3.2 Warning and Explanation on Projection of a Possible Loss or Material Year-on-year Change in Operating Results from the Beginning of the Year to the End of the Next Reporting Period

Since 2012, international crude oil prices have remained at a high level, resulting in a significant increase in the production costs of the Company and its subsidiaries (the Group). In addition, domestic prices of refined oil products were not adjusted in an adequate and timely manner during the Reporting Period. The market for petrochemical products remained weak despite a slight pickup, together with intensified competition within the industry. Thereby the Group recorded net loss attributable to equity shareholders of the Company for the first quarter of 2012. The Company forecasted that the Group's net profit attributable to equity shareholders of the Company for the six-month period ending 30 June 2012 would have a substantial decrease as compared to the corresponding period of the previous year.

3.3 Implementation of Dividend Policy during the Reporting Period

The 2011 profit distribution plan was considered and approved at the fifth meeting of the seventh session of the Board held on 29 March 2012. Based on the total share capital of 7.2 billion shares as at 31 December 2011, a dividend of RMB0.50 (tax inclusive) per 10 shares shall be distributed subject to the approval by the 2011 annual general meeting of the Company.
