Kansas City Life Insurance Company

Notes to Consolidated Financial Statements (Unaudited)

1. Nature of Operations and Significant Accounting Policies

Basis of Presentation

The unaudited interim consolidated financial statements and the accompanying notes include the accounts of the consolidated entity (the Company), which primarily consists of three life insurance companies. Kansas City Life Insurance Company (Kansas City Life) is the parent company. Sunset Life Insurance Company of America (Sunset Life) and Old American Insurance Company (Old American) are wholly-owned subsidiaries.

The unaudited interim consolidated financial statements have been prepared on the basis of U.S. generally accepted accounting principles (GAAP) for interim financial reporting and with the instructions to Form 10-Q and Regulations S-K, S-X, and other applicable regulations. Accordingly, they do not include all of the disclosures required by GAAP for complete financial statements. As such, these unaudited interim consolidated financial statements should be read in conjunction with the Company's 2011 Form 10-K as filed with the Securities and Exchange Commission. Management believes that the disclosures are adequate to make the information presented not misleading, and all normal and recurring adjustments necessary to present fairly the financial position at June 30, 2012 and the results of operations for all periods presented have been made. The results of operations for any interim period are not necessarily indicative of the Company's operating results for a full year. Significant intercompany transactions have been eliminated in consolidation and certain immaterial reclassifications have been made to prior period results to conform with the current period's presentation.

The preparation of the unaudited interim consolidated financial statements requires management of the Company to make estimates and assumptions relating to the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the unaudited interim consolidated financial statements, and the reported amounts of revenue and expenses during the period. These estimates are inherently subject to change and actual results could differ from these estimates.

Immaterial Correction of Errors

During the second quarter of 2012, the Company identified an error in the presentation of treasury stock held for the benefit of the Company's deferred compensation plans. This treasury stock was previously recorded as a component of other assets but should have been recorded in stockholders' equity as treasury stock. Accordingly, the Company reclassified \$6.2 million (188,621 shares) from other assets to treasury stock. This error had no material impact on net income in the current or prior reporting periods.

During the first quarter of 2012, the Company identified an error related to the amortization period for unrecognized actuarial gains and losses for its pension plan resulting in a reduction to net periodic pension expense of \$2.0 million before applicable income taxes and an after-tax increase of \$1.3 million to net income and stockholders' equity. The excess amortization had been previously recorded during 2011. Please refer to Note 11 - Pensions and Other Postretirement Benefits for additional information.

During 2011, the Company identified errors related to the classification of amounts reported in the Consolidated Statement of Cash Flows. The Company has revised the Consolidated Statement of Cash Flows for the six months ended June 30, 2011. The changes resulted in a decrease of \$0.9 million to cash flows from operating activities and an increase of the same amount to cash flows from financing activities. This change did not impact net income, the balance sheet, or stockholders' equity for the period.

Management has evaluated these errors both quantitatively and qualitatively, and concluded that these corrections were not material to the consolidated financial statements.

Significant Accounting Policies

No significant updates or changes to these policies occurred during the six months ended June 30, 2012.

For a full discussion of these significant accounting policies, please refer to the Company's 2011 Form 10-K.

Kansas City Life Insurance Company

Notes to Consolidated Financial Statements (Unaudited) Continued

2. New Accounting Pronouncements

For a full discussion of new accounting pronouncements and other regulatory activity and their impact on the Company, please refer to the Company's 2011 Form 10-K.

Accounting Pronouncements Adopted During 2012

In October 2010, the Financial Accounting Standards Board (FASB) issued guidance that modifies the types of costs incurred by insurance entities that can be capitalized when issuing or renewing insurance contracts. The guidance defines allowable deferred acquisition costs as incremental or directly related to the successful acquisition of new or renewal contracts. In addition, certain costs related directly to acquisition activities performed by the insurer, such as underwriting and policy issuance, are also deferrable. This guidance also defines the considerations for the deferral of direct-response advertising costs. This guidance became effective for interim and annual periods beginning after December 15, 2011, with either prospective or retrospective application permitted. The Company adopted this new guidance prospectively on January 1, 2012. Please refer to Note 7 – Change in Accounting Principle for additional information.

In May 2011, the FASB issued new guidance concerning fair value measurements and disclosure. The new guidance is the result of joint efforts by the FASB and the International Accounting Standards Board (IASB) to develop a single, converged fair value framework on how to measure fair value and the necessary disclosures concerning fair value measurements. The guidance became effective for interim and annual periods beginning after December 15, 2011. The Company adopted this new guidance on January 1, 2012 with no material impact to the consolidated financial statements.

In June 2011, the FASB issued new guidance regarding the manner in which entities present comprehensive income in the financial statements. This guidance removes the previous presentation options and provides that entities must report comprehensive income in either a continuous statement of comprehensive income or two separate but consecutive statements. This guidance also includes the requirement for reclassification adjustments for items that are reclassified from other comprehensive income to net income to be presented on the face of the financial statements. This guidance does not change the items that must be reported in other comprehensive income nor does it require any disclosures in addition to those previously required. In December 2011, the FASB deferred the effective date for amendments to the presentation of reclassification adjustments. The guidance became effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. The Company adopted this new guidance on January 1, 2012 with no material impact to the consolidated financial statements.

All other new accounting standards and updates of existing standards issued through the date of this filing were considered by management and did not relate to accounting policies and procedures pertinent to the Company at this time.

Redeemable preferred stocks	15,736	15,842
	\$ 2,580,775	\$ 2,816,250

Unrealized Losses on Investments

The Company reviews all security investments, with particular attention given to those having unrealized losses. Further, the Company specifically assesses all investments with greater than 10% declines in fair value below amortized cost and, in general, monitors all security investments as to ongoing risk. These risks are fundamentally evaluated through both a qualitative and quantitative analysis of the issuer. The Company also prepares a formal review document no less often than quarterly of all investments where fair value is less than 80% of amortized cost for six months or more and selected investments that have changed significantly from a previous period and that have a decline in fair value greater than 10% of amortized cost.

Table of Contents

Kansas City Life Insurance Company

Notes to Consolidated Financial Statements (Unaudited) Continued

The Company has a policy and process in place to identify securities that could potentially have an impairment that is other-than-temporary (OTTI). This process involves monitoring market events and other items that could impact issuers. The Company considers relevant facts and circumstances in evaluating whether the impairment of a security is other-than-temporary. Relevant facts and circumstances considered are described in the Valuation of Investments section of Note 1 – Nature of Operations and Significant Accounting Policies of the Company’s 2011 Form 10-K.

To the extent the Company determines that a fixed maturity security is deemed to be other-than-temporarily impaired, the portion of the impairment that is deemed to be due to credit is charged to the Consolidated Statements of Comprehensive Income and the cost basis of the underlying investment is reduced. The portion of such impairment that is determined to be non-credit-related is deducted from net realized loss in the Consolidated Statements of Comprehensive Income and is reflected in other comprehensive income and accumulated other comprehensive income.

There are a number of significant risks and uncertainties inherent in the process of monitoring impairments, determining if an impairment is other-than-temporary and determining the portion of an other-than-temporary impairment that is due to credit. These risks and uncertainties are described in the Valuation of Investments section of Note 1 of the Company’s 2011 Form 10-K.

Once a security is determined to have met certain of the criteria for consideration as being other-than-temporarily impaired, further information is gathered and evaluated pertaining to the particular security. If the security is an unsecured obligation, the additional research is a top-down approach with particular emphasis on the likelihood of the issuer to meet the contractual terms of the obligation. If the security is secured by an asset or guaranteed by another party, the value of the underlying secured asset or the financial ability of the third-party guarantor is evaluated as a secondary source of repayment. Such research is based upon a top-down approach, narrowing to the specific estimates of value and cash flow of the underlying secured asset or guarantor. If the security is a collateralized obligation, such as a mortgage-backed or other asset-backed instrument, research is also conducted to obtain and analyze the performance of the collateral relative to expectations at the time of acquisition and with regard to projections for the future. Such analyses are based upon historical results, trends, comparisons to collateral performance of similar securities, and analyses performed by third parties. This information is used to develop projected cash flows that are compared to the amortized cost of the security.

If a determination is made that an unsecured security, secured security, or security with a guaranty of payment by a third-party is other-than-temporarily impaired, an estimate is developed of the portion of such impairment that is due to credit. The estimate of the portion of impairment due to credit is based upon a comparison of ratings and maturity horizon for the security and relative historical default probabilities from one or more nationally recognized rating organizations. When appropriate for any given security, sector or period in the business cycle, the historical default probability is adjusted to reflect periods or situations of distress by adding to the default probability increments of standard deviations from mean historical results. The credit impairment analysis is supplemented by estimates of potential recovery values for the specific security, including the potential impact of the value of any secured assets, in the event of default. This information is used to determine the Company’s best estimate, derived from probability-weighted cash flows.

The evaluation of loan-backed and similar asset-backed securities, particularly including residential mortgage-backed securities, with significant indications of potential other-than-temporary impairment requires considerable use of estimates and judgment. Specifically, the Company performs discounted cash flow projections on these securities to evaluate whether the value of the investment is expected to be fully realized. Projections of expected future cash flows are based upon considerations of the performance of the actual underlying assets, including historical delinquencies, defaults, severity of losses incurred, and prepayments, along with the Company’s estimates of future results for these factors. The Company’s estimates of future results are based upon actual historical performance of the underlying assets relative to historical, current and expected general economic conditions, specific conditions related to the underlying assets, industry data, and other factors that are believed to be relevant. If the present value of the projected expected future cash flows is determined to be below the Company’s carrying value, the Company recognizes an other-than-temporary impairment on the portion of the carrying value that exceeds the projected expected future cash flows. To the extent that the loan-backed or other asset-backed securities were high quality investments at the time of acquisition, and they remain high quality investments and do not otherwise demonstrate characteristics of impairment, the Company performs other initial evaluations to determine whether other-than-temporary cash flow evaluations need to be performed.

Table of Contents**Kansas City Life Insurance Company****Notes to Consolidated Financial Statements (Unaudited) Continued**

The discounted future cash flow calculation typically becomes the primary determinant of whether any portion and to what extent an unrealized loss is due to credit on loan-backed and similar asset-backed securities with significant indications of potential other-than-temporary impairment. Such indications typically include below investment grade ratings and significant unrealized losses for an extended period of time, among other factors. The Company identified 17 non-U.S. Agency mortgage-backed securities that had such indications at both June 30, 2012 and December 31, 2011. The discount rate used in calculating the present value of future cash flows was the investment yield at the time of purchase for each security. The initial default rates were assumed to remain constant over a 24-month time frame and grade down thereafter, reflecting the general perspective of a more stabilized residential housing environment in the future.

For loan-backed and similar asset-backed securities, the determination of any amount of impairment that is due to credit is based upon the present value of projected future cash flows being less than the amortized cost of the security. This amount is recognized as a realized loss in the Company's Consolidated Statements of Comprehensive Income and the carrying value of the security is written down by the same amount. The portion of an impairment that is determined not to be due to credit is recorded as a component of accumulated other comprehensive income in the Consolidated Balance Sheets.

As part of the required accounting for unrealized gains and losses, the Company also adjusts the deferred acquisition costs (DAC) and value of business acquired (VOBA) assets to recognize the adjustment to those assets as if the unrealized gains and losses from securities classified as available for sale actually had been realized.

The following table provides information regarding fixed maturity and equity security investments available for sale with unrealized losses by length of time at June 30, 2012.

In addition, the Company also considers as part of its monitoring and evaluation process the length of time the fair value of a security is below amortized cost. At June 30, 2012, the Company had 65 issues in its investment portfolio of fixed maturity and equity securities with unrealized losses. Included in this total, 30 security issues were below cost for less than one year; six security issues were below cost for one year or more and less than three years; and 29 security issues were below cost for three years or more. At December 31, 2011, the Company had 85 issues in its investment portfolio of fixed maturity and equity securities with unrealized losses. Included in this total, 46 security issues were below cost for less than one year; 10 security issues were below cost for one year or more and less than three years; and 29 security issues were below cost for three years or more.

Gross realized losses	(32)	(1,590)	(32)	(1,590)

Mortgage Loans

The Company invests on an ongoing basis in commercial mortgage loans that are secured by commercial real estate and are stated at cost, adjusted for amortization of premium and accrual of discount, less an allowance for potential future losses. This allowance is maintained at a level believed by management to be adequate to absorb estimated credit losses and was \$2.5 million at June 30, 2012 and \$2.8 million at December 31, 2011. The Company had 16% of its invested assets in commercial mortgage loans at June 30, 2012, compared to 17% at December 31, 2011. In addition to the subject collateral underlying the mortgage, the Company typically requires some amount of recourse from borrowers as another potential source of repayment. The recourse requirement is determined as part of the underwriting requirements of each loan. The average loan to value ratio for the overall portfolio was 45% and 46% at June 30, 2012 and December 31, 2011, respectively, and is based upon the appraisal of value at the time the loan was originated or acquired.

Table of Contents**Kansas City Life Insurance Company****Notes to Consolidated Financial Statements (Unaudited) Continued**

The following table identifies the gross mortgage loan principal outstanding and the allowance for potential future losses at June 30, 2012 and December 31, 2011.

	\$ 582,017	100%	\$ 604,772	100%

The Company may refinance commercial mortgage loans prior to contractual maturity as a means of originating new loans that meet the Company's underwriting and pricing parameters. The Company refinanced loans with outstanding balances of \$4.0 million and \$1.9 million during the second quarters of 2012 and 2011, respectively, and \$8.6 million and \$9.7 million during the first six months of 2012 and 2011, respectively.

In the normal course of business, the Company commits to fund commercial mortgage loans generally up to 120 days in advance. These commitments generally have fixed expiration dates. A small percentage of commitments expire due to the borrower's failure to deliver the requirements of the commitment by the expiration date. In these cases, the Company retains the commitment fee. For additional information, please see Note 16 - Commitments.

At June 30, 2012, the Company had a construction-to-permanent loan commitment in the amount of \$2.8 million, and \$2.5 million had been disbursed on this loan. At completion and fulfillment of occupancy requirements, the construction loan will convert to a long-term, fixed-rate permanent loan.

4. Fair Value Measurements

Under GAAP, fair value represents the price that would be received to sell an asset (exit price) or paid to transfer a liability in an orderly transaction between market participants at the measurement date. It is the Company's policy to maximize the use of observable inputs and minimize the use of unobservable inputs when developing fair value measurements.

Table of Contents

Kansas City Life Insurance Company

Notes to Consolidated Financial Statements (Unaudited) Continued

The Company categorizes its financial assets and liabilities measured at fair value in three levels, based on the inputs and assumptions used to determine the fair value. These levels are as follows:

Level 1 Valuations are based upon quoted prices for identical instruments traded in active markets.

Level 2 Valuations are based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market. Valuations are obtained from third-party pricing services or inputs that are observable or derived principally from or corroborated by observable market data.

Level 3 Valuations are generated from techniques that use significant assumptions not observable in the market. These unobservable assumptions reflect the Company's assumptions that market participants would use in pricing the asset or liability. Valuation techniques include the use of discounted cash flow models, spread-based models, and similar techniques, using the best information available in the circumstances.

Following is a description of valuation methodologies used for assets and liabilities recorded at fair value and for estimating fair value for financial instruments not recorded at fair value but for which fair value is disclosed.

Assets

Securities Available for Sale

Fixed maturity and equity securities available for sale are recorded at fair value on a recurring basis. Fair value measurement is based upon unadjusted quoted prices, if available, except as described in the subsequent paragraphs.

Short-Term Financial Assets

Short-term financial assets include cash and other short-term assets. Cash is categorized as Level 1. Other short-term assets are invested in institutional money market funds. These assets are categorized as Level 2 in the fair value hierarchy, as the valuation is based upon the net asset value (NAV) of the fund.

Loans

The Company does not record loans at fair value. As such, valuation techniques discussed herein for loans are primarily for estimating fair value for purpose of disclosure.

Fair values of mortgage loans on real estate properties are calculated by discounting contractual cash flows, using discount rates based on current industry pricing or the Company's estimate of an appropriate risk-adjusted discount rate for loans of similar size, type, remaining maturity, likelihood of prepayment, and repricing characteristics. Mortgage loans are categorized as Level 3 in the fair value hierarchy.

The Company also has loans made to policyholders. These loans cannot exceed the cash surrender value of the policy. Carrying value of policy loans approximates fair value. Policy loans are categorized as Level 3 in the fair value hierarchy.

Separate Accounts

The separate account assets and liabilities, which are equal, are recorded at fair value based upon NAV. They are categorized as Level 2 in the fair value hierarchy, as the Company receives independent prices from external pricing sources to determine the fair value.

Liabilities

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

Investment-Type Liabilities Included in Policyholder Account Balances and Other Policyholder Funds

Fair values for liabilities under investment-type insurance contracts are based upon account value. The fair values of investment-type insurance contracts included with policyholder account balances for fixed deferred annuities are estimated to be their cash surrender values. The fair values of supplementary contracts without life contingencies are estimated to be the present value of payments using a market yield. The fair values of deposits with no stated maturity are estimated to be the amount payable on demand at the measurement date. These liabilities are categorized as Level 3 in the fair value hierarchy.

Guaranteed Minimum Withdrawal Benefits (GMWB)

The Company offers a GMWB rider that can be added to new or existing variable annuity contracts. The rider provides an enhanced withdrawal benefit that guarantees a stream of income payments to an owner or annuitant, regardless of the contract account value. Fair value for GMWB rider contracts is a Level 3 valuation, as it is based on models which utilize significant unobservable inputs. These models require actuarial and financial market assumptions, which reflect the assumptions market participants would use in pricing the contract, including adjustments for volatility, risk, and issuer non-performance.

Table of Contents

Kansas City Life Insurance Company

Notes to Consolidated Financial Statements (Unaudited) Continued

Notes Payable

Fair values for short-term notes payable approximate their carrying value. The carrying amount is a reasonable estimate of the fair value because of the relatively short time between the origination of the loan and its expected repayment.

Determination of Fair Value

The determination of the fair value of the Company's fixed maturity and equity securities is the responsibility of the Company's investment accounting group, which reports to the Principal Accounting Officer. This group manages and creates the policies and processes used to determine the fair value for these assets. This group employs third-party pricing services and obtains selected support from the Company's portfolio managers in order to achieve results for this multi-tiered process. All prices are reviewed by the investment accounting group. The financial reporting group, the Principal Accounting Officer, and the Chief Financial Officer also review the fair value methodologies and the fair values that are obtained each quarter. The results of those reviews are made known to the Company's Disclosure Committee and to the Company's Audit Committee. In addition, any significant policy or process changes made during the quarter are also discussed with the Company's Audit Committee.

The Company utilizes external independent third-party pricing services to determine the majority of its fair values on investment securities available for sale. At June 30, 2012, 96% of the carrying value of these investments was from external pricing services, 2% was from brokers, and 2% was derived from internal matrices and calculations. In the event that the primary pricing service does not provide a price, the Company utilizes the price provided by a second pricing service. The Company reviews prices received from service providers for reasonableness and unusual fluctuations but generally accepts the price identified from the primary pricing service. In the event that a price is not available from either third-party pricing service, the Company pursues external pricing from brokers. Generally, the Company pursues and utilizes only one broker quote per security. In doing so, the Company solicits only brokers which have previously demonstrated knowledge and experience of the subject security. If a broker price is not available, the Company determines a fair value through various valuation techniques that may include discounted cash flows, spread-based models, or similar techniques, depending upon the specific security to be priced. These techniques are primarily applied to private placement securities. The Company utilizes available market information, wherever possible, to identify inputs into the fair value determination, primarily including prices and spreads on comparable securities. In total, the Company internally determined the prices for 20 securities at June 30, 2012. The Company also obtained prices for seven securities from brokers.

Each quarter, the Company evaluates the prices received from third-party security pricing services and independent brokers to ensure that the prices represent a reasonable estimate of the fair value within the macro-economic environment, sector factors, and overall pricing trends and expectations. The Company corroborates and validates the primary pricing sources through a variety of procedures that include but are not limited to comparison to additional independent third-party pricing services or brokers, where possible; a review of third-party pricing service methodologies; back testing; and comparison of prices to actual trades for specific securities where observable data exists. In addition, the Company analyzes the primary third-party pricing service's methodologies and related inputs and also evaluates the various types of securities in its investment portfolio to determine an appropriate fair value hierarchy. Finally, the Company also performs additional evaluations when individual prices fall outside tolerance levels for prices received from third-party pricing services.

Fair value measurements for assets and liabilities where there exists limited or no observable market data are calculated using the Company's own estimates and are categorized as Level 3. These estimates are based on current interest rates, credit spreads, liquidity premium or discount, the economic and competitive environment, unique characteristics of the asset or liability, and other pertinent factors. Therefore, these estimates cannot be determined with precision and may not be realized in an actual sale or immediate settlement of the asset or liability. Additionally, there may be inherent weaknesses in any valuation technique. Further, changes in the underlying assumptions used, including discount rates and estimates of future cash flows, could significantly affect the results of current or future values.

The Company's own estimates of fair value of fixed maturity and equity securities are derived in a number of ways, including but not limited to: 1) pricing provided by brokers, where the price indicates reliability as to value; 2) fair values of comparable securities, incorporating a spread adjustment for maturity differences, collateralization, credit quality, liquidity, and other items, if applicable; 3) discounted cash flow models and margin spreads; 4) bond yield curves; 5) observable market prices and exchange transaction information not provided by external pricing services; and 6) statement values provided to the Company by fund managers.

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

The determination of the value of the Company's liabilities that are reported at fair value in the financial statements is the responsibility of the Company's valuation actuary group, which reports to the Company's Senior Vice President and Actuary. This group manages and creates the policies and processes used to determine the fair value for these liabilities. This methodology uses internal assumptions and directed third-party inputs to derive a value including a risk-neutral option pricing model that incorporates a third-party-developed index that is consistent with the attributes of the product and provides

for an approximate match of the volatility measure with the expected life of the underlying contracts. The fair value methodologies and the fair values are reviewed by the Senior Vice President and Actuary, the Principal Accounting Officer, and the Chief Financial Officer. The results of those reviews are made known to the Company's Disclosure Committee and to the Company's Audit Committee. In addition, any significant policy or process changes made during the quarter are also discussed with the Company's Audit Committee.

	Year Ended December 31, 2011			Liabilities
	Assets		Total	
	Fixed maturity securities available for sale	Equity securities available for sale		
Beginning balance	\$ 55,801	\$ 1,180	\$ 56,981	\$ (2,799)
Included in earnings	11	92	103	2,500
Included in other comprehensive income	1,385	51	1,436	-
Purchases, issuances, sales and other dispositions:				
Purchases	-	-	-	-
Issuances	-	-	-	163
Sales	-	-	-	-
Other dispositions	(2,977)	(200)	(3,177)	(51)
Transfers into Level 3	8,640	-	8,640	-
Transfers out of Level 3	(19,101)	-	(19,101)	-
Ending balance	\$ 43,759	\$ 1,123	\$ 44,882	\$ (187)
Net unrealized gains	\$ 1,401	\$ 105	\$ 1,506	

The Company did not exclude any realized or unrealized gains or losses on items transferred into Level 3 in any of the periods presented. Depending upon the availability of Level 1 or Level 2 pricing, specific securities may transfer into or out of Level 3. The Company did not have any transfers between Level 1 or Level 2 during the second quarter or six months ended June 30, 2012.

The following table presents quantitative information about material Level 3 fair value measurements as of June 30, 2012.

	Fair Value	Valuation Technique	Unobservable Inputs	Range (in basis points)	Weighted Average of Range
Fixed maturity securities	\$ 44,999	Market comparable	Spread adjustment	46-367	190

The Company's primary category of Level 3 fair values is fixed maturity securities, totaling \$45.0 million as of June 30, 2012. These assets are valued using comparable security valuations through the unobservable input of estimated discount spreads. Specifically, the Company reviews the values and discount spreads on similar securities for which such information is observable in the market. Estimates of increased discount spreads are then determined based upon the characteristics of the securities being evaluated. The Company estimates that an increased spread of 10 basis points on each of the Level 3 securities would reduce the reported fair value by \$0.2 million, as of June 30, 2012.

Other assets and liabilities categorized as Level 3 for purposes of fair value determination are not material to the Company's financial statements, and the sensitivities of such valuations to unobservable inputs are also believed to not be material.

Table of Contents**Kansas City Life Insurance Company****Notes to Consolidated Financial Statements (Unaudited) Continued**

The table below is a summary of fair value estimates at June 30, 2012 and December 31, 2011 for financial instruments. The Company has not included assets and liabilities that are not financial instruments in this disclosure. The total of the fair value calculations presented do not represent, and should not be construed to represent, the underlying value of the Company.

	June 30, 2012		December 31, 2011

5. Financing Receivables

The Company has financing receivables that have both a specific maturity date, either on demand or on a fixed or determinable date, and are recognized as an asset in the Consolidated Balance Sheets.

The table below identifies the Company's financing receivables by classification at June 30, 2012 and December 31, 2011.

	June 30 2012	December 31 2011
Receivables:		
Agent receivables, net (allowance \$2,230; \$2,226 2011)	\$ 1,527	\$ 1,708
Investment-related financing receivables:		
Mortgage loans, net (allowance \$2,517; \$2,849 2011)	579,500	601,923
Total financing receivables	\$ 581,027	\$ 603,631

The following table details the activity of the allowance for uncollectible accounts on agent receivables at June 30, 2012 and December 31, 2011.

Allowance for potential future losses	(2,517)	(2,849)
Carrying value	\$ 579,500	\$ 601,923

The following table details the activity of the allowance for potential future losses on mortgage loans at June 30, 2012 and December 31, 2011.

	June 30 2012	December 31 2011
Beginning of year	\$ 2,849	\$ 3,410
Additions	32	-
Deductions	(364)	(561)
End of period	\$ 2,517	\$ 2,849

Agent Receivables

The Company has agent receivables which are classified as financing receivables and are reduced by an allowance for doubtful accounts. These trade receivables from agents are long-term in nature and are specifically assessed as to the collectability of each receivable. The Company's gross agent receivables totaled \$3.7 million at June 30, 2012, and the Company maintained an allowance for doubtful accounts totaling \$2.2 million. Gross agent receivables totaled \$3.9 million with an allowance for doubtful accounts of \$2.2 million at December 31, 2011. The Company has two types of agent receivables, including:

Agent specific loans. At June 30, 2012, these loans totaled \$1.0 million with an allowance for doubtful accounts of \$0.2 million. At December 31, 2011, agent specific loans totaled \$0.8 million with an allowance for doubtful accounts of \$0.2 million.

Various agent commission advances and other commission receivables. Gross agent receivables in this category totaled \$2.7 million, with an allowance for doubtful accounts of \$2.0 million at June 30, 2012. Gross agent receivables totaled \$3.1 million and the allowance for doubtful accounts was \$2.0 million at December 31, 2011.

Mortgage Loans

The Company considers its mortgage loan portfolio to be long-term financing receivables. Mortgage loans are stated at cost, net of an allowance for potential future losses. Mortgage loan interest income is recognized on an accrual basis with any premium or discount amortized over the life

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

of the loan. Prepayment and late fees are recorded on the date of collection. Loans in foreclosure, loans considered impaired, or loans past due 90 days or more are placed on a non-accrual status.

If a mortgage loan is determined to be on non-accrual status, the Company does not accrue interest income. The loan is independently monitored and evaluated as to potential impairment or foreclosure. This evaluation includes assessing the probability of receiving future cash flows, along with consideration of many of the factors described below. If delinquent payments are made and the loan is brought current, then the Company returns the loan to active status and accrues income accordingly.

Generally, the Company considers its mortgage loans to be a portfolio segment. The Company considers its primary class to be property type. The Company primarily uses loan-to-value as its credit risk quality indicator but also monitors additional secondary risk factors, such as geographic distribution both on a regional and specific state basis. The mortgage loan portfolio segment is presented by property-type in a table in Note 3 Investments, as are geographic distributions for both regional and significant state concentrations. These measures are also supplemented with various other analytics to provide additional information concerning mortgage loans and management's assessment of financing receivables.

Table of Contents**Kansas City Life Insurance Company****Notes to Consolidated Financial Statements (Unaudited) Continued**

The following table presents an aging schedule for delinquent payments for both principal and interest at June 30, 2012 and December 31, 2011, by property type.

	Book Value	Amount of Payments Past Due			Total
		30-59 Days	60-89 Days	> 90 Days	
June 30, 2012					
Industrial	\$ -	\$ -	\$ -	\$ -	\$ -
Medical	-	-	-	-	-
Office	159	9	-	-	9
Other	-	-	-	-	-
Total	\$ 159	\$ 9	\$ -	\$ -	\$ 9
December 31, 2011					
Industrial	\$ -	\$ -	\$ -	\$ -	\$ -
Office	816	13	-	-	13
Medical	7,019	75	-	-	75
Other	-	-	-	-	-
Total	\$ 7,835	\$ 88	\$ -	\$ -	\$ 88

At June 30, 2012, there was one mortgage loan that was 30 days past due. Subsequently, payment was received and this loan was brought current in July 2012.

The allowance for potential future losses on mortgage loans is maintained at a level believed by management to be adequate to absorb estimated credit losses. Management's periodic evaluation and assessment of the adequacy of the reserve is based on known and inherent risks in the portfolio, historical and industry data, current economic conditions, and other relevant factors. The Company assesses the amount it maintains in the mortgage loan allowance through an assessment of what the Company believes are relevant factors at both the macro-environmental level and specific loan basis. A loan is considered impaired if it is probable that contractual amounts due will not be collected. The Company's allowance for potential future losses was \$2.5 million at June 30, 2012 and \$2.8 million at December 31, 2011. For information regarding management's periodic evaluation and assessment of mortgage loans and the allowance for potential future losses, please refer to Note 5 Financing Receivables in the Company's 2011 Form 10-K.

The Company has had three mortgage loan defaults in the current and prior year. One loan was foreclosed in the first quarter of 2012 and an impairment of \$0.2 million was recorded. One of the loan defaults in 2011 resulted in an impairment of \$0.4 million, while the second loan default in 2011 did not result in an impairment based upon the fair value of the property being greater than the loan value. The Company had no troubled loans that were restructured or modified during 2012 or 2011.

6. Variable Interest Entities

The Company invests in certain affordable housing and real estate joint ventures which are considered to be variable interest entities (VIEs) and are included in Real Estate in the Consolidated Balance Sheets. The assets held in affordable housing real estate joint venture VIEs are primarily residential real estate properties that are restricted to provide affordable housing under federal or state programs for varying periods of time. The restrictions primarily apply to the rents that may be paid by tenants residing in the properties during the term of an agreement to remain in the

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

affordable housing program. Investments in real estate joint ventures are equity interests in partnerships or limited liability corporations that may or may not participate in profits or residual value. In certain cases, the Company may issue fixed-rate senior mortgage loan investments secured by properties controlled by VIEs. These investments are classified as mortgage loans in the Consolidated Balance Sheets, and the income received from such investments is recorded as investment income in the Consolidated Statements of Comprehensive Income. For additional information, please refer to Note 6 Variable Interest Entities in the Company's 2011 Form 10-K.

Table of Contents**Kansas City Life Insurance Company****Notes to Consolidated Financial Statements (Unaudited) Continued**

The following table presents the carrying amount and maximum exposure to loss relating to VIEs for which the Company holds a variable interest, but is not the primary beneficiary, and which had not been consolidated at June 30, 2012 and December 31, 2011. The table includes investments in eight real estate joint ventures and 28 affordable housing real estate joint ventures at June 30, 2012 and investments in eleven real estate joint ventures and 28 affordable housing real estate joint ventures at December 31, 2011.

	June 30 2012		December 31 2011	
	Carrying Amount	Maximum Exposure to Loss	Carrying Amount	Maximum Exposure to Loss
Real estate joint ventures	\$ 24,089	\$ 24,089	\$ 35,551	\$ 35,551
Affordable housing real estate joint ventures	24,171	60,966	20,749	61,124
Total	\$ 48,260	\$ 85,055	\$ 56,300	\$ 96,675

The maximum exposure to loss relating to the real estate joint ventures and affordable housing real estate joint ventures, as shown in the table above, is equal to the carrying amounts plus any unfunded equity commitments, exposure to potential recapture of tax credits, guarantees of debt, or other obligations of the VIE with recourse to the Company. Unfunded equity and loan commitments typically require financial or operating performance by other parties and have not yet become due or payable but which may become due in the future.

At June 30, 2012 and December 31, 2011, the Company had \$1.4 million and \$6.4 million, respectively, in fixed-rate senior mortgage loan commitments outstanding to the benefit of entities that are also real estate joint venture VIEs. The loan commitments are included in the discussion of commitments in the Notes to Consolidated Financial Statements for both periods. The Company also has contingent commitments to fund additional equity contributions for operating support to certain real estate joint venture VIEs, which could result in additional exposure to loss. However, the Company is not able to quantify the amount of these contingent commitments.

In addition, the maximum exposure to loss on affordable housing joint ventures at June 30, 2012 and December 31, 2011 includes \$11.2 million and \$13.2 million, respectively, of losses which could be realized if the tax credits received by the VIEs were recaptured. Recapture events would cause the Company to reverse some or all of the benefit previously recognized by the Company or third parties to whom the tax credit interests were transferred. A recapture event can occur at any time during a 15-year required compliance period. The principal causes of recapture include financial default and non-compliance with affordable housing program requirements by the properties controlled by the VIE. The potential exposure due to recapture may be mitigated by guarantees from the managing member or managing partner in the VIE, insurance contracts, or changes in the residual value accruing to the Company's interests in the VIEs.

7. Change in Accounting Principle

The Company adopted Accounting Standards Update (ASU) No. 2010-26 *Accounting for Costs Associated with Acquiring or Renewing Insurance Contracts*, effective January 1, 2012. This guidance modifies the types of costs incurred by insurance entities that can be capitalized when issuing or renewing insurance contracts. The guidance defines allowable deferred acquisition costs as incremental or directly related to the successful acquisition of new or renewal contracts. In addition, certain costs related directly to acquisition activities performed by the insurer, such as underwriting and policy issuance, are also deferrable. This guidance also defines the considerations for the deferral of direct-response advertising costs.

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

Effective January 1, 2012, the Company prospectively adopted this guidance. Pursuant to this guidance, the Company evaluated the types of acquisition costs it capitalizes. The Company capitalizes agent compensation and benefits and other expenses that are directly related to the successful acquisition of contracts. The Company also capitalizes expenses directly related to activities performed by the Company, such as underwriting, policy issuance, and processing fees incurred in connection with successful contract acquisitions.

Table of Contents**Kansas City Life Insurance Company****Notes to Consolidated Financial Statements (Unaudited) Continued**

Deferred acquisition costs are capitalized as incurred. These costs for life insurance products are generally deferred and amortized over the premium paying period. Policy acquisition costs that relate to interest sensitive and variable insurance products are deferred and amortized in relation to the estimated gross profits to be realized over the lives of the contracts. For interest sensitive and variable insurance products, estimated gross profits are composed of net interest income, net realized investment gains and losses, fees, surrender charges, expenses, and mortality gains and losses. At the issuance of policies, projections of estimated gross profits are made which are then replaced by actual gross profits over the lives of the policies. The Company considers the following assumptions to be of significance when projecting future estimated gross profits: mortality, interest rates and spreads, surrender and withdrawal rates, and expense margins.

The amount of acquisition costs capitalized during the second quarter and six months ended June 30, 2012 were \$9.3 million and \$19.0 million, respectively. The amount of acquisition costs that would have been capitalized during the second quarter and six months ended June 30, 2012 if the Company's previous policy had been applied during that period would have been \$8.8 million and \$17.5 million, respectively. Thus, the adoption of this guidance resulted in a \$0.6 million and a \$1.5 million increase in the amount of acquisition costs capitalized during the two respective periods. The net result of the adoption of ASU No. 2010-26 were increases of \$0.8 million and \$1.4 million in pretax earnings in the second quarter and six months ended June 30, 2012, respectively.

8. Separate Accounts

The Company has a guaranteed minimum withdrawal benefit (GMWB) rider that can be added to new or existing variable annuity contracts. The rider provides an enhanced withdrawal benefit that guarantees a stream of income payments to an owner or annuitant, regardless of the contract account value. The value of variable annuity separate accounts with the GMWB rider was \$91.6 million at June 30, 2012 (December 31, 2011 - \$86.6 million) and the guarantee liability was \$0.3 million at June 30, 2012 (December 31, 2011 - (\$0.2) million). The value of the GMWB rider is recorded at fair value. The change in this value is included in policyholder benefits in the Consolidated Statements of Comprehensive Income. The value of variable annuity separate accounts with the GMWB rider is recorded in separate account liabilities, and the value of the rider is included in other policyholder funds in the Consolidated Balance Sheets. The determination of fair value of the GMWB liability requires models that use actuarial and financial market assumptions, which reflect the assumptions market participants would use in pricing the contract, including adjustments for risk and issuer non-performance.

Guarantees are offered under variable universal life and variable annuity contracts: a guaranteed minimum death benefit (GMDB) rider is available on certain variable universal life contracts, and GMDB are provided on all variable annuities. The GMDB rider for variable universal life and variable annuity contracts guarantees the death benefit for specified periods of time, regardless of investment performance, provided cumulative premium requirements are met. The total reserve held for the variable annuity GMDB at June 30, 2012 was \$0.1 million (December 31, 2011 - \$0.2 million).

9. Notes Payable

The Company had no notes payable at June 30, 2012 or December 31, 2011.

As a member of the Federal Home Loan Bank of Des Moines (FHLB) with a capital investment of \$4.7 million, the Company has the ability to borrow on a collateralized basis from the FHLB. The Company received dividends on the capital investment of less than \$0.1 million in both the second quarter and the six-month period ended June 30, 2012. Dividends received were less than \$0.1 million in the second quarter and \$0.1 million for the six-month period ended June 30, 2011.

The Company has unsecured revolving lines of credit of \$60.0 million with two major commercial banks with no balances outstanding and which are at variable interest rates based upon short-term indices. These lines of credit will expire in June of 2013. The Company anticipates renewing these lines as they come due.

Table of Contents**Kansas City Life Insurance Company****Notes to Consolidated Financial Statements (Unaudited) Continued****10. Income Taxes**

The following table provides a reconciliation of the federal income tax rate to the Company's effective income tax rate for the second quarters and six months ended June 30, 2012 and 2011.

	Quarter Ended June 30		Six Months Ended June 30	
	2012	2011	2012	2011
Federal income tax rate	35%	35%	35%	35%
Tax credits, net of equity adjustment	(1)	-	-	-
Permanent differences	(1)	(1)	(1)	(1)
Other	2	-	-	-
Effective income tax rate	35%	34%	34%	34%

The Company did not have any uncertain tax positions at June 30, 2012.

At June 30, 2012, the Company had a \$2.3 million current tax liability and a \$75.7 million deferred tax liability, compared to a \$0.3 million current tax recoverable and a \$68.8 million deferred tax liability at December 31, 2011.

11. Pensions and Other Postretirement Benefits

The following table provides the components of net periodic benefit cost for the second quarters and six months ended June 30, 2012 and 2011:

	Pension Benefits Quarter Ended June 30		Other Benefits Quarter Ended June 30	
	2012	2011	2012	2011
Service cost	\$ -	\$ -	\$ 199	\$ 161
Interest cost	1,475	1,871	452	387

Net periodic benefit cost (income)	\$ (2,350)	\$ 850	\$ 1,300	\$ 950

Table of Contents

Kansas City Life Insurance Company

Notes to Consolidated Financial Statements (Unaudited) Continued

During the first quarter of 2012, the Company identified an error related to the amortization period for unrecognized actuarial gains and losses for its pension plan. The Company determined that upon curtailment of the plan on January 1, 2011, the status of the plan participants should have changed from active to inactive. The amortization period was corrected from the average remaining service period of plan participants, approximately 10 years, to the average remaining life expectancy of plan participants, approximately 26 years. The Company has recognized a \$2.0 million pre-tax benefit related to the reversal of amortization recorded during 2011.

12. Share-Based Payment

The Company has a long-term incentive plan for senior management that provides a cash award to participants for the increase in the share price of the Company's common stock through units (phantom shares) assigned by the Board of Directors. The cash award is calculated over a three-year interval on a calendar year basis. At the conclusion of each three-year interval, participants will receive a cash award based on the increase in the share price during a defined measurement period, multiplied by the number of units. The increase in the share price will be determined based on the change in the share price from the beginning to the end of the three-year interval. Dividends are accrued and paid at the end of each three-year interval to the extent that they exceed negative stock price appreciation. Plan payments are contingent on the continued employment of the participant unless termination is due to a qualifying event such as death, disability, or retirement. The Company does not make payments in shares, warrants, or options.

No payments were made under this plan during the first six months ended June 30, 2012 and 2011.

At each reporting period, an estimate of the share-based compensation expense is accrued, utilizing the share price at the period end. The cost of share-based compensation accrued as an operating expense in the second quarter of 2012 was \$0.2 million, net of tax. The change in accrual for share-based compensation that reduced operating expense in the second quarter of 2011 was \$0.1 million, net of tax. The cost of compensation accrued as an operating expense for the six months ended June 30, 2012 was \$0.5 million, net of tax. The change in accrual for share-based compensation that reduced operating expense in the first six months of 2011 was less than \$0.1 million, net of tax.

13. Comprehensive Income

Comprehensive income is comprised of net income and other comprehensive income. Other comprehensive income includes the unrealized investment gains or losses on securities available for sale (net of adjustments for realized investment gains or losses) net of adjustments to DAC, VOBA, future policy benefits, and policyholder account balances. In addition, other comprehensive income includes the change in the liability for benefit plan obligations. Other comprehensive income reflects these items net of tax.

Table of Contents**Kansas City Life Insurance Company****Notes to Consolidated Financial Statements (Unaudited) Continued**

The table below provides information about comprehensive income for the second quarters and six months ended June 30, 2012 and 2011.

	Quarter Ended June 30, 2012		
	Before-Tax Amount	Tax (Expense) or Benefit	Net-of-Tax Amount

14. Earnings Per Share

Due to the Company's capital structure and the absence of other potentially dilutive securities, there is no difference between basic and diluted earnings per common share for any of the periods reported. The average number of shares outstanding for the quarters ended June 30, 2012 and 2011 was 11,093,397 and 11,466,948, respectively. The average number of shares outstanding for the six months ended June 30, 2012 and 2011 was 11,134,834 and 11,467,044, respectively. The number of shares outstanding at June 30, 2012 and December 31, 2011 was 11,056,933 and 11,309,365, respectively.

15. Segment Information

The following schedule provides the financial performance of each of the three reportable operating segments of the Company.

		Individual Insurance	Group Insurance	Old American	Intercompany Eliminations ¹	Consolidated
Insurance revenues:						
Second quarter:	2012	\$ 30,032	\$ 12,197	\$ 17,664	\$ (98)	\$ 59,795
	2011	25,542	12,246	16,899	(134)	54,553
Six months:	2012	\$ 58,601	\$ 24,264	\$ 34,964	\$ (197)	\$ 117,632
	2011	56,274	24,800	33,607	(269)	114,412
Net investment income:						
Second quarter:	2012	\$ 40,334	\$ 132	\$ 2,969	\$ -	\$ 43,435
	2011	41,654	142	3,097	-	44,893
Six months:	2012	\$ 81,455	\$ 260	\$ 5,929	\$ -	\$ 87,644
	2011	83,767	287	6,230	-	90,284
Net income (loss):						
Second quarter:	2012	\$ 6,704	\$ 121	\$ 1,572	\$ -	\$ 8,397

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

	2011	10,937	(152)	388	-	11,173
Six months:	2012	\$ 26,191	\$ (214)	\$ 1,861	\$ -	\$ 27,838
	2011	17,042	(552)	(526)	-	15,964

¹ Elimination entries to remove intercompany transactions for life and accident and health insurance that the Company purchases for its employees and agents were as follows: insurance revenues from the Group Insurance segment and operating expenses from the Individual Insurance segment to arrive at Consolidated Statements of Comprehensive Income.

16. Commitments

In the normal course of business, the Company has open purchase and sale commitments. At June 30, 2012, the Company had purchase commitments to fund mortgage loans and other investments of \$10.5 million. Included in this total, the Company had commitments to originate mortgage loans of \$8.4 million at June 30, 2012 with fixed interest rates ranging from 4.13% to 5.50%. At June 30, 2012, the Company also had a commitment to fund one construction-to-permanent loan of \$0.3 million that is subject to the borrower's performance.

Table of Contents

Kansas City Life Insurance Company

Notes to Consolidated Financial Statements (Unaudited) Continued

17. Contingent Liabilities

The Company is occasionally involved in litigation, both as a defendant and as a plaintiff. The life insurance industry, including the Company and its subsidiaries, has been subject to an increase in litigation in recent years. Such litigation has been pursued on behalf of purported classes of insurance purchasers, often questioning the conduct of insurers in the marketing of their products. In addition, state regulatory bodies, the SEC, FINRA, and other regulatory bodies regularly make inquiries and conduct examinations or investigations concerning the Company's compliance with laws in relation to, but not limited to, insurance, securities and activities of broker-dealers and investment advisors.

The Company's retail broker-dealer subsidiary is in an industry that involves substantial risks of liability. The Company's broker-dealer subsidiary, Sunset Financial Services (SFS), has been named as a defendant in several new cases in recent periods. In recent years, regulatory proceedings, litigation, and FINRA arbitration actions related to registered representative activity and securities products (including, mutual funds, variable annuities, and alternative investments, such as real estate investment products and oil and gas investments) have continued to increase. Given the significant decline in the major market indices beginning in 2008, and the generally poor performance of investments that have historically been considered safe and conservative, there is the potential for an increase in the number of proceedings to which a broker-dealer may be named as a party.

In addition to the above, the Company and its subsidiaries are defendants in, or subject to, other claims or legal actions related to insurance and investment products. Some of these claims and legal actions are in jurisdictions where juries are given substantial latitude in assessing damages, including punitive damages.

Although no assurances can be given and no determinations can be made at this time, management believes that the ultimate liability, if any, with respect to these legal actions and other claims would not have a material effect on the Company's business, results of operations, or financial position.

In accordance with applicable accounting guidelines, the Company has established an accrued liability for litigation and regulatory matters when those matters present loss contingencies that are both probable and estimable. As a litigation or regulatory matter develops, it is evaluated on an ongoing basis, in conjunction with outside counsel, as to whether the matter presents a loss contingency that meets conditions indicating the need for accrual and/or disclosure. If and when a loss contingency related to litigation or regulatory matters is deemed to be both probable and estimable, the Company establishes an accrued liability. This accrued liability is then monitored for further developments that may affect the amount of the accrued liability.

18. Guarantees and Indemnifications

The Company is subject to various indemnification obligations issued in conjunction with certain transactions, primarily assumption reinsurance agreements, stock purchase agreements, mortgage servicing agreements, tax credit assignment agreements, construction and lease guarantees and borrowing agreements whose terms range in duration and often are not explicitly defined. Generally, a maximum obligation is not explicitly stated. Therefore, the overall maximum amount of the obligation under the indemnifications cannot be reasonably estimated. The Company is unable to estimate with certainty the ultimate legal and financial liability with respect to these indemnifications. The Company believes that the likelihood is remote that material payments would be required under such indemnifications and therefore such indemnifications would not result in a material adverse effect on the financial position or results of operations.

19. Subsequent Events

On July 23, 2012, the Board of Directors declared a quarterly dividend of \$0.27 per share that will be paid August 8, 2012 to stockholders of record as of August 2, 2012.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Amounts are stated in thousands, except share data, or as otherwise noted.

Management's Discussion and Analysis of Financial Condition and Results of Operations is intended to provide in narrative form the perspective of the management of Kansas City Life Insurance Company (the Company) on its financial condition, results of operations, liquidity, and certain other factors that may affect its future results. The following is a discussion and analysis of the results of operations for the quarters ended June 30, 2012 and 2011 and the financial condition of the Company at June 30, 2012. This discussion should be read in conjunction with the consolidated financial statements and accompanying notes included in this document, as well as the Company's 2011 Form 10-K.

Overview

Kansas City Life Insurance Company is a financial services company that is predominantly focused on the underwriting, sales, and administration of life insurance and annuity products. The consolidated entity (the Company) primarily consists of three life insurance companies. Kansas City Life Insurance Company (Kansas City Life) is the parent company. Sunset Life Insurance Company of America (Sunset Life) and Old American Insurance Company (Old American) are wholly-owned subsidiaries. For additional information, please refer to the Overview included in Management's Discussion and Analysis of Financial Condition and Results of Operations in the Company's 2011 Form 10-K.

Cautionary Statement on Forward-Looking Information

This report reviews the Company's financial condition and results of operations, and historical information is presented and discussed. Where appropriate, factors that may affect future financial performance are also identified and discussed. Certain statements made in this report include forward-looking statements that fall within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements include any statement that may predict, forecast, indicate or imply future results, performance, or achievements rather than historical facts and may contain words like believe, expect, estimate, project, forecast, anticipate, plan, will, shall, and other words, phrases, or similar meaning.

Actual results may differ materially from those included in the forward-looking statements as a result of risks and uncertainties. Those risks and uncertainties include, but are not limited to, the risk factors listed in Item 1A. Risk Factors as filed in the Company's 2011 Form 10-K. For additional information, please refer to the Overview included in Management's Discussion and Analysis of Financial Condition and Results of Operations in the Company's 2011 Form 10-K.

Table of Contents**Consolidated Results of Operations*****Summary of Results***

The Company earned net income of \$8.4 million in the second quarter of 2012 compared to \$11.2 million in the second quarter of 2011. Net income per share was \$0.78 in the second quarter of 2012 versus \$0.97 in same period in the prior year. Net income for the first six months of 2012 was \$27.8 million, an increase of \$11.9 million or 74% compared to last year. Net income per share for the six months was \$2.50, an increase of \$1.11 per share versus the same period one year earlier. The following table presents variances between the results for the second quarters and six months ended June 30, 2012 and 2011. Additional information on these items is presented below.

	Quarter Ended June 30 2012 Versus 2011	Six Months Ended June 30 2012 Versus 2011
Insurance and other revenues	\$ 4,888	\$ 2,643
Net investment income	(1,458)	(2,640)
Net realized investment gains	(496)	14,380
Policyholder benefits and interest credited to policyholder account balances	(2,022)	4,705
Amortization of deferred acquisition costs	(4,416)	(2,733)
Operating expenses	(580)	1,323
Income tax expense	1,308	(5,804)
Total variance	\$ (2,776)	\$ 11,874

Sales

The Company measures sales in terms of new premiums and deposits. Sales of traditional life insurance, immediate annuities, and accident and health products are reported as premium income for financial statement purposes. Deposits received from the sale of interest sensitive products, including universal life insurance, fixed deferred annuities, variable universal life, variable annuities, and supplementary contracts without life contingencies are reflected as deposits in the Consolidated Statements of Cash Flows.

The Company's marketing plan for individual products focuses on three main aspects: providing financial security with respect to life insurance, the accumulation of long-term value, and future retirement income needs. The primary emphasis is on the growth of individual life insurance business, including new premiums for individual life products and new deposits for universal life and variable universal life products.

Sales are primarily made through the Company's existing sales force. The Company emphasizes growth of the sales force with the addition of new general agents and agents. The Company believes that increased sales will result through both the number and productivity of general agents and agents. In addition, the Company places an emphasis on training and direct support to the field force to assist new agents in their start-up phase. In addition, the Company provides support to existing

Table of Contents

agents to stay abreast of the ever-changing regulatory environment and to introduce agents to new products and enhanced features of existing products. On occasion, the Company may also selectively utilize third-party marketing arrangements to enhance its sales objectives. This allows the Company the flexibility to identify niches or pursue unique avenues in the existing market environment and to react quickly to take advantage of opportunities as they occur.

The Company also markets a series of group products. These products include group life, dental, disability, and vision products. The primary growth strategies for these products include increased productivity of the existing group representatives; planned expansion of the group distribution system; and to selectively utilize third-party marketing arrangements. Further, growth is to be supported by the addition of new products to the portfolio, particularly voluntary-type products.

The following table presents gross premiums by new and renewal business, less reinsurance ceded, as included in insurance revenues for the second quarters and six months ended June 30, 2012 and 2011. New premiums are also detailed by product.

	Quarter Ended June 30

Total new premiums	20,906	2	20,408	(20)
Renewal premiums	74,283	3	71,955	2
Total premiums	95,189	3	92,363	(4)
Reinsurance ceded	(28,280)	1	(27,937)	3
Premiums, net	\$ 66,909	4	\$ 64,426	(7)

Consolidated total premiums increased \$3.2 million or 7% in the second quarter of 2012 versus the same period in the prior year, as total new premiums increased \$2.6 million or 29% and total renewal premiums increased \$0.5 million or 1%. The increase in total new premiums was largely due to a \$2.4 million increase in immediate annuities. Immediate annuity receipts can have sizeable fluctuations, as receipts from policyholders largely result from one-time premiums rather than recurring premiums. In addition, new group life insurance premiums increased.

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

The increase in consolidated renewal premiums was largely due to a \$0.6 million increase in individual life insurance premiums, attributable to the Old American segment.

Table of Contents

Consolidated total premiums increased \$2.8 million or 3% in the first six months of 2012 versus one year earlier, reflecting a \$0.5 million or 2% increase in total new premiums and a \$2.3 million or 3% increase in total renewal premiums. The increase in total new premiums was due to a \$1.4 million or 38% increase in new immediate annuity premiums and a \$0.3 million increase in new group life premiums. These improvements were partially offset by a \$1.2 million or 18% decrease in new group accident and health premiums, primarily in the dental and short-term disability lines. The increase in renewal premiums reflected an increase in individual life insurance premiums from both the Individual and Old American segments. In addition, renewal group accident and health premiums increased, largely from the short-term disability line.

The following table reconciles deposits with the Consolidated Statements of Cash Flows and provides detail by new and renewal deposits for the second quarters and six months ended June 30, 2012 and 2011. New deposits are also detailed by product.

	Quarter Ended June 30			
	2012	% Change	2011	% Change
New deposits:				
Universal life insurance	\$ 2,857	(24)	\$ 3,750	22
Variable universal life insurance	103	(62)	268	35
Fixed deferred annuities	12,469	(31)	18,025	58
Variable annuities	4,642	(24)	6,142	10
Total new deposits	20,071	(29)	28,185	39
Renewal deposits	35,325	(3)	36,333	-
Total deposits	\$ 55,396	(14)	\$ 64,518	14

	Six Months Ended June 30			
	2012	% Change	2011	% Change
New deposits:				
Universal life insurance	\$ 6,160	(6)	\$ 6,562	1
Variable universal life insurance	260	(47)	493	12
Fixed deferred annuities	31,619	(4)	32,917	47
Variable annuities	8,603	(14)	9,979	(13)
Total new deposits	46,642	(7)	49,951	22
Renewal deposits	70,217	(3)	72,031	3
Total deposits	\$ 116,859	(4)	\$ 121,982	10

Total new deposits decreased \$8.1 million or 29% in the second quarter of 2012 compared with the second quarter of 2011. This change was primarily due to a \$5.6 million or 31% decrease in new fixed deferred annuity deposits and a \$1.5 million or 24% decrease in new variable annuity deposits. Total renewal deposits decreased \$1.0 million or 3% in the second quarter of 2012 versus last year, reflecting a \$0.9 million or 33% decrease in renewal variable annuity deposits. Total new deposits decreased \$3.3 million or 7% in the first six months of 2012 compared with the prior year. This decrease was largely due to a \$1.4 million or 14% decline in new variable annuity deposits and a \$1.3 million or 4% decrease in new fixed deferred annuity deposits. Total renewal deposits decreased \$1.8 million or 3%, reflecting a \$2.1 million or 35% decrease in renewal variable annuity deposits. Partially offsetting this decline, renewal fixed deferred annuity deposits increased \$0.8 million or 5% compared to last year. New sales and renewals for deposit products have been negatively affected for the second quarter and first six months of 2012 by continuing low interest rates and the uncertain economic environment.

Table of Contents***Insurance Revenues***

Insurance revenues consist of premiums, net of reinsurance, and contract charges. In the second quarter of 2012, total insurance revenues increased \$5.2 million or 10%, reflecting a \$3.4 million or 11% increase in net premiums and a \$1.8 million or 8% increase in contract charges compared to the prior year. The increase in net premiums resulted from a \$0.8 million or 3% increase in total individual life premiums, largely from the Old American segment, and a \$2.4 million increase in total immediate annuity premiums.

Insurance revenues increased \$3.2 million or 3% in the first six months of 2012 compared with the prior year. This increase was due to a \$2.5 million or 4% increase in net premiums and a \$0.7 million or 1% increase in contract charges. The increase in net premiums largely resulted from a \$1.6 million or 3% increase in total individual life insurance premiums, also largely from the Old American segment, and a \$1.2 million or 29% increase in total immediate annuity premiums.

Contract charges consist of cost of insurance, expense loads, amortization of unearned revenues, and surrender charges on policyholder account balances. Certain contract charges are not recognized in income immediately but are deferred and amortized into income in proportion to the expected future gross profits of the business, in a manner similar to DAC. Profit expectations are based upon assumptions of future interest spreads, mortality margins, expense margins, and policy and premium persistency experience. At least annually, a review is performed of the assumptions related to profit expectations. If it is determined the assumptions should be revised, the impact is recorded as a change in the revenue reported in the current period as an unlocking adjustment.

Contract charges are impacted by the sales of new products and the persistency of both existing and closed blocks of business. The closed blocks of business reflect policies and companies that the Company has purchased but to which the Company is not actively pursuing marketing efforts to generate new sales and has the intent of servicing to achieve long-term profit streams.

Total contract charges on all blocks of business increased \$1.8 million or 8% in the second quarter of 2012 compared to the same periods in 2011. The increase in the second quarter of 2012 was largely due to a \$2.5 million increase in the amortization of deferred revenue. Amortization of deferred revenue increased \$1.8 million during the second quarter of 2012 due to unlocking. This unlocking was due to changes in the interest and mortality margins that resulted in a decrease to the deferred revenue liability. Conversely, deferred revenue decreased \$1.8 million during second quarter 2011 due to unlocking. The 2011 unlocking was primarily the result of the implementation of a new industry mortality table and the impact of a system upgrade specific to reinsurance.

Total contract charges on all blocks of business increased \$0.7 million in the first six months of 2012 compared to one year earlier. In addition to the results discussed above for the quarter, the amortization of deferred revenue increased during 2012 due to a system upgrade that occurred during 2011 that led to enhanced reinsurance modeling capabilities. Partially offsetting this increase was a \$0.4 million decrease in both expense loads and cost of insurance charges. The decrease in expense loads resulted from a decline in value of variable annuities held in the separate accounts, reflecting the existing market conditions. The decline in cost of insurance charges was largely due to the runoff of closed blocks.

Total contract charges on closed blocks equaled 34% and 37% of total consolidated contract charges in the second quarters of 2012 and 2011, and 35% and 36% for the first six months of 2012 and 2011, respectively. Total contract charges on closed blocks decreased 1% in the second quarter and 2% in the first six months of 2012 compared to the same periods in the prior year. These declines reflect the runoff of the closed blocks. Total contract charges on open, or ongoing, blocks of business increased 13% in the second quarter and 4% in the first six months, reflecting in part new sales of these products and the unlocking discussed above.

The Company uses reinsurance as a means to mitigate its risks and to reduce the earnings volatility from claims. Reinsurance ceded premiums decreased \$0.2 million or 2% in the second quarter of 2012 and increased \$0.3 million or 1% in the first six months of 2012, as compared to the same periods in 2011. Reinsurance ceded for the Group segment increased \$0.1 million or 4% in the second quarter and \$0.9 million or 15% in the six months, reflecting increased disability sales that were largely reinsured. Reinsurance ceded for the Old American segment declined \$0.1 million or 12% in the second quarter and \$0.2 million or 15% in the first six months of 2012, reflecting the continued runoff of a large closed block of reinsured business. Reinsurance ceded for the Individual Insurance segment decreased \$0.3 million or 3% in the second quarter and \$0.3 million or 2% in the first six months of 2012.

Table of Contents**Investment Revenues**

Gross investment income is largely composed of interest, dividends and other earnings on fixed maturity securities, equity securities, short-term investments, mortgage loans, real estate, and policy loans. Gross investment income decreased \$1.0 million or 2% in the second quarter and \$2.5 million or 3% in the first six months of 2012 compared with the same periods in 2011. While average invested assets increased in both the second quarter and first six months during 2012, these changes were more than offset by lower yields earned on certain investments.

Fixed maturity securities provided a majority of the Company's investment income during both the quarter and six months ended June 30, 2012. Income on these investments declined \$1.1 million or 3% in the second quarter and \$2.7 million or 4% in the first six months of 2012 compared to the prior year, reflecting declines in yields earned.

Investment income from mortgage loans decreased 1% in the second quarter and increased 4% in the first six months of 2012 compared to the same periods in 2011. The improvement in the six months was largely the result of higher mortgage loan portfolio holdings in the first six months of 2012 compared to the first six months of 2011, as the Company increased the mortgage loan balance through purchases made during 2011.

Net investment income is stated net of investment expenses. Investment expenses increased \$0.4 million or 15% in the second quarter of 2012 and \$0.2 million or 3% in the first six months of 2012 compared to the same periods in 2011. These changes were largely attributable to increased real estate expenses.

The Company realizes investment gains and losses from several sources, including write-downs of investments and sales of investment securities and real estate. Many securities purchased by the Company contain call provisions, which allow the issuer to redeem the securities at a particular price. Depending upon the terms of the call provision and price at which the security was purchased, a gain or loss may be realized.

The following table provides detail concerning realized investment gains and losses for the second quarters and six months ended June 30, 2012 and 2011.

	Quarter Ended		Six Months Ended	
	2012	2011	2012	2011

Net realized investment gains	\$ 1,215	\$ 1,711	\$ 16,892	\$ 2,512

Table of Contents

The Company recorded a net realized investment gain of \$1.2 million in the second quarter of 2012, compared with a \$1.7 million net realized investment gain in the second quarter of 2011. During the second quarter of 2012, investment gains on sales of real estate totaled \$1.0 million. Net realized investment gains for the first six months totaled \$16.9 million in 2012 compared to \$2.5 million in 2011, largely reflecting gains on sales of real estate of \$16.2 million. In the above table, investment securities called and other includes, but is not limited to, principal payments and sinking funds.

The Company's analysis of securities for the second quarter ended June 30, 2012 resulted in the determination that eight fixed-maturity residential mortgage-backed securities had other-than-temporary impairments and were written down by a combined \$0.1 million due to credit impairments. These residential mortgage-backed securities had incremental losses, reflecting deterioration in the present value of expected future cash flows. The additional losses from these residential mortgage-backed securities totaled \$0.2 million in the second quarter of 2012, including \$0.1 million that was determined to be non-credit and was recognized in other comprehensive income. The total fair value of the affected securities after the write-downs was \$65.7 million.

The following table summarizes securities with other-than-temporary impairments recognized in earnings by business segment during the first and second quarters of 2012 and 2011 by asset class:

Analysis of Investments

The Company seeks to protect policyholders' benefits and achieve a desired level of organizational profitability by optimizing risk and return on an ongoing basis through managing asset and liability cash flows, monitoring credit risk, avoiding high levels of investments that may be redeemed by the issuer, maintaining sufficiently liquid investments and avoiding undue asset concentrations through diversification, among other things.

The primary sources of investment risk to which the Company is exposed include credit risk, interest rate risk, and liquidity risk. The Company's ability to manage these risks is essential to the success of the organization. In particular, the Company devotes considerable resources to both the credit analysis of each new investment and to ongoing credit positions. A default by an issuer usually involves some loss of principal to the investor. Losses can be mitigated by timely sales of affected securities or by active involvement in a restructuring process. However, there can be no assurance that the efforts of an investor will lead to favorable outcomes in a bankruptcy or restructuring. Credit risk is managed primarily through industry, issuer, and structure diversification.

Table of Contents

At December 31, 2011, the Company had \$31.3 million in gross unrealized losses on investment securities which were offset by \$229.5 million in gross unrealized gains. At June 30, 2012, the Company's unrealized losses on investment securities had decreased to \$22.1 million and were offset by \$259.3 million in gross unrealized gains, with 22% of the gross unrealized losses in the category of corporate obligations. The financial sector was the single largest contributor to unrealized losses in this category, reflecting the direct and indirect impact of the troubled residential real estate and mortgage markets. In addition, 39% of the gross unrealized losses were in the category of corporate private-labeled residential mortgage-backed securities, also due to the troubled residential real estate and mortgage markets. At June 30, 2012, 92% of the total fair value of the fixed maturities portfolio had unrealized gains, compared to 89% at December 31, 2011.

Table of Contents

The Company maintains a high quality securities portfolio. The following table identifies fixed maturity securities available for sale by actual or equivalent Standard & Poor's rating at June 30, 2012 and December 31, 2011.

¹ Federal agency securities are not backed by the full faith and credit of the U.S. Government.

Gross unrealized losses on fixed maturity and equity security investments attributable to securities having gross unrealized losses of 12 months or longer were \$19.9 million at June 30, 2012, a decrease of 17% from \$23.9 million at December 31, 2011. The largest component of this decrease was from the corporate private-labeled residential mortgage-backed securities category, which decreased \$1.3 million or 13% during the first six months of 2012. These securities continue to be challenged by the economy and the Company continues to monitor the cash flows on each of these investments.

Table of Contents

The following table summarizes the Company's investments in securities available for sale with unrealized losses at June 30, 2012.

	June 30, 2012		
	Amortized Cost	Fair Value	Gross Unrealized Losses

The following is a discussion of all non-residential mortgage-backed securities whose fair value had been less than 80% of amortized cost for at least six consecutive months at June 30, 2012. The Company has considered a wide variety of factors to determine that these positions were not other-than-temporarily impaired.

Security	Description
Financial institution	Institution impacted by housing and mortgage crisis. The security continues to perform within contractual obligations.
Collateralized debt obligation	Impacted by delinquencies and foreclosures in subprime and Alt-A markets and extreme declines in market valuations regardless of individual security performance. There continues to be

overcollateralization within the structure and the investment continues to perform within contractual obligations.

The discounted future cash flow calculation typically becomes the primary determinant of whether any portion and to what extent an unrealized loss is due to credit on loan-backed and similar asset-backed securities with significant indications of potential other-than-temporary impairment. Such indications typically include below investment grade ratings and significant unrealized losses for an extended period of time, among other factors. The Company identified 17 non-U.S.

Table of Contents

Agency mortgage-backed securities that were determined to have such indications at June 30, 2012 and December 31, 2011. Discounted future cash flow analysis was performed for each of these securities to determine if any portion of the impairment was due to credit and deemed to be other-than-temporary. The discount rate used in calculating the present value of future cash flows was the investment yield at the time of purchase for each security. The initial default rates were assumed to remain constant over a 24-month time frame and grade down thereafter, reflecting the general perspective of a more stabilized residential housing environment in the future.

The following tables present the range of significant assumptions used in projecting the future cash flows at June 30, 2012 and December 31, 2011. The Company believes that the assumptions below are reasonable because they are based upon the actual results of the underlying security collateral.

Vintage	June 30, 2012					
	Initial Default Rate		Initial Severity Rate		Prepayment Speed	
	Low	High	Low	High	Low	High
2003	4.2%	4.2%	40%	40%	18.0%	18.0%
2004	5.7%	7.7%	40%	55%	8.0%	13.0%
2005	3.4%	15.1%	40%	74%	6.0%	15.0%
2006	4.6%	6.8%	51%	85%	8.0%	16.0%
2007	9.9%	9.9%	65%	65%	8.0%	8.0%

Vintage	December 31, 2011					
	Initial Default Rate		Initial Severity Rate		Prepayment Speed	
	Low	High	Low	High	Low	High
2003	3.9%	3.9%	40%	40%	18.0%	18.0%
2004	4.9%	7.7%	40%	56%	8.0%	13.0%
2005	3.5%	13.7%	40%	68%	6.0%	15.0%
2006	4.9%	10.0%	52%	90%	8.0%	18.0%
2007	8.8%	8.8%	66%	66%	8.0%	8.0%

For loan-backed and similar asset-backed securities, the determination of any amount of impairment that is due to credit is based upon the present value of projected future cash flows being less than the amortized cost of the security. This amount is recognized as a realized loss in the Company's Consolidated Statements of Comprehensive Income and the carrying value of the security is written down by the same amount. The portion of an impairment that is determined not to be due to credit is recorded as a component of accumulated other comprehensive income in the Consolidated Balance Sheets.

Significant unrealized losses on securities can continue for extended periods of time, particularly for certain individual securities. While this can be an indication of potential credit impairments, it can also be an indication of illiquidity in a particular sector or security. In addition, the fair value of an individual security can be heavily influenced by the complexities of varying market sentiment or uncertainty regarding the prospects for an individual security. This has been the situation in the non-U.S. Agency mortgage-backed securities market in recent periods. Based upon the process described above, the Company is best able to determine if and to what extent credit impairment may exist in these securities by performing present value calculations of projected future cash flows at the conclusion of each reporting period. By reviewing the most recent data available regarding the security and other relevant industry and market factors, the Company can modify assumptions used in the cash flow projections and determine the best estimate of the portion of any impairment that is due to credit at the conclusion of each period.

The Company closely monitors its investments in securities classified as subprime. Subprime securities include all bonds or portions of bonds where the underlying collateral is made up of home equity loans or first mortgage loans to borrowers whose credit scores at the time of origination were lower than the level recognized in the market as prime. The Company's classification of subprime does not include Alt-A or jumbo loans, unless the collateral otherwise meets the preceding definition. At June 30, 2012, the fair value of investments with subprime residential mortgage exposure was \$16.7 million with a related \$2.5 million unrealized loss. At December 31, 2011, the Company had investments with subprime residential mortgage exposure of \$17.4 million and a related \$3.5 million unrealized loss. This exposure amounted to less than 1% of the Company's invested assets at both June 30, 2012 and December 31, 2011. These investments are included in the Company's process for evaluation of other-than-temporarily impaired securities.

Table of Contents

The Company has a significant level of non-U.S. Agency structured securities. Structured securities include asset-backed, residential mortgage-backed securities, along with collateralized debt obligations, collateralized mortgage obligations and other collateralized obligations. The Company monitors these securities through a combination of an analysis of vintage, credit ratings and other factors.

The following tables divide these investment types among vintage and credit ratings at June 30, 2012.

	Fair Value	Amortized Cost	Unrealized Gains (Losses)

Total structured securities	\$ 250,298	\$ 266,550	\$ (16,252)

¹ This chart accounts for all vintages owned by the Company.

Total unrealized losses on non-U.S. Agency structured securities totaled \$9.2 million at June 30, 2012, compared to \$16.3 million at December 31, 2011. Total unrealized losses on these securities as a percent of total amortized cost totaled 4% at June 30, 2012, an improvement from 6% at year-end 2011.

The Company has written down certain investments in previous periods. Securities written down and continuing to be owned at June 30, 2012 had a fair value of \$132.2 million with a net unrealized loss of \$9.8 million.

The Company evaluated the current status of all investments previously written-down to assess the ongoing expectations of amounts to be collected. The Company's evaluation process is similar to its impairment evaluation process. If evidence exists that the Company believes that it will receive all or a materially greater portion of its contractual maturities from securities previously written down, the accretion of income is adjusted. The Company did not change its evaluation of any investments under this process during the first six months of 2012 or 2011.

Table of Contents

The Company maintains a diversified investment portfolio, including less than 5% of its investment portfolio in municipal bond securities and 6% in bond securities from foreign issuers. Approximately 60% of the Company's foreign securities were from issuers in Canada and Australia at June 30, 2012. The Company has no holdings in European sovereign debt and all investments are denominated in U.S. dollars. The fair value of the Company's securities from foreign issuers at June 30, 2012 was \$230.5 million with a net unrealized gain of \$14.0 million. This compares to a fair value of \$199.5 million with a net unrealized gain of \$8.7 million at December 31, 2011.

The Company does not have a material amount of direct or indirect guarantees for the securities in its investment portfolio. The Company did not have any direct exposure to financial guarantors at June 30, 2012. The Company's indirect exposure to financial guarantors totaled \$36.5 million, which was approximately 1% of the Company's investments at June 30, 2012. The unrealized gain on these investments totaled \$2.5 million at June 30, 2012. The Company's indirect exposure to financial guarantors at December 31, 2011 totaled \$36.8 million, which was approximately 1% of the Company's investments. Total unrealized gains on these investments totaled \$1.7 million at December 31, 2011.

Other Revenues

Other revenues consist primarily of supplementary contract considerations; policyholder dividends left with the Company to accumulate; income received on the sale of low income housing tax credit (LIHTC) investments by a subsidiary of the Company; and fees charged on products and sales from the Company's broker-dealer subsidiary. Other revenues decreased 13% in the second quarter and 11% in the first six months of 2012 compared to the same periods one year earlier. The decreases in both periods reflected lower income from the sale of LIHTC investments. In addition, the decrease in the six months also reflected lower supplementary contract considerations.

Policyholder Benefits

Policyholder benefits consist of death benefits (mortality), immediate annuity benefits, accident and health benefits, surrenders, other benefits, and the associated increase or decrease in reserves for future policy benefits. The largest component of policyholder benefits was death benefits for the periods presented. Death benefits reflect mortality results, after consideration of the impact of reinsurance. Mortality will fluctuate from period to period. However mortality experience has generally remained within pricing expectations for the periods presented.

Policyholder benefits increased \$2.4 million or 6% in the second quarter of 2012 compared to the same period one year earlier. This increase largely resulted from an increase in benefit and contract reserves. Several factors contributed to this increase, including a \$2.4 million increase in immediate annuity receipts in the second quarter, which results in a nearly one-for-one increase in benefit and contract reserves. In addition, the change in the fair value of the GMWB rider resulted in a \$1.0 million increase in benefit and contract reserves, and the Company recaptured a block of previously reinsured policies that resulted in an increase of \$0.8 million in reserves in the second quarter. Partially offsetting the increase in benefit and contract reserves, death benefits, net of reinsurance, decreased \$3.0 million in the second quarter of 2012 versus 2011. Also contributing to the decrease in policyholder benefits was a reduction in group dental benefits, as discussed in the Group Insurance segment analysis.

Policyholder benefits decreased \$4.4 million or 5% in the first six months compared to the same period one year ago. The largest single factor in the decrease in policyholder benefits resulted from a \$7.7 million decline in death benefits, net of reinsurance. Other benefits declined \$2.4 million, net of reinsurance, primarily reflecting reduced group accident and health benefits. Partially offsetting these decreases, the Company had an increase in benefit and contract reserves. This increase resulted from several factors, including a \$1.2 million increase in immediate annuity receipts and a \$0.4 million increase in benefit and contract reserves from the increased value of the GMWB rider. The Company also recaptured a block of previously reinsured policies, which resulted in an increase of \$0.8 million in reserves for the six months.

The Company has a GMWB rider for variable annuity contracts that is considered to be a financial derivative and, as such, is accounted for at fair value. The Company determines the fair value of the GMWB rider using a risk-neutral valuation method. The value of the riders will fluctuate depending on market conditions. At June 30, 2012, the fair value of the liability increased \$0.5 million compared to the fair value at December 31, 2011. This fluctuation can be attributed to declines in interest rates and issuer discount spreads, partially offset by favorable capital market returns and market volatilities.

Table of Contents***Interest Credited to Policyholder Account Balances***

Interest is credited to policyholder account balances according to terms of the policies or contracts for universal life, fixed deferred annuities, and other investment-type products. There are minimum levels of interest crediting assumed in certain policies or contracts, as well as allowances for adjustments to be made to reflect current market conditions in certain policies or contracts. Accordingly, the Company reviews and adjusts crediting rates as necessary and appropriate. Amounts credited are a function of account balances and current period crediting rates. As account balances fluctuate, so will the amount of interest credited to policyholder account balances. Interest credited to policyholder account balances decreased 2% in the second quarter and 1% in the first six months of 2012 compared with the same periods one year earlier. While total policyholder account balances have increased during 2012, average crediting rates declined slightly.

Amortization of Deferred Acquisition Costs

The amortization of deferred acquisition costs increased \$4.4 million in the second quarter and \$2.7 million in the first six months of 2012 compared with the prior year. These increases were primarily the result of unlocking. Unlocking in 2012 resulted in an increase to the DAC asset of \$1.3 million and was primarily attributable to refinements in mortality, interest, and persistency assumptions. In 2011, the Company unlocked assumptions that resulted in a change in estimate, increasing the DAC asset \$7.8 million. The unlocking was primarily the result of changes in assumptions about future mortality experience, including the use of a new industry mortality table and changes in reinsurance.

Operating Expenses

Operating expenses consist of incurred commission expense from the sale of insurance products, net of the deferral of certain commissions and certain expenses directly associated with the attainment of new business; expenses from the Company's operations; the amortization of VOBA; and other expenses. Operating expenses increased \$0.6 million or 2% in the second quarter of 2012 and decreased \$1.3 million or 3% in the first six months compared to last year. The increase in the second quarter was largely due to the increase in VOBA amortization, which is discussed below. The decrease in the six months reflected a decline in pension expense and a decline in the amount charged to allowance for doubtful accounts for agent receivables. Partially offsetting these, salaries expense and legal fees increased.

The amortization of VOBA is included in operating expenses. VOBA is amortized with each purchased block of business over a defined period. Generally, as policies run off, the amortization will decline over time. In addition, VOBA is evaluated on an ongoing basis for unlocking adjustments. If necessary, adjustments are made in the current period VOBA amortization. The amortization of VOBA increased \$0.8 million or 31% in the second quarter of 2012 and \$0.2 million or 4% in the first six months of 2012 compared to the same periods one year earlier. The increase in VOBA amortization during 2012 was largely due to unlocking. The Company had an unlocking adjustment due to the reassessment of interest and mortality margins on certain interest sensitive products which increased the amortization of VOBA \$2.4 million in both the second quarter and the first six months of 2012. In comparison, the Company had an unlocking adjustment on certain interest sensitive products which increased the amortization of VOBA \$0.9 million in both the second quarter and the six months of 2011. Partially offsetting this, the VOBA associated with the traditional life insurance block from the Old American segment became fully amortized at December 31, 2011, thus resulting in no amortization for this item in 2012 compared to \$1.0 million in the first six months of 2011.

Income Taxes

The second quarter income tax expense was \$4.5 million or 35% of income before tax for 2012, versus \$5.8 million or 34% of income before tax for the prior year period. The income tax expense for the six months ended June 30, 2012 was \$14.1 million or 34% of income before tax, versus \$8.3 million or 34% of income before tax for the prior year period.

The effective income tax rate was equal to the prevailing corporate federal income tax rate of 35% in the second quarter of 2012. Permanent differences, including the dividends-received deduction, resulted in a benefit of approximately 1% of income before tax. Additionally, investments in affordable housing resulted in a benefit of approximately 1% of income before tax. Offsetting these items was tax expense of approximately 2% of income before tax related to a change in the projected effective tax rate, which was largely based upon historical and year-to-date pretax income.

The effective income tax rate was lower than the prevailing corporate federal income tax rate of 35% in the second quarter of 2011 primarily due to permanent differences, resulting in a benefit of approximately 1% of income before tax.

The effective income tax rate was lower than the prevailing corporate federal income tax rate of 35% for the six months ended June 30, 2012 and 2011. Permanent differences, including the dividends-received deduction, resulted in a benefit of approximately 1% of income before tax.

Table of Contents

Operating Results by Segment

The Company has three reportable business segments, which are defined based on the nature of the products and services offered: Individual Insurance, Group Insurance, and Old American. The Individual Insurance segment consists of individual insurance products for both Kansas City Life and Sunset Life. The Individual Insurance segment is marketed through a nationwide sales force of independent general agents and third-party marketing arrangements. The Group Insurance segment consists of sales of group life, group disability, dental, and vision products. This segment is marketed through a nationwide sales force of independent general agents, group brokers, and third-party marketing arrangements. Old American consists of individual insurance products designed largely as final expense products. These products are marketed through a nationwide general agency sales force with exclusive territories, using direct response marketing to supply agents with leads. For more information, refer to Note 15 Segment Information in the Notes to Consolidated Financial Statements (Unaudited).

Table of Contents**Individual Insurance**

The following table presents financial data of the Individual Insurance business segment for the second quarters and six months ended June 30, 2012 and 2011:

	Quarter Ended June 30		Six Months Ended June 30

Table of Contents

The net income for this segment in the second quarter of 2012 was \$6.7 million, a decrease of \$4.2 million from the second quarter of 2011. The decline was primarily the result of increased policyholder benefits, operating expenses, and amortization of deferred acquisition costs, along with lower net investment income. These were partially offset by an increase in insurance revenues.

Net income for this segment was \$26.2 million for the first six months of 2012, an increase of \$9.1 million from the first six months of 2011. Contributing to this improvement were increases in net realized investment gains and insurance revenues, along with lower policyholder benefits. Partially offsetting these changes was an increase in amortization of deferred acquisition costs.

Total insurance revenues for this segment increased \$4.5 million or 18% in the second quarter of 2012 compared with the same period in the prior year. Total premiums increased \$2.4 million or 18%, reflecting a \$2.4 million increase in immediate annuity premiums. Contract charges increased \$1.8 million or 8%, and reinsurance ceded premiums were flat.

Total insurance revenues for this segment increased \$2.3 million or 4% for the first six months of 2012 compared to one year earlier. Total premiums increased \$1.3 million or 5%, reflecting a \$1.2 million or 29% increase in immediate annuity premiums. Contract charges increased \$0.7 million and reinsurance ceded premiums were flat.

The following table presents gross premiums by new and renewal business, less reinsurance ceded, as included in insurance revenues for the second quarters and six months ended June 30, 2012 and 2011. New premiums are also detailed by product.

	Quarter Ended June 30			
	2012	% Change	2011	% Change
New premiums:

Premiums, net	\$ 7,878	25	\$ 6,288	(48)

Table of Contents

Total new premiums for this segment increased \$2.4 million in the second quarter of 2012, more than double the total new premiums in the same period one year earlier. This improvement resulted from increased sales of immediate annuities. Immediate annuity receipts can have sizeable fluctuations, as receipts from policyholders largely result from one-time premiums rather than recurring premiums. Total renewal premiums were flat compared to last year.

Total new premiums for this segment increased \$1.2 million or 18% in the first six months of 2012 versus the prior year. This improvement also resulted from increased immediate annuities. Total renewal premiums increased 1%, due to higher individual life premiums.

The following table provides detail by new and renewal deposits for the second quarters and six months ended June 30, 2012 and 2011. New deposits are also detailed by product.

	Quarter Ended June 30			
	2012	% Change	2011	% Change
New deposits:				
Universal life insurance	\$ 2,857	(24)	\$ 3,750	22
Variable universal life insurance	103	(62)	268	35
Fixed deferred annuities	12,469	(31)	18,025	58
Variable annuities	4,642	(24)	6,142	10
Total new deposits	20,071	(29)	28,185	39
Renewal deposits	35,325	(3)	36,333	-
Total deposits	\$ 55,396	(14)	\$ 64,518	14

	Six Months Ended June 30			
	2012	% Change	2011	% Change
New deposits:				
Universal life insurance	\$ 6,160	(6)	\$ 6,562	1
Variable universal life insurance	260	(47)	493	12
Fixed deferred annuities	31,619	(4)	32,917	47
Variable annuities	8,603	(14)	9,979	(13)
Total new deposits	46,642	(7)	49,951	22
Renewal deposits	70,217	(3)	72,031	3
Total deposits	\$ 116,859	(4)	\$ 121,982	10

Total new deposits decreased \$8.1 million or 29% in the second quarter of 2012 compared to last year, reflecting a \$5.6 million or 31% decrease in new fixed deferred annuity deposits and a \$1.5 million or 24% decrease in new variable annuity deposits. Total renewal deposits decreased \$1.0 million or 3% in the second quarter of 2012. This decrease was due to a \$0.9 million decline in renewal variable annuity deposits. Total new deposits decreased \$3.3 million or 7% in the first six months of 2012 compared with the prior year. This decrease reflected a \$1.4 million decline in new variable annuity deposits and a \$1.3 million decline in new fixed deferred annuity deposits. Total renewal deposits decreased \$1.8 million or 3% in the first six months of 2012. This decline resulted from a \$2.1 million decrease in renewal variable annuity deposits. New sales and renewals for deposit products have been negatively affected for the second quarter and first six months of 2012 by continuing low interest rates and the uncertain economic environment.

Total contract charges increased \$1.8 million or 8% in the second quarter of 2012 compared to the second quarter of 2011. This largely resulted from an increase in the amortization of deferred revenue. Amortization of deferred revenue increased \$1.8 million during the second quarter of 2012 due to unlocking. The unlocking in 2012 was due to changes in the interest and mortality margins that resulted in a decrease to the deferred

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

revenue liability. Conversely, the amortization of deferred revenue decreased \$1.8 million during second quarter 2011 due to unlocking. The 2011 unlocking was primarily the result of the implementation of a new industry mortality table and the impact of a system upgrade specific to reinsurance. Total contract charges on the closed blocks equaled 34% of total consolidated contract charges in the second quarter of 2012 compared to 37% in the second quarter of 2011. Total contract charges on closed blocks declined 1% in the second quarter of 2012 compared to the same period in 2011. Total contract charges on open blocks of business, where there is ongoing marketing for new sales, increased 13% in the first six months of 2012.

Table of Contents

Total contract charges increased \$0.7 million in the first six months of 2012 compared to one year earlier, due to the increase in the amortization of deferred revenue described above. In addition to the results discussed above for the quarter, the amortization of deferred revenue increased during 2012 due to a system upgrade that occurred during 2011 that led to enhanced reinsurance modeling capabilities. Partially offsetting this increase was a \$0.4 million decrease in both expense loads and cost of insurance charges. The decrease in expense loads resulted from a decline in value of variable annuities held in the separate accounts, reflecting the existing market conditions. The decline in cost of insurance charges was largely due to the runoff of closed blocks. Total contract charges on the closed blocks equaled 35% of total consolidated contract charges in the first six months of 2012 compared to 36% in the first six months of 2011. Total contract charges on closed blocks declined 2% in the first six months of 2012, while total contract charges on open blocks of business increased 4%.

Net investment income decreased \$1.3 million or 3% in the second quarter of 2012 compared to the second quarter of 2011, as an increase in average invested assets was offset by a decline in yields earned. Also, this segment experienced a net realized investment gain of \$1.3 million in the second quarter of 2012 compared to a net gain of \$1.9 million in the second quarter of 2011. Net investment income decreased \$2.3 million in the first six months of 2011 compared to one year earlier, as an increase in average invested assets was offset by a decline in yields earned. Also, this segment had a net realized gain of \$16.9 million in the first six months of 2012 compared to a net gain of \$2.6 million in the first six months of 2011.

Please see Consolidated Results of Operations in Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations for a table that provides securities that were written down through earnings by business segment for the first two quarters of 2012 and 2011.

Other revenues decreased 13% in the second quarter and 11% in the first six months of 2012 compared to the same periods one year earlier. The decreases in both periods reflected lower income from the sale of LIHTC investments. In addition, the decrease in the six months also reflected lower supplementary contract considerations.

Policyholder benefits increased \$2.9 million or 14% in the second quarter of 2012 compared to the prior year. This increase was largely due to an increase in benefit and contract reserves. One contributing factor was a \$2.4 million increase in sales of immediate annuities, which results in a nearly one-for-one increase in benefit and contract reserves. In addition, the change in the fair value of the GMWB rider resulted in a \$1.0 million increase in benefit and contract reserves, and the Company recaptured a block of previously reinsured policies that resulted in an increase of \$0.8 million in reserves in the second quarter. Partially offsetting the increase in reserves, death benefits, net of reinsurance, decreased \$2.6 million. This change reflected favorable mortality experience.

Policyholder benefits decreased \$2.7 million or 6% in the first six months of 2012 compared to the prior year. Death benefits, net of reinsurance ceded, decreased \$6.3 million. Partially offsetting this favorable mortality experience, benefit and contract reserves increased. The reserve increase was largely due to a \$1.2 million increase in sales of immediate annuities and a \$0.4 million change in the fair value of the GMWB rider, as discussed above. The Company also recaptured a block of previously reinsured policies that resulted in an increase of \$0.8 million in reserves for the six months.

Interest credited to policyholder account balances decreased 2% in the second quarter and 1% in the first six months of 2012 compared to the same periods one year earlier. While total policyholder account balances increased in 2012, average crediting rates declined slightly.

The amortization of deferred acquisition costs increased \$4.9 million in the second quarter and \$3.3 million in the first six months of 2012 compared with the prior year. These increases were largely the result of unlocking. Unlocking in 2012 resulted in an increase to the DAC asset of \$1.3 million and was primarily attributable to refinements in mortality, interest, and persistency assumptions. In 2011, the Company unlocked assumptions that resulted in a change in estimate, increasing the DAC asset \$7.8 million. The unlocking was primarily the result of changes in assumptions about future mortality experience including the use of a new industry mortality table and change in reinsurance.

Table of Contents

Operating expenses consist of incurred commissions, net of the capitalization of commissions, expenses from the Company's operations, the amortization of VOBA, and other expenses. Operating expenses increased \$1.3 million or 8% in the second quarter and \$0.2 million or less than 1% in the first six months of 2012 compared with the same periods one year earlier. The largest factor in this increase for both periods was higher amortization of VOBA, as discussed below.

The amortization of VOBA increased \$1.3 million or 63% in the second quarter and \$1.1 million or 37% in the first six months of 2012 compared to one year earlier. The increase in VOBA amortization during 2012 was largely due to unlocking. The Company had an unlocking adjustment due to the reassessment of interest and mortality margins on certain interest sensitive products which increased the amortization of VOBA \$2.4 million in both the second quarter and the first six months of 2012. Comparatively, during the second quarter of 2011, the Company had an unlocking adjustment on certain interest sensitive products which increased the amortization of VOBA \$0.9 million in both the second quarter and the six months.

Table of Contents**Group Insurance**

The following table presents financial data of the Group Insurance business segment for the second quarters and six months ended June 30, 2012 and 2011:

	Quarter Ended June 30		Six Months Ended June 30	
	2012	2011	2012	2011

Table of Contents

	Six Months Ended June 30			
	2012	% Change	2011	% Change
New premiums:				
Group life insurance	\$ 1,225	29	\$ 947	(16)
Group dental insurance	1,965	(17)	2,379	(44)
Group disability insurance	3,688	(19)	4,542	106
Other group insurance	90	29	70	(26)
Total new premiums	6,968	(12)	7,938	4
Renewal premiums	23,783	6	22,494	3
Total premiums	30,751	1	30,432	3
Reinsurance ceded	(6,487)	15	(5,632)	30
Premiums, net	\$ 24,264	(2)	\$ 24,800	(2)

Total new premiums increased \$0.1 million or 3% in the second quarter of 2012 and decreased \$1.0 million or 12% in the six months compared with the prior year. New group life premiums increased \$0.3 million or 64% in the second quarter and \$0.3 million or 29% in the six months. These were partially offset by a decrease in new group disability premiums of \$0.2 million or 10% in the second quarter and \$0.9 million or 19% in the six months. Also contributing to the decline in the six months, new dental premiums decreased \$0.4 million or 17%. Total renewal premiums remained flat in the second quarter and increased \$1.3 million or 6% in the six months. The increase in the six months was primarily driven by renewals on the short-term disability product.

The Company uses reinsurance in several of its group product lines to help mitigate risk. Reinsurance premiums increased \$0.1 million or 4% in the second quarter and \$0.9 million or 15% in the first six months of 2012 compared to the prior year. The increase in the six months was largely due to an increase in short-term disability renewal premiums.

Policyholder benefits consist of death benefits, accident and health benefits, and the associated increase or decrease in reserves for future policy benefits. Policyholder benefits declined \$0.9 million or 12% in the second quarter and \$1.5 million or 10% in the six months compared to the prior year. These results were largely due to a reduction in the benefits paid for the dental product line. This reduction reflects the changes that this segment made to the dental product line during 2011 to improve profitability, including increased pricing and better claim cost controls.

The policyholder benefit ratio is derived by dividing policyholder benefits, net of reinsurance, by total net premiums. The ratio for the Group Insurance segment was 54% in the second quarter and 56% for the first six months of 2012, compared to 61% in both the second quarter and first six months of 2011. These decreases were primarily the result of the decline in dental benefits previously mentioned. The policyholder benefit ratio for the dental product line decreased from approximately 77% in both the second quarter and first six months of 2011 to approximately 72% in both the second quarter and first six months of 2012.

Operating expenses consist of commissions, fees to third-party marketing and administrative organizations, and expenses from the Company's operations. Operating expenses increased \$0.4 million or 8% in the second quarter and \$0.4 million or 4% in the six months. These increases were largely due to higher commission expenses associated with the life and dental products.

Table of Contents**Old American**

The following table presents financial data for the Old American business segment for the second quarters and six months ended June 30, 2012 and 2011:

	Quarter Ended June 30		Six Months Ended June 30	
	2012	2011	2012	2011
Insurance revenues:				
Premiums, net	\$ 17,664	\$ 16,899	\$ 34,964	\$ 33,607
Total insurance revenues	17,664	16,899	34,964	33,607
Investment revenues:				
Net investment income	2,969	3,097	5,929	6,230
Net realized investment gains, excluding impairment losses	(60)	(124)	(27)	(35)
Net impairment losses recognized in earnings:				
Total other-than-temporary impairment losses	(11)	(22)	(29)	(57)
Portion of impairment losses recognized in other comprehensive income	(1)	4	-	16
Net impairment losses recognized in earnings	(12)	(18)	(29)	(41)
Total investment revenues	2,897	2,955	5,873	6,154
Other revenues	2	8	11	13
Total revenues	20,563	19,862	40,848	39,774
Policyholder benefits	11,676	11,249	23,767	24,031
Amortization of deferred acquisition costs	2,394	2,919	6,285	6,806
Operating expenses	3,952	5,066	7,789	9,777
Total benefits and expenses	18,022	19,234	37,841	40,614
Income (loss) before income tax expense (benefit)	2,541	628	3,007	(840)
Income tax expense (benefit)	969	240	1,146	(314)
Net income (loss)	\$ 1,572	\$ 388	\$ 1,861	\$ (526)

Net income for this segment totaled \$1.6 million in the second quarter compared to \$0.4 million in the prior year. The increase in net income for the second quarter reflected a \$0.8 million increase in insurance revenues, a \$0.5 million decrease in amortization of DAC and a \$1.1 million decrease in operating expenses. These were partially offset by a \$0.4 million increase in policyholder benefits and a \$0.7 million increase in income tax expense. Net income for the first six months of 2012 was \$1.9 million compared to a \$0.5 million net loss for the first six months of 2011. The increase in net income in the first six months of 2012 reflected a \$1.4 million increase in insurance revenues, a \$0.3 million decrease in policyholder benefits, a \$0.5 million decrease in the amortization of DAC, and a \$2.0 million decrease in operating expenses. These were partially offset by a \$0.3 million decrease in net investment income and a \$1.5 million increase in income tax expense.

Table of Contents

The following table presents gross premiums by new and renewal business, less reinsurance ceded, as included in insurance revenues for the second quarters and six months ended June 30, 2012 and 2011.

	Quarter Ended June 30			
	2012	% Change	2011	% Change
New individual life premiums	\$ 3,242	5	\$ 3,094	10
Renewal premiums	14,941	4	14,396	2
Total premiums	18,183	4	17,490	4
Reinsurance ceded	(519)	(12)	(591)	(16)
Premiums, net	\$ 17,664	5	\$ 16,899	4

	Six Months Ended June 30			
	2012	% Change	2011	% Change
New individual life premiums	\$ 6,444	5	\$ 6,135	13
Renewal premiums	29,563	3	28,702	2
Total premiums	36,007	3	34,837	4
Reinsurance ceded	(1,043)	(15)	(1,230)	(12)
Premiums, net	\$ 34,964	4	\$ 33,607	4

Total new premiums increased \$0.1 million or 5% in the second quarter and \$0.3 million or 5% in the six months, while total renewal premiums increased \$0.5 million or 4% in the second quarter and \$0.9 million or 3% in the six months. The increase in premiums reflects a combination of expanded distribution efforts and improved agency productivity. Old American continues to focus on the recruitment and development of new agencies and agents, along with improved production from existing agencies and agents. In addition, proactive territorial management by agencies and the home office have contributed to the increased sales.

Net investment income decreased \$0.1 million or 4% in the second quarter and \$0.3 million or 5% in the first six months of 2012 compared with the prior year. These declines were largely due to a reduction in yields available in the market.

Please see Consolidated Results of Operations in Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations for a table that provides securities that were written down through earnings by business segment for the first two quarters of 2012 and 2011. This section also contains a table that provides detail regarding individual investment securities by business segment that were written down through earnings during the first six months of 2012 and 2011.

Policyholder benefits increased \$0.4 million or 4% in the second quarter versus last year. The increase was largely due to an increase in benefit and contract reserves. Policyholder benefits decreased \$0.3 million or 1% in the first six months of 2012 compared with the prior year, largely due to lower death benefits. Partially offsetting this change was a \$0.7 million increase in reserves. The increase in reserves occurred in the second quarter and six months of 2012, largely from the increase in premiums. Mortality fluctuations occur each period, and the Company monitors these fluctuations in relation to its pricing expectations. While death benefits decreased during the first six months of 2012, the results remained within pricing expectations.

Amortization of DAC decreased \$0.5 million or 18% in the second quarter and \$0.5 million or 8% in the six months compared to a year ago. The declines were primarily due to the implementation of ASU No. 2010-26, as described in Note 7 Change in Accounting Principle.

Operating expenses decreased \$1.1 million or 22% in the second quarter and \$2.0 million or 20% in the six months compared to a year ago. The decreases in both periods were largely due to lower salary and benefit expenses, as well as reduced agent meeting costs. Also contributing to the

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

decreases were lower amortization of VOBA, due to the traditional life insurance block being fully amortized at December 31, 2011. Capitalized commissions increased in the six months, primarily related to the implementation of ASU No. 2010-26, as described in Note 7 Change in Accounting Principle.

Table of Contents**Liquidity and Capital Resources*****Liquidity***

Statements made in the Company's 2011 Form 10-K remain pertinent, as the Company's liquidity position is materially unchanged from year-end 2011.

Net cash used for operating activities was \$2.0 million in the six months ended June 30, 2012. The primary sources of cash from operating activities in the first six months of 2012 were premium receipts and net investment income. The primary uses of cash from operating activities in the first six months of 2012 were for the payment of policyholder benefits and operating expenses. Net cash used for investing activities was \$22.2 million. The primary sources of cash were sales, maturities, calls, and principal paydowns of investments totaling \$206.6 million. Included in this total, the Company had sizable real estate sales in the first six months of 2012. Offsetting these, the Company's new investments totaled \$260.6 million. Net cash provided by financing activities was \$19.4 million, primarily including \$30.1 million of deposits net of withdrawals from policyholder account balances.

Debt and Short-term Borrowing

The Company and certain subsidiaries have access to borrowing capacity through their membership affiliation with the Federal Home Loan Bank of Des Moines (FHLB). At June 30, 2012, there were no outstanding balances with the FHLB, and there were no outstanding balances at year-end 2011. The Company has access to unsecured revolving lines of credit of \$60.0 million with two major commercial banks with no balances outstanding. These lines of credit will expire in June of 2013. The Company anticipates renewing these lines of credit as they come due.

Capital Resources

The Company considers existing capital resources to be adequate to support the current level of business activities. In addition, the Company's statutory equity exceeds the minimum capital deemed necessary to support its insurance business, as determined by the risk-based capital calculations and guidelines established by the National Association of Insurance Commissioners. The Company believes these statutory limitations impose no practical restrictions on its dividend payment plans.

The following table shows the capital adequacy for the Company.

	June 30	December 31
	2012	2011
Total assets, excluding separate accounts	\$ 4,143,798	\$ 4,081,633
Total stockholders' equity	737,032	710,705
Ratio of stockholders' equity to assets, excluding separate accounts	18%	17%

The ratio of equity to assets less separate accounts increased from 17% at December 31, 2011 to 18% at June 30, 2012. Unrealized investment gains on available for sale securities, which are included as a part of stockholders' equity (net of securities losses, related taxes, policyholder account balances, future policy benefits, and DAC), totaled \$93.9 million at June 30, 2012. This represents an increase of \$12.8 million in net unrealized gains from the \$81.1 million in net unrealized investment gains at year-end 2011. Stockholders' equity increased \$26.3 million from year-end 2011. This improvement was largely due to growth in retained earnings, primarily driven by the increased net income experienced in the first six months of 2012.

Table of Contents

The stock repurchase program was extended by the Board of Directors through January 27, 2013 to permit the purchase of up to one million of the Company's shares on the open market. During the first six months of 2012, the Company purchased 72,126 shares under the stock repurchase program for \$2.3 million. The Company made no purchases of stock under this plan in the first six months of 2011.

During the six months ended June 30, 2012, the Company purchased 10,699 shares and sold 19,014 shares of treasury stock from the Company's employee stock ownership plan and deferred compensation plans for a net change in treasury stock of \$0.3 million. During the second quarter of 2012, the Company reclassified 188,621 shares from other assets to treasury stock. Please see the discussion of the immaterial correction in Note 1 - Nature of Operations and Significant Accounting Policies for additional information.

On July 23, 2012, the Board of Directors declared a quarterly dividend of \$0.27 per share, unchanged from the prior year, which will be paid August 8, 2012 to stockholders of record as of August 2, 2012. Total stockholder dividends paid were \$6.1 million and \$6.2 million in the first six months ended June 30, 2012 and 2011, respectively.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

In the most recent reporting periods, financial market volatility and liquidity have shown continued improvement. While the improvement has been fairly broad-based, normal market conditions have not yet returned in all sectors or markets. Periods of volatility and market uncertainty represent a heightened risk for all financial institutions. Such events could negatively affect the Company and policyholder activity, such as a reduction in sales, increased policy surrenders, increased policy loans and reduced earnings. The Company has factored these risks into its risk management processes and its disclosures of financial condition.

Please refer to the Company's 2011 Form 10-K for a more complete discussion of quantitative and qualitative disclosures about market risk.

Item 4. Controls and Procedures

As required by Exchange Act Rule 13a-15(b), Kansas City Life Insurance Company management, including the Chief Executive Officer and Chief Financial Officer, conducted an evaluation as of the end of the period covered by this report, of the effectiveness of the Company's disclosure controls and procedures as defined in Exchange Act Rule 13a-15(e). Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective as of the end of the period covered by this report. As required by Exchange Act Rule 13a-15(d), Kansas City Life Insurance Company management, including the Chief Executive Officer and Chief Financial Officer, also conducted an evaluation of the Company's internal control over financial reporting to determine whether any changes occurred during the period covered by this report materially affected, or are reasonably likely to materially affect the Company's internal control over financial reporting. Based on that evaluation, there has been no such change during the period covered by this report.

Part II: Other Information

Item 1. Legal Proceedings

The life insurance industry, including the Company and its subsidiaries, has been subject to an increase in litigation in recent years. Such litigation has been pursued on behalf of purported classes of insurance purchasers, often questioning the conduct of insurers in the marketing of their products.

Similarly, the Company's retail broker-dealer subsidiary is in an industry that also involves substantial risks of liability. In recent years, litigation and arbitration proceedings involving actions against registered representatives and securities products (including mutual funds, variable annuities, and alternative investments, such as real estate investment products and oil and gas investments) have continued to increase. Given the significant decline in the major market indices beginning in 2008, and the generally poor performance of investments that have historically been considered safe and conservative, there is the potential for an increase in the number of proceedings to which a broker-dealer may be named as a party.

In addition to the above, the Company and its subsidiaries are defendants in, or subject to, other claims or legal actions related to insurance and investment products. Some of these claims and legal actions are in jurisdictions where juries are given substantial latitude in assessing damages, including punitive damages.

Although no assurances can be given and no determinations can be made at this time, management believes that the ultimate liability, if any, with respect to these other claims and legal actions would not have a material effect on the Company's business, results of operations or financial position.

Item 1A. Risk Factors

The operating results of life insurance companies have historically been subject to significant fluctuations. The factors which could affect the Company's future results include, but are not limited to, general economic conditions and the known trends and uncertainties are discussed more fully in the Company's Risk Factors included in Part I, Item 1A of the Company's 2011 Form 10-K.

For Immediate Release: July 27, 2012, press release reporting financial results for the second quarter of 2012.

Kansas City Life Announces Second Quarter 2012 Results

Kansas City Life Insurance Company recorded net income of \$8.4 million or \$0.78 per share in the second quarter of 2012, a \$2.8 million or \$0.19 per share decrease relative to the same quarter in the prior year. Insurance revenues improved \$5.2 million or 10% for the period, but this was offset by \$6.8 million in increased policyholder benefits and amortization of deferred policy acquisition costs. In addition, investment revenues declined \$2.0 million or 4%, negatively impacting earnings for the second quarter relative to the prior year.

Net income for the first six months of 2012 was \$27.8 million or \$2.50 per share, an improvement of \$11.9 million or \$1.11 per share over the prior year results. This increase was largely the result of net realized investment gains of \$16.9 million in the first half of 2012, rising \$14.4 million over the first six months of 2011. Also contributing to the improved year-to-date earnings were increased insurance revenues and declines in policyholder benefits and operating expenses.

Insurance revenues increased \$5.2 million or 10% in the second quarter of 2012. This increase was largely the result of a \$2.6 million increase in new premiums, driven by \$2.4 million in increased immediate annuity sales, and a \$1.8 million increase in contract charges. The increase in contract charges was largely the result of an unlocking of assumptions that impacted the amortization of deferred revenue from selected universal life-type products.

Insurance revenues increased \$3.2 million or 3% in the first six months of 2012, primarily due to a \$1.4 million increase in new immediate annuity receipts, a \$1.4 million increase in renewal premiums on traditional life insurance products, and a \$0.7 million increase in contract charges.

Continued low interest rates and the uncertain economic environment negatively impacted new sales of deposit products, including an \$8.1 million or 29% decline in new interest sensitive products in the second quarter versus one year earlier. This included reductions in new universal life deposits of \$0.9 million or 24% and new fixed deferred annuities of \$5.6 million or 31%. In addition, new variable universal life and annuity deposits declined \$1.7 million or 26% in the second quarter. New deposits decreased \$3.3 million or 7% in the six months versus the prior year, including a \$1.3 million or 4% decrease in new fixed deferred annuities and a \$1.6 million or a 15% decrease in variable life and annuity products.

Total investment revenues, including net investment income and net realized investment gains and losses, decreased \$2.0 million or 4% in the second quarter compared with the same period in the prior year. This decrease was the result of \$1.5 million in reduced net investment income and a \$0.5 million decrease in net realized investment gains. Total investment revenues increased \$11.7 million in the first six months over the prior year. This increase was the result of \$16.2 million in gains on real estate sales, primarily generated in the first quarter of 2012. Net investment income declined \$2.6 million or 3% for the six months versus the prior year. The reduced net investment income in both periods was largely due to lower yields on the Company's primarily fixed-rate investment portfolio.

Policyholder benefits increased \$2.4 million or 6% for the second quarter of 2012 compared with the same period one year earlier. This was largely the result of an increase in benefit and contract reserves, reflecting the growth in new immediate annuity receipts and the increased value of policy riders with guaranteed withdrawal benefits. Policyholder benefits decreased \$4.4 million or 5% for the six months of 2012 versus the prior period. This decrease reflected favorable mortality, as death benefits declined, along with a reduction in group dental benefits paid, and increased reinsurance of group accident and health products.

The amortization of deferred acquisition costs (DAC) increased \$4.4 million in the second quarter of 2012 and \$2.7 million for the six months compared to the same periods one year earlier. These increases were largely the result of favorable unlocking of policy assumptions in the second quarter of 2011, which decreased the amortization of DAC in both the second quarter and first six months of last year.

Table of Contents

On July 23, 2012, the Kansas City Life Board of Directors declared a quarterly dividend of \$0.27 per share that will be paid on August 8, 2012 to stockholders of record on August 2, 2012.

Kansas City Life Insurance Company (NASDAQ: KCLI) was established in 1895 and is based in Kansas City, Missouri. The Company's primary business is providing financial protection through the sale of life insurance and annuities. The Company's revenues were \$419.0 million in 2011, and assets and life insurance in force were \$4.4 billion and \$29.2 billion, respectively, as of December 31, 2011. The Company operates in 49 states and the District of Columbia. For more information, please visit www.kclife.com.
