NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

QUARTERS ENDED DECEMBER 31, 2010 AND 2009

(UNAUDITED)

NOTE A Summary of Significant Accounting Policies

The consolidated unaudited interim financial statements included in this report have been prepared by Washington Federal, Inc. (Company). The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (GAAP) requires management to make estimates and assumptions that affect amounts reported in the financial statements. Actual results could differ from these estimates. In the opinion of management, all adjustments (consisting only of normal recurring accruals) necessary for a fair presentation are reflected in the interim financial statements. The September 30, 2010 Consolidated Statement of Financial Condition was derived from audited financial statements.

The information included in this Form 10-Q should be read in conjunction with Company s 2010 Annual Report on Form 10-K (2010 Form 10-K) as filed with the SEC. Interim results are not necessarily indicative of results for a full year.

Loans receivable When a borrower fails to make a required payment on a loan, the Company attempts to cure the deficiency by contacting the borrower. Contact is made after a payment is 30 days past its grace period. In most cases, deficiencies are cured promptly. If the delinquency is not cured within 90 days, the Company may institute appropriate action to foreclose on the property. If foreclosed, the property will be sold at a public sale and may be purchased by the Company.

The company will consider modifying the interest rates and terms of a loan if it determines that a modification is a better alternative to foreclosure.

Loans are placed on nonaccrual status when, in the judgment of management, the probability of collection of interest is deemed to be insufficient to warrant further accrual. When a loan is placed on nonaccrual status, previously accrued but unpaid interest is deducted from interest income. The Company does not accrue interest on loans 90 days past due or more. If payment is made on a loan so that the loan becomes less than 90 days past due, and the Company expects full collection of principal and interest, the loan is returned to full accrual status. Any interest ultimately collected is credited to income in the period of recovery.

The Company maintains an allowance for loan losses to absorb losses inherent in the loan portfolio. The allowance is based on ongoing, quarterly assessments of the probable and estimable losses inherent in the loan portfolio. The Company s methodology for assessing the appropriateness of the allowance consists of two components, which include the general allowance and specific allowances.

The general loan loss allowance is established by applying a loss percentage factor to the different loan types. Management believes loan types are the most relevant factor to group loans for the allowance calculation as the risk characteristics in these groups are similar. The loss percentage factor is made up of 2 parts the historical loss factor (HLF) and the qualitative loss factor (QLF). The HLF takes into account historical charge-offs, while the QLF is determined by loan type and allows management to augment reserve levels to reflect the current environment and portfolio performance trends including recent charge-off trends. The allowances are provided based on Management s continuing evaluation of the pertinent factors underlying the quality of the loan portfolio, including changes in the size and composition of the loan

Table of Contents

WASHINGTON FEDERAL, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

QUARTERS ENDED DECEMBER 31, 2010 AND 2009

(UNAUDITED)

portfolio, actual loan loss experience, current economic conditions, collateral values, geographic concentrations, seasoning of the loan portfolio, specific industry conditions, and the duration of the current business cycle. The recovery of the carrying value of loans is susceptible to future market conditions beyond the Company's control, which may result in losses or recoveries differing from those provided.

The Company's general reserve methodology relating to troubled debt restructurings (TDR) was enhanced during the quarter ended December 31, 2010 to rely more heavily on actual losses experienced as an indicator of estimated future cash flows. The impact was to increase the reserves allocated to single-family residential TDRs by \$5,930,000 at December 31, 2010, as compared to September 30, 2010.

Specific allowances are established for loans which are individually evaluated, in cases where Management has identified significant conditions or circumstances related to a loan that Management believes indicate the probability that a loss has been incurred.

The Company has an asset quality review function that analyzes its loan portfolios and reports the results of the review to the Board of Directors on a quarterly basis. The single-family residential, HELOC and consumer portfolios are evaluated based on their performance as a pool of loans, since no single loan is individually significant or judged by its risk rating, size or potential risk of loss. The construction, land, multi-family, commercial real estate and commercial and industrial loans are risk rated on a loan by loan basis to determine the relative risk inherent in specific borrowers or loans. Based on that risk rating, the loans are assigned a grade and classified as follows:

Pass the credit does not meet one of the definitions defined below.

Special mention A special mention credit is considered to be currently protected from loss but is potentially weak. No loss of principal or interest is foreseen; however, proper supervision and Management attention is required to deter further deterioration in the credit. Assets in this category constitute some undue and unwarranted credit risk but not to the point of justifying a risk rating of substandard. The credit risk may be relatively minor yet constitutes an unwarranted risk in light of the circumstances surrounding a specific asset.

Substandard A substandard credit is an unacceptable credit. Additionally, repayment in the normal course is in jeopardy due to the existence of one or more well defined weaknesses. In these situations, loss of principal is likely if the weakness is not corrected. A substandard asset is inadequately protected by the current sound worth and paying capacity of the borrower or of the collateral pledged, if any. Assets so classified will have a well defined weakness or weaknesses that jeopardize the liquidation of the debt. Loss potential, while existing in the aggregate amount of substandard assets, does not have to exist in individual assets risk rated substandard.

Doubtful A credit classified doubtful has all the weaknesses inherent in one classified substandard with the added characteristic that the weakness makes collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable. The probability of loss is high, but because of certain important and reasonably specific pending factors that may work to the advantage and strengthening of the asset, its classification as an estimated loss is deferred until its more exact status may be determined. Pending factors include proposed merger, acquisition,

Table of Contents

WASHINGTON FEDERAL, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
QUARTERS ENDED DECEMBER 31, 2010 AND 2009
(UNAUDITED)

or liquidation procedures, capital injection, perfecting liens on additional collateral, and refinancing plans.

Loss Credits classified loss are considered uncollectible and of such little value that their continuance as a bankable asset is not warranted. This classification does not mean that the asset has absolutely no recovery or salvage value, but rather it is not practical or desirable to defer writing off this asset even though partial recovery may be affected in the future. Losses should be taken in the period in which they are identified as uncollectible. Partial charge-off versus full charge-off may be taken if the collateral offers some identifiable protection.

Impaired loans consist of loans receivable that are not expected to have their principal and interest repaid in accordance with their contractual terms. Collateral dependent impaired loans are measured using the fair value of the collateral, less selling costs. Non-collateral dependent loans are measured at the present value of expected future cash flows.

The Company receives fees for originating loans in addition to various fees and charges related to existing loans, which may include prepayment charges, late charges and assumption fees. Deferred loan fees and costs are recognized over the life of the loans using the effective interest method.

Off-Balance-Sheet Credit Exposures The only material off-balance-sheet credit exposure is loans in process (LIP), which had a balance at December 31, 2010, excluding covered loans, of \$129,472,000. The Company estimates losses on LIP by including LIP with the related principal balance outstanding and then applying its general reserve methodology to the gross amount.

Certain reclassifications have been made to the financial statements to conform prior periods to current classifications.

NOTE B Dividends

On January 14, 2011 the Company paid its 112th consecutive quarterly cash dividend on common stock. Dividends per share were \$.06 and \$.05 for the quarters ended December 31, 2010 and 2009.

NOTE C Comprehensive Income

The Company s comprehensive income includes all items which comprise net income plus the unrealized gains (losses) on available-for-sale securities. Total comprehensive income (loss) for the quarters ended December 31, 2010 and 2009 totaled \$8,013,000 and \$(8,134,000), respectively. The difference between the Company s net income and total comprehensive income for the quarter ended December 31, 2010 was \$16,517,000, which equals the change in the net unrealized gain on available-for-sale securities of \$26,113,000, less tax of \$9,596,000.

NOTE E Allowance for Losses on Loans

The following table summarizes the activity in the allowance for loan losses for the period ended December 31, 2010:

	Beginning Allowance	Charge-offs	Recoveries (In thousands)	Provision & Transfers	Ending Allowance
Single-family residential	\$ 47,160	\$ (6,647)	\$ 508	\$ 13,776	\$ 54,797
Construction - speculative	26,346	(5,768)	330	1,857	22,765
Construction - custom	770			(411)	359
Land - acquisition & development	61,637	(16,758)	618	7,872	53,369
Land - consumer lot loans	4,793	(1,001)		1,389	5,181
Multi-family	5,050	(675)		1,921	6,296
Commercial real estate	3,165	(704)	275	408	3,144
Commercial & industrial	6,193	(114)	1,139	(560)	6,658
HELOC	586		75	496	1,157
Consumer	7,394	(1,454)	370	(748)	5,562
	\$ 163,094	\$ (33,121)	\$ 3,315	\$ 26,000	\$ 159,288

The Company recorded a \$26,000,000 provision for loan losses during the quarter ended December 31, 2010, while a \$69,750,000 provision was recorded for the same quarter one year ago. Non-performing assets (NPAs) amounted to \$442,699,000, or 3.30%, of total assets at December 31, 2010, compared to \$553,285,000, or 4.37%, of total assets one year ago. Covered loans are not classified as non-performing loans because, at acquisition, the carrying value of these loans was adjusted to reflect fair value and are covered under FDIC loss sharing agreements. There was no allowance for loan losses related to the covered loans at December 31, 2010, as these loans are performing as anticipated in the projections used in the purchase accounting fair value calculations. The Company had net charge-offs of \$29,806,000 for the quarter ended December 31, 2010, compared with \$46,037,000 of net charge-offs for the same quarter one year ago. A loan is charged-off when the loss is estimable and it is confirmed that the borrower will not be able to meet its contractual obligations. The decrease in the provision for loan losses is in response to four primary factors: first, the improvement in the amount of NPAs year-over-year described at the beginning of this paragraph; second, non-accrual loans decreased from \$369,777,000 at December 31, 2009, to \$256,434,000 at December 31, 2010, a 30.7% decrease; third, the percentage of loans 30 days or more delinquent decreased from 4.74% at December 31, 2009, to 3.41% at December 31, 2010; and finally, the Company's exposure in the land acquisition and development (A&D) and speculative construction portfolios, where the majority of losses have

Edgar Filing: WASHINGTON FEDERAL INC - Form 10-Q

come from during this period of the cycle, has decreased from a combined 7.5% of the gross loan portfolio at December 31, 2009, to 5.0% at December 31, 2010. Management expects the provision to remain at elevated levels until NPAs and charge-offs improve measurably. \$101,347,000 of the allowance was calculated under the formulas contained in our general allowance methodology and the remaining \$57,941,000 was made up of specific reserves on loans that were deemed to be impaired at December 31, 2010. For the period ending December 31, 2009, \$75,152,000 of the allowance was calculated under the formulas contained in our general allowance methodology and the remaining \$115,397,000 was made up of specific reserves on loans that were deemed to be impaired. The

Table of Contents**WASHINGTON FEDERAL, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****QUARTERS ENDED DECEMBER 31, 2010 AND 2009****(UNAUDITED)**

primary reasons for the shift in total allowance allocation from specific reserves to general reserves is due to the Company having already addressed many of the problem loans focused in the speculative construction and land A&D portfolios, combined with an increase in delinquencies and elevated charge-offs in the single-family residential portfolio. While overall delinquencies have decreased as discussed above, delinquencies in the single-family residential portfolio, the largest portion of the loan portfolio, increased from 3.20% at December 31, 2009 to 3.33% at December 31, 2010.

The following table shows a summary of loans collectively and individually evaluated for impairment and the related allocation of general and specific reserves as of December 31, 2010:

NOTE F New Accounting Pronouncements

In January 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2011-01, *Receivables (Topic 310) Deferral of the Effective Date of Disclosures about Troubled Debt Restructurings in Update No. 2010-20*. This ASU temporarily delays the effective date of the disclosures about troubled debt restructurings (TDR) in Update 2010-20 for public entities. The delay is intended to allow the FASB time to complete its deliberations on what constitutes a TDR. The effective date of the new disclosures about TDRs for public entities and the guidance for determining what constitutes a TDR will then be coordinated. Currently, that guidance is anticipated to be effective for interim and annual periods ending after June 15, 2011. Except for the disclosures delayed by ASU 2011-01, the disclosures required by ASU 2010-20 related to significant accounting policies are in Note A; the disclosures related to loans, past due and nonaccrual balances are in Notes D and H and disclosures related to the allowance for losses on loans are in Note E.

In December 2010, the FASB issued ASU 2010-28, *Intangibles - Goodwill and Other (Topic 350) When to Perform Step 2 of the Goodwill Impairment Test for Reporting Units with Zero or Negative Carrying*

Table of Contents

WASHINGTON FEDERAL, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

QUARTERS ENDED DECEMBER 31, 2010 AND 2009

(UNAUDITED)

Amounts. The amendments in this ASU affect all entities that have recognized goodwill and have one or more reporting units whose carrying amount for purposes of performing Step 1 of the goodwill impairment test is zero or negative. As the Company has only one reporting unit with a carrying amount greater than zero, this ASU has no impact on the financial statements.

In December 2010, the FASB issued ASU 2010-29, *Business Combinations (Topic 805) Disclosure of Supplementary Pro Forma Information for Business Combinations*. The amendments in this ASU specify that if a public entity presents comparative financial statements, the entity should disclose revenue and earnings of the combined entity as though the business combination(s) that occurred during the current year had occurred as of the beginning of the comparable prior annual reporting period only. This ASU also expands the supplemental pro forma disclosures under Topic 805 to include a description of the nature and amount of material, nonrecurring pro forma adjustments directly attributable to the business combination included in the reported pro forma revenue and earnings. This guidance will be effective for any business combinations entered into by the Company for which the acquisition date is after October 1, 2011.

NOTE G Fair Value Measurements

U.S. GAAP defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. U.S. GAAP also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active exchange markets that the entity has the ability to access as of the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active and other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect a company's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

The following is a description of the valuation methodologies used to measure and report fair value of financial assets and liabilities on a recurring or nonrecurring basis:

Measured on a Recurring Basis

Securities

Securities available for sale are recorded at fair value on a recurring basis. Fair value is determined with quoted prices for similar assets or liabilities, quoted prices in markets that are not active and other inputs that are observable or can be corroborated by observable market data (Level 2).

There were no transfers between, into and/or out of Levels 1, 2 or 3 during the quarter ended December 31, 2010.

Measured on a Nonrecurring Basis***Impaired Loans & Real Estate Held for Sale***

From time to time, and on a nonrecurring basis, fair value adjustments to collateral dependent loans and real estate held for sale are recorded to reflect write-downs of principal balances based on the current appraised or estimated value of the collateral.

Real estate held for sale consists principally of properties acquired through foreclosure.

The following table presents the aggregated balance of assets measured at estimated fair value on a nonrecurring basis through the quarter ended December 31, 2010, and the total losses resulting from those fair value adjustments for the same quarter end period. The following estimated fair values are shown gross of estimated selling costs:

	Through December 31, 2010				Quarter Ended December 31, 2010
	Level 1	Level 2	Level 3	Total	Total Losses
	(In thousands)				
Impaired loans (1)	\$ 0	\$ 0	\$ 104,271	\$ 104,271	\$ 16,579

Balance at end of period	\$ 0	\$ 0	\$ 150,963	\$ 150,963	\$ 29,257
--------------------------	------	------	------------	------------	-----------

- (1) The loss represents remeasurements of collateral dependent loans.
(2) The loss represents aggregate writedowns and charge-offs on real estate held for sale.
There were no liabilities carried at fair value, measured on a recurring or nonrecurring basis, at December 31, 2010.

Fair Values of Financial Instruments

U. S. GAAP requires disclosure of fair value information about financial instruments, whether or not recognized on the statement of financial condition, for which it is practicable to estimate those values. Certain financial instruments and all non-financial instruments are excluded from the disclosure requirements. Accordingly, the aggregate fair value estimates presented do not reflect the underlying fair value of the Company. Although management is not aware of any factors that would materially affect the estimated fair value amounts presented below, such amounts have not been comprehensively revalued for purposes of these financial statements since the dates shown, and therefore, estimates of fair value subsequent to those dates may differ significantly from the amounts presented below.

	December 31, 2010		September 30, 2010

The following methods and assumptions were used to estimate the fair value of financial instruments:

Cash and cash equivalents The carrying amount of these items is a reasonable estimate of their fair value.

Table of Contents**WASHINGTON FEDERAL, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****QUARTERS ENDED DECEMBER 31, 2010 AND 2009****(UNAUDITED)**

Available-for-sale securities and held-to-maturity securities Estimated fair value for investment securities is based on quoted market prices.

Loans receivable and covered loans For certain homogeneous categories of loans, such as fixed- and variable-rate residential mortgages, fair value is estimated using quoted market prices for securities backed by similar loans, adjusted for differences in loan characteristics. The fair value of other loan types is estimated by discounting the future cash flows and estimated prepayments using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining term. Some loan types were valued at carrying value because of their floating rate or expected maturity characteristics. Net deferred loan fees are not included in the fair value calculation but are included in the carrying amount.

FHLB stock The fair value is based upon the par value of the stock which equates to its carrying value.

Customer accounts The fair value of demand deposits, savings accounts, and money market accounts is the amount payable on demand at the reporting date. The fair value of fixed-maturity certificates of deposit is estimated by discounting the estimated future cash flows using the rates currently offered for deposits with similar remaining maturities.

FHLB advances and other borrowings The fair value of FHLB advances and other borrowings is estimated by discounting the estimated future cash flows using rates currently available to the Company for debt with similar remaining maturities.

The following is a reconciliation of amortized cost to fair value of available-for-sale and held-to-maturity securities:

(UNAUDITED)

NOTE H Covered Assets

Covered assets represent loans and real estate held for sale acquired from the FDIC that are subject to loss sharing agreements and were \$550,883,000 as of December 31, 2010, versus \$578,629,000 as of September 30, 2010.

Changes in the carrying amount and accretible yield for acquired impaired and non-impaired loans were as follows for the quarter ended December 31, 2010:

	Acquired Impaired Accretible Yield	Carrying Amount of Loans	Acquired Non-impaired Accretible Yield	Carrying Amount of Loans
	(In thousands)			
Balance at beginning of period	\$ 27,019	\$ 190,530	\$ 39,813	\$ 343,944
Accretion	(2,935)	2,935	(1,975)	1,975
Transfers to REO	0	(18,446)	0	0
Payments received, net	0	(10,331)	0	(17,660)
Balance at end of period	\$ 24,084	\$ 164,688	\$ 37,838	\$ 328,259

At December 31, 2010, none of the acquired impaired or non-impaired loans were classified as non-performing assets. Therefore, interest income, through accretion of the difference between the carrying amount of the loans and the expected cash flows, was recognized on all acquired loans. There was no allowance for loan losses related to the covered loans at December 31, 2010, as these loans are performing as anticipated in the projections used in the purchase accounting fair value calculations.

The outstanding principal balance of acquired loans was \$633,985,000 and \$685,384,000 as of December 31, 2010 and September 30, 2010, respectively.

The following table shows the year to date activity for the FDIC indemnification asset:

	December 31, 2010	September 30, 2010
	(In thousands)	
Balance at beginning of period	\$ 131,128	\$
Additions		227,500
Payments received	(14,220)	(92,551)

PART I Financial Information

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

FORWARD LOOKING STATEMENTS

In addition to historical information, this Quarterly Report on Form 10-Q includes certain forward-looking statements, as defined in the Securities Act of 1933 and the Securities Exchange Act of 1934, based on current management expectations. Actual results could differ materially from those management expectations. Such forward-looking statements include statements regarding the Company's intentions, beliefs or current expectations as well as the assumptions on which such statements are based. Stockholders and potential stockholders are cautioned that any such forward-looking statements are not guarantees of future performance and involve risks and uncertainties, and that actual results may differ materially from those contemplated by such forward-looking statements. Factors that could cause future results to vary from current management expectations include, but are not limited to: general economic conditions; legislative and regulatory changes, including without limitation the potential effect of the Dodd-Frank Wall Street Reform and Consumer Protection Act and regulations to be promulgated thereunder; monetary fiscal policies of the federal government; changes in tax policies; rates and regulations of federal, state and local tax authorities; changes in interest rates; deposit flows; cost of funds; demand for loan products; demand for financial services; competition; changes in the quality or composition of the Company's loan and investment portfolios; changes in accounting principles; policies or guidelines and other economic, competitive, governmental and technological factors affecting the Company's operations, markets, products, services and fees, including without limitation the Bank's ability to comply in a timely and satisfactory manner with the requirements of the memorandum of understanding entered into with the Office of Thrift Supervision. The Company undertakes no obligation to update or revise any forward-looking statements to reflect changed assumptions, the occurrence of unanticipated events or changes to future operating results over time.

GENERAL

Washington Federal, Inc. (Company) is a savings and loan holding company. The Company's primary operating subsidiary is Washington Federal Savings.

INTEREST RATE RISK

The Company assumes a higher level of interest rate risk as a result of its policy to originate and hold for investment fixed-rate single-family residential (SFR) home loans, which are longer-term in nature than the short-term characteristics of its liabilities of customer accounts and borrowed money. At December 31, 2010, the Company had a negative one-year maturity gap of approximately 30% of total assets, which was an increase from the 28% negative one-year maturity gap as of September 30, 2010, and the 23% negative one-year maturity gap as of December 31, 2009. The fiscal year to date increase is due to decreasing cash balances and increasing deposit accounts with maturities less than one year.

The interest rate spread decreased to 3.06% at December 31, 2010 from 3.09% at September 30, 2010. The spread decreased due to a higher proportion of lower yielding investment balances compared to total earning assets as deposit growth has exceeded loan growth. In addition, loan yields are lower as a result of refinancing of fixed-rate mortgages into historically low long-term interest rates. As of December 31, 2010, the weighted average rate on earning assets decreased by 12 basis points compared to September 30, 2010,

Table of Contents**WASHINGTON FEDERAL, INC. AND SUBSIDIARIES****PART I Financial Information****Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

while the weighted average rates on customer deposit accounts and borrowings decreased by 9 basis points over the same period.

As of December 31, 2010, the Company had decreased total assets by \$58,987,000, or 0.4%, from \$13,486,379,000 at September 30, 2010. For the quarter ended December 31, 2010, compared to September 30, 2010, loans (both non-covered and covered) decreased \$322,282,000, or 3.6%. To help offset the reduced income from loans, investment securities increased \$319,661,000, or 12.5%. Cash and cash equivalents of \$842,888,000 and stockholders' equity of \$1,838,600,000 provides management with flexibility in managing interest rate risk going forward.

LIQUIDITY AND CAPITAL RESOURCES

The Company's net worth at December 31, 2010 was \$1,838,600,000, or 13.69%, of total assets. This was a slight decrease of \$2,547,000 from September 30, 2010 when net worth was \$1,841,147,000, or 13.65%, of total assets. The Company's net worth was impacted in the quarter by net income of \$24,530,000, the payment of \$6,791,000 in cash dividends, treasury stock purchases that totaled \$4,561,000, as well as a decrease in other comprehensive income of \$16,517,000.

Management believes this strong net worth position will help the Company manage its interest rate risk and provide the capital support needed for controlled growth in a regulated environment. To be categorized as well capitalized, Washington Federal Savings must maintain minimum total risk-based, Tier 1 risk-based and Tier 1 leverage ratios as set forth in the following table.

	Actual Capital	Ratio	Capital Adequacy Guidelines Capital (In thousands)	Ratio	Categorized as Well Capitalized Under Prompt Corrective Action Provisions Capital	Ratio

CHANGES IN FINANCIAL CONDITION

Available-for-sale and held-to-maturity securities: Available-for-sale securities increased \$331,022,000, or 13.3%, during the quarter ended December 31, 2010, which included the purchase of \$572,539,000 of available-for-sale investment securities. There were no sales of available-for-sale securities during the period. There were no purchases or sales of held-to-maturity securities in the same period. As of December 31, 2010, the Company had net unrealized gains on available-for-sale securities of \$33,165,000, net of tax, which were recorded as part of stockholders' equity. The Company increased its available-for-sale investment portfolio to partially invest additional customer deposits and replace some of the lost interest income on maturing or prepaying loans and mortgage-backed securities.

Edgar Filing: WASHINGTON FEDERAL INC - Form 10-Q

Loans receivable: During the quarter ended December 31, 2010, the balance of loans receivable decreased 3.3% to \$8,142,948,000 compared to \$8,423,703,000 at September 30, 2010. This decrease is consistent with management's strategy to reduce the Company's exposure to land and construction loans and not aggressively compete for 30 year fixed-rate mortgages at current market rates. The Company's current decision not to originate and hold in its loan portfolio 30 year fixed-rate loans at rates below 4.50%, due to the duration risk associated with such low mortgage rates, contributed to the net run off of the loan portfolio. Additionally, during the year to date period, \$31,528,000 of loans were transferred to REO. If the current

Table of Contents**WASHINGTON FEDERAL, INC. AND SUBSIDIARIES****PART I Financial Information****Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

low rates on 30 year fixed-rate mortgages persists, management will consider continuing to shrink its loan portfolio. The following table shows the loan portfolio by category for the last three quarters.

Loan Portfolio by Category *	June 30, 2010		September 30, 2010		December 31, 2010	
			(In thousands)			
Single-family residential	\$ 6,632,333	74.1%	\$ 6,551,836	74.7%	\$ 6,333,040	74.9%

Loans in process	169,423		154,171		129,472	
Deferred net origination fees	35,795		36,138		35,865	
	378,645		353,403		324,625	
	\$ 8,577,791		\$ 8,423,703		\$ 8,142,948	

* Excludes covered loans

Covered loans: As of December 31, 2010, covered loans had decreased 7.8%, or \$41,527,000, to \$492,947,000, compared to September 30, 2010, due to continued paydowns.

Non-performing assets: Non-performing assets, which excludes covered assets acquired in FDIC-assisted transactions, increased during the quarter ended December 31, 2010 to \$442,699,000 from \$434,530,000 at September 30, 2010, a 1.9% increase. The continued elevated level of NPAs is a result of the significant decline in housing values in the western United States and the national recession over the last three years. Non-performing assets as a percentage of total assets was 3.30% at December 31, 2010 compared to 3.22% at September 30, 2010. This level of NPAs remains significantly higher than the 0.82% average in the Company's 28+ year history as a public company. The Company anticipates NPAs will continue to be elevated in the future until the residential real estate market stabilizes and values recover.

The following table sets forth information regarding restructured and non-accrual loans and REO held by the Company at the dates indicated.

Edgar Filing: WASHINGTON FEDERAL INC - Form 10-Q

Total REHI (3)	29,693		28,244	
Total non-performing assets	\$ 442,699		\$ 434,530	
Total non-performing assets and performing restructured loans as a percentage of total assets	5.11%		4.89%	

(1) Restructured loans were as follows:				
Performing	\$ 242,798	83.6%	\$ 225,195	82.5%
Non-accrual *	47,676	16.4	47,727	17.5
	\$ 290,474	100%	\$ 272,922	100%

* - Included in Total non-accrual loans above

(2) The Company recognized interest income on nonaccrual loans of approximately \$1,506,000 in the quarter ended December 31, 2010. Had these loans performed according to their original contract terms, the Company would have recognized interest income of approximately \$10,993,000 for the quarter ended December 31, 2010.

In addition to the nonaccrual loans reflected in the above table, at December 31, 2010, the Company had \$327,762,000 of loans that were less than 90 days delinquent but which it had classified as substandard for one or more reasons. If these loans were deemed non-performing, the Company's ratio of total NPAs and performing restructured loans as a percent of total assets would have increased to 7.55% at December 31, 2010.

(3) Total REO and REHI (included in real estate held for sale on the Statement of Financial Condition) includes real estate held for sale acquired in settlement of loans or acquired from purchased institutions in settlement of loans. Excludes covered REO.

Edgar Filing: WASHINGTON FEDERAL INC - Form 10-Q

Restructured single-family residential loans are reserved for under the Company's general reserve methodology. If any individual loan is significant in balance, the Company may establish a specific reserve as warranted.

Table of Contents**WASHINGTON FEDERAL, INC. AND SUBSIDIARIES****PART I Financial Information****Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

Most restructured loans are accruing and performing loans where the borrower has proactively approached the Company about modifications due to temporary financial difficulties. Each request is individually evaluated for merit and likelihood of success. Single-family residential loans comprised 75% of restructured loans as of December 31, 2010. The concession for these loans is typically a payment reduction through a rate reduction of from 100 to 200 bps for a specific term, usually six to twelve months. Interest-only payments may also be approved during the modification period. The subsequent default rate on restructured single-family mortgage loans has been approximately 15% since inception of the program in November 2008. Concessions for construction (3.5%), land A&D (11.1%) and multi-family loans (2.7%) are typically an extension of maturity combined with a rate reduction of normally 100 bps. The subsequent default rate on restructured commercial loans has been less than 10% since December 2009.

For commercial loans, six consecutive payments on newly restructured loan terms are required prior to returning the loan to accrual status. In some instances after the required six consecutive payments are made, a management assessment will conclude that collection of the entire principal balance is still in doubt. In those instances, the loan will remain on non-accrual. Homogeneous loans may or may not be on accrual status at the time of restructuring, but all are placed on accrual status upon the restructuring of the loan. Homogenous loans are restructured only if the borrower can demonstrate the ability to meet the restructured payment terms; otherwise, collection is pursued and the loan remains on non-accrual status until liquidated. If the homogenous restructured loan does not perform it will be placed in non-accrual status when it is 90 days delinquent.

A loan that defaults and is subsequently modified would impact the Company's delinquency trend, which is part of the qualitative risk factors component of the general reserve calculation. Any modified loan that re-defaults and is charged-off would impact the historical loss factors component of our general reserve calculation.

Allocation of the allowance for loan losses: The following table shows the allocation of the Company's allowance for loan losses at the dates indicated.

	December 31, 2010			September 30, 2010		
	Amount	Loans to Total Loans (1)	Coverage Ratio (2)	Amount	Loans to Total Loans (1)	Coverage Ratio (2)

Total	\$ 8,845,632	100%	1.40%	\$ 8,852,540	100%	1.51%

FHLB advances and other borrowings: Total borrowings decreased slightly to \$2,664,078,000 at December 31, 2010, compared with \$2,665,548,000 at September 30, 2010. The Company has a credit line with the FHLB Seattle equal to 50% of total assets, providing a substantial source of liquidity if needed. FHLB advances are collateralized as provided for in the Advances, Pledge and Security Agreement by all FHLB stock owned by the Company, deposits with the FHLB and certain mortgages or deeds of trust securing such properties as provided in the agreements with the FHLB.

Table of Contents**WASHINGTON FEDERAL, INC. AND SUBSIDIARIES****PART I Financial Information****Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations*****RESULTS OF OPERATIONS***

Net Income: The quarter ended December 31, 2010, produced net income of \$24,530,000 compared to \$7,911,000 for the same quarter one year ago. The increase for the quarter resulted primarily from lower credit costs, which included the provision for loan losses and real estate owned expenses. The provision for loan losses decreased \$43,750,000, or 62.7%, to \$26,000,000 for the quarter ended December 31, 2010, as compared to the same period one year ago. See related discussion in "Provision for Loan Losses" section below for reasons for the decrease in the provision for loan losses. In addition, losses recognized on real estate acquired through foreclosure was \$10,553,000 for the quarter ended December 31, 2010 as compared to \$12,720,000 for the same period one year ago.

Net Interest Income: The largest component of the Company's earnings is net interest income, which is the difference between the interest and dividends earned on loans and other investments and the interest paid on customer deposits and borrowings. Net interest income is impacted primarily by two factors; first, the volume of earning assets and liabilities and second, the rate earned on those assets or the rate paid on those liabilities.

The following table sets forth certain information explaining changes in interest income and interest expense for the periods indicated compared to the same periods one year ago. For each category of interest-earning asset and interest-bearing liability, information is provided on changes attributable to (1) changes in volume (changes in volume multiplied by old rate) and (2) changes in rate (changes in rate multiplied by old volume). The change in interest income and interest expense attributable to changes in both volume and rate has been allocated proportionately to the change due to volume and the change due to rate.

Rate / Volume Analysis:

	Comparison of Quarters Ended		
	12/31/10 and 12/31/09		
	Volume	Rate	Total
	(In thousands)		
Interest income:			
Loans and covered loans	(\$ 1,807)	\$ 2,272	\$ 465
Mortgaged-backed securities	830	(4,417)	(3,587)
Investments (1)	1,065	1,977	3,042
All interest-earning assets	88	(168)	(80)
Interest expense:			
Customer accounts	4,042	(7,793)	(3,751)
FHLB advances and other borrowings	(2,382)	(916)	(3,298)
All interest-bearing liabilities	1,660	(8,709)	(7,049)
Change in net interest income	(\$ 1,572)	\$ 8,541	\$ 6,969

Edgar Filing: WASHINGTON FEDERAL INC - Form 10-Q

(1) Includes interest on cash equivalents and dividends on FHLB stock

Provision for Loan Losses: The Company recorded a \$26,000,000 provision for loan losses during the quarter ended December 31, 2010, while a \$69,750,000 provision was recorded for the same quarter one year ago. Non-performing assets amounted to \$442,699,000, or 3.30%, of total assets at December 31, 2010, compared to \$553,285,000, or 4.37%, of total assets one year ago. The Company had net charge-offs of \$29,806,000 for the quarter ended December 31, 2010 compared with \$46,037,000 of net charge-offs for the same quarter one year ago. The ratio of net charge-offs to average non-covered loans outstanding was 0.35% and 0.51% for the quarters ended December 31, 2010 and 2009, respectively. The decrease in the provision for loan losses is in response to four primary factors: first, the improvement in the amount of NPAs year-over-year described at the beginning of this paragraph; second, non-accrual loans decreased from \$369,777,000 at December 31, 2009, to \$256,434,000 at December 31, 2010, a 30.7% decrease; third, the percentage of loans 30 days or more delinquent decreased from 4.74% at December 31, 2009, to 3.41% at December 31, 2010; and finally, the Company's exposure in the land A&D and speculative construction portfolios, where the majority of losses have come from during this period of the cycle, has decreased from a combined 7.5% of the gross loan portfolio at December 31, 2009, to 5.0% at December 31, 2010. Management expects the provision to remain at elevated levels until NPAs and charge-offs improve

PART I Financial Information

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

measurably. Management believes the allowance for loan losses, totaling \$159,288,000, is sufficient to absorb estimated losses inherent in the portfolio.

See Note E for further discussion and analysis of the allowance for loan losses for the quarter ended December 31, 2010.

Other Income: The quarter ended December 31, 2010 produced total other income of \$4,426,000 compared to \$24,238,000 for the same quarter one year ago, a decrease of \$19,812,000. The quarter ended December 31, 2009 included \$20,428,000 of gain on sale of investments, whereas the quarter ended December 31, 2010 included no gain on sale of investments.

Other Expense: The quarter ended December 31, 2010, produced total other expense of \$34,279,000 compared to \$26,977,000 for the same quarter one year ago, a 27.1% increase. The increase in total other expense over the same comparable period one year ago was primarily due to an increase of \$4,086,000 in compensation and benefits, which included the addition of employees from the Horizon transaction with the FDIC. Total other expense for the quarters ended December 31, 2010 and 2009 equaled 1.02% and 0.85%, respectively, of average assets. The number of staff, including part-time employees on a full-time equivalent basis, was 1,226 and 1,085 at December 31, 2010 and 2009, respectively.

Taxes: Income taxes increased \$9,153,000, or 197.1%, for the quarter ended December 31, 2010, when compared to the same period one year ago, due to a higher taxable income base. The effective tax rate for the quarter ended December 31, 2010, was 36.00%, compared to 37.00% for the same period one year ago. The Company expects an effective tax rate of 36.00% going forward.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Management believes that there have been no material changes in the Company's quantitative and qualitative information about market risk since September 30, 2010. For a complete discussion of the Company's quantitative and qualitative market risk, see "Management's Discussion and Analysis of Financial Condition and Results of Operations" in the Company's 2010 Form 10-K.

Item 4. Controls and Procedures

As of the end of the period covered by this report, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's President and Chief Executive Officer along with the Company's Executive Vice President and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to the Securities Exchange Act of 1934 (Exchange Act) Rule 13a-15. Based upon that evaluation, the Company's President and Chief Executive Officer, along with the Company's Executive Vice President and Chief Financial Officer, concluded that the Company's disclosure controls and procedures are effective in timely alerting them to material information relating to the Company (including its consolidated subsidiaries) required to be included in the Company's periodic SEC filings. There have been no significant changes in the Company's internal controls or in other factors that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Disclosure controls and procedures are Company controls and other procedures that are designed to ensure that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by the Company in the reports that it files under the Exchange Act is accumulated and communicated to the Company's management, including its President and Chief Executive Officer and Executive Vice President and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

PART II Other Information

Item 1. Legal Proceedings

From time to time the Company or its subsidiaries are engaged in legal proceedings in the ordinary course of business, none of which are considered to have a material impact on the Company's financial position or results of operations.

Item 1A. Risk Factors

In addition to the other information contained in this Quarterly Report on Form 10-Q, the following risk factors represent material updates and additions to the risk factors previously disclosed in the Company's Annual Report on Form 10-K. Additional risks not presently known to us, or that we currently deem immaterial, may also adversely affect our business, financial condition or results of operations.

Financial reform legislation will, among other things, eliminate the Office of Thrift Supervision (OTS), tighten capital standards, create a new Consumer Financial Protection Bureau and result in new laws and regulations that may increase our costs of operations.

On July 21, 2010, the President signed into law the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Act). This new law will significantly change the current bank regulatory structure and affect the lending, deposit, investment, trading and operating activities of financial institutions and their holding companies. It requires various federal agencies to adopt a broad range of new implementing rules and regulations, and to prepare numerous studies and reports for Congress. The federal agencies are given significant discretion in drafting the implementing rules and regulations, and consequently, many of the details and much of the impact of the Act may not be known for many months or years.

One change that is particularly significant to the Company and the Bank is the abolition of the OTS, the Bank's historical federal financial institution regulator, effective one year from the enactment date (with the possibility of a six-month extension). After the agency is abolished, supervision and regulation of the Company will move to the Board of Governors of the Federal Reserve System (Federal Reserve) and supervision and regulation of the Bank will move to the Office of the Comptroller of the Currency (OCC). Except as described below, however, the laws and regulations applicable to the Company and the Bank will not generally change the Home Owners Loan Act and the regulations issued under the Act will generally still apply (although these laws and regulations will be interpreted by the Federal Reserve and the OCC, respectively).

In addition, the Company for the first time will be subject to consolidated capital requirements and will be required to serve as a source of strength to the Bank. The Bank will be subject to the same lending limits as national banks. At this time, we do not anticipate that being subject to any of these provisions will have a material effect on the Company or the Bank.

The Act also broadens the base for Federal Deposit Insurance Corporation insurance assessments. Assessments will now be based on the average consolidated total assets less tangible equity capital of a financial institution. This could result in an increase in deposit insurance assessments to be paid by the Bank. The Act also permanently increases the maximum amount of deposit insurance for banks, savings institutions and credit unions to \$250,000 per depositor, retroactive to January 1, 2008, and non-interest

Table of Contents

WASHINGTON FEDERAL, INC. AND SUBSIDIARIES

PART II Other Information

bearing transaction accounts will have unlimited deposit insurance from December 31, 2010 through December 31, 2012. The Federal Reserve will also be adopting a rule addressing interchange fees applicable to debit card transactions that is expected to lower fee income generated from this source. At this time, we do not anticipate that being subject to any of these provisions will have a material effect on the Company or the Bank.

The Act will require publicly traded companies to give stockholders a non-binding vote on executive compensation and so-called "golden parachute" payments, and authorizes the Securities and Exchange Commission to promulgate rules that would allow stockholders to nominate their own candidates for election as directors using a company's proxy materials. The legislation also directs the federal financial institution regulatory agencies to promulgate rules prohibiting excessive compensation being paid to financial institution executives.

The Act creates a new Consumer Financial Protection Bureau to take over responsibility for the principal federal consumer protection laws, such as the Truth in Lending Act, the Equal Credit Opportunity Act, the Real Estate Settlement Procedures Act and the Truth in Saving Act, among others, with broad rule-making, supervisory and examination authority in this area over institutions that have assets of \$10 billion or more, such as the Bank. The Act also narrows the scope of federal preemption of state laws related to federally chartered institutions.

Many of the provisions of the Act will not become effective until a year or more after its enactment and, if required, the adoption and effectiveness of implementing regulations. In addition, the scope and impact of many of the Act's provisions will be determined through the rulemaking process. As a result, we cannot predict the ultimate impact of the Act on the Company or the Bank at this time, including the extent to which it could increase costs or limit our ability to pursue business opportunities in an efficient manner, or otherwise adversely affect our business, financial condition and results of operations. Nor can we predict the impact or substance of other future legislation or regulation. However, it is expected that at a minimum they will increase our operating and compliance costs.

The Bank has entered into a memorandum of understanding with the OTS that will entail compliance costs. Failure to comply with the memorandum of understanding could result in formal enforcement action or regulatory constraints on the Bank.

On July 28, 2010, the Bank entered into a memorandum of understanding with the OTS that requires the Bank to take a number of actions, including among other things: (1) develop a written enterprise risk management program; (2) enhance policies and procedures with respect to construction lending, portfolio valuation and interest rate risk management; (3) develop action plans and programs in the areas of consumer compliance, fair lending, information technology, business continuity and information security; and (4) monitor the Bank's performance results against its business plan. The memorandum of understanding does not affect dividend policy or require additional capital. Management believes that it is already in compliance with a number of the measures required by the memorandum of understanding and also believes that the Bank will be able to complete any other requirements within the specified timeframes, although compliance will be determined by the OTS and not by us. Compliance with the memorandum of understanding will increase the Bank's non-interest expenses in amounts that are not expected to, but may

Table of Contents**WASHINGTON FEDERAL, INC. AND SUBSIDIARIES****PART II Other Information**

be, material to our results of operations. The memorandum of understanding and the factors that gave rise to it also may have the effect of limiting or delaying our ability or plans to expand strategically. Moreover, a material failure to comply with the memorandum of understanding could subject the Bank to additional regulatory scrutiny or result in a formal enforcement action or constraints on the Bank's business, any of which could have a material adverse effect on future results of operations, financial condition, growth objectives or other aspects of our business. The requirements of the memorandum of understanding will remain in effect until the OTS decides to terminate, suspend or modify it.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table provides information with respect to purchases made by or on behalf of the Company of the Company's common stock during the three months ended December 31, 2010.

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plan (1)	Maximum Number of Shares That May Yet Be Purchased Under the Plan at the End of the Period
October 1, 2010 to October 31, 2010		\$		2,888,314
November 1, 2010 to November 30, 2010	17,300	14.95	17,300	2,871,014
December 1, 2010 to December 31, 2010	289,300 (2)	14.87 (2)	289,300	2,581,714
Total	306,600	\$ 14.88	306,600	2,581,714

- (1) The Company's only stock repurchase program was publicly announced by the Board of Directors on February 3, 1995 and has no expiration date. Under this ongoing program, a total of 21,956,264 shares have been authorized for repurchase.
- (2) On October 26, 2008, the Company announced it was asked to participate in the U.S. Treasury's Capital Purchase Program. As a result, effective November 14, 2008, the Company issued, in a private placement, warrants to the U.S. Treasury to purchase 1,707,456 shares of Company common stock with a strike price of \$17.57; the warrants expire November 14, 2018. On March 9, 2010, the Company announced a public offering of the warrants, listed on the Nasdaq Global Select Market under the symbol WFSLOW. On March 15, 2010, the U.S. Treasury sold, in a secondary public offering, all 1,707,456 warrants, each representing the right to purchase one share of the Company's common stock, at an exercise price of \$9.15. The Company purchased, as part of a non-publicly announced plan, in an open-market transaction, the following number of warrants during the period indicated. Per the Company's agreement with its Board of Directors, the purchase of warrants will reduce the number of shares available for repurchase from the stock repurchase program described in footnote 1 above. The following purchases are included in the numbers presented for the same period in the table above.

Period	Total Number of Warrants Purchased	Average Price Paid Per Warrant
October 1, 2010 to October 31, 2010		\$
November 1, 2010 to November 30, 2010		
December 1, 2010 to December 31, 2010	6,600	4.97
