Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

There were 46,297,324 shares of common stock, \$0.01 par value per share, outstanding on October 5, 2006.

Table of Contents

For purposes of this Quarterly Report, references to the Company, we, us, our and Chaparral mean Chaparral Steel Company collectively with all of our subsidiaries.

FORWARD-LOOKING STATEMENTS

This Quarterly Report contains forward-looking statements. All statements other than statements of historical fact are forward-looking statements. Forward-looking statements may include the words may, will, estimate, intend, continue, believe, expect, plan, or any other similar words. Such forward-looking statements may be contained in Management's Discussion and Analysis of Financial Condition and Results of Operations, among other places. Forward-looking statements include statements concerning:

future results of operations;

future cash flows and liquidity;

future capital expenditures;

competitive pressures and general economic and financial conditions;

levels of construction activity;

levels of import activity;

inclement weather;

the occurrence of unanticipated equipment failures and plant outages;

cost and availability of raw materials, fuel and energy;

environmental conditions and regulations; and

any assumptions underlying any of the foregoing.

Although we believe the expectations reflected in our forward-looking statements are reasonable, actual results could differ materially from those projected or assumed in our forward-looking statements. Our future financial condition and results of operations, as well as any forward-looking statements, are subject to change and are subject to inherent risks and uncertainties, such as those disclosed in this Quarterly Report. Each forward-looking statement speaks only as of the date of the particular statement.

ITEM 1. FINANCIAL STATEMENTS

Table of Contents

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Stockholders

Chaparral Steel Company

We have reviewed the accompanying consolidated balance sheet of Chaparral Steel Company and subsidiaries as of August 31, 2006, and the related consolidated statements of operations and cash flows for the three-month periods ended August 31, 2006 and 2005 and the related consolidated statement of stockholders' equity for the three-month period ended August 31, 2006. These financial statements are the responsibility of the Company's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the consolidated interim financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of Chaparral Steel Company and subsidiaries as of May 31, 2006, and the related consolidated statements of operations, stockholders' equity, and cash flows for the year then ended (not presented herein), and in our report dated July 19, 2006, we expressed an unqualified opinion on those consolidated financial statements. On September 1, 2006, the Company distributed a 100% common stock dividend resulting in a revision of the May 31, 2006 consolidated balance sheet. We have not audited the revised consolidated balance sheet reflecting its revision for the stock dividend.

CHAPARRAL STEEL COMPANY AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. Description of Business and Basis of Presentation

Chaparral Steel Company and its subsidiaries (the "Company") is a leading supplier of structural steel and steel bar products through a single business segment. The Company produces and sells structural steel, piling products, special bar quality products, merchant bar quality rounds, reinforcing bar and channels from facilities located in Texas and Virginia. Structural steel products include wide flange beams, piling products, channels and other shapes. Steel bar products include specialty bar products and, to a lesser extent, reinforcing bar. The Company sells to steel service centers and steel fabricators for use in the construction industry, as well as to cold finishers, forgers and original equipment manufacturers for use in the railroad, defense, automotive, manufactured housing and energy industries. The Company's products are marketed throughout the United States, Canada and Mexico, and to a limited extent in Europe. All of the Company's long-lived assets are located in the United States.

On July 29, 2005, Texas Industries, Inc. and its subsidiaries ("TXI") completed the spin-off of its steel business to TXI stockholders in the form of a pro-rata, tax-free dividend of one share of the Company's common stock for each share of TXI stock owned on July 20, 2005. Although pursuant to the Company's separation and distribution agreement with TXI and certain ancillary agreements, TXI has agreed to indemnify the Company against certain liabilities and the Company has agreed to indemnify TXI against certain liabilities. TXI has no further ownership interest in the Company, and the Company has no ownership interest in TXI. In addition, the Company is not a guarantor of any of TXI's indebtedness nor is TXI a guarantor of any of the Company's indebtedness. The Company's relationship with TXI is now governed by the separation and distribution agreement and the ancillary agreements described in that agreement. The terms of the agreements are more fully described in Note 9 "Legal Proceedings and Contingent Liabilities". At various times, items of intercompany indebtedness were settled between and among the Company and the Company's subsidiaries and TXI and its subsidiaries. These intercompany accounts were settled through offsets, contributions of such indebtedness to the Company's capital and other non-cash transfers. During the three months ended August 31, 2006, an adjustment of \$1.1 million was recorded increasing the previous contributions to the Company's capital by TXI.

For all periods prior to the spin-off, the Company's costs include the allocation of certain corporate expenses from TXI. TXI's corporate expenses have been allocated to the Company based on either the percentage of time employees incurred performing services for the Company or specifically identified costs incurred by TXI for the Company. Management believes that the allocations were made on a reasonable basis. However, the consolidated financial statements may not necessarily reflect the financial position, results of operations and cash flows of the Company in the future, nor is it practical for management to estimate what the financial position, results of operations or cash flows would have been if the Company had been an independent, public company for the historical periods presented.

On July 12, 2006, the Company's board of directors approved a stock split effected in the form of a 100% common stock dividend which was distributed on September 1, 2006 to stockholders of record on August 15, 2006. The historical share and per share amounts have been retroactively adjusted to reflect the stock dividend for all periods presented.

The accompanying unaudited consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of only normal recurring adjustments) considered necessary for a fair statement of the results for the interim periods presented have been included. Operating results for the three-month period ended August 31, 2006, are not necessarily indicative of the results that may be expected for the year ending May 31, 2007. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's Annual Report on Form 10-K for the year ended May 31, 2006.

Table of Contents

2. Summary of Significant Accounting Policies

Principles of Consolidation. The consolidated financial statements include the accounts of Chaparral Steel Company and all subsidiaries. Stock-based compensation on the statement of cash flows for the three months ended August 31, 2005 has been reclassified to conform to the current period presentation.

Estimates. The preparation of financial statements and accompanying notes in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported. Actual results could differ from those estimates.

Fair Value of Financial Instruments. The estimated fair value of each class of financial instruments as of August 31, 2006 approximates its carrying value except for the Senior Notes having a fixed interest rate at August 31, 2006. The fair value of the Senior Notes at August 31, 2006, estimated based on quoted market prices, was \$333.0 million compared to the carrying amount of \$300.0 million.

Cash Equivalents. Investments with maturities of less than 90 days when purchased are classified as cash equivalents and consist primarily of money market funds and investment grade commercial paper issued by major corporations and financial institutions.

Short-term investments. Short-term investments consist of Auction Rate Securities (ARS). At August 31, 2006, these ARS have remaining stated maturities which range from 10 to 32 years, but have their interest rates reset at predetermined intervals, typically less than 30 days, through an auction process. The Company invests in high credit quality instruments of political subdivisions of states with an active resale market to ensure liquidity and the ability to readily convert these investments into cash to fund current operations or satisfy other cash requirements as needed. Accordingly, the Company classified all these securities as available-for-sale and as current assets in the accompanying balance sheet as of August 31, 2006. The ARS are stated at cost which approximates fair value based on market quotes. Net unrealized gains and losses, net of deferred taxes, have not been significant. The Company limits the amount of credit exposure to any one issuer. The Company expects that the majority of its short-term investments will be sold within one year, regardless of legal maturity date. Purchases and sales activity of ARS are presented as cash flows from investing activities in the consolidated statements of cash flows.

Receivables. Management evaluates the ability to collect accounts receivable based on a combination of factors. A reserve for doubtful accounts is maintained based on historical default rates and current economic trends. The reserve is increased if it is anticipated that a specific customer will be unable to make required payments. Concentrations of credit risk with respect to accounts receivable are limited due to the large number of customers in the Company's customer base and their dispersion across geographical areas.

Environmental Liabilities. The Company is subject to environmental laws and regulations established by federal, state and local authorities and makes provision for the estimated costs related to compliance when it is probable that a reasonably estimable liability has been incurred.

Legal Contingencies. The Company and its subsidiaries are defendants in lawsuits which arose in the normal course of business, and make provision for the estimated loss from any claim or legal proceeding when it is probable that a reasonably estimable liability has been incurred.

Long-lived Assets. Management reviews long-lived assets for impairment whenever changes in circumstances indicate that the carrying amount of the assets may not be recoverable and would record an impairment charge if necessary. Such evaluations compare the carrying amount of an asset to future undiscounted net cash flows expected to be generated by the asset and are significantly impacted by estimates of future prices for the Company's products, capital needs, economic trends and other factors. All of the Company's long-lived assets are located in the United States.

Property, plant and equipment is recorded at cost. Provisions for depreciation are computed generally using the straight-line method. The Company assigns each fixed asset a useful life generally ranging from 5 to 7 years for mobile and other equipment, 10 to 20 years for machinery and equipment and 20 to 40 years for buildings and land improvements. Maintenance and repairs are charged to expense as incurred. Costs incurred for scheduled shut-downs to refurbish the facilities are amortized over the benefited period, typically 12 months. Such deferred amounts are included in prepaid expenses on the consolidated balance sheets and amounted to \$1.6 million at August 31, 2006 and \$3.4 million at May 31, 2006.

Table of Contents

Goodwill. Management tests goodwill for impairment at least annually. If the carrying amount of the goodwill exceeds its fair value, an impairment loss is recognized. In applying a fair-value-based test, estimates are made of the expected future cash flows to be derived from the applicable reporting unit. Similar to the review for impairment of other long-lived assets, the resulting fair value determination is significantly impacted by estimates of future prices for the Company's products, capital needs, economic trends and other factors. At May 31, 2006, the fair value of the Company's goodwill on the balance sheet exceeded its carrying value of \$85.2 million.

Investments and Deferred Charges. Investments are composed primarily of life insurance contracts that may be used to fund certain Company benefit agreements. The contracts, recorded at their net cash surrender value, totaled \$8.8 million at August 31, 2006 and \$8.3 million at May 31, 2006. Deferred charges are composed primarily of debt issuance costs that totaled \$8.1 million at August 31, 2006 and \$8.5 million at May 31, 2006. The costs are associated with various debt issues and amortized over the term of the related debt.

Other Credits. Other credits of \$11.4 million at August 31, 2006 and \$13.8 million at May 31, 2006 are composed primarily of liabilities related to the Company's retirement plans, asset retirement obligations and deferred compensation agreements.

Asset Retirement Obligations. Changes in asset retirement obligations for the three-month periods ended August 31, 2006 and August 31, 2005 are as follows (in thousands):

	Three months ended August 31,	
	2006	2005
Balance at beginning of period	\$ 1,040	\$ 566
Accretion expense	30	17
Settlements	(25)	(29)
Balance at end of period	\$ 1,045	\$ 554

Net Sales. The Company sells products to a highly diversified customer base representing various steel consuming markets. A significant portion of the Company's sales are to steel service centers, fabricators and processors. These customers typically act as intermediaries between steel producers and various end-user manufacturers that require further processing or inventory programs. The Company recognizes revenue when the goods are shipped and title and risk of loss transfer to the customer (FOB shipping point). The Company includes delivery fees in the amount it bills customers to the extent needed to recover the Company's cost of freight and delivery. Net sales from other products were generated from the Company's metals separation operation.

The following table summarizes the Company's net sales by product line (in thousands):

	Three months ended August 31,	
	2006	2005
Net sales		
Structural mills	\$ 313,589	\$ 250,039
Bar mill	58,036	60,763
Other products	16,036	8,614
Delivery fees	22,988	18,989
	\$ 410,649	\$ 338,405

Other Income. Other income includes interest income of \$2.5 million and \$37,000 in the three-month periods ended August 31, 2006 and 2005, respectively.

Table of Contents

Income Taxes. The Company uses the liability method of recognizing and classifying deferred income taxes. The Company and its subsidiaries will be included in the consolidated income tax returns of TXI for periods prior to the spin-off and will file stand alone returns for subsequent periods. However, the provision for income taxes for the periods presented has been determined as if the Company had filed separate tax returns. The Company provides valuation allowances to reduce deferred tax assets to amounts that will more likely than not be realized.

Earnings Per Share (EPS). Basic EPS is computed by dividing net income by the weighted-average number of common shares outstanding during the period. During the three months ended August 31, 2006, the Company issued 112,180 shares of common stock as a result of the exercise of stock options and 2,530 shares of common stock as a result of an employee stock award. Diluted EPS adjusts net income and the outstanding shares for the dilutive effect of stock options and other equity-based awards.

In thousands except per share data	Three months ended	
	August 31, 2006	2005
Earnings:		
Net income	\$ 59,087	\$ 17,751
Shares:		
Weighted-average shares outstanding	46,190	45,608
Basic weighted-average shares	46,190	45,608
Dilutive stock options and other equity-based awards	1,985	479
Diluted weighted-average shares	48,175	46,087
Net income:		
Basic earnings per share	\$ 1.28	\$ 0.39
Diluted earnings per share	\$ 1.23	\$ 0.39

Stock-based Compensation. The Company's employees and non-employee directors participate in stock compensation plans. The plans provide for the granting of incentive and non-qualified stock options, restricted stock and other equity-based incentive awards for officers, key employees and non-employee directors.

Prior to June 1, 2006, the Company accounted for employee and non-employee director stock options using the intrinsic value method of accounting prescribed by APB Opinion (APB) No. 25, Accounting for Stock Issued to Employees, as allowed by Statement of Financial Accounting Standard (SFAS) No. 123, Accounting for Stock-Based Compensation. Generally, no expense was recognized related to the Company's stock options because each option's exercise price was set at the stock's fair market value on the date the option was granted.

Effective June 1, 2006, the Company adopted the fair value recognition provisions of SFAS No. 123(R), Share-Based Payments, using the modified prospective application method. Under this modified prospective method, compensation cost recognized for the three months ended August 31, 2006 includes the applicable amounts of compensation cost of stock-based payments granted prior to, but not yet vested as of June 1, 2006 based on the grant-date fair value estimated in accordance with the original provisions of SFAS No. 123 and previously presented in pro forma footnote disclosures. The Company uses the Black-Scholes-Merton valuation method to determine the fair value of stock options as of the grant date. For restricted stock awards, the Company uses the stock price as of the grant date to determine the fair value. The impact of recognizing compensation expense related to stock options using the fair value recognition provisions of SFAS 123(R) for the three-month period ended August 31, 2006 was \$0.5 million (net of tax benefit of \$0.1 million) or \$0.01 per common share. Results for periods prior to June 1, 2006, have not been restated.

Table of Contents

Total stock-based compensation expense, related to the Company's stock options and non-employee director stock awards, recognized for the three-month period ended August 31, 2006 using the straight-line method over the requisite service period of the award was as follows (in thousands):

Cost of products sold	\$ 168
Selling, general and administrative	663
	\$ 831

As of August 31, 2006, the total estimated future compensation cost related to previous grants of stock options to be recognized in the statement of operations was \$6.4 million over a weighted-average period of 22 months while \$0.3 million remained to be recognized related to previous grants of restricted stock awards over a weighted-average period of 9 months. In addition, the Company currently expects to recognize future compensation expense of \$3.3 million related to the share portion of the new performance awards to be granted to the executive officers under the 2006 Plan (see Note 11),

Prior to adopting SFAS 123(R), the Company presented the tax benefits of deductions resulting from the exercise of stock options as operating cash flows. SFAS 123(R) requires the cash flows resulting from excess tax benefits related to stock options be classified as a part of cash flows from financing activities. As a result of adopting SFAS 123(R) effective June 1, 2006, \$4.2 million of excess tax benefits have been recorded in the current period as financing cash flows.

For purposes of pro forma disclosures under SFAS 123 for the three-month period ended August 31, 2005, the estimated fair value of the stock options was assumed to be amortized to expense over the stock options' vesting periods. The pro forma effects of recognizing estimated compensation expense under the fair value method on net income and earnings per common share for the three-month period ended August 31, 2005 were as follows (in thousands, except per share data):

Net income	
As reported	\$ 17,751
Stock-based compensation included in the determination of net income as reported, net of tax	28
Fair value of stock-based compensation, net of tax	(264)

Recent Accounting Pronouncements. The Financial Accounting Standards Board (FASB) issued FASB Interpretation No. (FIN) 48, Accounting for Uncertainty in Income Taxes, in July 2006. The new rules will be effective for the Company in the fiscal year beginning June 1, 2007. The Company is evaluating this interpretation, but does not presently anticipate its adoption will have a material impact on the Company's financial statements.

3. Working Capital

Working capital totaled \$497.4 million at August 31, 2006 and \$428.2 million at May 31, 2006.

Table of Contents

Short-term investments were \$238.3 million at August 31, 2006 and \$164.0 million at May 31, 2006 and consisted of Auction Rate Securities all of which had stated maturities of over 10 years but have their interest rates reset at predetermined intervals, typically less than 30 days, through an auction process.

Accounts receivable are presented net of allowances for doubtful receivables of \$1.7 million at August 31, 2006 and \$1.8 million at May 31, 2006 and net of allowances for returns and allowances of \$0.6 million at August 31, 2006 and \$0.4 million at May 31, 2006. Provisions (recoveries) for bad debts charged to expense were \$(0.1) million and \$(0.2) million in the three-month periods ended August 31, 2006 and 2005, respectively. No uncollectible amounts were written off in the three-month periods ended August 31, 2006 and 2005, respectively. Provisions for returns and allowances charged to sales were \$0.2 million and none in the three-month periods ended August 31, 2006 and 2005, respectively.

Inventories consist of (in thousands):

	August 31, 2006	May 31, 2006
Finished products	\$ 57,510	\$ 52,373
Work in process	18,266	15,348
Raw materials	28,841	16,952
Supplies	79,724	75,130
	\$ 184,341	\$ 159,803

Inventories, excluding supplies, are stated at cost (not in excess of market) using the last-in, first-out (LIFO) method that results in better matching of costs and revenues than other methods. An actual valuation of inventory under the LIFO method can be made only at the end of each year based on the inventory levels and costs at that time. Accordingly, interim LIFO calculations are based on management's estimates of expected year-end inventory levels and costs and are subject to the final year-end LIFO inventory valuation. If the average cost method (which approximates current replacement cost) had been used, inventory values would have been higher by \$52.5 million at August 31, 2006 and \$51.5 million higher at May 31, 2006. Supplies primarily consist of rolls and molds, which are used in the manufacturing processes, and are carried at average cost.

Effective June 1, 2006, the Company adopted SFAS No. 151, Inventory Costs, an amendment of ARB No. 43, Chapter 4. This standard clarifies that abnormal amounts of idle facility expense, freight, handling costs and wasted material should be expensed as incurred and not included in inventory. In addition, this standard requires that the allocation of fixed production overhead costs to inventory be based on the normal capacity of the production facilities. The adoption of this standard did not have a significant effect on our consolidated financial position or results of operations.

Accrued wages, taxes and other liabilities consist of (in thousands):

	August 31, 2006	May 31, 2006
Employee wages and benefits	\$ 20,619	\$ 26,354
Property taxes	4,089	3,135
Current income taxes payable	32,219	6,695
Interest payable	3,935	11,431
Other liabilities	8,451	7,777
	\$ 69,313	\$ 55,392

4. Commitments

Edgar Filing: Chaparral Steel CO - Form 10-Q

The Company entered into an agreement to purchase a minimum monthly amount of processed gases at a base price adjusted quarterly based upon a percentage change in the producer price index. The gases are produced

Table of Contents

from a facility located at the Company's Texas facility which is owned and operated by an independent third party. This agreement expires in August 2012. At August 31, 2006, the minimum monthly charge was approximately \$0.5 million. The Company entered into a similar agreement to purchase processed gases for its Virginia facility with the same third party, which expires in December 2014. The agreement specifies that the Company will purchase a minimum monthly amount of processed gases at a base price adjusted quarterly based upon a similar formula. At August 31, 2006, the minimum monthly charge was approximately \$0.1 million. The Company believes that its minimum purchase requirements will be satisfied by its consumption of the products in the normal course of its business.

The Company entered into an agreement to purchase a minimum monthly amount of mill services at its Texas facility. This agreement expires in December 2014. At August 31, 2006, the minimum monthly charge was approximately \$23,000. The Company entered into a similar agreement to purchase a minimum monthly amount of mill services for its Virginia facility. This agreement expires in June 2012. At August 31, 2006, the minimum monthly charge was approximately \$0.4 million. The Company believes that its minimum purchase requirements will be satisfied by its consumption of the products in the normal course of its business.

The Company has entered into agreements to purchase minimum amounts of electricity and natural gas for its Texas and Virginia facilities. Total commitments under these agreements were \$19.5 million in the three-month period ended August 31, 2006. As of August 31, 2006, the Company's commitments under these agreements extend through October 2006 for electricity and natural gas in Texas and through March 2007 for natural gas in Virginia. The Company believes its purchase requirements will be satisfied by its consumption of these energy sources in the normal course of its business.

The Company leases certain mobile and other equipment, real estate and other items, which in the normal course of business are renewed or replaced by subsequent leases. Total expense for such operating leases was \$0.6 million and \$0.4 million in the three-month periods ended August 31, 2006 and 2005, respectively.

Future estimated payments under these agreements as of August 31, 2006 are as follows for the years ending August 31 as noted (in thousands):

	Total	2007	2008	2009	2010	2011	After 2011
Processed gas supply contract	\$ 40,246	\$ 6,370	\$ 6,371	\$ 6,370	\$ 6,371	\$ 6,370	\$ 8,394
In-plant mill services	23,168	4,668	4,668	4,669	4,668	3,571	924
Short-term energy purchase obligations	20,390	20,390					
Operating lease obligations	3,949	761	509	496	497	426	1,260
Total	\$ 87,753	\$ 32,189	\$ 11,548	\$ 11,535	\$ 11,536	\$ 10,367	\$ 10,578

5. Long-term Debt

Long-term debt is comprised of the following (in thousands):

	August 31, 2006	May 31, 2006
Senior secured credit facility expiring in 2010	\$	\$
Senior notes due in 2013, interest rate 10.00%	300,000	300,000
	300,000	300,000
Less current maturities		
	\$ 300,000	\$ 300,000

Table of Contents

On June 16, 2005, the Company entered into a senior secured revolving credit facility (the "Credit Facility") which provides up to \$150.0 million of available borrowings. The Credit Facility includes a \$25.0 million sub-limit for letters of credit of which \$3.2 million was outstanding at August 31, 2006. Any outstanding letters of credit are deducted from the borrowing availability under the Credit Facility. Amounts drawn under the Credit Facility bear interest either at the LIBOR rate plus a margin of 1.00% to 1.75%, or at a base rate (which will be the higher of the federal funds rate plus 0.5% and the prime rate) plus a margin of up to 1%. The interest rate margins are subject to adjustments based on the Company's leverage ratio. The commitment fee calculated on the unused portion of the Credit Facility ranges from 0.25% to 0.5% per year based on the Company's leverage ratio. The Credit Facility matures June 16, 2010 and may be terminated by the Company at any time. The Credit Facility is secured by security interests in all of the Company's existing and future accounts and inventory, certain related personal property and in all of the equity interest in the Company's present and future domestic subsidiaries and 66% of the equity interest in the Company's present and future foreign subsidiaries. The Credit Facility contains covenants restricting, among other things, prepayment or redemption of the Company's other debt, distributions, dividends, and repurchases of capital stock and other equity interests, acquisitions and investments, indebtedness, liens and affiliate transactions. The Company is required to comply with certain financial tests and to maintain certain financial ratios, such as leverage and interest coverage ratios. The amount borrowed under the Credit Facility will fluctuate based upon the Company's cash flow and working capital needs.

In addition, on July 6, 2005, the Company issued \$300.0 million aggregate principal amount of 10% senior notes due July 15, 2013 (the "Senior Notes"). Interest is due semi-annually on January 1st and July 15th. On December 2, 2005, the Company completed the offer to exchange senior notes due 2013 (the "Senior Notes"), which are registered under the Securities Act of 1933, as amended, for the outstanding 10% senior notes due 2013 that were issued in a private offering. The terms of the registered notes are substantially identical to the Company's previously outstanding senior notes. The Senior Notes are unsecured and will effectively be subordinated in right of payment to all of the Company's existing and future senior secured debt, including borrowings under the Company's Credit Facility. The indenture governing the Senior Notes contains covenants limiting the Company's ability and the ability of the Company's subsidiaries to, among other things, incur additional indebtedness, pay dividends or make other distributions or repurchase or redeem stock, make investments, sell assets, incur liens, enter into agreements restricting the Company's subsidiaries' ability to pay dividends, enter into transactions with affiliates and consolidate, merge or sell all or substantially all of the Company's assets or the assets of its subsidiaries. As of August 31, 2006, the Company was in compliance with all loan covenants.

The Company used the net proceeds from \$50.0 million of borrowings under the Credit Facility and the \$300.0 million of Senior Notes to pay a cash dividend of \$341.1 million to Texas Industries, Inc. on July 6, 2005.

The amount of interest paid was \$15.2 million and \$3.0 million in the three-month periods ended August 31, 2006 and 2005, respectively. No interest was capitalized in either of the three-month periods ended August 31, 2006 and 2005.

6. Stockholders' Equity

Common stock, as adjusted for the 100% stock dividend, consists of:

	August 31, 2006	May 31, 2006
	(in thousands)	
Shares authorized	100,000	100,000
Shares outstanding	46,294	46,209

Preferred stock consists of 10,000,000 authorized shares, \$.01 par value, none of which have been issued.

Table of Contents**7. Stock Compensation Plans**

On July 21, 2005, the Board of Directors and on July 22, 2005, TXI as the sole stockholder of the Company approved the Company's Amended and Restated 2005 Omnibus Equity Compensation Plan (the "2005 Plan") which provides for grants of stock-based awards, including non-qualified and incentive stock options, restricted stock, restricted stock units, performance shares, and performance units to non-employee directors, officers and key employees of the Company. On August 29, 2006, the Company's stockholders ratified the 2005 Plan. The Chaparral Steel Company 2006 Omnibus Incentive Plan (the "2006 Plan"), as approved by stockholders, provides for grants of performance awards, annual incentive awards or a combination of such awards. Awards under the 2006 Plan for fiscal 2007 may be paid in cash, in shares of the common stock or both. Any shares of common stock used to settle awards will be issued under the 2005 Plan as "Other Stock-Based Awards" and will count against the maximum number of shares that may be issued under the 2005 Plan. At August 31, 2006, a maximum of 7,284,110 shares of the Company's common stock is available for issuance to participants under the 2005 plan.

A summary of Company stock option transactions related to the Company's employees and non-employee directors for the three-month period ended August 31, 2006, follows:

	Shares Under	Weighted-Average Option Price
	Option	Price
Options outstanding at May 31, 2006, as previously reported	1,535,141	\$ 13.14
Adjustment for the 100% stock dividend	1,535,141	(6.57)
Options outstanding at May 31, 2006, as adjusted	3,070,282	6.57
Exercised	(112,180)	(4.88)
Cancelled	(11,200)	(5.79)
Options outstanding at August 31, 2006	2,946,902	\$ 6.64
Options exercisable at August 31, 2006	449,170	\$ 6.12

The term of the options is ten years and the options vest in equal annual installments over five years. Outstanding options expire on various dates through January 12, 2016.

The following table summarizes information about Company stock options held by the Company's employees outstanding as of August 31, 2006.

	Range of Exercise Prices		
	\$2.675-\$4.565	\$6.045-\$9.20	\$10.1225-\$15.18
Options outstanding:			
Shares outstanding	1,268,326	1,278,676	399,900
Weighted-average remaining life in years	6.40	8.71	9.08
Weighted-average exercise price	\$ 3.05	\$ 8.58	\$ 11.83
Options exercisable:			
Shares exercisable	229,248	188,722	31,200
Weighted-average exercise price	\$ 3.23	\$ 8.96	\$ 10.12

As of August 31, 2006, the aggregate intrinsic value (the difference in the closing market price of the Company's common stock of \$35.71 and the exercise price to be paid by the optionee) of stock options outstanding was \$85.7 million. The aggregate intrinsic value of exercisable stock options at that date was \$13.3 million. During the three-month period ended August 31, 2006, the total intrinsic value for options exercised (the difference in the market price of the Company's common stock on the exercise date and the price paid by the optionee to exercise the option) was \$3.4 million.

Table of Contents

In addition, during 2006, the Company's board of directors granted 62,000 shares of restricted stock to the non-employee directors pursuant to the 2005 Plan, at the market price of the common stock on the respective dates of grant ranging from \$15.18 to \$35.278. The Company recorded compensation expense of \$0.3 million related to these grants based on their vesting periods for the three-month period ended August 31, 2006. As of August 31, 2006, 32,000 shares of restricted stock were vested.

8. Income Taxes

Income taxes for the interim periods ended August 31, 2006 and 2005, have been included in the accompanying financial statements on the basis of an estimated annual rate of 33.4% and 34.0%, respectively. The primary reason that these respective tax rates differ from the 35% statutory federal corporate rate is due to deduction for qualified domestic production activities. The Company made income tax payments of \$2.0 million and \$3.6 million in the three-month periods ended August 31, 2006 and 2005, respectively.

As of May 31, 2006, the Company has \$688.7 million in Virginia state net operating loss carryforwards that begin to expire in 2020. The Company also has Virginia state credits to offset future income tax liabilities of \$41.9 million that begin to expire in 2018 and \$10 million of credits that do not expire. The Company had net Virginia state deferred tax assets of \$47.4 million at May 31, 2006 and \$51.9 million at May 31, 2005. Management believes it is more likely than not that this net state deferred tax asset will be unrealized. Therefore, a valuation allowance has been recorded to fully reserve the amount of the net state deferred tax assets.

9. Legal Proceedings and Contingent Liabilities

The Company is subject to federal, state and local environmental laws and regulations concerning, among other matters, air emissions, furnace dust disposal and wastewater discharge. The Company believes it is in substantial compliance with applicable environmental laws and regulations; however, from time to time the Company receives claims from federal and state environmental regulatory agencies and entities asserting that the Company is or may be in violation of certain environmental laws and regulations. Based on its experience in dealing with such claims in the past and the information currently available to it regarding any potential or outstanding claims, the Company believes that such claims will not have a material impact on its consolidated financial condition or results of operations. Despite the Company's compliance and experience, it is possible that the Company could be held liable for future charges, which might be material but are not currently known or estimable. In addition, changes in federal and state laws, regulations and requirements or discovery of currently unknown conditions could require additional expenditures by the Company.

The Company and subsidiaries are defendants in lawsuits which arose in the normal course of business. In management's judgment the ultimate liability, if any, from such legal proceedings will not have a material effect on the consolidated financial position or results of operations of the Company.

In connection with the Company's spin-off from TXI, the Company entered into a separation and distribution agreement and a tax sharing and indemnification agreement with TXI. In these agreements, the Company has agreed to indemnify TXI and its related parties against, among other things, any liabilities arising out of the businesses, assets or liabilities transferred to the Company and any taxes imposed on TXI in connection with the spin-off that result from the Company's breach of its covenants in the tax sharing and indemnification agreement. TXI has agreed to indemnify the Company and its related parties against, among other things, any liabilities arising out of the businesses, assets or liabilities retained by TXI and any taxes imposed on the Company in connection with the spin-off that result from TXI's breach of its covenants in the tax sharing and indemnification agreement.

The Company and TXI have made certain covenants to each other in connection with the spin-off that prohibit the Company and TXI from taking certain actions. Pursuant to these covenants: (1) the Company and TXI will, for a minimum of two years after the distribution date, continue the active conduct of the steel or cement business, respectively; (2) neither the Company nor TXI will repurchase its stock for two years following the distribution date of the spin-off except in certain circumstances permitted by the IRS; (3) neither the Company nor TXI will take any actions inconsistent with the representations made in the separation and distribution agreement or in connection with the issuance by tax counsel of its legal opinion with respect to the spin-off; and (4) neither the Company nor TXI will take any other action that would result in or fail to take any action necessary to prevent any

Table of Contents

tax being imposed on the spin-off. Each of the Company and TXI may take actions inconsistent with these covenants if it obtains an unqualified opinion of counsel or a private letter ruling from the IRS that such actions will not cause the spin-off to become taxable.

10. Retirement Plans

The Company's employees participate in a defined contribution retirement plan. Prior to January 1, 2006, the Company contributed 2% of each employee's eligible compensation and a variable contribution based on a predetermined formula established annually. After December 31, 2005, the Company will contribute 100% of eligible contributions of up to 3% of employee compensation, and 50% of eligible contributions of the next 2% of employee compensation as defined by the plan. The amount of retirement expense charged to costs and expenses for this plan was \$1.0 million and \$0.9 million in the three-month periods ended August 31, 2006 and 2005.

On July 21, 2005, the Company's board of directors approved the Chaparral Steel Company financial security plan (FSP) a non-qualified defined benefit plan providing death and retirement benefits to the Company's executive and key managerial employees who are invited and elect to participate. The plan is contributory but not funded. Participants elect the amount of their base salary that is covered by the plan. Costs and associated assets and liabilities related to the Company's employee participation are included in the financial information contained herein. Amounts payable to participants are to be paid exclusively from the general assets of the Company and are otherwise unsecured. Life insurance contracts have been purchased that may be used to fund the FSP payments. These insurance contracts, recorded at their net cash surrender value, totaled \$8.8 million at August 31, 2006 and \$8.3 million at May 31, 2006, and are included in investments on the consolidated balance sheets. The amount of FSP benefit expense and the projected FSP benefit obligation are determined using assumptions as of the end of each fiscal year. The weighted-average discount rate used was 6% in the current period. Actuarial gains or losses are recognized when incurred, and therefore, the end of year benefit obligation is the same as the accrued benefit costs recognized in the balance sheet. Prior to the spin-off, the Company's executive and key managerial employees who were invited and elected to do so, participated in a series of TXI financial security plans which had terms and conditions similar to those of the FSP adopted by the Company.

As of August 31, 2006, the estimated future benefit payments for each of the five succeeding years are \$0.2 million, \$0.3 million, \$0.6 million, \$0.9 million and \$1.0 million and for the five-year period thereafter an aggregate of \$6.2 million.

The amount of FSP benefit expense was as follows (in thousands):

	Three months ended August 31,	
	2006	2005
Service cost	\$ 231	\$ 210
Interest cost	157	103
Amortization of costs	40	4
Participant deferrals	(82)	(62)
	\$ 346	\$ 255

11. Incentive Plans

All personnel employed by the Company as of May 31 and not subject to production-based incentive or 2006 Plan awards share in the pretax income of the Company for the year then ended based on predetermined formulas. The duration of the plan is one year. Certain executives are additionally covered under three-year plans with respect to fiscal years ending May 31, 2007 and 2008. In August 2006, the Company's executive officers relinquished their previous participation under the three-year plans with respect to fiscal years ending May 31, 2007 and 2008 and will participate in new performance awards under the 2006 Plan (see Notes 2 and 7) with respect to the fiscal year ending May 31, 2007. The new performance awards are payable in cash, shares of common stock or both and are being accrued over the respective vesting periods. This change in the incentive awards to our executive officers resulted in a net increase of incentive expense of \$0.1 million in the three-month period ended August 31,

Table of Contents

2006. New plans and awards will be subject to annual approval by the Company's Board of Directors. Incentive compensation related to these plans is included in selling, general and administrative expense and was \$2.7 million and \$0.4 million in the three-month periods ended August 31, 2006 and 2005, respectively.

12. Condensed Consolidating Financial Information

On July 6, 2005, Chaparral Steel Company (the "Parent Company") issued \$300.0 million principal amount of its 10% senior notes due July 15, 2013. All of the Parent Company's consolidated domestic subsidiaries have guaranteed the 10% senior notes. The guarantees are full and unconditional and are joint and several. There are no significant restrictions on the Parent Company's ability to obtain funds from any of the guarantor subsidiaries in the form of a dividend or loan. Additionally, there are no significant restrictions on a guarantor subsidiary's ability to obtain funds from the Parent Company or its direct or indirect subsidiaries.

The following condensed consolidating balance sheets, condensed consolidating statements of operations and condensed consolidating statements of cash flows are provided for the Parent Company and all guarantor subsidiaries. The information has been presented as if the Parent Company accounted for its ownership of the guarantor subsidiaries using the equity method of accounting.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

You should read the following discussion in conjunction with the consolidated financial statements and the corresponding notes included elsewhere in this Quarterly Report. Certain statements contained in this Management's Discussion and Analysis of Financial Condition and Results of Operations are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. See

Forward-Looking Statements. Such statements are subject to risks, uncertainties and other factors, which could cause actual results to differ materially from future results expressed or implied by such forward-looking statements.

Overview

We are a leading supplier of structural steel and steel bar products through a single business segment. We produce and sell structural steel, piling products, special bar quality products, merchant bar quality rounds, reinforcing bar and channels from facilities located in Texas and Virginia. Structural steel products include wide flange beams, channels, piling products and other shapes. Steel bar products include specialty bar products and, to a lesser extent, reinforcing bar. We sell to steel service centers and steel fabricators for use in the construction industry, as well as to cold finishers, forgers and original equipment manufacturers for use in the railroad, defense, automotive, manufactured housing and energy industries. Our products are marketed throughout the United States, Canada and Mexico, and to a limited extent in Europe. All of our long-lived assets are located in the United States.

Our sales prices closely track domestic steel industry sales prices and are market based. Domestic demand for structural steel is derived primarily from non-residential construction. Therefore, a significant percentage of our sales are attributable to the level of non-residential construction activity in the United States. The level of activity in non-residential construction is cyclical and is influenced by prevailing economic conditions, including interest rate levels, inflation, consumer spending habits and employment. In addition, we compete in a global steel industry and domestic prices are significantly influenced by global industry prices. The global steel industry has at times in the past been characterized by overcapacity, which can result in high levels of steel imports into the United States, exerting downward pressure on domestic steel prices. However, in the recent past, world-wide steel and steel scrap demand has risen. Increased steel demand and the relatively weak U.S. dollar have helped curb imports into the United States. These domestic and global factors have combined to produce historically high selling prices.

Our business requires large amounts of capital investment, raw materials, energy, labor and maintenance, and our future success depends on continued access to these resources. At full capacity, our annual steel scrap usage would be 3.4 million tons, which would represent approximately 6% of the U.S. scrap market. We make predominately all steel scrap purchases on the open market where prices are subject to market forces beyond our control. A major portion of the shredded steel requirements of our Texas plant is produced by an on-site shredder operation primarily utilizing crushed auto bodies purchased on the open market. We believe our shredding operations give us a competitive advantage by providing usable scrap at reduced cost compared to similarly prepared scrap available on the open market. The geographical market that supplies the Texas plant provides some protection from sharply higher raw material prices caused in part by favorable global market conditions. Our Virginia plant receives scrap from our on-site shredding facility which is operated by an unrelated party. We believe there will be adequate sources of our principal raw materials to meet our near term needs, although probably at higher prices than has historically been the case.

Steel mini-mills consume large amounts of electricity and natural gas. The electric industry has been deregulated in Texas since January 2002. The Texas plant purchases electricity through a local retail electric provider using various long and short term supply arrangements. We have entered into agreements to purchase minimum amounts of electricity and natural gas for our Texas and Virginia facilities. As of August 31, 2006, our commitments under these agreements extend through October 2006 for electricity and natural gas in Texas and through March 2007 for natural gas in Virginia. The Commonwealth of Virginia is in transition to a deregulated market for electricity. Electricity for the Virginia plant is purchased through the local utility under an interruptible supply contract with periodic adjustments for fuel costs. Natural gas is purchased from local gas marketers and delivered to our plants through local transportation agreements. Historically, we have not used financial instruments to mitigate price fluctuations on such purchases, however we may use such financial instruments when appropriate. We believe adequate supplies of electricity and natural gas are readily available, although some fluctuations will occur.

Table of Contents

Various Aspects of Spin-Off from TXI

We became an independent public company on July 29, 2005, as a result of our spin-off from TXI. When we were a subsidiary of TXI, TXI utilized a centralized cash management program for all of its subsidiaries through which we received payments from TXI as a result of cash received from product sales or made payments to TXI or its subsidiaries for purchases of materials or services or for costs incurred on our behalf, including raw material procurement, payroll and capital expenditures. As a result of the spin-off, we are no longer part of this program.

The accompanying financial statements include all costs of our steel business. For periods prior to July 30, 2005, these costs include the allocation of certain corporate expenses from TXI. TXI's corporate expenses were allocated to us based on either the percentage of time employees incurred performing services for us or specifically identified costs incurred by TXI for us. Management believes the allocations were made on a reasonable basis. However, the consolidated financial statements may not necessarily reflect our financial position, results of operations and cash flows in the future.

TXI, through one of its subsidiaries, previously provided us with common carrier services, transporting finished product to our customers and backhauling materials and supplies for us. For periods prior to July 30, 2005, these costs have been included in cost of products sold in the consolidated statements of operations and were \$0.6 million in the three-month period ended August 31, 2005. We believe the rates charged to us for transportation services approximate the rates that would have been charged by third parties. For periods subsequent to July 29, 2005, we are utilizing assets transferred to us by TXI to operate our own common carrier service.

Since 1986, TXI included our operations in its United States consolidated federal income tax return. TXI also included us with it or certain of its subsidiaries in consolidated, combined or unitary income tax groups for state tax purposes as required by law. The provision (benefit) for deferred income taxes for the periods presented has been determined as if we had filed separate tax returns. TXI managed its tax position for the benefit of its entire portfolio of businesses and its tax strategies are not necessarily reflective of the tax strategies we will follow.

At various times, items of intercompany indebtedness were settled between and among us and our subsidiaries and TXI and its subsidiaries. These intercompany accounts were settled through offsets, contributions of such indebtedness to our capital and other non-cash transfers. During the three months ended August 31, 2006, an adjustment of \$1.1 million was recorded increasing the previous contributions to our capital by TXI.

Table of Contents**Results of Operations**

Three-month period ended August 31, 2006 compared to the three-month period ended August 31, 2005.

(In thousands except per ton data)

	Three months ended August 31,			
	2006	2005	Change	% Change
Net sales				
Structural mills	\$ 313,589	\$ 250,039	\$ 63,550	25.4%

Delivery fees	22,988	18,989	3,999	21.1%
Total	\$ 410,649	\$ 338,405	\$ 72,244	21.3%
Units shipped (tons)				
Structural	478	493	(15)	(3.0)%
Bar	89	110	(21)	(19.1)%
Total	567	603	(36)	(6.0)%
Average sales price per ton				
Structural	\$ 656	\$ 507	\$ 149	29.4%
Bar	655	553	102	18.4%
Total	656	515	141	27.4%
Net sales	\$ 410,649	\$ 338,405	\$ 72,244	21.3%
Costs and expenses (income)				
Cost of products sold	306,768	297,194	9,574	3.2%
Selling, general and administrative	10,659	7,439	3,220	43.3%
Interest	8,046	8,164	(118)	(1.4)%
Other income, net	(3,487)	(1,302)	(2,185)	167.8%
	321,986	311,495	10,491	3.4%
Income before income taxes	88,663	26,910	61,753	229.5%
Income taxes	29,576	9,159	20,417	222.9%
Net income	\$ 59,087	\$ 17,751	\$ 41,336	232.9%

Net sales. Net sales increased \$72.2 million to \$410.6 million from the prior year period. Shipments decreased 6.0% to a level of 567,000 tons due to lower levels of available inventory for sale. Demand for structural products remained strong as domestic non-residential construction continued to improve. Average selling prices for structural products continued to improve in the current year period and were \$149 higher than the prior year period while bar product prices increased 18.4% reflecting a higher mix of special bar quality shipments. Global demand continues to be strong and has improved international pricing for our steel products. The increase in pricing for rolled products (structural and bar) accounted for approximately \$79.5 million of increased net sales, while decreased shipping volumes accounted for approximately \$18.7 million of decreased net sales. Net sales of other products increased by \$7.4 million to \$16.0 million due to higher selling prices for non-ferrous metals. Delivery fees increased by 21.1% due to higher fuel costs. We expect that end user demand for our products will remain strong for the three months ending November 30, 2006 at slightly higher prices to those in the three months ending August 31, 2006.

Table of Contents

Cost of products sold. Cost of products sold including depreciation and amortization was \$306.8 million, an increase of \$9.6 million from the prior year period. The increase was due primarily to a 7% increase in per ton costs. Per ton scrap costs were 37% higher than the prior year period while per ton energy costs were 19% lower than the prior year period due primarily to the short-term energy contract at the Texas facility.

Selling, general and administrative. Selling, general and administrative expense increased \$3.2 million from the prior year period primarily due to an increase in incentive expense of \$2.3 million and equity compensation expense of \$0.8 million from the prior year period.

Interest. Interest expense of \$8.0 million decreased \$0.1 million from the prior year period and was reflective of changes in our capitalization structure described in note 5 of the consolidated financial statements.

Other income, net. Other income, net increased by \$2.2 million to \$3.5 million reflecting an increase in interest income of \$2.5 million from the prior year period.

Income taxes. Income taxes for the interim periods ended August 31, 2006 and 2005, have been included in the accompanying financial statements on the basis of an estimated annual rate of 33.4% and 34.0%, respectively. The primary reason that these respective tax rates differ from the 35% statutory federal corporate rate is due to the deduction for qualified domestic production activities. The provision for income taxes of \$29.6 million increased \$20.4 million from the prior year period primarily due to the increase in pretax profits.

Net income. Net income improved \$41.3 million to \$59.1 million from the prior year period primarily due to the increase in selling prices discussed above.

Table of Contents

Financial Condition, Liquidity and Capital Resources

Net working capital at August 31, 2006 increased \$69.2 million to \$497.4 million from May 31, 2006, reflecting a \$102.8 million increase in current assets and a \$33.6 million increase in current liabilities. Significant changes in the components of current assets included an increase in short-term investments of \$74.3 million as a result of operating results. Accounts receivable decreased \$4.0 million due to lower sales in the month of August 2006 compared to May 2006. Inventories increased \$24.5 million as raw material volumes increased from May 2006 levels. Trade accounts payable increased \$19.7 million due to higher volumes of raw material purchases in the month of August 2006. Accrued wages, taxes and other liabilities increased \$13.9 million primarily due to an increase in income taxes payable of \$25.5 million offset by decreases in employee wages and benefits of \$5.7 million and interest payable of \$7.5 million as a result of employee incentive and scheduled interest payments in the three-month period ended August 31, 2006.

In June 2005, we entered into our Credit Facility which provides up to \$150.0 million of available borrowings and in July 2005, we issued \$300.0 million aggregate principal amount of our Senior Notes. We used \$50.0 million of borrowings from our Credit Facility and the net proceeds from our Senior Notes to pay a cash dividend of \$341.1 million to Texas Industries, Inc. on July 6, 2005 in connection with the spin-off. We had no outstanding borrowings under the Credit Facility during the three months ended August 31, 2006; however, \$3.2 million of the facility was utilized to support letters of credit. The amount borrowed under the Credit Facility will fluctuate based upon our cash flow and working capital needs.

In addition to cash and cash equivalents of \$51.7 million and short-term investments of \$238.3 million at August 31, 2006, our primary sources of liquidity are cash provided from operations and borrowings available under the Credit Facility. We fund working capital requirements and capital expenditures primarily with cash from operations. In addition, we lease certain mobile and other equipment used in our operations under operating leases that in the normal course of business are renewed or replaced by subsequent leases.

We believe the net cash provided by our operating activities, existing cash and cash equivalents and short-term investments, and supplemented as necessary with borrowings under the Credit Facility will provide sufficient resources to meet our working capital requirements, debt service and other cash needs over the next year.

Cash flows

Net cash provided by operating activities increased \$20.1 million in the three-month period ended August 31, 2006 to \$83.0 million, compared to the prior year period. Net income and the related effect of deferred income taxes increased cash flows \$39.0 million compared to the prior year period. A decrease in cash provided by changes in inventories of \$84.8 million was due to higher volumes of raw material purchases in August 2006 and a depletion in finished goods inventory levels in the prior year period. Cash provided by the change in accounts payable increased \$40.5 million primarily due to the raw material purchases in August 2006.

Net cash used by investing activities was \$78.7 million in the current period compared to \$5.1 million in the prior period. Purchases of short-term investments used cash of \$2.842 billion and sales of short-term investments provided cash of \$2.767 billion. Capital expenditures were \$4.0 million in the current period and \$4.7 million in the prior period. Capital expenditures for normal replacement and improvement of our existing equipment are currently estimated to be approximately \$25 million over the next 12 months.

Net cash provided by financing activities consisted of the issuance of common stock for the exercise of company stock options of \$0.5 million and a tax benefit from the exercise of company stock options of \$4.2 million in the current year period. Net cash used by financing activities in the prior year period was \$50.4 million which consisted of long-term borrowings of \$350.0 million, debt retirements of \$50.0 million and debt issuance costs of \$9.2 million under our loan agreements described below. In conjunction with our spin-off, we paid a cash dividend to Texas Industries, Inc. of \$341.1 million in the prior year period.

Prior to our spin-off from TXI, net cash provided by operating activities included the effects of TXI's centralized cash management program for all of its subsidiaries, through which we received advances from and made transfers to TXI depending on our cash requirements. Prior to our spin-off from TXI, these transactions were treated as amounts payable to and receivable from TXI.

Table of Contents

Impact of the distribution and separation from TXI

On June 16, 2005, the Company entered into a senior secured revolving credit facility (the "Credit Facility") which provides up to \$150.0 million of available borrowings. The Credit Facility includes a \$25.0 million sub-limit for letters of credit of which \$3.2 million was outstanding at August 31, 2006. Any outstanding letters of credit are deducted from the borrowing availability under the Credit Facility. Amounts drawn under the Credit Facility bear interest either at the LIBOR rate plus a margin of 1.00% to 1.75%, or at a base rate (which will be the higher of the federal funds rate plus 0.5% and the prime rate) plus a margin of up to 1%. The interest rate margins are subject to adjustments based on the Company's leverage ratio. The commitment fee calculated on the unused portion of the Credit Facility ranges from 0.25% to 0.5% per year based on the Company's leverage ratio. The Credit Facility matures June 16, 2010 and may be terminated by the Company at any time. The Credit Facility is secured by security interests in all of the Company's existing and future accounts and inventory, certain related personal property and in all of the equity interest in the Company's present and future domestic subsidiaries and 66% of the equity interest in the Company's present and future foreign subsidiaries. The Credit Facility contains covenants restricting, among other things, prepayment or redemption of the Company's other debt, distributions, dividends, and repurchases of capital stock and other equity interests, acquisitions and investments, indebtedness, liens and affiliate transactions. The Company is required to comply with certain financial tests and to maintain certain financial ratios, such as leverage and interest coverage ratios. The amount borrowed under the Credit Facility will fluctuate based upon the Company's cash flow and working capital needs.

In addition, on July 6, 2005, the Company issued \$300.0 million aggregate principal amount of 10% senior notes due July 15, 2013 (the "Senior Notes"). Interest is due semi-annually on January 1st and July 15th. On December 2, 2005, the Company completed the offer to exchange senior notes due 2013 (the "Senior Notes"), which are registered under the Securities Act of 1933, as amended, for the outstanding 10% senior notes due 2013 that were issued in a private offering. The terms of the registered notes are substantially identical to the Company's previously outstanding senior notes. The Senior Notes are unsecured and will effectively be subordinated in right of payment to all of the Company's existing and future senior secured debt, including borrowings under the Company's Credit Facility. The indenture governing the Senior Notes contains covenants limiting the Company's ability and the ability of the Company's subsidiaries to, among other things, incur additional indebtedness, pay dividends or make other distributions or repurchase or redeem stock, make investments, sell assets, incur liens, enter into agreements restricting the Company's subsidiaries' ability to pay dividends, enter into transactions with affiliates and consolidate, merge or sell all or substantially all of the Company's assets or the assets of its subsidiaries. As of August 31, 2006, the Company was in compliance with all loan covenants.

The Company used the net proceeds from \$50.0 million of borrowings under the Credit Facility and the \$300 million of Senior Notes to pay a cash dividend of \$341.1 million to Texas Industries, Inc. on July 6, 2005.

Any intercompany accounts with TXI that remained immediately prior to the spin-off distribution on July 29, 2005 were contributed to our capital. On July 29, 2005, the spin-off was completed in the form of a pro-rata, tax-free dividend to TXI stockholders of one share of the Company's common stock for each share of TXI stock owned on July 20, 2005. Although pursuant to the Company's separation and distribution agreement with TXI and certain ancillary agreements, TXI has agreed to indemnify the Company against certain liabilities and the Company has agreed to indemnify TXI against certain liabilities, TXI has no further ownership interest in the Company, and the Company has no ownership interest in TXI. In addition, the Company is not a guarantor of any of TXI's indebtedness nor is TXI a guarantor of any of the Company's indebtedness. The Company's relationship with TXI is now governed by the separation and distribution agreement and the ancillary agreements described in that agreement. During the three months ended August 31, 2006, an adjustment of \$1.1 million was recorded increasing the previous contributions to our capital by TXI.

Table of Contents

Other Items

Critical accounting policies. The preparation of financial statements and accompanying notes in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported. Changes in the facts and circumstances could have a significant impact on the resulting financial statements.

Effective June 1, 2006, we adopted the fair value recognition provisions of SFAS No. 123(R), *Share-Based Payments*, using the modified prospective application method. Under this modified prospective method, compensation cost recognized for the three months ended August 31, 2006 includes the applicable amounts of compensation cost of stock-based payments granted prior to, but not yet vested as of June 1, 2006 based on the grant-date fair value estimated in accordance with the original provisions of SFAS No. 123 and previously presented in pro forma footnote disclosures. The impact of recognizing compensation expense related to stock options using the fair value recognition provisions of SFAS 123(R) for the three month period ended August 31, 2006 was \$0.5 million (net of tax benefit of \$0.1 million) or \$0.01 per common share. Results for periods prior to June 1, 2006, have not been restated.

In December 2004, the FASB issued SFAS No. 151, *Inventory Costs*, an amendment of ARB No. 43, Chapter 4, which became effective for the Company beginning June 1, 2006. This standard clarifies that abnormal amounts of idle facility expense, freight, handling costs and wasted material should be expensed as incurred and not included in inventory. In addition, this standard requires that the allocation of fixed production overhead costs to inventory be based on the normal capacity of the production facilities. The adoption of this standard did not have a significant effect on our consolidated financial position or results of operations.

Additional critical accounting policies that affect management's more complex judgments and estimates are described in note 2 to the consolidated financial statements and in our Annual Report on Form 10-K for the year ended May 31, 2006.

Off-balance sheet arrangements. We have no off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues, expenses, results of operations, liquidity, capital expenditures or capital resources that is material to investors.

Environmental matters. We are subject to federal, state and local environmental laws and regulations concerning, among other matters, air emissions, furnace dust disposal and wastewater discharge. We believe we are in substantial compliance with applicable environmental laws and regulations; however, from time to time we receive claims from federal and state environmental regulatory agencies and entities asserting that we are or may be in violation of certain environmental laws and regulations. Based on our experience in dealing with such claims in the past and the information currently available to us regarding any potential or outstanding claims, we believe that such claims will not have a material impact on our financial condition or results of operations. Despite our compliance and experience, it is possible that we could be held liable for future charges which might be material but are not currently known or estimable. However, changes in federal or state laws, regulations or requirements or discovery of currently unknown conditions could require additional expenditures by us.

Inflation. We believe inflation has not had a material effect on our results of operations.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

Market Risk

We have not entered into derivatives or other financial instruments for trading or speculative purposes.

On June 16, 2005, we entered into the Credit Facility which provides up to \$150 million of available borrowings. Amounts drawn under the Credit Facility bear interest either at the LIBOR rate plus a margin of 1.00% to 1.75%, or at a base rate (which will be the higher of the federal funds rate plus 0.50% and the prime rate) plus a margin of up to 1.00%. The interest rate margins are subject to adjustments based on our leverage ratio. Accordingly, fluctuations in interest rates will impact the interest we pay on borrowings under this Credit Facility. On July 6, 2005, we also issued \$300 million of our Senior Notes. Although fluctuations in interest rates will not impact the interest we pay on this debt, it would impact the fair value of this debt.

Table of Contents

In the normal course of our business, we are exposed to market risk for price fluctuations related to the sale of steel products and to the purchase of commodities used in the steel production process, principally scrap steel, electricity and natural gas. We attempt to negotiate the best prices for our raw materials and energy requirements and to obtain prices for our steel products that match market price movements in response to supply and demand. Beginning in January 2004, we implemented a raw material surcharge program, derived from a published scrap price index, designed to pass some of the increased costs associated with rising raw material prices through to customers.

Steel mini-mills consume large amounts of electricity and natural gas. The electric industry has been deregulated in Texas since January 2002. The Texas plant purchases electricity through a local retail electric provider using various long and short term supply arrangements. The Commonwealth of Virginia is in transition to a deregulated market for electricity. Electricity for the Virginia plant is purchased through the local utility under an interruptible supply contract with periodic adjustments for fuel costs. Natural gas is purchased from local gas marketers and delivered to our plants through local transportation agreements. Historically, we have not used financial instruments to mitigate price fluctuations on such purchases; however we may use such financial instruments when appropriate.

We have not engaged in formal hedging activities to mitigate risks associated with fluctuations in currency values, but we do periodically review the potential impact of this risk to ensure that the risk of significant potential losses is minimized.

ITEM 4. CONTROLS AND PROCEDURES

We maintain disclosure controls and procedures designed to ensure that information required to be disclosed in reports filed under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the specified time periods. As of the period covered by this Quarterly Report on Form 10-Q, our Principal Executive Officer and Principal Financial Officer evaluated, with the participation of our management, the effectiveness of our disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)). Based on the evaluation, which disclosed no significant deficiencies or material weaknesses, our Principal Executive Officer and Principal Financial Officer concluded that our disclosure controls and procedures are effective. There were no significant changes in our internal controls and procedures in our most recent fiscal quarter that have materially affected or are reasonably likely to materially affect our internal control over financial reporting.

In connection with our spin-off from TXI on July 29, 2005, responsibility for all of our corporate accounting, finance and internal audit functions was transferred from personnel at TXI to our personnel. We have created our own, or engaged third parties to provide these functions to replace those previously performed by TXI. These changes, although significant, are not expected to materially affect our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS.

The information required by this item is included in Note 9 to the consolidated financial statements, Legal Proceedings and Contingent Liabilities presented in Part I on pages 16-17 and is incorporated herein by reference.

ITEM 1A. RISK FACTORS.
