charges, and \$597 related to abandoned acquisitions. In January of 2005, the last severance payment under the 2001 program was made and the Company reversed \$117 of unused restructuring accruals related to this program. In 2005, the Company completed the sale of its Villeneuve, France site for \$1,907, which completed all actions contemplated by this program. The Company reversed \$159 of unused restructuring accruals related to this program in the fourth quarter of 2005.

In 2003, Quaker's management approved a restructuring plan (2003 program). Included in the 2003 restructuring charge were provisions for severance for 9 employees totaling \$273. As of March 31, 2005, all severance payments were completed and the Company reversed \$59 of unused restructuring accruals related to this program, which completed all actions contemplated by this program.

In the first quarter of 2005, Quaker's management approved a restructuring plan (2005¹ Quarter Program). Included in the first quarter 2005 restructuring charge were provisions for severance for 16 employees totaling \$1,408. At December 31, 2005, all severance payments were completed. The Company reversed \$96 of unused restructuring charges related to this program in the fourth quarter of 2005, which completed all actions contemplated by this program.

In the fourth quarter of 2005, Quaker's management approved a restructuring plan (2005⁴ Quarter Program) with the goal of significantly reducing operating costs in the U.S. and Europe. The restructuring plan included involuntary terminations, a freeze of the Company's U.S. pension plan, a voluntary early retirement window to certain employees, with enhanced pension and other postretirement benefits. Included in the restructuring charges were provisions for severance (voluntary and involuntary) of 55 employees. Restructuring and related charges of \$9,344 were recognized in the fourth quarter of 2005. The charge comprised \$4,024 related to severance for involuntary terminations, \$1,017 related to one-time payments for voluntary early retirement, and \$2,668 related to the U.S. pension plan freeze and \$1,635 for the enhanced pension and other postretirement benefits related to voluntary early retirement participants. The Company expects to complete the initiatives contemplated under this program during 2006.

Accrued restructuring balances, included in other current liabilities and assigned to the Metalworking segment, are as follows:

	Employee
	Separations
2005 4th Quarter Program:	
December 31, 2005 ending balance	\$ 4,033
Payments	(3,411)
June 30, 2006 ending balance	\$ 622

Note 8 Business Acquisitions and Divestitures

In March 2005, the Company acquired the remaining 40% interest in its Brazilian joint venture for \$6,700. In addition, annual \$1,000 payments for four years will be paid subject to the former minority partners' compliance with the terms of the purchase agreement. The first \$1,000 payment was made in March 2006 and was recorded as goodwill assigned to the Metalworking Process Chemicals Segment.

Table of Contents**Quaker Chemical Corporation****Notes to Condensed Consolidated Financial Statements (Continued)****(Dollars in thousands, except per share amounts)****(Unaudited)****Note 9 Goodwill and Other Intangible Assets**

The changes in carrying amount of goodwill for the six months ended June 30, 2006 are as follows:

	Metalworking		
	Process Chemicals	Coatings	Total
Balance as of December 31, 2005	\$ 28,149	\$ 7,269	\$ 35,418
Goodwill additions	1,305		1,305
Currency translation adjustments	1,276		1,276
Balance as of June 30, 2006	\$ 30,730	\$ 7,269	\$ 37,999

Gross carrying amounts and accumulated amortization for definite-lived intangible assets as of June 30, 2006 and December 31, 2005 are as follows:

	Gross Carrying		Accumulated	
	Amount	Amount	Amortization	Amortization
	2006	2005	2006	2005
Amortized intangible assets				
Customer lists and rights to sell	\$ 6,937	\$ 6,703	\$ 2,452	\$ 2,095
Trademarks and patents	1,788	1,788	1,759	1,724
Formulations and product technology	3,278	3,278	1,440	1,240
Other	3,003	2,976	1,763	1,583
Total	\$ 15,006	\$ 14,745	\$ 7,414	\$ 6,642

The Company recorded \$708 and \$646 of amortization expense in the first six months of 2006 and 2005, respectively. Estimated annual aggregate amortization expense for the current year and subsequent five years is as follows:

For the year ended December 31, 2006	\$ 1,408
For the year ended December 31, 2007	\$ 987
For the year ended December 31, 2008	\$ 899
For the year ended December 31, 2009	\$ 891
For the year ended December 31, 2010	\$ 712
For the year ended December 31, 2011	\$ 652

The Company has one indefinite-lived intangible asset of \$600 for trademarks recorded in connection with the Company's 2002 acquisition of Epmar.

Table of Contents**Quaker Chemical Corporation****Notes to Condensed Consolidated Financial Statements (Continued)****(Dollars in thousands, except per share amounts)****(Unaudited)****Note 10 Pension and Other Postretirement Benefits**

The components of net periodic benefit cost, for the three and six months ended June 30, are as follows:

	Three Months Ended June 30, Other				Six Months Ended June 30, Other			
	Pension Benefits		Benefits		Pension Benefits		Benefits	
	2006	2005	2006	2005	2006	2005	2006	2005
Service cost	\$ 622	\$ 1,369	\$ 7	\$ 6	\$ 1,222	\$ 2,709	\$ 15	\$ 10
Interest cost and other	1,747	1,355	155	189	3,473	2,681	310	340
Expected return on plan assets	(1,667)	(1,301)			(3,319)	(2,574)		
Other amortization, net	356	282			707	558		
FAS 88 (Gain)/loss due to curtailments					(942)			
Net periodic benefit cost	\$ 1,058	\$ 1,705	\$ 162	\$ 195	\$ 1,141	\$ 3,374	\$ 325	\$ 350

Employer Contributions:

The Company previously disclosed in its financial statements for the year ended December 31, 2005, that it expected to make minimum cash contributions of \$8,024 to its pension plans and \$1,124 to its other postretirement benefit plan in 2006. As of June 30, 2006 \$4,569 and \$515 of contributions have been made, respectively.

Note 11 Commitments and Contingencies

The Company is involved in environmental clean-up activities and litigation in connection with an existing plant location and former waste disposal sites operated by unaffiliated third parties. In April of 1992, the Company identified certain soil and groundwater contamination at AC Products, Inc. (ACP), a wholly owned subsidiary. Voluntarily in coordination with the Santa Ana California Regional Water Quality Board, ACP is remediating the contamination. The Company believes that the remaining potential-known liabilities associated with these matters range from approximately \$1,300 to \$1,500, for which the Company has sufficient reserves. Notwithstanding the foregoing, the Company cannot be certain that liabilities in the form of remediation expenses and damages will not be incurred in excess of the amount reserved.

On or about December 18, 2004, the Orange County Water District (OCWD) filed a civil complaint in Superior Court, in Orange County, California against ACP and other parties potentially responsible for groundwater contamination containing tetrachloroethylene and other compounds, including perchloroethylene (PCE). OCWD is seeking to recover compensatory and other damages related to the investigation and remediation of the contamination in the groundwater. ACP seeks to defend this case vigorously on a number of bases including, most significantly, that it voluntarily investigated and remediated some or all of the PCE that appears to have originated at this facility. In cases such as these, parties often are allocated a percentage of responsibility for damages awarded or agreed upon. At this point in the case, it is not possible to provide an estimate of the percentage of liability, if any, that ACP ultimately may bear. Accordingly, it is not possible at this time to estimate the amount, if any, that ACP ultimately may be required to pay in settlement or to satisfy any adverse judgment as a result of the filing of this action or to assess whether the payment of such amount would be material to the Company.

Edgar Filing: QUAKER CHEMICAL CORP - Form 10-Q

Additionally, although there can be no assurance regarding the outcome of other environmental matters, the Company believes that it has made adequate accruals for costs associated with other environmental problems of which it is aware. Approximately \$134 was accrued at June 30, 2006 and December 31, 2005, respectively, to provide for such anticipated future environmental assessments and remediation costs.

Table of Contents

Quaker Chemical Corporation

Notes to Condensed Consolidated Financial Statements (Continued)

(Dollars in thousands, except per share amounts)

(Unaudited)

An inactive subsidiary of the Company that was acquired in 1978 sold certain products containing asbestos, primarily on an installed basis, and is among the defendants in numerous lawsuits alleging injury due to exposure to asbestos. The subsidiary discontinued operations in 1991 and has no remaining assets other than its existing insurance policies and proceeds from an insurance settlement received in late 2005. To date, the overwhelming majority of these claims have been disposed of without payment and there have been no adverse judgments against the subsidiary. Based on a continued analysis of the existing and anticipated future claims against this subsidiary, it is currently projected that the subsidiary's total liability over the next 50 years for these claims is approximately \$10,100 (excluding costs of defense). Although the Company has also been named as a defendant in certain of these cases, no claims have been actively pursued against the Company and the Company has not contributed to the defense or settlement of any of these cases pursued against the subsidiary. These cases have been handled to date by the subsidiary's primary and excess insurers who agreed to pay all defense costs and be responsible for all damages assessed against the subsidiary arising out of existing and future asbestos claims up to the aggregate limits of the policies. A significant portion of this primary insurance coverage was provided by an insurer that is now insolvent, and the other primary insurers have asserted that the aggregate limits of their policies have been exhausted. The subsidiary is challenging the applicability of these limits to the claims being brought against the subsidiary. In response to this challenge, one of these carriers entered into a settlement and release agreement with the subsidiary for \$15,000. The proceeds of the settlement are restricted and can only be used to pay claims and costs of defense associated with the subsidiary's asbestos litigation. The subsidiary has additional coverage under its excess policies. The Company believes, however, that if the coverage issues under the primary policies with the other carriers are resolved adversely to the subsidiary, the subsidiary's insurance coverage will likely be exhausted. As a result, liabilities in respect of claims may exceed coverage available to the subsidiary. See also Notes 16 and 17 of Notes to Consolidated Financial Statements filed with the Company's Annual Report on Form 10-K for the year ended December 31, 2005.

If the subsidiary's assets and insurance coverage were to be exhausted, claimants of the subsidiary may actively pursue claims against the Company because of the parent-subsubsidiary relationship. Although asbestos litigation is particularly difficult to predict, especially with respect to claims that are currently not being actively pursued against the Company, the Company does not believe that such claims would have merit or that the Company would be held to have liability for any unsatisfied obligations of the subsidiary as a result of such claims. After evaluating the nature of the claims filed against the subsidiary and the small number of such claims that have resulted in any payment, the potential availability of additional insurance coverage at the subsidiary level, the additional availability of the Company's own insurance and the Company's strong defenses to claims that it should be held responsible for the subsidiary's obligations because of the parent-subsubsidiary relationship, the Company believes it is not probable that the Company will incur any material losses. All of the asbestos cases pursued against the Company challenging the parent-subsubsidiary relationship are in the early stages of litigation. The Company has been successful in the past having claims naming it dismissed during initial proceedings. Since the Company may be in this early stage of litigation for some time, it is not possible to estimate additional losses or range of loss, if any.

The Company is party to other litigation which management currently believes will not have a material adverse effect on the Company's results of operations, cash flows or financial condition.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Executive Summary

Quaker Chemical Corporation is a worldwide developer, producer, and marketer of chemical specialty products and a provider of chemical management services (CMS) for various heavy industrial and manufacturing applications around the globe, with significant sales to the steel and automotive industries. The primary contributor to the Company's second quarter 2006 earnings improvement was an 11% improvement in revenues, improved performance from CMS and from SG&A cost control as compared to the second quarter of 2005.

The revenue growth in the second quarter of 2006 was primarily due to increased selling prices as well as higher volume in the U.S. and China. Higher selling prices, combined with significant improvement in CMS profitability offset higher raw material and third-party finished product costs resulting in higher gross margin dollars but a similar gross margin as a percentage of sales as compared to the second quarter of 2005. Raw material costs, primarily crude oil derivatives, continued to increase during the quarter, mitigating pricing actions intended to improve gross margins as a percentage of sales. SG&A for the second quarter of 2006 increased \$0.7 million as compared to the second quarter of 2005. Cost savings from restructuring efforts completed in 2005 were more than offset by increased spending in higher growth areas, higher variable compensation and higher professional fees.

Earnings per diluted share of \$0.30 for the second quarter of 2006 represent a considerable improvement over the \$0.18 reported for the second quarter of 2005. The Company's restructuring efforts are positively impacting bottom line results in accordance with expectations; however, improvements in gross margin as a percentage of sales will depend upon a sustained period of stable or declining raw material costs. The Company remains focused on pursuing revenue opportunities, managing its raw material and other costs and pursuing pricing initiatives.

Notwithstanding the improved quarterly performance, the business environment in which the Company operates remains challenging. Raw material and third party product costs continue to escalate due in part to higher crude oil prices. In certain instances, the Company faces competitive or contractual constraints limiting pricing actions to recover these higher costs. In addition, certain of our customers are dealing with demand and industry shifts, resulting in varying end-market conditions for the Company's products.

CMS Discussion

During 2003, the Company expanded its approach to its chemical management services (CMS) business consistent with the Company's strategic imperative to sell customer solutions - value - not just fluids. Prior to this change, the Company effectively acted as an agent whereby it purchased chemicals from other companies and resold the product to the customer at little or no margin and earned a set management fee for providing this service. Therefore, the profit earned on the management fee was relatively secure as the entire cost of the products was passed on to the customer. The approach taken in 2003 was dramatically different. The Company began entering into new contracts under which it receives a set management fee and the costs that relate to those management fees were and are largely dependent on how well the Company controls product costs and achieves product conversions from other third-party suppliers to its own products. This approach came with new risks and opportunities, as the profit earned from the management fee is subject to movements in product costs as well as the Company's own performance. The Company believes this expanded approach is a way for Quaker to become an integral part of our customers' operational efforts to improve manufacturing costs and to demonstrate value that the Company would not be able to demonstrate as purely a product provider.

Under this alternative pricing structure, the Company was awarded a series of multi-year CMS contracts primarily at General Motors Powertrain, DaimlerChrysler and Ford manufacturing sites in 2003, 2004, 2005 and 2006. This business was an important step in building the Company's share and leadership position in the automotive process fluids market and should position the Company well for penetration of CMS opportunities in other metalworking manufacturing sites. This new approach had a dramatic impact on the Company's revenue and margins. Under the traditional CMS approach, where the Company effectively acts as an agent, revenues and costs from these sales are reported on a net sales or pass-through basis. As discussed above, the alternative structure is different in that the Company's revenue received from the customer is a fee for products and services provided to the customer, which are indirectly related to the actual costs incurred. As a result, the Company recognizes in the alternative structure in reported revenues the gross revenue received from the CMS site customer, and in cost of goods sold, the third-party product purchases, which substantially offset each other until the Company achieves significant product conversions. As some contracts have been renewed or renegotiated, some of the contracts reverted to a pass through basis. Currently, the Company has a mix of contracts with both the traditional product pass through structure and fixed priced contracts covering all services and products. The Company's offerings will continue to include both approaches to CMS depending on customer requirements and business circumstances.

Table of Contents

Liquidity and Capital Resources

Quaker's cash and cash equivalents decreased to \$12.1 million at June 30, 2006 from \$16.1 million at December 31, 2005. The decrease resulted primarily from \$5.5 million of cash used in operating activities, \$5.7 million of cash used in investing activities, offset in part by \$6.8 million of cash provided by financing activities.

Net cash flows used in operating activities were \$5.5 million for the first six months of 2006 compared to \$7.9 million of cash provided by operating activities for the first six months of 2005. Increased investments in working capital and higher net pension plan contributions were the primary drivers of the increased use of cash over the prior year. Higher sales levels and raw material costs as well as the startup of new CMS contracts in the U.S. contributed to the increased use of cash from the Company's working capital accounts. The change in prepaid expenses and other current assets is reflective of a refund of \$2.0 million received in January 2005, relating to an overpaid tax position in the Company's European operations at the end of 2004. The Company also had significantly higher restructuring payments in the first six months of 2006 as a result of the actions taken in the fourth quarter of 2005.

Net cash flows used in investing activities were \$5.7 million in the first six months of 2006 compared to \$6.2 million in the same period of 2005. The change in cash flows was primarily due to higher capital expenditures in the current year for expansion and replacement activities, higher payments related to an acquisition in the prior year, offset in part by proceeds from the disposition of partnership assets in the prior year. In March 2005, the Company acquired the remaining 40% interest in its Brazilian joint venture for \$6.7 million. In accordance with the purchase agreement, the Company made the first of four contingent annual payments of \$1.0 million in the first quarter of 2006. In the first quarter of 2005, the Company received \$3.0 million of proceeds in connection with the sale of real estate assets by the Company's real estate joint venture. The Company also received \$0.7 million of cash proceeds in the first quarter of 2005 from the sale of its Villeneuve, France site.

Net cash flows provided by financing activities were \$6.8 million for the first six months of 2006 compared to \$11.9 million of cash used in financing activities in the first six months of 2005. The increase was caused primarily by net borrowings in 2006 compared to repayments in 2005 used to fund the Company's working capital needs as well as the restructuring actions taken in the fourth quarter of 2005. In addition, higher distributions paid to the minority shareholders of certain of the Company's affiliates in 2005 contributed to the change in cash flows. The prior year distributions to minority shareholders was driven in large part by a distribution made prior to the Company's acquisition of the remaining 40% interest in its Brazilian joint venture described above.

The Company had a net debt-to-total capital ratio of 39% at June 30, 2006 compared to 35% at December 31, 2005. In addition, at June 30, 2006, the Company had approximately \$76.7 million outstanding on its credit lines compared to \$63.8 million at December 31, 2005. The Company further believes it is capable of supporting its operating requirements, including pension plan contributions, payment of dividends to shareholders, possible acquisitions and business opportunities, capital expenditures and possible resolution of contingencies, through internally generated funds supplemented with debt as needed.

Operations

Comparison of Second Quarter 2006 with Second Quarter 2005

Net sales for the second quarter of 2006 were \$118.7 million, up 10.9% from \$107.0 million for the second quarter of 2005. The increase in net sales was driven by a combination of higher selling prices and volume growth. Volume growth was mainly attributable to market share growth and increased demand in both the U.S. and China. Selling price increases continue to be broadly implemented across all regions and market segments to offset significantly higher raw material costs.

Gross margin as a percentage of sales was 30.4% for the second quarter of 2006, compared to 30.6% for the second quarter of 2005. Higher selling prices and a stronger performance from the Company's CMS business helped maintain margins notwithstanding continued increases in raw material prices, as crude oil prices have spiked from the low fifty dollar per barrel range in the second quarter of 2005 to the low seventy dollar per barrel range in the second quarter of 2006. Sequentially, the second quarter 2006 gross margin as a percentage of sales represents an improvement over the first quarter 2006 gross margin percentage of 29.6%.

Selling, general and administrative expenses for the quarter increased \$0.7 million compared to the second quarter of 2005. Cost savings from restructuring efforts completed in 2005 substantially offset increased spending in higher growth areas, higher variable compensation, higher professional fees and inflationary increases.

The decrease in other income was due to larger foreign exchange gains in the second quarter of 2005. The increase in net interest expense is attributable to higher average borrowings and higher interest rates.

Table of Contents

The second quarter 2006 effective tax rate was 39.3% versus 32.5% during the second quarter of 2005. Many external and internal factors can impact this rate and the Company will continue to refine this rate, if necessary, as the year progresses. Please refer to the comparison of the First Six Months 2006 with First Six Months of 2005 section below for further disclosure.

The decrease in minority interest expense is due to lower financial performance from the Company's minority affiliates.

Net income for the second quarter was \$3.0 million compared to \$1.8 million for the second quarter of 2005. Higher sales contributing to higher gross margin was primarily responsible for the increase in net income compared to the second quarter of 2005.

Segment Reviews - Comparison of the Second Quarter 2006 with Second Quarter 2005

Metalworking Process Chemicals:

Metalworking Process Chemicals consists of industrial process fluids for various heavy industrial and manufacturing applications and represented approximately 92% of the Company's net sales for the second quarter of 2006. Net sales were up \$10.5 million, or 11%, compared to the second quarter of 2005. Foreign currency positively impacted net sales by approximately 1%, driven by the Brazilian real to U.S. dollar exchange rate. The Brazilian real to U.S. dollar exchange rate was 0.46 in the second quarter of 2006 versus 0.40 in the second quarter of 2005. Net sales was positively impacted by 13% growth in North America, 10% growth in Asia/Pacific, 7% growth in Europe, while net sales in South America were flat, all on a constant currency basis. The growth in net sales was attributable to both higher sales prices and volume growth. The majority of the volume growth came from increased demand in both North America and China, while price increases implemented across all regions helped to partially offset higher raw material costs. The \$3.3 million increase in this segment's operating income compared to the second quarter of 2005 is largely reflective of the Company's pricing actions, improved performance from the Company's U.S. CMS business, and savings generated from the Company's 2005 restructuring efforts.

Coatings:

The Company's Coatings segment, which represented approximately 7% of the Company's net sales for the second quarter of 2006, contains products that provide temporary and permanent coatings for metal and concrete products and chemical milling maskants. Net sales for this segment were up \$1.9 million, or 28%, for the second quarter of 2006 compared to the second quarter of 2005. The increase in net sales was the result of higher chemical milling maskant sales to the aerospace industry with a recent increase in aircraft build rates as well as due to sales of new temporary coatings products. This segment's operating income was up \$0.5 million consistent with the noted volume increases.

Other Chemical Products:

Other Chemical Products, which represented approximately 1% of net sales in the second quarter of 2006, consists of sulfur removal products for industrial gas streams sold by the Company's Q2 Technologies joint venture. Net sales for this segment for the second quarter of 2006 decreased \$0.8 million, or 46%, due to a variety of market conditions including reduced demand in the hydrocarbon and wastewater markets. This segment's operating income decreased \$0.1 million, as a result of the noted volume decreases and higher raw material costs.

Comparison of the First Six Months 2006 with First Six Months 2005

Net sales for the first half of 2006 were \$228.5 million, up 8.2% from \$211.2 million for the first half of 2005. The increase in net sales was attributable to higher sales prices and volume growth. Volume growth was mainly attributable to market share growth and increased demand in the U.S. and China. Selling price increases continue to be implemented across all regions and market segments to partially offset significantly higher raw material costs.

Gross margin as a percentage of sales was 30.0% for the first half of 2006, as compared to 30.1% for the first half of 2005. Higher selling prices and a stronger performance from the Company's CMS business helped maintain margin percentage despite continued increases in raw material prices, particularly crude oil derivatives.

Selling, general and administrative expenses for the first half of 2006 decreased \$0.2 million compared to the first half of 2005. Cost savings from restructuring efforts completed in 2005 substantially offset increased spending in higher growth areas, higher variable compensation, higher professional fees and inflationary increases. The Company recorded a pension gain in the first quarter of 2006 of \$0.9 million relating to legislative changes to one of its European pension plans. During the first quarter of 2005, the Company took a net pre-tax charge of \$1.2 million related to a reduction in its workforce.

Edgar Filing: QUAKER CHEMICAL CORP - Form 10-Q

The decrease in other income is largely due to \$4.2 million of pre-tax gain relating to the Company's real estate joint venture recorded in 2005. The remainder of the decrease was the result of foreign exchange losses in the first half of 2006 compared to gains in the first half of 2005. The increase in net interest expense is attributable to higher average borrowings and higher interest rates.

Table of Contents

The effective tax rate for the first six months of 2006 was 38.0% versus 32.5% during the first six months of 2005. Many external and internal factors can impact this rate and the Company will continue to refine this rate, if necessary, as the year progresses. The most significant factor impacting the effective tax rate was a shifting mix of income among taxing jurisdictions. At the end of 2005, the Company had net U.S. deferred tax assets totaling \$15.3 million, excluding deferred tax assets relating to additional minimum pension liabilities. The Company records valuation allowances when necessary to reduce its deferred tax assets to the amount that is more likely than not to be realized. The Company considers future taxable income and ongoing prudent and feasible tax planning strategies in assessing the need for a valuation allowance. However, in the event the Company were to determine that it would not be able to realize all or part of its net deferred tax assets in the future, an adjustment to the deferred tax asset would be a non-cash charge to income in the period such determination was made, which could have a material adverse impact on the Company's financial statements. The Company continues to closely monitor this situation as it relates to its net deferred tax assets and the assessment of valuation allowances. The Company is continuing to evaluate alternatives that could positively impact U.S. taxable income.

The decrease in minority interest expense for the year is due to the acquisition of the remaining 40% interest in the Company's Brazilian affiliate in March of 2005 and lower financial performance from the Company's minority affiliates.

Net income for the first half of 2006 was \$5.5 million as compared to \$4.9 million for the first half of 2005, which included a \$4.2 million of pre-tax gain received from the Company's real estate joint venture, partially offset by a net \$1.2 million pre-tax restructuring charge.

Segment Reviews - Comparison of the First Six Months 2006 with First Six Months 2005**Metalworking Process Chemicals:**

Metalworking Process Chemicals consists of industrial process fluids for various heavy industrial and manufacturing applications and represented approximately 92% of the Company's net sales for the first half of 2006. Net sales were up \$15.2 million, or 8%, compared to the first half of 2005. Foreign currency did not significantly impact the year to date sales comparison as increases from the Brazilian real to U.S. dollar exchange rate were offset by decreases from the Euro to U.S. dollar exchange rate. The Brazilian real to U.S. dollar exchange rate was 0.46 in the first half of 2006 versus 0.39 in the first half of 2005, while the Euro to U.S. dollar exchange rate was 1.23 in the first half of 2006 versus 1.29 in the first half of 2005. Net sales were positively impacted by 8% growth in North America, 15% growth in Asia/Pacific, 6% growth in Europe and 2% growth in South America, all on a constant currency basis. The growth in net sales was attributable to both higher sales prices and volume growth. The majority of the volume growth came from increased demand in both North America and China, while price increases implemented across all regions helped to partially offset higher raw material costs. The \$5.7 million increase in this segment's operating income compared to the first half of 2005 is largely reflective of the Company's pricing actions, improved performance from the Company's U.S. CMS business, and savings generated from the Company's 2005 restructuring efforts.

Coatings:

The Company's Coatings segment, which represented approximately 7% of the Company's net sales for the first half of 2006, contains products that provide temporary and permanent coatings for metal and concrete products and chemical milling maskants. Net sales for this segment were up \$3.4 million, or 27%, for the first half of 2006 compared to the first half of 2005. The increase in net sales was the result of higher chemical milling maskant sales to the aerospace industry with a recent increase in aircraft build rates as well as due to sales of new temporary coatings products. This segment's operating income was up \$1.0 million consistent with the noted volume increases.

Other Chemical Products:

Other Chemical Products, which represented approximately 1% of net sales in the first half of 2006, consists of sulfur removal products for industrial gas streams sold by the Company's Q2 Technologies joint venture. Net sales for this segment for the first half of 2006 decreased \$1.4 million, or 50%, due to a variety of market conditions including reduced demand in the hydrocarbon and wastewater markets. This segment's operating income decreased \$0.4 million, as a result of the noted volume decreases and higher raw material costs.

Factors that May Affect Our Future Results

(Cautionary Statements Under the Private Securities Litigation Reform Act of 1995)

Table of Contents

Certain information included in this Report and other materials filed or to be filed by Quaker with the SEC (as well as information included in oral statements or other written statements made or to be made by us) contains or may contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These statements can be identified by the fact that they do not relate strictly to historical or current facts. We have based these forward-looking statements on our current expectations about future events. These forward-looking statements include statements with respect to our beliefs, plans, objectives, goals, expectations, anticipations, intentions, financial condition, results of operations, future performance and business, including:

statements relating to our business strategy;

our current and future results and plans; and

statements that include the words may, could, should, would, believe, expect, anticipate, estimate, intend, or similar expressions.

Such statements include information relating to current and future business activities, operational matters, capital spending, and financing sources. From time to time, forward-looking statements are also included in Quaker's periodic reports on Forms 10-K and 8-K, press releases and other materials released to the public.

Any or all of the forward-looking statements in this Report and in any other public statements we make may turn out to be wrong. This can occur as a result of inaccurate assumptions or as a consequence of known or unknown risks and uncertainties. Many factors discussed in this Report will be important in determining our future performance. Consequently, actual results may differ materially from those that might be anticipated from our forward-looking statements.

We undertake no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise. However, any further disclosures made on related subjects in Quaker's subsequent reports on Forms 10-K, 10-Q and 8-K should be consulted. Our forward-looking statements are subject to risks, uncertainties and assumptions about us and our operations that are subject to change based on various important factors, some of which are beyond our control. A major risk is that the Company's demand is largely derived from the demand for its customers' products, which subjects the Company to uncertainties related to downturns in a customer's business and unanticipated customer production planning shutdowns. Other major risks and uncertainties include, but are not limited to, significant increases in raw material costs, worldwide economic and political conditions, foreign currency fluctuations, and terrorist attacks such as those that occurred on September 11, 2001. Furthermore, the Company is subject to the same business cycles as those experienced by steel, automobile, aircraft, appliance, and durable goods manufacturers. These risks, uncertainties, and possible inaccurate assumptions relevant to our business could cause our actual results to differ materially from expected and historical results. Other factors beyond those discussed could also adversely affect us. Therefore, we caution you not to place undue reliance on our forward-looking statements. This discussion is provided as permitted by the Private Securities Litigation Reform Act of 1995.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

Quaker is exposed to the impact of changes of interest rates, foreign currency fluctuations, changes in commodity prices, and credit risk.

Interest Rate Risk. Quaker's exposure to market rate risk for changes in interest rates relates primarily to its short and long-term debt. Most of Quaker's debt is negotiated at market rates which can be either fixed or variable. Accordingly, if interest rates rise significantly, the cost of debt to Quaker will increase. This can have an adverse effect on Quaker, depending on the extent of Quaker's borrowings. As of June 30, 2006, Quaker had \$76.7 million in borrowings under its credit facilities compared to \$63.8 million at December 31, 2005. The Company uses derivative financial instruments primarily for purposes of hedging exposures to fluctuations in interest rates. The Company does not enter into derivative contracts for trading or speculative purposes. In the fourth quarter of 2005, the Company entered into three interest rate swaps, and, in the first quarter of 2006, entered into one interest rate swap in order to fix a portion of its variable rate debt. The swaps had a combined notional value of \$20.0 million and \$15.0 million and a fair value of \$0.5 million and \$(0.1) million at June 30, 2006 and December 31, 2005, respectively. The counterparties to the swaps are major financial institutions.

Foreign Exchange Risk. A significant portion of Quaker's revenues and earnings is generated by its foreign operations. These foreign operations also hold a significant portion of Quaker's assets and liabilities. All such operations use the local currency as their functional currency. Accordingly, Quaker's financial results are affected by risks typical of global business such as currency fluctuations, particularly between the

Edgar Filing: QUAKER CHEMICAL CORP - Form 10-Q

U.S. dollar, the Brazilian real, and the E.U. euro. As exchange rates vary, Quaker's results can be materially affected.

The Company generally does not use financial instruments that expose it to significant risk involving foreign currency transactions; however, the size of non-U.S. activities has a significant impact on reported operating results and the attendant net assets. During the past three years, sales by non-U.S. subsidiaries accounted for approximately 53% to 55% of the consolidated net annual sales.

Table of Contents

In addition, the Company often sources inventory among its worldwide operations. This practice can give rise to foreign exchange risk resulting from the varying cost of inventory to the receiving location, as well as from the revaluation of intercompany balances. The Company mitigates this risk through local sourcing efforts.

Commodity Price Risk. Many of the raw materials used by Quaker are commodity chemicals, and, therefore, Quaker's earnings can be materially adversely affected by market changes in raw material prices. In certain cases, Quaker has entered into fixed-price purchase contracts having a term of up to one year. These contracts provide for protection to Quaker if the price for the contracted raw materials rises, however, in certain limited circumstances, Quaker will not realize the benefit if such prices decline.

Credit Risk. Quaker establishes allowances for doubtful accounts for estimated losses resulting from the inability of its customers to make required payments. If the financial condition of Quaker's customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required. Downturns in the overall economic climate may also tend to exacerbate specific customer financial issues. A significant portion of Quaker's revenues is derived from sales to customers in the U.S. steel and automotive industries, where a number of bankruptcies occurred during recent years. Through 2003, Quaker recorded additional provisions for doubtful accounts primarily related to bankruptcies in the U.S. steel industry. In addition, in the third quarter of 2005, the Company recorded additional provisions for doubtful accounts in connection with a customer bankruptcy. When a bankruptcy occurs, Quaker must judge the amount of proceeds, if any, that may ultimately be received through the bankruptcy or liquidation process. In addition, as part of its terms of trade, Quaker may custom manufacture products for certain large customers and/or may ship product on a consignment basis. These practices may increase the Company's exposure should a bankruptcy occur, and may require writedown or disposal of certain inventory due to its estimated obsolescence or limited marketability. Customer returns of products or disputes may also result in similar issues related to the realizability of recorded accounts receivable or returned inventory.

Item 4. Controls and Procedures.

Evaluation of disclosure controls and procedures. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by an issuer in the reports that it files or submits under the Securities Exchange Act of 1934 (the Exchange Act) is accumulated and communicated to the issuer's management, including its principal executive officer and principal financial officer, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure. Based on their evaluation of such controls and procedures as of the end of the period covered by this Quarterly Report on Form 10-Q, the Company's principal executive officer and principal financial officer have concluded that the Company's disclosure controls and procedures (as defined in Exchange Act Rule 13a-15(e)), are effective to reasonably assure that information required to be disclosed by the Company in the reports it files under the Exchange Act, is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission.

Changes in internal controls. As previously disclosed, the Company is in the process of implementing a global ERP system. At the end of 2005, subsidiaries representing more than 60% of consolidated revenue were operational on the global ERP system. Additional subsidiaries and CMS sites have been implemented and are planned to be implemented during 2006. The Company is taking the necessary steps to monitor and maintain its internal control over financial reporting (as defined in Exchange Act Rule 13a-15(f)) during this period of change.

Table of Contents

PART II. OTHER INFORMATION

Items 1, 1a., 2 ,3, and 5 of Part II are inapplicable and have been omitted.

Item 4: Submission of Matters to a Vote of Security Holders

The Annual Meeting of the Company's shareholders was held on May 10, 2006. At the meeting, management's nominees, Donald R. Caldwell, William R. Cook and Jeffrey D. Frisby were elected Class II directors. Voting (expressed in number of votes) was as follows: Donald R. Caldwell, 22,096,103 votes for, 675,074 votes withheld; William R. Cook, 22,522,641 votes for, 248,536 votes withheld; Jeffrey D. Frisby, 22,487,062 votes for, 284,115 votes withheld.

In addition, at the meeting, the shareholders approved the amended and restated 2001 Global Annual Incentive Plan by a vote of 17,102,778 for, 5,483,439 against, and 184,960 abstentions, as well as approved the 2006 Long-Term Incentive Performance Plan by a vote of 11,186,232 for, 9,532,542 against, 166,863 abstentions, and 1,885,540 broker non-votes.

In addition, at the meeting, the shareholders ratified the appointment of PricewaterhouseCoopers, LLP as the Company's independent registered public accounting firm to examine and report on its financial statements for the year ending December 31, 2006 by a vote of 22,496,783 for, 172,363 against, and 102,031 abstentions.

Item 6: Exhibits

(a) Exhibits

- 31.1 - Certification of Chief Executive Officer of the Company pursuant to Rule 13a-14(a) of the Securities Exchange Act of 1934
 - 31.2 - Certification of Chief Financial Officer of the Company pursuant to Rule 13a-14(a) of the Securities Exchange Act of 1934
 - 32.1 - Certification of Ronald J. Naples Pursuant to 18 U.S. C. Section 1350
 - 32.2 - Certification of Neal E. Murphy Pursuant to 18 U.S. C. Section 1350
- *****

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
