These securities, which the Fund's investment adviser had determined to be liquid, represent 1.8% of net assets.
- ^J *Stepped coupon security* A security with a predetermined schedule of interest or dividend rate changes, at which time it begins to accrue interest or pay dividends.

Security Valuation

The Fund's securities are valued on the basis of readily available market quotations or, lacking such quotations, at fair value as determined under policies approved by and under the general oversight of the Board of Trustees. In determining fair value, all relevant qualitative and quantitative factors available are considered. These factors are subject to change over time and are reviewed periodically. The Fund may use fair value pricing instead of market quotations to value one or more securities if the Fund believes that, because of special circumstances, doing so would more accurately reflect the prices the Fund expects to realize on the current sale of those securities. Further, because of the inherent uncertainty of valuation, those estimated values may differ significantly from quoted or published values or from the values that would have been used had a ready market for the investments existed, and the differences could be material.

With respect to the Fund, where a security is traded on more than one market, which may include foreign markets, the securities are generally valued on the market considered by the Fund's adviser to be the primary market. The Fund will value its foreign securities in U.S. dollars on the basis of the then-prevailing exchange rates.

Securities Lending

The Fund lends its securities to approved brokers to earn additional income and receives cash and U.S. government securities as collateral against the loans. Cash collateral received is invested in a money market pooled account by the Fund's lending agent. Collateral is maintained over the life of the loan in an amount not less than 100% of the value of loaned securities. At September 30, 2006, the market value of the securities on loan to broker-dealers was \$155,150 for which the Fund received collateral of \$158,304 in cash. Such collateral is in the possession of the Fund's custodian. The cash was invested in the State Street Navigator Securities Lending Prime Portfolio and is included in the Fund's portfolio of investments. As with other extensions of credit, the Fund may bear the risk of delay in recovery or even loss of rights to the

collateral should the borrower of the securities fail financially.

Options, Futures and Swap Agreements

The current market value of an exchange traded option is the last sale price or, in the absence of a sale, the price obtained by reference to broker-dealer quotations. Futures contracts are valued daily at the settlement price established by the board of trade or exchange on which they are traded. Futures contracts are marked-to-market on a daily basis. As the contract's value fluctuates, payments known as variation margin are made or received by the Fund each day, depending on the daily fluctuation in the value of the contract. The daily changes in contract value are recorded as unrealized gains or losses, and the Fund recognizes a gain or loss when the contract is closed. Swap agreements are generally priced daily based upon quotations provided by brokers and the change, if any, is recorded as unrealized appreciation or depreciation.

The following is a summary of open credit default swap contracts outstanding at September 30, 2006:

Agreement With:	Termination Date	The Fund Agrees to Pay	The Fund will Receive	Contract Notional Amount	Unrealized Appreciation/ (Depreciation)
JP Morgan Chase & Co. (Eastman Kodak Corporation, 7.25%, due 11/15/13)	March 20, 2011	Specified amount upon credit event notice ^A	2.60% Quarterly	\$ 10,000	\$ 159
