FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

ITEM 1. *Financial Statements and Supplementary Data**(Unaudited) (Continued)*

September 30, 2009

Note 1 Basis of Presentation

The accounting and reporting policies of First Commonwealth conform with accounting principles generally accepted in the United States of America. The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates, assumptions and judgments that affect the amounts reported in the financial statements and accompanying notes. Actual realized amounts could differ from those estimates. In the opinion of management, the unaudited interim consolidated financial statements include all adjustments (consisting of only normal recurring adjustments) necessary for a fair presentation of First Commonwealth's financial position, results of operations, cash flows, and changes in shareholders' equity as of and for the periods presented.

The results of operations for the nine months ended September 30, 2009 and 2008 are not necessarily indicative of the results that may be expected for the full year or any other interim period. These interim financial statements should be read in conjunction with First Commonwealth's 2008 Annual Report on Form 10-K which is available on First Commonwealth's website at <http://www.fcbanking.com>. First Commonwealth's website also provides additional information of interest to investors and clients, including other regulatory filings made to the Securities and Exchange Commission, press releases, historical stock prices, dividend declarations, corporate governance information, policies, and documents as well as information about products and services offered by First Commonwealth.

Note 2 Supplemental Comprehensive Income Disclosures

The following table identifies the related tax effects allocated to each component of other comprehensive income in the Consolidated Statements of Changes in Shareholders' Equity:

	September 30, 2009			September 30, 2008		
	(dollars in thousands)					
	Pre-tax Amount	Tax (Expense) Benefit	Net of Tax Amount	Pre-tax Amount	Tax (Expense) Benefit	Net of Tax Amount
Unrealized gains (losses) on securities:						
Unrealized holding gains (losses) arising during the period	\$ 45,554	\$ (15,944)	\$ 29,610	\$ (66,161)	\$ 23,156	\$ (43,005)
Noncredit related losses on securities not expected to be sold	(37,953)	13,284	(24,669)	-0-	-0-	-0-
Less: reclassification adjustment for losses (gains) realized in net income (loss)	30,445	(10,656)	19,789	7,721	(2,702)	5,019

Table of Contents

FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

ITEM 1. *Financial Statements and Supplementary Data*

(Unaudited) (Continued)

September 30, 2009

Note 3 Supplemental Cash Flow Disclosures

The following table presents information related to cash paid during the year for interest and income taxes as well as detail on noncash investing and financing activities.

	For the Nine Months Ended September 30, 2009 2008 (dollars in thousands)	
Cash paid during the current year for:		
Interest	\$ 71,837	\$ 113,133
Income taxes	\$ 3,900	\$ 8,600
Noncash investing and financing activities:		
ESOP loan reductions	\$ 1,500	\$ 1,500
Loans transferred to other real estate owned and repossessed assets	\$ 27,679	\$ 6,921
Investments purchased, not settled	\$ -0-	\$ (16,462)
Net unrealized gains (losses) on securities available for sale	\$ 38,046	\$ (58,440)
<u>Correction of Prior Period Error in Cash Flow</u>		

For reporting periods prior to March 31, 2009, we have identified an error in the line classification on our Consolidated Statements of Cash Flows. In these periods, we presented the change in Payable due to investments purchased/not settled in the Operating Activities section of the Consolidated Statements of Cash Flows, instead of in the Investing Activities section.

The error has been corrected in the Consolidated Statements of Cash Flows presented on page 7 by removing the transaction from the Operating Activities section and including it in the Investing Activities section. Also, unsettled transactions related to the purchase or sale of investment securities are now presented as part of the noncash transaction disclosure table presented above.

We have not amended or restated any prior period filings as this error does not impact our reported net income, net cash flows, or shareholders equity.

The effect of the correction of this error on Net cash (used in) provided by operating activities and Net cash (used in) provided by investing activities for prior reporting periods is reflected below.

	For the Nine Months Ended September 30, 2008	For Years Ended December 31, 2008 2007 2006 (dollars in thousands)

Note 4 Variable Interest Entities				

Note 4 Variable Interest Entities

In December 2003, the Financial Accounting Standards Board (FASB) issued FASB Accounting Standards Codification (ASC) 810-10,

Consolidation . As defined by ASC 810-10, a Variable Interest Entity (VIE) is a corporation, partnership, trust or any other legal structure used for business purposes that either (a) does not have equity investors with voting rights or (b) has equity investors that do not provide sufficient financial resources for the entity to support its activities. Under ASC 810-10, an entity that holds a variable interest in a VIE is required to consolidate the VIE if the entity is deemed to be the primary beneficiary, which generally means it is subject to a majority of the risk of loss from the VIE's activities, is entitled to receive a majority of the entity's residual returns, or both.

As part of its community reinvestment initiatives, First Commonwealth invests in qualified affordable housing projects as a limited partner. First Commonwealth receives Federal affordable housing tax credits and rehabilitation tax credits for these limited partnership investments. First Commonwealth's carrying value, or its maximum potential exposure, to these partnerships is \$1.3 million as of September 30, 2009, which consists of eleven limited partnership investments. Management evaluates the limited partnerships annually for impairment and recorded a \$1.2 million impairment charge in the fourth quarter of 2008. Based on ASC 810-10, First Commonwealth has determined that these investments will not be consolidated but continue to be accounted for under the equity method whereby First Commonwealth's portion of the partnership's results are recognized as earned.

Note 5 Commitments and Letters of Credit

Standby letters of credit are conditional commitments issued by First Commonwealth to guarantee the performance of a customer to a third party. The contract or notional amount of these instruments reflects the maximum amount of future payments that First Commonwealth could be required to pay under the guarantees if there were a total default by the guaranteed parties, without consideration of possible recoveries under recourse provisions or from collateral held or pledged. In addition, many of these commitments are expected to expire without being drawn upon; therefore, the total commitment amounts do not necessarily represent future cash requirements.

September 30, 2009

Note 5 Commitments and Letters of Credit (Continued)

The following table identifies the notional amount of those instruments at September 30, 2009 (dollars in thousands):

Commitments to extend credit	\$ 1,674,406
Financial standby letters of credit	\$ 88,020
Performance standby letters of credit	\$ 76,585
Commercial letters of credit	\$ 29

The current notional amounts outstanding above include financial standby letters of credit of \$13.9 million, performance standby letters of credit of \$3.9 million, and commercial letters of credit of \$9 thousand issued during the first nine months of 2009. A liability of \$308 thousand has been recorded which represents the fair value of letters of credit issued in 2008 and 2009. See Note 10, Fair Value of Assets and Liabilities, for additional information.

	41,264	42,323
Mortgage Backed Securities Residential (a)	133	143
Total Debt Securities	\$ 41,397	\$ 42,466

- (a) Mortgage Backed Securities Residential include an amortized cost of \$30 million and a fair value of \$33 million for Obligations of U.S. Government Agencies issued by the Ginnie Mae. Obligations of U.S. Government-sponsored enterprises includes obligations issued by Fannie Mae and Freddie Mac which had an amortized cost of \$103 million and a fair value of \$110 million.

For the nine months ended September 30, 2009, net securities gains included \$39 thousand in gains and no losses for debt securities held to maturity.

Note 7 Impairment of Investment Securities

As required by FASB ASC Topic 320, Investments Debt and Equity Securities, credit related other-than-temporary impairment on debt securities is recognized in earnings while noncredit related other-than-temporary impairment on debt securities not expected to be sold is recognized in other comprehensive income (OCI). In the third quarter of 2009, we recorded \$11.9 million in other-than-temporary impairment charges on ten trust preferred collateralized debt obligations. All of the securities for which other-than-temporary impairment was recorded were classified as available for sale securities. Additionally, \$13.6 million in noncredit related other-than-temporary impairment was recorded in OCI on our trust preferred collateralized debt obligations.

First Commonwealth early adopted the new authoritative accounting guidance under FASB ASC Topic 320 as of March 31, 2009. The following table shows the effect on the first quarter 2009 of this adoption (dollars in thousands, except share data):

Edgar Filing: FIRST COMMONWEALTH FINANCIAL CORP /PA/ - Form 10-Q

	Prior to Adoption	After Adoption	Effect of Adoption

Table of Contents

FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

ITEM 1. *Financial Statements and Supplementary Data**(Unaudited) (Continued)*

September 30, 2009

Note 7 Impairment of Investment Securities (Continued)

In accordance with the new guidance, the noncredit related portion of other-than-temporary impairment losses recognized in prior year earnings was reclassified as a cumulative effect adjustment that increased retained earnings and decreased accumulated OCI at the beginning of the year. In 2008, \$13.0 million in other-than-temporary impairment charges were recognized, of which \$6.5 million related to noncredit related impairment on debt securities. Therefore, the cumulative effect adjustment to retained earnings totaled \$6.5 million, or \$4.2 million net of tax.

First Commonwealth utilizes the specific identification method to determine the net gain or loss on debt securities and the average cost method to determine the net gain or loss on equity securities.

We review our investment portfolio on a quarterly basis for indications of impairment. This review includes analyzing the length of time and the extent to which the fair value has been lower than the cost, the financial condition and near-term prospects of the issuer, including any specific events which may influence the operations of the issuer and the intent and ability to hold the investment for a period of time sufficient to allow for any anticipated recovery in the market. We evaluate our intent and ability to hold debt securities based upon our investment strategy for the particular type of security and our cash flow needs, liquidity position, capital adequacy and interest rate risk position. In addition, the risk of future other-than-temporary impairment may be influenced by additional bank failures, prolonged recession in the U.S. economy, changes in real estate values, interest deferrals, and whether the federal government continues to provide assistance to financial institutions. Our pooled trust preferred collateralized debt obligations are beneficial interests in securitized financial assets within the scope of FASB ASC Topic 325,

Investments Other, and are therefore evaluated for other-than-temporary impairment using management's best estimate of future cash flows. If these estimated cash flows determine that it is probable an adverse change in cash flows has occurred, then other-than-temporary impairment would be recognized in accordance with FASB ASC Topic 320. There is a risk that this quarterly review could result in First Commonwealth recording other-than-temporary impairment charges in the future. See Note 10 Fair Values of Assets and Liabilities for additional information.

The following table presents the gross unrealized losses and fair values at September 30, 2009 for both available for sale and held to maturity securities by investment category and time frame for which the loss has been outstanding (dollars in thousands):

FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

ITEM 1. *Financial Statements and Supplementary Data**(Unaudited) (Continued)*

September 30, 2009

Note 7 Impairment of Investment Securities (Continued)

At September 30 2009, 1.5% of the total unrealized losses were comprised of fixed income securities issued by U.S. Government agencies, U.S. Government-sponsored enterprises and investment grade municipalities. Corporate fixed income comprised 7.9% of the total unrealized losses, while pooled trust preferred collateralized debt obligations accounted for 90.2% and equity securities accounted for the remaining 0.4%. The unrealized losses in the equity securities category consist of five issues, none of which has been in a continuous unrealized loss position for more than twelve months.

Corporate securities had a total unrealized loss of \$3.6 million as of September 30, 2009. Included in this category are single issue trust preferred securities and corporate debentures issued primarily by money center and large regional banks. As of September 30, 2009, our single issue trust preferred securities had an amortized cost of \$22.5 million and an estimated fair value of \$19.0 million, while our corporate debentures had a book value of \$1.2 million and an estimated fair value of \$1.2 million. After a review of each of the issuer's asset quality, earnings trend and capital position, it was determined that none of these issues were other-than-temporarily impaired. Additionally, all interest payments on these securities are being made as contractually required.

The following table presents the gross unrealized losses and fair values at December 31, 2008 for both available for sale and held to maturity securities by investment category and time frame for which the loss has been outstanding (dollars in thousands):

Description of Securities	Less Than 12 Months		12 Months or More		Total

As of September 30, 2009, the book value of our pooled trust preferred collateralized debt obligations totaled \$75.3 million with an estimated fair value of \$33.6 million, which includes securities comprised of 372 banks and other financial institutions. Two of our pooled securities are senior tranches and the remainder are mezzanine tranches. During the first quarter of 2009, all of the pooled issues were downgraded by Moody's Investor Services. Two of the pooled issues, representing \$12.4 million of the \$75.3 million book value, remain above investment grade. At the time of initial issue, the subordinated tranches ranged in size from approximately 7.3% to 35.4% of the total principal amount of the respective securities and no more than 5% of any pooled security consisted of a security issued by any one institution. As of September 30, 2009, after taking into account

Lack of liquidity in the market for trust preferred collateralized debt obligations, credit rating downgrades and market uncertainties related to the financial industry are factors contributing to the impairment on these securities.

On a quarterly basis we evaluate our debt securities for other-than-temporary impairment. In the third quarter of 2009, \$11.9 million in credit related other-than-temporary impairment charges were recognized on our pooled trust preferred collateralized debt obligations. When evaluating these investments we determine a credit related portion and a noncredit related portion of other-than-temporary impairment. The credit related portion is recognized in earnings and represents the expected shortfall in future cash flows. The noncredit related portion is recognized in other comprehensive income and represents the difference between the fair value of the security and the amount of credit related impairment. A

discounted cash flow analysis provides the best estimate of credit

Note 7 Impairment of Investment Securities (Continued)

related other-than-temporary impairment for these securities. Additional information related to this analysis follows:

Our pooled trust preferred collateralized debt obligations are measured for other-than-temporary impairment within the scope of FASB ASC Topic 325 by determining whether it is probable that an adverse change in estimated cash flows has occurred. Determining whether there has been an adverse change in estimated cash flows from the cash flows previously projected involves comparing the present value of remaining cash flows previously projected against the present value of the cash flows estimated at September 30, 2009. We consider the discounted cash flow analysis to be our primary evidence when determining whether credit related other-than-temporary impairment exists.

Results of a discounted cash flow test are significantly affected by other variables such as the estimate of future cash flows, credit worthiness of the underlying banks and determination of probability of default of the underlying collateral. The following provides additional information for each of these variables:

Estimate of Future Cash Flows Cash flows are constructed in an INTEX cash flow model. INTEX is a proprietary cash flow model recognized as the industry standard for analyzing all types of collateralized debt obligations. It includes each deal's structural features updated with trustee information, including asset-by-asset detail, as it becomes available. The modeled cash flows are then used to estimate if all the scheduled principal and interest payments of our investments will be returned.

Credit Analysis A quarterly credit evaluation is performed for each of the 372 banks comprising the collateral across the various pooled trust preferred securities. Our credit evaluation considers all evidence available to us and includes the nature of the issuer's business, its years of operating history, corporate structure, loan composition, loan concentrations, deposit mix, asset growth rates, geographic footprint and local economic environment. Our analysis focuses on profitability, return on assets, shareholders' equity, net interest margin, credit quality ratios, operating efficiency, capital adequacy, and liquidity.

Probability of Default A probability of default is determined for each bank and is used to calculate the expected impact of future deferrals and defaults on our expected cash flows. Each bank in the collateral pool is assigned a probability of default for each year until maturity. Banks currently in default or deferring interest payments are assigned a 100% probability of default. All other banks in the pool are assigned a probability of default based on their unique credit characteristics and market indicators. A 10% projected recovery rate is applied to projected deferrals and a 0% projected recovery rate is applied to defaults. The probability of default is updated quarterly. As of September 30, 2009, default probabilities for performing collateral ranged from 0.35% to 75%.

Our credit evaluation provides a basis for determining deferral and default probabilities for each underlying piece of collateral. Using the results of the credit evaluation, the next step of the process is to look at pricing of senior debt or credit default swaps for the issuer (or where such information is unavailable, for companies having similar credit profiles as the issuer). The pricing of these market indicators provides the information necessary to determine appropriate default probabilities for each bank.

ITEM 1. *Financial Statements and Supplementary Data**(Unaudited) (Continued)*

September 30, 2009

Note 7 Impairment of Investment Securities (Continued)

In addition to the above factors, our evaluation of impairment also includes a stress test analysis which provides an estimate of excess subordination for each tranche. We stress the cash flows of each pool by increasing current default assumptions to the level of defaults which results in an adverse change in estimated cash flows. This stressed breakpoint is then used to calculate excess subordination levels for each pooled trust preferred security. The results of the stress test allows management to identify those pools that are at a greater risk for a future break in cash flows so that we can monitor banks in those pools more closely for potential deterioration of credit quality.

Based upon the analysis performed by management as of September 30, 2009, it is probable that ten of our pooled trust preferred securities will experience principal and interest shortfalls. These securities are identified in the table on page 17 with 0.00% Excess Subordination as a % of Current Performing Collateral. The \$11.9 million in credit related other-than-temporary impairment charges recognized in the third quarter of 2009 are primarily the result of additional interest deferrals within these pools. Our analysis as of September 30, 2009 indicates it is probable that we will collect all contractual principal and interest payments on the four remaining pooled trust preferred securities.

The table below provides a cumulative roll forward of credit losses recognized in earnings for debt securities held and not intended to be sold:

	For the Three Months Ended September 30, 2009	For the Nine Months Ended September 30, 2009
	(dollars in thousands)	
Balance, beginning (a)	\$ 18,603	\$ 2,516
Credit losses on debt securities for which other-than-temporary impairment was not previously recognized	3,212	23,097
Additional credit losses on debt securities for which other-than-temporary impairment was previously recognized	8,691	4,893
Balance, ending	\$ 30,506	\$ 30,506

- (a) The beginning balance represents credit related losses included in other-than-temporary impairment charges recognized on debt securities in prior periods. For the three months ended September 30, 2009, the beginning balance represents impairment losses taken before July 1, 2009. For the nine months ended September 30, 2009, the beginning balance represents impairment losses taken before January 1, 2009.

On a quarterly basis, management evaluates equity securities for other-than-temporary impairment by reviewing the severity and duration of decline in fair value, research reports, analysts' recommendations, credit rating changes, news stories, annual reports, regulatory filings, impact of interest rate changes, and other relevant information. Based on the results of this review, management believes that the equity securities in an unrealized loss position will equal or exceed our cost basis within a reasonable period of time.

We previously disclosed our evaluation of the impact of subsequent events relating to two banks with securities in our pooled trust preferred securities on our impairment analysis of those pools as of December 31, 2008, in response to comments raised by the staff of the Securities and Exchange Commission (SEC). Based upon this evaluation, we determined that the impact of those events on our impairment analysis at

December 31, 2008 was not material. The SEC staff has subsequently advised us that it has completed its review of our Annual Report on

September 30, 2009

Note 7 Impairment of Investment Securities (Continued)

Form 10-K for the year ended December 31, 2008 and our Quarterly Report on Form 10-Q for the quarter ended March 31, 2009 and has no further comments at this time.

Note 8 Impaired Loans

The following table identifies impaired loans, and information regarding the relationship of impaired loans to the allowance for credit losses at September 30:

	2009	2008
	(dollars in thousands)	
Recorded investment in impaired loans at end of period	\$ 133,827	\$ 49,828
Average balance of impaired loans for the nine month period	\$ 66,050	\$ 50,516
Allowance for credit losses related to impaired loans	\$ 47,910	\$ 13,328
Impaired loans with an allocation of the allowance for credit losses	\$ 111,188	\$ 41,912
Impaired loans with no allocation of the allowance for credit losses	\$ 22,639	\$ 7,916
Income recorded on impaired loans on a cash basis	\$ 404	\$ 391

Impaired loans increased \$84.0 million to \$133.8 million at September 30, 2009 compared to \$49.8 million at September 30, 2008. As of September 30, 2009, commercial loans outside of Pennsylvania accounted for \$84.7 million of the \$133.8 million of total impaired loans. During the third quarter of 2009, impaired loans increased \$51.9 million from June 30, 2009. Significant additions to impaired loans in the third quarter of 2009 include the following:

A \$38.8 million real estate construction project in Florida.

A \$10.8 million commercial real estate loan in Pennsylvania.

An \$8.2 million real estate construction loan in Lake Tahoe, Nevada which was 90 days delinquent at quarter end and is part of our SNC portfolio.

A \$4.9 million commercial loan to a manufacturer of semiconductors in Texas which is part of our SNC portfolio.

A \$4.5 million real estate construction loan for residential lot development in Pennsylvania.

Loans past due in excess of 90 days and still accruing increased \$650 thousand, or 4.7%, to \$14.4 million at September 30, 2009 compared to \$13.7 million at September 30, 2008.

Note 9 Income Taxes

At January 1, 2009 and September 30, 2009, First Commonwealth had no material unrecognized tax benefits or accrued interest and penalties. If applicable, First Commonwealth will record interest and penalties as a component of non-interest expense. Federal and state tax years 2006 through 2008 were open for examination as of September 30, 2009.

FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

ITEM 1. *Financial Statements and Supplementary Data*

(Unaudited) (Continued)

September 30, 2009

Note 10 Fair Values of Assets and Liabilities

FASB ASC Topic 825, *Financial Instruments* permits entities to irrevocably elect to measure select financial instruments and certain other items at fair value. The unrealized gains and losses are required to be included in earnings each reporting period for the items that fair value measurement is elected. First Commonwealth elected not to measure any existing financial instruments at fair value under FASB ASC Topic 825; however, in the future we may elect to adopt this guidance for select financial instruments.

FASB ASC Topic 820, *Fair Value Measurements and Disclosures* defines fair value and the methods used for measuring fair value as well as requiring additional disclosures; however, it does not expand the use of fair value measurements. New authoritative accounting guidance issued under FASB ASC Topic 820 became effective January 1, 2009 and requires disclosures for nonfinancial assets and nonfinancial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). All nonfinancial assets are included either as a separate line item on the Consolidated Statements of Financial Condition or in the *Other assets* category of the Consolidated Statements of Financial Condition. Currently, First Commonwealth does not have any nonfinancial liabilities to disclose. FASB also issued new authoritative accounting guidance under FASB ASC Topic 820 in October 2008, which relates to determining fair values when there is no active market and additional guidance in April 2009 which provides guidelines for making fair value measurements more consistent with the other principles presented in FASB ASC Topic 820 when the volume and level of activity for assets or liabilities have significantly decreased. As permitted, we early adopted the new authoritative accounting guidance under FASB ASC Topic 820 on March 31, 2009.

In accordance with FASB ASC Topic 820, First Commonwealth groups financial assets and financial liabilities measured at fair value in three levels, based on the principal markets in which the assets and liabilities are transacted and the observability of the data points used to determine fair value. These levels are:

Level 1 Valuations for assets and liabilities traded in active exchange markets, such as the New York Stock Exchange. Valuations are obtained from readily available pricing sources for market transactions involving identical assets or liabilities. Level 1 securities include equity holdings comprised of publicly traded bank stocks.

Level 2 Valuations for assets and liabilities traded in less active dealer or broker markets. Valuations are obtained for identical or comparable assets or liabilities from alternative pricing sources with reasonable levels of price transparency. Level 2 includes U.S. Government securities, municipal securities, Federal Home Loan Bank (FHLB) stock, interest rate derivatives that include interest rate swaps and risk participation agreements, other real estate owned, and impaired loans.

Level 3 Valuations for assets and liabilities that are derived from other valuation methodologies, including option pricing models, discounted cash flow models and similar techniques, and not based on market exchange, dealer, or broker traded transactions. If the inputs used to provide the evaluation are unobservable and/or there is very little, if any, market activity for the security or similar securities, the securities would be considered Level 3 securities. Level 3 valuations incorporate certain assumptions and projections in determining the fair value assigned to such assets or liabilities. The assets included in Level 3 are select municipal securities, corporate securities, pooled trust preferred collateralized debt obligations, nonmarketable equity investments, and impaired loans.

In accordance with FASB ASC Topic 820, fair values for investment securities were based on quoted market prices, if available, and were classified as Level 1. If quoted market prices were not available, the valuation for

Table of Contents

ITEM 1. *Financial Statements and Supplementary Data*

(Unaudited) (Continued)

September 30, 2009

Note 10 Fair Values of Assets and Liabilities (Continued)

investments utilized pricing models that varied based on asset class and included available trade, bid and other observable market information. Securities priced using this information are classified as Level 2.

Corporate securities include single issue trust preferred securities whose fair values were obtained from pricing sources with reasonable pricing transparency, taking into account other unobservable inputs related to the risks for each issuer. These valuations were classified as Level 3 due to the inactivity in the markets.

Our pooled trust preferred collateralized debt obligations are collateralized by the trust preferred securities of individual banks, thrifts and bank holding companies in the U.S. There has been little or no active trading in these securities for approximately fifteen months; therefore it was more appropriate to determine fair value using a discounted cash flow analysis. Detail on our process for determining the appropriate cash flows for this analysis is provided in Note 7, Impairment of Investment Securities. The discount rate applied to the cash flows is determined by evaluating the current market yields for comparable corporate and structured credit products along with an evaluation of the risks associated with the cash flows of the comparable security. Due to the fact that there is no active market for the trust preferred collateralized debt obligations, one key reference point is the market yield for the single issue trust preferred securities issued by banks and thrifts for which there is more activity than for the pooled securities. Adjustments are then made to reflect the credit and structural differences between these two security types.

Interest rate derivatives are reported at fair value utilizing Level 2 inputs and are included in Other Assets and Other Liabilities. First Commonwealth values its interest rate swap positions using a yield curve by taking market prices/rates for an appropriate set of instruments. The set of instruments currently used to determine the US Dollar yield curve includes cash LIBOR rates from overnight to three months, Eurodollar futures contracts, and swap rates from three years to thirty years. These yield curves determine the valuations of interest rate swaps. Interest rate derivatives are further described in Note 12, Derivatives.

For purposes of potential valuation adjustments to our derivative positions, First Commonwealth evaluates the credit risk of its counterparties as well as our own credit risk. Accordingly, we have considered factors such as the likelihood of default, expected loss given default, net exposures, and remaining contractual life, among other things, in determining if any fair value adjustments related to credit risk are required. We review our counterparty exposure quarterly, and, when necessary, appropriate adjustments are made to reflect the exposure. We also utilize this approach to estimate our own credit risk on derivative liability positions. To date, we have not realized any losses due to a counterparty's inability to pay any net uncollateralized position.

FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

ITEM 1. *Financial Statements and Supplementary Data**(Unaudited) (Continued)*

September 30, 2009

Note 10 Fair Values of Assets and Liabilities (Continued)

For the three months ended September 30, 2009, there were no transfers between levels of fair value for available for sale securities.

Losses of \$11.9 million included in earnings for the period are attributable to the change in realized gains (losses) relating to assets held at September 30, 2009 and are reported in the lines Net impairment losses on securities and Net securities gains in the Consolidated Statements of Income.

The changes in Level 3 assets and liabilities measured at fair value on a recurring basis are summarized as follows at September 30, 2008:

	Obligations of States and Political Subdivisions	Corporate Securities	Pooled Trust Preferred Collateralized Debt Obligations (dollars in thousands)	Equities	Total Fair Value
Securities Available for Sale					
Balance, beginning of quarter	\$ 3,629	\$ 9,772	\$ 82,301	\$ 1,570	\$ 97,272
Realized and unrealized credit losses included in earnings	-0-	-0-	(7,673)	-0-	(7,673)
Total losses unrealized in other comprehensive income	-0-	(1,385)	(18,160)	-0-	(19,545)
Purchases, settlements, pay downs, and maturities	-0-	-0-	(135)	-0-	(135)
Transfers to Level 2	(3,629)	-0-	-0-	-0-	(3,629)
Transfers into Level 3	-0-	10,720	-0-	-0-	10,720
Balance, end of quarter	\$ -0-	\$ 19,107	\$ 56,333	\$ 1,570	\$ 77,010

At September 30, 2008, the securities transferred from Level 3 to Level 2 were municipal securities. The securities were classified as Level 2 because the market for municipal securities became more active in the third quarter of 2008, which allowed pricing of the securities to be based on actual trades on comparable securities.

Securities totaling \$10.7 million transferred to Level 3 during the third quarter of 2008, which included \$10.2 million of trust preferred securities and a \$500 thousand corporate security. The primary reason for the transfer into Level 3 was due to the inactivity in the market that resulted in a lack of observable market activity or comparable trades that could be used to establish a benchmark for valuation.

Losses of \$7.7 million included in earnings for the period are attributable to the change in realized gains (losses) relating to assets held at September 30, 2008 and are reported in the lines Net impairment (losses) and Net securities gains in the Consolidated Statements of Income.

Table of Contents

FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

ITEM 1. *Financial Statements and Supplementary Data**(Unaudited) (Continued)*

September 30, 2009

Note 10 Fair Values of Assets and Liabilities (Continued)

The table below presents the balances of assets measured at fair value on a nonrecurring basis at September 30, 2009:

	Level 1	Level 2	Level 3	Total Fair Value
		(dollars in thousands)		
Impaired loans	\$ -0-	\$ 31,724	\$ 62,461	\$ 94,185
Other real estate owned	-0-	23,808	-0-	23,808
Total Assets	\$ -0-	\$ 55,532	\$ 62,461	\$ 117,993

Impaired loans over \$100 thousand are individually reviewed to determine the amount of each loan considered to be at risk of noncollection. The impaired loans are collateral based and the fair value is determined by reviewing real property appraisals, equipment valuations, accounts receivable listings and other financial information.

Fair value for other real estate owned is determined by an independent market based appraisal less costs to sell and is classified as level 2.

Certain other assets and liabilities, including goodwill and core deposit intangibles, are measured at fair value on a nonrecurring basis; that is, the instruments are not measured at fair value on an ongoing basis but are subject to fair value adjustments only in certain circumstances. A step one goodwill impairment test for First Commonwealth was completed as of September 30, 2009. Based on this analysis, the fair value of First Commonwealth exceeded its book value. There were no other assets or liabilities measured at fair value on a nonrecurring basis during the nine months ended September 30, 2009.

FASB ASC 825-10-65, Transition Related to FSP FAS 107-1 and APB 28-1, Interim Disclosures about Fair Value of Financial Instruments, require disclosure of the fair value of financial assets and financial liabilities, including those financial assets and financial liabilities that are not measured and reported at fair value on a recurring basis or non-recurring basis. The methodologies for estimating the fair value of financial assets and financial liabilities that are measured at fair value on a recurring or non-recurring basis are as discussed above. The methodologies for other financial assets and financial liabilities are discussed below.

Cash and short-term instruments: The carrying amounts for cash and short-term instruments approximate the estimated fair values of such assets.

Securities: Fair values for securities available for sale and securities held to maturity are based on quoted market prices, if available. If quoted market prices are not available, fair values are based on quoted market prices of comparable instruments. The carrying value of nonmarketable equity securities, such as Federal Home Loan Bank stock, is considered a reasonable estimate of fair value.

Loans: The fair values of all loans are estimated by discounting the estimated future cash flows using interest rates currently offered for loans with similar terms to borrowers of similar credit quality adjusted for past due and nonperforming loans.

Off-balance sheet instruments: Many of First Commonwealth's off-balance sheet instruments, primarily loan commitments and standby letters of credit, are expected to expire without being drawn upon; therefore, the commitment amounts do not necessarily represent future cash requirements. Management has determined that

Table of Contents

FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

ITEM 1. *Financial Statements and Supplementary Data**(Unaudited) (Continued)*

September 30, 2009

Note 10 Fair Values of Assets and Liabilities (Continued)

due to the uncertainties of cash flows and difficulty in predicting the timing of cash flows for loan commitments, fair values were not estimated for either period. FASB ASC Topic 460, *Guarantees* clarified that a guarantor is required to recognize, at the inception of a guarantee, a liability for the fair value of the obligation undertaken in issuing the guarantee. The carrying amount and estimated fair value for standby letters of credit was \$308 thousand at September 30, 2009. See Note 5, *Commitments and Letters of Credit*, for additional information.

Deposit liabilities: Management estimates that the fair value of deposits is based on a market valuation of similar deposits. The carrying value of variable rate time deposit accounts and certificates of deposit approximate their fair values at the report date. Also, fair values of fixed rate time deposits for both periods are estimated by discounting the future cash flows using interest rates currently being offered and a schedule of aggregated expected maturities.

Short-term borrowings: The estimated fair values of borrowings from the Federal Home Loan Bank were estimated based on the estimated incremental borrowing rate for similar types of borrowings. The carrying amounts of other short-term borrowings such as Federal funds purchased, securities sold under agreement to repurchase and treasury, tax and loan notes were used to approximate fair value.

Long-term debt and subordinated debt: The fair value of long-term debt and subordinated debt is estimated by discounting the future cash flows using First Commonwealth's estimated incremental borrowing rate for similar types of borrowing arrangements.

The following table presents carrying amounts and estimated fair values of First Commonwealth's financial instruments at September 30, 2009:

	Carrying Amount	Estimated Fair Value
	(dollars in thousands)	
Financial assets		
Cash and due from banks	\$ 79,694	\$ 79,694
Interest-bearing bank deposits	332	332
Securities available for sale	1,231,015	1,231,015
Securities held to maturity	41,397	42,466
Other Investments	51,431	51,431
Loans	4,649,034	4,661,600
Financial liabilities		
Deposits	\$ 4,497,037	\$ 4,351,774
Short-term borrowings	1,043,447	1,035,475
Long-term debt	179,784	183,068
Subordinated debt	105,750	149,479

Note 11 Other Investments

As a member of the Federal Home Loan Bank of Pittsburgh (FHLB), First Commonwealth is required to purchase and hold stock in the FHLB to satisfy membership and borrowing requirements. This stock is restricted in that it can only be sold to the FHLB or to another member institution, and all sales of FHLB stock must be at

Table of Contents

FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

ITEM 1. *Financial Statements and Supplementary Data*

(Unaudited) (Continued)

September 30, 2009

Note 11 Other Investments (Continued)

par. As a result of these restrictions, FHLB stock is unlike other investment securities insofar as there is no trading market for FHLB stock and the transfer price is determined by FHLB membership rules and not by market participants. As of September 30, 2009 and December 31, 2008, our FHLB stock totaled \$51.4 million and is included in Other Investments on the Consolidated Statements of Financial Condition.

In December 2008, the FHLB voluntarily suspended dividend payments on its stock, as well as the repurchase of excess stock from members. The FHLB cited a significant reduction in the level of core earnings resulting from lower short-term interest rates, the increased cost of liquidity, and constrained access to the debt markets at attractive rates and maturities as the main reasons for the decision to suspend dividends and the repurchase of excess capital stock. The FHLB last paid a dividend in the third quarter of 2008.

FHLB stock is held as a long-term investment and its value is determined based on the ultimate recoverability of the par value. First Commonwealth evaluates impairment quarterly. The decision of whether impairment exists is a matter of judgment that reflects our view of the FHLB's long-term performance, which includes factors such as the following:

its operating performance;

the severity and duration of declines in the fair value of its net assets related to its capital stock amount;

its commitment to make payments required by law or regulation and the level of such payments in relation to its operating performance;

the impact of legislative and regulatory changes on the FHLB, and accordingly, on the members of FHLB; and

its liquidity and funding position.

After evaluating all of these considerations, First Commonwealth concluded that the par value of its investment in FHLB stock will be recovered. Accordingly, no impairment charge was recorded on these securities for the nine months ended September 30, 2009. Our evaluation of the factors described above in future periods could result in the recognition of impairment charges on FHLB stock.

Note 12 Derivatives

First Commonwealth is a party to interest rate derivatives that are not designated as hedging instruments. These derivatives relate to interest rate swaps that First Commonwealth enters into with customers to allow customers to convert variable rate loans to a fixed rate. First Commonwealth pays interest to the customer at a floating rate on the notional amount and receives interest from the customer at a fixed rate for the same notional amount. At the same time the interest rate swap is entered into with the customer, an offsetting interest rate swap is entered into with another financial institution. First Commonwealth pays the other financial institution interest at the same fixed rate on the same notional amount as the swap entered into with the customer, and receives interest from the financial institution for the same floating rate on the same notional amount. The changes in the market value of the swaps offset each other, except for the credit risk of the counterparties, which was calculated by taking into consideration the risk rating, probability of default and loss given default for all counterparties.

We have three risk participation agreements with financial institution counterparties for interest rate swaps related to loans in which we are a participant. The risk participation agreements provide credit protection to the

Table of Contents

Note 12 Derivatives (Continued)

financial institution should the borrower fail to perform on its interest rate derivative contract with the financial institution. The fee received, less the estimate of the liability for the credit exposure, was recognized in earnings at the time of the transaction.

A liability of \$1.1 million was recorded for credit risk on an aggregate notional amount outstanding of \$230.9 million for interest rate derivatives and \$92.9 million for risk participation agreements at September 30, 2009. The fair value of our derivatives is included in a table in Note 10 Fair Values of Assets and Liabilities in the line items Other Assets and Other Liabilities.

The table below presents the amount representing the change in value of derivative assets and derivative liabilities attributable to credit risk included in Other income on the Consolidated Statements of Income:

	For the Three Months Ended September 30, 2009 2008 (dollars in thousands)		For the Nine Months Ended September 30, 2009 2008 (dollars in thousands)	
Non-hedging interest rate derivatives:				
Decrease in Other income	\$ 1,036	\$ 54	\$ 908	\$ 54

Note 13 New Accounting Pronouncements

New authoritative accounting guidance, Accounting Standards Update (ASU) No. 2009-5, Fair Value Measurements and Disclosures (Topic 820) Measuring Liabilities at Fair Value provides guidance for measuring the fair value of a liability in circumstances in which a quoted price in an active market for the identical liability is not available. The new authoritative accounting guidance also clarifies that when estimating the fair value of a liability, a reporting entity is not required to include a separate input or adjustment to other inputs relating to the existence of a restriction that prevents the transfer of the liability. The new authoritative accounting guidance under ASC Topic 820 is effective for interim and annual periods beginning after August 2009 and is not expected to have a material impact on First Commonwealth's financial condition or results of operations.

In June 2009, FASB issued FASB ASC Topic 105, Generally Accepted Accounting Principles. ASC Topic 105 established the FASB Accounting Standards Codification (the Codification) to become the single source of authoritative GAAP recognized by FASB to be applied by nongovernmental entities, with the exception of guidance issued by the SEC and its staff. All guidance contained in the Codification carries an equal level of authority. The provisions of ASC Topic 105 are effective for interim and annual periods ending after September 15, 2009. As the Codification did not change GAAP, the adoption of ASC Topic 105 had no impact on First Commonwealth's financial condition or results of operations.

In June 2009, the FASB issued Statement of Financial Accounting Standards No. 167 (SFAS 167), Amendments to FASB Interpretation No. 46(R). SFAS No. 167 requires a qualitative rather than a quantitative analysis to determine the primary beneficiary of a variable interest entity (VIE) for consolidation purposes. The primary beneficiary of a VIE is the enterprise that has: (1) the power to direct the activities of the VIE that most significantly impact the VIE's economic performance, and (2) the obligation to absorb losses of the VIE that could potentially be significant to the VIE or the right to receive benefits of the VIE that could potentially be

September 30, 2009

Note 13 New Accounting Pronouncements (Continued)

significant to the VIE. This statement is effective for fiscal years beginning after November 15, 2009. Management is currently evaluating the impact of adopting this standard.

In June 2009, the FASB issued Statement of Financial Accounting Standards No. 166 (SFAS 166), Accounting for Transfers of Financial Assets, an amendment of FASB Statement No. 140. SFAS No. 166 makes several significant amendments to SFAS No. 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities, including the removal of the concept of a qualifying special-purpose entity from SFAS No. 140. SFAS No. 166 also clarifies that a transferor must evaluate whether it has maintained effective control of a financial asset by considering its continuing direct or indirect involvement with the transferred financial asset. This statement is effective for fiscal years beginning after November 15, 2009. Management does not expect the adoption of SFAS 166 to have a material impact on First Commonwealth's financial condition or results of operations.

In June 2009, the FASB issued new authoritative accounting guidance under ASC Topic 855, Subsequent Events. This new guidance establishes general standards of accounting for and disclosures of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. It requires the disclosure of the date through which an entity has evaluated subsequent events and the basis for that date. ASC Topic 855 was effective for interim or annual financial periods ending after June 15, 2009. The adoption of ASC Topic 855 did not have a material impact on First Commonwealth's financial condition or results of operations.

In April 2009, FASB issued new authoritative accounting guidance under ASC Topic 820, Fair Value Measurements and Disclosures. Effective for interim and annual reporting periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009, the new guidance under ASC Topic 820

provides guidelines for making fair value measurements more consistent with the other principles presented in ASC Topic 820 when the volume and level of activity for assets or liabilities have significantly decreased. The new guidance under ASC Topic 820 relates to determining fair values when there is no active market or where the price inputs being used represent distressed sales. We early adopted the new guidance under ASC Topic 820 on March 31, 2009, and the adoption did not have a material impact on our financial condition or results of operations.

In April 2009, FASB issued new authoritative accounting guidance under ASC Topic 320, Investments Debt and Equity Securities. Effective for interim and annual reporting periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009, the new guidance under ASC Topic 320 amended other-than-temporary impairment guidance in U.S. GAAP related to the presentation and disclosure of other-than-temporary impairment on debt and equity securities in the financial statements. We early adopted the new guidance under ASC Topic 320 on March 31, 2009. In accordance with this new accounting guidance, the noncredit related portion of other-than-temporary impairment losses previously recognized in earnings during 2008 was reclassified as a cumulative effect adjustment that increased retained earnings and decreased accumulated OCI. Of the \$13.0 million in other-than-temporary impairment charges recognized in 2008, \$6.5 million related to noncredit related impairment, and accordingly, has been recorded, net of tax, as a cumulative effect adjustment in the Consolidated Statements of Changes in Shareholders' Equity as of January 1, 2009. Refer to Note 7 Impairment of Investment Securities for further discussion.

In April 2009, FASB issued new authoritative accounting guidance under ASC Topic 825, Financial Instruments. Effective for interim and annual reporting periods ending after June 15, 2009, with early adoption

Note 13 New Accounting Pronouncements (Continued)

permitted for periods ending after March 15, 2009, the new guidance under ASC Topic 825 requires disclosures about fair value of financial instruments for interim reporting periods of publicly traded companies as well as in annual financial statements. The new guidance under ASC Topic 825 only relates to disclosures and therefore did not have an impact on First Commonwealth's financial condition or results of operations. We adopted the new guidance under ASC Topic 825 on June 30, 2009.

In March 2008, FASB issued new authoritative guidance under ASC Topic 815, *Derivatives and Hedging*. Effective for fiscal years and interim periods beginning after November 15, 2008, the new guidance amends and expands the disclosure requirements of ASC Topic 815 by requiring enhanced disclosures for how and why an entity uses derivative instruments; how derivative instruments and related hedged items are accounted for under ASC Topic 815 and its related interpretations; and how derivative instruments and related items affect an entity's financial position, financial performance and cash flows. The adoption of the new authoritative guidance under ASC Topic 815 did not have a material impact on First Commonwealth's financial condition or results of operations as it only relates to disclosures.

Note 14 Subsequent Events

First Commonwealth has evaluated subsequent events through November 6, 2009, the date that these financial statements were filed with the Securities and Exchange Commission. We have incorporated into these financial statements the effect of all material known events determined by ASC Topic 855, *Subsequent Events*, to be recognizable events.

ITEM 2. *Management's Discussion and Analysis of Financial Condition*

and Results of Operations

This discussion and the related financial data are presented to assist in the understanding and evaluation of the consolidated financial condition and the results of operations of First Commonwealth Financial Corporation including its subsidiaries (First Commonwealth) for the nine months ended September 30, 2009 and 2008, and should be read in conjunction with the Consolidated Financial Statements and notes thereto included in this Form 10-Q.

Forward-Looking Statements

This report contains forward-looking statements that describe our future plans, strategies and expectations. Forward-looking statements can be identified by the fact that they do not relate strictly to historical or current facts. They often include words such as believe, expect, anticipate, intend, plan, estimate or words of similar meaning, or future or conditional verbs such as will, would, should, could or may. All forward-looking statements are based on assumptions and involve risks and uncertainties, many of which are beyond our control and which may cause our actual results, performance or achievements to differ materially from the results, performance or achievements contemplated by the forward-looking statements. These risks and uncertainties include, among other things:

Competitive pressures among depository and other financial institutions nationally and in our market areas may increase significantly.

Deepened or prolonged weakness in economic and business conditions, nationally and in our market areas, which could increase credit-related losses and expenses and/or limit growth.

Further declines in the market value of investment securities that are considered to be other-than-temporary, which would negatively impact our earnings and capital levels.

Increases in defaults by borrowers and other delinquencies could result in increases in our provision for credit losses and related expenses.

Our inability to manage growth effectively, including the successful expansion of our customer support, administrative infrastructure and internal management systems, could adversely affect our results of operations and prospects.

Fluctuations in interest rates and market prices could reduce our net interest margin and asset valuations and increase our expenses.

Reduced wholesale funding capacity or higher borrowing costs due to capital constraints at the Federal Home Loan Bank, which would reduce our liquidity and negatively impact earnings and net interest margin.

The consequences of continued bank acquisitions and mergers in our market areas, resulting in fewer but much larger and financially stronger competitors, could increase competition for financial services to our detriment.

Edgar Filing: FIRST COMMONWEALTH FINANCIAL CORP /PA/ - Form 10-Q

Changes in legislative or regulatory requirements applicable to us and our subsidiaries could increase costs, limit certain operations and adversely affect results of operations.

Changes in tax requirements, including tax rate changes, new tax laws and revised tax law interpretations may increase our tax expense or adversely affect our customers' businesses.

Other risks and uncertainties described in this report and the other reports that First Commonwealth files with the Securities and Exchange Commission, including its most recent Annual Report on Form 10-K.

In light of these risks, uncertainties and assumptions, you should not place undue reliance on any forward-looking statements in this report. We undertake no obligation to publicly update or otherwise revise any forward-looking statements, whether as a result of new information, future events or otherwise.

ITEM 2. *Management's Discussion and Analysis of Financial Condition*

and Results of Operations (Continued)

Results of Operations

Summary of Results

First Commonwealth has experienced the following developments during the third quarter of 2009 compared to the third quarter of 2008.

Net interest income increased 6.4%.

Net interest margin, on a tax equivalent basis, improved 4 basis points.

Total loans increased 11.1% and commercial loans increased 16.3%.

Average demand and savings deposits increased 19.5%.

Nonaccrual loans increased \$83.5 million primarily due to deterioration in commercial real estate construction loans as a result of economic conditions.

Provision for credit losses increased \$19.1 million.

Net impairment losses increased \$3.3 million due to deterioration in our collateralized debt obligations.

FDIC insurance costs increased \$1.9 million driven by premium increases.

Our total capital to risk weighted asset ratio improved by 50 basis points to 11.5%.

We recorded a net loss for the third quarter 2009 of \$5.9 million or \$0.07 per share, as compared to net income of \$10.2 million or \$0.14 per diluted share for the same period in 2008. The decrease in net income was primarily the result of a \$19.1 million (\$12.4 million after tax) increase in the provision for credit losses as well as an increase of \$3.3 million (\$2.1 million after tax) in other-than-temporary impairment charges. The higher provision was primarily related to commercial construction loans primarily outside of Pennsylvania in addition to two out of state commercial and industrial loans. The other-than-temporary impairment charges resulted from further credit deterioration of the company's pooled trust preferred collateralized debt obligations. FDIC insurance costs rose \$1.9 million as a result of increased assessment rates. Although we have experienced increased provision for loan loss and other-than-temporary impairment charges, we achieved growth in loans and deposits and remain well capitalized with significant liquidity.

Average diluted shares in the third quarter 2009 were 16.2% greater than the comparable quarter in 2008 primarily due to the issuance of 11.5 million shares of common stock in connection with a capital raise completed on November 5, 2008.

Edgar Filing: FIRST COMMONWEALTH FINANCIAL CORP /PA/ - Form 10-Q

We recorded a net loss for the nine months ended September 30, 2009 of \$22.8 million, or \$0.27 per share compared to net income of \$34.2 million, or \$0.47 per diluted share in the same period last year. The decrease was due to the \$67.1 million (\$43.6 million after tax) increase in the provision for credit losses and a \$21.4 million (\$13.9 million after tax) increase in other-than-temporary impairment losses related primarily to our trust preferred collateralized debt obligations. FDIC insurance costs rose \$8.0 million primarily due to premium increases and the special assessment of \$2.9 million.

ITEM 2. *Management's Discussion and Analysis of Financial Condition**and Results of Operations (Continued)***Results of Operations (Continued)****Summary of Results (Continued)**

The following table illustrates the impact on diluted earnings per share of changes in certain components of net income for the three and nine months ending September 30, 2009 compared to the prior periods and after adjusting for the effect of the 11.5 million additional shares issued in November 2008. This adjustment reduced shares used in calculating the change for each component by 11.5 million in order to be comparable to the baseline from the prior year period.

	Three Months Ended September 30, 2009	Nine Months Ended September 30, 2009
Net income per diluted share, prior year period	\$ 0.14	\$ 0.47
Increase (decrease) from change in shares outstanding	0.01	0.04
Increase (decrease) from changes in:

Income from bank owned life insurance	0.00	(0.02)
Other operating income	(0.02)	0.02
Salaries and employee benefits	0.00	(0.04)
Collection and repossession expenses	(0.01)	(0.03)
FDIC insurance	(0.03)	(0.11)
Provision for income taxes	0.11	0.40
Net loss per share	\$ (0.07)	\$ (0.27)

Net Interest Income

Net interest income increased \$3.1 million, or 6.4%, in the third quarter of 2009 from the third quarter of 2008, despite the negative impact of an increased level of nonaccrual loans. The increase was a result of both growth in earning assets and an increase in the net interest margin. Interest income decreased \$9.1 million, or 11.2%, as the contribution from loan growth was negatively offset by lower interest rates and lost income from nonaccrual loans. Interest income was negatively impacted \$1.9 million, or 12 basis points, due to the reversal of previously recorded income on loans transferred to nonaccrual. Interest expense declined \$12.1 million, or 36.5%, primarily due to a 99 basis point decline on rates paid for interest-bearing liabilities.

Average interest-earning assets increased \$251.1 million, or 4.4%, in the third quarter of 2009 compared to the third quarter of 2008, driven by an increase in average loans of \$450.8 million, or 10.9%, due primarily from loan growth experienced in the fourth quarter of 2008. This quarter-to-quarter loan growth was funded by investment run-off, deposit growth and short-term borrowings. Average investment securities decreased \$199.7 million, or 13.1%, average deposits increased \$226.8 million, or 5.3%, while average short-term borrowings, or wholesale borrowings, increased \$138.3 million. We refinanced \$190.0 million of longer term Federal Home

and Results of Operations (Continued)

Results of Operations (Continued)

Net Interest Income (Continued)

Loan Bank advances in the fourth quarter of 2008. These advances were due to mature in the first seven months of 2009 and were replaced with lower costing overnight borrowings.

In the third quarter of 2009, average interest-bearing liabilities increased \$115.1 million when compared to the third quarter of 2008. Management continued to supplement deposit growth with wholesale borrowings due to the significant spread between wholesale borrowing costs and rates paid on interest-bearing deposits. In the third quarter of 2009 compared to the third quarter of 2008, average time deposits decreased \$230.9 million, or 11.9%, which were offset with increases in lower costing transaction and savings deposits. Average noninterest-bearing demand deposits increased \$41.2 million, or 7.4%, while average interest-bearing demand and savings deposits increased \$416.5 million, or 23.3%.

The net interest margin on a tax equivalent basis for the third quarter 2009 increased 4 basis points to 3.62% compared with 3.58% in the corresponding period last year. The increase in net interest margin can be attributed to increased loan volume and declines in the cost of interest-bearing liabilities exceeding the declines in yields on total interest-earning assets. The decrease in the cost of interest-bearing liabilities can be attributed to lower interest rates, combined with a shift in the mix of our liabilities to low cost deposits and short-term borrowings from time deposits and long-term debt. First Commonwealth uses simulation models to help manage exposure to changes in interest rates. A discussion of the effects of changing interest rates is included in the **Market Risk** section of this discussion.

Net interest income increased \$17.1 million, or 12.6%, for the nine months ended September 30, 2009 from the corresponding period in 2008 despite the negative impact of loans transferred to nonaccrual status. The increase was a result of both growth in earning assets and an increase in the net interest margin. Interest income decreased \$24.4 million, or 10.0%, as the contribution from loan growth was negatively offset by lower interest rates and interest lost on nonaccrual loans. Interest expense declined \$41.6 million, or 38.1%, as a 116 basis point decline on rates paid for interest-bearing liabilities.

Average interest-earning assets increased \$274.5 million, or 4.9%, in the first nine months of 2009 compared to the comparable period in 2008 driven primarily by a \$513.1 million, or 12.8%, increase in average loans. This loan growth was partially funded by investment run-off, deposit growth and short-term borrowings. Average investment securities decreased \$238.7 million, or 14.9%, and a portion of the increase of \$355.9 million in average short-term borrowings was also due to refinancing \$190.0 million of longer term Federal Home Loan Bank advances in the fourth quarter of 2008. These advances were due to mature in the first seven months of 2009 and were replaced with lower costing overnight borrowings.

In the nine months ended September 30, 2009, average interest-bearing liabilities increased \$165.6 million when compared to the corresponding period in 2008. Management continued to supplement deposit growth with wholesale borrowings due to the significant spread between wholesale borrowing costs and rates paid on interest-bearing deposits. In the first nine months of 2009 compared to the first nine months of 2008, average time deposits decreased \$276.7 million, or 13.5%, which were offset with increases in lower costing transaction and savings deposits. Average noninterest-bearing demand deposits increased \$46.1 million, or 8.6%, and average interest-bearing demand and savings deposits increased \$319.7 million, or 18.5%.

ITEM 2. *Management's Discussion and Analysis of Financial Condition*

and Results of Operations (Continued)

Results of Operations (Continued)

Net Interest Income (Continued)

The net interest margin on a tax equivalent basis for the nine months ended September 30, 2009 increased 22 basis points to 3.69% compared with 3.47% in the corresponding period last year. The net interest margin increased despite a negative impact of \$2.3 million, or five basis points, due to the reversal of previously recorded income on loans transferred to nonaccrual during 2009. The increase in net interest margin can be attributed to increased loan volume and declines in the cost of interest-bearing liabilities exceeding the declines in yields on total interest-earning assets. The decrease in the cost of interest-bearing liabilities is the result of lower interest rates, combined with a shift in the mix of our liabilities to low cost deposits and short-term borrowings from time deposits and long-term debt.

The following table shows the effect of changes in volumes and rates on interest income and interest expense for the three and nine months ended September 30:

	Analysis of Changes in Net Interest Income (dollars in thousands)					
	Three Months Ended September 30, 2009			Nine Months Ended September 30, 2009		
	Compared with September 30, 2008			Compared with September 30, 2008		
	Total Change	Change Due to Volume	Change Due to Rate (a)	Total Change	Change Due to Volume	Change Due to Rate (a)
Interest-earning assets:						
Interest-bearing deposits with banks	\$ (1)	\$ 1	\$ (2)	\$ (6)	\$ 5	\$ (11)
Tax-free investment securities	(636)	(900)	264	(2,024)	(3,031)	1,007
Taxable investment securities	(3,239)	(1,867)	(1,372)	(8,598)	(6,667)	(1,931)
Federal funds sold	-0-	-0-	-0-	(2)	(2)	-0-
Loans	(5,200)	6,924	(12,124)	(13,813)	24,468	(38,281)
Total interest income	(9,076)	4,158	(13,234)	(24,443)	14,773	(39,216)
Interest-bearing liabilities:						
Interest-bearing demand deposits	(837)	(39)	(798)	(2,846)	(15)	(2,831)
Savings deposits	73	1,628	(1,555)	(1,130)	3,948	(5,078)
Time deposits	(5,291)	(2,084)	(3,207)	(21,032)	(8,318)	(12,714)
Short-term borrowings	(3,687)	747	(4,434)	(9,163)	6,315	(15,478)
Long-term debt	(2,390)	(2,322)	(68)	(7,400)	(7,678)	278
Total interest expense	(12,132)	(2,070)	(10,062)	(41,571)	(5,748)	(35,823)
Net interest income	\$ 3,056	\$ 6,228	\$ (3,172)	\$ 17,128	\$ 20,521	\$ (3,393)

(a) Changes in interest income or expense not arising solely as a result of volume or rate variances are allocated to rate variances due to interest sensitivity of consolidated assets and liabilities.

Provision for Credit Losses

The provision for credit losses is determined based on management's estimates of the appropriate level of allowance for credit losses needed to absorb probable losses inherent in the loan portfolio, after giving consideration to charge-offs and recoveries for the period. The provision for credit losses is an amount added to the allowance against which credit losses are charged.

The provision for credit losses for the third quarter of 2009 totaled \$23.0 million, an increase of \$19.1 million compared to the third quarter of 2008 as a result of increased nonperforming loans, loan growth and trends in losses.

Table of Contents

FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

ITEM 2. *Management's Discussion and Analysis of Financial Condition**and Results of Operations (Continued)*Results of Operations (Continued)Provision for Credit Losses (Continued)

The table below provides a breakout of the third quarter provision for credit losses by loan category:

	Dollar	Percentage
Commercial, financial, and agricultural	\$ 7,424	32.2%
Real estate construction	6,057	26.3%
Real estate residential	686	3.0%
Real estate commercial	8,675	37.7%
Loans to individuals	178	0.8%
Total	\$ 23,020	100.0%

In the third quarter, the provision related to commercial, financial and agricultural loans was primarily due to \$4.7 million allocated for two out of state loans which are both Shared National Credits (SNC) and \$1.3 million for one in market credit.

The provision related to real estate construction loans was primarily related to \$4.6 million for one out of state loan which is a SNC and \$3.1 million for one in market residential development loan. These amounts were partially offset by a \$2.9 million reduction in the provision for construction loans due to the completion of several construction projects and the related transfer of \$134.3 million from real estate construction to the real estate commercial category this quarter.

The third quarter provision related to real estate commercial loans is primarily related to \$4.1 million allocated for two in market credits and \$3.6 million related to the reserves because of the previously mentioned \$134.3 million transfer from real estate construction loans.

In the third quarter, \$9.7 million or 42.1% of the provision for credit losses resulted from SNC loans. All of these loans are outside the state of Pennsylvania and they account for 100% of the provision recorded on out of state credits this quarter.

A SNC is any loan that totals \$20 million or more and is shared by three or more unaffiliated federally supervised institutions and has been determined to be a SNC by a committee of Federal Regulators. As of September 30, 2009, our SNC portfolio consists of \$930.0 million in commitments, with outstanding loans totaling \$483.3 million. During the third quarter of 2009, there were no new commitments related to our SNC portfolio, however, as a result of the annual review by regulators some credits already in our loan portfolio were classified as SNCs. As a result, commitments related to our SNC portfolio increased from \$585.1 to \$930.0 in the third quarter.

Net credit losses were \$15.6 million in the third quarter of 2009 compared to \$2.9 million in the third quarter of 2008. Two commercial credit relationships accounted for \$11.1 million, or 71.2%, of the net credit losses in the third quarter of 2009. One credit was a commercial construction loan and the other was a commercial and industrial loan, both of which are out of state SNCs.

The allowance for credit losses was \$90.5 million at September 30, 2009, which represents a ratio of 2.00% of average loans outstanding compared to 1.13% reported at September 30, 2008. Management believes that the allowance for credit losses is at a level deemed sufficient to absorb losses inherent in the loan portfolio at September 30, 2009.

ITEM 2. *Management's Discussion and Analysis of Financial Condition**and Results of Operations (Continued)*Results of Operations (Continued)Provision for Credit Losses (Continued)

Below is an analysis of the consolidated allowance for credit losses for the nine months ended September 30:

	2009 (dollars in thousands)	2008 (dollars in thousands)
Balance, beginning of year	\$ 52,759	\$ 42,396
Loans charged off:		
Commercial, financial and agricultural	16,805	2,509
Loans to individuals	3,308	3,128
Real estate-construction	14,099	68
Real estate-commercial	6,294	2,785
Real estate-residential	2,930	1,869
Total loans charged off	43,436	10,359
Recoveries of loans previously charged off:		
Commercial, financial and agricultural	376	356
Loans to individuals	391	396
Real estate-construction	-0-	-0-
Real estate-commercial	787	228
Real estate-residential	72	12
Lease financing receivables	7	-0-
Total recoveries	1,633	992
Net credit losses	41,803	9,367
Provision charged to expense	79,510	12,453
Balance, end of period	\$ 90,466	\$ 45,482

Additional information on our loan portfolio is provided in the Credit Risk section of Management's Discussion and Analysis.

Non-Interest Income

The following table presents the components of non-interest income for the three and nine months ended September 30:

Three Months Ended September 30,		Nine Months Ended September 30,	
2009	2008	2009	2008

(dollars in thousands)				
Non-Interest Income				
Trust income	\$ 1,366	\$ 1,444	\$ 3,604	\$ 4,514
Service charges on deposit accounts	4,555	4,792	12,798	14,003
Insurance and retail brokerage commissions	2,068	1,390	5,440	4,061
Income from bank owned life insurance	1,078	1,435	3,250	4,368
Card related interchange income	2,224	1,950	6,258	5,653
Other income	1,569	2,972	9,512	7,879
Subtotal	12,860	13,983	40,862	40,478
Net securities gains	44	911	124	1,502
Net impairment losses	(11,903)	(8,620)	(30,530)	(9,161)
Total non-interest income	\$ 1,001	\$ 6,274	\$ 10,456	\$ 32,819

Table of Contents

FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

ITEM 2. *Management's Discussion and Analysis of Financial Condition*

and Results of Operations (Continued)

Results of Operations (Continued)

Non-Interest Income (Continued)

Total non-interest income for the three and nine month periods ended September 30, 2009 decreased \$5.3 million, or 84.0%, and \$22.4 million, or 68.1% respectively, compared to the same periods in 2008 primarily due to net impairment losses on securities. Also contributing to this decline were lower levels of service charges on deposit accounts, income from bank owned life insurance and trust income. In both the three and nine month periods these decreases were partially offset by higher insurance and retail brokerage commissions. Other income provided increased levels when comparing results of the nine month period.

Net impairment losses of \$11.9 million for the third quarter of 2009 and \$30.5 million for the first nine months of 2009 increased \$3.3 million and \$21.4 million compared to the corresponding periods of 2008. The \$11.9 million net impairment charges in the third quarter of 2009 are due to higher credit related other-than-temporary impairment losses on trust preferred collateralized debt obligations. The year-to-date \$30.5 million net impairment charges are due to \$28.0 million in credit related other-than-temporary impairment losses on trust preferred collateralized debt obligations and \$2.5 million on bank equity securities.

Service charges on deposit accounts decreased \$237 thousand, or 4.9%, for the third quarter of 2009 and \$1.2 million, or 8.6%, for the first nine months of 2009 compared to the corresponding periods of 2008 primarily due to reduced overdraft revenue as a result of a reduction in the frequency of occurrences.

Income from bank owned life insurance decreased \$357 thousand, or 24.9%, for the third quarter of 2009 and \$1.1 million, or 25.6%, for the first nine months of 2009 compared to the corresponding periods of 2008 due to reductions in the crediting rates of our separately managed accounts.

The reduction in trust income of \$78 thousand, or 5.4%, for the third quarter of 2009 and \$910 thousand, or 20.2%, for the first nine months of 2009 compared to the corresponding periods of 2008 was primarily driven by a decline in the market value of assets under management.

Insurance and retail brokerage commissions increased \$678 thousand, or 48.8%, for the third quarter of 2009 and \$1.4 million, or 34.0%, for the first nine months of 2009 compared to the corresponding periods of 2008 mainly due to higher sales, additional producers and an enhanced calling program.

Card related interchange income includes income on debit, credit and ATM cards that are issued to consumers and/or businesses. Card related interchange income increased \$274 thousand, or 14.1%, for the third quarter of 2009 and \$605 thousand, or 10.7%, for the first nine months of 2009 compared to the corresponding periods of 2008 primarily due to higher usage and account growth.

Other operating income decreased \$1.4 million, or 47.2%, for the third quarter of 2009 and increased \$1.6 million, or 20.7%, for the first nine months of 2009 compared to the corresponding periods of 2008 primarily due to gains from the sales of other real estate owned in the third quarter of 2008, and a \$2.1 million gain on a favorable legal settlement during the second quarter of 2009.

FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

ITEM 2. *Management's Discussion and Analysis of Financial Condition**and Results of Operations (Continued)***Results of Operations (Continued)****Non-Interest Expense**

The following table presents the components of non-interest expense for the three and nine months ended September 30:

	Three Months Ended September 30, 2009		Nine Months Ended September 30, 2009	
	2009	2008	2009	2008
	(dollars in thousands)			
Non-Interest Expense				
Salaries and employee benefits	\$ 21,405	\$ 21,091	\$ 64,986	\$ 61,849
Net occupancy expense	3,263	3,613	10,791	11,248
Furniture and equipment expense	3,121	2,995	9,073	9,131
Advertising expense	865	550	1,973	1,579
Data processing expense	1,136	1,075	3,433	3,122
Pennsylvania shares tax expense	1,310	1,342	3,953	3,952
Intangible amortization	684	802	2,170	2,465
Collection and repossession expense	1,444	642	4,095	1,961
FDIC insurance	2,046	179	8,430	427
Other professional fees and services	723	754	2,633	2,438
Other operating expenses	5,948	5,954	19,091	18,566
Total non-interest expense	\$ 41,945	\$ 38,997	\$ 130,628	\$ 116,738

Total non-interest expense for the three and nine months ended September 30, 2009, increased \$2.9 million, or 7.6%, and \$13.9 million, or 11.9%, over the corresponding periods in 2008. The increase for the nine months was primarily due to FDIC insurance, higher salaries and employee benefits, and collection and repossession expense.

Salaries and employee benefits increased \$314 thousand, or 1.5%, for the third quarter of 2009 and \$3.1 million, or 5.1%, for the nine months ended September 30, 2009 compared with the same periods in 2008. The increases were primarily due to additional employees related to new branch offices, enhancing the consumer infrastructure for small business banking and retail brokerage, annual merit increases, higher 401(K) expense and higher hospitalization expense. Full time equivalent employees were 1,624 at September 30, 2009 compared to 1,587 at September 30, 2008.

Collection and repossession expenses increased \$802 thousand, or 124.9%, for the third quarter of 2009 and \$2.1 million, or 108.8%, for the nine months ended September 30, 2009 compared to the same periods in 2008 primarily due to costs associated with the higher level of nonaccrual loans as well as two loans that were transferred to other real estate owned in the first quarter of 2009, one of which was sold in the third quarter.

FDIC expense increased \$1.9 million for the third quarter of 2009 and \$8.0 million for the nine months ended September 30, 2009 compared to the same periods in 2008 due to the premium increases as well as the second quarter special assessment of \$2.9 million.

Income Tax

The provision for income taxes decreased \$8.2 million for the third quarter of 2009 and \$29.2 million for the first nine months ended September 30, 2009, compared to the corresponding periods in 2008. Our effective tax rate

Table of Contents

FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

ITEM 2. *Management's Discussion and Analysis of Financial Condition*

and Results of Operations (Continued)

Results of Operations (Continued)

Income Tax (Continued)

was 54.8% for the tax benefit in the third quarter of 2009 and 51.1% for the tax benefit for the first nine months of 2009 compared to 10.0% and 13.6% for the tax expense for the corresponding periods of 2008. The 2009 effective tax rate is the result of a loss before taxes as well as permanent differences and tax credits.

LIQUIDITY

Liquidity refers to our ability to meet the cash flow requirements of depositors and borrowers as well as our operating cash needs with cost-effective funding. We generate funds to meet these needs primarily through the core deposit base of First Commonwealth Bank and the maturity or repayment of loans and other interest-earning assets, including investments. Proceeds from the maturity and redemption of investment securities totaled \$312.4 million during the first nine months of 2009 and were used either for liquidity or to invest in securities of similar quality as our current investment portfolio. We also have available unused wholesale sources of liquidity, including overnight federal funds and repurchase agreements, advances from the Federal Home Loan Bank of Pittsburgh, borrowings through the discount window at the Federal Reserve Bank of Cleveland and access to certificates of deposit through brokers. We have increased our borrowing capacity at the Federal Reserve by establishing a Borrower-in-Custody of Collateral arrangement that enables us to pledge certain loans, not being used as collateral at the Federal Home Loan Bank, as collateral for borrowings at the Federal Reserve. At September 30, 2009, our borrowing capacity at the Federal Reserve related to this program was \$651.2 million. We can also raise cash through the sale of earning assets, such as loans and marketable securities, or the sale of debt or equity securities in the capital markets. In the fourth quarter of 2008, we issued 11.5 million shares of our common stock through a public stock offering, which resulted in gross proceeds of \$115.0 million and increased our capital by \$108.8 million after deducting underwriting discounts, commissions and offering expenses.

Liquidity risk arises from the possibility that we may not be able to meet our financial obligations and operating cash needs or may become overly reliant upon external funding sources. In order to manage this risk, our Board of Directors has established an Asset and Liability Management Policy that identifies primary sources of liquidity, establishes procedures for monitoring and measuring liquidity and quantifies minimum liquidity requirements based on limits approved by our Board. This policy designates our Asset/Liability Committee (ALCO) as the body responsible for meeting these objectives. The ALCO, which includes members of executive management, reviews liquidity on a periodic basis and approves significant changes in strategies that affect balance sheet or cash flow positions. Liquidity is centrally managed on a daily basis by our Treasury Department.

First Commonwealth Financial Corporation has an unsecured \$15 million line of credit with another financial institution. There are no amounts outstanding on this line as of September 30, 2009, nor has the line been utilized since its inception in May 2009. Additionally, we guarantee a \$6.1 million ESOP loan. We are currently not meeting debt covenants related to Return on Average Assets, Nonperforming Loans to Total Loans, and Allowance for Loan Loss to Nonperforming Loans. We are working with both parties and expect to either obtain a waiver or a modification for these covenants.

Table of Contents

FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

ITEM 2. *Management's Discussion and Analysis of Financial Condition**and Results of Operations (Continued)***LIQUIDITY (Continued)**

First Commonwealth's long-term liquidity source is a large core deposit base and a strong capital position. Core deposits are the most stable source of liquidity a bank can have due to the long-term relationship with a deposit customer. The level of deposits during any period is influenced by factors outside of management's control, such as the level of short-term and long-term market interest rates and yields offered on competing investments, such as money market mutual funds. During the first nine months of 2009, total deposits increased \$216.7 million helping to fund loan growth of \$230.7 million. The following table shows a breakdown of the components of First Commonwealth's interest-bearing deposits:

	September 30, 2009	December 31, 2008
	(dollars in thousands)	
Interest-bearing demand deposits	\$ 93,062	\$ 97,011
Savings deposits	2,133,203	1,773,843
Time deposits	1,670,930	1,842,644
Total interest-bearing deposits	\$ 3,897,195	\$ 3,713,498

At September 30, 2009, noninterest-bearing deposits increased by \$33.0 million and interest-bearing deposits increased \$183.7 million compared to December 31, 2008. The \$359.4 million increase in savings deposits for the first nine months of 2009 was partly offset by the \$3.9 million decrease in interest-bearing demand deposits and \$171.7 million decrease in time deposits, \$149.8 million of which are time deposits \$100 thousand and over.

MARKET RISK

Market risk refers to potential losses arising from changes in interest rates, foreign exchange rates, equity prices and commodity prices. Our market risk is composed primarily of interest rate risk. Interest rate risk is comprised of repricing risk, basis risk, yield curve risk and options risk. Repricing risk arises from differences in the cash flow or repricing between asset and liability portfolios. Basis risk arises when asset and liability portfolios are related to different market rate indices, which do not always change by the same amount. Yield curve risk arises when asset and liability portfolios are related to different maturities on a given yield curve; when the yield curve changes shape, the risk position is altered. Options risk arises from embedded options within asset and liability products as certain borrowers have the option to prepay their loans when rates fall while certain depositors can redeem their certificates early when rates rise.

The process by which we manage our interest rate risk is called asset/liability management. The goals of our asset/liability management are increasing net interest income without taking undue interest rate risk or material loss of net market value of our equity, while maintaining adequate liquidity. Net interest income is increased by widening the interest spread and increasing earning assets. Liquidity is measured by the ability to meet both depositors' and credit customers' requirements.

We use an asset/liability model to measure our interest rate risk. Interest rate risk measures include earnings simulation and gap analysis. Gap analysis is a static measure that does not incorporate assumptions regarding future business. Gap analysis, while a helpful diagnostic tool, displays cash flows for only a single rate environment. Net interest income simulations explicitly measure the exposure to earnings from changes in market rates of interest. Our current financial position is combined with assumptions regarding future business to calculate net interest income under various hypothetical rate scenarios. Our net interest income simulations assume a level balance sheet whereby new volumes equal run-offs. The ALCO reviews earnings simulations over multiple years under various interest rate scenarios. Reviewing these various measures provides us with a reasonably comprehensive view of our interest rate profile.

Table of Contents

FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

ITEM 2. *Management's Discussion and Analysis of Financial Condition**and Results of Operations (Continued)***MARKET RISK (Continued)**

The following gap analysis compares the difference between the amount of interest-earning assets and interest-bearing liabilities subject to repricing over a period of time. The ratio of rate sensitive assets to rate sensitive liabilities repricing within a one year period was 0.73 at September 30, 2009 and 0.74 at December 31, 2008. A ratio of less than one indicates a higher level of repricing liabilities over repricing assets over the next twelve months.

Following is the gap analysis as of September 30, 2009 and December 31, 2008:

	September 30, 2009 (dollars in thousands)				Over 1 Year Thru 5 Years	Over 5 Years

Table of Contents

FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

ITEM 2. *Management's Discussion and Analysis of Financial Condition**and Results of Operations (Continued)***MARKET RISK (Continued)**

The following table presents an analysis of the potential sensitivity of our annual net interest income to gradual changes in interest rates over a 12 month time frame versus if rates remained unchanged utilizing a flat balance sheet, based on September 30, 2009 information (dollars in thousands):

	- 200	- 100	+ 100	+ 200
Net interest income change (12 months):	(5,680)	(291)	(2,448)	(1,478)

The ALCO is responsible for the identification and management of interest rate risk exposure. As such, the ALCO continuously evaluates strategies to manage our exposure to interest rate fluctuations.

We recognize that asset/liability models are based on methodologies that may have inherent shortcomings. Furthermore, asset/liability models require certain assumptions be made, such as prepayment rates on earning assets and pricing impact on non-maturity deposits, which may differ from actual experience. These business assumptions are based upon our experience, business plans and published industry experience. While management believes such assumptions to be reasonable, there can be no assurance that modeled results will approximate actual results.

CREDIT RISK

We maintain an allowance for credit losses at a level deemed sufficient to absorb losses inherent in the loan portfolio at the date of each statement of financial condition. Management reviews the adequacy of the allowance on a quarterly basis to ensure that the provision for credit losses has been charged against earnings in an amount necessary to maintain the allowance at a level that is appropriate based on management's assessment of probable estimated losses.

First Commonwealth's methodology for assessing the appropriateness of the allowance for credit losses consists of several key elements. These elements include an assessment of individual problem loans with a balance greater than \$100 thousand, loss experience trends, delinquency, and other relevant factors. While allocations are made to specific loans and pools of loans, the total allowance is available for all loan losses.

Nonperforming loans include nonaccrual loans and troubled debt restructured loans. Nonaccrual loans represent loans on which interest accruals have been discontinued. Troubled debt restructured loans are those loans whose terms have been renegotiated to provide a reduction or deferral of principal or interest as a result of the deteriorating financial position of the borrower.

We discontinue interest accruals on a loan when, based on current information and events, it is probable that we will be unable to fully collect principal or interest due according to the contractual terms of the loan. A loan is also placed in nonaccrual status when, based on regulatory definitions, the loan is maintained on a cash basis due to the weakened financial condition of the borrower. Past due loans are those loans which are contractually past due 90 days or more as to interest or principal payments but are well secured and in the process of collection.

Nonperforming loans are closely monitored on an ongoing basis as part of our loan review and work-out process. The potential risk of loss on these loans is evaluated by comparing the loan balance to the fair value of any underlying collateral or the present value of projected future cash flows. Losses are recognized where appropriate.

ITEM 2. *Management's Discussion and Analysis of Financial Condition**and Results of Operations (Continued)***CREDIT RISK (Continued)**

The allowance for credit losses was \$90.5 million at September 30, 2009, which represents a ratio of 1.95% of loans outstanding compared to 1.09% reported at September 30, 2008. The allowance for credit losses as a percentage of nonperforming loans was 67.60% as of September 30, 2009 compared to 91.28% at September 30, 2008. The amount of allowance related to nonperforming loans was determined by using fair values obtained from current appraisals and updated discounted cash flow analyses. The specific allocation in the allowance for credit losses related to nonperforming loans provides for 35.8% of the total nonperforming loan balance. Management believes that the allowance for credit losses is at a level deemed sufficient to absorb losses inherent in the loan portfolio at September 30, 2009.

The following table identifies amounts of loan losses and nonperforming loans and securities:

	2009	September 30, 2008
	(dollars in thousands)	
<u>Nonperforming Loans:</u>		
Loans on nonaccrual basis	\$ 133,200	\$ 49,692
Troubled debt restructured loans	627	136
Total nonperforming loans	\$ 133,827	\$ 49,828
Loans past due in excess of 90 days and still accruing	\$ 14,369	\$ 13,719
Other real estate owned	\$ 24,138	\$ 3,718
Loans outstanding at end of period	\$ 4,649,034	\$ 4,184,600
Average loans outstanding	\$ 4,524,567	\$ 4,011,476
Nonperforming loans as a percentage of total loans	2.88%	1.19%
Provision for credit losses (year to date)	\$ 79,510	\$ 12,453
Allowance for credit losses	\$ 90,466	\$ 45,482
Net credit losses (year to date)	\$ 41,803	\$ 9,367
Net credit losses as a percentage of average loans outstanding (annualized)	1.24%	0.31%
Provision for credit losses as a percentage of net credit losses	190.20%	132.95%
Allowance for credit losses as a percentage of average loans outstanding	2.00%	1.13%
Allowance for credit losses as a percentage of end-of-period loans outstanding	1.95%	1.09%
Allowance for credit losses as a percentage of nonperforming loans	67.60%	91.28%
<u>Nonperforming Securities:</u>		
Nonaccrual securities at market value	\$ 3,503	\$ -0-

ITEM 2. *Management's Discussion and Analysis of Financial Condition**and Results of Operations (Continued)***CREDIT RISK (Continued)**

The following tables provide information related to loan type as of September 30, 2009 (dollars in thousands):

	As of September 30, 2009	
	Outstanding Balance	% of Total Portfolio
Commercial, financial, agricultural and other	\$ 1,265,546	27.22%
Real estate-construction	347,805	7.48%
Real estate-residential	1,226,519	26.38%
Real estate-commercial	1,259,063	27.08%
Loans to individuals	550,101	11.84%
Total loans, net of unearned income	\$ 4,649,034	100.00%

	For Nine Months Ended September 30, 2009		As of September 30, 2009	
	Net Charge-offs	% of Total Net Charge-offs	Nonaccrual Loans	% of Total Nonaccrual
Commercial, financial, agricultural and other	\$ 16,429	39.30%	\$ 12,373	9.29%
Real estate-construction	14,099	33.73%	85,950	64.53%
Real estate-residential	2,858	6.84%	7,409	5.56%
Real estate-commercial	5,507	13.17%	27,453	20.61%
Loans to individuals	2,910	6.96%	15	0.01%
Total loans, net of unearned income	\$ 41,803	100.00%	\$ 133,200	100.00%

As the above table illustrates, two categories of loans, Real estate construction and Commercial, financial, agricultural and other, were a significant portion of the net charge-offs and nonaccrual loans as of and for the nine months ended September 30, 2009. Real estate construction loans, which represent only 7.5% of total loans, were 33.7% of net charge-offs and 64.5% of total nonaccrual loans. Commercial, financial, agricultural and other loans were 27.2% of total loans, 39.3% of net charge-offs and 9.3% of total nonaccrual loans. Real estate-commercial loans were 27.1% of total loans, 13.2% of net charge-offs and 20.6% of total nonaccrual loans.

In each of these two categories, loans generated outside of Pennsylvania represented a greater percentage of the net charge-offs and nonaccrual loans than those generated within Pennsylvania, our core market area. We track market location for loans having an original principal balance greater than \$1 million; loans with original principal balances of \$1 million or less are considered small business loans and are not currently broken down by geographic location. In the case of Real estate construction loans, \$341.5 million or 98.2% had an original balance of \$1 million or greater, and in the case of Commercial, financial, agricultural and other loans, \$1.0 billion or 81.8% had an original balance of \$1 million or greater. The following table for Real estate construction, Real estate-commercial, and Commercial, financial, agricultural and other loans having an original balance of greater than \$1 million shows the percentage of such loans that were generated in and out of Pennsylvania; the percentage of net charge-offs for the nine months ended September 30, 2009; and the percentage of nonaccrual loans as of September 30, 2009 attributable to loans generated in and out of Pennsylvania.

Loans generated in Pennsylvania	85.45%	100.00%	100.00%
Loans generated out of Pennsylvania	14.55%	0.00%	0.00%

CAPITAL RESOURCES

At September 30, 2009, shareholders' equity was \$643.1 million, a decrease of \$9.6 million from December 31, 2008. The decrease was primarily due to net loss and dividends paid offset by unrealized holding gains on securities. A strong capital base provides First Commonwealth with a foundation to manage the current market challenges, to expand lending, to protect depositors, and to provide for growth while protecting against future uncertainties. The evaluation of capital adequacy depends on a variety of factors, including asset quality, liquidity, earnings history and prospects. In consideration of these factors, management's primary emphasis with respect to First Commonwealth's capital position is to maintain an adequate and stable equity to assets ratio.

First Commonwealth and its banking subsidiary are well capitalized; however, we may seek to raise additional capital as necessitated by market conditions and our financial condition or to fund growth in interest-earning assets or to expand our market area or product offerings through acquisitions or de novo expansion.

In October 2009, First Commonwealth Financial Corporation declared a quarterly dividend of \$0.03 per share payable on November 13, 2009. This dividend represents no change from the amount paid in July 2009 and a decrease from the March 2009 dividend of \$0.12 per share. The dividend reduction provides for the preservation of capital during a time of unprecedented uncertainty and market volatility.

The Federal Reserve Board has issued risk-based capital adequacy guidelines, which are designed principally as a measure of credit risk. These guidelines require: (1) at least 50% of a banking organization's total capital be common and other core equity capital (Tier I Capital); (2) assets and off-balance-sheet items be weighted

according to risk; (3) the total capital to risk-weighted assets ratio be at least 8%; and (4) a minimum leverage ratio of Tier I capital to average total assets of 4%.

ITEM 2. *Management's Discussion and Analysis of Financial Condition**and Results of Operations (Continued)***CAPITAL RESOURCES (Continued)**

The table below presents First Commonwealth's capital position at September 30, 2009:

	Actual		Regulatory Minimum	
	Capital Amount	Ratio	Capital Amount	Ratio
	(dollars in thousands)			
Total Capital to Risk Weighted Assets				
First Commonwealth Financial Corporation	\$ 649,072	11.5%	\$ 453,426	8.0%
First Commonwealth Bank	\$ 596,400	10.6%	\$ 448,267	8.0%
Tier I Capital to Risk Weighted Assets				
First Commonwealth Financial Corporation	\$ 578,203	10.2%	\$ 226,713	4.0%
First Commonwealth Bank	\$ 526,358	9.4%	\$ 224,133	4.0%
Tier I Capital to Average Assets				
First Commonwealth Financial Corporation	\$ 578,203	9.2%	\$ 252,676	4.0%
First Commonwealth Bank	\$ 526,358	8.4%	\$ 250,487	4.0%

For an institution to qualify as well capitalized under regulatory guidelines, total risk-based capital, Tier I risk-based capital and Tier I capital to average asset ratios must be at least 10%, 6%, and 5%, respectively. At September 30, 2009, First Commonwealth's banking subsidiary exceeded those requirements.

ITEM 3. *Quantitative and Qualitative Disclosures About Market Risk*

Information appearing in Item 2 of this report under the caption **Market Risk** is incorporated by reference in response to this item.

ITEM 4. *Controls and Procedures*

We carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and our Principal Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the period covered by this report pursuant to Rule 13a-15 under the Securities Exchange Act of 1934 (the **Exchange Act**). Based upon that evaluation, our Chief Executive Officer and Principal Financial Officer concluded that our disclosure controls and procedures are effective to provide reasonable assurance that the information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in applicable rules and forms of the Securities and Exchange Commission.

In addition, our management, including our Chief Executive Officer and Principal Financial Officer, also conducted an evaluation of our internal controls over financial reporting to determine whether any changes occurred during the current fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting. No such changes were identified in connection with this evaluation.
