Your Fund's Performance

Fund Objective

The primary investment objective of **The High Yield Income Fund, Inc.** (the Fund) is to maximize current income to shareholders. As a secondary investment objective, the Fund will seek capital appreciation, but only when consistent with its primary objective. The Fund will seek to achieve its objectives by investing primarily in corporate bonds rated below investment grade by independent rating agencies. Bonds rated below investment grade are commonly known as "junk" bonds and are subject to greater risk of default and higher volatility than investment-grade bonds. Furthermore, these bonds tend to be less liquid than higher-quality bonds. The Fund is diversified, and we carefully research companies to find those with attractive yields and improving credit quality. There can be no assurance that the Fund will achieve its investment objectives.

Total return of the Fund represents the change in net asset value from the beginning of the period (9/1/05) through the end (8/31/06) and assumes the reinvestment of dividends and distributions. Shares of the Fund are traded on the New York Stock Exchange, Inc. using the symbol HYI. Past performance is not indicative of future results.

²Source: Lipper Inc. The Lehman Brothers U.S. Corporate High Yield Index is an unmanaged index of fixed-rate, noninvestment-grade debt securities with at least one year remaining to maturity. Beginning in September 2005, the Fund's performance will be compared to the Lehman Brothers U.S. Corporate High Yield 2% Issuer Capped Index in place of the Lehman Brothers U.S. Corporate High Yield Index as one of the Fund's benchmarks. The Lehman Brothers U.S. Corporate High Yield 2% Issuer Capped Index better represents the composition of the Fund. In particular, the Fund generally maintains positions of 2% or less per issuer (although the Fund may hold positions greater than that amount). The Lehman Brothers U.S. Corporate High Yield 2% Issuer Capped Index is an unmanaged index of fixed-rate, noninvestment-grade debt securities with at least one year remaining to maturity. However, the representation of any single bond issuer is restricted to a maximum of 2% of the total index. Investors cannot invest directly in an index.

Investment Advisor's Report

Prudential Investment Management, Inc.

High yield bonds a standout in U.S. fixed income market

The 12-month reporting period that ended August 31, 2006, demonstrated why including high yield bonds in a well-diversified asset allocation strategy can make sense for some investors. High yield bonds performed better than most other areas of the U.S. fixed income market for the reporting period by producing a 4.83% return as measured by the Lehman Brothers U.S. Corporate High Yield 2% Issuer Capped Index (the benchmark index). The high yield asset class produced a 5.50% return as measured by the Lehman Brothers U.S. Corporate High Yield Index (the former benchmark index). The Fund returned 6.25%, outperforming both its benchmark index and the 5.44% return of its Lipper Closed-End High Current Yield Funds Average (Lipper Average). We attribute the Fund's solid relative performance primarily to favorable security selection in sectors such as electric utilities, media/-entertainment, and automotive.

On the whole, high yield bonds remained supported by positive business fundamentals. Corporate balance sheets were generally healthy many companies still generated free cash flow, had low-to-moderate amounts of leverage, and carried positive cash balances. Some firms, looking to make sure they had sufficient liquidity, refinanced their outstanding bonds earlier than necessary to take advantage of favorable market conditions. Moreover, the trailing 12-month high yield bond default rate fell to a record low during the reporting period.

Global rise in short-term rates rattled high yield bond market

Such factors helped restore investor confidence in high yield bonds after they sold off in the spring of 2006 as a global trend toward higher short-term interest rates finally began to discourage investment in riskier assets. High yield bonds tend to be less sensitive to the negative effects of rising interest rates than higher-quality bonds. However, there was widespread concern that major central banks might unintentionally tighten monetary policy too much and choke off the global economic expansion, which could hurt the credit quality of high yield bonds.

In the United States, the Federal Reserve (the Fed) had already raised its short-term rate target 10 times prior to the start of the reporting period as part of its latest campaign to rein in economic growth and curb inflationary pressures. During the reporting period, the Fed raised the target for the federal funds rate on overnight loans between banks another seven times, lifting it from 3.50% to 5.25%. When Fed policymakers met in August 2006 (the final meeting of the reporting period), they voted to leave the target for the benchmark rate unchanged, but left the door open for further rate hikes. While economic growth had begun to moderate, as evidenced by a weaker housing market, some inflation risk remained in the economy. As it turned

out, signs that inflationary pressures had begun to ease amid slower growth helped high yield bonds rally late in the reporting period. This was welcomed news for bond investors as inflation erodes the value of bonds' fixed interest payments.

Favorable security selection in electric utility industry helped

With the high yield market in the late stage of its credit cycle, downside risks tend to outweigh the potential for positive developments in the market. Therefore, we focused on bonds with sufficient asset protection, which benefited the Fund. In the utility sector, the Fund had a favorable position within the capital structure of Calpine Corporation when the independent power producer filed for bankruptcy in December 2005. The Fund held the more senior Calpine bonds, which actually rose in value, while its underweight exposure to Calpine's subordinated debt aided the Fund's performance relative to its benchmark Index.

Security selection in autos and media/entertainment another plus

The automotive sector posted a solid return, but sound security selection was crucial as some debt securities performed better than others. This was particularly true of auto parts suppliers, who faced higher costs for raw materials and energy as well as production cutbacks at key customers such as General Motors Corp. (GM) and Ford Motor Co. (Ford). With that in mind, we avoided Dura Automotive Systems' bonds, which declined in value as the auto parts supplier faced stiff competition from rivals who have had more success at cutting costs. In contrast, the Fund had a sizable position in bonds of Visteon, which performed well even though late in the reporting period a major credit-rating agency said it might downgrade its rating on Visteon debt securities.

The Fund also held GM bonds that performed well. The automaker has made steady progress toward cutting costs, selling a partial stake in its finance subsidiary General Motors Acceptance Corp., and negotiating with Delphi Corp. and the United Auto Workers union. We favored GM bonds over Ford debt securities, as financial markets have viewed GM's restructuring efforts more favorably than Ford's.

In the media/entertainment industry, the Fund held preferred stock of ION Media Networks (formerly Paxson Communications Corporation) that increased in value. The company struck a deal with NBC Universal that gave NBC an 18-month option to purchase a controlling stake in ION or seek another buyer for the option.

Leverage remained a positive factor in Fund performance

The Fund continued to employ leverage, which refers to the practice of taking out a loan against a percentage of portfolio assets and investing the money back into the

Investment Advisor's Report (continued)

high yield market. Leverage can materially enhance a portfolio's return when the underlying bonds gain in value, or it can detract from a portfolio's return when the underlying bonds decline in value. We believe the Fund's use of leverage, which declined during the reporting period, was among the factors that helped it outperform its benchmark Index.

Too few airline bonds detracted from Fund performance

Airline bonds gained solidly. In the face of stronger travel demand, carriers reduced capacity by making fewer flights and seats available. This enabled airlines to raise ticket prices, which helped them offset some of the negative impact of sharply higher fuel prices. Some major domestic carriers were even able to report their first profitable quarter in years. Despite these positive developments, we remained cautious with regard to the challenging operating environment faced by the major airlines as it is largely characterized by volatile fuel prices and stiff competition from low-cost carriers. The Fund held airline bonds that gained in value, but its underweight exposure to the sector detracted from its performance relative to its benchmark Index.

Overweight exposure to healthcare another negative

We continued to emphasize bonds in defensive sectors of the high yield market such as healthcare. Compared to its benchmark index, the Fund had an overweight exposure to the sector that included bonds of HCA, Inc.; Skilled Healthcare Group, Inc.; and Accellent, Inc., among others. HCA became involved in a leveraged buyout (LBO) that, if completed, will change the nation's largest hospital chain from a public company to a private one. As part of the transaction, HCA will take on billions of dollars of additional debt. Consequently, three major credit-rating agencies announced they may downgrade their ratings of HCA bonds. The sell-off in HCA bonds spilled over into the rest of the sector, which performed poorly for the reporting period. Thus, the Fund's overweight exposure to the healthcare sector detracted from its return.

Fund benefited from select emerging market exposure

Emerging market bonds also sold off in the spring of 2006 amid concern that the broad trend toward higher rates might undermine the global economic expansion. The sell-off did not last, however. Emerging market bonds bounced back during the summer to end the reporting period solidly in positive territory. The Fund's modest exposure, which included bonds of Argentina, Colombia, and the Philippines, enhanced its performance.

Notes to Financial Statements

The High Yield Income Fund, Inc. (the Fund) was organized in Maryland on August 21, 1987 as a diversified, closed-end management investment company. The Fund's primary investment objective is to maximize current income to shareholders through investment in a diversified portfolio of high-yield, fixed-income securities rated in the medium to lower categories by recognized rating services, or non-rated securities of comparable quality. As a secondary investment objective, the Fund will seek capital appreciation, but only when consistent with its primary objective. The ability of issuers of debt securities held by the Fund to meet their obligations may be affected by economic or political developments in a specific industry or region.

Note 1. Accounting Policies

The following is a summary of significant accounting policies followed by the Fund in the preparation of its financial statements.

Securities Valuation: Securities for which market quotations are readily available including securities listed on national securities exchanges and those traded over-the-counter are valued at the last quoted sales price on the valuation date on which the security is traded. If such securities were not traded on the valuation date, but market quotations are readily available, they are valued at the most recently quoted bid price provided by an independent pricing service or by a principal market maker. Securities for which market quotations are not readily available or for which the pricing agent or market maker does not provide a valuation or methodology, or provides a valuation or methodology that, in the judgment of the adviser, does not represent fair value, are valued by a Valuation Committee appointed by the Board of Directors, in consultation with the adviser. When determining the fair valuation of securities some of the factors influencing the valuation include, the nature of any restrictions on disposition of the securities; assessment of the general liquidity of the securities; the issuer's financial condition and the markets in which it does business; the cost of the investment; the size of the holding and the capitalization of issuer; the prices of any recent transactions or bids/offers for such securities or any comparable securities; any available analyst media or other reports or information deemed reliable by the investment adviser regarding the issuer or the markets or industry in which it operates. Using fair value to price securities may result in a value that is different from a security's most recent closing price and from the price used by other mutual funds to calculate their net asset values. As of August 31, 2006, there was one security whose value was adjusted in accordance with procedures approved by the Board of Directors.

Notes to Financial Statements

Cont d

Short-term securities, which mature in sixty days or less, are valued at amortized cost, which approximates market value. The amortized cost method involves valuing a security at its cost on the date of purchase and thereafter assuming a constant amortization to maturity of the difference between the principal amount due at maturity and cost. Short-term securities, which mature in more than sixty days, are valued at current market quotations.

In connection with transactions in repurchase agreements with U.S. financial institutions, it is the Fund's policy that its custodian or designated subcustodians, as the case may be under tri-party repurchase agreements, take possession of the underlying collateral securities, the value of which exceeds the principal amount of the repurchase transaction including accrued interest. If the seller defaults and the value of the collateral declines, or if bankruptcy proceedings are commenced with respect to the seller of the security, realization of the collateral by the Fund may be delayed or limited. The Fund's custodian will maintain, in a segregated account of the Fund, cash, U.S. Government securities, equity securities or other liquid, unencumbered assets marked to market daily, having a value equal to or greater than the Fund's purchase commitments with respect to certain investments.

Restricted Securities: The Fund may invest up to 20% of its total assets in securities, which are not readily marketable, including those which are restricted as to disposition under securities law (restricted securities).

Cash Flow Information: The Fund invests in securities and distributes dividends from net investment income, which are paid in cash or are reinvested at the discretion of shareholders. These activities are reported in the Statement of Changes in Net Assets and additional information on cash receipts and cash payments is presented in the Statement of Cash Flows.

Accounting practices that do not affect reporting activities on a cash basis include carrying investments at value, accruing income on PIK (payment-in-kind) securities and accreting discounts and amortizing premiums on debt obligations.

Foreign Currency Translation: The books and records of the Fund are maintained in U.S. dollars. Foreign currency amounts are translated into U.S. dollars on the following basis:

(i) market value of investment securities, other assets and liabilities at the current rates of exchange.

(ii) purchases and sales of investment securities, income and expenses at the rates of exchange prevailing on the respective dates of such transactions.

Although the net assets of the Fund are presented at the foreign exchange rates and market values at the close of the period, the Fund does not isolate that portion of the results of operations arising as a result of changes in the foreign exchange rates from the fluctuations arising from changes in the market prices of the securities held at the end of the period. Similarly, the Fund does not isolate the effect of changes in foreign exchange rates from the fluctuations arising from changes in the market prices of long-term debt securities sold during the period. Accordingly, such realized foreign currency gains or losses are included in the reported net realized gains or losses on investment transactions.

Net realized gains or losses on foreign currency transactions represent net foreign exchange gains or losses from sales and maturities of short-term securities and forward currency contracts, disposition of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions, and the difference between the amounts of interest, discount and foreign withholding taxes recorded on the Fund's books and the U.S. dollar equivalent amounts actually received or paid. Net currency gains or losses resulting from the valuing of foreign currency denominated assets (excluding investments) and liabilities at year-end exchange rates are reflected as a component of net unrealized appreciation or depreciation on investments and foreign currencies.

Foreign security and currency transactions may involve certain considerations and risks not typically associated with those of U.S. companies as a result of, among other factors, the possibility of political or economic instability and the level of governmental supervision and regulation of foreign securities markets.

Security Transactions and Investment Income: Security transactions are recorded on the trade date. Realized and unrealized gains or losses from securities transactions are calculated on the identified cost basis. Interest income, which is comprised of stated coupon rate, original issue discount, market discount and premium, is recorded on the accrual basis. Dividend income is recorded on the ex-dividend date. The Fund amortizes premium and accrue discounts on debt securities as adjustments to interest income. Expenses are recorded on the accrual basis.

Taxes: For federal income tax purposes, it is the Fund's policy to continue to meet the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its taxable net income and capital gains, if any, to its shareholders. Therefore, no federal income tax provision is required.

Notes to Financial Statements

Cont d

Dividends and Distributions: The Fund expects to pay dividends of net investment income monthly and make distributions of net realized capital and currency gains, if

any, annually. Dividends and distributions are recorded on the ex-dividend date. Dividends and distributions to shareholders, which are determined in accordance with federal income tax regulations and which may differ from generally accepted accounting principles. Permanent book/tax differences relating to income and gains are reclassified amongst undistributed net investment income, accumulated net realized gain or loss and paid-in capital in excess of par, as appropriate.

Estimates: The preparation of the financial statements requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates.

Note 2. Agreements

The Fund has a management agreement with Prudential Investments LLC (PI). Pursuant to this agreement, PI has responsibility for all investment advisory services and supervises the subadviser's performance of such services. PI has entered into a subadvisory agreement with Prudential Investment Management, Inc. (PIM). PIM furnishes investment advisory services in connection with the management of the Fund. PI pays for the services of PIM, the compensation of officers and employees of the Fund, occupancy and certain clerical and bookkeeping costs of the Fund. The Fund bears all other costs and expenses.

The management fee paid to PI is computed weekly and payable monthly, at an annual rate of .70 of 1% of the average weekly net assets of the Fund.

PI and PIM are indirect, wholly-owned subsidiaries of The Prudential Financial, Inc. (Prudential).

Note 3. Portfolio Securities

Purchases and sales of investment securities, other than short-term investments, for the year ended August 31, 2006, aggregated \$47,448,633 and \$47,844,906, respectively.

Note 4. Tax Information

In order to present undistributed net investment income and accumulated net realized loss on investments and foreign currency transactions on the Statement of Assets and Liabilities that more closely represent their tax character, certain adjustments have been made to undistributed net investment income and accumulated net realized loss on investments. For the year ended August 31, 2006, the adjustments were to increase undistributed net investment income and increase accumulated net realized loss on investments by \$297,578 primarily due to the difference in the treatment of accreting market discount between financial and tax reporting, reclassification of foreign currencies and paydown losses and other book to tax adjustments. Net investment income, net realized loss and net assets were not affected by this change.

For the years ended August 31, 2006 and August 31, 2005, the tax character of total dividends paid, as reflected on the Statement of Changes in Net Assets, of \$4,930,396 and \$5,738,011, respectively, was from ordinary income.

As of August 31, 2006, the components of distributable earnings on a tax basis were \$382,396 (includes a timing difference of \$19,988 for dividends payable) of ordinary income.

The United States federal income tax basis of the Fund's investments and the net unrealized appreciation as of August 31, 2006, were as follows:

Tax Basis			Net Unrealized
of Investments	Appreciation	Depreciation	Depreciation
\$85,025,356	\$2,345,942	\$2,365,764	\$19,822

The difference between book basis and tax basis was attributed to deferred losses on wash sales, differences in the treatment of premium and market discount amortization for book and tax purposes and other book to tax adjustments.

The adjusted net unrealized depreciation on a tax basis was \$16,255, which includes other cost basis adjustments of \$3,567 due to the mark to market of receivables and payables.

For federal income tax purposes, the Fund had a capital loss carryforward as of August 31, 2006 of approximately \$23,176,300, of which \$510,300 expires in 2007, \$3,336,700 expires in 2008, \$5,010,500 expires in 2009, \$6,960,200 expires in 2010, \$7,076,300 expires in 2011 and \$282,300 expires in 2014. Accordingly, no capital gains distribution is expected to be paid to shareholders until net realized

gains have been realized in excess of such amounts. It is uncertain whether the Fund will be able to realize the full benefit prior to the expiration date. In addition, the Fund elected to treat post-October currency and capital losses of approximately \$1,000 and \$356,100, respectively incurred in the ten month period ended August 31, 2006 as having been incurred in the following fiscal year.

On July 13, 2006, the Financial Accounting Standards Board (FASB) released FASB Interpretation No. 48 Accounting for Uncertainty in Income Taxes (FIN 48). FIN 48 provides guidance for how uncertain tax positions should be recognized, measured, presented and disclosed in the financial statements. FIN 48 requires the evaluation of tax positions taken or expected to be taken in the course of preparing the Fund's tax returns to determine whether the tax positions are more-likely-than-not of being sustained by the applicable tax authority. Tax positions not deemed to meet the more-likely-than-not threshold would be recorded as a tax benefit or expense in the current year. Adoption of FIN 48 is required for fiscal years beginning after December 15, 2006 and is to be applied to all open tax years as of the effective date. At this time, management is evaluating the implications of FIN 48 and its impact, if any in the financial statements has not yet been determined.

Note 5. Borrowings

The Fund has a credit agreement with State Street Bank & Trust Co. The maximum commitment under this agreement is \$35,000,000. Interest on any such borrowings outstanding fluctuates daily at .75 of one percentage point over the Federal Funds rate and is payable monthly. The Fund may utilize these borrowings (leverage) in order to increase the potential for gain on amounts invested. There can be no guarantee that these gains will be realized. There are increased risks associated with the use of leverage. The expiration of the credit agreement was June 5, 2006. Effective June 6, 2006, the Fund renewed the credit agreement with State Street Bank & Trust Co. under the same terms. The expiration of the renewed credit agreement is June 4, 2007. The average daily balance outstanding during the year ended August 31, 2006, was \$23,000,000 at a weighted average interest rate of 5.37%. The maximum face amount of borrowings outstanding at any month-end during the year ended August 31, 2006 was \$23,000,000.

The Fund pays commitment fees at an annual rate of .10 of 1% on any unused portion of the credit agreement. The commitment fee is accrued daily and paid

quarterly. Commitment fees are included in Loan interest expense as reported on the Statement of Operations.

Note 6. Capital

There are 200 million shares of \$.01 par value common stock authorized. Prudential owned 11,000 shares of common stock as of August 31, 2006.

During the year ended August 31, 2006 the Fund did not issue shares in connection with the reinvestment of dividends. During the year ended August 31, 2005 the Fund issued 21,425 shares in connection with the reinvestment of dividends.

Note 7. Subsequent Events

On September 1 and October 2, 2006 the Board of Directors of the Fund declared dividends of \$.0350 per share payable on September 29 and October 31, 2006, respectively, to shareholders of record on September 15 and October 16, 2006, respectively.

Note 8. Other

On September 20, 2006, the Financial Accounting Standards Board (FASB) released Statement of Financial Accounting Standards No. 157 Fair Value Measurements (FAS 157). FAS 157 establishes an authoritative definition of fair value, sets out a framework for measuring fair value, and requires additional disclosures about fair-value measurements. The application of FAS 157 is required for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. At this time, management is evaluating the implications of FAS 157 and its impact, if any in the financial statements has not yet been determined.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders of

The High Yield Income Fund, Inc.:

We have audited the accompanying statement of assets and liabilities of The High Yield Income Fund, Inc. (hereafter referred to as the Fund), including the portfolio of investments, as of August 31, 2006, and the related statements of operations and cash flows for the year then ended, the statements of changes in net assets for each of the years in the two-year period then ended and the financial highlights for each of the years in the three-year period then ended. These financial statements and financial highlights are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits. The financial highlights for the years presented prior to the year ended August 31, 2004, were audited by another independent registered public accounting firm, whose report dated October 22, 2003, expressed an unqualified opinion thereon.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of August 31, 2006, by correspondence with the custodian and brokers or by other appropriate auditing procedures where replies from brokers were not received. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of the Fund as of August 31, 2006, and the results of its operations and cash flows for the year then ended, the changes in its net assets for each of the years in the two-year period then ended and the financial highlights for each of the years in the three-year period then ended, in conformity with U.S. generally accepted accounting principles.

Tax Information

(Unaudited)

We wish to advise you as to the federal tax status of dividends paid by the Fund during its fiscal year ended August 31, 2006.

During the fiscal year ended August 31, 2006, the Fund paid dividends of ordinary income of \$0.425 per share from net investment income. Further, we wish to advise you that 0.76% of the dividends taxable as ordinary income and paid in the fiscal year ended August 31, 2006 qualified for corporate dividend received deduction available to corporate taxpayers.

For the fiscal year ended August 31, 2006, the Fund designated 0.89% of its ordinary income dividends as qualified dividend income for the reduced tax rate under the Jobs and Growth Tax Relief Reconciliation Act of 2003.

The Fund intends to designate 100% of the ordinary income dividends as qualified interest income under The American Jobs Creation Act of 2004.

For the purpose of preparing your 2006 annual federal income tax return, however, you should report the amounts as reflected on the appropriate Form 1099 DIV which will be mailed to you in January 2007.

Dividend Reinvestment Plan. Shareholders may elect to have all distributions of dividends and capital gains automatically reinvested in Fund shares (Shares) pursuant to the Fund's Dividend Reinvestment Plan (the Plan). Shareholders who do not participate in the Plan will receive all distributions in cash paid by check mailed directly to the shareholders of record (or, if the shares are held in street or other nominee name, then to the nominee) by the custodian, as dividend disbursing agent. Shareholders who wish to participate in the Plan should contact the Fund at (800) 451-6788.

Computershare Trust Company, N.A., (the Plan Agent), formerly EquiServe Trust Company, N.A., serves as agent for the shareholders in administering the Plan. After the Fund declares a dividend or capital gains distribution, if (1) the market price is lower than net asset value, the participants in the Plan will receive the equivalent in Shares valued at the market price determined as of the time of purchase (generally, following the payment date of the dividend or distribution); or if (2) the market price of Shares on the payment date of the dividend or distribution is equal to or exceeds their net asset value, participants will be issued Shares at a price equal to net asset value but not less than 95% of the market price. If net asset value exceeds the market price of Shares on the payment date or the Fund declares a dividend or other distribution payable only in cash, the Plan Agent will, as agent for the participants, receive the cash payment and use it to buy Shares in the open market. If, before the Plan Agent has completed its purchases, the market price exceeds the net asset value per share, the average per share purchase price paid by the Plan Agent may exceed the net asset value per share, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund. The Fund will not issue Shares under the Plan below net asset value.

Except for certain brokerage commissions, as described below, there is no other charge to participants for reinvesting dividends or capital gain distributions. The Plan Agent's fees for the handling of the reinvestment of dividends and distributions will be paid by the Fund. There will be no brokerage commissions charged with respect to shares issued directly by the Fund. However, each participant will pay a pro rata share of brokerage commissions incurred with respect to the Plan Agent's open market purchases in connection with the reinvestment of dividends and distributions. The automatic reinvestment of dividends and distributions will not relieve participants of any federal income tax that may be payable on such dividends or distributions.

The Fund reserves the right to amend or terminate the Plan upon 90 days' written notice to shareholders of the Fund.

Participants in the Plan may withdraw from the Plan upon written notice to the Plan Agent and will receive certificates for whole Shares and cash for fractional Shares.

All correspondence concerning the Plan should be directed to the Plan Agent, Computershare Trust Company, N.A., P.O. Box 43011, Providence, RI 02940-3011.

Certifications. The required annual certification for the previous year was submitted to the NYSE. The Fund also has included the certifications of the Fund's CEO and CFO required by Section 302 of the Sarbanes-Oxley Act in the Fund's Form N-CSR filed with the SEC, for the period of this report.

Approval of Advisory Agreements

The Board of Directors (the Board) of The High Yield Income Fund, Inc. (the Fund) oversees the management of the Fund, and, as required by law, determines annually whether to renew the Fund's management agreement with Prudential Investments LLC (PI) and the Fund's subadvisory agreement with Prudential Investment Management, Inc. (PIM). In considering the renewal of the agreements, the Board, including all of the Independent Directors, met on June 7-8, 2006 and approved the renewal of the agreements through July 31, 2007, after concluding that renewal of the agreements was in the best interests of the Fund and its shareholders.

In advance of the meetings, the Board received materials relating to the agreements, and had the opportunity to ask questions and request further information in connection with their consideration. Among other things, the Board considered comparisons with other mutual funds in relevant Peer Universes and Peer Groups. The mutual funds included in each Peer Universe or Peer Group were objectively determined solely by Lipper Inc., an independent provider of mutual fund data. The comparisons placed the Fund in various quartiles over one-year, three-year and five-year time periods ending December 31, with the first quartile being the best 25% of the mutual funds (for performance, the best performing mutual funds and, for expenses, the lowest-cost mutual funds).

In approving the agreements, the Board, including the Independent Directors advised by independent legal counsel, considered the factors they deemed relevant, including the nature, quality and extent of services provided, the performance of the Fund, the profitability of PI and its affiliates, expenses and fees, and the potential for economies of scale that may be shared with the Fund and its shareholders. In their deliberations, the Directors did not identify any single factor that was dispositive and each Director attributed different weights to the various factors. In connection with their deliberations, the Board considered information provided by PI throughout the year at regular Board meetings, presentations from portfolio managers and other information, as well as information furnished at or in advance of the meetings on June 7-8, 2006.

The Directors determined that the overall arrangements between the Fund and PI, which serves as the Fund's investment manager pursuant to a management agreement, and between PI and PIM, which serves as the Fund's subadviser pursuant to the terms of a subadvisory agreement with PI, are fair and reasonable in light of the services performed, fees charged and such other matters as the Directors considered relevant in the exercise of their business judgment.

The High Yield Income Fund, Inc.

Approval of Advisory Agreements (continued)

Several of the material factors and conclusions that formed the basis for the Directors reaching their determinations to approve the continuance of the agreements are separately discussed below.

Nature, Quality and Extent of Services

The Board received and considered information regarding the nature and extent of services provided to the Fund by PI and PIM. The Board considered the services provided by PI, including but not limited to the oversight of the subadviser for the Fund, as well as the provision of fund recordkeeping, compliance, and other services to the Fund. With respect to PI's oversight of the subadviser, the Board noted that PI's Strategic Investment Research Group (SIRG), which is a business unit of PI, is responsible for monitoring and reporting to PI's senior management on the performance and operations of the subadviser. The Board also considered that PI pays the salaries of all of the officers and non-independent Directors of the Fund. The Board also considered the investment subadvisory services provided by PIM, as well as adherence to the Fund's investment restrictions and compliance with applicable Fund policies and procedures.

The Board reviewed the qualifications, backgrounds and responsibilities of PI's senior management responsible for the oversight of the Fund and PIM, and also reviewed the qualifications, backgrounds and responsibilities of PIM's portfolio managers who are responsible for the day-to-day management of the Fund's portfolio. The Board was provided with information pertaining to PI's and PIM's organizational structure, senior management, investment operations, and other relevant information pertaining to both PI and PIM. The Board also noted that it received favorable compliance reports from the Fund's Chief Compliance Officer (CCO) as to both PI and PIM. The Board noted that PIM is affiliated with PI.

The Board concluded that it was satisfied with the nature, extent and quality of the investment management services provided by PI and the subadvisory services provided to the Fund by PIM, and that there was a reasonable basis on which to conclude that the Fund benefits from the services provided by PI and PIM under the management and subadvisory agreements.

Performance of The High Yield Income Fund

The Board received and considered information about the Fund's historical performance, noting that the Fund had achieved performance that was in the fourth quartile during the first quarter of 2006, performance that was in the second quartile over a one-year period, performance that was in the third quartile over a three-year period, performance that was in the second quartile over a five-year period, and performance that was in the first quartile over a 10-year period in relation to the

group of comparable funds in a Peer Universe. The Board noted that the Fund outperformed against the median of the mutual funds included in the Peer Universe over one-year and five-year periods, and that the Fund had also outperformed against its benchmark index over these same time periods.

The Board concluded that the Fund's performance was satisfactory.

Fees and Expenses

The Board considered the management fee for the Fund as compared to the management fee charged by PI to other funds and accounts and the fee charged by other advisers to comparable mutual funds.

The Fund's management fee of 0.700% ranked in the second quartile in its Peer Group. The Board concluded that the management and subadvisory fees were reasonable.

The Board further noted that new custodian arrangements had recently been approved, which were expected to result in reductions in custodian fees borne by Fund shareholders.

Costs of Services and Profits Realized by PI

The Board was provided with information on the profitability of PI and its affiliates in serving as the Fund's investment manager. The Board discussed with PI the methodology utilized in assembling the information regarding profitability and considered its reasonableness. The Board recognized that it is difficult to make comparisons of profitability from fund management contracts because comparative information is not generally publicly available and is affected by numerous factors, including the structure of the particular adviser, the types of funds it manages, its business mix, numerous assumptions regarding allocations and the adviser's capital structure and cost of capital. Taking these factors into account, the Board concluded that the profitability of PI and its affiliates in relation to the services rendered was not unreasonable. The Board did not separately consider the profitability of the subadviser, an affiliate of PI, as its profitability was reflected in the profitability report for PI. Taking these factors into account, the Board concluded that the profitability of PI and its affiliates in relation to the services rendered was not unreasonable.

Economies of Scale

The Board noted that the advisory fee schedule for the Fund does not contain breakpoints that reduce the fee rate on assets above specified levels. The Board also noted that the Fund is a closed-end fund and is not engaged in a continuous offering of its shares. The Board received and discussed information concerning whether PI

The High Yield Income Fund, Inc.

Approval of Advisory Agreements (continued)

realizes economies of scale as the Fund's assets grow beyond current levels. In light of the Fund's current size and expense structure, the Board concluded that the absence of breakpoints in the Fund's fee schedule is acceptable at this time.

Other Benefits to PI and PIM

The Board considered potential ancillary benefits that might be received by PI and PIM and their affiliates as a result of their relationship with the Fund. The Board concluded that potential benefits to be derived by PI included brokerage commissions received by affiliates of PI, transfer agency fees received by the Fund's transfer agent (which is affiliated with PI), as well as reputational or other intangible benefits resulting from PI's association with the Fund. The Board concluded that the potential benefits to be derived by PIM included its ability to use soft dollar credits, brokerage commissions received by affiliates of PIM, as well as the potential benefits consistent with those generally resulting from an increase in assets under management, specifically, potential access to additional research resources and reputational benefits. The Board concluded that the benefits derived by PI and PIM were consistent with the types of benefits generally derived by investment managers and subadvisers to mutual funds.

FUND COUNSEL

PROXY VOTING

The Board of Directors of the Fund has delegated to the Fund's investment advisor the responsibility for voting any proxies and maintaining proxy recordkeeping with respect to the Fund. A description of these proxy voting policies and procedures is available without charge, upon request, by calling (800) 451-6788 or by visiting the Securities and Exchange Commission's website at www.sec.gov. Information regarding how the Fund voted proxies relating to portfolio securities during the most recent 12-month period ended June 30 is available on the Fund's website and on the Commission's website.

An investor should consider the investment objectives, risks, charges, and expenses of the Fund carefully before investing.

SHAREHOLDER COMMUNICATIONS WITH DIRECTORS

Shareholders can communicate directly with the Board of Directors by writing to the Chair of the Board, The High Yield Income Fund, Inc., PO Box 13964, Philadelphia, PA 19176. Shareholders can communicate directly with an individual Director by writing to that Director at the same address. Communications are not screened before being delivered to the addressee.

AVAILABILITY OF PORTFOLIO SCHEDULE

The Fund files its complete schedule of portfolio holdings with the Securities and Exchange Commission for the first and third quarters of each fiscal year on Form N-Q. The Fund's Forms N-Q are available on the Commission's website at www.sec.gov. The Fund's Forms N-Q may also be reviewed and copied at the Commission's Public Reference Room in Washington, D.C. Information on the operation and location of the Public Reference Room may be obtained by calling (800) SEC-0330 (732-0330).

(e) (1) Audit Committee Pre-Approval Policies and Procedures

THE PRUDENTIAL MUTUAL FUNDS

AUDIT COMMITTEE POLICY

on

Pre-Approval of Services Provided by the Independent Accountants

The Audit Committee of each Prudential Mutual Fund is charged with the responsibility to monitor the independence of the Fund's independent accountants. As part of this responsibility, the Audit Committee must pre-approve any independent accounting firm's engagement to render audit and/or permissible non-audit services, as required by law. In evaluating a proposed engagement of the independent accountants, the Audit Committee will assess the effect that the engagement might reasonably be expected to have on the accountant's independence. The Committee's evaluation will be based on:

a review of the nature of the professional services expected to be provided,

a review of the safeguards put into place by the accounting firm to safeguard independence, and

periodic meetings with the accounting firm.

Policy for Audit and Non-Audit Services Provided to the Funds

On an annual basis, the scope of audits for each Fund, audit fees and expenses, and audit-related and non-audit services (and fees proposed in respect thereof) proposed to be performed by the Fund's independent accountants will be presented by the Treasurer and the independent accountants to the Audit Committee for review and, as appropriate, approval prior to the initiation of such services. Such presentation shall be accompanied by confirmation by both the Treasurer and the independent accountants that the proposed services will not adversely affect the independence of the independent accountants. Proposed services shall be described in sufficient detail to enable the Audit Committee to assess the appropriateness of such services and fees, and the compatibility of the provision of such services with the auditor's independence. The Committee shall receive periodic reports on the progress of the audit and other services which are approved by the Committee or by the Committee Chair pursuant to authority delegated in this Policy.

The categories of services enumerated under *Audit Services*, *Audit-related Services*, and *Tax Services* are intended to provide guidance to the Treasurer and the independent accountants as to those categories of services which the Committee believes are generally consistent with the independence of the independent accountants and which the Committee (or the Committee Chair) would expect upon the presentation of specific proposals to pre-approve. The enumerated categories are not intended as an exclusive list of audit, audit-related or tax services, which the Committee (or the Committee Chair) would consider for pre-approval.

Audit Services

The following categories of audit services are considered to be consistent with the role of the Fund's independent accountants:

Annual Fund financial statement audits

Seed audits (related to new product filings, as required)

SEC and regulatory filings and consents

Audit-related Services

The following categories of audit-related services are considered to be consistent with the role of the Fund's independent accountants:

Accounting consultations

Fund merger support services

Agreed Upon Procedure Reports

Attestation Reports

Other Internal Control Reports

Individual audit-related services that fall within one of these categories and are not presented to the Audit Committee as part of the annual pre-approval process will be subject to pre-approval by the Committee Chair (or any other Committee member on whom this responsibility has been delegated) so long as the estimated fee for those services does not exceed \$50,000.

Tax Services

The following categories of tax services are considered to be consistent with the role of the Fund's independent accountants:

Tax compliance services related to the filing or amendment of the following:

Federal, state and local income tax compliance; and,

Sales and use tax compliance

Timely RIC qualification reviews

Tax distribution analysis and planning

Tax authority examination services

Tax appeals support services

Accounting methods studies

Edgar Filing: HIGH YIELD INCOME FUND INC - Form N-CSR

Fund merger support services

Tax consulting services and related projects

Individual tax services that fall within one of these categories and are not presented to the Audit Committee as part of the annual pre-approval process will be subject to pre-approval by the Committee Chair (or any other Committee member on whom this responsibility has been delegated) so long as the estimated fee for those services does not exceed \$50,000.

Other Non-audit Services

Certain non-audit services that the independent accountants are legally permitted to render will be subject to pre-approval by the Committee or by one or more Committee members to whom the Committee has delegated this authority and who will report to the full Committee any pre-approval decisions made pursuant to this Policy. Non-audit services presented for pre-approval pursuant to this paragraph will be accompanied by a confirmation from both the Treasurer and the independent accountants that the proposed services will not adversely affect the independence of the independent accountants.

Proscribed Services

The Fund's independent accountants will not render services in the following categories of non-audit services:

Bookkeeping or other services related to the accounting records or financial statements of the Fund

Financial information systems design and implementation

Appraisal or valuation services, fairness opinions, or contribution-in-kind reports

Actuarial services

Internal audit outsourcing services

Management functions or human resources

Broker or dealer, investment adviser, or investment banking services

Legal services and expert services unrelated to the audit

Any other service that the Public Company Accounting Oversight Board determines, by regulation, is impermissible.

Pre-approval of Non-Audit Services Provided to Other Entities Within the Prudential Fund Complex

Certain non-audit services provided to Prudential Investments LLC or any of its affiliates that also provide ongoing services to the Prudential Mutual Funds will be subject to pre-approval by the Audit Committee. The only non-audit services provided to these entities that will require pre-approval are those related directly to the operations and financial reporting of the Funds. Individual projects that are not presented to the Audit Committee as part of the annual pre-approval process will be subject to pre-approval by the Committee Chair (or any other Committee member on whom this responsibility has been delegated) so long as the estimated fee for those services does not exceed \$50,000. Services presented for pre-approval pursuant to this paragraph will be accompanied by a confirmation from both the Treasurer and the independent accountants that the proposed services will not adversely affect the independence of the independent accountants.

Although the Audit Committee will not pre-approve all services provided to Prudential Investments LLC and its affiliates, the Committee will receive an annual report from the Fund's independent accounting firm showing the aggregate fees for all services provided to Prudential Investments and its affiliates.

(e) (2) Percentage of services referred to in 4(b)- (4)(d) that were approved by the audit committee

Not applicable.

(f) Percentage of hours expended attributable to work performed by other than full time employees of principal accountant if greater than 50%.

Not applicable.

(g) Non-Audit Fees

Not applicable to Registrant for the fiscal years 2006 and 2005. The aggregate non-audit fees billed by KPMG for services rendered to the registrant's investment adviser and any entity controlling, controlled by, or under common control with the investment adviser that provides ongoing services to the registrant for the fiscal years 2006 and 2005 was \$21,300 and \$56,000, respectively.

(h) Principal Accountant's Independence

Not applicable as KPMG has not provided non-audit services to the registrant's investment adviser and any entity controlling, controlled by, or under common control with the investment adviser that provides ongoing services to the registrant that were not pre-approved pursuant to Rule 2-01(c)(7)(ii) of Regulation S-X.

Item 5 Audit Committee of Listed Registrants

The registrant has a separately designated standing audit committee (the Audit Committee) established in accordance with Section 3(a)(58)(A) of the Securities Exchange Act of 1934. The members of the Audit Committee are Linda W. Bynoe, David E.A. Carson (chair), Stephen G. Stoneburn, Clay T. Whitehead and Robin B. Smith (ex-officio).

Item 6 Schedule of Investments The schedule is included as part of the report to shareholders filed under Item 1 of this Form.

Item 7 Disclosure of Proxy Voting Policies and Procedures for Closed-End Management Investment Companies

Summary of PIM Proxy Voting Policy

The overarching goal of each of the asset management units within Prudential Investment Management, Inc. (PIM) is to vote proxies in the best interests of their respective clients based on the clients' priorities. Client interests are placed ahead of any potential interest of PIM or its asset management units.

Because the various asset management units within PIM manage distinct classes of assets with differing management styles, some units will consider each proxy on its individual merits while other units may adopt a pre-determined set of voting guidelines. The specific voting approach of each unit is noted below.

A committee comprised of senior business representatives from each of the asset management units together with relevant regulatory personnel oversees the proxy voting process and monitors potential conflicts of interests. The committee is responsible for interpretation of the proxy voting policy and periodically assesses the policy's effectiveness. In addition, should the need arise, the committee is authorized to address any proxy matter involving an actual or apparent conflict of interest that cannot be resolved at the level of an individual asset management business unit.

In all cases, clients may obtain the proxy voting policies and procedures of the various PIM asset management units, and information is available to each client concerning the voting of proxies with respect to the client's securities, simply by contacting the client service representative of the respective unit.

Voting Approach of PIM Asset Management Units

Prudential Public Fixed Income

As this asset management unit invests primarily in public debt, there are few traditional proxies voted in this unit. Generally, when a proxy is received, this unit will vote with management on routine matters such as the appointment of accountants or the election of directors. With respect to non-routine matters such as proposed anti-takeover provisions or mergers the financial impact will be analyzed and the proxy will be voted on a case-by-case basis. Specifically, if a proxy involves:

a proposal regarding a merger, acquisition or reorganization,

a proposal that is not addressed in the unit's detailed policy statement, or

circumstances that suggest a vote not in accordance with the detailed policy, the proxy will be referred to the applicable portfolio manager(s) for individual consideration.

Prudential Real Estate Investors

As this asset management unit invests primarily in real estate and real estate-related interests, there are few traditional proxies voted in this unit. Generally, when a proxy is received, this unit will vote with management on routine matters such as the appointment of accountants or the election of directors. With respect to non-routine matters such as proposed anti-takeover provisions or mergers the financial impact will be analyzed and the proxy will be voted on a case-by-case basis. Specifically, if a proxy involves:

a proposal regarding a merger, acquisition or reorganization,

a proposal that is not addressed in the unit's detailed policy statement, or

circumstances that suggest a vote not in accordance with the detailed policy, the proxy will be referred to the relevant portfolio manager(s) for individual consideration.

Prudential Capital Group

As this asset management unit invests almost exclusively in privately placed debt, there are few, if any, traditional proxies voted in this unit. As a result, this unit evaluates each proxy it receives and votes on a case-by-case basis. Considerations will include detailed knowledge of the issuer's financial condition, long- and short-term economic outlook for the issuer, its capital structure and debt-service obligations, the

issuer's management team and capabilities, as well as other pertinent factors. In short, this unit attempts to vote all proxies in the best economic interest of its clients based on the clients' expressed priorities, if any.

Fund and Prudential Investments LLC Proxy Voting Policies and Recordkeeping Procedures

The Board of Directors/Trustees of the Prudential Mutual Funds (the "Funds") has delegated to the Fund's investment manager, Prudential Investments LLC ("PI" or the "Manager") the responsibility for voting any proxies and maintaining proxy recordkeeping with respect to the Funds. The Funds authorize the Manager to delegate, in whole or in part, its proxy voting authority to its investment advisers (Subadvisers) or third party vendors, consistent with the policies set forth below. The proxy voting process shall remain subject to the supervision of the Board of each Fund, including any Committee thereof established for that purpose.

The Manager and the Board of Directors of each Fund view the proxy voting process as a component of the investment process and, as such, seek to ensure that all proxy proposals are voted with the primary goal of seeking the optimal benefit for the Funds. Consistent with this goal, the Board of Directors of each Fund views the proxy voting process as a means to encourage strong corporate governance practices and ethical conduct by corporate management. The Manager and the Board of Directors of each Fund maintain a policy of seeking to protect the best interests of a Fund should a proxy issue potentially implicate a conflict of interest between the Fund and the Manager or its affiliates.

The Manager delegates to each Fund's investment advisers (Subadvisers) the responsibility for voting the Fund's proxies. The Subadvisers are expected to identify and seek to obtain the optimal benefit for the Funds they manage, and to adopt written Policies that meet certain minimum standards, including that the policies be reasonably designed to protect the best interests of the Fund and delineate procedures to be followed when a proxy vote presents a conflict between the interests of the Fund and the interests of the Subadviser or its affiliates. The Manager expects that the Subadvisers will notify the Manager at least annually of any such conflicts identified and confirm how the issue was resolved. In addition, the Manager expects that the Subadvisers will deliver to the Manager, or its appointed vendor, information required for filing the Form N-PX with the Securities and Exchange Commission.

A copy of the proxy voting policies of the Fund's Subadviser follows:

In recent years, the subject of proxy voting by investment managers and mutual funds has received attention in the press and by the Securities and Exchange Commission. We would like to take this opportunity to provide our clients with a summary of our proxy voting policy and procedures, which is enclosed. This information is being provided to you in accordance with a new SEC requirement under the Investment Advisers Act of 1940.

It is our policy to vote proxies on client securities in the best interest of our clients and consistently with portfolio investment guidelines. In the case of pooled accounts, it is our policy to vote proxies on securities in such account in the best interest of the pooled account. In the event of any actual or apparent material conflict between our clients' interest and our own, our policy is to act solely in our clients' interest. To this end, a proxy voting committee, described in

the enclosed summary, has established procedures to address proxy voting situations that could involve potential material conflicts.

You may obtain copies of our policy and procedure, and information concerning the voting of proxies with respect to their securities, at any time upon request.

Compensation and Conflicts Disclosure:

Compensation:

Prudential Fixed Income seeks to maintain a highly competitive compensation program designed to attract and retain outstanding investment professionals, which includes portfolio managers and research analysts, and to align the interests of its investment professionals with that of its clients and overall firm results. Prudential Fixed Income's investment professionals are compensated through a combination of base salary, a performance-based annual cash incentive bonus and a long-term incentive grant. The long-term incentive grant is generally divided between stock options and restricted stock of Prudential Financial, Inc., providing investment professionals with

an ownership stake. Investment professionals are all covered by the same general compensation structure although they manage multiple accounts. All investment compensation is paid by the investment adviser and not from any assets of the investment company or other managed accounts.

The salary component is based on market data relative to similar positions within the industry as well as the past performance, experience and responsibility of the individual.

Investment professional's incentive compensation payments, including their annual bonus and long-term incentive grant, are paid from an annual incentive pool. The size of the annual incentive pool is determined quantitatively based on three factors:

1) investment performance (pre-tax) of portfolios on a 1-year and 3-year basis relative to appropriate market peer groups or benchmarks, such as the market-based benchmark specified in this prospectus, 2) Prudential Fixed Income's business results as measured by financial indicators such as asset growth, operating margin and earnings growth, and 3) market-based data indicating trends and levels of overall compensation in the asset management industry in a given year. Prudential Fixed Income regularly benchmarks its compensation program against leading asset management firms in the industry to monitor competitiveness.

Each investment professional's incentive compensation payment including the annual bonus and long-term incentive grant from the incentive pool is primarily determined by how significantly he/she contributes to delivering investment performance to clients consistent with portfolio objectives, guidelines, and risk parameters, as well as the individual's qualitative contributions to the organization.

Conflicts of Interest

PIM is an indirect, wholly owned subsidiary of Prudential Financial and is part of a full-scale global financial services organization, affiliated with insurance companies, investment advisers and broker-dealers. PIM's portfolio managers are often responsible for managing multiple accounts, including accounts of affiliates, institutional accounts, mutual funds, insurance company separate accounts and various pooled investment vehicles, such as commingled trust funds and unregistered funds. These affiliations and portfolio management responsibilities may cause potential and actual conflicts of interest. PIM aims to conduct itself in a manner it considers to be the most fair and consistent with its fiduciary obligations to all of its clients including the Fund.

Management of multiple accounts and funds side-by-side may raise potential conflicts of interest relating to the allocation of investment opportunities, the aggregation and allocation of trades and cross trading. PIM has developed policies and procedures designed to address these potential conflicts of interest.

There may be restrictions imposed by law, regulation or contract regarding how much, if any, of a particular security PIM may purchase or sell on behalf of the Fund, and as to the timing of such purchase or sale. Such restrictions may come into play as a result of PIM's relationship with Prudential Financial and its other affiliates. The Fund may be prohibited from engaging in transactions with its affiliates even when such transactions may be beneficial for the Fund.

Certain affiliated transactions are permitted in accordance with procedures adopted by the Fund and reviewed by the independent directors of the Fund.

PIM may come into possession of material, non-public information with respect to a particular issuer and as a result be unable to execute purchase or sale transactions in securities of such issuer for the Fund. This can occur particularly with respect to fixed income investments because PIM has a bank loan unit that often invests in private loans that require the issuer to provide material, non-public information. PIM generally is able to avoid certain other potential conflicts due to the possession of material, non-public information by maintaining Information Barriers to prevent the transfer of this information between units of PIM as well as between affiliates and PIM. Additionally, in an effort to avoid potential conflicts of interest, PIM's fixed income unit has procedures in place to carefully consider whether or not to accept material, non-public information with respect to certain issuers, where appropriate.

Certain affiliates of PIM develop and may publish credit research that is independent from the research developed within PIM. PIM may hold different opinions on the investment merits of a given security, issuer or industry such that PIM may be purchasing or holding a security for the Fund and an affiliated entity may be selling or recommending a sale of the same security or other securities of the issuer. Conversely, PIM may be selling a security for the Fund and an affiliated entity may be purchasing or recommending a buy of the same security or other securities of the same issuer. In addition, PIM's affiliated broker-dealers or investment advisers may be executing transactions in the market in the same securities as the Fund at the same time.

PIM may cause securities transactions to be executed for the Fund concurrently with authorizations to purchase or sell the same securities for other accounts managed by PIM, including proprietary accounts or accounts of affiliates. In these instances, the executions of purchases or sales, where possible, are allocated equitably among the various accounts (including the Fund).

PIM may buy or sell, or may direct or recommend that one client buy or sell, securities of the same kind or class that are purchased or sold for the Fund, at prices which may be different. In addition, PIM may, at any time, execute trades of securities of the same kind or class in one direction for an account and trade in the opposite direction or not trade for any other account, including the Fund, due to differences in investment strategy or client direction.

The fees charged to advisory clients by PIM may differ depending upon a number of factors including, but not limited to, the unit providing the advisory services, the particular strategy, the size of a portfolio being managed, the relationship with the client, the origination and service requirements and the asset class involved. Fees may also differ based on account type (e.g., commingled accounts, trust accounts, insurance company separate accounts, and corporate, bank or trust-owned life insurance products). Fees are negotiable so one client with similar investment objectives or goals may be paying a higher fee than another client. Fees paid by certain clients may also be higher due to performance-based fees, which increase based on the performance of a portfolio above an established benchmark. Also, large clients generate more revenue for PIM than do smaller accounts. A portfolio manager may be faced with a conflict of interest when allocating scarce investment opportunities given the benefit to PIM of favoring

accounts that pay a higher fee or generate more income for PIM. To address this conflict of interest, PIM has adopted allocation policies as well as supervisory procedures that are intended to fairly allocate investment opportunities among competing client accounts.

PIM and its affiliates manage certain funds, including hedge funds that are subject to incentive compensation on a side-by-side basis with other accounts including the Fund. PIM and/or certain of its affiliates may have an interest in such funds. PIM and its affiliates have implemented policies and procedures to address potential conflicts of interest arising out of such side-by-side management.

For example, the accounts may at times be precluded from taking positions over-weighted versus an index in securities and other instruments in which one or more of the funds hold short positions. Lending, borrowing and other financing opportunities with respect to securities for which the market is paying a premium rate over normal market rates and for which there may be limited additional demand will be allocated to the accounts prior to allocating the opportunities to such funds.

Conflicts of interest may also arise regarding proxy voting. A committee of senior business representatives together with relevant regulatory personnel oversees the proxy voting process and monitors potential conflicts of interest relating to proxy voting.

Conflicts of interest may also arise in connection with securities holdings. Prudential Financial, the general account, of The Prudential Insurance Company of America (PICA), PIM's proprietary accounts and accounts of other affiliates of PIM (collectively the Affiliated Accounts) may at times have various levels of financial or other interests, including but not limited to portfolio holdings, in companies whose securities may be held or purchased or sold in PIM's client accounts, including the Fund. These financial interests may at any time be in potential or actual conflict or may be inconsistent with positions held or actions taken by PIM on behalf of the Fund. These interests can include loan servicing, debt or equity financing, services related to advising on merger and acquisition issues, strategic corporate relationships or investments and the offering of investment advice in various forms. Thus PIM may invest Fund assets in the securities of companies with which PIM or an affiliate of PIM has a financial relationship, including investment in the securities of companies that are advisory clients of PIM.

It is anticipated that there will be situations in which the interests of the Fund in a portfolio company may conflict with the interests of one or more Affiliated Accounts or other client accounts managed by PIM or its affiliates. This may occur because Affiliated Accounts hold public and private debt and equity securities of a large number of issuers and may invest in some of the same companies as the Fund but at different levels in the capital structure. Investment by Affiliated Accounts at different levels to that of the Fund in the capital structure of a portfolio company presents inherent conflicts of interest between the Affiliated Accounts and the Fund. For example, in the event of restructuring or insolvency, the holders of senior debt may exercise remedies and take other actions that are not in the interest of or are adverse to holders of junior debt. Similarly, an Affiliated Account might hold secured debt of an issuer whose public unsecured debt is held by the Fund. Such conflicts may also exist among client accounts managed by PIM or its affiliates. While these conflicts cannot be eliminated, PIM has

implemented policies and procedures designed to ensure that, notwithstanding these conflicts, investments of the Fund are originated and managed in its best interests.

In addition, portfolio managers may advise Affiliated Accounts. PIM's portfolio manager(s) may have a financial interest in the accounts they advise, either directly or indirectly. To address potential conflicts of interest, PIM has procedures, including supervisory review procedures, designed to ensure that, including to the extent that client accounts, including the Fund, are managed differently from Affiliated Accounts, each of the client accounts, and each Affiliated Account, is managed in a manner that is consistent with its investment objectives, investment strategies and restrictions, as well as with PIM's fiduciary obligations.

Potential conflicts of interest may exist in instances in which PIM or its affiliates determine that a specific transaction in a security is appropriate for a specific account, including the Affiliated Accounts, based upon numerous factors including, among other things, investment objectives, investment strategies or restrictions, while other accounts (including the Affiliated Accounts) may hold or take the opposite position in the security in accordance with those accounts' investment objectives, investment strategies and restrictions (these conflicting positions and transactions, where arising from PIM's advisory activities or where PIM is otherwise aware of them, are collectively referred to as "Differing Positions"). PIM periodically conducts reviews of these accounts and assesses the appropriateness of these Differing Positions.

Because of the substantial size of PICA's general account, trading by PICA's general account in certain securities, particularly certain fixed income securities may result in market changes in response to trades. Although PIM expects that PICA's general account will execute transactions that will move a market in a security infrequently, and generally in response to unusual market or issuer events, the execution of these transactions could have an adverse effect on transactions for or positions held by other clients.

PIM follows Prudential Financial's policies on business ethics, personal securities trading by investment personnel, and information barriers and has adopted a code of ethics, allocation policies, supervisory procedures and conflicts of interest policies, among other policies and procedures, which are designed to ensure that clients are not harmed by these potential or actual conflicts of interests; however, there is no guarantee that such policies and procedures will detect and ensure avoidance, disclosure or mitigation of each and every situation in which a conflict may arise.
