1. Result of Operations and Financial Condition

(1) Result of operations

With respect to the economic and financial environment for the fiscal year ended March 31, 2007, overseas economies generally remained firm as seen in China's continued strong growth led by exports, despite the slowdown of the United States economy. In Japan, while the overall momentum slightly weakened toward the fiscal year-end, exports and capital investments continued to rise along with solid corporate earnings and moderate improvement in personal consumption. Consumer prices followed a very modest upward trend.

In the financial environment, the U.S. federal funds target rate was raised to 5.25 percent, and the European Central Bank raised its key policy rate to 3.75 percent in the euro-zone. The Bank of Japan's additional short-term rate hike in February 2007, following the termination of its zero-interest rate policy in July 2006, has led to slightly increased upward pressure on Japan's short-term market interest rates. In the long-term interest rate market, the yield on ten-year Japanese government bonds rose temporarily before the zero-interest rate policy was lifted, but has since basically followed a downward trend with some fluctuation. In the foreign exchange market, while there were some temporary swings towards a stronger yen against the dollar from increased concerns in the market regarding the U.S. economic outlook, the yen generally weakened against the dollar reflecting factors such as interest rate gaps between the United States and Japan.

Amidst this environment, consolidated net income was ¥880.9 billion, an increase of ¥110.2 billion compared to the previous fiscal year. This increase was primarily due to the following factors.

Note: The financial results for the previous fiscal year include the results of former Mitsubishi Tokyo Financial Group (from April 2005 to September 2005) and the results of Mitsubishi UFJ Financial Group (October 2005 to March 2006), due to the merger on October 1, 2005.

Ordinary profit by business segment was; ¥1,127.4 billion for the banking segment, ¥273.0 billion for the trust banking segment, ¥70.5 billion for the securities segment and ¥23.3 billion for the credit card segment. Ordinary profit by geographic segment was; ¥1,221.5 billion in Japan, ¥149.4 billion in North America, ¥14.9 billion in Europe and the Middle East, ¥72.6 billion in Asia and Oceania excluding Japan and ¥42.4 billion in Latin America.

The Company has the following earning forecasts for the fiscal year ending March 31, 2008.

Consolidated ordinary income	Consolidated ordinary profit	Consolidated net income
¥6,700.0 billion	¥1,500.0 billion	¥800.0 billion

(Reference)

Preferred stock class 8:	¥ 15,900.00
Preferred stock class 11:	¥ 5,300.00
Preferred stock class 12:	¥ 11,500.00

(2) Financial condition

Total assets increased by ¥234.2 billion from March 31, 2006 to ¥187,281.0 billion at March 31, 2007, and total net assets increased by ¥697.3 billion to ¥10,523.7 billion compared to the aggregate amount of minority interest and shareholders' equity at March 31, 2006.

With regards to major factors affecting the change in total net assets, retained earnings increased by ¥776.2 billion, while treasury stock increased by ¥227.5 billion due to the repayment of public funds etc.

With regards to assets, loans and bills discounted decreased by ¥931.1 billion from March 31, 2006 to ¥84,831.9 billion at March 31, 2007. This change in balance, on the basis of the sum of the two major subsidiary banks, mainly consisted of a decrease in domestic lending by ¥3,418.1 billion (of which housing loans decrease by ¥1,047.0 billion) from March 31, 2006, and an increase in lending mainly by overseas branches by ¥1,525.0 billion. Investment securities decreased by ¥301.3 billion, from March 31, 2006 to ¥48,207.6 billion at March 31, 2007.

(3) Medium- and long-term management strategy

MUFG is a fully-fledged comprehensive financial group comprising commercial banks, trust banks, and securities companies, as well as credit card companies, consumer finance companies, investment trust companies, leasing companies and a U.S. bank (Union Bank of California). The Group aims to unify these Group companies to deliver top quality products and services that meet diverse customer needs. We aim to be No. 1 in service, No.1 in reliability, and No.1 in global coverage and so gain the strong support of customers and society as a premier, comprehensive, global financial group.

No.1 in Service

- MUFG will leverage its strengths as a comprehensive financial group to provide to its customers with an outstanding level of high-quality service that is matched to their individual needs.
- MUFG will fully utilize the integrated business group system comprising our three core business groups - Retail, Corporate and Trust Assets (asset management and asset administration) - and meet diverse customer needs rapidly and accurately as a unified group that transcends business boundaries.

No.1 in Reliability

- MUFG aims to be a truly reliable financial group and will strive to further enhance its financial health, implement thorough legal and other compliance and strengthen internal controls. Moreover, we will fulfill our responsibilities to society through enhancing customer satisfaction (CS), and pursuing CSR activities that contribute to society and to environmental conservation.

No.1 in Global Coverage

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 6-K

- MUFG aims to use its Group strengths to the maximum, leveraging the leading global network amongst Japanese banks and talented staff well-versed in the business of each country to swiftly and precisely meet the requirements of customers globally.

(4) Key issues

MUFG aims to be a comprehensive financial group that is strongly supported by its customers and by society at large, while from the perspective of enhancing shareholder value we also aspire to be one of the world's top five financial institutions by market capitalization. In pursuit of these objectives MUFG formulated its Medium-term Business Plan (FY 2007 version) in February 2007.

In this plan MUFG has set FY 2009 financial targets for consolidated net operating profit of approximately ¥2.5 trillion, consolidated net income of approximately ¥1.1 trillion, and consolidated ROE of approximately 15% in FY2009. MUFG will pursue the following four key strategies.

(Growth strategy)

MUFG aims to increase profits in its three core businesses (Retail, Corporate, and Trust Assets), with a particular focus on Retail, and build an optimal business portfolio for sustainable growth by strengthening risk/return management. In FY 2009 we aim for the Retail business to contribute over 30% of total net operating profit, and in overseas business we aim to expand business by pursuing an investment and alliance strategy, significantly strengthen profits, and from the perspective of improved risk/return management we intend to conduct a thorough review of our business model and resource allocation.

In support of our growth strategy we will aim to raise MUFG's corporate value by pursuing a balanced capital policy comprising three elements: the utilization of capital to maintain growth and enhance profitability; the strengthening of equity capital; and enhancing shareholder returns.

For equity capital, at the end of FY 2009 we are targeting a Tier 1 ratio of 8% (at the end of FY 2006 7.59%) and an equity capital ratio of 12% (at the end of FY 2006 12.58%). In regard to returns to shareholders we will strive to increase dividends in a sustainable manner, while over the medium term, we will work to raise the dividend payout ratio to around 20% of consolidated net income (FY 2006 planned payout ratio is 12.7%).

Moreover, subject to approval by the General Meeting of Shareholders of amendments to our Articles of Incorporation, we plan to reduce the minimum stock investment unit with respect to MUFG's common shares through a stock split and the adoption of a unit share system.

(Strengthening compliance)

We take very seriously our receipt of administrative orders in Japan and the United States, and we will strengthen and improve the entire Group's business administration and internal control frameworks, and legal and other compliance, and seek to rapidly restore trust in the Group.

MUFG is already steadily implementing measures to strengthen business administration at each Group company and, specifically, we have appointed an independent Chief Compliance Officer (CCO) in the holding company and established a Group CCO Committee, chaired by the holding company CCO and comprising the Chief Compliance Officers of each Group company.

Improving our compliance is our top priority issue and we are fully committed to this task.

(Completion of full-scale systems integration and steady realization of benefits of integration)

Considering the potentially large effects of the full-scale integration of the systems of Group banks on our service to customers and on the financial system, and in full recognition of the Group's social responsibilities we are taking the greatest care to achieve safe and secure integration.

The project to achieve full integration is progressing according to plan and by FY 2008 we plan to steadily shift to operations under the new system. Through transferring to the new system we aim to enhance services and steadily realize cost synergies.

(Maintaining and strengthening MUFG brand)

Through the provision of the highest quality services MUFG will seek to enhance customer satisfaction while also pursuing management with a clear emphasis on its corporate social responsibilities.

As part of our initiative to improve customer satisfaction, in FY 2006 we made certain bank transfers commission free, introduced measures to reduce waiting times at branches, and made our facilities easier to use for senior customers. Regarding CSR activities, we continued to actively pursue efforts to contribute to society through our core financial business, for example by implementing environment-related financing and providing SRI funds, while we were also active in providing childcare facilities and inviting children to experience new things through the MUFG Experience Workshop. Looking ahead, based on our slogan "No. 1 in service, No. 1 in reliability, No. 1 in global coverage" we aim to build the MUFG brand as one that is broadly supported and appreciated by society.

Notes to Consolidated Balance Sheets

1. Amounts of less than one million yen are rounded down.
2. Transactions involving short-term fluctuations or arbitrage opportunities in interest rates, currency exchange rates, market prices of securities or other market indices (Trading transactions) are presented in Trading assets and Trading liabilities on a trade date basis.

Trading assets and trading liabilities are stated at their fair values on the consolidated balance sheet date.

3. Held to maturity debt securities are stated at amortized costs (using the straight-line method) computed under the moving average method. Investments in non-consolidated subsidiaries and affiliates not accounted for under the equity method are stated at acquisition costs computed under the moving average method. Other securities with quoted market prices are stated at their quoted market prices on the consolidated balance sheet date (cost of securities sold is calculated primarily under the moving average method) and other securities where quoted market prices are not available are stated at acquisition costs or amortized costs as computed under the moving average method. Net unrealized gains (losses) on other securities are included directly in net assets, net of applicable income taxes, except in the case of securities with embedded derivatives, which are measured at fair value in their entirety with the change in fair value recognized in current earnings.

Prior to March 31, 2006, Credit linked bonds, Synthetic CBOs and Synthetic CLOs were classified as Other securities. The Bond portion and the implied derivative portion were evaluated altogether and the unrealized gains (losses) were reflected to the consolidated statements of operations. However, beginning from this fiscal year, MUFG modified its accounting procedure in accordance with ASBJ Guidance No.12 Guidance on Accounting for Other Compound Financial Instruments (Compound Financial Instruments Other than Those with Option to Increase Paid-in Capital) (March 30, 2006). Starting this period, Compound financial instruments including Inflation-indexed Japanese government bonds are stated at amortized costs, with book value as of March 31, 2006 to be acquired cost, and unrealized gains (losses) net of deferred tax liabilities are included in Net assets.

This modification does not have a significant impact on the consolidated balance sheets or consolidated statements of operations.

4. Securities which are held as trust assets in Money held in trust are accounted for under the same basis as noted above in Notes 2 and 3. Unrealized gains and losses on securities in Money held in trust, which are not held for trading purposes or held to maturity, are included directly in Net assets, net of applicable income taxes.
5. Derivatives transactions (other than trading transactions) are calculated primarily based on fair value.
6. Depreciation for Tangible fixed assets of MUFG and its domestic banking subsidiaries and trust banking subsidiaries is computed under the declining-balance method. The estimated useful lives are as follows:

Buildings:	15 years to 50 years
Equipment:	2 years to 20 years

Depreciation for Tangible fixed assets of other consolidated subsidiaries is computed primarily under the straight-line method based on their estimated useful lives.

7. Depreciation for Intangible fixed assets is computed under the straight-line method. Development costs for internally used software are capitalized and depreciated under the straight-line method over the estimated useful lives of primarily 3 to 10 years.

8. Bond issuance costs and stock issuance costs are expensed as incurred.

Discount on bonds recognized prior to March 31, 2006 was amortized using the straight-line method and the unamortized portion is deducted directly from Bonds and notes in accordance with ASBJ Guidance No.19 Tentative Treatment for Deferred Assets (August 11, 2006). This modification caused a ¥1,619 million decrease in Discount on bonds in Other assets and Bonds and notes. Premium on bonds in Other liabilities also decreased by ¥491 million and Bonds with warrants increased by ¥491 million.

9. Assets and Liabilities denominated in foreign currencies and accounts of overseas branches of MUFG's domestic banking subsidiaries and trust banking subsidiaries are translated into yen primarily at the exchange rates in effect on the consolidated balance sheet date, except for investments in non-consolidated subsidiaries and affiliates which are translated into yen at exchange rates in effect on the acquisition dates.

Assets and Liabilities denominated in foreign currencies of other consolidated subsidiaries are translated into yen at the exchange rates in effect on the consolidated balance sheet date.

10. Allowance for loan losses of major domestic consolidated subsidiaries are provided in detail below in accordance with the internal standards for self-assessment of asset quality and internal standards for write-offs and provisions.

For claims on borrowers that have entered into bankruptcy, special liquidation proceedings or similar legal proceedings (bankrupt borrowers) or borrowers that are not legally or formally bankrupt but are regarded as substantially in a similar condition (substantially bankrupt borrowers), allowances are provided based on the amount of claims, after write-offs as stated below, net of expected amounts to be collected through the disposal of collateral and the execution of guarantees.

For claims on borrowers that are not yet legally or formally bankrupt but deemed to have a high possibility to become bankrupt (potentially bankrupt borrowers), which cash flows from collection of principal and interest cannot be reasonably estimated, allowances are provided based on an overall solvency assessment of the claims, net of expected amounts to be collected through the disposal of collateral and the execution of guarantees.

For claims on potentially bankrupt borrowers and claims on borrowers requiring close monitoring, which cash flows from collection of principal and interest can be reasonably estimated, allowances are provided as the difference between the book value of the claims and the fair value of principal and interest, which is calculated using estimated cash flows discounted at the initial contractual interest rates.

For other claims, allowances are provided based on the historical loan loss experience. For claims originated in specific foreign countries, additional allowances are provided based on an assessment of the political and economic conditions of these countries.

All claims are assessed by branches and the credit supervision departments in accordance with internal standards for self-assessment of asset quality and the credit review department, which is independent from operating sections, subsequently audits these assessments. The allowances presented reflect these internally audited assessments.

For collateralized or guaranteed claims on bankrupt borrowers and substantially bankrupt borrowers, the amount of claims exceeding the estimated value of collateral or guarantees which is deemed uncollectible, has been written-off. The amount of write-offs is ¥844,161 million.

Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 6-K

Allowances for claims of consolidated subsidiaries are provided based on their historical loan loss experience or individual assessments of the possibility for collection on specific claims.

11. Allowances for losses on investment securities are provided based on assessments of each issuers financial condition and other relevant factors.

12. Reserve for employees' bonuses, which is provided for future bonus payments to employees, reflects an estimated amount accrued on the consolidated balance sheet date.
13. Some consolidated subsidiaries record Reserve for bonuses for directors and corporate auditors in the amount deemed accrued on the consolidated balance sheet date. Prior to March 31, 2006, Bonuses for directors and corporate auditors was recorded as a decrease in unappropriated profits. However, beginning from this fiscal year, MUFG modified its accounting procedure in accordance with ASBJ Statement No.4 Accounting Standard for Bonuses to Directors (November 29, 2005) that required Bonuses for directors and corporate auditors to be expensed as incurred. This change in accounting procedure caused a ¥366 million increase in General and administrative expenses and a ¥366 million decrease in Income before income taxes and others.
14. Reserve for employees' retirement benefits, which is provided for future pension payments to employees, is recorded in the amount deemed accrued at the consolidated balance sheet date based on the projected benefit obligation and the estimated plan asset amount at the end of each fiscal year. Prior service cost is amortized under the straight-line method primarily over 10 years within the employees' average remaining service period when the services were provided. Net actuarial gains (losses) are amortized under the straight-line method primarily over 10 years, within the employees' average remaining service period, commencing from the fiscal year following when the services were provided.
15. Reserve for contingent losses, which is provided for possible losses from contingent events related to derivatives and other transactions, is calculated by estimation of the impact of these contingent events.

Reserve for contingent losses is recorded for possible future loss for the termination fees that will be incurred from the cancellation of the system development outsourcing agreements of former UFJ Bank Limited since the computer systems of the former The Bank of Tokyo-Mitsubishi, Ltd. and former UFJ Bank Limited are being integrated. The reserve as of March 31, 2007 is ¥40,530 million.

Reserve for contingent losses includes the reserves that were included in Allowance for loan losses and Other liabilities. The amount that was included in the Allowance for loan losses is ¥25,746 million and the amount that was included in Other liabilities is ¥14,937 million.

16. Finance leases of domestic consolidated subsidiaries that do not involve transfer of ownership to lessees are accounted for as operating leases.
17. With respect to hedge accounting for interest rate risks arising from financial assets and liabilities of MUFG's domestic banking subsidiaries and trust banking subsidiaries, MUFG has principally adopted portfolio hedges or individual hedges as prescribed in Industry Audit Committee Report No.24, Treatment of Accounting and Auditing of Application of Accounting Standard for Financial Instruments in Banking Industry, issued by the Japanese Institute of Certified Public Accountants (JICPA) on February 13, 2002 and Accounting Committee Report No.14, Practical Guidelines for Accounting for Financial Instruments, issued by the JICPA on January 31, 2000. MUFG applies the deferred hedge accounting method.

With respect to hedging activities to offset fluctuations in the fair value of fixed rate deposits, loans and other instruments, MUFG's domestic banking subsidiaries and trust banking subsidiaries assess the effectiveness of such hedging activities by classifying hedged items and hedging instruments, such as interest rate swap transactions, by their maturities in accordance with Industry Audit Committee Report No.24.

With respect to hedging activities to offset fluctuations in fair value of fixed rate bonds, MUFG's domestic banking subsidiaries and trust banking subsidiaries classify hedged items and designate hedging instruments, such as interest rate swap transactions. Since material terms related to hedged items and hedging instruments are substantially identical and such hedging activities are deemed highly effective, the assessment of the effectiveness is based on the similarity of the terms.

With respect to hedging activities to fix the cash flows related to floating rate deposits and loans, MUFG's domestic banking subsidiaries and trust banking subsidiaries classify hedged items by interest rate indices and tenors and designate hedging instruments, such as interest rate swap transactions, in accordance with Industry Audit Committee Report No.24. Since material terms related to hedged items and hedging instruments are substantially identical and such hedging activities are deemed highly effective, the assessment of the effectiveness is based on the similarity of the terms. The effectiveness of hedging activities is also assessed based on the correlation between the fluctuation of factors related to the hedged items and hedging instruments.

As of March 31, 2003, deferred hedging losses and gains are recorded in the consolidated balance sheet as a result of the application of macro hedge accounting based on JICPA Industry Audit Committee Report No.15 Tentative Treatment for Accounting and Auditing in Adoption of Accounting Standards for Banking Industry, under which the overall interest rate risks arising from numerous deposits, loans and other instruments are hedged collectively by derivative transactions. These losses and gains are amortized as expense or income over the remaining lives of the macro hedging instruments (for a maximum period of 15 years from April 1, 2003). Deferred hedge losses and gains attributable to macro hedge accounting as of March 31, 2007 were ¥42,127 million (before tax effect adjustment) and ¥67,092 million (before tax effect adjustment), respectively.

18. With respect to hedging activities for risks arising from volatility in foreign exchange rates associated with monetary assets and liabilities denominated in foreign currencies, MUFG's domestic banking subsidiaries and trust banking subsidiary have applied the deferred hedge accounting method by classifying hedged items by currencies and designating currency swap transactions and forward exchange contracts (fund swap transactions) as hedging instruments in accordance with JICPA Industry Audit Committee Report No.25 Treatment of Accounting and Auditing concerning Accounting for Foreign Currency Transactions in the Banking Industry.

In addition to the activities described above, MUFG's domestic banking subsidiaries and trust banking subsidiaries have applied the deferred hedge accounting method for hedging risks arising from the volatility in foreign exchange rates associated with investment in subsidiaries denominated in foreign currencies and have applied the fair value hedge accounting method to foreign securities (other than bonds) with foreign currency denominated liabilities and forward exchange contracts as hedging instruments.

19. Derivative transactions, including interest rate swaps and currency swaps which are designated as hedging instruments, among consolidated companies or between trading accounts and other accounts (or among internal sections) are not eliminated from the consolidated statements of operations and related gains and losses are recognized or deferred under hedge accounting because these derivative transactions are executed and meet certain criteria, which include a framework, policies and procedures resulting in transactions equivalent to external third party operations, which are treated as hedge transactions in accordance with JICPA Industry Audit Committee Reports No.24 and No.25.
20. National and Local Consumption Taxes are excluded from transaction amounts. Non-deductible portions of Consumption Taxes on the purchases of Tangible fixed assets are expensed when incurred.
21. Reserve for contingent liabilities from futures transactions: ¥31 million

This reserve is maintained in accordance with Article 81 of the Financial Futures Transactions Law.

Reserve for contingent liabilities from securities transactions: ¥2,284 million

This reserve is maintained in accordance with Article 51 of the Securities and Exchange Law.

22. Investment in affiliates (not including investments in consolidated subsidiaries): ¥227,186 million.
23. Accumulated depreciation on Tangible fixed assets: ¥1,386,158 million.
24. Deferred gains on Tangible fixed assets deducted for tax purposes: ¥92,986 million.
25. In addition to the Tangible fixed assets that are presented in the consolidated balance sheets, MUFJ uses certain computers under financing lease contracts without transfer of ownership of the leased assets. These assets are not included in the consolidated balance sheets.

1. Acquisition cost equivalents	
Tangible fixed assets	¥ 198,924 million
Intangible fixed assets	¥ 149,776 million
Fixed assets total	¥ 348,700 million

MUFG and its consolidated subsidiaries may request the borrowers to pledge real properties and/or securities as collateral upon signing of the contract and will perform periodic monitoring of the borrower's business conditions in accordance with internal procedures, which may lead to renegotiation of the terms and conditions of the contract and/or initiate the request for additional collateral and/or guarantees.

This modification became available because of the upgrade of the trust banking subsidiary's information system which made it possible to calculate fees based on the computation period of trust fees under the trust agreements and based on the balance of entrusted assets. This modification caused a ¥7,811 million increase in Ordinary income, Ordinary profit and Income before income taxes and others.

(4) Classification Based on Prior Year Operating Results as Provided in the JICPA Audit Committee Report No.66

Although we recorded taxable income for the fiscal year ended March 31, 2007, we are classified as 4 described above since we have material net operating losses carried forwards. However since we believe the net operating losses carried forwards are attributable to extraordinary factors such as changes in laws and regulations, we apply the exception to classification 4. (Five years future taxable income is estimable.)

[Extraordinary Factors Such as Changes in Laws and Regulations]

Our net operating losses carried forwards were incurred due to, among other things, the followings : (i) we accelerated the final disposal of non performing loans in response to both the Emergency Economic Package , which provided guidance to major banks to remove claims to debtors classified as likely to become bankrupt or below from their balance sheets, and the Program for Financial Revival , which urged major banks to reduce the ratio of non performing loans to total claims by about half; and (ii) we reduced our holdings of strategic equity investments under the Law Concerning Restriction, etc. of Banks Shareholdings etc .
