SIX MONTHS ENDED 30 JUNE 2006 COMPARED WITH SIX MONTHS ENDED 30 JUNE 2005

Total Revenues

For the six months ended 30 June 2006, gross written premiums and policy fees was RMB54,580 million (RMB42,607 million for the corresponding period in 2005), representing an increase of 28.1% over the corresponding period in 2005. The increase was mainly attributable to the growth in individual life insurance business and group life insurance business respectively.

For the six months ended 30 June 2006, our net investment income was RMB11,341 million (RMB7,794 million for the corresponding period in 2005), representing an increase of 45.5% over the corresponding period in 2005. Such increase was mainly attributable to the growth in total investment assets. The relatively favorable market environment during the first half of the year and adjustments made to optimize the investment portfolio improved the investment return of the investment assets.

For the six months ended 30 June 2006, net realised gain on financial assets was RMB497 million (six months ended 30 June 2005: net realised loss on financial assets RMB383 million). Net fair value gain on assets at fair value through income (held-for-trading) was RMB5,758 million (six months ended 30 June 2005: net fair value loss at fair value through income (held-for-trading) was RMB888 million). Such result was mainly attributable to the generally favorable performance of the capital market in the PRC during the first half of 2006.

Benefits, claims and expenses

For the six months ended 30 June 2006, the Company's total benefits, claims and expenses were RMB61,355 million (six months ended 30 June 2005: RMB42,783 million), which were increased by 43.4% as compared with the same period in 2005. The increase was mainly attributable to the expansion of scale in our businesses.

For the six months ended 30 June 2006, our consolidated cost ratio was 15.0%, which was further reduced from the same period in 2005.

Income tax

For the six months ended 30 June 2006, the Company's income tax expenses were RMB2,299 million (six months ended 30 June 2005: RMB1,391 million). The effective tax rate reduced from 21.0% in the first half of 2005 to 20.3% in the first half of 2006. The reason for the decrease was the increase in interest income from government bonds that were tax exempted.

Net profit

For the six months ended 30 June 2006, the Company's net profit attributable to shareholders of the Company was RMB8,966 million (six months ended 30 June 2005: RMB5,208 million), which was increased by 72.2% as compared with the corresponding period in 2005. The increase

in net profit attributable to shareholders of the Company was mainly attributable to the business growth and structure optimization, substantial increase in investment return, and enhanced cost control measures.

Liquidity and Capital Resources

Sources of Liquidity

The Company's principal cash inflows come from insurance premiums, deposits, proceeds from sales and maturity of financial assets, and net investment income. The primary concerns over liquidity with respect to these cash inflows are the risk of early withdrawals by contract holders and policyholders, as well as the risks of default by debtors, volatilities in interest rate and capital market. The Company will closely monitor and manage these risks.

Additional sources of liquidity to meet unexpected cash outflows are available from cash and our investment assets. As at 30 June 2006, the amount of cash and cash equivalents was RMB42,974 million (RMB28,051 million on 31 December 2005). As at 30 June 2006, the amount of term deposits was RMB170,741 million (RMB164,869 million on 31 December 2005).

Our investment portfolio may also provide us with a source of liquidity to meet unexpected cash outflows. As of 30 June 2006, available-for-sale securities within the investments in debt securities had a fair value of RMB145,558 million (RMB96,425 million on 31 December 2005). As of 30 June 2006, investment in equity securities had a fair value of RMB52,699 million (RMB39,548 million on 31 December 2005).

Uses of Liquidity

The Company's principal cash outflows primarily relate to the benefits and claims associated with our various life insurance, annuity and accident and health insurance products, dividend and interest payments on our insurance policies and annuity contracts, operating expenses, income taxes and dividends that may be declared and payable to the Company's shareholders.

The Company believes that its sources of liquidity are sufficient to meet its current cash requirements.

Informal inquiry conducted by the U.S. Securities and Exchange Commission (SEC)

On 7 June 2006 (Hong Kong time), the Company was informed by SEC that the informal inquiry conducted by the SEC on the Company has been terminated and no enforcement action has been taken.
