Conclusion

Strength, stability and growth

Strong pricing fundamentals due to increased demand and lagging supply

BHP Billiton's strategy is unchanged -

a diversified upstream portfolio of Tier 1, large, low-cost, expandable assets

BHP Billiton is well positioned to continue to create strong value for shareholders with a large project pipeline, focussed on high margin investments, which will deliver strong growth

The Rio Tinto acquisition can generate additional value for both sets of shareholders and is strongly aligned with BHP Billiton's strategy and management philosophy of simplicity, accountability and global talent

The combined organisation would deliver:

More production, faster and lower cost, an enhanced set of future growth options and quantifiable synergies - \$3.7bn in incremental EBITDA by year 7

A compelling 45% premium for Rio Tinto shareholders and participation in the world's largest mining company
