PRESIDENT'S LETTER

Dear Shareholder,

ING Risk Managed Natural Resources Fund (the "Fund") is a non-diversified, closed-end management investment company whose shares are traded on the New York Stock Exchange under the symbol "IRR". The Fund's investment objective is total return through a combination of current income, capital gains and capital appreciation.

The Fund will seek to achieve its investment objective by investing in a portfolio of equity securities of companies in the energy and natural resources industries and by employing an integrated options collar strategy. The Fund's collar strategy seeks to reduce the volatility of total returns relative to the natural resources equity sector and to help the Fund achieve its investment objective by seeking to generate capital gains in declining markets from the purchase of put options and premiums from writing call options.

For the period ended August 31, 2012, the Fund made quarterly distributions totaling \$0.66 per share, characterized as \$0.60 per share return of capital and \$0.06 per share net investment income.

Based on net asset value ("NAV"), the Fund provided a total return of (4.55)% for the period

ended August 31, 2012.⁽¹⁾ This NAV return reflects a decrease in the Fund's NAV from \$13.12 on

February 29, 2012 to \$11.83 on August 31, 2012. Based on its share price as of August 31, 2012, the Fund provided a total return of (6.25)% for the period ended August 31, 2012.⁽²⁾ This share price return reflects a decrease in the Fund's share price from \$12.50 on February 29, 2012 to \$11.07 on August 31, 2012.

The global equity markets have witnessed a challenging and turbulent period. Please read the Market Perspective and Portfolio Managers' Report for more information on the market and the Fund's performance.

At ING our mission is to help you grow, protect and enjoy your wealth. We seek to assist you and your financial advisor by offering a range of global investment solutions. We invite you to visit our website at www.inginvestment.com. Here you will find information on our products and services, including current market data and fund statistics on our open- and closed-end funds. You will see that we offer a broad variety of equity, fixed income and multi-asset funds that aim to fulfill a variety of investor needs.

We thank you for trusting ING Funds with your investment assets, and we look forward to serving you in the months and years ahead.

Sincerely,

Shaun Mathews

President and Chief Executive Officer

ING Funds

International investing does pose special risks including currency fluctuation, economic and political risks not found in investments that are solely domestic.

For more complete information, or to obtain a prospectus for any ING Fund, please call your Investment Professional or the fund's Shareholder Service Department at (800) 992-0180 or log on to www.inginvestment.com. The prospectus should be read carefully before investing. Consider the fund's investment objectives, risks, charges and expenses carefully before investing. The prospectus contains this information and other information about the fund. Check with your Investment Professional to determine which funds are available for sale within their firm. Not all funds are available for sale at all firms.

- (1) Total investment return at net asset value has been calculated assuming a purchase at net asset value at the beginning of each period and a sale at net asset value at the end of each period and assumes reinvestment of dividends, capital gain distributions, and return or capital distributions/allocations, if any, in accordance with the provisions of the Fund's dividend reinvestment plan. Total investment return at net asset value is not annualized for periods less than one year.
- (2) Total investment return at market value measures the change in the market value of your investment assuming reinvestment of dividends, capital gain distributions, and return of capital distributions/allocations, if any, in accordance with the provisions of the Fund's dividend reinvestment plan. Total investment return at market value is not annualized for period less than one year.

MARKET PERSPECTIVE: SIX MONTHS ENDED AUGUST 31, 2012

As our new fiscal year started, global equities in the form of the MSCI World IndexSM measured in local currencies including net reinvested dividends were enjoying what would become the best first quarter rally since 1998. But in the two months from early April the MSCI World IndexSM slumped 11% as, for the third consecutive year, the basis of the earlier optimism was undermined by events. From there the recovery was almost as dramatic and for the six month period the index gained just 0.72%. (The MSCI World IndexSM returned (0.14)% for the six months ended August 31, 2012, measured in U.S. dollars.)

Much of the first quarter's upbeat sentiment rested on a sharp improvement in the employment situation, probably the most important driver of economic activity. In March, the Bureau of Labor Statistics announced a three-month average of 245,000 new jobs created and the unemployment rate down to 8.3%. But the deterioration was fast, culminating in the July report which showed only 80,000 jobs created the prior month with the three month average down to 75,000 and the labor force participation rate languishing near decades-low levels.

By the end of July, the trend in other economic statistics was mixed to negative. Retail sales had fallen for three months. The national purchasing managers' index of manufacturing activity signaled contraction. Personal spending was practically stagnant; wages & salaries sluggish. Gross domestic product (GDP) growth was reported at 1.5% (quarter over quarter annualized) in the second quarter, down from 2.0% in the first.

Also clearly slowing was China, responsible for much of the global GDP growth in recent years. GDP increased by 7.6% in the second quarter of 2012 over the same quarter in 2011, the lowest rise in three years.

And yet despite all this gloom, global equities ended July having already recovered 8% (in fits and starts) from the low point in early June. What was propelling stocks higher was the subject of much debate.

The answer seemed to lie in a sense that the euro zone's enduring sovereign debt crisis was approaching some kind of end game. Disillusionment with the European Central Bank's (ECB) Longer Term Refinancing Operations (LTRO) had set in, amid a growing backlash against fiscal austerity. Attention became focused on Spain, with its uncompetitive markets, restrictive practices, nearly 25% unemployed and shaky banking system.

Matters came to a head after a recapitalization bailout for Spanish banks worth up to 100 billion was finally requested in June. This was approved by euro zone leaders, but it took a number of attempts before a workable plan emerged in the last few days of June.

Attention returned to Greece in July where bailout creditors prepared to examine the country's fiscal state. The continuation of Greece's bailout would rest on the outcome, and it did not look good. With prospects for the euro looking increasingly tenuous, ECB President Draghi came out on July 26 with a statement unprecedented in its explicitness, that the ECB was ready to do whatever it takes to preserve the euro. Details would be scarce until September, but the plan appeared to imply another step towards the mutualization of euro zone bonds, which many consider to be a key part of the ultimate solution. In early August, German Chancellor Merkel crucially expressed support.

This and rather better economic news from the U.S. in August on employment, a rise in home prices and an upward revision to GDP growth supported markets until the end of our reporting period.

In U.S. fixed income markets, the Barclays Capital U.S. Aggregate Bond Index (BCAB) of investment grade bonds rose 2.97% in the six months through August. While a sub-index of the BCAB, the Barclays Capital U.S. Treasury Index, underperformed slightly with a return of 2.70%, long-dated Treasuries returned a remarkable 8.75%. Another sub-index of the BCAB, the Barclays Capital U.S. Corporate Investment Grade Bond Index, outperformed, rising 4.69%. The Barclays Capital High Yield Bond 2% Issuer Constrained Composite Index (not part of the BCAB) was slightly stronger, gaining 4.80%.

U.S. equities, represented by the S&P 500[®] Index including dividends, rose by 4.14% in the six months, not helped by Goldman Sachs recommendation on June 21st to sell the index short. With almost all S&P 500[®] companies having reported, operating earnings per share reached

Edgar Filing: ING Risk Managed Natural Resources Fund - Form N-CSRS

a new record in the second quarter and stood just over 2% higher than in the same quarter of 2011. By sector, only telecommunications showed a double-digit return, returning 19.99%, followed by consumer staples with a return of 8.83%. Energy was the worst performer, losing 3.16% followed by materials losing 2.65%.

In currency markets, the ongoing euro zone crisis drove the dollar up 7.18% against the euro. But the dollar barely moved against the pound, gaining just 0.16%. Since the U.K. prints its own currency, U.K. government bonds acquired their own safe haven status as the euro zone crisis played out, despite the U.K.'s close links to the euro zone. The dollar lost 2.30% to the yen, perhaps the ultimate safe haven with its strength apparently impervious to years of low interest rates and supported by a still considerable, if falling, current account surplus.

In international markets, the MSCI Japan® Index slumped 11.94% for the six months through August, falling harder than other markets in April and May as investors fretted about the effect of the euro zone crisis and the slowdown in China on Japan's export-focused economy. The MSCI Europe ex UK® Index edged up 1.34%, the relief from LTRO all too short as fears for the euro loomed large. Sentiment was also depressed by flat to falling GDP and unemployment reaching 11.3%. The MSCI UK® Index slipped 0.20%. The U.K. economy re-entered recession in the face of slumping construction activity and austerity measures aimed at cutting the budget deficit.

Table of Contents

BENCHMARK DESCRIPTIONS

Index	Description
MSCI World Index SM	An unmanaged index that measures the performance of over 1,400 securities listed on exchanges in the U.S., Europe, Canada, Australia, New Zealand and the Far East.
Barclays Capital U.S. Aggregate Bond Index	An unmanaged index of publicly issued investment grade U.S. Government, mortgage-backed, asset-backed and corporate debt securities.
Barclays Capital U.S. Corporate Investment Grade Bond Index	An unmanaged index consisting of publicly issued, fixed rate, nonconvertible, investment grade debt securities.
Barclays Capital U.S. Treasury Index	An unmanaged index that includes public obligations of the U.S. Treasury. Treasury bills, certain special issues, such as state and local government series bonds (SLGs), as well as U.S. Treasury TIPS and STRIPS, are excluded.
Barclays Capital High Yield Bond 2% Issuer Constrained Composite Index	An unmanaged index that includes all fixed-income securities having a maximum quality rating of Ba1, a minimum amount outstanding of \$150 million, and at least one year to maturity.
S&P 500 [®] Index	An unmanaged index that measures the performance of securities of approximately 500 large-capitalization companies whose securities are traded on major U.S. stock markets.
MSCI Japan [®] Index	A free float-adjusted market capitalization index that is designed to measure developed market equity performance in Japan.
MSCI Europe ex UK [®] Index	A free float-adjusted market capitalization index that is designed to measure developed market equity performance in Europe, excluding the UK.
MSCI UK [®] Index	A free float-adjusted market capitalization index that is designed to measure developed market equity performance in the UK.
S&P North American Natural Resources Sector Index	An unmanaged market-capitalization-weighted index of 112 stocks designed to measure the performance of companies in the natural resources sector, which includes energy, precious metals, timber and other sub-sectors.
Energy Select Sector Index [®]	A modified market capitalization-based index intended to track the movements of companies that are components of the S&P 500 [®] Index and are involved in the development or production of energy products. Energy companies in the Index develop and produce crude oil and natural gas and provide drilling and other energy related services.
Materials Select Sector Index [®]	A modified market capitalization-based index intended to track the movements of companies that are components of the S&P 500 [®] Index and are involved in materials. Materials include integrated steel product, chemicals, fibers, paper and gold.

ING Risk Managed Natural Resources Fund (the Fund) seeks total return through a combination of current income, capital gains and capital appreciation. The Fund is managed by Paul Zemsky, Joseph Bassett, John Bailey, Jody I. Hrazanek and Frank van Etten, Portfolio Managers, ING Investment Management Co. LLC the Sub-Adviser.

Under normal market conditions, the Fund seeks to achieve its investment objective by investing at least 80% of its managed assets in the equity securities of, or derivatives linked to the equity securities of, companies that are primarily engaged in owning or developing energy, other natural resources and basic materials, or supplying goods and services to such companies (Natural Resources Companies). Equity securities held by the Fund could include common stocks, preferred shares, convertible securities, warrants and depository receipts. The Fund may also invest in exchange traded funds (ETFs) comprised primarily of Natural Resources Companies. Additionally, the Fund employs an

integrated options collar strategy which seeks to partially reduce the exposure of the Fund to declines in the value of the equity securities in its portfolio and helps the Fund achieve its investment objective by seeking to generate capital gains in declining markets from employing put spreads and generating premiums from writing call options.

Equity Portfolio Construction: In order to implement the Fund's collar strategy, the Fund employs a risk-managed style on a portion of the underlying equity portfolio. Approximately 70% of the value of the equity portfolio is invested in securities in the energy and materials indices in which the Fund's collar strategy is implemented and the portfolio weights for these stocks generally reflect index weights. When selecting equity investments for the remaining 30% of the Fund, the Sub-Adviser uses fundamental and quantitative research provided by its analysts. The Sub-Adviser normally seeks to identify securities of companies that it believes to be undervalued relative to the value of the energy and natural resources assets they hold or their business fundamentals and outlook. The Sub-Adviser believes that the best investment candidates are those that feature superior capital allocation, strong competitive position and operations in industries with robust demand. Furthermore, the Sub-Adviser favors companies that can grow their production rather than those that simply rely upon strengthening commodity prices to improve their earnings outlooks. In constructing the portfolio, the Sub-Adviser takes into account the objectives of the Fund's collar strategy and the instruments through which it is implemented. Under normal market conditions, the Fund generally holds approximately 80-130 equity securities in its portfolio.

Collar Strategy: Under normal market conditions, the Fund seeks to manage risk by employing an integrated options collar strategy. The Fund's collar strategy includes: employing put spreads by purchasing and selling put options and writing call options on energy and materials indices (Resource Indices) and/or ETFs, correlated with the Fund's portfolio.

The Fund typically creates a put spread position by purchasing put options approximately 5% out-of-the-money usually on a three-month basis and for an amount approximating 100% of the value of the Fund's underlying assets while simultaneously, selling put options approximately 10-20% out-of-the-money and the same maturity and amount. The Fund retains the flexibility to create put spreads for an amount approximating 0-100% of the value of the Fund's underlying assets.

Edgar Filing: ING Risk Managed Natural Resources Fund - Form N-CSRS

The Fund generally also writes call options at-the-money or near to-the-money, usually on a one-month basis and for an amount equal to 40-100% of the value of the Fund's underlying assets.

The Fund's collar strategy seeks to partially reduce the exposure of the Fund to declines in the value of energy and natural resources securities in its portfolio, while simultaneously generating capital gains in declining markets from employing put spreads and premiums from writing call options to help the Fund achieve its total return investment objective. Purchased put options may be financed by a portion of the premiums received by the Fund from the sale of call and put options. The Fund may employ put spreads and write call options on Resource Indices and/or ETFs including, but not limited to the Energy Select Sector Index[®] and the Materials Select Sector Index[®] (each a Sector Index and collectively, the Sector Indices), and/or the Energy Select Sector SPDR[®] Fund and the Materials Select Sector SPDR[®] Fund (each a SPDR[®] Fund and collectively, the SPDR[®] Funds). The collar strategy may be executed primarily in over-the-counter markets with major international banks, broker dealers and financial institutions. Under certain market conditions, the Fund may deviate from its collar strategy and may elect not to employ put spreads or sell calls.

Top Ten Holdings as of August 31, 2012

PORTFOLIO MANAGERS REPORT

ING RISK MANAGED NATURAL RESOURCES FUND

Performance: Based on net asset value (NAV) as of August 31, 2012, the Fund provided a total return of (4.55)% for the period. This NAV return reflects a decrease in the Fund's NAV from \$13.12 on February 29, 2012 to \$11.83 on August 31, 2012. Based on its share price as of August 31, 2012, the Fund provided a total return of (6.25)% for the period. This share price return reflects a decrease in the Fund's share price from \$12.50 on February 29, 2012 to \$11.07 on August 31, 2012. The reference index, a composite of 80% Energy Select Sector Index® (IXE) and 20% Materials Select Sector Index® (IXB) returned (3.42)% for the reporting period. The portfolio is designed to generally participate in only a part of an upside of the market and help protect against part of the downside. During the period, the Fund made quarterly total distributions totaling \$0.66 per share, characterized as \$0.60 per share return of capital and \$0.06 per share net investment income. As of August 31, 2012, the Fund had 22,766,049 shares outstanding.

Overview: The Fund had a challenging six-month period. Broader energy indices underperformed in the second quarter as oil prices tumbled due to fears of a weakening global economy and bolstered petroleum supply. Demand trends in both OECD and non-OECD markets faltered compared to earlier expectations.

Equity Portfolio: To implement the collar strategy effectively, the Fund employs a risk-managed style in a portion of the underlying equity portfolio. To reduce basis risk between the portfolio and the collar, the portfolio generally holds the securities in the energy and materials indices in which the collar is implemented and the portfolio weights for stocks reflect index weights. These securities generally represent 70% of the value of the equity portfolio.

The actively managed equity portion of the strategy underperformed its reference index. Security selection detracted from results for the period.

Within the energy sector, security selection in the oil and gas equipment and services sub-sector hurt returns as our positions in stocks such as Key Energy Services Inc. and Basic Energy Services Inc. were unfavorable for the period. Both stocks were negatively impacted by their exposure to North American onshore oil services, where there has been mobilization of capacity from natural gas to oil. Also within energy, our position in Arch Coal Inc., in the coal and consumable fuels sub-sector, detracted from returns. The company lagged significantly as the coal sector underperformed due to depressed natural gas pricing which caps the pricing for coal. Concern about the slowdown in China's growth exacerbated the stock's underperformance.

Within the materials sector, our position in Cliffs Natural Resources Inc., a producer of iron ore and metallurgical coal, was unfavorable for returns. The stock was hurt by weakness in coal and iron ore due to falling steel demand from China. We think there will be demand for natural resources as growth comes back in emerging markets.

On the positive side, our position in Occidental Petroleum Corp. was favorable to returns. Also, underweighting Apache Corp., an oil and gas exploration company, was beneficial to returns. Apache has significant exposure to Egypt, which hurt the stock as the company had difficulty meeting its operational targets.

Options Portfolio: For the period, the Fund's option strategy had a positive impact on relative returns. The Fund's option strategy seeks to exploit the high volatility of the natural resources sector—it attempts to protect the portfolio from large NAV declines while seeking to generate premiums and retain some potential for upside appreciation. From the end of February to mid-June, the Fund purchased put options and wrote call options on the XLE and XLB ETFs to implement a collar. During the period, the Fund generally held put options against 100% of the value of the underlying equity portfolio, with strike prices roughly 5% out of the money and expiration dates three months or shorter at inception. The Fund typically wrote calls on 50–70% of the value of the underlying equity portfolio. These options were generally at or near the money and had expirations of about one month at inception.

In mid-June, the Fund implemented its new strategic option overlay strategy, a put spread collar. The Fund invested in put spread collars whereby it purchases put options that were roughly 5% out of the money and sold put options that were roughly 12.5% out-of-the-money. Both put options had expiration dates of about three months at inception, and the notional amounts of both generally represented 100% of the value of the underlying equity portfolio. The call overwrite portion of the strategy remains similar.

These option strategies contributed to relative returns as the energy and materials sectors were weak, most notably during the middle of the period. As a result of this weakness, the call options were generally worthless at expiration and the put options expired with some value.

Edgar Filing: ING Risk Managed Natural Resources Fund - Form N-CSRS

Outlook and Current Strategy: In the energy sector, we believe demand for oil and gas will continue to increase as growing demand among developing nations offsets slowing in the developed world. The supply of these resources is constrained and new sources of supply are costlier to develop. We believe that the indiscriminate sell-off has resulted in undervalued companies with improved business models, stronger customer bases, pronounced competitive advantages and sturdier returns through an economic cycle. Specifically, we have positioned the portfolio to benefit from industry trends in more resilient oil-directed drilling activity onshore and offshore, the globalization of natural gas markets and the modernization of drilling equipment.

In the materials sector, we like exposure to iron ore given the consolidated nature of the market among the top three producers. We are cautious about mining companies' quarterly results, however, as we expect byproduct credits to decline, increasing operating costs; what's more, we believe use of free cash flow for acquisitions may be received poorly. We are more conservative in our outlook for copper, with a marginal cost well below the current price and tough quarterly reports to come along with reinvestment risk. Longer term, however, we do like copper and wait for the right opportunity amid the sell-off. In precious metals we are generally weighted in line with the benchmark.

Portfolio holdings and characteristics are subject to change and may not be representative of current holdings and characteristics. The outlook for this Fund is based only on the outlook of its portfolio managers through the end of this period, and may differ from that presented for other ING Funds. Performance data represents past performance and is no guarantee of future results. Past performance is not indicative of future results. The indices do not reflect fees, brokerage commissions, taxes or other expenses of investing. Investors cannot invest directly in an index.

- (1) Total investment return at net asset value has been calculated assuming a purchase at net asset value at the beginning of each period and a sale at net asset value at the end of each period and assumes reinvestment of dividends, capital gain distributions and return of capital distributions/allocations, if any, in accordance with the provisions of the dividend reinvestment plan. Total investment return at net asset value is not annualized for periods less than one year.
 - (2) Total investment return at market value measures the change in the market value of your investment assuming reinvestment of dividends, capital gain distributions and return of capital distributions/allocations, if any, in accordance with the provisions of the Fund's dividend reinvestment plan. Total investment return at market value is not annualized for periods less than one year.
 - (3) Annualized for periods less than one year.
 - (4) Commencement of operations.
 - (5) Net asset value at beginning of period reflects the deduction of the sales load of \$0.90 per share and offering costs of \$0.04 per share paid by the shareholder from the \$20.00 offering price.
- Calculated using average number of shares outstanding throughout the period.
Impact of waiving the advisory fee for the ING Institutional Prime Money Market Fund holding has less than 0.005% impact on the expense ratio and net investment income or loss ratio.

NOTES TO FINANCIAL STATEMENTS AS OF AUGUST 31, 2012 (UNAUDITED)

NOTE 1 ORGANIZATION

ING Risk Managed Natural Resources Fund (the Fund) is a non-diversified, closed-end management investment company registered under the Investment Company Act of 1940, as amended (the 1940 Act). The Fund is organized as a Delaware statutory trust.

NOTE 2 SIGNIFICANT ACCOUNTING POLICIES

The following significant accounting policies are consistently followed by the Fund in the preparation of its financial statements, and such policies are in conformity with U.S. generally accepted accounting principles (GAAP) for investment companies.

A. Security Valuation. All investments in securities are recorded at their estimated fair value, as described below. Investments in equity securities traded on a national securities exchange are valued at the last reported sale price. Securities reported by NASDAQ are valued at the NASDAQ official closing prices. Securities traded on an exchange or NASDAQ for which there has been no sale and equity securities traded in the over-the-counter-market are valued at the mean between the last reported bid and ask prices. All investments quoted in foreign currencies are valued daily in U.S. dollars on the basis of the foreign currency exchange rates prevailing at that time. Debt securities with more than 60 days to maturity are valued using matrix pricing methods determined by an independent pricing service which takes into consideration such factors as yields, maturities, liquidity, ratings and traded prices in similar or identical securities. Securities for which valuations are not readily available from an independent pricing service may be valued by brokers which use prices provided by market makers or estimates of fair market value obtained from yield data relating to investments or securities with similar characteristics. Investments in open-end mutual funds are valued at the net asset value. Investments in securities of sufficient credit quality maturing 60 days or less from date of acquisition are valued at amortized cost which approximates fair value.

Securities and assets for which market quotations are not readily available (which may include certain restricted securities that are subject to limitations as to their sale) are valued at their fair values, as defined by the 1940 Act, and as determined in good faith by or under the supervision of the Fund's Board of Trustees (Board), in accordance with methods that are specifically authorized by the Board. Securities traded on exchanges, including foreign exchanges, which close

earlier than the time that the Fund calculates its net asset value (NAV) may also be valued at their fair values, as defined by the 1940 Act and as determined in good faith by or under the supervision of the Board, in accordance with methods that are specifically authorized by the Board. The value of a foreign security traded on an exchange outside the United States is generally based on its price on the principal foreign exchange where it trades as of the time the Fund determines its NAV or if the foreign exchange closes prior to the time the Fund determines its NAV, the most recent closing price of the foreign security on its principal exchange. Trading in certain non-U.S. securities may not take place on all days on which the NYSE Euronext (NYSE) is open. Further, trading takes place in various foreign markets on days on which the NYSE is not open. Consequently, the calculation of the Fund's NAV may not take place contemporaneously with the determination of the prices of securities held by the Fund in foreign securities markets. Further, the value of the Fund's assets may be significantly affected by foreign trading on days when a shareholder cannot purchase or redeem shares of the Fund. In calculating the Fund's NAV, foreign securities denominated in foreign currency are converted to U.S. dollar equivalents. If an event occurs after the time at which the market for foreign securities held by the Fund closes but before the time that the Fund's NAV is calculated, such event may cause the closing price on the foreign exchange to not represent a readily available reliable market value quotation for such securities at the time the Fund determines its NAV. In such a case, the Fund will use the fair value of such securities as determined under the Fund's valuation procedures. Events after the close of trading on a foreign market that could require the Fund to fair value some or all of its foreign securities include, among others, securities trading in the U.S. and other markets, corporate announcements, natural and other disasters, and political and other events. Among other elements of analysis in the determination of a security's fair value, the Board has authorized the use of one or more independent research services to assist with such determinations. An independent research service may use statistical analyses and quantitative models to help determine fair value as of the time the Fund calculates its NAV. There can be no assurance that such models accurately reflect the behavior of the applicable markets or the effect of the behavior of such markets on the fair value of securities, or that such markets will continue to behave in a fashion that is consistent with such models. Unlike

the closing price of a security on an

Table of Contents

NOTES TO FINANCIAL STATEMENTS AS OF AUGUST 31, 2012 (UNAUDITED) (CONTINUED)

NOTE 2 SIGNIFICANT ACCOUNTING POLICIES (continued)

exchange, fair value determinations employ elements of judgment. Consequently, the fair value assigned to a security may not represent the actual value that the Fund could obtain if it were to sell the security at the time of the close of the NYSE. Pursuant to procedures adopted by the Board, the Fund is not obligated to use the fair valuations suggested by any research service, and valuation recommendations provided by such research services may be overridden if other events have occurred or if other fair valuations are determined in good faith to be more accurate. Unless an event is such that it causes the Fund to determine that the closing prices for one or more securities do not represent readily available reliable market value quotations at the time the Fund determines its NAV, events that occur between the time of the close of the foreign market on which they are traded and the close of regular trading on the NYSE will not be reflected in the Fund's NAV.

Options that are traded over-the-counter will be valued using one of three methods: (1) dealer quotes; (2) industry models with objective inputs, or (3) by using a benchmark arrived at by comparing prior-day dealer quotes with the corresponding change in the underlying security. Exchange traded options will be valued using the last reported sale. If no last sale is reported, exchange traded options will be valued using an industry accepted model such as Black Scholes. Options on currencies purchased by the Fund are valued using industry models with objective inputs at their last bid price in the case of listed options or at the average of the last bid prices obtained from dealers in the case of over-the-counter options.

Fair value is defined as the price that the Fund would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date. Each investment asset or liability of the Fund is assigned a level at measurement date based on the significance and source of the inputs to its valuation. Quoted prices in active markets for identical securities are classified as Level 1, inputs other than quoted prices for an asset or liability that are observable are classified as Level 2 and unobservable inputs, including the sub-adviser's judgment about the assumptions that a market participant would use in pricing an asset or liability are classified as Level 3. The inputs used for valuing securities are not necessarily an indication of the risks associated with investing in those securities. Short-term securities of

sufficient credit quality which are valued at amortized cost, which approximates fair value, are generally considered to be Level 2 securities under applicable accounting rules. A table summarizing the Fund's investments under these levels of classification is included following the Summary Portfolio of Investments.

The Board has adopted methods for valuing securities and other assets in circumstances where market quotes are not readily available, and has delegated the responsibility for applying the valuation methods to the Pricing Committee as established by the Fund's Administrator. The Pricing Committee considers all facts they deem relevant that are reasonably available, through either public information or information available to the Investment Adviser or sub-adviser, when determining the fair value of the security. In the event that a security or asset cannot be valued pursuant to one of the valuation methods established by the Board, the fair value of the security or asset will be determined in good faith by the Pricing Committee. When the Fund uses these fair valuation methods that use significant unobservable inputs to determine its NAV, securities will be priced by a method that the Pricing Committee believes accurately reflects fair value and are categorized as Level 3 of the fair value hierarchy. The methodologies used for valuing securities are not necessarily an indication of the risks of investing in those securities valued in good faith at fair value nor can it be assured the Fund can obtain the fair value assigned to a security if they were to sell the security.

To assess the continuing appropriateness of security valuations, the Pricing Committee may compare prior day prices, prices on comparable securities, and traded prices to the prior or current day prices and the Pricing Committee challenges those prices exceeding certain tolerance levels with the third party pricing service or broker source. For those securities valued in good faith at fair value, the Pricing Committee reviews and affirms the reasonableness of the valuation on a regular basis after considering all relevant information that is reasonably available.

For fair valuations using significant unobservable inputs, U.S. GAAP requires a reconciliation of the beginning to ending balances for reported fair values that presents changes attributable to total realized and unrealized gains or losses, purchases and sales, and transfers in or out of the

Edgar Filing: ING Risk Managed Natural Resources Fund - Form N-CSRS

Level 3 category during the period. The end of period timing recognition is used for the transfers between Levels of the Fund's assets and

Table of Contents

NOTES TO FINANCIAL STATEMENTS AS OF AUGUST 31, 2012 (UNAUDITED) (CONTINUED)

NOTE 2 SIGNIFICANT ACCOUNTING POLICIES (continued)

liabilities. A reconciliation of Level 3 investments is presented when the Fund has a significant amount of Level 3 investments.

For the period ended August 31, 2012, there have been no significant changes to the fair valuation methodologies.

B. Security Transactions and Revenue Recognition. Security transactions are recorded on the trade date. Realized gains or losses on sales of investments are calculated on the identified cost basis. Interest income is recorded on the accrual basis. Premium amortization and discount accretion are determined using the effective yield method. Dividend income is recorded on the ex-dividend date, or in the case of some foreign dividends, when the information becomes available to the Fund.

C. Foreign Currency Translation. The books and records of the Fund are maintained in U.S. dollars. Any foreign currency amounts are translated into U. S. dollars on the following basis:

- (1) Market value of investment securities, other assets and liabilities at the exchange rates prevailing at the end of the day.
- (2) Purchases and sales of investment securities, income and expenses at the rates of exchange prevailing on the respective dates of such transactions.

Although the net assets and the market values are presented at the foreign exchange rates at the end of the day, the Fund does not isolate the portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from changes in market prices of securities held. Such fluctuations are included with the net realized and unrealized gains or losses from investments. For securities, which are subject to foreign withholding tax upon disposition, liabilities are recorded on the Statement of Assets and Liabilities for the estimated tax withholding based on the securities current market value. Upon disposition, realized gains or losses on such securities are recorded net of foreign withholding tax. Reported net realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions, the difference between the amounts of dividends, interest, and foreign withholding taxes recorded on the Fund's books and

the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in the value of assets and liabilities other than investments in securities at period end, resulting from changes in the exchange rate. Foreign security and currency transactions may involve certain considerations and risks not typically associated with investing in U.S. companies and U.S. government securities. These risks include, but are not limited to, revaluation of currencies and future adverse political and economic developments which could cause securities and their markets to be less liquid and prices more volatile than those of comparable U. S. companies and U.S. government securities.

D. Distributions to Shareholders. The Fund intends to make quarterly distributions from its cash available for distribution, which consists of the Fund's dividends and interest income after payment of Fund expenses, net option premiums and net realized and unrealized gains on investments. Such quarterly distributions may also consist of a return of capital. At least annually, the Fund intends to distribute all or substantially all of its net realized capital gains. Distributions are recorded on the ex-dividend date. Distributions are determined annually in accordance with federal tax principles, which may differ from U.S. generally accepted accounting principles for investment companies.

Edgar Filing: ING Risk Managed Natural Resources Fund - Form N-CSRS

The tax treatment and characterization of the Fund's distributions may vary significantly from time to time depending on whether the Fund has gains or losses on the call options written on its portfolio versus gains or losses on the equity securities in the portfolio. Each quarter, the Fund will provide disclosures with distribution payments made that estimate the percentages of that distribution that represent net investment income, other income or capital gains, and return of capital, if any. The final composition of the tax characteristics of the distributions cannot be determined with certainty until after the end of the Fund's tax year, and will be reported to shareholders at that time. A significant portion of the Fund's distributions may constitute a return of capital. The amount of quarterly distributions will vary, depending on a number of factors. As portfolio and market conditions change, the rate of dividends on the common shares will change. There can be no assurance that the Fund will be able to declare a dividend in each period.

E. **Federal Income Taxes.** It is the policy of the Fund to comply with the requirements of subchapter M of the Internal Revenue Code that are applicable to regulated

Table of Contents

NOTES TO FINANCIAL STATEMENTS AS OF AUGUST 31, 2012 (UNAUDITED) (CONTINUED)

NOTE 2 SIGNIFICANT ACCOUNTING POLICIES (continued)

investment companies and to distribute substantially all of its net investment income and any net realized capital gains to its shareholders. Therefore, a federal income tax or excise tax provision is not required. Management has considered the sustainability of the Fund's tax positions taken on federal income tax returns for all open tax years in making this determination.

F. Use of Estimates. The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates.

G. Risk Exposures and the use of Derivative Instruments. The Fund's investment objectives permit the Fund to enter into various types of derivatives contracts, including, but not limited to, forward foreign currency exchange contracts and purchased and written options. In doing so, the Fund will employ strategies in differing combinations to permit it to increase or decrease the level of risk, or change the level or types of exposure to market risk factors. This may allow the Fund to pursue its objectives more quickly and efficiently, than if it were to make direct purchases or sales of securities capable of affecting a similar response to market factors.

Market Risk Factors. In pursuit of its investment objectives, the Fund may seek to use derivatives to increase or decrease its exposure to the following market risk factors:

Credit Risk. Credit risk relates to the ability of the issuer to meet interest and principal payments, or both, as they come due. In general, lower-grade, higher-yield bonds are subject to credit risk to a greater extent than lower-yield, higher-quality bonds.

Equity Risk. Equity risk relates to the change in value of equity securities as they relate to increases or decreases in the general market.

Foreign Exchange Rate Risk. Foreign exchange rate risk relates to the change in U.S. dollar value of a security held that is denominated in a foreign currency. The U.S. dollar value of a foreign currency denominated security

will decrease as the dollar appreciates against the currency, while the U.S. dollar value will increase as the dollar depreciates against the currency.

Interest Rate Risk. Interest rate risk refers to the fluctuations in value of fixed-income securities resulting from the inverse relationship between price and yield. For example, an increase in general interest rates will tend to reduce the market value of already issued fixed-income investments, and a decline in general interest rates will tend to increase their value. In addition, debt securities with longer durations, which tend to have higher yields, are subject to potentially greater fluctuations in value from changes in interest rates than obligations with shorter durations.

Risks of Investing in Derivatives. The Fund's use of derivatives can result in losses due to unanticipated changes in the market risk factors and the overall market. In instances where the Fund is using derivatives to decrease, or hedge, exposures to market risk factors for securities held by the Fund, there are also risks that those derivatives may not perform as expected resulting in losses for the combined or hedged positions.

The use of these strategies involves certain special risks, including a possible imperfect correlation, or even no correlation, between price movements of derivative instruments and price movements of related investments. While some strategies involving derivative instruments can reduce the risk of loss, they can also reduce the opportunity for gain or even result in losses by offsetting favorable price movements in related

Edgar Filing: ING Risk Managed Natural Resources Fund - Form N-CSRS

investments or otherwise, due to the possible inability of the Fund to purchase or sell a portfolio security at a time that otherwise would be favorable or the possible need to sell a portfolio security at a disadvantageous time because the Fund is required to maintain asset coverage or offsetting positions in connection with transactions in derivative instruments. Additional associated risks from investing in derivatives also exist and potentially could have significant effects on the valuation of the derivative and the Fund. Associated risks are not the risks that the Fund is attempting to increase or decrease exposure to, per its investment objectives, but are the additional risks from investing in derivatives. Examples of these associated risks are liquidity risk, which is the risk that the Fund will not be able to sell the derivative in the open market in a timely manner, and counterparty credit risk, which is the risk that the counterparty will not fulfill its obligation to the Fund. Associated risks can be different for each type of derivative and are discussed by each derivative type in the following notes.

Table of Contents

NOTES TO FINANCIAL STATEMENTS AS OF AUGUST 31, 2012 (UNAUDITED) (CONTINUED)

NOTE 2 SIGNIFICANT ACCOUNTING POLICIES (continued)

Counterparty Credit Risk and Credit Related Contingent Features. Certain derivative positions are subject to counterparty credit risk, which is the risk that the counterparty will not fulfill its obligation to the Fund. The Fund's derivative counterparties are financial institutions who are subject to market conditions that may weaken their financial position. The Fund intends to enter into financial transactions with counterparties that it believes to be creditworthy at the time of the transaction. To reduce this risk, the Fund generally enters into master netting arrangements, established within the Fund's International Swap and Derivatives Association, Inc. (ISDA) Master Agreements (Master Agreements). These agreements are with select counterparties and they govern transactions, including certain over-the-counter (OTC) derivative and forward foreign currency contracts, entered into by the Fund and the counterparty. The Master Agreements maintain provisions for general obligations, representations, agreements, collateral, and events of default or termination. The occurrence of a specified event of termination may give a counterparty the right to terminate all of its contracts and affect settlement of all outstanding transactions under the applicable Master Agreement.

The Fund may also enter into collateral agreements with certain counterparties to further mitigate credit risk associated with OTC derivative and forward foreign currency contracts. Subject to established minimum levels, collateral is generally determined based on the net aggregate unrealized gain or loss on contracts with a certain counterparty. Collateral pledged to the Fund is held in a segregated account by a third-party agent and can be in the form of cash or debt securities issued by the U.S. government or related agencies.

The Fund's maximum risk of loss from counterparty credit risk on OTC derivatives is generally the aggregate unrealized gain in excess of any collateral pledged by the counterparty to the Fund. For purchased OTC options, the Fund bears the risk of loss in the amount of the premiums paid and the change in market value of the options should the counterparty not perform under the contracts. As of August 31, 2012, the total fair value of purchased OTC options subject to counterparty credit risk was \$576,065. The counterparty did not post any collateral to the Fund at period end. There were no credit events during the six months ended August 31, 2012 that triggered any credit related contingent features.

The Fund's master agreements with derivative counterparties have credit related contingent features that if triggered would allow its derivatives counterparties to close out and demand payment or additional collateral to cover their exposure from the Fund. Credit related contingent features are established between the Fund and its derivatives counterparties to reduce the risk that the Fund will not fulfill its payment obligations to its counterparties. These triggering features include, but are not limited to, a percentage decrease in the Fund's net assets and or a percentage decrease in the Fund's NAV, which could cause the Fund to accelerate payment of any net liability owed to the counterparty. The contingent features are established within the Fund's Master Agreements.

Written options by the Fund do not give rise to counterparty credit risk, as written options obligate the Fund to perform and not the counterparty. As of August 31, 2012, the total value of written OTC call options subject to Master Agreements in a liability position was \$1,832,764. If a contingent feature had been triggered, the Fund could have been required to pay this amount in cash to its counterparties. The Fund did not hold or post collateral for its open written OTC call options at period end. There were no credit events during the period ended August 31, 2012 that triggered any credit related contingent features.

H. Options Contracts. The Fund may purchase put and call options and may write (sell) put options and covered call options. The premium received by the Fund upon the writing of a put or call option is included in the Statement of Assets and Liabilities as a liability which is subsequently marked-to-market until it is exercised or closed, or it expires. The Fund will realize a gain or loss upon the expiration or closing of the option contract. When an option is exercised, the proceeds on sales of the underlying security for a written call option or purchased put option or the purchase cost of the security for a written put option or a purchased call option is adjusted by the amount of premium received or paid. The risk in writing a call option is that the Fund gives up the opportunity for profit if the market price of the security increases and the option is exercised. The risk in buying an option is that the Fund pays a premium whether or not the option is exercised. Risks may also arise from an illiquid secondary market or from the inability of counterparties to meet the terms of the contract.

Edgar Filing: ING Risk Managed Natural Resources Fund - Form N-CSRS

Under normal market conditions, the Fund seeks to manage risk by employing an integrated options collar strategy. The Fund's collar strategy includes: employing

Table of Contents

NOTES TO FINANCIAL STATEMENTS AS OF AUGUST 31, 2012 (UNAUDITED) (CONTINUED)

NOTE 2 SIGNIFICANT ACCOUNTING POLICIES (continued)

put spreads by purchasing and selling put options and writing call options on energy and materials indices (Resource Indices) and/or ETFs, correlated with the Fund's portfolio, or securities held in the Fund's portfolio. The Fund typically creates a put spread position by purchasing put options approximately 5% out-of-the-money usually on a three-month basis and for an amount approximating 100% of the value of the Fund's underlying assets while simultaneously, selling put options approximately 10-20% out-of-the-money and the same maturity and amount. The Fund retains the flexibility to create put spreads for an amount approximating 0-100% of the value of the Fund's underlying assets. The Fund usually also writes call options at-the-money or near to-the-money, usually on a one-month basis and for an amount equal to 40-100% of the value of the Fund's underlying assets.

During the period ended August 31, 2012, the Fund utilized the collar strategy. Please refer to Note 6 for the volume of both purchased and written option activity for the period ended August 31, 2012.

I. Forward Foreign Currency Contracts. The Fund may enter into forward foreign currency contracts primarily to hedge against foreign currency exchange rate risks on its non-U.S. dollar denominated investment securities. When entering into a forward foreign currency contract, the Fund agrees to receive or deliver a fixed quantity of foreign currency for an agreed-upon price on an agreed future date. These contracts are valued daily and the Fund's net equity therein, representing unrealized gain or loss on the contracts as measured by the difference between the forward foreign exchange rates at the dates of entry into the contracts and the forward rates at the reporting date, is included in the statement of assets and liabilities. Realized and unrealized gains and losses on forward foreign currency contracts are included on the Statement of Operations. These instruments involve market and/or credit risk in excess of the amount recognized in the statement of assets and liabilities. Risks arise from the possible inability of counterparties to meet the terms of their contracts and from movement in currency and securities values and interest rates.

The Fund had no open forward foreign currency contracts as of the period ended August 31, 2012.

J. Indemnifications. In the normal course of business, the Fund may enter into contracts that provide certain indemnifications. The Fund's maximum exposure under these arrangements is dependent on future claims that may be made against the Fund and, therefore, cannot be estimated; however, based on experience, management considers the risk of loss from such claims remote.

NOTE 3 INVESTMENT MANAGEMENT AND ADMINISTRATIVE FEES

ING Investments, LLC (ING Investments or the Investment Adviser), an Arizona limited liability company, is the Investment Adviser of the Fund. The Fund pays the Investment Adviser for its services under the investment management agreement (Management Agreement), a fee, payable monthly, based on an annual rate of 1.00% of the Fund's average daily managed assets. For purposes of the Management Agreement, managed assets are defined as the Fund's average daily gross asset value, minus the sum of the Fund's accrued and unpaid dividends on any outstanding preferred shares and accrued liabilities (other than liabilities for the principal amount of any borrowings incurred, commercial paper or notes issued by the Fund and the liquidation preference of any outstanding preferred shares). As of August 31, 2012, there were no preferred shares outstanding.

The Investment Adviser entered into a sub-advisory agreement (Sub-Advisory Agreement) with ING Investment Management Co. LLC (ING IM), a Delaware limited liability company. Subject to policies as the Board or the Investment Adviser might determine, ING IM manages the Fund's assets in accordance with the Fund's investment objectives, policies and limitations.

Edgar Filing: ING Risk Managed Natural Resources Fund - Form N-CSRS

ING Funds Services, LLC (the Administrator), a Delaware limited liability company, serves as Administrator to the Fund. The Fund pays the Administrator for its services a fee based on an annual rate of 0.10% of the Fund's average daily managed assets. The Investment Adviser, ING IM, and the Administrator are indirect, wholly-owned subsidiaries of ING Groep N.V. (ING Groep). ING Groep is a global financial institution of Dutch origin offering banking, investments, life insurance and retirement services.

ING Groep has adopted a formal restructuring plan that was approved by the European Commission in November 2009 under which the ING life insurance businesses, including the retirement services and

Table of Contents

NOTES TO FINANCIAL STATEMENTS AS OF AUGUST 31, 2012 (UNAUDITED) (CONTINUED)

NOTE 3 INVESTMENT MANAGEMENT AND ADMINISTRATIVE FEES (continued)

investment management businesses, which include the Adviser and its immediate affiliates, would be separated from ING Groep by the end of 2013. To achieve this goal, in a series of announcements beginning November 2010, ING Groep announced that it plans to pursue transactions to restructure certain businesses, including an initial public offering for its U.S. based insurance, retirement services, and investment management operations; and other transactions, which could include an initial public offering or other type of transaction, for its European based insurance and investment management operations and Asian based insurance and investment management operations. There can be no assurance that all or part of the restructuring plan will be carried out.

The restructuring plan and the uncertainty about its implementation, whether implemented through the planned public offerings or through other means, in whole or in part, may be disruptive to the businesses of ING entities, including the ING entities that service the Fund, and may cause, among other things, interruption or reduction of business and services, diversion of management's attention from day-to-day operations, and loss of key employees or customers. A failure to complete the offerings or other means of implementation on favorable terms could have a material adverse impact on the operations of the businesses subject to the restructuring plan. The restructuring plan may result in the Investment Adviser's loss of access to services and resources of ING Groep, which could adversely affect its businesses and profitability. In addition, the divestment of ING businesses, including the Investment Adviser, may potentially be deemed a change of control of each entity. A change of control would result in the termination of the Fund's advisory and sub-advisory agreements, which would trigger the necessity for new agreements that would require approval of the board, and may trigger the need for shareholder approval. Currently, the Investment Adviser does not anticipate that the restructuring will have a material adverse impact on the Fund or its operations and administration.

NOTE 4 OTHER TRANSACTIONS WITH AFFILIATED AND RELATED PARTIES

The Fund has adopted a Deferred Compensation Plan (the Plan), which allows eligible non-affiliated trustees as described in the Plan to defer the receipt of

all or a portion of the trustees fees payable. Amounts deferred are treated as though invested in various notional funds advised by ING Investments until distribution in accordance with the Plan.

NOTE 5 PURCHASES AND SALES OF INVESTMENT SECURITIES

The cost of purchases and proceeds from sales of investments for the period ended August 31, 2012, excluding short-term securities, were \$47,025,220 and \$53,780,167, respectively.

NOTE 6 PURCHASED AND WRITTEN OPTIONS

Transactions in both purchased and written options for the period ended August 31, 2012 were as follows:

Transactions in purchased OTC put options on indices were as follows:

	Number of Contracts	Cost
Balance at 02/29/12	4,999,118	\$ 11,393,432

Edgar Filing: ING Risk Managed Natural Resources Fund - Form N-CSRS

Options Purchased	9,622,979	16,451,705
Options Expired	(6,144,431)	(11,409,273)
Options Exercised		
Options Terminated in Closing Sell Transactions	(3,692,481)	(5,964,808)
Balance at 08/31/12	4,785,185	\$ 10,471,056

Transactions in written OTC call options on indices were as follows:

	Number of Contracts	Premiums Received
Balance at 02/29/12	3,348,036	\$ 4,020,480
Options Written	17,512,517	21,896,505
Options Expired	(7,754,343)	(9,107,947)
Options Exercised		
Options Terminated in Closing Purchase Transactions	(5,621,410)	(8,249,672)
Balance at 08/31/12	7,484,800	\$ 8,559,366

NOTE 7 CONCENTRATION OF INVESTMENT RISKS

All mutual funds involve risk some more than others and there is always the chance that you could lose money or not earn as much as you hope. The Fund's risk profile is largely a factor of the principal securities in which it invests and investment techniques that it uses. For more information regarding the types of securities and investment techniques that may be used by the Fund and its corresponding risks, see the Fund's most recent Prospectus and/or the Statement of Additional Information.

Table of Contents

NOTES TO FINANCIAL STATEMENTS AS OF AUGUST 31, 2012 (UNAUDITED) (CONTINUED)

NOTE 7 CONCENTRATION OF INVESTMENT RISKS (continued)

Foreign Securities and Emerging Markets. The Fund makes significant investments in foreign securities and may invest up to 20% of its managed assets, measured at the time of investment, in securities issued by companies located in countries with emerging markets. Investments in foreign securities may entail risks not present in domestic investments. Since investments in securities are denominated in foreign currencies, changes in the relationship of these foreign currencies to the U.S. dollar can significantly affect the value of the investments and earnings of the Fund. Foreign investments may also subject the Fund to foreign government exchange restrictions, expropriation, taxation or other political, social or economic developments, as well as from movements in currency, security value and interest rates, all of which could affect the market and/or credit risk of the investments. The risks of investing in foreign securities can be intensified in the case of investments in issuers located in countries with emerging markets.

Leverage. Although the Fund has no current intention to do so, the Fund is authorized to utilize leverage through the issuance of preferred shares and/or borrowings, including the issuance of debt securities. The Fund also may enter into a working capital facility to facilitate its collar strategy. In the event that the Fund determines in the future to utilize investment leverage, there can be no assurance that such a leveraging strategy will be successful during any period in which it is employed.

Non-Diversified and Natural Resources Companies. The Fund may be subject to large price volatility due to non-diversification and concentration in Natural Resources Companies. Securities of such companies may be subject to broad price fluctuations, reflecting volatility of energy and basic materials prices and possible instability of supply of various natural resources. Because many Natural Resources Companies have significant operations in many countries worldwide, the Fund's portfolio will be more exposed than a more diversified portfolio to unstable political, social and economic conditions, including expropriation and disruption of licenses or operations. This means that the Fund's portfolio of Natural Resources

Companies may be more exposed to price volatility, liquidity and other risks that accompany an investment in equities of foreign companies than portfolios of international equities generally.

NOTE 8 CAPITAL SHARES

Transactions in capital shares and dollars were as follows:

Year or period ended	Reinvestment of distributions #	Net increase in shares outstanding #	Reinvestment of distributions (\$)	Net increase (\$)
8/31/2012				
2/29/2012	76,577	76,577	1,126,032	1,126,032

NOTE 9 FEDERAL INCOME TAXES

The amount of distributions from net investment income and net realized capital gains are determined in accordance with federal income tax regulations, which may differ from U.S. generally accepted accounting principles for investment companies. These book/tax differences may be either temporary or permanent. Permanent differences are reclassified within the capital accounts based on their federal tax-basis treatment; temporary differences are not reclassified. Key differences include the treatment of short-term capital gains, foreign currency transactions,

Edgar Filing: ING Risk Managed Natural Resources Fund - Form N-CSRS

income from passive foreign investment companies (PFICs) and wash sale deferrals. Distributions in excess of net investment income and/or net realized capital gains for tax purposes are reported as return of capital.

Dividends paid by the Fund from net investment income and distributions of net realized short-term capital gains are, for federal income tax purposes, taxable as ordinary income to shareholders.

The tax composition of dividends and distributions in the current period will not be determined until after the Fund's tax year-end of December 31, 2012. The tax composition of dividends and distributions as of the Fund's most recent tax year-end was as follows:

Tax Year Ended December 31, 2011	
Ordinary Income	Return of Capital
\$ 23,028,322	\$ 9,235,445

Table of Contents

NOTES TO FINANCIAL STATEMENTS AS OF AUGUST 31, 2012 (UNAUDITED) (CONTINUED)

NOTE 9 FEDERAL INCOME TAXES (continued)

The tax-basis components of distributable earnings and the capital loss carryforwards which may be used to offset future realized capital gains for federal income tax purposes as of December 31, 2011 are detailed in the table below. Capital loss carryforwards with no expiration, if any, must be utilized prior to those with expiration dates.

Unrealized Appreciation/ (Depreciation)	Short-Term Capital Loss Carryforwards	Expiration
\$ 20,922,883	\$ (46,776,520)	2017
	(5,692,716)	2018
	\$ (52,469,236)	

The Fund's major tax jurisdictions are U.S. federal and Arizona. The earliest tax year that remains subject to examination by these jurisdictions is 2007.

As of August 31, 2012, no provision for income tax is required in the Fund's financial statements as a result of tax positions taken on federal and state income tax returns for open tax years. The Fund's federal and state income and federal excise tax returns for tax years for which the applicable statutes of limitations have not expired are subject to examination by the Internal Revenue Service and state department of revenue.

NOTE 10 SUBSEQUENT EVENTS

Dividends: Subsequent to August 31, 2012, the Fund made a distribution of:

Per Share Declaration		Payable	Record
Amount	Date	Date	Date
\$ 0.280	9/17/2012	10/15/2012	10/3/2012

Each quarter, the Fund will provide disclosures with distribution payments made that estimate the percentages of that distribution that represent net investment income, capital gains, and return of capital, if any. A significant portion of the quarterly distribution payments made by the Fund may constitute a return of capital.

The Fund has evaluated events occurring after the Statement of Assets and Liabilities date (subsequent events) to determine whether any subsequent events necessitated adjustment to or disclosure in the financial statements. Other than the above, no such subsequent events were identified.

Total Liabilities	\$	(1,832,764)	\$	(1,832,764)

[^] See Note 2, Significant Accounting Policies in the Notes to Financial Statements for additional information.

⁺ Other Financial Instruments are derivatives not reflected in the Portfolio of Investments and may include open forward foreign currency contracts, equity forwards, futures, swaps, and written options. Forward foreign currency contracts, equity forwards and futures are valued at the unrealized gain (loss) on the instrument. Swaps and written options are valued at the fair value of the instrument.

[#] The earlier close of the foreign markets gives rise to the possibility that significant events, including broad market moves, may have occurred in the interim and may materially affect the value of those securities. To account for this, the Fund may frequently value many of its foreign equity securities using fair value prices based on third party vendor modeling tools to the extent available. Accordingly, a portion of the Fund's investments are categorized as Level 2 investments.

There were no transfers in or out of Levels 1, 2 or 3 of the fair value hierarchy during the six months ended August 31, 2012.

**ING RISK MANAGED NATURAL
RESOURCES FUND**

**SUMMARY
PORTFOLIO OF INVESTMENTS**

AS OF AUGUST 31, 2012 (UNAUDITED) (CONTINUED)

The effect of derivative instruments on the Fund's Statement of Operations for the six months ended August 31, 2012 was as follows:

Derivatives not accounted for as hedging instruments	Amount of Realized Gain or (Loss) on Derivatives Recognized in Income		
	Investments*	Written options	Total
Equity contracts	\$ (2,131,485)	\$ 2,589,498	\$ 458,013
Total	\$ (2,131,485)	\$ 2,589,498	\$ 458,013

Derivatives not accounted for as hedging instruments	Change in Unrealized Appreciation or (Depreciation) on Derivatives Recognized in Income		
	Investments*	Written options	Total
Equity contracts	\$ (2,384,439)	\$ 5,620,437	\$ 3,235,998
Total	\$ (2,384,439)	\$ 5,620,437	\$ 3,235,998

- * Amounts recognized for purchased options are included in net realized gain (loss) on investments and net change in unrealized appreciation or depreciation on investments.
- ** Amounts recognized for forward foreign currency contracts are included in net realized gain (loss) on foreign currency related transactions and net change in unrealized appreciation or depreciation on foreign currency related transactions.

Supplemental Option Information (Unaudited)

Supplemental Call Option Statistics as of August 31, 2012:	
% of Total Net Assets against which calls written	59.96%
Average Days to Expiration at time written	35 days
Average Call Moneyness* at time written	ATM
Premiums received for calls	\$ 2,977,991
Value of calls	\$ (1,665,160)
Supplemental Put Option Statistics as of August 31, 2012:	
% of the Portfolio with Put Spread Options	100%
Average Days to Expiration at time purchased/written	98 days
Average Index Put Moneyness* at time purchased/written	OTM
Premiums paid for purchased put options	\$ 10,471,056
Value of purchased put options	\$ 576,065
Premiums received for written put options	\$ 5,581,375
Value of written put options	\$ (167,604)

- * Moneyness is the term used to describe the relationship between the price of the underlying asset and the option's exercise or strike price. For example, a call (buy) option is considered in-the-money when the value of the underlying asset exceeds the strike price. Conversely, a put (sell) option is considered in-the-money when its strike price exceeds the value of the underlying asset. Options are characterized for the purpose of Moneyness as, in-the-money (ITM), out-of-the-money (OTM) or at-the-money (ATM), where the underlying asset value equals the strike price.

SHAREHOLDER MEETING INFORMATION (UNAUDITED)

An annual meeting of shareholders of the ING Risk Managed Natural Resources Fund was held July 5, 2012, at the offices of ING Funds, 7337 East Doubletree Ranch Road, Suite 100, Scottsdale, AZ 85258.

ING Risk Managed Natural Resources Fund, Class II Trustees

At this meeting, a proposal was submitted to elect three members of the Board of Trustees to represent the interests of the holders of Common Shares of the Fund, with all three individuals to serve as Class II Trustees, for a term of three-years, and until the election and qualification of their successors. The proposal passed with the following votes recorded.

	Proposal	Shares voted for	Shares voted against or withheld	Shares abstained	Total Shares Voted
Class II Trustees	Colleen D. Baldwin	20,491,450.206	664,310.096		21,155,760.302
	Robert W. Crispin	19,442,144.286	1,713,616.016		21,155,760.302
	Peter S. Drotch	20,477,473.911	678,286.391		21,155,760.302

Table of Contents

ADDITIONAL INFORMATION (UNAUDITED)

During the period, there were no material changes in the Fund's investment objective or policies that were not approved by the shareholders or the Fund's charter or by-laws or in the principal risk factors associated with investment in the Fund.

The Fund may lend portfolio securities in an amount equal to up to 33 ¹/₃% of its managed assets to broker dealers or other institutional borrowers, in exchange for cash collateral and fees. The fund may use the cash collateral in connection with the Fund's investment program as approved by the Adviser, including generating cash to cover collateral posting requirements. Although the Fund has no current intention to do so, it may use the cash collateral to generate additional income. The use of cash collateral in connection with the Fund's investment program may have a leveraging effect on the Fund, which would increase the volatility of the Fund and could reduce its returns and/or cause a loss.

The Fund intends to engage in lending portfolio securities only when such lending is secured by cash or other permissible collateral in an amount at least equal to the market value of the securities loaned. The Fund will maintain cash, cash equivalents or liquid securities holdings in an amount sufficient to cover its repayment obligation with respect to the collateral, marked to market on a daily basis.

Securities lending involves the risks of delay in recovery or even loss of rights in the securities loaned if the borrower of the securities fails financially. Loans will be made only to organizations whose credit quality or claims paying ability is considered by the Sub-Adviser to be at least investment grade. The financial condition of the borrower will be monitored by the Adviser on an ongoing basis. The Fund will not lend portfolio securities subject to a written American style covered call option contract. The Fund may lend portfolio securities subject to a written European style covered call option contract as long as the lending period is less than or equal to the term of the covered call option contract.

Dividend Reinvestment Plan

Unless the registered owner of Common Shares elects to receive cash by contacting Computershare Shareowner Services LLC (the Plan Agent), all dividends declared on Common Shares of the Fund will be automatically reinvested by the Plan Agent for shareholders in additional Common Shares of the Fund through the Fund's Dividend Reinvestment Plan (the Plan). Shareholders who elect not to participate in

the Plan will receive all dividends and other distributions in cash paid by check mailed directly to the shareholder of record (or, if the Common Shares are held in street or other nominee name, then to such nominee) by the Plan Agent. Participation in the Plan is completely voluntary and may be terminated or resumed at any time without penalty by notice if received and processed by the Plan Agent prior to the dividend record date; otherwise such termination or resumption will be effective with respect to any subsequently declared dividend or other distribution. Some brokers may automatically elect to receive cash on your behalf and may re-invest that cash in additional Common Shares of the Fund for you. If you wish for all dividends declared on your Common Shares of the Fund to be automatically reinvested pursuant to the Plan, please contact your broker.

The Plan Agent will open an account for each Common Shareholder under the Plan in the same name in which such Common Shareholder's Common Shares are registered. Whenever the Fund declares a dividend or other distribution (together, a Dividend) payable in cash, non-participants in the Plan will receive cash and participants in the Plan will receive the equivalent in Common Shares. The Common Shares will be acquired by the Plan Agent for the participants' accounts, depending upon the circumstances described below, either (i) through receipt of additional unissued but authorized Common Shares from the Fund (Newly Issued Common Shares) or (ii) by purchase of outstanding Common Shares on the open market (Open-Market Purchases) on the NYSE or elsewhere. Open-market purchases and sales are usually made through a broker affiliated with the Plan Agent.

If, on the payment date for any Dividend, the closing market price plus estimated brokerage commissions per Common Share is equal to or greater than the net asset value per Common Share, the Plan Agent will invest the Dividend amount in Newly Issued Common Shares on behalf of the participants. The number of Newly Issued Common Shares to be credited to each participant's account will be determined by dividing the dollar amount of the Dividend by the net asset value per Common Share on the payment date; provided that, if the net asset value is less than or equal to 95% of the closing market value on the payment date, the dollar amount of the Dividend will be divided by 95% of the closing market price per Common Share on the payment date. If, on the payment date for any Dividend, the net asset value per Common Share is greater than

the closing market value plus estimated brokerage commissions, the Plan Agent will invest the

Table of Contents

ADDITIONAL INFORMATION (UNAUDITED) (CONTINUED)

Dividend amount in Common Shares acquired on behalf of the participants in Open-Market Purchases. In the event of a market discount on the payment date for any Dividend, the Plan Agent will have until the last business day before the next date on which the Common Shares trade on an ex-dividend basis or 30 days after the payment date for such Dividend, whichever is sooner (the Last Purchase Date), to invest the Dividend amount in Common Shares acquired in Open-Market Purchases.

The Fund pays quarterly Dividends. Therefore, the period during which Open-Market Purchases can be made will exist only from the payment date of each Dividend through the date before the next ex-dividend date, which typically will be approximately ten days.

If, before the Plan Agent has completed its Open-Market Purchases, the market price per common share exceeds the net asset value per Common Share, the average per Common Share purchase price paid by the Plan Administrator may exceed the net asset value of the Common Shares, resulting in the acquisition of fewer Common Shares than if the Dividend had been paid in Newly Issued Common Shares on the Dividend payment date. Because of the foregoing difficulty with respect to Open-Market Purchases, the Plan provides that if the Plan Agent is unable to invest the full Dividend amount in Open-Market Purchases during the purchase period or if the market discount shifts to a market premium during the purchase period, the Plan Agent will cease making Open-Market Purchases and will invest the un-invested portion of the Dividend amount in Newly Issued Common Shares at the net asset value per common share at the close of business on the Last Purchase Date provided that, if the net asset value is less than or equal to 95% of the then current market price per Common Share, the dollar amount of the Dividend will be divided by 95% of the market price on the payment date.

The Plan Agent maintains all shareholders' accounts in the Plan and furnishes written confirmation of all transactions in the accounts, including information needed by shareholders for tax records. Common Shares in the account of each Plan participant will be held by the Plan Agent on behalf of the Plan participant, and each shareholder proxy will include those shares purchased or received pursuant to the Plan. The Plan Agent will forward all proxy solicitation materials to participants and vote proxies for shares held under the Plan in accordance with the instructions of the participants.

In the case of shareholders such as banks, brokers or nominees which hold shares for others who are the beneficial owners, the Plan Agent will administer the Plan on the basis of the number of Common Shares certified from time to time by the record shareholder's name and held for the account of beneficial owners who participate in the Plan.

There will be no brokerage charges with respect to Common Shares issued directly by the Fund. However, each participant will pay a pro rata share of brokerage commissions incurred in connection with Open-Market Purchases. The automatic reinvestment of Dividends will not relieve participants of any federal, state or local income tax that may be payable (or required to be withheld) on such Dividends. Participants that request a partial or full sale of shares through the Plan Agent are subject to a \$15.00 sales fee and a \$0.10 per share brokerage commission on purchases or sales, and may be subject to certain other service charges.

The Fund reserves the right to amend or terminate the Plan. There is no direct service charge to participants with regard to purchases in the Plan; however, the Fund reserves the right to amend the Plan to include a service charge payable by the participants.

All questions concerning the Plan should be directed to the Fund's Shareholder Service Department at (800) 992-0180.

KEY FINANCIAL DATES CALENDAR 2012 DISTRIBUTIONS:

December 17, 2012

December 27, 2012

January 15, 2013

Record date will be two business days after each Ex-Dividend Date. These dates are subject to change.

Stock Data

The Fund's common shares are traded on the NYSE (Symbol: IRR).

Repurchase of Securities by Closed-End Companies

In accordance with Section 23(c) of the 1940 Act, and Rule 23c-1 under the 1940 Act the Fund may from time to time purchase shares of beneficial interest of the Fund in the open market, in privately negotiated transactions and/or purchase shares to correct erroneous transactions.

Table of Contents

ADDITIONAL INFORMATION (UNAUDITED) (CONTINUED)

Number of Shareholders

The approximate number of record holders of Common Stock as of August 31, 2012 was 17,830, which does not include beneficial owners of shares held in the name of brokers or other nominees.

Certifications

In accordance with Section 303A.12 (a) of the New York Stock Exchange Listed Company Manual, the Fund's CEO submitted the Annual CEO Certification on

August 2, 2012 certifying that he was not aware, as of that date, of any violation by the Fund of the NYSE's Corporate governance listing standards. In addition, as required by Section 302 of the Sarbanes-Oxley Act of 2002 and related SEC rules, the Fund's principal executive and financial officers have made quarterly certifications, included in filings with the SEC on Forms N-CSR and N-Q, relating to, among other things, the Fund's disclosure controls and procedures and internal controls over financial reporting.

Liabilities Table				
Other Financial Instruments+				
Written Options	\$	\$ (1,832,764)	\$	\$ (1,832,764)
Total Liabilities	\$	\$ (1,832,764)	\$	\$ (1,832,764)

[^] See Note 2, "Significant Accounting Policies" in the Notes to Financial Statements for additional information.

⁺ Other Financial Instruments are derivatives not reflected in the Portfolio of Investments and may include open forward foreign currency contracts, equity forwards, futures, swaps, and written options. Forward foreign currency contracts, equity forwards and futures are valued at the unrealized gain (loss) on the instrument. Swaps and written options are valued at the fair value of the instrument.

[#] The earlier close of the foreign markets gives rise to the possibility that significant events, including broad market moves, may have occurred in the interim and may materially affect the value of those securities. To account for this, the Fund may frequently value many of its foreign equity securities using fair value prices based on third party vendor modeling tools to the extent available. Accordingly, a portion of the Fund's investments are categorized as Level 2 investments.

There were no transfers in or out of Levels 1, 2 or 3 of the fair value hierarchy during the six months ended August 31, 2012.

The Board has a Nominating Committee for the purpose of considering and presenting to the Board candidates it proposes for nomination to fill Independent Trustee vacancies on the Board. The Committee currently consists of all Independent Trustees of the Board. (6 individuals). The Nominating Committee operates pursuant to a Charter approved by the Board. The primary purpose of the Nominating Committee is to consider and present to the Board the candidates it proposes for nomination to fill vacancies on the Board. In evaluating candidates, the Nominating Committee may consider a variety of factors, but it has not at this time set any specific minimum qualifications that must be met. Specific qualifications of candidates for Board membership will be based on the needs of the Board at the time of nomination.

The Nominating Committee is willing to consider nominations received from shareholders and shall assess shareholder nominees in the same manner as it reviews its own nominees. A shareholder nominee for director should be submitted in writing to the Fund's Secretary. Any such shareholder nomination should include at a minimum the following information as to each individual proposed for nomination as trustee: such individual's written consent to be named in the proxy statement as a nominee (if nominated) and to serve as a trustee (if elected), and all information relating to such individual that is required to be disclosed in the solicitation of proxies for election of trustees, or is otherwise required, in each case under applicable federal securities laws, rules and regulations.

Table of Contents

The secretary shall submit all nominations received in a timely manner to the Nominating Committee. To be timely, any such submission must be delivered to the Fund's Secretary not earlier than the 90th day prior to such meeting and not later than the close of business on the later of the 60th day prior to such meeting or the 10th day following the day on which public announcement of the date of the meeting is first made, by either disclosure in a press release or in a document publicly filed by the Fund with the Securities and Exchange Commission.
