**CARDIUM THERAPEUTICS, INC.**

(a development stage company)

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

**(Unaudited)**

**Note 1. Organization and Liquidity**

**Organization**

Cardium Therapeutics, Inc. (the Company, Cardium, we, our and us ) was organized in Delaware in December 2003. We are a medical technology company primarily focused on the development, manufacture and sale of innovative therapeutic products for cardiovascular, ischemic and related indications. In October 2005, we acquired a portfolio of biologic growth factors and related delivery techniques from the Schering AG Group, Germany, which we plan to develop as cardiovascular-directed growth factor therapeutics for potential use by interventional cardiologists as a one-time treatment to promote and stimulate the growth of collateral circulation in the hearts of patients with ischemic conditions such as recurrent angina. In March 2006, we acquired the technologies and products of InnerCool Therapies, Inc., a medical technology company in the emerging field of therapeutic hypothermia, or patient temperature modulation, whose systems and products are designed to rapidly and controllably cool the body to reduce cell death and damage following acute ischemic events such as cardiac arrest and stroke, and to potentially lessen or prevent associated injuries such as adverse neurologic outcomes. In August 2006, we acquired rights to assets and technologies of Tissue Repair Company, a company focused on the development of growth factor therapeutics for the potential treatment of tissue wounds such as chronic diabetic wounds, and whose product candidate, Excellerate™, is initially being developed as a single administration for the treatment of non-healing, neuropathic diabetic foot ulcers. InnerCool Therapies and Tissue Repair Company are each operated as a wholly-owned subsidiary of Cardium.

We are a development stage company. We have yet to generate positive cash flows from operations, and essentially depend on debt and equity funding to finance our operations. In October 2005, we closed a private placement of 19,325,651 shares of our common stock at a purchase price of \$1.50 per share and received net proceeds of \$25,542,389. In connection with the private placement, we completed a reverse merger, whereby Cardium merged with a wholly-owned subsidiary of Aries Ventures Inc. ( Aries ), a publicly-traded company. As a result of these transactions, the stockholders of Cardium became the controlling stockholders of Aries. Accordingly, the acquisition of Cardium by Aries was a reverse merger. Aries' results of operations are included in Cardium's financial results beginning October 20, 2005.

In January 2006, Aries was merged with and into Cardium, with Cardium as the surviving entity and the successor issuer to Aries. As a result, we are now in our present form a publicly-traded, Delaware corporation named Cardium Therapeutics, Inc.

**Liquidity and Going Concern**

Since inception, our operations have consumed substantial amounts of cash and we have had only limited revenues. We anticipate that the negative cash flow from operations will continue. On January 31, 2008, we completed a registered direct offering of our common stock that resulted in net proceeds to the Company of approximately \$5 million. On June 27, 2008, we completed a follow-on registered direct offering of our common stock that resulted in net proceeds to the Company of approximately \$3 million. On July 1, 2008 we paid off the principal balance on our commercial credit facility out of the proceeds from the June 2008 offering. On July 18, 2008, we completed another registered direct offering for which we received net proceeds of approximately \$3 million. (see Note 6 below).

As of September 30, 2008, we had \$126,575 in cash and cash equivalents. On November 10, 2008, we completed a secured debt financing for which we received proceeds of approximately \$6 million before placement agent fees and offering expenses (see Note 8 below). With the completion of our recent debt offering, we believe we will be able to fund required operations for approximately the next three months, not including efforts to accelerate the study of our Generx and Excellerate product candidates and actively promote the launches of InnerCool's CoolBlue and RapidBlue product lines. As a result, we will need to raise additional funds through the sale of equity securities, debt financings, strategic licensing agreements and/or other corporate transactions. If we do not raise such funds, we will not be able to accelerate our product development activities or maintain operations. Management has been in discussions to raise additional funds but there is no assurance we will succeed in these efforts. If we are not successful in obtaining additional funds, we will need to scale back our operations and/or sell or partner certain development projects or products, or our operations may not be able to continue as planned or at all. The previously described conditions raise substantial doubt about the Company's ability to continue as a going concern. The condensed consolidated financial statements do not include any adjustments related to the recoverability of assets or classifications of liabilities that might be necessary should we be unable to

continue as a going concern.

---

## **Table of Contents**

### **Note 2. Basis of Presentation and Summary of Certain Significant Accounting Policies**

#### **Basis of Presentation**

Our principal activities are expected to focus on the commercialization of our licensed technologies, other technologies and the expansion of our existing products. The accompanying condensed consolidated financial statements have been prepared in accordance with Statement of Financial Accounting Standard (SFAS) No. 7, Accounting and Reporting by Development Stage Enterprises.

The accompanying interim unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and pursuant to the instructions to Form 10-Q and applicable rules and regulations. Certain information and footnote disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles have been condensed or omitted pursuant to such rules and regulations. In management's opinion, all adjustments necessary for a fair presentation of the consolidated financial position, results of operations and cash flows have been included and are of a normal, recurring nature. The consolidated results of operations for the three and nine months ended September 30, 2008 are not necessarily indicative of the operating results for the full fiscal year or any future periods.

The accompanying condensed consolidated financial statements and these notes should be read in conjunction with our audited financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2007 ( 2007 Annual Report ). The accounting policies used to prepare the financial statements included in this report are the same as those described in the notes to the consolidated financial statements in our 2007 Annual Report unless otherwise noted below.

#### **Loss Per Common Share**

We compute earnings per share in accordance with SFAS No. 128, Earnings Per Share. SFAS No. 128 requires dual presentation of basic and diluted earnings per share.

Basic loss per common share is computed by dividing net loss by the weighted average number of common shares outstanding during the period. Diluted loss per common share is computed by dividing net loss by the weighted average number of common shares outstanding, plus the issuance of common shares, if dilutive, resulting from the exercise of outstanding stock options and warrants. These potentially dilutive securities were not included in the calculation of loss per common share for the three and nine months ended September 30, 2008 and 2007 because, due to the loss we incurred during such periods, their inclusion would have been anti-dilutive. Accordingly, basic and diluted loss per common share are the same for all periods presented. The common stock issued and outstanding with respect to the stockholders of Aries has been included since October 20, 2005, the effective date of the reverse merger.

Potentially dilutive securities not included in diluted loss per common share consisted of outstanding stock options and warrants to acquire 13,942,163 shares as of September 30, 2008 and 11,162,277 shares as of September 30, 2007.

#### **Reclassification**

Certain prior year amounts have been reclassified to conform to the current year presentation. The reclassification did not have any effect on reported consolidated net losses for any periods presented.

#### **Stock-Based Compensation**

Effective January 1, 2006, we adopted the fair value recognition provisions of SFAS No. 123 (revised 2004), Share-Based Payment (SFAS 123R), using the modified prospective transition method. Under the transition method, stock-based compensation expense is recognized (i) for all stock-based compensation awards granted before, but not yet vested as of, January 1, 2006, based on the grant date fair value estimated in accordance with the original provision of SFAS No. 123, Accounting for Stock-Based Compensation (SFAS 123), and (ii) for all stock-based compensation awards granted after January 1, 2006, based on the grant date fair value estimated in accordance with the provisions of SFAS 123R.

Stock-based compensation costs are recognized on a straight-line basis over the requisite service period of the award, which is generally the vesting term of the award. Total stock-based compensation expense included in the condensed consolidated statements of operations was \$513,998 for the three months ended September 30, 2008, and \$1,617,633 for the nine months ended September 30, 2008. For the nine months ended September 30, 2008, \$739,258 was recorded as a component of research and development expenses and \$878,375 was recorded as a component of selling, general and administrative expenses. Total stock-based compensation expense included in the condensed consolidated

## Edgar Filing: Cardium Therapeutics, Inc. - Form 10-Q

statements of operations was \$576,027 for the three months ended September 30, 2007, and \$1,736,828 for the nine months ended September 30, 2007. For the nine months ended September 30, 2007, \$793,730 was recorded as a component of research and development expenses and \$943,098 was recorded as a component of selling, general and administrative expenses. As of September 30, 2008, the Company had \$2,803,414 of unvested stock-based compensation at fair value remaining to be expensed ratably over the period October 2008 through May 2013.

**Table of Contents**

The fair value of the stock options and similar stock-based compensation granted is estimated on the date of grant using the Black-Scholes option valuation model. The Black-Scholes option valuation model was developed for use in estimating the fair value of traded options that have no vesting restrictions and are fully transferable. Option valuation models require the input of highly subjective assumptions, including expected life and stock price volatility. The following weighted-average assumptions were used:

	<b>For the Three Months Ended September 30,</b>	
	<b>2008</b>	<b>2007</b>
Dividend yield	0%	0%
Expected life (years)	5.25	5.25
Risk-free interest rate	3.11%	4.75%
Volatility	75%	76%

  

	<b>For the Nine Months Ended September 30,</b>	
	<b>2008</b>	<b>2007</b>
Dividend yield	0%	0%
Expected life (years)	5.25	5.25
Risk-free interest rate	3.00%	4.75%
Volatility	75%	76%

**Income Taxes**

Effective January 1, 2007, the Company adopted the provisions of Financial Accounting Standards Board (FASB) Interpretation No. 48, Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109 (FIN 48). FIN 48 prescribes a recognition threshold and a measurement attribute for the financial statement recognition and measurement of tax positions taken or expected to be taken in a tax return. For those benefits to be recognized, a tax position must be more-likely-than-not to be sustained upon examination by taxing authorities. Differences between tax positions taken or expected to be taken in a tax return and the benefit recognized and measured pursuant to the interpretation are referred to as unrecognized benefits. A liability is recognized (or amount of net operating loss carryforward or amount of tax refundable is reduced) for an unrecognized tax benefit because it represents an enterprise's potential future obligation to the taxing authority for a tax position that was not recognized as a result of applying the provisions of FIN 48.

In accordance with FIN 48, interest costs related to unrecognized tax benefits are required to be calculated (if applicable) and would be classified as Interest expense. Penalties, if incurred, would be recognized as a component of Selling, general and administrative expenses.

The Company files income tax returns in the United States (federal) and in various state and local jurisdictions. The adoption of the provisions of FIN 48 did not have a material impact on the Company's consolidated financial position and results of operations. As of December 31, 2007 and September 30, 2008, no liability for unrecognized tax benefits was required to be recorded. The Company does not expect its unrecognized tax benefit position to change during the next 12 months.

The Company recognized a deferred tax asset of approximately \$26.8 million as of September 30, 2008, primarily relating to net operating loss carryforwards of approximately \$25 million (which excludes net operating losses of \$71 million that represent pre-merger losses for which the use is limited in accordance with Section 382 of the Internal Revenue Code of 1986, as amended), available to offset future taxable income through 2028. The net operating losses begin to expire in 2023 for federal tax purposes and in 2013 for state income tax purposes.

The ultimate realization of deferred tax assets depends on the generation of future taxable income during the periods in which those net operating losses are available. The Company considers projected future taxable income and tax planning strategies in making its assessment. At present, the Company does not have a sufficient history of income to conclude that it is more-likely-than-not that the Company will be able to realize all of its tax benefits in the near future and therefore a valuation allowance was established for the full value of the deferred tax asset.

**Table of Contents**

A valuation allowance will be maintained until sufficient positive evidence exists to support the reversal of any portion or all of the valuation. Should the Company become profitable in future periods with supportable trends, the valuation allowance will be reversed accordingly.

**Recently Adopted Accounting Pronouncements**

In December 2007, the Securities and Exchange Commission issued Staff Accounting Bulletin No. 110 (SAB 110). SAB 110 amends and replaces Question 6 of Section D.2 of Topic 14, Share-Based Payment of the Staff Accounting Bulletin series. Question 6 of Section D.2 of Topic 14 expresses the views of the staff regarding the use of the simplified method in developing an estimate of the expected term of plain vanilla share options and allows usage of that method for options granted before December 31, 2007. SAB 110 allows public companies that do not have sufficient historical experience to provide a reasonable estimate to continue the use of this method for estimating the expected term of plain vanilla share options granted after December 31, 2007. SAB 110 was effective January 1, 2008. The adoption of this pronouncement did not have a material impact on the Company's condensed consolidated financial statements.

In October 2008, the FASB issued FSP157-3 Determining Fair Value of a Financial Asset in a Market That Is Not Active (FSP 157-3). FSP 157-3 clarified the application of SFAS No. 157 in an active market. It demonstrated how the fair value of a financial asset is determined when the market for that financial asset is inactive. FSP 157-3 was effective upon issuance, including prior periods for which financial statements had not been issued. The implementation of this standard did not have a material impact on our condensed consolidated financial statements.

**Note 3. Inventories**

Inventories consisted of the following:

	September 30, 2008	December 31, 2007
Raw materials	\$ 789,998	\$ 490,688

<b>Total</b>	<b>\$ 2,724,689</b>	<b>\$ 2,311,849</b>

**Note 6. Stockholders Equity***Common Stock*

On January 31, 2008, we completed a registered direct offering of our common stock that resulted in the sale of 2,655,000 shares, in the aggregate, of our common stock at a purchase price of \$2.00 per share, and five year warrants to purchase an additional 929,250 shares of our common stock at an exercise price of \$2.00. The warrants were fully exercisable when issued. We received gross proceeds of approximately \$5,300,000, before placement agent fees and offering expenses of approximately \$400,000. In addition, we issued warrants to purchase 159,300 shares of our common stock to the placement agent on terms substantially the same as the warrants issued to investors.

On June 27, 2008, we completed a follow-on registered direct offering of our common stock that resulted in the sale of 1,625,000 shares, in the aggregate, of our common stock at a purchase price of \$2.00 per share, and five year warrants to purchase an additional 568,750 shares of our common stock at an exercise price of \$2.00. The warrants were fully exercisable when issued. We received gross proceeds of approximately \$3,250,000, before placement agent fees and offering expenses of approximately \$224,000. In addition, we issued warrants to purchase 97,500 shares of our common stock to the placement agent. These warrants have an exercise price of \$2.29 and otherwise have substantially the same terms as the warrants issued to investors.

On July 18, 2008, we completed a second follow-on registered direct offering of our common stock that resulted in the sale of 1,670,000 shares, in the aggregate, of our common stock at a purchase price of \$2.00 per share, and five year warrants to purchase an additional 584,500 shares of our common stock at an exercise price of \$2.00. The warrants were fully exercisable when issued. We received gross proceeds of approximately \$3,340,000, before placement agent fees, offering expenses and expense reimbursements of approximately \$330,000. In addition, we issued warrants to purchase 100,200 shares of our common stock to the placement agent. These warrants have an exercise price of \$2.20 and otherwise have substantially the same terms as the warrants issued to investors.

*Option Activity*

We have an equity incentive plan that was established in 2005 under which 5,665,856 shares of our common stock have been reserved for issuance to employees, non-employee directors and consultants of the Company.

During the nine months ended September 30, 2008, options to purchase 647,500 shares were granted under the plan. The options granted during the nine months ended September 30, 2008 have an average exercise price of \$2.25, with a term of seven years, and vest over four years. During the nine months ended September 30, 2008, vested options to purchase 7,811 shares of our common stock expired and unvested options to purchase an additional 214,719 shares of our common stock were cancelled and are available for future issuance under the plan. Warrants to purchase 37,585 shares which had been granted outside the plan were cancelled and 37,832 shares expired during the nine months ended September 30, 2008.

**Table of Contents**

The following is a summary of stock option activity under our equity incentive plan and warrants issued outside of the plan to employees and consultants, during the nine months ended September 30, 2008:

	Number of Options or Warrants	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (in years)	Aggregate Intrinsic Value
Balance outstanding, December 31, 2007	5,491,500	\$ 2.30	7.3	\$
Granted	647,500	2.25	6.7	
Exercised				
Expired (vested)	(45,643)	2.57	5.0	
Cancelled (unvested)	(252,304)	2.10	7.1	
Balance outstanding, September 30, 2008	5,841,053	\$ 2.30	6.6	\$ 0.0
Exercisable, September 30, 2008	3,941,581	2.22		

The following is a summary of unvested options and warrants as of September 30, 2008, and changes during the nine months ended September 30, 2008.

	Number of Options or Warrants	Weighted Average Grant Date Fair Value
Unvested balance outstanding, December 31, 2007	2,733,198	\$ 1.48
Granted	647,500	1.45
Vested	(1,183,279)	1.28
Expired (vested)	(45,643)	1.48
Cancelled (unvested)	(252,304)	1.25
Unvested balance outstanding, September 30, 2008	1,899,472	\$ 1.48

*Warrants*

On January 31, 2008, we completed a registered direct offering of our common stock that resulted in the sale of 2,655,000 shares, in the aggregate, of our common stock at a purchase price of \$2.00 per share, and five year warrants to purchase an additional 929,250 shares of our common stock at an exercise price of \$2.00. The warrants were fully exercisable when issued. In addition, we issued warrants to purchase 159,300 shares of our common stock to the placement agent on substantially the same terms as the warrants issued to investors.

On June 27, 2008, we completed a follow-on registered direct offering of our common stock that resulted in the sale of 1,625,000 shares, in the aggregate, of our common stock at a purchase price of \$2.00 per share, and five year warrants to purchase an additional 568,750 shares of our common stock at an exercise price of \$2.00. The warrants were fully exercisable when issued. In addition, we issued warrants to purchase 97,500 shares of our common stock to the placement agent. These warrants have an exercise price of \$2.29 and otherwise have substantially the same terms as the warrants issued to investors.

**Table of Contents**

On July 18, 2008, we completed a second follow-on registered direct offering of our common stock that resulted in the sale of 1,670,000 shares, in the aggregate, of our common stock at a purchase price of \$2.00 per share, and five year warrants to purchase an additional 584,500 shares of our common stock at an exercise price of \$2.00. The warrants were fully exercisable when issued. In addition, we issued warrants to purchase 100,200 shares of our common stock to the placement agent. These warrants have an exercise price of \$2.20 and otherwise have substantially the same terms as the warrants issued to investors.

The following table summarizes warrant activity for the nine months ended September 30, 2008:

	Number of Warrants	Exercise Price	Weighted Average Remaining Contractual Life (in years)
Balance outstanding, December 31, 2007	5,701,610	\$ 1.50 - \$3.78	2 -4
Warrants issued	2,439,500	2.00 - 2.29	5
Warrants exercised	(40,000)	1.50	2
Warrants expired			
Warrants cancelled			
Balance outstanding, September 30, 2008	8,101,110	\$ 1.50 3.78	1 5
Warrants exercisable at September 30, 2008	8,101,110	\$ 1.50 3.78	1 5

The table above does not include warrants issued to employees and consultants described and included under [Option Activity](#) above.

**Note 7. Long-Term Debt**

On November 12, 2007, Cardium, InnerCool Therapies and Tissue Repair Company entered into a Loan and Security Agreement with Life Sciences Capital, LLC, whereby we obtained debt financing in the principal amount of \$5 million to be used for general working capital purposes. In connection with the loan, we paid Life Sciences Capital, LLC a loan commitment fee and related legal expenses of \$108,500, which was capitalized as deferred financing costs and amortized over the term of the loan. On July 1, 2008 we paid off the principal balance on our commercial credit facility out of the proceeds from the June 2008 offering, thereby retiring our remaining debt obligations to Life Sciences Capital.

**Note 8. Subsequent Events**

On November 10, 2008, we completed a \$6 million financing in the form of secured debt with accompanying warrants to purchase nine million shares of common stock. This obligation is secured by our assets and intellectual property, has a one year term and bears interest at a fixed rate of 12% per annum. The warrants were fully exercisable when issued, have a five year term and an exercise price of \$2.00. We expect to receive gross proceeds of approximately \$6 million (which includes \$845,000 previously advanced to the Company in the form of advances and salary deferral by the Company's chief executive officer, chief business officer, chief scientific officer and chief medical advisor, that were contributed to the purchase of notes), less placement agent fees and offering expenses. In addition, we issued warrants to purchase 386,625 shares of common stock to the placement agent on substantially the same terms as the warrants issued to the lenders.

**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

The following discussion and analysis is intended to help you understand our financial condition and results of operations for the three and nine months ended September 30, 2008. You should read the following discussion and analysis together with our unaudited condensed consolidated financial statements and the notes to the condensed consolidated financial statements included under Item 1 in this report, as well as the risk factors and other information included in our 2007 Annual Report and other reports and documents we file with the United States Securities and Exchange Commission (SEC). Our future financial condition and results of operations will vary from our historical financial condition and results of operations described below.

## **Table of Contents**

### **Executive Overview**

*The following overview does not address all of the matters covered in the other sections of this Item 2 or other items in this report or contain all of the information that may be important to our stockholders or the investing public. This overview should be read in conjunction with the other sections of this Item 2 and this report.*

We are a medical technology company primarily focused on the development, manufacture and sale of innovative therapeutic products and devices for cardiovascular, ischemic and related indications. Building upon our core products and product candidates, our strategic goal is to develop a portfolio of medical products at various stages of development and secure additional financial resources to commercialize these products in a timely and effective manner. To that end, on January 31, 2008, we closed a \$5.3 million registered direct offering to provide funding to further develop our ongoing programs, as well as for other general corporate purposes. On June 27, 2008, we closed a \$3.25 million follow-on registered direct offering, the proceeds of which were primarily used to pay off the principal balance on our commercial credit facility. On July 18, we closed a \$3.34 million follow-on registered direct offering, the proceeds of which were primarily used to fund current operations.

As a development stage company, our revenues are generally limited to those generated by the sale of InnerCool's endovascular system and its new CoolBlue surface temperature modulation system and its RapidBlue system. We do not have any other products available for sale or use. Because of the limited nature of our revenues and the high costs we must incur to develop our product candidates, we have yet to generate positive cash flows or income from operations and do not anticipate doing so in the foreseeable future. As a result, we are currently dependent on debt and equity funding to finance our operations.

Going forward, the key elements of our strategy are to:

advance the Phase 2b clinical study for Excellerate;

accelerate the commercialization of InnerCool's Rapid Blue System<sup>TM</sup> and, at the same time, expand our CoolBlue product placements and broaden and expand our therapeutic hypothermia technology into other medical indications and applications;

advance the Phase 3 AWARE clinical study for Generx;

leverage our financial resources and focused corporate infrastructure through the use of contract manufacturers to produce clinical supplies and a contract research organization to manage or assist planned clinical studies;

advance the pre-clinical development of Corgentin and potentially seek partnering opportunities for the Corgentin and Genvascor product candidates;

broaden and expand our product base and financial resources through other corporate development transactions in an attempt to enhance stockholder value, which could include acquiring other medical-related companies or product opportunities and/or securing additional capital; and

monetize the economic value of our product portfolio by establishing strategic collaborations and selling businesses and assets at appropriate valuation inflection points.

We plan to continue to build our business through internal development and external acquisitions. As an emerging public company, we have initially focused on acquiring undervalued opportunities having unrealized value but which we believe have potential for significant future growth and development or partnering prospects when combined with the skills and perspectives of our experienced management team.

## Edgar Filing: Cardium Therapeutics, Inc. - Form 10-Q

We intend to continue to pursue opportunistic acquisitions designed to enhance long-term stockholder value. At the same time, to the extent our technologies and product candidates are advanced and businesses are built-up, further developed and mature, we may consider various corporate development transactions to enhance and monetize stockholder value such as corporate partnerings, spin-out transactions and equity distribution.

We recognize that the practical realities of developing therapeutic products in the current regulatory environment require sizable financial investment. In view of this, we plan to pursue clinical development strategies intended to facilitate collaborations and partnerships for joint development of our products at appropriate valuation inflection points during their clinical development cycle.

More detailed information about our products, product candidates, our intended efforts to develop our products and our business strategy is included in our 2007 Annual Report.

---

## **Table of Contents**

### **Critical Accounting Policies and Estimates**

The preparation of our financial statements requires that we make estimates and assumptions that affect the amounts reported in our financial statements and their accompanying notes. We have identified certain policies that we believe are important to the portrayal of our financial condition and results of operations. These policies require the application of significant judgment by our management. We base our estimates on our historical experience, industry standards, and various other assumptions that we believe are reasonable under the circumstances. Actual results could differ from these estimates under different assumptions or conditions. An adverse effect on our financial condition, changes in financial condition, and results of operations could occur if circumstances change that alter the various assumptions or conditions used in such estimates or assumptions.

Our significant accounting policies are described under Item 7 of our 2007 Annual Report and in the notes to the condensed consolidated financial statements included in this report.

### **Results of Operations**

#### **Three months ended September 30, 2008 compared to September 30, 2007**

Product sales for the three months ended September 30, 2008 were \$585,421 compared to sales of \$306,992 for the three months ended September 30, 2007. The increase of \$278,429 was due in large part to an increase in sales of InnerCool Therapies Celsius Control System resulting from our expanded sales and marketing efforts at InnerCool Therapies, as well as new sales from the launch of InnerCool Therapies CoolBlue system in late 2007. There was no grant revenue for the three months ended September 30, 2008 compared to grant revenues of \$57,338 for the three months ended September 30, 2007. The decrease of \$57,338 was attributed to no grant expenditures during the third quarter of 2008.

Cost of goods sold for the three months ended September 30, 2008 was \$514,243 compared to \$318,934 for the three months ended September 30, 2007. The increase of \$195,309 was due to an increase in the products being sold during the three months ended September 30, 2008, along with increases in production costs.

Research and development expenses for the three months ended September 30, 2008 were \$2,947,997 compared to \$3,243,008 for the same three month period last year. The decrease of \$295,011 was primarily due a reduction in the development costs for InnerCool's RapidBlue product as it has moved from development to production, increased expenses in our efforts to advance our Excellerate product candidate in its Phase 2b clinical trial, offset by reductions in Generx (AWARE) Phase 3 clinical trial costs as spending in the three months ended September 30, 2007 included product material and initial start-up costs not required in the recent three month period.

Selling, general and administrative expenses for the three months ended September 30, 2008 were \$2,886,089 compared to \$2,838,949 for the three months ended September 30, 2007. The increase of \$47,140 for the three month period was primarily due to increases in the sales efforts at Innercool including major advertising expense, offset by reductions in printing and stock exchange filing fees. The increase was also due to higher rent expense resulting from the relocation of our corporate headquarters as the lease for our prior facility was due to expire and we had no renewal option.

Amortization of intangibles for the three months ended September 30, 2008 was \$197,414, as compared to \$178,156 recorded in the three months ended September 30, 2007. The increase of \$19,258 was a result of an adjustment in the amount of amortization due to the reclassification of some costs between the recorded patented technology and other intangibles in connection with our acquisition of InnerCool Therapies.

We derive interest income from the investment of our available cash in various short-term obligations, such as certificates of deposit, commercial paper and money market funds. Interest income for the three months ended September 30, 2008 was \$8,028 compared to \$146,748 for the same three month period last year. The \$138,720 decrease in interest income for the three month period when compared to the same period last year was related to the decrease in cash and cash equivalents available for investment during the respective periods and lower interest rates.

Interest expense for the three months ended September 30, 2008 was \$199,221 as a result of our commercial credit facility with Life Sciences Capital LLC. There was no interest expense recorded during the three months ended September 30, 2007 as the commercial credit facility with Life Sciences Capital was not obtained until November 12, 2007.

#### **Nine months ended September 30, 2008 compared to September 30, 2007**

## Edgar Filing: Cardium Therapeutics, Inc. - Form 10-Q

Product sales for the nine months ended September 30, 2008 were \$1,483,631 compared to \$771,762 for the nine months ended September 30, 2007. The increase of \$711,869 was due in large part to an increase in sales of InnerCool Therapies Celsius Control System resulting from our expanded sales and marketing efforts at InnerCool Therapies, as well as new sales from the launch of InnerCool Therapies CoolBlue system in late 2007. For the nine months ended September 30, 2008, grant revenues were \$374,633 compared to grant revenues of \$131,371 for the nine months ended September 30, 2007. The increase of \$243,262 in grant revenues is reflective of the level of activity as we sought to ramp up our preclinical study activities in 2008.

---

## **Table of Contents**

Cost of goods sold for the nine months ended September 30, 2008 were \$1,199,193 compared to \$823,676 for the nine months ended September 30, 2007. The increase of \$375,517 in cost of goods sold was directly related to the increase in revenues from the sale of InnerCool Therapies products.

Research and development expenses for the nine months ended September 30, 2008 were \$10,289,883 compared to \$9,901,087 for the nine months ended September 30, 2007. The increase of \$388,796 was primarily due to our efforts to advance our Excellerate product candidate in its Phase 2b clinical trial, including a \$500,000 product advancement milestone payment and the accrual of the final \$500,000 product advancement milestone payment payable in February 2009, and development costs for InnerCool's RapidBlue product as it has moved from development to production, offset by reductions in Generx (AWARE) Phase 3 clinical trial costs as spending in the nine months ended September 30, 2007 included initial product material and start-up costs not required in the recent nine month period, and a \$500,000 reversal of bonuses that were accrued at the end of 2007 and not paid. As of December 31, 2007, the Company recorded a liability for discretionary employee and officer bonuses for past performance. The payment of such bonuses was expected to take place sometime in 2008. Given the ongoing difficulties in the financial markets, which made it more challenging and expensive for companies to raise funds, the compensation committee felt it appropriate to forego the planned payment of these bonuses.

Selling, general and administrative expenses for the nine months ended September 30, 2008, were \$8,968,214 compared to \$8,356,498 for the nine months ended September 30, 2007. The increase of \$611,716 in selling, general and administrative expenses was primarily due to our expanded sales and marketing efforts at InnerCool, rent expense, professional fees and increases in headcount, offset by the reversal of \$700,000 in bonuses that were accrued at the end of 2007 and not paid, as noted above.

Interest income for the nine months ended September 30, 2008 was \$95,664 compared to \$461,371 for the nine months ended September 30, 2007. The \$365,707 decrease in interest income was related to the decrease in cash and cash equivalents available for investment during the respective periods and lower interest rates.

Interest expense for the nine months ended September 30, 2008 was \$424,501 as a result of our commercial credit facility with Life Sciences Capital LLC. There was no interest expense recorded during the nine months ended September 30, 2007 as the commercial credit facility with Life Sciences Capital was not obtained until November 12, 2007.

## **Liquidity and Capital Resources**

Our primary source of liquidity has been cash flows from financing activities and in particular proceeds from the sale of our common stock. Net cash provided by financing activities was \$6,086,893 for the nine months ended September 30, 2008, and was primarily derived from proceeds we received from the sale of our common stock, net of issuance costs. For the nine months ended September 30, 2007, net cash provided by financing activities was \$20,119,639 and for the period December 22, 2003 (inception) to September 30, 2008, net cash provided by financing activities was \$58,154,217. Net cash used in operating activities was \$12,059,610 for the nine months ended September 30, 2008 compared to \$15,719,691 for the same nine month period last year. The decrease in net cash used in operating activities was due primarily to an increase in accounts payable and other accrued liabilities at September 30, 2008. Cash used in investing activities was \$1,623,524 for the nine months ended September 30, 2008 compared to \$1,077,113 for the nine months ended September 30, 2007. The increase of \$546,411 was due to a \$500,000 product advancement milestone payment and the accrual of the final \$500,000 product advancement milestone payment payable in February 2009, offset by a reduction in the purchase of property and equipment.

Since inception, our operations have consumed substantial amounts of cash and we have had only limited revenues. We anticipate that the negative cash flow from operations will continue. On January 31, 2008, we completed a registered direct offering of our common stock that resulted in net proceeds to the Company of approximately \$5 million. On June 27, 2008, we completed a follow-on registered direct offering of our common stock that resulted in net proceeds to the Company of approximately \$3 million. On July 1, 2008 we paid off the principal balance on our commercial credit facility out of the proceeds from the June 2008 offering. On July 18, 2008, we completed a second registered direct offering for which we received net proceeds of approximately \$3 million.

As of September 30, 2008, we had \$126,575 in cash and cash equivalents. On November 10, 2008, we completed a secured debt financing for which we received proceeds of approximately \$6 million before placement agent fees and offering expenses (see Note 8). With the completion of our recent debt offering, we believe we will be able to fund required operations for approximately the next three months, not including efforts to accelerate the study of our Generx and Excellerate product candidates and actively promote the launches of InnerCool's CoolBlue and RapidBlue product lines. As a result, we will need to raise additional funds through the sale of equity securities, debt financings, strategic licensing agreements and/or other corporate transactions. If we do not raise such funds, we will not be able to accelerate our product development activities or maintain operations. Management has been in discussions to raise additional funds but there is no assurance we will succeed in these efforts. If we are not successful in obtaining additional funds,

---

**Table of Contents**

we will need to scale back our operations and/or sell or partner certain development projects or products, or our operations may not be able to continue as planned or at all. The previously described conditions raise substantial doubt about the Company's ability to continue as a going concern. The condensed consolidated financial statements do not include any adjustments related to the recoverability of assets or classifications of liabilities that might be necessary should we be unable to continue as a going concern.

**Off-Balance Sheet Arrangements**

As of September 30, 2008, we did not have any significant off-balance sheet debt nor did we have any transactions, arrangements, obligations (including contingent obligations) or other relationships with any unconsolidated entities or other persons that have or are reasonably likely to have a material current or future effect on financial condition, changes in financial condition, results of operations, liquidity, capital expenditures, capital resources, or significant components of revenue or expenses material to investors. As of September 30, 2008, we had operating lease obligations of approximately \$4,236,921 extending through 2013.

**Special Note About Forward-Looking Statements**

Certain statements in this report, including information incorporated by reference, are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, Section 21E of the Securities Exchange Act of 1934, and the Private Securities Litigation Reform Act of 1995. Forward-looking statements reflect current views about future events and financial performance based on certain assumptions. They include opinions, forecasts, intentions, plans, goals, projections, guidance, expectations, beliefs or other statements that are not statements of historical fact. Words such as may, will, should, could, would, expects, plans, believes, anticipates, intends, estimates, projects, or the negative or other variation of such words, and similar expressions may identify a statement as a forward-looking statement. Any statements that refer to projections of our future financial performance, our anticipated growth and trends in our business, our goals, strategies, focus and plans, and other characterizations of future events or circumstances, including statements expressing general optimism about future operating results and the development of our products, are forward-looking statements. Forward-looking statements in this report may include statements about:

future financial and operating results;

our ability to fund operations and business plans, and the timing of any funding we obtain;

the timing, conduct and outcome of discussions with regulatory agencies, regulatory submissions and clinical trials and product launches;

the performance of Generx™, InnerCool Therapies Celsius Control System™ and RapidBlue™ and CoolBlue™ systems, Excellerate™, and other product candidates and their potential to attract development partners and/or generate revenues;

our beliefs and opinions about the safety and efficacy of our products and product candidates and the results of our clinical studies and trials;

the development or commercialization of competitive products or medical procedures;

our development of new products and product candidates;

our growth, expansion and acquisition strategies, the success of such strategies, and the benefits we believe can be derived from such strategies;

the outcome of litigation matters;

our intellectual property rights and those of others, including actual or potential competitors;

the ability to enter into acceptable relationships with one or more contract manufacturers or other service providers on which we may depend and the ability of such contract manufacturers or other service providers to manufacture biologics or devices or to provide services of an acceptable quality on a cost-effective basis;

our personnel, consultants and collaborators;

operations outside the United States;

current and future economic and political conditions;

overall industry and market performance;

the impact of accounting pronouncements;

management's goals and plans for future operations; and

other assumptions described in this report underlying or relating to any forward-looking statements.

## **Table of Contents**

The forward-looking statements in this report speak only as of the date of this report and caution should be taken not to place undue reliance on any such forward-looking statements. Forward-looking statements are subject to certain events, risks, and uncertainties that may be outside of our control. When considering forward-looking statements, you should carefully review the risks, uncertainties and other cautionary statements in this report as they identify certain important factors that could cause actual results to differ materially from those expressed in or implied by the forward-looking statements. These factors include, among others, the risks described under Item 1A of Part II and elsewhere in this report and in our 2007 Annual Report, as well as in other reports and documents we file with the SEC.

Unless the context requires otherwise, all references in this report to the Company, Cardium, we, our, and us refer to Cardium Therapeutics, and, as applicable, InnerCool Therapies, Inc. and Tissue Repair Company, each a wholly-owned subsidiary of Cardium.

### **ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

We are exposed to a limited level of market risk, which is the potential loss arising from adverse changes in market rates and prices, such as interest rates, due to the investment of our available cash and cash equivalents in various instruments.

The goal of our investment activities is to preserve principal while seeking to increase income received on our investments without significantly increasing risk. In the normal course of business, we employ established policies and procedures to manage our exposure to changes in the fair value of our investments. We generally do not, however, enter into derivatives or other financial instruments for trading or speculative purposes or to otherwise manage our exposure to interest rate changes. Generally, we seek to limit our exposure to risk by investing substantially in short-term, investment grade securities, such as commercial paper, certificates of deposit and money market funds. The amount of interest income we receive on our investments will vary with changes in the general level of interest rates in the United States, generally decreasing as interest rates decrease and increasing as interest rates increase.

While we cannot predict with any certainty our future exposure to fluctuations in interest rates or other market risks or the impact, if any, such fluctuations may have on our future business, consolidated financial condition, results of operations or cash flows, due to the short-term, investment grade nature of our investments, we do not believe our exposure to market risk from our investments is material.

### **ITEM 4. CONTROLS AND PROCEDURES**

We maintain certain disclosure controls and procedures. They are designed to help ensure that material information is: (1) gathered and communicated to our management, including our principal executive and financial officers, on a timely basis; and (2) recorded, processed, summarized, reported and filed with the SEC as required under the Securities Exchange Act of 1934, as amended.

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures as of September 30, 2008. Based on such evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective for their intended purpose described above.

There were no changes to our internal control over financial reporting during the quarterly period ended September 30, 2008 that have materially affected, or that are reasonably likely to materially affect, our internal control over financial reporting.

**Table of Contents**

**PART II OTHER INFORMATION**

**ITEM 1. LEGAL PROCEEDINGS**

From time to time, we may become involved in various investigations, claims and legal proceedings that arise in the ordinary course of our business. These matters may relate to intellectual property, employment, tax, regulation, contract or other matters. The resolution of these matters as they arise will be subject to various uncertainties and, even if such claims are without merit, could result in the expenditure of significant financial and managerial resources.

As of November 7, 2008, neither Cardium nor its subsidiaries were a party to any pending legal proceeding considered material to their businesses nor was any of their property the subject of any material pending legal proceeding. We anticipate, however, that we will be regularly engaged in various patent prosecution and related matters in connection with the technology we develop and/or license. To the extent we are not successful in defending against any adverse claims concerning our technology, we could be compelled to seek licenses from one or more third parties who could be direct or indirect competitors and who might not make licenses available on terms that we find commercially reasonable or at all. In addition, any such proceedings, even if decided in our favor, involve lengthy processes, are subject to appeals, and typically result in substantial costs and diversion of resources.

**ITEM 1A. RISK FACTORS**

There have been no material changes from the risk factors previously disclosed in our 2007 Annual Report. You should carefully consider the risks described under Item 1A of our 2007 Annual Report, as well as the other information in our 2007 Annual Report, this report and other reports and documents we file with the SEC, when evaluating our business and future prospects. If any of the identified risks actually occur, our business, financial condition and results of operations could be seriously harmed. In that event, the market price of our common stock could decline and you could lose all or a portion of the value of your investment in our common stock.

**ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS**

During the quarterly period ended September 30, 2008, we did not sell any unregistered securities.

**ITEM 3. DEFAULTS UPON SENIOR SECURITIES**

None.

**ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS**

None.

**ITEM 5. OTHER INFORMATION**

None.

**Table of Contents****ITEM 6. EXHIBITS**

The following exhibit index shows those exhibits filed with this report and those incorporated by reference:

**EXHIBIT INDEX**

<b>Exhibit Number</b>	<b>Description</b>	<b>Incorporated By Reference To</b>
2.1	Agreement and Plan of Merger dated as of October 19, 2005 and effective as of October 20, 2005, by and among Aries Ventures Inc., Aries Acquisition Corporation and Cardium Therapeutics, Inc.	Exhibit 2.1 of our Current Report on Form 8-K dated October 20, 2005, filed with the commission on October 26, 2005
