ITEM 7.01 REGULATION FD DISCLOSURE

On April 27, 2011, the Registrant disclosed that it experienced a 45 basis point improvement in the net interest margin in the first quarter of 2011 as compared to the fourth quarter of 2010, which can be broken down into the following significant categories: First, changes in both the rates and mix of deposit products during the first quarter led to a 20 basis point increase in margin compared to the fourth quarter of 2010. In addition, changes to the FDIC covered loan portfolio led to another nine basis point increase in the margin (including a pool payoff which accounted for six basis points of this change). Loan growth provided another eight basis point of the margin increase. The Company retired some Trust Preferred Securities, which improved the margin four basis points. Finally, other factors accounted for the remaining four basis points in margin improvement.
